

FEDERAL REGISTER

Vol. 89

Monday,

No. 249

December 30, 2024

Pages 106231–106976

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.gpo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpoousthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

The Federal Register Printing Savings Act of 2017 (Pub. L. 115-120) placed restrictions on distribution of official printed copies of the daily **Federal Register** to members of Congress and Federal offices. Under this Act, the Director of the Government Publishing Office may not provide printed copies of the daily **Federal Register** unless a Member or other Federal office requests a specific issue or a subscription to the print edition. For more information on how to subscribe use the following website link: <https://www.gpo.gov/frsubs>.

Rules and Regulations

Federal Register

Vol. 89, No. 249

Monday, December 30, 2024

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 51

[Doc. No. AMS–SC–23–0009]

RIN 0581–AE32

Section 8e Import Inspection Fee Structure

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The Agricultural Marketing Service (AMS) of the Department of Agriculture (USDA) is revising the regulations governing the inspection and certification for fresh fruits, vegetables, and other products by amending certain fees charged for Section 8e import inspections from a per-carlot basis to a per-pound basis, reducing the fee for each additional subplot by 50 percent, and establishing a new fee calculation for lots less than a carlot. These revisions recover, as nearly as practicable, the costs of performing inspection services on imported commodities in accordance with the Agricultural Marketing Agreement Act of 1937.

DATES: Effective January 29, 2025.

FOR FURTHER INFORMATION CONTACT: The Standardization Branch, Specialty Crops Inspection Division, Specialty Crops Program, Agricultural Marketing Service, U.S. Department of Agriculture, National Training and Development Center; 100 Riverside Parkway, Suite 101, Fredericksburg, Virginia 22406; fax: (540) 361–1199, or via the internet at: <https://www.regulations.gov>.

SUPPLEMENTARY INFORMATION: This document amends regulations at 7 CFR part 51 issued under the Agricultural Marketing Act of 1946 (7 U.S.C. 1621–1627), as amended.

Executive Orders 12866, 13563, and 14094

The USDA is issuing this rule in conformance with Executive Orders 12866, 13563, and 14094. Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 14094 reaffirms, supplements, and updates Executive Order 12866 and further directs agencies to solicit and consider input from a wide range of affected and interested parties through a variety of means. This final rule falls within a category of regulatory actions that the Office of Management and Budget (OMB) has exempted from review under Executive Order 12866.

Executive Order 13175

This rule has been reviewed under Executive Order 13175, “Consultation and Coordination with Indian Tribal Governments,” which requires agencies to consider whether their rulemaking actions would have Tribal implications.

AMS has determined that this rule is unlikely to have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, “Civil Justice Reform.” This action is not intended to have retroactive effect. There are no administrative procedures that must be exhausted prior to any judicial challenge to the provisions of this rule.

Background

On June 20, 2024, a proposed rulemaking was published in the **Federal Register** (89 FR 51850) providing a 60-day comment period for interested parties to comment on proposed changes to Section 8e import inspection charges and revisions to the

fee structure of the Specialty Crop Inspection Division (Division). One comment in support of the proposal was received. Prior to developing proposed revisions to the Section 8e fee structure, AMS engaged in discussions with State partners including Association of Fruit and Vegetable Inspection and Standardization Agencies (AFVISA) members and the Texas Cooperative Inspection Program (TCIP), as well as industry stakeholders. The outcome of those discussions was a positive perception of the fee changes as proposed. AMS is adopting the proposed rulemaking with no changes. Through this final rule, AMS will charge for certain Section 8e import inspections on a per-pound basis and implement additional revisions to the fee structure of the Division.

Currently, fees for all terminal market inspections, including Section 8e import inspections, are charged on a carlot basis (7 CFR 51.37). The current single carlot fee structure charges per conveyance and does not account for sampling and inspection time required for today’s larger conveyances transporting larger volumes. Under this final rule, the fees for Section 8e import inspections for lots qualifying as a full carlot (or a whole lot) or for lots less than a full carlot will no longer be calculated on a per-carlot basis. Instead, those fees will be calculated on a per-pound rate basis. The per-pound fee structure will better ensure full recovery of inspection cost by AMS while mitigating the financial impact on applicants of additional subplot fees.

The per-pound rate will be calculated by dividing the current inspection fee for a full carlot by the average weight by pound of a full carlot (40,000 pounds) (for example: the current inspection fee for a full carlot (\$254) divided by 40,000 will result in a per-pound rate of \$0.00635). The Division will use 40,000 lbs. as the appropriate measurement for calculating the per-pound rate. AMS notes that 40,000 pounds is generally recognized as the standard weight of the measurement used in USDA–AMS inspection practices when identifying a full carlot.

Additionally, AMS will have two separate subplot (or additional lot of the same product) fees: one for Section 8e sublots and one for non-Section 8e sublots. For example, under this rule, the fee for a Section 8e subplot is reduced

by 50 percent, from the current \$116 per subplot fee (the FY 2025 rate) to \$58 per subplot. All non-8e inspection fees remain unchanged by this rule. The per-pound rate for a full carlot or for lots less than a full carlot, and the 8e subplot fee, are subject to the annual updated Specialty Crops Program’s inspections fee schedule.

Under this rule, for all Section 8e import inspections, AMS will apply the current lot separation and sampling rates at 7 CFR 51.2(d)(1) through (3). To calculate inspection fees for a full carlot, AMS will multiply the current per-pound rate, using the calculation as noted above, by the total weight of the full carlot, plus any applicable subplot fees. To calculate the inspection fee for lots less than a carlot, AMS will multiply the current per-pound rate, using the per-pound rate calculation as noted above, by the total weight of the lot, with a minimum charge equivalent

to 2-hours computed at the current established hourly rate, whichever is greater, plus any subplot fee(s) as applicable. As shown in Table 1, applicants importing typical 40,000-pound loads comprising one lot will see no change in inspection fees under this new rule. Table 2 shows that larger size loads, which typically require increased sampling and inspection, will see a proportional increase in fees under this new rule. However, loads currently subject to additional subplot fees will see a significant decrease in fees per subplot under this new rule. The fee calculation changes under this final rule more accurately assess fees on inspected volume, better aligning the Division’s ability to ensure cost recovery while significantly reducing additional subplot fees charged to applicants. The following comparison of the Section 8e fee structure is based on FY 2025 fees. Any increase or decrease to Section 8e

fees will be included in the annual fee structure package in subsequent years.

Columns 1 and 2 of Table 1 compare the currently scheduled FY 2025 fee structure to the new fee structure for a standard 40,000-pound lot. As shown in row 1, column 1, the currently scheduled FY 2025 fee structure for one lot is \$254. Row 1, column 2 shows that under the new fee structure, the fee for one lot will remain at \$254 but will be expressed at the per pound rate of \$0.00635 (multiplied by 40,000 pounds).

Column 1 (rows 2 through 5) shows that without the new fee structure, the inspection fee for each additional 40,000-pound increases by \$116. Column 2 shows that with the new fee, the incremental cost per additional lot will be cut in half to \$58. Column 3 shows the cost savings for additional lots.

TABLE 1—SCI SEC. 8e INSPECTION FEES FOR STANDARD 40,000 POUND LOT: COMPARISON OF FY 2025 FEE TO NEW FEE STRUCTURE
[Showing reduced cost for additional lots]

Number of lots	FY 2025 fee	New fee ¹	Reduced cost to importer applicant
	(1)	(2)	(3)
1	\$254	\$254	\$0.
2	\$370	\$297	\$58.
3	\$486	\$355	\$116.
4	\$602	\$413	\$174.
5	\$718	\$471	\$232.
Each additional subplot	Plus \$116	Plus \$58	\$58 savings per additional subplot.

¹ The fee for one standard lot under this rule is \$254, unchanged from the FY 2025 fee, but will be expressed as the per-pound equivalent of \$0.00605. (\$254 inspection cost per 40,000-pound lot divided by 40,000 pounds equals \$0.00635 per pound). Each additional lot will cost an additional \$58, a 50% reduction from the FY 2025 incremental cost of \$116.

Table 2 shows the new fee structure for alternative lot sizes under this final rule. Row 2 shows again that the 40,000-pound lot fee will remain \$254. Row 3 shows that for a 50,000-pound lot, the \$317.50 inspection fee will be

determined by multiplying the proposed per-pound rate (\$0.00635) by 50,000 pounds. Row 1 shows that for any lot weighing less than 40,000 pounds, the applicable fee will be a 2-hour minimum charge at the currently

established FY 2025 hourly inspection rate of \$123 (\$123 multiplied by 2 equals \$246). Any increase or decrease to the hourly inspection rates will be included in the annual fee structure package in subsequent years.

TABLE 2—SCI 8e INSPECTION FEES FOR ALTERNATIVE LOT SIZES
[Proposed inspection rate per pound]

	Alternative lot sizes	Pounds per lot	Inspection fee per lot ^{1 2}
1	Less than full (standard) lot	(¹)	\$246.00 minimum.
2	Standard Lot	40,000	\$254.00.
3	Lot 25% larger than standard	50,000	\$317.50.

¹ For lots less than a standard lot, the fees are computed by multiplying pounds per lot by rate per pound (\$0.00635) with a minimum charge equivalent to 2-hours applied at the current established FY 2025 hourly inspection rate of \$123.

² Inspection fee per lot for standard lot or larger [(2) and (3)] are computed by multiplying pounds per lot by rate per pound (\$0.00635).

Final Regulatory Flexibility Analysis

Pursuant to the requirement set forth in the Regulatory Flexibility Act (RFA), AMS has considered the economic impact of this action on small entities. Accordingly, AMS provides this final regulatory flexibility analysis. The purpose of the RFA is to fit regulatory actions to the scale of businesses subject

to such actions in order that small businesses will not be unduly or disproportionately burdened.

The action described herein is being taken for several reasons, including that additional user fee revenues are needed to cover the costs of (1) providing current program operations and services; (2) improving the timeliness in

which inspection services are provided; and (3) improving the work environment. AMS regularly reviews its user-fee financed programs to determine if the fees are adequate.

This rule revises the regulations governing the inspection and certification for fresh fruits, vegetables, and other products by increasing certain

fees charged for Section 8e import inspections on a per-pound basis. These revisions recover, as nearly as practicable, the costs of performing inspection services on imported commodities in accordance with the Agricultural Marketing Agreement Act of 1937.

Since the inspection fees to be charged under this final rule's new rate structure are proportional to size of lots, smaller businesses (importers) are not unduly or disproportionately burdened.

This new fee structure, for imports subject to Section 8e grading requirements, balances cost increases (for lots larger than 40,000 pounds) with cost decreases for additional sublots. The fee for a standard 40,000-pound lot remains unchanged.

Tables 3 and 4 show the impact on the nine Section 8e commodities affected by this rule, using data from USDA's Compliance Enforcement Management System (CEMS) database, which lists the weight of each lot

inspected over the three-year period FY 2021 through FY 2023. Table 3 puts the number of inspections into two categories: column 1 shows the number of lots that weighed 40,000 pounds or less, and column 2 shows the number of lots that weighed more than 40,000 pounds. Column 3 presents the sum of columns 1 and 2. The last row of column 3 shows that the total number of inspections for the three-year period was 611,475.

TABLE 3—8e COMMODITIES IMPORTED: NUMBER OF INSPECTIONS, CATEGORIZED BY SIZE OF LOT INSPECTED, USING 40,000-POUND STANDARD LOT SIZE THRESHOLD
[FY2021–FY2023¹]

	≤40,000 lbs. per lot	>40,000 lbs. per lot	Total inspections	Pct of total inspections (percent)	Cumulative percent
	1	2	3	4	5

¹ Source: Compliance Enforcement Management System (CEMS) database, Market Development Division, Specialty Crops Program, Agricultural Marketing Service, USDA.

TABLE 4—8e COMMODITIES IMPORTED: PERCENT OF INSPECTIONS, CATEGORIZED BY SIZE OF LOT INSPECTED, USING 40,000-POUND STANDARD LOT SIZE THRESHOLD
[FY2021–FY2023]

	≤40,000 lbs. per lot (%)	>40,000 lbs. per lot (%)
Avocados	86	14
Onions	25	75
Grapes	87	13
Oranges	55	45
Kiwifruit	53	47
Tomatoes	99	1
Grapefruit	69	31
Filberts	69	31
Potatoes	67	33
9 commodities	77	23

Table 4 shows that for all nine commodities combined, 77 percent of the inspections would have had equal or lower fees if charged with the new fee structure. Twenty-three percent of the lots would have been subject to higher fees. Looking at individual years (not shown), the percentage of inspections representing lots weighing 40,000 pounds or less for FY 2021, FY 2022 and FY 2023 was 73, 75, and 80 percent, respectively. Therefore, for a large majority of annual inspections, the cost per individual inspection would have

been the same or lower than with the previous fee system in place.

The impacts of the revised fee structure vary significantly by commodity. Table 4 shows that for six of the nine commodities, at least two thirds of the lots inspected would have had equal or lower fees (*i.e.*, lots weighing 40,000 pounds or less—avocados, grapes, tomatoes, grapefruit, filberts, potatoes) under the revised fee structure. One commodity, onions, would have had the opposite result, with 25 percent of lots seeing lower

fees, and 75 percent higher. This variation would be offset by the onion industry's prevalence of additional sublots in inspections. See Table 1, "SCI Sec. 8e Inspection Fees for Standard 40,000 Pound Lot: Comparison of FY 2025 Fee to New Fee Structure, Showing Reduced Cost for Additional Lots." For oranges and kiwifruit, the results were about even; slightly more than 50 percent of the lots weighed equal to or less than 40,000 pounds and, therefore, would have been subject to lower fees.

This analysis assumes that each lot is sampled and inspected independently. This may overstate the extent of higher fees because under the new fee structure the cost declines for each additional subplot, as shown in Table 1. To the extent that the lots for which fees were charged in the CEMS database are actually sublots associated with an inspected lot from a particular importer, the value in Table 4, column (2) (*i.e.*, for lots more than 40,000 pounds) overstates the percentage of lots that would have been subject to a higher fee.

It is also important to note that certain commodities represented larger proportions of the lots inspected, as shown in columns (4) and (5) of Table 3. Just over 75 percent of the inspected lots were for avocados. Adding the next four commodities in terms of the magnitude of total inspections (onions, grapes, oranges, and kiwifruit) raises the cumulative percentage up to nearly 99 percent. Four commodities (tomatoes, grapefruit, filbert, and potatoes) represented about 1.3 percent of the total number of lots inspected.

This analysis shows that the fee impacts vary by commodity, with smaller fees per inspected lot expected for eight of the nine commodities, suggesting that for a large majority of annual inspections the cost per individual inspection would be the same or lower than with the fee system that would otherwise be in place in FY 2025 and future years.

Comments

AMS received one comment from the Texas International Produce Association (TIPA) in full support of implementing this rule, noting the changes not only help prevent increased food prices but also reflects a modernization of the fresh produce industry.

USDA has determined that this rule is consistent with and will effectuate the purpose of the Agricultural Marketing Act of 1946. Therefore, AMS is amending certain fees charged for Section 8e import inspections from a per-carlot basis to a per-pound basis, reducing the fee for each additional subplot by 50 percent, and establishing a new fee calculation for lots less than a carlot.

List of Subjects in 7 CFR Part 51

Agricultural commodities, Food grades and standards, Fruits, Nuts, Reporting and recordkeeping requirements, Vegetables.

For reasons set forth in the preamble, the Agricultural Marketing Service amends 7 CFR part 51 as follows:

PART 51—FRESH FRUITS, VEGETABLES, AND OTHER PRODUCTS (INSPECTION, CERTIFICATION, AND STANDARDS)

■ 1. The authority citation for part 51 continues to read as follows:

Authority: 7 U.S.C. 1621–1627.

■ 2. Revise § 51.37 to read as follows:

§ 51.37 Charges for fees, rates, and expenses.

For each carlot of product inspected, a fee or rate determined in accordance with §§ 51.38, 51.39, and 51.40, and expenses determined in accordance with § 51.41, shall be paid by the applicant.

§§ 51.39 through 51.62 [Redesignated as §§ 51.40 through 51.63]

■ 3. Redesignate §§ 51.39 through 51.62 as §§ 51.40 through 51.63 as follows:

Old section	New section
Schedule of Fees and Charges at Destination Markets (undesignated center heading)	
§ 51.37 (unchanged)	§ 51.37 (unchanged).
§ 51.38 (unchanged)	§ 51.38 (unchanged).
§ 51.39	§ 51.40.
§ 51.40	§ 51.41.
§ 51.41	§ 51.42.
§ 51.42	§ 51.43.
§ 51.43	§ 51.44.
§ 51.44	§ 51.45.

Schedule of Fees and Charges at Shipping Point Areas (undesignated center heading)

§ 51.45	§ 51.46.

Miscellaneous (undesignated center heading)

§ 51.46	§ 51.47.
§ 51.47	§ 51.48.
§ 51.48	§ 51.49.
§ 51.49	§ 51.50.
§ 51.50	§ 51.51.
§ 51.51	§ 51.52.
§ 51.52	§ 51.53.

Requirements for Plants Operating Under Continuous Inspection on a Contract Basis (undesignated center heading)

§ 51.53	§ 51.54.
§ 51.54	§ 51.55.
§ 51.55	§ 51.56.
§ 51.56	§ 51.57.
§ 51.57	§ 51.58.
§ 51.58	§ 51.59.
§ 51.59	§ 51.60.
§ 51.60	§ 51.61.
§ 51.61	§ 51.62.
§ 51.62	§ 51.63.

■ 4. Add new § 51.39 to read as follows:

§ 51.39 Charges for fees and rates for 8e import inspection.

(a) *8e import inspection fees charged on a per-pound basis.*—(1) *Establishing the per-pound inspection rate.* To compute the per-pound inspection rate, divide the current per-lot inspection fee for a full carlot (whole lot) by 40,000 (the generally accepted weight by pound of a full carlot).

(2) *Applying the per-pound rate.* The per-pound inspection rate shall be applied to the following lot sizes as follows:

(i) For a full carlot, multiply the per-pound rate by the total weight of the full carlot plus any applicable fees for additional lots of the same product as described in paragraph (b) of this section.

(ii) For lots less than a full carlot, multiply the per-pound rate by the total weight of the lot with a minimum fee equivalent to a 2-hour charge computed at the current established hourly rate, whichever is greater, plus any applicable fees for additional lots of the same product as described in paragraph (b) of this section.

(b) *8e import inspection fees charged on additional lots of the same product.* To compute the inspection fee for additional lots of the same product, multiply each additional lot by one-half of the current non-8e additional lot of the same product inspection fee.

Erin Morris,

Associate Administrator, Agricultural Marketing Service.

BILLING CODE P

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 2, 20, 26, 50, 51, 55, 73, 140, 170, and 171

[NRC–2011–0087]

RIN 3150–AI96

Non-Power Production or Utilization Facility License Renewal

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule and guidance; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is amending its regulations that govern the license renewal process for certain production or utilization facilities. In this final rule, the NRC collectively refers to these facilities as non-power production or utilization facilities (NPUFs). This final

rule revises the definitions of “non-power reactor,” “research reactor,” and “testing facility.” This final rule also eliminates license terms for licenses for facilities used for medical therapy or research and development, other than testing facilities; these licenses are issued under the authority of Sections 104a or 104c of the Atomic Energy Act of 1954, as amended (AEA). This final rule defines the license renewal process for licenses issued to testing facilities under the authority of Section 104c of the AEA or commercial or industrial NPUFs (including testing facilities) under the authority of Section 103 of the AEA. This final rule requires all NPUF licensees to submit to the NRC final safety analysis report (FSAR) updates at intervals not to exceed 5 years. In addition, this final rule provides an accident dose criterion of 1 Roentgen equivalent man (rem) (0.01 sievert [Sv]) total effective dose equivalent (TEDE) for NPUFs other than testing facilities. The NRC is also issuing final implementation guidance for this final rule.

DATES: This final rule is effective on January 29, 2025.

ADDRESSES: Please refer to Docket ID NRC–2011–0087 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- **Federal Rulemaking website:** Go to <https://www.regulations.gov> and search for Docket ID NRC–2011–0087. Address questions about NRC dockets to Helen Chang; telephone: 301–415–3228; email: Helen.Chang@nrc.gov. For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- **NRC’s Agencywide Documents Access and Management System (ADAMS):** You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to pdr.resource@nrc.gov. For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the “Availability of Documents” section.

- **NRC’s PDR:** The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please

send an email to PDR.Resource@nrc.gov or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Robert Beall, Office of Nuclear Material Safety and Safeguards, telephone: 301–415–3874, email: Robert.Beall@nrc.gov and Duane Hardesty, Office of Nuclear Reactor Regulation, telephone: 301–415–3724, email: Duane.Hardesty@nrc.gov. Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

Executive Summary

A. Need for the Regulatory Action

In April 2008, the Commission issued staff requirements memorandum (SRM) M080317B, “Briefing on State of NRC Technical Programs,” which directed the staff to “examine the license renewal process for non-power reactors and identify and implement efficiencies to streamline this process while ensuring that adequate protection of public health and safety are maintained.” The need for improvement in the reliability and efficiency of the license renewal process was primarily driven by four issues: (1) historic NRC priorities and emergent issues; (2) limited licensee resources; (3) inconsistent existing license infrastructure; and (4) regulatory requirements and the broad scope of the renewal process.

B. Major Provisions

The major provisions of this final rule include changes that:

- Revise the definitions for *Non-power reactor*, *Testing facility*, and *Research reactor*;
- Eliminate license terms for medical therapy or research and development facilities, other than testing facilities, licensed under paragraphs (a) or (c) of § 50.21 of title 10 of the *Code of Federal Regulations* (10 CFR);
- Define the license renewal process for all commercial or industrial NPUFs (including testing facilities) licensed under § 50.22 and testing facilities licensed under § 50.21(c);
- Require all NPUF licensees to submit an updated FSAR and subsequent FSAR updates to the NRC at intervals not to exceed 5 years;
- Amend the current timely renewal provision under § 2.109, allowing NPUFs subject to license renewal to continue operating under an existing license past its expiration date if the licensee submits a license renewal application at least 2 years (rather than

30 days) before the current license expiration date;

- Provide an accident dose criterion of 1 rem (0.01 Sv) TEDE for NPUFs other than testing facilities;
 - Extend the applicability of § 50.59 to NPUF licensees regardless of their decommissioning status;
 - Clarify an NPUF applicant’s requirements for meeting the existing provisions of § 51.45 for submitting an environmental report; and
 - Eliminate the requirement for NPUF licensees to submit financial qualification information with license renewal applications under § 50.33(f)(2).
- Concurrent with this final rule, the NRC is issuing Regulatory Guide (RG) 2.7, Revision 0, “Preparation of Updated Final Safety Analysis Reports for Non-Power Production or Utilization Facilities.”

C. Costs and Benefits

The NRC prepared a regulatory analysis to determine the expected quantitative costs and benefits of this final rule and the final implementing guidance, as well as qualitative factors to be considered in the NRC’s rulemaking decision. Based on the analysis, the NRC concluded that this final rule will result in net savings to licensees and the NRC. The analysis examined the benefits and costs of the final rule requirements and the final implementing guidance compared to the baseline for the current license renewal process (*i.e.*, the no-action alternative). Compared to the no-action baseline, the NRC estimates that total net benefits to NPUFs (*i.e.*, cost savings minus costs) will be \$5.5 million (\$3.9 million using a 3-percent discount rate or \$2.6 million using a 7-percent discount rate) over a 20-year period. The average NPUF will receive net benefits ranging from approximately \$78,000 to \$166,000 over a 20-year period. The NRC will receive total net benefits of \$12 million (\$8.6 million using a 3-percent discount rate or \$5.9 million using a 7-percent discount rate) over a 20-year period.

The regulatory analysis also considered, in a qualitative fashion, additional benefits of this final rule and the final implementing guidance associated with regulatory efficiency, protection of public health and safety, promotion of the common defense and security, and protection of the environment.

The regulatory analysis concluded that this final rule and the final implementing guidance are justified because of the cost savings received by both licensees and the NRC while public health and safety are maintained. A detailed discussion of the

methodology and complete results is presented in the “Regulatory Analysis” section of this document.

I. Background

The NRC licenses NPUFs under the authority granted in Sections 103 and 104 of the AEA. Section 103 of the AEA applies to commercial and industrial facilities, and Sections 104a and 104c of the AEA apply to facilities used for medical therapy or research and development activities, respectively. The section of the AEA that provides licensing authority for the NRC corresponds directly to the class of license issued to a facility (*e.g.*, Section 104a of the AEA authorizes the issuance of a “class 104a” license). Furthermore, Sections 104a and 104c of the AEA require that the Commission impose the minimum amount of regulation needed to promote the common defense and security; protect the health and safety of the public; and permit, under Section 104a, the widest amount of effective medical therapy possible and, under Section 104c, the conduct of widespread and diverse research and development.

The NRC regulates 34 NPUFs, of which 29 are research reactors or testing facilities currently licensed to operate. The NRC has issued construction permits for two of the five remaining NPUFs (SHINE Medical Technologies, Inc. (SHINE) and the Hermes-Kairos Testing facility),¹ and the other three licensees are in the process of decommissioning their facilities (*i.e.*, removing a facility or site safely from service and reducing residual radioactivity to a level that permits release of the site for unrestricted use or use under restricted conditions). Most NPUFs are located at universities or

colleges throughout the United States. The NRC regulates one operating testing facility at the National Institute of Standards and Technology.

A. License Terms

The AEA dictates an initial license term of no more than 40 years for class 103 facilities, which the NRC licenses under § 50.22, but the AEA does not specify license terms for class 104a or 104c facilities, which are licensed under § 50.21(a) or (c). The regulation that implements this statutory authority, § 50.51(a), currently specifies that the NRC may grant an initial license for NPUFs for no longer than a 40-year license term. If the NRC initially issues a license for a shorter period, then it may renew the license by amendment for a maximum aggregate period not to exceed 40 years. An NPUF license is usually renewed for a term of 20 years. If the requested renewal would extend the license beyond 40 years from the date of issuance, the original license may not be renewed by amendment. Rather, the NRC must issue a renewed license that supersedes the initial license.

Any application for license renewal must include an FSAR describing: (1) changes to the facility or facility operations resulting from new or amended regulatory requirements, and (2) changes and effects of changes to the facility or procedures and new experiments. The FSAR must include the elements specified in § 50.34. The NRC has guidance for preparing the FSAR in NUREG-1537, Part 1, “Guidelines for Preparing and Reviewing Applications for the Licensing of Non-Power Reactors: Format and Content.” The NRC reviews NPUF initial and renewal license applications using NUREG-1537, Part 2, “Guidelines for Preparing and Reviewing Applications for the Licensing of Non-Power Reactors: Standard Review Plan and Acceptance Criteria.”

As a license term nears its end, a licensee must submit a license renewal application to continue operations. A “timely renewal” provision exists in § 2.109(a) to enable operations to continue beyond the license term during the NRC’s review of a license renewal application. If the licensee files an application for a renewal or for a new license for the authorized activity at least 30 days before the expiration of an existing license, the existing license will not be deemed to have expired until the application has been finally determined.

B. Need for Improvement in the License Renewal Process

In 2008, the NRC recognized a need to identify and implement efficiencies in the NPUF license renewal process while ensuring that adequate protection of public health and safety is maintained. Four issues primarily drove this effort to improve the reliability and efficiency of the process.

1. Historic NRC Priorities and Emergent Issues

Under the Atomic Energy Commission (AEC), the NRC’s predecessor agency, NPUFs were some of the first reactors licensed and the first reactors to undergo license renewal. Most of these reactors were initially licensed in the late 1950s and 1960s for terms that varied from 10 to 40 years. The AEC started renewing these licenses in the 1960s. License renewal was primarily an administrative activity until 1976, when the NRC decided to also conduct a technical review equivalent to the initial licensing of the facility. The licenses that had been issued with initial 20-year terms were due for renewal during this timeframe. As the NRC started developing methods for conducting these technical reviews, an accident occurred at Unit 2 of the Three Mile Island (TMI) nuclear power plant.

The NRC’s focus on post-TMI activities resulted in a suspension of NPUF license renewal activities for several years. After license renewal activities were reinitiated, the NRC issued numerous renewals in a short period of time, primarily by relying on generic evaluations. These 20-year renewals expired starting in the late 1990s. The original licenses issued with 40-year terms also started expiring in the late 1990s, creating a new surge of license renewal applications.

As a result of the NRC’s response to the events of September 11, 2001, the NRC deferred work on a number of NPUF license renewal applications. In addition, the NRC’s NPUF licensing activities focused on implementing § 50.64, “Limitations on the use of highly enriched uranium (HEU) in domestic non-power reactors,” to convert non-power reactors to the use of low-enriched uranium. Therefore, reviews of these license renewal applications extended for many years. In all cases, the timely renewal provision enabled these NPUFs to continue operating during the NRC’s review period.

2. Limited Licensee Resources

Many NPUF licensees have limited staff resources available for licensing

¹ On May 18, 2018, the NRC issued a construction permit for Northwest Medical Isotopes, LLC. That construction permit was terminated on July 11, 2022.

support. The number of NPUF staff can range from one part-time employee for some low-power facilities to four or five full-time employees for higher-power facilities. The NPUF staff that perform the licensing function typically do so in addition to their normal organizational responsibilities, which often results in delays in the license renewal process, particularly in responding to the NRC's requests for additional information.

3. Inconsistent Existing License Infrastructure

The NPUFs licensed under § 50.21(a) or (c) are primarily at college and university sites. Staff turnover and limited staffing resources at an NPUF often contribute to a lack of historical knowledge of the development of the licensee's FSAR and changes to the FSAR. During the most recent round of license renewals, the NRC found that some of the submitted FSARs did not adequately reflect the current licensing bases for the respective licensees. Because the only required FSAR submission comes at license renewal, which can be at 20-year or greater intervals, submitted FSARs often contain varying levels of completeness and accuracy. Consequently, the NRC has issued requests for additional information to obtain missing information, seek clarifications and corrections, and document the current licensing basis.

4. Regulatory Requirements and Broad Scope of the Renewal Process

For power reactors, license renewal reviews have a defined scope, primarily focused on aging management, as described in 10 CFR part 54. For NPUFs, there are no explicit requirements on the scope of issues to be addressed during license renewal. Therefore, the scope of review for license renewal was initially treated the same as that for an original license.

In response to Commission direction in SRM-SECY-91-061, "Separation of Non-Reactor and Non-Power Reactor Licensing Activities from Power Reactor Licensing Activities in 10 CFR part 50," the NRC developed licensing guidance for the first time since many NPUF applicants were originally licensed. In that guidance (NUREG-1537, Parts 1 and 2), the NRC provides detailed descriptions of the scope, content, and format of FSARs and the NRC's process for reviewing initial license applications and license renewal applications. However, the first license renewals using NUREG-1537 had varying levels of consistency and did not propose an acceptable alternative to the guidance. This resulted in the NRC sending

requests for additional information and some of the issues already described in Section I.B. of this document.

C. NRC Response to These Issues

As a result of these issues, a backlog of NPUF license renewal applications developed and persisted. The Commission and other stakeholders voiced concerns not only about the backlog, but also about the burdensome nature of the license renewal process itself. The Commission issued SRM-M080317B, "Briefing on State of NRC Technical Programs," in April 2008, directing the staff to "examine the license renewal process for non-power reactors to identify and implement efficiencies to streamline this process while ensuring that adequate protection of public health and safety are maintained."

In October 2008, the staff provided the Commission with plans to improve the review process for NPUF license renewal applications in SECY-08-0161, "Review of Research and Test Reactor License Renewal Applications." In SECY-08-0161, the staff summarized a public meeting held with stakeholders to gather feedback on the current process, ways the process could be improved, and options for improving the review process. The staff provided a detailed description of five options for streamlining the NPUF license renewal process:

- An "alternate safety review approach" that would limit the review of license renewal applications to changes to the facility since the previous license review occurred. Safe operation of the facility would be assured by the review of changes to the facility, compliance with the current regulations, the previous NRC analysis, and the NRC's inspection process.
- A "graded approach" that would base the areas of review on the relative risk associated with the facility applying for a renewed license. The graded approach would ensure safe operation by properly identifying the inherent risk associated with the facility and ensuring those risks are minimized.
- A "generic analysis approach" that would require the NRC to review and approve a generic reactor design similar to the NRC topical report process. The NRC would rely on the previously approved generic analysis and would not reanalyze those items.
- A "generic siting analysis approach" that would require the NRC to develop a generic communication that contains information related to each of the licensee sites. The licensees could then reference this generic

communication in their license renewal submittals.

- An "extended license term approach" would permit extended or indefinite terms for NPUF licenses. The staff described this approach in SECY-08-0161:

In order to permit an extended term (including possibly an indefinite term), the staff would have to explain why it is appropriate and, more importantly, demonstrate that there are no aging concerns.

Environmental conditions such as temperature, pressure and radiation levels in most [research and test reactors] are not significant. With surveillance, maintenance and repair, [research and test reactors] can have indefinite lives.

For a facility to be eligible for an extended license term, the staff would complete a detailed renewal with a licensing basis reviewed against NUREG-1537. To maintain the licensing basis over time, the staff would propose a license condition or regulation that requires licensees to revise their [safety analysis reports] on a periodic basis such as every 2 years. The inspection program would be enhanced to place additional focus on surveillance, maintenance and repair, and changes to the facility made under 10 CFR 50.59. The licensee would still be required to adhere to changes in the regulations.

The Commission issued SRM-SECY-08-0161, "Review of Research and Test Reactor License Renewal Applications," in March 2009. The Commission directed the staff to: (1) immediately implement short-term program initiatives to address the backlog of license renewal applications; (2) work with the regulated community and other stakeholders to develop an interim streamlining process to focus the review on the most safety-significant aspects of the license renewal application; and (3) streamline the review process to ensure that it becomes more efficient and consistent, thereby reducing uncertainties in the process while ensuring compliance with regulatory requirements.

As part of its direction to develop the program initiatives, the Commission instructed the staff to implement a graded approach commensurate with the risk posed by each facility, incorporate elements of the alternate safety review approach, and use risk insights from security assessments to inform the dose threshold. In addition, the Commission told the staff to develop an interim staff guidance (ISG) document that employs the graded approach to streamline the license renewal application process.

Lastly, the Commission instructed the staff to submit a long-term plan for an enhanced NPUF license renewal process. The Commission directed that the plan include development of a basis

for redefining the scope of the process as well as a recommendation regarding the need for rulemaking and guidance development.

The staff responded to the Commission's direction by implementing short-term actions to address the license renewal application backlog and developing ISG–2009–001, “Interim Staff Guidance on the Streamlined Review Process for License Renewal for Research Reactors,” hereafter referred to as the ISG. The ISG called for employing a graded approach to streamline the license renewal application process. Since October 2009, the NRC has reviewed license renewal applications according to the streamlined review process presented in the ISG. The ISG identified the three most safety-significant sections of an FSAR: reactor design and operation, accident analysis, and technical specifications. The NRC also has reviewed licensees' radiation protection and waste management programs and compliance with financial requirements. The ISG divided facilities into two groups: (1) those facilities with licensed power of less than 2 megawatts thermal (MW(t)), which would undergo a limited review focusing on the safety-significant aspects, considering the decisions and precedents set by past NRC reviews; and (2) those facilities with licensed power of 2 MW(t) and greater, which would undergo a full review using NUREG–1537, Part 2. The process outlined in the ISG facilitated the NRC's review of license renewal applications and enabled the NRC to review applications in a timelier manner.

In addition, the staff issued SECY–09–0095, “Long-Term Plan for Enhancing the Research and Test Reactor License Renewal Process and Status of the Development and Use of the Interim Staff Guidance,” in June 2009, to provide the Commission with a long-term plan for enhancing the NPUF license renewal process. In the long-term plan, the staff proposed to develop a regulatory basis to support rulemaking to streamline and enhance the NPUF license renewal process. The Commission issued SRM–M090811, “Briefing on Research and Test Reactor (RTR) Challenges,” in August 2009, which directed the staff to accelerate the rulemaking to establish a more efficient, effective, and focused regulatory framework.

D. 2012 Regulatory Basis

In August 2012, the staff completed the “Non-Power Reactor (NPR) License Renewal Rulemaking: Regulatory Basis

Document,” hereafter referred to as the regulatory basis.²

The NRC, in the regulatory basis, analyzed the NPUF license renewal process's technical, legal, and policy issues; effects on public health, safety, and security; effects on licensees; effects on the NRC; and stakeholder feedback. The NRC also considered lessons learned from implementation of the streamlined review process outlined in the ISG. The NRC concluded that a rulemaking was warranted. A public meeting was held on August 7, 2014, to discuss the regulatory basis and rulemaking options. The NRC held another public meeting on October 7, 2015, to afford stakeholders the opportunity to provide feedback and comment on preliminary proposed rule concepts. Participant comments and questions focused on the potential effects of eliminating license terms, the scope of review under the new process, and how the amended regulation would work compared to the existing license renewal process. The NRC considered the comments when developing the proposed rule.

E. 2017 Proposed Rule

On March 30, 2017, the NRC published the proposed rule, “Non-Power Production or Utilization Facility License Renewal” in the **Federal Register** (82 FR 15643). The NRC proposed to eliminate license terms for facilities used for medical therapy or research and development licensed under the authority of Sections 104a or 104c of the AEA, other than for testing facilities. Other proposed amendments addressed the license renewal process for licenses issued to testing facilities under the authority of Section 104c of the AEA and licenses issued to non-power commercial facilities under the authority of Section 103 of the AEA (including testing facilities). The proposed rule also included a provision to require all NPUF licensees to submit FSAR updates to the NRC every 5 years. The NRC also proposed an accident dose criterion of 1 rem (0.01 Sv) TEDE for NPUFs other than testing facilities. The NRC requested public feedback on specific questions, including the criteria, other than power level, to use

² At the time of publication of the regulatory basis, the rulemaking title was “Non-Power Reactor (NPR) License Renewal Rulemaking.” During the development of the proposed rule, the scope of the rulemaking expanded to include licenses for certain facilities that are not reactors, based upon recent license applicants (e.g., for medical radioisotope irradiation and processing facilities). In order to encompass all affected entities, the NRC has changed the title of the rulemaking to “Non-power Production or Utilization Facility License Renewal.”

when determining the applicability of requirements for low-risk commercial production or utilization facilities and low-risk testing facilities. The proposed rule provided a public comment period of 75 days. The NRC received 16 comment submissions on the proposed rule and draft implementation guidance, as discussed further in Section IV of this document. The NRC considered those comments in developing this final rule.

II. Discussion

This final rule: (1) revises the definitions for *Non-power reactor*, *Research reactor*, and *Testing facility*; (2) eliminates license terms for NPUFs licensed under § 50.21(a) or (c), other than testing facilities; (3) defines the license renewal process for NPUFs (including testing facilities) licensed under § 50.22 and testing facilities licensed under § 50.21(c); (4) requires all NPUF licensees to submit to the NRC an updated FSAR and subsequent FSAR updates at intervals not to exceed 5 years; (5) amends the current timely renewal provision under § 2.109, allowing an NPUF subject to license renewal to continue operating under an existing license past its expiration date if the licensee submits a license renewal application at least 2 years before the current license expiration date; (6) provides an accident dose criterion of 1 rem (0.01 Sv) TEDE for NPUFs other than testing facilities; (7) extends the applicability of § 50.59 to NPUFs regardless of their decommissioning status; (8) clarifies the requirements for NPUF license applicants to meet the existing provisions of § 51.45; and (9) eliminates the requirement to submit financial qualification information with license renewal applications under § 50.33(f)(2).

This final rule enhances the effectiveness and efficiency of the NPUF license renewal process, consistent with the AEA's criterion for imposing minimum regulation on facilities of these types that is needed to promote the common defense and security and protect the health and safety of the public. Each of the nine main objectives of this final rule are discussed in detail in this section.

1. Revises the definitions for *Non-power reactor*, *Research reactor*, and *Testing facility*.

This final rule addresses inconsistencies in definitions and terminology throughout 10 CFR chapter I to improve clarity in determining the applicability of the regulations associated with NPUFs as defined in § 50.2.

The NRC received public comments on the proposed definition of *Non-*

power production or utilization facility. In reviewing the comments, the NRC identified that the proposed definition for *Non-power production or utilization facility* was too broad for defining production facilities that are NPUFs. Previously, the definition excluded fuel reprocessing plants, but did not exclude production facilities designed or used primarily for the formation of plutonium or uranium-233 or designed or used for the separation of the isotopes of plutonium. Ultimately, the NRC did not revise the definition for *Non-power production or utilization facility* because an appropriate definition to exclude all production facilities as defined under paragraphs (1) and (2) of the definition of *Production facility* in § 50.2 was added by the rule on Emergency Preparedness for Small Modular Reactors and Other New Technologies (88 FR 80050; November 16, 2023). Production facilities of the type defined under paragraph (1) of the definition of *Production facility* in § 50.2 have been owned by the U.S. Department of Energy to produce plutonium or uranium-233 and have not been NRC licensees. If such a facility were to be licensed by the NRC, the facility's particular use of special nuclear material would require the Commission to determine the licensing path for the facility. Production facilities, as defined under paragraph (2) of the definition of *Production facility* in § 50.2, are not NPUFs because these facilities have a higher potential of radiological risk to the environment and the public than NPUFs (e.g., an inventory of high-level liquid radioactive wastes). This higher risk is evidenced by the applicability to these facilities of NRC regulations in appendix B to 10 CFR part 50, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants" and appendix F to 10 CFR part 50, "Policy Relating to the Siting of Fuel Reprocessing Plants and Related Waste Management Facilities." The definition of *Non-power production or utilization facility* in § 50.2 excludes production facilities designed or used primarily for the formation of plutonium or uranium-233 or the separation of the isotopes of plutonium.

The NRC also received a comment from the National Institute of Standards and Technology on the definition of *Testing facility* in § 50.2 and *Research reactor* in § 171.11(b)(2). The commenter recommended that the NRC revise the definitions of *Testing facility* and *Research reactor* to "remove the arbitrary 10 MW(t) threshold, and apply instead a risk-based approach to its

regulation of a testing facility." Further, the commenter stated that the risk "is best quantified by accident analyses performed under a licensing safety analysis" and linked the recommended definition to the NRC's accident dose criterion of 1 rem (0.01 Sv) in the proposed rule.

The technical basis associated with the 10 MW(t) threshold under the current definition for *Testing facility*, while generally based on safety significance, is not explicitly documented. Similarly, the technical basis for the 1 MW(t) threshold (coupled with specific design features) under the current definition for *Testing facility* is not explicitly documented. These prescriptive power thresholds do not account for the safety features that are engineered into the facility design and those barriers that must be breached during an accident before a release of radioactive material to the environment can occur. Therefore, these thresholds do not accurately represent the risk associated with a particular facility. For these reasons, the use of a postulated accident dose is a more risk-informed, performance-based approach, compared to using the power level of the reactor for distinguishing between types of NPUFs, such as research reactors and testing facilities. As a result of this public comment, the NRC revised the definitions of *Testing facility* and *Research reactor* to reflect this risk-informed approach by incorporating an accident dose criterion of 1 rem (0.01 Sv) TEDE, the basis for which is discussed in section II.6 of this document.

Additionally, the NRC is making conforming changes to the definitions of *Testing facility*, *Research reactor*, and *Non-power reactor* wherever these definitions appear throughout 10 CFR chapter I. The regulations currently refer to many types of facilities that are categorized as NPUFs, such as non-power reactors, research reactors, training reactors, testing reactors, testing facilities, and critical assemblies. The NRC reviewed each instance of these various terms in 10 CFR chapter I. Where appropriate in this final rule, the NRC added, corrected, or standardized the terminology and definitions.

While this final rule revises the definition of *Research reactor* in §§ 170.3 and 171.5 to conform to other definitions in 10 CFR chapter I, the NRC did not change the definition of *Research reactor* in the specific exemption for Federally owned and State-owned research reactors in § 170.11(a)(9) or § 171.11(b)(2). The current definition in § 171.11(b)(2) is based on the language of the Omnibus

Budget Reconciliation Act of 1990, as amended (Pub. L. 101–508) (OBRA–90), a statutory requirement imposed by Congress. Further, a substantively similar definition of *Research reactor* was included in the provisions of the Nuclear Energy Innovation and Modernization Act (Pub. L. 115–439) (NEIMA) that relate to the NRC's fee recovery structure. Changing the definition of *Research reactor* in § 171.11(b)(2) would therefore be inconsistent with OBRA–90 and NEIMA. The definition of *Research reactor* in § 170.11(a)(9) is not based on OBRA–90, but the basis for that exemption from fees parallels the basis for the exemption from annual fees in § 171.11(b)(2). Changing the definition of *Research reactor* in § 170.11(a)(9) would be a substantive change beyond the scope of this final rule.

Where appropriate, this final rule standardizes the terminology in other parts of the regulations to modify the intended scope of regulations citing *Research* and *test reactors* to be either *Non-power reactors* or *Non-power production or utilization facilities*. For example, this final rule changes *Research and test reactors* to *Non-power production or utilization facilities* in appendix E to 10 CFR part 50, "Emergency Planning and Preparedness for Production and Utilization Facilities," while in § 55.40, this final rule changes *Test and research reactors* to *Non-power reactors*. Also, where appropriate, the final rule changes the uses in other parts of the regulations for *Testing facility*, *Research reactor*, and *Non-power reactor* to reference only one definition in the part where that definition is used most, unless the specific meaning is needed and different for a given part. In addition, the final rule adds the definition of *Non-power reactor*, as it is defined in § 50.2, to the definitions section in 10 CFR part 73 because the term is used many times throughout that part. These changes increase clarity by defining all NPUF-related terms consistently where they are most used in the regulations.

This final rule also revises the definition of *Non-power reactor* to distinguish between non-power reactors used for research and development activities and non-power reactors used for commercial or industrial purposes. Before this final rule, all non-power reactors were defined in § 50.2 as "a research or test reactor licensed under §§ 50.21(c) or 50.22 of this part for research and development." This final rule defines non-power reactors more precisely as one of three mutually exclusive categories of facilities: (1) testing facilities, (2) research reactors

that are NPUFs licensed under § 50.21(c), or (3) commercial or industrial reactors that are NPUFs licensed under § 50.22. The second and third categories exclude testing facilities, and the facilities in those categories must meet the accident dose criterion in § 50.34(a)(1)(i). If they do not meet this criterion, then they will be considered testing facilities.

2. Eliminates license terms for NPUFs, other than testing facilities, licensed under § 50.21(a) or (c).

The final rule language in § 50.51(c) eliminates license terms for NPUFs, other than testing facilities, licensed under § 50.21(a) or (c). Before this final rule, § 50.51(a) stated, “Each license will be issued for a fixed period of time to be specified in the license but in no case to exceed 40 years from date of issuance.” This included all facility licenses issued under 10 CFR part 50, including licenses for facilities issued under § 50.21(a) or (c). However, the AEA does not establish specific license terms nor the need for license terms for class 104 facilities.

Historically, license renewal afforded both the NRC and the public the opportunity to re-evaluate the licensing basis of the NPUF. The purpose of license renewal was to assess the likelihood of continued safe operation of the facility, such that radioactive materials can be used for beneficial civilian purposes in a safe and secure manner. For several reasons that are unique to NPUFs, this objective can be achieved through existing oversight activities and review of FSAR updates submitted pursuant to the new requirements in § 50.71(e) of the final rule (see Section II.4. of this document). This approach is consistent with the NRC’s goal of efficient and effective licensing and will implement and reflect lessons learned from decades of processing license renewal applications. The NRC reached this conclusion based on three considerations: (1) low overall radiological risk, (2) limited aging-related issues, and (3) slow evolution of the design basis.

First, compared to power reactors, the NPUFs licensed under § 50.21(a) or (c), other than testing facilities, operate at low power levels, temperatures, and pressures, and have a small inventory of fission products in the fuel. Therefore, these NPUFs present a lower potential radiological risk to the environment and the public. Additionally, the consequences of the maximum hypothetical accidents (MHAs) for these facilities fall below the standards in 10 CFR part 20 for protecting the health and safety of the public.

Of the 30 NPUFs that are currently licensed to operate and are eligible for non-expiring licenses (excluding the one testing facility), 26 have cores that are submerged in tanks or pools of water that provide sufficient passive decay heat removal to prevent overheating of the fuel.³ Of these 26 licensed facilities, 24 are not required to have emergency core cooling systems (ECCSs) because conservative accident analyses have shown that these NPUFs do not generate enough decay heat, even after extended operation at maximum licensed power, to be at risk of overheating, failure of a fission product barrier, or posing a threat to public health and safety. Additionally, many of the licensees monitor for leaks by routinely inspecting the facility, tracking and trending water inventory, and performing surveillance on installed pool-level instrumentation and sensors. Licensees sample the water periodically and analyze the radioisotopes in the primary and, if applicable, secondary coolant. Many licensees sample weekly for gross radioactive material content. This data also is used to establish trends to quickly identify fuel or heat exchanger failure. Most of these licensees analyze, in their FSARs, pool and heat exchanger failures and the potential consequences for the safety of the reactor, workers, and public. In general, the radioisotope concentrations in pool or tank water at NPUFs are within the effluent concentration limits specified in appendix B to 10 CFR part 20, and therefore are not radiologically significant.

Only two of the NPUFs eligible for non-expiring licenses are required by their safety analyses to have an ECCS to maintain core cooling in the highly unlikely case that a loss-of-coolant accident uncovers the core.⁴ For these NPUFs, the ECCS is needed only to direct flow into the top of the tank or pool to provide cooling for a limited time after reactor shutdown. This period of time depends on the recent operational history of the reactor, which determines the decay heat present at reactor shutdown. After this relatively brief time, air cooling is adequate to remove decay heat without the ECCS. Additionally, required surveillance and testing of the ECCS at these facilities

help ensure the performance of the system. Operation of the facility is not permitted if the ECCS has not been verified to be operable before reactor startup or if the system is deemed inoperable during reactor operation.

Second, the NRC has found that the simple design and operation of these facilities yield a limited scope of aging-related concerns. There have been no significant aging issues identified at the time of license renewal because the NRC currently imposes aging-related surveillance requirements on NPUFs via technical specifications, as needed. Aging of components is specifically addressed in the standard review plan and acceptance criteria used for evaluating license renewal applications (*i.e.*, NUREG–1537, Part 2). Parts 1 and 2 of NUREG–1537 document lessons learned and known aging issues from prior reviews. Since NUREG–1537 was published in 1996, NRC reviews and assessments have not revealed any additional issues or need to update the NUREG. Specifically, based on operating experience over the past 60 years and review of license renewal applications over the past 40 years, and as documented in NUREG–1537, Parts 1 and 2, the NRC has determined that for NPUFs, the two main areas related to aging that could need surveillance because of potential safety concerns are 1) fuel cladding and 2) instrumentation and control features.

Regarding fuel cladding, the NRC currently requires NPUFs to perform periodic fuel inspections. Through years of experience, the NRC has found that aging-related fuel failures either do not occur, or failures that do occur do not release significant amounts of fission products and are quickly detected by existing monitoring systems and surveillances. If fuel failures are detected, licensees are able to take the facility out of service and remove any failed assemblies from service.

With regard to instrumentation and control, the NRC has found that failures in this area result in automatic facility shutdown. Failures reveal themselves to the licensee and do not prevent safe shutdown. Over the past 60 years of operation of these facilities, the potential occurrence of age-related degradation has been successfully mitigated through inspection, surveillance, monitoring, trending, recordkeeping, replacement, and refurbishment. In addition, licensees are required to report preventive and corrective maintenance activities in their annual reports, which are reviewed by the NRC. This allows the NRC to identify new aging issues if they occur. Therefore, the NRC has

³ The three Aerojet-General Nucleonics reactors (University of New Mexico (Docket No. 50–252), Idaho State University (Docket No. 50–284), and Texas A&M University (Docket No. 50–59)), each rated at 5 watts, and the University of Florida Argonaut reactor (Docket No. 50–83), rated at 100 kilowatts, are not considered tank or pool reactors but have similarly low risk profiles.

⁴ The two facilities are Massachusetts Institute of Technology (MIT) (Docket No. 50–20) and the University of California/Davis (Docket No. 50–607).

concluded that existing requirements and facility design and operational features will address concerns over aging-related issues during a non-expiring license term.

Third, the design bases of these facilities evolve slowly over time, with approximately five license amendment requests from all NPUF licensees combined each year and, on average, only five § 50.59 evaluations per facility per year for changes that do not require prior NRC approval.

Given these considerations, the elimination of license terms for medical therapy or research and development facilities, other than testing facilities, licensed under § 50.21(a) or (c), combined with the addition of requirements for periodic FSAR submittals, will provide a new framework for enabling licensees to continue to operate safely while reducing burden on licensees and the NRC. The final rule at § 50.71(e) requires licensees to submit updated FSARs and subsequent FSAR updates to ensure that a facility's licensing basis is kept up-to-date, a major function previously provided by the license renewal process, while imposing significantly less burden on licensees. Eliminating license terms for these licensees will allow the NRC to focus its resources on oversight of these facilities, such as conducting routine inspection activities and reviewing annual reports and FSAR updates. Recurring FSAR updates by licensees and reviews by the NRC will increase licensees' focus on maintaining their facilities' licensing bases. Should the NRC identify potential issues with the facility's continued safe operation in its reviews of FSAR updates, the Commission can undertake regulatory actions specified in § 2.202 to modify, suspend, or revoke a license. In addition, the public will remain informed about facility operations through the publicly available FSAR submittals and will continue to have opportunities to participate in the regulatory process through licensing actions and the § 2.206 petition process. By eliminating license terms and requiring periodic FSAR update submittals, coupled with existing oversight processes, the NRC will reduce the burden on the affected licensees and the NRC, which is consistent with the AEA and supports the NRC's goal of efficient and effective licensing.

Most licenses of existing NPUFs licensed under § 50.21(a) or (c), other than testing facilities, will be modified by order to remove the license terms after the effective date of this final rule (see Section II.4. of this document).

Facilities licensed under § 50.21(a) or (c), other than testing facilities, that have undergone relicensing using the guidance in NUREG-1537, Part 2 will be eligible to receive a non-expiring license without again renewing the current license. The current NPUF licensees that have not undergone the license renewal process using the guidance in NUREG-1537, Part 2, will each need to submit an application for license renewal if they wish to continue facility operation beyond the current license term. The NRC will review the application using NUREG-1537, Part 2, and the ISG. If the NRC concludes that a licensee's application meets the standard for issuing a renewed license, then the NRC would issue a non-expiring renewed license. If, in the future, the NRC issues an operating license to a new facility, other than a testing facility, under § 50.21(a) or (c), the license would be non-expiring and would be subject to periodic FSAR submittal requirements applicable to all NPUF licensees.

This final rule makes conforming changes to requirements for facilities that are decommissioning by revising § 50.82(b) and (c). These provisions currently use the expiration of the operating license as a reference point to address license termination applications and collection periods for shortfalls in decommissioning funding for NPUFs. This final rule clarifies that NPUFs (including testing facilities) licensed under § 50.22 and testing facilities licensed under § 50.21(c) are the only NPUFs with license expiration dates. The reference point for NPUFs licensed under § 50.21(a) or (c), other than testing facilities, is the NPUF's permanent cessation of operations.

3. Defines the license renewal process for NPUFs (including testing facilities) licensed under § 50.22 and testing facilities licensed under § 50.21(c).

For NPUFs (including testing facilities) licensed under § 50.22 and testing facilities licensed under § 50.21(c), this final rule defines the license renewal process in § 50.135. This one section consolidates existing regulatory requirements (e.g., requirements regarding written communications, application filing, application contents, and the issuance of renewed licenses) for current and future licensees. This final rule does not impose new regulations on these facilities. The NRC also is making a conforming change to § 50.8 to reflect the approved information collection requirement of § 50.135.

Section 103 of the AEA establishes a license term of no more than 40 years for commercial or industrial facilities

licensed under § 50.22. Although the AEA does not establish a fixed license term for testing facilities, licensees for these facilities are currently subject to additional license renewal requirements (e.g., siting subject to 10 CFR part 100, Advisory Committee on Reactor Safeguards review, and environmental impact statements) because of the potential for higher radiological risks associated with their facilities' design, operation, or use as compared to other class 104a or 104c licensees. Therefore, all commercial or industrial NPUFs (including testing facilities) licensed under § 50.22 and testing facilities licensed under § 50.21(c) will continue to have fixed license terms and undergo license renewal. As described in § 50.135(c)(2), these NPUFs will be able to submit a license renewal application to the Commission no more than 10 years in advance of the expiration of the operating license currently in effect. The requirement in § 50.135(c)(2) is not intended to affect the term of operating licenses granted to NPUFs.

The NRC is making renewed operating licenses for these facilities effective, and thereby replacing the previous operating license, immediately upon the date of issuance. The applicant for the renewed license can propose a schedule for implementation of the renewed licensee. This implementation schedule would ensure that the licensee can make any necessary and conforming changes to the facility processes and procedures required by the applicable conditions of the renewed license. The NRC will review and make the schedule, if approved, a condition of the renewed license. The immediate effectiveness of the renewed license is a change from the proposed rule, which would have made the renewed license effective 30 days after issuance. This final rule provides a substantively similar result as the proposed rule and provides licensees additional flexibility in the timing of their implementation of the renewed license.

If administrative or judicial appeal affects the renewed license, then the previous operating license will be reinstated unless its term has expired and the facility has failed to submit a license renewal application in a timely manner.

During the development of this final rule, the NRC recognized that § 50.135(e)(2) in the proposed rule could have unnecessarily restricted the license term for a renewed NPUF license to less than 40 years. Section 103 of the AEA allows for license terms of up to 40 years. To address this issue, this final rule clarifies that renewed licenses are

issued for a fixed period of time, not to exceed 40 years.

4. Requires all NPUF licensees to submit to the NRC updated FSARs and subsequent FSAR updates at intervals not to exceed 5 years.

Maintaining up-to-date FSARs facilitates safe management of a facility, including current understanding of the licensing bases and effective training of personnel, and enables the NRC to fulfill its statutory obligations and regulatory responsibilities effectively. Section 50.71(e) of the final rule requires all NPUF licensees to submit to the NRC updated FSARs and subsequent FSAR updates at intervals not to exceed 5 years. The updated FSAR will incorporate the various supplements and amendments that may have been submitted, either in response to NRC questions or on the licensee's own initiative, following the original submittal to create a single and complete updated document that can then serve as the baseline for future changes. Given the requirement to submit subsequent FSAR updates, the NRC anticipates that licensees will document changes to the licensing bases as they occur, which will aid in maintaining continuity of knowledge and the understanding of changes and effects of changes on the facility both for the licensee and the NRC. The NRC anticipates that these changes will result in minimal additional burden on licensees and the NRC because only a small number of changes have occurred per facility each year. In addition, licensees should have already documented these changes under § 50.59 or through a license amendment request under § 50.90.

This final rule requires licensees to submit, in accordance with § 50.4, a complete updated FSAR within 5 years of receipt of a facility operating license (§ 50.71(e)(3)(iv)) and subsequent FSAR updates at successive intervals not to exceed 5 years (§ 50.71(e)(4)(ii)). The NRC will issue orders to existing facilities licensed under § 50.21(c) that have undergone the license renewal process using the guidance in NUREG-1537, Part 2. These licensee-specific orders will direct these licensees to submit their updated FSARs, after which they will be subject to the new requirement in § 50.71(e)(4)(ii) to submit subsequent FSAR updates.

To issue the licensee-specific orders, the NRC will group the facilities based upon when they have undergone license renewal using NUREG-1537. The orders will dictate when a licensee's initial updated FSAR will be due to the NRC. The NRC plans to stagger the dates over a 5-year period following the effective

date of this final rule. The NRC will place existing operating and decommissioning NPUF licensees in three groups as follows:

(1) Group 1 consists of licensees that completed the license renewal process most recently using NUREG-1537. The NRC will establish a due date for the updated FSAR that will be at least 1 year and no later than 3 years from the effective date of this final rule. The NRC will require these licensees to submit an updated FSAR first because, with a recent license renewal, the FSARs should require minimal updates.

(2) Group 2 generally consists of licensees for which the NRC reviewed the license renewal application before Group 1 using NUREG-1537, and includes the three facilities currently in decommissioning. The NRC will establish a due date for the updated FSAR that will be at least 2 years and no later than 5 years from the effective date of this final rule. The NRC will allow these licensees more time to submit an updated FSAR than Group 1 licensees because more time has passed since license renewal, so additional time may be needed to update their FSARs.

(3) Group 3 consists of the remaining NPUF licensees that have not undergone license renewal using NUREG-1537. The licenses for these facilities are all due to expire in less than 5 years from the effective date of this final rule. If these licensees choose to renew their facility operating licenses, they will be subject to the requirements in § 50.71(e) after issuance of the renewed license.

The general approach will be to stagger the submittal dates within Groups 1 and 2 such that licensees that most recently completed license renewal will be the first to submit their updated FSAR. However, the licensee-specific orders will also consider facility-specific circumstances and NRC discretion.

This final rule also corrects a grammatical error in footnote 1 to § 50.71(e). The footnote previously stated, "Effects of changes includes appropriate revisions of descriptions in the FSAR such that the FSAR (as updated) is complete and accurate." This final rule changes "includes" to "include" so that the plural subject is followed by a plural verb.

5. Amends the current timely renewal provision under § 2.109, allowing an NPUF subject to license renewal to continue operating under an existing license past its expiration date if the licensee submits a license renewal application at least 2 years before the current license expiration date.

The requirements in § 2.101(a) allow the NRC to determine the acceptability of an application for review by the NRC. However, before this final rule, § 2.109 allowed an NPUF licensee to submit its license renewal application as late as 30 days before the expiration of the existing license. Historical precedent indicates that 30 days is not a sufficient period of time for the NRC to adequately assess the sufficiency of a license renewal application for review. As a result, the NRC accepted license renewal applications and addressed their deficiencies in the license renewal process by issuing requests for additional information. This approach increased the duration of the license renewal process and resulted in multiple facilities operating many years into a "timely renewal" period without renewed licenses.

To address this issue, the NRC is revising the timely renewal provision for NPUFs (including testing facilities) licensed under § 50.22 and testing facilities licensed under § 50.21(c) to establish a length of time adequate for the NRC to review the sufficiency of a license renewal application. Specifically, this final rule amends § 2.109, allowing a facility to continue operating under an existing license past its expiration date if the licensee submits a sufficient license renewal application at least 2 years before the current license expiration date. In such cases, the existing license will not be deemed to have expired until the application has been finally determined by the NRC. This final rule ensures that the NRC has adequate time prior to the expiration of the current license to review the sufficiency of license renewal applications while the facility continues to operate under the terms of its current license.

The proposed rule would have eliminated this provision for medical therapy or research and development facilities, other than testing facilities, licensed under § 50.21(a) or (c), because these facilities would no longer have license expiration dates.

The NRC reinstates the provision in this final rule to enable its use for the remaining license renewal applications that may be submitted after this final rule is published. The NRC anticipates that there is one research reactor licensee that would use this provision.

6. Provides an accident dose criterion of 1 rem (0.01 Sv) TEDE for NPUFs other than testing facilities.

The standards in 10 CFR part 20 for protection against ionizing radiation provide a limit on the maximum yearly radiation dose a member of the public can receive from the operation of any

NRC-licensed facility. Licensees are required to maintain programs and facility design features to ensure that these limits are met. In addition to the dose limits in 10 CFR part 20, accident dose criteria are also applied during licensing to determine the acceptability of the licensed facility. The accident dose criteria are not dose limits; they inform a licensee's accident analyses and the development of successive safety measures (*i.e.*, defense in depth) so that in the unlikely event of an accident, the NRC has reasonable assurance that no acute radiation-related harm will result to any member of the public. Before this final rule, the accident dose criterion for NPUFs, other than testing facilities, was the 10 CFR part 20 dose limit to a member of the public. For testing facilities, accident dose criteria are found in 10 CFR part 100: 25 rem (0.25 Sv) to the whole body and 300 rem (3 Sv) to the thyroid.

Before January 1, 1994, the NRC had generally found acceptable accident doses for applicants applying for an initial or renewed NPUF license, other than for testing facilities, that were less than 0.5 rem (0.005 Sv) to the whole body and 3 rem (0.03 Sv) to the thyroid for members of the public. On May 21, 1991,⁵ the NRC amended 10 CFR part 20 to reduce the dose limit to a member of the public to 0.1 rem (0.001 Sv) TEDE (56 FR 23360) with an implementation date of January 1, 1994. Since January 1, 1994, for applicants applying for an initial or renewed NPUF license, other than for testing facilities, the NRC has compared the results from the accident analyses submitted in initial or renewed license applications with the standards in 10 CFR part 20.

The NRC has determined that the public dose limit of 0.1 rem (0.001 Sv) TEDE in 10 CFR part 20 is unduly restrictive to be applied as accident dose criteria for NPUFs except for testing facilities, which are subject to 10 CFR part 100. The NRC bases this determination on the NRC Atomic Safety and Licensing Appeal Board's decision that the standards in 10 CFR part 20 are unduly restrictive as accident dose criteria for research reactors (Trustees of Columbia University in the City of New York, ALAB-50, 4 AEC 849, 854-855 (May 18, 1972)). At the time of this decision, the 10 CFR part 20 public dose limit was 0.5 rem (0.005 Sv) whole body.

However, the NRC considers the accident dose criteria in 10 CFR part 100 to be too high for NPUFs other than testing facilities, because those NPUFs

have lower risk profiles than testing facilities. For these reasons, this final rule modifies § 50.34 to add an accident dose criterion of 1 rem (0.01 Sv) TEDE for NPUFs not subject to 10 CFR part 100. The accident dose criterion of 1 rem (0.01 Sv) TEDE is based on the Environmental Protection Agency's (EPA) Protection Action Guides (PAGs). The EPA PAGs are dose guidelines that support decisions during a radiological incident to take protective actions such as staying indoors or evacuating. The proposed rule stated that the 1 rem (0.01 Sv) TEDE accident dose criterion was based on the EPA PAGs published in EPA 400-R-92-001, "Manual of Protective Action Guides and Protective Actions for Nuclear Incidents." In January 2017, the EPA published an update to its PAGs in EPA-400/R-17/001, "PAG Manual: Protective Action Guides and Planning Guidance for Radiological Incidents." This update to the EPA PAGs does not change the basis for the 1 rem (0.01 Sv) TEDE accident dose criterion.

The PAG is defined as the projected dose to an individual from a release of radioactive material at which a specific protective action to reduce or avoid that dose is recommended. Three principles considered in the development of the EPA PAGs include: (1) prevent acute effects; (2) balance protection with other important factors and ensure that actions result in more benefit than harm; and (3) reduce risk of chronic effects. In the early phase (*i.e.*, the beginning of the radiological incident, which may last hours to days), if the sum of the projected dose from external radiation exposure and the inhalation of radioactive material is 1 rem (0.01 Sv) to 5 rem (0.05 Sv), the EPA PAG recommends the protective action of sheltering-in-place or evacuation of the public to avoid inhalation of gases or particulates in an atmospheric plume and to minimize external radiation exposures. The EPA PAG Manual does not provide a protective action recommendation for the public when the projected dose to an individual from an incident is less than 1 rem (0.01 Sv). In light of this understanding of the early phase EPA PAG, the NRC's accident dose criterion of 1 rem (0.01 Sv) TEDE for NPUFs, other than testing facilities, provides reasonable assurance of adequate protection of the public from unnecessary exposure to radiation.

The NRC revised § 50.34(a)(1)(ii)(D)(2) of the proposed rule to replace "postulated accidental release of licensed material" with "postulated accident." This final rule requires applicants and licensees to evaluate the potential dose from postulated accidents

to include the potential exposure from all radiological sources, such as direct or scattered radiation from an unshielded source inside the facility, in addition to potential exposure from a release of radioactive materials. This requirement is consistent with the evaluation methodology described in NUREG-1537, Part 1. Under this final rule, these evaluations need to demonstrate that the dose to any individual located in the unrestricted area will not be in excess of 1 rem (0.01 Sv) TEDE for the duration of the accident. Although the EPA PAGs were developed for radiological incidents that lead to the release or potential release of radioactive materials into the environment, the three principles considered in their development are not dependent on whether the dose received is due to exposure from a release of radioactive materials or from direct or scattered radiation.

To provide further clarification on the NRC's intent of the 1 rem (0.01 Sv) TEDE accident dose criterion for NPUFs, other than testing facilities, a footnote has been incorporated into the final rule text. The footnote clarifies that this 1 rem (0.01 Sv) TEDE accident dose criterion is not a dose limit, as explained in the preceding paragraphs.

In this final rule, the NRC moves proposed § 50.34(a)(1)(ii)(D)(2) to § 50.34(a)(1)(i) and leaves the rule language in § 50.34(a)(1)(ii)(D) unchanged. During the development of this final rule, the NRC recognized that the accident dose criterion more appropriately belongs in § 50.34(a)(1)(i) because the requirements in § 50.34(a)(1)(ii) apply to power reactor construction permit applicants, while the requirements in § 50.34(a)(1)(i) apply to all other construction permit applicants, such as NPUF applicants. Similarly, proposed § 50.34(a)(1)(ii)(D)(2) would have imposed a requirement on applications for renewed NPUF operating licenses, which more appropriately belongs in § 50.34(b). Therefore, the NRC moved the requirement to new § 50.34(b)(13) in this final rule to clarify that an application for an operating license or a renewed operating license for an NPUF must include in the FSAR a final evaluation of the applicable radiological consequences consistent with § 50.34(a)(1)(i).

7. Extends the applicability of § 50.59 to NPUFs regardless of their decommissioning status.

Before this final rule, § 50.59(b) of the Commission's regulations did not apply § 50.59 to NPUFs whose licenses were amended to reflect permanent cessation of operations and that no longer had

⁵ In the proposed rule, the NRC misidentified the part 20 rulemaking date as January 1, 1994.

fuel on site (e.g., they returned all of their fuel to the U.S. Department of Energy). The former language stated that § 50.59 applied to licensees “whose license has been amended to allow possession of nuclear fuel, but not operation of the facility.” Therefore, § 50.59 did not apply to NPUF licensees that no longer possessed nuclear fuel. For these licensees, the NRC has typically added license conditions identical to the provisions of § 50.59 to allow the licensee to make changes to its facility or changes in its procedures that would not otherwise require obtaining a license amendment pursuant to § 50.90. Because most NPUFs promptly return their fuel to the U.S. Department of Energy after permanent shutdown, in contrast to decommissioning power reactors, these licensees had to request the addition of the license conditions, which imposed an administrative burden on the licensees and the NRC. This final rule eliminates this burden by revising § 50.59(b) to extend the applicability of § 50.59 to NPUFs regardless of their decommissioning status.

8. Clarifies an applicant’s requirements for meeting the existing provisions of § 51.45.

The NRC is required to prepare either an environmental impact statement or environmental assessment, as appropriate, for all licensing actions pursuant to 10 CFR part 51, unless a categorical exclusion applies as provided in § 51.22. For most types of licenses, 10 CFR part 51 specifies that an applicant must submit environmental documentation in the form of an environmental report, or a supplement to a previously submitted environmental report, to assist the NRC’s review and its compliance with the National Environmental Policy Act of 1969, as amended. However, before this final rule, the NRC did not have explicit requirements under 10 CFR part 51 with respect to the nature of the environmental documentation that must accompany applications for construction permits, initial licenses, and renewed licenses for NPUFs.

This final rule adds a new section to 10 CFR part 51 to clarify NPUF environmental reporting requirements. Section 51.56 clarifies an applicant’s existing requirements for meeting the provisions of § 51.45. This change improves consistency throughout 10 CFR part 51 with respect to environmental report submissions required from applicants. The NRC also is making a conforming change to § 51.17 to reflect the approved information collection requirement of § 51.56.

9. Eliminates the requirement for NPUF licensees to submit financial qualification information with license renewal applications under § 50.33(f)(2).

This final rule eliminates license renewal financial qualification requirements for NPUFs. Before this final rule, § 50.33(f) required NPUF license applicants to provide information sufficient to demonstrate their financial qualifications to carry out the activities for which the license is sought. Because the regulatory requirements for the content of an application for a renewed NPUF license were the same as those for an original license, NPUF licensees that requested license renewal were required to submit an update to the same financial information that was required in an application for an initial license. In addition, the NRC found that the financial qualification information did not meaningfully contribute to the NRC’s safety determination on the license renewal application. The elimination of NPUF license renewal financial qualification requirements reduces the burden associated with license renewal applications while still enabling the NRC to conduct its review of these applications.

This change is consistent with the current license renewal process for power reactors. On January 30, 2004, the NRC published in the **Federal Register** the final rule, “Financial Information Requirements for Applications to Renew or Extend the Term of an Operating License for a Power Reactor” (69 FR 4439). This final rule discontinued financial qualification reviews for power reactors at the license renewal stage except in very limited circumstances. The Commission stated that “[t]he NRC believes that its primary tool for evaluating and ensuring safe operations at nuclear power reactors is through its inspection and enforcement programs” Further, the Commission stated that “[t]he NRC has not found a consistent correlation between licensees’ poor financial health and poor safety performance. If a licensee postpones inspections and repairs that are subject to NRC oversight, the NRC has the authority to shut down the reactor or take other appropriate action if there is a safety issue.”

At NPUF sites, the NRC’s inspection and enforcement programs serve as important tools for evaluating licensee performance and ensuring safe operations. The NRC periodically inspects each operating NPUF using a graded approach that prioritizes higher-power facilities. The NRC completes an annual inspection of NPUFs licensed to

operate at power levels of 2 MW(t) or greater. For NPUFs operating under 2 MW(t), the inspection program is designed to be completed every two years, although inspector availability and licensee availability sometimes dictate that an inspection cycle is carried out in multiple inspections over the 2-year cycle. Inspections can include reviews of organizational structure, operator training and qualification, design and design control, radiation and environmental protection, maintenance and surveillance activities, transportation, material control and accounting, operational activities, review and audit functions, experiments, fuel handling, procedural controls, emergency preparedness, and security. The NRC also performs special and reactive inspections. In addition, the NRC manages the NPUF operator license examination program. The NRC also manages the review of NPUF emergency and security plans and develops and implements policy and guidance concerning the NPUF licensing program.

The same basis for the NRC’s elimination of financial qualification requirements for power reactor licensees at the time of license renewal supports the NRC’s elimination of NPUF financial qualification requirements at the time of license renewal. The NRC is not aware of any connection between an NPUF’s financial qualifications at license renewal and safe operation of the facility. The NRC retains broad authority under the AEA and § 50.54(cc), § 50.54(f), and § 2.102 to request additional financial information from its licensees and applicants, as necessary, to protect public health and safety.

III. Opportunity for Public Participation

The NRC hosted two public meetings to engage with external stakeholders on the proposed rule and associated draft guidance document during the public comment period. A public meeting was held on May 24, 2017, to discuss the proposed rule. A public meeting on the implementation schedule of the final requirements was held on April 25, 2019. Summaries of both public meetings are available in ADAMS, as provided in the “Availability of Documents” section. The feedback from these public meetings informed the development of this final rule.

IV. Public Comment Analysis

The NRC prepared a summary and analysis of public comments received on the 2017 proposed rule and draft regulatory guide, as referenced in the

“Availability of Documents” section. In response to the proposed rule and draft regulatory guide, the NRC received 16 comment submissions.

The public comment submittals are available from the Federal e-Rulemaking website at <http://www.regulations.gov> under Docket ID NRC–2011–0087. Responses to the public comments, including a summary of how the final rule text or guidance changed as a result of the public comments, can be found in the public comment analysis document.

For more information about the associated guidance document, see the “Availability of Guidance” section of this document.

V. Section-by-Section Analysis

The following paragraphs describe the specific changes within this final rule.

Section 2.109 Effect of timely renewal application.

In § 2.109, this final rule revises paragraph (a) to exclude NPUFs (including testing facilities) licensed under § 50.22 and testing facilities licensed under § 50.21(c) from the 30-day timely renewal provision by adding paragraph (f) to require these same licensees to submit a license renewal application at least 2 years before license expiration to be considered timely.

Section 20.1905 Exemptions to labeling requirements.

In § 20.1905, this final rule revises paragraph (g) to standardize terminology by replacing the term “reactors” with the phrase “production or utilization facilities.”

Section 26.3 Scope.

In § 26.3, this final rule revises paragraph (e) to standardize terminology by replacing the term “reactor” with the phrase “production or utilization facility.”

Section 50.2 Definitions.

In § 50.2, this final rule revises the definitions for *Non-power reactor* and *Testing facility*.

Section 50.8 Information collection requirements: OMB approval.

In § 50.8, this final rule revises paragraph (b) to include new § 50.135 as an approved information collection requirement in 10 CFR part 50.

Section 50.33 Contents of applications; general information.

In § 50.33, this final rule revises paragraph (f)(2) to remove the phrase “for a power reactor” from the fourth sentence and to remove the fifth

sentence, which required a non-power reactor applicant to submit with license renewal applications the same financial information that is required for initial license applications. It also redesignates the footnote to conform to the Office of the Federal Register’s requirements.

Section 50.34 Contents of applications; technical information.

In § 50.34, this final rule revises paragraph (a)(1)(i) to include an accident dose criterion for applicants for construction permits for NPUFs not subject to 10 CFR part 100 and a new footnote 2. It also redesignates the footnotes to conform to the Office of the Federal Register’s requirements. This final rule also adds paragraph (b)(13) to require an applicant for an operating or a renewed operating license for an NPUF to include in the FSAR a final evaluation of the applicable radiological consequences in § 50.34(a)(1)(i).

Section 50.36 Technical specifications.

In § 50.36, this final rule revises paragraph (c)(6) to standardize terminology by replacing the term “non-power reactor” with the phrase “non-power production or utilization.”

Section 50.51 Continuation of license.

In § 50.51, this final rule revises paragraph (a) to add the conditional phrase “except as noted under § 50.51(c).” This final rule also adds new paragraph (c) to clarify that NPUFs licensed under § 50.21(a) or (c), other than testing facilities, after the effective date of this final rule, will have non-expiring license terms.

Section 50.59 Changes, tests, and experiments.

In § 50.59, this final rule revises paragraph (b) to extend applicability to NPUFs that have permanently ceased operations and that no longer have fuel on site.

Section 50.71 Maintenance of records, making of reports.

In § 50.71, this final rule revises paragraph (e) to include NPUFs in the requirement and makes a tense correction to footnote 1. This final rule also revises paragraph (e)(3)(i) and redesignates paragraph (4) as paragraph (4)(i) to clarify that these paragraphs only apply to nuclear power reactors. New paragraphs (e)(3)(iv) and (e)(4)(ii) are added to include the requirements for NPUFs. This final rule also revises paragraph (g) to standardize terminology by replacing the phrase “non-power reactor” with the phrase “non-power production or utilization facility.”

Section 50.75 Reporting and recordkeeping for decommissioning planning.

In § 50.75, this final rule also revises paragraphs (d)(1), (e)(1)(iv), and (f)(4) to standardize terminology by replacing the phrase “non-power reactor” with the phrase “non-power production or utilization facility.” This final rule also revises paragraph (f)(5) by replacing the phrase “non-power reactors” with the phrase “non-power production or utilization facilities.”

Section 50.82 Termination of license.

In § 50.82, this final rule revises paragraph (b) to standardize terminology by replacing the term “reactor” with the phrase “production or utilization facility” and revises paragraph (b)(1) to include testing facilities licensed under § 50.21(c) and holders of a license issued under § 50.22. Paragraph (c) is revised by moving the phrase “that has permanently ceased operation before the expiration of its license” to new paragraph (c)(2) to clarify when the collection period for shortfalls in funding will be determined for NPUFs and holders of licenses issued under § 50.21(b) or § 50.22, or testing facilities.

Section 50.135 Renewal of non-power production or utilization facility licenses issued under § 50.22 and testing facility licenses.

This final rule adds new § 50.135 to clearly define the license renewal process for NPUFs (including testing facilities) licensed under § 50.22 and testing facilities licensed under § 50.21(c).

Appendix C to Part 50—A Guide for the Financial Data and Related Information Required To Establish Financial Qualifications for Construction Permits and Combined Licenses

In appendix C to part 50, this final rule revises paragraph III by replacing the reference to “medical and research reactors” with a reference to “non-power production or utilization facilities of a type described in § 50.21(a) or (c), other than testing facilities.”

Appendix E to Part 50—Emergency Planning and Preparedness for Production and Utilization Facilities

In appendix E to part 50, this final rule revises footnote 2 in paragraph I.3 to include the title of Regulatory Guide 2.6 and to replace the phrase “research and test reactor” with the phrase “non-power production or utilization facility.”

Section 51.17 Information collection requirements; OMB approval.

In § 51.17, this final rule revises paragraph (b) to add new § 51.56 as an approved information collection requirement in 10 CFR part 51.

Section 51.45 Environmental report.

In § 51.45, this final rule revises paragraph (a) to add a cross reference to new § 51.56.

Section 51.56 Environmental report—non-power production or utilization facility.

This final rule adds new § 51.56 to clarify existing requirements for the submittal and content of environmental reports by applicants seeking a permit to construct, a license to operate, or a renewal of a license to operate a non-power production or utilization facility.

Section 55.5 Communications.

In § 55.5, this final rule revises paragraph (b)(1) to remove the conditional phrase “except for test and research reactor facilities.” It also revises paragraph (b)(3) to clarify the applicability of this paragraph to utilization facilities licensed under 10 CFR part 50 that are not power reactors.

Section 55.40 Implementation.

In § 55.40, this final rule revises paragraph (d) to replace the phrase “test and research reactors” with the phrase “non-power reactors.”

Section 55.53 Conditions of licenses.

In § 55.53, this final rule revises paragraphs (e) and (f)(2) to replace the phrase “test and research reactors” with the phrase “non-power reactors.” It also revises paragraphs (j) and (k) to clarify that these paragraphs apply to utilization facilities licensed under 10 CFR part 50 that are not power reactors.

Section 55.59 Requalification.

In § 55.59, this final rule revises paragraph (c)(7) to clarify that this paragraph applies to utilization facilities licensed under 10 CFR part 50 that are not power reactors.

Section 55.61 Modification and revocation of licenses.

In § 55.61, this final rule revises paragraph (b)(5) to clarify that this paragraph applies to utilization facilities licensed under 10 CFR part 50 that are not power reactors.

Section 73.2 Definitions.

In § 73.2, this final rule adds the definition of *Non-power reactor* as it is defined in § 50.2.

Section 73.21 Protection of safeguards information: performance requirements.

In § 73.21, this final rule revises paragraph (a)(1)(ii) to replace the phrase “research and test reactors” with the phrase “non-power reactors.”

Section 73.23 Protection of safeguards information—modified handling: specific requirements.

In § 73.23, this final rule replaces the phrase “research and test reactors” with the phrase “non-power reactors.”

Section 73.60 Additional requirements for physical protection at non-power reactors.

In § 73.60, this final rule revises all instances of “nonpower” to read “non-power.”

Section 140.3 Definitions.

In § 140.3, this final rule removes the definition of *Testing reactor* and adds the definition of *Testing facility* as it is defined in § 50.2.

Section 140.11 Amounts of financial protection for certain reactors.

In § 140.11, this final rule revises paragraph (a)(3) to standardize terminology by replacing the term “reactor” with the term “facility.”

Section 170.3 Definitions.

In § 170.3, this final rule revises the definition of *Research reactor* and revises the definition of *Testing facility* to align with the definition in § 50.2.

Section 171.5 Definitions.

In § 171.5, this final rule revises the definitions of *Research reactor* and *Testing facility* to align with the definitions in § 170.3 and § 50.2, respectively.

VI. Regulatory Flexibility Certification

Under the Regulatory Flexibility Act (5 U.S.C. 605(b)), the NRC certifies that this rule does not have a significant economic impact on a substantial number of small entities. This final rule affects only the licensing and operation of NPUFs. In general, the companies, universities, and government agencies that own and operate these facilities do not fall within the scope of the definition of “small entities” set forth in the Regulatory Flexibility Act or the size standards established by the NRC (10 CFR 2.810). Additional information is provided in Section 4 of the regulatory analysis, which is available as indicated in the “Availability of Documents” section of this document.

VII. Regulatory Analysis

The NRC has prepared a final regulatory analysis on this regulation and the implementation guidance. The analysis examines the costs and benefits of the alternatives considered by the NRC. The regulatory analysis is available as indicated in the “Availability of Documents” section of this document.

VIII. Backfitting

The NRC’s backfitting regulations for entities that are licensed under 10 CFR part 50 and within the scope of the NRC’s backfitting policy appear in § 50.109, “Backfitting.” “Backfitting” is defined in § 50.109(a)(1), in relevant part, as a modification of or addition to the systems, structures, components, or design of a facility, or the procedures or organization required to design, construct, or operate a facility, which results from a new or amended provision in the Commission’s regulations.

The amendments in this final rule include the following:

- revising the definitions for *Non-power reactor*, *Testing facility*, and *Research reactor*; eliminating license terms for medical therapy or research and development facilities, other than testing facilities, licensed under 10 CFR 50.21(a) or (c);
- defining the license renewal process for all commercial or industrial NPUFs (including testing facilities) licensed under § 50.22 and testing facilities licensed under § 50.21(c) by consolidating existing regulatory requirements in one section of the NRC’s regulations; requiring all NPUF licensees to submit an updated FSAR and subsequent FSAR updates to ensure that a facility’s licensing basis is kept up-to-date;
- amending the current timely renewal provision under § 2.109, allowing NPUFs subject to license renewal to continue operating under an existing license past its expiration date if the licensee submits a license renewal application at least 2 years (rather than 30 days) before the current license expiration date; providing an accident dose criterion of 1 rem (0.01 Sv) TEDE for NPUFs other than testing facilities, for use in applicants’ accident analyses; extending the applicability of § 50.59 to NPUF licensees regardless of their decommissioning status;
- clarifying an NPUF applicant’s environmental report requirements in § 51.45; and eliminating the requirement for NPUF licensees to submit financial qualification information with license renewal applications under § 50.33(f)(2).

These amendments do not result in a modification of or addition to the systems, structures, components, or design of a facility, or the procedures or organization required to design, construct, or operate a facility. The final rule changes do not meet the § 50.109(a)(1) definition of “backfitting” and, thus, do not constitute backfitting for any NPUF that may be within the scope of backfitting.

The NRC will clarify whether commercial NPUFs (*i.e.*, NPUFs licensed under Section 103 of the AEA) are within the scope of the NRC’s backfitting policy as a general matter through an interpretive rule process. An interpretive rule is an agency’s interpretation of a statute or its regulations that does not revise the agency’s regulations. Examples of NRC interpretive rules include regulatory guides and notices of interpretation.

As described in the “Availability of Guidance” section of this document, the NRC is issuing Regulatory Guide (RG) 2.7, “Preparation of Updated Final Safety Analysis Reports for Non-Power Production or Utilization Facilities,” which provides guidance on methods acceptable to the NRC for complying with the requirements in § 50.71(e) of this final rule. Issuance of this RG does not constitute backfitting under § 50.109. As discussed in the “Implementation” section of RG 2.7, licensees generally are not required to comply with the guidance in that RG. If, in the future, the NRC seeks to impose positions stated in the RG in a manner that would constitute backfitting or forward fitting, the NRC would need to make the showing as required in § 50.109 for backfitting or Management Directive 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests,” for forward fitting, that would allow the NRC to impose the positions.

IX. Cumulative Effects of Regulation

Cumulative Effects of Regulation (CER) consists of the challenges licensees may face in addressing the implementation of new regulatory positions, programs, and requirements (*e.g.*, rulemaking, guidance, generic letters, backfits, inspections). The CER may manifest in several ways, including the total burden imposed on licensees by the NRC from simultaneous or consecutive regulatory actions that can adversely affect the licensee’s capability to implement those requirements, while continuing to operate or construct its facility in a safe and secure manner.

The goals of the NRC’s CER effort were met throughout the development of this final rule. The NRC engaged

external stakeholders at public meetings and by soliciting public comments on the proposed rule and associated draft guidance document. A public meeting was held on May 24, 2017, to discuss the proposed rule. A public meeting on implementation was held on April 25, 2019. Summaries of both public meetings are available in ADAMS, as provided in the “Availability of Documents” section of this document. The feedback from the April 25, 2019, public meeting informed the NRC’s final rule implementation schedule.

Based upon input from the public and affected licensees, the NRC has specified that this final rule will take effect 30 days from the date of publication of this document. For the purposes of implementing the requirements of § 50.71(e), the NRC will be issuing orders to certain holders of operating licenses, as described in Section II.4 of this document.

X. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31885).

XI. Voluntary Consensus Standards

The National Technology Transfer and Advancement Act of 1995, Public Law 104–113, requires agencies to use technical standards developed or adopted by voluntary consensus standards bodies unless the use of such standards is inconsistent with applicable law or is otherwise impractical. The NRC is amending its requirements for the license renewal process for certain production or utilization facilities. This action does not constitute the establishment of a standard that contains generally applicable requirements.

XII. Environmental Assessment and Final Finding of No Significant Environmental Impact

The Commission has determined under the National Environmental Policy Act of 1969, as amended, and the Commission’s regulations in subpart A of 10 CFR part 51, that this final rule will not be a major Federal action significantly affecting the quality of the human environment and, therefore, an environmental impact statement is not required. The provision to eliminate license terms for NPUFs, other than testing facilities, licensed under § 50.21(a) or (c) will result in no

additional radiological or non-radiological impacts because of the minimal accident consequences of these facilities, existing surveillance and reporting by licensees, and NRC oversight. In addition, the implementation of this final rule will not affect the environmental review requirements for new facilities and facilities applying for license renewal. The NRC concludes that this final rule will not cause any additional radiological or non-radiological impacts on the human environment.

The NRC requested the views of the States on the environmental assessment for this rule. No States filed comments regarding the environmental assessment for this rule.

The determination of this environmental assessment is that there will be no significant offsite impact to the public from this action. The environmental assessment is available as indicated under the “Availability of Documents” section.

XIII. Paperwork Reduction Act

This final rule contains new or amended collections of information subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*). The collections of information were approved by the Office of Management and Budget (OMB), approval number 3150–0268.

The burden to the public for the information collections is estimated to average 51 hours per response for information collection requirements contained in 10 CFR part 50 and 0 hours per response for information collection requirements contained in 10 CFR part 51, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the information collections.

The information collections are being conducted to create a more efficient licensing process that continues to protect public health, safety, and the environment. Information will be used by the NRC to ensure that licensing bases remain up-to-date and that adequate protection of public health and safety is maintained. Responses to these collections of information are mandatory under § 50.71(e) and § 51.56. Confidential and proprietary information submitted to the NRC is protected in accordance with NRC regulations at § 9.17(a) and § 2.390(b).

You may submit comments on any aspect of the information collections, including suggestions for reducing the burden, by the following methods:

• *Federal Rulemaking Website:* Go to <http://www.regulations.gov> and search for Docket ID NRC–2011–0087.

• *Mail comments to:* FOIA, Library, and Information Collections Branch, Office of the Chief Information Officer, Mail Stop: T–6 A10M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; InfoCollects@nrc.gov; or to the OMB reviewer at: OMB Office of Information and Regulatory Affairs (3150–0268), Attn: Desk Officer for the Nuclear Regulatory Commission, 725 17th Street NW, Washington, DC 20503.

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the document requesting or requiring the

collection displays a currently valid OMB control number.

XIV. Congressional Review Act

This final rule is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

XV. Criminal Penalties

For the purposes of Section 223 of the AEA, the NRC is issuing this final rule that amends 10 CFR 50.34, 50.36, 50.59, 50.71, 50.75, 50.82, 55.40, 55.53, 55.59, 73.21, 73.23, 73.60, and 140.11 and creates § 50.135 under one or more of Sections 161b, 161i, or 161o of the AEA. Willful violations of these provisions would be subject to criminal enforcement.

XVI. Availability of Guidance

The NRC is issuing RG 2.7, Revision 0, “Preparation of Updated Final Safety Analysis Reports for Non-Power Production or Utilization Facilities,” for the implementation of the requirements in § 50.71(e) of this final rule. The guidance is available in ADAMS under Accession No. ML18031A007. You can access information and public comment submissions related to the guidance at the federal rulemaking website, www.regulations.gov, by searching on Docket ID NRC–2011–0087.

XVII. Availability of Documents

The documents identified in the following table are available to interested persons through one or more of the following methods, as indicated.

List of Subjects

10 CFR Part 2

Administrative practice and procedure, Antitrust, Byproduct material, Classified information, Confidential business information; Freedom of information, Environmental protection, Hazardous waste, Nuclear energy, Nuclear materials, Nuclear power plants and reactors, Penalties, Reporting and recordkeeping requirements, Sex discrimination, Source material, Special nuclear material, Waste treatment and disposal.

10 CFR Part 20

Byproduct material, Criminal penalties, Hazardous waste, Licensed

material, Nuclear energy, Nuclear materials, Nuclear power plants and reactors, Occupational safety and health, Packaging and containers, Penalties, Radiation protection, Reporting and recordkeeping requirements, Source material, Special nuclear material, Waste treatment and disposal.

10 CFR Part 26

Administrative practice and procedure, Alcohol abuse, Alcohol testing, Appeals, Chemical testing, Drug abuse, Drug testing, Employee assistance programs, Fitness for duty, Management actions, Nuclear power plants and reactors, Privacy, Protection of information, Radiation protection,

Reporting and recordkeeping requirements.

10 CFR Part 50

Administrative practice and procedure, Antitrust, Classified information, Criminal penalties, Education, Fire prevention, Fire protection, Intergovernmental relations, Nuclear power plants and reactors, Penalties, Radiation protection, Reactor siting criteria, Reporting and recordkeeping requirements, Whistleblowing.

10 CFR Part 51

Administrative practice and procedure, Environmental impact statements, Hazardous waste, Nuclear

energy, Nuclear materials, Nuclear power plants and reactors, Reporting and recordkeeping requirements.

10 CFR Part 55

Criminal penalties, Manpower training programs, Nuclear power plants and reactors, Penalties, Reporting and recordkeeping requirements.

10 CFR Part 73

Criminal penalties, Exports, Hazardous materials transportation, Imports, Nuclear energy, Nuclear materials, Nuclear power plants and reactors, Penalties, Reporting and recordkeeping requirements, Security measures.

10 CFR Part 140

Criminal penalties, Extraordinary nuclear occurrence, Insurance, Intergovernmental relations, Nuclear materials, Nuclear power plants and reactors, Penalties, Reporting and recordkeeping requirements.

10 CFR Part 170

Byproduct material, Import and export licenses, Intergovernmental relations, Non-payment penalties, Nuclear energy, Nuclear materials, Nuclear power plants and reactors, Source material, Special nuclear material.

10 CFR Part 171

Annual charges, Byproduct material, Holders of certificates, registrations, approvals, Intergovernmental relations, Nonpayment penalties, Nuclear materials, Nuclear power plants and reactors, Source material, Special nuclear material.

For the reasons set out in the preamble and under the authority of the AEA, as amended; the Energy Reorganization Act of 1974, as amended; and 5 U.S.C. 552 and 553, the NRC is adopting the following amendments to 10 CFR parts 2, 20, 26, 50, 51, 55, 73, 140, 170, and 171:

PART 2—AGENCY RULES OF PRACTICE AND PROCEDURE

- 1. The authority citation for part 2 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 29, 53, 62, 63, 81, 102, 103, 104, 105, 161, 181, 182, 183, 184, 186, 189, 191, 234 (42 U.S.C. 2039, 2073, 2092, 2093, 2111, 2132, 2133, 2134, 2135, 2201, 2231, 2232, 2233, 2234, 2236, 2239, 2241, 2282); Energy Reorganization Act of 1974, secs. 201, 206 (42 U.S.C. 5841, 5846); Nuclear Waste Policy Act of 1982, secs. 114(f), 134, 135, 141 (42 U.S.C. 10134(f), 10154, 10155, 10161); Administrative Procedure Act (5 U.S.C. 552, 553, 554, 557, 558); National Environmental

Policy Act of 1969 (42 U.S.C. 4332); 44 U.S.C. 3504 note.

Section 2.205(j) also issued under Sec. 31001(s), Pub. L. 104–134, 110 Stat. 1321–373 (28 U.S.C. 2461 note).

- 2. In § 2.109, revise paragraph (a) and add paragraph (f) to read as follows:

§ 2.109 Effect of timely renewal application.

(a) Except for the renewal of licenses identified in paragraphs (b) through (f) of this section, if at least 30 days before the expiration of an existing license authorizing any activity of a continuing nature, the licensee files an application for a renewal or for a new license for the activity so authorized, the existing license will not be deemed to have expired until the application has been finally determined.

* * * * *

(f) If the licensee of a non-power production or utilization facility licensed under 10 CFR 50.22, or a testing facility, files a sufficient application for renewal at least 2 years before the expiration of the existing license, the existing license will not be deemed to have expired until the application has been finally determined.

PART 20—STANDARDS FOR PROTECTION AGAINST RADIATION

- 3. The authority citation for part 20 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 11, 53, 63, 65, 81, 103, 104, 161, 170H, 182, 186, 223, 234, 274, 1701 (42 U.S.C. 2014, 2073, 2093, 2095, 2111, 2133, 2134, 2201, 2210h, 2232, 2236, 2273, 2282, 2021, 2297f); Energy Reorganization Act of 1974, secs. 201, 202 (42 U.S.C. 5841, 5842); Low-Level Radioactive Waste Policy Amendments Act of 1985, sec. 2 (42 U.S.C. 2021b); 44 U.S.C. 3504 note.

§ 20.1905 [Amended]

- 4. In § 20.1905, amend paragraph (g) by removing the word “reactors” and adding in its place the phrase “production or utilization facilities”.

PART 26—FITNESS FOR DUTY PROGRAMS

- 5. The authority citation for part 26 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 53, 103, 104, 107, 161, 223, 234, 1701 (42 U.S.C. 2073, 2133, 2134, 2137, 2201, 2273, 2282, 2297f); Energy Reorganization Act of 1974, secs. 201, 202 (42 U.S.C. 5841, 5842); 44 U.S.C. 3504 note.

§ 26.3 [Amended]

- 6. In § 26.3, amend paragraph (e) by removing the word “reactor” and adding in its place the phrase “production or utilization facility”.

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

- 7. The authority citation for part 50 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 11, 101, 102, 103, 104, 105, 108, 122, 147, 149, 161, 181, 182, 183, 184, 185, 186, 187, 189, 223, 234 (42 U.S.C. 2014, 2131, 2132, 2133, 2134, 2135, 2138, 2152, 2167, 2169, 2201, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2239, 2273, 2282); Energy Reorganization Act of 1974, secs. 201, 202, 206, 211 (42 U.S.C. 5841, 5842, 5846, 5851); Nuclear Waste Policy Act of 1982, sec. 306 (42 U.S.C. 10226); National Environmental Policy Act of 1969 (42 U.S.C. 4332); 44 U.S.C. 3504 note; Sec. 109, Pub. L. 96–295, 94 Stat. 783.

- 8. In § 50.2, revise the definitions for “Non-power reactor” and “Testing facility” to read as follows:

§ 50.2 Definitions.

* * * * *

Non-power reactor means:

- (1) A testing facility; or
(2) A research reactor, which is a non-power production or utilization facility that is a nuclear reactor licensed under § 50.21(c):

- (i) For which a safety assessment demonstrates accident radiation doses consistent with § 50.34(a)(1)(i); and
(ii) That is not a testing facility; or
(3) A commercial or industrial reactor, which is a non-power production or utilization facility that is a nuclear reactor licensed under § 50.22:

- (i) For which a safety assessment demonstrates accident radiation doses consistent with § 50.34(a)(1)(i); and
(ii) That is not a testing facility.

* * * * *

Testing facility means a non-power production or utilization facility that is a nuclear reactor licensed under § 50.21(c) or § 50.22 for which:

- (1) Analyzed accident radiation doses are in excess of the dose criterion for facilities not subject to 10 CFR part 100 set forth in § 50.34(a)(1)(i); or
(2) The Commission determines that the design, operation, or use and the associated risk warrant classification as a testing facility.

* * * * *

§ 50.8 [Amended]

- 9. In § 50.8, amend paragraph (b) by adding the number “50.135,” in numerical order.

§ 50.33 [Amended]

- 10. Amend § 50.33 by:

- a. Removing the phrase “for a power reactor” from the fourth sentence and removing the last sentence in paragraph (f)(2); and

■ b. Redesignating footnotes 4 and 5 as footnotes 1 and 2.

■ 11. In § 50.34:

■ a. Revise paragraph (a)(1)(i);

■ b. Add paragraph (b)(13);

■ c. Redesignate footnote 5 as footnote 1;

■ d. Add footnote 2;

■ e. Redesignate footnotes 6 and 7 as footnotes 3 and 4;

■ f. Remove footnotes 8 and 9; and

■ g. Redesignate footnotes 10 and 11 as footnotes 5 and 6.

The revision and addition read as follows:

§ 50.34 Contents of applications; technical information.

(a) * * *

(1) * * *

(i) A description and safety assessment of the site on which the facility is to be located, with appropriate attention to features affecting facility design. Special attention should be directed to the site evaluation factors identified in part 100 of this chapter. The assessment must contain an analysis and evaluation of the major structures, systems and components of the facility which bear significantly on the acceptability of the site under the site evaluation factors identified in part 100 of this chapter, assuming that the facility will be operated at the ultimate power level which is contemplated by the applicant. For non-power production or utilization facilities not subject to 10 CFR part 100, the assessment must provide an evaluation of the applicable radiological consequences that demonstrates with reasonable assurance that any individual located in the unrestricted area following the onset of a postulated accident, including consideration of experiments, would not receive a radiation dose in excess of 1 rem (0.01 Sv)² TEDE for the duration of the accident. With respect to operation at the projected initial power level, the applicant is required to submit information prescribed in paragraphs (a)(2) through (a)(8) of this section, as well as the information required by this paragraph, in support of the application for a construction permit, or a design approval.

* * * * *

(b) * * *

(13) Non-power production or utilization facility applicants who apply for an initial or renewed operating license shall provide a final evaluation of the applicable radiological consequences in § 50.34(a)(1)(i).

* * * * *

² The 1 rem accident dose criterion for non-power production or utilization facilities is

not a dose limit; it informs the analysis of postulated accidents and the development of safety measures so that in the unlikely event of an accident, the NRC has reasonable assurance that no acute radiation-related harm will result to any member of the public.

§ 50.36 [Amended]

■ 12. In § 50.36, amend paragraph (c)(6) by removing the phrase “non-power reactor” and adding in its place the phrase “non-power production or utilization”.

■ 13. In § 50.51, in the first sentence of paragraph (a) remove the word “Each” and add in its place the phrase “Except as noted in § 50.51(c), each” and add paragraph (c) to read as follows:

§ 50.51 Continuation of license.

* * * * *

(c) Each non-power production or utilization facility license issued under § 50.21(a) or (c), other than a testing facility license, after January 29, 2025, will be issued with no fixed license term.

■ 14. In § 50.59, revise paragraph (b) to read as follows:

§ 50.59 Changes, tests, and experiments.

* * * * *

(b) This section applies to each holder of an operating license issued under this part or a combined license issued under part 52 of this chapter, including the holder of a license authorizing the operation of a nuclear power reactor that has submitted the certification of permanent cessation of operations required under § 50.82(a)(1) or § 50.110, a reactor licensee whose license has been amended to allow possession of nuclear fuel but not operation of the facility, or a non-power production or utilization facility that has permanently ceased operations.

* * * * *

■ 15. In § 50.71:

■ a. In the first sentence of paragraph (e), add the phrase “, or non-power production or utilization facility,” after the word “reactor”;

■ b. In paragraph (e)(3)(i), remove the letter “A” at the beginning and add in its place the phrase “For nuclear power reactor licensees, a”;

■ c. Add paragraph (e)(3)(iv);

■ d. Redesignate paragraph (e)(4) as paragraph (e)(4)(i);

■ e. In newly redesignated paragraph (e)(4)(i), remove the word “Subsequent” and add in its place the phrase “For nuclear power licensees, subsequent”;

■ f. Add paragraph (e)(4)(ii);

■ g. In paragraph (g), remove the phrase “non-power reactor” and add in its place the phrase “non-power production or utilization facility”; and

■ h. In footnote 1, remove the word “includes” and add in its place the word “include”.

The revisions and additions read as follows:

§ 50.71 Maintenance of records, making of reports.

* * * * *

(e) * * *

(3) * * *

(iv) Holders of non-power production or utilization facility licenses issued after January 29, 2025, shall file a revision of the original FSAR containing those original pages that are still applicable plus new replacement pages within 5 years of the date of issuance of the operating license. The revision must bring the FSAR up to date as of a maximum of 6 months prior to the date of filing the revision.

* * * * *

(4) * * *

(ii) Non-power production or utilization facility licensees shall file an FSAR update no more than 5 years from the date of the submittal of the updated FSAR required by § 50.71(e)(3)(iv) or by order and shall file subsequent updates no more than 5 years from the date of the previous submittal. Each submittal must reflect all changes made to the FSAR up to a maximum of 6 months prior to the date of filing the submittal.

* * * * *

■ 16. In § 50.75:

■ a. Revise paragraph (d)(1);

■ b. In paragraphs (e)(1)(iv) and (f)(4), remove the phrase “non-power reactor” and add in its place the phrase “non-power production or utilization facility”; and

■ c. In paragraph (f)(5), remove the phrase “power and non-power reactors” and add in its place the phrase “power reactors and non-power production or utilization facilities”.

The revision reads as follows:

§ 50.75 Reporting and recordkeeping for decommissioning planning.

* * * * *

(d)(1) Each applicant for or holder of an operating license for a non-power production or utilization facility shall submit a decommissioning report as required by § 50.33(k) of this part.

* * * * *

■ 17. In § 50.82, revise paragraphs (b) introductory text, (b)(1), and (c) to read as follows:

§ 50.82 Termination of license.

* * * * *

(b) For non-power production or utilization facility licensees—

(1) A licensee that permanently ceases operations must make application for

license termination within 2 years following permanent cessation of operations, and for testing facilities licensed under § 50.21(c) or facilities licensed under § 50.22, in no case later than 1 year prior to expiration of the operating license. Each application for termination of a license must be accompanied or preceded by a proposed decommissioning plan. The contents of the decommissioning plan are specified in paragraph (b)(4) of this section.

* * * * *

(c) The collection period for any shortfall of funds will be determined, upon application by the licensee, on a case-by-case basis taking into account the specific financial situation of each holder of the following licenses:

(1) A non-power production or utilization facility licensed under § 50.21(a) or (c), other than a testing facility, that has permanently ceased operations.

(2) A facility licensed under § 50.21(b) or § 50.22, or a testing facility, that has permanently ceased operation before the expiration of its license.

■ 18. Add § 50.135 to read as follows:

§ 50.135 Renewal of non-power production or utilization facility licenses issued under § 50.22 and testing facility licenses.

(a) *Applicability.* The requirements in this section apply to applicants for renewed non-power production or utilization facility operating licenses issued under § 50.22 and to applicants for renewed testing facility operating licenses issued under § 50.21(c).

(b) *Written communications.* All applications, correspondence, reports, and other written communications must be filed in accordance with applicable portions of § 50.4.

(c) *Filing of application.* (1) The filing of an application for a renewed license must be in accordance with subpart A of 10 CFR part 2 and all applicable sections of this part.

(2) An application for a renewed license may not be submitted to the Commission earlier than 10 years before the expiration of the operating license currently in effect.

(d) *Contents of application.* (1) Each application must include the information specified in §§ 50.33, 50.34, and 50.36, as applicable.

(2) Each application must include conforming changes to the standard indemnity agreement, under 10 CFR part 140 to account for the expiration term of the proposed renewed license.

(3) Each application must include a supplement to the environmental report that complies with the requirements of 10 CFR 51.56.

(e) *Issuance of a renewed license.* (1) A renewed license will be of the class for which the operating license currently in effect was issued.

(2) A renewed license will be issued for a fixed period of time. The term of any renewed license may not exceed 40 years.

(3) A renewed license will become effective immediately upon its issuance, thereby superseding the operating license previously in effect. If a renewed license is subsequently set aside upon further administrative or judicial appeal, the operating license previously in effect will be reinstated unless its term has expired and the renewal application was not filed in a timely manner in accordance with 10 CFR 2.109.

(4) A renewed license may be subsequently renewed in accordance with all applicable requirements.

Appendix C to Part 50 [Amended]

■ 19. In appendix C to part 50, amend paragraph III by removing the phrase “for medical and research reactors” and adding in its place the phrase “for non-power production or utilization facilities of a type described in § 50.21(a) or (c), other than testing facilities”.

■ 20. In appendix E to part 50, revise footnote 2 to read as follows:

Appendix E to Part 50—Emergency Planning and Preparedness for Production and Utilization Facilities

* * * * *

² Regulatory Guide 2.6, “Emergency Planning for Research and Test Reactors and Other Non-Power Production and Utilization Facilities,” may be used as guidance for the acceptability of non-power production or utilization facility emergency response plans.

* * * * *

PART 51—ENVIRONMENTAL PROTECTION REGULATIONS FOR DOMESTIC LICENSING AND RELATED REGULATORY FUNCTIONS

■ 21. The authority citation for part 51 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 161, 193 (42 U.S.C. 2201, 2243); Energy Reorganization Act of 1974, secs. 201, 202 (42 U.S.C. 5841, 5842); National Environmental Policy Act of 1969 (42 U.S.C. 4332, 4334, 4335); Nuclear Waste Policy Act of 1982, secs. 144(f), 121, 135, 141, 148 (42 U.S.C. 10134(f), 10141, 10155, 10161, 10168); 44 U.S.C. 3504 note.

§ 51.17 [Amended]

■ 22. In § 51.17, amend paragraph (b) by adding the number “51.56,” in numerical order.

§ 51.45 [Amended]

■ 23. In § 51.45, amend paragraph (a) by adding the number “51.56,” in numerical order.

■ 24. Add § 51.56 to read as follows:

§ 51.56 Environmental report—non-power production or utilization facility.

Each applicant for a non-power production or utilization construction permit or facility license, or renewal of a non-power production or utilization facility license issued pursuant to § 50.21(a) or (c) or § 50.22 of this chapter shall submit a separate document, entitled “Applicant’s Environmental Report” or “Supplement to Applicant’s Environmental Report,” as appropriate, with its application to: ATTN: Document Control Desk, Director, Office of Nuclear Reactor Regulation. The environmental report or supplement shall contain the information specified in § 51.45. If the application is for a renewal of a license for which the applicant has previously submitted an environmental report, the supplement, to the extent applicable, shall include an analysis of any environmental impacts resulting from operational experience or a change in operations, and an analysis of any environmental impacts that may result from proposed decommissioning activities.

PART 55—OPERATORS’ LICENSES

■ 25. The authority citation for part 55 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 107, 161, 181, 182, 183, 186, 187, 223, 234 (42 U.S.C. 2137, 2201, 2231, 2232, 2233, 2236, 2237, 2273, 2282); Energy Reorganization Act of 1974, secs. 201, 202 (42 U.S.C. 5841, 5842); Nuclear Waste Policy Act of 1982, sec. 306 (42 U.S.C. 10226); 44 U.S.C. 3504 note.

§ 55.5 [Amended]

■ 26. Amend § 55.5 by:

■ a. In paragraph (b)(1), removing the phrase “Except for test and research reactor facilities, the” and adding in its place the word “The”; and

■ b. In paragraph (b)(3), removing the phrase “a test and research reactor or non-power reactor facility licensed under 10 CFR part 50” and adding in its place “a utilization facility licensed under part 50 of this chapter that is not a power reactor”.

§ 55.40 [Amended]

■ 27. In § 55.40, amend paragraph (d) by removing the phrase “all test and research reactors” and adding in its place the phrase “all non-power reactors”.

§ 55.53 [Amended]

- 28. Amend § 55.53 by:
- a. In paragraphs (e) and (f)(2), removing the phrase “test and research reactors” and adding in its place the phrase “non-power reactors”; and
 - b. In paragraph (j), removing the phrase “non-power reactors” and adding in its place the phrase “utilization facilities licensed under 10 CFR part 50 that are not power reactors”; and
 - c. In paragraph (k):
 - i. Removing the phrase “non-power reactors” and adding in its place the phrase “utilization facilities licensed under 10 CFR part 50 that are not power reactors”; and
 - ii. Removing the term “non-power” at the end of the paragraph.

§ 55.59 [Amended]

- 29. In § 55.59, amend paragraph (c)(7) by:
- a. Removing in the paragraph heading, the phrase “*research and test reactor facilities*” and adding in its place the phrase “*utilization facilities licensed under 10 CFR part 50 that are not power reactors*”; and
 - b. Removing the phrase “research reactor or test reactor facility” and adding in its place “utilization facility licensed under 10 CFR part 50 that is not a power reactor”.

§ 55.61 [Amended]

- 30. In § 55.61, amend paragraph (b)(5) by removing the phrase “non-power reactors” and adding in its place the phrase “utilization facilities licensed under 10 CFR part 50 that are not power reactors”.

PART 73—PHYSICAL PROTECTION OF PLANTS AND MATERIALS

- 31. The authority citation for part 73 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 53, 147, 149, 161, 161A, 170D, 170E, 170H, 170I, 223, 229, 234, 1701 (42 U.S.C. 2073, 2167, 2169, 2201, 2201a, 2210d, 2210e, 2210h, 2210i, 2273, 2278a, 2282, 2297f); Energy Reorganization Act of 1974, secs. 201, 202 (42 U.S.C. 5841, 5842); Nuclear Waste Policy Act of 1982, secs. 135, 141 (42 U.S.C. 10155, 10161); 44 U.S.C. 3504 note.

Section 73.37(b)(2) also issued under Sec. 301, Public Law 96–295, 94 Stat. 789 (42 U.S.C. 5841 note).

- 32. In § 73.2, add in alphabetical order the definition for *Non-power reactor*.

§ 73.2 Definitions.

* * * * *

Non-power reactor is defined at 10 CFR 50.2.

* * * * *

§ 73.21 [Amended]

- 33. In § 73.21, amend paragraph (a)(1)(ii) by removing the phrase “Research and test reactors” and adding in its place the phrase “non-power reactors”.

§ 73.23 [Amended]

- 34. Amend § 73.23 by removing the phrase “research and test reactors” and adding in its place the phrase “non-power reactors”.

§ 73.60 [Amended]

- 35. Amend § 73.60 by removing wherever it may appear, the word “nonpower” and adding in its place the word “non-power”.

PART 140—FINANCIAL PROTECTION REQUIREMENTS AND INDEMNITY AGREEMENTS

- 36. The authority citation for part 140 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 161, 170, 223, 234 (42 U.S.C. 2201, 2210, 2273, 2282); Energy Reorganization Act of 1974, secs. 201, 202 (42 U.S.C. 5841, 5842); 44 U.S.C. 3504 note.

- 37. Amend § 140.3 by removing the definition for “Testing reactor” and adding the definition for “Testing facility” to read as follows:

§ 140.3 Definitions.

* * * * *

Testing facility is defined at 10 CFR 50.2.

* * * * *

§ 140.11 [Amended]

- 38. In § 140.11, amend paragraph (a)(3) by removing the phrase “testing reactor” and adding in its place the phrase “testing facility”.

PART 170—FEES FOR FACILITIES, MATERIALS, IMPORT AND EXPORT LICENSES, AND OTHER REGULATORY SERVICES UNDER THE ATOMIC ENERGY ACT OF 1954, AS AMENDED

- 39. The authority citation for part 170 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 11, 161(w) (42 U.S.C. 2014, 2201(w)); Energy Reorganization Act of 1974, sec. 201 (42 U.S.C. 5841); 42 U.S.C. 2215; 31 U.S.C. 901, 902, 9701; 44 U.S.C. 3504 note.

- 40. Amend § 170.3 by revising the definitions for “Research reactor” and “Testing facility” to read as follows:

§ 170.3 Definitions.

* * * * *

Research reactor means a non-power production or utilization facility, as

defined in 10 CFR 50.2, that is a nuclear reactor licensed under 10 CFR 50.21(c):

(i) For which a safety assessment demonstrates accident radiation doses consistent with 10 CFR 50.34(a)(1)(i); and

(ii) That is not a testing facility.

* * * * *

Testing facility is defined at 10 CFR 50.2.

* * * * *

PART 171—ANNUAL FEES FOR REACTOR LICENSES AND FUEL CYCLE LICENSES AND MATERIALS LICENSES, INCLUDING HOLDERS OF CERTIFICATES OF COMPLIANCE, REGISTRATIONS, AND QUALITY ASSURANCE PROGRAM APPROVALS AND GOVERNMENT AGENCIES LICENSED BY THE NRC

- 41. The authority citation for part 171 continues to read as follows:

Authority: Atomic Energy Act of 1954, secs. 11, 161(w), 223, 234 (42 U.S.C. 2014, 2201(w), 2273, 2282); Energy Reorganization Act of 1974, sec. 201 (42 U.S.C. 5841); 42 U.S.C. 2215; 44 U.S.C. 3504 note.

- 42. Amend § 171.5 by revising the definitions for “Research reactor” and “Testing facility” to read as follows:

§ 171.5 Definitions.

* * * * *

Research reactor is defined at 10 CFR 170.3.

* * * * *

Testing facility is defined at 10 CFR 50.2.

* * * * *

Dated: December 19, 2024.

For the Nuclear Regulatory Commission.

Carrie Safford,

Secretary of the Commission.

FEDERAL HOUSING FINANCE AGENCY**12 CFR Part 1282**

RIN 2590–AB34

2025–2027 Enterprise Housing Goals

AGENCY: Federal Housing Finance Agency.

ACTION: Final rule.

SUMMARY: The Federal Housing Finance Agency (FHFA) is issuing a final rule on the housing goals for Fannie Mae and Freddie Mac (the Enterprises) for 2025 through 2027 as required by the Federal Housing Enterprises Financial Safety and Soundness Act of 1992. The final

rule establishes the benchmark levels for the single-family and multifamily housing goals and subgoals for 2025 through 2027. The final rule also includes technical changes and factors FHFA will consider when determining whether an Enterprise would be required to submit a housing plan to FHFA should the Enterprise fail to meet three of the single-family housing goals.

DATES: This final rule is effective February 28, 2025.

FOR FURTHER INFORMATION CONTACT: For general questions, please contact MediaInquiries@FHFA.gov. For technical questions, please contact Padmasini Raman, Supervisory Policy Analyst, Housing & Community Investment, Division of Housing Mission and Goals, (202) 649-3633, Padmasini.Raman@fhfa.gov; or Carey Whitehead, Assistant General Counsel, Office of General Counsel, (202) 649-3630, Carey.Whitehead@fhfa.gov. These are not toll-free numbers. The mailing address is: Federal Housing Finance Agency, 400 Seventh Street SW, Washington, DC 20219. For TTY/TRS users with hearing and speech disabilities, dial 711 and ask to be connected to any of the contact numbers above.

SUPPLEMENTARY INFORMATION:

I. Background

A. Statutory and Regulatory Background for Enterprise Housing Goals

The Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (Safety and Soundness Act) requires FHFA to establish several annual housing goals for both single-family and multifamily mortgages purchased by the Enterprises.¹ The annual housing goals are one measure of the extent to which the Enterprises are meeting their public purposes, which include “an affirmative obligation to facilitate the financing of affordable housing for low- and moderate-income families in a manner consistent with their overall public purposes, while maintaining a strong financial condition and a reasonable economic return.”²

FHFA establishes annual housing goals for Enterprise purchases of single-family and multifamily mortgages consistent with the requirements of the Safety and Soundness Act. The structure of the housing goals and the parameters for determining how mortgage purchases are counted or not counted towards the goals are defined in FHFA’s Enterprise housing goals

regulation.³ This final rule amends the regulation to establish benchmark levels for the single-family and multifamily housing goals for 2025–2027.

Single-family housing goals. The single-family housing goals defined under the Safety and Soundness Act include separate categories for home purchase mortgages for low-income families, very low-income families, and families that reside in low-income areas.⁴ For purposes of the single-family housing goals, families that reside in low-income areas⁵ include: (1) families in low-income census tracts, defined as census tracts with median income less than or equal to 80 percent of area median income (AMI);⁶ (2) families with incomes less than or equal to 100 percent of AMI who reside in minority census tracts (defined as census tracts with a minority population of at least 30 percent and a tract median income of less than 100 percent of AMI);⁷ and (3) families with incomes less than or equal to 100 percent of AMI who reside in designated disaster areas.⁸ The Enterprise housing goals regulation also includes subgoals,⁹ within the low-income areas housing goal, that focus on single-family housing occupied by families in low-income census tracts and moderate-income families in minority census tracts.¹⁰ Performance on the single-family home purchase goals and subgoals is measured as the percentage of the total home purchase mortgages purchased by an Enterprise each year that qualify for each goal or subgoal. There is also a separate goal for single-family refinance mortgages for low-income families, and performance on the refinance goal is determined in a similar way.

³ 12 CFR part 1282.

⁴ 12 U.S.C. 4562(a)(1). To distinguish the goals and subgoals related to home purchase mortgages from the goal related to refinance mortgages, this preamble refers to the “low-income home purchase goal” and the “very low-income home purchase goal” to refer to the low-income families housing goal and the very low-income families housing goal, respectively, described in 12 CFR 1282.12(c) and (d). The terms “low-income census tracts home purchase subgoal” and “minority census tracts home purchase subgoal” are used to refer to the low-income census tracts housing subgoal and the minority census tracts housing subgoal, respectively, described in 12 CFR 1282.12(f) and (g).

⁵ See 12 U.S.C. 4502(28); 12 CFR 1282.1 (definition of “families in low-income areas”).

⁶ 12 CFR 1282.1 (par. (i) of definition of “families in low-income areas”).

⁷ 12 U.S.C. 4502(29); 12 CFR 1282.1 (par. (ii) of definition of “families in low-income areas” and definition of “minority census tract”).

⁸ 12 U.S.C. 4502(28); 12 CFR 1282.1 (definition of “designated disaster area” and par. (iii) of definition of “families in low-income areas”).

⁹ For brevity, sometimes this preamble uses the term “goals” to refer to goals and subgoals.

¹⁰ 12 CFR 1282.12(f).

Under the Safety and Soundness Act, the single-family housing goals are limited to mortgages on owner-occupied housing with one to four units. The single-family goals cover first lien, conventional, conforming mortgages, meaning mortgages that are not subordinate to other mortgage liens, that are not insured or guaranteed by the Federal Housing Administration or another government agency, and that have principal balances that do not exceed the conforming loan limits for Enterprise mortgages.

Two-part evaluation approach for single-family housing goals. The Enterprises’ performance on the single-family housing goals is evaluated using a two-part approach that compares the goal-qualifying share of each Enterprise’s mortgage purchases to two separate measures: a benchmark level and a market level. To meet a single-family housing goal, the percentage of mortgage purchases by an Enterprise that qualifies for credit under each goal must equal or exceed either the benchmark level or the market level for that year. The benchmark level is set prospectively by rulemaking based on various factors set forth in the Safety and Soundness Act, which are further discussed below.¹¹ The market level is determined retrospectively for each year, based on the actual goal-qualifying share of the overall market as measured by the Home Mortgage Disclosure Act¹² (HMDA) data for that year. The overall market that FHFA uses for setting both the prospective benchmark level and the retrospective market level consists of all single-family, owner-occupied, conventional, conforming mortgages that would be eligible for purchase by either Enterprise. It includes loans purchased by the Enterprises as well as comparable loans held in a lender’s portfolio. It also includes any loans that are part of a private label security, although few such securities have been issued for conventional conforming mortgages since 2008. Since 2018, several new HMDA data fields have become available. FHFA continues to monitor reporting of these new fields to consider potential adjustments to the way FHFA measures the overall market. Because FHFA’s econometric market models use past years’ data to construct the models, a potential transition to incorporate any new data variables will require time to obtain an adequate input data series.

While the retrospective market levels measure mortgage originations in a particular year, the performance of the

¹ 12 U.S.C. 4561(a).

² 12 U.S.C. 4501(7).

¹¹ See 12 U.S.C. 4562(e).

¹² 12 U.S.C. 2801 *et seq.*

Enterprises on the housing goals includes all Enterprise purchases in that year, regardless of the year in which the loan was originated. This includes any loans that are originated in one year and purchased by an Enterprise in a later year.

Multifamily housing goals. The multifamily housing goals defined under the Safety and Soundness Act include separate categories for mortgages on multifamily properties (properties with five or more units) with rental units affordable to low-income and very low-income families. The Safety and Soundness Act also requires reporting on smaller properties, and the Enterprise housing goals regulation includes a small multifamily low-income subgoal for properties with 5 to 50 units. The multifamily housing goals include all Enterprise multifamily mortgage purchases, regardless of the purpose of the loan. The multifamily housing goals evaluate the performance of the Enterprises based on the share of affordable units in properties that serve as collateral for mortgages purchased by an Enterprise. The Enterprise housing goals regulation does not include a retrospective market level measure for the multifamily housing goals, due in part to a lack of comprehensive data about the multifamily market. As a result, FHFA currently measures Enterprise multifamily housing goals performance against the benchmark levels only and the final rule retains this approach.

The Safety and Soundness Act requires that affordability for rental units under the multifamily housing goals be determined based on rents that “[do] not exceed 30 percent of the maximum income level of such income category, with appropriate adjustments for unit size as measured by the number of bedrooms.”¹³ The Enterprise housing goals regulation considers the net rent paid by the renter, *i.e.*, the rent is decreased by any subsidy payments that the renter may receive, including housing assistance payments.¹⁴

¹³ See 12 U.S.C. 4563(c). The 30 percent test for measuring affordability traces back to the “Brooke Amendment,” which amended the United States Housing Act of 1937 to cap public housing rents (Pub. L. 91–152). For purposes of the multifamily housing goals, to be affordable at the 80 percent of AMI level, the rents must not exceed 30 percent of the renter’s income, which must not exceed 80 percent of AMI. See https://www.huduser.gov/portal/pdredge/pdr_edge_featd_article_092214.html for a description of the Brooke Amendment and background on the notion of affordability embedded in the housing goals.

¹⁴ See 12 CFR 1282.1 (par. (i)(B) of definition of “rent”).

B. Considerations After Publication of the Final Rule

If, after publication of this final rule, new information indicates that any of the single-family or multifamily housing goals or subgoals should be adjusted in light of market conditions or the safety and soundness of the Enterprises, or for any other reason, FHFA may take any steps that are necessary and appropriate to respond, consistent with the Safety and Soundness Act and the Enterprise housing goals regulation.

For example, under the Safety and Soundness Act and the Enterprise housing goals regulation, FHFA is permitted to reduce a benchmark level in response to an Enterprise petition for reduction for any of the single-family or multifamily housing goals or subgoals in a particular year. Any adjustment in response to such a petition must be based on a determination by FHFA that: (1) market and economic conditions or the financial condition of the Enterprise require a reduction; or (2) efforts to meet the goal or subgoal would result in the constraint of liquidity, over-investment in certain market segments, or other consequences contrary to the intent of the Safety and Soundness Act or the purposes of the Enterprises’ charter acts.¹⁵

The Safety and Soundness Act and the Enterprise housing goals regulation also consider the possibility that achievement of a particular housing goal or subgoal may or may not have been feasible for an Enterprise. If FHFA determines that a housing goal or subgoal was not feasible for an Enterprise to achieve, then the statute and regulation do not require any further action related to that housing goal or subgoal for that year.¹⁶

If FHFA determines that an Enterprise did not meet a housing goal or subgoal and that achievement of the housing goal or subgoal was feasible, then the statute and regulation provide FHFA with discretionary authority to require the Enterprise to submit a housing plan describing the specific actions the Enterprise will take to improve its housing goals performance.¹⁷

C. Housing Goals Under Conservatorship

On September 6, 2008, FHFA placed each Enterprise into conservatorship. Although the Enterprises remain in conservatorship, they continue to have the mission of supporting a stable and

¹⁵ See 12 U.S.C. 4564(b); 12 CFR 1282.14(d).

¹⁶ See 12 U.S.C. 4566(b); 12 CFR 1282.21(a) (current regulation); 12 CFR 1282.22(a) (final rule).

¹⁷ See 12 U.S.C. 4566(c); 12 CFR 1282.21(a) (current regulation); 12 CFR 1282.22(a) (final rule).

liquid national market for residential mortgage financing. FHFA has continued to establish annual housing goals for the Enterprises and assess their performance under the housing goals each year during conservatorship.

II. Discussion of Proposed Rule and Public Comments

FHFA published a notice of proposed rulemaking (NPRM or proposed rule) in the **Federal Register** on August 29, 2024, that proposed benchmark levels for the single-family and multifamily housing goals for 2025–2027.¹⁸ The public comment period on the proposed rule ended on October 28, 2024. The NPRM proposed decreasing the benchmark levels for the single-family low-income home purchase and very low-income home purchase goals from the current benchmark levels in response to recent market conditions and forecast updates. The NPRM also proposed increasing the minority census tracts home purchase subgoal benchmark level, while maintaining the existing low-income census tracts home purchase subgoal and the low-income refinancing goal benchmark levels.

With respect to the multifamily benchmark levels, the NPRM proposed maintaining the existing low-income multifamily goal benchmark level, increasing the very low-income multifamily goal benchmark level, and decreasing the small (5–50 units) multifamily subgoal benchmark level.

In response to potential future uncertainty regarding the size and composition of the single-family mortgage market, the NPRM proposed including “Enforcement Factors” that FHFA would consider in determining when a housing plan would be required if an Enterprise failed to meet certain single-family housing goals during the 2025–2027 period.

The NPRM also proposed referring to the multifamily very low-income housing subgoal as a goal instead of a subgoal. In addition, the NPRM proposed technical changes intended to better conform the regulation to statutory text and existing FHFA practices and procedures and indicated that it may include additional technical changes or corrections in the final rule based on comments received.

Overview of comments received.

FHFA received 31 comment letters from 61 organizations and individuals in response to the proposed rule. Comments were submitted by both Enterprises, as well as by a community development financial institution, two mortgage companies, and four trade

¹⁸ 89 FR 70127 (Aug. 29, 2024).

associations (one trade association submitted two letters). FHFA also received one comment letter signed by 20 Members of Congress, and seven comment letters from policy advocacy organizations, with one letter representing the views of eleven organizations and another representing the views of five organizations. Eleven individuals submitted the remaining thirteen comment letters (one individual submitted three letters). FHFA also held several meetings with stakeholders to describe the content of the proposed rule and to discuss issues raised by the proposed rule.¹⁹

FHFA has reviewed and considered all the comments. Several of the letters raised issues unrelated to the housing goals or beyond the scope of the proposed rule, and those comments are not addressed in this final rule. Specific provisions of the proposed rule, and the comments received on those provisions, are discussed below and throughout this final rule.

Proposed single-family housing goals benchmark levels.

Most of the commenters who addressed the proposed single-family goals, including the Enterprises, three individuals, three trade associations, and three nonprofit advocacy organizations, expressed overall support for the proposed benchmark levels. Many of these commenters also acknowledged the challenges associated with developing updated benchmark levels for the single-family housing goals using forecast models, particularly given recent and future mortgage market conditions. One nonprofit advocacy organization stated that while their organization has traditionally opposed reductions in the affordable housing goals, they recognize that higher interest rates and a historically low supply of affordable homes have combined to severely limit home purchase options for low-income households. The commenter also expressed support for FHFA's efforts to balance market dynamics and the desire to set single-family goals at relatively high levels. Another comment letter submitted on behalf of several nonprofit advocacy groups acknowledged the challenges posed by rising interest rates in the housing market in recent years and FHFA's ongoing commitment to navigate the complexities of a high-interest rate environment while supporting racial equity initiatives. The comment letter also noted that while the

previous housing goals were established as reasonable stretch targets based on market conditions at that time, it is vital that FHFA adopt new strategies to better address the current economic landscape. One trade association stated that the proposed goals strike the right balance between continuing to push the Enterprises to fulfill their mission to serve low- and moderate-income homebuyers and homeowners, while doing so in a financially responsible and achievable manner.

Although both Enterprises conveyed support for the proposed single-family home purchase benchmark levels, both also expressed concerns over uncertainty in the housing and loan origination market. Fannie Mae welcomed the proposed reductions in the low-income and very low-income benchmark levels but noted that uncertainty and constraints in housing supply and affordability could challenge its ability to meet the proposed benchmark levels.

Three nonprofit advocacy organizations, one trade association, and a community development financial institution disagreed with all or many of the proposed single-family goal benchmark levels, and their comments supported maintaining or increasing the benchmark levels relative to the levels established for 2022 through 2024. Some of these commenters specifically opposed the proposed reductions in the benchmark levels for the low-income home purchase and very low-income home purchase goals. A few of these commenters also recommended that the benchmark levels for the low-income refinancing goal and the low-income census tracts home purchase subgoal be increased. These commenters urged FHFA to remain aggressive and ambitious when setting the housing goal benchmark levels as a means to motivate the Enterprises to lead the market. Several of these commenters stressed the critical role the goals and subgoals play in providing access to mortgage credit for low-income and very low-income borrowers by ensuring that the Enterprises properly focus on this important aspect of their mission.

Proposed benchmark levels for single-family low-income and very low-income home purchase goals.

Three nonprofit advocacy organizations and one community development financial institution recommended that the proposed benchmark levels for the single-family low-income home purchase goal, which FHFA proposed to lower from 28 percent to 25 percent, and the single-family very low-income home purchase goal, which FHFA proposed to lower

from 7 percent to 6 percent, be increased in the final rule. These commenters maintained that the proposed benchmark levels were not aggressive enough given that interest rates had declined since the proposed rule was published. A few of these commenters pointed out that the proposed benchmark levels for the low-income and very low-income home purchase goals were set at levels lower than the midpoints of the forecasts. As noted above, several of these commenters stated that the Enterprises should be given more ambitious low-income and very low-income home purchase goals to motivate them to lead the market.

Proposed single-family low-income census tracts home purchase subgoal.

One individual commented that the proposed rule, which would maintain the current benchmark level for the single-family low-income census tracts home purchase subgoal at 4 percent, is lower than past performance as well as projected forecast performance. The commenter further noted that a higher benchmark level for this subgoal would be more consistent with past Enterprise performance and projected market performance (*i.e.*, two of the statutory factors that must be considered when establishing a goal or subgoal). Two policy advocacy groups urged FHFA to set a higher benchmark level for this subgoal and pointed out that FHFA's model forecast and Enterprise performance in recent years have been higher than the proposed benchmark level of 4 percent.

Proposed single-family minority census tracts subgoal.

Many commenters supported the proposed increase in the benchmark level for the single-family minority census tracts home purchase subgoal from 10 percent to 12 percent. A comment letter submitted on behalf of several nonprofit advocacy organizations expressed support for this proposed increase and noted that the previous benchmark level did not present a significant challenge for the Enterprises to meet. A community development financial institution also supported the proposed increase, and encouraged FHFA to further increase it over time given the critical need to close the persistent racial and ethnic homeownership gaps that perpetuate inequality. A nonprofit advocacy organization recommended that FHFA set the benchmark level at 13 percent rather than 12 percent to push the Enterprises to pursue innovations that drive the market in light of population trends that may lead to a greater share of census tracts where at least 30

¹⁹ Summaries of each of these meetings are available at <https://www.fhfa.gov/regulation/federal-register/proposed-rulemaking/2025-2027-enterprise-housing-goals>.

percent of the population identifies as non-white. Another nonprofit advocacy group stated that because the statutory definition of “minority census tract” is broad, FHFA should greatly increase the benchmark level for this subgoal to incentivize the Enterprises to close the racial homeownership gaps for specific minority groups.

Proposed single-family low-income refinance goal.

Most of the commenters who addressed the proposed low-income refinance goal supported the proposal, which would maintain the current benchmark level at 26 percent. Several of the commenters recognized the challenges associated with forecasting the refinance market. For example, one trade association noted that the refinance market is more sensitive to interest rates, making it more difficult to forecast compared to the home purchase market. A policy advocacy group acknowledged that the refinance market is more unpredictable and volatile than the home purchase market due to increased sensitivity to interest rates, but nevertheless encouraged FHFA to increase the benchmark level for this goal in response to the forecasted market. To address the challenges associated with establishing this goal, the trade association also suggested that FHFA consider establishing a secondary assessment factor based on the number of loans purchased when unique market factors drive large or unanticipated increases in the denominator²⁰ to better assess the number of low-income refinances purchased year over year.

Measurement buffers (called “Enforcement Factors” in the proposed rule).

In the proposed rule preamble, FHFA specifically requested comments on the proposed factors (referred to as “Enforcement Factors” in the NPRM) that FHFA would consider when determining if a housing plan would be required if an Enterprise failed to meet certain single-family housing goals during the 2025–2027 housing goals period. Specifically, FHFA proposed language in section 1282.22 to indicate that it would not require a housing plan if the benchmark level for a single-family housing goal is higher than the market level for the goal and the Enterprise’s performance meets or exceeds the market level minus a specified percentage point. The applicable percentage point is different for the low-income home purchase goal,

the very low-income home purchase goal, and the low-income refinance goal. FHFA did not propose similar factors for single-family subgoals. FHFA also proposed limitations so that the factors would not apply in 2027 if the Enterprise did not meet the market and the benchmark levels in 2025 and 2026.

Several commenters, including a nonprofit advocacy organization, both Enterprises, three trade associations, and a mortgage company expressed support for the proposed factors. The nonprofit advocacy organization commented that the proposed factors would offer flexibilities that will allow the Enterprises to better adapt their business activities to market changes without having to focus on meeting one static metric. One trade association noted that the proposed factors would allow the Enterprises to address unexpected market outcomes to prevent unintended consequences, including unwanted market behaviors that would not benefit the intended borrowers. A mortgage company welcomed the additional flexibility based on current market conditions that the proposed factors would provide.

Fannie Mae expressed general support for the proposed enforcement factors, indicating that the proposed factors considered the difficulties an Enterprise may experience when managing to the anticipated market share rather than the fixed benchmark levels. Fannie Mae noted that while the use of the proposed factors would not change the requirement that an Enterprise meet or surpass each of the single-family housing goals benchmark levels or market share levels, implementation of the factors would provide the Enterprises some assurance considering the uncertainty inherent in predicting market share, especially in the absence of fulsome data.

Freddie Mac expressed support for the proposed enforcement factors, noting that they would appropriately account for market fluctuations and uncertainties that cannot be adequately predicted months or years in advance due to the lack of inclusive and timely market data. Freddie Mac described the proposed factors as a “necessary safeguard” for offsetting any potential gap between the actual and forecasted market levels during the 2025–2027 housing goal period. Freddie Mac also supported the proposed limitations on the use of the proposed factors. Specifically, if an Enterprise fails to meet one of the single-family low-income housing goals in both 2025 and 2026, it would not be allowed to apply the proposed factor to the applicable housing goal in 2027. Freddie Mac

noted that the proposed limitation on the use of the proposed factors would appropriately account for the uncertainty of market conditions and forecasting while maintaining the Enterprises’ responsibility to develop strategies for achieving the housing goals.

Comment letters submitted on behalf of several policy advocacy organizations expressed opposition to the proposed enforcement factors, based on the view that they would reduce the accountability of the Enterprises and allow them to meet a share lower than the market level. As noted in the NPRM, the use of the enforcement factors would be limited and designed to balance the importance of meeting the housing goals with support for liquidity in all market segments. To balance these needs, FHFA narrowly targeted the proposed enforcement factors to apply only to certain single-family housing goals and only for 2025–2027. FHFA noted that it would consider a proposed factor only if the benchmark levels for certain single-family goals were a stretch goal (*i.e.*, above the HMDA market measure) for the year.

Two comments submitted on behalf of nonprofit advocacy organizations expressed concern that the proposed factors would relax performance requirements for the Enterprises. FHFA notes that these comments do not reflect the intent behind the proposed factors. As proposed, the factors do not modify the standards for meeting the housing goals. The Enterprises are still required to meet the lower of the benchmark level or the market level for each goal. FHFA will continue to make a final determination of each Enterprise’s performance under each single-family housing goal and subgoal and each multifamily housing goal and subgoal and will continue to notify Congress if an Enterprise fails to meet any of the goals or subgoals.

Proposed multifamily housing goals benchmark levels.

Several of the commenters that commented on the proposed multifamily housing goals benchmark levels supported the proposal to maintain the current multifamily low-income goal benchmark level at 61 percent, to increase the multifamily very low-income goal benchmark level from 12 percent to 14 percent, and to reduce the small multifamily low-income subgoal benchmark level from 2.5 to 2.0 percent. One trade association supported all the proposed multifamily goal benchmark levels, stating that they would effectively balance the role of the Enterprises in supporting affordable housing and providing liquidity to the

²⁰ For refinance mortgages, the denominator is the total number of refinancing mortgage purchases of an Enterprise in a particular year that finance owner-occupied single-family properties.

entire multifamily market. Another trade association stated that the proposed benchmark levels strike the right balance between continuing to push the Enterprises to fulfill their mission while doing so in a financially responsible and achievable manner. Another trade association referred to the proposed benchmark levels as a “reasonable” mandate for the Enterprises that would provide a critical framework for mortgage funding. A nonprofit advocacy organization supported the proposal to keep the multifamily housing goals at elevated levels. The organization particularly supported the proposed increase in the very low-income goal benchmark level from 12 percent to 14 percent, noting that very low-income renters have been disproportionately impacted by the affordable housing crisis and face a severe shortage of affordable options.

Of the remaining commenters on the multifamily housing goals, three nonprofit advocacy organizations, 20 Members of Congress, and three individuals supported one or more of the proposed multifamily goals or the subgoal benchmark levels, while two nonprofit advocacy organizations opposed all the proposed multifamily goals benchmark levels. Two letters submitted by nonprofit advocacy organizations (one submitted on behalf of 11 nonprofit advocacy organizations) encouraged FHFA to adopt a higher benchmark level for the multifamily low-income housing goal but expressed support for the proposed multifamily very low-income benchmark level. Conversely, another policy advocacy organization supported maintaining the multifamily low-income housing goal benchmark level at 61 percent but urged FHFA to adopt a benchmark level for the multifamily very low-income housing goal higher than 12 percent, not realizing that FHFA proposed increasing this goal to 14 percent. A letter submitted on behalf of 20 Members of Congress called on FHFA to increase the proposed multifamily low-income housing goal benchmark level. With respect to the proposed multifamily low-income housing goal, the letters submitted by and on behalf of policy advocacy organizations, as well as the 20 Members of Congress, stressed that the Enterprises’ previous performance highlighted their ability to lead in providing credit for multifamily mortgages that serve low-income households. For example, one of the commenters noted that because both Enterprises’ multifamily lending activity easily exceeded the 61 percent

benchmark level each year from 2020 to 2023, the multifamily low-income housing goal benchmark level should be increased to 65 percent. The letter submitted on behalf of the Members of Congress also noted that recent decreases in the target range for the federal funds rate, as well as the potential for additional decreases, coupled with individual state actions to increase housing supply pointed towards new opportunities for the Enterprises to meet higher benchmark levels.

Regarding the proposed multifamily very low-income goal, a nonprofit advocacy organization expressed support for the proposed increase in the benchmark level by highlighting the important role the Enterprises play in helping to address the affordable housing needs of very low-income renters. The commenter pointed out that both Enterprises have easily exceeded the 12 percent benchmark level in recent years. The commenter also noted that developers of very low-income rental units often struggle to access affordable capital and that the Enterprises are well-suited to address these developers’ funding needs. Another policy advocacy organization viewed a benchmark level of 12 percent to be proportionally low in comparison to the proposed multifamily low-income housing goal benchmark level as well as the past performance of the Enterprises. The commenter noted that Fannie Mae’s multifamily very low-income housing goal performance was 18.7 percent for 2023, while Freddie Mac’s was 20.6 percent. As a result, the commenter recommended that FHFA increase the multifamily very low-income housing goal benchmark level in the final rule to reflect the greater need for affordable housing as well as to make it more proportional to the relationship between performance and benchmarking.

One of the nonprofit advocacy organizations stated that FHFA is too conservative with its setting of the multifamily goal benchmark levels. The commenter noted that the recent historical performance of the Enterprises indicates that the proposed multifamily goals and subgoal benchmark levels should be more ambitious. The commenter expressed concern that the large difference between goal benchmark level setting and historical performance will encourage the Enterprises to “back slide,” which will hurt the housing supply for low-income rental units during a time when rents have been increasing significantly. Another

nonprofit advocacy organization strongly urged FHFA to set higher multifamily goal benchmark levels in response to the “fair and affordable housing crisis” to incentivize the Enterprises to lead and move the market to give renters more opportunities for fair and affordable multifamily housing.

Proposed small multifamily housing subgoal benchmark level.

There were mixed reactions among those commenters that addressed the proposal to lower the benchmark level for the small multifamily low-income subgoal (which is for properties with 5 to 50 units) from 2.5 percent to 2 percent. One trade association supported the proposed reduction in the benchmark level, stating that this sector is well-supported by private capital sources. Freddie Mac stated that the proposal was appropriate given how sensitive this segment of the market is to market conditions and noted that this market sensitivity has resulted in fewer owners of such properties seeking financing relative to the market overall. Freddie Mac also stated that while it is important for the Enterprises to play a role in this market by advancing beneficial standards and providing countercyclical liquidity, the Enterprises should not crowd out private capital providers including regional banks and small financial institutions. Fannie Mae also supported the proposed benchmark level, stating that a reduction from 2.5 percent to 2 percent is consistent with the ongoing competition for these loans in the market.

One nonprofit advocacy organization and three individuals urged FHFA to maintain the benchmark level for this subgoal at the current 2.5 percent. A nonprofit advocacy organization and a letter on behalf of 20 Members of Congress recommended that the benchmark level be raised to above 2.5 percent. The commenters argued that because the Enterprises have exceeded the 2.5 percent subgoal for the last four years, there is no need to decrease the benchmark level. The commenters emphasized that Enterprise support is crucial for these properties, noting that small multifamily properties serve as a critical source of affordable housing in rural areas and other underserved communities and owners of these properties struggle to access capital as readily as owners of larger developments.

Technical changes.

Fannie Mae commented that the proposed technical changes related to enforcement of the housing goals omit certain language in the Safety and Soundness Act at 12 U.S.C. 4566(c)(7), 4581(a)(3), and 4585(a)(3) that refers to goals established under specific sections of the statute. Fannie Mae suggested that FHFA modify the proposed rule language to avoid confusion about the enforcement options available for the housing goals. As stated in the proposed rule preamble, FHFA proposed technical changes “to better conform the regulation to statutory text” and to improve transparency by providing a more complete description of FHFA’s enforcement authority.²¹ FHFA did not intend the proposed technical changes to expand or to limit FHFA’s authority to enforce housing plans under the Safety and Soundness Act or any other applicable law.

Other issues not included in the proposed rule, but raised by commenters:

Duration of goals and opportunity for comment. One nonprofit advocacy organization urged FHFA to set two-year, rather than three-year, benchmark levels for the single-family and multifamily goals. The commenter reasoned that because forecasts are more accurate in shorter time frames, two-year goals could allow for more aggressive benchmark levels. The commenter also stated that a two-year cycle would increase the frequency of public comments and suggested that FHFA request public comments on the Enterprises’ performance under the goals, specifically with respect to housing plans.

Under the Safety and Soundness Act, FHFA is required to establish the annual housing goals benchmark levels in a regulation, which FHFA adopts through notice and comment rulemaking.²² FHFA has chosen a three-year housing goals period, as it enables the Enterprises to plan their business activities more effectively and make progress towards meeting the goals. FHFA continues to believe that the establishment of three-year housing goals better enables the Enterprises to develop and implement high-level strategies for guiding their respective organizations towards achieving all the single-family and multifamily housing goals. The establishment and implementation of three-year housing goals also allows the Enterprises to map out, develop, and invest in longer-term

strategies designed to achieve the housing goals.

In response to the commenter’s recommendation that FHFA request public comments on the Enterprises’ performance under the goals, specifically on housing plans, FHFA notes that FHFA issues an Annual Housing Report (Report) pursuant to 12 U.S.C. 4566. The Report describes the affordable and other housing activities of Fannie Mae and Freddie Mac during the preceding year and FHFA’s final review of the Enterprises’ housing goals performance, including copies of the final determination letters FHFA sends each Enterprise. The Report also indicates whether FHFA has required an Enterprise to submit a housing plan if the Enterprise fails to meet one or more of the goals and such goals were feasible. Because an Enterprise’s housing plan may contain proprietary information, FHFA does not believe it is appropriate to request public input on the strategies and initiatives the Enterprise intends to pursue to correct and improve its housing goal performance.

Enterprises’ ability to lead the market. Three nonprofit advocacy organizations argued that the Enterprises be given higher, more ambitious goals to ensure they lead and “drive up” the market to serve the needs of neglected populations and address the nation’s affordable housing crisis. As further discussed below, the Safety and Soundness Act requires FHFA to balance seven statutory factors in setting the benchmark levels for the single-family housing goals, and six statutory factors in setting the benchmark levels for the multifamily housing goals. Under the statute, FHFA must consider the *ability* of the Enterprises to lead the single-family and multifamily markets, as well as other factors such as recent Enterprise and market performance, current and expected market conditions, and the safety and soundness of the Enterprises. In setting benchmark levels, FHFA takes all the statutory factors into account to enable the Enterprises to continue to provide critical support to the different goal market segments while also supporting the rest of the market.

Publishing local data on Enterprise performance. One nonprofit advocacy organization stated that FHFA should publish local data on Enterprise performance to enable stakeholders to better identify underserved areas with many goal-qualified loans due to relatively high levels of housing affordability but are perhaps overlooked by the primary and secondary markets. The commenter suggested that FHFA create a database that would include

income to housing ratios and other indicia of affordability that could help identify the underserved areas with a high share of goal-qualified loans.

FHFA publishes state-level data from HMDA and on Enterprise performance on each single-family housing goal. Because the housing goals are set across all localities and for all Enterprise acquisitions in any given year, and because loan origination volume fluctuates depending on macroeconomic conditions, primary market activities, and Enterprise participation in the secondary market in each locality, comparisons of locality data across years may be misleading without adequate context about the extent of primary mortgage activity in the area as well as secondary market activities. FHFA will continue to conduct research and provide data that FHFA believes would be beneficial to the public.

Additional tract “criteria” for the single-family low-income census tracts home purchase subgoal. A nonprofit advocacy organization commented that FHFA could use additional census tract “criteria” to ensure mortgage credit is made available to underserved, disinvested markets (where gentrification is not happening or is less of a concern) and limit borrower income in some low-income census tracts. The commenter noted the additional criteria are necessary because mortgage credit remains scarce in rural areas, smaller post-industrial legacy cities, and poor urban neighborhoods. The commenter urged FHFA to examine tailoring the single-family low-income census tracts home purchase subgoal to better scale its impact on underserved, low-income markets.

FHFA notes that gentrification and disinvestment are measured on multiple dimensions and data series on these measures are not readily available. FHFA first established the minority census tracts subgoal and the low-income census tracts subgoal for the 2022–2024 period, and there have only been two complete performance years for these subgoals. FHFA will continue to analyze the subgoal performance as related to these issues and will publish information on FHFA’s website as appropriate.

Setting housing goals consistently. One nonprofit advocacy organization stated that the housing goals are not set consistently because some goals are set below the market forecast, while other goals are set at the market forecast. When proposing the benchmark levels, FHFA considers the most up-to-date expected market conditions as indicated by a forecast produced by Moody’s and the latest HMDA market levels for

²¹ 89 FR 70127, 70130.

²² 12 U.S.C. 4561(a).

which the loan level data series are available to include in the model when developing the proposed rule. FHFA also considers Enterprise performance for the partial year, to appropriately adjust the model-generated benchmark levels. The proposed rule's benchmark level for the low-income census tracts home purchase subgoal was set below the market forecast at that time to address displacement concerns. The proposed rule's benchmark level for the low-income refinance goal was set below the market forecast as this segment is highly sensitive to interest rate changes. In addition, there is limited economic data regarding how many borrowers are "locked in" by their current low mortgage rates, meaning that they are less likely to refinance or sell their home while prevailing mortgage rates are higher than their current rate. FHFA also notes that along with the market forecast, FHFA must consider the statutory factors in the Safety and Soundness Act that are not included in the market model when setting each benchmark level, as discussed in more detail below.

Support for market-rate units. One trade association recommended that

FHFA help the Enterprises balance their housing goals with providing liquidity support for market-rate units. FHFA considered market-rate units when setting the cap on multifamily purchase volume (the Multifamily Cap) and the percent of loans purchased that must be "mission-driven," in the Conservatorship Scorecard.²³ The proposed Enterprise housing goals, however, are focused on families at or below specific AMI levels and FHFA sought to balance these objectives.

Simplify Enterprise goals and targets. One trade association encouraged FHFA to work towards simplifying the various multifamily affordable and mission-related goals of the Enterprises (including the housing goals that are the subject of this final rule, the Conservatorship Scorecard, and the Duty to Serve requirements in 12 CFR part 1282, subpart C). Each of these requirements helps ensure that the Enterprises fulfill a different aspect of their statutory mission and charters, as well as that they serve low- and moderate-income families and underserved markets in different ways. FHFA has already taken measures to assist the Enterprises in coordinating

their efforts with respect to these requirements. For example, FHFA's 2023–2024 Multifamily Enterprise Housing Goals final rule established the benchmark levels for the multifamily goals based on a new methodology—the percentage of affordable units in multifamily properties financed by mortgages purchased by the Enterprise each year. FHFA believes that this change has simplified the multifamily housing goals in a way that complements the Multifamily Cap and enables the Enterprises to meet both targets more seamlessly. FHFA will continue to explore ways to coordinate and streamline the requirements of the various multifamily affordable and mission-related goals of the Enterprises while ensuring these goals are achieved.

III. Summary of Final Rule

A. Benchmark Levels for the Single-Family Housing Goals and Subgoals—§ 1282.12

This final rule establishes the benchmark levels for the single-family housing goals and subgoals for 2025–2027 as follows:

Goal or subgoal	Criteria	Final benchmark level for 2025–2027 (percent)
Low-Income Home Purchase Goal.	Home purchase mortgages on single-family, owner-occupied properties, to borrowers with incomes no greater than 80 percent of area median income (AMI).	25
Very Low-Income Home Purchase Goal.	Home purchase mortgages on single-family, owner-occupied properties, to borrowers with incomes no greater than 50 percent of AMI.	6
Low-Income Refinance Goal	Refinance mortgages on single-family, owner-occupied properties, to borrowers with incomes no greater than 80 percent of AMI.	26
Minority Census Tracts Home Purchase Subgoal.	Home purchase mortgages on single-family, owner-occupied properties to borrowers with incomes no greater than 100 percent of AMI in minority census tracts. ¹ .	12
Low-Income Census Tracts Home Purchase Subgoal.	(i) Home purchase mortgages on single-family, owner-occupied properties to borrowers (regardless of income) in low-income census tracts ² that are not minority census tracts, and (ii) home purchase mortgages on single-family, owner-occupied properties to borrowers with incomes greater than 100 percent of AMI in low-income census tracts that are also minority census tracts..	4

¹ Census tracts that have a minority population of at least 30 percent and a median income of less than 100 percent of AMI.

² Census tracts where the median income is no greater than 80 percent of AMI.

As in previous rulemakings, the low-income areas housing goal benchmark level is not included in this final rule. Under the existing regulation, the benchmark level will be the sum of the benchmark levels for the minority census tracts home purchase subgoal and the low-income census tracts home

purchase subgoal established in this final rule, plus an additional amount that will be determined separately by FHFA by notice that considers families in disaster areas with incomes no greater than 100 percent of AMI.²⁴

B. Benchmark Levels for the Multifamily Housing Goals and Subgoal—§ 1282.13

The final rule establishes the benchmark levels for the multifamily housing goals and subgoal for 2025–2027 as follows:

²³ In an annual Conservatorship Scorecard, FHFA establishes a cap on the multifamily purchase volume of each Enterprise. The Scorecard also establishes a percentage of multifamily purchases within the cap that must be "mission driven," a defined term that generally encompasses affordable and underserved market segments. The 2024 Scorecard sets a cap of \$70 billion on each

Enterprise and requires that at least half of Enterprise multifamily loan purchases be "mission-driven." Details are available in the fact sheet "2025 Multifamily Loan Purchase Caps for Fannie Mae and Freddie Mac," available at <https://www.fhfa.gov/news/fact-sheet/2025-multifamily-loan-purchase-caps-for-fannie-mae-and-freddie-mac>.

²⁴ See 12 CFR 1282.12(e). The benchmark level for 2024 is 19 percent. The notices setting this benchmark level can be found on FHFA's website at <https://www.fhfa.gov/sites/default/files/2024-06/2024-Low-Income-Areas-Goal-Fannie-Mae.pdf> and <https://www.fhfa.gov/sites/default/files/2024-06/2024-Low-Income-Areas-Goal-Freddie-Mac.pdf>.

Goals and subgoal	Criteria	Final benchmark level for 2025–2027 (percent)
Low-Income Goal	Percentage share of all goal-eligible units in multifamily properties financed by mortgages purchased by the Enterprise in the year that are affordable to low-income families, defined as families with incomes less than or equal to 80 percent of AMI.	61
Very Low-Income Goal	Percentage share of all goal-eligible units in multifamily properties financed by mortgages purchased by the Enterprise in the year that are affordable to very low-income families, defined as families with incomes less than or equal to 50 percent of AMI.	14
Small Multifamily Low-Income Subgoal.	Percentage share of all goal-eligible units in all multifamily properties financed by mortgages purchased by the Enterprise in the year that are units in small multifamily properties affordable to low-income families, defined as families with incomes less than or equal to 80 percent of AMI.	2

C. Measurement Buffers (Referred to as “Enforcement Factors” in the Proposed Rule)—§ 1282.22(b)

Consistent with the proposed rule, the final rule establishes new factors for the 2025–2027 housing goals period that FHFA will apply in determining whether to require a housing plan if an Enterprise fails to meet certain single-family housing goals in 2025–2027. The final rule establishes the numerical factors as proposed but changes the name to “measurement buffers.” Specifically, for 2025–2027, if the benchmark level for the single-family low-income home purchase, very low-income home purchase, or low-income refinance housing goal is higher than the market level for the goal, an Enterprise that fails to meet the goal will not be required to submit a housing plan if the Enterprise’s performance meets or exceeds: (i) the market level minus 1.3 percentage points for the low-income home purchase goal; (ii) the market level minus 0.5 percentage points for the very low-income home purchase goal; or (iii) the market level minus 1.3 percentage points for the low-income refinance goal. To ensure that an Enterprise does not rely entirely on these measurement buffers, if an Enterprise fails to meet one of the applicable goals in both 2025 and 2026, the measurement buffer will not apply to that goal in 2027.

D. Multifamily Very Low-Income Housing Goal—§§ 1282.11(a)(1); 1282.13(a) and (c); 1282.15(c) and (e)

The final rule revises the housing goals regulation to refer to the multifamily very low-income housing subgoal as a goal instead of a subgoal. This change is consistent with the Safety and Soundness Act, the reference to the single-family very low-income home purchase goal in 12 CFR 1282.12(d) as a goal and not a subgoal, and FHFA’s practice of referring to

“multifamily housing goals.”²⁵ FHFA received one comment (NDI) supporting this proposed change.

E. Technical Changes—§§ 1282.1; 1282.11(a)(1); 1282.13 (Header); 1282.20; 1282.21; 1282.22

Consistent with the proposed rule, the final rule makes minor technical changes to the housing goals regulation that are intended to better conform the regulation to statutory text and existing FHFA practices and procedures. Except as discussed in this preamble regarding proposed changes to § 1282.22(g), FHFA received no comments on the proposed technical changes.

The final rule modifies the definition of “designated disaster area” in § 1282.1 as proposed, to reflect that major disasters are designated (declared) by the President under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*). FHFA modified the definition to add the reference to the designation by the President and deleted the reference to “declared by the Federal Government.” This change eliminates potential confusion about which disasters are associated with designated disaster areas.

Consistent with the proposed rule, the final rule modifies § 1282.11(a)(1) to correctly reference the various housing goals. That paragraph previously referred to one single-family housing subgoal and is modified in the final rule to reference the two single-family, owner-occupied, purchase money mortgage housing subgoals. The final rule also removes the words “special affordable” that until now described the multifamily goals and subgoals in § 1282.11(a)(1) and the header in § 1282.13 for simplicity and to

consistently reference single-family and multifamily goals and subgoals. Affordability remains a criterion for units to count towards meeting the goals and subgoal, however.

In addition, consistent with the proposed rule, the final rule makes non-substantive changes to the enforcement provisions in § 1282.20 and redesignates housing plan provisions in § 1282.21 as a new § 1282.22. Specifically, the final rule modifies § 1282.20 to separate and more fully describe the preliminary and final determinations of housing goals compliance. As modified, § 1282.20 addresses preliminary determinations of housing goals compliance; § 1282.21 addresses final determinations of housing goals compliance. These sections also include revised wording that conforms to FHFA’s established practices.

The final rule revises and republishes newly redesignated § 1282.22 to include the measurement buffers for the 2025–2027 single-family housing goals in paragraph (b). The final rule relocates provisions in § 1282.21(b) through (e) to § 1282.22(c) through (f). Paragraph (c)(3) includes an additional technical change inadvertently omitted in the proposed rule to add “or subgoal” for consistency with the changes to § 1282.22(a) in the proposed and final rules. Paragraph (f) includes technical changes to clarify that if a proposed amended housing plan is not acceptable to the Director, the Director may afford the Enterprise 15 days to submit additional amendments to its proposed plan for approval or disapproval, rather than requiring a “new” proposed plan. Except as noted, these changes are included in the final rule as proposed in the NPRM.

The final also rule includes the new proposed provision at § 1282.22(g) that incorporates the housing plan enforcement provisions contained in the

²⁵ 12 U.S.C. 4563(a)(2) requires FHFA to establish “additional requirements” for units affordable to very low-income families when it establishes the goal for mortgages on multifamily properties that finance dwelling units affordable to very low-income families.

Safety and Soundness Act.²⁶ That paragraph provides that if the Director requires an Enterprise to submit a housing plan and the Enterprise refuses to submit such a plan, submits an unacceptable plan, or fails to comply with the plan, the Director may issue a cease and desist order in accordance with 12 U.S.C. 4581, impose civil money penalties in accordance with 12 U.S.C. 4585, or take any other action that the Director determines to be appropriate. The Safety and Soundness Act provides authority to enforce the housing plans, but this authority was not previously described in the Enterprise housing goals regulation. Including these provisions in the final rule supports transparency by providing a more complete description of FHFA's enforcement authority. This change makes it easier for anyone unfamiliar with the Safety and Soundness Act to understand the potential consequences if an Enterprise fails to submit an acceptable housing plan or fails to comply with the plan as required. This is the only technical change addressed by a comment on the proposed rule. In response to a comment from Fannie Mae suggesting that FHFA modify the proposed rule language to provide clarity about the enforcement options available for the housing goals, FHFA is including language in § 1282.22(g) to indicate that enforcement of housing plans will be consistent with 12 U.S.C. 4566 and any other applicable requirements of the Safety and Soundness Act.

IV. Single-Family Housing Goals and Subgoals

A. Factors Considered in Setting the Single-Family Housing Goal Benchmark Levels

The Safety and Soundness Act requires FHFA to consider the following seven factors in setting the single-family housing goals:

1. National housing needs;
2. Economic, housing, and demographic conditions, including expected market developments;
3. The performance and effort of the Enterprises toward achieving the housing goals in previous years;
4. The ability of the Enterprises to lead the industry in making mortgage credit available;
5. Such other reliable mortgage data as may be available;
6. The size of the purchase money conventional mortgage market, or refinance conventional mortgage market, as applicable, serving each of

the types of families described, relative to the size of the overall purchase money mortgage market or the overall refinance mortgage market, respectively; and

7. The need to maintain the sound financial condition of the Enterprises.²⁷

FHFA has considered each of these seven statutory factors in setting the benchmark levels for each of the single-family housing goals and subgoals in the final rule.

In setting the benchmark levels for the single-family housing goals and subgoals, FHFA relied on statistical market models developed by FHFA to evaluate four of the seven factors (national housing needs; economic, housing, and demographic conditions; other reliable mortgage data; and the size of the conventional purchase money or refinance mortgage segment). These market models generate a point forecast for each goal as well as a confidence interval for the point forecast. FHFA also monitors information on market developments that are not reflected in the model. FHFA then considers the other statutory factors (performance and effort of the Enterprises to lead the industry in making mortgage credit available; the ability of the Enterprises to do so; and the need to maintain sound financial condition of the Enterprises). These factors are not explicitly modeled in the statistical forecast models. Therefore, FHFA considered these factors when setting the benchmark levels within the model generated confidence intervals for the 2025–2027 single-family housing goals.

Market forecast models. The purpose of FHFA's market forecast models is to forecast the market share of the goal-qualifying mortgage originations for the 2025–2027 period. The models are intended to generate reliable forecasts rather than to test various economic hypotheses about the housing market or to explain the relationship between variables. Therefore, following standard practice among forecasters and economists at other federal agencies, FHFA estimates a reduced-form equation for each of the housing goals and fits an Autoregressive Integrated Moving Average (or ARIMA) model to each goal share. The models look at the statistical relationship between (a) the historical market share for each single-family housing goal or subgoal, as calculated from monthly HMDA data, and (b) the historical values for various factors that may influence the market shares, such as interest rates, inflation, home prices, home sales, the

unemployment rate, and other factors. The models then project the future value of the affordable market share using forecast values of the model inputs. Separate models are developed for each of the single-family housing goals and subgoals.

FHFA has employed similar models in past Enterprise housing goals rulemaking cycles to generate market forecasts. The models are developed using monthly series generated from HMDA and other data sources, and the resulting monthly forecasts are then averaged into an annual forecast for each of the three years in the goal period. The models rely on 20 years of HMDA data, from 2004 to 2023, the latest year for which public HMDA data was available at the time of model construction. Additional discussion of the market forecast models can be found in a technical report on FHFA's official website.²⁸

Current market outlook. There are many factors that impact the affordable housing market, and changes to any of them could significantly impact the ability of the Enterprises to meet the goals. In developing the market models, FHFA used Moody's forecasts as the source for macroeconomic variables where available.²⁹ In cases where Moody's forecasts were not available (for example, the share of government-insured/guaranteed home purchases and the share of government-insured/guaranteed refinances), FHFA generated and tested its own forecasts as in past rulemakings.³⁰ Variables that impact the models and the determinations of benchmark levels, including interest rates, home prices, and the supply of affordable housing, are discussed below.

The Federal Open Market Committee (FOMC) of the Federal Reserve, at its September 2024 meeting, reiterated its commitment to seeking maximum employment and inflation at the rate of 2 percent in the long run, by lowering its target range for the federal funds rate by 0.5 percentage points to 4.75 percent to 5.0 percent.³¹ In its November 2024 meeting, the FOMC lowered the target range by an additional 0.25 percentage

²⁸ Details on FHFA's single-family market models are available in the technical report "The Size of the Affordable Mortgage Market: 2025–2027 Enterprise Single-Family Housing Goals," available at <https://www.fhfa.gov/research/papers/2025-2027-enterprise-single-family-housing-goals-12-2024>.

²⁶ 12 U.S.C. 4566.

²⁷ See 12 U.S.C. 4562(e)(2)(B).

points to 4.5 percent to 4.75 percent.³² Moody's August 2024 Baseline forecast does not include these cuts but assumes that the FOMC will cut rates by 0.25 percentage points in September 2024 and December 2024, with further cuts to the federal funds rate to 4 percent by the fourth quarter of 2025.

The forecast projects that the 30-year fixed mortgage rate will remain elevated, and only decline 0.3 percentage points from 6.4 percent in 2025 to 6.1 percent in 2026, and then decline to 6.0 percent in 2027. Home prices increased rapidly in 2021 and 2022 as indicated by FHFA's purchase-only House Price Index (HPI), due to a combination of high demand for housing resulting from demographic trends and limited supply of homes for sale.³³ The rapid rise in mortgage rates through 2022 and their stabilization at new elevated levels in 2023 slowed down the pace of house price growth. Although slower, house price growth was still significant, rising 4.2 percent from August 2023 to August 2024.³⁴ FHFA noted in its monthly HPI report that it was the sixth consecutive month of modest house price growth.³⁵ Moody's predicts that home price appreciation will slow down even more in 2025. Moody's August 2024 forecast of the same HPI index expects the annual rates of house price growth to be 1.0, 1.5, and 2.1 percent in 2025, 2026, and 2027, respectively.

Even though mortgage interest rates are forecast to decline modestly, many households maintain low mortgage rates that are likely to remain below the prevailing mortgage rates, and therefore they are less likely to refinance. The refinancing share of overall mortgage originations declined from 62.4 percent in 2020 to 19.2 percent in 2023. Moody's forecasts this share to decline further to 18.0 percent in 2024, but rise to 19.2, 25.7, and 33.8 percent in 2025, 2026, and 2027, respectively.

Taken together, the elevated mortgage interest rates and high home price levels will likely continue to impact the ability of low- and very low-income households to purchase homes. The median sales price for existing single-family homes to median household income ratio, which is often used to measure affordability, rose to 5.1 in

2022, up from 4.1 in 2019.³⁶ As a result, between 2019 and 2022, the number of cost-burdened homeowners increased by 3 million households.³⁷ Housing affordability in 2023, as measured by Moody's forecast of the Housing Affordability Index (HAI) provided by the National Association of Realtors (NAR), was at its lowest level since 1989. This factor is projected to rise even more modestly in the August 2024 forecast used to support the final rule than was projected in the February 2024 forecast (used to support the proposed rule).^{38 39}

The supply of affordable housing has not kept pace with the growth of demand. This has led to a shortage of homes, which became more acute during the COVID-19 pandemic. Although, for example, the October 2024 active listing count is 29.2 percent higher than it was in October 2023, it is still 21.1 percent lower than it was at the same time in 2019.⁴⁰ Single-family housing starts, or the measure of new one-to-four-unit residential construction, dropped 10.8 percent from 2021 to 2022, and continued to decline in 2023.⁴¹ For example, the Mortgage Bankers Association (MBA) estimates housing starts to have decreased about 8.8 percent from 1.55 million in 2022 to 1.42 million in 2023. MBA forecasts housing starts to decline about 4.6 percent in 2024, before rising about 3.4 percent in 2025.⁴²

³⁷ *Ibid.* p. 2.

³⁸ Moody's Analytics, "Economic Data and Forecasts," August 2024.

³⁹ NAR's HAI is a national index. It measures, nationally, whether an average family could qualify for a mortgage on a typical home. A typical home is defined as the national median-priced, existing single-family home as reported by NAR. An average family is defined as one earning the median family income. The calculation assumes a down payment of 20 percent of the home price and a monthly payment that does not exceed 25 percent of the median family income. An index value of 100 means that a family earning the median family income has exactly enough income to qualify for a mortgage on a median-priced home. An index value above 100 signifies that a family earning the median family income has more than enough income to qualify for a mortgage on a median-priced home. A decrease in the index value over time indicates that housing is becoming less affordable.

⁴² "Housing Finance: At a Glance Monthly Chartbook, October 2024," | Urban Institute

The combination of high home prices and elevated mortgage rates along with continued limited housing supply has also contributed to a sharp decline in purchase loan origination volumes, as new homes are less affordable and existing homeowners are less likely to move and relinquish their low interest rate mortgages. For example, in 2022, lenders reported a 51 percent decrease in originated closed-end home loans from 2021 volumes.⁴³ In 2023, there were further declines, with lenders reporting a 34.5 percent decrease in originated closed-end home loans from 2022 volumes.⁴⁴ Moody's Baseline scenario for August 2024 shows single-family purchase mortgage originations similarly down in 2023, when originations totaled \$1.33 trillion, compared to 2021, when originations totaled \$1.86 trillion.⁴⁵

Furthermore, this observation from Moody's February 2024 forecast is still applicable: "Life events such as divorces, deaths, and the birth of children along with moderating interest rates will prompt more homeowners to list their homes in 2024 than in 2023, but the rise in existing home sales is expected to be limited."⁴⁶

FHFA continues to monitor how these changes in the housing market, as well as other market conditions, may impact various segments of the market, including those targeted by the housing goals.

Post-model adjustments. While FHFA's models can address and forecast many of the factors referenced in the statute, including increasing interest rates and rising property values, some factors are not captured in the models. FHFA, therefore, considers additional factors when selecting the benchmark level within the model-generated confidence interval for each of the single-family housing goals.

Demographic trends. Although the model considers some demographic factors, specific demographic changes,

³⁵ *Ibid.*

such as the housing demand patterns of Millennials or the growth of minority households, are not included explicitly in the market forecast models. FHFA considers those demographic changes that are not captured by the model, along with the other factors listed in this section, as post-model adjustments when setting the housing goals benchmark levels. According to NAR, Millennials had represented the largest share of homebuyers for almost a decade until 2022.⁴⁷ Although they lost that spot to Baby Boomers in 2022, Millennials once again represented the

largest share of homebuyers in 2023, increasing from 28 percent to 38 percent.^{48 49} Furthermore, the number of minority households is projected to grow by 22 percent, or 9.3 million, from 2018 to 2028.⁵⁰

Ability of the Enterprises to lead the mortgage market. The Enterprises' overall share of the mortgage market is subject to fluctuation, as well. In the years preceding the 2008 financial crisis, the Enterprises' share of the market dropped to about 44 percent. As shown in Graph 1, that share rose to about 65 percent in 2012, but declined

to about 55 percent in 2015. The Enterprises' share remained relatively stable until 2019, then jumped to 67 percent in 2020 as the Enterprises continued to acquire mortgages even as others in the market stepped back during the COVID-19 pandemic. Since then, the Enterprises' share has declined as the shares of government-guaranteed and government-insured loans, as well as the shares of other market participants, have grown. Government-guaranteed and government-insured loans are not eligible for housing goals credit.

Graph 1: Shares of the Conforming Mortgage Market

Graph 1 also shows that the Enterprises' share of the conforming mortgage market returned to pre-pandemic levels in 2022 but declined significantly in 2023. Preliminary data shows further declines in 2024. Over the same period, the total Government share of the mortgage market (including the Federal Housing Administration, Department of Veterans Affairs, and Rural Housing Service) and the Other

share (such as retained bank portfolios) expanded.

Need to maintain the sound financial condition of the Enterprises. During a period of affordability challenges and increased uncertainty around market conditions, setting the single-family housing goals benchmark levels too high could compromise safe and sound lending standards. FHFA carefully considered benchmark levels that would support access to mortgage lending for

low-income families, families that reside in low-income areas, and very low-income families, while still allowing the Enterprises to adequately support all other segments of the market.

Past performance and effort of the Enterprises to achieve the housing goals. Table 1 provides the annual performance of both Enterprises on the single-family housing goals between 2010 and 2023.

* Numbers marked with an asterisk indicate that the Enterprise failed to meet the goal.

+ Numbers marked with a plus sign indicate that FHFA determined the goal to be infeasible.

B. Benchmark Levels for the Single-Family Housing Goals for 2025–2027 in the Final Rule

The final rule establishes the following benchmark levels for the single-family housing goals and subgoals for 2025–2027:

1. Low-Income Home Purchase Goal

The low-income home purchase goal is based on the percentage share of all conventional, conforming, single-family, owner-occupied home purchase

mortgages purchased by an Enterprise that are made to low-income families, defined as families with incomes less than or equal to 80 percent of AMI. Consistent with the proposed rule and FHFA's market model, the final rule sets the annual low-income home purchase housing goal benchmark level for 2025–2027 at 25 percent. While this benchmark level is below the current benchmark level of 28 percent for 2022–2024, it is above the 24 percent benchmark level that was in place from 2015 through 2021 and is consistent

with the updated forecast using Moody's August 2024 baseline forecast and 2023 HMDA data. As explained further below, FHFA believes that this benchmark level is appropriate to enable the Enterprises to fulfill their statutory duty to facilitate the financing of affordable housing for all low-income families without compromising safe and sound lending standards during a period of affordability challenges and increased uncertainty around market conditions.

TABLE 2—SINGLE-FAMILY LOW-INCOME HOME PURCHASE GOAL

Year	Historical performance				Projected forecast			
	2020	2021	2022	2023	2024	2025	2026	2027
Actual Market Level	27.6%	26.7%	26.8%	26.3%				
Benchmark Level	24.0%	24.0%	28.0%	28.0%	28.0%	25.0%	25.0%	25.0%
Current Market Forecast					26.3%	26.2%	25.9%	25.7%
					+/- 2.6%	+/- 4.4%	+/- 5.7%	+/- 6.7%
Fannie Mae Performance								
Low-Income Home Purchase Mortgages	374,376	375,569	278,799	189,439				
Total Home Purchase Mortgages	1,288,806	1,306,459	1,016,371	726,139				

TABLE 2—SINGLE-FAMILY LOW-INCOME HOME PURCHASE GOAL—Continued

Year	Historical performance				Projected forecast			
	2020	2021	2022	2023	2024	2025	2026	2027
Low-Income % of Home Purchase Mortgages	29.0%	28.7%	27.4%	26.1%				
Freddie Mac Performance								
Low-Income Home Purchase Mortgages	280,561	329,426	264,118	209,432				
Total Home Purchase Mortgages	982,888	1,201,540	911,037	735,932				
Low-Income % of Home Purchase Mortgages	28.5%	27.4%	29.0%	28.5%				

Recent performance and forecasts. As shown in Table 2, between 2020 and 2023, the low-income purchase market level, as measured by HMDA data, declined from 27.6 percent to 26.3 percent. FHFA's current model forecasts that market level to continue declining and end below 26 percent in 2027 with an average forecast midpoint value of 25.9 percent. Freddie Mac's performance on this goal was 29.0 percent in 2022 and 28.5 percent in 2023, which was above both the benchmark and the market levels in those two years. Fannie Mae's performance in 2022 was 27.4 percent, which was below the benchmark level but above the market level. However, in 2023, Fannie Mae's performance was 26.1 percent, which was below both the benchmark and the market levels. FHFA determined that while Fannie Mae had missed the goal, the goal itself was not feasible for the Enterprise in 2023.⁵¹

FHFA rationale. As FHFA noted in the proposed rule preamble, "[t]he combination of high home prices and elevated mortgage rates along with continued limited housing supply has also contributed to a sharp decline in purchase loan origination volumes, as new homes are less affordable and existing homeowners are less likely to give up their low interest rate mortgage. For example, in 2022, lenders reported

a 51 percent decrease in closed-end, site-built, single-family mortgage originations from 2021 volumes. Home prices grew by 43 percent between 2019 and 2022, while incomes grew by just 7 percent over the same time."⁵² These trends are reflected in the declining market share for the low-income home purchase goal segment as measured by HMDA data. Table 2 shows the decline from 26.8 percent in 2022 to 26.3 percent in 2023 amidst a sharp contraction in mortgage origination volume. Taking the market forecast average and current and forecast market conditions into consideration, the benchmark level in the final rule is set at 25 percent to encourage the Enterprises to continue to find ways to support low-income borrowers under current and forecast market conditions while not compromising safe and sound lending standards. Some commenters on the proposed rule supported the proposal to lower the benchmark level for this goal from the current 28 percent to 25 percent, recognizing the impact of a variety of market challenges and describing the proposed benchmark level as appropriate. Other commenters disagreed with the proposed lowered benchmark level, arguing that the Enterprises should be leading the market. Both Enterprises were supportive of the proposed benchmark

level of 25 percent, describing it as meaningful, prudent, and consistent with the Safety and Soundness Act. After considering the comments and updated economic data that became available after FHFA issued the proposed rule, FHFA is adopting the proposed benchmark level of 25 percent in the final rule.

2. Very Low-Income Home Purchase Goal

The very low-income home purchase goal is based on the percentage share of all conventional, conforming, single-family, owner-occupied home purchase mortgages purchased by an Enterprise that are for very low-income families, defined as families with incomes less than or equal to 50 percent of AMI. Consistent with the proposed rule and FHFA's market model, the final rule sets the annual very low-income home purchase housing goal benchmark level for 2025–2027 at 6 percent. While this benchmark level is below the current benchmark level of 7 percent, it is in line with the benchmark level in place from 2015–2021 and the most recent market forecast midpoint average of 6.0 percent. FHFA has determined that a 6 percent benchmark level will serve as an appropriate target that will promote Enterprise efforts in this market segment.

TABLE 3—SINGLE-FAMILY VERY LOW-INCOME HOME PURCHASE GOAL

Year	Historical performance				Projected forecast			
	2020	2021	2022	2023	2024	2025	2026	2027

TABLE 3—SINGLE-FAMILY VERY LOW-INCOME HOME PURCHASE GOAL—Continued

Year	Historical performance				Projected forecast			
	2020	2021	2022	2023	2024	2025	2026	2027
Very Low-Income % of Home Purchase Mortgages	7.3%	7.4%	6.9%	6.0%				
Freddie Mac Performance								
Very Low-Income Home Purchase Mortgages	68,216	75,945	64,850	50,244				
Total Home Purchase Mortgages	982,888	1,201,540	911,037	735,932				
Very Low-Income % of Home Purchase Mortgages	6.9%	6.3%	7.1%	6.8%				

Recent performance and forecasts. As shown in Table 3, between 2020 and 2023, the very low-income purchase market level, as measured using HMDA data, declined from 7.0 percent to 6.5 percent. FHFA's current model forecasts that the market for this goal will fall from 6.1 percent to 5.9 percent for the 2025–2027 period. While Freddie Mac's performance in 2022 and 2023 was above both the benchmark and market levels, Fannie Mae's performance in 2022 was above the market level but below the benchmark level. In 2023, Fannie Mae's performance was below both the market and the benchmark levels. FHFA determined that the goal was not feasible for the Enterprise in 2023.

FHFA rationale. The 6 percent benchmark level in the final rule should encourage the Enterprises to continue their efforts to promote safe and sustainable lending to very low-income families. FHFA believes that setting the benchmark level at 6 percent is

appropriate, reasonable, and supported by the current market forecast. As noted in section II, some commenters on the proposed rule supported the proposal to lower the benchmark level for this goal from the current 7 percent to 6 percent, recognizing the market challenges, and describing it as appropriate. Other commenters disagreed with the proposed lowered benchmark level, arguing that the Enterprises should be leading the market. Both Enterprises supported the proposed benchmark level of 6 percent, describing it as meaningful, prudent, and consistent with the Safety and Soundness Act, while also noting that it will be challenging to meet. After considering the comments and updated economic data that became available after FHFA issued the proposed rule, FHFA is adopting the proposed benchmark level of 6 percent in the final rule.

3. Minority Census Tracts Home Purchase Subgoal

The minority census tracts home purchase subgoal is based on the percentage share of home purchase mortgages on conventional, conforming, single-family, owner-occupied properties to borrowers with incomes no greater than 100 percent of AMI in minority census tracts. The Safety and Soundness Act defines minority census tracts as those with a minority population of 30 percent or more and median census tract income of less than 100 percent of AMI. Consistent with the proposed rule and FHFA's market model, the final rule increases the annual benchmark level for this subgoal for 2025–2027 from the current 10 percent to 12 percent. This benchmark level is slightly below the average market forecast of 12.7 percent. FHFA has determined that this benchmark level will serve as an appropriate target that will promote Enterprise efforts in this market segment.

TABLE 4—SINGLE-FAMILY MINORITY CENSUS TRACTS HOME PURCHASE SUBGOAL

Year	Historical performance				Projected forecast			
	2020	2021	2022	2023	2024	2025	2026	2027

The numbers in italics refer to FHFA's tabulations of the market and Enterprise performance had this goal been in place before 2022.

Recent performance and forecasts. Table 4 shows the implied market levels and Enterprise performance in 2020 and 2021 (before FHFA established this subgoal), as well as market levels and Enterprise performance since this subgoal was established. Both

Enterprises exceeded the benchmark and market levels for this subgoal in 2022 and 2023. The table also shows a pronounced increase in the market levels and in both Enterprises' performance on this subgoal beginning in 2022, which was the first year of the

new subgoal as well as the first year of new census tract boundaries based on the 2020 census. The average AMI increase in 2022 was unusually high, which led to more borrowers qualifying

for this subgoal.⁵³ The number of census tracts rose from about 74,000 to 85,000 in the 2020 census, and the share of minority census tracts rose from 32.9 percent to 35.2 percent with this census update, leading to more loans qualifying for this subgoal.⁵⁴ The imposition of the new subgoal also meant additional attention and effort at the Enterprises to meet the new subgoal's benchmark level. With changes in the census tract boundaries, unusually high AMI increases, and the imposition of the new subgoal all occurring in 2022, it is difficult to isolate and conclusively determine the specific effect of each of these factors on the higher performance of the market and the Enterprises. FHFA will continue to analyze this trend.

FHFA rationale. One commenter suggested that FHFA greatly increase the benchmark level for this subgoal given that the statutory definition of "minority census tract" is broad. As noted, the definition of "minority census tract" is statutory, and FHFA first established this subgoal in the 2022–2024 housing goals final rule.⁵⁶ For the 2022–2024 housing goals, FHFA set the benchmark level for this subgoal at 10 percent.⁵⁷ Given that the subgoal is still relatively new, an incremental increase over the benchmark level in the

previous housing goals period will further the same purposes without being disruptive to the market. The 12 percent benchmark level is an appropriate level given the recent market and Enterprise performance, and the updated model forecast. FHFA believes that this benchmark level emphasizes the importance of providing access to mortgage credit for borrowers with incomes at or below 100 percent of AMI who reside or seek to reside in minority census tracts while taking current market conditions into consideration. Commenters strongly supported the proposed increase in the benchmark level to 12 percent. Several commenters highlighted the positive impact the proposed benchmark level would have on ensuring the Enterprises fulfill their statutory duty to facilitate the financing of affordable housing for low- and moderate-income families, including families of color. After considering the comments and updated economic data that became available after FHFA issued the proposed rule, FHFA is adopting the proposed benchmark level of 12 percent in the final rule.

4. Low-Income Census Tracts Home Purchase Subgoal

The low-income census tracts home purchase subgoal is based on the

percentage share of conventional, conforming, single-family, owner-occupied home purchase mortgages that are: (1) to borrowers (regardless of income) in low-income census tracts that are not minority census tracts; and (2) to borrowers with incomes greater than 100 percent of AMI in low-income census tracts that are also minority census tracts. Consistent with the proposed rule, the final rule sets the annual benchmark level for this subgoal for 2025–2027 at 4 percent, which is the same as the benchmark level for the 2022–2024 housing goals period. FHFA recognizes that this benchmark level is significantly lower than both the midpoint of the confidence intervals of the market forecast and the recent performance of the Enterprises. However, FHFA has determined that a relatively low benchmark level for this subgoal is appropriate because the subgoal includes housing goals credit for higher-income borrowers (higher than 100 percent of AMI) that may have ready access to mortgage credit even when purchasing homes in low-income census tracts. FHFA's tabulation of 2023 HMDA data shows that 70 percent of the loans that qualified for credit under this subgoal were made to borrowers at or above 100 percent of AMI.

TABLE 5—SINGLE-FAMILY LOW-INCOME CENSUS TRACTS HOME PURCHASE SUBGOAL

Year	Historical performance				Projected forecast			
	2020	2021	2022	2023	2024	2025	2026	2027

The numbers in italics refer to FHFA's tabulations of the market and Enterprise performance had this goal been in place before 2022.

Recent performance and forecasts. Table 5 shows that both Enterprises exceeded the benchmark level for this subgoal in 2022 and 2023. FHFA's current model forecasts that the market for this subgoal will remain around 10.1 percent for 2025–2027.

FHFA rationale. The comments on this subgoal summarized in section II indicate that some commenters were unclear about the structure of this subgoal as well as FHFA's intent in setting a benchmark level well below its forecasted share. The benchmark is set at a level that balances the need for

access to credit in low-income census tracts with the concern that a higher benchmark level could result in an incentive for the Enterprises to purchase loans made to higher-income borrowers in low-income census tracts, leading to displacement of low-income families in both low-income and minority census

⁵³ "HUD Publishes FY 2022 Income Limits; 99% of Counties Will See Increase," Novogradac, April 19, 2022, available at <https://www.novoco.com/>

⁵⁷ 86 FR 73641, 73651 (Dec. 28, 2021).

tracts. As FHFA explained when it first proposed implementing the minority census tracts home purchase subgoal in 2021, “[u]nder the proposed rule, for loans purchased from areas that meet the criteria for both minority and low-income census tracts, the borrower’s AMI would determine under which subgoal the loan would be eligible. If the borrower’s income is less than or equal

to 100 percent of AMI, the loan would be counted towards the minority census tracts [home purchase] subgoal, and if the borrower’s income is above 100 percent of AMI, the loan would be counted towards the low-income census tracts [home purchase] subgoal.”⁵⁸ FHFA notes that the single-family low-income census tracts home purchase subgoal is not defined to cap the

borrower’s income relative to AMI. For instance, as displayed in Table 6, FHFA’s analysis of HMDA data shows that approximately 68.7 percent of the loans that were made in 2023 that met the criteria for the subgoal were made to borrowers at or above 100 percent of AMI.

TABLE 6—LOW-INCOME CENSUS TRACTS SUBGOAL: BORROWER INCOME DISTRIBUTION

Borrower incomes relative to AMI (HMDA)	2019 (%)	2020 (%)	2021 (%)	2022 (%)	2023 (%)
Borrower Income ≤50% AMI	9.1	10.1	9.2	7.3	7.4

Income Missing	1.9	1.9	1.8	2.1	1.6
Total	100	100	100	100	100

Source: FHFA tabulation of HMDA data.

As noted in the proposed rule preamble, FHFA is selecting a benchmark level lower than its model forecast midpoint and lower than recent Enterprise performance to avoid exacerbating the displacement of low-income residents in these low-income, non-minority census tracts as well as in low-income, minority census tracts. Setting this lower benchmark level addresses concerns about incentivizing purchases of loans to higher-income borrowers in low-income census tracts. However, this benchmark level is also intended to encourage the Enterprises to continue providing critically needed access to mortgage credit in low-income census tracts. After considering the comments and updated economic data that became available after FHFA issued the proposed rule, FHFA is adopting the proposed benchmark level of 4 percent in the final rule.

5. Low-Income Areas Home Purchase Goal

The benchmark level for the overall low-income areas housing goal is set annually by FHFA notice based on the sum of the benchmark levels for the low-income census tracts housing subgoal and the minority census tracts housing subgoal, plus an adjustment factor reflecting the additional incremental share of mortgages for low- and moderate-income families in designated disaster areas. FHFA will continue to set a benchmark level for the overall low-income areas housing goal that will reflect the adjustment factor for mortgages to families with incomes less than or equal to 100 percent of AMI who are located in federally declared disaster areas.⁵⁹ Accordingly, the low-income areas home purchase goal benchmark level is not included in the final rule. During the 2025–2027 housing goals period, FHFA will continue its annual practice

to notify the Enterprises by letter of the benchmark level for the overall low-income areas housing goal for each year.

6. Low-Income Refinance Goal

The low-income refinance goal is based on the percentage share of all conventional, conforming, single-family, owner-occupied refinance mortgages purchased by an Enterprise that are for low-income families, defined as families with incomes less than or equal to 80 percent of AMI. Consistent with the proposed rule and the updated FHFA market model, the final rule sets the annual benchmark level for this goal for 2025–2027 at 26 percent, which is the same as the benchmark level for the 2022–2024 housing goals period. FHFA has determined that given the market challenges and the uncertainty of future mortgage rates, a 26 percent benchmark level will serve as an appropriate target that will promote Enterprise efforts in this segment.

TABLE 7—SINGLE-FAMILY LOW-INCOME REFINANCE GOAL

Year	Historical performance				Projected forecast

TABLE 7—SINGLE-FAMILY LOW-INCOME REFINANCE GOAL—Continued

Year	Historical performance				Projected forecast			
	2020	2021	2022	2023	2024	2025	2026	2027
Low-Income % of Refinance Mortgages	21.2%	26.2%	34.7%	38.4%				
Freddie Mac Performance								
Low-Income Refinance Mortgages	490,176	658,845	254,332	54,906				
Total Refinance Mortgages	2,485,748	2,651,858	686,394	127,043				
Low-Income % of Refinance Mortgages	19.7%	24.8%	37.1%	43.2%				

When measured in percentage terms, annual performance in the overall market and by the Enterprises on low-income refinance mortgages tends to be inversely proportional to the volume of low-income refinance loans the market produces and the Enterprises purchase during a given year. For example, during the refinance boom of 2020, when mortgage rates were low, low-income refinance volume in the overall market soared to over 1.3 million loans, but the volume of all refinances in the market reached over 6.3 million.⁶⁰ This equated to a low-income refinance market performance of 21.0 percent. In contrast, in 2023, with higher mortgage rates, low-income refinance volume in the overall market contracted to roughly 160,000 loans and refinance volume overall fell to about 397,000 loans.⁶¹ This equated to a low-income refinance market performance of 40.3 percent. The Enterprises' performance on the low-income refinance goal followed the same pattern. Low-income refinance performance for both Enterprises increased significantly during this later period, even as the volume of their purchases of low-income refinance mortgages fell.

Recent performance and forecasts. As shown in Table 7, the market for low-income refinance loans rose sharply from 2020 to 2023, as reflected in the HMDA data. For example, the market level for low-income refinance loans was 21.0 percent in 2020 with low mortgage rates and was 40.3 percent in 2023 with elevated mortgage rates. At 19.7 percent, Freddie Mac was below the 21 percent benchmark level in 2020, but has met the goal since then, with performance rising to 43.2 percent in 2023. Fannie Mae has met the goal since 2020, with performance rising from 21.2 percent to 38.4 percent during that period.

FHFA rationale. Some commenters supported the proposed benchmark level of 26 percent, noting that the refinance market is highly sensitive to fluctuations in interest rates. One

commenter asked FHFA to raise the benchmark level given the recent strong performance of the market and the Enterprises. As noted above, the Enterprises' annual performance on the low-income refinance goal tends to be inversely proportional to the volume of low-income refinance loans the market produces and the Enterprises purchase during a given year. Although mortgage rates are expected to decline during the 2025–2027 housing goals period, FHFA's model cannot forecast the low-income refinance market with a high degree of confidence due to the unpredictability of future interest rates and the strong sensitivity of refinance originations to interest rates. FHFA believes that the 26 percent benchmark level in the final rule is reasonable given these forecasting challenges. Many current mortgage holders are unlikely to refinance without a substantial reduction in mortgage rates. FHFA is not aware of any long-term data series that captures this impact that can be used in the forecast model. FHFA also recognizes that if interest rates were to decline significantly, the benchmark level of 26 percent could be difficult for the Enterprises to achieve based on market conditions. It is for this reason that the final rule establishes the benchmark level of 26 percent for this goal, as proposed, and establishes measurement buffers for this goal, which are further discussed below.

V. Measurement Buffers

For the three single-family housing goals subject to the measurement buffers, FHFA proposed numerical factors to encourage each Enterprise to focus on achieving the housing goal by meeting the market level if the benchmark level is higher than the market level, despite the uncertainty regarding the final market level throughout the course of the year.⁶² Specifically, for 2025–2027, as proposed, the final rule provides that if the benchmark level for the single-

family low-income home purchase, very low-income home purchase, or low-income refinance housing goal is higher than the market level for the goal, an Enterprise that fails to meet the goal will not be required to submit a housing plan if the Enterprise's performance meets or exceeds: (i) the market level minus 1.3 percentage points for the low-income home purchase goal; (ii) the market level minus 0.5 percentage points for the very low-income home purchase goal; or (iii) the market level minus 1.3 percentage points for the low-income refinance goal. To ensure that an Enterprise does not rely entirely on these measurement buffers, if an Enterprise fails to meet one of the applicable goals in both 2025 and 2026, the measurement buffer will not apply to that goal in 2027.

Fannie Mae commented that FHFA should establish similar factors for the single-family housing subgoals. The final rule does not include a measurement buffer for the single-family minority census tracts home purchase subgoal or the single-family low-income census tracts home purchase subgoal. FHFA is not adopting a measurement buffer for the minority census tracts home purchase subgoal due to the Enterprises' recent performance on this subgoal. A measurement buffer is unnecessary for the low-income census tracts home purchase subgoal because the benchmark level for the subgoal is being established below historic Enterprise performance to address potentially unintended consequences of Enterprise purchases in those areas.

FHFA considers the measurement buffers to be a transparent and fair means to encourage each Enterprise to achieve these three single-family housing goals by meeting the market level despite uncertainty about the market level during the measurement period. FHFA also notes, as it did in the NPRM, that these measurement buffers will be in place for the 2025–2027 housing goals period due to the heightened uncertainty in macroeconomic conditions and the difficult mortgage market that is

⁶⁰ FHFA's tabulation of HMDA data.

⁶¹ *Ibid.*

⁶² As previously noted, the proposed rule referred to the measurement buffers as "Enforcement Factors".

currently forecast for 2025–2027. Additionally, if an Enterprise fails to meet one of the applicable single-family housing goals in both 2025 and 2026, the measurement buffer for that goal will not apply in 2027.

VI. Multifamily Housing Goals and Subgoal

A. Factors Considered in Setting the Multifamily Housing Goal Benchmark Levels

The Safety and Soundness Act requires FHFA to consider the following six factors in setting the multifamily housing goals:

1. National multifamily mortgage credit needs and the ability of the Enterprises to provide additional liquidity and stability for the multifamily mortgage market;
2. The performance and effort of the Enterprises in making mortgage credit available for multifamily housing in previous years;
3. The size of the multifamily mortgage market for housing affordable to low-income and very low-income families, including the size of the multifamily markets for housing of a smaller or limited size;
4. The ability of the Enterprises to lead the market in making multifamily mortgage credit available, especially for multifamily housing affordable to low-income and very low-income families;
5. The availability of public subsidies; and
6. The need to maintain the sound financial condition of the Enterprises.⁶³

Unlike the single-family housing goals, performance on the multifamily housing goals is measured solely against benchmark levels set by FHFA in the regulation, without any retrospective market measure. The absence of a retrospective market measure for the multifamily housing goals results, in part, from the lack of comprehensive data about the multifamily mortgage market. Unlike the single-family mortgage market, where HMDA provides a reasonably comprehensive dataset about single-family mortgage originations each year, the multifamily mortgage market (and the affordable multifamily mortgage market segment) has no comparable single, unified source with coverage extending across many years. As a result, it is difficult to correlate different datasets that rely on different reporting metrics.

The lack of comprehensive data for the multifamily mortgage market is even more acute with respect to the segments of the market that are targeted to low-

income families, defined as families with incomes at or below 80 percent of AMI, and very low-income families, defined as families with incomes at or below 50 percent of AMI.

Unlike the single-family housing goals, which set separate benchmark levels for home purchase and refinance mortgages, the multifamily housing goals include all Enterprise multifamily mortgage purchases, regardless of the purpose of the loan.

In consideration of public comments and to improve the responsiveness of the multifamily housing goals to market conditions, in 2023, FHFA revised the housing goals regulation to change the multifamily housing goals benchmark levels from a numeric benchmark level for units to a percentage of affordable units in multifamily properties financed by mortgages purchased by the Enterprise each year. This ensures that the multifamily housing goals remain meaningful in different market conditions and enables the Enterprises to respond to those conditions while continuing to serve affordable segments.⁶⁴

FHFA has considered each of the six statutory factors in setting the benchmark levels for each of the multifamily housing goals in the final rule. Five of the factors relate to the multifamily mortgage market and the Enterprises' role in that market. Those factors generally have similar impacts on each of the multifamily housing goals and are discussed below. The past performance of the Enterprises is discussed separately for each of the multifamily housing goals.

Multifamily mortgage market. FHFA's consideration of the multifamily mortgage market credit needs addresses the size and competitiveness of the overall multifamily mortgage market as well as the subset that is affordable to low-income and very low-income families. In August 2024, MBA forecasted that multifamily mortgage originations would increase from the \$246 billion estimated in 2023 to \$297 billion in 2024, then to \$390 billion in 2025.⁶⁵ MBA noted that the moderation in interest rates along with the large volume of loans maturing should result in an increase in borrowing relative to 2023 and 2024, but the timing of this borrowing is uncertain.⁶⁶

⁶⁴ 12 CFR 1282.13.

⁶⁵ "MBA Forecast: Commercial/Multifamily Borrowing and Lending to Increase 26 Percent to \$539 Billion in 2024," Mortgage Bankers Association, August 29, 2024, available at <https://www.mba.org/news-and-research/newsroom/news/2024/08/29/mba-forecast-commercial-multifamily-borrowing-and-lending-to-increase-26-percent-to-539-billion-in-2024>.

⁶⁶ *Ibid.*

According to the National Multifamily Housing Council's tabulation of American Community Survey microdata, in 2023, about 47 percent of renter households (22 million households) lived in multifamily properties.^{67 68}

Affordability in the multifamily mortgage market. In its *America's Rental Housing 2024* report, Harvard University's Joint Center for Housing Studies (JCHS) found that rent growth had moderated following historically high rent growth in 2021 and 2022.⁶⁹ For instance, in the third quarter of 2023, rent growth for professionally managed apartments was 0.4 percent, compared to 15.3 percent in early 2022.⁷⁰ Despite the recent slowdown in rent growth, the extended period of rising rents corresponds to the continued stress on renters, with the share of cost-burdened renters continuing to remain elevated.

For purposes of the Enterprise housing goals, the Safety and Soundness Act requires FHFA to determine affordability based on whether rent levels are affordable. The Safety and Soundness Act defines a rent level as affordable if a family's rent and utility expenses do not exceed 30 percent of the maximum income level for each income category, with appropriate adjustments for unit size as measured by the number of bedrooms.⁷¹ The JCHS report found that the share of cost-burdened renters, particularly among low-income and very low-income households, continues to grow.⁷² A household is considered cost-burdened if it spends more than 30 percent of its income on housing, and severely cost-burdened if it spends more than 50 percent of its income on housing. The JCHS report shows that the share of cost-burdened renters across all income segments rose by 3.2 percentage points to 50 percent from 2019 to 2022.⁷³ The

⁶⁷ Single-family properties are defined as structures with one to four units. Multifamily properties are defined as structures with five or more units.

⁷³ *Ibid.*

⁶³ 12 U.S.C. 4563(a)(4).

share of cost-burdened renters earning between \$45,000 and \$74,999 increased the most, rising by 5.4 percentage points.⁷⁴

In *The State of the Nation's Housing 2024* report, JCHS noted the significant rise in new rental supply as 449,900 units were added in 2023, a 22 percent rise from 2022 and the highest number of completions in more than 30 years.⁷⁵ However, the growth in new rental supply is expected to slow down as multifamily starts fell by 14 percent in 2023, and this decline has accelerated.⁷⁶ While the addition of rental units may limit rent growth, the JCHS report found that new rental units are primarily targeted towards the upper end of the market, with a median asking rent of \$1,710 in the third quarter of 2023, compared to \$1,440 in 2014.⁷⁷

Role of the Enterprises. In adopting the multifamily housing goal benchmark levels for 2025–2027 in the final rule, FHFA has considered the ability of the Enterprises to lead the market in making multifamily mortgage credit available. The Enterprises' share of the overall multifamily mortgage market increased in the years immediately following the 2008 financial crisis but has declined more recently in response to growing private sector participation. The Enterprises' share of the multifamily market was over 70 percent in 2008 and 2009, compared to 36 percent in 2015.^{78 79} The total share was 40 percent or higher from 2016 to 2020. However, in 2021 and 2022, when multifamily origination volume was relatively robust, the combined Enterprise share was estimated to be below 30 percent before increasing to 41 percent in 2023.⁸⁰ Through the second quarter of 2024, the combined Enterprise share is estimated to be 35 percent.⁸¹

FHFA recognizes that the multifamily housing goals are just one measure of how the Enterprises contribute to and participate in the multifamily market. Other Enterprise multifamily activities

include those under their Duty to Serve Underserved Markets Plans, Low-Income Housing Tax Credit (LIHTC) equity financing, and the mission-driven elements of FHFA's Conservatorship Scorecard. Together with the housing goals, these programmatic activities provide support to renter households, including low-income families spending more than 30 percent of their income on housing. FHFA will continue to monitor these initiatives and priorities to maintain appropriate focus by the Enterprises, including compliance with the Enterprises' charter acts and safety and soundness considerations.

FHFA expects the Enterprises to continue to demonstrate leadership in supporting affordable housing in the multifamily market by providing liquidity for housing for tenants at different income levels in various geographies and market segments. This support should continue throughout the economic cycle, even as the overall size of the multifamily mortgage market fluctuates.

Availability of public subsidies. Multifamily housing assistance is primarily available in two forms—demand-side public subsidies that either directly assist low-income tenants (e.g., Section 8 vouchers) or provide project-based rental assistance (e.g., Section 8 contracts), and supply-side public subsidies that support the creation and preservation of affordable housing (e.g., public housing and LIHTCs). The availability of public subsidies impacts the overall affordable multifamily housing market, and significant changes to long-standing public subsidy programs could impact the ability of the Enterprises to meet the housing goals. The Enterprises also provide liquidity to facilitate the preservation of public subsidies through their purchases of mortgages that finance the preservation of existing affordable housing units (especially for restructurings of older properties that reach the end of their initial 15-year LIHTC compliance periods) and for refinancing properties with expiring Section 8 Housing Assistance Payment contracts.

The need for public subsidies persists as the number of cost-burdened renters remains high, at over 22.4 million renter households in 2022.⁸² The Center on Budget and Policy Priorities estimates that only one in four eligible households

currently receive Federal housing assistance.⁸³

In 2025 and beyond, there should continue to be opportunities in the multifamily mortgage market to provide permanent financing for properties with LIHTCs and to preserve existing affordable units, as described above.

Maintaining the sound financial condition of the Enterprises. In establishing multifamily housing goals benchmark levels for 2025–2027 in the final rule, FHFA must balance the role of the Enterprises in providing liquidity and supporting various multifamily mortgage market segments with the need to maintain the Enterprises' sound and solvent financial condition. The Enterprises have served as a stabilizing force in the multifamily mortgage market across economic cycles, and their loans on affordable multifamily properties have experienced low levels of delinquency and default that are similar to those of market rate properties.

FHFA continues to monitor the activities of the Enterprises in this market. As discussed above and consistent with the authorities described in the Enterprise housing goals regulation, FHFA may take any steps it determines necessary and appropriate after adoption of this final rule to address the multifamily housing goals benchmark levels to ensure the Enterprises' continued safety and soundness.

Past performance of the Enterprises. Before finalizing the benchmark levels for the multifamily housing goals in this final rule, FHFA reviewed any additional data (including Enterprise performance after the proposed rule was published) that became available about the performance of the Enterprises with regard to the multifamily housing goals. For each multifamily housing goals benchmark level, FHFA summarized the relevant performance of the Enterprises in the context of that goal or subgoal discussed in section B. *Multifamily Housing Goals Benchmark Levels in the Final Rule—§ 1282.13.*

Based on FHFA's consideration of the statutory factors described above, any developments in the multifamily mortgage market, and comments received on the proposed multifamily housing goals benchmark levels, the final rule establishes the benchmark levels for the multifamily housing goals, as further discussed below.

1. Multifamily Low-Income Housing Goal

The multifamily low-income housing goal is the percentage share of all goal-eligible units in multifamily properties financed by mortgages purchased by the Enterprises that are affordable to low-

income families in any given year. Low-income families are defined as those with incomes less than or equal to 80 percent of AMI. The final rule sets the annual benchmark level for this goal for 2025–2027 at 61 percent of goal-eligible units acquired. This is the same benchmark level as in the proposed rule

and that was in place for the 2023–2024 housing goals period. It is consistent with FHFA’s analysis of the current and expected multifamily market, which indicates fewer affordable units to support, rising price per unit, and uncertain market conditions.

TABLE 8—MULTIFAMILY LOW-INCOME HOUSING GOAL

Year	Historical performance							
	2020	2021	2022	2023	2024	2025	2026	2027
Low-Income Multifamily Benchmark Level	315,000	315,000	415,000	61%	61%	61%	61%	61%
Fannie Mae Performance								
Low-Income Multifamily Units	441,773	384,488	419,361	317,032				
Total Multifamily Units	637,696	557,152	542,347	415,513				
Low-Income % Total Units	69.3%	69.0%	77.3%	76.3%				
Freddie Mac Performance								
Low-Income Multifamily Units	473,338	373,225	420,107	231,968				
Total Multifamily Units	664,638	540,541	567,249	345,702				
Low-Income % of Total Units	71.2%	69.0%	74.1%	67.1%				

Recent performance. Table 8 shows the annual share of goal-qualifying low-income multifamily units in properties backing mortgages acquired by each Enterprise from 2020 through 2023.⁸⁴ In addition, the historical performance share average for the pre-pandemic years of 2017–2019 would have been 65.1 percent for Fannie Mae and 67.3 percent for Freddie Mac.⁸⁵

FHFA rationale. FHFA has considered the statutory factors for the multifamily housing goals, including current market conditions, the Enterprises’ performance, and the Enterprises’ role in the market, as well as the public comments received (summarized in section II). Several commenters supported the proposed benchmark level of 61 percent for this goal, while other commenters recommended that FHFA establish a higher benchmark

level. FHFA remains concerned that elevated interest rates are continuing to contribute to the increasing costs of owning low-income multifamily units. FHFA also remains concerned that expected declines in affordable originations and increases in rents are likely to cause fewer units to qualify as affordable for low-income families. These challenges are expected to persist in 2025–2027, as rent increases and insufficient supply of affordable housing are likely to result in more low-income families paying more than 30 percent of their incomes for rent.⁸⁶ In light of FHFA’s consideration of the statutory factors and the comments on the proposed goal, FHFA is adopting the proposed benchmark level of 61 percent for this goal for 2025–2027 in the final rule.

2. Multifamily Very Low-Income Housing Goal

The multifamily very low-income housing goal is the percentage share of all goal-eligible units in multifamily properties financed by mortgages purchased by the Enterprises that are affordable to very low-income families in any given year. Very low-income families are defined as those with incomes less than or equal to 50 percent of AMI. The final rule sets the annual benchmark level for this goal for 2025–2027 at 14 percent of goal-eligible units acquired, which is the same as the proposed benchmark level but higher than the current 12 percent benchmark level applicable for the 2023–2024 housing goals period.

TABLE 9—MULTIFAMILY VERY LOW-INCOME HOUSING GOAL

Year	Historical performance							
	2020	2021	2022	2023	2024	2025	2026	2027
Very Low-Income Multifamily Benchmark Level	60,000	60,000	88,000	12%	12%	14%	14%	14%
Fannie Mae Performance								
Very Low-Income Multifamily Units	95,416	83,459	127,905	77,509				
Total Multifamily Units	637,696	557,152	542,347	415,513				
Very Low-Income % of Total Units	15.0%	15.0%	23.6%	18.7%				
Freddie Mac Performance								
Very Low-Income Multifamily Units	107,105	87,854	127,733	71,217				
Total Multifamily Units	664,638	540,541	567,249	345,702				
Very Low-Income % of Total Units	16.1%	16.3%	22.5%	20.6%				

⁸⁴ 12 CFR 1282.16 (Special Counting Requirements).

⁸⁵ See 87 FR 50800 (Aug. 18, 2022).

⁸⁶ See “The State of the Nation’s Housing 2024,” Joint Center for Housing Studies of Harvard

University, June 2024, available at <https://www.jchs.harvard.edu/state-nations-housing-2024>.

Recent performance. Table 9 shows the number and share of goal-qualifying very low-income multifamily units as a percentage of the total goal-eligible units in properties backing mortgages acquired by each Enterprise. In addition, the historical performance share average for the pre-pandemic years of 2017–2019 would have been 13.1 percent for Fannie Mae and 15.6 percent for Freddie Mac.⁸⁷

FHFA rationale. FHFA has considered the statutory factors for the multifamily housing goals, including current market conditions and the Enterprises' role in the market. FHFA has also considered the comments received in response to the proposed benchmark level for this goal that are summarized in section II. As with the multifamily low-income housing goal, several commenters thought that FHFA could slightly increase the benchmark level for the multifamily very low-income housing goal. As discussed above, FHFA remains concerned that elevated interest rates and the severe disparity between demand and supply of units affordable

to very low-income renters are continuing to contribute to the increasing costs of owning very low-income multifamily units. These factors are expected to result in fewer units that qualify as affordable for very low-income families. As a result, FHFA believes that a benchmark level of 14 percent for this goal will encourage the Enterprises to continue to adequately serve very low-income families, while accounting for the challenges associated with elevated interest rates, lower volume of loan transactions, and the lack of affordable units in the multifamily market, as well as continued uncertain economic conditions.

FHFA believes that raising the benchmark level for this goal from the current 12 percent to 14 percent is appropriate and achievable considering the past performance of the Enterprises on this goal. Accordingly, FHFA is adopting the proposed benchmark level of 14 percent for this goal for 2025–2027 in the final rule.

3. Small Multifamily Low-Income Housing Subgoal

The current Enterprise housing goals regulation defines a small multifamily property as having 5 to 50 units. The small multifamily low-income housing subgoal is based on the share of units in small multifamily properties affordable to low-income families as a percentage of all goal-eligible units in all multifamily properties financed by mortgages purchased by the Enterprises in a given year. Low-income families are defined as those with incomes less than or equal to 80 percent of AMI. The final rule sets the annual benchmark level for this subgoal for 2025–2027 at 2 percent of goal-eligible units acquired, as proposed, which is slightly lower than the current 2.5 percent benchmark level for the 2023–2024 housing goals period. FHFA believes that with a 2 percent benchmark level, the Enterprises will remain positioned to support this market when needed without crowding out other sources of financing for small multifamily properties.

TABLE 10—SMALL (5–50 UNITS) MULTIFAMILY LOW-INCOME SUBGOAL

Year	Historical performance							
	2020	2021	2022	2023	2024	2025	2026	2027
Fannie Mae Small Low-Income Multifamily Benchmark Level	10,000	10,000	17,000	2.5%	2.5%	2.0%	2.0%	2.0%
Freddie Mac Small Low-Income Multifamily Benchmark Level	10,000	10,000	23,000	2.5%	2.5%	2.0%	2.0%	2.0%
Fannie Mae Performance								
Small Low-Income Multifamily Units	21,797	14,409	21,436	13,241				
Total Multifamily Units	637,696	557,152	542,347	415,513				
Small Low-Income % of Total Units	3.4%	2.6%	4.0%	3.2%				
Freddie Mac Performance								
Small Low-Income Multifamily Units	28,142	31,913	27,103	14,006				
Total Multifamily Units	664,638	540,541	567,249	345,702				
Small Low-Income % of Total Units	4.2%	5.9%	4.8%	4.1%				

Recent performance. Table 10 shows Enterprise performance on this subgoal, including the previous numeric benchmark levels applicable through 2022 and the percentage-based metric that began in 2023. FHFA recognizes that the Enterprises have different business approaches to the small multifamily market segment, and that each Enterprise sets its own credit risk tolerance for these products. As a result, each Enterprise has performed very differently on this subgoal. Since 2020, Freddie Mac has exceeded Fannie Mae in terms of percentage share of total units and volume of low-income units in small (5–50) multifamily properties.

FHFA rationale. FHFA has considered the statutory factors for the multifamily housing goals, the purpose of this

subgoal, and the comments received on the proposed benchmark level for this subgoal. As noted in section II, several commenters supported the proposed benchmark level of 2 percent, with one commenter noting that this market segment is well-supported by private capital sources. Other commenters disagreed with the proposed benchmark level, recommending that FHFA raise or maintain the existing benchmark level. Both Enterprises supported the proposed benchmark level, recognizing that their role is to provide liquidity without crowding out the private capital sources that have historically served this market segment.

FHFA has observed increased private sector financing for small multifamily properties in recent years, and as a

result, less activity among secondary mortgage market participants. Therefore, FHFA believes that a benchmark level of 2 percent should be adequate for the Enterprises to support this market segment when needed without crowding out other sources of financing for small multifamily properties. Accordingly, FHFA is adopting the proposed benchmark level of 2 percent for this goal for 2025–2027 in the final rule.

VII. Paperwork Reduction Act

The final rule does not contain any information collection requirement that requires the approval of the Office of Management and Budget (OMB) under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). Therefore, FHFA has not

⁸⁷ See 87 FR 50801 (Aug. 18, 2022).

submitted the final rule to OMB for review.

VIII. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires that a regulation that has a significant economic impact on a substantial number of small entities, small businesses, or small organizations must include an initial regulatory flexibility analysis describing the regulation's impact on small entities. Such an analysis need not be undertaken if the agency has certified that the regulation will not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605(b). FHFA has considered the impact of the final rule under the Regulatory Flexibility Act. FHFA certifies that the final rule will not have a significant economic impact on a substantial number of small entities because the final rule applies to Fannie Mae and Freddie Mac, which are not small entities for purposes of the Regulatory Flexibility Act.

IX. Congressional Review Act

In accordance with the Congressional Review Act (5 U.S.C. 801 *et seq.*), FHFA has determined that this final rule is a major rule and has verified this determination with the Office of Information and Regulatory Affairs of OMB.

List of Subjects in 12 CFR Part 1282

Mortgages, Reporting and recordkeeping requirements.

Accordingly, for the reasons stated in the Preamble, FHFA amends part 1282 of title 12 of the Code of Federal Regulations as follows:

PART 1282—ENTERPRISE HOUSING GOALS AND MISSION

■ 1. The authority citation for part 1282 continues to read as follows:

Authority: 12 U.S.C. 4501, 4502, 4511, 4513, 4526, 4561–4566.

■ 2. Amend § 1282.1 by revising the definition of “Designated disaster area” to read as follows:

§ 1282.1 Definitions.

* * * * *

Designated disaster area means any census tract that is located in a county designated by the President as adversely affected by a declared major disaster administered by FEMA under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 *et seq.*), where housing assistance payments were authorized by FEMA. A census tract shall be treated as a “designated disaster area” for purposes

of this part beginning on the January 1 after the major disaster declaration of the county, or such earlier date as determined by FHFA, and continuing through December 31 of the third full calendar year following the major disaster declaration. This time period may be adjusted for a particular disaster area by notice from FHFA to the Enterprises.

* * * * *

■ 3. Amend § 1282.11 by revising paragraph (a)(1) to read as follows:

§ 1282.11 General.

(a) * * *

(1) Three single-family owner-occupied purchase money mortgage housing goals, two single-family owner-occupied purchase money mortgage housing subgoals, a single-family refinancing mortgage housing goal, two multifamily housing goals, and a multifamily housing subgoal;

* * * * *

■ 4. Amend § 1282.12 by revising paragraphs (c)(2), (d)(2), (f)(2)(ii), (g)(2), and (h)(2) to read as follows:

§ 1282.12 Single-family housing goals and subgoals.

* * * * *

(c) * * *

(2) The benchmark level, which for 2025, 2026, and 2027 shall be 25 percent of the total number of purchase money mortgages purchased by that Enterprise in each year that finance owner-occupied single-family properties.

(d) * * *

(2) The benchmark level, which for 2025, 2026, and 2027 shall be 6 percent of the total number of purchase money mortgages purchased by that Enterprise in each year that finance owner-occupied single-family properties.

* * * * *

(f) * * *

(2) * * *

(ii) The benchmark level, which for 2025, 2026, and 2027 shall be 4 percent of the total number of purchase money mortgages purchased by that Enterprise in each year that finance owner-occupied single-family properties.

(g) * * *

(2) The benchmark level, which for 2025, 2026, and 2027 shall be 12 percent of the total number of purchase money mortgages purchased by that Enterprise in each year that finance owner-occupied single-family properties.

(h) * * *

(2) The benchmark level, which for 2025, 2026, and 2027 shall be 26 percent of the total number of

refinancing mortgages purchased by that Enterprise in each year that finance owner-occupied single-family properties.

■ 5. Revise § 1282.13 to read as follows:

§ 1282.13 Multifamily housing goals and subgoal.

(a) *Multifamily housing goals and subgoal.* An Enterprise shall be in compliance with a multifamily housing goal or subgoal if its performance under the housing goal or subgoal meets or exceeds the benchmark level for the goal or subgoal, respectively.

(b) *Multifamily low-income housing goal.* The percentage share of dwelling units in multifamily residential housing financed by mortgages purchased by each Enterprise that consists of dwelling units affordable to low-income families shall meet or exceed 61 percent of the total number of dwelling units in multifamily residential housing financed by mortgages purchased by the Enterprise in each year for 2025, 2026, and 2027.

(c) *Multifamily very low-income housing goal.* The percentage share of dwelling units in multifamily residential housing financed by mortgages purchased by each Enterprise that consists of dwelling units affordable to very low-income families shall meet or exceed 14 percent of the total number of dwelling units in multifamily residential housing financed by mortgages purchased by the Enterprise in each year for 2025, 2026, and 2027.

(d) *Small multifamily low-income housing subgoal.* The percentage share of dwelling units in small multifamily properties financed by mortgages purchased by each Enterprise that consists of dwelling units affordable to low-income families shall meet or exceed 2 percent of the total number of dwelling units in all multifamily residential housing financed by mortgages purchased by the Enterprise in each year for 2025, 2026, and 2027.

■ 6. Amend § 1282.15 by:

■ a. In paragraph (b)(2), remove the first instance of “subgoal” and add, in its place, “subgoals”;

■ b. Revise the heading and the first sentence of paragraph (c);

■ c. In paragraphs (d)(1), (3), and (4) and (e)(3), remove the phrase “housing goal and subgoals” wherever it appears and add in its place the phrase “housing goals and subgoal”;

■ d. Revise the heading to paragraph (e); and

■ e. In paragraph (e)(2), remove the phrase “housing goal or subgoals” and add in its place the phrase “housing goals or subgoal”.

The revisions read as follows:

§ 1282.15 General counting requirements.

* * * * *

(c) *Calculating the numerator and denominator for multifamily housing goals and subgoal.* Performance under the multifamily housing goals and subgoal shall be measured using a fraction that is converted into a percentage. * * *

* * * * *

(e) *Missing data or information for multifamily housing goals and subgoal.* * * *

* * * * *

■ 7. Revise § 1282.20 to read as follows:

§ 1282.20 Preliminary determination of compliance with housing goals; notice of preliminary determination.

(a) *Preliminary determination.* On an annual basis, the Director will evaluate each Enterprise's performance under each single-family housing goal and subgoal and each multifamily housing goal and subgoal. The Director will make a preliminary determination of whether an Enterprise has failed, or there is a substantial probability that an Enterprise will fail, to meet each housing goal or subgoal established by this subpart.

(b) *Notice of preliminary determination.* The Director will provide written notice to each Enterprise of the preliminary determination of its performance under each housing goal and subgoal established by this subpart, the reasons for such determination, and the information on which the Director based the determination.

(c) *Response by Enterprise.* Any notification to an Enterprise of a preliminary determination under this section will provide the Enterprise with an opportunity to respond in writing in accordance with the procedures at 12 U.S.C. 4566(b). Relevant information in a timely written response from an Enterprise will be included in the information the Director considers when making a final determination of housing goals compliance under § 1282.21.

§ 1282.21 [Redesignated as § 1282.22]

■ 8. Redesignate § 1282.21 as § 1282.22.

■ 9. Add new § 1282.21 to read as follows:

§ 1282.21 Final determination of compliance with housing goals; notice of final determination.

(a) *Final determination.* On an annual basis, the Director will make a final determination of each Enterprise's

performance under each single-family housing goal and subgoal and each multifamily housing goal and subgoal. The final determination will address whether an Enterprise has failed, or there is a substantial probability that an Enterprise will fail, to meet any housing goal or subgoal and whether the achievement of that housing goal or subgoal was or is feasible.

(b) *Notice of final determination.* The Director will provide each Enterprise with written notification of the final determination. If the Enterprise fails to meet any housing goal or subgoal, the notification will specify whether the Enterprise is required to submit a housing plan for approval under § 1282.22.

■ 10. Revise newly redesignated § 1282.22 to read as follows:

§ 1282.22 Housing plans.

(a) *General.* If the Director determines that an Enterprise has failed, or that there is a substantial probability that an Enterprise will fail, to meet any housing goal or subgoal, and that the achievement of the housing goal or subgoal was or is feasible, the Director may require the Enterprise to submit a housing plan for approval by the Director.

(b) *Measurement buffers for 2025–2027.* (1) Except as provided in paragraph (b)(3) of this section, the Director will not require an Enterprise to submit a housing plan based on the Enterprise's failure to meet the single-family low-income families housing goal, the single-family very low-income families housing goal, or the single-family refinancing housing goal for the years 2025, 2026, or 2027, if:

(i) The share of the market as defined in § 1282.12(b) for the applicable goal is lower than the benchmark level for the goal; and

(ii) The Enterprise's performance meets or exceeds the share of the market minus the measurement buffer for the applicable goal as defined in paragraph (b)(2) of this section.

(2) The following measurement buffers apply for the years 2025, 2026, and 2027:

(i) For the single-family low-income families housing goal, 1.3 percentage points;

(ii) For the single-family very low-income families housing goal, 0.5 percentage points; and

(iii) For the single-family refinancing housing goal, 1.3 percentage points.

(3) The measurement buffers in this paragraph (b) will not apply to a goal in

2027 if the Enterprise failed to meet that goal for each of the previous two years.

(c) *Nature of plan.* If the Director requires a housing plan, the housing plan must:

(1) Be feasible;

(2) Be sufficiently specific to enable the Director to monitor compliance periodically;

(3) Describe the specific actions that the Enterprise will take in a time period determined by the Director to improve the Enterprise's performance under the housing goal or subgoal; and

(4) Address any additional matters relevant to the plan as required, in writing, by the Director.

(d) *Deadline for submission.* The Enterprise shall submit the housing plan to the Director within 45 days after issuance of a notice requiring the Enterprise to submit a housing plan. The Director may extend the deadline for submission of a plan, in writing and for a time certain, to the extent the Director determines an extension is necessary.

(e) *Review of housing plans.* The Director shall review and approve or disapprove housing plans in accordance with 12 U.S.C. 4566(c)(4) and (c)(5).

(f) *Resubmission.* If the Director disapproves an initial housing plan submitted by an Enterprise, the Enterprise shall submit an amended plan for approval or disapproval not later than 15 days after the Director's disapproval of the initial plan; the Director may extend the deadline if the Director determines an extension is in the public interest. If an amended plan is not acceptable to the Director, the Director may afford the Enterprise 15 days to submit additional amendments to its plan for approval or disapproval.

(g) *Enforcement of housing plans.* If the Director requires an Enterprise to submit a housing plan and the Enterprise refuses to submit such a plan, submits an unacceptable plan, or fails to comply with the plan, the Director may issue a cease and desist order in accordance with 12 U.S.C. 4581, impose civil money penalties in accordance with 12 U.S.C. 4585, or take any other action that the Director determines to be appropriate, consistent with the Safety and Soundness Act.

Sandra L. Thompson,

Director, Federal Housing Finance Agency.

BILLING CODE 8070–01–P

CONSUMER FINANCIAL PROTECTION BUREAU**12 CFR Chapter X****Consumer Financial Protection Circular 2024–07: Design, Marketing, and Administration of Credit Card Rewards Programs**

AGENCY: Consumer Financial Protection Bureau.

ACTION: Consumer financial protection circular.

SUMMARY: The Consumer Financial Protection Bureau (Bureau or CFPB) has issued Consumer Financial Protection Circular 2024–07 titled, “Design, marketing, and administration of credit card rewards programs.” In this circular, the CFPB responds to the question, “Can credit card issuers violate the law if they or their rewards partners devalue earned rewards or otherwise inhibit consumers from obtaining or redeeming promised rewards?”

DATES: The CFPB released this circular on its website on December 18, 2024.

ADDRESSES: Enforcers, and the broader public, can provide feedback and comments to Circulars@cfpb.gov.

FOR FURTHER INFORMATION CONTACT: George Karithanom, Regulatory Implementation & Guidance Program Analyst, Office of Regulations, at 202–435–7700 or at: <https://reginquiries.consumerfinance.gov/>. If you require this document in an alternative electronic format, please contact CFPB_Accessibility@cfpb.gov.

SUPPLEMENTARY INFORMATION:**Question Presented**

Can credit card issuers violate the law if they or their rewards partners devalue earned rewards or otherwise inhibit consumers from obtaining or redeeming promised rewards?

Response

Yes. Covered persons that offer, provide, or operate credit card rewards programs, and their service providers, may violate the prohibition against unfair, deceptive, or abusive acts or practices in a variety of circumstances, including instances where some of the conduct in question may be attributable to a third party, such as a merchant partner, and regardless of whether covered persons or service providers are taking actions consistent with rewards program terms. This circular provides some examples where covered persons that offer, provide, or operate credit card rewards programs, and their service providers, may violate the prohibition against unfair, deceptive, and abusive

acts or practices, where: (1) the redemption values of rewards that consumers have already earned or purchased are devalued; (2) consumers’ receipt of rewards is revoked, canceled, or prevented based on buried or vague conditions, such as criteria disclosed only in fine print or up to the operator’s discretion; or (3) consumers have reward points deducted from their balance without receiving the corresponding benefit of the rewards, including due to technical failures when redeeming rewards points on merchant partners’ systems.

Background on Credit Card Rewards Programs

Rewards programs are increasingly used to encourage consumers to apply for and use specific credit cards.¹ As of 2019, more than 90 percent of general purpose credit card spending occurred on rewards cards, and by the end of 2022, 75 percent of general purpose credit cards were rewards cards.² While rewards cards are more common for consumers with higher credit scores, the use of rewards cards is growing fastest among deep subprime, subprime, and near-prime consumers.³ The amount of

money or value that consumers earn and maintain in credit card rewards programs is also large and has increased substantially in recent years. For example, in 2022, consumers earned more than \$40 billion in rewards from major general-purpose credit cards, more than a 50 percent increase from 2019.⁴ Consumer rewards balances at the end of 2022 were more than \$33 billion, up 40 percent relative to the fourth quarter of 2019.⁵ More consumers are also using rewards to make payments, including for day-to-day purchases and necessary expenses.⁶

Credit card rewards programs are typically structured around earning rewards “currencies”—most commonly “miles” or other units of value issued by a co-brand partner (such as an airline or hospitality chain) or, alternatively, a credit card issuer’s own “points.”⁷ Consumers typically earn miles or points through credit card spending or by directly purchasing them in accordance with pre-determined formulas, or “earn rates.”⁸ Many issuers also offer promotional rewards through things like sign-up bonuses and referrals.⁹

Once earned or purchased by consumers, points can be redeemed for rewards like “cash back” (statement

¹ See CFPB, *The Consumer Credit Card Market* (Oct. 2023) (hereinafter “2023 Report”) at 98, https://files.consumerfinance.gov/f/documents/cfpb_consumer-credit-card-market-report_2023.pdf. An industry survey found that rewards and cash back programs were the top reason why consumers chose one card over another, as well as the top reason consumers cited for increasing spending on credit cards over the last six months. Despite the growth in the use of rewards cards among consumers with lower credit scores, in many cases, these consumers do not benefit from these rewards programs, and research has shown that consumers with higher credit scores generally benefit from credit card rewards programs at the expense of consumers with lower credit scores. credits or direct deposits) or transfers to a co-brand or merchant partner (e.g., miles or merchant-specific gift cards), and also for other types of goods or services, like buying merchandise, donating to charities, applying to purchases at check out, and others.¹⁰ However, both credit card issuers and loyalty programs generally reserve, and often assert a right to, unilaterally change the value of rewards, including at the point of redemption.¹¹ Reward points or miles valuation changes can sometimes be tied to price changes in the underlying product or service for which the reward is being redeemed (e.g., changes in flight pricing), but program operators also adjust rewards redemption rates distinct from underlying prices, apparently as a means to “preserve” or “maintain” profit margins.¹²

As the market for credit card rewards programs has grown, so too has their complexity.¹³ Rewards program operators often assert their ability to unilaterally modify credit card rewards programs, which has caused at least one State to take action to provide consumers with additional protections against such unilateral program modifications.¹⁴ Additionally, the number of consumer complaints that the CFPB receives about credit card rewards programs has also risen dramatically in recent years.¹⁵ Many consumers’ complaints describe how the marketing or initial offering of a rewards program is inconsistent with their actual, later experiences earning and redeeming credit card rewards. For instance, consumers have complained to the CFPB about companies devaluing their rewards relative to what they were marketed, or increasing barriers to redeeming cash or cash-equivalent rewards, such as eliminating the ability for consumers to redeem points for a statement credit.¹⁶

Consumers have also complained about being denied access to promotional or other rewards because of terms or other requirements hidden in their cardholder or rewards program agreements, including instances of unexpectedly being found ineligible after applying for a credit card¹⁷ or being forced to return a promotional offer because they closed their account within a certain period.¹⁸ For many of these types of complaints, companies and merchant partners justified revoking, canceling, or preventing consumer access to rewards through requirements and guidelines absent from their marketing materials and only found buried in their cardholder or rewards program agreements.

Consumers have also repeatedly alerted the CFPB about difficulties redeeming their rewards or inexplicably seeing their points disappear. These reported challenges include issues with

customer service,¹⁹ technical failures,²⁰ and dispute resolution,²¹ all of which can be further compounded when neither the issuer nor its merchant partner accept responsibility and both refer consumers to the other.²² Because of these issues, some consumers have seen their rewards disappear when being transferred or applied to a merchant partner, with little recourse to resolve such problems.²³

Analysis

The CFPB prohibits any “covered person” or “service provider” from “committing or engaging in an unfair, deceptive, or abusive act or practice under Federal law in connection with . . . the offering of a consumer financial product or service.”²⁴ An act or practice is unfair when: (1) it causes or is likely to cause substantial injury to consumers that is not reasonably avoidable by consumers and (2) such injury is not outweighed by countervailing benefits to consumers or to competition.²⁵ Substantial injury includes monetary harm, and may be based on likely rather than actual injury.²⁶ In general, an injury is not reasonably avoidable if consumers cannot reasonably anticipate the injury, or when there is no way to avoid the injury even if it is anticipated.²⁷

Under the CFPB, a representation, omission, or practice is deceptive if it is likely to mislead a reasonable consumer and is material.²⁸ Representations, omissions, or practices are “material” if they “involve[] information that is important to consumers and, hence, likely to affect their choice of, or conduct regarding, a product.”²⁹ In assessing the meaning of a communication, the CFPB looks to its overall, net impression; in other words, the CFPB considers the entire advertisement, transaction, or course of dealing rather than evaluating

statements in isolation.³⁰ A misrepresentation can be “an express or implied statement [that is] contrary to fact.”³¹ It may also be deceptive, for example, when a seller partially discloses information about the nature of a product or service, but fails to disclose other material information.³² Further, “[w]ritten disclosures or fine print may be insufficient to correct a misleading representation.”³³

Rewards programs are a feature common to many credit cards, and tend to both be prominently marketed by issuers and widely used by consumers.³⁴ Credit card rewards programs also play a major role in consumer’s choices on which cards to apply for and use for any given transaction.³⁵

The CFPB is issuing this circular to underscore that the CFPB’s prohibition on unfair or deceptive acts or practices applies to the design, marketing, and administration of credit card rewards programs.³⁶ Rewards program operators

may violate this prohibition in a variety of circumstances regardless of whether they are taking actions consistent with rewards program terms. In particular, rewards program operators risk committing unfair or deceptive acts or practices when (1) rewards that consumers have already earned are devalued; (2) consumers’ receipt of rewards is revoked, cancelled, or prevented based on buried or vague conditions; and (3) rewards points are deducted without consumers receiving the corresponding benefit of the rewards. These examples are illustrative and non-exhaustive.

As described further below, the CFPB emphasizes that covered persons that offer, provide, or operate credit card rewards programs may be liable for an unfair or deceptive act or practice where some of the conduct in question may be attributable to a third party or service provider, such as a merchant partner.³⁷

Devaluation of Rewards Already Earned or Purchased

Rewards program operators may commit an unfair or deceptive act or practice when they materially reduce the overall value of rewards that consumers have already earned or purchased. Consumers make decisions on whether to open or use a credit card based on the explicit and implicit representations about the value of card benefits and rewards. For instance, consumers’ reasonable expectations about the value of rewards may be informed by advertisements at account opening, as well as by redemption values of rewards communicated to consumers on or around the time the consumer makes decisions to purchase goods with the card and accrue rewards benefits. Furthermore, fine print disclaimers or contract terms stating that rewards program operators have the right to adjust rewards offerings often will not be sufficient to correct

consumers’ net impression about the expected value of rewards.

When rewards operators influence consumers’ expectations about the value of rewards in their product or marketing efforts (e.g., to support customer acquisition, retention, or increased purchase volume), but later make decisions to deflate the overall value of accrued rewards, they may have engaged in actions that resemble a traditional “bait-and-switch” scheme.³⁸ These activities may constitute unfair or deceptive acts or practices under the CFPB.³⁹

Enforcers investigating potentially unfair or deceptive acts or practice should consider a variety of different devaluation tactics by rewards program operators. Unfair or deceptive devaluations are easier to detect when the rewards program involves simple, fixed redemption rates with one retailer or merchant partner. But such schemes may be harder to detect where there are numerous potential rewards available or rewards program operators implement more complex program changes. For example, if a rewards program operator uses dynamic pricing for rewards redemptions, enforcers can examine whether the firm is unfairly or deceptively devaluing points over time by considering, for example, whether the dynamic prices in points have increased, in aggregate, relative to dynamic cash prices for the same products or services. Similarly, if a rewards program includes redemption options from multiple participating merchant partners, and the rewards program operator loses a major merchant partner or a major partner materially downgrades the service provided, enforcers can look to whether the rewards program operator is taking reasonable measures to generally maintain the value of rewards, such as by increasing points usable at other merchant partners, allowing customers to cash out points, replacing lost rewards with other rewards, or by other

³⁰ See, e.g., *CFPB v. Aria*, 54 F.4th 1168, 1173 (9th Cir. 2022); *Gordon*, 819 F.3d at 1193; *FTC v. E.M.A. Nationwide, Inc.*, 767 F.3d 611, 631 (6th Cir. 2014); *Fanning v. FTC*, 821 F.3d 164, 170 (1st Cir. 2016).

³¹ FTC, Policy Statement on Deception (Oct. 14, 1983).

³² See, e.g., *Sterling Drug, Inc. v. FTC*, 741 F.2d 1146, 1154 (9th Cir. 1984) (advertisements referring to “unique formula” were deceptive because they could lead consumers to infer that pain reliever’s formulation was something other than ordinary aspirin); see also *FTC v. Bay Area Business Council, Inc.*, 423 F.3d 627, 635 (7th Cir. 2005) (“[T]he omission of a material fact, without an affirmative misrepresentation, may give rise to an FTC Act violation.”).

³³ FTC, Policy Statement on Deception (Oct. 14, 1983).

³⁴ In 2022, rewards card spending was 90 percent of all consumer spending on general purpose credit cards. CFPB, *The Consumer Credit Card Market*, at 99 (Oct. 2023), https://files.consumerfinance.gov/f/documents/cfpb_consumer-credit-card-market-report_2023.pdf. See also *Background on Credit Card Rewards Programs*, *supra*.

³⁵ *Id.* at 98. Because credit card rewards programs are offered or provided “in connection” with a consumer financial product or service (the extension of credit to consumers), the “covered persons” or “service providers” who offer, provide, or support such programs (hereinafter “rewards program operators”) must comply with the CFPB, including its prohibitions against unfair, deceptive or abusive acts or practices, as well as other applicable consumer financial protection laws. In the typical case, a credit card issuer providing the rewards program would be a “covered person,” while “service providers” could include the partners or vendors that provide material services on the rewards program in connection with the credit card program, such as co-brand or merchant partners that deliver applicable rewards, or vendors who operate the key infrastructure or platforms for consumers to view, manage, and use their rewards earnings. See 12 U.S.C. 5481(6), 5481(26)(A).

³⁶ While not specifically discussed in this circular, rewards program operators must also comply with the CFPB’s prohibition on abusive acts or practices, 12 U.S.C. 5531(d), which provides that an act or practice is abusive if it (1) materially interferes with a consumer’s ability to understand

a term or condition of a consumer financial product or service or (2) takes unreasonable advantage of the consumer’s (a) lack of understanding of the material risks, costs, or conditions of the product or service; (b) inability to protect their interests in selecting or using a consumer financial product or service; or (c) reasonable reliance on a covered person to act in the consumer’s interests.

³⁷ See, e.g., *CFPB v. Ocwen Fin. Corp.*, No. 17–80495–CIV, 2019 WL 13203853 at *30 (S.D. Fla. Sept. 5, 2019) (finding that the CFPB sufficiently alleged CFPB violations regarding add-on products even where add-on vendor was responsible for enrolling borrowers to such add-on products); see also, e.g., *FTC v. Bay Area Bus. Council, Inc.*, 423 F.3d at 630 (affirming district court ruling that multiple interrelated corporate and individual defendants were liable under section 5 of FTC Act for deceptive telemarketing scheme); *FTC v. Neovi, Inc.*, 604 F.3d 1150, 1155 (9th Cir. 2010) (“a single violation of the [FTC] Act may have more than one perpetrator”) (citing *Bay Area*).

³⁸ See 16 CFR 238 *et seq.*, FTC Guides Against Bait Advertising. Cf. *Rossman v. Fleet Card (R.I.) Nat. Ass’n*, 280 F.3d 384, 396–400 (3d Cir. 2002) (credit card issuer soliciting business with no-annual-fee offer while intending to later impose fee constitutes a bait-and-switch scheme).

³⁹ Cf. 24 FR 9755 (Dec. 4, 1959) (noting that FTC enforcement actions with respect to bait-and-switch schemes are brought under the FTC Act’s prohibition on “unfair or deceptive acts or practices”); 32 FR 15540 (Nov. 8, 1967) (similar); *Synopsis of Federal Trade Commission Decisions Concerning “Bait and Switch” Sales Practices* (Sept. 23, 1975) (“The Federal Trade Commission has determined that ‘bait and switch’ practices are unfair or deceptive trade practices and are unlawful under Section 5(a)(1) of Federal Trade Commission Act.”), https://www.ftc.gov/system/files/ftc_gov/pdf/NOPO-Bait-and-Switch.pdf.

means. Additionally, when two firms merge, resulting in a conversion of one firm's customers into a new rewards program, enforcers can look at whether the resulting firm took actions to convert customers' points to the new system without a reduction in points value.⁴⁰

In any investigation into whether a rewards program operator has engaged in an unfair or deceptive devaluation scheme, enforcers are encouraged to collect and consider accounting or other metrics maintained by program operators or others regarding rewards values. For example, many companies maintain internal figures on the dollar value of outstanding rewards for accounting purposes, including an estimated cost-per-point or weighted average redemption cost.⁴¹ If a firm's cost-per-point or weighted average redemption cost decreases over time, that could suggest a firm has engaged in a bait-and-switch or similar unfair or deceptive act or practice.

The CFPB emphasizes that covered persons that offer, provide, or operate credit card rewards programs may be liable for an unfair or deceptive act or practice even when the material devaluation of rewards could arguably be attributed to the actions of a third party. In other words, if a covered person that offers, provides, or operates a credit card rewards program makes explicit or implicit representations about, and thereby induces consumer expectations regarding, the value of the card benefits or rewards, and the value of those benefits or rewards is subsequently materially reduced by actions that may be attributable to the covered person's merchant partner, the

covered person may be liable for an unfair or deceptive act or practice.

Hidden Conditions

Rewards program operators also risk committing unfair or deceptive acts or practices when they revoke or cancel rewards, or prevent the award of rewards, based on buried or vague conditions.⁴² Rewards programs have become increasingly complex, with lengthy terms and unintuitive restrictions that consumers may not be aware of as they use their credit cards day to day. These lengthy terms may use buried or vague conditions set by rewards program operators that are non-negotiable and may not be consistent with prominent promotional language advertising the rewards that consumers can earn. As noted above, consumer complaints received by the CFPB suggest that, despite descriptions in the fine print of rewards program terms, consumers often do not understand the basis of many rewards forfeitures or denials.

The following are illustrative examples of potentially unfair rewards program practices:

- Revoking or canceling rewards based on vague catch-all language in program terms, such as “gaming” or “abuse.” This can be especially problematic when those terms are also subject to the rewards program operator's discretion.⁴³
- Revoking previously earned rewards based on policies that tie revocation to actions that are not within the consumer's control and do not constitute fraud or misconduct by the consumer, like an issuer unilaterally closing an account.⁴⁴
- Promotional “sign-up” offers that are denied based on hidden conditions that consumers were not reasonably aware of, such as “churning” conditions that restrict how frequently a consumer can earn sign-up rewards, time periods to earn rewards that are effectively shortened by the hidden and unavoidable period of time needed to receive and activate a card, or promotional offers that are unavailable for applicants through certain channels.

These sorts of dark patterns and fine print will often constitute deceptive representations, omissions, or practices about material concerns, and thus violate the prohibition on deceptive practices.⁴⁵ In addition, denying or preventing rewards based on buried or vague terms could cause a substantial monetary injury in the form of lost rewards value and may be unfair.⁴⁶ These injuries may not be reasonably avoidable by consumers where conditions are buried or vague, and accordingly hinder consumers' ability to make a “free and informed choice.”⁴⁷ Specifically, consumers cannot reasonably avoid injuries where they are not “adequately informed” of key conditions or presented such information in a confusing way.⁴⁸ As noted above, rewards program operators typically promote most prominently the availability of rewards, even more so than other key credit card terms, such as APR or annual fees, while putting conditions around rewards in fine print.⁴⁹ Consumers may not understand the restrictive eligibility criteria buried in the fine print where program operators send marketing materials that target rewards promotions to the specific consumers.⁵⁰ Similarly, a consumer may be confused by the way a rewards program operator interprets vague catch-all language, such as terms restricting rewards based on impermissible “gaming” or “abuse,”

⁴⁵ See FTC, *Bringing Dark Patterns to Light*, at 7 (Sept. 2022) (“Some dark patterns operate by hiding or obscuring material information from consumers, such as burying key limitations of the product or service in dense Terms of Service documents that consumers don't see before purchase.”), https://www.ftc.gov/system/files/ftc_gov/pdf/P214800%20Dark%20Patterns%20Report%209.14.2022%20-%20FINAL.pdf. Cf. *FTC v. Amazon.com*, 2024 WL 2723812 at *1 (W.D. Wash. 2024) (denying motion to dismiss of claims brought under Section 5 of the FTC Act and the Restore Online Shoppers' Confidence Act based on defendants' “trick[ing], coer[ce], and manipul[at]ing consumers . . . by failing to disclose the material terms of the subscription clearly and conspicuously and by failing to obtain consumers' informed consent before enrolling them”); *FTC v. Publishers Clearing House LLC*, No. 23–CV–4735 (E.D.N.Y. June 6, 2023) (complaint) (alleging defendant “employs dark patterns throughout the consumer's experience by, among other things . . . placing disclosures in small and light font and in places where a consumer is unlikely to see them”).

⁴⁴ *Id.* at 20.

when those interpretations conflict with prominent promotional language or other representations.⁵¹ There are no countervailing benefits that outweigh the injury to consumers or competition of inducing consumers to use credit cards with vague or fine-print conditions that consumers cannot reasonably understand.⁵²

Inability To Redeem Rewards

Rewards program operators can also commit unfair or deceptive acts or practices when their customers lose their points because redemption procedures do not function properly. In offering rewards programs, operators make representations to consumers about how rewards can be redeemed, often developing online interfaces for consumers to use to redeem rewards. A rewards program operator is accordingly responsible for administering the rewards program it offers, including coordinating with its merchant partners or vendors, so that consumers can redeem the rewards that they have earned and selected in accordance with the rewards program.⁵³

If systems failures result in consumers losing points when attempting to redeem, it may result in a deceptive practice because consumers would typically have a basis to reasonably believe they were purchasing products or services with their points, which would be false as a result of the failure. It would likely also be unfair because

consumers would incur injury as a result of the loss of rewards, with no ability to avoid the harm and no countervailing benefits that outweigh the injury. Even if a rewards program operator ultimately refunds unredeemed points to a consumer, the consumer may be harmed by the consumer's inability to redeem points in the interim,⁵⁴ and often consumers end up expending significant time and resources trying to obtain the refund.⁵⁵ Consumers cannot reasonably avoid these harms as they do not have control over operators' rewards program administration, including procedures for redeeming points or converting them for use with co-brand or merchant partners.

Again, the CFPB emphasizes that covered persons that offer, provide, or operate credit card rewards programs may commit an unfair or deceptive act or practice when the loss of points due to failures of redemption procedures could arguably be attributed to a merchant partner or service provider. For instance, a covered person may be liable for an unfair or deceptive act or practice when a consumer attempts to transfer rewards points from the online portal of such covered person to the points portal of a merchant partner (e.g., requests a "conversion" of credit card rewards points to points at a travel partner), but technical failures on the merchant partner's system result in the consumer losing the points.

About Consumer Financial Protection Circulars

Consumer Financial Protection Circulars are issued to all parties with authority to enforce Federal consumer financial law. The CFPB is the principal Federal regulator responsible for administering Federal consumer financial law, *see* 12 U.S.C. 5511, including the Consumer Financial Protection Act's prohibition on unfair, deceptive, and abusive acts or practices, 12 U.S.C. 5536(a)(1)(B), and 18 other "enumerated consumer laws," 12 U.S.C. 5481(12). However, these laws are also enforced by State attorneys general and State regulators, 12 U.S.C. 5552, and prudential regulators including the Federal Deposit Insurance Corporation,

the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, and the National Credit Union Administration. *See, e.g.*, 12 U.S.C. 5516(d), 5581(c)(2) (exclusive enforcement authority for banks and credit unions with \$10 billion or less in assets). Some Federal consumer financial laws are also enforceable by other Federal agencies, including the Department of Justice and the Federal Trade Commission, the Farm Credit Administration, the Department of Transportation, and the Department of Agriculture. In addition, some of these laws provide for private enforcement.

Consumer Financial Protection Circulars are intended to promote consistency in approach across the various enforcement agencies and parties, pursuant to the CFPB's statutory objective to ensure Federal consumer financial law is enforced consistently. 12 U.S.C. 5511(b)(4).

Consumer Financial Protection Circulars are also intended to provide transparency to partner agencies regarding the CFPB's intended approach when cooperating in enforcement actions. *See, e.g.*, 12 U.S.C. 5552(b) (consultation with CFPB by State attorneys general and regulators); 12 U.S.C. 5562(a) (joint investigatory work between CFPB and other agencies).

Consumer Financial Protection Circulars are general statements of policy under the Administrative Procedure Act. 5 U.S.C. 553(b). They provide background information about applicable law, articulate considerations relevant to the Bureau's exercise of its authorities, and, in the interest of maintaining consistency, advise other parties with authority to enforce Federal consumer financial law. They do not restrict the Bureau's exercise of its authorities, impose any legal requirements on external parties, or create or confer any rights on external parties that could be enforceable in any administrative or civil proceeding. The CFPB Director is instructing CFPB staff as described herein, and the CFPB will then make final decisions on individual matters based on an assessment of the factual record, applicable law, and factors relevant to prosecutorial discretion.

Rohit Chopra,

Director, Consumer Financial Protection Bureau.

RIN 2105–AF16

Revisions to Civil Penalty Amounts, 2025**AGENCY:** Department of Transportation (DOT or the Department).**ACTION:** Final rule.**SUMMARY:** This final rule provides the statutorily prescribed 2025 adjustment to civil penalty amounts that may be imposed for violations of certain DOT regulations.**DATES:** This rule is effective December 30, 2024.**FOR FURTHER INFORMATION CONTACT:** Elizabeth Kohl, Attorney-Advisor, Office of the General Counsel, U.S. Department of Transportation, 1200 New Jersey Ave. SE, Washington, DC 20590, 202–366–7253; elizabeth.kohl@dot.gov.**SUPPLEMENTARY INFORMATION:****Authority for This Rulemaking**

This rule implements the Federal Civil Penalties Inflation Adjustment Act of 1990 (FCPIAA), Public Law 101–410, as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (2015 Act), Public Law 114–74, 129 Stat. 599, codified at 28 U.S.C. 2461 note. The FCPIAA and the 2015 Act require Federal agencies to adjust minimum and maximum civil penalty amounts to preserve their deterrent impact. The 2015 Act amended the formula and frequency of the adjustments. It required an initial catch-up adjustment in the form of an interim final rule, followed by annual adjustments of civil penalty amounts using a statutorily mandated formula. Section 4(b)(2) of the 2015 Act specifically directs that the annual adjustment be accomplished through final rule without notice and comment. This rule is effective immediately.

The Department's authorities over the specific civil penalty regulations being amended by this rule are provided in the preamble discussion below.

I. Background

On November 2, 2015, the President signed into law the 2015 Act, which amended the FCPIAA, to improve the effectiveness of civil monetary penalties and to maintain their deterrent effect. The 2015 Act requires Federal agencies to: (1) adjust the level of civil monetary penalties with an initial “catch-up” adjustment through an interim final rule (IFR); and (2) make subsequent annual adjustments.

The 2015 Act directed the Office of Management and Budget (OMB) to issue guidance on implementing the required annual adjustment no later than December 15 of each year.¹ OMB released this required guidance in OMB Memorandum M–25–02, available at <https://www.whitehouse.gov/omb/information-for-agencies/memoranda/>, which provides instructions on how to calculate the 2025 annual adjustment. To derive the 2025 adjustment, the Department must multiply the maximum or minimum penalty amount by the percent change between the October 2024 Consumer Price Index for All Urban Consumers (CPI–U) and the October 2023 CPI–U. In this case, as explained in OMB Memorandum M–25–02, the percent change between the October 2024 CPI–U and the October 2023 CPI–U is 1.02598.²

¹ 28 U.S.C. 2461 note.

² Agencies may calculate the percent change using the CPI–U numbers, which are typically issued in November each year, and confirm their

On May 16, 2024, the President signed the FAA Reauthorization Act of 2024 (2024 Reauthorization Act) (Pub. L. 118–63) into law. Updates to the Department's civil penalties authority in the 2024 Reauthorization Act are reflected, as appropriate, in this final rule.

II. Issuance of a Final Rule

This final rule is being published without notice and comment and with an immediate effective date. The 2015 Act provides clear direction for how to adjust the civil penalties, and clearly states at section 4(b)(2) that this adjustment shall be made “notwithstanding section 553 of title 5, United States Code.” By operation of the 2015 Act, DOT must publish an annual adjustment by January 15 of every year, and the new levels take effect upon publication of the rule. Accordingly, DOT is publishing this final rule without prior notice and comment, and with an immediate effective date.

III. Discussion of the Final Rule

In 2016, OST and DOT's operating administrations with civil monetary penalties promulgated the “catch up” IFR required by the 2015 Act. All DOT operating administrations have finalized their “catch up” IFRs, and this rule makes the annual adjustment required by the 2015 Act.

The Department emphasizes that this rule adjusts penalties prospectively, and therefore the penalty adjustments made by this rule will apply only to violations that take place after this rule becomes effective. This rule also does not change previously assessed or enforced penalties that DOT is actively collecting or has collected.

A. Office of the Secretary (OST) 2025 Adjustments

OST's 2025 civil penalty adjustments are summarized in the chart below. Pursuant to section 507 of the 2024 Reauthorization Act, the Department increased the maximum civil penalty in 49 U.S.C. 46301(a)(1) to \$75,000 for persons who are not individuals or small business concerns.³ The maximum penalty for individuals and small business concerns was not

calculations upon issuance of the annual OMB guidance.

³ The 2015 Act specifies that if a civil penalty is increased by an amount greater than the amount of the required adjustment during the 12-month period preceding the required adjustment, the Secretary is not required to make the adjustment for that year. Consistent with this provision, the \$75,000 amount will not be increased in this 2025 adjustment.

changed by the 2024 Reauthorization Act.

Also, subsection 542(a) of the 2024 Reauthorization Act requires DOT to issue a notice of proposed rulemaking to develop requirements for minimum training standards related to stowing on an aircraft wheelchairs and scooters used by passengers with disabilities. Subsections (b) and (c) specify requirements of the rule and considerations that the Department must make in conducting the rulemaking. Subsection (d) requires issuance of a final rule, and subsection (e) authorizes DOT to assess a civil

penalty in accordance with 49 U.S.C. 46301 against any air carrier or foreign air carrier who does not meet the requirements established in the rulemaking. In addition, subsection 543(a) of the 2024 Reauthorization Act requires DOT to issue a notice of proposed rulemaking to develop requirements for minimum training standards for airline personnel or contractors who assist wheelchair users who board or deplane using an aisle chair or other boarding device. Subsections (b) and (c) specify requirements of the rule and

considerations that the Department must make in conducting the rulemaking. Subsection (d) requires issuance of a final rule, and subsection (e) authorizes DOT to assess a civil penalty in accordance with 49 U.S.C. 46301 against any air carrier or foreign air carrier who does not meet the requirements established in the rulemaking. DOT will conduct the rulemakings as required by the 2024 Reauthorization Act. Any penalties would subsequently be included and updated in the Department's annual civil penalties update rulemaking.

Description	Citation	Existing penalty	New penalty (existing penalty × 1.02598)
General civil penalty for violations of certain aviation economic regulations and statutes.	49 U.S.C. 46301(a)(1)	\$41,577	\$75,000
General civil penalty for violations of certain aviation economic regulations and statutes involving an individual or small business concern.	49 U.S.C. 46301(a)(1)	1,828	1,875
Civil penalties for individuals or small businesses for violations of most provisions of Chapter 401 of Title 49, including the anti-discrimination provisions of sections 40127 and 41705 and rules and orders issued pursuant to these provisions.	49 U.S.C. 46301(a)(5)(A)	16,630	17,062
Civil penalties for individuals or small businesses for violations of 49 U.S.C. 41719 and rules and orders issued pursuant to that provision.	49 U.S.C. 46301(a)(5)(C)	8,315	8,531
Civil penalties for individuals or small businesses for violations of 49 U.S.C. 41712 or consumer protection rules and orders issued pursuant to that provision.	49 U.S.C. 46301(a)(5)(D)	4,159	4,267

B. Federal Aviation Administration (FAA) 2025 Adjustments

FAA's 2025 civil penalty adjustments are summarized in the chart below. Pursuant to section 507 of the 2024 Reauthorization Act, the Department

increased the maximum civil penalty in 49 U.S.C. 46301(a)(1) to \$75,000 for persons who are not individuals or small business concerns. The Department also added the civil penalty specified in section 770 of the 2024

Reauthorization Act for violations of 47 U.S.C. 47107(a)(22) related to the restriction or prohibition of the sale or self-fueling of any 100-octane low lead aviation gasoline, including any grant assurances made under that section.⁴

Description	Citation	Existing penalty	New penalty (existing penalty × 1.02598)
Violation of hazardous materials transportation law	49 U.S.C. 5123(a)(1)	\$99,756	\$102,348
Violation of hazardous materials transportation law resulting in death, serious illness, severe injury, or substantial property destruction.	49 U.S.C. 5123(a)(2)	232,762	238,809
Minimum penalty for violation of hazardous materials transportation law relating to training.	49 U.S.C. 5123(a)(3)	601	617
Maximum penalty for violation of hazardous materials transportation law relating to training.	49 U.S.C. 5123(a)(3)	99,756	102,348
Knowing presentation of a nonconforming aircraft for issuance of an initial airworthiness certificate by a production certificate holder.	49 U.S.C. 44704(d)(3)(B)	1,181,581	1,212,278
Knowing failure by an applicant for or holder of a type certificate to submit safety critical information or include certain such information in an airplane flight manual or flight crew operating manual contrary to 49 U.S.C. 44704(e)(1)–(3).	49 U.S.C. 44704(e)(4)(A)	1,181,582	1,212,278
Operation of an unmanned aircraft or unmanned aircraft system equipped or armed with a dangerous weapon.	49 U.S.C. 44802 note	30,417	31,207
Violation by a person other than an individual or small business concern under 49 U.S.C. 46301(a)(1)(A) or (B).	49 U.S.C. 46301(a)(1)	41,577	75,000
Violation by an airman serving as an airman under 49 U.S.C. 46301(a)(1)(A) or (B) (but not covered by 46301(a)(5)(A) or (B)).	49 U.S.C. 46301(a)(1)	1,828	1,875
Violation by an individual or small business concern under 49 U.S.C. 46301(a)(1)(A) or (B) (but not covered in 49 U.S.C. 46301(a)(5)).	49 U.S.C. 46301(a)(1)	1,828	1,875

⁴ As noted in footnote 3, the 2015 Act specifies that if a civil penalty is increased by an amount greater than the amount of the required adjustment

during the 12-month period preceding the required adjustment, the Secretary is not required to make the adjustment for that year. Consistent with this

provision, the \$5,000 amount will not be increased in this 2025 adjustment.

Description	Citation	Existing penalty	New penalty (existing penalty × 1.02598)

Maximum civil penalty for willfully failing to affix, or failing to maintain, the label required in 49 U.S.C. 32304.	49 U.S.C. 32309	2,168	2,224
Maximum penalty amount per violation related to odometer tampering and disclosure.	49 U.S.C. 32709	13,300	13,676
Maximum penalty amount for a related series of violations related to odometer tampering and disclosure.	49 U.S.C. 32709	1,330,069	1,364,624
Maximum penalty amount per violation related to odometer tampering and disclosure with intent to defraud.	49 U.S.C. 32710	13,330	13,676
Maximum penalty amount for each violation of 49 U.S.C. 33114(a)(1)–(4)	49 U.S.C. 33115(a)	2,922	2,998
Maximum penalty amount for a related series of violations of 49 U.S.C. 33114(a)(1)–(4).	49 U.S.C. 33115(a)	730,455	749,432
Maximum civil penalty for violations of 49 U.S.C. 33114(a)(5)	49 U.S.C. 33115(b)	216,972	222,609
Maximum civil penalty for violations under 49 U.S.C. 32911(a) related to automobile fuel economy.	49 U.S.C. 32912(a)	51,139	52,468
Civil penalty factor for violations of fuel economy standards prescribed for a model year under 49 U.S.C. 32902. ⁵	49 U.S.C. 32912(b)	17	17
Maximum civil penalty factor that may be prescribed for fuel economy standards under 49 U.S.C. 32912(c)(1)(A).	49 U.S.C. 32912(c)(1)(B)	32	33
Maximum civil penalty for a violation under the medium- and heavy-duty vehicle fuel efficiency program.	49 U.S.C. 32902	50,360	51,668

D. Federal Motor Carrier Safety Administration (FMCSA) 2025 Adjustments

FMCSA's civil penalties affected by this rule are all located in appendices A and B to 49 CFR part 386. The 2025 adjustments to these civil penalties are

summarized in the chart below. Note that in the regulatory text for the 2023 update, the penalty for violations of Appendix A IV (i) Out-of-service order (conducting operations during suspension or revocation for failure to pay penalties) and the penalty for Appendix B (a)(3) Non-recordkeeping

violations were incorrectly stated as \$18,758. The correct dollar amount, as stated in the preamble of the 2023 update, was \$18,759. The error in the regulatory text has been corrected in this 2024 update, reflecting a penalty for this 2025 update of \$19,246.

Description	Citation	Existing penalty	New penalty (existing penalty × 1.02598)
Appendix A II Subpoena	49 U.S.C. 525	\$1,330	\$1,365
Appendix A II Subpoena	49 U.S.C. 525	13,300	13,676
Appendix A IV (a) Out-of-service order (operation of commercial motor vehicle (CMV) by driver).	49 U.S.C. 521(b)(7)	2,304	2,364
Appendix A IV (b) Out-of-service order (requiring or permitting operation of CMV by driver).	49 U.S.C. 521(b)(7)	23,048	23,647
Appendix A IV (c) Out-of-service order (operation by driver of CMV or intermodal equipment that was placed out of service).	49 U.S.C. 521(b)(7)	2,304	2,364
Appendix A IV (d) Out-of-service order (requiring or permitting operation of CMV or intermodal equipment that was placed out of service).	49 U.S.C. 521(b)(7)	23,048	23,647
Appendix A IV (e) Out-of-service order (failure to return written certification of correction).	49 U.S.C. 521(b)(2)(B)	1,152	1,182
Appendix A IV (g) Out-of-service order (failure to cease operations as ordered).	49 U.S.C. 521(b)(2)(F)	33,252	34,116
Appendix A IV (h) Out-of-service order (operating in violation of order).	49 U.S.C. 521(b)(7)	29,221	29,980
Appendix A IV (i) Out-of-service order (conducting operations during suspension or revocation for failure to pay penalties).	49 U.S.C. 521(b)(2)(A) and (b)(7)	18,759	19,246
Appendix A IV (j) (conducting operations during suspension or revocation).	49 U.S.C. 521(b)(7)	29,221	29,980
Appendix B (a)(1) Recordkeeping—maximum penalty per day.	49 U.S.C. 521(b)(2)(B)(i)	1,544	1,584
Appendix B (a)(1) Recordkeeping—maximum total penalty.	49 U.S.C. 521(b)(2)(B)(i)	15,445	15,846
Appendix B (a)(2) Knowing falsification of records	49 U.S.C. 521(b)(2)(B)(ii)	15,445	15,846
Appendix B (a)(3) Non- recordkeeping violations	49 U.S.C. 521(b)(2)(A)	18,759	19,246

⁵ For model years before model year 2019, the civil penalty is \$5.50; for model years 2019 through

2021, the civil penalty is \$14; for model year 2022, the civil penalty is \$15; for model year 2023, the

civil penalty is \$16; for model years 2024 and 2025, the civil penalty is \$17.

E. Federal Railroad Administration (FRA) 2025 Adjustments

FRA's 2025 civil penalty adjustments are summarized in the chart below.

Description	Citation	Existing penalty	New penalty (existing penalty $\times$ 1.02598)
Minimum rail safety penalty	49 U.S.C. ch. 213	\$1,086	\$1,114
Ordinary maximum rail safety penalty	49 U.S.C. ch. 213	35,516	36,439
Maximum penalty for an aggravated rail safety violation.	49 U.S.C. ch. 213	142,063	145,754
Minimum penalty for hazardous materials training violations.	49 U.S.C. 5123	601	617
Maximum penalty for ordinary hazardous materials violations.	49 U.S.C. 5123	99,756	102,348
Maximum penalty for aggravated hazardous materials violations.	49 U.S.C. 5123	232,762	238,809

F. Pipeline and Hazardous Materials Safety Administration (PHMSA) 2025 Adjustments

PHMSA's civil penalties affected by this rule for hazardous materials

violations are located in 49 CFR 107.329, appendix A to subpart D of 49 CFR part 107, and § 171.1. The civil penalties affected by this rule for pipeline safety violations are located in

§ 190.223. PHMSA's 2025 civil penalty adjustments are summarized in the chart below.

Description	Citation	Existing penalty	New penalty (existing penalty $\times$ 1.02598)
Maximum penalty for hazardous materials violation	49 U.S.C. 5123	\$99,756	\$102,348
Maximum penalty for hazardous materials violation that results in death, serious illness, or severe injury to any person or substantial destruction of property.	49 U.S.C. 5123	232,762	238,809
Minimum penalty for hazardous materials training violations.	49 U.S.C. 5123	601	617
Maximum penalty for each pipeline safety violation	49 U.S.C. 60122(a)(1)	266,015	272,926
Maximum penalty for a related series of pipeline safety violations.	49 U.S.C. 60122(a)(1)	2,660,135	2,729,245
Maximum additional penalty for each liquefied natural gas pipeline facility violation.	49 U.S.C. 60122(a)(2)	97,179	99,704
Maximum penalty for discrimination against employees providing pipeline safety information.	49 U.S.C. 60122(a)(3)	1,544	1,584

*G. Maritime Administration (MARAD)
2025 Adjustments*

MARAD's 2025 civil penalty adjustments are summarized in the chart below.

Description	Citation	Existing penalty	New penalty (existing penalty × 1.02598)
Maximum civil penalty for a single violation of any provision under 46 U.S.C. Chapter 313 and all of Subtitle III related MARAD regulations, except for violations of 46 U.S.C. 31329.	46 U.S.C. 31309	\$25,548	\$26,212
Maximum civil penalty for a single violation of 46 U.S.C. 31329 as it relates to the court sales of documented vessels.	46 U.S.C. 31330	63,991	65,653
Maximum civil penalty for a single violation of 46 U.S.C. 56101 as it relates to approvals required to transfer a vessel to a noncitizen.	46 U.S.C. 56101(e)	25,712	26,380
Maximum civil penalty for failure to file an Automated Mutual Assistance Vessel Rescue System (AMVER) report.	46 U.S.C. 50113(b)	162	166
Maximum civil penalty for violating procedures for the use and allocation of shipping services, port facilities and services for national security and national defense operations.	50 U.S.C. 4513	32,341	33,181
Maximum civil penalty for violations in applying for or renewing a vessel's fishery endorsement.	46 U.S.C. 12151	187,602	192,476

*H. Great Lakes St. Lawrence Seaway
Development Corporation (GLS) 2025
Adjustments*

The 2025 civil penalty adjustment for GLS is as follows:

Description	Citation	Existing penalty	New penalty (existing penalty × 1.02598)
Maximum civil penalty for each violation of the Seaway Rules and Regulations at 33 CFR part 401.	33 U.S.C. 1232	\$114,630	\$117,608

Regulatory Analysis and Notices

A. Executive Order 12866 and DOT Regulatory Policies and Procedures

This final rule has been evaluated in accordance with existing policies and procedures and is considered not significant under Executive Order 12866 and DOT's Regulatory Policies and Procedures; therefore, the rule has not been reviewed by the Office of Management and Budget (OMB) under Executive Order 12866.

B. Regulatory Flexibility Analysis

The Department has determined the Regulatory Flexibility Act of 1980 (RFA) (5 U.S.C. 601, *et seq.*) does not apply to this rulemaking. The RFA applies, in pertinent part, only when "an agency is required. . . to publish general notice of proposed rulemaking." 5 U.S.C. 604(a). The Small Business Administration's *A Guide for Government Agencies: How to*

Comply with the Regulatory Flexibility Act (2012), explains that:

If, under the [Administrative Procedure Act (APA)] or any rule of general applicability governing federal grants to state and local governments, the agency is required to publish a general notice of proposed rulemaking (NPRM), the RFA must be considered [citing 5 U.S.C. 604(a)]. . . . If an NPRM is not required, the RFA does not apply.

As stated above, DOT has determined that good cause exists to publish this final rule without notice and comment procedures under the APA. Therefore, the analytical requirements of the RFA do not apply.

C. Executive Order 13132 (Federalism)

This final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13132 ("Federalism"). This regulation has no substantial direct effects on the States, the relationship between the

National Government and the States, or the distribution of power and responsibilities among the various levels of government. It does not contain any provision that imposes substantial direct compliance costs on State and local governments. Therefore, the consultation and funding requirements of Executive Order 13132 do not apply.

D. Executive Order 13175

This final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. Because none of the measures in the rule have tribal implications or impose substantial direct compliance costs on Indian tribal governments, the funding and consultation requirements of Executive Order 13175 do not apply.

E. Paperwork Reduction Act

Under the Paperwork Reduction Act, before an agency submits a proposed collection of information to OMB for approval, it must publish a document in the **Federal Register** providing notice of and a 60-day comment period on, and otherwise consult with members of the public and affected agencies concerning, each proposed collection of information. This final rule imposes no new information reporting or record keeping necessitating clearance by OMB.

F. National Environmental Policy Act

The Department has analyzed the environmental impacts of this final rule pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321, *et seq.*) and has determined that it is categorically excluded pursuant to DOT Order 5610.1C, Procedures for Considering Environmental Impacts (44 FR 56420, Oct. 1, 1979, as amended July 13, 1982, and July 30, 1985). Categorical exclusions are actions identified in an agency's NEPA implementing procedures that do not normally have a significant impact on the environment and therefore do not require either an environmental assessment (EA) or environmental impact statement (EIS). See 40 CFR 1508.1. In analyzing the applicability of a categorical exclusion, the agency must also consider whether extraordinary circumstances are present that would warrant the preparation of an EA or EIS. *Id.* Paragraph 4(c)(5) of DOT Order 5610.1C incorporates the categorical exclusions for all DOT Operating Administrations. This action qualifies for a categorical exclusion in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures (80 FR 44208, July 24, 2015), paragraph 5–6.6.f, which covers regulations not expected to cause any potentially significant environmental impacts. The Department does not anticipate any environmental impacts, and there are no extraordinary circumstances present in connection with this final rule.

G. Unfunded Mandates Reform Act

The Department analyzed the final rule under the factors in the Unfunded Mandates Reform Act of 1995. The Department considered whether the rule includes a Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any one year. The Department has determined that this final rule will not result in such expenditures. Accordingly, no further assessment or

analysis is required under the Unfunded Mandates Reform Act.

List of Subjects in*14 CFR Part 13*

Administrative practice and procedure, Hazardous materials

transportation, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Parts 213, 216, 217, 221, 224, 229, 230, 232, 233, and 239

Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 214

Bridges, Occupational safety and health, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 215

Freight, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 218

Locomotives, Occupational safety and health, Penalties, Railroad employees, Railroad safety, Tampering.

49 CFR Part 219

Alcohol abuse, Drug abuse, Drug testing, Penalties, Railroad safety, Reporting and recordkeeping requirements, Safety, Transportation.

49 CFR Part 220

Penalties, Radio, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Parts 222, 235, 240, 242, 243, and 244

Administrative practice and procedure, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 223

Glazing standards, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 225

Investigations, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 227

Hazardous materials transportation, Locomotive noise control, Occupational safety and health, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 228

Penalties, Railroad employees, Reporting and recordkeeping requirements.

49 CFR Part 231

Penalties, Railroad safety.

49 CFR Part 234

Highway safety, Penalties, Railroad safety, Reporting and recordkeeping

requirements, State and local governments.

49 CFR Part 236

Penalties, Positive train control, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 237

Bridges, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 238

Fire prevention, Passenger equipment, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 241

Communications, Penalties, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 272

Penalties, Railroad employees, Railroad safety, Railroads, Safety, Transportation.

49 CFR Part 386

Administrative procedures, Commercial motor vehicle safety, Highways and roads, Motor carriers, Penalties.

49 CFR Part 578

Imports, Motor vehicle safety, Motor vehicles, Penalties, Rubber and rubber products, Tires.

Accordingly, the Department of Transportation amends 14 CFR chapters I, II, and III, 33 CFR chapter IV, 46 CFR chapter II, and 49 CFR chapters I, II, III, and V as follows:

Title 14—Aeronautics and Space

PART 13—INVESTIGATIVE AND ENFORCEMENT PROCEDURES

■ 1. The authority citation for part 13 is revised to read as follows:

Authority: 18 U.S.C. 6002; 28 U.S.C. 2461 note; 49 U.S.C. 106(g), 5121–5124, 40113–40114, 44103–44106, 44701–44704, 44709–44710, 44713, 44725, 44742, 44802 (note),

46101–46111, 46301, 46302 (for a violation of 49 U.S.C. 46504), 46304–46316, 46318–46320, 46501–46502, 46504, 46507, 47106, 47107, 47111, 47122, 47306, 47531–47532; 49 CFR 1.83.

■ 2. Amend § 13.301 by revising paragraphs (b) and (c) to read as follows:

§ 13.301 Inflation adjustments of civil monetary penalties.

* * * * *

(b) Each adjustment to a maximum civil monetary penalty or to minimum and maximum civil monetary penalties that establish a civil monetary penalty range applies to actions initiated under this part for violations occurring on or after December 30, 2024, notwithstanding references to specific civil penalty amounts elsewhere in this part.

(c) Minimum and maximum civil monetary penalties are as follows:

TABLE 1 TO § 13.301(c)—MINIMUM AND MAXIMUM CIVIL MONETARY PENALTY AMOUNTS FOR CERTAIN VIOLATIONS

United States Code citation	Civil monetary penalty description	2024 minimum penalty amount	New adjusted minimum penalty amount for violations occurring on or after December 30, 2024	2024 maximum penalty amount	New adjusted maximum penalty amount for violations occurring on or after December 30, 2024
49 U.S.C. 5123(a)(1)	Violation of hazardous materials transportation law	N/A	N/A	\$99,756	\$102,348.
49 U.S.C. 5123(a)(2)	Violation of hazardous materials transportation law resulting in death, serious illness, severe injury, or substantial property destruction.	N/A	N/A	\$232,762	\$238,809.
49 U.S.C. 5123(a)(3)	Violation of hazardous materials transportation law relating to training.	\$601	\$617	\$99,756	\$102,348.
49 U.S.C. 44704(d)(3)	Knowing presentation of a nonconforming aircraft for issuance of an initial airworthiness certificate by a production certificate holder.	N/A	N/A	\$1,181,581	\$1,212, 278.
49 U.S.C. 44704(e)(4)	Knowing failure by an applicant for or holder of a type certificate to submit safety critical information or include certain such information in an airplane flight manual or flight crew operating manual.	N/A	N/A	\$1,181,581	\$1,212,278.
49 U.S.C. 44704(e)(5)	Knowing false statement by an airline transport pilot (ATP) certificate holder with respect to the submission of certain safety critical information.	N/A	N/A	See entries for 49 U.S.C. 46301(a)(1) and (a)(5).	See entries for 49 U.S.C. 46301(a)(1) and (a)(5).
49 U.S.C. 44742	Interference by a supervisory employee of an organization designation authorization (ODA) holder that manufactures a transport category airplane with an ODA unit member's performance of authorized functions.	N/A	N/A	See entries for 49 U.S.C. 46301(a)(1).	See entries for 49 U.S.C. 46301(a)(1).
49 U.S.C. 44802 note	Operation of an unmanned aircraft or unmanned aircraft system equipped or armed with a dangerous weapon.	N/A	N/A	\$30,417	\$31,207.
49 U.S.C. 46301(a)(1)	Violation by a person other than an individual or small business concern under 49 U.S.C. 46301(a)(1)(A) or (B).	N/A	N/A	\$41,577	\$75,000.
49 U.S.C. 46301(a)(1)	Violation by an airman serving as an airman under 49 U.S.C. 46301(a)(1)(A) or (B) (but not covered by 46301(a)(5)(A) or (B)).	N/A	N/A	\$1,828	\$1,875.
49 U.S.C. 46301(a)(1)	Violation by an individual or small business concern under 49 U.S.C. 46301(a)(1)(A) or (B) (but not covered in 49 U.S.C. 46301(a)(5)).	N/A	N/A	\$1,828	\$1,875.
49 U.S.C. 46301(a)(3)	Violation of 49 U.S.C. 47107(b) (or any assurance made under such section) or 49 U.S.C. 47133.	N/A	N/A	Increase above otherwise applicable maximum amount not to exceed 3 times the amount of revenues used in violation of such section.	No change.

TABLE 1 TO § 13.301(c)—MINIMUM AND MAXIMUM CIVIL MONETARY PENALTY AMOUNTS FOR CERTAIN VIOLATIONS—
Continued

United States Code citation	Civil monetary penalty description	2024 minimum penalty amount	New adjusted minimum penalty amount for violations occurring on or after December 30, 2024	2024 maximum penalty amount	New adjusted maximum penalty amount for violations occurring on or after December 30, 2024
49 U.S.C. 46301(a)(5)(A)	Violation by an individual or small business concern (except an airman serving as an airman) under 49 U.S.C. 46301(a)(5)(A)(i) or (ii).	N/A	N/A	\$16,630	\$17,062.
49 U.S.C. 46301(a)(5)(B)(i).	Violation by an individual or small business concern related to the transportation of hazardous materials.	N/A	N/A	\$16,630	\$17,062.
49 U.S.C. 46301(a)(5)(B)(ii).	Violation by an individual or small business concern related to the registration or recordation under 49 U.S.C. chapter 441, of an aircraft not used to provide air transportation.	N/A	N/A	\$16,630	\$17,062.
49 U.S.C. 46301(a)(5)(B)(iii).	Violation by an individual or small business concern of 49 U.S.C. 44718(d), relating to limitation on construction or establishment of landfills.	N/A	N/A	\$16,630	\$17,062.
49 U.S.C. 46301(a)(5)(B)(iv).	Violation by an individual or small business concern of 49 U.S.C. 44725, relating to the safe disposal of life-limited aircraft parts.	N/A	N/A	\$16,630	\$17,062.
49 U.S.C. 46301(a)(8)	Violation of 49 U.S.C. 41707(a)(22), including any grant assurances made under that section.	N/A	N/A	N/A	\$5,000.
49 U.S.C. 46301 note	Individual who aims the beam of a laser pointer at an aircraft in the airspace jurisdiction of the United States, or at the flight path of such an aircraft.	N/A	N/A	\$31,819	\$32,646.
49 U.S.C. 46301(b)	Tampering with a smoke alarm device	N/A	N/A	\$5,339	\$5,478.
49 U.S.C. 46302	Knowingly providing false information about alleged violation involving the special aircraft jurisdiction of the United States.	N/A	N/A	\$28,995	\$29,748.
49 U.S.C. 46318	Physical or sexual assault or threat to physically or sexually assault crewmember or other individual on an aircraft, or action that poses an imminent threat to the safety of the aircraft or individuals on board.	N/A	N/A	\$43,658	\$44,792.
49 U.S.C. 46319	Permanent closure of an airport without providing sufficient notice.	N/A	N/A	\$16,630	\$17,062.
49 U.S.C. 46320	Operating an unmanned aircraft and in so doing knowingly or recklessly interfering with a wildfire suppression, law enforcement, or emergency response effort.	N/A	N/A	\$25,455	\$26,116.
49 U.S.C. 47531	Violation of 49 U.S.C. 47528–47530 or 47534, relating to the prohibition of operating certain aircraft not complying with stage 3 noise levels.	N/A	N/A	See entries for 49 U.S.C. 46301(a)(1) and (a)(5).	See entries for 49 U.S.C. 46301(a)(1) and (a)(5).

PART 383—CIVIL PENALTIES

■ 3. The authority citation for part 383 continues to read as follows:

Authority: Sec. 701, Pub. L. 114–74, 129 Stat. 584; Sec. 503, Pub. L. 108–176, 117 Stat. 2490; Pub. L. 101–410, 104 Stat. 890; Sec. 31001, Pub. L. 104–134.

■ 4. Section 383.2 is revised to read as follows:

§ 383.2 Amount of penalty.

Civil penalties payable to the U.S. Government for violations of Title 49, Chapters 401 through 421, pursuant to 49 U.S.C. 46301(a), are as follows:

(a) A general civil penalty of not more than \$75,000 (or \$1,875 for individuals or small businesses) applies to violations of statutory provisions and rules or orders issued under those provisions, other than those listed in paragraph (b) of this section (*see* 49 U.S.C. 46301(a)(1)); and

(b) With respect to small businesses and individuals, notwithstanding the general civil penalty specified in paragraph (a) of this section, the following civil penalty limits apply:

(1) A maximum civil penalty of \$17,062 applies for violations of most provisions of Chapter 401, including the anti-discrimination provisions of sections 40127 (general provision), and 41705 (discrimination against the disabled) and rules and orders issued pursuant to those provisions (*see* 49 U.S.C. 46301(a)(5)(A));

(2) A maximum civil penalty of \$8,531 applies for violations of section 41719 and rules and orders issued pursuant to that provision (*see* 49 U.S.C. 46301(a)(5)(C)); and

(3) A maximum civil penalty of \$4,267 applies for violations of section 41712 or consumer protection rules or orders (*see* 49 U.S.C. 46301(a)(5)(D)).

PART 406—INVESTIGATIONS, ENFORCEMENT, AND ADMINISTRATIVE REVIEW

■ 5. The authority citation for part 406 continues to read as follows:

Authority: 51 U.S.C. 50901–50923.

■ 6. Amend § 406.9 by revising paragraph (a) to read as follows:

§ 406.9 Civil penalties.

(a) *Civil penalty liability.* Under 51 U.S.C. 50917(c), a person found by the Federal Aviation Administration (FAA) to have violated a requirement of the Act, a regulation issued under the Act, or any term or condition of a license or permit issued or transferred under the Act, is liable to the United States for a civil penalty of not more than \$299,772 for each violation. A separate violation

occurs for each day the violation continues.

* * * * *

Title 33—Navigation and Navigable Waters

PART 401—SEAWAY REGULATIONS AND RULES

Subpart B—Penalties—Violations of Seaway Regulations

- 7. The authority citation for subpart B of part 401 continues to read as follows:

Authority: 33 U.S.C. 981–990; 46 U.S.C. 70001–70004, 70011, and 70032; 49 CFR 1.101, unless otherwise noted.

- 8. Amend § 401.102 by revising paragraph (a) to read as follows:

§ 401.102 Civil penalty.

(a) A person, as described in § 401.101(b) who violates a regulation in this chapter is liable to a civil penalty of not more than \$117,608.

* * * * *

Title 46—Shipping

PART 221—REGULATED TRANSACTIONS INVOLVING DOCUMENTED VESSELS AND OTHER MARITIME INTERESTS

- 9. The authority citation for part 221 continues to read as follows:

Authority: 46 U.S.C. chs. 301, 313, and 561; Pub. L. 114–74; 49 CFR 1.93.

- 10. Amend § 221.61 by revising paragraph (b) to read as follows:

§ 221.61 Compliance.

* * * * *

(b) Pursuant to 46 U.S.C. 31309, a general penalty of not more than \$26,212 may be assessed for each violation of chapter 313 or 46 U.S.C. subtitle III administered by the Maritime Administration, and pursuant to the regulations in this part a person violating 46 U.S.C. 31329 is liable for a civil penalty of not more than \$65,653 for each violation. A person who charts, sells, transfers, or mortgages a vessel, or an interest therein, in violation of 46 U.S.C. 56101(e) is liable for a civil penalty of not more than \$26,380 for each violation.

PART 307—ESTABLISHMENT OF MANDATORY POSITION REPORTING SYSTEM FOR VESSELS

- 11. The authority citation for part 307 continues to read as follows:

Authority: Pub. L. 109–304; 46 U.S.C. 50113; Pub. L. 114–74; 49 CFR 1.93.

- 12. Section 307.19 is revised to read as follows:

§ 307.19 Penalties.

The owner or operator of a vessel in the waterborne foreign commerce of the United States is subject to a penalty of \$166 for each day of failure to file an AMVER report required by this part. Such penalty shall constitute a lien upon the vessel, and such vessel may be libeled in the district court of the United States in which the vessel may be found.

PART 340—PRIORITY USE AND ALLOCATION OF SHIPPING SERVICES, CONTAINERS AND CHASSIS, AND PORT FACILITIES AND SERVICES FOR NATIONAL SECURITY AND NATIONAL DEFENSE RELATED OPERATIONS

- 13. The authority citation for part 340 continues to read as follows:

Authority: 50 U.S.C. 4501 *et seq.* (“The Defense Production Act”); Executive Order 13603 (77 FR 16651); Executive Order 12656 (53 FR 47491); Pub. L. 114–74; 49 CFR 1.45; 49 CFR 1.93(l).

- 14. Section 340.9 is revised to read as follows:

§ 340.9 Compliance.

Pursuant to 50 U.S.C. 4513, any person who willfully performs any act prohibited, or willfully fails to perform any act required, by the provisions of this part shall, upon conviction, be fined not more than \$33,181 or imprisoned for not more than one year, or both.

PART 356—REQUIREMENTS FOR VESSELS OF 100 FEET OR GREATER IN REGISTERED LENGTH TO OBTAIN A FISHERY ENDORSEMENT TO THE VESSEL’S DOCUMENTATION

- 15. The authority citation for part 356 continues to read as follows:

Authority: 46 U.S.C. 12102; 46 U.S.C. 12151; 46 U.S.C. 31322; Pub. L. 105–277, division C, title II, subtitle I, section 203 (46 U.S.C. 12102 note), section 210(e), and section 213(g), 112 Stat. 2681; Pub. L. 107–20, section 2202, 115 Stat. 168–170; Pub. L. 114–74; 49 CFR 1.93.

- 16. Amend § 356.49 by revising paragraph (b) to read as follows:

§ 356.49 Penalties.

* * * * *

(b) A fine of up to \$192,476 may be assessed against the vessel owner for each day in which such vessel has engaged in fishing (as such term is defined in section 3 of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1802)) within the exclusive economic zone of the United States; and

* * * * *

Title 49—Transportation

PART 107—HAZARDOUS MATERIALS PROGRAM PROCEDURES

- 17. The authority citation for part 107 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 Section 4; Pub. L. 104–121 Sections 212–213; Pub. L. 104–134 Section 31001; Pub. L. 114–74 Section 701 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97; 33 U.S.C. 1321.

- 18. Revise § 107.329 to read as follows:

§ 107.329 Maximum penalties.

(a) A person who knowingly violates a requirement of the Federal hazardous material transportation law, an order issued thereunder, this subchapter, subchapter C of this chapter, or a special permit or approval issued under this subchapter applicable to the transportation of hazardous materials or the causing of them to be transported or shipped is liable for a civil penalty of not more than \$102,348 for each violation, except the maximum civil penalty is \$238,809 if the violation results in death, serious illness, or severe injury to any person or substantial destruction of property. There is no minimum civil penalty, except for a minimum civil penalty of \$617 for violations relating to training. When the violation is a continuing one, each day of the violation constitutes a separate offense.

(b) A person who knowingly violates a requirement of the Federal hazardous material transportation law, an order issued thereunder, this subchapter, subchapter C of this chapter, or a special permit or approval issued under this subchapter applicable to the design, manufacture, fabrication, inspection, marking, maintenance, reconditioning, repair or testing of a package, container, or packaging component which is represented, marked, certified, or sold by that person as qualified for use in the transportation of hazardous materials in commerce is liable for a civil penalty of not more than \$102,348 for each violation, except the maximum civil penalty is \$238,809 if the violation results in death, serious illness, or severe injury to any person or substantial destruction of property. There is no minimum civil penalty, except for a minimum civil penalty of \$617 for violations relating to training.

Appendix A to Subpart D of Part 107 [Amended]

- 19. Amend appendix A to subpart D of part 107, under section B, Penalty Increases for Multiple Counts, in the

second paragraph, by removing “\$99,756 or \$232,762” and “January 6, 2023” and adding in their places “\$102,348 or \$238,809” and “December 30, 2024,” respectively.

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

■ 20. The authority citation for part 171 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; Pub. L. 101–410 section 4; Pub. L. 104–134, section 31001; Pub. L. 114–74 section 4 (28 U.S.C. 2461 note); 49 CFR 1.81 and 1.97.

■ 21. Amend § 171.1 by revising paragraph (g) to read as follows:

§ 171.1 Applicability of Hazardous Materials Regulations (HMR) to persons and functions.

* * * * *

(g) *Penalties for noncompliance.* Each person who knowingly violates a requirement of the Federal hazardous material transportation law, an order issued under Federal hazardous material transportation law, subchapter A of this chapter, or a special permit or approval issued under subchapter A or C of this chapter is liable for a civil penalty of not more than \$102,348 for each violation, except the maximum civil penalty is \$238,809 if the violation results in death, serious illness, or severe injury to any person or substantial destruction of property. There is no minimum civil penalty, except for a minimum civil penalty of \$617 for a violation relating to training.

PART 190—PIPELINE SAFETY ENFORCEMENT AND REGULATORY PROCEDURES

■ 22. The authority citation for part 190 continues to read as follows:

Authority: 33 U.S.C. 1321(b); 49 U.S.C. 60101 *et seq.*

■ 23. Amend § 190.223 by revising paragraphs (a), (c), and (d) to read as follows:

§ 190.223 Maximum penalties.

(a) Any person found to have violated a provision of 49 U.S.C. 60101, *et seq.*, or any regulation in 49 CFR parts 190 through 199, or order issued pursuant to 49 U.S.C. 60101, *et seq.* or 49 CFR part 190, is subject to an administrative civil penalty not to exceed \$272,926 for each violation for each day the violation continues, with a maximum administrative civil penalty not to exceed \$2,729,245 for any related series of violations.

* * * * *

(c) Any person found to have violated any standard or order under 49 U.S.C.

60103 is subject to an administrative civil penalty not to exceed \$99,704, which may be in addition to other penalties to which such person may be subject under paragraph (a) of this section.

(d) Any person who is determined to have violated any standard or order under 49 U.S.C. 60129 is subject to an administrative civil penalty not to exceed \$1,584, which may be in addition to other penalties to which such person may be subject under paragraph (a) of this section.

* * * * *

PART 209—RAILROAD SAFETY ENFORCEMENT PROCEDURES

■ 24. The authority citation for part 209 continues to read as follows:

Authority: 49 U.S.C. 5123, 5124, 20103, 20107, 20111, 20112, 20114; 28 U.S.C. 2461 note; and 49 CFR 1.89.

■ 25. Amend § 209.103 by revising paragraphs (a) and (c) to read as follows:

§ 209.103 Minimum and maximum penalties.

(a) A person who knowingly violates a requirement of the Federal hazardous materials transportation laws, an order issued thereunder, 49 CFR subchapter A or C of chapter I, subtitle B, or a special permit or approval issued under subchapter A or C of chapter I, subtitle B, of this title is liable for a civil penalty of not more than \$102,348 for each violation, except that—

(1) The maximum civil penalty for a violation is \$238,809 if the violation results in death, serious illness, or severe injury to any person, or substantial destruction of property; and

(2) A minimum \$617 civil penalty applies to a violation related to training.

* * * * *

(c) The maximum and minimum civil penalties described in paragraph (a) of this section apply to violations occurring on or after December 30, 2024.

■ 26. Amend § 209.105 by revising the last sentence of paragraph (c) to read as follows:

§ 209.105 Notice of probable violation.

* * * * *

(c) * * * In an amended notice, FRA may change the civil penalty amount proposed to be assessed up to and including the maximum penalty amount of \$102,348 for each violation, except that if the violation results in death, serious illness or severe injury to any person, or substantial destruction of property, FRA may change the penalty amount proposed to be assessed up to and including the maximum penalty amount of \$238,809.

§ 209.409 [Amended]

■ 27. Amend § 209.409 as follows:

■ a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;

■ b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and

■ c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

■ 28. Amend appendix A to part 209 in the section “Penalty Schedules; Assessment of Maximum Penalties” as follows:

■ a. Add a sentence at the end of the sixth paragraph;

■ b. Revise the fourth sentence in the seventh paragraph; and

■ c. Revise the first sentence of the tenth paragraph.

The addition and revisions read as follows:

Appendix A to Part 209—Statement of Agency Policy Concerning Enforcement of the Federal Railroad Safety Laws

* * * * *

Penalty Schedules; Assessment of Maximum Penalties

* * * * *

* * * Effective December 30, 2024, the minimum civil monetary penalty was raised from \$1,086 to \$1,114, the ordinary maximum civil monetary penalty was raised from \$35,516 to \$36,439, and the aggravated maximum civil monetary penalty was raised from \$142,063 to \$145,754.

* * * For each regulation in this part or order, the schedule shows two amounts within the \$1,114 to \$36,439 range in separate columns, the first for ordinary violations, the second for willful violations (whether committed by railroads or individuals). * * *

* * * * *

Accordingly, under each of the schedules (ordinarily in a footnote), and regardless of the fact that a lesser amount might be shown in both columns of the schedule, FRA reserves the right to assess the statutory maximum penalty of up to \$145,754 per violation where a pattern of repeated violations or a grossly negligent violation has created an imminent hazard of death or injury or has caused death or injury. * * *

* * * * *

Appendix B to Part 209 [Amended]

■ 29. Amend appendix B to part 209 as follows:

■ a. Remove the dollar amount “\$99,756” everywhere it appears and add in its place “\$102,348”;

■ b. Remove the dollar amount “\$232,762” everywhere it appears and add in its place “\$238,809”; and

■ c. Remove the dollar amount “\$601” and add in its place “\$617” in the first paragraph.

PART 213—TRACK SAFETY STANDARDS

■ 30. The authority citation for part 213 continues to read as follows:

Authority: 49 U.S.C. 20102–20114 and 20142; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 213.15 [Amended]

- 31. Amend § 213.15 in paragraph (a) as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 214—RAILROAD WORKPLACE SAFETY

■ 32. The authority citation for part 214 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 21301–21302, 31304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 214.5 [Amended]

- 33. Amend § 214.5 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 215—RAILROAD FREIGHT CAR SAFETY STANDARDS

■ 34. The authority citation for part 215 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 215.7 [Amended]

- 35. Amend § 215.7 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 216—SPECIAL NOTICE AND EMERGENCY ORDER PROCEDURES: RAILROAD TRACK, LOCOMOTIVE AND EQUIPMENT

■ 36. The authority citation for part 216 continues to read as follows:

Authority: 49 U.S.C. 20102–20104, 20107, 20111, 20133, 20701–20702, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 216.7 [Amended]

- 37. Amend § 216.7 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 217—RAILROAD OPERATING RULES

■ 37. The authority citation for part 217 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 217.5 [Amended]

- 38. Amend § 217.5 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 218—RAILROAD OPERATING PRACTICES

■ 39. The authority citation for part 218 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20131, 20138, 20144, 20168; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 218.9 [Amended]

- 40. Amend § 218.9 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 219—CONTROL OF ALCOHOL AND DRUG USE

■ 41. The authority citation for part 219 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20140, 21301, 21304, 21311; 28 U.S.C. 2461 note; Div. A, Sec. 412, Pub. L. 110–432, 122 Stat. 4889 (49 U.S.C. 20140 note); Sec. 8102, Pub. L. 115–271, 132 Stat. 3894; and 49 CFR 1.89.

§ 219.10 [Amended]

- 42. Amend § 219.10 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 220—RAILROAD COMMUNICATIONS

■ 43. The authority citation for part 220 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20103, note, 20107, 21301–21302, 20701–20703, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 220.7 [Amended]

- 44. Amend § 220.7 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 221—REAR END MARKING DEVICE—PASSENGER, COMMUTER AND FREIGHT TRAINS

■ 45. The authority citation for part 221 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 221.7 [Amended]

- 46. Amend § 221.7 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 222—USE OF LOCOMOTIVE HORNS AT PUBLIC HIGHWAY-RAIL GRADE CROSSINGS

■ 47. The authority citation for part 222 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20153, 21301, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 222.11 [Amended]

- 48. Amend § 222.11 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 223—SAFETY GLAZING STANDARDS—LOCOMOTIVES, PASSENGER CARS AND CABOSES

■ 49. The authority citation for part 223 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20133, 20701–20702, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 223.7 [Amended]

- 50. Amend § 223.7 as follows:
- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 224—REFLECTORIZATION OF RAIL FREIGHT ROLLING STOCK

- 51. The authority citation for part 224 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20148 and 21301; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 224.11 [Amended]

- 52. Amend § 224.11 in paragraph (a) as follows:
- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 225—RAILROAD ACCIDENTS/ INCIDENTS: REPORTS CLASSIFICATION, AND INVESTIGATIONS

- 53. The authority citation for part 225 is continues to read as follows:

Authority: 49 U.S.C. 103, 322(a), 20103, 20107, 20901–20902, 21301, 21302, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 225.29 [Amended]

- 54. Amend § 225.29 as follows:
- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 227—OCCUPATIONAL SAFETY AND HEALTH IN THE LOCOMOTIVE CAB

- 55. The authority citation for part 227 continues to read as follows:

Authority: 49 U.S.C. 20103, 20103 note, 20166, 20701–20703, 21301, 21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 227.9 [Amended]

- 56. Amend § 227.9 in paragraph (a) as follows:
- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;

- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 228—PASSENGER TRAIN EMPLOYEE HOURS OF SERVICE; RECORDKEEPING AND REPORTING; SLEEPING QUARTERS

- 57. The authority citation for part 228 continues to read as follows:

Authority: 49 U.S.C. 103, 20103, 20107, 21101–21109; 49 U.S.C. 21301, 21303, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 228.6 [Amended]

- 58. Amend § 228.6 in paragraph (a) as follows:
- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.
- 59. Amend appendix A to part 228, under the heading “General Provisions,” in the “Penalty” paragraph by adding a sentence at the end of the first paragraph to read as follows:

Appendix A to Part 228—Requirements of the Hours of Service Act: Statement of Agency Policy and Interpretation

* * * * *

General Provisions

* * * * *

Penalty. * * * Effective December 30, 2024, the minimum civil monetary penalty was raised from \$1,086 to \$1,114, the ordinary maximum civil monetary penalty was raised from \$35,516 to \$36,439, and the aggravated maximum civil monetary penalty was raised from \$142,063 to \$145,754.

* * * * *

PART 229—RAILROAD LOCOMOTIVE SAFETY STANDARDS

- 60. The authority citation for part 229 is revised to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20133, 20137–38, 20143, 20168, 20701–03, 21301–02, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 229.7 [Amended]

- 61. Amend § 229.7 in paragraph (b) as follows:
- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 230—STEAM LOCOMOTIVE INSPECTION AND MAINTENANCE STANDARDS

- 62. The authority citation for part 230 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20702; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 230.4 [Amended]

- 63. Amend § 230.4 in paragraph (a) as follows:
- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 231—RAILROAD SAFETY APPLIANCE STANDARDS

- 64. The authority citation for part 231 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 20131, 20301–20303, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 231.0 [Amended]

- 65. Amend § 231.0 in paragraph (f) as follows:
- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 233—SIGNAL SYSTEMS REPORTING REQUIREMENTS

- 66. The authority citation for part 233 continues to read as follows:

Authority: 49 U.S.C. 504, 522, 20103, 20107, 20501–20505, 21301, 21302, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 233.11 [Amended]

- 67. Amend § 233.11 as follows:
- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 234—GRADE CROSSING SAFETY

- 68. The authority citation for part 234 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20152, 20160, 21301, 21304, 21311, 22907 note; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 234.6 [Amended]

- 69. Amend § 234.6 in paragraph (a) as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 235—INSTRUCTIONS GOVERNING APPLICATIONS FOR APPROVAL OF A DISCONTINUANCE OR MATERIAL MODIFICATION OF A SIGNAL SYSTEM OR RELIEF FROM THE REQUIREMENTS OF PART 236

- 70. The authority citation for part 235 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 235.9 [Amended]

- 71. Amend § 235.9 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 236—RULES, STANDARDS, AND INSTRUCTIONS GOVERNING THE INSTALLATION, INSPECTION, MAINTENANCE, AND REPAIR OF SIGNAL AND TRAIN CONTROL SYSTEMS, DEVICES, AND APPLIANCES

- 72. The authority citation for part 236 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20107, 20133, 20141, 20157, 20301–20303, 20306, 20501–20505, 20701–20703, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 236.0 [Amended]

- 73. Amend § 236.0 in paragraph (f) as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 237—BRIDGE SAFETY STANDARDS

- 74. The authority citation for part 237 continues to read as follows:

Authority: 49 U.S.C. 20102–20114; 28 U.S.C. 2461 note; Div. A, Sec. 417, Pub. L. 110–432, 122 Stat. 4848; and 49 CFR 1.89.

§ 237.7 [Amended]

- 75. Amend § 237.7 in paragraph (a) as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 238—PASSENGER EQUIPMENT SAFETY STANDARDS

- 76. The authority citation for part 238 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20133, 20141, 20302–20303, 20306, 20701–20702, 21301–21302, 21304; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 238.11 [Amended]

- 77. Amend § 238.11 in paragraph (a) as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 239—PASSENGER TRAIN EMERGENCY PREPAREDNESS

- 78. The authority citation for part 239 continues to read as follows:

Authority: 49 U.S.C. 20102–20103, 20105–20114, 20133, 21301, 21304, and 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 239.11 [Amended]

- 79. Amend § 239.11 as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 240—QUALIFICATION AND CERTIFICATION OF LOCOMOTIVE ENGINEERS

- 80. The authority citation for part 240 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20135, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 240.11 [Amended]

- 81. Amend § 240.11 in paragraph (a) as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and

- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 241—UNITED STATES LOCATIONAL REQUIREMENT FOR DISPATCHING OF UNITED STATES RAIL OPERATIONS

- 82. The authority citation for part 241 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 21301, 21304, 21311; 28 U.S.C. 2461 note; 49 CFR 1.89.

§ 241.15 [Amended]

- 83. Amend § 241.15 in paragraph (a) as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 242—QUALIFICATION AND CERTIFICATION OF CONDUCTORS

- 84. The authority citation for part 242 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20135, 20138, 20162, 20163, 21301, 21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 242.11 [Amended]

- 85. Amend § 242.11 in paragraph (a) as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 243—TRAINING, QUALIFICATION, AND OVERSIGHT FOR SAFETY-RELATED RAILROAD EMPLOYEES

- 86. The authority citation for part 243 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20131–20155, 20162, 20301–20306, 20701–20702, 21301–21304, 21311; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 243.7 [Amended]

- 87. Amend § 243.7 in paragraph (a) as follows:
 - a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
 - b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
 - c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 244—REGULATIONS ON SAFETY INTEGRATION PLANS GOVERNING RAILROAD CONSOLIDATIONS, MERGERS, AND ACQUISITIONS OF CONTROL

■ 88. The authority citation for part 244 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 21301; 5 U.S.C. 553 and 559; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 244.5 [Amended]

■ 89. Amend § 244.5 in paragraph (a) as follows:

- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 272—CRITICAL INCIDENT STRESS PLANS

■ 90. The authority citation for part 272 continues to read as follows:

Authority: 49 U.S.C. 20103, 20107, 20109 note; 28 U.S.C. 2461 note; and 49 CFR 1.89.

§ 272.11 [Amended]

■ 91. Amend § 272.11 in paragraph (a) as follows:

- a. Remove the dollar amount “\$1,086” and add in its place “\$1,114”;
- b. Remove the dollar amount “\$35,516” and add in its place “\$36,439”; and
- c. Remove the dollar amount “\$142,063” and add in its place “\$145,754”.

PART 386—RULES OF PRACTICE FOR FMCSA PROCEEDINGS

■ 92. The authority citation for part 386 continues to read as follows:

Authority: 28 U.S.C. 2461 note; 49 U.S.C. 113, 1301 note, 13106a; 49 U.S.C. chapters 5, 51, 131–141, 145–149, 311, 313, and 315; and 49 CFR 1.81, 1.87.

■ 93. Amend appendix A to part 386 by revising section II and section IV.a. through e. and g. through j. to read as follows:

Appendix A to Part 386—Penalty Schedule: Violations of Notices and Orders

* * * * *

II. Subpoena

Violation—Failure to respond to Agency subpoena to appear and testify or produce records.

Penalty—minimum of \$1,365 but not more than \$13,676 per violation.

* * * * *

IV. Out-of-Service Order

a. Violation—Operation of a commercial vehicle by a driver during the period the driver was placed out of service.

Penalty—Up to \$2,364 per violation.

(For purposes of this violation, the term “driver” means an operator of a commercial motor vehicle, including an independent contractor who, while in the course of operating a commercial motor vehicle, is employed or used by another person.)

b. Violation—Requiring or permitting a driver to operate a commercial vehicle during the period the driver was placed out of service.

Penalty—Up to \$23,647 per violation.

(This violation applies to motor carriers including an independent contractor who is not a “driver,” as defined under paragraph IV(a) above.)

c. Violation—Operation of a commercial motor vehicle or intermodal equipment by a driver after the vehicle or intermodal equipment was placed out-of-service and before the required repairs are made.

Penalty—\$2,364 each time the vehicle or intermodal equipment is so operated. (This violation applies to drivers as defined in IV(a) above.)

d. Violation—Requiring or permitting the operation of a commercial motor vehicle or intermodal equipment placed out-of-service before the required repairs are made.

Penalty—Up to \$23,647 each time the vehicle or intermodal equipment is so operated after notice of the defect is received.

(This violation applies to intermodal equipment providers and motor carriers, including an independent owner operator who is not a “driver,” as defined in IV(a) above.)

e. Violation—Failure to return written certification of correction as required by the out-of-service order.

Penalty—Up to \$1,182 per violation.

* * * * *

g. Violation—Operating in violation of an order issued under § 386.72(b) to cease all or part of the employer’s commercial motor vehicle operations or to cease part of an intermodal equipment provider’s operations, i.e., failure to cease operations as ordered.

Penalty—Up to \$34,116 per day the operation continues after the effective date and time of the order to cease.

h. Violation—Operating in violation of an order issued under § 386.73.

Penalty—Up to \$29,980 per day the operation continues after the effective date and time of the out-of-service order.

i. Violation—Conducting operations during a period of suspension under § 386.83 or § 386.84 for failure to pay penalties.

Penalty—Up to \$19,246 for each day that operations are conducted during the suspension or revocation period.

j. Violation—Conducting operations during a period of suspension or revocation under § 385.911, § 385.913, § 385.1009, or § 385.1011 of this subchapter.

Penalty—Up to \$29,980 for each day that operations are conducted during the suspension or revocation period.

■ 94. Amend appendix B to part 386 by revising paragraphs (a)(1) through (5),

(b), (d) through (f), (g)(1) through (8), (10) through (14), and (16) through (18), (g)(21)(i), (g)(22) and (23), (h), and (i) to read as follows:

Appendix B to Part 386—Penalty Schedule: Violations and Monetary Penalties

* * * * *

What are the types of violations and maximum monetary penalties?

(a) * * *

(1) *Recordkeeping.* A person or entity that fails to prepare or maintain a record required by part 40 of this title and parts 382, subpart A, B, C, D, E, or F, 385, and 390 through 399 of this subchapter, or prepares or maintains a required record that is incomplete, inaccurate, or false, is subject to a maximum civil penalty of \$1,584 for each day the violation continues, up to \$15,846.

(2) *Knowing falsification of records.* A person or entity that knowingly falsifies, destroys, mutilates, or changes a report or record required by parts 382, subpart A, B, C, D, E, or F, 385, and 390 through 399 of this subchapter, knowingly makes or causes to be made a false or incomplete record about an operation or business fact or transaction, or knowingly makes, prepares, or preserves a record in violation of a regulation order of the Secretary is subject to a maximum civil penalty of \$15,846 if such action misrepresents a fact that constitutes a violation other than a reporting or recordkeeping violation.

(3) *Non-recordkeeping violations.* A person or entity that violates part 382, subpart A, B, C, D, E, or F, part 385, or parts 390 through 399 of this subchapter, except a recordkeeping requirement, is subject to a civil penalty not to exceed \$19,246 for each violation.

(4) *Non-recordkeeping violations by drivers.* A driver who violates parts 382, subpart A, B, C, D, E, or F, 385, and 390 through 399 of this subchapter, except a recordkeeping violation, is subject to a civil penalty not to exceed \$4,812.

(5) *Violation of 49 CFR 392.5.* A driver placed out of service for 24 hours for violating the alcohol prohibitions of 49 CFR 392.5(a) or (b) who drives during that period is subject to a civil penalty not to exceed \$3,961 for a first conviction and not less than \$7,924 for a second or subsequent conviction.

* * * * *

(b) *Commercial driver’s license (CDL) violations.* Any employer, employee, medical review officer, or service agent who violates any provision of 49 CFR part 382, subpart G, or any person who violates 49 CFR part 383, subpart B, C, E, F, G, or H, is subject to a civil penalty not to exceed \$7,155; except:

(1) A CDL-holder who is convicted of violating an out-of-service order shall be subject to a civil penalty of not less than \$3,961 for a first conviction and not less than \$7,924 for a second or subsequent conviction;

(2) An employer of a CDL-holder who knowingly allows, requires, permits, or authorizes an employee to operate a CMV during any period in which the CDL-holder is subject to an out-of-service order, is subject to a civil penalty of not less than \$7,155 or more than \$39,615; and

(3) An employer of a CDL-holder who knowingly allows, requires, permits, or authorizes that CDL-holder to operate a CMV in violation of a Federal, State, or local law or regulation pertaining to railroad-highway grade crossings is subject to a civil penalty of not more than \$20,537.

* * * * *

(d) *Financial responsibility violations.* A motor carrier that fails to maintain the levels of financial responsibility prescribed by part 387 of this subchapter or any person (except an employee who acts without knowledge) who knowingly violates the rules of part 387, subparts A and B, is subject to a maximum penalty of \$21,114. Each day of a continuing violation constitutes a separate offense.

(e) *Violations of the Hazardous Materials Regulations (HMRs) and safety permitting regulations found in subpart E of part 385 of this subchapter.* This paragraph (e) applies to violations by motor carriers, drivers, shippers and other persons who transport hazardous materials on the highway in commercial motor vehicles or cause hazardous materials to be so transported.

(1) All knowing violations of 49 U.S.C. chapter 51 or orders or regulations issued under the authority of that chapter applicable to the transportation or shipment of hazardous materials by commercial motor vehicle on the highways are subject to a civil penalty of not more than \$102,348 for each violation. Each day of a continuing violation constitutes a separate offense.

(2) All knowing violations of 49 U.S.C. chapter 51 or orders or regulations issued under the authority of that chapter applicable to training related to the transportation or shipment of hazardous materials by commercial motor vehicle on the highways are subject to a civil penalty of not less than \$617 and not more than \$102,348 for each violation.

(3) All knowing violations of 49 U.S.C. chapter 51 or orders, regulations, or exemptions under the authority of that chapter applicable to the manufacture, fabrication, marking, maintenance, reconditioning, repair, or testing of a packaging or container that is represented, marked, certified, or sold as being qualified for use in the transportation or shipment of hazardous materials by commercial motor vehicle on the highways are subject to a civil penalty of not more than \$102,348 for each violation.

(4) Whenever regulations issued under the authority of 49 U.S.C. chapter 51 require compliance with the FMCSRs while transporting hazardous materials, any violations of the FMCSRs will be considered a violation of the HMRs and subject to a civil penalty of not more than \$102,348.

(5) If any violation subject to the civil penalties set out in paragraphs (e)(1) through (4) of this appendix results in death, serious illness, or severe injury to any person or in substantial destruction of property, the civil penalty may be increased to not more than \$238,809 for each offense.

(f) *Operating after being declared unfit by assignment of a final "unsatisfactory" safety rating.* (1) A motor carrier operating a commercial motor vehicle in interstate commerce (except owners or operators of

commercial motor vehicles designed or used to transport hazardous materials for which placarding of a motor vehicle is required under regulations prescribed under 49 U.S.C. chapter 51) is subject, after being placed out of service because of receiving a final "unsatisfactory" safety rating, to a civil penalty of not more than \$34,116 (49 CFR 385.13). Each day the transportation continues in violation of a final "unsatisfactory" safety rating constitutes a separate offense.

(2) A motor carrier operating a commercial motor vehicle designed or used to transport hazardous materials for which placarding of a motor vehicle is required under regulations prescribed under 49 U.S.C. chapter 51 is subject, after being placed out of service because of receiving a final "unsatisfactory" safety rating, to a civil penalty of not more than \$102,348 for each offense. If the violation results in death, serious illness, or severe injury to any person or in substantial destruction of property, the civil penalty may be increased to not more than \$238,809 for each offense. Each day the transportation continues in violation of a final "unsatisfactory" safety rating constitutes a separate offense.

(g) * * *

(1) A person who operates as a motor carrier for the transportation of property in violation of the registration requirements of 49 U.S.C. 13901 is liable for a minimum penalty of \$13,676 per violation.

(2) A person who knowingly operates as a broker in violation of registration requirements of 49 U.S.C. 13904 or financial security requirements of 49 U.S.C. 13906 is liable for a penalty not to exceed \$13,676 for each violation.

(3) A person who operates as a motor carrier of passengers in violation of the registration requirements of 49 U.S.C. 13901 is liable for a minimum penalty of \$34,116 per violation.

(4) A person who operates as a foreign motor carrier or foreign motor private carrier of property in violation of the provisions of 49 U.S.C. 13902(c) is liable for a minimum penalty of \$13,676 per violation.

(5) A person who operates as a foreign motor carrier or foreign motor private carrier without authority, outside the boundaries of a commercial zone along the United States-Mexico border, is liable for a maximum penalty of \$18,766 for an intentional violation and a maximum penalty of \$46,918 for a pattern of intentional violations.

(6) A person who operates as a motor carrier or broker for the transportation of hazardous wastes in violation of the registration provisions of 49 U.S.C. 13901 is liable for a minimum penalty of \$27,293 and a maximum penalty of \$54,585 per violation.

(7) A motor carrier or freight forwarder of household goods, or their receiver or trustee, that does not comply with any regulation relating to the protection of individual shippers, is liable for a minimum penalty of \$2,052 per violation.

(8) A person as described under paragraph (i) or (ii) is liable for a minimum penalty of \$4,109 for the first violation and \$10,269 for each subsequent violation—

(i) Who falsifies, or authorizes an agent or other person to falsify, documents used in

the transportation of household goods by motor carrier or freight forwarder to evidence the weight of a shipment; or

(ii) Who charges for services which are not performed or are not reasonably necessary in the safe and adequate movement of the shipment.

* * * * *

(10) A person who offers, gives, solicits, or receives transportation of property by a carrier at a different rate than the rate in effect under 49 U.S.C. 13702 is liable for a maximum penalty of \$205,375 per violation. When acting in the scope of his/her employment, the acts or omissions of a person acting for or employed by a carrier or shipper are considered the acts or omissions of that carrier or shipper, as well as of that person.

(11) Any person who offers, gives, solicits, or receives a rebate or concession related to motor carrier transportation subject to jurisdiction under subchapter I of 49 U.S.C. chapter 135, or who assists or permits another person to get that transportation at less than the rate in effect under 49 U.S.C. 13702, commits a violation for which the penalty is \$410 for the first violation and \$513 for each subsequent violation.

(12) A freight forwarder, its officer, agent, or employee, that assists or willingly permits a person to get service under 49 U.S.C. 13531 at less than the rate in effect under 49 U.S.C. 13702 commits a violation for which the penalty is up to \$1,028 for the first violation and up to \$4,109 for each subsequent violation.

(13) A person who gets or attempts to get service from a freight forwarder under 49 U.S.C. 13531 at less than the rate in effect under 49 U.S.C. 13702 commits a violation for which the penalty is up to \$1,028 for the first violation and up to \$4,109 for each subsequent violation.

(14) A person who knowingly authorizes, consents to, or permits a violation of 49 U.S.C. 14103 relating to loading and unloading motor vehicles or who knowingly violates subsection (a) of 49 U.S.C. 14103 is liable for a penalty of not more than \$20,537 per violation.

* * * * *

(16) A person required to make a report to the Secretary, answer a question, or make, prepare, or preserve a record under part B of subtitle IV, title 49, U.S.C., or an officer, agent, or employee of that person, is liable for a minimum penalty of \$1,365 and for a maximum penalty of \$10,269 per violation if it does not make the report, does not completely and truthfully answer the question within 30 days from the date the Secretary requires the answer, does not make or preserve the record in the form and manner prescribed, falsifies, destroys, or changes the report or record, files a false report or record, makes a false or incomplete entry in the record about a business-related fact, or prepares or preserves a record in violation of a regulation or order of the Secretary.

(17) A motor carrier, water carrier, freight forwarder, or broker, or their officer, receiver, trustee, lessee, employee, or other person authorized to receive information from them, who discloses information identified in 49

U.S.C. 14908 without the permission of the shipper or consignee is liable for a maximum penalty of \$4,109.

(18) A person who violates a provision of part B, subtitle IV, title 49, U.S.C., or a regulation or order under part B, or who violates a condition of registration related to transportation that is subject to jurisdiction under subchapter I or III of chapter 135, or who violates a condition of registration of a foreign motor carrier or foreign motor private carrier under section 13902, is liable for a penalty of \$1,028 for each violation if another penalty is not provided in 49 U.S.C. chapter 149.

* * * *

(21) * * *

(i) Who knowingly and willfully fails, in violation of a contract, to deliver to, or unload at, the destination of a shipment of household goods in interstate commerce for which charges have been estimated by the motor carrier transporting such goods, and for which the shipper has tendered a payment in accordance with part 375, subpart G, of this subchapter, is liable for a civil penalty of not less than \$20,537 for each violation. Each day of a continuing violation constitutes a separate offense.

* * * *

(22) A broker for transportation of household goods who makes an estimate of the cost of transporting any such goods before entering into an agreement with a motor carrier to provide transportation of household goods subject to FMCSA jurisdiction is liable to the United States for a civil penalty of not less than \$15,846 for each violation.

(23) A person who provides transportation of household goods subject to jurisdiction under 49 U.S.C. chapter 135, subchapter I, or provides broker services for such transportation, without being registered under 49 U.S.C. chapter 139 to provide such transportation or services as a motor carrier or broker, as the case may be, is liable to the United States for a civil penalty of not less than \$39,615 for each violation.

(h) *Copying of records and access to equipment, lands, and buildings.* A person subject to 49 U.S.C. chapter 51 or a motor carrier, broker, freight forwarder, or owner or operator of a commercial motor vehicle subject to part B of subtitle VI of title 49 U.S.C. who fails to allow promptly, upon demand in person or in writing, the Federal Motor Carrier Safety Administration, an employee designated by the Federal Motor Carrier Safety Administration, or an employee of a MCSAP grant recipient to inspect and copy any record or inspect and examine equipment, lands, buildings, and other property, in accordance with 49 U.S.C. 504(c), 5121(c), and 14122(b), is subject to a civil penalty of not more than \$1,584 for each offense. Each day of a continuing violation constitutes a separate offense, except that the total of all civil penalties against any violator for all offenses related to a single violation shall not exceed \$15,846.

(i) *Evasion.* A person, or an officer, employee, or agent of that person:

(1) Who by any means tries to evade regulation of motor carriers under title 49, United States Code, chapter 5, chapter 51,

subchapter III of chapter 311 (except sections 31138 and 31139) or section 31302, 31303, 31304, 31305(b), 31310(g)(1)(A), or 31502, or a regulation in subtitle B, chapter I, subchapter C of this title, or this subchapter, issued under any of those provisions, shall be fined at least \$2,730 but not more than \$6,823 for the first violation and at least \$3,409 but not more than \$10,224 for a subsequent violation.

(2) Who tries to evade regulation under part B of subtitle IV, title 49, U.S.C., for carriers or brokers is liable for a penalty of at least \$2,730 for the first violation or at least \$6,823 for a subsequent violation.

PART 578—CIVIL AND CRIMINAL PENALTIES

■ 95. The authority citation for part 578 continues to read as follows:

Authority: Pub. L. 92–513, Pub. L. 94–163, Pub. L. 98–547, Pub. L. 101–410, Pub. L. 102–388, Pub. L. 102–519, Pub. L. 104–134, Pub. L. 109–59, Pub. L. 110–140, Pub. L. 112–141, Pub. L. 114–74, Pub. L. 114–94 (49 U.S.C. 30165, 30170, 30505, 32308, 32309, 32507, 32709, 32710, 32902, 32912, 33114, and 33115); delegation of authority at 49 CFR 1.81, 1.95.

■ 96. Amend § 578.6 by revising paragraphs (a)(1), (a)(2)(i)(B), (a)(3) and (4), (b) through (g), (h)(1), (h)(2) introductory text, (h)(3), and (i) to read as follows:

§ 578.6 Civil penalties for violations of specified provisions of Title 49 of the United States Code.

(a) * * *

(1) *In general.* A person who violates any of sections 30112, 30115, 30117 through 30122, 30123(a), 30125(c), 30127, or 30141 through 30147 of Title 49 of the United States Code or a regulation in this chapter prescribed under any of those sections is liable to the United States Government for a civil penalty of not more than \$27,874 for each violation. A separate violation occurs for each motor vehicle or item of motor vehicle equipment and for each failure or refusal to allow or perform an act required by any of those sections. The maximum civil penalty under this paragraph (a)(1) for a related series of violations is \$139,356,994.

(2) * * *

(i) * * *

(B) Violates section 30112(a)(2) of Title 49 United States Code, shall be subject to a civil penalty of not more than \$15,846 for each violation. A separate violation occurs for each motor vehicle or item of motor vehicle equipment and for each failure or refusal to allow or perform an act required by this section. The maximum penalty under this paragraph (a)(2)(i)(B) for a related series of violations is \$23,769,723.

(3) *Section 30166.* A person who violates Section 30166 of Title 49 of the United States Code or a regulation in this chapter prescribed under that section is liable to the United States Government for a civil penalty for failing or refusing to allow or perform an act required under that section or regulation. The maximum penalty under this paragraph (a)(3) is \$27,874 per violation per day. The maximum penalty under this paragraph (a)(3) for a related series of daily violations is \$139,356,994.

(4) *False and misleading reports.* A person who knowingly and willfully submits materially false or misleading information to the Secretary, after certifying the same information as accurate under the certification process established pursuant to Section 30166(o) of Title 49 of the United States Code, shall be subject to a civil penalty of not more than \$6,823 per day. The maximum penalty under this paragraph (a)(4) for a related series of daily violations is \$1,364,624.

(b) *National Automobile Title Information System.* An individual or entity violating 49 U.S.C. Chapter 305 is liable to the United States Government for a civil penalty of not more than \$2,224 for each violation.

(c) *Bumper standards.* (1) A person that violates 49 U.S.C. 32506(a) is liable to the United States Government for a civil penalty of not more than \$3,650 for each violation. A separate violation occurs for each passenger motor vehicle or item of passenger motor vehicle equipment involved in a violation of 49 U.S.C. 32506(a)(1) or (4)—

(i) That does not comply with a standard prescribed under 49 U.S.C. 32502; or

(ii) For which a certificate is not provided, or for which a false or misleading certificate is provided, under 49 U.S.C. 32504.

(2) The maximum civil penalty under this paragraph (c) for a related series of violations is \$4,064,690.

(d) *Consumer information—(1) Crashworthiness and damage susceptibility.* A person who violates 49 U.S.C. 32308(a), regarding crashworthiness and damage susceptibility, is liable to the United States Government for a civil penalty of not more than \$3,650 for each violation. Each failure to provide information or comply with a regulation in violation of 49 U.S.C. 32308(a) is a separate violation. The maximum penalty under this paragraph (d)(1) for a related series of violations is \$1,990,815.

(2) *Consumer tire information.* Any person who fails to comply with the national tire fuel efficiency program under 49 U.S.C. 32304A is liable to the

United States Government for a civil penalty of not more than \$75,541 for each violation.

(e) *Country of origin content labeling.* A manufacturer of a passenger motor vehicle distributed in commerce for sale in the United States that willfully fails to attach the label required under 49 U.S.C. 32304 to a new passenger motor vehicle that the manufacturer manufactures or imports, or a dealer that fails to maintain that label as required under 49 U.S.C. 32304, is liable to the United States Government for a civil penalty of not more than \$2,224 for each violation. Each failure to attach or maintain that label for each vehicle is a separate violation.

(f) *Odometer tampering and disclosure.* (1) A person that violates 49 U.S.C. Chapter 327 or a regulation in this chapter prescribed or order issued thereunder is liable to the United States Government for a civil penalty of not more than \$13,676 for each violation. A separate violation occurs for each motor vehicle or device involved in the violation. The maximum civil penalty under this paragraph (f)(1) for a related series of violations is \$1,364,624.

(2) A person that violates 49 U.S.C. Chapter 327 or a regulation in this chapter prescribed or order issued thereunder, with intent to defraud, is liable for three times the actual damages or \$13,676, whichever is greater.

(g) *Vehicle theft protection.* (1) A person that violates 49 U.S.C. 33114(a)(1)–(4) is liable to the United States Government for a civil penalty of not more than \$2,998 for each violation. The failure of more than one part of a single motor vehicle to conform to an applicable standard under 49 U.S.C. 33102 or 33103 is only a single violation. The maximum penalty under this paragraph (g)(1) for a related series of violations is \$749,432.

(2) A person that violates 49 U.S.C. 33114(a)(5) is liable to the United States Government for a civil penalty of not more than \$222,609 a day for each violation.

(h) *Automobile fuel economy.* (1) A person that violates 49 U.S.C. 32911(a) is liable to the United States Government for a civil penalty of not more than \$52,468 for each violation. A separate violation occurs for each day the violation continues.

(2) Except as provided in 49 U.S.C. 32912(c), a manufacturer that violates a standard prescribed for a model year under 49 U.S.C. 32902 is liable to the United States Government for a civil penalty of \$17 (for model years before model year 2019, the civil penalty is \$5.50; for model years 2019 through 2021, the civil penalty is \$14; for model

year 2022, the civil penalty is \$15; for model year 2023, the civil penalty is \$16; for model year 2024, the civil penalty is \$17), multiplied by each .1 of a mile a gallon by which the applicable average fuel economy standard under that section exceeds the average fuel economy—

* * * * *

(3) If a higher amount for each .1 of a mile a gallon to be used in calculating a civil penalty under paragraph (h)(2) of this section is prescribed pursuant to the process provided in 49 U.S.C. 32912(c), the amount prescribed may not be more than \$33 for each .1 of a mile a gallon.

(i) *Medium- and heavy-duty vehicle fuel efficiency.* The maximum civil penalty for a violation of the fuel consumption standards of 49 CFR part 535 is not more than \$51,668 per vehicle or engine. The maximum civil penalty for a related series of violations shall be determined by multiplying \$51,668 times the vehicle or engine production volume for the model year in question within the regulatory averaging set.

Signed in Washington, DC, on December 18, 2024.

Subash Iyer,

Acting General Counsel.

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 91

Docket No. FAA–2015–8672; Amdt. No. 91–340E]

RIN 2120–AL96

Extension of the Prohibition Against Certain Flights in Specified Areas of the Sanaa Flight Information Region (FIR) (OYSC)

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: This action extends the prohibition against certain flight operations in specified areas of the Sanaa Flight Information Region (FIR) (OYSC) by all: U.S. air carriers; U.S. commercial operators; persons exercising the privileges of an airman certificate issued by the FAA, except when such persons are operating U.S.-registered aircraft for a foreign air carrier; and operators of U.S.-registered civil aircraft, except when the operator

of such aircraft is a foreign air carrier, for an additional three years, from January 7, 2025, until January 7, 2028. The FAA finds this action necessary to address significant, unacceptable safety-of-flight risks to U.S. civil aviation operations in the specified areas of the Sanaa FIR (OYSC) stemming from heightened regional tensions associated with Houthi weapons employment and operational activities. Most recently, Houthi forces have engaged in increased weapons employment and operational activities related to the Israel-Gaza Conflict, leading in some cases to air defense responses. The FAA also takes into account the Houthis' recent history of having conducted long-range attacks emanating from the Sanaa FIR (OYSC) in other directions, notably against Saudi Arabia and the United Arab Emirates (UAE) in 2022. The FAA also republishes the approval process and exemption information for this Special Federal Aviation Regulation (SFAR), consistent with other recently published flight prohibition SFARs.

DATES: This final rule is effective on December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Bill Petrak, Flight Standards Service, through the Washington Operations Center, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone (202) 267–3203; email 9-FAA-OverseasFlightProhibitions@faa.gov.

SUPPLEMENTARY INFORMATION:

I. Executive Summary

This action extends the expiration date of SFAR No. 115, title 14 Code of Federal Regulations (14 CFR) 91.1611, from January 7, 2025, until January 7, 2028. SFAR No. 115 prohibits certain flight operations in the specified areas of the Sanaa FIR (OYSC) by all: U.S. air carriers; U.S. commercial operators; persons exercising the privileges of an airman certificate issued by the FAA, except when such persons are operating U.S.-registered aircraft for a foreign air carrier; and operators of U.S.-registered civil aircraft, except when the operator of such aircraft is a foreign air carrier. Since the start of the Israel-Gaza Conflict, Houthi forces have launched numerous long-range weaponized unmanned aircraft systems (UAS), missiles, and rockets out of Houthi-controlled territories in Yemen toward intended targets in Israel, the Red Sea, the Gulf of Aden, and the Arabian Sea. These attacks have been likely attempts to strike Israel and hold maritime shipping in the Red Sea, the Gulf of Aden, and the Arabian Sea at risk. Prior to the 2022 UN brokered ceasefire,

which has expired, the Houthis conducted similar long-range attacks against Saudi Arabia and the UAE. Additionally, Houthi forces armed with advanced anti-aircraft weapons systems capable of targeting aircraft at or above standard cruising altitudes have successfully engaged Western intelligence and surveillance aircraft operating over Houthi-controlled territory in Yemen and over the Red Sea.

Consistent with other recently published flight prohibition SFARs, this action also republishes the approval process and exemption information for this flight prohibition SFAR.

II. Authority and Good Cause

A. Authority

The FAA is responsible for the safety of flight in the U.S. and for the safety of U.S. civil operators, U.S.-registered civil aircraft, and U.S.-certificated airmen throughout the world. Section 106(f) of title 49, U.S. Code (U.S.C.), subtitle I, establishes the FAA Administrator's authority to issue rules on aviation safety. Subtitle VII of title 49, Aviation Programs, describes in more detail the scope of the agency's authority. Section 40101(d)(1) provides that the Administrator shall consider in the public interest, among other matters, assigning, maintaining, and enhancing safety and security as the highest priorities in air commerce. Section 40105(b)(1)(A) requires the Administrator to exercise this authority consistently with the obligations of the U.S. Government under international agreements.

The FAA is promulgating this rule under the authority described in 49 U.S.C. 44701, General requirements. Under that section, the FAA is charged broadly with promoting safe flight of U.S. civil aircraft in air commerce by prescribing, among other things, regulations and minimum standards for practices, methods, and procedures that the Administrator finds necessary for safety in air commerce and national security.

This regulation is within the scope of the FAA's authority because it continues to prohibit the persons described in paragraph (a) of SFAR No. 115, § 91.1611, from conducting flight operations in the specified areas of the Sanaa FIR (OYSC) due to the continuing significant hazards to the safety of U.S. civil flight operations, as described in the preamble to this final rule.

B. Good Cause for Immediate Adoption

Section 553(b)(B) of title 5, U.S.C., authorizes agencies to dispense with

notice and comment procedures for rules when the agency for "good cause" finds that those procedures are "impracticable, unnecessary, or contrary to the public interest." Also, section 553(d) permits agencies, upon a finding of good cause, to issue rules with an effective date less than 30 days from the date of publication. In this instance, the FAA finds good cause to forgo notice and comment and the delayed effective date because they would be impracticable and contrary to the public interest.

Providing notice and the opportunity for the public to comment here would be impracticable. The FAA's flight prohibitions, and any amendments thereto, need to include appropriate boundaries that reflect the agency's current understanding of the risk environment for U.S. civil aviation. This allows the FAA to protect the safety of U.S. operators' aircraft and the lives of their passengers and crews without over-restricting or under-restricting U.S. operators' routing options. However, the risk environment for U.S. civil aviation in airspace managed by other countries with respect to safety of flight is fluid in circumstances involving fighting, violent extremist and militant activity, or periods of heightened tensions, particularly where weapons capable of targeting or otherwise negatively affecting U.S. civil aviation are or may be present. This fluidity, and the potential for rapid changes in the risks to U.S. civil aviation, significantly limits how far in advance of a new or amended flight prohibition the FAA can usefully assess the risk environment. The delay that would be occasioned by providing an opportunity to comment on this action would significantly increase the risk that the resulting final action would not accurately reflect the current risks to U.S. civil aviation associated with the situation and thus would not establish boundaries for the flight prohibition commensurate with those risks.

While the FAA sought and responded to public comments, the boundaries of the area in which unacceptable risks to the safety of U.S. civil aviation existed might change due to: evolving military or political circumstances; violent extremist and militant group activity; the introduction, removal, or repositioning of more advanced anti-aircraft weapon systems; or other factors. As a result, if the situation improved while the FAA sought and responded to public comments, the rule the FAA finalized might be over-restrictive, unnecessarily limiting U.S. operators' routing options and potentially causing them to incur unnecessary additional fuel and

operations-related costs, as well as potentially causing passengers to incur unnecessarily some costs attributed to their time. Conversely, if the situation deteriorated while the FAA sought and responded to public comments, the rule the FAA finalized might be under-restrictive, allowing U.S. civil aviation to continue operating in areas where unacceptable risks to their safety had developed. Such an outcome would endanger the safety of these aircraft, as well as their passengers and crews, exposing them to unacceptable risks of death, injury, and property damage that could occur if a U.S. operator's aircraft were shot down (or otherwise damaged) while operating in the specified areas of the Sanaa FIR (OYSC).

Alternatively, if the FAA made changes to the area in which U.S. civil aviation operations would be prohibited between a notice of proposed rulemaking and a final rule due to changed conditions, the version of the rule the public commented on would no longer reflect the FAA's current assessment of the risk environment for U.S. civil aviation.

In addition, seeking comment would be contrary to the public interest because some of the rational basis for the rulemaking is based upon classified information and controlled unclassified information not authorized for public release. In order to meaningfully provide comment on a proposal, the public would need access to the basis for the agency's decision-making, which the FAA cannot provide. Disclosing classified information or controlled unclassified information not authorized for public release in order to seek meaningful comment on the proposal would harm the public interest. Accordingly, the FAA meaningfully seeking comment on the proposal is contrary to the public interest.

Therefore, providing notice and the opportunity for comment would be impracticable as it would hinder the FAA's ability to maintain appropriate flight prohibitions based on up-to-date risk assessments of the risks to the safety of U.S. civil aviation operations in airspace managed by other countries. It would also be contrary to the public interest, as the FAA cannot protect classified information and controlled unclassified information not authorized for public release and meaningfully seek public comment.

For the same reasons discussed above, the potential safety impacts and the need for prompt action on up-to-date information that is not public would make delaying the effective date impracticable and contrary to the public interest.

Accordingly, the FAA finds good cause exists to forgo notice and comment and any delay in the effective date for this rule.

III. Background

In its most recent extension of the prohibition against certain flights in specified areas of the Sanaa FIR (OYSC),^{1 2} the FAA continued to assess the situation in the specified areas of the Sanaa FIR (OYSC) as presenting significant, continuing safety-of-flight risks for U.S. civil aviation due to the ongoing conflict between the Saudi-led Coalition (SLC) and Houthi forces and the enduring extremist or militant threat to U.S. civil aviation operations in those areas. Houthi forces had continued to develop, acquire, and employ advanced weapons capabilities, including and nontraditional air defense capabilities, UAS, and missile capabilities. Collectively, such capabilities posed risks to U.S. civil aviation operations at all altitudes in the specified areas of the Sanaa FIR (OYSC) and at airports in Yemen.

Houthi forces operated multiple air defense systems capable of targeting aircraft at various altitudes. They had employed increasingly capable Iranian-supplied surface-to-air missiles (SAMs) and electro-optical/infrared seeker air-to-air missiles modified for use as SAMs to engage aircraft. Houthi air defense capabilities posed an inadvertent risk to U.S. civil aviation operations due to the potential for misidentification or miscalculation by irregular forces using advanced air defense capabilities for which they may not have received adequate training and may not have had adequate air surveillance information to distinguish accurately between civil aircraft and potential airborne threats. In the preamble to the December 2021 final rule, the FAA stated that it continued to assess, at that time, that Houthi forces

in Yemen did not possess functional medium-/long-range strategic SAM capabilities. Houthi forces have subsequently acquired longer range anti-aircraft weapon systems.

Additionally, as described in the preamble to the December 2021 final rule, Houthi forces had targeted international airports in the region using weaponized UAS, ballistic, and cruise missiles. Although the FAA noted that some Houthi offensive weapons systems had range capabilities that would allow them to reach the limited areas of the Sanaa FIR (OYSC) in which the FAA permits U.S. civil aviation to operate, Houthi forces had not demonstrated an intent to conduct weaponized UAS or missile attacks in those areas. Instead, they had focused these types of attacks primarily on targets in Saudi Arabia and in contested areas of Yemen. In addition, in the preamble to the December 2021 final rule, the FAA assessed Houthi weaponized UAS operations would only present a safety-of-flight hazard to civil aircraft operating off the Yemeni coast if such aircraft were operating below cruising altitudes.

Besides the safety-of-flight risks associated with the SLC-Houthi conflict, in the preamble to the December 7, 2021 final rule, the FAA assessed extremist or militant groups operating in Yemen likely had access to anti-aircraft-capable weapons, including man-portable air defense systems (MANPADS), which pose risks up to 25,000 feet. Al-Qa'ida in the Arabian Peninsula (AQAP) continued to operate in Yemen and historically had attempted to attack Western civil aviation through novel improvised explosive devices, including the failed 2009 underwear bombing attempt on a U.S.-bound flight and the 2010 printer cartridge plot that targeted U.S.-bound cargo flights. Additionally, Islamic State of Iraq and ash-Sham (ISIS) cells remained active in Yemen.

IV. Discussion of the Final Rule

The FAA has assessed the situation in the specified areas of the Sanaa FIR (OYSC) and determined that it continues to be hazardous for U.S. civil aviation. Since the beginning of the Israel-Gaza Conflict in October 2023, Houthi forces have launched numerous attacks likely targeting Israel and maritime shipping in the Red Sea, the Gulf of Aden, and the Arabian Sea using a variety of weapons including cruise missiles, anti-ship ballistic missiles, and weaponized UAS. Such attacks present significant risks to safety-of-flight of U.S. civil aviation in the specified areas of the Sanaa FIR (OYSC) addressed by this flight prohibition SFAR. Although

the majority of these attacks primarily pose low-altitude risks, Houthi-launched ballistic missiles pose risks to aircraft operating at or above standard cruising altitudes, as ballistic missile trajectories may ascend through or over established air routes. Additionally, ballistic missile operations can negatively affect flight safety in the event of a missile failure, as falling debris may descend through air routes.

Houthi forces are also equipped with a variety of advanced anti-aircraft weapons—including various MANPADS, SAMs, and Iranian-proliferated loitering munition systems—capable of targeting aircraft at or above standard cruising altitudes. In 2023 and 2024, the Houthis used these systems to successfully intercept multiple U.S. intelligence, surveillance, and reconnaissance UAS over Yemen and the Red Sea. These weapon systems pose risks to civil aviation operations over Houthi-controlled territory in Yemen, with ranges extending beyond the specified areas of the Sanaa FIR (OYSC). For example, in November 2023, the Houthis claimed responsibility for having allegedly shot down a MQ-9 Reaper off the western coast of Yemen. Additionally, in late May 2024, the Houthis claimed responsibility for shooting down another MQ-9 near Marib, Yemen. Houthi air defense operations have continued over Houthi-controlled territory in Yemen and off Yemen's west coast, in likely attempts to intercept Western military reconnaissance operations. The FAA remains concerned that Houthi forces operating advanced anti-aircraft weapons may not have adequate training or adequate air surveillance information to distinguish accurately between civil aircraft and potential airborne threats. There are concerns that Houthi forces may now possess functional medium-range SAMs. These circumstances present an unacceptable inadvertent risk of aircraft misidentification, which could result in the accidental shoot down of a civil aircraft, in the specified areas of the Sanaa FIR (OYSC).

Additionally, AQAP and ISIS have remained active in Yemen and likely have access to a variety of weapons, including small arms; small commercially-available UAS, which can be weaponized; and potentially legacy MANPADS, posing risks to aircraft up to 25,000 feet.

Collectively, the various threat actors' existing capabilities, coupled with their demonstrated intent to use these weapons, presents a continued, significant, and unacceptable level of risk to U.S. civil aviation operations at

¹ *Extension of the Prohibition Against Certain Flights in Specified Areas of the Sanaa Flight Information Region (FIR) (OYSC)* final rule, 86 FR 69167 (Dec. 7, 2021).

² Subsequent to the publication of the 2021 final rule, the FAA became aware the International Civil Aviation Organization (ICAO) Middle East Air Navigation Planning and Implementation Regional Group approved an update to the Regional Air Navigation Plan to amend certain waypoints. Some of the amendments affected waypoints used by the FAA to demarcate the boundary between the airspace in which U.S. operators are prohibited from conducting operations and the airspace in which U.S. operators are permitted to operate. To address the amendments of waypoints, on September 22, 2023, the FAA published a technical amendment in the *Federal Register* identifying the new waypoint names and locations to clarify where U.S. operators are prohibited from conducting operations due to flight safety risks associated with the conflict in Yemen and where they are permitted to operate. 88 FR 65319.

all altitudes in the specified areas of the Sanaa FIR (OYSC). Houthis cross-border attacks into Saudi Arabia and the UAE ceased following an April 2022 United Nations (UN)-brokered temporary ceasefire between the Houthis and the SLC, even though the temporary ceasefire expired in the fall of 2022 without the Houthis and the SLC agreeing to a longer-term formal ceasefire. However, SLC-Houthi cross-border attacks could resume with little or no warning—a risk that has significantly increased since the start of the Israel-Gaza Conflict in October 2023 due to increased regional volatility.

Therefore, the FAA extends the expiration date of SFAR No. 115, § 91.1611, from January 7, 2025, until January 7, 2028, without any changes to the boundaries of the SFAR.

If the risk to U.S. civil aviation safety and security decreases to an acceptable level, then further amendments to SFAR No. 115, § 91.1611, might be appropriate. The FAA will continue to monitor the situation and evaluate the extent to which persons described in paragraph (a) of this rule might be able to operate safely in the specified areas of the Sanaa FIR (OYSC).

The FAA also republishes the details concerning the approval and exemption processes in sections V and VI of this preamble, consistent with other recently published flight prohibition SFARs, to enable interested persons to refer to this final rule for comprehensive information about requesting relief from the FAA from the provisions of SFAR No. 115, § 91.1611.

V. Approval Process Based on a Request From a Department, Agency, or Instrumentality of the United States Government

A. Approval Process Based on an Authorization Request From a Department, Agency, or Instrumentality of the United States Government

In some instances, U.S. Government departments, agencies, or instrumentalities may need to engage U.S. civil aviation to support their activities in the specified areas of the Sanaa FIR (OYSC). If a department, agency, or instrumentality of the U.S. Government determines that it has a critical need to engage any person described in paragraph (a) of SFAR No. 115, § 91.1611, including a U.S. air carrier or commercial operator, to transport civilian or military passengers or cargo or conduct other operations in the specified areas of the Sanaa FIR (OYSC), that department, agency, or instrumentality may request the FAA to approve persons described in paragraph

(a) of SFAR No. 115, § 91.1611, to conduct such operations.

The requesting U.S. Government department, agency, or instrumentality must submit the request for approval to the FAA's Associate Administrator for Aviation Safety in a letter signed by an appropriate senior official of the requesting department, agency, or instrumentality.³ The FAA will not accept or consider requests for approval from anyone other than the requesting U.S. Government department, agency, or instrumentality. In addition, the senior official signing the letter requesting FAA approval must be sufficiently positioned within the requesting department, agency, or instrumentality to demonstrate that the organization's senior leadership supports the request for approval and is committed to taking all necessary steps to minimize aviation safety and security risks to the proposed flights. The senior official must also be in a position to: (1) attest to the accuracy of all representations made to the FAA in the request for approval, and (2) ensure that any support from the requesting U.S. Government department, agency, or instrumentality described in the request for approval is in fact brought to bear and is maintained over time. Unless justified by exigent circumstances, requesting U.S. Government departments, agencies, or instrumentalities must submit requests for approval to the FAA no less than 30 calendar days before the date on which the requesting department, agency, or instrumentality wishes the operator(s) to commence the proposed operation(s).

The requestor must send the request to the Associate Administrator for Aviation Safety, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591. Electronic submissions are acceptable, and the requesting entity may request that the FAA notify it electronically as to whether the FAA grants the request for approval. If a requestor wishes to make an electronic submission to the FAA, the requestor should contact the Washington Operations Center by telephone at (202) 267-3203 or by email at 9-FAA-OverseasFlightProhibitions@faa.gov for submission instructions. The requestor must not submit its letter requesting FAA approval or related supporting documentation to the

³ This approval procedure applies to U.S. Government departments, agencies, or instrumentalities; it does not apply to the public. The FAA describes this procedure in the interest of providing transparency with respect to the FAA's process for interacting with U.S. Government departments, agencies, or instrumentalities that seek to engage U.S. civil aviation to operate in the area in which this SFAR would prohibit their operations in the absence of specific FAA approval.

Washington Operations Center. Rather, the Washington Operations Center will refer the requestor to an appropriate staff member of the Flight Standards Service for further assistance.

A single letter may request approval from the FAA for multiple persons described in SFAR No. 115, § 91.1611, or for multiple flight operations. To the extent known, the letter must identify the person(s) the requester expects the SFAR to cover on whose behalf the U.S. Government department, agency, or instrumentality seeks FAA approval, and it must describe—

- The proposed operation(s), including the nature of the mission being supported;
- The service the person(s) covered by the SFAR will provide;
- To the extent known, the specific locations in the specified areas of the Sanaa FIR (OYSC) where the proposed operation(s) will occur, including, but not limited to, the flight path and altitude of the aircraft while it is operating in the specified areas of the Sanaa FIR (OYSC) and the airports, airfields, or landing zones at which the aircraft will take off and land; and
- The method by which the requesting department, agency, or instrumentality will provide, or how the operator will otherwise obtain, current threat information and an explanation of how the operator will integrate this information into all phases of the proposed operations (*i.e.*, the pre-mission planning and briefing, in-flight, and post-flight phases).

The request for approval must also include a list of operators with whom the U.S. Government department, agency, or instrumentality requesting FAA approval has a current contract(s), grant(s), or cooperative agreement(s) (or its prime contractor has a subcontract(s)) for specific flight operations in the specified areas of the Sanaa FIR (OYSC). The requestor may identify additional operators to the FAA at any time after the FAA issues its approval. Neither the operators listed in the original request, nor any operators the requestor subsequently seeks to add to the approval, may commence operations under the approval until the FAA issues them an Operations Specification (OpSpec) or Letter of Authorization (LOA), as appropriate, for operations in the specified areas of the Sanaa FIR (OYSC). The approval conditions discussed below apply to all operators. Requestors should contact the Washington Operations Center by telephone at (202) 267-3203 or by email at 9-FAA-OverseasFlightProhibitions@faa.gov for instructions on how to submit the names of additional

operators the requestor wishes to add to an existing approval to the FAA. The requestor must not submit the names of additional operators it wishes to add to an existing approval to the Washington Operations Center. Rather, the Washington Operations Center will refer the requestor to an appropriate staff member of the Flight Standards Service for further assistance.

If an approval request includes classified information or controlled unclassified information not authorized for public release, requestors may contact the Washington Operations Center for instructions on submitting it to the FAA. The Washington Operations Center's contact information appears in the **FOR FURTHER INFORMATION CONTACT** section of this final rule.

FAA approval of an operation under SFAR No. 115, § 91.1611, does not relieve persons subject to this SFAR of the responsibility to comply with all other applicable FAA rules and regulations. Operators of civil aircraft must comply with the conditions of their certificates, OpSpecs, and LOAs, as applicable. Operators must also comply with all rules and regulations of other U.S. Government departments, agencies, or instrumentalities that may apply to the proposed operation(s), including, but not limited to, regulations issued by the Transportation Security Administration.

B. Approval Conditions

If the FAA approves the request, the FAA's Aviation Safety organization will send an approval letter to the requesting U.S. Government department, agency, or instrumentality informing it that the FAA's approval is subject to all of the following conditions:

(1) The approval will stipulate those procedures and conditions that limit, to the greatest degree possible, the risk to the operator, while still allowing the operator to achieve its operational objectives.

(2) Before any approval takes effect, the operator must submit to the FAA:

(a) A written release of the U.S. Government from all damages, claims, and liabilities, including without limitation legal fees and expenses, relating to any event arising out of or related to the approved operations in the specified areas of the Sanaa FIR (OYSC); and

(b) The operator's written agreement to indemnify the U.S. Government with respect to any and all third-party damages, claims, and liabilities, including without limitation legal fees and expenses, relating to any event arising out of or related to the approved

operations in the specified areas of the Sanaa FIR (OYSC).

(3) Other conditions the FAA may specify, including those the FAA might impose in OpSpecs or LOAs, as applicable.

The release and agreement to indemnify do not preclude an operator from raising a claim under an applicable non-premium war risk insurance policy the FAA issues under chapter 443 of title 49, U.S. Code.

If the FAA approves the proposed operation(s), the FAA will issue an OpSpec or LOA, as applicable, to the operator(s) identified in the original request and any operators the requestor subsequently adds to the approval, authorizing them to conduct the approved operation(s). In addition, as stated in paragraph (3) of this section V.B., the FAA notes that it may include additional conditions beyond those contained in the approval letter in any OpSpec or LOA associated with a particular operator operating under this approval, as necessary in the interests of aviation safety. U.S. Government departments, agencies, and instrumentalities requesting FAA approval on behalf of entities with which they have a contract or subcontract, grant, or cooperative agreement should request a copy of the relevant OpSpec or LOA directly from the entity with which they have any of the foregoing types of arrangements, if desired.

VI. Information Regarding Petitions for Exemption

Any operations not conducted under an approval the FAA issues through the approval process set forth previously may only occur in accordance with an exemption from SFAR No. 115, § 91.1611. A petition for exemption must comply with 14 CFR part 11. The FAA will consider whether exceptional circumstances exist beyond those described in the approval process in the previous section. To determine whether a petition for exemption from the prohibition this SFAR establishes fulfills the standards described in 14 CFR 11.81, the FAA consistently finds necessary the following information:

- The proposed operation(s), including the nature of the operation;
- The service the person(s) covered by the SFAR will provide;
- The specific locations in the specified areas of the Sanaa FIR (OYSC) where the proposed operation(s) will occur, including, but not limited to, the flight path and altitude of the aircraft while it is operating in the specified areas of the Sanaa FIR (OYSC) and the

airports, airfields, or landing zones at which the aircraft will take off and land;

- The method by which the operator will obtain current threat information and an explanation of how the operator will integrate this information into all phases of its proposed operations (*i.e.*, the pre-mission planning and briefing, in-flight, and post-flight phases); and
- The plans and procedures the operator will use to minimize the risks identified in this preamble to the proposed operations, to support the relief sought and demonstrate that granting such relief would not adversely affect safety or would provide a level of safety at least equal to that provided by this SFAR. The FAA has found comprehensive, organized plans and procedures of this nature to be helpful in facilitating the agency's safety evaluation of petitions for exemption from flight prohibition SFARs.

The FAA includes, as a condition of each such exemption it issues, a release and agreement to indemnify, as described previously.

The FAA recognizes that, with the support of the U.S. Government, the governments of other countries could plan operations that may be affected by SFAR No. 115, § 91.1611. While the FAA will not permit these operations through the approval process, the FAA will consider exemption requests for such operations on an expedited basis and in accordance with the order of preference set forth in paragraph (c) of SFAR No. 115, § 91.1611.

If a petition for exemption includes information that is sensitive for security reasons or proprietary information, requestors may contact the Washington Operations Center for instructions on submitting it to the FAA. The Washington Operations Center's contact information is listed in the **FOR FURTHER INFORMATION CONTACT** section of this final rule. Requestors must not submit their petitions for exemption or related supporting documentation to the Washington Operations Center. Rather, the Washington Operations Center will refer the requestor to the appropriate staff member of the Flight Standards Service or the Office of Rulemaking for further assistance.

VII. Regulatory Notices and Analyses

Federal agencies consider the impacts of regulatory actions under a variety of executive orders and other requirements. First, Executive Order 12866, Executive Order 13563, and Executive Order 14094 ("Modernizing Regulatory Review") direct that each Federal agency shall propose or adopt a regulation only upon a reasoned determination that the benefits of the

intended regulation justify the costs. Second, the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) requires agencies to analyze the economic impact of regulatory changes on small entities. Third, the Trade Agreements Act (Pub. L. 96–39) prohibits agencies from setting standards that create unnecessary obstacles to the foreign commerce of the United States. Fourth, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. The current threshold after adjustment for inflation is \$183 million using the most current (2023) Implicit Price Deflator for the Gross Domestic Product. This portion of the preamble summarizes the FAA’s analysis of the economic impacts of this final rule.

In conducting these analyses, the FAA has determined this final rule has benefits that justify its costs. This rule is a significant regulatory action, as defined in section 3(f)(4) of Executive Order 12866 as amended by Executive Order 14094. As 5 U.S.C. 553 does not require notice and comment for this final rule, 5 U.S.C. 603 and 604 do not require regulatory flexibility analyses regarding impacts on small entities. This rule will not create unnecessary obstacles to the foreign commerce of the United States. This rule will not impose an unfunded mandate on State, local, or Tribal governments, or on the private sector, by exceeding the threshold identified previously.

A. Regulatory Evaluation

This rule prohibits U.S. civil flights in the specified areas of the Sanaa FIR (OYSC) due to the significant hazards to U.S. civil aviation described in this preamble. The alternative flight routes result in some additional fuel and operations costs to the operators, as well as some costs attributed to passenger time. Accordingly, the incremental costs of the extension of this flight prohibition SFAR are minimal. By prohibiting unsafe flights, the benefits of this rule will exceed the minimal flight deviation costs. Therefore, the FAA finds that the incremental costs of extending SFAR No. 115, 14 CFR 91.1611, will be minimal and are exceeded by the benefits of avoided risks of deaths, injuries, and property damage that could occur if a U.S. operator’s aircraft were shot down (or otherwise damaged) while operating in

the specified areas of the Sanaa FIR (OYSC).

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA), in 5 U.S.C. 603, requires an agency to prepare an initial regulatory flexibility analysis describing impacts on small entities whenever 5 U.S.C. 553 or any other law requires an agency to publish a general notice of proposed rulemaking for any proposed rule. Similarly, 5 U.S.C. 604 requires an agency to prepare a final regulatory flexibility analysis when an agency issues a final rule under 5 U.S.C. 553 after that section or any other law requires publication of a general notice of proposed rulemaking. The FAA concludes good cause exists to forgo notice and comment and to not delay the effective date for this rule. As 5 U.S.C. 553 does not require notice and comment in this situation, 5 U.S.C. 603 and 604 similarly do not require regulatory flexibility analyses.

C. International Trade Impact Assessment

The Trade Agreements Act of 1979 (Pub. L. 96–39) prohibits Federal agencies from establishing standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Pursuant to this Act, the establishment of standards is not considered an unnecessary obstacle to the foreign commerce of the United States, so long as the standard has a legitimate domestic objective, such as the protection of safety, and does not operate in a manner that excludes imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards.

The FAA has assessed the potential effect of this final rule and determined that its purpose is to protect the safety of U.S. civil aviation from risks to their operations in the specified areas of the Sanaa FIR (OYSC), a location outside the U.S. Therefore, the rule complies with the Trade Agreements Act of 1979.

D. Unfunded Mandates Assessment

Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in an expenditure of \$100 million or more (in 1995 dollars) in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector; such a mandate is deemed to be a “significant regulatory action.” The FAA currently

uses an inflation-adjusted value of \$183 million in lieu of \$100 million.

This final rule does not contain such a mandate. Therefore, the requirements of title II of the Act do not apply.

E. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires the FAA to consider the impact of paperwork and other information collection burdens it imposes on the public. The FAA has determined no new requirement for information collection is associated with this final rule.

F. International Compatibility and Cooperation

In keeping with U.S. obligations under the Convention on International Civil Aviation, the FAA’s policy is to conform to International Civil Aviation Organization (ICAO) Standards and Recommended Practices to the maximum extent practicable. The FAA has determined no ICAO Standards and Recommended Practices correspond to this regulation. The FAA finds this action is fully consistent with the obligations under 49 U.S.C. 40105(b)(1)(A) to ensure the FAA exercises its duties consistently with the obligations of the United States under international agreements.

While the FAA’s flight prohibition does not apply to foreign air carriers, DOT codeshare authorizations prohibit foreign air carriers from carrying a U.S. codeshare partner’s code on a flight segment that operates in airspace for which the FAA has issued a flight prohibition for U.S. civil aviation. In addition, foreign air carriers and other foreign operators may choose to avoid, or be advised or directed by their civil aviation authorities to avoid, airspace for which the FAA has issued a flight prohibition for U.S. civil aviation.

G. Environmental Analysis

The FAA has analyzed this action under Executive Order 12114, Environmental Effects Abroad of Major Federal Actions, and DOT Order 5610.1C, Paragraph 16. Executive Order 12114 requires the FAA to be informed of environmental considerations and take those considerations into account when making decisions on major Federal actions that could have environmental impacts anywhere beyond the borders of the United States. The FAA has determined this action is exempt pursuant to Section 2–5(a)(i) of Executive Order 12114 because it does not have the potential for a significant effect on the environment outside the United States.

In accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, paragraph 8–6(c), the FAA has prepared a memorandum for the record stating the reason(s) for this determination and has placed it in the docket for this rulemaking.

VIII. Executive Order Determinations

A. Executive Order 13132, Federalism

The FAA has analyzed this rule under the principles and criteria of Executive Order 13132. The agency has determined this action will not have a substantial direct effect on the States, or the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, this rule will not have federalism implications.

B. Executive Order 13211, Regulations That Significantly Affect Energy Supply, Distribution, or Use

The FAA analyzed this rule under Executive Order 13211. The agency has determined it is not a “significant energy action” under the Executive order and will not be likely to have a significant adverse effect on the supply, distribution, or use of energy.

C. Executive Order 13609, Promoting International Regulatory Cooperation

Executive Order 13609 promotes international regulatory cooperation to meet shared challenges involving health, safety, labor, security, environmental, and other issues and to reduce, eliminate, or prevent unnecessary differences in regulatory requirements. The FAA has analyzed this action under the policies and agency responsibilities of Executive Order 13609 and has determined that this action will have no effect on international regulatory cooperation.

IX. Additional Information

A. Electronic Access

Except for classified and controlled unclassified material not authorized for public release, all documents the FAA considered in developing this rule, including economic analyses and technical reports, may be accessed from the internet through the docket for this rulemaking.

Those documents may be viewed online at <https://www.regulations.gov> using the docket number listed above. A copy of this rule will be placed in the docket. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365

days each year. An electronic copy of this document may also be downloaded from the Office of the Federal Register’s website at <https://www.federalregister.gov> and the Government Publishing Office’s website at <https://www.govinfo.gov>. A copy may also be found at the FAA’s Regulations and Policies website at https://www.faa.gov/regulations_policies.

Copies may also be obtained by sending a request to the Federal Aviation Administration, Office of Rulemaking, ARM–1, 800 Independence Avenue SW, Washington, DC 20591, or by calling (202) 267–9677.

B. Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) (Pub. L. 104–121) (set forth as a note to 5 U.S.C. 601) requires FAA to comply with small entity requests for information or advice about compliance with statutes and regulations within its jurisdiction. A small entity with questions regarding this document may contact its local FAA official, or the persons listed under the **FOR FURTHER INFORMATION CONTACT** heading at the beginning of the preamble. To find out more about SBREFA on the internet, visit https://www.faa.gov/regulations_policies/rulemaking/sbre_act/.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends chapter I of title 14, Code of Federal Regulations, as follows:

PART 91—GENERAL OPERATING AND FLIGHT RULES

- 1. The authority citation for part 91 continues to read as follows:

Authority: 49 U.S.C. 106(f), 40101, 40103, 40105, 40113, 40120, 44101, 44111, 44701, 44704, 44709, 44711, 44712, 44715, 44716, 44717, 44722, 46306, 46315, 46316, 46504, 46506–46507, 47122, 47508, 47528–47531, 47534; Pub. L. 114–190, 130 Stat. 615 (49 U.S.C. 44703 note); Sec. 828 of Pub. L. 118–63, 138 Stat. 1330 (49 U.S.C. 44703 note); articles 12 and 29 of the Convention on International Civil Aviation (61 Stat. 1180), (126 Stat. 11).

- 2. Amend § 91.1611 by revising paragraph (e) to read as follows:

§ 91.1611 Special Federal Aviation Regulation No. 115—Prohibition against certain flights in specified areas of the Sanaa Flight Information Region (FIR) (OYSC).

* * * * *

(e) *Expiration.* This SFAR will remain in effect until January 7, 2028. The FAA may amend, rescind, or extend this SFAR, as necessary.

Issued in Washington, DC, under the authority of 49 U.S.C. 106(f), 40101(d)(1), 40105(b)(1)(A), and 44701(a)(5).

Michael G. Whitaker,

Administrator.

14 CFR Part 107

[Docket No. FAA–2024–2403]

Accepted Means of Compliance for Small Unmanned Aircraft Category 2 and Category 3 Operations Over Human Beings; Virginia Tech Mid-Atlantic Aviation Partnership (VT MAAP)

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notification of availability.

SUMMARY: This document announces the acceptance of a means of compliance with FAA regulations for small unmanned aircraft (sUA) Category 2 and Category 3 operations over human beings. The Administrator finds that VT MAAP’s “Operation of Small Unmanned Aircraft Systems Over People,” version 2.1, dated August 9, 2024, provides an acceptable means, but not the only means, of showing compliance with FAA regulations.

DATES: Effective December 30, 2024.

FOR FURTHER INFORMATION CONTACT:

FAA Contact: Kimberly Luu, Cabin Safety Section, AIR–624, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service, Federal Aviation Administration, 2200 South 216th Street, Des Moines, Washington 98198; telephone and fax 206–231–3414; email Kimberly.H.Luu@faa.gov.

VT MAAP Contact: Robert Briggs, UAS Chief Engineer, 1991 Kraft Drive, Suite 2018, Blacksburg, VA 24061, (540) 231–9373; rbriggs@vt.edu.

SUPPLEMENTARY INFORMATION:

Background

Title 14, Code of Federal Regulations, part 107, subpart D, prescribes the eligibility and operating requirements for civil sUA to operate over human beings in the United States. To be eligible for use, the sUA must meet the requirements of § 107.120(a) for Category 2 operations or § 107.130(a) for Category 3 operations. These sections require the sUA to be designed, produced, or modified such that it will not cause injury to a human being above a specified severity limit, does not contain any exposed rotating parts that would lacerate human skin, and does not contain any safety defects. Section 107.155 requires that means of compliance with § 107.120(a) or § 107.130(a) be established and FAA-accepted. Section 107.160 requires an applicant to declare that sUA for Category 2 or Category 3 operations meet an FAA-accepted means of compliance.

Means of Compliance Accepted

This notice of availability serves as a formal acceptance by the FAA of VT MAAP's "Operation of Small Unmanned Aircraft Systems Over People," version 2.1, as an acceptable means of compliance, but not the only means of compliance with §§ 107.120(a) and 107.130(a). Applicants may also propose alternative means of compliance for FAA review and possible acceptance.

Revisions

Revisions to VT MAAP's "Operation of Small Unmanned Aircraft Systems Over People," version 2.1, will not be automatically accepted and will require further FAA acceptance for any revisions to be considered an accepted means of compliance.

Issued in Kansas City, Missouri, on December 20, 2024.

Patrick R. Mullen,

Manager, Technical Policy Branch, Policy and Standards Division, Aircraft Certification Service.

RIN 0605–AA69

Civil Monetary Penalty Adjustments for Inflation

AGENCY: Office of the Chief Financial Officer and Assistant Secretary for Administration, Department of Commerce.

ACTION: Final rule.

SUMMARY: This final rule is being issued to adjust for inflation each civil monetary penalty (CMP) provided by law within the jurisdiction of the United States Department of Commerce (Department of Commerce). The Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Debt Collection Improvement Act of 1996 and the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, required the head of each agency to adjust for inflation its CMP levels in effect as of November 2, 2015, under a revised methodology that was effective for 2016 which provided for initial

catch up adjustments for inflation in 2016, and requires adjustments for inflation to CMPs under a revised methodology for each year thereafter. The Department of Commerce's 2025 adjustments for inflation to CMPs apply only to CMPs with a dollar amount, and will not apply to CMPs written as functions of violations. The Department of Commerce's 2025 adjustments for inflation to CMPs apply only to those CMPs, including those whose associated violation predated such adjustment, which are assessed by the Department of Commerce after the effective date of the new CMP level.

DATES: This rule is effective January 15, 2025.

FOR FURTHER INFORMATION CONTACT:

Stephen M. Kunze, Deputy Chief Financial Officer and Director for Financial Management, Office of Financial Management, at (202) 482-1207, Department of Commerce, 1401 Constitution Avenue NW, Room D200, Washington, DC 20230. The Department of Commerce's Civil Monetary Penalty Adjustments for Inflation are available for downloading from the Department of Commerce, Office of Financial Management's website at the following address: <https://www.commerce.gov/ofm/publications>.

SUPPLEMENTARY INFORMATION:

Background

The Federal Civil Penalties Inflation Adjustment Act of 1990 (Pub. L. 101-410; 28 U.S.C. 2461), as amended by the Debt Collection Improvement Act of 1996 (Pub. L. 104-134), provided for agencies' adjustments for inflation to CMPs to ensure that CMPs continue to maintain their deterrent value and that CMPs due to the Federal Government were properly accounted for and collected.

A CMP is defined as any penalty, fine, or other sanction that:

1. Is for a specific monetary amount as provided by Federal law, or has a maximum amount provided for by Federal law; and,
2. Is assessed or enforced by an agency pursuant to Federal law; and,
3. Is assessed or enforced pursuant to an administrative proceeding or a civil action in the Federal courts.

On November 2, 2015, the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Section 701 of Pub. L. 114-74) further amended the Federal Civil Penalties Inflation Adjustment Act of 1990 to improve the effectiveness of CMPs and to maintain their deterrent effect. This amendment

(1) required agencies to adjust the CMP levels in effect as of November 2, 2015, with initial catch up adjustments for inflation through a final rulemaking to take effect no later than August 1, 2016; and (2) requires agencies to make subsequent annual adjustments for inflation to CMPs that shall take effect not later than January 15. The Department of Commerce's previous 2024 adjustments for inflation to CMPs were published in the **Federal Register** on December 27, 2023, and the new CMP levels became effective January 15, 2024.

The Department of Commerce's 2025 adjustments for inflation to CMPs apply only to CMPs with a dollar amount, and will not apply to CMPs written as functions of violations. These 2025 adjustments for inflation apply only to those CMPs, including those whose associated violation predated such adjustment, which are assessed by the Department of Commerce after the effective date of the new CMP level.

This regulation adjusts for inflation CMPs that are provided by law within the jurisdiction of the Department of Commerce. The actual CMP assessed for a particular violation is dependent upon a variety of factors. For example, the National Oceanic and Atmospheric Administration's (NOAA) Policy for the Assessment of Civil Administrative Penalties and Permit Sanctions (Penalty Policy), a compilation of NOAA internal guidelines that are used when assessing CMPs for violations for most of the statutes NOAA enforces, will be interpreted in a manner consistent with this regulation to maintain the deterrent effect of the CMPs. The CMP ranges in the Penalty Policy are intended to aid enforcement attorneys in determining the appropriate CMP to assess for a particular violation. NOAA's Penalty Policy is maintained and made available to the public on NOAA's Office of the General Counsel, Enforcement Section website at: <https://www.noaa.gov/general-counsel/gc-enforcement-section>.

The Department of Commerce's 2025 adjustments for inflation to CMPs set forth in this regulation were determined pursuant to the methodology prescribed by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, which requires the maximum CMP, or the minimum and maximum CMP, as applicable, to be increased by the cost-of-living adjustment. The term "cost-of-living adjustment" is defined by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015. For the 2025 adjustments for inflation to CMPs, the cost-of-living

adjustment is the percentage for each CMP by which the Consumer Price Index for the month of October 2024 exceeds the Consumer Price Index for the month of October 2023.

Classification

Pursuant to 5 U.S.C. 553(b)(3)(B), there is good cause to issue this rule without prior public notice or opportunity for public comment because it would be unnecessary. The Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Section 701(b)) requires agencies to make annual adjustments for inflation to CMPs notwithstanding section 553 of title 5, United States Code.

Additionally, the methodology used for adjusting CMPs for inflation is given by statute, with no discretion provided to agencies regarding the substance of the adjustments for inflation to CMPs. The Department of Commerce is charged only with performing ministerial computations to determine the dollar amounts of adjustments for inflation to CMPs. Accordingly, prior public notice and an opportunity for public comment are not required for this rule. For the same reasons, there is good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effective date.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1995, Public Law 104-13, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR part 1320, do not apply to this rule because there are no new or revised recordkeeping or reporting requirements.

Regulatory Analysis

E.O. 12866, Regulatory Review

This rule is not a significant regulatory action as that term is defined in Executive Order 12866.

Regulatory Flexibility Act

Because notice of proposed rulemaking and opportunity for comment are not required pursuant to 5 U.S.C. 553, or any other law, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*) are inapplicable. Therefore, a regulatory flexibility analysis is not required and has not been prepared.

*Deputy Chief Financial Officer and Director
for Financial Management, Department of
Commerce.*

Authority and Issuance

■ For the reasons stated in the preamble, the Department of Commerce revises 15 CFR part 6 to read as follows:

PART 6—CIVIL MONETARY PENALTY ADJUSTMENTS FOR INFLATION

Sec.

6.1 Definitions.

6.2 Purpose and scope.

6.3 Adjustments for inflation to civil monetary penalties.

6.4 Effective date of adjustments for inflation to civil monetary penalties.

6.5 Subsequent annual adjustments for inflation to civil monetary penalties.

Authority: Pub. L. 101–410, 104 Stat. 890 (28 U.S.C. 2461 note); Pub. L. 104–134, 110 Stat. 1321 (31 U.S.C. 3701 note); Sec. 701 of Pub. L. 114–74, 129 Stat. 599 (28 U.S.C. 1 note; 28 U.S.C. 2461 note).

§ 6.1 Definitions.

(a) The *Department of Commerce* means the United States Department of Commerce.

(b) *Civil Monetary Penalty* means any penalty, fine, or other sanction that:

(1) Is for a specific monetary amount as provided by Federal law, or has a maximum amount provided for by Federal law; and

(2) Is assessed or enforced by an agency pursuant to Federal law; and

(3) Is assessed or enforced pursuant to an administrative proceeding or a civil action in the Federal courts.

§ 6.2 Purpose and scope.

The purpose of this part is to make adjustments for inflation to civil monetary penalties, as required by the Federal Civil Penalties Inflation Adjustment Act of 1990 (Pub. L. 101–410; 28 U.S.C. 2461), as amended by the Debt Collection Improvement Act of 1996 (Pub. L. 104–134) and the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Section 701 of Pub. L. 114–74), of each civil monetary penalty provided by law within the jurisdiction of the United States Department of Commerce (Department of Commerce).

§ 6.3 Adjustments for inflation to civil monetary penalties.

The civil monetary penalties provided by law within the jurisdiction of the Department of Commerce, as set forth in paragraphs (a) through (f) of this section, are hereby adjusted for inflation in accordance with the Federal Civil Penalties Inflation Adjustment Act of

1990, as amended, from the amounts of such civil monetary penalties that were in effect as of January 15, 2024, to the amounts of such civil monetary penalties, as thus adjusted. The year stated in parenthesis represents the year that the civil monetary penalty was last set by law or adjusted by law (excluding adjustments for inflation).

(a) *United States Department of Commerce.* (1) 31 U.S.C. 3802(a)(1), Program Fraud Civil Remedies Act of 1986 (1986), violation, maximum from \$13,946 to \$14,308.

(2) 31 U.S.C. 3802(a)(2), Program Fraud Civil Remedies Act of 1986 (1986), violation, maximum from \$13,946 to \$14,308.

(3) 31 U.S.C. 3729(a)(1)(G), False Claims Act (1986); violation, minimum from \$13,946 to \$14,308; maximum from \$27,894 to \$28,619.

(b) *Bureau of Economic Analysis.* 22 U.S.C. 3105(a), International Investment and Trade in Services Act (1990); failure to furnish information, minimum from \$5,761 to \$5,911; maximum from \$57,617 to \$59,114.

(c) *Bureau of Industry and Security.* (1) 15 U.S.C. 5408(b)(1), Fastener Quality Act (1990), violation, maximum from \$57,617 to \$59,114.

(2) 22 U.S.C. 6761(a)(1)(A), Chemical Weapons Convention Implementation Act (1998), violation, maximum from \$46,901 to \$48,119.

(3) 22 U.S.C. 6761(a)(1)(B), Chemical Weapons Convention Implementation Act (1998), violation, maximum from \$9,380 to \$9,624.

(4) 50 U.S.C. 1705(b), International Emergency Economic Powers Act (2007), violation, maximum from \$368,136 to \$377,700.

(5) 22 U.S.C. 8142(a), United States Additional Protocol Implementation Act (2006), violation, maximum from \$38,116 to \$39,106.

(6) 50 U.S.C. 4819, Export Controls Act of 2018 (2018), violation, maximum from \$364,992 to \$374,474.

(d) *Census Bureau.* (1) 13 U.S.C. 304, Collection of Foreign Trade Statistics (2002), each day's delinquency of a violation; total of not to exceed maximum per violation, from \$1,696 to \$1,740; maximum per violation, from \$16,971 to \$17,412.

(2) 13 U.S.C. 305(b), Collection of Foreign Trade Statistics (2002), violation, maximum from \$16,971 to \$17,412.

(e) *International Trade Administration.* (1) 19 U.S.C. 81s, Foreign Trade Zone (1934), violation, maximum from \$3,558 to \$3,650.

(2) 19 U.S.C. 1677f(f)(4), U.S.-Canada Free Trade Agreement Protective Order

(1988), violation, maximum from \$255,964 to \$262,614.

(f) *National Oceanic and Atmospheric Administration.* (1) 51 U.S.C. 60123(a), Land Remote Sensing Policy Act of 1992, as amended (2010), violation, maximum from \$14,067 to \$14,432.

(2) 51 U.S.C. 60148(c), Land Remote Sensing Policy Act of 1992, as amended (2010), violation, maximum from \$14,067 to \$14,432.

(3) 16 U.S.C. 773f(a), Northern Pacific Halibut Act of 1982 (2007), violation, maximum from \$294,510 to \$302,161.

(4) 16 U.S.C. 783, Sponge Act (1914), violation, maximum from \$2,103 to \$2,158.

(5) 16 U.S.C. 957(d), (e), and (f), Tuna Conventions Act of 1950 (1962):

(i) Violation of 16 U.S.C. 957(a), maximum from \$105,105 to \$107,836.

(ii) Subsequent violation of 16 U.S.C. 957(a), maximum from \$226,380 to \$232,261.

(iii) Violation of 16 U.S.C. 957(b), maximum from \$3,558 to \$3,650.

(iv) Subsequent violation of 16 U.S.C. 957(b), maximum from \$21,022 to \$21,568.

(v) Violation of 16 U.S.C. 957(c), maximum from \$452,761 to \$464,524.

(6) 16 U.S.C. 957(i), Tuna Conventions Act of 1950,¹ violation, maximum from \$230,464 to \$236,451.

(7) 16 U.S.C. 959, Tuna Conventions Act of 1950,² violation, maximum from \$230,464 to \$236,451.

(8) 16 U.S.C. 971f(a), Atlantic Tunas Convention Act of 1975,³ violation, maximum from \$230,464 to \$236,451.

(9) 16 U.S.C. 973f(a), South Pacific Tuna Act of 1988 (1988), violation, maximum from \$639,908 to \$656,533.

BILLING CODE 3510-DP-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

[Docket No. DEA–1457]

Schedules of Controlled Substances: Extension of Temporary Placement of Seven Specific Fentanyl-Related Substances in Schedule I of the Controlled Substances Act

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Temporary rule; temporary scheduling order; extension.

SUMMARY: The Administrator of the Drug Enforcement Administration is issuing this temporary scheduling order to extend the temporary schedule I status of seven specific fentanyl-related substances, as identified in this order, including their isomers, esters, ethers, salts, and salts of isomers, esters and ethers. These seven substances fall within the definition of fentanyl-related substances set forth in the February 6, 2018, temporary scheduling order. Through the Temporary Reauthorization and Study of Emergency Scheduling of Fentanyl Analogues Act, which became law on February 6, 2020, Congress extended the temporary control of fentanyl-related substances until May 6, 2021. This temporary order was subsequently extended multiple times, most recently on December 29, 2022, through the Consolidated Appropriations Act, 2023, which extended the order until December 31, 2024. This temporary order will extend

the temporary scheduling of seven specific fentanyl-related substances for one year, or until the permanent scheduling action for these substances is completed, whichever occurs first.

DATES: This temporary scheduling order, which extends schedule I control of seven specific substances covered by an order (83 FR 5188, February 6, 2018), is effective December 31, 2024, and expires on December 31, 2025. If DEA publishes a final rule making this scheduling action permanent, this order will expire on the effective date of that rule, if the effective date is earlier than December 31, 2025.

FOR FURTHER INFORMATION CONTACT:

Terrence L. Boos, Drug and Chemical Evaluation Section, Diversion Control Division, Drug Enforcement Administration; Mailing Address: 8701 Morrisette Drive, Springfield, Virginia 22152; Telephone: (571) 362-3249.

SUPPLEMENTARY INFORMATION: In this order, the Drug Enforcement Administration (DEA) extends the temporary scheduling of the following seven controlled substances in schedule I of the Controlled Substances Act (CSA), including their isomers, esters, ethers, salts, and salts of isomers, esters, and ethers whenever the existence of such isomers, esters, ethers, and salts is possible within the specific chemical designation:

- *para*-chlorofentanyl (*N*-(4-chlorophenyl)-*N*-(1-phenethylpiperidin-4-yl)propionamide),
- *ortho*-chlorofentanyl (*N*-(2-chlorophenyl)-*N*-(1-phenethylpiperidin-4-yl)propionamide),
- *meta*-fluorofuranyl fentanyl (*N*-(3-fluorophenyl)-*N*-(1-phenethylpiperidin-4-yl)furan-2-carboxamide),
- *ortho*-methylcyclopropyl fentanyl (*N*-(2-methylphenyl)-*N*-(1-phenethylpiperidin-4-yl)cyclopropanecarboxamide),
- *beta*-methylacetyl fentanyl (*N*-phenyl-*N*-(1-(2-phenylpropyl)piperidin-4-yl)acetamide),
- tetrahydrothiofuranyl fentanyl (*N*-(1-phenethylpiperidin-4-yl)-*N*-phenyltetrahydrothiophene-2-carboxamide),
- *para*-fluoro valeryl fentanyl (*N*-(4-fluorophenyl)-*N*-(1-phenethylpiperidin-4-yl)pentanamide).

Background and Legal Authority

On February 6, 2018, pursuant to 21 U.S.C. 811(h)(1), DEA published an order in the **Federal Register** temporarily placing fentanyl-related substances, as defined in that order, in schedule I of the CSA based upon a finding that these substances pose an

imminent hazard to the public safety.¹ As discussed below, the seven substances named in this rule meet the existing definition of fentanyl-related substances as they are not otherwise controlled in any other schedule (i.e., not included under another DEA Controlled Substance Code Number) and are structurally related to fentanyl by one or more of the five modifications listed under the definition.

Additionally, as required by 21 U.S.C. 811(h)(2), these specific seven substances have no exemption or approval in effect under section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355). That temporary order was effective upon the date of publication. Pursuant to 21 U.S.C. 811(h)(2), the temporary control of fentanyl-related substances, a class of substances as defined in the order, as well as the seven specific substances already covered by that order, was set to expire on February 6, 2020. However, on February 6, 2020, as explained in DEA's April 10, 2020 correcting amendment,² Congress extended that expiration date until May 6, 2021, by enacting the Temporary Reauthorization and Study of the Emergency Scheduling of Fentanyl Analogues Act.³ This temporary order was subsequently extended multiple times, most recently on December 29, 2022, through the Consolidated Appropriations Act, 2023,⁴ which extended the order until December 31, 2024. Consequently, the temporary control of these seven substances will remain in effect until December 31, 2024, unless DEA permanently places them in schedule I prior to that date.

As defined in the February 6, 2018 temporary scheduling order, fentanyl-related substances include any substance not otherwise controlled in any schedule (i.e., not included under any other Administration Controlled Substance Code Number) that is structurally related to fentanyl by one or more of the following modifications:

(A) Replacement of the phenyl portion of the phenethyl group by any monocycle, whether or not further substituted in or on the monocycle;

(B) substitution in or on the phenethyl group with alkyl, alkenyl, alkoxy, hydroxyl, halo, haloalkyl, amino or nitro groups;

(C) substitution in or on the piperidine ring with alkyl, alkenyl, alkoxy, ester, ether, hydroxyl, halo, haloalkyl, amino or nitro groups;

(D) replacement of the aniline ring with any aromatic monocycle whether or not further substituted in or on the aromatic monocycle; and/or

(E) replacement of the *N*-propionyl group by another acyl group.

Further, according to the temporary scheduling order, the existence of a substance with any one, or any combination, of the above-mentioned modifications would meet the structural requirements of the definition of fentanyl-related substance. The present seven substances were not otherwise controlled under any schedule at the time of the temporary order and are covered by the order due to having the following modifications:

1. *para*-chlorofentanyl: substitution on the aniline ring (meets definition for modification D);

2. *ortho*-chlorofentanyl: substitution on the aniline ring (meets definition for modification D);

3. *meta*-fluorofuranyl fentanyl: substitution on the aniline ring and replacement of the *N*-propionyl group with another acyl group (meets definition for modifications D and E);

4. *ortho*-methylcyclopropyl fentanyl: substitution on the aniline ring and replacement of the *N*-propionyl group with another acyl group (meets definition for modifications D and E);

5. *beta*-methylacetyl fentanyl: substitution on the phenethyl group with an alkyl group and replacement of the *N*-propionyl group with another acyl group (meets definition for modifications B and E);

6. tetrahydrothiofuranyl fentanyl: replacement of the *N*-propionyl group with another acyl group (meets definition for modification E);

7. *para*-fluoro valeryl fentanyl: substitution on the aniline ring and replacement of the *N*-propionyl group with another acyl group (meets definition for modifications D and E).

As noted above, these specific seven substances have no exemption or approval in effect under section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355). As explained above, the temporary control of these seven substances will remain in effect until December 31, 2024, unless DEA permanently places them in schedule I prior to that date. However, the CSA also provides that during the pendency of proceedings to permanently schedule a substance under 21 U.S.C. 811(a)(1), such temporary scheduling may be

⁴ Public Law 117-328, division O, title VI, sec. 601.

extended for up to one year.⁵ Proceedings under 21 U.S.C. 811(a) may be initiated by the Attorney General (delegated to the Administrator of DEA pursuant to 28 CFR 0.100) on his own motion, at the request of the Secretary of Health and Human Services,⁶ or on the petition of any interested party.⁷

The Administrator of DEA, on her own motion pursuant to 21 U.S.C. 811(a), has initiated proceedings under 21 U.S.C. 811(a)(1) to permanently schedule these seven fentanyl-related substances: *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl. DEA has gathered and reviewed the available information regarding the pharmacology, chemistry, trafficking, actual abuse, pattern of abuse, and the relative potential for abuse for these substances. On April 3, 2023, DEA submitted a request to HHS to provide DEA with a scientific and medical evaluation of available information and a scheduling recommendation for these seven fentanyl-related substances (*para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl) in accordance with 21 U.S.C. 811(b) and (c).

Upon evaluating the scientific and medical evidence, on October 25, 2024, HHS provided DEA with a scientific and medical evaluation and scheduling recommendation to place these seven fentanyl-related substances in schedule I of the CSA.

Upon receipt of the scientific and medical evaluation and scheduling recommendation from HHS, DEA reviewed the documents, and all other relevant data, and conducted its own eight-factor analysis of the abuse potential of these seven fentanyl-related substances in accordance with 21 U.S.C. 811(c). Based on this review, as discussed elsewhere in this issue of the

Federal Register, DEA is publishing a notice of proposed rulemaking for the placement of these seven fentanyl-related substances in schedule I of the CSA. If the proposed rule is finalized, DEA will publish a final rule in the **Federal Register**.

Pursuant to 21 U.S.C. 811(h)(2), the Administrator orders that the temporary scheduling of seven substances, covered by the February 6, 2018 temporary scheduling order, be extended for one year, or until the permanent scheduling proceeding is completed, whichever occurs first. These seven substances are: *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl, including their isomers, esters, ethers, salts and salts of isomers, esters, and ethers.

In accordance with this temporary scheduling order, the schedule I requirements for handling *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl, including their isomers, esters, ethers, salts and salts of isomers, esters, ethers, will remain in effect for one year, or until the permanent scheduling proceeding is completed, whichever occurs first.

Regulatory Matters

The CSA provides for an expedited temporary scheduling action where such action is necessary to avoid an imminent hazard to the public safety.⁸ This provision of the CSA allows the Attorney General, by order, to schedule a substance in schedule I on a temporary basis.⁹ It also provides that the temporary scheduling of a substance shall expire at the end of two years from the date of the issuance of the order scheduling such substance, except that the Attorney General may, during the pendency of proceedings to permanently schedule the substance, extend the temporary scheduling for up to one year.

To the extent that 21 U.S.C. 811(h) directs that temporary scheduling actions be issued by order and sets forth the procedures by which such orders are to be issued and extended, the notice and comment requirements of section 553 of the Administrative Procedure Act (APA), 5 U.S.C. 553, do not apply to this extension of the temporary scheduling

action.¹⁰ The APA expressly differentiates between orders and rules, as it defines an “order” to mean a “final disposition, whether affirmative, negative, injunctive, or declaratory in form, of an agency in a matter other than rule making.”¹¹ This contrasts with permanent scheduling actions, which are subject to formal rulemaking procedures done “on the record after opportunity for a hearing,” and final decisions that conclude the scheduling process and are subject to judicial review.¹² The specific language chosen by Congress indicates an intention for DEA to proceed through the issuance of an order instead of proceeding by rulemaking. Given that Congress specifically requires the Attorney General to follow rulemaking procedures for other kinds of scheduling actions,¹³ it is noteworthy that, in subsection 811(h), Congress authorized the issuance of temporary scheduling actions by order rather than by rule.

In the alternative, even if this action were subject to 5 U.S.C. 553, the Administrator finds that there is good cause to forgo the notice-and-comment requirements and the delayed effective date requirements of such section, as any further delays in the process for extending the temporary scheduling order would be impracticable and contrary to the public interest in view of the manifest urgency to avoid an imminent hazard to the public safety that these substances would present if scheduling expired, for the reasons expressed in the temporary scheduling order.¹⁴

Further, DEA believes that this order extending the temporary scheduling action is not a “rule” as defined by 5 U.S.C. 601(2), and, accordingly, is not subject to the requirements of the Regulatory Flexibility Act (RFA). The requirements for the preparation of an initial regulatory flexibility analysis in 5 U.S.C. 603(a) are not applicable where, as here, DEA is not required by section 553 of the APA or any other law to publish a general notice of proposed

⁵ Though DEA has used the term “final order” with respect to temporary scheduling orders in the past, this document adheres to the statutory language of 21 U.S.C. 811(h), which refers to a “temporary scheduling order.” No substantive change is intended.

⁶ Because the Secretary of the Department of Health and Human Services has delegated to the Assistant Secretary for Health of the Department of Health and Human Services the authority to make domestic drug scheduling recommendations, for purposes of this temporary order, all subsequent references to “Secretary” have been replaced with “Assistant Secretary.”

⁷ 21 U.S.C. 811(a).

⁸ 21 U.S.C. 811(h).

⁹ *Id.*

¹⁰ Even if this action were subject to section 553 of the APA, the Administrator finds that there is good cause to forgo the notice and comment requirements of section 553, as any further delays in the process for extending the temporary scheduling order would be impracticable and contrary to the public interest in view of the manifest urgency to avoid an imminent hazard to the public safety.

¹¹ 5 U.S.C. 551(6) (emphasis added).

¹² 21 U.S.C. 811(a) and 877.

¹³ See 21 U.S.C. 811(a).

¹⁴ See *Schedules of Controlled Substances: Temporary Placement of Butonitazene, Etodesnitazene, Flunitazene, Metodesnitazene, Metonitazene, N-Pyrrolidino etonitazene, and Protonitazene in Schedule I*, 87 FR 21556 (Apr. 12, 2022).

rulemaking. Therefore, in this instance, since DEA believes this temporary scheduling action is not a “rule,” it is not subject to the requirements of the RFA when issuing this temporary action.

Additionally, in accordance with the principles of Executive Orders (E.O.) 12866, 13563, and 14094, this action is not a significant regulatory action. E.O. 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distributive impacts; and equity). E.O. 13563 is supplemental to and reaffirms the principles, structures, and definitions governing regulatory review as established in E.O. 12866. E.O. 12866, sec. 3(f), as amended by E.O. 14094, sec. 1(b), provides the definition of a “significant regulatory action,” requiring review by the Office of Management and Budget. Because this is not a rulemaking action, this is not a significant regulatory action as defined in section 3(f) of E.O. 12866.

This action will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132 (Federalism), it is determined that this action does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

As noted above, this action is an order, not a rule. Accordingly, the Congressional Review Act (CRA) is inapplicable, as it applies only to rules. However, if this were a rule, pursuant to the CRA, “any rule for which an agency for good cause finds that notice and public procedure thereon are

impracticable, unnecessary, or contrary to the public interest, shall take effect at such time as the federal agency promulgating the rule determines.”¹⁵

It is in the public interest to maintain the temporary placement of these seven substances in schedule I because they pose a public health risk. These substances are: *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl. The temporary scheduling action was taken pursuant to 21 U.S.C. 811(h), which is specifically designed to enable DEA to act in an expeditious manner to avoid an imminent hazard to the public safety. Under 21 U.S.C. 811(h), temporary scheduling orders are not subject to notice and comment rulemaking procedures. The CSA frames temporary scheduling actions as orders rather than rules to ensure that the process moves swiftly, and this extension of the temporary scheduling order for these seven substances continues to serve that purpose. For the same reasons that underlie 21 U.S.C. 811(h), that is, the need to keep these seven substances in schedule I because they pose an imminent hazard to public safety, it would be contrary to the public interest to delay implementation of this extension of the temporary scheduling order. Therefore, in accordance with section 808(2) of the CRA, this order extending the temporary scheduling order for seven specific substances, currently covered under the definition of fentanyl-related substances in the temporary order, shall take effect immediately upon its publication.

DEA has submitted a copy of this temporary order to both Houses of Congress and to the Comptroller General, although such filing is not required under the Small Business

Regulatory Enforcement Fairness Act of 1996 (Congressional Review Act), 5 U.S.C. 801–808, because, as noted above, this action is an order, not a rule.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 19, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the Federal Register.

Heather Achbach,

Federal Register Liaison Officer, Drug Enforcement Administration.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Reporting and recordkeeping requirements.

For the reasons set out above, DEA amends 21 CFR part 1308 as follows:

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

BILLING CODE 4410–09–P

DEPARTMENT OF THE TREASURY**Internal Revenue Service****26 CFR Part 1****[TD 10020]****RIN 1545–BI22****Reissuance of State or Local Bonds****AGENCY:** Internal Revenue Service (IRS), Treasury.**ACTION:** Final regulations.

SUMMARY: This document contains final regulations that address when tax-exempt bonds are treated as retired for certain Federal income tax purposes. The final regulations are necessary to unify and to clarify existing guidance on this subject. The final regulations affect State and local governments that issue tax-exempt bonds.

DATES:

Effective date: These regulations are effective on December 30, 2024.

Applicability date: For dates of applicability, see § 1.150–3(f).

FOR FURTHER INFORMATION CONTACT:

Zoran Stojanovic, (202) 317–6980 (not a toll-free number).

SUPPLEMENTARY INFORMATION:**Authority**

This document contains final regulations that amend the Income Tax Regulations (26 CFR part 1) by adding final regulations under section 150 and amending the regulations under section 1001 of the Internal Revenue Code (Code) to provide rules for determining when tax-exempt bonds are treated as retired for purposes of sections 103 and 141 through 150 of the Code (final regulations).

These final regulations are promulgated under the express delegation of authority in section 7805(a) of the Code, which authorizes the Secretary of the Treasury or her delegate to “prescribe all needful rules and regulations for the enforcement of [the Code], including all rules and regulations as may be necessary by reason of any alteration of law in relation to internal revenue.”

Background

On December 31, 2018, a notice of proposed rulemaking (REG–141739–08) regarding retirement of tax-exempt bonds was published in the **Federal Register** (83 FR 67701) (proposed regulations). No public hearing was

requested or held. Five public comments responding to the proposed regulations were received and are available at <https://www.regulations.gov> or upon request. After careful consideration of all the written comments, the proposed regulations are adopted as amended by this Treasury decision in response to such comments as described in the *Summary of Comments and Explanation of Revisions*.

1. Overview

In general, under section 103, interest received by the holders of certain bonds issued by State and local governments is exempt from Federal income tax. To qualify for the tax exemption, a bond issued by a State or local government must satisfy various eligibility requirements under sections 141 through 150 at the time of issuance of the bond. If the issuer and holder agree after issuance to modify the terms of a tax-exempt bond significantly, the original bond may be treated as having been retired and exchanged for a newly issued, modified bond. Similarly, if the issuer or its agent acquires and resells the bond, the bond may be treated as having been extinguished upon acquisition and replaced upon resale with a newly issued bond.

The term “reissuance” commonly refers to the effect of a transaction in which a new bond is deemed to be issued in place of an old bond as a result of retirement of the old bond pursuant to such an exchange or extinguishment. In the case of a reissuance, the reissued bond must be retested for qualification under sections 103 and 141 through 150. The reissuance of an issue of tax-exempt bonds may result in various negative consequences to the issuer, such as changes in yield for purposes of the arbitrage investment yield restrictions under section 148(a), acceleration of arbitrage rebate payment obligations under section 148(f), and change-in-law risk.

2. Tender Option Bonds

Tender option bonds and variable rate demand bonds (collectively, tender option bonds) have special features that present reissuance questions. Specifically, tender option bonds have original terms that provide for a tender option interest rate mode, as described in this paragraph. Issuers of tax-exempt bonds often preauthorize several different interest rate modes in the bond documents and retain an option to switch interest rate modes under parameters set forth in the bond documents. During a tender option

mode, tender option bonds have short-term interest rates that are reset periodically at various short-term intervals (typically, every seven days) based on the current market rate necessary to remarket the bonds at par. In connection with each resetting of the interest rate, the holder of a tender option bond has a right or requirement to tender the bond back to the issuer or its agent for purchase at par. Tender option bonds generally are structured with these short-term features supported by put options to enable the bonds to be eligible for purchase by tax-exempt money market funds pursuant to 17 CFR 270.2a–7 (Rule 2a–7 under the Investment Company Act of 1940).

Tender option bonds also may have interest rate mode conversion options that permit the issuer or conduit borrower to change the interest rate mode on the bonds from a tender option mode to another short-term interest rate mode or to a fixed interest rate to maturity. At the time of a conversion to another interest rate mode, the holder of a tender option bond typically has the right or requirement to tender the bond for purchase at par.

Tender option bonds generally have third-party liquidity facilities from banks or other liquidity providers to ensure that there is sufficient cash to repurchase the bonds upon a holder's tender, and they also commonly have credit enhancement from bond insurers or other third-party guarantors. Upon a holder's exercise of its tender rights in connection with either a resetting of the interest rate during a tender option mode or a conversion to another interest rate mode, a remarketing agent or a liquidity provider typically will acquire the bonds subject to the tender and resell the bonds either to the same bondholders or to others willing to purchase such bonds.

3. Existing Guidance

To address reissuance questions related to tax-exempt bonds, on December 27, 1988, the Department of the Treasury (Treasury Department) and the IRS published Notice 88–130, 1988–2 CB 543, which provides rules for determining when a tax-exempt bond is retired for purposes of sections 103 and 141 through 150. Notice 88–130 provides in part that a tax-exempt bond is retired when there is a change to the terms of the bond that results in a disposition of the bond for purposes of section 1001. In addition, Notice 88–130 provides special rules for retirement of certain tender option bonds that meet a definition of the term “qualified tender bond.”

On June 26, 1996, the Treasury Department and the IRS published final regulations under § 1.1001–3 of the Income Tax Regulations (1996 final regulations) in the **Federal Register** (61 FR 32926). The 1996 final regulations provide rules for determining whether a modification of the terms of a debt instrument, including a tax-exempt bond, results in an exchange for purposes of section 1001. In recognition of a need to coordinate the interaction of the prior guidance in Notice 88–130 with the 1996 final regulations for particular tax-exempt bond purposes, the Treasury Department and the IRS stated their intention to issue regulations under section 150 on this subject in the preamble of the 1996 final regulations. See 61 FR 32930.

On April 14, 2008, the Treasury Department and the IRS published Notice 2008–41, 2008–1 CB 742. Like Notice 88–130, Notice 2008–41 provides rules for determining when a tax-exempt bond is retired for purposes of sections 103 and 141 through 150 and includes special rules for qualified tender bonds. While the retirement standards provided in these two notices are similar, Notice 2008–41 was intended to coordinate the retirement standards for tax-exempt bond purposes with the 1996 final regulations on modifications of debt instruments under § 1.1001–3 and to be more administrable than Notice 88–130. In order to preserve flexibility and to limit potential unintended consequences during the 2008 financial crisis, Notice 2008–41 permitted issuers to apply either notice. Generally, under Notice 2008–41, a tax-exempt bond is retired when a significant modification to the terms of the bond occurs under § 1.1001–3, the bond is acquired by or on behalf of its issuer, or the bond is otherwise redeemed or retired. The notice clarifies that, for purposes of these retirement standards, the purchase of a tax-exempt bond by a third-party guarantor or third-party liquidity facility provider pursuant to the terms of the guarantee or liquidity facility is not treated as a purchase or other acquisition by or on behalf of a governmental issuer. Although these general rules apply to a qualified tender bond, Notice 2008–41 also provides that certain features of qualified tender bonds will not result in a retirement. In Notice 2008–41, the Treasury Department and the IRS reiterated their intention to provide guidance on the retirement of tax-exempt bonds in regulations under section 150.

The proposed regulations provide rules for determining when tax-exempt bonds are treated as retired for purposes

of sections 103 and 141 through 150. The proposed regulations also amend § 1.1001–3(a)(2) of the 1996 final regulations to conform that section to the special rules in the proposed regulations for retirement of qualified tender bonds.

Summary of Comments and Explanation of Revisions

After consideration of the public comments, the Treasury Department and the IRS adopt the proposed regulations as amended by this Treasury decision. This section of the preamble discusses the public comments and the revisions made in the final regulations in response to those comments.

1. General Rules for Retirement of a Tax-Exempt Bond

The proposed regulations generally provide standards for determining when a tax-exempt bond is retired for purposes of sections 103 and 141 through 150, including certain special rules for determining when qualified tender bonds are retired.

One comment suggested expanding the scope of the final regulations to cover taxable tax-advantaged bonds, such as direct pay build America bonds and tax credit bonds, because some of those bonds were also issued as tender option bonds that would benefit from the special rules for qualified tender bonds. The authorizations for these taxable tax-advantaged bonds, however, have been very limited in both time and amount, and very few of these bonds have been issued as tender option bonds. Furthermore, section 13404 of Public Law 115–97, 131 Stat. 2054, 2138 (December 22, 2017), commonly referred to as the Tax Cuts and Jobs Act, repealed the existing authority in the Code for taxable tax-advantaged bonds. Because no taxable tax-advantaged bonds currently may be issued and very few historically have been issued as tender option bonds, the Treasury Department and the IRS have determined that expanding the scope of the final regulations to include those bonds lacks sufficient justification. Accordingly, the final regulations do not adopt this comment.

The proposed regulations generally provide that a tax-exempt bond is retired if a significant modification to the terms of the bond occurs under § 1.1001–3, the issuer or an agent acting on its behalf acquires the bond in a manner that liquidates or extinguishes the bondholder's investment in the bond, or the bond is otherwise redeemed (for example, redeemed at maturity).

The final regulations make one technical change to the second general rule regarding debt extinguishment to remove the reference to the “bondholder's investment” and thus to focus more clearly on the merger of interests and attendant extinguishment that occurs when an issuer acquires its own bond either directly or through an agent.

Two comments recommended allowing an issuer to make an election to treat a tax-exempt bond as retired and reissued under the final regulations. These comments noted that it is sometimes unclear whether a transaction results in the retirement and reissuance of a tax-exempt bond. The comments described several specific situations in which such an election could address this uncertainty. The Treasury Department and the IRS recognize that such an election could reasonably reduce the burden on issuers in certain specific situations. However, the Treasury Department and the IRS have concerns that an unrestricted right to elect retirement and reissuance of tax-exempt bonds could result in unintended consequences. In response to this comment and to provide flexibility to address this issue in appropriate, tailored circumstances, the final regulations authorize the Commissioner to publish guidance in the Internal Revenue Bulletin that allows issuers to elect to treat tax-exempt bonds as retired and reissued in specific circumstances for purposes of sections 103 and 141 through 150.

2. Exceptions to Retirement of a Tax-Exempt Bond

The proposed regulations provide three exceptions to the operation of the general rules that limit retirements of tax-exempt bonds. Two of these exceptions prevent the special features of tender option bonds from resulting in a retirement. A third exception applies to all tax-exempt bonds.

A. Definition of Qualified Tender Bond

The first two exceptions in the proposed regulations apply to qualified tender bonds, which are defined to cover tender option bonds that meet certain requirements. Specifically, a qualified tender bond is subject to certain limitations on interest rate, timing of interest payments, and maturity. A qualified tender bond must also include a qualified tender right. The proposed regulations generally define a qualified tender right as a right or obligation of the holder of a bond to tender the bond for purchase by the issuer, its agent, or another party at a purchase price equal to par plus any

accrued interest. Under the proposed regulations, a qualified tender right must also require the issuer or its remarketing agent to redeem the bond or to use reasonable best efforts to resell the bond within the 90 days of the tender at a purchase price equal to par plus any accrued interest.

Four comments urged the Treasury Department and the IRS to amend the definition of a qualified tender right in the final regulations to allow a bond to be resold at a premium or discount price relative to the par amount of the bond (rather than just at a price equal to par as under the proposed regulations) when the qualified tender right is exercised in connection with a conversion of the interest rate mode to a fixed rate for the remaining term of the bond. The comments noted that, when a long-term fixed rate bond is originally issued at par, a sustained upward trend in interest rates can result in the bond having market discount as it is resold in the secondary market. If that market discount exceeds the permitted de minimis amount, the discount will be taxed as ordinary income to the holder. Premium included in the sale price of a long-term fixed rate tax-exempt bond serves as a buffer against market discount as interest rates rise over time. Accordingly, qualified tender bonds resold at a premium upon conversion of the interest rate mode on the bonds to a fixed rate to maturity generally have greater market demand and a lower yield than they would have if resold at par. The comments also noted that, even when an issue of fixed rate tax-exempt bonds is resold at an aggregate net premium price, certain bonds within the issue may be resold at a discount. The comments further noted that Notice 2008–41 permitted qualified tender bonds to be resold at a premium or a discount upon conversion of the interest rate mode to a fixed rate to maturity and treated the premium received by the issuer upon resale of the bonds as additional sale proceeds for purposes of the arbitrage investment restrictions under section 148. The final regulations adopt this comment.

One comment pointed out a technical discrepancy in the proposed regulations under which a bond may be purchased pursuant to a qualified tender right by the issuer, the issuer's agent, or another party, whereas the bond must be resold under the terms of a qualified tender right by the issuer or a remarketing agent. The comment recommended that the final regulations clarify this technical issue in the definition of a qualified tender right so that the parties that may purchase the tendered bond (that is, the issuer, the issuer's agent, or

another party) are also permitted to resell the bond. The comment advised against use of the term “remarketing agent” on the grounds that the party charged with reselling the bond may not be an agent of the issuer and the resale may be a private placement rather than a remarketing. The final regulations adopt this comment.

B. Exceptions to Retirement of a Qualified Tender Bond

A qualified tender bond has two features that could result in retirement of the bond under the general rules for retirement in the proposed regulations. First, the existence or exercise of a qualified tender right in connection with an alteration under the terms of the bond could cause the alteration to be a modification under § 1.1001–3 and, if significant, that modification would result in retirement of the qualified tender bond under § 1.150–3(b)(1) of the proposed regulations. For example, when accompanied by a tender right, an exercise of the issuer's option to change the interest rate or the interest rate mode under the terms of the bond could be a modification under the rule in § 1.1001–3(c)(2)(iii) for alterations that result from the exercise of an option because the holder's resulting right to put the bond to the issuer or its agent under the qualified tender right upon the interest rate conversion could cause the issuer's option to fail to qualify as a unilateral option under § 1.1001–3(c)(3)(i). Similarly, an issuer may be uncertain as to whether the periodic change in interest rate that occurs pursuant to the terms of a bond operating in a tender option mode could be a modification under § 1.1001–3 when accompanied by a tender right. To address these circumstances, the proposed regulations provide a special exception that avoids retirement by disregarding a qualified tender right for purposes of applying § 1.1001–3 to determine whether an alteration of a qualified tender bond constitutes a significant modification under § 1.1001–3 that results in retirement of the bond.

One comment requested that the final regulations clarify whether this exception applies to a qualified tender right arising in connection with any alteration of the terms of the bond or only to a qualified tender right arising in connection with a change in interest rate or interest rate mode. The scope of the analogous provisions in Notices 88–130 and 2008–41 was limited to circumstances covering changes in the interest rate or interest rate mode only. The Treasury Department and the IRS intended for this special rule to be similarly limited in scope. In response

to the comment, the final regulations clarify that the special rule for disregarding a qualified tender right in applying § 1.1001–3 to a qualified tender bond applies only for the purpose of determining whether an alteration of the interest rate or interest rate mode pursuant to the terms of a qualified tender bond results in a retirement. The determination of whether any other alteration to the terms of a qualified tender bond, such as a change in maturity or collateral, results in a retirement under § 1.150–3(b)(1)(i) is made under the general rules in § 1.1001–3 without the benefit of the special exception in § 1.150–3(c)(1), even if the alteration occurs contemporaneously with a change in interest rate or interest rate mode on the bond.

One comment recommended that the final regulations include several additional exceptions to the general rule under § 1.150–3(b)(1) that a bond is retired for purposes of sections 103 and 141 through 150 when a significant modification occurs under § 1.1001–3. Specifically, this comment requested that the final regulations include a rule from Notice 2008–41 that a modification that changes the collateral or credit enhancement on a nonrecourse tax-exempt bond is significant only if the change results in a change in payment expectations under § 1.1001–3(e)(4)(vi). This special rule involved an accommodation for circumstances in the 2008 financial crisis. This comment also requested that the final regulations retain the exception in Notice 88–130 for qualified corrective changes. This exception from 1988 preceded the significant modification standard under § 1.1001–3, which was finalized in the 1996 final regulations. In most circumstances, these qualified corrective changes would not be significant modifications under § 1.1001–3. Further, a significant purpose of the final regulations is to improve administrability in a complex area of law by integrating the rules for retirement of a tax-exempt bond as closely as possible with the existing rules under § 1.1001–3. Accordingly, the final regulations do not adopt these comments.

The second feature of a qualified tender bond that could result in retirement of the bond under the general rules for retirement in the proposed regulations is the feature under which an issuer or its agent may acquire the bond upon the holder's exercise of the qualified tender right. The general rules for retirement treat an acquisition of a bond by an issuer or an issuer's agent in a manner that extinguishes the bond as

a retirement of the bond. To address this circumstance, the proposed regulations provide an exception under which the acquisition of a qualified tender bond pursuant to the exercise of a qualified tender right will not result in retirement, provided that neither the issuer nor its agent holds the bond for longer than 90 days. One comment recommended expanding this special rule to cover all tax-exempt bonds rather than just qualified tender bonds. This exception is limited to qualified tender bonds because the rate-setting mechanism on those bonds may require the issuer or its agent to purchase a tendered bond if a buyer for the bond cannot be found when the bond is tendered. The Treasury Department and the IRS have adopted this limited exception for the narrowly defined class of qualified tender bonds because the acquisition of those bonds occurs pursuant to the ordinary operation of the rate-setting mechanism on those bonds. In addition, qualified tender bonds represent a significant structured type of bonds in the tax-exempt bond market tailored to money market fund investors and the Treasury Department and the IRS have supported this structure with accommodating special rules consistently in all of the existing guidance in this area. Other tax-exempt bonds do not rely on this exception for the ordinary operation of their rate-setting mechanism. The Treasury Department and the IRS decline to expand this exception to allow issuers to hold their own bonds more generally because of concerns regarding the implications for the debt extinguishment principle. Accordingly, the final regulations do not adopt this comment.

One comment recommended continuing a special rule from Notice 2008–41 that modified the definition of program investment for purposes of arbitrage investment restrictions under § 1.148–1(b). Ordinarily, this definition prohibits a conduit borrower of tax-exempt bond proceeds from purchasing the bonds that financed the conduit loan in an amount that is related to the conduit loan. Notice 2008–41 modified this rule so that a conduit borrower could purchase any auction rate bonds that financed the conduit loan, provided the conduit borrower purchased the bonds to facilitate liquidity under adverse market conditions. This special rule permitted conduit borrowers to buy those bonds to address extraordinary circumstances in the 2008 financial crisis and to increase liquidity at a time of market crisis involving the collapse of the auction rate bond market and

downgrades of bond insurers. The Treasury Department and the IRS decline to extend this special rule beyond the conditions under which the rule was promulgated. Accordingly, the final regulations do not adopt this comment.

C. Additional Exceptions for All Tax-Exempt Bonds

The proposed regulations also provide an exception to the general rules of retirement for all tax-exempt bonds. This exception, carried forward from Notice 2008–41, provides that acquisition of a tax-exempt bond by a guarantor or liquidity facility provider acting as the issuer's agent does not result in retirement of the bond if the acquisition is pursuant to the terms of the guarantee or liquidity facility and the guarantor or liquidity facility provider is not a related party (as defined in § 1.150–1(b)) to the issuer. No public comments were received on this provision. The final regulations adopt this provision without change.

The proposed regulations provide that a tax-exempt bond is retired for purposes of sections 103 and 141 through 150 when a significant modification occurs under § 1.1001–3. Section 1.1001–3(e)(5)(i) generally provides that, subject to the special rule in § 1.1001–3(f)(7), a modification of a debt instrument that results in an instrument or property right that is not debt for Federal income tax purposes is a significant modification. Section 1.1001–3(f)(7)(ii)(A) generally provides that, in determining whether a modification of a debt instrument results in an instrument or property right that is not debt, any deterioration in the financial condition of the obligor between the issue date of the debt instrument and the date of the modification is not taken into account. One comment recommended that, when new bonds are issued and the proceeds are used to currently refund outstanding bonds, issuers be allowed to apply the credit deterioration rule in § 1.1001–3(f)(7) to treat the new bonds as a continuation of the refunded bonds for purposes of sections 103 and 141 through 150. The Treasury Department and the IRS have concluded that there is not sufficient justification to expand the scope of the final regulations to include rules for new issuances of tax-exempt bonds. Accordingly, the final regulations do not adopt this comment.

3. Effect of Retirement of a Tax-Exempt Bond

The proposed regulations prescribe certain consequences for a bond that is retired pursuant to a deemed exchange

under § 1.1001–3 or retired following the acquisition of the bond by the issuer or the issuer's agent. Upon a deemed exchange under § 1.1001–3, the bond is treated as a new bond issued at the time of the significant modification as determined under § 1.1001–3. Upon an issuer's acquisition of its own bond, absent any special rule, the bond is extinguished and retired. One comment recommended permitting an issuer that purchases its own tax-exempt bond to treat the resale of that bond as a refunding of the bond extinguished by the purchase. The comment suggested that the issuer be permitted to allocate the proceeds from the resale of the bond to the expenditure incurred in the purchase of the bond under rules similar to the rules for using proceeds of tax-exempt bonds to “reimburse” previous expenditures under the reimbursement expenditure rules in § 1.150–2. Section 1.150–2(g)(1), however, specifically prohibits using bond proceeds to reimburse expenditures incurred in repayment of tax-exempt bonds. Modification of the reimbursement rules to encompass refundings of extinguished and retired bonds is beyond the scope of the final regulations. The final regulations do not adopt this comment.

4. Applicability Dates

Under the proposed regulations, the final rules would apply to events and actions taken with respect to bonds that occur on or after the date that is 90 days after the date of publication of the final regulations in the **Federal Register**. The proposed regulations further state that issuers may apply the proposed regulations to events and actions taken with respect to bonds that occur before that date. One comment recommended applying the final regulations only to bonds issued after the applicability date of the final regulations. This comment noted that outstanding bonds are structured to avoid retirement under the existing guidance and potentially might not avoid retirement under the final regulations. The Treasury Department and the IRS are concerned that this approach would continue the application of the disparate existing guidance in this area for a substantial period of time for the entire current outstanding volume of tax-exempt bonds in the municipal bond market. The principal goals of the final regulations are to unify, clarify, and improve the administrability of the existing guidance on retirement of tax-exempt bonds. The Treasury Department and the IRS have determined that publishing the final regulations without also obsoleting

Notice 88–130 and Notice 2008–41 would undermine the unifying and streamlining purposes of the final regulations. In addition, the final regulations and Notice 2008–41 are similar and generally should produce similar results in most cases outside of special circumstances involving the 2008 financial crisis. Accordingly, the final regulations do not adopt this comment.

However, to provide a longer transition period for outstanding tax-exempt bonds, the final regulations provide a period of one year from the date the final regulations are published in the **Federal Register** during which issuers may continue to apply Notice 88–130 or Notice 2008–41. As a result, the final regulations apply to events occurring and actions taken with respect to bonds on or after December 30, 2025, though an issuer may choose to apply the final regulations to events occurring and actions taken with respect to bonds on or after December 30, 2024.

Effect on Other Documents

Notice 88–130 and Notice 2008–41 are obsolete as of December 30, 2025.

Special Analyses

I. Regulatory Planning and Review

Pursuant to the Memorandum of Agreement, Review of Treasury Regulations under *Executive Order 12866 (June 9, 2023)*, tax regulatory actions issued by the IRS are not subject to the requirements of section 6 of *Executive Order 12866*, as amended. Therefore, a regulatory impact assessment is not required.

II. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (RFA), it is hereby certified that these final regulations will not have a significant economic impact on a substantial number of small entities. The final regulations affect State and local governments that issue tax-exempt bonds. States are not considered small entities for purposes of the RFA but small governmental jurisdictions (jurisdictions with populations less than 50,000) are considered small entities. The Treasury Department and the IRS do not have data on how many small governmental jurisdictions may be affected by these regulations, but it may be a substantial number.

Even if a substantial number of small entities are affected, the economic impact of these regulations will not be significant. These final regulations consolidate and clarify the existing guidance on retirement and reissuance of tax-exempt bonds published in

Notices 88–130 and 2008–41. Therefore, these final regulations will not create additional obligations for, or impose an economic impact on, a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required.

Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking preceding this regulation was submitted to the Chief Counsel for the Office of Advocacy of the Small Business Administration for comment on its impact on small governmental jurisdictions and no comments were received.

III. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a State, local, or Tribal government, in the aggregate, or by the private sector, of \$100 million in 1995 dollars, updated annually for inflation. These regulations do not include any Federal mandate that may result in expenditures by State, local, or Tribal governments, or by the private sector in excess of that threshold.

IV. Executive Order 13132: Federalism

Executive Order 13132 (Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State and local governments, and is not required by statute, or preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. The final regulations do not have federalism implications and do not impose substantial direct compliance costs on State and local governments or preempt State law within the meaning of the Executive order.

V. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as not a major rule, as defined by 5 U.S.C. 804(2).

Statement of Availability of IRS Documents

Any IRS Revenue Procedure, Revenue Ruling, Notice, or other guidance cited in this document is published in the Internal Revenue Bulletin (or Cumulative Bulletin) and are available from the Superintendent of Documents, U.S. Government Publishing Office,

Washington, DC 20402, or by visiting the IRS website at <https://www.irs.gov>.

Drafting Information

The principal author of these regulations is Zoran Stojanovic of the Office of Associate Chief Counsel (Financial Institutions and Products). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.150–3 is added to read as follows:

§ 1.150–3 Retirement standards for state and local bonds.

(a) *General purpose and scope.* This section provides rules to determine when a tax-exempt bond is retired solely for purposes of sections 103 and 141 through 150 of the Internal Revenue Code (Code).

(b) *Retirement of a tax-exempt bond—*(1) *General rules.* Except as otherwise provided in paragraph (c) of this section, a tax-exempt bond is retired when:

- (i) A significant modification of the bond occurs under § 1.1001–3;
- (ii) The issuer or its agent acquires the bond in a manner that extinguishes the bond; or
- (iii) The bond is otherwise redeemed (for example, redeemed at maturity).

(2) *Elective retirement.* In guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(a) of this chapter), the Commissioner may set forth specific circumstances under which an issuer may elect to treat a tax-exempt bond as retired for purposes of sections 103 and 141 through 150 of the Code.

(c) *Exceptions to general rules for retirement of a tax-exempt bond—*(1) *Qualified tender right disregarded for certain purposes.* In applying § 1.1001–3 to a qualified tender bond for purposes of paragraph (b)(1)(i) of this section, both the existence and exercise of a qualified tender right are disregarded for purposes of determining whether an alteration of the interest rate

or interest rate mode that occurs pursuant to the terms of the bond is a modification. Thus, an issuer's exercise of an option to alter the interest rate or interest rate mode on a qualified tender bond generally is not a modification under § 1.1001–3 because the alteration occurs by operation of the terms of the bond and the holder's resulting right to put the bond to the issuer or the issuer's agent pursuant to the disregarded qualified tender right does not prevent the issuer's option from qualifying as a unilateral option under § 1.1001–3(c)(3) that would not give rise to a modification.

(2) *Acquisition pursuant to a qualified tender right.* An acquisition of a qualified tender bond by the issuer or its agent does not result in the retirement of the bond under paragraph (b)(1)(ii) of this section if the acquisition is pursuant to the operation of a qualified tender right and neither the issuer nor its agent continues to hold the bond after the close of the 90-day period beginning on the date of the tender.

(3) *Acquisition of a tax-exempt bond by a guarantor or liquidity facility provider.* An acquisition of a tax-exempt bond by a guarantor or liquidity facility provider acting on the issuer's behalf does not result in the retirement of the bond under paragraph (b)(1)(ii) of this section if the acquisition is pursuant to the terms of the guarantee or liquidity facility and the guarantor or liquidity facility provider is not a related party (as defined in § 1.150–1(b)) to the issuer.

(d) *Effect of retirement.* If a bond is retired pursuant to paragraph (b)(1)(i) of this section (that is, in a transaction treated as an exchange of the bond for a bond with modified terms), the bond is treated as a new bond issued at the time of the modification as determined under § 1.1001–3. If the issuer or its agent resells a bond retired pursuant to paragraph (b)(1)(ii) of this section, the bond is treated as a new bond issued on the date of resale. The rules of § 1.150–1(d) apply to determine if the new bond is part of a refunding issue.

(e) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Issuer* means the State or local governmental unit (as defined in § 1.103–1) that actually issues the tax-exempt bond and any related party (as defined in § 1.150–1(b)) to the actual issuer (as distinguished, for example, from a conduit borrower that is not a related party to the actual issuer).

(2) *Qualified tender bond* means a tax-exempt bond that, pursuant to the terms of the bond, has all of the following features:

(i) During each authorized interest rate mode, the bond bears interest at a

fixed interest rate, a qualified floating rate under § 1.1275–5(b), or an objective rate for a tax-exempt bond under § 1.1275–5(c)(5);

(ii) Interest on the bond is unconditionally payable (as defined in § 1.1273–1(c)(1)(ii)) at periodic intervals of no more than one year;

(iii) The bond has a stated maturity date that is not later than 40 years after the issue date of the bond; and

(iv) The bond includes a qualified tender right.

(3) *Qualified tender right* means a right or obligation of a holder of a tax-exempt bond pursuant to the terms of the bond to tender the bond for purchase as described in this paragraph (e)(3). The purchaser under the tender may be the issuer, its agent, or another party. The tender right is available on at least one date before the stated maturity date. For each such tender, the purchase price of the bond is equal to par (plus any accrued interest). Following each such tender, the issuer, its agent, or another party either redeems the bond or uses reasonable best efforts to resell the bond within the 90-day period beginning on the date of the tender. Upon any such resale, the resale price of the bond is equal to the par amount of the bond (plus any accrued interest), except that, if the tender right is exercised in connection with a conversion of the interest rate mode on the bond to a fixed rate for the remaining term of the bond, the bond may be resold at any price, including a premium price above the par amount of the bond or a discount price below the par amount of the bond (plus any accrued interest). Any premium received by the issuer pursuant to such a resale is treated solely for purposes of the arbitrage investment restrictions under section 148 of the Code as additional sale proceeds of the bonds.

(f) *Applicability date*—(1) *General applicability.* This section applies to events occurring and actions taken with respect to bonds on or after December 30, 2025.

(2) *Permissive applicability.* An issuer may choose to apply this section to events occurring and actions taken with respect to bonds on or after December 30, 2024.

■ **Par. 3.** Section 1.1001–3 is amended by revising paragraph (a)(2) to read as follows:

§ 1.10011.1001–3 Modifications of debt instruments.

(a) * * *

(2) *Tax-exempt bonds.* For special rules governing whether tax-exempt bonds are retired for purposes of

sections 103 and 141 through 150 of the Internal Revenue Code, *see* § 1.150–3.

* * * * *

Douglas W. O'Donnell,

Deputy Commissioner.

Approved: December 8, 2024.

Aviva R. Aron-Dine,

Deputy Assistant Secretary of the Treasury (Tax Policy).

BILLING CODE 4830–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2024–0205]

RIN 1625–AA11

Regulated Navigation Area; Port of Miami, Miami, FL

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a regulated navigation area for certain waters surrounding the Port of Miami. This action is necessary to enhance the protection of high-risk vessel and port operations while reducing navigational hazards to waterway users and mariners by controlling vessel speeds. This rule will establish a slow speed zone throughout Fisherman's Channel and the Main Ship Channel for vessels less than 50 meters in length.

DATES: This rule is effective January 29, 2025.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to <https://www.regulations.gov>, type USCG–2024–0205 in the search box and click “Search.” Next, in the Document Type column, select “Supporting & Related Material.”

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email Mr. David Lieberman, District 7 Dpw, U.S. Coast Guard; telephone (206) 827–3637, email David.L.Lieberman2@uscg.mil.

NOI Notice of Intent

NPRM Notice of proposed rulemaking
PAWSA Port and Waterways Safety
Assessment
RNA Regulated Navigation Area
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Captain of the Port (COTP) Miami has determined that the Port of Miami is at increased navigational risk as the port continues to expand and vessel traffic increases. On May 10–11, 2023, Coast Guard Navigation Center (NAVCEN) and Sector Miami conducted a Ports and Waterways Safety Assessment (PAWSA) with key stakeholders of the Port of Miami. The core finding of workshop participants was the presence of increased hazards to navigational safety in the Port of Miami created by high-speed vessel operations and the resulting large and damaging wakes they often introduce into the congested and geographically confined waterway. Over the last few years, a growing number of near misses prompted concern for the safety of life as both the volume of vessel traffic and speeds of vessels have increased. On June 25, 2023, around 3:30 a.m., a recreational vessel, traveling at a high rate of speed through the Main Ship Channel, collided with a crossing vehicle ferry, killing one person and seriously injuring another. The incident not only resulted in the tragic loss of life but also caused a significant disruption of 30,000 cruise ship passengers and cargo movements within the Port of Miami for over 12 hours. Additionally, on February 12, 2024, a recreational vessel collided with an inspected passenger vessel in a critical point of Fisherman's Channel. This incident resulted in 13 injuries with one person in critical condition. This regulated navigation area (RNA) will reduce the navigational risk associated with one of the world's largest ports, reduce the loss of life, and mitigate the chance of disruption to port operations.

On April 11, 2024, under docket USCG–2024–0205, the Coast Guard published a Notice of Intent (NOI) entitled Regulated Navigation Area; Port of Miami, Miami, FL in the **Federal Register** (89 FR 25553) seeking comments on a potential RNA around the Port of Miami. The Coast Guard received 47 comments that had a predominantly positive tone.

On August 28, 2024, under docket USCG–2024–0205, the Coast Guard published a Notice of Proposed Rulemaking (NPRM) entitled Regulated Navigation Area; Port of Miami, Miami, FL in the **Federal Register** (89 FR

68843). The NPRM provided official notice of the proposed RNA and invited comment on the proposed regulatory action. The comment period ended on September 28, 2024, with 32 comments received that reflected a predominantly positive tone.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under the authority in 46 U.S.C. 70034. The COTP Miami has determined the potential hazards associated with increased vessel traffic and wake created by vessels transiting at high speeds poses a concern for navigational safety surrounding the Port of Miami. In addition, the Port of Miami is expanding its cruise ship terminals and will soon be the largest cruise ship port in the world, moving tens of thousands of passengers every day. With this, the Port of Miami also experienced an increase in Liquefied Natural Gas (LNG) powered cruise ships and cargo vessels resulting in an increase of hazardous bunkering operations within the port. The existing security risk associated with the Port of Miami is already high and this expansion only increases that risk. Establishing the RNA will reduce the speed of vessels and aid law enforcement officials in monitoring vessel traffic, as vessels not complying with slow speed zones will quickly draw attention, giving law enforcement officials more time to assess the situation and take appropriate action to protect vessels within the port and port facilities. The purpose of this rule is to ensure safe navigation and promote the safety of life at sea.

IV. Discussion of Comments, Changes, and the Rule

There are no changes in the regulatory text of this rule from the proposed language in the NPRM. This rule establishes an RNA for certain waters surrounding the Port of Miami. This rule will establish a slow speed zone throughout Fisherman's Channel and the Main Ship Channel for vessels less than 50 meters in length. This action is necessary to provide for the safety of life by enhancing the protection of increased high-risk vessel traffic while reducing the navigational hazards to the mariners who operate throughout the port.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a “significant regulatory action,” under section 3(f) of Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, duration and time of day of the regulated area. The regulated navigation area will only affect vessels entering and passing within the Main Ship Channel, Fisherman's Channel, and Meloy Channel. Vessels may continue to operate within the regulated navigation area with the only restriction being the requirement to operate at slow speeds and not create an excessive wake. Moreover, upon activating the regulated navigation area, the Coast Guard will notify the local maritime community through various means including, Local Notice to Mariners and Broadcast Notice to Mariners issued on VHF–FM marine radio channel 16.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received no comments from the Small Business Administration on this rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of

power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or Tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a regulated navigation area requiring vessels 50 meters or less to transit the regulated area at a slow speed that creates minimum wake. It is categorically excluded from further review under paragraph L[60a] of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to

coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine Safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

- 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

- 2. Add § 165.792 before the center heading “Eighth Coast Guard District” to read as follows:

§ 165.792 Regulated Navigation Area; Port of Miami, Miami, Florida.

(a) *Location.* The following area is a Regulated Navigation Area (RNA): All waters of the Port of Miami, from Fisherman’s Channel Daybeacon 16 at 25°46.40’ N, 080°10.84’ W proceeding southeasterly through Fisherman’s Channel south of Dodge Island to Miami Main Channel Light 15 at 25°45.86’ N, 080°08.24’ W in Government Cut, thence northwesterly through the Main Ship Channel north of Dodge Island to Biscayne Bay Light 50 at 25°46.90’ N, 080°10.88’ W. Additionally, the Meloy Channel from Miami Main Channel Lighted Buoy 16 at 25°46.04’ N, 080°08.41’ W proceeding northwesterly to the MacArthur Causeway Bridge. The coordinates used in this paragraph are based on the World Geodetic System (WGS) 1984.

(b) *Definitions.* As used in this section, slow speed means the speed at which a vessel proceeds when it is fully off plane, completely settled in the water and not creating excessive wake. Due to the different speeds at which vessels of different sizes and configurations may travel while in compliance with this definition, no specific speed is assigned to slow speed. A vessel is not proceeding at slow speed if it is:

- (1) On plane;
 - (2) In the process of coming up on or coming off plane; or
 - (3) Creating an excessive wake.
- (c) *Regulations.* Vessels less than 50 meters entering and transiting through the regulated navigation area shall proceed at a slow speed. Nothing in this

section alleviates vessels or operators from complying with all state and local laws in the area including manatee slow speed zones. Nor should anything in this section be construed as conflicting with the requirement to operate at safe speed under the Inland Navigation Rules, (33 CFR chapter I, subchapter E).

(d) *Enforcement.* The Coast Guard may be assisted in the patrol and enforcement of the Regulated Navigation Area by other Federal, State, and local agencies.

(e) *Contact information.* If you observe violations of the regulations in this section, you may notify the COTP via the Coast Guard Sector Miami Command Center via VHF channel 16, by phone at 305–535–4472, or by email at SectorMiamiWaterways@uscg.mil.

Dated: December 20, 2024.

Douglas M. Schofield,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2024–1065]

Safety Zone; Annual Fireworks Displays and Other Events in the Eighth Coast Guard District Requiring Safety Zones

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce a safety zone for the Crescent City Countdown Club/New Year’s Celebration fireworks display, from 11:30 p.m. on December 31, 2024, through 12:30 a.m. on January 1, 2025, to provide for the safety of life on the navigable waterways during this event. Our regulation for annual fireworks displays and other events in the Eighth Coast Guard District identifies this safety zone for this event on the Mississippi River in New Orleans, LA. During the enforcement period, entry into this zone is prohibited unless authorized by the Captain of the Port or a designated representative.

DATES: The regulations in 33 CFR 165.801 will be enforced for the Crescent City Countdown Club/New Year’s Celebration safety zone listed in item 10 in table 5 to § 165.801 from 11:30 p.m. on December 31, 2024, through 12:30 a.m. on January 1, 2025.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of enforcement, call or email Lieutenant Commander Xiaobin Tuo, Sector New Orleans, U.S. Coast Guard; 504-365-2246, email Xiaobin.Tuo@uscg.mil.

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce a safety zone for the Crescent City Countdown Club/New Year's Celebration fireworks display from 11:30 p.m. on December 31, 2024, through 12:30 a.m. on January 1, 2025, to provide for the safety of life on the navigable waterways during this event. Our regulation for annual fireworks displays and other events in the Eighth Coast Guard District, 33 CFR 165.801 identifies this safety zone on the Lower Mississippi River MM 93.5-96.5, New Orleans, LA. During this enforcement period, as reflected in § 165.801(a) through (d), entry into this zone is prohibited unless authorized by the Captain of the Port or a designated representative.

In addition to this notification of enforcement in the **Federal Register**, the Coast Guard plans to provide notification of this enforcement period via Marine Safety Information Bulletin and Broadcast Notice to Mariners.

Dated: December 19, 2024.

G.A. Callaghan,

Captain, U.S. Coast Guard, Captain of the Port Sector New Orleans.

33 CFR Part 165

[Docket Number USCG-2017-0914]

RIN 1625-AA00

Safety Zone; Taylor Bayou Turning Basin, Port Arthur, TX

AGENCY: Coast Guard, Department of Homeland Security (DHS).

ACTION: Temporary interim rule and request for comments.

SUMMARY: The Coast Guard is extending the period of a temporary safety zone on the upper reaches of Taylor Bayou Turning Basin in Port Arthur, TX. This action is necessary to provide protection to the levee protection wall located at the north end of the turning basin until permanent repairs can be affected. This rule prohibits persons and vessels from entering the safety zone unless authorized by the Captain of the Port

Marine Safety Unit Port Arthur or a designated representative.

DATES: The effective period of § 165.T08-0914 is extended through September 30, 2027. The amendments in this rule are effective from December 30, 2024, through September 30, 2027. Comments are due on or before February 28, 2025.

ADDRESSES: For instructions on submitting comments, see section VI of the **SUPPLEMENTARY INFORMATION**. To view documents mentioned in this preamble as being available in the docket, go to <https://www.regulations.gov>, type USCG-2017-0914 in the search box and click "Search." Next, in the Document Type column, select "Supporting & Related Material."

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Lieutenant Sean Yanez, Marine Safety Unit Port Arthur, TX, U.S. Coast Guard; telephone 571-610-0193, email sean.p.yanez@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port, Marine Safety Unit Port Arthur
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
USACE U.S. Army Corps of Engineers
U.S.C. United States Code

II. Background Information and Regulatory History

On August 14, 2017, the Coast Guard established this temporary safety zone for the upper reaches of Taylor Bayou Basin in Port Arthur, TX. That emergency action was necessary to protect the damaged flood protection levee and bulkhead during stabilization efforts. On July 18, 2018, the Coast Guard published the temporary final rule establishing the safety zone until January 31, 2023 (83 FR 33842). In August 2022, the USACE informed the Coast Guard that permanent repairs to the flood protection wall would not be completed for another two years. The Coast Guard extended the effective period of the temporary safety zone through January 31, 2025 (87 FR 73256, November 29, 2022).

In October 2024, the USACE informed the Coast Guard that permanent repairs to the flood protection wall would not be completed until 2027. The Coast Guard must extend the effective period of the temporary safety zone through September 30, 2027. It would be impracticable to publish an NPRM

because the safety zone must be extended prior to January 31, 2025.

The Coast Guard is issuing this temporary interim rule under the authority in 5 U.S.C. 553(b)(B). This statutory provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are "impracticable, unnecessary, or contrary to the public interest." The Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it would be impracticable. It is impracticable because this safety zone must be extended by January 31, 2025, to provide for the safety of life on the navigable waters during levee protection repair work, and we lack sufficient time to provide a reasonable comment period and then consider those comments before issuing this rule.

Also, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this temporary interim rule would be impracticable because it is necessary to protect the damaged flood protection levee and bulkhead during stabilization efforts.

Although this regulation is published as an interim rule without prior notice, public comment is nevertheless desirable to ensure that the regulation is both workable and reasonable. Accordingly, persons wishing to comment may do so by submitting written comments to the office listed under **ADDRESSES** in this preamble. Commenters should include their names and addresses, identify the docket number for the regulation, and give reasons for their comments. If the Coast Guard determines that changes to the temporary interim rule are necessary, we will publish a temporary final rule or other appropriate document.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034. The Captain of the Port, MSU Port Arthur (COTP) has determined that potential damage to temporary repairs would make the surrounding community susceptible to flooding during storm surge or extreme tide events that may endanger persons and property in the surrounding community. The USACE has requested, and the Coast Guard concurs, that protection measures must be instituted until permanent repairs are completed.

IV. Discussion of the Rule

On August 14, 2017, the Coast Guard established a temporary safety zone for the upper reaches of Taylor Bayou Basin in Port Arthur, TX. That emergency action was necessary to protect the damaged flood protection levee and bulkhead during stabilization efforts. This safety zone was extended in November of 2022, this temporary rule further extends the effective date of these safety zones until September 30, 2027.

No vessel or person is permitted to enter or remain in the safety zone without obtaining permission from the COTP or a designated representative of the COTP. A designated representative is a commissioned, warrant, or petty officer of the U.S. Coast Guard (USCG) assigned to units under the operational control of the COTP. To seek permission to enter, contact the COTP or a designated representative via VHF-FM channel 16, or through Marine Safety Unit Port Arthur at 409-719-5070. Persons and vessels permitted to enter the safety zone must comply with all lawful orders or directions issued by the COTP or designated representative. The COTP or a designated representative will inform the public of the effective period for the safety zone as well as any changes in the dates and times of enforcement through Local Notice to Mariners (LNMs), Broadcast Notices to Mariners (BNMs), and/or Marine Safety Information Bulletins (MSIBs), as appropriate.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a “significant regulatory action,” under section 3(f) of Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, duration and entities impacted by the safety zone. This safety zone affects

approximately 350-yards of Taylor Bayou Turning Basin north of latitude 29°50′57.45″ N. A facility receives vessels within this zone and that facility would be permitted to receive vessels based on previously agreed to maneuvering calculations and plans.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves extending the effective period of the temporary safety zone on the upper reaches of Taylor Bayou Turning Basin in Port Arthur, TX. It is categorically excluded from further review under paragraph L[60(a)] of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions

on locating the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

VI. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments through the Federal Decision Making Portal at <https://www.regulations.gov>. To do so, go to <https://www.regulations.gov>, type USCG–2017–0914 in the search box and click “Search.” Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If your material cannot be submitted using <https://www.regulations.gov>, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

Viewing material in the docket. To view documents mentioned in this rule as being available in the docket, find the docket as described in the previous paragraph, and then select “Supporting & Related Material” in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the <https://www.regulations.gov> Frequently Asked Questions web page. We review all comments received, but we will only post comments that address the topic of this rule. We may choose not to post off-topic, inappropriate, or duplicate comments that we receive.

Personal information. We accept anonymous comments. Comments we post to <https://www.regulations.gov> will include any personal information you have provided. For more information about privacy and submissions to the docket in response to this document, see DHS’s eRulemaking System of Records Notice (85 FR 14226, March 11, 2020).

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Amend § 165.T08–0914 by revising paragraph (d) to read as follows:

§ 165.T08–0914 Safety Zone; Taylor Bayou Turning Basin, Port Arthur, TX.

* * * * *

(d) *Enforcement date.* The safety zone in paragraph (a) of this section will be enforced from December 30, 2024, through September 30, 2027. It will be subject to enforcement the entire period unless the COTP determines it is no longer needed, in which case the Coast Guard will inform mariners via Notice to Mariners.

Dated: December 20, 2024.

Anthony R. Migliorini,

Captain, U.S. Coast Guard, Captain of the Port Marine Safety Unit Port Arthur.

Coast Guard

33 CFR Part 165

[Docket Number USCG–2024–0820]

RIN 1625–AA00

Safety Zone; Kernwood Avenue Bridge Repairs—Danvers River, Salem, MA, and Beverly, MA

AGENCY: Coast Guard, DHS.

ACTION: Temporary interim rule and request for comments.

SUMMARY: The Coast Guard is amending the current temporary safety zone in the vicinity of the Kernwood Avenue Bridge between Salem, MA and Beverly, MA. We are extending the effective period by 11 months to November 30, 2025, and are updating the enforcement schedule of the safety zone. The temporary safety zone is necessary to protect personnel, vessels, and the marine environment

from potential hazards created during emergency bridge repairs. When enforced, entry of vessels or persons into this zone will be prohibited unless specifically authorized by the Captain of the Port Boston or a designated representative.

DATES: This rule is effective without actual notice from December 30, 2024 through 11:59 p.m. on November 30, 2025. For the purposes of enforcement, actual notice will be used from December 20, 2024, until December 30, 2024.

Comments and related material must be received by the Coast Guard on or before March 31, 2025.

ADDRESSES: You may submit comments identified by docket number USCG–2024–0820 using the Federal e-Rulemaking Portal at <http://www.regulations.gov>. See the “Public Participation and Request for Comments” portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this rulemaking, call or email Mr. Timothy Chase, Waterways Management Division, U.S. Coast Guard Sector Boston, telephone 617–447–1620, or email Timothy.w.chase@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port Boston
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
NAD 83 North American Datum 1983
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

On November 21, 2024, the Massachusetts Department of Transportation bridge division notified the Waterways Management Division of U.S. Coast Guard Sector Boston that more extensive repair operations need to be conducted to the Kernwood Avenue Bridge, spanning the Danvers River between Salem, MA, and Beverly, MA, and are anticipated to be completed by November 30, 2025. An earlier TIR published on September 23, 2024, established the first safety zone regulation for that waterway in 33 CFR 165.T01–0820 (89 FR 77451).

The Coast Guard is issuing this temporary rule under the authority in 5 U.S.C. 553(b)(B). This statutory provision authorizes an agency to issue a rule without prior notice and

opportunity to comment when the agency for good cause finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” The Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because the construction schedule for Kernwood Avenue Bridge was only recently finalized, and prompt action is needed to respond to the potential safety hazards associated with this project. It is impracticable and contrary to the public interest to publish an NPRM because prompt action is needed to establish this safety zone by December 20, 2024, to allow for the timely repairs to the Kernwood Avenue Bridge and ensure the safety of mariners transiting the area from the dangers associated with the operations associated with these repairs.

Also, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be impracticable because prompt action is needed to ensure public safety during repair operations to the Kernwood Avenue Bridge.

Although the first regulation was published as an interim rule without prior notice, public comment was nevertheless desirable to ensure that the regulation is both workable and reasonable. No comments were received during a 30-day comment period that ended October 23, 2024. Accordingly, an additional 90-day comment period for this temporary interim rule will allow persons wishing to comment to do so by submitting written comments as set out under **ADDRESSES** in this preamble. Commenters should include their names and addresses, identify the docket number for the regulation, and give reasons for their comments. If the Coast Guard determines that additional changes to the temporary interim rule are necessary, we will publish a temporary final rule or other appropriate document.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034. The Captain of the Port Boston (COTP) has determined that potential hazards associated with bridge repair operations continuing through November 30, 2025, will be a safety concern for anyone within a 100-yard radius of the center point of the Kernwood Avenue Bridge. This rule is needed to protect personnel, vessels, and the marine environment in the navigable waters within the safety

zone while bridge repair operations are taking place.

IV. Discussion of Rule

The Coast Guard is making the following amendments to the current temporary safety zone on the navigable waters at mile 1.0 Danvers River, within a 100-yard radius of the center point of the Kernwood Avenue Bridge between Salem, MA and Beverly, MA:

i. We are extending the effective period by 11 months to accommodate more extensive repairs to the bridge. The existing safety zone was effective until 11:59 p.m. December 31, 2024. The 11-month extension will make the safety zone effective until 11:59 p.m. on November 30, 2025.

ii. We are adjusting the enforcement of the safety zone. The existing safety zone was subject to an enforcement schedule from 9 p.m. to 5 a.m. Sunday through Thursday. With this rule we are moving away from that schedule. The Coast Guard is establishing a safety zone from December 20, 2024, through 11:59 p.m. on November 30, 2025. The safety zone will be enforced only during active repair operations, when work barges and cranes will be placed in the narrow navigable channel, or other instances which may create a hazard to navigation. The active repair operations will take place in multiple phases which will be announced in the Local Notice to Mariners. Additionally, each phase will allow for bridge openings and transits through the regulated area during repairs with advanced notification to the on-scene contractor.

The safety zone will cover all navigable waters within a 100-yard radius of the center point of the MassDOT Kernwood Avenue Bridge, at mile 1.0, spanning the Danvers River, between Salem, MA, and Beverly, MA, in approximate position 42°32'34.8" N 70°53'54.2" W (NAD 83). During times of enforcement, all persons or vessels will be prohibited from entering the safety zone without permission from the COTP or a designated representative.

The Coast Guard will make notice of the enforcement period of the safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency or hazardous condition. In addition, if the project is completed before 11:59 p.m. on November 30, 2025, enforcement of the safety zone will be suspended, and notice given via Local Notice to Mariners. The First Coast Guard District Local Notice to Mariners can be found at: <http://www.navcen.uscg.gov>.

These amendments are being made to maintain safe navigation in the project area and to prevent accidental or intentional damage to persons or property on the work site.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a “significant regulatory action,” under section 3(f) of Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, duration. When enforced, vessel traffic will not be able to safely transit around this safety zone. As a result, to reduce the regulator burden, with advance notice, vessels may request permission from the on-scene contractor to safely transit the safety zone. Enforcement of the safety zone will be limited in duration during active repair operations, when work barges and cranes will be placed in the narrow navigable channel. Additionally, the Salem, Beverly, and Danvers Harbor Masters will be on scene during active repair operations to inform any potential vessels of the safety zone. The Coast Guard will make notice of this safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency or hazardous condition. Again, this rule also allows vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator because they are able to transit with permission from COTP or the COTP's designated representative.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule will affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule does not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments,

because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule amends a previously created temporary safety zone for the navigable waters within 100-yard radius of the center point of the MassDOT Kernwood Avenue Bridge, at mile 1.0, spanning the Danvers River between Salem, MA, and Beverly, MA, in two ways. First, we are extending the effective period by 11 months to November 30, 2025. Second, by updating the schedule the safety zone is subject to enforcement to accommodate more extensive repairs to the bridge. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without

jeopardizing the safety or security of people, places, or vessels.

VI. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. If we determine that changes to the temporary interim rule are necessary, the Coast Guard will publish a temporary final rule or other appropriate document. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments through the Federal Decision-Making Portal at <https://www.regulations.gov>. To do so, go to <https://www.regulations.gov>, type USCG–2024–0820 in the search box and click “Search.” Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If you cannot submit your material by using <https://www.regulations.gov>, call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this rule for alternate instructions.

Viewing material in docket. To view documents mentioned in this temporary interim rule as being available in the docket, find the docket as described in the previous paragraph, and then select “Supporting & Related Material” in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the <https://www.regulations.gov> Frequently Asked Questions web page. Also, if you click on the Dockets tab and then the temporary interim rule, you should see a “Subscribe” option for email alerts. The option will notify you when comments are posted, or a subsequent document is published.

We review all comments received, but we will only post comments that address the topic of the rule. We may choose not to post off-topic, inappropriate, or duplicate comments that we receive.

Personal information. We accept anonymous comments. Comments we post to <https://www.regulations.gov> will include any personal information you have provided. For more about privacy and submissions to the docket in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

- 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

- 2. Revise and republish § 165.T01–0820 to read as follows:

§ 165.T01–0820 Safety Zone; Kernwood Avenue Bridge Repairs—Danvers River, Salem, MA, and Beverly, MA.

(a) *Location.* The following area is a safety zone: all navigable waters within a 100-yard radius of the center point of the Massachusetts Department of Transportation (MassDOT) Kernwood Avenue Bridge, at mile 1.0 spanning the Danvers River between Salem, MA, and Beverly, MA, in approximate position 42°32′34.8″N 70°53′54.2″W.

(b) *Enforcement period.* The safety zone in paragraph (a) of this section is effective from December 20, 2024, through 11:59 p.m. on November 30, 2025. The section is subject to enforcement only during periods the navigable channel is restricted by the contractor's work vessels, when the span cannot be mechanically operated, or in response to an emergency or hazardous condition during this period. The Coast Guard will make notice of this safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF–FM) as soon as practicable in response to an emergency or hazardous condition. In addition, if the project is completed before 11:59 p.m. on November 30, 2025, enforcement of the safety zone will be suspended, and notice given via Local Notice to Mariners. The First Coast Guard District Local Notice to Mariners can be found at: <http://www.navcen.uscg.gov>.

(c) *Definitions.* As used in this section:

(1) *Designated representative* means any Coast Guard commissioned, warrant, petty officer, or any federal, state, or local law enforcement officer who has been designated by the Captain of the Port Boston (COTP) to act on his or her behalf. The designated representative may be on an official

patrol vessel or may be on shore and will communicate with vessels via VHF–FM radio or loudhailer. In addition, members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation.

(2) *Official patrol vessels* mean any Coast Guard, Coast Guard Auxiliary, state, or local law enforcement vessels assigned or approved by the COTP to enforce this section.

(d) *Regulations.* When this safety zone is enforced, the following regulations, along with those contained in 33 CFR 165.23 apply:

(1) No person or vessel may enter or remain in this safety zone without the permission of the COTP or the COTP's designated representatives. Any person or vessel permitted to enter the safety zone must comply with the lawful directions and orders of the COTP or the COTP's designated representatives.

(2) To seek permission to enter the safety zone, individuals may reach the COTP or a COTP-designated representative via Channel 16 (VHF–FM) or (857) 416–3015 (Sector Boston Command Center).

Dated: December 20, 2024.

J.C. Frederick,

Captain, U.S. Coast Guard, Captain of the Port Boston.

SUPPLEMENTARY INFORMATION:**I. General Information****A. How is the preamble organized?**

The information presented in this preamble is organized as follows:

Table of Contents**I. General Information****A. How is the preamble organized?****II. Background****III. What is the EPA correcting?****IV. What action is the EPA taking?****V. Statutory and Executive Order Reviews****II. Background**

On November 8, 2024, the EPA proposed to correct an error in an earlier EPA action, using the authority of section 110(k)(6) of the CAA. Specifically, the proposed action explained that the error occurred in a December 7, 2023, EPA action¹ disapproving revisions to the SIP for the State of Louisiana submitted in response to the 2015 SSM SIP Action.² On June 12, 2015, the EPA finalized the 2015 SSM SIP Action, which clarified, restated, and updated the EPA's national policy regarding SIP provisions applying to excess emissions during periods of startup, shutdown, and malfunction (SSM). As part of the 2015 SSM SIP Action, the EPA issued a finding that certain SIP provisions for 36 states that were applicable in 45 statewide and local jurisdictions were

¹ 88 FR 85112 (December 7, 2023).

² State Implementation Plans: Response to Petition for Rulemaking; Restatement and Update of EPA's SSM Policy Applicable to SIPs; Findings of Substantial Inadequacy; and SIP Calls To Amend Provisions Applying to Excess Emissions During Periods of Startup, Shutdown and Malfunction, 80 FR 33840 (June 12, 2015).

substantially inadequate to meet CAA requirements due to how those SIP provisions treated excess emissions during SSM periods. Further, the EPA issued a “SIP call” to each of those 45 air agencies, including the State of Louisiana on the basis that Louisiana’s SIP contained impermissible automatic and discretionary exemptions that were substantially inadequate to meet CAA requirements.³ To respond to the EPA’s SIP call in the 2015 SSM SIP Action, each affected state was required to submit its corrective SIP revision by November 22, 2016. On December 7, 2023, the EPA took final action⁴ to disapprove certain portions of a SIP revision submitted by the State of Louisiana on November 20, 2016, and supplemented on June 9, 2017, because the EPA found that Louisiana’s SIP revision did not correct the deficiency identified in Louisiana’s SIP in the 2015 SSM SIP Action.⁵

As a result of the March 1, 2024, decision from the United States Court of Appeals for the District of Columbia Circuit in *Environ. Comm. Fl. Elec. Power v. EPA*, 94 F.4th 77 (D.C. Cir. 2024), certain portions of the EPA’s SIP call in the 2015 SSM SIP Action were vacated by the D.C. Circuit and therefore have no legal effect. Thus, certain states subject to the 2015 SSM SIP Action no longer have a legal obligation to submit the revisions that the EPA had originally determined were required to correct the deficiencies identified in the SIP call.⁶ In other words, by partially vacating the EPA’s 2015 SSM SIP Action, the D.C. Circuit’s decision rendered Louisiana’s SIP submission in response to the 2015 SSM SIP Action voluntary rather than mandatory. As a result, the EPA proposed to correct the EPA’s December 7, 2023, disapproval action with respect to the consequences of that disapproval.

A more complete explanation of the reasons for the proposed error correction can be found in the November 8, 2024, proposed action. Comments on the November 8, 2024,

proposed action were due on or before December 9, 2024. The EPA did not receive any comments on the November 8, 2024, proposed action.

III. What is the EPA correcting?

In this action, the EPA is correcting the erroneous triggering of mandatory sanctions under CAA section 179 and 40 CFR 52.31 for the state of Louisiana following its December 7, 2023, disapproval of Louisiana’s SIP revision submitted in response to the 2015 SSM SIP Call. The EPA is also correcting the erroneous triggering of the EPA’s obligation to issue a Federal Implementation Plan (FIP) under CAA section 110(c)(1)(B). As a result, in finalizing this error correction action, the imposition of sanctions for the State of Louisiana and the FIP obligation for the EPA that were triggered as a result of the December 7, 2023, final disapproval action are no longer in effect.

IV. What action is the EPA taking?

As a result of the D.C. Circuit’s decision in *Environ. Comm. Fl. Elec. Power v. EPA*, the EPA is determining that, pursuant to section 110(k)(6) of the CAA, a portion of the EPA’s December 7, 2023, final disapproval action of Louisiana’s SIP revision was in error with respect to the consequences of that disapproval. By partially vacating the EPA’s 2015 SSM SIP Action, the D.C. Circuit’s decision rendered Louisiana’s SIP submission in response to the 2015 SSM SIP Action voluntary rather than mandatory. Thus, the EPA is finding that the triggering of mandatory sanctions and FIP obligation following the December 7, 2023, final disapproval was erroneous and, through this action, is terminating the imposition of sanctions for the State and the FIP obligation for the EPA triggered by that disapproval as they are no longer legally valid.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. However, this action, which seeks to correct an error in a prior SIP disapproval action under section 110(k)(6) of the CAA, is neither an approval nor a disapproval. This action merely corrects an error in EPA’s prior action and does not impose additional

requirements beyond those imposed by state law.

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993), and 14094 (88 FR 21879, April 11, 2023);

- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it is an error correction taken under section 110(k)(6) of the CAA and does not directly or disproportionately affect children.

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and

- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

- In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the action does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address “disproportionately high and adverse human health or environmental effects” of their actions on communities with environmental justice (EJ) concerns to the greatest extent practicable and permitted by law. EPA defines EJ as “the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of

³ See 78 FR 12460, 12521–12522 (February 22, 2013) and 80 FR 33840 at 33967 (June 12, 2015).

⁴ See 88 FR 85112 (December 7, 2023).

⁵ On October 5, 2022, EPA Region 6 finalized approval of a portion of Louisiana’s SIP revision that corrected six of Louisiana’s seven deficient SIP provisions originally identified in EPA’s 2015 SSM SIP Call. See 87 FR 60292. On December 7, 2023 (88 FR 85112), the EPA Region 6 finalized disapproval of Louisiana’s SIP revision that sought to correct the remaining deficient provision.

⁶ In vacating certain portions of the 2015 SSM SIP Action, the D.C. Circuit’s decision did not determine whether the SIP-called provisions were otherwise lawful under the CAA. See *e.g.* 94 F.4th at 110 (“We thus do not reach the question whether the called SIPs’ relevant emission restrictions in fact amount to (or must amount to) ‘emission limitations’ per the statutory definition.”).

environmental laws, regulations, and policies.” EPA further defines the term fair treatment to mean that “no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.”

The air agency did not evaluate environmental justice considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. Although not a basis for that action, the EPA performed an EJ analysis for informational purposes only in its June 13, 2023, proposed disapproval of Louisiana’s SIP revision. See 88 FR 38448, 38453–38455 (June 13, 2023) and 88 FR 85112, 85123–85124 (December 7, 2023) for more information. The EPA views this action as a necessary procedural step following the D.C. Circuit decision and vacatur of portions of the 2015 SIP call. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of E.O. 12898 of achieving environmental justice for communities with EJ concerns.

This action is subject to the Congressional Review Act, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 28, 2025. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2024–0529; FRL–12471–01–R5]

Air Plan Approval; Ohio; Nitrogen Oxide Standards Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving revisions to the Ohio State Implementation Plan (SIP) submitted by the Ohio Environmental Protection Agency (Ohio EPA) on November 4, 2024. Ohio EPA requested that EPA approve the revised rules for nitrogen oxide standards in the Ohio Administrative Code (OAC) into Ohio’s SIP. The revised rules include non-substantive updates to rule language and updates to referenced material. The revisions will assist with Ohio’s efforts to attain and maintain the National Ambient Air Quality Standards (NAAQS) for nitrogen dioxide (NO₂).

DATES: This direct final rule will be effective February 28, 2025, unless EPA receives adverse comments by January 29, 2025. If adverse comments are received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R05–OAR–2024–0529 at <https://www.regulations.gov> or via email to langman.michael@epa.gov. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from the docket. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI), Proprietary Business Information (PBI), or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy,

information about CBI, PBI, or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT:

Delaney Kilgour, Air and Radiation Division (AR–1–8J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–1106, kilgour.delaney@epa.gov. The EPA Region 5 office is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA.

I. What is the background for these actions?

Ohio EPA is subject to requirements in Ohio Revised Code 106.03 and 106.031 to review each of its regulations every five years to assess whether any updates to the regulations are warranted and for other purposes. Accordingly, Ohio EPA reviewed its regulations in OAC Chapter 3745–23, entitled “Nitrogen Oxide Standards.” OAC Chapter 3745–23 is part of Ohio’s strategy for attainment and maintenance of the NAAQS for NO₂.

As a result of its review, Ohio EPA concluded that rule revisions were needed to modify the wording of selected text to correct typos and reflect new formatting guidelines, and to update publication and referenced material titles, effective dates, addresses, and websites. Ohio EPA adopted these various minor revisions and updated their rules on August 15, 2024, and then requested that EPA approve these revisions into the Ohio SIP in a submittal dated November 4, 2024.

II. What is EPA’s analysis of Ohio’s SIP revision?

Ohio EPA has requested that EPA approve revised rules under Chapter 3745–23 of the OAC. These rules include 3745–23–01 (Definitions) and 3745–23–02 (Methods of measurement). These revised rules are intended to assist in maintaining the NO₂ NAAQS. The revisions are described in detail below. EPA is determining that these revisions are approvable since they are primarily administrative in nature and serve to strengthen the SIP.

A. 3745–23–01 Definitions

This rule contains the applicable definitions and referenced material for OAC Chapter 3745–23. The rule is being

revised to include updates to the publication dates and website URLs of referenced material, and to adopt minor changes in rule language to correct typos and meet updated style and formatting guidelines. No terms or definitions were added or removed from this section. Since the revised definitions do not make this rule less stringent, EPA finds that 3745–23–01 is approvable.

B. 3745–23–02 Methods of measurement

This rule contains methods for measuring and determining the concentration of NO₂ in ambient air. The rule is being revised to adopt minor language adjustments, including removal of the word “shall” and rearrangement of sentences. Since the revisions to the rule language are minor in nature and do not affect the scope or intent of the rules, EPA finds that 3745–23–02 is approvable.

III. What action is EPA taking?

EPA is approving the November 4, 2024, submission by Ohio EPA as a revision to the Ohio SIP. Specifically, EPA is approving updates to OAC Chapter 3745–23.

We are publishing this action without prior proposal because we view this as a noncontroversial amendment and anticipate no adverse comments. However, in the proposed rules section of this **Federal Register** publication, we are publishing a separate document that will serve as the proposal to approve the state plan if relevant adverse written comments are filed. This rule will be effective February 28, 2025 without further notice unless we receive relevant adverse written comments by January 29, 2025. If we receive such comments, we will withdraw this action before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on the proposed action. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. If we do not receive any comments, this action will be effective February 28, 2025.

IV. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of the Ohio Regulations described in section II of this preamble and set forth in the amendments to 40 CFR part 52 below. EPA has made, and will continue to make, these documents generally available through www.regulations.gov and at the EPA Region 5 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by EPA for inclusion in the SIP, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the Clean Air Act (CAA) as of the effective date of the final rulemaking of EPA’s approval, and will be incorporated by reference in the next update to the SIP compilation.¹

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA’s role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993), and 14094 (88 FR 21879, April 11, 2023);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive

Order 13132 (64 FR 43255, August 10, 1999);

- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address “disproportionately high and adverse human health or environmental effects” of their actions on communities with environmental justice (EJ) concerns to the greatest extent practicable and permitted by law. Executive Order 14096 (Revitalizing Our Nation’s Commitment to Environmental Justice for All, 88 FR 25251, April 26, 2023) builds on and supplements E.O. 12898 and defines EJ as, among other things, the just treatment and meaningful involvement of all people, regardless of income, race, color, national origin, or Tribal affiliation, or disability in agency decision-making and other Federal activities that affect human health and the environment.

Ohio EPA did not evaluate EJ considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA did not perform an EJ analysis and did not consider EJ in this action. Due to the nature of the action being taken here, this action is expected to have a neutral to positive impact on the air quality of the affected area. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of E.O. 12898/14096 of achieving EJ for communities with EJ concerns.

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of

¹ 62 FR 27968 (May 22, 1997).

the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 28, 2025. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section

of this **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

Federal Implementation Plan for Nonattainment New Source Review Program; Mojave Desert Air Quality Management District, California

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing a Federal Implementation Plan (FIP) under the Clean Air Act (CAA) that consists of Nonattainment New Source Review (NNSR) rules for areas within the jurisdiction of the Mojave Desert Air Quality Management District

(MDAQMD or “District”) in which air pollutant concentrations are above specific National Ambient Air Quality Standards (NAAQS). The NNSR rules will apply to construction of new major stationary sources and major modifications at existing major stationary sources of air pollution. The FIP will be implemented by the EPA, unless and until it is replaced by an EPA-approved state implementation plan (SIP). In this action, the EPA is also responding to a September 5, 2024 decision of the United States Ninth Circuit Court of Appeals for the Ninth Circuit, which remanded the EPA’s disapproval of a MDAQMD rule provision related to the calculation and generation of emissions offsets. This response again disapproves MDAQMD Rule 1304(C)(2)(d) and provides additional information to support that decision.

DATES: This final rule is effective on February 28, 2025.

ADDRESSES: The EPA has established a docket for the FIP rulemaking under Docket ID No. EPA–R09–OAR–2024–

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. In § 52.1870, the table in paragraph (c) is amended by revising entries “3745–23–01” and “3745–23–02” under “Chapter 3745–23 Nitrogen Oxide Standards” to read as follows:

§ 52.1870 Identification of plan.

 2023 LA/LD The EPA’s rulemaking action at 88 FR 42258, which was published on June 30, 2023, in the **Federal Register**.

I. Final Action To Establish Federal Implementation Plan

On July 9, 2024 (89 FR 56237), the EPA proposed to establish a Federal Implementation Plan (FIP), pursuant to (Clean Air Act) section 110(c), for a nonattainment New Source Review (NNSR) program within the Mojave Desert Air Quality Management District (MDAQMD).¹ This FIP relates to a finding of failure to submit issued by the EPA on February 3, 2017, and EPA’s action to disapprove a part of the MDAQMD’s Nonattainment New Source Review (NNSR) permitting program regulations on June 30, 2023 (88 FR 42258) (“2023 LA/LD”). The latter action was a limited approval/limited disapproval action in which EPA disapproved MDAQMD’s Rule 1304(C)(2)(d) because this rule failed to meet requirements for determining the quantity of offsets needed to issue a permit for a major modification.

This FIP implements NNSR program requirements and will apply to the construction of new major sources and major modifications at existing major sources that are located within areas that are designated as nonattainment with specific National Ambient Air Quality Standards (NAAQS). This FIP will apply to pollutants for which the area is designated nonattainment. Therefore, this action applies only in the areas within the MDAQMD’s jurisdiction that are designated nonattainment, specifically, the San Bernardino County portion of the West Mojave Desert ozone nonattainment area and the San Bernardino County and Trona Planning Area Particulate Matter with a diameter of 10 micrometers or less (PM₁₀) nonattainment areas.² The EPA will implement the FIP in these areas until such time as the EPA approves a SIP submission from the MDAQMD that fully resolves the deficiencies identified in the EPA’s June 30, 2023 limited approval/limited disapproval (“2023 LA/LD”) action on the MDAQMD’s NNSR program and identifies no new deficiencies.³ This FIP satisfies the statutory requirements for SIPs and NNSR programs in CAA

¹ The EPA’s finding of failure to submit triggered an obligation under CAA section 110(c) for the EPA to promulgate a FIP within two years (*i.e.*, by March 6, 2019). 82 FR 9158, 9161 (February 3, 2017).

² See 40 CFR 81.305. The ozone nonattainment area is located within San Bernardino County. The PM₁₀ nonattainment areas consist of all of the MDAQMD portion of San Bernardino County: the Trona Planning Area and the portion of San Bernardino County that excludes both the Trona Planning Area and the portion of San Bernardino County that is located in the South Coast Air Basin. A map of this area is available in the docket for this action.

³ 89 FR 56237, 56241.

sections 110(c)(1), 172(c)(5), 173, 182(c) and (d), 189(a)(1)(A) and (e), 301(a), and 302. The provisions of the FIP are also designed to meet the requirements for state plans in the EPA regulations at 40 CFR 51.165, 40 CFR 51.1114, and 40 CFR 51.1314.

The FIP that is finalized in this action addresses the deficiencies the EPA identified in the MDAQMD’s NNSR program by incorporating requirements from 40 CFR part 51, appendix S (“Appendix S”), as well as additional requirements to make the program administrable. Upon the effective date of this action, permit applicants will need to obtain two permits—one permit from the EPA under this FIP and one permit from the MDAQMD under the rules in the SIP. Where permit approval criteria between the MDAQMD’s SIP and this FIP conflict—for example, the procedures to determine the quantity of offsets at a major modification, a deficiency in the MDAQMD’s NNSR program—permit applicants need to demonstrate compliance with the requirements of this FIP, since this FIP fills the gaps in the MDAQMD’s NNSR program. To the extent that there are any differences in the required permit application materials under the FIP versus the SIP, the applicant will need to comply with both requirements when submitting its permit application. The EPA will enforce the FIP as provided under CAA section 113(a). Our notification proposing this action includes further information on the implementation, purpose, components, and severability of this FIP.⁴

II. EPA Response to the Ninth Circuit’s Remand

In this rulemaking, the EPA is also taking final action in response to a remand to the Agency by the U.S. Court of Appeals for the Ninth Circuit in *Mojave Desert Air Quality Management District v. U.S. Environmental Protection Agency* (“MDAQMD v. EPA”).⁵ As background, on July 10, 2023, the MDAQMD filed a petition for review in the Ninth Circuit Court of Appeals of the EPA’s 2023 LA/LD of the MDAQMD’s NNSR program. The focus of the litigation was the EPA’s disapproval of the MDAQMD’s Rule 1304(C)(2)(d). The MDAQMD argued that the EPA had failed to adequately explain the disapproval in light of the Agency’s 1996 approval of a

⁴ 89 FR 56237.

⁵ *Mojave Desert Air Quality Mgmt. Dist. v. U.S. Env’t. Prot. Agency*, No. 23-1411 (9th Cir. September 5, 2024), Docket No. EPA-R09-OAR-2022-0338, available in the docket for this action and at <https://cdn.ca9.uscourts.gov/datastore/memoranda/2024/09/05/23-1411.pdf>.

substantially similar, earlier version of the rule. On September 5, 2024, the Ninth Circuit found that the EPA’s disapproval of Rule 1304(C)(2)(d) was arbitrary and capricious because the Agency had failed to adequately explain “the reversal of its prior approval of a similar Mojave rule.”⁶ The court granted the District’s petition and remanded the matter “for further proceedings before the agency on an open record consistent with this decision.”⁷

In response to a remand from a court and agency can choose one of two paths. The agency may offer a fuller explanation of its reasoning at the time of the remanded agency action, or EPA may take a new agency action that need not be limited to its prior reasons but must comply with the procedural requirements for a new agency action.⁸ The EPA is choosing to follow the second of these paths to respond to the Ninth Circuit’s remand, reexamining the remanded action and providing a fresh justification for the disapproval of Rule 1304(C)(2)(d), including an explanation for the reversal of EPA’s 1996 approval.

The EPA also received comments referencing our 1996 rulemaking action on the proposal for the FIP. In light of the overlapping subject matter, we have elected to include the following two final actions in one rulemaking: (1) a new EPA final action to disapprove Rule 1304(C)(2)(d), as authorized under CAA

sections 110(k)(3) and 301(a), that responds to the Ninth Circuit’s remand of a portion of our 2023 LA/LD; and (2) EPA’s final action on the FIP, as authorized under CAA section 110(c), described above. Our responses to comments in Section III of this action both respond to the comments received on the proposed FIP and provide additional explanation that supports EPA new final action to disapprove Rule 1304(C)(2)(d), consistent with the 2023 LA/LD rule.

For the former action, the EPA must comply with the procedural requirement for a new agency action. Considering the grounds for the court’s remand, there is no need for the EPA to provide an additional opportunity for public comment before taking final action to disapprove Rule 1304(C)(2)(d). The EPA provided notice and opportunity to comment on the disapproval of Rule 1304(C)(2)(d) in the 2023 LA/LD action. In reviewing that action, the Ninth Circuit held that EPA’s response to one of the public comments on that action was not adequate. The court found that the MDAQMD had sufficiently raised in its comment the contention that EPA’s 2023 action was inconsistent with the Agency’s prior approval of comparable rule in 1996. Then, the court held that the EPA did not sufficiently articulate a basis for our change of position to support the 1993 disapproval of MDAQMD Rule

1304(C)(2)(d). In this action, the EPA is responding to the MDAQMD’s comment in the manner that the Ninth Circuit directed. We have opened the record to the 2023 LA/LD action and provided additional information to support a new disapproval of Rule 1304(C)(2)(d). Considering that the court remanded for the EPA to provide a response to a comment, there is no need to provide an opportunity to submit comments.⁹

III. Public Comments on FIP and EPA Responses to Comments and Court Remand

The public comment period on the proposed FIP rule opened on July 9, 2024, the date of the proposal’s publication in the **Federal Register**, and closed on August 23, 2024. The EPA held a virtual public hearing on July 24, 2024, for members of the public to provide oral comments. This section summarizes the written and oral public comments the EPA received on the proposed FIP rule and provides responses to those comments. The written comments as well as a transcript of the public hearing are available in the docket for this action. The responses below also provide additional analysis and explanation that supports the EPA’s disapproval of Rule 1304(C)(2)(d) in the 2023 LA/LD rule.

Twelve written comments were submitted to <https://regulations.gov>. The commenters are listed in Table 1.

TABLE 1—LIST OF COMMENTERS PROVIDING WRITTEN COMMENTS

Commenter ID	Commenter name	Commenter organization	Type of commenter	Notes
01	Brad Poiriez, Executive Director	MDAQMD	State or Local Government Representative/Agency.	This is the first comment letter submitted by the MDAQMD.
02	Brad Poiriez, Executive Director	MDAQMD	State or Local Government Representative/Agency.	This is the second comment letter submitted by the MDAQMD regarding the MDAQMD’s August 7, 2024 SIP submittal.
03	Garden Hills Org. & Co. Ltd			This comment is not relevant to the proposed action and the EPA will therefore not be providing a response to this comment.
04	Clean Future			This commenter submitted four separate comments, two that supported the proposed FIP as drafted and two that made additional recommendations.
05	Karnig Ohannessian, Deputy Assistant Secretary of the Navy (Environment and Mission Readiness).	U.S. Department of Defense	Government Representative/Agency.	
06	L. Dugan	Marine Air Ground Task Force Training Command, Marine Corps Air Ground Combat Center (MAGTFTC–MCAGCC).	Government Representative/Agency.

Commenter ID	Commenter name	Commenter organization	Type of commenter	Notes
09	Michael Meinen, V.P. Environmental and Decarbonization Efforts.	Mitsubishi Cement Corporation	Industry.	

The EPA also received a total of three comments on the proposed rule during the public hearing. The commenters are listed in Table 2.

TABLE 2—LIST OF COMMENTERS IN JULY 24, 2024 PUBLIC HEARING

Commenter ID	Commenter name	Commenter organization	Type of commenter
AA	Brad Poiriez, Executive Director	Mojave Desert Valley Air Quality Management District (MDAQMD).	State or Local Government Representative/ Agency.
BB	Pedro Dumaua	Ducommun, Inc	Industry.
CC	Daniel McGivney	Southern California Gas Company (SoCalGas)	Industry.

As we stated in the July 24, 2024 public hearing, the EPA considers written comments and oral comments equally in reaching its final decision on the proposed FIP. For clarity, we have divided our responses to the comments we received into two sections: the written comments we received during the public comment period and the oral comments we received during the public hearing.

A. Summaries of Written Comments and the EPA's Responses

1. Basis and Timing for the FIP

Comment A.1.1: Commenter 01 asserts that the EPA proposed the FIP in “haste,” that the proposed FIP relates to a single issue, and that it is unnecessary because it rests on an erroneous assumption.

Response to Comment A.1.1: The EPA disagrees with the characterization that the EPA proposed the FIP in haste. As explained in our proposed rulemaking,¹⁰ the EPA’s FIP authority and obligation arises from our February 3, 2017 finding of failure to submit, in which we found that the State of California had failed to submit a SIP revision for NNSR rules that apply to a “Severe” classification for the 2008 ozone NAAQS, as required under subpart 2 of part D of title 1 of the CAA and the 2008 Ozone SIP Requirements Rule.¹¹ The EPA’s finding of failure to submit triggered an obligation under CAA section 110(c) for the EPA to promulgate a FIP no later than two years from the finding of failure to submit a complete SIP (*i.e.*, by March 6, 2019).¹² Specifically, the finding stated that if the State did not make the required SIP

submission and the EPA did not take final action to approve the submission within two years of the effective date of the finding, the EPA would be required to promulgate a FIP for the affected nonattainment area.¹³ On June 7, 2022, the Center for Biological Diversity (CBD) filed a lawsuit against the EPA alleging that the EPA had failed to promulgate a FIP or approve a SIP by the statutory deadline of March 6, 2019 (“2023 CBD Consent Decree”).¹⁴ On June 15, 2023, the U.S. District Court of the Northern District of California entered a consent decree resolving this claim and requiring the EPA to sign a final rulemaking action to either promulgate a FIP or approve a SIP no later than November 29, 2024, although on November 8, 2024, the EPA and CBD agreed to extend the deadline to January 10, 2025.¹⁵ The EPA proposed and is finalizing this FIP for the NNSR program in the MDAQMD to fulfill the EPA’s statutory duty by the deadline established under the consent decree.¹⁶

Relatedly, the 2015 Ozone NAAQS Implementation Rule required the MDAQMD to submit an updated NNSR rule to the EPA by August 1, 2021, no later than three years from the effective date of its nonattainment designation.¹⁷

¹³ Id. at 9158.

¹⁴ *Center for Biological Diversity et al., v. Regan*, No. 3:22-cv-03309-RS (N.D. Cal.) (“2023 CBD Consent Decree”). The consent decree, as entered by the court on June 15, 2023, is available in the docket for this action.

¹⁵ Id. Prior to court’s entry of the 2023 CBD Consent Decree, the EPA published a notice in the **Federal Register** announcing the proposed settlement and providing an opportunity for interested persons to submit comments. 88 FR 20166 (April 5, 2023). The EPA received no comments on the proposed settlement. The parties’ joint stipulation to extend the consent decree deadline is available in the docket for this action.

¹⁶ 2023 CBD Consent Decree, *supra* n. 13.

¹⁷ 83 FR 62998 (December 6, 2018).

On July 23, 2021, CARB submitted to the EPA the MDAQMD’s revised NNSR rules for the 2015 ozone NAAQS, which the MDAQMD adopted in March 2021.¹⁸ On June 30, 2023, the EPA finalized an LA/LD of the District’s NNSR rules.¹⁹ In this rulemaking, the EPA evaluated the SIP submission to determine its compliance with NNSR requirements for the 2008 and 2015 ozone NAAQS and for the 1987 PM₁₀ NAAQS. The EPA’s rulemaking for the submitted rules explained that the EPA had identified six deficiencies in the submitted rules that did not fully satisfy the relevant requirements for preconstruction review and permitting in nonattainment areas under section 110 and part D of title I of the Act. These deficiencies prevented full approval.²⁰ As noted in that final action, this disapproval imposed an obligation on the EPA to promulgate a FIP pursuant to CAA section 110(c) within 24 months of the effective date of the action (*i.e.*, July 31, 2023, setting a deadline of July 31, 2025, for the EPA to promulgate a FIP), unless the EPA approved a SIP revision correcting the deficiencies. The June 2023 final action also noted the EPA’s existing obligation under the 2023 CBD Consent Decree to promulgate a FIP for new source review (NSR) SIP elements that the Agency had not approved.²¹ The EPA is therefore finalizing this FIP for the NNSR program in the MDAQMD to fulfill the EPA’s statutory duty by the deadline

¹⁸ 88 FR 42258 (June 30, 2023). CARB’s submittal stopped the sanctions clocks that started as a result of the 2017 Finding of Failure to Submit, but not the FIP clock, since the latter requires approval of the SIP submission.

established under the 2023 CBD Consent Decree.

Comment A.1.2: Commenter 08 states that it understands that the EPA is proposing the FIP under both a statutory deadline established by a consent decree resulting from its failure to act in a timely manner on various SIP submissions and under a regulatory deadline required by CAA section 110(c). Commenter 08 states that the EPA acted to propose the FIP nearly five months sooner than required by the consent decree. Commenter 08 believes that the proposed FIP presumes the outcome of the ongoing litigation, and the hasty action on the EPA's part does not demonstrate a good faith effort to allow the MDAQMD to continue to implement its own NNSR program.

Response to Comment A.1.2: The EPA proposed this FIP for the MDAQMD NNSR program to fulfill the EPA's statutory duty by the deadline established under the 2023 CBD Consent Decree.²² The terms of the consent decree require the EPA to sign a notice of final rulemaking to approve a revised SIP submission, to promulgate a FIP, or to approve in part a revised SIP submission and promulgate a partial FIP for the Severe NNSR SIP element in the MDAQMD no later than January 10, 2025.²³ Because the FIP can only be promulgated through a notice and comment rulemaking, it was necessary for the EPA to propose the FIP several months before the final signature deadline to give time for the public to review the draft rulemaking, provide comments, and allow for the EPA to consider and respond to those comments in a final agency action.

Commenter 08's assessment of the basis for the EPA's promulgation of the FIP and the timing of the FIP is not correct. The EPA's obligation to promulgate a FIP stems from our 2017 Finding of Failure to Submit the NNSR SIP element for a Severe-15 ozone nonattainment area.²⁴ Our 2017 action started the clock for when the EPA would need to promulgate a FIP, consistent with CAA section 110(c). Thus, since March 6, 2019 (two years after the effective date of the action, under CAA section 110(c)), the EPA has had an obligation to promulgate a FIP unless it approved the MDAQMD's

NNSR program. Because the EPA has not fully approved the MDAQMD's NNSR program, the EPA remains obligated to promulgate a FIP unless the MDAQMD addresses the deficiencies identified in the 2023 LA/LD.

After extensive coordination between the EPA and MDAQMD, the MDAQMD adopted revised NSR rules on March 22, 2021, which CARB, as the governor's designee, submitted to the EPA on July 23, 2021, for approval into the SIP. In the transmittal letter from the MDAQMD to CARB accompanying the amended NNSR rules, the MDAQMD wrote that the issue regarding MDAQMD Rule 1304(C)(2)(d) may need to be resolved in court.²⁵ The EPA's 2023 LA/LD was the final action on the 2021 submittal. The FIP clock that commenced with the 2023 LA/LD is separate from the FIP clock that began with the 2017 finding of failure to submit, in contrast to the statements Commenter 08 made in its comment number 1 on the proposed FIP; again, that deadline passed in 2019.

Following the EPA's finalization of the 2023 LA/LD on June 30, 2023, the MDAQMD filed a petition for review of that action in the U.S. Court of Appeals for the Ninth Circuit Court on July 10, 2023. On September 5, 2024, the Ninth Circuit Court of Appeals in the case *Mojave Desert Air Quality Management District v. EPA* remanded to the EPA the Agency's determination that the MDAQMD Rule 1304(C)(2)(d) is unlawful under the CAA. The Ninth Circuit did not render a substantive ruling on the legality of the MDAQMD Rule 1304(C)(2)(d); rather, it remanded to the EPA to explain the EPA's finding that the MDAQMD rule was deficient, specifically in the context of the EPA's 1996 approval of the MDAQMD's NNSR program containing similar provisions to today's Rule 1304(C)(2)(d). The EPA therefore finds the MDAQMD SIP remains deficient with respect to Rule 1304(C)(2)(d) and inconsistent with CAA requirements. Regardless of the Ninth Circuit's remand, the EPA is required to promulgate the FIP, and it must do so by the consent decree deadline of January 10, 2025.²⁶

Comment A.1.3: Commenter 02 states that since the MDAQMD made changes to address all but one of the six

deficiencies the EPA identified in the 2023 LA/LD, there is no longer a need to address those particular issues in the FIP other than to note that resolution has been reached and approval of those five issues is forthcoming.

Commenter 08 states that because CARB submitted the MDAQMD's revised rules to the EPA on August 7, 2024, it is the commenter's understanding that the FIP will only pertain to Simultaneous Emission Reduction ("SER") calculations under MDAQMD Rule 1304(C)(2)(d). The commenter states that with CARB's submission of the MDAQMD's revised rules, the deficiencies in the MDAQMD's rules are no longer broad in scope, nor do they affect multiple aspects of the program. The commenter urges the EPA to work cooperatively with the MDAQMD and not put the onus of the FIP on facilities.

Commenter 07 states that the MDAQMD has made many changes to its NSR rules to meet the requirements of the 1990 Clean Air Act and requests that the EPA reevaluate its decision to promulgate the FIP. Similarly, Commenter 05 states that the EPA should reconsider or postpone implementing the FIP until it can resolve its disagreement with the MDAQMD regarding Rule 1304(C)(2)(d). Commenter 09 urges the EPA to defer the FIP until the ongoing litigation between the EPA and the MDAQMD is resolved.

Response to Comment A.1.3: Section III.H of our FIP proposal described how SIP replacement of all or any part of the proposed FIP would work, noting that changes to the MDAQMD's rules, if approved into the SIP, could replace the corresponding requirements of the FIP.²⁷ The EPA received CARB's submission of the MDAQMD's revised rules (adopted by the MDAQMD on March 25, 2024) on August 7, 2024, which was after our July 9, 2024 proposed action. For the EPA to narrow the scope of the FIP to just the remaining issue—the quantification and generation of offsets under MDAQMD Rule 1304(C)(2)(d)—the EPA would first need to approve the August 7, 2024 CARB submittal containing the MDAQMD's revised NNSR rules, which requires a 30-day notice and comment period. We are currently reviewing the submission for completeness and substance, as required under section 110(k) of the CAA. Therefore, there is not enough time before the January 10, 2025 consent decree deadline to accommodate the required notice and comment rulemaking on any action the

²² Id.

²³ *Center for Biological Diversity et al., v. Regan*, No. 3:22-cv-03309-RS (N.D. Cal.). The consent decree, as entered by the court on June 15, 2023, is available in the docket for this action. On November 8, 2024, the parties stipulated to an extension of the consent decree deadline to January 10, 2025. The joint stipulation is available in the docket for this action.

²⁴ 82 FR 9158 (February 3, 2017).

²⁵ Cover Letter, MDAQMD March 22, 2021 Amendments to MDAQMD Regulation XIII—New Source Review and Rule 1600—Prevention of Significant Deterioration, sent from the MDAQMD to CARB. May 17, 2021, p. 2.

²⁶ On November 8, 2024, CBD and the EPA filed a joint stipulation to extend the original November 29, 2024 deadline to January 10, 2025. *Center for Biological Diversity et al., v. Regan*, No. 3:22-cv-03309-RS (N.D. Cal.). This consent decree is also available in the docket for this action.

²⁷ 89 FR 56237, 56243.

EPA takes on the August SIP submittal.²⁸

Case law also supports the conclusion that the EPA is not required to act on the MDAQMD's August 7, 2024 submittal prior to finalizing the FIP. As the court held in *Keystone-Conemaugh Projects LLC v. EPA*, a case in which the EPA promulgated a FIP before acting on a revised SIP submittal, CAA section 110(c) "contains no language requiring the EPA to act on the SIP revision before promulgating the FIP."²⁹ (Emphasis in original.) Likewise, as Commenter 02 indicates in its comment letter, the MDAQMD's revised NNSR rules submitted by CARB on August 7, 2024, does not include any revisions of MDAQMD Rule 1304(C)(2)(d).

Similar to the situation at issue in *Arizona ex rel. Darwin v. United States*, there is no reason to think that, after nearly five years of discussions of the MDAQMD's NNSR program between EPA and the MDAQMD, additional time to correct Rule 1304(C)(2)(d) would lead to MDAQMD's revising its NNSR program to resolve the deficiency.³⁰

Comment A.1.4: Commenter 09 states that the proposed FIP is not necessary because the EPA already has authority under the existing MDAQMD rules to review applications for major facilities and enforce applicable federal NNSR requirements. This commenter states that MDAQMD Rule 1203(B)(1) requires that the EPA be given an opportunity to review and comment on applications for Federal Operating Permits (FOP), Significant Modifications to FOPs, and Renewals to FOPs. The commenter

states that the EPA already has the discretion and authority to deny applications for a Major Facility that it believes has not complied with applicable federal NNSR requirements.

Response to Comment A.1.4: The EPA disagrees with the comment. While the EPA can comment on, and enforce, Title V permits issued under the MDAQMD's approved CAA Title V program,³¹ the Title V operating permit program is not the same permitting program as a NNSR pre-construction permitting program. Title I of the CAA has a separate requirement that the MDAQMD SIP contain a fully approved NNSR permitting program for the 2008 and 2015 ozone NAAQS.³² Federal Operating Permits issued under Title V of the CAA (and under Regulation XII of MDAQMD's approved Title V program) are not the same as pre-construction NNSR permits issued under a SIP-approved program under Title I of the CAA, and the EPA's authority to review, comment on, and object to Title V permits does not remedy the deficiencies in the MDAQMD's NNSR program, nor does the EPA's authority under Title V fulfill the EPA's FIP obligation under CAA section 110(c). MDAQMD Regulation XIII, which contains the MDAQMD's NNSR program, still needs to be approved into the SIP for the 2008 and 2015 ozone NAAQS. The EPA therefore has a statutory duty to promulgate a FIP as the result of its finding of failure to submit published in the **Federal Register** on February 6, 2017, and the EPA is now subject to a court order to either promulgate a FIP or approve a SIP submission that corrects all the deficiencies identified in the finding of failure to submit no later than January 10, 2025.³³

2. Comments on MDAQMD Rule 1304(C)(2)(d)

Comment A.2.1: Commenter 01 asserts that the EPA erroneously assumed that SERs (Simultaneous Emissions Reductions) created under MDAQMD Rule 1304(C)(2)(d) (referred to by Commenter 01 as "1304(C)(2)(d) Offsets") are unlawful under the CAA. The commenter states that 1304(C)(2)(d) Offsets are created by a reduction in a source's allowable emissions that were fully offset in a previous action. Commenter 01 states that 1304(C)(2)(d) Offsets are adjusted to reflect otherwise required reductions, may only be used

to offset contemporaneous emission increases at the facility, and cannot be banked for future use. Commenter 01 further asserts that 40 CFR 51.165(a)(3)(ii)(J) does not relate to creditable emission reductions and that even that provision, through a cross-reference to the definition of "actual emissions" at 40 CFR 51.165(a)(1)(xii), allows permitting agencies to "presume that source-specific allowable emissions for the unit are equivalent to the actual emissions of the unit."

Commenter 06 similarly asserts that while 40 CFR 51.165(a)(3)(ii)(J) requires offsets to be determined by summing the difference between the allowable emissions after the modification and the actual emissions before the modification (as defined in paragraph (a)(1)(xii)), paragraph (a)(1)(xii)(C) allows the MDAQMD to presume that source-specific allowable emissions for the unit are equivalent to the actual emissions of the unit.

Therefore, Commenters assert, 1304(C)(2)(d) Offsets and the potential-to-emit to potential-to-emit or potential-to-potential (PTE-to-PTE) test are valid and consistent with sections 173(c)(1), 173(c)(2), and 182 of the CAA and the implementing regulations at 40 CFR 51.160–165.

Response to Comment A.2.1: The EPA disagrees with the assertion that the EPA made an erroneous finding that 1304(C)(2)(d) Offsets are inconsistent with statutory and regulatory requirements. As the EPA previously explained in the 2023 LA/LD and reiterated in our proposed action for the FIP, 1304(C)(2)(d) Offsets are inconsistent with the CAA and the EPA's regulations because they allow facilities to satisfy major NSR offset obligations using a baseline of allowable emissions before construction rather than a baseline of actual emissions before construction. We provide a more detailed explanation below.

CAA sections 173(a)(1)(A) and 173(c)(1) require that NNSR permits issued by states (or local air districts) pursuant to EPA-approved SIPs must require all proposed new or modified major sources that trigger NNSR to obtain sufficient offsetting emissions reductions. For example, section 173(c)(1) requires owners or operators of new or modified major stationary sources to obtain emission reductions that "assure that the total tonnage of increased emissions of the air pollutant from the new or modified source shall be offset by an equal or greater reduction, as applicable, in the actual emissions of such air pollutant from the same or other sources in the area."

²⁸ The CBD Consent Decree deadline was November 29, 2024, until CBD and the EPA agreed to extend the deadline, following the EPA's showing of need for an extension. Despite this extension, the EPA maintains that the extension of the CBD Consent Decree deadline to January 10, 2025, is still an insufficient amount of time to act on the MDAQMD's submittal and narrow the scope of the FIP before the deadline to finalize it.

²⁹ *Keystone-Conemaugh Projects LLC v. EPA*, 100 F.4th 434, 447 (3d Cir. 2024). The court further stated that "... if the EPA were required to act on each and every SIP revision submitted before it could issue a FIP, an untenable scenario could ensue. For instance, if a state were to submit multiple inadequate SIP revisions, it could effectively nullify the EPA's ability to issue a FIP and thus delay the implementation of any emission limits." (FN7)

³⁰ See, *Ariz. ex rel. Darwin v. United States*, 815 F.3d 519, 543–544 (9th Cir. 2016), in which the Ninth Circuit Court of Appeals upheld the EPA's combined partial SIP disapproval and FIP, which the agency promulgated to meet a consent decree deadline stemming from a previous finding of failure to submit. The court stated that "it is unlikely that a different outcome would have resulted if EPA had provided [the State] with additional time to correct its ... SIP ... [the State] made no effort to correct its SIP in light of these comments. There is no reason to think it would have done so after the Final Rule disapproving the SIP issued either."

³¹ See 40 CFR part 70, appendix A.

³² 42 U.S.C. 7410(a).

³³ *Center for Biological Diversity et al., v. Regan*, No. 3:22-cv-03309-RS (N.D. Cal.). This consent decree is also available in the docket for this action.

(Emphasis added.)³⁴ Rule 1304(C)(2)(d) is inconsistent with section 173(c)(1) because it allows sources that have offset their allowable emissions at any point in time to avoid the CAA obligation to offset future increases in actual emissions from future major modifications. The EPA also disagrees with Commenter 01's assertion that Rule 1304(C)(2)(d) is consistent with CAA section 173(c)(2). In addition to the phrase referenced by the commenter, CAA section 173(c)(2) also states that “[i]ncidental emission reductions which are not otherwise required by this chapter shall be creditable as emission reductions for such purposes if such emission reductions meet the requirements of [CAA section 173(c)(1)].”

The regulations at 40 CFR 51.165 require the District to use actual emissions as the baseline for determining the total tonnage of offsets that must be obtained by an owner or operator of a stationary source undergoing NNSR permitting. 40 CFR 51.165(a)(3)(i) requires:

[T]hat the offset baseline shall be the *actual* emissions of the source from which offset credit is obtained where . . . [t]he demonstration of reasonable further progress and attainment of ambient air quality standards is based upon the actual emissions of sources located within a designated nonattainment area for which the preconstruction review program was adopted. (Emphasis added.)

Moreover, under 40 CFR 51.165(a)(3)(ii)(f), which the EPA codified in 2002, SIPs “shall . . . provide that” “[t]he total tonnage of increased emissions . . . that must be offset . . . shall be determined by summing the difference between the *allowable* emissions *after* the modification (as defined by paragraph (a)(1)(xi) of this section) and the *actual* emissions *before* the modification (as

defined in paragraph (a)(1)(xii) of this section)[.]” (Emphasis added.)

Although Commenters 01 and 06 cite 40 CFR 51.165(a)(1)(xii) as authority to assert that MDAQMD is allowed to presume that the source-specific allowable emissions for a unit are equivalent to the actual emissions of the unit, any flexibility allowed under that provision is limited by section 40 CFR 51.165(a)(3)(i), which requires states or air districts that base reasonable further progress (RFP) and attainment planning on actual emissions³⁵ to use actual emissions as the baseline for all offset purposes.³⁶ The MDAQMD's RFP and attainment demonstrations are based on actual emissions, not allowable emissions.³⁷

The EPA also disagrees with Commenter 01's suggestion that the EPA erroneously relied on 40 CFR 51.165(a)(3)(ii)(f) in its disapproval of Rule 1304(C)(2)(d) because that paragraph “addresses calculating emission increases[,] not creditable emission reductions.”³⁸ Both provisions require the use of actual emissions as a baseline to calculate either the offset obligation (emission increase) or the satisfaction of that obligation (credit for emissions reductions), and the commenter does not dispute that 40 CFR 51.165(a)(3)(i) requires that emissions reductions for offset credits must use actual emissions as a baseline if actual emissions are used to demonstrate reasonable further

progress and attainment. The MDAQMD's RFP and attainment demonstrations are based on actual emissions—not allowable emissions.³⁹

Based on the requirements of the CAA and its implementing regulations regarding offsets,⁴⁰ Rule 1304(C)(2)(d) does not ensure that the required quantity of emissions associated with a major modification in the MDAQMD will be offset and the provision is therefore not approvable in the SIP. Accordingly, the EPA must promulgate a FIP that contains the requirements stated in the CAA and its implementing regulations. The MDAQMD regulates an area that is classified as a Severe ozone nonattainment area and a “Moderate” PM₁₀ nonattainment area. It is important that sources in the nonattainment area make real reductions in emissions to offset emissions increases consistent with the goal of bringing the area into attainment for these air pollutants.

Comment A.2.2: Commenter 01 states that although 1304(C)(2)(d) Offsets result from reductions in allowable emissions, “they produce real reductions in actual emissions.” The commenter states that to “originally secure the allowable emissions, the facility had to previously effect permanent actual emission reductions” either by curtailing its own emissions or by purchasing emission reduction credits. The commenter states that if the facility agrees to permanently reduce those offset allowable emissions, the permanent emission reductions continue to exist. Commenter 01 then states that where those emission reductions “exceed the volume of reductions required to sufficiently offset historical actual emissions (*i.e.*, the facility was able to curtail the source's emissions below the now eliminated allowable emission levels), those reductions exceed the obligation to assure that the total tonnage of increased emissions of an air pollutant from the new or modified source is offset by a reduction of actual emissions of that air pollutant in accordance with 42 U.S.C. 7503(c)(1) and in the quantities required by 42 U.S.C. 7511a.” Commenter 01 further states that Rule 1304(C)(2)(d) complies with 42 U.S.C.

³⁴ In *New York v. EPA*, a case regarding the applicability of NSR requirements, the U.S. Court of Appeals for the District of Columbia held that “the plain language of the CAA indicates that Congress intended to apply NSR to changes that increase actual emissions instead of potential or allowable emissions,” when describing the definition of the term “modification” in CAA section 111(a)(4). 413 F.3d 3, 40 (D.C. Cir. 2005). CAA section 173(c)(1) is at least as clear as CAA section 111(a)(4) regarding the import of using actual emissions for baseline purposes—it specifically uses the term “actual emissions,” and it omits terms like “potential to emit,” “emission limitations,” or similar references when addressing the baseline. Although the D.C. Circuit did not construe the Act's offset requirement at section 173(c)(1), its interpretation of a similar statutory provision bearing on when a proposed source's emissions increases trigger the need for an NSR permit, CAA section 111(a)(4), is instructive.

³⁵ See 86 FR 24809, 24813 (May 10, 2021), “The 2018 SIP Update explains that 2012 ‘stationary source emissions reflect actual emissions reported from industrial point sources’ and include stationary aggregate sources, such as gasoline dispensing facilities . . . MDAQMD Rule 107, ‘Certification of Submissions and Emission Statements,’ require[s] all stationary sources within the nonattainment area that emit more than 25 tons per year (tpy) or more of VOC or NO_x to report and certify annual emissions.” The MDAQMD does not assert or document use of allowables for RFP or attainment.

³⁶ Furthermore, Commenter 01 states the presumption incorrectly—40 CFR 51.165(a)(1)(xii)(C) allows the permitting authority to presume that allowable emissions are equivalent to the actual emissions, it does not say that the permitting authority may presume that the actual emissions are equivalent to the allowable emissions. This is important because a source's actual emissions will almost always be lower than its allowable emissions since an exceedance of the allowable emissions could constitute a violation of the permit.

³⁷ MDAQMD's 2008 and 2015 ozone NAAQS attainment plans are based on actual emissions. The 2008 ozone NAAQS plan is available at: https://ww2.arb.ca.gov/sites/default/files/classic/planning/sip/planarea/wmdaqmp/2016sip_mdplan.pdf, pp. 7, 34 (EPA approved this plan, see 86 FR 53223 (September 27, 2021)). ⁴⁰ See *e.g.*, CAA sections 173(a)(1)(A), 173(c)(1) and 40 CFR 51.165(a)(3)(i), 40 CFR 51.165(a)(3)(ii)(G), and 40 CFR 51.165(a)(3)(ii)(f).

7503(c)(2) by identifying excess emission reductions and credits that exceeds the law's requirements as an available offset.

Moreover, Commenter 05 believes that emissions that were previously offset under the MDAQMD's rules represent actual emission reductions as required by CAA section 173(c)(1) and can be used for calculating emission reductions pursuant to Rule 1304(C)(2)(d). Commenter 05 asserts that fully offset emissions are not "paper reductions" because they represent actual emission reductions that are banked and used following approved regulatory procedures.

Response to Comment A.2.2: The EPA does not agree with the comment that 1304(C)(2)(d) Offsets result in real reductions in actual emissions, as required by the Act. Rule 1302(C)(2)(d) requires that (i) a federally enforceable emission limitation specify the PTE for the specific Emissions Unit; (ii) the resulting emissions change result in a decrease in emissions from the emissions unit; and (iii) any excess Simultaneous Emissions Reductions (SERs) generated from a calculation using the Rule are not eligible for banking. For emissions units that have allowable emissions limits that were fully offset at some point in the past, Rule 1304(C)(2)(d) allows *any* reduction in a facility's *allowable* emissions to be used to avoid CAA requirements to offset *actual* emissions increases.⁴¹ As a hypothetical example, under MDAQMD Rule 1304(C)(2)(d), a facility might at the time of its original construction, "secure the allowable emissions," (using the commenter's phrasing) in the amount of 200 tons per year (tpy) through "permanent actual emission reductions" in that amount. If the facility subsequently submits a permit application to construct a project that would increase its actual emissions by 40 tpy, Rule 1304(C)(2)(d) allows the facility to decrease its allowable emissions limit of 200 tpy by a nominal amount, even just 1 tpy or less, to establish that the project would result in an "emissions decrease," rather than the actual emissions increase of 40 tpy that would actually occur and that would be subject to a requirement to offset the increase in actual emissions.⁴² Rule

1304(C)(2)(d) is contrary to the CAA because it allows increases in actual emissions without *any* offsetting reductions in actual emissions. In other words, Rule 1304(C)(2)(d) allows real increases in emissions to be added to the air without requiring any offsetting decrease in real emissions.

It should also be noted that, in the hypothetical example presented in the previous paragraph, although the facility would have offset 200 tpy of emissions at the time of its initial construction by obtaining or surrendering 200 tpy of emissions reduction credits ("ERCs"), it used those ERCs to obtain a 200 tpy allowable emissions limit in that project.⁴³ Therefore, those ERCs are no longer available to offset subsequent increases in actual emissions resulting from future construction and modification projects. According to Commenter 01, Rule 1304(C)(2)(d) allows NNSR permit applicants to obtain permits by relying on previously relied upon emission reductions or previously surrendered emission reduction credits; however, because those emission reductions were used in a prior permitting action, they are not "surplus" under 40 CFR 51.165(a)(3)(ii)(G). 40 CFR 51.165(a)(3)(ii)(G) states: [The SIP] "shall further provide that . . . [c]redit for an emissions reduction can be claimed to the extent that the reviewing authority has not relied on it in issuing any [NNSR] permit . . . or the State has not relied on it in demonstrat[ing] attainment or reasonable further progress." Thus, 40 CFR 51.165(a)(3)(ii)(G) prevents facilities from re-using credits to obtain a permit for a major modification.

3. Comments Regarding EPA's 1996 Approval of 1304(C)(2)(d) Offsets

Comment A.3.1: Commenter 01 states that in 1996, EPA approved 1304(C)(2)(d) Offsets and that the associated 1995 technical support document explained that 1304(C)(2)(d) Offsets constitute real reductions in actual emissions, are not otherwise required by the CAA (once adjusted) and comply with CAA section 173. The commenter also states that since 1996 neither the relevant law nor the 1304(C)(2)(d) Offsets have materially changed.

Decision—Statement of Basis for Minor Modification to and Renewal of FOP Number: 104701849 For: High Desert Power Project, LLC." December 21, 2022, p. 7.)

⁴³ These required offset quantities do not reflect the adjustment based on the area's nonattainment, which would require an even greater quantity of offsets for higher levels of nonattainment. CAA 182(d)(2), 40 CFR 51.165(a)(9).

Commenter 01 further states that the proposed FIP is arbitrary and capricious because the EPA fails to explain the reversal of its 1996 position in approving the District's Rule 1304(C)(2)(d) Offsets. The commenter states that EPA's contention that 1304(C)(2)(d) Offsets allow reductions on paper that do not represent real emissions reductions and that sources must reduce actual emissions to below historic actual emission levels to generate offset credit are complete reversals of the positions the EPA took in 1996 when it determined that SERs, including 1304(C)(2)(d) Offsets, constitute real reductions in actual emissions that are not otherwise required by the CAA and offset credit could be lawfully generated from reductions of surplus, fully-offset allowable emissions. The commenter states that, while the Administrative Procedure Act (APA) allows the EPA to reverse its policy on the 1304(C)(2)(d) Offsets, the EPA must "display awareness that it is changing position and show that there are good reasons for the new policy."⁴⁴

Response to Comment A.3.1: The EPA's response to this comment serves as both our response to this comment in the context of the proposed FIP, the rulemaking for which the comment was submitted, and as the Agency's new final action to disapprove Rule 1304(C)(2)(d) in response to the Court of Appeals' ruling in the case *Mojave Desert Air Quality Management District v. EPA*, in which the Ninth Circuit granted petitioner MDAQMD's petition for review and remanded to the EPA "for further proceedings before the agency on an open record consistent with this decision."⁴⁵ The MDAQMD, in its comments on the EPA's proposal of the 2023 LA/LD, criticized the EPA's proposed rulemaking for failing to explain why the EPA approved similar provisions into the SIP in 1996 that it now finds deficient. The MDAQMD sought review of EPA's 2023 LA/LD action in the Ninth Circuit. The court agreed that the EPA failed to provide sufficient explanation in that action for the change in direction after 1996 and therefore directed the EPA to address the issue through further proceedings. Commenter 01—the MDAQMD—makes the comment again in the context of the FIP. Since both matters address the same subject, the EPA has determined that it is appropriate to use one notice

⁴¹ Rule 1304(C)(2)(d)(ii) requires that "the resulting Emissions Change from a calculation using this provision is a decrease in emissions from the Emissions Unit(s)," hence why a source must demonstrate a reduction in allowable emissions from the subsequent modification.

⁴² The example presented here is similar to a recent MDAQMD permitting action that the EPA described in the 2023 LA/LD. 88 FR 42258, 42263 (MDAQMD, "Preliminary Determination/

⁴⁴ Citing *Ass'n of Irrigated Residents v. U.S. Env't Prot. Agency*, 10 F.4th 937, 945 (9th Cir. 2021).

⁴⁵ Memorandum, *Mojave Desert Air Quality Management District v. United States Environmental Protection Agency*, 9th Circuit Court of Appeals No. 23–1411, September 5, 2024, p. 5.

to both respond to the MDAQMD's comments in the context of the FIP and to respond to the court's remand regarding the 2023 LA/LD disapproval of Rule 1304(C)(2)(d).

First, we note that significant regulatory changes occurred or were proposed in the 1990s, federally and in California, where the State and local air districts were implementing State legislation that was passed in 1988 to address air quality issues.⁴⁶ Later in this action, we discuss the CAA and regulatory requirements at the time of the EPA's October 1995 proposed approval and November 1996 final approval of the MDAQMD's NSR rules. We then describe the Agency's contemporaneous consideration of options for regulatory flexibility during the 1990's. These documents, taken together, provide context for the regulatory landscape that existed during the EPA's review and approval of the MDAQMD's rules in 1995–1996. We also analyze our 1996 approval of MDAQMD's offset rules in light of the EPA's 2002 final rulemaking revising significant aspects of the NSR program ("2002 NSR Reform Rule").⁴⁷ In sum, this analysis is sufficient for the EPA, now, to conclude that the EPA's 1996 approval of the MDAQMD's offset rules was inconsistent with the CAA and its implementing regulations. Based on the documents discussed in this response, the EPA apparently believed in 1996 that the District's rules, which required the application of Best Available Control Technology (BACT) and offsets for a modification on the PTE of the entire facility rather than the modification alone, were sufficiently stringent to satisfy federal requirements.⁴⁸ As we explain in this response and in our responses to comments A.2.1 and A.2.2, however, our justification in 1996 for approving MDAQMD rule provisions that were similar to Rule 1304(C)(2)(d) is deficient, the EPA's 2002 NSR Reform Rule did not include revisions that would ratify or authorize MDAQMD's approach, and therefore our 2023

disapproval of Rule 1304(C)(2)(d) is correct.

Federal Regulatory Scheme Regarding Offsets in Effect in 1996

On August 7, 1980, the EPA promulgated NSR rules for attainment and nonattainment areas.⁴⁹ The 1980 NSR rulemaking codified 40 CFR 51.18(j)(3)(i), requiring an offset baseline to be based on actual emissions of the source from which offset credit is obtained where demonstrations of reasonable further progress and attainment are based on actual emissions.⁵⁰ As stated in the rule's preamble, the EPA's rationale was, "to be consistent with RFP, sources must reduce their actual, rather than their allowable, emissions. Otherwise, sources could claim credit for offsets in situations where the offset would actually interfere with RFP."⁵¹ On November 7, 1986, the EPA promulgated NSR rules specifically for nonattainment areas at 40 CFR 51.165 and codified the text at 40 CFR 51.18(j)(3)(i) into 40 CFR 51.165(a)(3)(i), where it was in 1996, in 2023 (at the time of our LA/LD rulemaking), and today.⁵²

The EPA's 1980 NSR rulemaking also codified 40 CFR 51.18(j)(3)(g), allowing credit for emissions reductions only "to the extent that the reviewing authority has not relied on [the reductions] in issuing any permit under regulations approved pursuant to 40 CFR 51.18 or the state has not relied on [the reductions] in demonstrating attainment or reasonable further progress."⁵³ The EPA's 1986 NSR rulemaking codified the text at 40 CFR 51.165(a)(3)(ii)(G), where it was in 1996, in 2023 (at the time of our LA/LD rulemaking) and today.⁵⁴

Likewise, EPA guidance issued during the 1990s addressed the quantity of emissions to be offset. Specifically, in the proposed rulemaking action titled, "General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990," the EPA clarified that CAA section 173(c)(1) "provides that emissions increases from the new or modified source must be

offset by real reductions in actual emissions."⁵⁵

The EPA's 1995–1996 Rulemaking for the MDAQMD's 1993 and 1996 Adopted Versions of Rule 1304(C)(2)(d)

On October 27, 1993, the MDAQMD adopted a series of NSR rules, which CARB submitted to the EPA as a SIP revision on March 29, 1994.⁵⁶ On October 31, 1995, the EPA published a proposed action in the **Federal Register** to approve the rules contingent upon the MDAQMD's adoption and submittal, as a SIP revision, of revised rules that would correct a number of deficiencies that EPA had identified.⁵⁷ The EPA based its proposed "approval with a contingency and disapproval in the alternative" on a set of draft rules that the MDAQMD transmitted to the EPA on October 11, 1995 ("October 11, 1995 draft rules") that MDAQMD had not yet adopted or submitted to CARB.⁵⁸ The EPA's proposed action explained that the 1993 adopted version of the rules contained numerous deficiencies that precluded full approval but that the October 11, 1995 draft rules were intended to address those deficiencies and that the EPA's proposed approval was conditioned upon MDAQMD's adoption and submission of the revised rules.⁵⁹ Thus, the EPA's proposed rule and technical support document (TSD) summarized the rules as adopted on March 29, 1993, including bases for findings of rule deficiencies, as well as statements regarding the October 11, 1995 draft rules that the MDAQMD had

⁵⁵ 57 FR 13498, 13553 (April 16, 1992). The EPA further stated that if RFP and attainment plans "are based on allowable emissions, offset credit for reductions in allowable emissions . . . is appropriate, but will be deemed inadequate if there is not a real reduction in actual emissions that equals or exceeds, as applicable, the increase in emissions resulting from the operation of the major new or modified source." Id.

⁵⁶ Although EPA has not been able to locate a copy of the NSR rules as adopted by the MDAQMD in October 1993, we are able to determine the adoption date from the MDAQMD's headings on later versions of the rules that provide a chronology of adoption dates. The 1995 TSD and proposed rulemaking reference the submittal date. 1995 TSD at 2; 60 FR 55356.

⁵⁷ 61 FR 58133 (November 13, 1996). In the proposed rulemaking, the EPA proposed "to approve with a contingency, and disapprove in the alternative." 60 FR 55355 (October 31, 1995).

⁵⁸ 60 FR 55355.

⁵⁹ Id. ("The submitted rules contain a number of deficiencies that prevent EPA from approving them as revisions to the SIP. However, MDAQMD has agreed to correct these deficiencies, and has sent draft rules . . . to EPA which contain acceptable language. This proposed approval is therefore contingent upon MDAQMD adopting and submitting to EPA revised rules which correct the deficiencies identified in this document before EPA promulgates a final rulemaking on the submitted rules.")

⁴⁶ For example, the California Clean Air Act uses different offsets thresholds than the federal regulations. See California Health and Safety Code sections 40918, 40919, 40920, and 40920.5; compare to 40 CFR 51.165. California air districts must implement State requirements under California law and satisfy the federal requirements under the CAA and its implementing regulations. Any provision that conflicts with the CAA and its implementing regulations is not approvable.

⁴⁷ 67 FR 80186, 80205 (December 31, 2002).

See also, 57 FR 13498, 13552 (April 16, 1992) ("The EPA interprets section 173(a)(1)(A) to ratify current EPA regulations requiring that the emissions baseline for offset purposes be calculated in a manner consistent with the emissions baseline used to demonstrate RFP.")

⁵³ 45 FR 52746.

⁵⁴ 51 FR 40672; 40 CFR 51.165(a)(3)(ii)(G) (1996).

committed to adopt and submit to EPA before EPA finalized its rulemaking.

In the EPA's proposed action on this submission, the EPA concluded that MDAQMD's Rule 1306 "Calculating Emissions Changes" as adopted in March 1993 was deficient because the rule uses a source's pre-modification PTE rather than pre-modification actual emissions, as the baseline to calculate the offset requirement and that the method is not acceptable unless the source has already offset its entire pre-modification PTE.⁶⁰

In the 1995 TSD accompanying the EPA's proposed rule, the EPA further explained that Rule 1306 as adopted in March 1993 "has several deficiencies that prevent its full approvability by EPA" and provided a list of deficiencies, "along with the changes which would make the rule approvable." As stated in the 1995 TSD:

The rule uses a source's potential to emit as a baseline for calculating emissions changes, rather than its actual emissions. In general, use of potential to emit in this calculation is unacceptable, however, for most purposes in this rule it is acceptable. For example, the submitted rules require the application of BACT and offset for a modification if the PTE of the *entire source* (not just the increase caused by the modification) would exceed the applicable threshold after the modification. Thus, applicability is determined by the total PTE of the source, not the size of the calculated emissions change resulting from the modification. However, this method is not acceptable for calculating the amount of offsets required as the result of an increase, unless the source has already offset its entire PTE.⁶¹

Section 1305(A)(2)(b)(iii) of the proposed revision of the District's rules contains the necessary changes to these provisions.⁶²

⁶⁰ Id. at 55356 ("This section uses a source's pre-modification potential to emit (PTE), rather than its pre-modification actual emissions, as the baseline for calculating the offset requirement for major modifications in nonattainment areas. This method is not acceptable unless the source has already offset its entire pre-modification PTE. The District must amend the rule to calculate the offset requirement in this case as the source's new PTE minus the source's pre-modification actual emissions.")

⁶¹ 1995 TSD, p. 17.

⁶² Id. at 17. In March 1996, the MDAQMD adopted Rule 1305(A)(2)(b)(iii), which the EPA approved into the California SIP in November 1996, and is the equivalent of current Rule 1304(C)(2)(d). Rule 1305(A)(2)(b)(iii) stated: "For emissions increases from a Modification to a Major Facility the base quantity of Offsets shall be determined as follows: (a) When the Modification is a Major Modification to a Major Facility within a nonattainment area, the base quantity of Offsets shall be the amount equal to the difference between the Facility's Proposed Emissions and the HAE [historic actual emissions] unless the Facility's HPE [Historic Potential Emissions] has been completely offset in prior permitting actions pursuant to this Regulation; or (b) The amount equal to the difference between the Facility's Proposed Emissions, as modified, and the HPE."

(Emphasis in original.)

The statements in the EPA's proposed rule and TSD are brief. It appears, however, that we concluded that the MDAQMD's approach—using PTE (*i.e.*, allowable emissions) rather than actual emissions as a baseline to evaluate NNSR applicability for modifications—would be acceptable because it would require the MDAQMD to impose BACT and offsets requirements for any modification at a major source, regardless of whether the modification qualified as "significant," whereas the EPA's regulations apply BACT and Lowest Achievable Emission Rate (LAER) to facility modifications only if the source is already major and the emissions increase from the modification itself is "significant," or if the modification is itself above the applicable major source threshold. Therefore, it appears that applying this rationale, the EPA found that the MDAQMD's approach to determining NNSR applicability for modifications was at least as stringent as the federal approach and therefore was approvable.

As described in the EPA's final rulemaking, the MDAQMD adopted revised NSR rules on March 25, 1996, that CARB submitted as a SIP revision to the EPA on July 23, 1996.⁶³ The EPA's final rulemaking contains no additional analysis, but it simply states: "The submitted rules contain the changes necessary for approval, in a manner that is identical to that described in the TSD for the proposed approval." ⁶⁴ As part of this final action, the EPA approved MDAQMD rules, such as 1304(C)(1)(b), that allow SERs to be based on reductions in PTE (allowable emissions) and that allow such SERs to satisfy federal offset obligations.

Thus, we have been unable to discern in the EPA's 1995–1996 rulemaking documents any legal rationale or support for the MDAQMD's use of a PTE baseline to determine that the amount of offsets is acceptable if a "source has already offset its entire PTE." The statement is inconsistent with statutory and regulatory requirements that existed at the time (and are still in effect), such as CAA section 173, 40 CFR 51.165(a)(3)(i) and 40 CFR 51.165(a)(3)(ii)(G).⁶⁵ Furthermore, the EPA appears to have mistakenly concluded in 1995–1996 that the MDAQMD's approach for applicability would be sufficient to consistently

ensure issuance of NNSR permits that would be at least as stringent as required by federal law. First, as we have explained in our response to comment A.2.2, MDAQMD Rule 1304(C)(2)(d) allows facilities that are "fully offset" at any time in the past to increase actual emissions without having to offset those actual emission increases. These increases would be impermissible if MDAQMD applied the federal requirements.⁶⁶ Second, we note that the EPA's regulations at 40 CFR 51.165(a)(2)(ii) allow states to use different calculation methodologies to determine applicability upon the state's demonstration that its approach is at least as stringent as the EPA's approach. The EPA's regulations do not contain a similar provision that would allow states to apply an alternative methodology to calculate the quantity of required offsets based on a demonstration that the alternative is more stringent.

The 80 Percent Compromise for Calculating Emissions Increases

In a letter dated October 30, 1995, from the EPA to the MDAQMD, transmitting the 1995 TSD that provided the EPA's analysis of the MDAQMD's October 1993 NSR rules, the EPA referenced an NSR flexibility option that the EPA, the MDAQMD, and CARB had discussed since at least 1993. The flexibility option pertains to how an applicant could calculate emissions changes at its facility, and it is therefore relevant to the offset generation and quantification issues in 1304(C)(2)(d). This portion of the EPA's response to comment A.3.1 focuses on that flexibility option, beginning with the earliest document EPA staff were able to locate on the subject.

A letter dated September 8, 1993, from CARB to MDAQMD documents that the EPA had provided a comment regarding the MDAQMD's calculation procedures during MDAQMD's process of amending its NSR rules.⁶⁷ Specifically, the letter documents that the EPA had identified a conflict in determining "historic emissions" (*i.e.*, emissions that could be used as a baseline in evaluating emissions changes resulting from facility modifications) between federal requirements requiring the use of actual

⁶⁶ We provide a hypothetical example in our response to comment A.2.2 and reference the real-world example that we described in our 2023 LA/LD, wherein a facility that should have been required to obtain offsets under the federal requirements was exempted from doing so under MDAQMD Rule 1304(C)(2)(d).

⁶⁷ CARB Letter to MDAQMD, dated September 8, 1993.

⁶³ 61 FR 58133.

⁶⁴ Id. at 58134.

⁶⁵ As noted elsewhere, the provision is also inconsistent with 40 CFR 51.165(a)(3)(ii)(J), which the EPA promulgated in 2002.

emissions and California guidelines that allowed PTE. In an apparent attempt to resolve this conflict, the letter references a “compromise” that “will allow potential to emit to be used in some instances but actual emissions in others.”⁶⁸ The letter included an enclosure with text for the MDAQMD to include in its Rule 1306 stating that the EPA had “tentatively” agreed to the draft text. Included in the draft text are definitions for the terms “historic emissions” and “normal operations” as follows:

Historic Emissions: The potential to emit of an existing emissions unit prior to modification. In determining the potential to emit, daily emission limitations shall be treated as part of an emission unit’s design only if the limitations are representative of normal operations, or, if the facility has provided offsets for previous permitting actions . . .

Normal Operations: Usual or typical daily operating of an emissions unit resulting in actual emissions which are at least 80% of the specific limits contained in the unit’s authority to construct or permit to operate.

Based on this letter, it appears that the EPA agreed to allow emissions changes from facility modifications to be calculated using a baseline of 80 percent of a facility’s allowable emissions, rather than actual emissions, which, as the letter acknowledges, was the federal requirements for such calculations. The letter does not provide sufficient detail to determine whether the calculations in question were for the purpose of determining emissions changes for applicability or for determining the offset obligation or both. The letter also does not provide any legal analysis or support to justify the use of allowable emissions as a baseline in situations in which actual emissions are at least 80 percent of allowable emissions, in contrast to the EPA’s statutory and regulatory requirements to use actual emissions to calculate emissions changes when the air district uses actual emissions for reasonable further progress and attainment planning purposes.

Later, in the 1995 TSD transmittal letter, the EPA wrote:

The proposed rules contain one provision that should be removed prior to adoption and submittal of the rules. This provision, located at 1304(C)(3)(a) and 1305(B)(2)(b)(i), allows for reductions in a facility’s potential to emit to be used as simultaneous emission offsets if the facility’s actual emissions were equal to or greater than 80% of its potential emissions. EPA has discussed this provision with the California Air Resources Board and

both agencies agree that it should not be included in the District’s rules.⁶⁹

As explained earlier in this response, the EPA’s 1995 TSD (transmitted with this letter) also discussed the use of PTE as a baseline to calculate offset obligations, but it allowed that approach if a source had already offset its entire PTE. There is no explanation in the October 30, 1995 letter or the 1995 TSD to reconcile the EPA’s apparent position that PTE *could not* be used to calculate the offset requirement if actual emissions were equal to or greater than 80 percent of PTE (as expressed in the October 30, 1995 letter) with the EPA’s stated position that PTE *could be* used to calculate the offset requirement if the source’s PTE had been fully offset in a previous permitting decision (as stated in the 1995 TSD).

A subsequent document with the handwritten notation “Mojave Compromise,” is possibly relevant. This document appears to have been sent by CARB to the MDAQMD on November 14, 1995, and reflects discussions between EPA and the MDAQMD (“November 14, 1995 Memo”).⁷⁰ The document states:

General: Rule 1304, Section (C)(3)(a), states that “actual emissions reductions may be calculated using a facility’s “historic potential to emit” if the “historic actual emissions” of the emissions unit(s) prior to modification is greater than or equal to 80 percent of the “historic potential to emit” for that emission unit.

The ARB and the U.S. Environmental Protection Agency have agreed that in one specific case a facility may use an emission unit’s “historic potential to emit” in lieu of the emission unit’s “historic actual emissions.” Both agencies agreed that districts could use this “compromise” when determining the applicability of federal New Source Review. The intention of this “compromise” was to give a facility more flexibility when making this determination. It was not intended to be used when calculating the quantity of offsets required for mitigation by a facility. The use of “historic potential to emit” in lieu of “historic actual emissions” should only be used in the “federal netting process,” and it only applies to quantifying emissions increases.

As you know, 40 CFR 51.165 (a)(1)(vi), which defines “net emissions increase,” in general stipulates that all increases/decreases

must be actual emissions. This compromise allowed a facility to reduce the increase in emissions by a factor no greater than 20 percent. Unfortunately, the District has also applied the “compromise” provision when calculating emission decreases in the netting process.

The District has included the above provision in both Rules 1304 and 1305. The net effect of using the “compromise” when calculating emission decreases is that it generates “paper credits.” Further, Rule 1305, Section (B)(2)(b) proposes to allow the use of these credits to offset “actual” emission increases.

We strongly recommend that the District delete Subsection (C)(3)(a) from Rule 1304, and Subsection (B)(2)(b)(i) from Rule 1305. In addition, we recommend that definitions (V) “Historic Potential Emissions” and (DD) “Normal Operation” in your current Rule 1302 (Amended 10/27/93) be added to your proposed Rule 1301. Once these changes have been made, the District should apply the “compromise” provision as intended by the ARB and U.S. EPA.⁷¹

Based on the November 14, 1995 Memo, it appears that the EPA generally objected to the MDAQMD’s use of PTE as a baseline when calculating emissions decreases, either in the context of determining NSR applicability or calculating an offset obligation, but would allow the use of PTE as a baseline when calculating emissions increases if PTE was within 80 percent of actual emissions. However, these documents (CARB’s September 8, 1993 letter to the MDAQMD, the EPA’s October 30, 1995 TSD transmittal letter, and the November 14, 1995 Memo) contain no explanation to reconcile (i) the objection by CARB and the EPA to use of PTE to calculate emissions decreases because such an approach would “generate ‘paper credits,’” which could then be used to offset actual emission increases” (as stated in the November 14, 1995 Memo) with (ii) the acceptance by CARB and the EPA of the MDAQMD’s use of PTE to calculate simultaneous emission reductions if an emissions unit’s PTE had been fully offset in a previous permit action (as stated in the 1995 TSD).⁷²

In a letter dated January 26, 1996 from the MDAQMD to CARB, with a courtesy copy to the EPA, the MDAQMD proposes an alternative to the compromise that had previously been discussed among the three agencies.⁷³ The letter references the MDAQMD’s new text for Rules 1303 and 1304 as “attached,” but the EPA has not been

⁶⁹ 1995 TSD, Transmittal Letter.

⁷⁰ CARB Memo, November 14, 1995. The November 14, 1995, CARB Memo appears substantially similar to an October 20, 1995, CARB Memo, apparently transmitted by CARB to the EPA, that reflects CARB’s comments regarding the MDAQMD’s draft rules, specifically Rule 1304 “Emissions Calculations” and Rule 1305 “Emissions Offsets.” The October 20, 1995, CARB memo also references communications between the EPA, CARB, and the MDAQMD regarding MDAQMD Rules 1304, “Emissions Calculations” and 1305, “Emissions Offsets.”

⁷¹ November 14, 1995, CARB staff comments on 1995 MDAQMD draft Regulation XIII.

⁷³ Letter from the MDAQMD to CARB, dated January 26, 1996.

⁶⁸ Id.

able to locate these attachments. The EPA is also unable to locate copies of the October 11, 1995 draft rules; therefore, the EPA is unable to track revisions to the rules MDAQMD adopted in October 1993 to the rules MDAQMD adopted in March 1996, which the EPA approved in November 1996. Although it is apparent from the correspondence among the EPA, CARB and the MDAQMD that the agencies were involved in multi-year discussions over the calculation of emissions increases and decreases and the application of emissions decreases to new projects, it is not clear why the EPA and CARB objected to the use of PTE to calculate offsets (as well as emissions decreases related to the applicability analysis) but allowed the use of PTE to calculate offsets if emissions units had been fully offset as part of previous permitting action.

1996 Proposal To Revise the Federal NSR Rules and 2002 NSR Reform Rule

While EPA Region 9 was reviewing the MDAQMD's proposed revisions to its NSR program in 1993–1996, the EPA was also in the process of revising its nationally applicable NSR regulations for major stationary sources in both attainment and nonattainment areas based on input from stakeholders from industry, state and local agencies, and environmental organizations. Towards this end, in July 1996, the EPA published in the **Federal Register** a proposed rulemaking to comprehensively overhaul the federal NSR program for the first time in 15 years.⁷⁴ The proposal provides a roughly contemporaneous insight to concepts that the EPA was exploring to provide states greater flexibility to customize their own NSR programs.⁷⁵ One such concept was a revision to the NSR regulations to allow the use of the PTE-to-PTE test for NSR applicability as well as for calculating offsets, netting credits, and other emissions reductions credits.⁷⁶ This proposal, referred to as the “Exhibit B approach,” would provide sources with the alternative of using their hourly potential emissions to determine baselines for NSR applicability and other NSR purposes.⁷⁷ The EPA acknowledged in the proposed rulemaking that the Exhibit B approach would provide flexibility requested by industry, but we expressed concern for environmental consequences, providing examples of how the proposal could lead to increases in actual emissions

that would escape NSR review.⁷⁸ The EPA's analysis of potential environmental impacts of the proposal revealed that, in the two states studied, actual emissions comprised 30 to 86 percent of allowable emissions, depending on source category and pollutant.⁷⁹ Because the analysis showed actual emissions were substantially below allowable emissions levels, the use of an emissions baseline based on actual or allowable emissions could significantly impact whether a source would need to comply with NSR requirements.

The EPA's 1996 proposed rulemaking included the following analysis of a PTE-to-PTE test for calculation of offsets:

[Exhibit B's] proposal on offsets may conflict with the 1990 Amendments. That is, section 173(c) of the Act requires that a source secure sufficient emissions reductions to assure that “the total tonnage of increased emissions of the air pollutant from the new or modified source shall be offset by an equal or greater reduction . . . in the *actual emissions* of such air pollutants.” Thus, offsetting emissions reductions (including emissions reduction credits used for offsets) must be calculated in terms of actual emissions.⁸⁰

(Emphasis in original.)

The EPA sought comment in the 1996 proposed rulemaking as to whether the Exhibit B proposal “is consistent with the air quality planning goals of the NSR program. That is, while Exhibit B could allow significant increases in actual emissions to be unreviewed, section 173 of the Act required offsets to be based on actual emissions.”⁸¹

After seeking comment on the Exhibit B proposal in 1996, the EPA ultimately decided not to adopt it for reasons explained in the 2002 NSR Reform Rule (which also added 40 CFR 51.165(a)(3)(ii)(J)). The EPA reiterated that the Exhibit B proposal would allow sources to “use this potential-to-potential test for NSR applicability, as well as for calculating offsets, netting credits, and other ERCs.”⁸² While acknowledging the “maximum flexibility” the PTE-to-PTE test would provide to existing sources, the EPA also re-stated concerns associated with the calculation methodology for calculating emission reductions to be used for netting or ERCs, stating that Exhibit B would allow facilities to

generate netting credits and ERCs for offsets based on potential hourly emissions, even if never actually emitted, which could allow greater actual emissions increases without any preconstruction review.⁸³

In the 2002 NSR Reform Rule, the EPA acknowledged that it was unable to determine the specific environmental impact from using a PTE-to-PTE test, but we observed that its analysis showed that typical source operation frequently results in actual emissions that are below allowable emission levels.⁸⁴ This observation reinforces concerns that a calculation methodology that relies on allowable emissions will fail to regulate actual emissions increases. Regarding the offsets implications of Exhibit B specifically, the EPA wrote in the response to comments that:

[The Exhibit B] methodology would also be problematic for generating ERCs, particularly for use as offsets. The use of potential emissions for offset credits is in direct conflict with the Act. Under section 172(c) of the Clean Air Act, emissions offsets must be based on reductions in actual emissions. Allowing sources to get credit for reductions in potential emissions would result in “paper” credits, and could allow sources to receive credit for reducing emissions that never actually occurred. Thus, our rules have not changed with regard to the calculation of reductions in actual emissions for offsetting purposes.⁸⁵

It is important to note that, along with rejecting Exhibit B, the 2002 NSR Reform Rule also codified at 40 CFR 51.165(a)(3)(ii)(J) a specific requirement that, for each major modification, a source must offset the difference between the allowable emissions after the modification and the actual emissions before the modification for each emissions unit.⁸⁶ The EPA's statement in the response to comments that it was not changing regulatory requirements for offset calculations establishes that the addition of new section 40 CFR 51.165(a)(3)(ii)(J) was merely a codification of an existing requirement for calculating offsets.⁸⁷

Conclusion: The EPA's 1996 SIP Action Was Inconsistent With the Act and Regulations

For the reasons we articulate today, and that we articulated in the 2023 LA/LD, the MDAQMD's program that we approved in 1996 is not consistent with the requirements of the Act and its implementing regulations. The EPA acknowledges that its 2023 disapproval of Rule 1304(C)(2)(d) is at odds with its 1996 approval of the MDAQMD's rules that allowed facilities to use emissions reductions that were previously relied upon as a basis for using a PTE-to-PTE test to not require a project to obtain offsets. The EPA's 1995 TSD and 1995–1996 rulemaking approving the MDAQMD's NNSR program do not explain how the EPA reconciled the MDAQMD's program's departure from the requirements that existed at the time (and continue to exist) in CAA section 173(c)(1), 40 CFR 51.165(a)(3)(i), 40 CFR 51.165(a)(3)(ii)(G), and the not-yet-codified 40 CFR 51.165(a)(3)(ii)(J), which the EPA promulgated in 2002. The EPA's 2023 LA/LD, however, does explain our disapproval of Rule 1304(C)(2)(d) in light of applicable statutory and regulatory requirements.

The preceding paragraphs describe the EPA's interest in exploring options for flexibility contemporaneously with our 1995–1996 rulemaking to approve MDAQMD's NNSR program. For example, from at least 1993 to 1996, the EPA, CARB, and the MDAQMD discussed how to calculate emissions changes for applicability, netting, and ERC purposes. The changes to the MDAQMD program, and the EPA's approval of them, occurred during the years following the passage of the California Clean Air Act (1988), the Federal Clean Air Act Amendments of 1990, and the numerous associated statutory deadlines for the EPA to act on revised NSR programs in the 1990s (similar to today, there were nearly three dozen air districts in California in the 1990s). In July 1996, between the EPA's proposed contingent approval of the MDAQMD's NNSR rules in October 1995 and its final approval of those rules in November 1996, the EPA proposed changes to the federal NSR program that contemplated a PTE–PTE test for NSR applicability and offsets. The timing of the many regulatory changes and proposals that occurred around the same time as the EPA's

approval of the MDAQMD's NNSR program is thus helpful context for understanding the EPA's unexplained approval of MDAQMD's provisions that conflict with CAA requirements. However, the EPA did not approve any regulatory revisions during the 1990s or thereafter that would allow the MDAQMD's program, as it existed in 1996 or 2023, to be approved. In 2002, the EPA clarified in its rejection of the 1996 Exhibit B proposal that we were not revising our rules regarding the calculation of reductions in actual emissions for offsetting purposes.⁸⁸ Furthermore, in 2002, the EPA codified 40 CFR 51.165(a)(3)(ii)(J) to make explicit in its regulations a requirement for major stationary sources to calculate their offset obligation using a pre-modification baseline of actual emissions (at least when the air district uses actual emissions for reasonable further progress and attainment planning purposes).

The MDAQMD's 1994, 2008, and 2015 attainment plans demonstrate RFP and attainment based on actual emissions, not allowable emissions.⁸⁹ Under 40 CFR 51.165(a)(3)(i), which was promulgated by the EPA in 1980, substantially predating the EPA's 1996 approval of the MDAQMD's NNSR rules, the offset baseline must be the actual emissions of the source from which the credit is obtained. Likewise, 40 CFR 51.165(a)(3)(ii)(G) prevents sources in the MDAQMD from relying on emissions reductions that were utilized in a prior permitting action. The EPA's 1996 approval of the MDAQMD's rules does not provide a justification for its conclusions that the MDAQMD's rules satisfied the offsetting requirements of the CAA or its implementing regulations. The EPA recognizes that we are changing our position as stated in our 1995–1996 rulemaking on the MDAQMD's rules on the specific question of whether Rule 1304(C)(2)(d) is consistent with the Act and the NSR regulations. This change in position is because the provisions that we approved in 1996 (which, as noted

above, are substantially similar to Rule 1304(C)(2)(d)) were not consistent with the CAA or our regulations at that time. As we wrote in the 1996 and 2002 NSR Reform rules, we are concerned about the potential environmental impacts of an NNSR program such as MDAQMD's that would use the PTE–PTE test along with or because of a unique offset generating scheme. The codification of 51.165(a)(3)(ii)(J) in 2002 meant that, when the EPA analyzed the MDAQMD's NNSR program for approvability in the context of the 2008 ozone NAAQS implementation rule, the program's inconsistency was apparent. MDAQMD Rule 1304(C)(2)(d) is not approvable, even though the EPA approved similar text in 1996.

4. Comments Regarding Reliance

Comment A.4.1: Commenter 01 states that while the EPA may reverse its policy on 1304(C)(2)(d) Offsets, the APA requires the EPA “‘to assess whether there were reliance interests, determine whether they were significant, and weigh any such interests against competing policy concerns,’ considering alternatives to accommodate such interests.”⁹⁰ The commenter states that the EPA is effectively nullifying valuable 1304(C)(2)(d) Offsets that were purchased with costly reductions in actual emissions on the EPA's promise that they could later be used to offset certain emission increases. The commenter also states that the proposed FIP does not consider these reliance interests or alternatives to the immediate invalidation of the 1304(C)(2)(d) Offsets that have existed with EPA's blessing for over 25 years.

Response to Comment A.4.1: The EPA has provided a comprehensive explanation in our response to comment A.3.1 regarding our changed position on the approvability of MDAQMD Rule 1304(C)(2)(d). Moreover, the EPA disagrees with the comment to the extent it is asserting that this action invalidates significant reliance interests. Commenter 01 cites *Dep't of Homeland Sec. v. Regents of the Univ. of California* as support for its assertion that there are reliance interests stemming from Rule 1304(C)(2)(d) and that the EPA failed to consider them in disapproving the provision.⁹¹ In *Regents*, the Supreme Court ruled against the government, finding that the government's decision to rescind the Deferred Action on Childhood Arrivals (“DACA”) program was arbitrary and capricious under the

FR 80241 (“Our decision is based primarily on our belief that the NSR program will work better as a practical matter and will produce better environmental results if all five of the new applicability provisions are adopted and implemented.”)

APA.⁹² DACA recipients (as well as their parents, under the related “DAPA” program) “enjoy[ed] . . . forbearance, work eligibility, and other benefits” under the programs.⁹³ The Supreme Court held that the government failed to provide a “reasoned explanation for its action” because it “failed to consider the conspicuous issues of whether to retain forbearance and what if anything to do about the hardship to DACA recipients.”⁹⁴

Regents, however, is materially distinguishable from the EPA’s disapproval of Rule 1304(C)(2)(d); the case does not support the MDAQMD’s assertions regarding reliance interests. In *Regents*, while the Attorney General had determined that the work-authorization aspect of the DACA program was illegal following an adverse judicial decision about the DAPA program, the Attorney General’s opinion was not comprehensive; *i.e.*, the Attorney General had “neither addressed the [deportation] forbearance policy at the heart of DACA nor compelled [the government] to abandon that policy.”⁹⁵ Further, as the Supreme Court found, the government had offered “no reason for terminating forbearance.”⁹⁶

In contrast, the EPA, in disapproving Rule 1304(C)(2)(d), proposed and finalized a comprehensive, outcome-controlling legal determination that Rule 1304(C)(2)(d) fails to comply with federal law. *Regents* does not stand for the proposition that agencies must consider reliance interests when federal law compels the outcome. Also, unlike the situation in *Regents*, the EPA provided an opportunity for public comment and has provided reasoned responses to all comments received. Thus, EPA fulfilled its obligations under the APA.

Furthermore, the commenter’s characterization of 1304(C)(2)(d) Offsets as “valuable” and as “purchased with costly reductions in actual emissions” is fundamentally a claim that sources hold compensable property rights in 1304(C)(2)(d) Offsets.⁹⁷ The EPA has repeatedly rejected similar assertions in the past and has never recognized a property right associated with emission

reductions to be used as offsets.⁹⁸ Also, it is unclear to what extent 1304(C)(2)(d) Offsets were, in fact, “purchased.” In the MDAQMD, as in all nonattainment areas, construction of a new major stationary source requires the facility owner to obtain emission reduction credits to offset the emissions from the new construction. Nonattainment NSR permits issued by the MDAQMD to such sources are contingent on the surrender of credits to offset emissions up to the allowable limits in the permits. The EPA acknowledges that facility owners purchase emission reduction credits and surrender them to obtain permits with allowable emissions limits to allow them to proceed with construction. The MDAQMD, however, claims that its rules should additionally allow those same emission reduction credits, which facility owners have already surrendered to obtain allowable emissions limits that authorized the facility to emit up to those levels, to be re-used to offset emissions increases associated with future construction projects. This system is inconsistent with federal NNSR requirements in multiple respects and therefore further delegitimizes any claim that 1304(C)(2)(d) Offsets are a property right with a compensable value.

First, as explained our response to comment A.2.2, the EPA’s regulations at 40 CFR 51.165(a)(3)(G) do not allow emission reduction credits to be re-used in subsequent permitting actions of, for example, facility modifications. The MDAQMD’s rules allow emission reduction credits that have already been applied to initial construction of a new facility to be used to offset emissions increases in the future and are therefore inconsistent with NNSR requirements. Second, as also explained in our response to comment A.2.1, the EPA’s regulations at 40 CFR 51.165(a)(3)(i)

allow the use of allowable emissions to be used as a baseline to calculate emission reductions that will be used as offsets only if demonstrations of RFP and attainment are also based on allowable emissions. MDAQMD’s RFP and attainment demonstrations are based on actual emissions; therefore, MDAQMD’s calculation of reductions to be used as offsets must also be based on actual emissions. Third, since 2002, the EPA’s regulations have clearly specified that emissions increases resulting from major modifications must be offset through a calculation that uses actual emissions before the modification. In fact, as explained above in our response to comment A.3.1, as part of the 2002 NSR Reform Rule, the EPA explicitly rejected a calculation that would use potential emissions as a baseline in this calculation. MDAQMD’s provision for 1304(C)(2)(d) Offsets clearly allow sources to offset emissions increases through reductions in allowable emissions and therefore fail to ensure compliance with the requirement that sources offset emissions increases through reductions in actual emissions. The fact that 1304(C)(2)(d) Offsets are inconsistent with federal law invalidates any claim of property right or compensable value.

Comment A.4.2: Commenter 05 states that the removal of Rule 1304(C)(2)(d) would “create a discriminatory situation, where a facility that has previously provided offsets for emission sources/processes is not differentiated from one that has received a permit without providing offsets.”

Response to Comment A.4.2: As explained in the response to comment A.4.1, Rule 1304(C)(2)(d) Offsets do not comply with CAA 173 and federal NNSR requirements for offsetting emissions increases at major stationary sources. The permit application process should be sufficient to enable the reviewing authority to determine the quantity and status of offset credits and reductions; diligent implementation of the federal requirements will avoid confusion and unfair outcomes. Rule 1304(C)(2)(d) Offsets are not valid under the CAA or the federal NNSR regulations. The FIP will bring the MDAQMD’s offset regulations into compliance with the CAA and federal regulations. The EPA disagrees that the removal of Rule 1304(C)(2)(d) would create a discriminatory situation.

Comment A.4.3: Commenter 08 states that MDAQMD Rule 1304(C)(2)(d) has developed a provision for major facilities to utilize existing allowable emissions as a mechanism to generate simultaneous emissions reductions during another permitting action and

⁹² Id. at 33.

⁹³ Id. at 2.

⁹⁴ Id. at 35.

⁹⁵ Id. at 28.

⁹⁶ Id.

⁹⁷ MDAQMD has made similar assertions in the past. See, *e.g.*, MDAQMD Regulation XIII Final Staff Report, March 22, 2021, page 44, footnote 188: “If the amount of offsets needed is calculated using the HAE of the emissions unit(s) involved many Facilities view this as a taking of property (namely the previously allowed PTE that was fully offset) without just compensation.”

⁹⁸ See, *e.g.*, Letter from John S. Seitz, Director, EPA Office of Air Quality Planning and Standards to Peter F. Hess, President, California Air Pollution Control Officers Association Joint Commission of Regulators & Business, July 8, 1996 (“Finally, your letter states that it is unfair for owners of banked ERC’s not to be able to sell or use them. However, please note that although ERCs are a limited authorization to emit, they are not and never have been an absolute property right.”); EPA, Office of Air and Radiation, “Improving Air Quality with Economic Incentive Programs,” January 2001, p. 80 (“Emission reductions and emission allowances generated, traded, and used in emission trading EIPs do not have property rights associated with them. They simply represent a limited authorization to emit for the entity holding the tradable reduction or allowance.”); see also South Coast Air Quality Management District (SCAQMD) Rule 2007, “Trading Requirements,” most recently approved into the California SIP at 73 FR 38122 (July 3, 2008), which states, in relevant part, at subsection (b)(3) that a RECLAIM Trading Credit “shall not constitute a security or other form of property . . .”

that this provision has been in effect since the 1990s. Commenter 08 urges the EPA to consider how the sudden change of a provision in effect for years will impact regulated facilities.

Response to Comment A.4.3: As explained above in the responses to comments A.2.1 and A.2.2, the MDAQMD's Rule 1304(C)(2)(d) is not consistent with the CAA or the EPA's NSR regulations. The EPA disagrees with the commenter's suggestion that the FIP represents a "sudden change," because the calculation method in Rule 1304(C)(2)(d) was specifically prohibited in the EPA's 2002 NSR Reform rule, which included 40 CFR 51.165(a)(3)(ii)(J).⁹⁹ Moreover, the MDAQMD and regulated entities in its jurisdiction have been aware of the EPA's position regarding Rule 1304(C)(2)(d) and the MDAQMD's practices regarding its emissions offset calculations since at least March 2021, when the MDAQMD responded to the EPA's concerns about Rule 1304(C)(2)(d) in the "Appendix G to Staff Report" document (an appendix to its 2021 final staff report and rules that the MDAQMD adopted), which is a public document. In December 2019, prior to the release of that document, the EPA wrote to the MDAQMD to inform the MDAQMD of its concern regarding the offset calculation method allowed under what is currently Rule 1304(C)(2)(d).¹⁰⁰ The EPA, the District, and CARB then committed significant resources to meeting, on a bi-weekly basis from approximately March 2020 to June 2021, for detailed discussions to address the deficiencies in the MDAQMD's NSR program. The EPA's obligation to promulgate a FIP is a consequence of a finding of failure to submit published in the **Federal Register** in February 2017; the subject of a lawsuit filed in the U.S. District Court for the Northern District of California in June 2022; and a court-ordered obligation as the result of a consent decree that was subject to a 30-day comment period as announced in the **Federal Register** on April 5, 2023.

Finally, the EPA notes that the FIP will apply prospectively, that is, to new major stationary sources and major modifications at existing major sources that commence construction after the effective date of the FIP.

5. Comments on Potential Impacts and Implementation of the FIP

Comment A.5.1: Commenter 01 states that the proposed FIP is arbitrary and capricious because the EPA fails to consider important aspects of the problem before the Agency, including the impacts of the proposed FIP on air quality. The commenter states that the EPA fails to substantiate its claim that the proposed FIP will result in greater emission reductions. The commenter states that this claim is false because Rule 1304(C)(2)(d) Offsets incentivize operators to voluntarily lower actual emissions to ensure the greatest volume of creditable emissions reductions for future projects. The commenter states that the EPA's disapproval of offset calculations allowed under Rule 1304(C)(2)(d) encourages source operators to retain older, dirty units and to replace those old and dirty units with comparably dirty units when the units fail. The commenter states that, under the proposed FIP, operators are particularly incentivized to run equipment to produce the maximum amount of emissions for the two years prior to applying for a modification to secure creditable emissions reductions.

Similarly, commenters 07, 08, and 09 state that MDAQMD Rule 1304(C)(2)(d) enables permit holders to plan for equipment upgrades and modernizations that will ultimately reduce actual major source emissions in the ozone nonattainment area. These commenters state that that removal of these offset provisions will hinder emission reduction projects and burden facilities with significant increased costs. Commenter 05 adds that the loss of previous offsets would create a disincentive for facilities to be upgraded to new technology. Commenter 09 states that regulated facilities may elect to cancel business expansions, facility improvements, or other major capital investments that would modernize equipment or otherwise benefit air quality.

Response to Comment A.5.1: The EPA disagrees with the comments. Preliminarily, we note that the commenters do not provide any analysis or support for their assertions that Rule 1304(C)(2)(d)'s approach to calculating offsets results in greater emission reductions than the federal requirements for offsets. We also note that in the 2002 NSR Reform Rule, we rejected an option similar to Rule 1304(C)(2)(d) that would have allowed sources "to generate netting credits and ERCs for offsets based on potential hourly emissions, even if never actually emitted," because we had determined

that such an approach "could sanction greater actual emission increases to the environment, often from older facilities, without any preconstruction review."¹⁰¹ In the 1996 NSR proposal, the EPA stated that its analysis of actual and allowable emissions in two states showed that "typical source operation frequently does result in actual emissions that are substantially below allowable emissions levels."¹⁰² In other words, the difference between actual and potential emissions may be up to 70 percent, depending on source category and pollutant.¹⁰³ Using actual emissions as a baseline to calculate emissions will reflect emissions increases and require offsets that would not be captured or regulated if allowable emissions were used as a baseline. As the EPA also stated in response to comments in the rulemaking for the 2002 NSR Reform Rule, "The use of potential emissions for offset credits is in direct conflict with the Act. Under section 172(c) of the Clean Air Act, emissions offsets must be based on reductions in actual emissions. Allowing sources to get credit for reductions in potential emissions would result in 'paper' credits, and could allow sources to receive credit for reducing emissions that never actually occurred."¹⁰⁴ Similarly, the MDAQMD Rule 1304(C)(2)(d) would allow sources to receive credit for "reductions" in emissions that do not actually occur and use them to offset actual emissions increases.

Moreover, we note that the federal regulations, such as 40 CFR 51.165(a)(3)(ii)(J) and 40 CFR 51.165(a)(3)(ii)(G), are more protective than Rule 1304(C)(2)(d). For example, 40 CFR 51.165(a)(3)(ii)(J) requires facilities to offset the difference between pre-project actual emissions and post-project allowable emissions that are associated with *each* major modification, and 40 CFR 51.165(a)(3)(ii)(G) requires those actual emissions reductions to be reductions that the facility has not relied upon in a prior permitting action.

The EPA also disagrees with comments claiming that the EPA's disapproval of Rule 1304(C)(2)(d) will encourage retention of older greater-emitting units and incentivize sources

¹⁰¹ 67 FR 80186, 80205.

¹⁰² 61 FR 38250, 38270.

¹⁰⁴ U.S. EPA Office of Air Quality Planning and Standards, Technical Support Document for the Prevention of Significant Deterioration and Nonattainment Area New Source Review Regulations (November 2002) at page I-6-11, available at https://www.epa.gov/sites/default/files/2015-12/documents/nsr-td_11-22-02.pdf.

⁹⁹ Rule 1304(C)(2)(d) is also inconsistent with the federal regulations promulgated in 1980.

¹⁰⁰ Memorandum, Lisa Beckham, EPA Region IX, to Brad Poiriez, MDAQMD, "Re: Mojave Desert Air Quality Management District New Source Review Program," December 19, 2019. A copy of the letter is available in the docket for this rulemaking action.

to operate and emit more. Rather, the FIP encourages sources to take enforceable limits that reflect the source's actual emissions. We note in addition that the CAA does not require sources to offset emissions that they do not emit or intend to emit. Regarding commenters' concern that the FIP would discourage emissions-reduction projects, we note that a project that reduces actual emissions would not be subject to NSR requirements to offset and install pollution controls. Installation of cleaner equipment is therefore not in jeopardy under the FIP. Only projects at major stationary sources that would increase emissions will be required to undergo review to determine if emissions increases will trigger requirements to install emissions controls and to offset emissions increases. It is therefore unclear how sources would be incentivized to retain older, dirtier equipment if the installation of newer, cleaner equipment would result in emissions decreases.

Finally, we disagree that Commenter 01's quotations from the 2002 NSR Reform Rule support its claims that Rule 1304(C)(2)(d) Offsets "incentivize operators to voluntarily lower actual emissions to ensure the greatest volume of creditable emissions reductions for future projects." The statements quoted by Commenter 01 are irrelevant to this action, because they do not involve offsets.

Comment A.5.2: Commenter 01 states that the EPA fails to address the practical impacts the proposed FIP will have on facilities. More specifically, the commenter states that it is unclear what a new minor facility, existing minor facility remaining under the applicability threshold, or a synthetic minor facility retaining its permitted limitation on PTE would need to submit to the EPA to show that it is not subject to the FIP requirements. The commenter requests that the EPA clarify whether all new or modified facilities would need to submit applications to the EPA and that it appears every permit application would be required to be duplicated in EPA Region 9's electronic permit application system to ensure that a minor facility has not become subject to the FIP. The commenter also states that while the MDAQMD has the staffing and expertise to properly analyze and process applications under the current SIP, it has neither the time nor the resources to devote to analyzing each application for FIP applicability purposes.

Response to Comment A.5.2: As explained in the EPA's proposed action, the FIP will apply "(i) If you propose to construct a new major stationary source

and your source is a major source of nonattainment pollutant(s)" or "(ii) If you own or operate a major stationary source and propose to construct a major modification, where your source is a major source of nonattainment pollutant(s) and the proposed modification is a major modification for the nonattainment pollutant."¹⁰⁵ The relevant terms in the quoted provisions are defined in the definitions section of the FIP, in section 40 CFR 52.285(b). If the applicant believes that its proposed project would constitute a new major source or a major modification under the FIP, it is required to submit an application to the EPA or the designated reviewing authority (if not the EPA) to obtain a permit under the FIP. It is the permit applicant's responsibility to comply with the FIP provisions. Failure to obtain a permit in accordance with the FIP prior to construction and operation of the new or modified source would be a federally enforceable violation of the FIP and the CAA. Under the FIP, existing minor facilities remaining under the applicability threshold and synthetic minor facilities retaining the permitted limitation on PTE would not need to apply for a permit under the FIP unless they make a modification that would constitute a major stationary source by itself.¹⁰⁶

Regarding Commenter 01's concern over the MDAQMD's time and resources to devote to analyzing applications, the EPA would be responsible for implementation of the FIP unless and until the MDAQMD is delegated authority to implement it. The MDAQMD would only be delegated authority to implement the proposed FIP if it requested delegation. Under the FIP as implemented by the EPA, applicants would need to submit their applications to the EPA, not to the MDAQMD.

Comment A.5.3: Commenter 04 states that this action is crucial for ensuring that regions with air pollutant concentrations above the NAAQS are protected from further environmental degradation. This commenter presents information on the detrimental impact of air pollution to health and notes that these effects are felt mainly by minority communities, such as low-income families or people of color, who are more likely to live in areas with higher pollution levels. The commenter supports approval of the FIP and states that the FIP will provide a necessary regulatory framework to manage and reduce emissions, enhancing efforts to

meet and maintain NAAQS in the region.

Response to Comment A.5.3: The EPA has noted the commenter's support of this action.

Comment A.5.4: Commenters 01, 05, 06, 07, and 08 express concern about the permit processing timeline under the proposed FIP. Commenter 01 states that pursuant to these timelines, approximately 90 percent of permit applications submitted to the MDAQMD are processed and issued within 90 days but that no similar timelines are proposed in the FIP and that this may result in a detrimental impact to sources, especially minor facilities, to the extent they cannot proceed with their modifications due to the necessity of awaiting an EPA determination. Commenter 05 states that the FIP creates the potential for delays in permit issuances due to conflicts between California law and the FIP on items such as the completeness determination, BACT determinations, and offsetting and the use of SERs, and Commenter 06 adds that the differences between the requirements under the SIP and the FIP will add a level of complexity to the permit application process and in ensuring facilities comply with the permits. Commenters 05 and 06 state that potential timing issues would have an adverse impact on the national security mission at Department of Defense facilities because a facility cannot proceed with construction until it receives two permits—one from MDAQMD, and one from EPA. Commenters 01, 07, and 08 request that the EPA provide timeline estimates for the proposed permit processing.

Response to Comment A.5.4: Neither the CAA nor the existing NNSR FIP that applies in tribal areas, which is very similar to the FIP, includes a requirement for the reviewing authority to render a decision on a permit application within a certain period of time. Likewise, the EPA has not incorporated any temporal requirement to the issuance of permits under this FIP. Under the CAA, the EPA is required to make a permit decision on a Prevention of Significant Deterioration (PSD) permit application within one year after the application is determined complete by the EPA.¹⁰⁷ While no analogous provision exists in Part D of Title I of the CAA, which governs Plan Requirements for Nonattainment Areas, the EPA will endeavor to follow the PSD permit application processing timeline when we review applications submitted under the finalized FIP. Also, should the MDAQMD receive delegation as a

¹⁰⁵ 89 FR 56237, 56247; 40 CFR 52.285(c)(1)(i)–(ii) (as proposed).

¹⁰⁶ Appendix S, section II.A.4(i)(c).

¹⁰⁷ CAA section 165(c) (42 U.S.C. 7465(c)).

reviewing authority of the FIP, it could consolidate its review under the FIP with its review under the SIP.

Finally, it is not clear how applicants for minor source permits—either new or modified sources—would be affected by the timing issue because the proposed FIP does not affect minor NSR.¹⁰⁸

Comment A.5.5: Commenter 01 states that the proposed FIP includes “de minimis” provisions that allow emissions increases of less than 25 tons per year aggregated with all other net increases from the facility over five consecutive calendar years to not require BACT or offsets. Commenter 01 states further that this provision is contrary to California law, which requires any emission unit that emits or has the potential to emit over 25 lbs per day to be equipped with BACT. The commenter also states that the Protect California Air Act of 2003 prohibits California air districts, including the MDAQMD, from “backing off” their NNSR programs to allow the implementation of requirements less stringent than those in place as of December 30, 2002. The commenter states that because the MDAQMD’s current SIP rules have been in place since before 1996, they cannot now be avoided, and that the FIP creates the potential for massive confusion and misunderstanding among regulated facilities that are located in the MDAQMD.

Response to Comment A.5.5: If the MDAQMD believes that the provisions in its current SIP, which EPA acted upon in the 2023 LA/LD,¹⁰⁹ will result in greater emissions reductions than the application of the de minimis provisions proposed in the FIP, there should be no conflict between the FIP and the MDAQMD’s SIP. The EPA is not required to apply state-level requirements even if, in some cases, the application of the state-level requirements would result in a scenario where emissions reductions would be greater than under federal requirements. Likewise, in the situation described in the comment, a permit applicant’s compliance with a more stringent MDAQMD requirement would enable the applicant to satisfy the federal requirement. The de minimis requirement that the commenter references, which is in CAA section 182(c)(6), states that a source cannot be considered “de minimis” for NNSR applicability purposes unless its net emissions increases over the past five consecutive calendar years are less than

25 tons per year.¹¹⁰ It is not clear how the federal requirement is “directly contrary” to the California law that, according to the commenter, “requir[es] any emissions unit which emits or has the potential to emit over 25 LBS per day to be equipped with BACT;” the California requirement sets a threshold for BACT, based on potential emissions of 25 pounds per day, whereas the federal requirement says that the source must undergo NNSR (e.g., satisfy BACT and offsets requirements) if net emissions increases over the last five consecutive calendar years exceed 25 tons per year. It would appear that in most, if not all, cases a source’s compliance with the California requirement would also comply with the federal requirement.

Finally, the EPA finds this comment from the MDAQMD confusing given that the MDAQMD stated elsewhere in its comments that its August 7 SIP submittal addresses all but one of the deficiencies EPA identified in the 2023 LA/LD, which the EPA understands to be a reference to Rule 1304(C)(2)(d).¹¹¹ The EPA’s 2023 LA/LD rulemaking also found the MDAQMD’s rules as adopted in 2021 to be deficient because they did not ensure compliance with CAA 182(c)(6). Based on discussions with the MDAQMD after we finalized the 2023 LA/LD, we had understood that the MDAQMD intended that its revised rules as adopted on March 25, 2024, and submitted to the EPA on August 7, 2024, would address the concerns identified in our LA/LD, including adding the missing de minimis provision. While our full review of those rules will be attentive to this issue, it is not clear why the MDAQMD would object to the inclusion of the de minimis provision in the FIP.

Comment A.5.6: Commenters 05, 06, 07, 08 and 09 state that permit holders may also face increased permit fees, increased permit processing times, and possible inconsistencies between the duplicate EPA permits and district permits. The commenters state that dual permits and their separate requirements will increase the complexity and potential for conflicting or unclear requirements and that this may lead to unintended compliance issues and

conflicts, which could compromise a source’s ability to comply as well as result in significant penalties.

Commenters 05, 07, and 08 request that the EPA work with the MDAQMD to develop a solution that would remove the requirement that sources obtain two permits.

Commenter 05 requests that the EPA confirm which agency (the MDAQMD or the EPA) will be the permitting authority under the proposed FIP rule or if the intention is for both the MDAQMD and the EPA to issue and enforce separate permits independently, including facility inspections and processing fees.

Response to Comment A.5.6: Unless the MDAQMD requests, and the EPA approves, delegation to implement the FIP or the MDAQMD addresses the deficiency in MDAQMD Rule 1304(C)(2)(d), major stationary sources and sources undergoing major modifications in areas within the jurisdiction of MDAQMD will need to obtain two permits—one under the EPA’s FIP, and one under the MDAQMD’s SIP. The MDAQMD, if delegated to implement the FIP, could consolidate its review under the FIP and its review under its SIP-approved NNSR program. The EPA considered options to avoid permit applicants having to obtain two permits, such as delegating the FIP to MDAQMD. However, the MDAQMD is not interested in implementing the FIP at this time. We also considered regulatory approaches that would reduce or eliminate the MDAQMD’s role in issuing permits to major stationary sources, but those options seemed likely to have unnecessarily disruptive outcomes and uncertain impacts on permitting for minor sources. We anticipate that applications for projects subject to the FIP will require essentially the same information as applications to be submitted to the MDAQMD, which should reduce the permitting burden on permit applicants. We also anticipate that the most significant difference between the two permit programs will be evaluation of offset obligations and requirements. We also hope that the MDAQMD’s newly submitted NNSR rules will narrow the scope of the FIP once we have approved these rules into the SIP, reducing EPA’s role in permitting major stationary sources within MDAQMD’s jurisdiction.

In response to Commenter 05’s inquiry regarding which agency will be the permitting authority, both the EPA and MDAQMD will be permitting authorities for major stationary sources. As explained previously, major sources subject to the FIP will need to obtain

¹⁰⁸ See 40 CFR 52.285(c)(1)(i)–(ii); 89 FR 56237, 56247.

¹⁰⁹ 88 FR 42258 (June 30, 2023).

¹¹⁰ The de minimis requirement at CAA section 182(c)(6) was a part of the 1990 CAA Amendments.

¹¹¹ MDAQMD August 8, 2024 comment letter: “USEPA and MDAQMD reached resolution of all but one of the purported deficiencies and the MDAQMD thereafter modified its NNSR rules on 3/25/2024.” In the comments Brad Poiriez, on behalf of the MDAQMD, provided during the July 24, 2024 public hearing, Mr. Poiriez mentioned the “pending SIP submission containing revisions to the NNSR rules that were agreed upon by the District and US EPA.” (Transcript page 16).

two permits—one under the EPA's FIP and one under the MDAQMD's SIP.

Comment A.5.7: Commenters 07 and 09 state that the proposed FIP will likely cause increased demand and prices for ERCs of nonattainment area pollutants. The commenters state that the proposed FIP may have significant impacts on local ERC demand and prices for emission offsets at a time where there are a few private holders of ERCs with relatively low quantities of available credits within the MDAQMD.

Commenter 09 provides examples of the prices of credits for PM₁₀ and Nitrogen Oxides (NO_x) in the South Coast Air Quality Management District to support its assertion that it is unclear how the FIP will address such potentially restrictive and unsustainable ERC market conditions within the MDAQMD. Commenter 09 states that there has been insufficient study of these potential ERC market conditions, additional emission offset costs, and related concerns on regulated facilities.

Commenter 04 recommends that the EPA work with the MDAQMD to ensure that the proposed FIP complements existing state and local efforts and states that coordination will help avoid any errors in the process. This commenter states that the NNSR rules should provide flexibility to accommodate the needs of businesses and economic development in the region.

Response to Comment A.5.7: The EPA is promulgating this FIP as required by a consent decree because the MDAQMD does not have a fully approved NNSR SIP, as required by the 2008 ozone NAAQS implementation rule.¹¹² The requirements that entities would be subject to under the FIP, which implements Appendix S, are the same requirements that regulated entities in other jurisdictions across the country are currently subject to and have been subject to for decades under SIP-approved programs that meet the minimum requirements of the CAA. The EPA recognizes the scarcity of offsets in the nonattainment area that would be covered by this FIP. The EPA will continue to work with the MDAQMD to assist in identifying offsets from sources in the nonattainment area that will be covered by this FIP.

Comment A.5.8: Commenter 08 states that the proposed FIP puts the time, monetary, and compliance burdens on facilities. Similarly, Commenter 09 states that the burdensome conditions that the FIP will cause will make it difficult for it and other regulated

facilities to make capital investments, equipment purchases, facility expansions, new employee hires, and other business decisions.

Response to Comment A.5.8: The EPA disagrees with the commenters' characterizations of the impacts of the FIP. Facilities in the MDAQMD are required to comply with federal NNSR requirements, including the requirements for offset quantification and generation, in the same manner as any other facilities in other jurisdictions that are located in areas not attaining the NAAQS. The FIP applies only when new or existing major stationary sources undertake facility modifications that will increase emissions above the applicable thresholds. The FIP is necessary to ensure that air quality in the MDAQMD, which is currently classified as Severe nonattainment for the 2008 and 2015 ozone NAAQS, as well as Moderate nonattainment for the PM₁₀ NAAQS, improves toward attainment of the NAAQS over time. At present, the MDAQMD's current rules allow for applicants to be excused from certain NNSR requirements, as described in the proposed FIP rulemaking and in the 2023 LA/LD.¹¹³

B. Summaries of Oral Comments Received During the Public Hearing and EPA's Responses

1. Comments on the Timing and Implementation of the FIP

Comment B.1.1: Commenter AA states that while he understands that the EPA is under a consent decree to act on the MDAQMD's NNSR provisions, the EPA's promulgation of a FIP seems to be rushed given the pending SIP submission that contains revisions to the NNSR rules that the MDAQMD, and the EPA agreed to during mediation following the MDAQMD's petition for review of the EPA's 2023 LA/LD action.¹¹⁴ The commenter states that EPA was copied on the submission of the MDAQMD's rules to CARB and thus has constructive notice of the MDAQMD's submission.

Commenter AA states that, to the extent that the EPA's rush to promulgate the FIP is spurred by the dispute between the MDAQMD the EPA over the use of fully offset allowable emissions as SERs at an existing major facility, the EPA should reconsider its disapproval of the MDAQMD's SER provision. The commenter states that the EPA has previously approved the MDAQMD's offset provision and that there is a reasonable reliance by

industry and the MDAQMD on this approval.

Response to Comment B.1.1: The EPA disagrees with the commenter's characterization that "the EPA's promulgation of a FIP seems to be rushed." In fact, the EPA's obligation to promulgate a FIP is more than five years overdue. As explained in our proposed rulemaking, on February 3, 2017, the EPA found that the State of California failed to submit a SIP revision for NNSR rules that apply to a Severe classification for the 2008 ozone NAAQS, as required under subpart 2 of part D of title 1 of the CAA and the 2008 Ozone SIP Requirements Rule.¹¹⁵ In addition to establishing deadlines for the imposition of sanctions, the EPA's finding of failure to submit triggered an obligation under CAA section 110(c) for the EPA to promulgate a FIP no later than two years from the finding, *i.e.*, by March 6, 2019.¹¹⁶ The EPA did not meet this deadline and was subsequently sued over its failure to do so.¹¹⁷ The lawsuit was resolved by a consent decree that underwent a 30-day public comment period before it was entered by the court on June 15, 2023. Under the terms of the consent decree, no later than November 29, 2024, the EPA must sign a notice of final rulemaking to approve a revised SIP submission, promulgate a FIP, or approve in part a revised SIP submission and promulgate a partial FIP for the Severe NNSR SIP element. On November 8, 2024, the EPA and CBD agreed to extend the deadline to January 10, 2025.¹¹⁸

As the commenter notes, MDAQMD adopted revised rules on March 25, 2024, and submitted them to CARB for transmittal to the EPA. On August 7, 2024, CARB submitted the revised rules to the EPA. The EPA is currently reviewing the submission as required under section 110(k) of the CAA. The EPA has confirmed that the submission still contains the deficiency associated with MDAQMD Rule 1304(C)(2)(d) that EPA has previously identified. For the EPA to discharge its obligation to promulgate a FIP, it would need to fully approve the MDAQMD's NNSR

¹¹⁵ 82 FR 9158 (February 3, 2017).

¹¹⁶ *Id.*

¹¹⁷ *Center for Biological Diversity et al., v. Regan*, No. 3:22-cv-03309-RS (N.D. Cal.). The consent decree, as entered by the court on June 15, 2023, is available in the docket for this action.

¹¹⁸ *Id.* Prior to court's entry of the 2023 CBD Consent Decree, the EPA published a notice in the **Federal Register** announcing the proposed settlement and providing an opportunity for interested persons to submit comments. 88 FR 20166 (April 5, 2023). The EPA received no comments on the proposed settlement. The parties' joint stipulation to extend the consent decree deadline is available in the docket for this action.

¹¹² *Center for Biological Diversity et al., v. Regan*, No. 3:22-cv-03309-RS (N.D. Cal.). This consent decree is also available in the docket for this action.

¹¹³ 88 FR 42258, 42260; 89 FR 56237, 56240.

¹¹⁴ 88 FR 42258.

submission, which is not possible due to the deficiency associated with MDAQMD Rule 1304(C)(2)(d). The EPA provides additional information that is relevant to this comment both specifically in our response to Comment A.1.1 in this Response to Comments and generally in our responses to the comments summarized in section A.1 of this Response to Comments, where we address the written comments we received that pertain to the EPA's obligation under the applicable consent decree.

As stated in Section III.H of the proposed rulemaking action, if the EPA approves CARB's recent SIP submittal, the approved MDAQMD rules would apply rather than the FIP, except for the portion of the FIP that had not been replaced by the approved SIP.¹¹⁹

Lastly, for the reasons we explain in our responses to comments A.4.1 through A.4.3 in this Response to Comments, we disagree with Commenter AA's assertion that the EPA should reconsider the FIP because of industry's reliance upon MDAQMD's Rule 1304(C)(2)(d).

Comment B.1.2: Commenter BB states that the EPA should postpone promulgating the FIP until after the EPA and the MDAQMD resolve their differences. Commenter BB states that there is only one pending issue that the two agencies need to resolve. Having to apply to two jurisdictions for permits will cause an undue burden to facilities like the one at which Commenter BB works.

Response to Comment B.1.2: It is not possible for the EPA to postpone finalizing the FIP while we attempt to resolve our differences with the MDAQMD. Section 110(c) of the CAA requires the EPA to promulgate a FIP for a deficient NNSR program. As the EPA wrote in the proposed action, the purpose of this NNSR FIP, which will regulate sources within the MDAQMD's jurisdiction, is to fulfill the EPA's statutory duty by the deadline established under a consent decree in a lawsuit brought against the EPA.¹²⁰ The consent decree compels the EPA to promulgate a FIP by November 29, 2024, unless the EPA can fully approve the MDAQMD's NNSR SIP program before that date.¹²¹ On November 8, 2024, the EPA and CBD agreed to extend the deadline to January 10, 2025.¹²² We

provide additional information on this issue in our responses to comments A.1.2 and A.1.3 in this Notice.

Regarding the burdens associated with compliance with the FIP and the MDAQMD's NNSR program, we direct the reader to our response to written comment A.5.6, where we respond to similar assertions from other commenters. Unless the EPA delegates authority to implement the FIP to the MDAQMD, permit applicants will need to apply to the EPA for an NNSR permit under the FIP and to the MDAQMD for a permit under the SIP. If, however, the MDAQMD requests delegation authority to implement the FIP, the EPA is willing to work with the MDAQMD for MDAQMD to obtain this delegation authority.

2. Comments on the 2023 LA/LD of the MDAQMD's NNSR SIP Submission

Comment B.2.1: Commenter AA states that the EPA previously approved the use of SERs, as offsets, which it subsequently disapproved in the 2023 LA/LD action. The commenter states that neither the 2023 LA/LD action nor the proposed FIP fully explain the EPA's policy reversal of MDAQMD Rule 1304(C)(2)(d), which regulates the use of SERs. The commenter states that allowable emissions reflected in a permit were backed by real reductions when the permit was issued and that the EPA has not explained why these reductions are no longer real, especially when the SERs are surplus adjusted and adjusted for Reasonably Available Control Technology (RACT) upon use. The commenter states that any leftover SERs created in the permitting action would never again be available for use, since SERs cannot be put into the ERC bank. Finally, the commenter states that CAA section 173(c)(2) expressly mandates that these SERs are creditable emission reductions (*i.e.*, offsets), that EPA recognized this in 1996, and that there has been no relevant change in the CAA or the implementing regulations since then.

Response to Comment B.2.1: Rule 1304(C)(2)(d) is not approvable under the CAA or the requirements for NNSR SIPs at 40 CFR 51.160–51.165. As we explain in our responses to comments A.2.1 and A.2.2, MDAQMD Rule 1304(C)(2)(d) is not consistent with section 173(c)(1) of the CAA, and it is not consistent with the requirements at 40 CFR 51.165(a)(3)(i), 40 CFR

51.165(a)(3)(ii)(G), or 40 CFR 51.165(a)(3)(ii)(J) because it allows facilities in the MDAQMD's jurisdiction to use reductions in past potential emissions, even if actual emissions associated with a modification would not be reduced at all, to offset emissions increases from construction of modified emissions units. This arrangement creates a loophole in the actual emissions accounting system established by the CAA and in place in the MDAQMD, which uses an attainment plan that is based on actual emissions.¹²³ The currency of the CAA is *actual emissions*, and that is true at *each* major modification undertaken at a facility.

As we explained in our response to comment A.2.1 in this rulemaking, Rule 1304(C)(2)(d) is inconsistent with CAA section 173(c)(1), 40 CFR 51.165(a)(3)(i), 40 CFR 51.165(a)(3)(ii)(G), and 40 CFR 51.165(a)(3)(ii)(J) because it allows a facility to offset emissions from a major modification with previously-relied upon offsets associated with a prior, distinct, project. Because Rule 1304(C)(2)(d) is at odds with these requirements, it is not approvable.

3. Comments on the Impact of the FIP on Reliance Interests

Comment B.3.1: Commenter AA is concerned that the EPA, in proposing the FIP, failed to recognize and assess the impact of the FIP on the MDAQMD and regulated industry. The commenter states that the MDAQMD and sources subject to the FIP have a reliance interest in the MDAQMD's Rule 1304(C)(2)(d) because, for over 25 years, the MDAQMD and its constituents have operated under the EPA's previously approved Rule 1304(C)(2)(d) procedures. The commenter states that SERs allowed under Rule 1304(C)(2)(d) may not be allowed under the FIP, and that this will impede the permitting process and the timeline for projects that have proceeded based on the understanding that MDAQMD's Rule 1304(C)(2)(d) was acceptable. Now, the commenter states, the EPA is reversing its position to eliminate these SERs without explanation or consideration of readily apparent alternative measures that could reduce the severity of its impact. The commenter states that the EPA's action does not reflect the

¹¹⁹ 89 FR 56237, 56243.

¹²⁰ *Id.* at 56240–56241.

¹²¹ *Center for Biological Diversity et al., v. Regan*, No. 3:22-cv-03309-RS (N.D. Cal.). This consent decree is also available in the docket for this action.

¹²² *Id.* Prior to court's entry of the 2023 CBD Consent Decree, the EPA published a notice in the **Federal Register** announcing the proposed

settlement and providing an opportunity for interested persons to submit comments. 88 FR 20166 (April 5, 2023). The EPA received no comments on the proposed settlement. The parties' joint stipulation to extend the consent decree deadline is available in the docket for this action.

¹²³ MDAQMD's 2008 and 2015 ozone NAAQS attainment plans are based on actual emissions. The 2008 ozone NAAQS plan is available at: https://ww2.arb.ca.gov/sites/default/files/classic/planning/sip/planarea/wmdaqmp/2016sip_mdplan.pdf, pp. 7, 34 (EPA approved this plan, see 86 FR 53223 (September 27, 2021).) The 2015 ozone NAAQS is available at: <https://www.mdaqmd.ca.gov/home/showpublisheddocument/9589/638084392297570000>, pp. 4–5, 24, 80.

cooperation between agencies that should be strived for, nor is it in compliance with the EPA's obligations under the APA.

Response to Comment B.3.1: As explained in our response to comment A.4.1, the EPA disagrees with the commenter's assertion regarding reliance interests. The EPA must promulgate a FIP because the MDAQMD has not adopted NSR rules that the EPA can fully approve.

Furthermore, it is not clear what the commenter means by the statement that EPA's proposed FIP fails to comply with EPA's obligations under the Administrative Procedure Act. To the extent that this comment is the same as comment A.3.1, the EPA's response is already stated in our response to that comment.

4. Comments on Other Potential Impacts of the FIP

Comment B.4.1: Commenter AA states that the proposed FIP is primarily silent about practical implementation issues, elaborating that the only discussion on that topic seems to be that two permits will be necessary and that the new permit for modified major facilities will need to use the EPA Region IX's electronic format.

Response to Comment B.4.1: Section 40 CFR 52.285(d)(3) of the FIP identifies the information that an applicant must provide to the EPA (or other reviewing authority, if delegated by the EPA) when submitting an application under the FIP.

Comment B.4.2: Commenter AA states that the EPA has expressed orally to the MDAQMD on a number of different occasions that it is concerned about various minor sources that will somehow escape NNSR. The commenter states that the EPA has especially expressed this concern for synthetic minor sources, where a permit limitation is the only thing rendering the facility "minor." The commenter states that, given the EPA's concern, it seems to be a bit of an oversight that specific provisions regarding review of minor sources are not addressed either directly or by reference.

Response to Comment B.4.2: The FIP and 40 CFR 51.165 generally apply to major stationary sources of air pollution, though synthetic minor sources must comply with definitions of "potential to emit" and provisions relating to the relaxation of these limits. At such time that a particular source or modification becomes a major stationary source or major modification solely by virtue of a relaxation in any enforceable limitation that was established after August 7, 1980, on the capacity of the source or modification otherwise to emit a

pollutant, such as a restriction on hours of operation, then the requirements of the FIP shall apply to the source or modification as though construction had not yet commenced on the source or modification.¹²⁴ The FIP also requires sources to identify any emission limitations taken by the source.¹²⁵ The FIP incorporates the definitions used in Appendix S to Part 51, including the definition of "Potential to Emit."¹²⁶ Synthetic minor sources that take a limit on their PTE are required to comply with this definition and the provisions relating to the relaxation of limits.

Comment B.4.3: Commenter BB states that, in contrast to the MDAQMD's requirement for a response or issuance of permits within 90 days of application, the EPA's permitting process lacks a specific timeline. The commenter states that this potential delay could significantly impact manufacturing facilities applying for permits, which could impact facility operation and planning. The commenter states that facilities want to comply, but adding layers to the already-approved SIP that is implemented by the MDAQMD will cause an added layer of undue burden on the facility.

Response to Comment B.4.3: We refer the reader to our response to comment A.5.4 for this comment.

Comment B.4.4: Commenter CC states that five out of the six issues the EPA identified in the 2023 LA/LD of the MDAQMD's NNSR program have apparently been resolved and that after CARB takes its action only one issue remains. The commenter states that it appears that issue is more based on interpretation, which does not seem resolvable by a FIP as far as the implications and impacts it will have on industry for submitting dual permits, having different permitting timelines, additional costs, and impacts on projects moving forward that maybe benefit clean air. The commenter suggests not implementing the FIP and instead encourages that it would be more beneficial for the EPA and the MDAQMD to work through their issues.

Response to Comment B.4.4: The EPA directs the reader to our responses to comments A.1.3, A.5.6, and A.5.8. The EPA received CARB's submission of the MDAQMD's most recent NNSR SIP on August 7, 2024. The EPA is currently reviewing the submittal. Because the MDAQMD did not address one of the deficiencies that the EPA identified in

the 2023 LA/LD, even if it did address all of the other deficiencies, the EPA would still need to promulgate a FIP by January 10, 2025, as required under the consent decree, because the EPA would still not be able to fully approve the MDAQMD's NNSR program into the SIP.¹²⁷

To the extent that the disagreement between the EPA and the MDAQMD is based upon interpretation of legal requirements, the FIP is a gap-filling tool that the EPA is required to promulgate when states or air districts do not implement CAA requirements into their permitting requirements. Because the MDAQMD refuses to implement CAA requirements regarding offsets, the EPA must implement a FIP that effectuates those requirements.

IV. Final Action

In this rulemaking, the EPA is taking final action in response to the court remand of EPA's June 30, 2023 LA/LD action.¹²⁸ The EPA is disapproving MDAQMD's Rule 1304(C)(2)(d) because this rule continues to be insufficient to meet requirements for determining the quantity of offsets needed to issue a permit for a major modification.¹²⁹ In this rulemaking, the EPA has provided additional explanation to support this disapproval of Rule 1304(C)(2)(d). This includes an analysis of the EPA's prior action in 1996, which shows that the EPA did not fully consider applicable requirements at that time and that there have also since been intervening changes to EPA regulations. These responses supplement the EPA's rationale provided for the 2023 LA/LD action.¹³⁰ EPA affirms its disapproval of Rule 1304(C)(2)(d) in the 2023 LA/LD action.¹³¹ In this new final action based on the additional reasoning provided in this rulemaking and the record the EPA compiled to support the 2023 LA/LD action.

In addition, in accordance with CAA section 110(c), the EPA is finalizing a FIP for the NNSR program for the MDAQMD portion of the West Mojave Desert ozone nonattainment area and the San Bernardino County and Trona

¹²⁷ On November 8, 2024, CBD and the EPA filed a joint stipulation to extend the original November 29, 2024 deadline to January 10, 2025. *Center for Biological Diversity et al., v. Regan*, No. 3:22-cv-03309-RS (N.D. Cal.). This consent decree and the parties' joint stipulation to extend the consent decree deadline is also available in the docket for this action.

¹²⁸ 88 FR 42258.

¹²⁹ The EPA's disapproval of Rule 1304(C)(2)(d) in this action, as in the 2023 LA/LD, is limited; the provision remains a part of the SIP, as justified under CAA sections 110(k)(3) and 301(a).

¹³⁰ *Id.*

¹³¹ *Id.*

¹²⁴ 40 CFR 52.285(c)(2) (incorporating Appendix S, section IV.F.).

¹²⁵ 40 CFR 52.285(b) (referencing the definitions in Appendix S including the definition of PTE in 40 CFR 52.285(e)(2)(ii)(C)).

¹²⁶ Appendix S section II.A.3.

Planning Area PM₁₀ nonattainment areas. The EPA is finalizing the FIP as proposed except for one change to address an oversight error that is in the proposed rule text: in 40 CFR 52.285(b)(1)(i), the definition of “actual emissions,” the EPA is inserting the text “, or for establishing a PAL under paragraph IV.K of 40 CFR part 51, appendix S” to the first sentence of the definition. The added text clarifies the terms that are to be used in establishing a Plantwide Applicability Limit (PAL), as described in Appendix S, which the FIP incorporates by reference.¹³² The EPA is not requesting public comment on the fix to this minor typographical error since it merely applies the text that is in Appendix S.¹³³

The FIP applies only to construction of new major stationary sources and major modifications at existing major stationary source in these nonattainment areas. The FIP implements statutory requirements in CAA sections 110(c)(1), 172(c)(5), 173, 179(b), 182(c) and (d), 189(a)(1)(A) and (e), 301(a), and 302.

The FIP will be directly implemented and enforced by the EPA. The FIP authorizes the EPA to delegate implementation of the FIP to the MDAQMD if the District requests such delegation. The FIP will apply until the MDAQMD revises its SIP to address deficiencies identified by the EPA and the EPA fully approves the MDAQMD's NNSR SIP.

As we explained in the proposal for this action, should the MDAQMD submit a SIP revision that corrects some, but not all, of the deficiencies identified in our June 30, 2023 rulemaking, the permit approval criteria for this FIP could be limited to the remaining deficiencies that the EPA identified.¹³⁴ As described in the proposal for this action, permit applicants would still need to comply with any portions of the FIP that remain after the EPA approves the MDAQMD's revised rules in the SIP. Likewise, if a court invalidates any one of these elements of the FIP, the EPA intends the remainder of this action to remain effective, as the EPA finds each portion of it to be appropriate even if one or more parts of it have been set aside.

¹³² See 40 CFR 52.285(d), “Permit approval criteria.”

¹³³ Furthermore, the EPA notes that the PAL provisions in the FIP are not likely to be utilized by any permit applicants because the MDAQMD no longer has a PAL program in its NSR rules.

¹³⁴ 88 FR 42264–42266; See also 87 FR 72434, 72438 (November 25, 2022).

V. Supporting Information

A. Policy on Children's Health

In 2021, the EPA updated its *Policy on Children's Health* to reflect that “children's environmental health refers to the effect of environmental exposure during early life: from conception, infancy, early childhood and through adolescence until 21 years of age.” In addition, the policy applies to “effects of early life exposures [that] may also arise in adulthood or in later generations.” In this action, the EPA is finalizing a program that would implement our federal regulations in the nonattainment areas under the MDAQMD. In so far as there is an impact from this action, it will be positive since the deficiencies in the District's program it is meant to rectify would likely result in increased emissions as compared to this FIP and our federal NNSR regulations.

B. Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 28, 2025.

Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

VI. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at <https://www.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 14094: Modernizing Regulatory Review

This action is not a significant regulatory action as defined in Executive Order 12866 (58 FR 51735, October 1993), as amended by Executive Order 14094 (88 FR 21879, April 11, 2023), and was, therefore, not subject to a requirement for Executive Order 12866 review.

B. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) because this

final rule implements existing requirements under the CAA and 40 CFR 51.160–165. The Office of Management and Budget (OMB) has previously approved the information collection activities in the existing PSD and NNSR regulations under OMB control number 2060–0003. The burden associated with obtaining an NNSR permit for a major stationary source undergoing a major modification is already accounted for under the approved information collection requests. Thus, the EPA is not conducting an information collection request for this action.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action is unlikely to impact small entities because the permitting requirements implemented through this action are applicable only to construction or modification of major stationary sources of air pollution. In the MDAQMD, major sources are those that emit, or have the potential to emit 25 tons per year or more of NO_x, Sulfur Oxides, or volatile organic compounds (VOCs); or 15 tons per year or more of PM₁₀. To the extent that any small entities would own or operate sources capable of emitting this much air pollution, the requirements of this action apply only to construction of new major sources, or major modifications to existing major sources, located in the portions of the MDAQMD that are subject to the requirements of this action. The EPA does not have information to suggest that there currently are a substantial number of major stationary sources located in the MDAQMD that are owned or operated by small entities. The Agency also does not have any information on future modifications that any such existing major sources may engage in after the effective date of this FIP. Further, the Agency does not have information that suggests one or more small entities will seek to construct a new major stationary source in the MDAQMD.

Even if the federal permitting requirements established in this FIP could be applicable to one or more small entities, these requirements would not have significant economic impact on such a small entity. Furthermore, any impact would not affect a substantial number of small entities. This FIP ensures that such small entities and other sources subject to the FIP requirements meet CAA requirements to which these sources should have already been subject. Upon finalization of this action, sources applying for a

permit will be required to submit application materials to the EPA in compliance with the FIP. These sources are already subject to NNSR requirements under the District's SIP, including the requirements to submit applications, to obtain offsets, and to install pollution control technology that satisfies Federal standards.

Consequently, the incremental impact associated with application of the specific requirements of the NNSR regulations for certain sources emitting nonattainment criteria pollutants or its precursors is expected to be de minimis, primarily pertaining to the amount of offsets needed.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of \$100 million or more, as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action imposes no enforceable duty on any state, local or tribal governments or the private sector.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175, because this proposed rule would not apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that the tribe has jurisdiction, and it will not impose substantial direct costs on tribal governments or preempt tribal law. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

Executive Order 13045 directs federal agencies to include an evaluation of the health and safety effects of the planned regulation on children in Federal health and safety standards and explain why the regulation is preferable to potentially effective and reasonably feasible alternatives. This action is not subject to Executive Order 13045 because it is not a significant regulatory action under section 3(f)(1) of Executive

Order 12866. The EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children because it implements specific standards established by Congress in statutes.

However, EPA's *Policy on Children's Health* applies to this action. Information on how the Policy was applied is available under "Children's Environmental Health" in the Supporting Information section of this preamble.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 (66 FR 28355, May 22, 2001), because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations and Executive Order 14096: Revitalizing Our Nation's Commitment to Environmental Justice for All

The EPA believes that it is not practicable to assess whether the human health or environmental conditions that exist prior to this action result in disproportionate and adverse effects on communities with environmental justice concerns. The EPA performed an EJ analysis, as is described in the proposed action, 89 FR 56237, July 9, 2024, in the section titled, "Environmental Justice Considerations." The analysis was done for the purpose of providing additional context and information about this rulemaking to the public, not as a basis for the action. While the EPA can identify the existing major sources in the nonattainment areas that would be impacted by this action, the EPA cannot quantify the number or types of sources that will undertake major modifications in the future. Additionally, the EPA cannot know whether new major sources will locate in the nonattainment area and what emissions these sources may have. The impacts of the action are likely to vary greatly depending on the source category, number and location of facilities, and the pollutants and potential controls addressed. Therefore, while the EPA cannot quantify the precise baseline conditions and impacts, to the extent that this action will have

impacts, it will not result in disproportionate and adverse effects on communities with EJ concerns as compared with baseline human health and environmental conditions.

In finalizing this action, the EPA will replace the MDAQMD in implementation of the District's NNSR program through the FIP. Therefore, the EPA does not anticipate that this action will result in any negative impacts to human health and the environment negative impacts. If this action has any impact on human health or the environment it will be beneficial in so far as the FIP action will address deficiencies associated with the calculation of emission offsets in the NNSR program. As explained in section II of the preamble of the proposal of this action, this FIP is being promulgated to address several deficiencies with the MDAQMD's NNSR program. See 89 FR 56237, 56239. While the EPA has not analyzed the health impacts nor the emissions impacts from these deficiencies, the deficient provisions are less stringent than the Federal NNSR requirements that the EPA will be applying if this proposed FIP is finalized. Therefore, in so far as the EPA can qualitatively identify impacts to human health and the environment, the EPA expects this action will ensure the protections provided by the CAA and that the EPA's implementing regulations will be fully realized.

K. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Ammonia, Incorporation by reference, Intergovernmental relations, Nitrogen oxides, Ozone, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Michael Regan,
Administrator.

For the reasons stated in the preamble, part 52 of title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.285 is added to read as follows:

§ 52.285 Review of new sources and modifications—Mojave Desert Air Quality Management District.

(a) *Plan overview*—(1) *What is the purpose of the Federal Implementation Plan (FIP or “plan”)?*

(i) The FIP has the following purposes: It establishes the Federal preconstruction permitting requirements for new major sources and major modifications located in nonattainment areas within the Mojave Desert Air Quality Management District (MDAQMD or “District”) that are major for a nonattainment pollutant.

(ii) The plan serves as the Federal nonattainment new source review (NNSR or “nonattainment major NSR”) plan for the area described in paragraph (a)(1)(i) of this section, which the EPA has determined does not meet all of the Clean Air Act (CAA or “Act”) title I part D requirements for NNSR programs. Sources subject to the plan must comply with the provisions and requirements of 40 CFR part 51, appendix S. The FIP also sets forth the criteria and procedures that the reviewing authority (as defined in paragraph (b)(1)(v) of this section) must use to issue permits under the plan. For the purposes of the plan, the term *SIP* means any EPA-approved implementation plan for the area administered by the MDAQMD.

(iii) Paragraph (f)(3) of this section sets forth procedures for appealing a permit decision issued under the plan.

(iv) The plan does not apply in Indian country, as defined in 18 U.S.C. 1151 and 40 CFR 49.167, located within the MDAQMD.

(2) *Where does the plan apply?* (i) The provisions of the plan apply to the proposed construction of any new major stationary source or major modification in the MDAQMD that is major for a nonattainment pollutant, if the stationary source or modification is located anywhere in the designated nonattainment area.

(3) *What general provisions apply under the plan?* The following general provisions apply to you as an owner or operator of a source:

(i) If you propose to construct a new major source or a major modification in a nonattainment area in the MDAQMD, you must obtain a Federal NNSR permit (“permit”) under the plan before beginning actual construction. You may not begin actual construction after the effective date of the plan without applying for and receiving a Federal

NNSR permit that authorizes construction pursuant to the plan.

(ii) You must construct and operate your source or modification in accordance with the terms of your permit issued under the plan.

(iii) Issuance of a permit under the plan does not relieve you of the responsibility to fully comply with applicable provisions of any EPA-approved implementation plan or FIP, and any other requirements under applicable law. This includes obligations to comply with any EPA-approved SIP provisions that satisfy Federal new source review (NSR) requirements.

(b) *Definitions.* For the purposes of the plan, the definitions in 40 CFR part 51, appendix S, paragraph II.A, and 40 CFR 51.100 apply, except for paragraphs (b)(1) through (6) of this section, which replace the corresponding definitions found in part 51, appendix S:

(1) *Actual emissions* means the actual rate of emissions of a regulated NSR pollutant from an emissions unit, as determined in accordance with paragraphs (b)(1)(i) and (ii) of this section, except that this paragraph (b)(1) shall not apply for calculating whether a significant emissions increase has occurred, or for establishing a PAL under paragraph IV.K of 40 CFR part 51, appendix S. Instead, 40 CFR part 51, appendix S, paragraphs II.A.24 and 30, shall apply for those purposes.

(i) In general, actual emissions as of a particular date shall equal the average rate, in tons per year, at which the unit actually emitted the pollutant during a consecutive 24-month period that precedes the particular date and that is representative of normal source operation. The reviewing authority shall allow the use of a different time period upon a determination that it is more representative of normal source operation. Actual emissions shall be calculated using the unit’s actual operating hours, production rates, and types of materials processed, stored, or combusted during the selected time period.

(ii) For any emissions unit that has not begun normal operations on the particular date, actual emissions shall equal the potential to emit of the unit on that date.

(2) *Enforceable as a practical matter* means that an emission limitation or other standard is both legally and practicably enforceable as follows:

(i) An emission limitation or other standard is legally enforceable if the reviewing authority has the legal power to enforce it.

(ii) Practical enforceability for an emission limitation or for other

standards (design standards, equipment standards, work practices, operational standards, pollution prevention techniques) in a permit for a source is achieved if the permit’s provisions specify:

(A) A limitation or standard and the emissions units or activities at the source subject to the limitation or standard;

(B) The time period for the limitation or standard (e.g., hourly, daily, monthly and/or annual limits such as rolling annual limits); and

(C) The method to determine compliance, including appropriate monitoring, recordkeeping, reporting, and testing.

(3) *Environmental Appeals Board* means the Board within the EPA described in 40 CFR 1.25(e).

(4) *Nonattainment pollutant* means any regulated NSR pollutant for which the MDAQMD, or portion of the MDAQMD, has been designated as nonattainment, as codified in 40 CFR 81.305, as well as any precursor of such regulated NSR pollutant specified in 40 CFR part 51, appendix S, paragraph II.A.31.(ii)(b).

(5) *Reviewing authority* means the Administrator of EPA Region IX, but it may include the MDAQMD if the Administrator delegates the power to administer the FIP under paragraph (g) of this section.

(6) *Significant* means, in reference to an emissions increase or a net emissions increase, and notwithstanding the definition of “significant” in 40 CFR part 51, appendix S, paragraph II.A.10, any increase in actual emissions of volatile organic compounds or oxides of nitrogen that would result from any physical change in, or change in the method of operation of, a major stationary source locating in a serious or severe ozone nonattainment area if such emissions increase of volatile organic compounds or oxides of nitrogen exceeds 25 tons per year when aggregated with all other net emissions increases from the source over any period of 5 consecutive calendar years that includes the calendar year in which such increase occurred.

(c) *Does the plan apply to me?* (1) In any MDAQMD nonattainment area, the requirements of the plan apply to you under the following circumstances:

(i) If you propose to construct a new major stationary source and your source is a major source of nonattainment pollutant(s).

(ii) If you own or operate a major stationary source and propose to construct a major modification, where your source is a major source of nonattainment pollutant(s) and the

proposed modification is a major modification for the nonattainment pollutant.

(2) At such time that a particular source or modification becomes a major stationary source or major modification solely by virtue of a relaxation in any enforceable limitation that was established after August 7, 1980, on the capacity of the source or modification otherwise to emit a pollutant, such as a restriction on hours of operation, then the requirements of the plan shall apply to the source or modification as though construction had not yet commenced on the source or modification.

(d) *Permit approval criteria*—(1) *What are the general criteria for permit approval?* The criteria for approval of applications for permits submitted pursuant to the plan are provided in part D of title I of the Act and in 40 CFR 51.160 through 51.165 and 40 CFR part 51, appendix S.

(2) *What are the plan-specific criteria for permit approval?* Consistent with the requirements in 40 CFR part 51, appendix S, the reviewing authority shall not approve a permit application unless it meets the following criteria:

(i) The lowest achievable emission rate (LAER) requirement for any NSR pollutant subject to the plan and monitoring, recordkeeping, reporting, and testing as necessary to assure compliance with LAER.

(ii) Certification that all existing major sources owned or operated by the applicant in California are in compliance or, on a schedule for compliance, with all applicable emission limitations and standards under the Act.

(iii) Any source or modification subject to the plan must obtain emission reductions (offsets) from existing sources in the area of the proposed source (whether or not under the same ownership) such that there will be reasonable progress toward attainment of the applicable NAAQS. Notwithstanding 40 CFR part 51, appendix S, paragraph IV.G.5, interprecursor offsetting is not permitted between precursors of ozone. A demonstration of reasonable progress toward attainment shall include:

(A) A demonstration that the emission offsets will provide a net air quality benefit in the affected area, as required under 40 CFR part 51, appendix S, paragraph IV.A, Condition 4.

(B) A demonstration that emissions reductions otherwise required by the Act are not credited for purposes of satisfying the offset requirements in this paragraph (d)(2)(iii) and part D of title I of the Act.

(iv) An analysis of alternative sites, sizes, production processes and environmental control techniques for such proposed major source or major modification that demonstrates that the benefits of the proposed major source or major modification significantly outweigh the environmental and social costs imposed as a result of its location, construction, or modification.

(3) *What are the application requirements?* The owner or operator of any proposed new major stationary source or major modification shall submit a complete application using EPA Region IX's electronic system, which is described in paragraph (d)(3)(ii) of this section. The application must include the information listed in this paragraph (d)(3) as well as the demonstrations to show compliance with paragraphs (d)(2)(i) through (iv) of this section. The reviewing authority's designation that an application is complete for purposes of permit processing does not preclude the reviewing authority from requesting or accepting any additional information.

(i) *Application content requirements.*

(A) Identification of the permit applicant, including contact information.

(B) Address and location of the new or modified source.

(C) Identification and description of all emission points, including information regarding all nonattainment pollutants emitted by all emissions units included in the new source or modification.

(D) A process description of all activities, including design capacity, that may generate emissions of nonattainment pollutants, in sufficient detail to establish the basis for the applicability of standards.

(E) A projected schedule for commencing construction and operation for all emissions units included in the new source or modification.

(F) A projected operating schedule for each emissions unit included in the new source or modification.

(G) A determination as to whether the new source or modification will result in any secondary emissions.

(H) The emission rates of all regulated NSR pollutants, including fugitive and secondary emission rates, if applicable. The emission rates must be described in tons per year (tpy). If necessary, shorter-term rates must be described to allow for compliance using the applicable standard reference test method or other methodology specified (*i.e.*, grams/liter, parts per million volume (ppmv) or parts per million weight (ppmw), lbs/MMBtu).

(I) The calculations on which the emission rate information is based, including fuel specifications, if applicable, and any other assumptions used to determine the emission rates (*e.g.*, higher heating value (HHV), sulfur content of natural gas, VOC content).

(J) The calculations, pursuant to 40 CFR part 51, appendix S, paragraph IV.I and IV.J, that are used to determine applicability of the plan, including the emission calculations (increases or decreases) for each project that occurred during the contemporaneous period, as applicable.

(K) The calculations, pursuant to 40 CFR part 51, appendix S, paragraph IV.A, used to determine the quantity of offsets required for the new source or modification.

(L) Identification of actual emission reductions that meet the offset integrity criteria of being real, surplus, quantifiable, permanent and federally enforceable.

(M) If applicable, a description of how performance testing will be conducted, including test methods and a general description of testing protocols.

(N) Information necessary to determine whether issuance of such permit:

(1) May adversely affect federally-listed threatened or endangered species or the designated critical habitat of such species; or

(2) Has the potential to cause adverse effects on historic properties.

(ii) *Application process requirements.* To submit an application required under the plan, applicants may submit electronically through the Central Data Exchange (CDX)/Compliance and Emissions Data Reporting Interface (CEDRI) or submit by mail.

(A) CDX/CEDRI is accessed through <https://cdx.epa.gov>. First-time users will need to register with CDX. The CDX platform will also be used for any permit reporting requirements.

(B) Applicants that do not apply using CDX/CEDRI shall mail a signed application using certified mail (do not request signature) to: Air and Radiation Division, Permits Office (Air-3-1), U.S. EPA, Region 9, 75 Hawthorne Street, San Francisco, CA 94105.

(C) Applicants that apply using certified mail must email a copy of the application and the certified mail tracking number to provide notification of delivery receipt to R9AirPermits@epa.gov.

(4) *What are the requirements for monitoring, recordkeeping, and reporting?* The reviewing authority shall require in the conditions of a permit such monitoring, recordkeeping, and reporting as necessary to facilitate

compliance with the terms of a permit and to make them enforceable as a practical matter.

(e) *Public participation requirements*—(1) *What permit information will be publicly available?* With the exception of any confidential information as defined in 40 CFR part 2, subpart B, the reviewing authority must make available for public inspection the documents listed in paragraphs (e)(1)(i) through (iv) of this section. The reviewing authority must make such information available for public inspection at the appropriate EPA Regional Office and in at least one location in the area affected by the source, such as the MDAQMD headquarters location or a local library.

(i) All information submitted as part of your permit application as required under paragraph (d)(3) of this section.

(ii) Any additional information requested by the reviewing authority.

(iii) The reviewing authority's analysis of the application and any additional information submitted by you, including the LAER analysis and, where applicable, the analysis of your emissions reductions (offsets), your demonstration of a net air quality benefit in the affected area and your analysis of alternative sites, sizes, production processes and environmental control techniques.

(iv) A copy of the draft permit or the draft decision to deny the permit with the justification for denial.

(2) *How will the public be notified and participate?* (i) Before issuing a permit under the plan, the reviewing authority must prepare a draft permit and provide adequate public notice to ensure that the affected community and the general public have reasonable access to the application and draft permit information, as set out in this paragraph (e)(2)(i) and paragraph (e)(2)(ii) of this section. The public notice must provide an opportunity for public comment and notice of a public hearing, if any, on the draft permit.

(A) The reviewing authority must mail a copy of the notice to you (the permit applicant), the MDAQMD (or the EPA if there is a delegation under paragraph (g) of this section), and the California Air Resources Board (CARB).

(B) The reviewing authority must comply with the methods listed in paragraph (e)(2)(i)(B)(1) or (2) of this section:

(1) The reviewing authority must post the notice on its website.

(2) The reviewing authority must publish the notice in a newspaper of general circulation in the area affected by the source.

(3) The reviewing authority may also include other forms of notice as appropriate. This may include posting copies of the notice at one or more locations in the area affected by the source, such as at post offices, libraries, community centers or other gathering places in the community.

(ii) The notices required pursuant to paragraph (c)(2)(i) of this section must include the following information at a minimum:

(A) Identifying information, including the name and address of the permit applicant (and the plant name and address if different);

(B) The name and address of the reviewing authority processing the permit application;

(C) The regulated NSR pollutants to be emitted, and identification of the emissions unit(s) whose emissions of a regulated NSR pollutant could be affected by the project, including any emission limitations for these emissions unit(s);

(D) The emissions change involved in the permit action;

(E) Instructions for requesting a public hearing;

(F) The name, address and telephone number of a contact person in the reviewing authority's office from whom additional information may be obtained;

(G) Locations and times of availability of the information, listed in paragraph (e)(1) of this section, for public inspection; and

(H) A statement that any person may submit written comments, a written request for a public hearing or both, on the draft permit action. The reviewing authority must provide a period of at least 30 days from the date of the public notice for comments and for requests for a public hearing.

(3) *How will the public comment and will there be a public hearing?* (i) Any person may submit written comments on the draft permit and may request a public hearing. The comments must raise any reasonably ascertainable issue with supporting arguments by the close of the public comment period (including any public hearing). The reviewing authority must consider all comments in making the final decision. The reviewing authority must keep a record of the commenters and of the issues raised during the public participation process, and such records must be available to the public.

(ii) The reviewing authority must extend the public comment period under paragraph (e)(2) of this section to the close of any public hearing under this section. The hearing officer may also extend the comment period by so stating at the hearing.

(iii) A request for a public hearing must be in writing and must state the nature of the issues proposed to be raised at the hearing.

(iv) If requested, the reviewing authority may hold a public hearing at its discretion to give interested persons an opportunity for the oral presentation of data, views, or arguments, in addition to an opportunity to make written statements. The reviewing authority may also hold a public hearing at its discretion, whenever, for instance, such a hearing might clarify one or more issues involved in the permit decision. The reviewing authority must provide notice of any public hearing at least 30 days prior to the date of the hearing. Public notice of the hearing may be concurrent with that of the draft permit, and the two notices may be combined. Reasonable limits may be set upon the time allowed for oral statements at the hearing.

(v) The reviewing authority must make the written transcript of any hearing available to the public.

(f) *Final permit issuance and administrative and judicial review*—(1) *How will final action occur and when will my Federal NNSR permit become effective?* After making a decision on a permit application, the reviewing authority must notify you, the permit applicant, of the decision in writing, and, if the permit is denied, provide the reasons for such denial and the procedures for appeal. If the reviewing authority issues a final permit to you, it must make a copy of the permit available at any location where the draft permit was made available. In addition, the reviewing authority must provide adequate public notice of the final permit decision to ensure that the affected community, the general public and any individuals who commented on the draft permit have reasonable access to the decision and supporting materials. A final permit becomes effective 30 days after service of the final permit decision, unless:

(i) A later effective date is specified in the permit;

(ii) Review of the final permit is requested under paragraph (f)(3) of this section; or

(iii) No comments requested a change in the draft permit or a denial of the permit, in which case the reviewing authority may make the permit effective immediately upon issuance.

(2) *What is the administrative record for each final permit?* (i) The reviewing authority must base final permit decisions on an administrative record consisting of:

(A) All comments received during any public comment period, including any extension or reopening;

(B) The tape or transcript of any hearing(s) held;

(C) Any written material submitted at such a hearing;

(D) Any new materials placed in the record as a result of the reviewing authority's evaluation of public comments;

(E) Other documents in the supporting files for the permit that were relied upon in the decision-making;

(F) The final Federal NNSR permit;

(G) The application and any supporting data furnished by you, the permit applicant;

(H) The draft permit or notice of intent to deny the application or to terminate the permit; and

(I) Other documents in the supporting files for the draft permit that were relied upon in the decision-making.

(ii) The additional documents required under paragraph (f)(2)(i) of this section should be added to the record as soon as possible after their receipt or publication by the reviewing authority. The record must be complete on the date the final permit is issued.

(iii) Material readily available or published materials that are generally available and that are included in the administrative record under the standards of paragraph (f)(2)(i) of this section need not be physically included in the same file as the rest of the record as long as it is specifically referred to in that file.

(3) *Can permit decisions be appealed?*

(i) Permit decisions may be appealed under the permit appeal procedures of 40 CFR 124.19, and the provisions of that section applicable to prevention of significant deterioration (PSD) permits shall apply to permit decisions under the FIP. A petition for review must be filed with the Clerk of the Environmental Appeals Board within 30 days after the reviewing authority serves notice of the issuance of a final permit decision under the plan, in accordance with 40 CFR 124.19.

(ii) An appeal under paragraph (f)(3)(i) of this section is, under section 307(b) of the Act, a prerequisite to seeking judicial review of the final agency action.

(4) *Can my permit be reopened?* The reviewing authority may reopen an existing, currently-in-effect permit for cause on its own initiative, such as if it contains a material mistake or fails to assure compliance with requirements in this section. However, except for those permit reopenings that do not increase the emission limitations in the permit, such as permit reopenings that correct

typographical, calculation and other errors, all other permit reopenings shall be carried out after the opportunity for public notice and comment and in accordance with one or more of the public participation requirements under paragraph (e)(2) of this section.

(5) *Can my permit be rescinded?* (i) Any permit issued under this section, or a prior version of this section, shall remain in effect until it is rescinded under this paragraph (f)(5).

(ii) An owner or operator of a stationary source or modification who holds a permit issued under this section for the construction of a new source or modification that meets the requirement in paragraph (f)(5)(iii) of this section may request that the reviewing authority rescind the permit or a particular portion of the permit.

(iii) The reviewing authority may grant an application for rescission if the application shows that the provisions of the plan would not apply to the source or modification.

(iv) If the reviewing authority rescinds a permit under this paragraph (f), the public shall be given adequate notice of the rescission determination in accordance with paragraph (e)(2)(i)(B) of this section.

(g) *Administration and delegation of the Federal nonattainment major NSR plan in the MDAQMD—(1) Who administers the FIP in the MDAQMD?* (i) The Administrator is the reviewing authority and will directly administer all aspects of the FIP in the MDAQMD under Federal authority.

(ii) The Administrator may delegate Federal authority to administer specific portions of the FIP to the MDAQMD upon request, in accordance with the provisions of paragraph (g)(2) of this section. If the MDAQMD has been granted such delegation, it will be the reviewing authority for purposes of the provisions for which it has been granted delegation.

(2) *Delegation of administration of the FIP to the MDAQMD.* This paragraph (g)(2) establishes the process by which the Administrator may delegate authority to the MDAQMD in accordance with the provisions in paragraphs (g)(2)(i) through (iv) of this section. Any Federal requirements under the plan that are administered by the delegate MDAQMD are enforceable by the EPA under Federal law.

(i) *Information to be included in the Administrative Delegation Request.* To be delegated authority to administer the FIP or specific portions of it, the MDAQMD must submit a request to the Administrator.

(ii) *Delegation Agreement.* A Delegation Agreement will set forth the

terms and conditions of the delegation, will specify the provisions that the delegate MDAQMD will be authorized to implement on behalf of the EPA and will be entered into by the Administrator and the MDAQMD. The Agreement will become effective upon the date that both the Administrator and the MDAQMD have signed the Agreement or as otherwise stated in the Agreement. Once the delegation becomes effective, the MDAQMD will be responsible, to the extent specified in the Agreement, for administration of the provisions of the FIP that are subject to the Agreement.

(iii) *Publication of notice of the Agreement.* The Administrator will publish a notice in the **Federal Register** informing the public of any Delegation Agreement. The Administrator also will publish the notice in a newspaper of general circulation in the MDAQMD. In addition, the Administrator will mail a copy of the notice to persons on a mailing list developed by the Administrator consisting of those persons who have requested to be placed on such a mailing list.

(iv) *Revision or revocation of an Agreement.* A Delegation Agreement may be modified, amended or revoked, in part or in whole, by the Administrator after consultation with the MDAQMD.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 81

[EPA–R05–OAR–2023–0498; FRL–12265–02–R5]

Air Plan Approval; Illinois; Alton Township 2010 Sulfur Dioxide Redesignation and Maintenance Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving Illinois' request to redesignate the Alton Township nonattainment area in Madison County, Illinois to attainment for the 2010 sulfur dioxide (SO₂) National Ambient Air Quality Standard (NAAQS). EPA is also approving Illinois' maintenance plan for the area. Illinois submitted the request for approval on October 2, 2023. Additionally, EPA is taking final action to determine that the Alton Township area attained the 2010 SO₂ NAAQS by the September 12, 2021, attainment

date, fulfilling EPA's obligation under the Clean Air Act (CAA) section 179(c) to determine whether the area attained the relevant NAAQS standard. EPA proposed to approve this action on October 8, 2024, and received no comments. December 30, 2024

DATES: This final rule is effective on January 29, 2025.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA-R05-OAR-2023-0498. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, *i.e.*, Confidential Business Information (CBI), Proprietary Business Information (PBI), or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through <https://www.regulations.gov> or at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Cecilia Magos, at (312) 886-7336, before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Cecilia Magos, Air and Radiation Division (AR-18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-7336, magos.cecilia@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document whenever "we," "us," or "our" is used, we mean EPA.

I. Background Information

On June 22, 2010 (75 FR 35520), EPA revised the primary SO₂ NAAQS, establishing a new health-based 1-hour standard of 75 parts per billion (ppb). EPA promulgated designations for this standard in four rounds. On September 18, 2015, Illinois submitted its recommendations to EPA to designate certain areas of the state as part of the Round 2 designations. Illinois recommended a portion of southern Alton Township in Madison County be designated as nonattainment for the 2010 SO₂ NAAQS. EPA concurred with Illinois' analysis and published a final action designating the area as nonattainment for the 2010 SO₂ NAAQS effective September 12, 2016 (81 FR 45039).

Illinois submitted an attainment plan for the Alton Township nonattainment area on December 3, 2018. The plan included computer modeling that included emissions from the Alton Steel Inc. (Alton Steel) facility in Alton, Illinois, and emissions from the Ameren-Missouri-Sioux Energy Center (Ameren-Sioux) power plant in Missouri, located about 13 kilometers west-northwest of the nonattainment area. On March 14, 2019, the Illinois Environmental Protection Agency issued Construction Permit #18020009 for the Alton Steel facility to operate a new ladle metallurgy facility (LMF) stack and to remove the downfacing vents that were contributing to modeled nonattainment at the facility. EPA included additional dispersion modeling to supplement Illinois' attainment demonstration to demonstrate that the emission limits required by the Illinois SIP and submitted for EPA approval provide for modeled concentrations meeting the 2010 SO₂ NAAQS. EPA approved Illinois' attainment plan revision on February 21, 2023 (88 FR 10464).

On October 2, 2023, Illinois submitted a redesignation request and maintenance plan for the Alton Township nonattainment area for the 2010 SO₂ NAAQS. The submitted redesignation request and maintenance plan includes the Construction Permit issued to Alton Steel and the Consent Agreement for Ameren-Sioux that has been approved into the Missouri SIP (87 FR 68634, November 16, 2022) with accepted SO₂ emissions limits. On October 8, 2024 (89 FR 81409), EPA proposed to approve the redesignation of the Alton Township area in Madison County, Illinois from nonattainment to attainment for the 2010 SO₂ NAAQS in accordance with Illinois' request submitted on October 2, 2023. EPA has determined the area is attaining the 2010 SO₂ NAAQS and that the improvement in air quality is due to permanent and enforceable SO₂ emission reductions in the area. EPA is also approving Illinois' maintenance plan, which is designed to ensure that the area will continue to maintain attainment of the 2010 SO₂ NAAQS. Additionally, under section 179(c) of the CAA, EPA is required to determine whether a nonattainment area attained a standard by the applicable attainment date based on the area's air quality as of the attainment date. In this action, EPA is determining that the Alton Township area did attain the 2010 SO₂ NAAQS by the attainment date of September 12, 2021. An explanation of the CAA requirements, a detailed analysis of the revisions, and EPA's reasons for

proposing approval were provided in the notice of proposed rulemaking (NPRM) and will not be restated here. The public comment period for this proposed rule ended on November 7, 2024. EPA received no comments on the proposal. Therefore, we are finalizing our action as proposed.

II. Final Action

EPA is approving the redesignation of the Alton Township area from nonattainment to attainment, meeting the criteria under CAA section 107(d)(3)(E) for the 2010 SO₂ NAAQS in accordance with Illinois' October 2, 2023, request. EPA is determining that the area is attaining the 2010 SO₂ NAAQS and that the improvement in air quality is due to permanent and enforceable SO₂ emission reductions in the area. On this basis, EPA is approving the redesignation request from Illinois for the area and changing the legal designation of the Alton Township area in Madison County at 40 CFR part 81 to attainment for the 2010 SO₂ NAAQS.

EPA is also approving Illinois' maintenance plan under CAA section 175A. The maintenance plan demonstrates that the area will continue to maintain the 2010 SO₂ NAAQS and includes a process to develop contingency measures to remedy any future violations of the 2010 SO₂ NAAQS and procedures for evaluation of potential violations. This includes Illinois' commitment to provide EPA with an annual emissions report of the newly constructed Alton Steel LMF stack as part of Illinois' annual network plan submittal to provide ongoing verification of attainment.

Finally, EPA is determining that the Alton Township area attained the 2010 SO₂ NAAQS by the September 12, 2021, attainment date addressing EPA's obligation under CAA section 179(c).

III. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735,

October 4, 1993), and 14094 (88 FR 21879, April 11, 2023);

- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and

- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, February 16, 1994) directs Federal agencies to identify and address

“disproportionately high and adverse human health or environmental effects” of their actions on communities with environmental justice (EJ) concerns to the greatest extent practicable and permitted by law. Executive Order 14096 (Revitalizing Our Nation’s Commitment to Environmental Justice for All, 88 FR 25251, April 26, 2023) builds on and supplements E.O. 12898 and defines EJ as, among other things, the just treatment and meaningful involvement of all people, regardless of income, race, color, national origin, or Tribal affiliation, or disability in agency decision-making and other Federal activities that affect human health and the environment.

The Illinois Environmental Protection Agency did not evaluate EJ considerations as part of its SIP submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA performed an EJ analysis, as is described in the proposed action (October 8, 2024, 89 FR 81409) in the section titled, “EJ Considerations.” The analysis was done for the purpose of providing additional context and information about this rulemaking to the public, not as a basis of the action. Due to the nature of the action being taken here, this action is expected to have a neutral to positive impact on the air quality of the affected area. In addition, there is no information in the record upon which this decision is based inconsistent with the stated goal of E.O. 12898/14096 of achieving EJ for communities with EJ concerns.

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 28, 2025. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: December 16, 2024.

Debra Shore,

Regional Administrator, Region 5.

For the reasons stated in the preamble, title 40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. In § 52.720, amend the table in paragraph (e), under the heading “Attainment and Maintenance Plans” by adding a second entry for “Sulfur dioxide (2010) maintenance plan” after the entry for “Sulfur dioxide maintenance plan” to read as follows:

§ 52.720 Identification of plan.

* * * * *

(e) * * *

EPA APPROVED ILLINOIS NONREGULATORY AND QUASI-REGULATORY PROVISIONS

Name of SIP provision	Applicable geographic or nonattainment area	State submittal date	EPA approval date	Comments

PART 81—DESIGNATION OF AREAS FOR AIR QUALITY PLANNING PURPOSES

■ 3. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

§ 81.314 Illinois.

* * * * *

■ 4. In § 81.314, amend the table entitled “Illinois—2010 Sulfur Dioxide NAAQS [Primary], by revising the entry for “Alton Township, IL”” to read as follows:

ILLINOIS—2010 SULFUR DIOXIDE NAAQS
[Primary]

Designated area ¹	Designation	
	Date ²	Type
Alton Township, IL Madison County (part) Within Alton Township: Area east of Corporal Belchik Memorial Expressway, south of East Broadway, south of Route 3, and north of Route 143.	12/30/24	Attainment.
* * * * *	* * * * *	* * * * *

¹ Includes any Indian country in each county or area, unless otherwise specified. EPA is not determining the boundaries of any area of Indian country in this table, including any area of Indian country located in the larger designation area. The inclusion of any Indian country in the designation area is not a determination that the state has regulatory authority under the Clean Air Act for such Indian country.
² This date is April 9, 2018, unless otherwise noted.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving revisions to Ohio EPA’s title V rules. These revisions include revisions to the definition of hazardous air pollutants and requirements for a permit statement of basis that are consistent with recent Federal rulemaking actions. Other changes are insignificant and part of the state’s five-year review of adopted regulations.

DATES: This direct final rule will be effective February 28, 2025, unless EPA receives adverse comments by January 29, 2025. If adverse comments are received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R05–OAR–2024–0282 at <https://www.regulations.gov> or via email to damico.genevieve@epa.gov. For comments submitted at [Regulations.gov](https://www.regulations.gov),

follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from the docket. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI), Proprietary Business Information (PBI), or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI, PBI, or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Sam Portanova, Air Permits Section, Air and Radiation Division (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–3189, portanova.sam@epa.gov. The EPA Region 5 office is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays.

SUPPLEMENTARY INFORMATION: Throughout this document whenever

“we,” “us,” or “our” is used, we mean EPA.

I. Background

On June 11, 2024, Ohio EPA submitted revisions to Ohio Administrative Code (OAC) chapters 3745–77–01, 3745–77–08, and 3745–77–09 to EPA for approval as a title V program revision. These revisions were made as part of Ohio’s statutory five-year regulatory review process and include a change to the definition of hazardous air pollutant, additional requirements pertaining to a permit statement of basis and response to comments, a reordering of the definitions in OAC 3745–77–01, minor grammatical changes, and updates to test method, publication, and reference materials.

II. What action is EPA taking?

EPA is approving this submittal as part of Ohio’s title V permit program. The revisions to Ohio’s rules are consistent with 40 CFR part 70 and the Clean Air Act (CAA) as discussed below.

The definitions in OAC 3745–77–01 are reorganized such that the terms are listed and group in paragraphs alphabetically. These revisions do not substantively change the provisions of this chapter but provide for easier search of and subsequent updates to the listed definitions.

The definition of “hazardous air pollutant” in OAC 3745–77–01(H) has been revised to include “. . . as revised under 40 CFR part 63, subpart C.” This change to the definition allows for the inclusion of 1-bromopropane, which EPA added to the CAA’s list of

hazardous air pollutants on January 5, 2022, and any future additions to the CAA's hazardous air pollutants list. Consistent with this revision, this rulemaking action also adds a new item under "referenced materials" in OAC 3745-77-01(AA)(2)(k) for 40 CFR part 63, subpart C.

This rulemaking action includes revisions to several items under "referenced materials" in OAC 3745-77-01(AA)(2). These revisions update the rule language to include the most recent edition or publication date of the referenced material. This does not constitute a substantive change to the regulations.

On February 5, 2020 (85 FR 6431), EPA issued a final rule amending 40 CFR part 70 requiring permitting authorities to prepare a written response to comments document if significant comments are received during the public comment period of a draft permit. The final rule also specifies that a statement of basis must be included with a permit during the public comment period and EPA's 45-day review period. In addition, the final rule requires that the response to comments document be included in the proposed permit that is sent to EPA for 45-day review. In this submittal, Ohio EPA has revised OAC 3745-77-08(G)(2), (5), and (6) and OAC 3745-77-09(A) to be consistent with these changes to the Federal rule.

Included in this rulemaking action are grammatical changes throughout OAC 3745-77. These revisions are intended to apply consistent wording throughout state regulations and do not represent a substantive change to the meaning of the rule.

We are publishing this action without prior proposal because we view this as a noncontroversial amendment and anticipate no adverse comments. However, in the proposed rules section of this **Federal Register** publication, we are publishing a separate document that will serve as the proposal to approve the state plan if relevant adverse written comments are filed. This rule will be effective February 28, 2025 without further notice unless we receive relevant adverse written comments by January 29, 2025. If we receive such comments, we will withdraw this action before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will then be addressed in a subsequent final rule based on the proposed action. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse

comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. If we do not receive any comments, this action will be effective February 28, 2025.

III. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a state title V program submission that complies with the provisions of the CAA and applicable Federal regulations. 40 CFR 70.4(i). Thus, in reviewing title V program submissions, EPA's role is to approve state choices provided they meet the criteria of the CAA and the criteria, standards, and procedures defined in 40 CFR part 70. Accordingly, this final action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law.

A. Executive Order 12866: Regulatory Planning and Review, and Executive Order 14094: Modernizing Regulatory Review

This action is not a significant regulatory action as defined in Executive Order 12866, as amended by Executive Order 14094, and was therefore not subject to a requirement for Executive Order 12866 review.

B. Paperwork Reduction Act

This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

C. Regulatory Flexibility Act

This action merely approves state law as meeting Federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531-1538, and does not significantly or uniquely affect small governments. This action does not impose additional requirements beyond those imposed by state law. Accordingly, no additional costs to State, local, or tribal governments, or to

the private sector, will result from this action.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

Executive Order 13175 (65 FR 67249, November 9, 2000), requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." This rule does not have Tribal implications, as specified in Executive Order 13175. It will not have substantial direct effects on Tribal governments. Thus, Executive Order 13175 does not apply to this rule.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

This action is not subject to Executive Order 13045 because it is not 3(f)(1) significant as defined in Executive Order 12866, and because EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children because it approves a state program.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 (66 FR 28355 (May 22, 2001)), because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer Advancement Act

This rulemaking does not involve technical standards.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

Executive Order 12898 (Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, February 16, 1994) directs Federal agencies to identify and address "disproportionately high and adverse human health or environmental effects" of their actions on communities with

environmental justice (EJ) concerns to the greatest extent practicable and permitted by law. Executive Order 14096 (Revitalizing Our Nation's Commitment to Environmental Justice for All, 88 FR 25251, April 26, 2023) builds on and supplements E.O. 12898 and defines EJ as, among other things, the just treatment and meaningful involvement of all people, regardless of income, race, color, national origin, Tribal affiliation, or disability in agency decision-making and other Federal activities that affect human health and the environment."

Ohio EPA did not evaluate EJ considerations as part of its program submittal; the CAA and applicable implementing regulations neither prohibit nor require such an evaluation. EPA did not perform an EJ analysis and did not consider EJ in this action. Consideration of EJ is not required as part of this action, and there is no information in the record inconsistent with the stated goal of E.O. 12898/14096 of achieving EJ for communities with EJ concerns.

K. Congressional Review Act

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

L. Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 28, 2025. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. See section 307(b)(2).

List of Subjects in 40 CFR Part 70

Environmental protection, Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: December 19, 2024.

Debra Shore,
Regional Administrator, Region 5.

For the reasons stated in the preamble, title 40 CFR part 70 is amended as follows:

PART 70—[AMENDED]

■ 1. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. Appendix A to part 70 is amended under "Ohio" by adding paragraph (f) to read as follows:

Appendix A to Part 70—Approval Status of State and Local Operating Permits Programs.

* * * * *

Ohio

* * * * *

(f) The Ohio Environmental Protection Agency submitted an operating permits program amendment on June 11, 2024. This submittal included revisions to the definition of hazardous air pollutants and requirements for a permit statement of basis. The state is hereby granted approval effective February 28, 2025.

Medicare Program: Appeal Rights for Certain Changes in Patient Status and Changes to the Medicare Claims and Medicare Prescription Drug Coverage Determination Appeals Procedures; Correcting Amendment

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Final rules; correcting amendment.

SUMMARY: This document corrects technical errors in the final rule that appeared in the October 15, 2024, **Federal Register** titled "Medicare Program: Appeal Rights for Certain Changes in Patient Status." It also corrects technical errors in the final rule that appeared in the May 7, 2019, **Federal Register** titled "Medicare Program; Changes to the Medicare Claims and Medicare Prescription Drug Coverage Determination Appeals Procedures."

DATES: This correcting amendment is effective December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Kristy Nishimoto, (206) 615–2367.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2024–23195 of October 15, 2024 (89 FR 83240), the final rule titled "Medicare Program: Appeal Rights for Certain Changes in Patient Status," there were technical errors associated with the regulations text that are identified and corrected in this correcting amendment.

In FR Doc. 2019–09114 of May 7, 2019 (84 FR 19855), the final rule titled "Medicare Program; Changes to the Medicare Claims and Medicare Prescription Drug Coverage Determination Appeals Procedures," there was a technical error associated with the regulation text that is identified and corrected in this correcting amendment.

II. Summary of Errors

For the October 15, 2024, final rule, we are making the following corrections:

- In §§ 405.932(i)(1), 405.936(d)(1), and 405.1210(b)(3), we are correcting errors in paragraph numbering.
- In § 405.934(c)(4)(viii), we are correcting a grammatical error in the use of the word "party."

For the May 7, 2019, final rule, in § 405.1014(a)(1)(i), we are removing the term "health" in the phrase "Medicare health number" because the word "health" is not necessary to describe an individual's Medicare number. "Health" was inadvertently included in the regulation text and we are deleting the unnecessary term to avoid confusion.

III. Waiver of Proposed Rulemaking and Delay in Effective Date

Under 5 U.S.C. 553(b) of the Administrative Procedure Act (APA), the agency is usually required to publish a notice of the proposed rule in the **Federal Register** before the provisions of a rule take effect. Specifically, 5 U.S.C. 553 requires the agency to publish a notice of the proposed rule in the **Federal Register** that includes a reference to the legal authority under which the rule is proposed, and the terms and substance of the proposed rule or a description of the subjects and issues involved. Further, 5 U.S.C. 553 generally requires the agency to give interested parties the opportunity to participate in the rulemaking through public comment before a final rule is issued. Section 1871(b)(1) of the Social Security Act (the Act) also generally requires the Secretary to provide for notice of the proposed rule in the **Federal Register** and provide a period of not less than 60 days for public comment for rules to

carry out the administration of the Medicare program under title XVIII of the Act. In addition, section 553(d) of the APA and section 1871(e)(1)(B)(i) of the Act usually require a 30-day delay in effective date after issuance or publication of a rule. Sections 553(b)(B) and 553(d)(3) of the APA, however, provide for exceptions from the notice and comment and delay in effective date APA requirements in some limited situations. In cases in which these exceptions apply, sections 1871(b)(2)(C) and 1871(e)(1)(B)(ii) of the Act also provide exceptions from the advanced public notice and 60-day comment period and delay in effective date requirements of the Act. Section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act authorize an agency to dispense with certain rulemaking requirements for good cause if the agency makes a finding that the notice and comment process is impracticable, unnecessary, or contrary to the public interest. In addition, both section 553(d)(3) of the APA and section 1871(e)(1)(B)(ii) of the Act allow the agency to waive the normal 30-day delay in effective date where there is good cause or the delay in the effective date would be contrary to the public interest and the agency includes an appropriate finding to support the rule becoming effective sooner.

We find there is good cause to issue this technical correction final rule without seeking advanced public comments based on the “unnecessary” prong of the good cause exception allowed under section 553(b)(B) of the APA and which is also expressly incorporated by cross-reference in section 1871(b)(2)(C) of the Act. The corrections in this document are insignificant or technical in nature and impact and will largely be inconsequential to the public. CMS periodically issues correction notices to implement non-substantive edits to previously finalized rules. The non-substantive corrections described herein do not require regulated parties to adjust their behavior, and therefore are of little impact or consequence for the public. This correcting amendment simply corrects paragraph numbering and technical errors in the regulatory text of the aforementioned final rules but does not make substantive changes to the policies that were adopted in those final rules. As a result, this correcting amendment is intended to ensure that the regulations at §§ 405.932, 405.934, 405.936, 405.1014, and 405.1210 accurately reflect the policies adopted in the final rules.

Undertaking further notice and comment procedures to incorporate the

regulatory text corrections in this document into the final rules or delaying the effective date would be unnecessary, as we are not altering our policies or regulatory changes, but rather, we are simply correcting paragraph numbering and technical errors that do not affect the requirements that we previously proposed, requested comment on, and subsequently finalized. This final rule correcting amendment is intended solely to ensure that the final rules and the Code of Federal Regulations (CFR) accurately reflect policies and regulatory changes that have been adopted through rulemaking.

Additionally, we find there is good cause to waive the normal 30-day delay in effective date for this technical correction final rule under section 553(d)(3) of the APA. The purpose of the 30-day delay in effective date under section 553(d) of the APA is to “give affected parties a reasonable time to adjust their behavior before the final rule takes effect.” *Omnipoint Corp. v. FCC*, 78 F.3d 620, 630 (D.C. Cir. 1996). These non-substantive, technical corrections do not make changes that would require the public to adjust their behavior in any manner, rendering a delayed effective date unnecessary. We also note that the requirement for a 30-day delay in effective date under section 1871(e)(1)(B)(i) of the Act applies only to substantive changes; because the corrections described herein are non-substantive, the requirements of section 1871(e)(1)(B)(i) of the Act are inapplicable. Even if the changes could be construed as substantive, we find that additional delay would be contrary to the public interest under section 1871(e)(1)(B)(ii) of the Act. We believe there is no need for the public to prepare for the nonsubstantive, technical corrections in this rule as they are merely correcting errors in form and designation in the regulation text specified in the previous final rules. Moreover, since we have announced that we are targeting January 1, 2025 for implementation of the retrospective appeals procedures in §§ 405.931 through 405.938, a 30-day delay in the effective date for these non-substantive, technical corrections could cause undue hardship for eligible parties who are preparing to exercise their right immediately once the appeal process is implemented and who may be entitled to financial relief following a favorable appeal.

Therefore, for the reasons state previously, we find good cause to waive the notice and comment and effective date requirements.

List of Subjects in 42 CFR Part 405

Administrative practice and procedure, Diseases, Health facilities, Health professions, Medical devices, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services corrects 42 CFR part 405 by making the following correcting amendments:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

- 1. The authority citation for part 405 continues to read as follows:

Authority: 42 U.S.C. 263a, 405(a), 1302, 1320b-12, 1395x, 1395y(a), 1395ff, 1395hh, 1395kk, 1395rr, and 1395ww(k).

§ 405.932 [Amended]

- 2. Section 405.932 is amended by redesignating paragraphs (i)(1)(A) and (B) as paragraphs (i)(1)(i) and (ii).

§ 405.934 [Amended]

- 3. Section 405.934 is amended in paragraph (c)(4)(viii) by removing the phrase “an eligible parties’ right” and adding in its place the phrase “an eligible party’s right”.

- 4. Section 405.936 is amended by revising paragraph (d)(1) to read as follows:

§ 405.936 Hearings before an ALJ and decisions by an ALJ or Attorney Adjudicator.

* * * * *

(d) * * *

(1)(i) If the ALJ or attorney adjudicator determines that the inpatient admission, and as applicable, eligible SNF services, satisfied the relevant criteria for Part A coverage at the time the services were furnished, then the ALJ or attorney adjudicator issues notice of the favorable decision to the eligible party (or the party’s representative).

(ii) The ALJ or attorney adjudicator also notifies the hospital and SNF, as applicable, in the case of a favorable determination for Part A coverage.

* * * * *

- 5. Section 405.1014 is amended by revising paragraph (a)(1)(i) to read as follows:

§ 405.1014 Request for an ALJ hearing or a review of a QIC dismissal.

(a) * * *

(1) * * *

(i) The name, address, and Medicare number of the beneficiary whose claim is being appealed, and the beneficiary’s

telephone number if the beneficiary is the appealing party and not represented.
* * * * *

■ 6. Section 405.1210 is amended by adding paragraph (b)(3) to read as follows:

§ 405.1210 Notifying eligible beneficiaries of appeal rights when a beneficiary is reclassified from an inpatient to an outpatient receiving observation services.
* * * * *

(b) * * *
(3) *When delivery of the notice is valid.* Delivery of the written notice of appeal rights described in this section is valid if—

(i) The eligible beneficiary (or the eligible beneficiary's representative) has signed and dated the notice to indicate that he or she has received the notice and can comprehend its contents, except as provided in paragraph (b)(4) of this section; and

(ii) The notice is delivered in accordance with paragraph (b)(1) of this section and contains all the elements described in paragraph (b)(2) of this section.

Administration for Children and Families

45 CFR Part 1355
[Docket #2024–28072]

RIN 0970–AC98

Adoption and Foster Care Analysis and Reporting System; Correction

AGENCY: Children's Bureau (CB), Administration on Children, Youth and Families (ACYF), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS).

ACTION: Final rule; correction.

SUMMARY: ACF is correcting a final rule (FR) that was published in the **Federal Register** on December 5, 2024, with an effective date of February 3, 2025. This rule finalizes revisions to the Adoption and Foster Care Analysis and Reporting System (AFCARS) regulations proposed on February 23, 2024. This final rule requires state title IV–E agencies to

collect and report to ACF additional data related to the Indian Child Welfare Act of 1978 (ICWA) for children in the AFCARS Out-of-Home Care Reporting Population. This correction provides that this final rule will be effective 30 days after its publication in accordance with the Administrative Procedure Act. **DATES:** Effective January 4, 2025.

FOR FURTHER INFORMATION CONTACT: Joe Bock, Children's Bureau, (202) 205–8618. Telecommunications Relay users may dial 711 first. Email inquiries to cbcomments@acf.hhs.gov.

SUPPLEMENTARY INFORMATION: In the final rule published December 5, 2024, there was one technical error that is now identified and corrected in this document. The provisions in this correction document are effective as if they had been included in the document published December 5, 2024. Accordingly, the following corrections are effective January 4, 2025.

Corrections to Regulations

In FR Doc. 2024–28072, appearing on page 96569 in the **Federal Register** of Thursday, December 5, 2024, the following correction is made:

1. On page 96569, in the second column, correct the **DATES** section to read as follows:.

DATES: This rule is effective on January 4, 2025, except for the amendments to § 1355.44 (amendatory instruction 3), which are effective October 1, 2028.

Elizabeth J. Gramling,
Executive Secretary, Department of Health and Human Services.

Federal Acquisition Regulation: Training To Prevent Human Trafficking for Certain Air Carriers; Correction

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: DoD, GSA, and NASA are issuing a final rule amending the Federal Acquisition Regulation (FAR) to implement a section of the Frederick Douglass Trafficking Victims Prevention and Protection Reauthorization Act of 2018, which requires that domestic carriers who contract with the Federal Government to provide air transportation must submit an annual report with certain information related to prevention of human trafficking.

DATES: Effective January 3, 2025.

FOR FURTHER INFORMATION CONTACT: For clarification of content, contact Ms. Malissa Jones, Procurement Analyst, at 571–882–4687 or by email at malissa.jones@gsa.gov. For information pertaining to status or publication schedules contact the Regulatory Secretariat Division at 202–501–4755 or GSARegSec@gsa.gov. Please cite FAC 2025–02, FAR Case 2019–017.

SUPPLEMENTARY INFORMATION: DoD, GSA, and NASA are correcting an effective date in the preamble under the Discussion and Analysis section of the rule.

In the FR Doc. 2024–29373, published in the **Federal Register** at 89 FR 101821 in the issue of December 16, 2024, make the following correction:

4. Retroactive Applicability [Corrected]

On page 101822, in the second column, in paragraph 4., Response, correct the date “November 1, 2024”, to read “January 3, 2025”.

William F. Clark,
Director, Office of Government-wide Acquisition Policy, Office of Acquisition Policy, Office of Government-wide Policy.

Federal Acquisition Regulation: Prohibition on Unmanned Aircraft Systems From Covered Foreign Entities

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Interim rule; extension of comment period.

SUMMARY: DoD, GSA, and NASA issued an interim rule on November 12, 2024, amending the Federal Acquisition Regulation (FAR) to implement a prohibition on the procurement and operation of unmanned aircraft systems manufactured or assembled by an American Security Drone Act-covered foreign entity. The deadline for submitting comments is being extended from January 13, 2025, to January 27, 2025, to provide additional time for interested parties to provide comments on the proposed rule. The effective date of this rule is not being changed and remains November 12, 2024.

DATES: For the interim rule published on November 12, 2024, (89 FR 89464), the deadline to submit comments is extended. Submit comments by January 27, 2025.

ADDRESSES: Submit comments in response to FAC 2025–01, FAR Case 2024–002 to the Federal eRulemaking portal at <https://www.regulations.gov> by searching for “FAR Case 2024–002”. Select the link “Comment Now” that corresponds with “FAR Case 2024–002”. Follow the instructions provided on the “Comment Now” screen. Please include your name, company name (if any), and “FAR Case 2024–002” on your attached document. If your comment cannot be submitted using <https://www.regulations.gov>, call or email the points of contact in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

Instructions: Please submit comments only and cite “FAR Case 2024–002” in all correspondence related to this case. Comments received generally will be posted without change to <https://www.regulations.gov>, including any personal and/or business confidential information provided. Public comments may be submitted as an individual, as an organization, or anonymously (see frequently asked questions at <https://www.regulations.gov/faq>). To confirm receipt of your comment(s), please check <https://www.regulations.gov>, approximately two-to-three days after submission to verify posting.

[[Docket No. NHTSA–2022–0013]

Federal Motor Vehicle Safety Standards; Lamps, Reflective Devices, and Associated Equipment, Adaptive Driving Beam Headlamps

AGENCY: National Highway Traffic Safety Administration (NHTSA or the Agency), Department of Transportation (DOT).

ACTION: Denial of petitions for reconsideration.

SUMMARY: This document responds to the petitions for reconsideration of the February 22, 2022, final rule that amended Federal Motor Vehicle Safety Standard (FMVSS) No. 108, “Lamps, reflective devices, and associated equipment,” to enable certification of adaptive driving beam (ADB) headlighting systems on vehicles sold in the United States. This document denies all petitions for reconsideration received in response to the final rule.

DATES: December 30, 2024.

I. Background

Beam switching technology was first introduced into vehicles sold in the United States in the 1950s and was limited simply to switching between upper and lower beams. An adaptive driving beam (ADB) is an advanced type of semiautomatic headlamp beam switching technology. It uses advanced sensing and computing technology to identify oncoming and preceding traffic and actively adapt the beam pattern to limit at lower beam levels any light shining toward those vehicles while continuing to direct high intensity light to other areas of the roadway. This dynamic beam pattern was not previously permitted by NHTSA’s lighting standard. As such, in 2013, Toyota petitioned NHTSA to modify the standard to permit ADB headlighting systems.

A. Notice of Proposed Rulemaking

NHTSA published a Notice of Proposed Rulemaking (NPRM) on October 12, 2018, proposing to amend NHTSA’s lighting standard, FMVSS No. 108, “Lamps, reflective devices, and associated equipment,” in response to a petition that raised concerns that the standard’s beam pattern (photometry) requirements would not permit the enhanced beam that ADB headlighting systems provide.¹ ADB headlamp technology dynamically modifies headlamp photometry to provide more illumination in certain areas in and around the roadway while reducing glare towards oncoming and preceding motorists. This dynamism is facilitated by the headlamps changing the lower beam pattern and increasing the usage of the upper beam, the effect of which

¹ 83 FR 51766, (Oct. 12, 2018).

increases visibility, thereby improving safety. NHTSA assessed comments received in response to the NPRM and published a final rule on February 22, 2022.

B. Final Rule

On February 22, 2022, NHTSA published a final rule amending FMVSS No. 108, “Lamps, reflective devices, and associated equipment, adaptive driving beam headlamps,” to enable the certification of ADB headlighting systems on vehicles sold in the United States.² Several industry comments to the NPRM advocated for stronger harmonization with regulatory alternatives when specifying performance requirements for ADB systems on vehicles. These alternatives included the regulation issued by the Economic Commission for Europe (UNECE R123), the Society of Automotive Engineers (SAE) J3069 JUN2016, Surface Vehicle Recommended Practice; Adaptive Driving Beam standard, as well as the updated version of the SAE Practice published in March 2021. In addition, NHTSA conducted laboratory testing to establish appropriate performance allowances for ADB systems, driving scenarios, and any associated equipment. All information and feedback was reflected in the development of the final rule.

FMVSS No. 108 has two main components that ensure ADB systems operate safely: (1) vehicle-level track-test requirements specifically tailored to the performance of the ADB system in meeting the specified glare limits, and (2) component-level photometric requirements related to glare and visibility. This standard provides practicable, performance-based requirements and test procedures that appropriately balance visibility and glare. If vehicle manufacturers choose to equip their vehicles with ADB systems, manufacturers must certify that their ADB systems meet these requirements.

II. Petitions for Reconsideration

In response to the February 22, 2022, Final Rule, NHTSA received twelve timely petitions from automotive manufacturers, lighting suppliers, trade organizations, and the Insurance Institute for Highway Safety (IIHS). American Honda Motor Co., Inc. (Honda),³ Volkswagen Group of America (Volkswagen),⁴ Toyota Motor

North America, Inc. (Toyota),⁵ Ford Motor Company (Ford),⁶ Koito Manufacturing Co. LTD (Koito),⁷ Stanley Electric Co. LTD (Stanley),⁸ North American Lighting (NAL),⁹ Valeo Lighting Systems (Valeo),¹⁰ Alliance for Automotive Innovation (Alliance),¹¹ the Transportation Safety Equipment Institute (TSEI),¹² SAE International—Lighting Systems Group (SAE),¹³ and IIHS¹⁴ submitted petitions for reconsideration of the final rule. Several petitioners requested alignment with alternative ADB regulatory practices (*i.e.*, SAE J3069) currently in place for systems on vehicles in foreign markets. Many of the petitions requested that NHTSA amend the standard to further advance the goal of the final rule.

The topics raised in the petitions can be generally classified into one of the following categories: (1) requests to address perceived complexities in technical scenarios; (2) claims that NHTSA imposed conflicting substantive requirements for testing; (3) requests to add alternative ADB headlamp testing procedures; and (4) requests to amend technical areas of the final rule to clarify requirements. This document addresses the petitioners’ concerns.

A. Stimulus Headlamps Aiming

FMVSS No. 108 specifies three specific headlamps and rear combination lamps mounted on test fixtures as part of the track testing for ADB systems. Additionally, FMVSS No. 108 requires that all headlamps must be aimable. As such, the stimulus lamps specified in the ADB track test procedure, used to elicit ADB performance, are capable of being aimed. However, while the Final Rule stated that the stimulus headlamps will have the lower beam activated and aimed per the SAE Recommended Practice J599 Lighting Inspection Code (SAE J599) procedures, these SAE J599 aiming instructions were not included

and incorporated by reference in the regulatory text.¹⁵ Toyota stated that, to ensure repeatability of testing, NHTSA should specify how the stimulus headlamps on the ADB test fixture will be aimed, as the regulatory text from the final rule does not include stimulus headlamp aiming instructions. Toyota suggested the headlamps be aimed in accordance with manufacturer instructions, or alternatively, in accordance with SAE J599. However, regarding SAE J599, Toyota stated that this procedure could introduce more variation and potentially stray away from real-world representation of the stimulus devices. The Alliance also petitioned that NHTSA provide in the docket the manufacturer’s headlamp aiming instructions and information sufficient to mount the stimulus lamps specified in the FMVSS No. 108.

Agency Response

NHTSA is denying the request to incorporate into the regulatory text aiming instructions for the stimulus headlamps installed on the ADB test fixtures. As clarified in the final rule, NHTSA will aim the stimulus headlamps as a matter of good testing practice; however, it is not necessary to include such a condition as part of the regulation because headlamp aim on the stimulus test fixtures does not have enough variability to change the outcome of the ADB test. As detailed in the discussions of the SAE J3069 synthetic light source in the NPRM and final rule, the minimum taillamp intensities for which an ADB system is required to react are considerably lower than a headlamp’s intensity. Even at the extremes of headlamp aim, a headlamp will always emit more light than a taillamp and the ADB recognition system must be capable of detecting intensities as low as those of taillamps. Therefore, stimulus headlamp aim will not be a deterministic factor in the outcome of an ADB test.¹⁶

¹⁵ See 87 FR 9947 (Feb. 22, 2022) (“The final rule also clarifies various aspects of the test procedures related to the fixture lamps. It clarifies that the stimulus headlamps will have the lower beam activated and aimed per the SAE Recommended Practice J599 Lighting Inspection Code (J599) procedures, as applicable.”).

¹⁶ 87 FR 9947 (Feb. 22, 2022) (“As NHTSA explained in the NPRM, the minimum taillamp intensities allowed by FMVSS No. 108 (2.0 cd at H–V and as low as 0.3 cd at 20 degrees) are considerably lower than the 7.0 cd lamp specified in SAE J3069 NHTSA also does not agree with SAE that specifying actual vehicle headlamps would result in excessive variability, but continues to believe, as stated in the NPRM, that gradients in typical headlamp beam patterns would likely only affect the repeatability of the test if the reaction by the ADB system changes based on this difference. If this is the case, the ADB system will have this issue in actual use (especially since the specified

² 87 FR 9916, (Feb. 22, 2022).

³ American Honda Motor Co., Inc., Docket No.2022–0013–0011.

⁴ Volkswagen Group of America, Docket No.2022–0013–0012.

Further, including specific headlamp aiming instructions for the stimulus test fixtures would overly prescribe the test conditions, encouraging manufacturers to design narrowly to the test instead of real-world safety needs. The required testing is meant to be representative of on-the-road situations where ADB systems should react regardless of the precise aim of the stimulus headlamps. On the road, the headlamps installed on surrounding traffic are not likely to be perfectly level due to variations such as the slope of the roadway and may even be misaimed, presenting ADB systems with headlamp gradient locations that are not predictable. While an ADB system might use headlamp gradients as an optional method to assist in distinguishing vehicles from other light sources such as streetlights, misaim of stimulus headlamps should not preclude the ADB system from recognizing the need to reduce intensity. Thus, ADB systems should not be particularly sensitive to the aim of the stimuli headlamps.

NHTSA is not docketing specific aiming information from the manufacturers of the stimulus headlamps. While custom aiming strategies may be appropriate for these lamps when mounted on the vehicles on which they were originally designed to be installed, any such instructions would be inapposite for these lamps when mounted in the locations specified for the stimulus test fixtures, as here. For instance, the Ford F-150 headlamps are likely mounted higher when installed on a pickup truck as compared to the mounting height specified for the ADB test fixture. As such, any offset used for these lamps while installed on a pickup truck, would be inappropriate for the mounting location specified for the test fixture. The manufacturer aiming instructions are therefore not fitting in a testing context.

The Agency disagrees that it is necessary to specify in the regulatory text specific aiming instructions for the stimuli headlamps (whether those in SAE J599, or otherwise) and denies these petitions.

B. Allow Representative Vehicles as Stimulus for Compliance Testing

FMVSS No. 108 specifies ADB test fixtures equipped with stimulus lamps for use in performing the dynamic ADB

performance tests. This approach minimizes complexity and harmonizes with SAE J3069 (March 2021) while ensuring that ADB systems operate safely. While the test fixtures' specifications follow SAE J3069 with respect to the locations of the photometers¹⁷ and stimulus lamps, FMVSS No. 108 departs from SAE J3069 in that it requires the use of more real-world representative lighting in the test procedure by specifying original equipment vehicle headlamps and taillamps mounted on test fixtures.¹⁸

In their petitions for reconsideration, Toyota and the Alliance stated that NHTSA should allow, as a manufacturer's option, actual vehicles in place of ADB test fixtures for use in compliance testing. The petitioners suggested that NHTSA modify the final rule by specifying the three vehicles identified in the Final Rule to accommodate more advanced ADB systems.¹⁹

Toyota and the Alliance stated that representative vehicles would permit ADB sensor arrays (e.g., camera- or radar-based systems) to properly account for the characteristics of real-world oncoming and preceding vehicle scenarios, complementing vehicle lighting detection methodologies that current ADB systems use. The Alliance stated that more realistic real-world conditions would differentiate between other light sources in the environment that might impact detection. Toyota stated that the ADB-equipped Lexus NX used by NHTSA for internal research was an older generation system and that other, more advanced ADB systems, with additional advanced sensing, can rely on (other) vehicle characteristics to enhance object recognition to more accurately determine how to adjust the headlamp beam pattern. The petitioners stated that allowing representative vehicles as stimulus for compliance testing would be safety-beneficial and enhance system performance.

Agency Response

NHTSA is denying the request for the option to use representative vehicles in place of stimulus test fixtures to demonstrate compliance for ADB systems during track testing.

The NPRM initially proposed using representative vehicles during track testing. However, following review of comments expressing significant

opposition, NHTSA specified stimulus test fixtures in place of vehicles and explained its reasoning for doing so at length in the final rule.²⁰ FMVSS No. 108 does not preclude the use of potential stimulus vehicles to improve ADB systems; thus, NHTSA sees no issue with vehicle manufacturers using vehicles to further evaluate the performance of their ADB systems. However, performance above and beyond what is required by FMVSS No. 108 does not supersede what is required in the standard.

By requiring the use of original equipment headlamps and taillamps on the ADB test fixtures, FMVSS No. 108 establishes a minimum performance standard that all motor vehicles with ADB headlighting systems are required to meet. Other vehicle characteristics may not be universal components or present in all vehicles. For example, grilles are a characteristic on certain vehicles, but are not a required component like headlamps and thus not present on some electric vehicles. Rather, FMVSS No. 108 as finalized reflects that lighting is the central object of detection for ADB sensors.

Because the regulatory text specifies how NHTSA will evaluate FMVSS No. 108 compliance for ADB systems and the requirements for ADB do not inhibit manufacturers' use of representative vehicles for ADB development, NHTSA denies the petitions from Toyota and the Alliance to allow representative vehicles as a stimulus in compliance testing.

C. ADB System Component-Level Photometric Requirements

In FMVSS No. 108, the component-level photometric requirements, among other things, ensure that the ADB system provides a minimum level of visibility while limiting the maximum level of glare it may direct toward other drivers. The vehicle-level ADB test procedure evaluates the degree of glare that an ADB system casts on the ADB stimulus test fixture in specific scenarios; it does not evaluate visibility. Accordingly, FMVSS No. 108 applies the existing component-level photometric intensity requirements to portions of the adaptive driving beam. The adaptive driving beams must

headlamps are from high-selling vehicles and therefore common on the road), and this should not be considered variability attributable to the test, but a failing of the ADB system. In any case, NHTSA's testing showed that the tested ADB system was generally able to recognize the fixtures fitted with these lamps.'').

¹⁷ A photometer, or illuminance meter, is an instrument that measures light.

¹⁸ See 87 FR 9996 (Feb. 22, 2022) Table 15 (Summary of Major Differences Between the Final Rule and SAE J3069).

¹⁹ MY2018 Toyota Camry, Ford F-150, Harley Davidson Sportster.

²⁰ Among other reasons, NHTSA concluded that using real vehicles would generally not challenge ADB systems any more robustly than the test fixtures fitted with original manufacturer replacement equipment vehicle headlamps and taillamps, as specified in the final rule. Testing showed that the ADB system detected and responded to the finalized test fixtures in generally the same way it did to an actual vehicle. See 87 FR 9934 (Feb. 22, 2022). This obviated the need to include vehicle testing as an option.

consist only of area(s) of reduced intensity, area(s) of un-reduced intensity, and transition zone(s). ADB systems are subject to several requirements that are measured in a laboratory, including that it must be designed to conform to the Table XIX (lower beam photometry) requirements in an area of reduced intensity, and that it must be designed to conform to the Table XVIII (upper beam photometry) requirements in an area of un-reduced intensity.

Stanley stated that replicating the conditions of an actual vehicle test within a laboratory setting, to conduct a photometric test with headlamps, is “almost impossible.” Stanley stated that future ADB (micro) LED headlamps could necessitate testing an infinite combination of areas of reduced intensity. Stanley petitioned NHTSA to only use vehicle-level testing for ADB systems verification and use component-level testing to confirm the lower beam limits with the reduced intensity area turned off, and upper beam limits with the area of un-reduced intensity turned on for vehicle headlamps as they would without the ADB. NAL and Koito’s petitions suggested similar approaches, with Koito suggesting that ADB component-level photometry requirements be changed to the minimum and maximum lower-beam values in the area of reduced intensity, and the minimum lower-beam values and maximum upper-beam values in the area of un-reduced intensity.

Valeo and TSEI petitioned for NHTSA to create a series of specific standardized laboratory compliance tests for ADB systems. According to the petitioners, the lack of a defined test method could lead to an unreasonable, if not an impracticable, amount of time employing various possible implementations of ADB systems spanning a vast range of changing scenarios. TSEI suggested adopting a specific set of test points/lines/zones corresponding to the test scenarios of Table XXII and glare levels of Table XXI.

Valeo’s petition acknowledged that the preamble of the final rule states that all possible ADB headlamp configurations would not necessarily need to be tested but suggested that the suppliers need data from actual testing or simulations that show all possible ADB configurations satisfy the lighting standard. Valeo requested that NHTSA devise a specific test plan with eleven set-ups that would cover most, if not all, of the possible set-ups to ensure manufacturers can certify compliance

for the FMVSS No. 108 requirements.²¹ Both TSEI and Valeo requested that NHTSA adopt vehicle track test scenarios comparable to UNECE regulations.

Agency Response

NHTSA is denying the petitioners’ request to modify the component-level photometric intensity requirements. The purpose of component-level photometric requirements is to complement the dynamic vehicle track testing and ensure that the ADB system always provides the driver with a minimum level of visibility. The track tested requirements encompass many common scenarios (e.g., a single oncoming vehicle in the adjacent lane) while evaluating ADB system glare, but they do not test glare in every conceivable driving scenario, nor do they evaluate visibility. For example, an area of un-reduced intensity that is exceedingly bright (e.g., exceeds the 75,000 cd upper beam maximum) could create glare beyond the maximum track tested distance of 220 m. Component-level photometric requirements therefore must help serve as a backstop to the track test by ensuring that areas of un-reduced intensity are not exceedingly bright out to this distance and glare to other vehicles is minimized.

The component-level photometric requirements generally ensure adequate visibility by specifying minimum levels of light at certain locations (test points) that correspond to different locations on the road. Manufacturers are provided broad flexibility in determining which areas of the roadway receive an area of reduced intensity or an area of un-reduced intensity. The component-level requirements ensure that any areas of reduced intensity (up to and including a pattern equivalent to a full lower beam) do not exceed the Table XIX (lower beam) maxima, and any areas of un-reduced intensity (up to and including a pattern equivalent to a full upper beam), do not exceed the Table XVIII (upper beam) maxima. Conversely, these component-level requirements ensure adequate illumination by ensuring that the minima in Tables XVIII and XIX are also met.

While NHTSA will verify compliance to Table XIX (lower beam photometry requirements) and to Table XVIII (upper beam photometry requirements) through

headlamp testing, manufacturers have the flexibility to certify compliance to the component-level photometric requirements based on other means. As an initial matter, the complexity of certification is based on the complexity of a manufacturer’s adaptive beam. If a manufacturer chooses to create a simple adaptive beam, that beam will be less complex to certify than a beam that has multiple areas of reduced intensity or a beam that moves the areas of intensities. In this way, manufacturers may, in their discretion, limit the number of combinations as needed to create a system that they can properly certify. Certification to the component-level requirements may also be accomplished by actual testing, simulation or any valid means that demonstrate that the requirements are met and that ensure that if NHTSA tests the lamps they will meet the requirements.

Additionally, the component level requirements are consistent with longstanding categorization methods used for headlamp beam patterns because they use intensity values at various horizontal and vertical angles. This longstanding method is already used by manufacturers throughout the design and validation process when developing headlamps. As such, manufacturers are likely already aware of the ADB patterns which they have designed for particular purposes.

In considering the petitions to create a series of specific standardized laboratory compliance tests for ADB systems, NHTSA does not wish to limit the flexibilities currently provided to manufacturers to create dynamic beam patterns. If a manufacturer wishes to limit the number of patterns produced by its ADB system to decrease the measurements required to certify their system, it may do so. Likewise, if a manufacturer wishes to create a dynamic beam pattern that includes many combinations of reduced and un-reduced areas, the requirements also offer that flexibility. Regardless of the component-level evaluation through actual testing or simulation, the manufacturer must certify that whatever beam pattern its ADB headlamp produces has only areas of reduced, un-reduced, and transition zones. In taking this approach, NHTSA has maximized the manufacturers’ flexibility to create beam patterns that satisfy their customers, while also protecting other road users from glare. NHTSA therefore denies these petitions.

D. ADB Photometry Requirements

Areas of reduced intensity must meet the component-level photometric

²¹ Valeo’s petition shows several laboratory testing set-ups for the different ADB road test scenarios and different photometers distances. See Docket No. 2022–0013–0010, Figures 8 to 12 (Figure 8 shows testing at 15 m and testing distance is increased in each figure up to 220 m in Figure 12).

requirements for a lower beam.²² In addition to the component-level photometric requirements, vehicles using ADB headlighting systems are required to maintain these standards while performing dynamic testing on a track. As a part of the track testing, FMVSS No. 108 specifies the use of ADB test fixtures, which each contain stimulus lamps and photometry sensors.²³ For an ADB headlamp, FMVSS No. 108 states the headlighting system must meet the photometry requirements of Table XXI (Adaptive Driving Beam Photometry Requirements) which sets the maximum illuminance within marked measurement distance intervals within a 220 m range.²⁴

Several petitioners²⁵ asserted that ADB headlighting systems cannot concurrently meet the requirements set forth in the component-level tests and the vehicle-level tests. The petitions stated that the maximum permitted illuminance values associated with specific driving scenarios (such as right curves, straight-path, etc.) were particularly difficult to meet while also maintaining the component-level photometric requirements. They suggested, among other actions, that vehicles with ADB systems may need to have their headlamps permanently aimed downward and/or mounted at specific heights to meet the ADB photometry requirements. IIHS asserted that NHTSA's decision to apply left side beam pattern glare limits to the ADB headlighting system imposed an asymmetry during vehicle-level testing of right curves. IIHS stated that the more demanding requirements could only be satisfied with more advanced ADB systems.

SAE, Stanley, and Koito each identified photometric test point 0.5U, 1R–3R as an instance where the ADB maximum allowed illuminance values (glare limit) will fall below the headlamp lower beam photometric intensity minimum. SAE presented multiple right curve calculations to

support its claim. The first area in which SAE claimed conflicting requirements exist is at the lower beam photometric test line of 0.5U, 1R–3R. This particular lower beam photometric scan (laboratory) requires a minimum intensity of 500 cd throughout the line, while allowing a maximum of 2,700 cd anywhere along the line. During right curve ADB test scenarios, the photometer on the test fixture will have a relative travel path that will cross this same test line at some test distance (the distance varies with factors such as curve radius, headlamp mounting height, etc.). SAE stated that the dynamic vehicle test also imposes a glare limit on the same region of the beam pattern which it claimed does not match the corresponding component-level photometry requirement.

In its petition, SAE presented an example showing a 400 m right curve and an ADB headlamp mounting height of 600 mm. In the example, the lower beam maximum of 2,700 cd (laboratory) along that line for a single headlamp would now be limited to 2,160 cd (track) from the pair of ADB headlamps. SAE further stated that dividing this value for each of the two headlamps results in approximately 1,080 cd from a single ADB headlamp imposed by the vehicle driving test requirements. SAE stated that the component-level minimum of 500 cd is also required for lower beams along that same photometric scan line. SAE described this smaller window of compliance as a conflict, claiming that an intensity not much greater than the minimum intensity required along the 0.5U, 1R–3R line would fail the ADB vehicle testing requirements. SAE also presented an example for a 210 m right curve and an ADB lamp mounting height of 800 mm where the upper limit would be approximately 1103 cd per ADB headlamp (track) along the same 0.5U, 1R–3R line that again has a 500 cd minimum.

SAE also presented an example for an area close to the lower beam test point of 2U–4L (Laboratory). SAE stated that this test point requires a minimum of 135 cd. SAE further calculated that, for the 210 m right curve at an ADB mounting height of 600 mm, the lux meter position for the vehicle test would be very close to the 2U–4L point at 15 m distance. The track test maxima require no greater than 700 cd from a pair of ADB headlamps, or 350 cd per ADB headlamp, which SAE stated allows only a small design window.

TSEI stated its concurrence with SAE's petition. It further stated that the glare and lower beam photometry requirements, along with the

requirement for a 1-degree transition zone, deviate from the definition of ADB systems as an evolution of headlamp beam switching devices where specific zones of the upper beam are dimmed, leaving intensity of the dimmed zone at a level equal to the lower beam. TSEI stated that unless the ADB system is deactivated while performing on right curves, under the standard as currently written, the lower beam portion of the ADB system would need to be re-aimed downward or dimmed to comply. TSEI stated that either of those choices would reduce the performance and increase the cost of the system.

Ford presented a comparison of the performance of compliant 2021 F–150 headlamps while undertaking right curves, aimed nominally versus oriented 3 inches downward, to meet the glare limits of the final rule.²⁶ Ford's comparison highlighted that the headlamps largely exceeded the maximum illuminance requirements defined in Table XXI at nominal, while the downwardly aimed headlamps met the requirements. For example, for distances less than 60 m and greater than or equal to 30 m the maximum illuminance requirement is 1.8 lux, yet the illuminance at nominal aim was 4.4 lux and the illuminance when aimed 3 inches down was 1.1 lux. In addition, when translated into forward visibility on a straight road, Ford determined that the downward aiming decreased the forward lower beam seeing distance by 40.3%. For those reasons, Ford petitioned for the creation of a separate glare limit for right curves, in order to maintain a high level of road visibility for drivers. Ford also petitioned based on the IIHS's Headlight Test & Rating Protocol²⁷ for updates of the illuminance values in Table XXI.²⁸

Valeo asserted that currently compliant headlamps that meet photometric requirements would not meet the requirements in the standard on vehicles with higher mounting heights during same direction driving scenarios. Valeo performed an internal investigation with three headlamp mounting heights (750 mm, 900 mm,

²² For instance, in accordance with Table XIX, headlamps observed at test point 0.5U, 1R–3R (deg) must abide by a minimum photometric intensity of 500 cd and maximum photometric intensity of 2700 cd.

²³ 49 CFR 571.108 S14.9.3.12.3.1.

²⁴ See 49 CFR 571.108 S14.9.3.12.2. and 49 CFR 571.108, Table XVIII (Headlamp Upper Beam Photometry Requirements), Table XXI (Adaptive Driving Beam Photometry Requirements). As an example: at distances less than 30 m and greater than or equal to 15 m, the maximum illuminance for an oncoming vehicle is 3.1 lux and the maximum illuminance for a same direction vehicle is 18.9 lux.

²⁵ Specifically SAE, Stanley, Toyota, Ford, TSEI, NAL, IIHS, Valeo, Volkswagen, Koito and the Alliance.

²⁶ See Docket No. NHTSA–2022–0013–0016; Appendix A.

²⁷ See Insurance Institute for Highway Safety, Headlight Test & Rating Protocol, Ver. III (July 2018), <https://www.iihs.org/media/0e823704-32d1-4500-b095-15d064d824a7/ZJciYw/>; (last accessed Dec. 18, 2024)

²⁸ Ford suggests using the following values in Table XXI: for distances less than 30 m and greater than or equal to 15 m, a maximum illuminance for right curves of 7.1; for distances less than 60 m and greater than or equal to 30 m, a maximum illuminance for right curves of 4.8; and for distances less than 120 m and greater than or equal to 60 m, a maximum illuminance for right curves of 2.1.

and 1160 mm) to evaluate glare compliance for the vehicle rearview mirrors and driver's eyes photometers at distances of 15 m, 30 m, 60 m, and 120 m. Valeo composed photometric figures (Figures 5–7) on a coordinate system that showed the intensity (cd) from the left side headlamps of the outside rearview mirrors and driver's eyes photometers during the same direction (straight-path) road test.²⁹ Figure 5 showed a 750 mm headlamp mounting height, Figure 6 showed a 900 mm mounting height, and Figure 7 showed a 1160 mm mounting height. Each figure identified several points of interest, corresponding mirror and photometer locations, where Valeo calculated that the photometric intensity would exceed the bounds of the lower and upper beam photometric requirements, at a given distances, for the specified mounting height. As such, Valeo stated that it does not believe that redesigning the lower beam photometric output would resolve the issue, as recommended in the rule that permitted the installation of ADB systems. Instead, Valeo recommended that NHTSA change the glare requirements, so that they are calibrated to the headlamp being tested instead of it being a fixed value.

Toyota presented a similar analysis, characterizing the pitch of a high-mounted lower beam versus normal aiming.³⁰ Toyota determined that headlamps positioned at a height of 1.1 m would need to lower their vertical aiming angle by 1.41 degrees to meet the photometry requirements in the final rule. However, the adjusted vertical aiming angle would result in a roughly 120 m reduction in forward visibility at 3 lux of lower beam visibility, creating “sub-optimal visibility” for the driver in the area of reduced intensity.

The petitioners suggested that due to perceived conflict enabled by the narrow acceptable intensity margin presented in Table XIX (Headlamp Lower Beam Photometry Requirements) and XXI (Adaptive Driving Beam Photometry Requirements), NHTSA should allow industry stakeholders to dim or re-aim the lower beam during right curves. Several petitioners requested NHTSA consider aligning with SAE J3069, essentially providing the option to evaluate the ADB glare requirement by stipulating the illuminance of the ADB either not exceed the values listed in Table XXI or not exceed by more than 25% the illuminance produced by the same

vehicle's lower beam. Ford alternatively petitioned NHTSA to amend FMVSS No. 108 to reflect its own petitioned values for Table XXI, though Ford stated that it would request that NHTSA provide a phase-in period to allow vehicle manufacturers the time to validate the more stringent requirements.

Agency Response

NHTSA is denying the petitioners' requests to modify the track limits in Table XXI of FMVSS No. 108 by permitting ADB illuminance to exceed the vehicle's lower beam illuminance by up to 25%. NHTSA is also denying Ford's petitioned changes to Table XXI (Adaptive Driving Beam Photometry Requirements), to create separate standards for right and left opposite direction curves. Further modifications to FMVSS No. 108, such as those raised by the petitioners, are not necessary because options already exist for ADB systems to mitigate glare while adhering to the component-level photometric requirements. These flexibilities are available to the manufacturer and discussed below.

NHTSA established photometry requirements for headlamp upper and lower beams in Table XVIII and Table XIX of the lighting standard (FMVSS No. 108), respectively. NHTSA standardizes vehicle headlamps to satisfy two safety needs: visibility and glare prevention. Headlamp lower beams are designed to provide relatively high levels of light in the close-in forward visibility region, and to provide reduced light intensity in longer-distance regions, where oncoming or preceding vehicles would be glared. The upper beams are designed to provide relatively high levels of illumination in both close-in and longer distance regions. For adaptive driving beams, NHTSA designated the photometry requirements, specified as a directional maximum illuminance per measurement distance interval, on the left or driver side of the vehicle. For example, over a measurement distance interval greater than or equal to 15.0 m and less than 30.0 m, the maximum illuminance for a vehicle in the opposite direction is 3.1 lux; for a vehicle driving in the same direction, the maximum illuminance is 18.9 lux.

NHTSA reiterates that it currently allows vehicle manufacturers the option to dynamically re-aim headlamps during driving. Potential issues of glare due to headlamp mounting height can be addressed with the on-vehicle (dynamic) aim of the headlamps. NHTSA has previously explained that for headlamp systems capable of

dynamically re-aiming the headlamps (e.g., based on the steering angle), the laboratory photometry requirements “must be met in the nominal position of the lower beam headlamp (*i.e.*, considering the location of the axis of reference to coincide with the longitudinal axis of the vehicle).”³¹

With respect to the comments about vehicles equipped with high-mounted headlamps, the issue of glare is also present with respect to the lower beams on those vehicles. As such, those vehicles already tend to have their headlamps aimed downward to avoid glaring oncoming or preceding vehicles. Toyota contended that aiming beams downward would reduce seeing distance. However, this concern presumes that a manufacturer aims an entire system's beams downward instead of aiming the adaptive driving beam only. If a manufacturer aims only the adaptive driving beam somewhat lower, that will likely have the greatest impact on areas of reduced intensity, not areas of unreduced intensity (due to the characteristics of lower beam and upper beam patterns). This would not likely have an outsized impact on seeing distance as Toyota suggests.

Additionally, manufacturers have the flexibility to alter the vertical arrangement of the headlamps and/or light sources to mitigate glare. Vertical arrangement refers to the positioning of each headlamp when multiple headlamps are used. FMVSS No. 108 S9.4.1.6.5 expressly permits the adaptive driving beam to be provided by any combination of headlamps, allowing ADB systems to produce the adaptive driving beam out of a headlamp that is mounted lower on the vehicle. This regulatory language directly addresses the concerns raised by commenters that cited high-mounted headlamps as causing a glare issue. Ford and the Alliance acknowledged this option in their comments to the NPRM.³²

SAE, in its petition, calculated that during certain curve scenarios the maximum glare limits are less than the maximum allowed photometry values. Considering the example that results in the highest discrepancy based on the provided calculations (the 400 m right curve example), the maximum value at that test point is still more than twice

²⁹ See Docket No. NHTSA–2022–0013–0010, Figures 5–7.

³⁰ See Docket No. NHTSA–2022–0013–0015, Figure 1.

³² NHTSA–2018–0090–0162; NHTSA–2018–0090–0138.

the minimum at the same point (1,080 cd from SAE calculations vs the 500 cd minimum in FMVSS No. 108). A 580 cd (1,080 cd–500 cd) range of intensity values is sufficient for the design of a compliant ADB lamp, especially considering that the ADB system could dynamically re-aim in order to avoid glare during the ADB track tests. As mentioned previously, a lamp with an output which may exceed the dynamic track test limits for glare could re-aim downward (or use other means) to alleviate glare. The Agency retains this requirement, as detailed in the final rule, because ADB systems can detect oncoming vehicles and adapt accordingly, thus outperforming traditional lower and upper beams in reducing glare.³³ It is therefore appropriate to hold ADB systems to a higher standard.

In its petition, through an internal analysis, Valeo asserts that fully compliant lower beams would fail the glare requirements for same direction driving scenarios. However, upon inspection of their analysis, NHTSA recognized that Valeo had instead applied the adaptive driving beam photometry requirements (Table XXI) for oncoming/opposite direction scenarios when grouping the intensity measures for the locations of the side-view mirrors and driver photometers, shown in figures 5–7. NHTSA also observed that Valeo analyzed test setups using headlamp mounting heights that were nearly level with the 1.2 m driver photometer, in particular the 1.16 m height. Headlamp setups of that stature are unlikely and would glare drivers without proper re-aiming. Because Valeo used improper parameters in its testing, NHTSA does not find the results

of this testing compelling and they do not warrant revisiting FMVSS No. 108. NHTSA therefore denies the petitions.

E. Transition Zone

FMVSS No. 108 allows for a 1-degree transition zone between an area of reduced intensity and an area of unreduced intensity.³⁴ The lower and upper beam photometric test points will not be applied within the transition zone (except for the upper beam maximum at H–V, which still applies throughout the entirety of the beam). Manufacturers are free to decide which portions of the roadway will receive an area of reduced or unreduced intensity, subject to several requirements or constraints (such as the track test that evaluates glare). This flexibility enables ADB systems to provide an area of reduced intensity not only to prevent glare to oncoming or preceding vehicles, but also in other situations in which reduced intensity would be beneficial (*e.g.*, towards retroreflective signs, or on a wet roadway).

SAE, Stanley, Koito, Valeo, NAL, the Alliance, Toyota, TSEI, IIHS, Volkswagen, and Honda all petitioned NHTSA to adjust the designation of a 1-degree transition zone between the headlamp's areas of reduced and unreduced intensity. Of those identified, SAE, Stanley, Valeo, the Alliance, Toyota, Volkswagen and TSEI explicitly petitioned that NHTSA increase the transition zone to 4 degrees. Valeo supported its petition by presenting an ADB pattern and its accompanying intensity scan of the H–H line, to demonstrate how transitioning from the area of reduced intensity to an area of full intensity in the upper beam portion of the ADB beam takes at least 4 degrees.³⁵ Further, Valeo presented a comparative diagram of the UNECE and FMVSS No. 108 ADB implementation requirements to illustrate that the 1-degree transition zones will result in much larger areas of reduced intensity to meet the minimum requirements of the upper beam test points in the areas of unreduced intensity; Valeo stated this result effectively minimized the added safety benefits of ADB. Koito showed in its petition an iso-lux curve showing its ADB systems use approximately a 4-degree transition zone.³⁶ NAL stated that not restricting ADB systems to a 1-degree transition zone could provide more light than the basic lower beam and potentially improve safety. Further,

NAL and Koito also commented that NHTSA did not thoroughly explain the safety benefit of a 1-degree transition zone.

Several petitioners³⁷ shared that an overwhelming majority of current ADB systems in other foreign markets would fail to meet the 1-degree transition zone requirement given the limits of the technology. Koito stated that the most popular and cost-effective ADB systems employ an optical system with shifting and overlapping segments of light, to ensure better visibility by enabling smooth transitions between the areas of reduced and unreduced intensity. Koito, among others, stated that these systems would fail to meet the standard. Toyota also commented that the photometry requirements would likely make systems more costly and slow development. Further, Toyota stated that only expensive, high-resolution pixelated ADB systems within premium vehicles can meet the current compliance standards for the transition zone. Additionally, NAL stated that SAE J3069 intentionally did not specify a width of the transition zone to permit different, less complicated, ADB systems and beam patterns as more than 80 percent of systems currently implemented by manufacturers are less complex. IIHS stated that NHTSA would contravene its stated technology-neutral approach by having a requirement that would strongly favor pixelated systems.

Petitioners SAE and Koito suggested eliminating the transition zone entirely. TSEI requested NHTSA specify the size of the transition zone be greater than the minimum values specified for relevant lower beam test points (Table XIX, Headlamp Lower Beam Photometry Requirements) and less than the maximum specified at the HV for the upper beam (Table XVIII, Headlamp Upper Beam Photometry Requirements). TSEI stated this solution would more closely align, not only with SAE J3069, but also with the definition of a semi-automatic headlamp beam switching device, granting manufacturers more freedom to optimize ADB systems. Volkswagen stated in its petition that there are no known safety recalls, reported concerns or customer complaints with ADB in the rest of the world, which indicates an absence of safety issues with current ADB systems. According to Volkswagen, the exceptionally rigorous requirements for ADB in the United States through FMVSS No. 108 are not necessary.

³³ 87 FR 9957, (February 22, 2022). The agency notes that even with this modification, the glare limits in this final rule are still (as Stanley suggested) more stringent than currently allowed by the Table XIX right-side maxima from 1R to 3R. However, this level of stringency is reasonable and provides a manageable design range. The lower beam photometry was designed to provide a generic beam to prevent glare regardless of the actual road and traffic conditions; it was not customized to provide glare protection to oncoming vehicles on a right curve. Because most situations in which an oncoming vehicle can be glared will occur with the oncoming vehicle to the *left*, the existing Table XIX lower beam photometry requirements require shading the left side and permit more light on the right side. However, the adaptive driving beam is not, and need not be, an all-purpose beam like a conventional lower beam. It is clear in the photometry tables that the appropriate glare limits for oncoming situations are the left-side maxima in Table XIX, on which the oncoming glare limits are based. These limits should, to the extent possible, apply to oncoming glare, including from the right-side. In any case, the agency believes that current lower beams would generally comply with the glare limits as applied in this scenario with the revised measurement distance range.

³⁷ SAE, Stanley, Valeo, the Alliance, NAL, Toyota, IIHS, Volkswagen and TSEI.

Agency Response

NHTSA is denying all the petitions that request a change to the 1-degree transition zone allowance between the vehicle's headlamp areas of reduced and unreduced intensity. The transition zone plays a vital role in making the requirements practicable. In some cases, transitioning from lower beam intensities to upper beam intensities can represent a large change in photometric intensity. Achieving this transition is important to ensure that the adaptive beam pattern continues to serve the function of providing seeing distance, while also limiting glare. The angular size of this transition is critical to the beam's ability to meet these competing goals. A transition zone that is too large can create a problem in the beam pattern where either glare control or seeing distance is less than what is provided by the appropriate lower or upper beam, compromising safety.

NHTSA determined that increasing the transition zone from 1-degree to 4-degree, as suggested by most of the petitioners, would reduce visibility below that provided by an upper beam even in common driving situations. Specifically, NHTSA found that over a 50 m range, the area of a 4-degree transition zone would extend 3.5 m wide and potentially cover the entirety of an adjacent lane. This limits the ability of the driver of an ADB equipped vehicle to navigate the roadway. NHTSA considered a simple interaction with a single oncoming vehicle that is positioned 50 m ahead in a lane to the left of the ADB equipped vehicle. In such a scenario, the adaptive beam will create an area of reduced intensity around the oncoming vehicle and will also create a transition zone to the left and right of that area of reduced intensity. If that transition zone extends 4 degrees beyond the end of the area of reduced intensity, it will not provide the upper beam photometric intensity until 3.5 m to the right of the oncoming vehicle (the area representing the ADB vehicle's travel lane). For a roadway with 3.0 m wide lane widths, the entirety of the ADB vehicle's travel lane (at a distance of 50 m) will be illuminated by the minimally regulated transition zone, which does not ensure proper object detection and undermines safety.

With regard to the commenters' claims that FMVSS No. 108's transition zone requirement is overly stringent, costly, and only high-resolution, pixelated ADB systems within premium vehicles can comply, NHTSA highlights that ADB headlight systems are optional. Because of the added costs

associated with the technology, NHTSA does not anticipate that manufacturers would make these systems standard equipment in all vehicle models at this time. However, the practicability requirement in the National Traffic and Motor Vehicle Safety Act considers the technological ability of an industry to meet the goals of a particular standard. While ADB technology sufficient to meet the 1-degree transition zone may not yet be prevalent, compliance is feasible and demonstrated by specific premium models. NHTSA may also issue safety standards that are technology-forcing, requiring improvements in existing technology.³⁸ While the transition zone requirements of FMVSS No. 108 are appropriately more rigorous than existing global requirements, revising FMVSS No. 108 to allow certification of ADB systems moves toward harmonization. By making ADB an optional technology, NHTSA incentivizes manufacturers to strive toward the increased safety and visibility advanced by the standard's rigor, while balancing reasonableness of cost and lead time.

F. Other

Momentary Exceedance Limit

FMVSS No. 108 allows for a 0.1 second momentary glare exceedance allowance to account for vehicle pitch and other potentially uncontrolled noise in the measurement system.³⁹ The momentary glare exceedance duration begins when the permitted maximum lux is exceeded and concludes in at least two ways: the illuminance value drops below the applicable glare limit; or the glare limit itself changes (*i.e.*, increase). These outcomes could happen if the exceedance is experienced just before the glare limit changes. In either case, if the glare limit is not exceeded for more than 0.1 seconds, the exceedance will not be considered a noncompliance.

Volkswagen petitioned NHTSA to increase the ADB systems exceedance limit. Volkswagen stated that the detection angle of the forward-facing cameras in NHTSA's testing of medium curve track scenarios, which resulted in glare exceedances, surpassed the capabilities of their existing ADB system cameras. Volkswagen stated that increasing the angle of detection of existing ADB system cameras, to keep the lux values within the illuminance limits and time exceedance at the far horizontal edges of the camera's detection zone, will detract from the

system's performance and stability in the head-on area of the vehicle. According to Volkswagen, the compromised sensitivity will limit the ADB system from utilizing increased use of unreduced intensity light and limit safety benefits of enhanced visibility in all road scenarios. According to Volkswagen, consistently controlling glare to the far extreme horizontal edges of the angular visibility of the camera could be optimized by increasing the glare exceedance limit to a higher value.

Volkswagen stated that a human driver's physical reaction time is approximately 1.0 second. Volkswagen referenced comments in the final rule preamble by the American Automobile Association (AAA), where it reported oncoming glare research showed exceedance of 1 second was rated as distracting to drivers.⁴⁰ Volkswagen petitioned NHTSA to increase the minimum exceedance limit time from 0.1 seconds to 0.7 seconds, which it states will allow the systems to have a more consistent and reliable detection performance.

Momentary Exceedance Limit Agency Response

NHTSA is denying the petitioner's request to increase the 0.1-second momentary exceedance limit for ADB systems to 0.7 seconds. NHTSA established the 0.1-second glare exceedance allowance to account for testing-related variability caused by noise and uncontrolled test factors. For example, minor imperfections in the road surface can cause glare exceedances by affecting vehicle pitch. The testing conducted by NHTSA in support of the final rule does not show that glare from such sources lasts longer than 0.1 second.

NHTSA does not agree with Volkswagen's comparison to a human driver's reaction time. The field of view (FOV) of the ADB system's camera is considerably narrower than that of a human observer, which is estimated at approximately 180°. The narrower FOV will impact, and indeed improve, the ADB system's ability to quickly recognize and respond to oncoming stimuli. NHTSA considers any comparison with a human observer to be a false equivalency.

Large Radius of Curvature Track Testing

FMVSS No. 108 specifies testing for oncoming glare over eight track test scenarios. The test scenarios involve the subject vehicle traveling towards the

³⁸ See *Chrysler v. Department of Transportation*, 472 F.2d 659 (6th Cir. 1972).

³⁹ 49 CFR 571.108 S14.9.3.12.2.1.

⁴⁰ 87 FR 9940 (Feb. 22, 2022) § VIII.C.4 (Maximum Illuminance Criteria (Glare Limits)).

fixture at various ranges of test speeds and road geometries of varying direction and curve radii, including large radii from 335m to 440m.⁴¹

Volkswagen requested NHTSA remove the large radius curve test scenario from the standard. Volkswagen stated the vast majority of vehicle proving grounds do not offer such a large radius of curvatures. Volkswagen stated that there are currently only five facilities that are sufficiently large enough to conduct the final rule track testing. Volkswagen suggested NHTSA did not evaluate the ability of manufacturers or companies to conduct the testing at their own facilities and/or make accommodation for large radius curve test scenarios, which impose significant financial and time burdens. In addition, given NHTSA's preamble comments on IIHS using extrapolation for medium radius of curvature testing,⁴² Volkswagen inferred that similar extrapolation would be allowed for large radius test scenarios, making it redundant to include a specific track test as part of the regulation.

Large Radius of Curvature Track Testing Agency Response

NHTSA is denying the petitioner's request to remove large radius curve testing scenarios from FMVSS No. 108. NHTSA was able to test on the curves specified in the final rule at the Transportation Research Center Vehicle Dynamics Area. This test facility is publicly available to manufacturers.

A manufacturer must certify that its ADB system will meet the requirements specified in the standard if NHTSA tests it. As such, a manufacturer may use any valid means, including extrapolation, to certify if such a method proves valid through physical testing conducted by the NHTSA. Therefore, it is not necessary to remove the large radius curve test scenarios. Accordingly, manufacturers must exercise reasonable care in certifying that their vehicles will perform throughout the range of radii of curvature specified in the Table XXII. NHTSA will perform compliance testing using NHTSA facilities and it is the manufacturer's responsibility to ensure that it meets the performance requirements.

Headlamp Lens Cleaning

The Alliance petitioned for the test vehicle preparation of the headlamps lenses to match the preparation for the ADB sensors and windshield.

Headlamp Lens Cleaning Agency Response

The regulatory text states that to the extent practicable, the windshield and sensors will be clean and free from dirt and debris. The phrase "to the extent practicable" does not appear in the vehicle preparation condition for a clean and debris free headlamp lens. This distinction acknowledges that it may not be practicable in some cases to clean the ADB sensors depending on the design of the vehicle. While Option 1 for headlamp beam switching devices in FMVSS No. 108 (classic semiautomatic beam switching device) is required to have an accessible lens for cleaning, no such requirement is applied to the ADB option. As such, a condition may exist in which NHTSA is unable to clean the ADB sensor. Considering this possibility, the "to the extent practicable" phrase is included in the cleaning condition for that sensor. A comparable situation does not exist for headlamp lenses as FMVSS No. 108 restricts the installation of headlamp obstructions. As such, NHTSA anticipates that it can clean the headlamp lenses before testing the ADB system as specified in the test procedure without issue.

Motorcycle ADB Requirements

FMVSS No. 108 identifies the upper and lower beam photometry requirements for motorcycle headlamps and specifies that a motorcycle headlighting system must meet one of two options.⁴³ One option is that it must satisfy one half of any passenger vehicle headlighting system of Table II, which provides both a full upper beam and full lower beam and is designed to conform to the requirements for that headlamp type. Alternatively, under the second option, the headlighting system may be designed to conform to requirements that are specific to motorcycles.

Honda and Stanley requested NHTSA verify the application of ADB systems to motorcycles. They stated that the ADB requirements only mention photometry requirements in Tables XVIII and Table XIX, but not Table XX which includes photometry requirements for headlamps of motorcycles.

Honda suggested that NHTSA modify the requirement to add Table XX to the relevant ADB sections of the standard (S9.4.1.6.4.[3–5]), while Stanley simply

requested clarification on how to apply ADB to motorcycles.

Motorcycle ADB Requirements Agency Response

NHTSA is denying the petitioners' requests to include motorcycle specific language in the final rule to validate motorcycle headlamp photometry compliance for ADB systems. NHTSA's lighting standard grants motorcycle headlighting systems two options to meet compliance. One of the options requires that the motorcycle headlighting system consist of one half of a headlighting system specified in Table II and conforms to the requirements for that headlamp type. This option can be used to ensure motorcycle headlamps meet the ADB requirements and not require change to the current regulatory text. NHTSA recognizes the requirements in Tables XVIII and XIX differ from those of Table XX; this difference is intentional and motorcycle lamps that incorporate ADB technology will need to comply with the requirements in Tables XVIII and XIX as they relate to motorcycles.

III. Petition for Reconsideration That Is Out of Scope

Each semiautomatic headlamp switching device must include operating instructions to permit a driver to operate the device correctly. This requirement includes how to turn the automatic control on and off; how to adjust the sensitivity control (for Option 1 and, if provided, for Option 2); and any other specific instructions applicable to the device. Option 1 ("the classic system") automatically switches between the upper and lower beam. Option 2 is the adaptive driving beam newly allowed by the revision of FMVSS No. 108. The recent revision to FMVSS No. 108 added the parenthetical "(for Option 1 and, if provided, for Option 2)" to the regulatory text to reflect that the requirement for sensitivity control instructions continue to apply to the classic system without change, but now also applies to adaptive driving beams if the adaptive driving beam is equipped with sensitivity control.

The Alliance petitioned for a modification of the operating instructions to the semiautomatic beam switching devices. The Alliance petitioned to remove the sensitivity control instructions for the Option 1 semiautomatic beam switching device by modifying the regulatory text to say "if provided" for both Option 1 and Option 2. FMVSS No. 108 uses the language "if provided" only for Option 2, reflecting the intent to make no

⁴¹ 87 FR 9928 (Feb. 22, 2022) Table 4 (Summary to the Proposed Track Test Scenarios). Testing is done with the vehicle traveling on a straight-path or on curves. The Radii of the curves vary as follows: Small = 85 m–115 m; Medium = 210 m–250 m; Large = 335 m–440 m. The testing speed ranges vary based on scenario from 25 mph to 70 mph.

⁴² 87 FR 9955 (Feb. 22, 2022) § VIII.C.8.d (Scenario 4: Oncoming Large Left Curve).

⁴³ 49 CFR 571.108 S10.17.

changes to the classic semiautomatic beam switching devices requirements (Option 1), as compared to the previous versions of FMVSS No. 108. The scope of the recent FMVSS No. 108 revision pertained only to adaptive driving beams. As the request from the Alliance pertains to modification of the classic semiautomatic beam switching devices and those devices are not part of this ADB systems rulemaking action, NHTSA deems this request out of scope. NHTSA will not modify the requirements.

IV. Clarifications

Several clarification questions were presented as part of the various petitions for reconsideration. NHTSA is taking this opportunity to answer some of these clarifying questions.

First, NHTSA will zero-calibrate the photometers for the ADB track testing with the photometers installed on the test fixture and in the testing orientation. Doing so will allow NHTSA to more accurately measure the light provided by the test vehicle and filter out light from the environment.

Second, NHTSA's zero-calibration process will subtract out light provided by the test fixture lighting itself. The lamps installed on the test fixture will illuminate the surroundings and, as such, some of that light will be reflected back onto the photometers. This light will not be counted as part of the measured light that is required to be less than the prescribed maxima. NHTSA's testing method also accounts for ambient conditions by measuring ambient illuminance either immediately before or after each test trial and subtracting that value from the recorded test data.

Finally, NHTSA is clarifying that if a lower beam is part of the adaptive beam and horizontal aim is included in that lower beam, then it is excluded from the horizontal VHAD requirements in the same way as the adaptive beam is excluded. That is to say, a lower beam that is part of an adaptive beam and includes a horizontal aim need only meet the horizontal VHAD requirement to include references and scales relative to the longitudinal axis of the vehicle

necessary to ensure correct horizontal aim for photometry and aiming purposes. It must include a "0" mark to indicate the alignment of the headlamps relative to the longitudinal axis of the vehicle and include an equal number of graduations from the "0" position representing equal angular changes in the axis relative to the vehicle axis. The remaining horizontal VHAD requirements that would apply to a lower beam that is not part of an adaptive beam do not apply in such a scenario (S10.18.8.1.2.1 through S10.18.8.1.2.4).

V. Conclusion

For the reasons discussed above, the agency denies the Petitioners' petitions for reconsideration of the February 22, 2022, final rule (87 FR 9916).

Issued in Washington, DC, under authority delegated in 49 CFR 1.95 and 501.

Adam Raviv,
Chief Counsel.

Docket No. 24–AAL–99]

RIN 2120–AA66

Amendment of Alaskan Very High Frequency Omnidirectional Range Federal Airways V–444 and V–504 in Alaska

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend Alaskan Very High Frequency Omnidirectional Range (VOR) Federal Airways V–444 and V–504. The FAA is proposing this action due to the pending decommissioning of the Evansville, AK, Nondirectional Radio Beacon (NDB).

DATES: Comments must be received on or before February 13, 2025.

ADDRESSES: Send comments identified by FAA Docket No. FAA–2024–2738 and Airspace Docket No. 24–AAL–99 using any of the following methods:

* *Federal eRulemaking Portal:* Go to www.regulations.gov and follow the online instructions for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at www.regulations.gov at any time.

Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11J, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at www.faa.gov/air_traffic/publications/. SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the airway structure as necessary to preserve the safe and efficient flow of air traffic within the National Airspace System.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments,

commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at www.dot.gov/privacy.

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at www.regulations.gov. Recently published rulemaking documents can also be accessed through the FAA's web page at www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the office of the Western Service Center, Federal Aviation Administration, 2200 South 216th St., Des Moines, WA 98198.

Incorporation by Reference

Alaskan VOR Federal Airways are published in paragraph 6010 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11J, dated July 31, 2024, and

effective September 15, 2024. These updates would be published in the next update to FAA Order JO 7400.11. That order is publicly available as listed in the **ADDRESSES** section of this document.

FAA Order JO 7400.11J lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

Background

In 2003, Congress enacted the Vision 100-Century of Aviation Reauthorization Act (Pub L., 108–176), which established a joint planning and development office in the FAA to manage the work related to the Next Generation Air Transportation System (NextGen). Today, NextGen is an ongoing FAA-led modernization of the nation's air transportation system to make flying safer, more efficient, and more predictable.

In support of NextGen, this proposal is part of an ongoing, large, and comprehensive airway modernization project in the state of Alaska. Part of this project is to transition the Alaskan en route navigation structure away from dependency on NDBs and move to develop and improve the Area Navigation (RNAV) route structure. The FAA is planning to decommission the Evansville, AK, NDB. As a result, the segment of Alaskan Federal Airway V–444 between the Evansville NDB and the Browerville, AK, VOR will become unusable. The mitigation to the loss of this segment of V–444 is RNAV route T–232. T–232 directly overlays the segment of V–444 proposed for removal. Additionally, the segment of Alaskan Federal Airway V–504 between the Evansville NDB and the Deadhorse, AK, VOR/Distance Measuring Equipment (DME) will become unusable. The mitigation to the loss of this segment of V–504 is RNAV route T–240. T–240 directly overlays the segment of V–504 proposed for removal.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to amend Alaskan VOR Federal Airways V–444 and V–504 in Alaska. The FAA is proposing these actions due to the pending decommissioning of the Evansville, AK, NDB.

V–444: V–444 in Alaska currently extends between the Barrow, AK, VOR/DME and the intersection of the Northway, AK, VOR/Tactical Air Navigation (VORTAC) 120° (M), 138° (T), and the Gulkana, AK, VOR/DME 062° (M), 079° (T) radials. As amended, V–444 would extend between the Bettles, AK, VOR/DME and the intersection of the Northway, AK, VORTAC 120° (M), 138° (T), and the

Gulkana, AK, VOR/DME 062° (M), 079° (T) radials.

V–504: V–504 currently extends between the Nenana, AK, VORTAC and the Deadhorse, AK, VOR/DME. As amended, V–504 would extend between the Neana VORTAC and the Bettles, AK, VOR/DME.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11J, Airspace Designations and Reporting Points, dated July 31, 2024, and effective September 15, 2024, is amended as follows:

Paragraph 6010(b) Alaskan VOR Federal Airways.

* * * * *

V–444 [Amended]

From Bettles, AK; Fairbanks, AK; Big Delta, AK; Northway, AK; intersection of the Northway 120° (M), 138° (T), and Gulkana 062° (M), 079° (T) radials.

* * * * *

V–504 [Amended]

From Nenana, AK; to Bettles, AK.

Issued in Washington, DC, on December 20, 2024.

Richard Lee Parks,

Manager (A), Airspace Rules and Regulations.

[FR Doc. 2024–31104 Filed 12–27–24; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

[Docket No. DEA–1246]

Schedules of Controlled Substances: Placement of 4-Chloromethcathinone in Schedule I

AGENCY: Drug Enforcement Administration, Department of Justice.
ACTION: Notice of proposed rulemaking.

SUMMARY: The Drug Enforcement Administration proposes placing the substance 4-chloromethcathinone (4-CMC, 1-(4-chlorophenyl)-2-(methylamino)propan-1-one), including its salts, isomers, and salts of isomers, in schedule I of the Controlled Substances Act. This action is being taken, in part, to enable the United States to meet its obligations under the 1971 Convention on Psychotropic Substances. If finalized, this action would impose the regulatory controls and administrative, civil, and criminal sanctions applicable to schedule I controlled substances on persons who handle (manufacture, distribute, reverse distribute, import, export, engage in research, conduct instructional activities or chemical analysis with, or possess) or propose to handle 4-chloromethcathinone.

DATES: Comments must be submitted electronically, and written comments must be postmarked or shipped on or before January 29, 2025.

Interested persons may file a request for a hearing or waiver of hearing pursuant to 21 CFR 1308.44 and in accordance with 21 CFR 1316.47 and/or 1316.49, as applicable. Requests for a hearing and waivers of an opportunity for a hearing or to participate in a

hearing, together with a written statement of position on the matters of fact and law asserted in the hearing, must be received on or before January 29, 2025.

ADDRESSES: Interested persons may file written comments on this proposal in accordance with 21 CFR 1308.43(g). The electronic Federal Docket Management System will not accept comments after 11:59 p.m. eastern time on the last day of the comment period. To ensure proper handling of comments, please reference “Docket No. DEA-1246” on all electronic and written correspondence, including any attachments.

- **Electronic comments:** The Drug Enforcement Administration (DEA) encourages commenters to submit comments electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to <https://www.regulations.gov> and follow the online instructions at that site for submitting comments. Upon completion of your comment submission, you will receive a Comment Tracking Number. If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment. Commenters should be aware that the electronic Federal Docket Management System will not accept comments after 11:59 p.m. eastern time on the last day of the comment period.

- **Paper comments:** Paper comments that duplicate the electronic submissions are not necessary and are discouraged. Should you wish to mail a paper comment, *in lieu of* an electronic comment, it should be sent via regular or express mail to: Drug Enforcement Administration, Attn: DEA Federal Register Representative/DPW, 8701 Morrisette Drive, Springfield, Virginia 22152.

- **Hearing requests:** All requests for a hearing and waivers of participation, together with a written statement of position on the matters of fact and law asserted in the hearing, must be filed with the DEA Administrator, who will make the determination of whether a hearing will be needed to address such matters of fact and law in the rulemaking. Such requests must be sent to: Drug Enforcement Administration, Attn: Administrator, 8701 Morrisette Drive, Springfield, Virginia 22152. For informational purposes, a courtesy copy of requests for hearing and waivers of participation should also be sent to: (1) Drug Enforcement Administration, Attn:

Hearing Clerk/OALJ, 8701 Morrisette Drive, Springfield, Virginia 22152; and (2) Drug Enforcement Administration, Attn: DEA Federal Register Representative/DPW, 8701 Morrisette Drive, Springfield, Virginia 22152.

- **Paperwork Reduction Act**

Comments: All comments concerning collections of information under the Paperwork Reduction Act must be submitted to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for DOJ, Washington, DC 20503. Please state that your comment refers to Docket No. DEA-1246.

FOR FURTHER INFORMATION CONTACT: Dr. Terrence L. Boos, Drug and Chemical Evaluation Section, Diversion Control Division, Drug Enforcement Administration; telephone: (571) 362-3249.

SUPPLEMENTARY INFORMATION: In this proposed rule, the Drug Enforcement Administration (DEA) proposes to place 4-chloromethcathinone (also known as 4-CMC or 1-(4-chlorophenyl)-2-(methylamino)propan-1-one) including its salts, isomers, and salts of isomers in schedule I of the Controlled Substances Act (CSA).

Posting of Public Comments

Please note that all comments received in response to this docket are considered part of the public record. DEA will make comments available for public inspection online at <https://www.regulations.gov>. Such information includes personal or business identifiers (such as name, address, state or Federal identifiers, etc.) voluntarily submitted by the commenter. In general, information voluntarily submitted by the commenter, unless clearly marked as Confidential Information in the method described below, will be publicly posted. Comments may be submitted anonymously.

Commenters submitting comments which include personal identifying information (PII), confidential, or proprietary business information that the commenter does not want made publicly available should submit two copies of the comment. One copy must be marked “CONTAINS CONFIDENTIAL INFORMATION” and should clearly identify all PII or business information the commenter does not want to be made publicly available, including any supplemental materials. DEA will review this copy, including the claimed PII and confidential business information, in its consideration of comments. The second copy should be marked “TO BE PUBLICLY POSTED” and must have all claimed confidential PII and business

information already redacted. DEA will post only the redacted comment on <https://www.regulations.gov> for public inspection. The Freedom of Information Act applies to all comments received.

For easy reference, an electronic copy of this document and supplemental information to this proposed scheduling action are available at <https://www.regulations.gov>.

Request for Hearing or Appearance; Waiver

Pursuant to 21 U.S.C. 811(a), this action is a formal rulemaking “on the record after opportunity for a hearing.” Such proceedings are conducted pursuant to the provisions of the Administrative Procedure Act (APA), 5 U.S.C. 551–559.¹ Interested persons, as defined in 21 CFR 1300.01(b), may file requests for a hearing in conformity with the requirements of 21 CFR 1308.44(a) and 1316.47(a), and such requests must:

- (1) state with particularity the interest of the person in the proceeding;
- (2) state with particularity the objections or issues concerning which the person desires to be heard; and
- (3) state briefly the position of the person with regarding to the objections or issues.

Any interested person may file a waiver of an opportunity for a hearing or to participate in a hearing in conformity with the requirements of 21 CFR 1308.44(c), together with a written statement of position on the matters of fact and law involved in any hearing.²

All requests for a hearing and waivers of participation, together with a written statement of position on the matters of fact and law involved in such hearing, must be sent to DEA using the address information provided above. The decision whether a hearing will be needed to address such matters of fact and law in the rulemaking will be made by the Administrator. If a hearing is needed, DEA will publish a notice of hearing on the proposed rulemaking in the **Federal Register**.³ Once the Administrator designates an Administrative Law Judge (ALJ) to preside over the hearing, the ALJ’s functions shall commence, as provided in 21 CFR 1316.52.

In accordance with 21 U.S.C. 811 and 812, the purpose of a hearing would be to determine whether 4-chloromethcathinone meets the statutory criteria for placement in schedule I, as proposed in this rule.

¹ 21 CFR 1308.41 through 1308.45; 21 CFR part 1316, subpart D.

² 21 CFR 1316.49.

³ 21 CFR 1308.44(b), 1316.53.

Legal Authority

The CSA provides that proceedings for the issuance, amendment, or repeal of the scheduling of any drug or other substance may be initiated by the Attorney General (delegated to the Administrator of DEA pursuant to 28 CFR 0.100) on his own motion, at the request of the Secretary of Health and Human Services (HHS), or on the petition of an interested party.⁴ This proposed action is initiated on the Administrator's own motion and supported by, *inter alia*, a recommendation from the Assistant Secretary for Health of HHS.

In addition, the United States is a party to the 1971 United Nations Convention on Psychotropic Substances (1971 Convention), Feb. 21, 1971, 32 U.S.T. 543, 1019 U.N.T.S. 175, as amended. Procedures respecting changes in drug schedules under the 1971 Convention are governed domestically by 21 U.S.C. 811(d)(2)–(4). When the United States receives notification of a scheduling decision pursuant to Article 2 of the 1971 Convention indicating that a drug or other substance has been added to a schedule specified in the notification, the Secretary of HHS (Secretary),⁵ after consultation with the Attorney General, shall first determine whether existing legal controls under subchapter I of the CSA and the Federal Food, Drug, and Cosmetic Act meet the requirements of the schedule specified in the notification with respect to the specific drug or substance.⁶ In the event that the Secretary did not consult with the Attorney General, and the Attorney General did not issue a temporary order, as provided under 21 U.S.C. 811(d)(4), the procedures for permanent scheduling set forth in 21 U.S.C. 811(a) and (b) control. Pursuant to 21 U.S.C. 811(a)(1) and (2), the Attorney General (as delegated to the Administrator of DEA) may, by rule, and upon the recommendation of the Secretary, add to such a schedule or transfer between such schedules any drug or other substance, if he finds that such drug or other substance has a potential for abuse, and makes with respect to such drug or other substance the findings

prescribed by 21 U.S.C. 812(b) for the schedule in which such drug or other substance is to be placed.

Background

4-Chloromethcathinone (4-CMC) is a central nervous system stimulant that shares structural and pharmacological similarities with schedule I synthetic cathinones such as 4-methylethcathinone (4-MEC), 4-fluoromethcathinone (4-FMC), and 3-fluoromethcathinone (3-FMC), and schedule II stimulants such as amphetamine and methamphetamine. On May 7, 2020, the Secretary-General of the United Nations advised the Secretary of State of the United States that the Commission on Narcotic Drugs (CND) voted to place 4-CMC in Schedule II of the 1971 Convention during its 63rd session held in March 2020 (CND Dec/63/9).

As a signatory to the 1971 Convention, the United States is required, by scheduling under the CSA, to place appropriate controls on 4-CMC to meet the minimum requirements of the treaty. Because the procedures in 21 U.S.C. 811(d)(3) and (4) for consultation and issuance of a temporary order for 4-CMC, discussed in the above legal authority section, were not followed, DEA is utilizing the procedures for permanent scheduling set forth in 21 U.S.C. 811(a) and (b) to control 4-CMC. Such scheduling would satisfy the United States' international obligations.

Article 2, paragraph 7(b), of the 1971 Convention sets forth the minimum requirements that the United States must meet when a substance has been added to Schedule II of the 1971 Convention. Pursuant to the 1971 Convention, the United States must require licenses for the manufacture, export and import, and distribution of 4-CMC. This license requirement is accomplished by the CSA's registration requirement as set forth in 21 U.S.C. 822, 823, 957, and 958, and in accordance with 21 CFR parts 1301 and 1312.

In addition, the United States must adhere to specific export and import provisions set forth in the 1971 Convention. This requirement is accomplished by the CSA with the export and import provisions established in 21 U.S.C. 952, 953, 957, and 958, and in accordance with 21 CFR part 1312. Likewise, under Article 13, paragraphs 1 and 2 of the 1971 Convention, a party to the 1971 Convention may notify through the UN Secretary-General another party that it prohibits the importation of a substance in Schedule II, III, or IV of the 1971 Convention. If such notice is presented

to the United States, the United States shall take measures to ensure that the named substance is not exported to the notifying country. This requirement is also accomplished by the CSA's export provisions mentioned above.

Under Article 16, paragraph 4, of the 1971 Convention, the United States is required to provide annual statistical reports to the International Narcotics Control Board (INCB). Using INCB Form P, the United States shall provide the following information: (1) In regard to each substance in Schedule I and II of the 1971 Convention, quantities manufactured, exported to, and imported from each country or region as well as stocks held by manufacturers; (2) in regard to each substance in Schedule III and IV of the 1971 Convention, quantities manufactured, as well as quantities exported and imported; (3) in regard to each substance in Schedule II and III of the 1971 Convention, quantities used in the manufacture of exempt preparations; and (4) in regard to each substance in Schedule II–IV of the 1971 Convention, quantities used for the manufacture of non-psychoactive substances or products.

Lastly, under Article 2 of the 1971 Convention, the United States must adopt measures in accordance with Article 22 to address violations of any statutes or regulations that are adopted pursuant to its obligations under the 1971 Convention. Persons acting outside the legal framework established by the CSA are subject to administrative, civil, and/or criminal action; therefore, the United States complies with this provision.

DEA notes that there are differences between the schedules of substances in the 1971 Convention and the CSA. The CSA has five schedules (schedules I–V) with specific criteria set forth for each schedule. Schedule I is the only possible schedule in which a drug or other substance may be placed if it has high potential for abuse and no currently accepted medical use in treatment in the United States.⁷ In contrast, the 1971 Convention has four schedules (Schedules I–IV) but does not have specific criteria for each schedule. The 1971 Convention simply defines its four schedules, in Article 1, to mean the correspondingly numbered lists of psychotropic substances annexed to the Convention, and altered in accordance with Article 2.

⁷ See 21 U.S.C. 812(b).

⁴ 21 U.S.C. 811(a).

⁵ As discussed in a memorandum of understanding entered into by the FDA and the National Institute on Drug Abuse (NIDA), FDA acts as the lead agency within HHS in carrying out the Secretary's scheduling responsibilities under the CSA, with the concurrence of NIDA. 50 FR 9518 (Mar. 8, 1985). The Secretary has delegated to the Assistant Secretary for Health of HHS the authority to make domestic drug scheduling recommendations. 58 FR 35460 (July 1, 1993).

⁶ 21 U.S.C. 811(d)(3).

Proposed Determination to Schedule 4–CMC

Pursuant to 21 U.S.C. 811(b), DEA gathered the necessary data on 4–CMC and on May 12, 2021, submitted it to the Assistant Secretary for Health of HHS with a request for a scientific and medical evaluation of available information and a scheduling recommendation for 4–CMC.

On December 22, 2022, HHS provided DEA a scientific and medical evaluation entitled “Basis for the Recommendation to Control 4-Chloro-N-methylcathinone (4–CMC) and its Optical Isomers, Salts, and Salts of Optical Isomers, in Schedule I of the Controlled Substances Act” and a scheduling recommendation. Pursuant to 21 U.S.C. 811(b), following consideration of the eight-factors and findings related to the substance’s abuse potential, legitimate medical use, safety, and dependence liability, HHS recommended that 4–CMC be controlled in schedule I of the CSA under 21 U.S.C. 812(b). Upon receipt of the scientific and medical evaluation and scheduling recommendation from HHS, DEA reviewed the documents and all other relevant data and conducted its own eight-factor analysis in accordance with 21 U.S.C. 811(c). Included below is a brief summary of each factor as analyzed by HHS and DEA, and as considered by DEA in its proposed scheduling action. Readers should refer to the full eight-factor analyses prepared by HHS and by DEA in support of this proposal, which are available in their entirety under the tab “Supporting Documents” of the public docket of this rulemaking action at <https://www.regulations.gov>, under docket number “DEA–1246.”

1. The Drug’s Actual or Relative Potential for Abuse

In addition to considering the information HHS provided in its scientific and medical evaluation document for 4–CMC, DEA also considered all other relevant data regarding actual or relative potential for abuse of 4–CMC. The term “abuse” is not defined in the CSA; however, the legislative history of the CSA suggests the following four prongs in determining whether a particular drug or substance has a potential for abuse:⁸

a. There is evidence that individuals are taking the drug or drugs containing such a substance in amounts sufficient to create a hazard to their health or to

the safety of other individuals or of the community; or

b. There is a significant diversion of the drug or substance from legitimate drug channels; or

c. Individuals are taking the drug or drugs containing such a substance on their own initiative rather than on the basis of medical advice from a practitioner licensed by law to administer such drugs in the course of his professional practice; or

d. The drug or drugs containing such a substance are new drugs so related in their action to a drug or drugs already listed as having a potential for abuse to make it likely that the drug will have the same potentiality for abuse as such drugs, thus making it reasonable to assume that there may be significant diversions from legitimate channels, significant use contrary to or without medical advice, or that it has a substantial capability of creating hazards to the health of the user or to the safety of the community.

Both DEA and HHS eight-factor analyses found that 4–CMC produces pharmacological effects that are similar to those of the ten schedule I cathinone stimulants,⁹ MDMA, and the schedule II drugs cocaine and methamphetamine. 4–CMC exhibits a typical stimulant-like pharmacological profile in preclinical studies and in human case reports. 4–CMC produces full generalization to the schedule II stimulants, methamphetamine, and cocaine, and to MDMA, and, in humans, 4–CMC caused stimulant-like adverse effects, like that of these schedule I and II stimulants.

4–CMC does not have an approved medical use in the United States, but evidence indicates that 4–CMC is being abused and trafficked in the United States. Because this substance is not an approved drug product, a practitioner may not legally prescribe it, and it cannot be dispensed to an individual. However, case reports, coroner/medical examiner reports, and law enforcement data¹⁰ demonstrate that 4–CMC is being abused because it is being used without medical advice. 4–CMC has been identified during the toxicological

screening of human urine or serum samples indicating that it is being abused by individuals. In humans, stimulant effects, like those of amphetamine, were observed following the oral administration of 4–CMC. Non-fatal intoxications and overdoses have also been associated with the abuse of 4–CMC.

Law enforcement data show that 4–CMC has been encountered in the United States’ illicit drug market. From January 2014 to August 2024, the National Forensic Laboratory Information System (NFLIS)-Drug registered 399 reports¹¹ pertaining to the trafficking, distribution, and abuse of 4–CMC. These encounters of 4–CMC by law enforcement indicate that this substance is being trafficked and abused by individuals in the United States as a recreational drug of abuse.

Overall, these data demonstrate that 4–CMC has a high potential for abuse. Thus, based on these data, it is reasonable to conclude that 4–CMC, having no medical use, and thus no therapeutic value, presents a hazard to the health and safety of individuals and the community.

2. Scientific Evidence of the Drug’s Pharmacological Effects, if Known

As discussed in the eight-factor analyses prepared by DEA and by HHS, the available pharmacology data indicate that 4–CMC produces pharmacological effects that are similar to those produced by schedule I and II substances, such as mephedrone, 4–FMC, methamphetamine, cocaine, methcathinone, and MDMA. Similar to these schedule I and II stimulants, 4–CMC affects monoamine neurotransmission via action at monoamine transporters. 4–CMC binds to monoamine transporters for dopamine, serotonin, or norepinephrine and promotes the release of these monoamines or blocks their uptake. Actions at these transporters, especially actions that alter dopaminergic neurotransmission, are believed to be involved in the production of the stimulant effects of this class of drugs. Data also demonstrate that 4–CMC produces locomotor behavior and discriminative stimulus effects that are similar to those of the schedule I and II substances methamphetamine and cocaine. Furthermore, in humans, adverse effects of 4–CMC are similar to those reported following the use of

⁹ Schedules of Controlled Substances: Placement of 10 Synthetic Cathinones Into Schedule I, 82 FR 12171–12177 (Mar. 1, 2017). The ten synthetic cathinones were 4-methcathinone (4–MEC), 4′-Methyl-α-pyrrolidinopropiophenone (4–MePPP), α-pyrrolidinovalerophenone (α–PVP), butylone, pentedrone, pentylone, 4-fluoromethcathinone (4–FMC), 3-fluoromethcathinone (3–FMC), naphyrone, and α-Pyrrolidinobutylphenone (α–PBP).

¹⁰ While law enforcement data is not direct evidence of abuse, it can lead to an inference that a drug has been diverted and abused. See Schedules of Controlled Substances: Placement of Carisoprodol Into Schedule IV, 76 FR 77330, 77332 (Dec. 12, 2011).

¹¹ NFLIS-Drug is a national forensic laboratory reporting system that systematically collects results from drug chemistry analyses conducted by State and local forensic laboratories in the United States. NFLIS-Drug data was queried on September 4, 2024.

⁸ Comprehensive Drug Abuse Prevention and Control Act of 1970, H.R. Rep. No. 91–1444, 91st Cong., Sess. 1 (1970); reprinted in 1970 U.S.C.A.N. 4566, 4601.

schedule I synthetic cathinones and schedule II stimulants. These pharmacological characteristics of 4-CMC are predictive of substances that have a high potential for abuse. Overall, these data indicate that 4-CMC produces pharmacology effects and stimulant-like behaviors that are similar to those of methamphetamine and MDMA.

3. The State of Current Scientific Knowledge Regarding the Drug or Other Substance

4-CMC is a synthetic cathinone that is structurally similar to schedule I substances such as 4-FMC, methcathinone, and mephedrone. Anecdotal information in the record indicates that the effects of 4-CMC can be felt more quickly after insufflation (2–3 minutes) than after oral ingestion (30–60 minutes), but its duration of effect is longer with oral ingestion. In addition, toxicology data show that 4-CMC is rapidly metabolized in the human body. DEA is not aware of any legitimate medical use for 4-CMC. Additionally, there are no therapeutic applications or recorded medical uses of 4-CMC. According to HHS, the Food and Drug Administration (FDA) concluded that 4-CMC has no currently accepted medical use in the United States. Similarly, DEA concludes 4-CMC has no currently accepted medical use according to established DEA procedure and case law.¹²

¹² To place a drug or other substance in schedule I under the CSA, DEA must consider whether the substance has a currently accepted medical use in treatment in the United States. 21 U.S.C. 812(b)(1)(B). There is no evidence suggesting that 4-CMC has a currently accepted medical use in treatment in the United States. To determine whether a drug or other substance has a currently accepted medical use, DEA has traditionally applied a five-part test to a drug that has not been approved by FDA: i. The drug's chemistry must be known and reproducible; ii. there must be adequate safety studies; iii. there must be adequate and well-controlled studies proving efficacy; iv. the drug must be accepted by qualified experts; and v. the scientific evidence must be widely available. *Marijuana Scheduling Petition; Denial of Petition; Remand*, 57 FR 10499 (Mar. 26, 1992), pet. for rev. denied, *Alliance for Cannabis Therapeutics v. Drug Enforcement Admin.*, 15 F.3d 1131, 1135 (D.C. Cir. 1994). DEA and HHS applied the traditional five-part test for currently accepted medical use in this matter. In a recent published letter in a different context, HHS applied an additional two-part test to determine currently accepted medical use for substances that do not satisfy the five-part test: (1) whether there exists widespread, current experience with medical use of the substance by licensed health care practitioners operating in accordance with implemented jurisdiction-authorized programs, where medical use is recognized by entities that regulate the practice of medicine, and, if so, (2) whether there exists some credible scientific support for at least one of the medical conditions for which part 1 is satisfied. On April 11, 2024, the Department of Justice's Office of Legal Counsel (OLC) issued an opinion, which,

4. History and Current Pattern of Abuse

4-CMC is a synthetic cathinone that has been identified in the United States' illicit drug market. Thus, it is highly likely that this substance is abused in the same manner as schedule I synthetic cathinones. That is, 4-CMC, similar to other stimulant substances, is most likely ingested by swallowing capsules or tablets or snorted by nasal insufflation of the powder tablets. Demographic data collected from toxicology analyses suggest that the main users of 4-CMC are young adults. In addition, there is evidence that 4-CMC is being ingested with other substances, including other synthetic cathinones, common cutting agents, or other substances of abuse.

5. Scope, Duration, and Significance of Abuse

Evidence in the record shows that 4-CMC is a recreational drug of abuse. According to HHS, based on the pharmacological properties of 4-CMC, the scope, duration, and significance of abuse of 4-CMC would be similar to stimulants that are scheduled under the CSA, including the schedule I substance MDMA as well as the schedule II stimulants cocaine and methamphetamine, if uncontrolled. Law enforcement data is also evidence of the abuse of 4-CMC.

According to HHS, evidence of 4-CMC abuse is confirmed by data from poison control centers (PCC). PCC data is derived from the National Poison Data System (NPDS), a database managed by the American Association of Poison Control Centers (AAPCC).¹³ Between 2010 and 2019, there were 13,238 PCC cases involving synthetic cathinones, of which 10,482 were abuse cases. Approximately 7,775 (74 percent) of the synthetic cathinone cases involved a synthetic cathinone as a single drug substance. HHS reported that it is likely that some portion of these cases involved 4-CMC exposure because 4-CMC is a synthetic cathinone. PCC data also showed that the most common category of medical outcome were cases

among other things, concluded that HHS's two-part test would be sufficient to establish that a drug has a currently accepted medical use. Office of Legal Counsel, Memorandum for Merrick B. Garland Attorney General Re: Questions Related to the Potential Rescheduling of Marijuana at 3 (April 11, 2024). For purposes of this proposed rule, there is no evidence that health care providers have widespread experience with medical use of 4-CMC, or that the use of 4-CMC is recognized by entities that regulate the practice of medicine under either the traditional five-part test or the two-part test.

¹³ AAPCC is a nationwide network of PCCs that receive reports from individuals, healthcare professionals, and other interested persons in the general U.S. population regarding exposures to prescription drugs and other substances.

with moderate effects (*i.e.*, symptoms that are prolonged and involved some treatments) (3,746 of 5,654, or 66.3 percent). Of the cases admitted to a health care facility, most (3,039 of 4,720, or 64.4 percent) were admitted to a critical care unit. From these data, HHS concluded that individuals likely seek aid through PCCs or emergency departments (ED) following ingestion of synthetic cathinones because of the known adverse effects of synthetic cathinones.

Evidence of 4-CMC abuse is also confirmed by law enforcement seizure data. According to analyses by forensic laboratories, drug exhibits received from State, local, or Federal law enforcement agencies were found to contain 4-CMC. Between January 2014 and August 2024, NFLIS-Drug registered 399 reports from Federal, State, and local forensic laboratories identifying this substance in drug-related exhibits from 33 states.¹⁴ There is additional evidence that 4-CMC is abused internationally. 4-CMC has been identified in items seized by law enforcement agencies in countries such as China, Czechia, Hungary, Indonesia, and Poland. These encounters of 4-CMC by law enforcement indicate that this substance is being trafficked in the United States and internationally. The abuse of 4-CMC in the United States and internationally indicates that the abuse of 4-CMC is widespread.

6. What, if Any, Risk There Is to the Public Health

Available evidence in the record on the overall public health risks associated with the use of 4-CMC suggests that it can cause acute health problems leading to ED admissions and death. Indeed, 4-CMC has been associated with overdoses and deaths of individuals. Acute effects of 4-CMC are those typical of sympathomimetic agents (*e.g.*, cocaine, methamphetamine, amphetamine) and among other effects include euphoria, increased energy, sociability and sexuality, visual and auditory hallucinations, strong empathogenic feelings, bruxism, light-headedness, dizziness, slurred speech, slowed behavior, mydriasis, increased drive, disorientation as to time, place, and surroundings, tachycardia, agitation, logorrhea, poor light reflex, and difficulty walking and holding items. In addition, products containing 4-CMC often do not bear labeling information regarding their ingredients and, if they do, such labels may not contain the expected active ingredient or identify the health risks and potential

¹⁴ NFLIS-Drug was queried on September 4, 2024.

hazards associated with these products. These factors demonstrate that 4-CMC is a serious public health threat.

7. Its Psychic or Physiological Dependence Liability

According to the HHS eight-factor analysis, the psychic or physiological dependence liability of 4-CMC is demonstrated by animal abuse-related studies. HHS found that the pharmacological data (*e.g.*, locomotor studies) strongly suggest that 4-CMC produces behavioral effects that are similar to those of schedule I and II stimulants. Because 4-CMC shares pharmacological properties with those of the schedule I and II substances that have dependence potential, such as methamphetamine, cocaine, and MDMA, it is probable that 4-CMC has a dependence profile similar to these substances which are known to cause substance dependence. It is also probable that 4-CMC will have rewarding properties similar to those of schedule I and II stimulants and, consequently, psychic dependence of 4-CMC can develop and may contribute to its continued use among individuals who abuse it despite its adverse consequences. Thus, as HHS notes, it is likely that 4-CMC will produce similar psychic dependence to schedule I and II stimulant drugs.

8. Whether the Substance Is an Immediate Precursor of a Substance Already Controlled Under the CSA

4-CMC is not an immediate precursor of any substance controlled under the CSA, as defined in 21 U.S.C. 802(23).

Conclusion

After considering the scientific and medical evaluation conducted by HHS, HHS's scheduling recommendation, and DEA's own eight-factor analysis, DEA finds that the facts and all relevant data constitute substantial evidence of the potential for abuse of 4-CMC. As such, DEA hereby proposes to permanently schedule 4-CMC as a schedule I controlled substance under the CSA. This action would enable the United States to meet its obligations under the 1971 Convention on Psychotropic Substances.

Proposed Determination of Appropriate Schedule

The CSA establishes five schedules of controlled substances known as schedules I, II, III, IV, and V. The CSA also outlines the findings required to place a drug or other substance in any particular schedule.¹⁵ After

consideration of the analysis and recommendation of the Assistant Secretary for Health of HHS and review of all other available data, the Administrator of DEA, pursuant to 21 U.S.C. 811(a) and 812(b)(1), finds that:

1. 4-CMC Has a High Potential for Abuse

According to HHS, 4-CMC is structurally and pharmacologically similar to schedule I and II stimulant substances, such as schedule I synthetic cathinones, methamphetamine, and MDMA. 4-CMC demonstrated activity as a monoamine reuptake inhibitor at dopamine, serotonin, and norepinephrine transporters. This mechanism of action is similar to the schedule I substances 4-FMC, mephedrone, MDMA, and methcathinone, as well as the schedule II stimulants, cocaine and methamphetamine. In locomotor studies, 4-CMC produced behavioral stimulation similar to that of the schedule II stimulants cocaine and methamphetamine and the schedule I stimulant MDMA. In drug discrimination studies, 4-CMC fully generalized to the discriminative stimulus effects of the schedule II stimulants cocaine and methamphetamine and the schedule I stimulant MDMA. Thus, 4-CMC elicits pharmacological effects similar to cocaine, methamphetamine, MDMA, and methcathinone, illustrating a high potential for abuse that is similar to substances in schedules I and II of the CSA. Overall, these data provide supportive evidence that 4-CMC has a high potential for abuse that is similar to substances in schedule I or II of the CSA.

2. 4-CMC has No Currently Accepted Medical Use in Treatment in the United States

HHS stated that FDA has not approved a marketing application for a drug product containing 4-CMC for any indication. Moreover, FDA is not aware of any adequate and well-controlled clinical studies that show 4-CMC is safe and effective for any intended use. DEA further notes that, according to established DEA procedure and case law, 4-CMC has no currently accepted medical use. Thus, evidence demonstrates that 4-CMC has no currently accepted medical use in treatment in the United States.

3. There is a Lack of Accepted Safety for Use of 4-CMC Under Medical Supervision

Currently, 4-CMC does not have an accepted medical use. And because it

has not been approved for use by FDA, its safety under medical supervision has not been determined. Thus, there is a lack of accepted safety for use of 4-CMC under medical supervision.

Based on these findings, the Administrator concludes that 4-chloromethcathinone (4-CMC, 1-(4-chlorophenyl)-2-(methylamino)propan-1-one), including its salts, isomers, and salts of isomers, warrants control in schedule I of the CSA.

Requirements for Handling 4-CMC

If this rule is finalized as proposed, 4-CMC would be subject to the CSA's schedule I regulatory controls and administrative, civil, and criminal sanctions applicable to the manufacture, distribution, reverse distribution, importation, exportation, engagement in research, and conduct of instructional activities or chemical analysis with, and possession of schedule I controlled substances including the following:

1. Registration. Any person who handles (manufactures, distributes, reverse distributes, imports, exports, engages in research, or conducts instructional activities or chemical analysis with, or possesses) 4-CMC, or who desires to handle 4-CMC, would be required to be registered with DEA to conduct such activities pursuant to 21 U.S.C. 822, 823, 957, and 958, and in accordance with 21 CFR parts 1301 and 1312, as of the effective date of a final scheduling action. Any person who currently handles 4-CMC, and is not registered with DEA, would need to submit an application for registration and may not continue to handle 4-CMC as of the effective date of a final scheduling action, unless DEA has approved that application for registration pursuant to 21 U.S.C. 822, 823, 957, and 958, and in accordance with 21 CFR parts 1301 and 1312.

2. Disposal of stocks. Any person who does not desire or is not able to obtain a schedule I registration would be required to surrender all quantities of currently held 4-CMC or to transfer all quantities of currently held 4-CMC to a person registered with DEA before the effective date of a final scheduling action, in accordance with all applicable Federal, State, local, and Tribal laws. As of the effective date of a final scheduling action, 4-CMC would be required to be disposed of in accordance with 21 CFR part 1317, in addition to all other applicable Federal, State, local, and Tribal laws.

3. Security. 4-CMC would be subject to schedule I security requirements and would need to be handled and stored pursuant to 21 U.S.C. 821, 823, and 871(b) and in accordance with 21 CFR

¹⁵ 21 U.S.C. 812(b).

1301.71 through 1301.76 as of the effective date of a final scheduling action. Non-practitioners handling 4-CMC would also need to comply with the employee screening requirements of 21 CFR 1301.90 through 1301.93.

4. *Labeling and Packaging.* All labels, labeling, and packaging for commercial containers of 4-CMC would need to comply with 21 U.S.C. 825 and 958(e) and be in accordance with 21 CFR part 1302, as of the effective date of a final scheduling action.

5. *Quota.* Only registered manufacturers would be permitted to manufacture 4-CMC in accordance with a quota assigned pursuant to 21 U.S.C. 826 and in accordance with 21 CFR part 1303 as of the effective date of a final scheduling action.

6. *Inventory.* Every DEA registrant who possesses any quantity of 4-CMC on the effective date of a final scheduling action would be required to take an inventory of 4-CMC on hand at that time, pursuant to 21 U.S.C. 827 and 958 and in accordance with 21 CFR 1304.03, 1304.04, and 1304.11.

Any person who becomes registered with DEA to handle 4-CMC on or after the effective date of a final scheduling action would be required to have an initial inventory of all stocks of controlled substances (including 4-CMC) on hand on the date the registrant first engages in the handling of controlled substances pursuant to 21 U.S.C. 827 and 958, and in accordance with 21 CFR 1304.03, 1304.04, and 1304.11(a) and (b).

After the initial inventory, every DEA registrant must take an inventory of all controlled substances (including 4-CMC) on hand every two years, pursuant to 21 U.S.C. 827 and 958, and in accordance with 21 CFR 1304.03, 1304.04, and 1304.11.

7. *Records and Reports.* Every DEA registrant would be required to maintain records and submit reports with respect to 4-CMC pursuant to 21 U.S.C. 827 and 958(e) and in accordance with 21 CFR parts 1304 and 1312, as of the effective date of a final scheduling action. Manufacturers and distributors would be required to submit reports regarding 4-CMC to the Automation of Reports and Consolidated Order System (ARCOS) pursuant to 21 U.S.C. 827 and in accordance with 21 CFR parts 1304 and 1312, as of the effective date of a final scheduling action.

8. *Order Forms.* Every DEA registrant who distributes 4-CMC would be required to comply with the order form requirements, pursuant to 21 U.S.C. 828 and in accordance with 21 CFR part 1305, as of the effective date of a final scheduling action.

9. *Importation and Exportation.* All importation and exportation of 4-CMC would need to comply with 21 U.S.C. 952, 953, 957, and 958, and in accordance with 21 CFR part 1312, as of the effective date of a final scheduling action.

10. *Liability.* Any activity involving 4-CMC not authorized by, or in violation of, the CSA or its implementing regulations would be unlawful, and may subject the person to administrative, civil, and/or criminal sanctions.

Regulatory Analyses

Executive Orders 12866, 13563, and 14094 (Regulatory Review)

In accordance with 21 U.S.C. 811(a), this proposed scheduling action is subject to formal rulemaking procedures performed “on the record after opportunity for a hearing,” which are conducted pursuant to the provisions of 5 U.S.C. 556 and 557. The CSA sets forth the criteria for scheduling a drug or other substance. Such actions are exempt from review by the Office of Management and Budget (OMB) pursuant to section 3(d)(1) of Executive Order (E.O.) 12866 and the principles reaffirmed in E.O. 13563. E.O. 14094 modernizes the regulatory review process to advance policies that promote the public interest and address national priorities.

Executive Order 12988, Civil Justice Reform

This proposed regulation meets the applicable standards set forth in sections 3(a) and 3(b)(2) of E.O. 12988 to eliminate drafting errors and ambiguity, minimize litigation, provide a clear legal standard for affected conduct, and promote simplification and burden reduction.

Executive Order 13132, Federalism

This proposed rulemaking does not have federalism implications warranting the application of E.O. 13132. The proposed rule does not have substantial direct effects on the States, on the relationship between the National

Government and the States, or the distribution of power and responsibilities among the various levels of government.

Executive Order 13175, Consultation and Coordination with Indian Tribal Governments

This proposed rule does not have Tribal implications warranting the application of E.O. 13175. It does not have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

Regulatory Flexibility Act

The Administrator, in accordance with the Regulatory Flexibility Act, 5 U.S.C. 601–602, has reviewed this proposed rule and by approving it certifies that it will not have a significant economic impact on a substantial number of small entities.

DEA proposes placing the substance 4-chloromethcathinone (4-CMC, 1-(4-chlorophenyl)-2-(methylamino)propan-1-one), including its salts, isomers, and salts of isomers, in schedule I of the CSA. This action is being taken to enable the United States to meet its obligations under the 1971 Convention on Psychotropic Substances. If finalized, this action would impose the regulatory controls and administrative, civil, and criminal sanctions applicable to schedule I controlled substances on persons who handle (manufacture, distribute, reverse distribute, import, export, engage in research, conduct instructional activities or chemical analysis with, or possess), or propose to handle, 4-CMC.

The entities affected by this proposed rule include the manufacturers, distributors, importers, exporters, and researchers of 4-CMC. DEA determines the North American Industry Classification System (NAICS) industries that best represent these business activities. Table 1 lists the business activities and corresponding NAICS industries.¹⁶

¹⁶ Executive Office of the President Office of Management and Budget, North American Industry Classification System, United States, 2022, https://www.census.gov/naics/reference_files_tools/2022_NAICS_Manual.pdf. (Accessed 4/2/2024)

TABLE 1—BUSINESS ACTIVITY AND CORRESPONDING NAICS INDUSTRIES

Business activity	NAICS code	NAICS industry description
Manufacturer	325412	Pharmaceutical Preparation Manufacturing.
Distributor, Importer, Exporter	424210	Drugs and Druggists' Sundries Merchant Wholesalers.
	424690	Other Chemical and Allied Products Merchant Wholesalers.
Researcher	541715	Research and Development in the Physical, Engineering, and Life Sciences (except
	611310	Nanotechnology and Biotechnology).
		Colleges, Universities and Professional Schools.

From Statistics of U.S. Businesses (SUSB) data, DEA determined the number of firms and small firms for each of the affected industries, and by

comparing the number of affected small entities to the number of small entities for each industry, DEA determine whether a substantial number of small

entities are affected in any of the industries. Table 2 lists the number of firms, small firms, and percent small firms in each affected industry.

TABLE 2—PERCENT AFFECTED SMALL ENTITIES BY INDUSTRY

NAICS industry	Firms ¹⁷	SBA size standard ¹⁸	Small firms ¹⁹	Percent small entities (%)
325412-Pharmaceutical Preparation Manufacturing	1,007	1,300	931	92.4
424210—Drugs and Druggists' Sundries Merchant Wholesalers	6,958	250	6,663	95.8
424690—Other Chemical and Allied Products Merchant Wholesalers	6,069	175	5,781	95.3
541715—Research and Development in the Physical, Engineering, and Life Sciences (except Nanotechnology and Biotechnology)	8,019	1,000	7,571	94.4
611310—Colleges, Universities and Professional Schools	2,433	\$34.5	1,515	62.3

Based on the American Chemical Society's SciFinder database, DEA identified 10 entities supplying 4-CMC across these industries. Suppliers include 325412, 424210, and 424690 industries. Even if all affected suppliers were small entities, they would account for only 0.15 percent of the small entities in those industries, not a substantial number.²⁰ Additionally, DEA expects the number of researchers working with 4-CMC is small because 4-CMC lacks current marketing approval under a new drug application or an abbreviated new drug application, and is not subject to an investigational new drug application as noted in the HHS review. Also, DEA believes the researchers working with 4-CMC may also work with other controlled substances; hence, they have probably already registered with DEA and are qualified to handle controlled substances. For these reasons, DEA believes the number of affected researchers that are small entities is not a substantial number of small entities in 541715 and 622310 industries.

The primary costs associated with this proposed rule would be the annual registration fee for Schedule I controlled substances (\$3,699 for manufacturers, \$1,850 for distributors, and \$296 for

researchers). As mentioned above, DEA has identified 13 domestic suppliers of 4-CMC from the SciFinder database and none of these suppliers has registered with DEA to handle Schedule I controlled substances. However, it is common for suppliers to have items in their catalog while not actually having any material level of sales because FDA has not approved a marketing application for a drug product containing 4-CMC. Therefore, some suppliers may simply remove 4-CMC from their catalog without any impact. Additionally, as discussed above, the researchers working with 4-CMC are likely to work with other controlled substances and hence, must already register with DEA.

In summary, the small entities impacted by this proposed rule are those in 325412-Pharmaceutical Preparation Manufacturing, 424210—Drugs and Druggists' Sundries Merchant Wholesalers, and 424690-Other Chemical and Allied Products Merchant Wholesalers. The affected small entities account for less than 0.15 percent of the small businesses and are not likely to manufacture or carry inventory of 4-CMC. As such, the proposed rule, if finalized, is not expected to result in a

significant economic impact on a substantial number of small entities.

Unfunded Mandates Reform Act of 1995

In accordance with the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1501 *et seq.*, DEA has determined and certifies that this action would not result in any Federal mandate that may result “in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any 1 year” Therefore, neither a Small Government Agency Plan nor any other action is required under the UMRA.

Paperwork Reduction Act of 1995

This proposed rule would not impose a new collection or modify an existing collection of information under the Paperwork Reduction Act of 1995.²¹ Also, this proposed rule would not impose new or modify existing recordkeeping or reporting requirements on state or local governments, individuals, businesses, or organizations. However, this proposed rule would require compliance with the following existing OMB collections: 1117–0003, 1117–0004, 1117–0006, 1117–0008, 1117–0009, 1117–0010,

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

[Docket No. DEA–1457]

Schedules of Controlled Substances: Placement of Seven Specific Fentanyl-Related Substances in Schedule I

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Drug Enforcement Administration proposes placing seven fentanyl-related substances, as identified in this proposed rule, in schedule I of the Controlled Substances Act. These seven substances fall within the definition of fentanyl-related substances set forth in the February 6, 2018 temporary scheduling order. Through the Temporary Reauthorization and Study of Emergency Scheduling of Fentanyl Analogues Act, which became law on February 6, 2020, Congress extended the temporary control of fentanyl-related substances until May 6, 2021. This temporary order was subsequently extended multiple times, most recently on December 29, 2022, through the Consolidated Appropriations Act, 2023, which extended the order until December 31, 2024. If finalized, this action would make permanent the existing regulatory controls and administrative, civil, and criminal sanctions applicable to schedule I controlled substances on persons who handle (manufacture, distribute, import, export, engage in research, conduct instructional activities or chemical analysis, or possess), or propose to handle these seven specific controlled substances.

DATES: Comments must be submitted electronically or postmarked on or before January 29, 2025.

Interested persons may file a request for a hearing or waiver of hearing pursuant to 21 CFR 1308.44 and in accordance with 21 CFR 1316.47 and/or 1316.49, as applicable. Requests for a hearing, and waivers of an opportunity for a hearing or to participate in a hearing, must be received on or before January 29, 2025.

ADDRESSES: Interested persons may file written comments on this proposal in accordance with 21 CFR 1308.43(g). To ensure proper handling of comments, please reference “Docket No. DEA–1457” on all electronic and written correspondence, including any attachments.

• **Electronic comments:** The Drug Enforcement Administration (DEA)

encourages commenters to submit all comments electronically through the Federal eRulemaking Portal which provides the ability to type short comments directly into the comment field on the web page or to attach a file for lengthier comments. Please go to <https://www.regulations.gov> and follow the online instructions at that site for submitting comments. Upon completion of your submission, you will receive a Comment Tracking Number for your comment. Submitted comments are not instantaneously available for public view on *Regulations.gov*. If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment. Commenters should be aware that the electronic Federal Docket Management System will not accept comments after 11:59 p.m. Eastern Time on the last day of the comment period.

• **Paper comments:** Paper comments that duplicate electronic submissions are not necessary. Should you wish to mail a paper comment *in lieu of* an electronic comment, it should be sent via regular or express mail to: Drug Enforcement Administration, Attn: DEA Federal Register Representative/DPW, 8701 Morrisette Drive, Springfield, Virginia 22152.

• **Hearing requests:** All requests for a hearing and waivers of participation, together with a written statement of position on the matters of fact and law asserted in the hearing, must be filed with the DEA Administrator, who will make the determination of whether a hearing will be needed to address such matters of fact and law in the rulemaking. Such requests must be sent to: Drug Enforcement Administration, Attn: Administrator, 8701 Morrisette Drive, Springfield, Virginia 22152. For informational purposes, a courtesy copy of requests for hearing and waivers of participation should also be sent to: (1) Drug Enforcement Administration, Attn: Hearing Clerk/OALJ, 8701 Morrisette Drive, Springfield, Virginia 22152; and (2) Drug Enforcement Administration, Attn: DEA Federal Register Representative/DPW, 8701 Morrisette Drive, Springfield, Virginia 22152.

• **Paperwork Reduction Act Comments:** All comments concerning collections of information under the Paperwork Reduction Act must be submitted to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for DOJ, Washington, DC 20503. Please state that your comment refers to Docket No. DEA–1457.

FOR FURTHER INFORMATION CONTACT: Dr. Terrence L. Boos, Drug and Chemical

Evaluation Section, Diversion Control Division, Drug Enforcement Administration; Telephone: (571) 362–3249.

SUPPLEMENTARY INFORMATION: In this proposed rule, the Drug Enforcement Administration (DEA) proposes to permanently schedule the following seven controlled substances in schedule I of the Controlled Substances Act (CSA), including their isomers, esters, ethers, salts, and salts of isomers, esters, and ethers whenever the existence of such isomers, esters, ethers, and salts is possible within the specific chemical designation:

- *para*-chlorofentanyl (*N*-(4-chlorophenyl)-*N*-(1-phenethylpiperidin-4-yl)propionamide),
- *ortho*-chlorofentanyl (*N*-(2-chlorophenyl)-*N*-(1-phenethylpiperidin-4-yl)propionamide),
- *meta*-fluorofentanyl (*N*-(3-fluorophenyl)-*N*-(1-phenethylpiperidin-4-yl)furan-2-carboxamide),
- *ortho*-methylcyclopropyl fentanyl (*N*-(2-methylphenyl)-*N*-(1-phenethylpiperidin-4-yl)cyclopropanecarboxamide),
- *beta*-methylacetyl fentanyl (*N*-phenyl-*N*-(1-(2-phenylpropyl)piperidin-4-yl)acetamide),
- tetrahydrothiofuran fentanyl (*N*-(1-phenethylpiperidin-4-yl)-*N*-phenyltetrahydrothiophene-2-carboxamide),
- *para*-fluoro valeryl fentanyl (*N*-(4-fluorophenyl)-*N*-(1-phenethylpiperidin-4-yl)pentanamide).

Posting of Public Comments

All comments received in response to this docket are considered part of the public record. DEA will make comments available for public inspection online at <https://www.regulations.gov>, unless reasonable cause is given. Such information includes personal or business identifiers (such as name, address, state of federal identifiers, etc.) voluntarily submitted by the commenter.

Commenters submitting comments which include personal identifying information (PII), confidential, or proprietary business information that the commenter does not want made publicly available should submit two copies of the comment. One copy must be marked “CONTAINS CONFIDENTIAL INFORMATION” and should clearly identify all PII or business information the commenter does not want to be made publicly available, including any supplemental materials. DEA will review this copy, including the claimed PII and confidential business information, in its

consideration of comments. The second copy should be marked “TO BE PUBLICLY POSTED” and must have all claimed confidential PII and business information already redacted. DEA will post only the redacted comment on <https://www.regulations.gov> for public inspection. DEA generally will not redact additional information contained in the comment marked “TO BE PUBLICLY POSTED.” The Freedom of Information Act applies to all comments received.

For easy reference, an electronic copy of this document and supplemental information to this proposed scheduling action are available at <https://www.regulations.gov>.

Request for Hearing or Appearance; Waiver

Pursuant to 21 U.S.C. 811(a), this action is a formal rulemaking “on the record after opportunity for a hearing.” Such proceedings are conducted pursuant to the provisions of the Administrative Procedure Act (APA), 5 U.S.C. 551–559.¹ Interested persons, as defined in 21 CFR 1300.01(b), may file requests for a hearing in conformity with the requirements of 21 CFR 1308.44(a) and 1316.47(a), and such requests must:

- (1) state with particularity the interest of the person in the proceeding;
- (2) state with particularity the objections or issues concerning which the person desires to be heard; and
- (3) state briefly the position of the person with regard to the objections or issues.

Any interested person may file a waiver of an opportunity for a hearing or to participate in a hearing in conformity with the requirements of 21 CFR 1308.44(c), together with a written statement of position on the matters of fact and law involved in any hearing.²

All requests for a hearing and waivers of participation, together with a written statement of position on the matters of fact and law involved in such hearing, must be sent to DEA using the address information provided above. The decision whether a hearing will be needed to address such matters of fact and law in the rulemaking will be made by the Administrator. If a hearing is needed, DEA will publish a notification of hearing on the proposed rulemaking in the **Federal Register**.³ Further, once the Administrator determines a hearing is needed to address such matters of fact and law in rulemaking, she will then

designate an Administrative Law Judge (ALJ) to preside over the hearing. The ALJ’s functions shall only commence upon designation, as provided in 21 CFR 1316.52.

In accordance with 21 U.S.C. 811 and 812, the purpose of a hearing would be to determine whether *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuran fentanyl, and *para*-fluoro valeryl fentanyl meet the statutory criteria for placement in schedule I, as proposed in this rule.

Legal Authority

The CSA provides that proceedings for the issuance, amendment, or repeal of the scheduling of any drug or other substance may be initiated by the Attorney General (delegated to the Administrator of DEA pursuant to 28 CFR 0.100) on his own motion, at the request of the Secretary of Health and Human Services (HHS), or on the petition of an interested party.⁴ This proposed action is initiated on the Administrator’s own motion and supported by, *inter alia*, a recommendation from the Assistant Secretary for Health of HHS (Assistant Secretary for HHS or Assistant Secretary) and an evaluation of all other relevant data by DEA. If finalized, this action would make permanent the existing temporary regulatory controls and administrative, civil, and criminal sanctions of schedule I controlled substances on any person who handles or proposes to handle these seven substances.

Background

On February 6, 2018, pursuant to 21 U.S.C. 811(h)(1), DEA published an order in the **Federal Register** (83 FR 5188) temporarily placing fentanyl-related substances, as defined in that order, in schedule I of the CSA based upon a finding that these substances pose an imminent hazard to the public safety.⁵ As discussed below in Factor 3, the seven substances named in this proposed rule meet the existing definition of fentanyl-related substances as they are not otherwise controlled in any other schedule (*i.e.*, not included under another DEA Controlled Substance Code Number) and are structurally related to fentanyl by one or more of the five modifications listed under the definition. That temporary

¹ 21 CFR 1308.41 through 1308.45; 21 CFR part 1316, subpart D.

² 21 CFR 1316.49.

³ 21 CFR 1308.44(b), 1316.53.

⁴ 21 U.S.C. 811(a).

⁵ *Schedules of Controlled Substances: Temporary Placement of Fentanyl-Related Substances in Schedule I*, 83 FR 5188 (Feb. 6, 2018).

order was effective upon the date of publication. Pursuant to 21 U.S.C. 811(h)(2), the temporary control of fentanyl-related substances, a class of substances as defined in the order, as well as the seven specific substances already covered by that order, was set to expire on February 6, 2020. However, on February 6, 2020, as explained in DEA's April 10, 2020 correcting amendment),⁶ Congress extended that expiration date until May 6, 2021, by enacting the Temporary Reauthorization and Study of the Emergency Scheduling of Fentanyl Analogues Act.⁷ This temporary order was subsequently extended multiple times, most recently on December 29, 2022, through the Consolidated Appropriations Act, 2023,⁸ which extended the order until December 31, 2024. Consequently, the temporary control of these seven substances will remain in effect until December 31, 2024, unless it is extended. Accordingly, as published elsewhere in this issue of the **Federal Register**, the DEA Administrator is ordering an extension of this temporary order as it relates to these seven substances.

The Administrator, on her own motion pursuant to 21 U.S.C. 811(a), is initiating proceedings to permanently schedule *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl in schedule I of the CSA. Pursuant to 21 U.S.C. 811(b), DEA gathered the necessary data and reviewed the available information regarding the pharmacology, chemistry, trafficking, actual abuse, pattern of abuse, and the relative potential for abuse for these substances. On April 3, 2023, in accordance with 21 U.S.C. 811(b), the Administrator submitted a request to the Assistant Secretary to provide DEA with a scientific and medical evaluation of available information and a scheduling recommendation for these seven substances.

On October 25, 2024, the Assistant Secretary submitted HHS's scientific and medical evaluation and scheduling recommendation for *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and

para-fluoro valeryl fentanyl and their salts to the Administrator. The Secretary recommended placing these seven fentanyl related substances in schedule I of the CSA. In accordance with 21 U.S.C. 811(c), upon receipt of the scientific and medical evaluation and scheduling recommendation from HHS, DEA reviewed the documents and all other relevant data and conducted its own eight-factor analysis of the abuse potential of these seven substances.

Proposed Determination To Permanently Schedule Seven Specific Fentanyl-Related Substances

As discussed in the background section, the Administrator is initiating proceedings, pursuant to 21 U.S.C. 811(a), to permanently add *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl to schedule I. DEA reviewed the scientific and medical evaluation and scheduling recommendation received from HHS, and all other relevant data and conducted its own eight-factor analysis of the abuse potential of these seven substances pursuant to 21 U.S.C. 811(c). Included below is a brief summary of each factor as analyzed by HHS and DEA, and as considered by DEA in its proposed scheduling action. Readers should refer to the full eight-factor analyses prepared by HHS and by DEA in support of this proposal, which are available in their entirety under "Supporting Documents" of the public docket for this proposed rule at <https://www.regulations.gov> under Docket Number "DEA-1457."

1. The Drug's Actual or Relative Potential for Abuse

In addition to considering the information HHS provided in its scientific and medical evaluation document for these seven fentanyl-related substances, DEA also considered all other relevant data regarding actual or relative potential for abuse of these three substances. The term "abuse" is not defined in the CSA; however, the legislative history of the CSA suggests that DEA consider the following criteria when determining whether a particular drug or substance has a potential for abuse:⁹

(a) There is evidence that individuals are taking the drug or drugs containing such a substance in amounts sufficient

to create a hazard to their health or to the safety of other individuals or to the community; or

(b) There is significant diversion of the drug or drugs containing such a substance from legitimate drug channels; or

(c) Individuals are taking the drug or drugs containing such a substance on their own initiative rather than on the basis of medical advice from a practitioner licensed by law to administer such drugs in the course of his professional practice; or

(d) The drug or drugs containing such a substance are new drugs so related in their action to a drug or drugs already listed as having a potential for abuse to make it likely that the drug will have the same potentiality for abuse as such drugs, thus making it reasonable to assume that there may be significant diversions from legitimate channels, significant use contrary to or without medical advice, or that it has a substantial capability of creating hazards to the health of the user or to the safety of the community.

Law enforcement seizure data indicate that individuals have and are using *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl on their own initiative rather than on the basis of medical advice from a practitioner licensed by law to administer such drugs in the course of his professional practice, especially since there is no currently accepted medical use for these seven substances. According to the National Forensic Laboratory Information System (NFLIS-Drug)¹⁰ database, which collects drug identification results from drug cases submitted to and analyzed by Federal, State, and local forensic laboratories, there have been 214 reports for *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl between 2020 and 2024. According to HHS, *para*-

¹⁰ The National Forensic Laboratory Information System (NFLIS) represents an important resource in monitoring illicit drug trafficking, including the diversion of legally manufactured pharmaceuticals into illegal markets. NFLIS is a comprehensive information system that includes data from forensic laboratories that handle more than 96% of an estimated 1.0 million distinct annual State and local drug analysis cases. NFLIS includes drug chemistry results from completed analyses only. While NFLIS data is not direct evidence of abuse, it can lead to an inference that a drug has been diverted and abused. See *Schedules of Controlled Substances: Placement of Carisoprodol Into Schedule IV*, 76 FR 77330, 77332 (Dec. 12, 2011). NFLIS data were queried November 1, 2024.

⁶ *Schedules of Controlled Substances: Temporary Placement of Fentanyl-Related Substances in Schedule I; Correction*, 85 FR 20155 (Apr. 10, 2020).

⁷ Public Law 116-114, sec. 2, 134 Stat. 103.

⁸ Public Law 117-328, division O, title VI, sec. 601.

⁹ Comprehensive Drug Abuse Prevention and Control Act of 1970, H.R. Rep. No. 91-1444, 91st Cong., Sess. 1 (1970); reprinted in 1970 U.S.C.A.N. 4566, 4603.

chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl are not legally marketed as drugs in the United States or anywhere else in the world. These substances have no approved medical use other than their limited use in scientific research. As such, the legal sources of the substances are limited to legitimate chemical companies supplying them for scientific research.

para-Chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl are not approved for medical use and are not formulated or approved for clinical use. As such, all use is on an individual's own initiative, rather than on the basis of medical advice from a practitioner licensed by law to administer drugs. Law enforcement seizures and case reports demonstrate that individuals are taking these seven fentanyl-related substances on their own initiative, rather than on the basis of medical advice from a licensed practitioner.

Based on available data, *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl, are related in their effects to the actions of other mu-opioid receptor (MOR) agonists,¹¹ such as fentanyl, that are already listed as having potential for abuse. Because high doses of MOR agonists can produce respiratory depression leading to death, these fentanyl-related substances at high doses have substantial capability of creating hazards to the health of the user or to the safety of the community. According to HHS, these seven fentanyl-related substances exert their actions at least in part through the MOR and thus have a high likelihood of having substantially similar potential for abuse as other schedule I opioids. Both DEA's and HHS's eight-factor analyses found that the abuse potential of these substances is similar to other schedule I opioids and presents a hazard to the health and safety of individuals and the community.

¹¹ Drug Enforcement Administration—Veterans Affairs (DEA—VA) Interagency Agreement. Binding and Functional Activity at Delta, Kappa and Mu Opioid Receptors. In Vitro Receptor and Transporter Assays for Abuse Liability Testing for the DEA by the VA (unpublished data).

2. Scientific Evidence of the Drug's Pharmacological Effects, if Known

According to DEA and HHS, the pharmacological activity of these substances in humans is unknown. Data obtained from preclinical studies show that these fentanyl-related substances (*para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl) exhibit a pharmacological profile similar to that of fentanyl, morphine, and several schedule I opioid substances that are structurally related to fentanyl. Similar to fentanyl and other structurally related synthetic opioids, fentanyl-related substances namely *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl have been shown to bind to the mu-opioid receptors with varying affinities.¹² Also, similar to fentanyl and other structurally related synthetic opioids, these seven fentanyl-related substances behave as agonists at the MOR sites in *in vitro* functional studies.

Studies conducted to examine the antinociceptive effect of the seven fentanyl-related substances in a warm water tail-withdrawal assay and their mediation by opioid receptors as determined by naltrexone antagonism showed these seven fentanyl-related substances, similar to fentanyl and morphine, produced antinociceptive effects as measured by an increase in tail withdrawal latency.¹³ Pre-treatment with naltrexone, an opioid receptor antagonist, attenuated antinociceptive effects of the seven-fentanyl related substances. These data demonstrate that similar to morphine and fentanyl, *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, *para*-fluoro valeryl fentanyl produced dose-dependent antinociception in the warm-water tail-withdrawal assay that can be attenuated by naltrexone pre-treatment.

¹² *in vitro* Pharmacology data was collected through DEA—Veterans Affairs interagency agreement: "in vitro Receptor and Transporter Assays for Abuse Liability Testing for the DEA by the VA".

¹³ Gatch MB. (2024). Test of analgesic effects alone and in combination with naltrexone. 15DDHQ19F00001173, "Evaluation of Abuse Potential of Synthetic Opioids Using In Vivo Pharmacological Studies" (unpublished data).

There is a strong correlation between the discriminative stimulus effects of a given drug in animals and its subjective effects in humans.¹⁴ Data from drug discrimination studies¹⁵ show that the seven-fentanyl related substances fully and dose-dependently substitute for the discriminative stimulus effects produced by morphine in Sprague Dawley rats trained to discriminate 3.2 mg/kg morphine from saline.¹⁶ These data demonstrate *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl, similar to morphine (schedule II) and fentanyl (schedule II), are mu-opioid receptor agonists.

3. The State of Current Scientific Knowledge Regarding the Drug or Other Substance

para-Chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl are synthetic opioids in the 4-anilidopiperidine structural class which includes fentanyl. As defined in the February 6, 2018 temporary scheduling order, fentanyl-related substances include any substance not otherwise controlled in any schedule (*i.e.*, not included under any other Administration Controlled Substance Code Number) that is structurally related to fentanyl by one or more of the following modifications:

- (A) Replacement of the phenyl portion of the phenethyl group by any monocycle, whether or not further substituted in or on the monocycle;
- (B) substitution in or on the phenethyl group with alkyl, alkenyl, alkoxy, hydroxyl, halo, haloalkyl, amino or nitro groups;
- (C) substitution in or on the piperidine ring with alkyl, alkenyl, alkoxy, ester, ether, hydroxyl, halo, haloalkyl, amino or nitro groups;
- (D) replacement of the aniline ring with any aromatic monocycle, whether

¹⁴ Solinas M, Panlilio LV, Justinova Z, Yasar S, Goldberg SR. (2006). Using drug-discrimination techniques to study the abuse-related effects of psychoactive drugs in rats. *Nat Protoc.*1(3):1194–206.

¹⁵ Drug discrimination is widely used to determine whether a new test drug or substance is pharmacologically similar to a known drug of abuse.

¹⁶ DEA—Synthetic Opioids Purchase Agreement (2022–2024). Evaluation of synthetic opioid substances using analgesia and the drug discrimination assay. In Vivo Testing for the DEA by Gatch (Univ. of North Texas).

or not further substituted in or on the aromatic monocycle; and/or

(E) replacement of the *N*-propionyl group by another acyl group.

Figure 1: Regions of the Chemical Structure of Fentanyl Described in The Definition of a Fentanyl-Related Substance

According to the February 6, 2018 temporary scheduling order, the existence of a substance with anyone, or any combination, of above-mentioned modifications (see figure 1) would meet the structural requirements of the definition of fentanyl-related substances. The present seven substances fall within the definition of fentanyl-related substances by the following modifications:

1. *para*-chlorofentanyl: substitution on the aniline ring (meets definition for modification D);
2. *ortho*-chlorofentanyl: substitution on the aniline ring (meets definition for modification D);
3. *meta*-fluorofuranyl fentanyl: substitution on the aniline ring and replacement of the *N*-propionyl group with another acyl group (meets definition for modifications D and E);
4. *ortho*-methylcyclopropyl fentanyl: substitution on the aniline ring and replacement of the *N*-propionyl group with another acyl group (meets definition for modifications D and E);
5. *beta*-methylacetyl fentanyl: substitution on the phenethyl group with an alkyl group and replacement of the *N*-propionyl group with another acyl group (meets definition for modifications B and E);
6. tetrahydrothiofuranyl fentanyl: replacement of the *N*-propionyl group with another acyl group (meets definition for modification E);
7. *para*-fluoro valeryl fentanyl: substitution on the aniline ring and replacement of the *N*-propionyl group with another acyl group (meets definition for modifications D and E).

4. Its History and Current Pattern of Abuse

Evidence suggests that the pattern of abuse of *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl parallels that of prescription opioid analgesics. Currently, the United States is in the midst of an illicit opioid abuse epidemic. There has been a marked increase in the encounters of synthetic opioids that are structurally related to fentanyl that parallels an increase in deaths related to synthetic opioids. Thus, the recreational abuse of fentanyl-like substances continues to be a significant concern. These substances are distributed to users, often with unpredictable outcomes. *para*-Chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl have been encountered by law enforcement officials.

Law enforcement encountered these seven substances in the United States. According to the NFLIS¹⁷ database, 214 reports were registered containing six of the substances (*para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl) from state or local forensic laboratories from 2020 to 2024. *ortho*-Methylcyclopropyl fentanyl was not specifically listed in the NFLIS database, although in 2018, there were three reports of methylcyclopropyl fentanyl.

5. The Scope, Duration, and Significance of Abuse

The rapid appearance of fentanyl-related substances presents numerous challenges for forensic and toxicology laboratories. The identification of a new substance requires full structural elucidation, sometimes requiring specialized instrumentation not available to all forensic laboratories. Laboratories are required to quickly adapt testing procedures to identify new substances. It remains likely that the prevalence of these substances in opioid related emergency room admissions and deaths is underreported as standard immunoassays may not differentiate fentanyl from substances structurally related to fentanyl.

¹⁷ NFLIS data were queried November 1, 2024. NFLIS data reporting is still pending for 2023 and 2024 due to normal lag time.

The population likely to abuse fentanyl-related substances overlaps with the population abusing prescription opioid analgesics, heroin, fentanyl, and other synthetic opioid substances. Because abusers of fentanyl-related substances are likely to obtain these substances through unregulated sources, the identity, purity, and quantity are uncertain and inconsistent, thus posing significant adverse health risks to the end user. The misuse and abuse of opioids have been demonstrated and are well characterized. According to the most recent data from the National Survey on Drug Use and Health (NSDUH)¹⁸ of the Substance Abuse and Mental Health Services Administration (SAMHSA),¹⁹ in 2023, an estimated 8.9 million people aged 12 or older misused opioids in the past year, including 8.6 million prescription pain reliever misusers and 660,000 heroin users. In 2023, among people aged 12 or older, 828,000 people misused fentanyl in the past year. NSDUH data show that among people aged 12 or older in 2023, 627,000 people used illicitly manufactured fentanyl in the past year. This population is likely to be at risk of abusing fentanyl-related substances. Individuals who initiate (*i.e.*, use a drug for the first time) use of fentanyl-related substances are likely to be at risk of developing substance use disorder, overdose, and death, similar to the risks of other opioid analgesics (*e.g.*, fentanyl, morphine, etc.).

According to HHS, it is highly likely that the prevalence of these fentanyl-related substances in emergency room admissions and fatalities is under reported because standard immunoassays may not be sufficient to distinguish between fentanyl and

¹⁸ The National Survey on Drug Use and Health, formerly known as the National Household Survey on Drug Abuse (NHSDA), is conducted annually by the Department of Health and Human Services Substance Abuse and Mental Health Services Administration (SAMHSA). It is the primary source of estimates of the prevalence and incidence of nonmedical use of pharmaceutical drugs, illicit drugs, alcohol, and tobacco use in the United States. The survey is based on a nationally representative sample of the civilian, non-institutionalized population 12 years of age and older. The survey excludes homeless people who do not use shelters, active military personnel, and residents of institutional group quarters such as jails and hospitals. The NSDUH provides yearly national and state level estimates of drug abuse, and includes prevalence estimates by lifetime (*i.e.*, ever used), past year and past month abuse or dependence.

¹⁹ The Substance Abuse and Mental Health Services Administration (SAMHSA) is a branch of the U.S. Department of Health and Human Services (HHS). It is charged with improving the quality and availability of prevention, treatment, and rehabilitative services in order to reduce illness, death disability, and cost to society resulting from substance abuse and mental illness.

substances that are structurally related to fentanyl. Law enforcement reports demonstrate *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuran fentanyl, and *para*-fluoro valeryl fentanyl are being illicitly distributed and abused. The use of these seven fentanyl-related substances is likely to increase the scope, duration, and significance of abuse based on their pharmacological similarity to drugs that are abused in the current opioid epidemic (e.g., fentanyl).

6. What, if Any, Risk There Is to the Public Health

The increase in opioid overdose deaths in the United States has been exacerbated by the availability of potent synthetic opioids such as fentanyl and numerous other structurally related substances in the illicit drug market.²⁰ These substances have a history of being trafficked as replacements for other opioids, such as heroin and other synthetic opioids. Fentanyl is a potent synthetic opioid that is primarily prescribed for acute and chronic pain and is approximately 100 times more potent than morphine. As such, fentanyl has a high risk of abuse, dependence and overdose that can lead to death. Because fentanyl-related substances have a similar chemical structure to fentanyl, these substances are expected to have similar biological effects. Indeed, these seven fentanyl-related substances produced pharmacological effects similar to fentanyl. The adverse effects of substances structurally related to fentanyl on humans are largely identical to those of fentanyl and other opioid analgesics. These fentanyl-related substances pose the same qualitative public health risks as heroin, fentanyl, and other opioid analgesic substances. The DEA Toxicology Testing Program (DEA-Tox)²¹ identified

three drug paraphernalia where *para*-chlorofentanyl was detected. These cases occurred between May 2022 and June 2024. As the data demonstrate, the potential for overdoses exists for these substances and these substances pose risk to public health.

According to HHS, the lack of hospitalization or fatality for these seven fentanyl-related substances is not surprising because the enzyme linked immunosorbent assay (ELISA) which is used to detect fentanyl cross-reacts with fentanyl-related substances when fentanyl is present above a threshold level.²² Thus, fatalities that might be associated with the fentanyl-related substances may be underreported. As with any opioid not approved for medical use, the health and safety risks for users are high. Public health data suggest that *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuran fentanyl, and *para*-fluoro valeryl fentanyl may be a direct risk to public health.

7. Its Psychic or Physiological Dependence Liability

According to HHS, the psychic or physiologic dependence of these seven fentanyl-related substances has not been studied in clinical studies and is therefore unknown. HHS notes that pharmacology data for these substances as MOR agonists with known abuse potential demonstrates their property of producing physical and psychic dependence similar to other MOR agonists. The discontinuation of the use of MOR agonists, such as morphine and fentanyl (Schedule II drugs), is associated with withdrawal symptoms indicative of physical dependence. Opioid withdrawal syndrome is characterized by central nervous system irritability, gastrointestinal dysfunction, yawning, diaphoresis, and fever.²³ Thus, the pharmacological similarity and pattern of abuse of *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuran fentanyl, and *para*-fluoro valeryl fentanyl are indicative of their potential to possess a

of novel psychoactive substances, in addition to other drugs of abuse.

²² Guerrieri D, Kjellqvist F, Kronstrand R, Gr  n H. (2019). Validation and Cross-Reactivity Data for Fentanyl Analogs with the Immunolysis Fentanyl ELISA. *J Anal Toxicol*. 43(1):18–24.

²³ Katz R, Kelly W, Hsi A. (1994). Prospective study on the occurrence of withdrawal in critically ill children who receive fentanyl by continuous infusion. *Critical Care Medicine* 16:763–767.

psychic and physiological dependence liability similar to that of other mu opioid receptor agonist substances, such as heroin and fentanyl.

8. Whether the Substance is an Immediate Precursor of a Substance Already Controlled Under the CSA

para-Chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuran fentanyl, and *para*-fluoro valeryl fentanyl are not immediate precursors of any controlled substance of the CSA, as defined by 21 U.S.C. 802(23).

Conclusion: Based on consideration of the scientific and medical evaluation and accompanying recommendation of HHS, and on DEA's own eight-factor analysis, DEA finds that these facts and all relevant data constitute substantial evidence of potential for abuse of *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuran fentanyl, and *para*-fluoro valeryl fentanyl. As such, DEA proposes to permanently schedule these seven substances as controlled substances under the CSA.

Proposed Determination of Appropriate Schedule

The CSA establishes five schedules of controlled substances known as schedules I, II, III, IV, and V. The CSA also outlines the findings required to place a drug or other substance in any particular schedule.²⁴ After consideration of the analysis and recommendation of the Assistant Secretary for HHS and review of all other available data, the Administrator of DEA, pursuant to 21 U.S.C. 811(a) and 812(b)(1), finds that:

(1) *para*-Chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuran fentanyl, and *para*-fluoro valeryl fentanyl, similar to fentanyl, are mu-opioid receptor agonists. The seven fentanyl-related substances have analgesic effects, and these effects are mediated by μ -opioid receptor agonism. These substances that produce mu-opioid receptor agonist effects in the CNS are considered as having a high potential for abuse (e.g. morphine and fentanyl). Data obtained from drug discrimination studies indicate that *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofentanyl, *ortho*-methylcyclopropyl

²⁰ Centers for Disease Control and Prevention, (2024, April). Understanding the opioid overdose epidemic. <https://www.cdc.gov/overdose-prevention/about/understanding-the-opioid-overdoseepidemic.html> Spencer, M. R., Warner, M., Cisewski, J. A., Mini  o, A., Dodds, D., Perera, J., & Ahmad, F. B., Estimates of drug overdose deaths involving fentanyl, methamphetamine, cocaine, heroin, and oxycodone: United States, 2021. *Vital Statistics Rapid Release* (Report No. 27). National Center for Health Statistics; Zibbell, J. E., Aldridge, A., Grabenauer, M., Heller, D., Duhart Clarke, S., Pressley, D., & Smiley-McDonald, H. (2023). Associations between opioid overdose deaths and drugs confiscated by law enforcement and submitted to crime laboratories for analysis, United States, 2014–2019: An observational study. *The Lancet Regional Health—Americas*, 25.

²¹ DEA-TOX is a DEA-run program whereby unused biological samples from victims of drug overdoses can be extensively tested for the presence

²⁴ See 21 U.S.C. 812(b).

fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl fully substituted for the discriminative stimulus effects of morphine. Thus, these substances have a high potential for abuse.

(2) There is no FDA-approved drug application for *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl in the United States. Further, there are no adequate and well-controlled clinical studies for any of these substances, and there are no well-defined finished dosage forms for any of these fentanyl-related substances. There are no known therapeutic applications for these seven fentanyl-related substances, and thus they have no currently accepted medical use in the United States.²⁵

²⁵ Pursuant to 21 U.S.C. 812(b)(1)(B), when placing a drug or substance in schedule I of the CSA, DEA must consider whether the substance has a currently accepted medical use in treatment in the United States. First, DEA looks to whether the drug or substance has FDA approval. When no FDA approval exists, DEA has traditionally applied a five-part test to a drug or substance to determine whether a drug or substance has a currently medical use: i. the drug's chemistry must be known and reproducible; ii. there must be adequate safety studies; iii. there must be adequate and well-controlled studies proving efficacy; iv. the drug must be accepted by qualified experts; and v. the scientific evidence must be widely available. *Marijuana Scheduling Petition; Denial of Petition; Remand*, 57 FR 10499 (Mar. 26, 1992), *pet. for rev. denied*, *Alliance for Cannabis Therapeutics v. Drug Enforcement Admin.*, 15 F.3d 1131, 1135 (D.C. Cir. 1994). DEA applied the traditional five-part test and concluded the test was not satisfied. In a recent published letter in a different context, HHS applied an additional two-part test to determine currently accepted medical use for substances that do not satisfy the five-part test: (1) whether there exists widespread, current experience with medical use of the substance by licensed health care providers operating in accordance with implemented jurisdiction-authorized programs, where medical use is recognized by entities that regulate the practice of medicine, and, if so, (2) whether there exists some credible scientific support for at least one of the medical conditions for which part (1) is satisfied. On April 11, 2024, the Department of Justice's Office of Legal Counsel (OLC) issued an opinion, which, among other things, concluded that HHS's two-part test would be sufficient to establish that a drug has a currently accepted medical use. Office of Legal Counsel, Memorandum for Merrick B. Garland Attorney General Re: Questions Related to the Potential Rescheduling of Marijuana at 3 (April 11, 2024). In its eight-factor assessment, HHS determined that these seven fentanyl-related substances did not satisfy this two-part test. Therefore, since both DEA and HHS have determined that these seven fentanyl-related substances do not satisfy the five-part test, and HHS has determined that these seven fentanyl-related substances do not satisfy the additional two-part test, DEA concludes that *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl

(3) There is a lack of accepted safety for use of *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl under medical supervision. Because these seven substances have no FDA-approved medical use and have not been investigated as new drugs, their safety for use under medical supervision has not been determined. Therefore, there is a lack of accepted safety for use of these seven substances under medical supervision.

Based on these findings, the Administrator of DEA concludes that *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl, including their isomers, esters, ethers, salts, and salts of isomers, esters, and ethers whenever the existence of such isomers, esters, ethers, and salts is possible within the specific chemical designation, warrant continued control in schedule I of the CSA.²⁶

Requirements for Handling *para*-Chlorofentanyl, *ortho*-Chlorofentanyl, *meta*-Fluorofuranyl fentanyl, *ortho*-Methylcyclopropyl fentanyl, *beta*-Methylacetyl fentanyl, Tetrahydrothiofuranyl fentanyl, and *para*-Fluoro valeryl fentanyl

As discussed above, these seven fentanyl-related substances are currently subject to a temporary scheduling order, which added them to schedule I. If this rule is finalized as proposed, *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl would be subject, on a permanent basis, to the CSA's schedule I regulatory controls and administrative, civil, and criminal sanctions applicable to the manufacture, distribution, dispensing, importing, exporting, research, and conduct of instructional activities, including the following:

1. **Registration.** Any person who handles (manufactures, distributes, dispenses, imports, exports, engages in research, or conducts instructional activities or chemical analysis with, or possesses) *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl

fentanyl, and *para*-fluoro valeryl fentanyl do not have a currently accepted medical use.

²⁶ 21 U.S.C. 812(b)(1).

fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl must be registered with DEA to conduct such activities pursuant to 21 U.S.C. 822, 823, 957, and 958, and in accordance with 21 CFR parts 1301 and 1312.

2. **Security.** *para*-Chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl are subject to schedule I security requirements and must be handled and stored pursuant to 21 U.S.C. 821, 823, and in accordance with 21 CFR 1301.71 through 1301.76. Non-practitioners handling these seven substances also must comply with the screening requirements of 21 CFR 1301.90 through 1301.93.

3. **Labeling and Packaging.** All labels and labeling for commercial containers of *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl must comply with 21 U.S.C. 825 and 958(e) and be in accordance with 21 CFR part 1302.

4. **Quota.** Only registered manufacturers are permitted to manufacture *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl in accordance with a quota assigned pursuant to 21 U.S.C. 826 and in accordance with 21 CFR part 1303.

5. **Inventory.** Any person registered with DEA to handle *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl must have an initial inventory of all stocks of controlled substances (including these substances) on hand on the date the registrant first engages in the handling of controlled substances pursuant to 21 U.S.C. 827, and in accordance with 21 CFR 1304.03, 1304.04, and 1304.11.

After the initial inventory, every DEA registrant must take a new inventory of all stocks of controlled substances (including *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl) on hand

every two years pursuant to 21 U.S.C. 827 and 958(e) and in accordance with 21 CFR 1304.03, 1304.04, and 1304.11.

6. *Records and Reports.* Every DEA registrant must maintain records and submit reports with respect to *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl, pursuant to 21 U.S.C. 827, 832(a), and 958(e), and in accordance with 21 CFR 1301.74(b) and (c) and 1301.76(b) and parts 1304, 1312, and 1317. Manufacturers and distributors would be required to submit reports regarding *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl to the Automation of Reports and Consolidated Order System pursuant 21 U.S.C. 827, and in accordance with 21 CFR parts 1304 and 1312.

7. *Order Forms.* Every DEA registrant who distributes *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl must comply with the order form requirements, pursuant to 21 U.S.C. 828 and 21 CFR part 1305.

8. *Importation and Exportation.* All importation and exportation of *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl must be in compliance with 21 U.S.C. 952, 953, 957, and 958, and in accordance with 21 CFR part 1312.

9. *Liability.* Any activity involving *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl not authorized by, or in violation of, the CSA or its implementing regulations is unlawful, and may subject the person to administrative, civil, and/or criminal sanctions.

Regulatory Analyses

Executive Orders 12866, 13563, and 14094 (Regulatory Review)

In accordance with 21 U.S.C. 811(a), this proposed scheduling action is

subject to formal rulemaking procedures done “on the record after opportunity for a hearing,” which are conducted pursuant to the provisions of 5 U.S.C. 556 and 557. The CSA sets forth the criteria for scheduling a drug or other substance. Such actions are exempt from review by the Office of Management and Budget (OMB) pursuant to section 3(d)(1) of Executive Order (E.O.) 12866 and the principles reaffirmed in E.O. 13563. E.O. 14094 modernizes the regulatory review process to advance policies that promote the public interest and address national priorities.

Executive Order 12988, Civil Justice Reform

This proposed regulation meets the applicable standards set forth in sections 3(a) and 3(b)(2) of E.O. 12988 to eliminate drafting errors and ambiguity, minimize litigation, provide a clear legal standard for affected conduct, and promote simplification and burden reduction.

Executive Order 13132, Federalism

This proposed rulemaking does not have federalism implications warranting the application of E.O. 13132. The proposed rule does not have substantial direct effects on the States, on the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government.

Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

This proposed rule does not have tribal implications warranting the application of E.O. 13175. It does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Regulatory Flexibility Act

The Administrator, in accordance with the Regulatory Flexibility Act, 5 U.S.C. 601–612, has reviewed this rule and by approving it, certifies that it will not have a significant economic impact on a substantial number of small entities. On February 6, 2018, DEA published an order to temporarily place fentanyl-related substances, as defined in the order, in schedule I of the CSA pursuant to the temporary scheduling provisions of 21 U.S.C. 811(h). However, as explained in DEA’s April

10, 2020 correcting amendment,²⁷ Congress extended that expiration date until May 6, 2021, by enacting the Temporary Reauthorization and Study of the Emergency Scheduling of Fentanyl Analogues Act.²⁸ This temporary order was subsequently extended multiple times, most recently on December 29, 2022, through the Consolidated Appropriations Act, 2023,²⁹ which extended the order until December 31, 2024. DEA estimates that all entities handling or planning to handle *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl have already established and implemented systems and processes required to handle these substances which meet the definition of fentanyl-related substances.

There are currently 170 registrations authorized to specifically handle the fentanyl-related substances as a class, which include one or more of the following substances: *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl, as well as a number of registered analytical labs that are authorized to handle schedule I controlled substances generally. Some of these entities are likely to be large entities. However, since DEA does not have information of registrant size, DEA conservatively assumes all of 170 registrants affected by this rule are small entities.

A review of the 170 registrations indicates that all entities that currently handle *para*-chlorofentanyl, *ortho*-chlorofentanyl, *meta*-fluorofuranyl fentanyl, *ortho*-methylcyclopropyl fentanyl, *beta*-methylacetyl fentanyl, tetrahydrothiofuranyl fentanyl, and *para*-fluoro valeryl fentanyl also handle other schedule I controlled substances and have established and implemented (or maintained) systems and processes required to handle these substances. Therefore, DEA anticipates that this proposed rule will impose minimal or no economic impact on any affected entities; and thus, will not have a significant economic impact on any of the 95 affected small entities. Therefore,

²⁷ *Schedules of Controlled Substances: Temporary Placement of Fentanyl-Related Substances in Schedule I; Correction*, 85 FR 20155 (Apr. 10, 2020).

²⁸ Public Law 116–114, sec. 2, 134 Stat. 103.

²⁹ Public Law 117–328, division O, title VI, sec. 601.

DEA has concluded that this proposed rule will not have a significant economic impact on a substantial number of small entities.

Unfunded Mandates Reform Act of 1995

In accordance with the Unfunded Mandates Reform Act (UMRA) of 1995, 2 U.S.C. 1501 *et seq.*, DEA has determined and certifies that this action would not result in any Federal mandate that may result “in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any 1 year” Therefore, neither a Small Government Agency Plan nor any other action is required under the UMRA of 1995.

Paperwork Reduction Act of 1995

This proposed rule would not impose a new collection or modify an existing collection of information under the Paperwork Reduction Act of 1995.³⁰ Also, this proposed rule would not impose new or modify existing recordkeeping or reporting requirements on state or local governments, individuals, businesses, or organizations. However, this proposed rule would require compliance with the following existing OMB collections: 1117–0003, 1117–0004, 1117–0006, 1117–0008, 1117–0009, 1117–0010, 1117–0012, 1117–0014, 1117–0021,

1117–0023, 1117–0029, and 1117–0056. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 19, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Heather Achbach,

Federal Register Liaison Officer, Drug Enforcement Administration.

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Reporting and recordkeeping requirements.

For the reasons set out above, DEA proposes to amend 21 CFR part 1308 as follows:

PART 1308—SCHEDULES OF CONTROLLED SUBSTANCES

■ 1. The authority citation for 21 CFR part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871(b), 956(b), unless otherwise noted.

■ 2. In § 1308.11:

■ a. Redesignate paragraphs (b)(104) through (109) as paragraphs (b)(111) through (116);

■ b. Redesignate paragraphs (b)(87) through (103) as paragraphs (b)(93) through (109);

■ c. Redesignate paragraphs (b)(84) through (86) as paragraphs (b)(89) through (91);

■ d. Redesignate paragraphs (b)(82) and (83) as paragraphs (b)(86) and (87);

■ e. Redesignate paragraphs (b)(76) through (81) as paragraphs (b)(79) through (84);

■ f. Redesignate paragraphs (b)(59) through (75) as paragraphs (b)(61) through (77);

■ g. Redesignate paragraphs (b)(21) through (58) as paragraphs (b)(22) through (59); and

■ h. Add new paragraphs (b)(21), (60), (78), (85), (88), (92), and (110).

The additions read as follows:

§ 1308.11 Schedule I.

* * * * *

(b) * * *

(21)	<i>beta</i> -methylacetyl fentanyl (<i>N</i> -phenyl- <i>N</i> -(1-(2-phenylpropyl)piperidin-4-yl)acetamide)	9868
(60)	<i>meta</i> -fluorofuranyl fentanyl (<i>N</i> -(3-fluorophenyl)- <i>N</i> -(1-phenethylpiperidin-4-yl)furan-2-carboxamide)	9871
(78)	<i>ortho</i> -chlorofentanyl (<i>N</i> -(2-chlorophenyl)- <i>N</i> -(1-phenethylpiperidin-4-yl)propionamide)	9828
(85)	<i>ortho</i> -methylcyclopropyl fentanyl (<i>N</i> -(2-methylphenyl)- <i>N</i> -(1-phenethylpiperidin-4-yl)cyclopropanecarboxamide)	9849
(88)	<i>para</i> -chlorofentanyl (<i>N</i> -(4-chlorophenyl)- <i>N</i> -(1-phenethylpiperidin-4-yl)propionamide)	9818
(92)	<i>para</i> -fluoro valeryl fentanyl (<i>N</i> -(4-fluorophenyl)- <i>N</i> -(1-phenethylpiperidin-4-yl)pentanamide)	9870
(110)	tetrahydrothiofuranyl fentanyl (also known as: tetrahydrothiophene fentanyl) (<i>N</i> -(1-phenethylpiperidin-4-yl)- <i>N</i> -phenyltetrahydrothiophene-2-carboxamide)	9869

³⁰ 44 U.S.C. 3501–3521.

RIN 0938–AU94

Coverage of Certain Preventive Services Under the Affordable Care Act

AGENCY: Internal Revenue Service, Department of the Treasury; Employee Benefits Security Administration, Department of Labor; Centers for Medicare & Medicaid Services, Department of Health and Human Services.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: This document withdraws a notice of proposed rulemaking that appeared in the **Federal Register** on February 2, 2023, regarding coverage of certain preventive services under the Affordable Care Act.

DATES: As of December 23, 2024, the notice of proposed rulemaking that appeared in the **Federal Register** on February 2, 2023, at 88 FR 7236, is withdrawn.

FOR FURTHER INFORMATION CONTACT: Alex Krupnick, Internal Revenue Service, Department of the Treasury, at (202) 317–5500; Beth Baum or Matthew Meidell, Employee Benefits Security Administration, Department of Labor, at (202) 693–8335; David Mlawsky, Centers for Medicare & Medicaid Services, Department of Health and Human Services, at (410) 786–6851.

SUPPLEMENTARY INFORMATION: Section 2713 of the Public Health Service Act (PHS Act), as added by the Affordable

Care Act and incorporated into the Employee Retirement Income Security Act and the Internal Revenue Code, requires non-grandfathered group health plans and health insurance issuers offering non-grandfathered group or individual health insurance coverage to provide coverage of certain recommended preventive services without imposing any cost-sharing requirements. These preventive services include, with respect to women, under comprehensive guidelines supported by the Health Resources and Services Administration, certain contraceptive services. Current regulations include exemptions and optional accommodations for entities and individuals with religious objections or non-religious moral objections to coverage of contraceptive services.

On February 2, 2023, the Departments of the Treasury, Labor, and Health and Human Services (HHS) (collectively, the Departments) proposed rules (88 FR 7236) that sought to resolve long-running litigation with regard to religious objections to providing contraceptive coverage, by respecting the objecting entities' religious objections while also ensuring that women enrolled in plans or coverage sponsored, arranged, or offered by objecting entities could independently obtain contraceptive services at no cost. The proposed rules would have rescinded the regulation providing for an exemption based on non-religious moral objections. The proposed rules would also have established a new individual contraceptive arrangement that individuals in plans or coverage subject to a religious exemption could use to obtain contraceptive services at no cost directly from a provider or facility that furnishes contraceptive services, without any involvement on the part of an objecting entity.

The Departments requested comments on all aspects of the proposed rules, as well as on a number of specific issues. The Departments received 44,825 comments in response to the proposed rules from a range of interested parties, including employers, health insurance issuers, State Exchanges, State regulators, unions, and individuals. The Departments received comments on specific proposals in the proposed rules, as well as general comments on the proposals. The Departments also received comments that were not related to the proposals in the proposed rules.

The Departments have determined it appropriate to withdraw the proposed rules at this time to focus their time and resources on matters other than finalizing these rules. Additionally, in light of the volume and breadth of scope

of the comments received, the Departments want to further consider the proposals made in the proposed rules. Moreover, should the Departments decide in the future that it is a priority to move forward with a rulemaking in this area, the Departments want to ensure that they will have the benefit of the most up-to-date facts and information on these important issues as the Departments consider how to best implement the contraceptive coverage requirements of PHS Act section 2713, while respecting religious objections to contraception. For these independently sufficient reasons, the Departments are withdrawing the proposed rules, and may propose new rules in the future, as appropriate to meet these goals.

This withdrawal does not limit the Departments' ability to make new regulatory proposals in the areas addressed by the withdrawn proposed rules, including new proposals that may be substantially identical or similar to those described therein. In addition, this withdrawal does not affect the Departments' ongoing application of existing statutory and regulatory requirements or its responsibility to faithfully administer the statutory requirements the proposed rules would have implemented if finalized.

Douglas W. O'Donnell,

Deputy Commissioner, Internal Revenue Service.

Lisa M. Gomez,

Assistant Secretary, Employee Benefits Security Administration, Department of Labor.

Xavier Becerra,

Secretary, Department of Health and Human Services.

RIN 1024–AE52

Whiskeytown Unit, Whiskeytown-Shasta-Trinity National Recreation Area; Bicycling

AGENCY: National Park Service, Interior.

ACTION: Proposed rule.

SUMMARY: The National Park Service proposes to amend the special regulations for Whiskeytown National

Recreation Area to allow bicycle use on approximately 79.8 miles of multi-use trails. National Park Service regulations require promulgation of a special regulation to allow bicycles on new trails outside of developed areas and for existing trails that require construction or significant modification to accommodate bicycles.

DATES: Comments on the proposed rule must be received by 11:59 p.m. EDT on February 28, 2025.

ADDRESSES: You may submit comments, identified by Regulation Identifier Number (RIN) 1024-AE52, by either of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: <https://www.regulations.gov>. Follow the instructions for submitting comments.

(2) *By hard copy:* Mail to: Superintendent, Whiskeytown National Recreation Area, P.O. Box 188, Whiskeytown, CA 96095.

Document Availability: The Trails Management Plan and Environmental Assessment and the Finding of No Significant Impact provide information and context for this proposed rule and are available online at <https://parkplanning.nps.gov/whis> by clicking the link entitled “All Docs & Projects,” then clicking the link entitled “Whiskeytown NRA Trails Management Plan,” and then clicking the link entitled “Document List.”

Instructions: Comments will not be accepted by fax, email, or in any way other than those specified above. All submissions received must include the words “National Park Service” or “NPS” and must include the docket number or RIN (1024-AE52) for this rulemaking. Comments received may be posted without change to <https://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <https://www.regulations.gov> and search for “1024-AE52”.

FOR FURTHER INFORMATION CONTACT: Laura Shaskey, Division Manager, Resources and Interpretation, Whiskeytown National Recreation Area; phone: 530-242-3457; email: Laura_Shaskey@nps.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. In

compliance with the Providing Accountability Through Transparency Act of 2023, the plain language summary of the proposal is available on [Regulations.gov](https://www.regulations.gov) in the docket for this rulemaking.

SUPPLEMENTARY INFORMATION:

Background

Purpose and Management Authority for the Recreation Area

Congress established the Whiskeytown-Shasta-Trinity National Recreation Area in 1965 for public outdoor recreation, use and enjoyment. 16 U.S.C. 460q. Congress directed the Secretary of the Interior to administer the Whiskeytown unit and directed the Secretary of Agriculture to administer the Shasta and Trinity units. The National Park Service (NPS) administers the Whiskeytown unit, on the behalf of the Secretary of the Interior, as the Whiskeytown National Recreation Area (referred to in this document as the “recreation area”). The U.S. Forest Service manages the Shasta and Trinity units, on behalf of the Secretary of Agriculture, as the Shasta-Trinity National Recreation Area. Each bureau is required to administer their units in a manner that will best provide for public outdoor recreation benefits and conserve the scenic, scientific, historic, and other values that contribute to public enjoyment. 16 U.S.C. 460q-3. In addition to the enabling legislation described above, the NPS manages the recreation area pursuant to the NPS Organic Act of 1916, which gives the NPS broad authority to regulate the use of the lands and waters that it administers as part of the National Park System. See 54 U.S.C. 100101; 100751(a).

Significance and Visitor Use of the Recreation Area

The recreation area encompasses 42,497 acres in Shasta County, nestled within the Klamath Mountains in Northern California. The recreation area has diverse ecosystems ranging from oak scrubland to dense coniferous forests, with elevations ranging from 800 feet in lower Clear Creek to more than 6,200 feet atop Shasta Baldy. This dynamic landscape, range in elevation, rugged topography, and numerous soil types contribute to a rich biodiversity. These habitats provide shelter and sustenance to an abundant and diverse wildlife community, including numerous species of concern and other rare species. High-elevation forests have been profoundly influenced by wildland fire. Fire management continues to play a key role in the preservation and

restoration of natural communities in the recreation area.

The recreation area includes significant cultural resources. For thousands of years before the arrival of European Americans, the Wintu People and their ancestors lived in villages along Clear Creek and its tributaries. Archeological remains document their extensive habitation and use of the land, and traditional ties to the recreational area remain among contemporary Wintu. In the early part of the 19th century, European explorers and trappers began visiting the upper Sacramento Valley and Wintu homelands. They were soon followed by parties of settlers on their way to central California and Oregon, and in 1848 gold was discovered on Clear Creek just south of the recreation area. During the 100-year gold rush, lands within the recreation area were subject to intensive mining exploration and development. This history of mining is evident throughout the recreation area.

In the early 1900s, the United States Government began establishing the Central Valley Project to manage the water of the Sacramento River and provide for its use in the Central Valley of California. The construction of Whiskeytown Dam in 1962 created Whiskeytown Lake. With 36 miles of shoreline, the crystal-clear water of Whiskeytown Lake is perhaps the most recognized feature of the recreation area. Due to its forested, mountain setting and consistent water level, the lake provides high-quality recreational opportunities throughout the primary recreation season. Visitors enjoy swimming, beaches, lakeside camping, boating, sport fishing, and picnicking. Beyond the shoreline of the lake, the rugged canyons, forests, streams, and waterfalls within the recreation area provide visitors with outstanding recreational opportunities. An extensive trail system allows visitors to experience a variety of forested terrain for birdwatching, camping, picnicking, wildlife viewing, hiking, horseback riding, and bicycling. Trails are located primarily upon historic logging and mining infrastructure south, east, and west of Whiskeytown Lake. In total, more than 800,000 visitors come to enjoy the recreation area each year, including casual sightseers, experienced adventurers and everyone in between.

Bicycle Use in the Recreation Area

Bicycle use has occurred in the recreation areas for several decades. Today, bicycles are used on roads that are open to public motor vehicle use, on 42.2 miles of administrative roads that are closed to motor vehicle use by the

public but open to motor vehicle use by the NPS for administrative purposes, and on the majority of trails in the existing trail system. Public roads, administrative roads, and trails that are open to traditional bicycles are also open to Class 1 electric bicycles, which are defined in NPS regulations as an electric bicycle equipped with a motor that provides assistance only when the rider is pedaling, and that ceases to provide assistance when the bicycle reaches the speed of 20 miles per hour. Class 2 and 3 electric bicycles are not allowed on trails or administrative roads within the recreation area, however they are permitted on roads that are open to public motor vehicle use. The trails identified below are closed to bicycle use:

- All portions of the Shasta Divide Nature Trail between Kennedy Memorial Drive and Whiskeytown Lake.
- All portions of the Davis Gulch Trail between the trailheads at Kennedy Memorial Drive and the Brandy Creek Day Use Area.
- All portions of the Crystal Creek Water Ditch Trail.
- James K. Carr Trail to Whiskeytown Falls (from Mill Creek Trail junction to the falls).
- Boulder Creek Falls Trail.
- The portion of Brandy Creek Falls Trail beyond the intersection with Rich Gulch Trail.

Other trails in the network are reserved for use by the Whiskeytown Environmental School (WES) and are not open to the public. These WES-only trails are the Ladybug Lane Trail, Martha's Ditch Trail and the Ridge Trail.

Trails Management Plan Environmental Assessment

With the growth of the city of Redding eight miles to the east, the recreation area has transitioned from a wildland setting to an urban location that offers recreation opportunities for the largest metropolitan area in the northern Sacramento Valley. Facilities and infrastructure within the recreation areas were primarily constructed in the 1960s and were not designed to accommodate current levels of visitation. To address emerging management challenges and accommodate current levels of visitation, the NPS initiated a comprehensive trail management project to help guide, plan, and manage trail use and maintenance within the recreation area. In 2017 the NPS sought public input on the existing trail system. The NPS used this input to develop preliminary alternatives for a trails management plan. In 2018 the Carr Fire burned approximately 39,000 out of

42,000 acres within the recreation area. To date, this is the most destructive fire in the history of the National Park System. The entire recreation area was closed and NPS resources were diverted to the rebuilding effort. NPS staff, partners, and contractors have made significant headway in rebuilding lost infrastructure and reopening much of the recreation area. As of August 2024 approximately 9% of the trails remain closed because of the fire. The NPS will continue to reopen trails provided there are no safety or resource issues associated with using the trails after the fire.

In 2020 the NPS restarted the trail planning process, with alternatives that were revised to reflect the changed landscape and address the need for long term solutions to poorly designed and unsustainable trails. On June 8, 2021, the NPS published the Trails Management Plan and Environmental Assessment and accepted public comments for 30 days. In February 2022 the NPS issued a revised Trails Management Plan and Environmental Assessment (EA) to reflect updated trail mileages and additional best management practices. The EA describes one action alternative (the preferred alternative) and the no-action alternative. The no-action alternative would continue the existing management of the trail system into the future. The action alternative would involve trail construction, including building new trails, rerouting some existing trails, and restoring other existing trails to natural condition. The EA evaluates the suitability of each trail surface and soil conditions for accommodating bicycle use; and life cycle maintenance costs, safety considerations, methods to prevent or minimize user conflict, and methods to protect natural and cultural resources and mitigate impacts associated with bicycle use on each trail. The EA contains a full description of the purpose and need for taking action, the alternatives considered, a map of the affected area, and the environmental impacts associated with the project.

On March 11, 2022, the Regional Director for DOI Unified Regions 8, 9, 10 and 12 signed a Finding of No Significant Impact (FONSI) that identified the preferred alternative in the EA as the selected alternative.¹ Trail

¹ During the NEPA process, the NPS evaluated the impacts of bicycle use on all trails where the NPS proposes to authorize their use in this rulemaking. The NPS acknowledges minor trail mileage discrepancies between the FONSI and this proposed rule. Small discrepancies in GIS estimates are reasonable and expected. The differing mileage estimates between documents are a result of simple

work will occur on approximately 32.8 miles of trails and will include minor improvements to existing trails, the construction of new multiuse trails, the rerouting of some existing trails, and trail closures and restoration to natural conditions. The longest new trail, the proposed lakefront trail, will be approximately 8 miles in length and improve access to the lake. The NPS will also establish a new trail along the Shasta Divide at the east side of the recreation area, offering views of Mount Shasta and the Lassen Peak. The NPS also will formalize three social trails by merging them into one mile of new trail. All of the new trails will connect to existing trails to create more trail loops. The new trails will generate opportunities for new and diverse visitor experiences in different locations in the recreation area.

The NPS will reroute seven multiuse trails because the existing routes have become unsustainable due to erosive soils or soil compaction, steep alignment, and undesirable visitor experiences. The new routes will have a more sustainable alignment and capacity for use. Other trails totaling 5.1 miles will be closed and not rerouted, which will allow those areas to return to their natural condition. In total, the selected alternative will expand the trail network and result in approximately 79.8 miles of trails open to bicycle use within the recreation area.

NPS Management of Bicycle Use

From 1966 until 1987 NPS regulations allowed bicycles on trails in recreation areas unless they were restricted by posted signs or markings on a map. See 31 FR 16650 (December 29, 1966) and 39 FR 11882 (April 1, 1974). In 1987 the NPS replaced what had been an "open unless closed" management framework for bicycle use in recreation areas with a framework that required that the NPS promulgate a special regulation in order to allow bicycles in any System unit on routes outside of developed areas and special use zones. Further, routes could only be designated for bicycle use upon a determination that such use was consistent with the protection of a park area's natural scenic and aesthetic values, safety considerations and management objectives and would not disturb wildlife or park resources. See 52 FR 10685 (April 2, 1987).

In 2012 the NPS amended its regulations for bicycle use again. These amended regulations are in place today and are codified at 36 CFR 4.30. These regulations focus on planning and

addition and rounding errors as well as improved data quality and increased accuracy in GIS layers.

environmental compliance under the National Environmental Policy Act (NEPA). Bicycles are allowed by default on park roads and parking areas open to public motor vehicles. Bicycles may be allowed on administrative roads that are closed to motor vehicle use by the public but open to motor vehicle use by the NPS for administrative purposes, but only after the Superintendent makes the same determination that has been required since 1987 (see above). The use of bicycles on trails is subject to a thorough review and approval process. The NPS must complete a planning process that evaluates bicycle use on each specific trail, including impacts to trail surface and soil conditions, maintenance costs, safety considerations, potential user conflicts, and methods to protect resources and mitigate impacts. The NPS also must complete either an environmental assessment or environmental impact statement that concludes that bicycle use in the park and on each specific trail will have no significant impacts on the environment. If an environmental assessment is prepared, the public must be notified and provided 30 days to review and comment. In addition to the planning and NEPA compliance documents (which are typically the same document), the Superintendent must prepare and the regional director must approve the same written determination about bicycle use that is required for administrative roads. For existing trails or new trails within developed areas, the NPS must publish the written determination in the **Federal Register** for a 30-day public comment period. For all trails, including new trails outside of developed areas, the Regional Director must approve the written determination. For new trails outside of developed areas, the NPS must publish a special regulation designating the trails for bicycle use, which is subject to a separate notice-and-comment period under the Administrative Procedure Act, 5 U.S.C. 553(b). New trails, whether they are in developed areas or not, must be developed and constructed in accordance with appropriate sustainable trail design principles and guidelines. Adherence to the procedures in these regulations helps ensure that bicycles are allowed only in locations where, in the judgment of the NPS, their use is appropriate and will not cause unacceptable impacts.

Proposed Rule

Compliance With NPS Regulations

This proposed rule would authorize the Superintendent to allow bicycles, by

designation in the Superintendent's Compendium, on all of the trails where bicycles would be allowed under the selected alternative. This includes existing trails that are not being rerouted, existing trails that are being rerouted, and new trails that will be constructed. Although NPS regulations do not require special regulations to allow bicycles on existing trails that do not require any construction or significant modification, the NPS proposes to include those trails in the special regulation so that all of the trails that may be designated for bicycle use are identified in one place. The NPS expects this approach to increase compliance with the regulations by making it easier for visitors to understand where bicycles are allowed and how they can be used.

The EA constitutes the planning document and evaluates the criteria required by the regulations at 36 CFR 4.30. The no action alternative evaluates continued bicycle use on existing trails that will not be rerouted; and the action alternative evaluates the rerouting of existing trails and construction of new trails, plus the impact of bicycle use on those trails. The FONSI concludes that the development and use of the new trail system would not significantly affect the quality of the human environment.

The Superintendent of the recreation area has signed a written determination that bicycle use on all of the trails where bicycles would be allowed under the selected alternative is consistent with the protection of the park's natural, scenic, and aesthetic values; safety considerations; management objectives; and will not disturb wildlife or park resources. This written determination is available on the recreation area's planning website at <https://parkplanning.nps.gov/whis> by clicking the link entitled "All Docs & Projects," then clicking the link entitled "Whiskeytown NRA Trails Management Plan," and then clicking the link entitled "Document List." The NPS is not publishing the written determination separately in the **Federal Register** but welcomes comments on the written determination during the public comment period for this proposed rule, and will consider those comments before submitting the written determination to the Regional Director for approval. The written determination also determines that continued bicycle use on administrative roads within the recreation area is consistent with the protection of the park's natural, scenic, and aesthetic values; safety considerations; management objectives;

and will not disturb wildlife or park resources.

Content of the Proposed Rule

This proposed rule would add a new paragraph (e) to 36 CFR 7.91, which contains the special regulations for the recreation area. The proposed rule would authorize the Superintendent to designate 79.8 miles of trails within the recreation area for bicycle use. The proposed rule would require the Superintendent to notify the public of any designated trails through one or more of the methods identified in 36 CFR 1.7 and to identify the designated trails on maps available at visitor centers and on the recreation area's website (<https://www.nps.gov/whis>). The proposed rule would authorize the Superintendent to limit, restrict, or impose conditions on bicycle use, or close any trail to bicycle use, or terminate such limits, restrictions, conditions or closures, after considering public health and safety, resources protection, and other management activities and objectives. Pursuant to 36 CFR 4.30(i), the Superintendent may allow electric bicycles on any trails that are open to traditional bicycles, and will notify the public pursuant to 36 CFR 1.7 if electric bicycles are so allowed.

Compliance With Other Laws, Executive Orders and Department Policy

Regulatory Planning and Review (Executive Orders 12866 and 13563 and 14094)

Executive Order 14094 (E.O.) amends E.O. 12866 and reaffirms the principles of E.O. 12866 and E.O. 13563 and states that regulatory analysis should facilitate agency efforts to develop regulations that serve the public interest, advance statutory objectives, and are consistent with E.O. 12866 and E.O. 13563. Regulatory analysis, as practicable and appropriate, shall recognize distributive impacts and equity, to the extent permitted by law. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. The NPS has developed this proposed rule in a manner consistent with these requirements.

E.O. 12866, as reaffirmed by E.O. 13563 and amended and reaffirmed by E.O. 14094, provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget (OMB) will review all significant rules. OIRA determined that this proposed rule is not significant.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

This proposed rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This certification is based on information contained in the economic analyses found in the report entitled “Cost-Benefit and Regulatory Flexibility Threshold Analyses: Proposed Special Regulations to Designate New and Existing Trails for Bicycle Use at Whiskeytown National Recreation Area.” The report may be viewed on the recreation area’s planning website at <https://parkplanning.nps.gov/whis> by clicking the link entitled “All Docs & Projects,” then clicking the link entitled “Whiskeytown NRA Trails Management Plan,” and then clicking the link entitled “Document List.”

Congressional Review Act (CRA)

This proposed rule is not a major rule under 5 U.S.C. 804(2). This rulemaking:

- (a) Does not have an annual effect on the economy of \$100 million or more.
- (b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.
- (c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

This proposed rule does not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than \$100 million per year. The proposed rule does not have a significant or unique effect on State, local or Tribal governments or the private sector. It addresses public use of national park lands and imposes no requirements on other agencies or governments. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

Takings (Executive Order 12630)

This rulemaking does not affect a taking of private property or otherwise have takings implications under Executive Order 12630. A takings implication assessment is not required.

Federalism (Executive Order 13132)

Under the criteria in section 1 of Executive Order 13132, the rulemaking does not have sufficient federalism implications to warrant the preparation

of a federalism summary impact statement. This proposed rule only affects use of federally administered lands and waters. It has no direct effects on other areas. A federalism summary impact statement is not required.

Civil Justice Reform (Executive Order 12988)

This rulemaking complies with the requirements of Executive Order 12988. This rulemaking:

- (a) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and
- (b) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

Consultation With Indian Tribes (Executive Order 13175 and Department Policy)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. The NPS has evaluated this proposed rule under the criteria in Executive Order 13175 and under the Department’s Tribal consultation policy and has determined that Tribal consultation is not required because the proposed rule will have no substantial direct effect on federally recognized Indian Tribes. Nevertheless, in support of the Department of the Interior and NPS commitment for government-to-government consultation, during the EA process, the NPS worked with the Native American Heritage Commission (NAHC) to identify Tribal partners that may be interested in the trails management plan. The NPS shared information about the proposed action and copies of the draft trails management plan/EA with one federally recognized American Indian Tribe identified by the NAHC and five non-federally recognized Tribal groups. These Tribes are the Shasta Nation, Nor-Rel-Muk Nation, Redding Rancheria, Winnemem Wintu Tribe, Wintu Tribe of Northern California, and Toyon-Wintu Center Wintu Educational and Cultural Council. The proposed new trails and trail reroutes under the selected action alternative would not impact known ethnographic resources or impede tribes’ ability to utilize Whiskeytown for traditional purposes. The proposed trail construction activities and routes would be designed to avoid known ethnographic resources in consultation

with tribes. The NPS informed Tribal partners that the trails management plan requires regular consultation for individual actions in accordance with section 106 of the National Historic Preservation Act under 36 CFR part 800. Additional details about Tribal consultation are available in chapter 4 of the EA.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

This proposed rule does not contain information collection requirements, and a submission to the Office of Management and Budget under the Paperwork Reduction Act is not required. The NPS may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 et seq.)

The NPS has prepared the EA to determine whether this proposed rule will have a significant impact on the quality of the human environment under the National Environmental Policy Act of 1969. This proposed rule would not constitute a major Federal action significantly affecting the quality of the human environment. A detailed statement under the NEPA is not required because of the FONSI. A copy of the EA and FONSI can be found online at <https://parkplanning.nps.gov/whis> by clicking the link entitled “All Docs & Projects,” then clicking the link entitled “Whiskeytown NRA Trails Management Plan,” and then clicking the link entitled “Document List.”

Effects on the Energy Supply (Executive Order 13211)

This proposed rule is not a significant energy action under the definition in Executive Order 13211; the proposed rule is not likely to have a significant adverse effect on the supply, distribution, or use of energy, and the proposed rule has not otherwise been designated by the Administrator of OIRA as a significant energy action. A Statement of Energy Effects is not required.

Clarity of This Rule

The NPS is required by Executive Orders 12866 (section 1(b)(12)) and 12988 (section 3(b)(1)(B)), and 13563 (section 1(a)), and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule the NPS publishes must:

- (a) Be logically organized;
- (b) Use the active voice to address readers directly;

(c) Use common, everyday words and clear language rather than jargon;

(d) Be divided into short sections and sentences; and

(e) Use lists and tables wherever possible.

If you feel that the NPS has not met these requirements, send us comments by one of the methods listed in the **ADDRESSES** section. To better help the NPS revise the proposed rule, your comments should be as specific as possible. For example, you should identify the numbers of the sections or paragraphs that you find unclear, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Public Participation

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments regarding this proposed rule by one of the methods listed in the **ADDRESSES** section of this document.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.

List of Subjects in 36 CFR Part 7

National parks, Reporting and recordkeeping requirements.

In consideration of the foregoing, the National Park Service proposes to amend 36 CFR part 7 as set forth below:

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

■ 1. The authority citation for part 7 continues to read as follows:

Authority: 54 U.S.C. 100101, 100751, 320102; Sec. 7.96 also issued under D.C. Code 10–137 and D.C. Code 50–2201.07.

■ 2. Amend § 7.91 by adding paragraph (e) to read as follows:

§ 7.91 Whiskeytown Unit, Whiskeytown-Shasta-Trinity National Recreation Area.

* * * * *

(e) *Bicycle Use.* (1) The Superintendent may designate all or a portion of the following trails as open to bicycle use:

(i) Boulder Creek Trail (approximately 3.8 miles).

(ii) Brandy Creek Falls Trail (approximately 1.1 miles between the

trailhead and Rich Gulch Trail intersection).

(iii) Brandy Creek Picnic Trail (approximately 0.3 miles).

(iv) Brandy Creek RV Trail (approximately 0.2 miles).

(v) Brandy Creek Trail (approximately 2.0 miles).

(vi) Buck Hollow Trail (approximately 1.0 miles).

(vii) Camden Water Ditch Trail (approximately 1.1 miles).

(viii) Clear Creek Canal Trail (approximately 5.2 miles).

(ix) Clear Creek Picnic Trail (approximately 0.3 miles).

(x) Clear Creek Vista Trail (approximately 2.5 miles).

(xi) Crystal Creek Falls Trail (approximately 0.5 miles).

(xii) Crystal Creek Trail (approximately 2.3 miles).

(xiii) East Boundary Vista Trail (approximately 1.4 miles).

(xiv) Guardian Rock Equestrian Trail (approximately 1.3 miles).

(xv) Horse Camp Trail (approximately 0.4 miles).

(xvi) Hydraulic Mine Trail (approximately 0.5 miles).

(xvii) James K. Carr Trail (approximately 0.4 miles between the trailhead and Mill Creek Trail intersection).

(xviii) Kanaka Peak Trail (approximately 3.3 miles).

(xix) Knobcone Trail (approximately 0.3 miles).

(xx) Ladybug Lane Trail (approximately 0.3 miles, Whiskeytown Environmental School use only).

(xxi) Logging Camp Trail (approximately 0.9 miles).

(xxii) Martha's Ditch Trail (approximately 2.5 miles, Whiskeytown Environmental School use only).

(xxiii) Mill Creek Trail (approximately 3.9 miles).

(xxiv) Mount Shasta Mine Loop Trail (approximately 5.0 miles).

(xxv) Mule Mountain Loop Trail (approximately 1.2 miles).

(xxvi) Mule Mountain Pass Trail (approximately 1.3 miles).

(xxvii) Oak Bottom Water Ditch Trail (approximately 2.8 miles).

(xxviii) Orofino Trail (approximately 0.3 miles).

(xxix) Papoose Connector Trail (approximately 0.2 miles).

(xxx) Papoose Pass Trail (approximately 5.2 miles).

(xxxi) Peltier Bridge Trail (approximately 0.6 miles).

(xxxii) Peltier Trail (approximately 2.5 miles).

(xxxiii) Princess Ditch Trail (approximately 2.1 miles).

(xxxiv) Prospect Trail (approximately 1.1 miles).

(xxxv) Rich Gulch Trail (approximately 2.4 miles).

(xxxvi) Ridge Trail (approximately 1.8 miles, Whiskeytown Environmental School use only).

(xxxvii) Salt Gulch Trail (approximately 2.0 miles, connecting Peltier Trail to Rich Gulch Trail).

(xxxviii) Shasta Divide Trail (approximately 7.0 miles, connecting the Visitor Center with the NPS and BLM trail system in the area of Mule Mountain).

(xxxix) Tower Grave Trail (approximately 0.2 miles).

(xl) WES Camp Emergency Access Road (approximately 0.6 miles).

(xli) Whiskeytown Lake Trail (approximately 8.0 miles, connecting the Brandy Creek area with Carr Powerhouse area).

(2) The Superintendent may authorize bicycle use on administrative roads within the recreation area pursuant to § 4.30(b) of this chapter.

(3) A map showing trails and administrative roads open to bicycle use will be available at recreation area visitor centers and posted on the recreation area website. The Superintendent will provide notice of all trails and administrative roads designated for bicycle use in accordance with § 1.7 of this chapter.

(4) The Superintendent may limit, restrict, or impose conditions on bicycle use, or close any trail to bicycle use, or terminate such conditions, closures, limits, or restrictions in accordance with § 4.30 of this chapter. A violation of any such condition, closure, limit, or restriction is prohibited.

Shannon Estenoz,

Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 2024–31207 Filed 12–27–24; 8:45 am]

BILLING CODE 4312–52–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2024–0529; FRL–12471–02–R5]

Air Plan Approval; Ohio; Nitrogen Oxide Standards Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve revisions to the Ohio State Implementation Plan (SIP) submitted by the Ohio Environmental Protection

Agency (Ohio EPA) on November 4, 2024. Ohio EPA requested that EPA approve the revised rules for nitrogen oxide standards in the Ohio Administrative Code into Ohio's SIP. The revised rules include non-substantive updates to rule language and updates to referenced material. The revisions will assist with Ohio's efforts to attain and maintain the National Ambient Air Quality Standards for nitrogen dioxide.

DATES: Comments must be received on or before January 29, 2025.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R05-OAR-2024-0529 at <https://www.regulations.gov> or via email to langman.michael@epa.gov. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from the docket. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI), Proprietary Business Information (PBI), or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI, PBI, or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Delaney Kilgour, Air and Radiation Division (AR-18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-1106, kilgour.delaney@epa.gov. The EPA Region 5 office is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays.

SUPPLEMENTARY INFORMATION: In the Final Rules section of this issue of the **Federal Register**, EPA is approving the state's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse

comments. A detailed rationale for the approval is set forth in the direct final rule. If no relevant adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives such comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. For additional information, see the direct final rule which is located in the Rules section of this **Federal Register**.

Dated: December 19, 2024.

Debra Shore,

Regional Administrator, Region 5.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 70

[EPA-R05-OAR-2024-0282; FRL-12468-01-R5]

Air Plan Approval; Ohio; Title V Operating Permit Rules Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve revisions to Ohio EPA's title V rules. These revisions include revisions to the definition of hazardous air pollutants and requirements for a permit statement of basis that are consistent with recent Federal rulemaking actions. Other changes are insignificant and part of the state's statutory five-year review of adopted regulations.

DATES: Comments must be received on or before January 29, 2025.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R05-OAR-2024-0282 at <https://www.regulations.gov> or via email to damico.genevieve@epa.gov. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from the docket. EPA may publish any comment received to its public docket.

Do not submit electronically any information you consider to be Confidential Business Information (CBI), Proprietary Business Information (PBI), or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI, PBI, or multimedia submissions, and general guidance on making effective comments, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

FOR FURTHER INFORMATION CONTACT: Sam Portanova, Air Permits Section, Air and Radiation Division (AR-18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886-3189, portanova.sam@epa.gov. The EPA Region 5 office is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays.

SUPPLEMENTARY INFORMATION: In the Final Rules section of this **Federal Register**, EPA is approving the state's submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no relevant adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives such comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment. For additional information, see the direct final rule which is located in the Rules section of this **Federal Register**.

Dated: December 19, 2024.

Debra Shore,

Regional Administrator, Region 5.

50 CFR Part 300

[241220–0333]

RIN 0648–BN29

International Fisheries; Pacific Tuna Fisheries; 2025–2026 Commercial Fishing Restrictions for Pacific Bluefin Tuna in the Eastern Pacific Ocean

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; notice of availability of a draft environmental assessment; request for comments.

SUMMARY: NMFS is proposing regulations under the Tuna Conventions Act of 1950, as amended (TCA), to implement Inter-American Tropical Tuna Commission (IATTC) Resolution C–24–02 (Measures for the Conservation and Management of Bluefin Tuna in the Eastern Pacific Ocean) adopted by the IATTC in September 2024. This proposed rule would implement annual and trip limits on United States commercial catch of Pacific bluefin tuna (*Thunnus orientalis*) (PBF) in the eastern Pacific Ocean (EPO) for 2025–2026. This action is necessary to conserve PBF and for the United States to satisfy its obligations as a member of the IATTC. In accordance with the National Environmental Policy Act (NEPA), NMFS also announces the availability of a draft environmental assessment (EA) that analyzes the potential effects of the associated proposed rule.

DATES: Comments on the proposed rule, draft environmental assessment, and supporting documents must be submitted in writing by January 29, 2025.

ADDRESSES: A plain language summary of this proposed rule is available at <https://www.regulations.gov/docket/NOAA-NMFS-2024-0146>.

You may submit comments on this document, identified by NOAA–NMFS–2024–0146 or the draft environmental assessment by:

- **Electronic Submission:** Submit all electronic public comments via the

Federal e-Rulemaking Portal. Go to <https://www.regulations.gov> and enter “NOAA–NMFS–2024–0146” in the Search box. Click on the “Comment” icon, complete the required fields, and enter or attach your comments.

Comments must be submitted electronically to ensure they are received, documented, and considered by NMFS. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous). Please specify whether the comments provided are associated with the proposed rule, draft environmental assessment, or other supporting documents.

Copies of the draft Regulatory Impact Review (RIR) and other supporting documents are available via the Federal eRulemaking Portal: <http://www.regulations.gov>, docket NOAA–NMFS–2024–0146 or contact Highly Migratory Species Branch, Amanda Munro, NMFS, Amanda.Munro@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Amanda Munro, NMFS, (619) 407–9284, Amanda.Munro@noaa.gov.

SUPPLEMENTARY INFORMATION:

Background on the IATTC

The United States is a member of the IATTC, which was established in 1949 and operates under the Convention for the Strengthening of the Inter-American Tropical Tuna Commission Established by the 1949 Convention between the United States of America and the Republic of Costa Rica (Antigua Convention).

The IATTC consists of 21 member nations and 5 cooperating non-member nations. The IATTC facilitates scientific research into, as well as the conservation and management of, tuna and tuna-like species in the IATTC Convention Area. The IATTC Convention Area is defined as waters of the EPO within the area bounded by the west coast of the Americas and by 50° N latitude, 150° W longitude, and 50° S latitude. The IATTC maintains a scientific research and fishery

monitoring program and regularly assesses the status of tuna, shark, and billfish stocks in the EPO to determine appropriate catch limits and other measures to promote sustainable fisheries and prevent overexploitation.

The text of the Antigua Convention can be found here: https://www.iattc.org/PDFFiles/IATTC-Instruments/English/IATTC_Antigua_Convention%20Jun%202003.pdf.

International Obligations of the United States Under the Convention

As a Party to the Antigua Convention and a member of the IATTC, the United States is legally bound to implement decisions of the IATTC. The TCA, 16 U.S.C. 951 *et seq.*, directs the Secretary of Commerce, in consultation with the Secretary of State and, with respect to enforcement measures, the U.S. Coast Guard, to promulgate such regulations as may be necessary to carry out the United States’ obligations under the Antigua Convention, including recommendations and decisions adopted by the IATTC. The authority of the Secretary of Commerce to promulgate such regulations has been delegated to NMFS. All resolutions adopted by the IATTC can be found online: <http://iattc.org/ResolutionsActiveENG.htm>.

Pacific Bluefin Tuna Stock Status

In 2011, NMFS determined overfishing was occurring on PBF (76 FR 28422, May 17, 2011), which is considered a single Pacific-wide stock. In 2013, based on the results of a stock assessment conducted by the International Scientific Committee for Tuna and Tuna-like Species in the North Pacific Ocean (ISC), NMFS determined that PBF was not only subject to overfishing, but was also overfished (78 FR 41033, July 9, 2013). Subsequently, based on the results of the 2014, 2016, 2018, and 2020 ISC stock assessments, NMFS determined that PBF continued to be overfished and subject to overfishing (See 80 FR 12621, March 10, 2015; 82 FR 18434, April 19, 2017; 84 FR 19905, May 7, 2019; 86 FR 9910, Feb. 17, 2021).

Since 2016, the IATTC and the Northern Committee (NC) to the Western and Central Pacific Fisheries Commission (WCPFC) have held annual joint working group meetings intended to develop a Pacific-wide approach to management of PBF. Joint IATTC–WCPFC NC Working Group (JWG) recommendations have included establishing rebuilding targets and criteria that must be met before considering catch limit increases. Conservation measures adopted by the

IATTC and WCPFC have considered the recommendations of the JWG.

At its sixth meeting in 2021, the JWG considered the most recent ISC stock assessment and noted that the initial rebuilding target may have been met early. The JWG recommended the IATTC and WCPFC increase catch limits consistent with the rebuilding plan previously agreed to by the IATTC and WCPFC. Subsequently, the IATTC adopted Resolution C-21-05, which established catch limits consistent with the JWG recommendation. NMFS implemented Resolution C-21-05 through a rulemaking which established catch and trip limits for 2022–2024 (87 FR 47939, August 5, 2022). In 2022, NMFS determined that the stock was still overfished but no longer experiencing overfishing.

In 2024, the ISC stock assessment for PBF determined that the stock had likely met the second rebuilding target 12 years ahead of schedule. NMFS subsequently determined that the stock was no longer overfished. The ISC projected that further catch increases were possible while maintaining the continued growth of the stock.

At its ninth meeting held July 10–14, 2024, the JWG considered the ISC projection scenarios and recommended increasing harvest of PBF. The ISC is currently undertaking a management strategy evaluation (MSE) for PBF to be completed in 2025. The JWG's recommended catch increases are based on an ISC projection scenario that is expected to ensure a greater than 50 percent probability of not overfishing relative to all of the candidate reference points being evaluated in that MSE. The recommended catch increases also result in an increased fishery impact ratio on the stock for the EPO compared to the fishery impact for the western and central Pacific Ocean (WCPO), increasing the EPO fishery's current impact of 17 percent to 21 percent by 2034.

IATTC Pacific Bluefin Tuna Resolutions

The IATTC has adopted PBF catch limits in the Convention Area since 2012. For more information about previous management measures, see the final rules implementing Resolution C-14-06 (80 FR 38986, July 8, 2015), Resolution C-16-08 (82 FR 18704, April 21, 2017), Resolutions C-18-01 and C-18-02 (84 FR 18409, May 1, 2019), Resolution C-20-02 (86 FR 16303, March 29, 2021), and Resolution C-21-05 (87 FR 47939, August 05, 2022).

On August 5, 2022, NMFS published a final rule (87 FR 47939) implementing IATTC Resolution C-21-05 (Measures

for the Conservation and Management of Pacific Bluefin Tuna in the Eastern Pacific Ocean). That rule established an initial combined catch limit for 2023–2024 of 1,017 metric tons (mt). It also implemented an initial trip limit of 30 mt, intermediate trip limits of 20 mt and 10 mt, and a low trip limit of 3 mt. These trip limits were designed to adjust seasonally throughout the year as total catch approached the annual limit. However, U.S. vessels did not utilize enough of the annual catch limit to trigger reduced trip limits in 2023 or 2024.

At its 102nd Meeting in September 2024, the IATTC adopted Resolution C-24-02, which establishes catch limits consistent with the 2024 JWG recommendation and determines how the EPO increase will be divided between the United States and Mexico. The Resolution contains catch increases for both Mexico and the United States and adds a footnote allowing up to 10 mt to be caught by members not named in the Resolution, recognizing that other fleets in the EPO have reported small catches of bluefin due to the increased stock abundance. The 2025–2026 biennial catch limit for the United States established in C-24-02 is 1,822 mt, not to exceed 1,285 mt in any one year.

As in previous resolutions, an IATTC member may add to the new catch limit any under-harvest from the previous catch limit in an amount not to exceed 5 percent of the last biennial catch limit. In this case, the United States may add up to 5 percent of 1,017 mt (*i.e.*, 50.85 mt) from 2023–2024 to the 2025–2026 biennial catch limit. From the California Department of Fish and Wildlife reports, NMFS estimates that U.S. commercial vessels will catch less than 335 mt in 2023–2024. Therefore, NMFS projects that the 2025–2026 biennial catch limit will be approximately 1,873 mt. This number will be finalized before publication of the final rule.

Pacific Fishery Management Council Recommendations for the Implementation of Resolution C-24-02

At its November 2024 meeting, the Pacific Fishery Management Council (PFMC) considered advisory body reports and recommended a trip limit scheme similar to the ones implemented for 2021 and 2022–2024, but with higher initial, intermediate, and low trip limits. The annual catch and trip limits proposed in this rule are consistent with the PFMC's recommendation and are described in the next section.

Proposed Regulations for Pacific Bluefin Tuna for 2025–2026

Consistent with recommendations from the PFMC and its advisory bodies at the November 2024 meeting, this proposed rule would establish trip limits for 2025 and 2026 while maintaining an adaptive management approach. The intent behind these trip limits is to encourage U.S. vessel owners and operators to fully utilize the U.S. catch limit while allowing ample opportunity for multiple gear types. Trip limits would adjust seasonally, with the intent to ensure a portion of the annual catch limit remains available to smaller-volume gear types throughout the year. The proposed annual catch and trip limits are described in detail below.

Proposed PBF Management Regime for 2025–2026

The proposed annual catch limit for 2025 is 1,285 mt. The proposed annual catch limit for 2026 is the total cumulative catch in 2025 subtracted from the biennial limit, not to exceed 1,285 mt. The proposed initial trip limit for both 2025 and 2026 is 60 mt and would adjust as follows:

January–June:

- The trip limit decreases to 40 mt if the total catch is within 400 mt of the annual limit.

- The trip limit decreases to 5 mt if the total catch is within 225 mt of the annual limit.

July–September:

- The trip limit decreases to 40 mt if the catch is within 300 mt of the annual limit.

- The trip limit decreases to 5 mt if the total catch is within 175 mt of the annual limit.

October–December:

- The trip limit decreases to 40 mt if the catch is within 200 mt of the annual limit.

- The trip limit decreases to 5 mt if the total catch is within 125 mt of the annual limit.

Under the terms of this proposed rule, NMFS would announce the 2026 annual limit in a notice published in the **Federal Register** in January or early February 2026. This notice would also be posted on the NMFS website: <https://www.fisheries.noaa.gov/west-coast/sustainable-fisheries/pacific-bluefin-tuna-commercial-harvest-status>.

The catch and trip limits proposed in this rulemaking represent approximately an 80 percent increase over the current (*i.e.*, 2022–2024) management regime (87 FR 47939, August 5, 2022). This is based on a recent stock assessment and subsequent

status determinations which found the PBF stock in the eastern Pacific Ocean is no longer overfished nor subject to overfishing.

Landing Receipt Submission Deadlines

Under California law and regulations, electronic landing receipts (*i.e.*, e-tickets) are required for landings in California and are required to be submitted to the California Department of Fish and Wildlife (DFW) within 3 business days (*see* California Fish and Game Code section 8046 and 14 California Code of Regulations § 197). Under current Federal regulations (*see* 50 CFR 300.25(g)(9)), if landing PBF in California, fish landing receipts must be submitted within 24 hours to DFW. This proposed rule would maintain that requirement.

In-Season Action Announcements

Under this proposed rulemaking, NMFS would use available fishery information (*i.e.*, landing receipts) to estimate when the overall catch is expected to reach thresholds at which the agency would reduce the trip limit. NMFS would then make decisions on in-season actions to reduce the trip limit or close the fishery based on those estimates.

Under current Federal regulations (*see* 50 CFR 300.25(g)(8)), if an in-season action taken under paragraphs is based on overestimate of actual catch, NMFS will reverse that action in the timeliest possible manner, provided NMFS finds that reversing that action is consistent with the management objectives for the affected species. This proposed rule would maintain that requirement.

Under current Federal regulations (*see* 50 CFR 300.25(g)(7)), NMFS posts a notice on the NMFS website announcing in-season actions to reduce trip limits or close the fishery (<https://www.fisheries.noaa.gov/west-coast/sustainable-fisheries/pacific-bluefin-tuna-commercial-harvest-status>). In-season actions to reduce trip limits or close the fishery are also announced by email to vessel owners and published in the **Federal Register** as soon as practicable. In-season actions are effective upon the earlier of either receipt by email of such notice or publication in the **Federal Register**. This proposed rule would maintain these announcement procedures.

In 2025–2026, if NMFS determines that cumulative catch is expected to meet any of the thresholds described previously (based on landing receipts or other available information), an intermediate or lower trip limit would be imposed by NMFS using the in-season action procedures described

previously. Upon the effective date of an in-season action to change trip limits, targeting, retaining on board, transshipping, or landing PBF in the Convention Area in violation of the in-season action would be prohibited, with the exception that any PBF already on board a fishing vessel on the effective date of the notification of in-season action may be retained on board and landed or transshipped within 24 hours after the effective date of the notice. If NMFS determines in 2025 or 2026 that the annual catch limits are expected to be reached, NMFS would close the fishery effective upon the date provided in the notification. The exception allowing any PBF already on board a fishing vessel on the effective date of the notice to be retained, landed, or transshipped would apply, provided they are landed or transshipped within 14 days after the closure date.

Catch Reporting

Under this proposed rulemaking, NMFS would continue to provide updates on PBF catches in the Convention Area to the public via the NMFS website: <https://www.fisheries.noaa.gov/west-coast/sustainable-fisheries/pacific-bluefin-tuna-commercial-harvest-status>. NMFS would update the website as long as the updates do not disclose confidential information. These updates are intended to help participants in the U.S. commercial fishery plan for reduced trip limits and attainment of annual limits.

Classification

Tuna Conventions Act

The NMFS Assistant Administrator has determined that this proposed rule is consistent with the Tuna Conventions Act and other applicable laws, subject to further consideration after public comment.

National Environmental Policy Act

NMFS addressed NEPA requirements through preparation of an EA that describes the impact on the human environment that would result from implementation of this action. Based on the EA, Regulatory Impact Review, and review of criteria for significance (*see* 40 CFR 1501.3(b)) and section 7(C) of NOAA's Policies and Procedures for Compliance with National Environmental Policy Act and Related Authorities (Companion Manual for NOAA Administrative Order 216–6A)), no significant effect on the quality of the human environment is anticipated as a result of any of the action alternatives contained in the draft EA. A copy of the draft EA is available from NMFS (*see*

ADDRESSES). This action also announces a public comment period on the draft EA.

Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 605(b) (RFA), the Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration (SBA) that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The rationale for this certification follows.

The SBA defines a “small business” (or “small entity”) as one with annual revenue that meets or is below an established size standard. On December 29, 2015, NMFS issued a final rule establishing a small business size standard of \$11 million in annual gross receipts for all businesses primarily engaged in the commercial fishing industry (NAICS 11411) for RFA compliance purposes only (80 FR 81194). The \$11 million standard became effective on July 1, 2016, and is to be used in place of the U.S. SBA current standards of \$20.5 million, \$5.5 million, and \$7.5 million for the finfish (NAICS 114111), shellfish (NAICS 114112), and other marine fishing (NAICS 114119) sectors of the U.S. commercial fishing industry in all NMFS rules subject to the RFA after July 1, 2016. *Id.* at 81194.

The proposed action is intended to provide increased fishing opportunity to U.S. fishermen now that the PBF stock is rebuilt, while ensuring that catches remain within the annual and biennial limits. The entities the proposed action would directly affect are U.S. commercial fishing vessels that catch and retain PBF in the IATTC Convention Area (*e.g.*, coastal purse seine vessels and drift gillnet vessels). U.S. commercial catch of PBF from the IATTC Convention Area is primarily made in waters off of California by the coastal pelagic purse seine fleet, which targets PBF opportunistically, and the surface hook-and-line fleet. Other fleets (*e.g.*, California large-mesh drift gillnet and North Pacific albacore troll) catch PBF incidentally or in small quantities.

U.S. Coastal Purse Seine Fleet

Coastal purse seiners fish relatively close to shore off of California within the U.S. exclusive economic zone. They primarily target small coastal pelagic species such as Pacific mackerel, Pacific sardine, anchovy, and market squid. These vessels opportunistically target PBF when they enter the coastal waters of the Southern California Bight from

May to October. The fleet will also opportunistically target tropical tunas (yellowfin and skipjack) when intrusions of warm water from the south bring these species within range of the fleet.

Since 2006, the average annual revenue per vessel from all finfish

fishing activities for the U.S. purse seine fleet that have landed PBF has been far less than \$11 million. From 2019–2023, coastal purse seine vessels that caught highly migratory species (HMS) had ex-vessel revenues ranging from less than \$20 to \$512,956 per vessel per year

(based on all species landed). Therefore, all of the vessels in this fleet are considered small businesses. Over the past 5 years, PBF has accounted for 17 percent of the total revenues of the coastal purse seine fleet.

TABLE 1—EX-VESSEL REVENUE OF COASTAL PURSE SEINE VESSELS THAT MADE LANDINGS OF HIGHLY MIGRATORY SPECIES (HMS), BY YEAR: MINIMUM, MAXIMUM, AND MEAN
[Data from PacFIN]

	2019	2020	2021	2022	2023
Num. Vessels	11	12	<5	10	8
Min	\$23	\$7,271	<\$7,000	\$9	\$5,848
Max	\$135,549	\$512,956	<\$55,000	\$183,012	\$76,154
Mean	\$57,563	\$170,507	\$24,055	\$77,626	\$25,095

Prior to the implementation of a 25 mt trip limit in 2015, coastal purse seine vessels landed an average of 41 mt per trip, and were capable of landing over 70 mt in a single trip. For the years 2022–2024, NMFS implemented a 30 mt trip limit. U.S. purse seine vessels did not utilize enough of the annual catch limit to trigger reduced trip limits in any year between 2022 and 2024. This may be because the 30 mt trip limits imposed were too restrictive for the purse seine fleet with growing schools of PBF. Because the annual and trip limits in 2025–2026 are higher than in recent years (trip limits starting at 60 mt), the proposed action is expected to provide more opportunity to the purse seine fleet when compared to the management of commercial PBF from 2015–2024. Buffer points that reduce trip limits throughout the year are intended to avoid overutilization and ensure that

fleets other than purse seine can continue to fish throughout the year.

Catch and trip limits would be higher than the past 5 years of management for this stock, so the proposed rule is expected to provide increased revenue opportunity for this fleet. Purse seine vessels are also able to switch to other species if PBF trip limits decrease or the annual limit approaches. PBF has not been the primary revenue source of this fleet in recent years, and the proposed rule would not affect opportunities to fish other species. NMFS does not expect revenues, costs, or corresponding profitability of coastal purse seine vessels to be significantly altered as a result of this proposed rule.

Surface Hook-and-Line

The surface hook-and-line fishery mainly operates off the coast of California, although some landings

occur in Oregon and Washington. The number of surface hook-and-line vessels in the U.S. fleet has ranged from 79–188 in the past 5 years with a mean of 160 total vessels. As the PBF stock has recovered, the hook-and-line fishery has also grown. In 2019, 13 percent of total PBF landings came from the hook-and-line fleet. Hook-and-line PBF landings have since grown to 88 percent of total landings in 2023. Metric tons of PBF caught by this fleet have also steadily increased over the past 5 years, from 36.07 mt in 2019 to 162.63 mt in 2023. However, the catch of PBF per trip in this fleet is relatively small. On average, vessels in this fleet catch only 0.15 mt of PBF per trip.

Ex-vessel revenue of the surface hook-and-line fleet has ranged from less than \$20 to \$217,660. Therefore, all of the vessels in this fleet are considered small businesses.

TABLE 2—EX-VESSEL REVENUE OF SURFACE HOOK-AND-LINE VESSELS THAT MADE HMS LANDINGS, BY YEAR: MINIMUM, MAXIMUM, AND MEAN
[Data from PacFIN]

	2019	2020	2021	2022	2023
Num. Vessels	79	111	145	188	178
Min	\$48	\$90	\$78	\$9	\$96
Max	\$55,264	\$114,851	\$123,740	\$139,529	\$217,660
Mean	\$5,106	\$8,215	\$8,915	\$9,487	\$11,505

The catch limits proposed in this rule are higher than the past 5 years of management for this stock, which would provide increased revenue opportunity for this fleet. PBF makes up the majority of this fleet's revenue, but due to the low volume of PBF landings per trip these vessels would not be subjected to reduced trip limits. The trip limit of 5 mt would allow the surface hook-and-line fleet to continue to catch this valuable stock throughout the year,

even in a scenario of increased purse seine effort. This proposed rule is expected to increase fishing opportunities for the surface hook-and-line vessels. NMFS does not expect revenues, costs, or corresponding profitability of surface hook-and-line vessels to be significantly altered as a result of this proposed rule.

Other U.S. Fleets That Catch PBF

Other gears known to land PBF include large-mesh drift gillnet, North Pacific albacore troll, and non-HMS fisheries. Since 2006, the average annual ex-vessel revenue for all U.S. vessels that landed PBF in small quantities has been less than \$11 million. All of these vessels are considered small businesses.

The number of vessels from these fisheries that have landed PBF have

ranged from 14–39 over the past 5 years, with an average of 23 per year. The metric tons of PBF landed by these gears have ranged from 11.38 to 57.15 mt per year, with a mean of 27.34 mt. Revenue from PBF landings by these fleets makes up a small percentage of their total revenue.

The majority of these landings came from the large-mesh drift gillnet fishery (DGN), which targets swordfish and thresher shark and also retains other marketable species. The number of vessels in this fishery has steadily decreased over the past 5 years. The Driftnet Modernization and Bycatch Reduction Act enacted in 2022 will

sunset the use of large-mesh drift gillnets after 5 years, which will be December 2027. Landings of PBF from the DGN fleet have ranged from 9.57 mt to 54.74 mt in the past 5 years. DGN gear has never landed PBF in quantities greater than 5 mt in a single trip, so they are not likely to be impacted by any of the proposed trip limits.

TABLE 3—EX-VESSEL REVENUE OF DRIFT GILLNET VESSELS, BY YEAR: MINIMUM, MAXIMUM, AND MEAN
[Data from PacFIN]

	2019	2020	2021	2022	2023
Num. Vessels	15	12	7	7	5
Min	\$617	\$7,959	\$224	\$10,226	\$12,302
Max	\$59,127	\$83,447	\$233,929	\$136,880	\$157,287
Mean	\$26,842	\$32,117	\$77,787	\$64,052	\$97,690

The proposed rule would establish a trip limit of 5 mt to reduce the possibility of regulatory discards in these fleets as total catch approaches the annual limit. NMFS does not expect revenues, costs, or corresponding profitability of drift gillnet vessels to be significantly altered as a result of this proposed rule.

Overall Expected Economic Impacts of Proposed Regulations and Certification

Pursuant to the RFA and NMFS’ December 29, 2015, final rule (80 FR 81194), this certification was developed using NMFS’ revised size standards. NMFS considers all entities subject to this action to be small entities as defined by both the former size standards and the revised size standards. The proposed action would likely result in increased fishing opportunities relative to previous years, and would not cause significant negative economic impacts to the affected fishing fleets. Any impact to the income of U.S. vessels is expected to be minor. Because each affected vessel is a small business, there are no disproportionate economic impacts on small entities relative to large entities.

In summary, the proposed action, if adopted, is not expected to have a significant adverse economic impact on the profitability of a substantial number of small entities, or a disproportionate economic effect on small entities relative to large entities. Given these conclusions, an Initial Regulatory Flexibility Analysis is not required and none has been prepared.

Paperwork Reduction Act

This proposed rule does not contain a change to a collection of information requirement for purposes of the Paperwork Reduction Act of 1995 (PRA). The existing collection of

information requirements would continue to apply under the following OMB Control Number(s): 0648–0778, Reporting and Notification Requirements in West Coast PBF Fishery.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

Executive Order 12866

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

Executive Order 13175

NMFS has determined that this action would not have a substantial direct effect on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes; therefore, consultation with Tribal officials under Executive Order 13175 is not required, and the requirements of sections (5)(b) and (5)(c) of Executive Order 13175 also do not apply. A Tribal summary impact statement under section (5)(b)(2)(B) and section (5)(c)(2)(B) of Executive Order is not required and has not been prepared.

List of Subjects in 50 CFR Part 300

Administrative practice and procedure, Fish, Fisheries, Fishing, Marine resources, Reporting and recordkeeping requirements, Treaties.

Dated: December 20, 2024.

Samuel D. Rauch III,
Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS proposes to amend 50 CFR part 300 as follows:

PART 300—INTERNATIONAL FISHERIES REGULATIONS

■ 1. The authority citation for part 300, subpart C, continues to read as follows:

Authority: 16 U.S.C. 951 *et seq.*

■ 2. In § 300.24, revise paragraph (u) to read as follows:

§ 300.24 Prohibitions.

* * * * *

(u) Use a United States commercial fishing vessel in the Convention Area to target, retain on board, transship, or land Pacific bluefin tuna in contravention of § 300.25(g).

* * * * *

■ 3. In § 300.25, revise paragraph (g) to read as follows:

§ 300.25 Fisheries management.

* * * * *

(g) *Pacific bluefin tuna (Thunnus orientalis) commercial catch limits, reporting requirements, and in-season action procedures—(1) Biennial catch limit for 2025–2026.* The biennial catch limit for 2025–2026 is 1,822 metric tons, plus up to 5 percent of under-harvest from the 2023–2024 biennial catch limit.

(2) *Annual catch and trip limits for 2025.* For the calendar year 2025, all commercial fishing vessels of the United States combined may capture, retain, transship, or land no more than 1,285 metric tons. A 60 mt trip limit will be in effect until the following criteria are met:

If the time of year is . . .	And NMFS anticipates cumulative catch will be . . .	Then the trip limit will be . . .
(i) January through June	885 mt	40 mt.
	1,060 mt	5 mt.
(ii) July through September	985 mt	40 mt.
	1,110 mt	5 mt.
(iii) October through December	1,085 mt	40 mt.
	1,160 mt	5 mt.

(3) *Annual catch and trip limits for 2026.* For the calendar year 2026, all commercial fishing vessels of the United States combined may capture, retain,

transship, or land no more than the amount caught in 2025 subtracted from the biennial limit, not to exceed 1,285 metric tons.

(i) If the 2026 catch limit is more than 200 metric tons, a 60-metric ton trip limit will be in effect until the following criteria are met:

If the time of year is . . .	And NMFS anticipates cumulative catch will be within . . .	Then the trip limit will be . . .
(A) January through June	400 mt of the annual limit	40 mt.
	225 mt of the annual limit	5 mt.
(B) July through September	300 mt of the annual limit	40 mt.
	175 mt of the annual limit	5 mt.
(C) October through December	200 mt of the annual limit	40 mt.
	125 mt of the annual limit	5 mt.

(ii) If the 2026 catch limit is 200 metric tons or less, the trip limit will be 5 metric tons for the entire calendar year.

(4) *In-season actions for trip limits and closure of the fishery.* If NMFS determines that action to change a trip limit needs to be taken under paragraph (g)(2) or (3) of this section, the revised trip limit will be effective upon the date provided in a notification of in-season action in accordance with paragraph (g)(5) of this section. Upon the effective date of an in-season action to change trip limits under paragraph (g)(2) or (3), targeting, retaining on board, transshipping, or landing Pacific bluefin tuna in the Convention Area in violation of the in-season action shall be prohibited, with the exception that any Pacific bluefin tuna already on board a fishing vessel on the effective date of the notification of in-season action may be retained on board and landed or transshipped within 24 hours after the effective date of the notice, to the extent authorized by applicable laws and regulations. After NMFS determines that the annual catch limits under paragraph

(g)(2) or (3) of this section are expected to be reached, NMFS will close the fishery effective upon the date provided in the notification in accordance with paragraph (g)(5) of this section. Upon the effective date in the notification, targeting, retaining on board, transshipping, or landing Pacific bluefin tuna in the Convention Area shall be prohibited through the end of the calendar year, with the exception that any Pacific bluefin tuna already on board a fishing vessel on the effective date of the notice may be retained on board and landed or transshipped within 14 days after the effective date published in the fishing closure notification, to the extent authorized by applicable laws and regulations.

(5) *Announcement and effective dates of in-season actions.* If in-season actions under paragraphs (g)(2) through (4) of this section are needed, NMFS will post a notice on the NMFS web page announcing the in-season action, including effective dates. NMFS will also send emails with notice of the in-season action to affected vessel owners. This action will also be published in the

Federal Register as soon as practicable. The in-season action will be effective upon whichever is earlier: receipt by email of such notice or publication in the **Federal Register**.

(6) *Reversal of in-season actions.* If an in-season action taken under paragraphs (g)(2) through (5) of this section is based on overestimate of actual catch, NMFS will reverse that action in the timeliest possible manner, provided NMFS finds that reversing that action is consistent with the management objectives for the affected species. The fishery will be subject to the change in trip limit or reopened effective on the date provided in the notice in accordance with paragraph (g)(5) of this section.

(7) *State of California fish landing receipts.* If landing Pacific bluefin tuna into the State of California, fish landing receipts must be submitted within 24 hours to the California Department of Fish and Wildlife in accordance with the requirements of applicable State regulations.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Adoption of Recommendations

AGENCY: Administrative Conference of the United States.

ACTION: Notice.

SUMMARY: The Assembly of the Administrative Conference of the United States adopted three recommendations at its hybrid (virtual and in-person) Eighty-second Plenary Session: Using Algorithmic Tools in Regulatory Enforcement, Public Engagement in Agency Rulemaking Under the Good Cause Exemption, and Nonlawyer Assistance and Representation in Agency Adjudications.

FOR FURTHER INFORMATION CONTACT: For Recommendation 2024–5, Kazia Nowacki; Recommendation 2024–6, Benjamin Birkhill; and Recommendation 2024–7, Lea Robbins. For each of these recommendations the address and telephone number are: Administrative Conference of the United States, Suite 706 South, 1120 20th Street NW, Washington, DC 20036; Telephone 202–480–2080.

SUPPLEMENTARY INFORMATION: The Administrative Conference Act, 5 U.S.C. 591–596, established the Administrative Conference of the United States. The Conference studies the efficiency, adequacy, and fairness of the administrative procedures used by Federal agencies and makes recommendations to agencies, the President, Congress, and the Judicial Conference of the United States for procedural improvements (5 U.S.C. 594(1)). For further information about the Conference and its activities, see www.acus.gov.

The Assembly of the Conference met during its Eighty-second Plenary Session on December 12, 2024, to consider three proposed recommendations and conduct other

business. All three recommendations were adopted.

Recommendation 2024–5, *Using Algorithmic Tools in Regulatory Enforcement*. This recommendation provides best practices for using artificial intelligence, predictive analytics, and other algorithmic tools to support agencies' regulatory enforcement efforts. It addresses the potential benefits and risks of using algorithmic tools to detect, investigate, and prosecute noncompliance with the law and identifies policies, practices, and organizational structures that agencies can put in place to ensure they enforce the law fairly, accurately, and efficiently.

Recommendation 2024–6, *Public Engagement in Agency Rulemaking Under the Good Cause Exemption*. This recommendation provides best practices for public engagement when agencies find good cause to forgo notice-and-comment rulemaking procedures under the Administrative Procedure Act. It encourages agencies to use direct final rulemaking, interim final rulemaking, and alternative methods of public engagement to ensure robust public participation even when they rely properly on the good cause exemption.

Recommendation 2024–7, *Nonlawyer Assistance and Representation in Agency Adjudications*. This recommendation provides best practices for agencies to increase the availability of nonlawyer representation and assistance to participants in their adjudicative systems. It provides guidance on the establishment of rules authorizing qualification or, as appropriate, accreditation of nonlawyer representatives; ways to make such processes accessible and transparent; and strategies for coordinating with other government agencies and nongovernmental organizations to increase the availability of representation and assistance.

The Conference based its recommendations on research reports and prior history that are posted at: <https://www.acus.gov/event/82nd-plenary-session>.

Authority: 5 U.S.C. 595.

Dated: December 23, 2024.

Shawne C. McGibbon,
General Counsel.

Appendix—Recommendations of the Administrative Conference of the United States

Administrative Conference Recommendation 2024–5

Using Algorithmic Tools in Regulatory Enforcement

Adopted December 12, 2024

The use of artificial intelligence (AI) and other algorithmic tools is changing how government agencies do their work. As the Administrative Conference has recognized, these tools “hold out the promise of lowering the cost of completing government tasks and improving the quality, consistency, and predictability of agencies’ decisions.” At the same time, these tools “raise concerns about the full or partial displacement of human decision making and discretion.”¹ The Conference adopted Statement #20, *Agency Use of Artificial Intelligence*, in 2020 to help agencies consider when and how to use algorithmic tools appropriately.² More recently, it adopted specific recommendations addressing the use of algorithmic tools to review regulations,³ manage public comments,⁴ and provide guidance to the public.⁵

In this Recommendation, the Conference turns to the use of algorithmic tools in regulatory enforcement. An algorithmic tool is a computer-based process that “uses a series of rules or inferences drawn from data to transform specified inputs into outputs to make decisions or support decision making.”⁶ Many agencies engage in regulatory enforcement—that is, detecting, investigating, and prosecuting potential violations of the laws they administer. These agencies are often “faced with assuring the compliance of an increasing number of entities and products without a corresponding growth in agency resources.”⁷

⁴ Admin. Conf. of the U.S., Recommendation 2021–1, *Managing Mass, Computer-Generated, and Falsely Attributed Comments*, 86 FR 36,075 (July 8, 2021).

⁵ Admin. Conf. of the U.S., Recommendation 2022–3, *Automated Legal Guidance at Federal Agencies*, 87 FR 39,798 (July 5, 2022).

⁶ Recommendation 2023–3, *supra* note 3. For purposes of this Recommendation, “algorithmic tools” includes AI technologies but not basic scientific or computing tools.

⁷ See Admin. Conf. of the U.S., Recommendation 2012–7, *Agency Use of Third-Party Programs to*

As agencies seek ways to make regulatory compliance “more effective and less costly,”⁸ many are considering how they can use algorithmic tools to perform regulatory enforcement tasks such as monitoring compliance; detecting potential noncompliance; identifying potential subjects for investigation, inspection, or audit; and gathering evidence to determine whether corrective action against a regulated person is warranted. Indeed, a report to the Conference analyzing the use of AI in federal administrative agencies found that “AI has made some of its most substantial inroads in the context of agency enforcement activities.”⁹

The use of algorithmic tools in regulatory enforcement presents special opportunities for agencies. When used appropriately, such tools may enable agencies to perform enforcement tasks even more efficiently, accurately, and consistently. Algorithmic tools may be particularly useful in performing many of the most time- and resource-intensive tasks associated with regulatory enforcement, such as synthesizing voluminous records, determining patterns in complex filings, and identifying activities that might require additional review by a human being.

At the same time, significant challenges and concerns arise in agencies’ use of algorithmic tools in regulatory enforcement.¹⁰ The Conference has previously identified possible risks associated with agencies’ use of algorithmic tools, including insufficient transparency, internal and external oversight, and explainability;¹¹ the potential to unintentionally create or exacerbate “harmful biases” by encoding and deploying them at scale;¹² and the possibility that agency personnel will devolve too much decisional authority to AI systems.¹³ Such risks are

heightened when, as in the regulatory enforcement context, agencies use algorithmic tools to make decisions or take actions that affect a person’s rights, civil liberties, privacy, safety, equal opportunities, or access to government resources or services.¹⁴

Since the Conference issued Statement #20, Congress enacted the AI in Government Act, which directs the Director of the Office of Management and Budget (OMB) to provide agencies with guidance on removing barriers to agency AI use “while protecting civil liberties, civil rights, and economic and national security” and on best practices for identifying, assessing, and mitigating harmful bias.¹⁵ Executive Order 13,960, *Promoting the Use of Trustworthy Artificial Intelligence in the Federal Government*, identifies principles for agencies when designing, developing, acquiring, and using AI and directs agencies to inventory their uses of AI and make those inventories publicly available.¹⁶ Executive Order 14,110, *Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence*, requires agencies to designate Chief AI Officers, who have primary responsibility for overseeing their agencies’ AI use and coordinating with other agencies, and establishes the Chief AI Officer Council to coordinate the development and use of AI across agencies.¹⁷ OMB Memorandum M–24–10, *Advancing Governance, Innovation, and Risk Management for Agency Use of Artificial Intelligence*, which implements the AI in Government Act and Executive Order 14,110, provides guidance to agencies on strengthening the effective and appropriate use of AI, advancing innovation, and managing risks, particularly those related to rights-impacting uses of AI.¹⁸ Memorandum M–24–10 further provides risk-management practices for agency uses of AI that affect people’s rights, which are derived from the Office of Science and Technology Policy’s Blueprint for an AI Bill of Rights and the National Institute of Standards and Technology’s AI Risk Management Framework.¹⁹ Those practices include “conducting public consultation; assessing data quality; assessing and mitigating disparate impacts and algorithmic discrimination; providing notice of the use of AI; continuously monitoring and evaluating deployed AI; and granting human consideration and remedies for adverse

decisions made using AI.”²⁰ Additionally, OMB issued Memorandum M–24–18, *Advancing the Responsible Acquisition of Artificial Intelligence in Government*, which “integrat[es] these considerations for AI risk management into agency acquisition planning.”²¹

Consistent with these authorities, this Recommendation provides a framework for using algorithmic tools in regulatory enforcement in ways that promote the efficient, accurate, and consistent administration of the law while also safeguarding rights, civil liberties, privacy, safety, equal opportunities, and access to government resources and services.

RECOMMENDATION

1. When considering possible uses of algorithmic tools to perform regulatory enforcement tasks, agencies should consider whether and to what extent such tools will:

- Promote efficiency, accuracy, and consistency;
- Create or exacerbate unlawful or harmful biases;
- Produce an output that agency decisionmakers can understand and explain;
- Devolve decisional authority to automated systems;
- Adversely affect rights, civil liberties, privacy, safety, equal opportunities, and access to government resources or services;
- Use inappropriately or reveal publicly, directly or indirectly, confidential business information or trade secrets; and
- Affect the public’s perception of the agency and how fairly it administers regulatory programs.

2. When agencies use algorithmic tools to perform regulatory enforcement tasks, they should assess the risks associated with using such tools, including those in Paragraph 1, and put in place oversight mechanisms and data quality assurance practices to mitigate such risks. During a risk assessment process, agencies should consider, among other things, the:

- Ability to customize tools and systems to the agency’s ongoing needs and to specific use cases;
- Tendency of such tools to produce unexpected outcomes that could go beyond their intended uses or have the potential for biased or harmful outcomes;
- Training and testing methodologies used in developing and maintaining such tools;
- Quality assurance practices available for data collection and use, including the dependency of such tools on the completeness and veracity of the underlying data on which they rely; and
- Oversight procedures available to the agency and the public to ensure responsible use of such tools.

3. When agencies use algorithmic tools to perform regulatory enforcement tasks, agencies should ensure that any agency personnel who use such tools or rely on their outputs to make enforcement decisions receive adequate training on the capabilities,

²⁰ Exec. Order No. 14,110, *supra* note 17.

²¹ Off. of Mgmt. & Budget, Exec. Off. of the President, M–24–18, *Advancing the Responsible Acquisition of Artificial Intelligence in Government* (2024), at 1.

risks, and limits of such tools and understand how to appropriately assess their outputs before relying on them.

4. When agencies provide notice to regulated persons of an action taken during an investigation, inspection, audit, or prosecution, they should specify if an algorithmic tool provided a meaningful basis for taking that action, consistent with existing legal requirements.

5. Consistent with legal requirements, agencies should notify the public on their websites of algorithmic tools they meaningfully use to investigate, inspect, audit, or gather evidence to discover non-compliance by regulated entities, along with information about the sources and nature of the data used by such tools.

6. Agencies that meaningfully use or are considering using algorithmic tools in regulatory enforcement should engage with persons interested in or affected by the use of such tools to identify possible benefits and harms associated with their use.

7. Agencies that use algorithmic tools to perform regulatory enforcement tasks should provide effective processes whereby persons can voice concerns or file complaints regarding the use or outcome resulting from the use of such tools so that agencies may respond or take corrective action.

8. The Chief AI Officer Council should facilitate collaboration and the exchange of information among agencies that use or are considering using algorithmic tools in regulatory enforcement.

Administrative Conference Recommendation 2024–6

Public Engagement in Agency Rulemaking Under the Good Cause Exemption

Adopted December 12, 2024

Public participation plays an essential role in agency rulemaking. Agencies facilitate such participation through public engagement activities designed to elicit input from the public, including efforts to enhance public understanding of the rulemaking process and foster meaningful public participation in it. As the Administrative Conference has recognized, “[b]y providing opportunities for public input and dialogue, agencies can obtain more comprehensive information, enhance the legitimacy and accountability of their decisions, and increase public support for their rules.”¹ The Administrative Procedure Act (APA) recognizes the value of public participation in rulemaking by generally requiring agencies to publish a notice of proposed rulemaking in the **Federal Register** and provide interested persons an opportunity to submit written comments on rulemaking proposals.²

However, notice-and-comment procedures can be time-consuming and resource-intensive, and there are circumstances in which the costs of those procedures may outweigh their benefits in terms of public participation. For this reason, the APA permits agencies to forgo notice-and-

comment procedures when, among other reasons, they find for “good cause” that such procedures would be “impracticable, unnecessary, or contrary to the public interest” and they incorporate this finding and “a brief statement of reasons” for it in their rules.³ Notice and comment may be “impracticable” when an agency “finds that due and timely execution of its functions would be impeded by the notice otherwise required [by the APA].”⁴ Notice and comment may be “unnecessary” when a rule is “a routine determination, insignificant in nature and impact, and inconsequential to the industry and to the public”⁵ or when the agency lacks discretion regarding the substance of the rule.⁶ And notice and comment may be “contrary to the public interest” in “the rare circumstance when ordinary procedures—generally presumed to serve the public interest—would in fact harm that interest.”⁷

The Conference has long encouraged robust public participation in agency rulemaking and has identified effective methods for engaging with the public outside of, and to supplement, the notice-and-comment process.⁸ The fact that *notice and comment* is unnecessary, impracticable, or contrary to the public interest does not mean that *no* public engagement is appropriate. Indeed, such engagement may be especially important precisely because standard notice and comment is not occurring. And such engagement can also help agencies determine whether the good cause exemption is applicable.

Of course, the same factors that make a comment period inappropriate may weigh equally against other types of public engagement as well. Neither the agency nor the public is well served by needless or counterproductive efforts to engage the public. Such circumstances are rare, however. The goal of this Recommendation is to identify ways in which agencies can meaningfully and usefully engage the public even when relying on the good cause exemption.

Agencies engage with the public in a variety of ways when invoking the good cause exemption. The two primary rulemaking mechanisms are usually referred to as direct final rulemaking and interim final rulemaking.⁹ When notice and comment is unnecessary, agencies sometimes use direct final rulemaking, in which the agency

simultaneously publishes a final rule and solicits comments on it, with the rule going into effect only if no significant adverse comments are received. When notice and comment is impracticable or contrary to the public interest, agencies sometimes use interim final rulemaking, in which, at the same time the rule is published, they request public comment on a final rule for the purpose of deciding whether to reaffirm, modify, or replace the published rule in light of those comments. Agencies sometimes also use other, more informal procedures—including publishing requests for information, engaging in targeted outreach, and convening listening sessions with interested persons—when they invoke the good cause exemption.

The Conference has addressed direct final rulemaking and interim final rulemaking in prior recommendations. In Recommendation 83–2, *The “Good Cause” Exemption from APA Rulemaking Requirements*, the Conference encouraged agencies to “provide a post-promulgation comment opportunity for rules they adopt under the good cause exemption.”¹⁰ In Recommendation 95–4, *Procedures for Noncontroversial and Expedited Rulemaking*, the Conference recommended that agencies “use direct final rulemaking in all cases where the ‘unnecessary’ prong of the good cause exemption is available, unless the agency determines that the process would not expedite issuance of such rules,” and provided best practices for doing so.¹¹ In Recommendation 95–4, the Conference recommended that agencies use interim final rulemaking when they conclude that using notice-and-comment procedures would be “impracticable” or “contrary to the public interest,” and provided best practices for doing so.¹²

The Conference is revisiting the topic of public engagement in rulemaking under the good cause exemption for two reasons. First, best practices for public engagement have become increasingly important as agencies rely more frequently on the good cause exemption.¹³ Second, there have been legal developments since 1995, particularly a 2020 decision by the Supreme Court on interim final rulemaking.¹⁴

Based on a reexamination of agency rulemaking practices under the good cause exemption,¹⁵ this Recommendation identifies best practices for enhancing public

² 5 U.S.C. 553(b)–(c).

engagement in rulemaking under the good cause exemption, particularly when agencies use direct final rulemaking and interim final rulemaking. It also encourages agencies to use alternative methods—such as publishing requests for information, engaging in targeted outreach, convening listening sessions with interested persons, and soliciting post-adoption comments—to reap the benefits of robust public participation even when they rely properly on the good cause exemption. Recommendations 83–2 and 95–4 are superseded to the extent that they recommend public engagement practices that are inconsistent with this Recommendation. Recommendation

Direct Final Rulemaking

1. Except in the rare instance that an agency determines that direct final rulemaking would not expedite issuance of a rule, an agency should use direct final rulemaking when it:

a. For good cause finds that it is “unnecessary” to undertake notice-and-comment rulemaking; and

b. Concludes that the rule is unlikely to elicit any significant adverse comments.

2. When an agency uses direct final rulemaking, it should publish in the **Federal Register** a rule that:

a. Identifies the rule as a “direct final rule”;

b. Provides a brief statement explaining the basis for the agency’s finding that it is unnecessary to undertake notice-and-comment rulemaking;

c. Provides a statement of the rule’s basis and purpose and explains the issues the agency considered in developing the rule;

d. Provides a period of at least 30 days during which interested persons may submit comments regarding the substance of the rule;

e. Explains that the agency will withdraw the direct final rule if it receives any significant adverse comments and specifies any additional actions that the agency may take if it withdraws the direct final rule;

f. Specifies when the rule will take effect if the agency receives no significant adverse comments (see Paragraph 5);

g. If applicable, specifies whether the agency will issue a subsequent notice in the **Federal Register** confirming that the agency received no significant adverse comments (see Paragraph 5); and

h. Identifies any companion proposed rule, as described in Paragraph 3.

3. When an agency issues a direct final rule, it may consider publishing in the same issue of the **Federal Register** a companion proposed rule that will serve as a notice of proposed rulemaking if the agency later withdraws the direct final rule upon receiving any significant adverse comments. In the event the agency receives significant adverse comments, the agency should consider providing an additional period for public comment on the companion proposed rule.

4. An agency should consider any comment received during direct final rulemaking to be a significant adverse comment if the comment explains why:

a. The rule would be inappropriate, including challenges to the rule’s underlying premise or approach; or

b. The rule would be ineffective or unacceptable without a change.

5. Absent exceptional circumstances for providing a different effective date, the agency should provide that a direct final rule will take effect at least 30 days after the close of the comment period if the agency receives no significant adverse comments or at least 30 days after publication of a subsequent notice in the **Federal Register** confirming that the agency received no significant adverse comments. An agency that does not publish a confirmation notice should consider providing an effective date greater than 30 days after the close of the comment period if the agency believes it is necessary to ensure that it has adequate time to withdraw the rule in the event it receives significant adverse comments.

6. If the agency receives any significant adverse comments or otherwise decides to withdraw the direct final rule before it takes effect, the agency should publish a notice in the **Federal Register** that states that the agency is withdrawing the direct final rule and describes any further rulemaking the agency will conduct on the matter. If the agency previously requested comments in a companion proposed rule as described in Paragraph 3, the agency may proceed with notice-and-comment rulemaking consistent with the proposed rule.

Interim Final Rulemaking

7. An agency is encouraged to use interim final rulemaking when it for good cause finds that it is “impracticable” or “contrary to the public interest” to undertake notice-and-comment rulemaking.

8. When an agency uses interim final rulemaking, it should publish in the **Federal Register** a rule that:

a. Identifies the rule as an “interim final rule”;

b. Provides a brief statement explaining the basis for the agency’s finding that is “impracticable” or “contrary to the public interest” to undertake notice-and-comment rulemaking;

c. Provides a statement of the rule’s basis and purpose and explains the issues the agency considered in developing the rule;

d. Provides a period of at least 30 days (or in most cases at least 60 days, in particular for “major rules” as defined in the Congressional Review Act) during which interested persons may submit comments regarding the substance of the rule or the agency’s finding that notice-and-comment rulemaking is impracticable or contrary to the public interest;

e. Explains that the agency will consider any comments that it receives in response to the interim final rule;

f. As applicable, sets forth the agency’s plans for supplemental public engagement (see Paragraph 11) and solicits public input on those public engagement plans;

g. Explains that the rule is being adopted without prior notice and comment, specifies the date upon which the rule will take effect, and identifies the rule’s expiration date if applicable; and

h. Specifies that the agency will consider the comments and complete the rulemaking by reaffirming, modifying, or withdrawing the interim final rule (see Paragraph 9).

9. An agency should conclude the interim final rulemaking by publishing a new final rule in the **Federal Register** that responds to all significant comments and reaffirms, modifies, or withdraws the interim final rule as appropriate. Consistent with agency resources and priorities, an agency should publish the new final rule as expeditiously as possible and should prioritize “major rules” as defined in the Congressional Review Act.

Additional Public Engagement

10. When appropriate, an agency should use additional forms of public engagement, including those identified in Recommendation 2018–7, *Public Engagement in Rulemaking*, before considering whether to invoke the good cause exemption when such engagement would help the agency (a) determine if notice-and-comment rulemaking is unnecessary, impracticable, or contrary to the public interest or (b) develop the rule. The agency should explain in the direct or interim final rule what additional public engagement the agency undertook.

11. An agency should consider using supplemental forms of public engagement after issuing an interim final rule. Consistent with Executive Order 13,563 and Recommendation 2021–2, *Periodic Retrospective Review*, an agency should prioritize for retrospective review interim final rules that are “major rules” as defined in the Congressional Review Act. An agency should explain in any subsequent final rule what supplemental public engagement the agency undertook.

12. Consistent with Recommendation 2014–4, “*Ex Parte Communications in Informal Rulemaking*,” an agency should disclose ex parte communications that occur during supplemental public engagement. For purposes of applying Recommendation 2014–4, an interim final rule should be considered the equivalent of a notice of proposed rulemaking.

Administrative Conference Recommendation 2024–7

Nonlawyer Assistance and Representation in Agency Adjudications

Adopted December 12, 2024

Millions of people each year participate in administrative adjudicative proceedings to access federal programs and resolve legal issues. Some adjudicative proceedings are simple enough—or could be made simple enough—for people to navigate on their own, and the Administrative Conference has identified best practices for reducing administrative burdens and assisting self-represented parties.¹ But many adjudicative

¹ See Admin. Conf. of the U.S., Recommendation 2023–6, *Identifying and Reducing Burdens on the Public in Administrative Proceedings*, 89 FR 1511 (Jan. 10, 2024); Admin. Conf. of the U.S., Recommendation 2016–6, *Self-Represented Parties in Administrative Proceedings*, 81 FR 94319 (Dec. 23, 2016).

proceedings are so complex, or involve such significant stakes, that people engaging with them benefit from representation by individuals with expertise in those programs or assistance from individuals who can help them navigate the proceedings.

It is helpful to distinguish between “representation” and “assistance.” Representation is used to denote that the individual is “standing in the shoes” of the participant and can speak for that individual even when they are not present. Other activities that likely indicate representation include counseling on eligibility for an agency program or signing official records.² “Assistance” is broader and used to indicate many other forms of help that may be beneficial to a person in dealing with an agency; this may include educating someone on process, counseling someone about rights and remedies generally, and, in some cases, helping someone navigate a form or benefits application. In most cases, representation will include various forms of assistance, but assistance does not include representation.

Representation and assistance, whether by lawyers or nonlawyers, are particularly valuable, even in seemingly straightforward adjudicatory proceedings, when they help people access relevant and accurate information about agency programs, program eligibility, and information on how to complete forms correctly and submit required information.³ For example, although the use of digital technologies, such as online forms and virtual hearings, is an effective strategy for increasing accessibility, it can also act as a barrier for people who lack access to digital tools or lack the skills to navigate these systems. Such challenges can be present for anyone, but those lacking representation or assistance may become so overwhelmed that they forgo rights and benefits to which they are entitled.⁴ More generally, a lack of representation or assistance often can lead to incorrect or unfair outcomes.

Representation and assistance not only help participants in adjudicatory proceedings but also benefit agencies. Without representation or assistance, an individual may be less likely to properly and timely complete adjudicative requirements, which can delay proceedings. Additionally, those without representation or assistance may require more support from the agency, including the adjudicator, which can strain resources and reduce efficiency.⁵

Many people, however, particularly low-income people and members of historically

underserved communities, are unable to access representation or assistance.⁶ One barrier is the shortage of affordable legal services. This concern is particularly acute in remote and rural areas, where not only are lawyers relatively scarce and may not have relevant expertise, but they may not be accessible to people who need them due to the long distances required to visit in person, inability to consult virtually, and other barriers.

Federal agencies have long innovated various ways to widen the pool of available representatives and expand assistance. For example, many agencies currently permit participants in agency adjudications to be represented by qualified or accredited nonlawyers.⁷ In many instances, the decision maker (whether or not an administrative law judge) makes an informal determination whether a representative is “qualified,” but some adjudicative systems provide for a formal accreditation system to determine which nonlawyer representatives are qualified to practice in those systems.⁸

Increasing availability of nonlawyer representation and assistance can be particularly beneficial in meeting the needs of communities of special populations, including veterans and servicemembers, members of tribal communities, people with disabilities, people with criminal records, immigrants, and disaster survivors.⁹ Members of such communities often benefit from representation and assistance provided by nongovernmental organizations, advocacy groups, and others already operating to meet

the needs and face the challenges within such communities. These community ties function as a way to build trust among participants and serve as a deep source of knowledge and expertise that can bear on representation and assistance. That trust can in turn inspire public confidence in agency adjudication. Agencies can engage with such groups to help increase availability and awareness of nonlawyer representation and assistance in these communities.

There are barriers to increasing availability of nonlawyer representation and assistance, including barriers that agencies may be able to address through their rules regarding representation and assistance. Agencies vary in their requirements, oversight, and encouragement of such representation and assistance. While reasonable requirements for qualification or accreditation, as well as continuing education, help ensure the quality and competence of representation, overly burdensome requirements can unnecessarily reduce the availability of nonlawyer representation. When agencies do not affirmatively inform participants of the availability of such representation or assistance, participants may not be aware of these resources.

The issue of nonlawyer representation and assistance has been a long-standing concern of the Conference. As early as 1986, the Conference recommended that agencies permit and encourage nonlawyer representation and assistance because of the substantial number of individuals needing or desiring representation and assistance in filling out forms, filing claims, and appearing in agency proceedings who were unable to afford or otherwise obtain such representation or assistance by lawyers.¹⁰ In 2023, the Conference adopted two recommendations addressing agency adjudicatory processes that encourage agencies to allow participants in many adjudications “to be represented by a lawyer or a lay person with relevant expertise”¹¹ and to establish “rules authorizing accredited or qualified nonlawyer representatives to practice before the agency.”¹² And in 2024, the Conference’s Chair released *Model Rules of Representative Conduct*, that, among other topics, address the qualifications and conduct of nonlawyer representatives.¹³

This Recommendation expands on the Conference’s previous recommendations by identifying best practices for incorporating and increasing representation and assistance by permitting broader practice by nonlawyers in different types of adjudicative systems and providing guidance to make processes governing nonlawyer representation and assistance more accessible and transparent.

² Admin. Conf. of the U.S., Recommendation 86–1, *Nonlawyer Assistance and Representation*, 51 FR 25641, 25642 n.2 (July 16, 1986).

³ White House Legal Aid Interagency Roundtable, *Access to Justice in Federal Administrative Proceedings: Nonlawyer Assistance and Other Strategies 1* (2023) [hereinafter WH–LAIR Report].

⁴ Pamela Herd, Donald Moynihan, & Amy Widman, *Identifying and Reducing Burdens in Administrative Processes 41* (Dec. 5, 2023) (report to the Admin. Conf. of the U.S.).

⁵ Recommendation 2016–6, *supra* note 1, at 94,320; *see also*, Recommendation 86–1, *supra* note 2, at 25,642; WH–LAIR Report, *supra* note 3, at 19 (“Studies show that legal assistance improves legal outcomes.”).

⁶ *See* Amy Widman, *Nonlawyer Assistance and Representation* (Dec. 9, 2024) (report to the Admin. Conf. of the U.S.).

⁷ *See* 5 U.S.C. 555(b) (“A person compelled to appear in person before an agency . . . is entitled to be accompanied, represented, and advised by counsel or, if permitted by the agency, by other qualified representative.”). Examples of nonlawyers who represent or assist parties in agency proceedings include other licensed professionals such as accountants, social workers, and paralegals; law students; union representatives; human resources professionals; corporate officers; tribal advocates; agency employees; community members; and family members. The Conference recognizes that there is an ongoing discussion about the best way to describe representatives who do not hold an active law license. For the purposes of this Recommendation, the Conference refers to this group as “nonlawyer representatives” because it is consistent with two prior recommendations of the Conference, the *Model Rules of Representative Conduct*, and the 2023 report of the White House Legal Aid Interagency Roundtable. Use of the term “nonlawyer” is not meant to suggest any deficiencies in representation offered by such individuals, nor should it deter any individual agency from adopting a different term. The Conference encourages agencies to remain attentive to the ongoing discussion within the legal community about terminology in this area and to consider updating their usage accordingly.

⁸ Federal law may specify criteria or processes that an agency must use in determining whether a nonlawyer representative is qualified to represent participants in proceedings before it. *See, e.g.*, 5 U.S.C. 500(c) (providing that individuals duly qualified to practice as a certified public accountant in a state may represent participants in Internal Revenue Service proceedings upon filing with the agency a written declaration as specified by law).

⁹ *See* WH–LAIR Report, *supra* note 3, at vii.

¹⁰ Recommendation 86–1, *supra* note 2, at 25,642.

¹¹ Admin. Conf. of the U.S., Recommendation 2023–5, *Best Practices for Adjudication Not Involving an Evidentiary Hearing*, 89 FR 1509 (Jan. 10, 2024).

¹² Recommendation 2023–6, *supra* note 1, at 1513.

¹³ Admin. Conf. of the U.S., *Model Rules of Representative Conduct* (2024). The Model Rules were developed by a working group of public- and private-sector representatives.

Recommendation

Availability of Nonlawyer Assistance

1. Agencies should permit nonlawyers—including friends, family members, and other individuals—to assist participants throughout the adjudicative process. For example, agencies should freely allow nonlawyers to help participants navigate and complete forms, obtain necessary documents and records, and accompany participants to interviews and hearings for moral support, unless there is reason to exclude such individuals (e.g., allowing participation in an interview or hearing could cause a disruption or adversely affect testimony).

2. Agencies should encourage and expand opportunities for nonlawyer assistance through programs that authorize, educate, and/or certify individuals to provide participants with information, support, and dedicated assistance, either by staffing and operating such programs directly or providing guidance and/or grant funding to nonprofit organizations to perform those functions.

Availability of Nonlawyer Representation

3. To increase the availability of representation for participants in their adjudications, agencies should establish rules authorizing qualified (see paragraphs 4–5) and, as appropriate, accredited (see paragraphs 6–9) nonlawyer representatives to practice before them.

Qualifications of Nonlawyer Representatives

4. Agencies should establish reasonable qualifications required for nonlawyer representatives to practice before them, without adding unnecessary burdens. When determining whether a nonlawyer is qualified to represent a participant in an agency proceeding, agencies should consider the factors listed in the *Model Rules of Representative Conduct*, such as the representative's relationship to the participant; their knowledge, expertise, experience, or skill; and their fitness to serve.

5. Agencies should have a process for determining whether an individual who has been disbarred should thereby be disqualified from serving as a nonlawyer representative in a particular case.

Accreditation of Nonlawyer Representatives

6. In addition to establishing qualifications for nonlawyer representatives, the following types of agencies should consider developing and implementing accreditation programs for nonlawyer representatives to help ensure the quality and competency of representation in their adjudicative proceedings:

- a. Agencies conducting adversarial adjudications with evidentiary hearings;
- b. Agencies that adjudicate a high volume of cases involving historically underserved communities; and
- c. Agencies with adjudications that involve specialized or technical subject matter.

7. Agencies with accreditation programs should consider implementing reasonable initial and continuing education requirements for nonlawyer representatives, either by providing such education directly or by working with organizations that employ, educate, or mentor nonlawyer

representatives. In doing so, agencies should avoid imposing education requirements that unnecessarily burden representatives.

8. Agencies regularly should review the requirements of their accreditation programs to ensure they are reasonable and beneficial without adding unnecessary burdens.

9. Agencies with programs for accrediting, educating, and regulating nonlawyer representatives who practice before them should have funding to ensure availability of representation and reduce wait times for accreditation.

Oversight and Enforcement

10. Agencies should establish rules to govern the conduct and ethical obligations of nonlawyer representatives.

11. Agencies should establish procedures for reviewing allegations or evidence of noncompliance by nonlawyer representatives with their rules of conduct; adjudicating allegations that nonlawyer representatives have violated those rules; and imposing sanctions on nonlawyer representatives found to have violated the rules of conduct. Agencies should also ensure they have procedures for enforcing such sanctions.

12. Agencies should provide for administrative review of any sanctions imposed on nonlawyer representatives for violation of relevant conduct rules.

13. Agencies may consider using the *Model Rules of Representative Conduct* as a resource in establishing the rules and procedures outlined in paragraphs 10–12.

Transparency With Regard to Representation and Assistance

14. To improve participants' awareness of options for representation and assistance, including by qualified or accredited nonlawyers, agencies should inform participants about such options early and throughout adjudications, including at levels of decision making prior to an opportunity for a hearing and by posting relevant information on their websites.

15. Agencies should publish the following in the *Code of Federal Regulations* and on their websites:

- a. Rules prescribing the qualifications required for nonlawyer representatives;
- b. Rules for accrediting, educating, and regulating nonlawyer representatives, for agencies with formal accreditation programs; and
- c. Rules governing the conduct and ethical obligations of nonlawyer representatives, as well as procedures for adjudicating alleged violations of these rules and imposing sanctions.

16. To inform and protect participants, agencies should publish on their websites the names of nonlawyer representatives who have been sanctioned, the nature of the sanction, and, as relevant, the specified period of the sanction. Agencies may omit certain information regarding the nature of the violation or sanction as necessary to preserve recognized privacy interests. Agencies should consider establishing, when appropriate, procedures for removing information about sanctioned representatives from their websites after a certain period of time has elapsed or a sanction is no longer in effect.

Coordination and Collaboration With Regard to Representation and Assistance

17. Agencies with overlapping subject matters, similar adjudication systems, or similar regulatory structures for nonlawyer representation should identify opportunities for interagency coordination of accreditation or education programs for nonlawyer representatives, to save resources and promote consistency.

18. When authorized by law, agencies should expand grant funding opportunities for nonprofit organizations that employ, educate, or mentor nonlawyers who represent or assist participants.

19. Agencies should work with law and other professional school clinics to expand programs that allow students to represent participants under the supervision of lawyers or other accredited professionals or to provide assistance to participants.

20. Agencies should engage with community-based organizations, nongovernmental organizations, advocacy groups, and other organizations that can assist in building trust among participants and improve nonlawyer representation and assistance by bringing knowledge of and expertise in issues facing those communities.

21. Agencies should collaborate with state bar associations and other relevant licensing authorities to reduce the effect that state prohibitions against unauthorized practice of law may have on the ability of nonlawyers to represent parties before them.

Data

22. Agencies should gather and maintain baseline comparative data on representation, including by nonlawyers, to (1) help agencies and others assess whether rules and procedures regarding nonlawyer representation are achieving agency goals in making such representation available and accessible; and (2) identify opportunities for expanding access to representation. Such data should include, at a minimum, the type and number of nonlawyer representatives; the outcomes, in aggregate, of cases in which parties have no representation, lawyer representation, or nonlawyer representation; the number of pending applications for accreditation; and average wait time for applications to be reviewed. Agencies should make data regarding representation publicly available, including on their websites, and regularly update it.

23. To the extent practicable, agencies should gather and maintain data on assistance, including by nonlawyers, to assess participants' experiences with and access to various forms of assistance. Agencies may collect such information by, for example, surveying participants regarding whether they received any assistance, the type of assistance they received, and the effectiveness of such assistance. To help with the assessment of funding opportunities, agencies may also require grantees, as a condition of their grants, to report on the types of assistance they provide, the number of participants they assist, and the outcomes of such assistance (e.g., the individual applied for benefits). Agencies should make data on assistance publicly available,

including on their websites, and regularly update it.

BILLING CODE 6110–01–P

AGENCY FOR INTERNATIONAL DEVELOPMENT

Center for Faith-Based and Neighborhood Partnerships (FBNP) Partner Meeting Survey

AGENCY: United States Agency for International Development.

ACTION: Notice of information collection; request for comment.

SUMMARY: The U.S. Agency for International Development/Center for Faith-Based and Neighborhood Partnerships (USAID/IPI/LFT/FBNP), as part of the Agency's continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on the following new information collection, as required by the Paperwork Reduction Act of 1995. Comments are requested concerning: Whether the proposed or continuing collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the burden estimates; ways to enhance the quality, utility, and clarity of the information collected; and ways to minimize the burden of the collection of the information on the respondents.

DATES: All comments should be submitted within 60 calendar days from the date of this publication.

ADDRESSES: To access and review the electronic Google forms survey tool, please use: <https://forms.gle/4JR8nLzZmmsPNkv8>.

Interested persons are invited to submit comments regarding the proposed information collection to Amanda Vigneaud, Initiative Lead, USAID/IPI/LFT/FBNP at cfbnp@usaid.gov.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Amanda Vigneaud, Initiative Lead, USAID/IPI/LFT/FBNP at cfbnp@usaid.gov or 202–712–1815.

SUPPLEMENTARY INFORMATION:

Title of Collection: Center for Faith-Based and Neighborhood Partnerships (FBNP) Partner Meeting Survey 2024.

OMB Number: Not yet known.

Expiration Date: Not yet known.

Type of Request: New collection.

Form Number: Not yet known.

Affected Public: Point of contact from faith-based organizations that have met with USAID/IPI/LFT/FBNP in 2024.

Estimated Number of Respondents: 70.

Estimated Total Annual Burden

Hours: 20–25.

Abstract: The Center for Faith-Based and Neighborhood Partnerships (USAID/IPI/LFT/FBNP) met with approximately 70 organizations in 2024. This survey will be sent to the points of contact from the partner meetings to collect information on outcomes following the partner's meeting with the team. If the collection is not conducted, it will affect the ability of USAID/IPI/LFT/FBNP to improve their partner engagement process. Method of collection will be electronic using Google forms survey. The data will be collected and maintained by USAID/IPI/LFT/FBNP on their Google platform.

Amanda Vigneaud,

Initiative Lead, USAID/IPI/LFT/FBNP.

BILLING CODE 6116–01–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, *Public Law 104–13*. Comments are required regarding: whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by January 29, 2025 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this

particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Farm Production and Conservation Business Center

Title: Request for Geospatial Products and Services.

OMB Control Number: 0565–NEW.

Summary of Collection: In accordance with the Paperwork Reduction Act, 1995, the Farm Production and Conservation (FPAC) is requesting comments from all interested individuals and organizations on a new information collection request for the. The information collection is needed to enable the Department of Agriculture to effectively administrate the Geospatial and Aerial Photography Programs. GEO has the responsibility for acquiring and conducting coordination of the FPAC's geospatial datasets and the aerial photography flying contracts and remote sensing programs. The geospatial data and digital aerial imagery secured by FPAC BC is public domain and reproductions are available at cost to any customer with a need. All receipts from the sale of geospatial products and services are retained by FPAC BC. This collection will get an FPAC OMB control number. The FPAC–ISD–441, Request for Geospatial Products and Services, is the form FPAC supplies to the customers for placing an order for aerial imagery products and services. The burden hours have decreased because FPAC–ISD–441B Request for Custom Aerial Print and FPAC–ISD441D One Time Credit Card Payment Authorization forms are now obsolete.

For the following estimated total annual burden on respondents, the formula used to calculate the total burden hour is the estimated average time per responses hours multiplied by the estimated total annual responses. The information collection request will get new FPAC OMB control number.

Estimate of Burden: Public reporting burden for the information collection is estimated to average 16 minutes per response.

Type of Respondents: Farmers, Ranchers, and other customers who

wish to purchase imagery products and services.

Estimated Number of Respondents: 1,425.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Responses: 1,425.

Estimated Average Time per Response: 0.303.

Estimated Total Annual Burden Hours on Respondents: 432 hours.

Rachelle Ragland-Greene,

Departmental Information Collection Clearance Officer.

[FR Doc. 2024-31053 Filed 12-27-24; 8:45 am]

BILLING CODE 3411-E2-P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and approval under the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are requested regarding: whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments regarding these information collections are best assured of having their full effect if received by January 29, 2025. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such

persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Agricultural Marketing Service

Title: Plan for Estimating Daily Livestock Slaughter under Federal Inspection.

OMB Control Number: 0581-0050.

Summary of Collection: The Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627) (AMA), as amended, authorizes the Secretary of Agriculture "to collect and disseminate marketing information, including adequate outlook information on a market-area basis, for the purpose of anticipating and meeting consumer requirements, aiding in the maintenance of farm income, and bringing about a balance between production, and utilization of agricultural products." The collection of information in this request is based on the AMA, title II, subtitle A, sec. 203, principally, paragraphs (b), (g), and (k) that direct the Secretary of Agriculture to determine agricultural marketing costs and develop efficient marketing methods to reduce the price spread between producer and consumer; to collect and disseminate marketing information to bring about a balance between production and utilization of agricultural products; and to collect, tabulate, and disseminate agricultural marketing statistics.

Under this authority, the Agricultural Marketing Service (AMS) Livestock, Poultry, and Grain Market News (LPGMN) Division works to provide timely information of prices, supply, demands, trends, movement, and other details affecting the trade of livestock, poultry, meat, eggs, grain, and their related products, as well as locally produced and marketed products. The information requested is used to compile and disseminate market reports that provide current, unbiased information to all stakeholders in the U.S. agricultural industry.

Need and Use of the Information: AMS will collect information on estimation of the current day's slaughter at their plant(s) and the actual slaughter of the previous day. The report is used to make market outlook projections and maintain statistical data. The up-to-the-minute reports collected and disseminated by professional market reporters are intended to provide both buyers and sellers with the information necessary for making intelligent, informed marketing decisions, thus putting everyone in the marketing system in an equal bargaining position. Since the government is a large purchaser of meat, a system to monitor

the collection and reporting of data is needed. Collecting this information less frequently would hinder the timely use of this data.

Description of Respondents: Business or other for-profit; Individuals or households; Farms.

Number of Respondents: 69.

Frequency of Responses: Reporting; Weekly; Other: Daily.

Total Burden Hours: 597.

Levi S. Harrell,

Departmental Information Collection Clearance Officer.

displays a currently valid OMB control number.

Forest Service

Title: Significant Cave Nomination.

OMB Control Number: 0596–0244.

Summary of Collection: The Federal Cave Resources Protection Act (FCRPA) [Pub. L. 100–691, 107 Stat. 4546] requires the Secretaries of Agriculture and Interior to identify and protect significant caves on Federal lands within their respective jurisdictions. The information covered in this collection applies to caves on Federal lands administered by the Forest Service. The FCRPA does not define what constitutes a “significant” cave, but it does require the Secretaries, in cooperation and consultation with each other, to issue regulations that define criteria for identification of significant caves found at (16 U.S.C. 4303(a)).

Need and Use of the Information: In accordance with FCRPA, the FS collects information from appropriate private sector interests, including “cavers,” to update a list of significant caves under USDA’s jurisdiction. FS will use form FS–2800–0023 “Significant Cave Nomination Worksheet” to collect name, address, telephone number of individual or organization submitting the nomination and the individual who is knowledgeable about the resources in the cave; name and location of the cave, a discussion of how the cave meets the criteria, studies, maps, research papers and other supporting documentation. If this information is not collected FS might not become aware of potentially significant caves’ existence or have insufficient information upon which to base a judgment as to their significance.

Description of Respondents:

Individuals and households.

Number of Respondents: 10.

Frequency of Responses: Reporting: One time.

Total Burden Hours: 110.

Levi S. Harrell,

Departmental Information Collection
Clearance Officer.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2020–0047]

Privacy Act of 1974; System of Records

AGENCY: Animal and Plant Health
Inspection Service, USDA.

ACTION: Notice of a new system of
records.

SUMMARY: Pursuant to the Privacy Act of 1974 and Office of Management and Budget Circular No. A–108, the U.S. Department of Agriculture gives notice that a component agency, the Animal and Plant Health Inspection Service (APHIS) proposes to add a new system of records to its inventory of records. The system of records being proposed is the APHIS Student Outreach Programs System, USDA/APHIS–26. The purpose of this system is to facilitate the submission and review of information submitted by students and their parents or guardians as part of the application process for student outreach programs.

DATES: In accordance with 5 U.S.C. 552a(e)(4) and (11), this notice is applicable upon publication, subject to a 30-day notice and comment period in which to comment on the routine uses described in the “Routine Uses of Records Maintained in the System” section of this system of records notice. Please submit any comments by January 29, 2025.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to www.regulations.gov. Enter APHIS–2020–0047 in the Search field. Select the Documents tab, then select the Comment button in the list of documents.

- *Postal Mail/Commercial Delivery:* Please send one copy of your comment to Docket No. APHIS–2020–0047, Regulatory Analysis and Development, PPD, APHIS, Station 2C–10.16, 4700 River Road, Unit 25, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at www.regulations.gov or in our reading room, which is located in Room 1620 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For general questions, please contact Ms. Sophia Kirby, Chief, Outreach and Communications, OCRDI, 4700 River Road, Unit 92, Riverdale, MD 20737; (301) 851–4192; email: sophia.l.kirby@usda.gov. For Privacy Act questions concerning this system of records notice, please contact Director, Freedom of Information and Privacy Act Staff, 4700 River Road, Unit 50, Riverdale, MD 20737; (301) 851–4076; email:

APHISPrivacy@usda.gov. For USDA Privacy Act questions, please contact the USDA Chief Privacy Officer, Information Security Center, Office of Chief Information Officer, USDA, Jamie L. Whitten Building, 1400 Independence Ave. SW, Washington, DC 20250; email: USDAPrivacy@usda.gov.

SUPPLEMENTARY INFORMATION: The Animal and Plant Health Inspection Service (APHIS) of the United States Department of Agriculture (USDA) is proposing to add a new system of records, titled APHIS Student Outreach Programs System, USDA/APHIS–26, that APHIS’ Office of Civil Rights, Diversity, and Inclusion (OCRDI) will use to facilitate the submission and review of information submitted by students and their parents or guardians as part of the application process for outreach programs such as AgDiscovery. (AgDiscovery is a summer outreach program designed to help teenagers explore careers in areas such as plant and animal science, wildlife management, and agribusiness (<https://www.aphis.usda.gov/careers/students-grads/agdiscovery>)). APHIS Student Outreach Programs challenge students to consider the importance of American agriculture, and the role USDA plays in this critical mission. Students participate in experiential learning activities on and off campus, attend workshops, lectures, laboratory, and field exercises, in addition to a variety of cultural and teambuilding activities. The maintenance of this system is conducted in a manner consistent with the guidelines established in 7 U.S.C. 2279 (Farming Opportunities Training and Outreach).

The application process for OCRDI’s outreach programs provides information needed to discover and explore a student’s interest in agriculture and provides recommendations from others who are familiar with the student’s character. That information, which is collected annually from applicants, will be used to evaluate and select the participants for APHIS Student Outreach Programs. The application process also provides the agency and participating educational institutions information required to evaluate and rate the applicants.

Individuals covered by the system include students who apply for APHIS Student Outreach Programs and their parent(s) or guardian(s).

APHIS will share information from the system pursuant to the requirements of the Privacy Act and, in the case of its routine uses, when the disclosure is compatible with the purpose for which

the information was compiled. A full list of routine uses is included in the routine uses section below.

SYSTEM NAME AND NUMBER:

APHIS Student Outreach Programs System, USDA/APHIS-26.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

The electronic component is completed via the IBM Forms Filler for application submissions. This component and the paper files are located in the Office of Civil Rights, Diversity, and Inclusion, 4700 River Road, Unit 92, Riverdale, MD 20737.

SYSTEM MANAGER(S):

APHIS Student Outreach Programs Manager, APHIS, 4700 River Road, Unit 92, Riverdale, MD 20737.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The maintenance of this system is conducted in a manner consistent with the guidelines established through the Farming Opportunities Training and Outreach found in 7 U.S.C. 2279.

PURPOSE(S) OF THE SYSTEM:

APHIS Student Outreach Programs System is used to facilitate the submission and review of information submitted by students, their parents, or guardians, and those that provide recommendations for the students as part of the application process for Office of Civil Rights, Diversity, and Inclusion programs such as AgDiscovery. These programs are designed to help teenagers explore careers in areas such as plant and animal science, wildlife management, and agribusiness.

The application process provides the information needed to assess a student's interest in agriculture, and provides recommendations from others who are familiar with the student's interests and character. The information, which is collected annually from applicants, will ultimately be used to select the participants for APHIS Student Outreach Programs. The application process also provides the APHIS and the participating educational institutions the information to rate and rank the applicants.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Categories of individuals covered by the system include students who apply for APHIS Student Outreach Programs, their parent(s) or guardian(s), and individuals mentioned or referenced in documents entered into the system.

CATEGORIES OF RECORDS IN THE SYSTEM:

The categories of records in the system include, but are not limited to, the name, address, phone number(s), gender, grade, name of educational institution, name of parent(s) or guardian(s) and their contact information, emergency contact information, email address, essay, volunteer service, extracurricular activities, student contract, parental release form, applicant rating and ranking, past program participation, photo release, agency comments, and individuals mentioned or referenced in documents entered into the system. Records also include a letter of recommendation form that is completed by a teacher, educational institution counselor or administrator, as well as other persons with personal knowledge of the student. (Three letters of recommendation are required for applicants.) The name of the specific host educational institution associated with the student is also maintained in the system, as well as information about the applicant's past participation in the program.

RECORD SOURCE CATEGORIES:

The sources for the information in this system comes directly from the applicant, the applicant's parent(s) or guardian(s), and those who have provided recommendation letters for them, such as parents, teachers, and other persons.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, records contained in the system may be disclosed outside USDA as a routine use under 5 U.S.C. 552a(b)(3), to the extent that such uses are compatible with the purposes for which the information was collected. Such permitted routine uses include the following:

- (1) To the partnering educational institutions that receive the funding via the cooperative agreement to administer the APHIS Student Outreach Programs and assists in the application review, rating, and selection of participants;
- (2) When a record on its face, or in conjunction with other records, indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program, statute, or by regulation, rule, or order issued pursuant thereto, APHIS may disclose the record to the appropriate agency, whether Federal, foreign, State, Tribal, local, or other

public authority responsible for enforcing, investigating, or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto, if the information disclosed is relevant to any enforcement, regulatory, investigative, or prosecutive responsibility of the receiving entity;

(3) To the Department of Justice when: (a) USDA or any component thereof; or (b) any employee of USDA in his or her official capacity, or any employee of the agency in his or her individual capacity where the Department of Justice has agreed to represent the employee; or (c) the United States Government, is a party to litigation or has an interest in such litigation, and USDA determines that the records are relevant and necessary to the litigation and the use of such records by the Department of Justice is for a purpose that is compatible with the purpose for which USDA collected the records;

(4) In an appropriate proceeding before a court, grand jury, or administrative or adjudicative body or official, when the USDA or other agency representing the USDA determines that the records are both relevant and necessary to the proceeding; or in an appropriate proceeding before an administrative or adjudicative body when the adjudicator determines the records to be relevant to the proceeding;

(5) To appropriate agencies, entities, and persons when: (a) USDA suspects or has confirmed that there has been a breach of the system of records; (b) USDA has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, USDA (including its information systems, programs, and operations), the Federal Government, or national security; and (c) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with USDA's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm;

(6) To another Federal agency or Federal entity, when information from this system of records is reasonably necessary to assist the recipient agency or entity in (a) responding to a suspected or confirmed breach or (b) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency, or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach;

(7) To a Congressional office in response to an inquiry from that

Congressional office made at the written request of the individual about whom the record pertains;

(8) To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the USDA, when necessary to accomplish an agency function related to this system of records; and

(9) To the National Archives and Records Administration (NARA) or other Federal Government agencies pursuant to records management activities conducted under 44 U.S.C. 2904 and 2906.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Records are maintained in paper copy and electronically. Paper records are maintained at APHIS Headquarters at 4700 River Road Unit 92, Riverdale, MD 20737. The office is locked during non-business hours and requires the presentation of employee identification for admittance at all times. Electronic copies are housed on the USDA secured computer system and are entered into an electronic database stored on the USDA secured computer system at the address above in Riverdale, MD.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

The records can be retrieved by the name of the applicant or applicant's parent or guardian and educational institution.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

APHIS has requested records disposition authority from NARA. Records will be retained until appropriate disposition authority is obtained, and records will then be disposed of in accordance with the authority granted.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

External users (educational institution coordinators) will only be able to access applications submitted on behalf of their respective organizations and must obtain Identity Assurance Level (IAL) 2 eAuthentication access credentials. Access to system data is granted by the system owner on a limited basis to participating educational institutions, OCRDI student program employees and administrators, and applicants and educational institutions are granted access to their own basic information. These entities can use their identification and password to access the system and modify their own personal information and information

within their own profile; however, they do not have access to modify sensitive data or data that is locked/password protected.

Marketing and Regulatory Programs Information Technology (MRP IT) has access to user information on a limited basis allowing them to perform only their specific job functions. Access is limited to administrators on a least privileged basis utilizing separation of duties. MRP IT application support staff have accounts with the appropriate level of access and permissions that allow them to access and modify user data. These permissions are granted by a limited number of management personnel.

Access is monitored by USDA Office of the Chief Information Officer, Cybersecurity and Privacy Operations Center, and MRP IT application support staff to ensure authorized and appropriate use of the data. To gain full access to the system, internal users must have an IAL eAuthentication using a personal identity verification (PIV) card.

RECORD ACCESS PROCEDURES:

All requests for access to records must be in writing and should be submitted to the APHIS Privacy Act Officer, 4700 River Road Unit 50, Riverdale, MD 20737; or by facsimile (301) 734-5941; or by email APHISPrivacy@usda.gov. In accordance with 7 CFR 1.112, (Procedures for requests pertaining to individual records in a record system), the request must include the full name of the individual making the request; the name of the system of records; any other information specified in the system notice; and preference of inspection, in person or by mail. In accordance with 7 CFR 1.113, prior to inspection of the records, the requester shall present sufficient identification (*e.g.*, driver's license, employee identification card) to establish that the requester is the individual to whom the records pertain. In addition, if an individual submitting a request for access wishes to be supplied with copies of the records by mail, the requester must include with his or her request sufficient data for the agency to verify the requester's identity.

CONTESTING RECORD PROCEDURES:

Individuals seeking to contest or amend records maintained in this system of records must direct their request to the address indicated in the "RECORD ACCESS PROCEDURES" paragraph, above and must follow the procedures set forth in 7 CFR 1.116, (Request for correction or amendment to record). All requests must state clearly and concisely what record is being

contested, the reasons for contesting it, and the proposed amendment to the record.

NOTIFICATION PROCEDURES:

Individuals may be notified if a record in this system of records pertains to them when the individuals request information utilizing the same procedures as those identified in the "RECORD ACCESS PROCEDURES" paragraph, above.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

None.

HISTORY:

N/A.

A report on this new system of records, required by 5 U.S.C. 552a(r), as implemented by Office of Management and Budget Circular A-108, was sent to the Chairman and Ranking Member of the House Committee on Oversight and Reform, Chairman and Ranking Member of the Senate Committee on Homeland Security and Governmental Affairs, and the Administrator of the Office of Management and Budget's Office of Information and Regulatory Affairs.

Done in Washington, DC, this 23rd day of December 2024.

Donna Lalli,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2020-0024]

Importation of Fresh Pineapple (*Ananas comosus*) Fruit From Indonesia Into the United States

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice of availability.

SUMMARY: We are advising the public that we have prepared a pest risk analysis that evaluates the risks associated with the importation of fresh pineapple fruit (*Ananas comosus*) for consumption from Indonesia into the United States. Based on the analysis, we have determined that the application of one or more phytosanitary measures will be sufficient to mitigate the risks of introducing or disseminating plant pests or noxious weeds via the importation of fresh pineapple fruit from Indonesia. We are making the pest risk analysis available to the public for review and comment.

DATES: We will consider all comments that we receive on or before February 28, 2025.

ADDRESSES: We will submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to www.regulations.gov. Enter APHIS–2020–0024 in the Search field. Select the Documents tab, then select the Comment button in the list of documents.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2020–0024, Regulatory Analysis and Development, PPD, APHIS, Station 2C–10.16, 4700 River Road, Unit 25, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at <http://www.regulations.gov> or in our reading room, which is located in Room 1620 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: Mr. Hesham Abuelnaga, Senior Regulatory Policy Specialist, PPQ, APHIS, 4700 River Road, Unit 133, Riverdale, MD 20737–1236; (301) 851–2010; email: Hesham.A.Abuelnaga@usda.gov.

SUPPLEMENTARY INFORMATION:

Background

Under the regulations in “Subpart L—Fruits and Vegetables” (7 CFR 319.56–1 through 319.56–12, referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) prohibits or restricts the importation of fruits and vegetables into the United States from certain parts of the world to prevent plant pests from being introduced into or disseminated within the United States.

Section 319.56–4 contains a performance-based process for approving the importation of certain fruits and vegetables that, based on the findings of a pest risk analysis, can safely be imported subject to one or more of the five designated phytosanitary measures listed in paragraph (b) of that section.

APHIS received a request from the national plant protection organization of Indonesia to allow the importation of fresh pineapple fruit (*Ananas comosus*) from Indonesia into the United States. As part of our evaluation of Indonesia’s request, we have prepared a pest risk assessment to identify the pests of quarantine significance that could

follow the pathway of the importation of fresh pineapple fruit (*Ananas comosus*) from Indonesia into the United States. Based on the pest risk assessment, a risk management document (RMD) was prepared to identify phytosanitary measures that could be applied to the fresh pineapple fruit to mitigate the pest risk.

Therefore, in accordance with § 319.56–4(c), we are announcing the availability of our pest risk assessment and RMD for public review and comment. Those documents, as well as a description of the economic considerations associated with the importation of fresh pineapple for consumption from Indonesia may be viewed on the *Regulations.gov* website or in our reading room (see **ADDRESSES** above for a link to *Regulations.gov* and information on the location and hours of the reading room). You may request paper copies of the pest risk assessment and RMD by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the subject of the analysis you wish to review when requesting copies.

After reviewing any comments we receive, we will announce our decision regarding the import status of fresh pineapple fruit from Indonesia in a subsequent notice. If the overall conclusions of our analysis and the Administrator’s determination of risk remain unchanged following our consideration of the comments, then we will authorize the importation of fresh pineapple fruit from Indonesia into the United States subject to the requirements specified in the RMD.

Authority: 7 U.S.C. 1633, 7701–7772, and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 19th day of December 2024.

Michael Watson,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 2024–30969 Filed 12–27–24; 8:45 am]

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. FSIS–2024–0029]

2025 Rate Changes for the Basetime, Overtime, Holiday, Laboratory Services, and Export Application Fees

AGENCY: Food Safety and Inspection Service (FSIS), U.S. Department of Agriculture (USDA).

ACTION: Notice.

SUMMARY: FSIS is announcing the 2025 rates it will charge meat, poultry, and egg products establishments, and importers and exporters for providing voluntary, overtime, and holiday inspection and identification, certification, and laboratory services. Additionally, FSIS is announcing a change to the fee FSIS assesses to exporters that choose to apply for export certificates electronically through the export component of the Agency’s Public Health Information System. The 2025 basetime, overtime, holiday, and laboratory services rates will be applied on January 12, 2025.

DATES: FSIS will charge the rates announced in this notice beginning January 12, 2025.

FOR FURTHER INFORMATION CONTACT: For further information contact Michael Toner, Director, Budget Division, Office of the Chief Financial Officer; email: Michael.toner@usda.gov, telephone:(202) 365–1352.

SUPPLEMENTARY INFORMATION:

Background

On April 12, 2011, FSIS published a final rule amending its regulations to establish formulas for calculating the rates it charges meat, poultry, and egg products establishments and importers and exporters for providing voluntary, overtime, and holiday inspection and identification, certification, and laboratory services (76 FR 20220). In the final rule, FSIS stated that it would use the formulas to calculate the annual rates, publish the rates in **Federal Register** notices prior to the start of each calendar year, and apply the rates on the first FSIS pay period at the beginning of the calendar year. This notice provides the 2025 rates, which will be applied starting on January 12, 2025.

Export Component

On September 6, 2017, FSIS published the **Federal Register** notice, *Public Health Information System (PHIS) Export Component Country Implementation* (82 FR 42056). The notice announced the delayed implementation of the export component to ensure sufficient testing and outreach to stakeholders and that the application fee would be recalculated based on available costs and number of applications but would not be assessed prior to January 1, 2019. In addition, FSIS announced that it would implement the PHIS Export Component with a limited number of countries and gradually expand implementation to additional countries.

On April 29, 2019, FSIS published the **Federal Register** notice, *Public Health*

Information System Export Component Fee (84 FR 17999). The notice announced that starting June 1, 2019, FSIS would assess a fee of \$4.01 to exporters that chose to apply for export

certificates electronically through the export component of PHIS. As noted below, the application fee has been recalculated based on updated costs and number of applications.

2025 Rates and Calculations

The following table lists the 2025 Rates per hour, per employee, by type of service:

Service	2025 rate (estimates rounded to reflect billable quarter hour)
Basetime	\$73.04
Overtime	89.68
Holiday	106.32
Laboratory	105.68
Export Application	4.83*

* Per application.

The regulations that cover these fees (other than the export application fee) state that FSIS will calculate the rates using formulas that include the Office of Field Operations (OFO) inspection program personnel's previous fiscal year's regular direct pay and regular hours (9 CFR 391.2, 391.3, 391.4, 590.126, 590.128, 592.510, 592.520, and 592.530). The final rates have been rounded to make the amount divisible by the quarter hour (15 minutes). Fifteen minutes is the minimum charge for the services covered by these rates.

FSIS determined the 2025 rates using the following calculations:

Basetime Rate = The quotient of dividing the OFO inspection program personnel's previous fiscal year's regular direct pay by the previous fiscal year's regular hours, plus the quotient multiplied by the calendar year's percentage of cost-of-living increase, plus the benefits rate, plus the travel and operating rate, plus the overhead rate, plus the allowance for bad debt rate.

The calculation for the 2025 basetime rate per hour per program employee is:

[FY 2024 OFO Regular Direct Pay divided by the previous fiscal year's Regular Hours (\$488,399,073/14,973,938)] = \$32.62 + (\$32.62 * 2.0% (calendar year 2025 Cost of Living Increase)) = \$33.27 + \$13.34 (benefits rate) + \$2.91 (travel and operating rate) + \$23.53(overhead rate) + \$0.02 (bad debt allowance rate) = \$73.05, rounded down to \$73.04, so that it is divisible by 4.

Overtime Rate = The quotient of dividing the OFO inspection program personnel's previous fiscal year's regular direct pay by the previous fiscal year's regular hours, plus that quotient multiplied by the calendar year's percentage of cost-of-living increase, multiplied by 1.5 (for overtime), plus the benefits rate, plus the travel and

operating rate, plus the overhead rate, plus the allowance for bad debt rate.

The calculation for the 2025 overtime rate per hour per program employee is:

[FY 2024 OFO Regular Direct Pay divided by previous fiscal year's Regular Hours (\$488,399,073/14,973,938)] = \$32.62 + (\$32.62 * 2.0% (calendar year 2025 Cost of Living Increase)) = \$33.27 * 1.5 = \$49.90 + \$13.34 (benefits rate) + \$2.91 (travel and operating rate) + \$23.53(overhead rate) + \$0.02(bad debt allowance rate) = \$89.68, which is divisible by 4.

Holiday Rate = The quotient of dividing the OFO inspection program personnel's previous fiscal year's regular direct pay by the previous fiscal year's regular hours, plus that quotient multiplied by the calendar year's percentage of cost-of-living increase, multiplied by 2 (for holiday pay), plus the benefits rate, plus the travel and operating rate, plus the overhead rate, plus the allowance for bad debt rate.

The calculation for the 2025 holiday rate per hour per program employee calculation is:

[FY 2024 OFO Regular Direct Pay divided by previous fiscal year's Regular Hours (\$488,399,073/14,973,938)] = \$32.62 + (\$32.62 * 2.0% (calendar year 2025 Cost of Living Increase)) = \$33.27 * 2 = \$66.54 + \$13.34 (benefits rate) + \$2.91 (travel and operating rate) + \$23.53(overhead rate) + \$0.02(bad debt allowance rate) = \$106.32, which is divisible by 4.

Laboratory Services Rate = The quotient of dividing the Office of Public Health Science (OPHS) previous fiscal year's regular direct pay by the OPHS previous fiscal year's regular hours, plus the quotient multiplied by the calendar year's percentage cost of living increase, plus the benefits rate, plus the travel and operating rate, plus the overhead rate, plus the allowance for bad debt rate.

The calculation for the 2025 laboratory services rate per hour per program employee is:

[FY 2024 OPHS Regular Direct Pay/OPHS Regular hours (\$28,720,306/444,635)] = \$64.59 + (\$64.59 * 2.0% (calendar year 2025 Cost of Living Increase)) = \$65.88 + \$13.34 (benefits rate) + \$2.91 (travel and operating rate) + \$23.53 (overhead rate) + \$0.02 (bad debt allowance rate) = \$105.67, rounded up to \$105.68, so that it is divisible by 4.

Calculations for the Benefits, Travel and Operating, Overhead, and Allowance for Bad Debt Rates

These rates are components of the basetime, overtime, holiday, and laboratory services rates formulas.

Benefits Rate: The quotient of dividing the previous fiscal year's direct benefits costs by the previous fiscal year's total hours (regular, overtime, and holiday), plus that quotient multiplied by the calendar year's percentage cost of living increase. Some examples of direct benefits are health insurance, retirement, life insurance, and Thrift Savings Plan basic and matching contributions.

The calculation for the 2025 benefits rate per hour per program employee is:

[FY 2024 Direct Benefits/(Total Regular hours + Total Overtime hours + Total Holiday hours) (\$235,393,201/17,994,567)] = \$13.08 + (\$13.08 * 2.0% (calendar year 2025 Cost of Living Increase)) = \$13.34.

Travel and Operating Rate: The quotient of dividing the previous fiscal year's total direct travel and operating costs by the previous fiscal year's total hours (regular, overtime, and holiday), plus that quotient multiplied by the calendar year's percentage of inflation.

The calculation for the 2025 travel and operating rate per hour per program employee is:

[FY 2024 Total Direct Travel and Operating Costs/(Total Regular hours + Total Overtime hours + Total Holiday hours) (\$51,107,348/17,994,567)] = \$2.84 + (\$2.84 * 2.023% (2025 Inflation)) = \$2.91.

Overhead Rate: The quotient of dividing the previous fiscal year's indirect costs plus the previous fiscal year's information technology (IT) costs in the Public Health Data Communication Infrastructure System Fund plus the provision for the operating balance less any Greenbook costs (*i.e.*, costs of USDA support services prorated to the service component for which fees are charged) that are not related to food inspection by the previous fiscal year's total hours (regular, overtime, and holiday) worked across all funds, plus the quotient multiplied by the calendar year's percentage of inflation.

The calculation for the 2025 overhead rate per hour per program employee is: [FY 2024 Total Overhead/(Total Regular hours + Total Overtime hours +

Total Holiday hours) (\$413,946,871/17,994,567)] = \$23.00 + (\$23.00 * 2.023% (2025 Inflation)) = \$23.53.

Allowance for Bad Debt Rate = Previous fiscal year's total allowance for bad debt (for example, debt owed for overtime and holiday inspection services that is not paid in full by establishments that declare bankruptcy) divided by previous fiscal year's total hours (regular, overtime, and holiday) worked.

The 2025 calculation for bad debt rate per hour per program employee is:

[FY 2024 Total Bad Debt/(Total Regular hours + Total Overtime hours + Total Holiday hours) = (\$390,688/17,994,564)] = \$0.02.

2025 Electronic Export Application Fee

As published in FSIS' final rule, *Electronic Export Application and Certification Charge; Flexibility in the Requirements for Export Inspection Marks, Devices, and Certificates; Egg Products Export Certification* (81 FR

42225), the Electronic Export Application Fee Formula is: Labor Cost (Technical Support + Export Library Maintenance) + IT Cost (Ongoing Operations and Maintenance + eAuthentication ¹)

Number of Export Applications

FSIS stated in the 2016 final rule (81 FR 42225) and the 2017 **Federal Register** notice (82 FR 42056) that it would update and recalculate the fee based on the best available estimates for costs and number of applications. As of November 2024, most countries have been included in the export component. Therefore, FSIS is able to accurately estimate the number of export applications (the denominator in the formula) and update costs to include the transition from eAuthentication to *Login.gov*. The electronic export application fee has been changed to \$4.83 for 2025.

The 2025 Electronic Export Application Fee:

Labor Cost (\$590,070 + (\$191,050)) + IT Cost (\$1,620,000 + \$24,000)

501,984

= \$4.83

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: <https://www.fsis.usda.gov/federal-register>.

FSIS will also announce and provide a link through the FSIS *Constituent Update*, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The *Constituent Update* is available on the FSIS web page. Through the web page, FSIS is able to provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and

information. This service is available at: <https://www.fsis.usda.gov/subscribe>. Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password protect their accounts.

USDA Non-Discrimination Statement

In accordance with Federal civil rights law and USDA civil rights regulations and policies, USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or

funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.*, Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720-2600 (voice and TTY); or the Federal Relay Service at (800) 877-8339.

To file a program discrimination complaint, a complainant should complete a Form, AD-3027, *USDA Program Discrimination Complaint Form*, which can be obtained online at <https://www.usda.gov/forms/electronic-forms>, from any USDA office, by calling (866) 632-9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name,

¹ As of September 2024, Login.gov accounts are required by all public customers to access USDA

websites and applications, *i.e.*, FSIS' PHIS. More information can be found on the USDA eAuth

FAQ's page at: <https://www.eauth.usda.gov/eauth/b/usda/faq>.

address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights about the nature and date of an alleged civil rights violation. The completed AD-3027 form or letter must be submitted to USDA by:

(1) *Mail*: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250-9410; or (2) *Fax*: (833) 256-1665 or (202) 690-7442; or (3) *Email*: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

Done at Washington, DC.

Denise Eblen,

Administrator.

BILLING CODE 3410-DM-P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Waiver and State Plans (WiSP)

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on this proposed information collection. This collection is a: New collection.

DATES: Written comments must be received on or before TBD February 28, 2025.

ADDRESSES: We invite you to submit written comments on this notice.

—*Preferred method*: Federal eRulemaking Portal. Go to <https://www.regulations.gov>, and follow the online instructions for submitting comments electronically.

—*Mail*: Amanda Vega, WIC Program Integrity and Monitory Branch, Food and Nutrition Service, U.S. Department of Agriculture, 1320 Braddock Place, Alexandria, Virginia 22314.

—*Email*: email comments to amanda.vega@usda.gov.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will be a matter of public record.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of this information collection

should be directed to Andrea Whitley at andrea.whitley@usda.gov, 703-305-2465.

SUPPLEMENTARY INFORMATION: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions that were used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Title: Waivers and State Plans (WiSP).

Form Number: Not Yet Determined.

OMB Number: Not Yet Assigned.

Expiration Date: Not Yet Determined.

Type of Request: New collection.

Abstract: The burden activities that are covered by this Information Collection Request include the transition from individual collections for Program waivers and State Plans to a new application supporting multiple USDA Programs. This application will allow State agencies to request Program waivers and submit State Plans to the USDA Food and Nutrition Service (FNS), FNS staff to manage data provided within the application, and covers the gathering and maintenance of all supporting data from each State agency. The Waivers and State Plans (WiSP) application will support the following USDA Programs and be available to all participating State agencies in each Program: Special Supplemental Nutrition Program for Woman, Infants and Children (WIC), Farmers Market Nutrition Program (FMNP), and Seniors Farmers Market Nutrition Program (SFMNP).

The purpose of WIC is to provide supplemental foods, nutrition education, and health care referrals to low income, nutritionally at-risk pregnant, breastfeeding and postpartum women, infants, and children up to age five. The WIC Program is authorized by the Child Nutrition Act of 1966, as amended. WIC currently operates through a Federal/State partnership in which the Department of Agriculture/ Food and Nutrition Service (FNS) provides grants to State agencies in 50 U.S. States, 6 U.S. Territories, and 32 Indian Tribal Organizations (ITO's). The

WIC Program requirements are specified in Section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786(m)(8)), and WIC regulations at 7 CFR part 246.

FMNP is designed to provide fresh, unprepared, locally grown fruits and vegetables to WIC participants and expand the awareness, use of, and sales at farmers markets. FMNP currently operates through a Federal/State partnership in which FNS provides grants to State agencies in 42 U.S. States, 3 U.S. Territories, and 6 ITOs. FMNP Program requirements are specified in Section 17(m)(8) of the Child Nutrition Act of 1966 (42 U.S.C. 1786(m)(8)), and FMNP regulations at 7 CFR part 248.

SFMNP is designed to provide low-income seniors with access to locally grown fruits, vegetables, honey and herbs and aid in the development of new and additional farmers markets, roadside stands, and community support agricultural programs. SFMNP currently operates through a Federal/State partnership in which FNS provides grants in 44 U.S. States, 3 U.S. Territories, and 7 ITOs. SFMNP Program requirements are specified in the Farm Security and Rural Investment Act of 2002, as amended, (Pub. L. 107-171) and SFMNP regulations at 7 CFR part 249.

The reporting and record-keeping burden activities that are covered by the information collection include requirements that involve the new application allowing State agencies to submit waiver requests and State Plan submissions to FNS. The WiSP application will provide a way for State agency staff to request pre-defined standard waivers, nationwide opt-in waivers, disaster related waivers, and to build custom ad hoc waiver requests. The application will support current and future legislation providing FNS with waiver authority for WIC, FMNP, and SFMNP program requirements. Depending on the legislation, this waiver authority may be temporary, as is the case for waivers granted under the American Rescue Plan Act (ARPA, Pub. L. 117-2), or permanent, as is the case for waivers granted under the Access to Baby Formula Act of 2022 (ABFA, Pub. L. 117-129). Application users will be able to respond to requests for more information, as needed, within the application. This will streamline the waiver request process and ensure that all waiver correspondence is kept associated to the waiver request. Waivers are requested on an as needed basis, and not all State agencies will request a waiver for a Program requirements. Waivers are authorized by specific legislation and may have a

scope that only applies to some of the Programs. State Plan Program operations are also supported in the WiSP application. Federal regulations require that State Plan Program-related information be collected and that full and complete records concerning Program operations are maintained. State Plans are the principal source of information about how each State agency operates WIC, FMNP and SFMNP. State agencies gather information to inform their initial and annual State Plan submissions throughout their work during an average year. This involves consolidating and summarizing the results of: local agency authorization and monitoring; participant certification of eligibility; authorized outlet selection, authorization, disqualification, monitoring visits, and monitoring reviews; face-to-face training results; Food instrument receipt, issuance, and disposition; complaint handling; policy establishment for sanctions; financial management system establishment and maintenance; management evaluation system establishment and maintenance; and corrective action plan establishment and maintenance all of which are associated to the reporting burden approved under OMB Control Numbers: 0584–0687 (WIC), 0584–0447 (FMNP) and 0584–0541 (SFMNP).

Current and new State agencies are required to submit State Plans annually per the guidelines of the respective Programs, as an application or prerequisite to the receipt of federal funds from FNS.

Each Program has one or more designated checklists that cover different Program requirements. FMNP and SFMNP optionally allow for some Programs to be combined into a single, consolidated State Plan checklist. The new application will support each Program's individual checklists, and allowable, consolidated checklists.

WIC State agencies are required to submit their full Program planning data in 10 distinct checklist documents. Each fiscal year, only a portion of the total

checklists are required to be submitted. The required checklists are published prior to the due date of WIC State Plans and apply equally to all State agencies. It is estimated that each State agency will be required to annually submit 4 checklists per FY from each WIC State agency. State agencies may choose provide updates to the other 6 checklists on file but are not required to submit updates for these.

FMNP and SFMNP Programs require that each of their State agencies submit 1 (one) of the of the 3 different versions of State Plan checklists available: FMNP only, SFMNP only, and S/FMNP Consolidated. The Consolidated checklist is for State agencies who administer both Programs.

The burden table information collection items are grouped by Waivers and then State Plan items, then by the collection items. The lines in the collection grouping identify the State agency category group for the respondents. For each collection item, we have identified the estimated burden by State agency category.

Reporting Burden

Affected Public: Respondent groups identified include State agency officials from the 50 geographic States, 6 US Territories, and 32 Indian Tribal Organizations. Not all identified State agencies participate with all Programs or with all application features. Program Waivers are issued based upon regulations these non-mandatory requests are available for the State agencies at their option. WIC, FMNP and SFMNP Programs require that each of their State agencies file a Program specific State Plan each year.

Estimated Number of Respondents: The total estimated number of respondents is 2,656 (1176 Waiver respondents + 1480 State Plan respondents including one time effort activities), which represents the estimated sum of all State agencies for all applicable FNS Programs, across all collection items for both Waivers and State Plans.

Estimated Number of Responses per Year: The State agencies will be able to use the WiSP application to submit Program Waivers, and State Plans. The estimated total number of responses per year is 2,652.28 (380.28 Waiver responses + 2272.00 State Plan responses including one time effort activities), which represents the estimated sum of all requests estimated from State agencies for all applicable FNS Programs, across all collection items for both Waivers and State Plans. The distinct number of responses is broken down below for Waivers and then State Plans.

Estimated Time per Response: The estimated time of response for both Waivers and State Plans varies from 0.89 to 11.77 hours depending on respondent group and instrument, as shown in the table below, with an average estimated time of 10.21 hours for all participants.

Estimated Total Annual Burden on Respondents: The estimated total annual burden on respondents for both Waivers and State Plan items is 27,074.66 hours. See the table below for estimated total annual burden for each type of respondent.

Record-Keeping Burden

Affected Public: Record-keeping groups identified include State agency officials from the 50 geographic States, 6 US Territories, and 32 Indian Tribal Organizations.

Estimated Number of Record-Keepers: The total estimated number of record-keepers is 196.00 which represents the estimated sum of all State agencies for all applicable FNS Programs, across all collection items for State Plans.

Estimated Number of Records per Year: The estimated total number of annual records is 196.00 for State Plans.

Estimated Time per Record Keeper: The estimated time per record-keeper for State Plans is 1.00 hours.

Estimated Total Record-Keeping Burden Hours: The estimated total annual burden on record-keepers State Plans is 196.00 hours.

Information collected	Estimated number of respondents	Estimated annual frequency of response per respondent	Total annual responses	Hours per response	Total annual burden (hours)
Gathering data for waiver request	196.00	0.48	94.90	1.00	94.90
Waiver request form	588.00	0.34	202.47	2.67	162.29
Supplemental Data waiver requests	196.00	0.16	31.89	1.00	31.89
Waiver Sub Total	1,176.00	0.32	380.28	0.89	340.10
Import of all existing State Plans	196.00	5.04	988.00	2.00	1,976.00
Application data entry training	500.00	1.00	500.00	2.00	1,000.00

Information collected	Estimated number of respondents	Estimated annual frequency of response per respondent	Total annual responses	Hours per response	Total annual burden (hours)
State Plan One Time Effort Sub Total	696.00	2.14	1,488.00	2.00	2,976.00
State Plan of Operations	588.00	1.00	588.00	40.07	23,562.56
State Plan Record Maintenance	196.00	1.00	196.00	1.00	196.00
State Plan Annual Effort Sub Total	784.00	1.00	784.00	30.30	23,758.56
State Plan Sub Total	1,480.00	1.54	2,272.00	11.77	26,734.56
Grand Totals	2,656.00	1.00	2,652.28	10.21	27,074.66

Tameka Owens,

Acting Administrator and Assistant Administrator, Food and Nutrition Service.

BILLING CODE 3410-30-P

DEPARTMENT OF AGRICULTURE

Forest Service

Information Collection; Non-Timber Forest Products

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Forest Service (Forest Service or Agency) is requesting public comment on the reapproval and proposed revisions of an approved information collection (ICR), 0596-0243, Non-Timber Forest Products.

DATES: Comments on reapproval and the proposed revisions of the ICR must be received in writing by February 28, 2025.

ADDRESSES: Comments may be sent to Forest Service Research and Development, 201 14th Street SW, Washington, DC 20250-1124. Comments also may be submitted by email to: julie.minde@usda.gov.

Comments submitted in response to this notice will be available to the public through relevant websites and upon request. Therefore, do not include confidential information, such as sensitive personal information or proprietary information. An email address associated with a comment will be included with the comment when it is made publicly available online.

The public may inspect the draft supporting statements for the ICR and comments received at 201 14th Street SW, Washington, DC 20250, on business days between 8:30 a.m. and 4:00 p.m. Visitors are encouraged to call ahead at 703-559-2972 to facilitate entry to the

building. The public may request an electronic copy of the supporting statements and comments via return email. Requests should be emailed to julie.minde@usda.gov.

FOR FURTHER INFORMATION CONTACT: Julie Minde, Social Science Analyst, at julie.minde@usda.gov or 703-559-2972. Individuals who use telecommunication devices for the deaf and hard of hearing may call 711 to reach the Telecommunications Relay Service, 24 hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION:

Title: Non-Timber Forest Products.

OMB Number: 0596-0243.

Expiration Date of Approval: February 28, 2025.

Type of Request: Reapproval and proposed revisions of an approved ICR.

Abstract:

Non-timber forest products are plants, mushrooms, and plant- or tree-derived goods like nuts, boughs, sap, and leaves that are harvested for use as food, medicine, cultural, artisan, and other purposes. Some gathering is planned and systematic, while much of it is informal, unplanned, opportunistic, or incidental to other outdoor recreation activities. For some people, harvested wild plants and mushrooms make up a substantial or nutritionally important part of their diet. In other cases, non-timber forest products are locally or regionally important products for businesses.

Many opportunities exist to manage forests and other natural areas to enhance the supply of non-timber forest products. This increases the benefits they provide to society, individuals, and cultures and helps maintain populations of important non-timber forest products in the face of changes like invasive species and climate impacts. Potential public benefits include improved public health outcomes from outdoor activity and access to socially, culturally, and economically significant products. Harvesting and consuming non-timber

forest products also may help supplement food sources for people with limited access to fresh, affordable food.

Many laws and policies direct the Forest Service to consider and manage for non-timber forest products for the benefit of the public and to meet trust responsibilities to American Indians and Alaskan Natives on federal and Tribal lands, *e.g.*, Forest and Rangeland Renewable Resources Planning Act (RPA) of 1974, Forest and Rangeland Renewable Resources Research Act of 1978. Managing forests and other natural areas to provide non-timber forest products in a sustainable way requires detailed, science-based information. Gaining new information can help us understand how uses of non-timber forest products have changed over time in response to management, socio-cultural circumstances, the economic conditions of Tribes, and environmental forces of change.

The Forest Service seeks to obtain OMB approval for extension with revision to a currently approved information collection to collect information from who manage, make policies for, or otherwise have a stake in the management of lands where non-timber forest products may be harvested.

Estimated Annual Burden per Response: 25 minutes for survey; 60 minutes for interview; 90 minutes for focus group.

Types of Respondents: Individuals and households, businesses and non-profit organizations, and state, local or Tribal Government.

Estimated Annual Number of Respondents: 1,300.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 276 hours.

Comment is invited on: (1) whether this collection of information is necessary for the stated purposes and

the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission request for Office of Management and Budget for reapproval of the ICR as revised.

JoLynn Anderson,
Liason.

BILLING CODE 3411-15-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[S-224-2024]

Foreign-Trade Zone 247; Application for Subzone; Cummins Inc.; Irvine, Pennsylvania

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the Erie-Western Pennsylvania Port Authority, grantee of FTZ 247, requesting subzone status for the facility of Cummins Inc., located in Irvine, Pennsylvania. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the FTZ Board (15 CFR part 400). It was formally docketed on December 20, 2024.

The proposed subzone (5.87 acres) is located at 200 Murray Drive, Irvine, Pennsylvania. No authorization for production activity has been requested at this time. The proposed subzone would be subject to the existing activation limit of FTZ 247.

In accordance with the FTZ Board's regulations, Juanita Chen of the FTZ Staff is designated examiner to review the application and make recommendations to the Executive Secretary.

Public comment is invited from interested parties. Submissions shall be

addressed to the FTZ Board's Executive Secretary and sent to: ftz@trade.gov. The closing period for their receipt is February 10, 2025. Rebuttal comments in response to material submitted during the foregoing period may be submitted through February 24, 2025.

A copy of the application will be available for public inspection in the "Online FTZ Information Section" section of the FTZ Board's website, which is accessible via www.trade.gov/ftz.

For further information, contact Juanita Chen at juanita.chen@trade.gov.

Dated: December 20, 2024.

Elizabeth Whiteman,
Executive Secretary.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-520-804]

Certain Steel Nails From the United Arab Emirates: Final Results of Antidumping Duty Administrative Review; 2022-2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that sales of certain steel nails from the United Arab Emirates were not made at less than normal value during the period of review (POR) May 1, 2022, through April 30, 2023.

DATES: Applicable December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Olivia Woolverton or Brittany Bauer, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-7452 or (202) 482-3860, respectively.

SUPPLEMENTARY INFORMATION:

Background

On June 11, 2024, Commerce published the *Preliminary Results* and invited interested parties to comment.¹ This review covers two respondents: Master Nails and Pins Manufacturing, LLC/Middle East Manufacturing Steel

LLC (collectively, Master) and Rich Well Steel Industries LLC (Rich Well).

On July 11, 2024, the petitioner² submitted two case briefs (one for issues related to Master and another for issues related to Rich Well),³ and on July 23, 2024, Master⁴ and Rich Well⁵ submitted rebuttal briefs. On July 22, 2024, Commerce tolled certain deadlines in this administrative proceeding by seven days.⁶ On September 27, 2024, we extended the deadline for these final results to December 13, 2024.⁷ Additionally, on December 9, 2024, Commerce tolled the deadline to issue the final results in this administrative review by 90 days.⁸ Accordingly, the deadline for these final results is now March 13, 2025. For a complete description of the events that occurred since the *Preliminary Results*, see the Issues and Decision Memorandum.⁹ Commerce conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Order¹⁰

The products covered by this *Order* are certain steel nails from the United Arab Emirates. For a full description of the scope, see the Issues and Decision Memorandum.

Analysis of Comments Received

We addressed the issues raised in the case and rebuttal briefs in the Issues and Decision Memorandum. A list of the issues addressed in the Issues and Decision Memorandum is included in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically

² The petitioner is Mid Continent Steel & Wire, Inc.

³ See Petitioner's Letters, "Case Brief {Master}," and "Case Brief {Richwell}," both dated July 11, 2024.

⁴ See Master's Letter, "Rebuttal Brief of Master," dated July 23, 2024.

⁵ See Rich Well's Letter, "Rich Well Steel Industries LLC Rebuttal to the Petitioner's Case Brief," dated July 23, 2024.

⁶ See Memorandum, "Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings," dated July 22, 2024.

⁷ See Memorandum, "Extension of Deadline for Final Results of Antidumping Duty Administrative Review," dated September 27, 2024.

⁸ See Memorandum, "Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings," dated December 9, 2024.

⁹ See Memorandum, "Issues and Decision Memorandum for the Final Results of the Antidumping Duty Administrative Review of Certain Steel Nails from the United Arab Emirates; 2022-2023," dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

¹⁰ See *Certain Steel Nails from the United Arab Emirates: Amended Final Determination of Sales at Less Than Fair Value and Antidumping Duty Order*, 77 FR 27421 (May 10, 2012) (*Order*).

¹ See *Certain Steel Nails from the United Arab Emirates: Preliminary Results of Antidumping Duty Administrative Review, and Partial Recission; 2022-2023*, 89 FR 49150 (June 11, 2024) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Changes Since the Preliminary Results

Based on our review of the record and comments received from interested parties, we have made changes to the *Preliminary Results* margin calculation for Master.¹¹ However, Master's margin remains unchanged from the *Preliminary Results*.

Final Results of Review

Commerce determines that the following estimated weighted-average dumping margins exist for the period May 1, 2022, through April 30, 2023:

Exporter/producer	Weighted average dumping margin (percent)
Master Nails and Pins Manufacturing, LLC/Middle East Manufacturing Steel, LLC	0.00
Rich Well Steel Industries LLC	0.00

Disclosure

Commerce intends to disclose the calculations performed in connection with these final results of review (with respect to Master's revised dumping margin calculation) to interested parties within five days after public announcement of the final results or, if there is no public announcement, within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Consistent with section 751(a)(2) of the Act and 19 CFR 351.212(b)(1), Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries covered by an administrative review. Because the weighted-average dumping margins for Master and Rich Well are zero, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

Consistent with Commerce's assessment practice, for entries of subject merchandise during the POR produced by Master or Rich Well for which they did not know their merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.¹²

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2) of the Act: (1) the cash deposit rates for Master and Rich Well will be the weighted-average dumping margins established in the final results of this administrative review; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the producer has been covered in a prior completed segment of this proceeding, the cash deposit rate will be the company-specific rate established for the most recent period for the producer of the merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 4.30 percent.¹³ These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a

¹² For a full discussion of this practice, see *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003).

¹³ See *Order*, 77 FR at 27422.

certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties has occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: December 19, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE**International Trade Administration****[A-337-808]****Certain Glass Wine Bottles From Chile: Termination of Less-Than-Fair-Value Investigation**

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: Based on a withdrawal of the antidumping duty (AD) petition on certain glass wine bottles from Chile by the U.S. Glass Producers Coalition (the petitioner), we are terminating this less than-fair-value (LTFV) investigation.

DATES: Applicable December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Dusten Hom or Joshua Weiner, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-5075 or (202) 482-3902, respectively.

SUPPLEMENTARY INFORMATION:**Background**

On December 29, 2023, the U.S. Department of Commerce (Commerce) received an AD petition concerning imports of certain glass wine bottles from Chile, filed in proper form by the petitioner.¹ On January 25, 2024, Commerce published the notice of initiation of this LTFV investigation.² On August 9, 2024, Commerce published its preliminary determination in the LTFV investigation of certain glass wine bottles from Chile.³ On December 10, 2024, the petitioner submitted a letter withdrawing the AD Petition with respect to Chile.⁴ On December 16, 2024, Saverglass, Inc.; Saverglass S. de R.L. de C.V.; Fevisa Comercial S.A. de C.V.; Fevisa Industrial S.A. de C.V.; Encore Glass; and TricorBraun Inc. (collectively, the interested parties) filed opposition to

the petitioner's withdrawal of the AD Petition with respect to Chile.⁵ On December 18, 2024, the petitioner filed a response to the interested parties' opposition.⁶ On December 20, 2024, interested parties filed additional comments opposing termination of the investigation.⁷

Termination of the Investigation

Section 351.207(b)(1) of Commerce's regulations stipulates that the Secretary may terminate an investigation, provided it has concluded that termination of the investigation is in the public interest.⁸ After considering the information on the record of this proceeding, including the petitioner's withdrawal letter, and the comments received from interested parties, Commerce has concluded that termination of this investigation is in the public interest. Accordingly, pursuant to section 734(a)(1)(A) of the Tariff Act of 1930, as amended and 19 CFR 351.207(b)(1), we are terminating the LTFV investigation of certain glass wine bottles from Chile.

Suspension of Liquidation

In the *Preliminary Determination*, Commerce determined weighted-average dumping margins for exporters of certain glass wine bottles from Chile that were above *de minimis*. Therefore, we instructed U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of certain glass wine bottles from Chile as of August 9, 2024, the date of publication of the *Preliminary Determination*.⁹ Because Commerce is terminating this LTFV investigation, we will instruct U.S. Customs and Border Protection to terminate suspension of

liquidation and refund any cash deposits of estimated antidumping duties for entries of certain glass wine bottles from Chile.

Administrative Protective Order

This notice serves as a reminder to parties subject to administrative protective order (APO) of their responsibilities concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a violation that is subject to sanction.

Dated: December 20, 2024.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE**International Trade Administration****Notice of Scope Ruling Applications Filed in Antidumping and Countervailing Duty Proceedings**

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) received scope ruling applications, requesting that scope inquiries be conducted to determine whether identified products are covered by the scope of antidumping duty (AD) and/or countervailing duty (CVD) orders and that Commerce issue scope rulings pursuant to those inquiries. In accordance with Commerce's regulations, we are notifying the public of the filing of the scope ruling applications listed below in the month of November 2024.

DATES: Applicable December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Terri Monroe, AD/CVD Operations, Customs Liaison Unit, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, telephone: (202) 482-1384.

SUPPLEMENTARY INFORMATION:**Notice of Scope Ruling Applications**

In accordance with 19 CFR 351.225(d)(3), we are notifying the public of the following scope ruling

¹ See Petitioner's Letter, "Certain Glass Wine Bottles from the People's Republic of China, the United Mexican States, and Chile: Petitions for the Imposition of Antidumping and Countervailing Duties," dated December 29, 2023 (AD Petition).

² See *Certain Glass Wine Bottles from Chile, the People's Republic of China, and Mexico: Initiation of Less-Than-Fair-Value Investigations*, 89 FR 4911 (January 25, 2024).

³ See *Certain Glass Wine Bottles from Chile: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures*, 89 FR 65325 (August 9, 2024) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum.

⁴ See Petitioner's Letter, "Withdrawal of Petition," dated December 10, 2024.

applications related to AD and CVD orders and findings filed in or around the month of November 2024. This notification includes, for each scope application: (1) identification of the AD and/or CVD orders at issue (19 CFR 351.225(c)(1)); (2) concise public descriptions of the products at issue, including the physical characteristics (including chemical, dimensional and technical characteristics) of the products (19 CFR 351.225(c)(2)(ii)); (3) the countries where the products are produced and the countries from where the products are exported (19 CFR 351.225(c)(2)(i)(B)); (4) the full names of the applicants; and (5) the dates that the scope applications were filed with Commerce and the name of the ACCESS scope segment where the scope applications can be found.¹ This notice does not include applications which have been rejected and not properly resubmitted. The scope ruling applications listed below are available on Commerce's online e-filing and document management system, Antidumping and Countervailing Duty Electronic Service System (ACCESS), at <https://access.trade.gov>.

Scope Ruling Applications

Wood Mouldings and Millwork Products from the People's Republic of China (China) (A–570–117/C–570–118); Feedstock for wooden slats for window blinds; feedstock for wooden bottom rails for window blinds; feedstock for wooden valances for window;

¹ See *Regulations to Improve Administration and Enforcement of Antidumping and Countervailing Duty Laws*, 86 FR 52300, 52316 (September 20, 2021) (*Final Rule*) (“It is our expectation that the Federal Register list will include, where appropriate, for each scope application the following data: (1) identification of the AD and/or CVD orders at issue; (2) a concise public summary of the product's description, including the physical characteristics (including chemical, dimensional and technical characteristics) of the product; (3) the country(ies) where the product is produced and the country from where the product is exported; (4) the full name of the applicant; and (5) the date that the scope application was filed with Commerce.”)

² The products are basswood slat stock, basswood bottom rail stock, and basswood valance stock for use in the production of wooden slats for blinds, wooden bottom rails for blinds, and wooden valances for blinds (collectively, feedstock). Slat stock made from basswood that is cut to specific widths (nominally 1 inch or 2 inches, with actual widths being within tolerances) and specific thicknesses (nominally 0.110 inches, with actual widths being within tolerances). Bottom rail stock is cut to specific widths (nominally 1 inch or 2 inches, with actual widths being within tolerances) and specific thicknesses (nominally 0.590 inches, with actual widths being within tolerances). Valance stock is cut to specific widths (nominally 2.5 inches or 3.25 inches, with actual widths being within tolerances) and specific thicknesses (nominally 0.315 inches or 0.590 inches, with actual thicknesses being within tolerances). The feedstock stock lengths are between 20 inches and 96 inches. The feedstock is covered with a UV

produced in and exported from China; submitted by Blinds to Go (US), Inc.; November 15, 2024; ACCESS scope segment “Blinds to Go Feedstock.”

Aluminum Extrusions from China (A–570–967/C–570–968); Cable Display Kits;³ produced in and exported from China; submitted by MBS Cable Display Systems (MBS Cable); November 25, 2024; ACCESS scope segment “MBS Cable Display Systems.”

Notification to Interested Parties

This list of scope ruling applications is not an identification of scope inquiries that have been initiated. In accordance with 19 CFR 351.225(d)(1), if Commerce has not rejected a scope ruling application nor initiated the scope inquiry within 30 days after the filing of the application, the application will be deemed accepted and a scope inquiry will be deemed initiated the following day—day 31.⁴ Commerce's practice generally dictates that where a deadline falls on a weekend, Federal holiday, or other non-business day, the appropriate deadline is the next business day.⁵ Accordingly, if the 30th day after the filing of the application falls on a non-business day, the next business day will be considered the “updated” 30th day, and if the application is not rejected or a scope inquiry initiated by or on that particular

protected finish on all surfaces except the ends. The feedstock is not finger-jointed.

³ The products are cable display systems used to support and display visual media (photographs, artworks, etc.) and are composed of a steel cable that is anchored to a wall, ceiling, or floor, and the media is hung from the cable. Cable display systems can be categorized as: (a) suspended cable display kits, and (b) mounted cable display kits. Suspended cable display kits are cable display systems where one end of the steel cable is anchored onto the ceiling (or wall), and the other end of the cable is attached to the visual media on display. Mounted cable display kits are cable display systems where the steel cable is anchored at both ends, either onto the wall, ceiling, floor, and any combination thereof. Cable display systems are sold as complete kits, ready to be assembled and installed as imported, including all necessary components: steel cables, fittings milled from extruded aluminum, screws, anchors, and Allen wrenches. The products may have clear anodized or matte black for certain finishings, and may have different steel cable diameters, between 1/16” and 1/8”. The products may have different steel cable lengths, including 1.14 inches, 36 inches and 78 inches.

⁴ In accordance with 19 CFR 351.225(d)(2), within 30 days after the filing of a scope ruling application, if Commerce determines that it intends to address the scope issue raised in the application in another segment of the proceeding (such as a circumvention inquiry under 19 CFR 351.226 or a covered merchandise inquiry under 19 CFR 351.227), it will notify the applicant that it will not initiate a scope inquiry, but will instead determine if the product is covered by the scope at issue in that alternative segment.

⁵ See *Notice of Clarification: Application of “Next Business Day” Rule for Administrative Determination Deadlines Pursuant to the Tariff Act of 1930, As Amended*, 70 FR 24533 (May 10, 2005).

business day, the application will be deemed accepted and a scope inquiry will be deemed initiated on the next business day which follows the “updated” 30th day.⁶

In accordance with 19 CFR 351.225(m)(2), if there are companion AD and CVD orders covering the same merchandise from the same country of origin, the scope inquiry will be conducted on the record of the AD proceeding. Further, please note that pursuant to 19 CFR 351.225(m)(1), Commerce may either apply a scope ruling to all products from the same country with the same relevant physical characteristics, (including chemical, dimensional, and technical characteristics) as the product at issue, on a country-wide basis, regardless of the producer, exporter, or importer of those products, or on a company-specific basis.

For further information on procedures for filing information with Commerce through ACCESS and participating in scope inquiries, please refer to the Filing Instructions section of the Scope Ruling Application Guide, at https://access.trade.gov/help/Scope_Ruling_Guidance.pdf. Interested parties, apart from the scope ruling applicant, who wish to participate in a scope inquiry and be added to the public service list for that segment of the proceeding must file an entry of appearance in accordance with 19 CFR 351.103(d)(1) and 19 CFR 351.225(n)(4). Interested parties are advised to refer to the case segment in ACCESS as well as 19 CFR 351.225(f) for further information on the scope inquiry procedures, including the timelines for the submission of comments.

Please note that this notice of scope ruling applications filed in AD and CVD proceedings may be published before any potential initiation, or after the initiation, of a given scope inquiry based on a scope ruling application identified in this notice. Therefore, please refer to the case segment on ACCESS to determine whether a scope ruling application has been accepted or rejected and whether a scope inquiry has been initiated.

Interested parties who wish to be served scope ruling applications for a particular AD or CVD order may file a request to be included on the annual inquiry service list during the anniversary month of the publication of the AD or CVD order in accordance with

⁶ This structure maintains the intent of the applicable regulation, 19 CFR 351.225(d)(1), to allow day 30 and day 31 to be separate business days.

19 CFR 351.225(n) and Commerce's procedures.⁷

Interested parties are invited to comment on the completeness of this monthly list of scope ruling applications received by Commerce. Any comments should be submitted to Scot Fullerton, Acting Deputy Assistant Secretary for AD/CVD Operations, Enforcement and Compliance, International Trade Administration, via email to CommerceCLU@trade.gov.

This notice of scope ruling applications filed in AD and CVD proceedings is published in accordance with 19 CFR 351.225(d)(3).

Dated: December 20, 2024.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[A–201–820]

Agreement Suspending the Antidumping Duty Investigation on Fresh Tomatoes From Mexico: Final Results of the 2021–2022 Administrative Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that the respondents selected for individual examination, respectively, Ceuta Produce S.A. DE C.V. (Ceuta) and Valores Horticolas Del Pacifico S.A. De C.V. (VALHPAC) (collectively, respondents), were in compliance with the terms of the 2019 Agreement Suspending the Antidumping Duty Investigation on Fresh Tomatoes from Mexico (2019 Agreement) during the period of review (POR) from September 1, 2021, through August 31, 2022, except for certain instances of inadvertent or inconsequential noncompliance. Commerce also determines that the 2019 Agreement met the applicable statutory requirements during the POR.

DATES: Applicable December 30, 2024.

FOR FURTHER INFORMATION CONTACT:

Sally C. Gannon or David Cordell, Enforcement and Compliance, International Trade Administration,

U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0162 or (202) 482–0408, respectively.

SUPPLEMENTARY INFORMATION:

Background

On October 10, 2023, Commerce published the preliminary results of this administrative review, and we invited interested parties to comment.¹ On November 9, 2023, the Florida Tomato Exchange (FTE), a member of the U.S. petitioning industry, filed a case brief.² On November 16, 2023, Ceuta and VALHPAC filed a joint rebuttal brief.³ Commerce extended the date for the publication of the final results until December 16, 2024.⁴ On December 9, 2024, Commerce tolled the deadlines for all preliminary and final determinations by 90 days.⁵

Scope of 2019 Agreement

The merchandise subject to this 2019 Agreement is all fresh or chilled tomatoes (fresh tomatoes) which have Mexico as their origin, except for those tomatoes which are for processing. For purposes of this 2019 Agreement, processing is defined to include preserving by any commercial process, such as canning, dehydrating, drying, or the addition of chemical substances, or converting the tomato product into juices, sauces, or purees. In Appendix F of this 2019 Agreement, Commerce has outlined the procedure that Signatories must follow for selling subject merchandise for processing. Fresh tomatoes that are imported for cutting up, not further processing (e.g., tomatoes used in the preparation of fresh salsa or salad bars), are covered by this 2019 Agreement. Commercially grown tomatoes, both for the fresh market and for processing, are classified as *Lycopersicon esculentum*. Important commercial varieties of fresh tomatoes include common round, cherry, grape,

plum, greenhouse, and pear tomatoes, all of which are covered by this 2019 Agreement. Tomatoes imported from Mexico covered by this 2019 Agreement are classified under the following subheading of the Harmonized Tariff Schedules of the United States (HTSUS), according to the season of importation: 0702. Although this HTSUS number is provided for convenience and customs purposes, the written description of the scope of this Agreement is dispositive.

A full description of the scope of the 2019 Agreement is also contained in the Issues and Decision Memorandum.

Analysis

Commerce continues to find, based on record evidence, that the selected respondents, Ceuta and VALHPAC, were in compliance with the terms of the 2019 Agreement during the POR, with the exception of certain inconsequential or inadvertent non-compliance. Overall, Commerce finds that there have been no material or consequential violations of the 2019 Agreement by the selected respondents during the POR. We also determine that the 2019 Agreement is meeting the applicable statutory requirements for a suspension agreement, e.g., preventing price suppression or undercutting, and effective monitoring is practicable.

The issues raised in the case and rebuttal briefs are addressed in the accompanying Issues and Decision Memorandum. The issues are identified in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Administrative Protective Order (APO)

This notice also serves as a reminder to parties subject to APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Certain Steel Nails From the Sultanate of Oman: Final Results of Antidumping Duty Administrative Review; 2022–2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that Oman Fasteners, LLC (Oman Fasteners), the sole producer and exporter subject to this administrative review, did not make sales of certain steel nails (steel nails) from the Sultanate of Oman (Oman) in the United States at prices below normal value (NV) during the period of review (POR), July 1, 2022, through June 30, 2023.

DATES: Applicable December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Dakota Potts, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0223.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 2024, Commerce published the *Preliminary Results* of this administrative review and we

invited interested parties to comment.¹ On December 6, 2024, we extended the deadline for these final results by 60 days, until no later than February 10, 2025.² On December 9, 2024, Commerce tolled the deadline to issue the final results in this administrative review by 90 days.³ A summary of the events that occurred since Commerce published the *Preliminary Results*, as well as a full discussion of the issues raised by parties for these final results, are discussed in the Issues and Decision Memorandum.⁴

Scope of the Order⁵

The product covered by this *Order* is steel nails from Oman. For a complete description of the scope of the *Order*, see the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the parties’ case and rebuttal briefs are addressed in the Issues and Decision Memorandum and are listed in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on-file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Changes Since the Preliminary Results

Based on comments received from interested parties regarding our *Preliminary Results* and our review of

¹ See *Certain Steel Nails from the Sultanate of Oman: Preliminary Results and Rescission, in Part, of Antidumping Duty Administrative Review; 2022–2003*, 89 FR 65593 (August 12, 2024) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

² Because the current deadline for these final results falls on the weekend (i.e., February 8, 2025), the deadline became the next business day (i.e., February 10, 2025). See *Notice of Clarification: Application of “Next Business Day” Rule for Administrative Determination Deadlines Pursuant to the Tariff Act of 1930, As Amended*, 70 FR 24533 (May 10, 2005); see also Memorandum, “Extension of Deadline for Final Results of Antidumping Duty Administrative Review,” dated December 6, 2024.

³ See Memorandum, “Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings,” dated December 9, 2024.

⁴ See Memorandum, “Issues and Decision Memorandum for the Final Results of the 2022–2023 Administrative Review of the Antidumping Duty Order on Certain Steel Nails from the Sultanate of Oman,” dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

⁵ See *Certain Steel Nails from the Republic of Korea, Malaysia, the Sultanate of Oman, Taiwan, and the Socialist Republic of Vietnam: Antidumping Duty Orders*, 80 FR 39994 (July 13, 2015) (*Order*).

the record to address those comments, we made changes to the preliminary weighted-average dumping margin calculations for Oman Fasteners, as detailed in the Issues and Decision Memorandum.⁶

Final Results of Review

As a result of this review, we determine the following weighted-average dumping margin exists for the POR:

Exporter or producer	Weighted-average dumping margin (percent)
Oman Fasteners, LLC	0.00

Disclosure

Commerce intends to disclose the calculations performed for these final results within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Commerce has determined, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with these final results of review.⁷ Pursuant to 19 CFR 351.212(b)(1), we calculated importer-specific *ad valorem* duty assessment rates based on the ratio of the total amount of dumping calculated for the examined sales to the total entered value of the sales for which entered value was reported. Where the respondent’s weighted-average dumping margin is zero or *de minimis* within the meaning of 19 CFR 351.106(c)(1), or an importer-specific assessment rate is zero or *de minimis*, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

Commerce’s “automatic assessment” practice will apply to entries of subject merchandise during the POR produced by companies included in these final results of review for which the reviewed companies did not know that the merchandise it sold to the intermediary (e.g., a reseller, trading company, or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.⁸

⁶ See Issues and Decision Memorandum at 3–4.
⁷ See 19 CFR 351.212(b).
⁸ For a full discussion of this practice, see *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003).

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

Cash Deposit Requirements

The following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the companies listed above will be equal to the weighted-average dumping margin that is established in the “Final Results of Review”; (2) for previously investigated or reviewed companies not subject to this review, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which the company participated; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value (LTFV) investigation, but the producer is, the cash deposit rate will be the rate established for the most recently completed segment of the proceeding for the producer of the merchandise; and (4) the cash deposit rate for all other producers and exporters will continue to be 9.10 percent *ad valorem*, the all-others rate established in the LTFV investigation.⁹ These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers Regarding the Reimbursement of Duties

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during the POR. Failure to comply with this requirement could result in Commerce’s presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

⁹ See Order.

Administrative Protective Order

This notice also serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5) and 19 CFR 351.213(h)(1).

Dated: December 19, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

International Trade Administration

[C–570–980]

Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled Into Modules, From the People’s Republic of China: Notice of Court Decision Not in Harmony with the Results of Countervailing Duty Administrative Review; Notice of Amended Final Results

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On December 18, 2024, the U.S. Court of International Trade (CIT)

issued its final judgment in *Risen Energy Co., Ltd., v. United States*, Court No. 23–00153, sustaining the U.S. Department of Commerce’s (Commerce) remand results pertaining to the administrative review of the countervailing duty (CVD) order on crystalline silicon photovoltaic cells, whether or not assembled into modules (solar cells), from the People’s Republic of China (China) covering the period January 1, 2020 through December 31, 2020. Commerce is notifying the public that the CIT’s final judgment is not in harmony with Commerce’s final results of the administrative review, and that Commerce is amending the final results with respect to the countervailable subsidy rate assigned to producer and/or exporter Risen Energy Co., Ltd. (Risen).

DATES: Applicable December 28, 2024.

FOR FURTHER INFORMATION CONTACT: Lingjun Wang, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–2316.

SUPPLEMENTARY INFORMATION:

Background

On July 11, 2023, Commerce published its Final Results in the 2020 CVD administrative review of solar cells from China. Commerce found that the Government of China failed to cooperate to the best of its ability and, as adverse facts available, found that Risen used and benefited from the Export Buyer’s Credit Program (EBCP).¹

After correcting ministerial errors contained in the Final Results, on August 11, 2023, Commerce published the Amended Final Results, where we corrected the calculation of the countervailable subsidy rate for Risen from 14.27 percent to 18.95 percent.²

Risen appealed Commerce’s Final Results/Amended Final Results to the CIT. On August 16, 2024, the CIT remanded the Final Results/Amended Final Results to Commerce. The CIT directed Commerce on remand to either attempt verification of the non-use certifications to determine more accurately what proportion of the sales

¹ See *Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled into Modules, from the People’s Republic of China: Final Results of Countervailing Duty Administrative Review; 2020*, 88 FR 44108 (July 11, 2023) (*Final Results*), and accompanying Issues and Decision Memorandum (IDM).

² See *Notice of Correction to the Final Results, and Amended Final Results of Countervailing Duty Administrative Review; 2020* (August 11, 2023) (*Amended Final Results*).

Risen is able to account for, or to remove at least the portion of the EBCP rate attributable to the customers demonstrating non-use from the calculation of Risen's overall subsidy rate.³

In its final Remand Redetermination,⁴ issued in November 2024, Commerce found that pro-rating Risen's subsidy rate to account for the number of non-use certifications provided by its U.S. customers is inconsistent with Commerce's practice and the AFA hierarchy. Commerce removed the 5.46 percent EBCP AFA rate from Risen's total countervailable subsidy rate.⁵ The CIT sustained Commerce's Remand Redetermination.⁶

Timken Notice

In its decision in Timken,⁷ as clarified by Diamond Sawblades,⁸ the Court of Appeals for the Federal Circuit held that, pursuant to section 516A(c) and (e) of the Tariff Act of 1930, as amended (the Act), Commerce must publish a notice of court decision that is not "in harmony" with a Commerce determination and must suspend liquidation of entries pending a "conclusive" court decision. The CIT's December 18, 2024, judgment constitutes a final decision of the CIT that is not in harmony with Commerce's Final Results/Amended Final Results. Thus, this notice is published in fulfillment of the publication requirements of Timken.

Amended Final Results

Because there is now a final court judgment, Commerce is amending its Final Results and Amended Final Results with respect to producer and/or exporter Risen's countervailable subsidy rate for the period of January 1, 2020, through December 31, 2020, as follows:

Producer/ exporter	Subsidy rate (percent ad valorem)
Risen Energy Co., Ltd. ⁹	13.49

Cash Deposit Requirements

Because Risen does not have a superseding cash deposit rate, Commerce will issue revised cash deposit instructions to U.S. Customs and Border Protection (CBP).

Liquidation of Suspended Entries

At this time, Commerce remains enjoined by the CIT order from liquidating entries that: were produced and/or exported by Risen, and were entered, or withdrawn from warehouse, for consumption during the period January 1, 2020 through December 31, 2020. These entries will remain enjoined pursuant to the terms of the injunction during the pendency of any appeals process.

In the event the CIT's ruling is not appealed, or, if appealed, upheld by a final and conclusive court decision, Commerce intends to instruct CBP to assess countervailing duties on unliquidated entries of subject merchandise produced and/or exported by Risen in accordance with 19 CFR 351.212(b). We will instruct CBP to assess countervailing duties on all appropriate entries covered by this review when the ad valorem rate is not zero or de minimis. Where an ad valorem subsidy rate is zero or de minimis,¹⁰ we will instruct CBP to liquidate the appropriate entries without regard to countervailing duties.

Notification to Interested Parties

This notice is issued and published in accordance with sections 516A(c) and (e) and 777(i)(1) of the Act.

Dated: December 20, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Silicomanganese From India: Final Results and Partial Rescission of Antidumping Duty Administrative Review; 2022-2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) finds that Maithan Alloys Limited (MAL) made sales of subject merchandise at less than normal value during the period of review (POR) May 1, 2022, through April 30, 2023. Additionally, we are rescinding the review with respect to Rajadhiraj Tirupani Vinayak Natraj Pvt. Ltd. (RTVN), because we find that it had no shipments of subject merchandise during the POR.

DATES: Applicable December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Sarah Keith, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-0264.

SUPPLEMENTARY INFORMATION:

Background

On June 11, 2024, Commerce published the preliminary results of the 2022-2023 administrative review of the antidumping duty order on silicomanganese from India.¹ We invited interested parties to comment on the *Preliminary Results*.² No interested parties submitted comments; thus, no decision memoranda accompany this notice. The *Preliminary Results* are hereby adopted as the final results of this review. Commerce conducted this review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act). On October 16, 2024, in accordance with section 751(a)(3)(A) of the Act, Commerce extended the deadline for the final results of this review by 60 days, until December 16, 2024.³ On December 9,

¹ See *Silicomanganese from India: Preliminary Results, Preliminary Results of Antidumping Duty Administrative Review and Intent to Rescind, in Part; 2022-2023*, 89 FR 49152 (June 11, 2024) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum (PDM).

² See *Preliminary Results*, 89 FR at 49153.

⁹ This rate applies Risen Energy Co., Ltd. and its cross-owned companies: Risen Energy (Luoyang) Co., Ltd.; Risen Energy (Wuhai) Co., Ltd.; Risen Energy (Changzhou) Co., Ltd.; Risen Energy (Ningbo) Co., Ltd.; Risen Energy (Yiwu) Co., Ltd.; Zhejiang Boxin Investment Co., Ltd.; Zhejiang Twinsele Electronic Technology Co., Ltd.; Jiangsu Sveck New Material Co., Ltd.; Changzhou Sveck

2024, Commerce tolled the deadlines to issue the preliminary or final results in all ongoing administrative reviews by 90 days.⁴ Accordingly, the deadline for Commerce to issue the final results in this administrative review is now March 17, 2025.

Scope of the Order⁵

The merchandise covered by the scope of the *Order* is silicomanganese from India. A full description of the scope of the *Order* is provided in the *Preliminary Results*.⁶

Rescission of Administrative Review, in Part

In the *Preliminary Results*, we stated that we intended to rescind this review with respect to RTVN, which we preliminarily found had no shipments of subject merchandise during the POR, pursuant to 19 CFR 351.213(d)(3).⁷ No party filed comments with respect to our preliminary finding and intent to rescind the review. Therefore, we are rescinding the administrative review with respect to RTVN.

Final Results of the Review

We determine the following estimated weighted-average dumping margin for the period May 1, 2022, through April 30, 2023.

Exporter/producer	Weight-average dumping margin (percent)
Maithan Alloys Limited	1.71

Disclosure

Because Commerce received no comments on the *Preliminary Results*, we have not modified our analysis. Consequently, there are no calculations to disclose in accordance with 19 CFR 351.224(b) for these final results.

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(1), Commerce will determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review. If the

weighted-average dumping margin is not zero or *de minimis* (i.e., less than 0.50 percent), upon completion of the final results, Commerce intends to calculate importer-specific assessment rates on the basis of the ratio of the total amount of dumping calculated for each importer's examined sales to the total entered value of those sales. Where we do not have entered values for all U.S. sales to a particular importer, we will calculate an importer-specific, per-unit assessment rate on the basis of the ratio of the total amount of dumping calculated for the importer's examined sales to the total quantity of those sales.⁸ To determine whether an importer-specific, per-unit assessment rate is *de minimis*, in accordance with 19 CFR 351.106(c)(2), we also will calculate an importer-specific *ad valorem* ratio based on estimated entered values. Where the weighted-average dumping margin is zero or *de minimis*, or an importer-specific *ad valorem* assessment rate is zero or *de minimis*, we will instruct CBP to liquidate appropriate entries without regard to antidumping duties.⁹

For entries of subject merchandise during the POR produced by MAL for which it did not know that the merchandise it sold to the intermediary (e.g., reseller, trading company, or exporter) was destined for the United States, we will instruct CBP to liquidate such entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.¹⁰

For the company for which we are rescinding this review, we will instruct CBP to assess antidumping duties on all appropriate entries at a rate equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue these rescission instructions to CBP no earlier than 35 days after the publication of this notice in the **Federal Register**.

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of these final results in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant

entries until the time for parties to file a request for a statutory injunction has expired (i.e., within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review, as provided for by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the companies under review will equal to the dumping margin established in the final results of this review for each respondent (except, if that rate is *de minimis*, then the cash deposit rate will be zero); (2) for producers or exporters not covered in this review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently-completed segment of this proceeding in which they were reviewed; (3) if the exporter is not a firm covered in this review or a prior segment of the proceeding but the producer is, then the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the producer of the merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 17.74 percent, the all-others rate established in the less-than-fair-value investigation.¹¹ These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of double antidumping duties, and/or an increase in the amount of antidumping duties by the amount of the countervailing duties.

Administrative Protective Order (APO)

This notice also serves as a reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information

Polyethylene Terephthalate Film, Sheet, and Strip From India: Final Results of Countervailing Duty Administrative Review; 2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.
SUMMARY: The U.S. Department of Commerce (Commerce) determines that certain producers and exporters of polyethylene terephthalate film, sheet, and strip (PET film) from India received countervailable subsidies during the period of review (POR) January 1, 2022, through December 31, 2022.
DATES: Applicable December 30, 2024.
FOR FURTHER INFORMATION CONTACT: Stefan Smith, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4342.
SUPPLEMENTARY INFORMATION:

Background

On August 12, 2024, Commerce published the *Preliminary Results* of this administrative review in the *Federal Register* and invited comments from interested parties.¹ On December

2, 2024, we extended the deadline for the final results of this review to no later than January 15, 2025.² Additionally, on December 9, 2024, Commerce tolled the deadline to issue the final results in this administrative review by 90 days.³ Accordingly, the deadline for the final results is now April 15, 2025.
For a complete description of the events that occurred since the *Preliminary Results*, see the Issues and Decision Memorandum.⁴ Commerce conducted this review in accordance with section 751(a)(1)(A) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order⁵

The merchandise covered by the Order is PET film from India. For a complete description of the scope of the Order, see the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the case brief submitted by interested parties in this review are addressed in the Issues and Decision Memorandum. The topics discussed and the issues raised by parties to which we responded in the Issues and Decision Memorandum are listed in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance’s Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at <https://access.trade.gov/public/FRNoticesListLayout.aspx>.

Changes Since the Preliminary Results

Based on our analysis of comments received from interested parties, we made changes to the net countervailable subsidy rates for Jindal Poly Films Limited (Jindal). For a discussion of these changes, see the Issues and Decision Memorandum.

(August 12, 2024) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.
² See Memorandum, “Extension of Deadline for Final Results of Countervailing Duty Administrative Review,” dated December 2, 2024.
³ See Memorandum, “Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings,” dated December 9, 2024.
⁴ See Memorandum, “Issues and Decision Memorandum for the Final Results of the Countervailing Duty Administrative Review of Polyethylene Terephthalate Film, Sheet, and Strip from India; 2022,” dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).
⁵ See *Countervailing Duty Order; Polyethylene Terephthalate Film, Sheet, and Strip (PET Film) from India*, 67 FR 44179 (July 1, 2002) (*Order*).

Methodology

Commerce conducted this administrative review in accordance with section 751(a)(1)(A) of the Act. For each of the subsidy programs found to be countervailable, we find that there is a subsidy, *i.e.*, a government-provided financial contribution that gives rise to a benefit to the recipient, and that the subsidy is specific.⁶ In making this final determination, Commerce relied, in part, on facts otherwise available, including with an adverse inference, pursuant to sections 776(a) and (b) of the Act. For a complete description of the methodology underlying all of Commerce’s conclusions, see the Issues and Decision Memorandum.

Final Results of the Administrative Review

Commerce determines that the following net countervailable subsidy rates exist for the period January 1, 2022, through December 31, 2022:

Producer/exporter	Subsidy rate (percent <i>ad valorem</i>)
Jindal Poly Films Limited	* 122.75
Garware Hi-Tech Films Limited	4.96

* Rate is based on facts available with adverse inferences.

Disclosure

Commerce intends to disclose to interested parties the calculations performed in connection with these final results within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of the notice of final results in the *Federal Register*, in accordance with 19 CFR 351.224(b). However, we did not make any changes from the preliminary subsidy rates calculated for Garware Hi-Tech Films Limited (Garware); therefore, we will not disclose any calculation documents for Garware for these final results of review.

Assessment

In accordance with section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(2), Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, countervailing duties on all appropriate entries covered by this review. Commerce intends to issue assessment instructions to CBP no earlier than 35 days after publication of the final results

¹ See *Polyethylene Terephthalate Film, Sheet, and Strip from India: Preliminary Results of Countervailing Duty Administrative Review and Rescission of Review, in Part; 2022*, 89 FR 65591
⁶ See sections 771(5)(B) and (D) of the Act regarding financial contribution; section 771(5)(E) of the Act regarding benefit; and section 771(5A) of the Act regarding specificity.

of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.*, within 90 days of publication).

Cash Deposit Requirements

In accordance with section 751(a)(1) of the Act, Commerce also intends to instruct CBP to collect cash deposits of estimated countervailing duties in the amounts shown for the companies listed above for shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of these final results of this administrative review. For all non-reviewed firms subject to the *Order*, we will instruct CBP to continue to collect cash deposits of estimated countervailing duties at the most recent company-specific rate or the all-others rate (*i.e.*, 20.40 percent), as appropriate.⁷ These cash deposit requirements, effective upon publication of these final results, shall remain in effect until further notice.

Administrative Protective Order (APO)

This notice also serves as a final reminder to parties subject to an APO of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

These final results of administrative review are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: December 19, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Disposable Aluminum Containers, Pans, Trays, and Lids From the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value, and Preliminary Affirmative Determination of Critical Circumstances

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that disposable aluminum containers, pans, trays, and lids (aluminum containers) from the People's Republic of China (China) are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is October 1, 2023, through March 31, 2024. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Matthew Palmer or Kate Fracke, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1678 or (202) 482–3299, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on June 12, 2024.¹ On July 22, 2024, Commerce tolled certain deadlines in

¹ See *Disposable Aluminum Containers, Pans, Trays, and Lids from the People's Republic of China: Initiation of Less-Than-Fair-Value Investigation*, 89 FR 49837 (June 12, 2024) (*Initiation Notice*).

this administrative proceeding by seven days.² On October 8, 2024, Commerce postponed the preliminary determination.³ The deadline for the preliminary determination is now December 19, 2024.

For a complete description of the events that followed the initiation of this investigation, see the Preliminary Decision Memorandum.⁴ A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be found at <https://access.trade.gov/public/FRNotices/ListLayout.aspx>.

Scope of the Investigation

The products covered by this investigation are aluminum containers from China. For a complete description of the scope of this investigation, see Appendix I.

Scope Comments

In accordance with the *Preamble* to Commerce's regulations,⁵ the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.*, scope).⁶ No interested party commented on the scope of the investigation as it appeared in the *Initiation Notice*. As a result, Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice*. See the scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Pursuant to sections 776(a) and (b) of the Act, we have

² See Memorandum, "Tolling of Deadlines for Antidumping and Countervailing Duty Proceedings," dated July 22, 2024.

³ See *Aluminum Containers, Pans, Trays, and Lids from the People's Republic of China: Postponement of Preliminary Determination in the Less-Than-Fair-Value Investigation*, 89 FR 81425 (October 8, 2024).

⁴ See Memorandum, "Decision Memorandum for the Preliminary Affirmative Determination in the Less-Than-Fair-Value Investigation of Disposable Aluminum Containers, Pans, Trays, and Lids from the People's Republic of China," dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

⁵ See *Antidumping Duties; Countervailing Duties, Final Rule*, 62 FR 27296, 27323 (May 19, 1997) (*Preamble*).

⁶ See *Initiation Notice*, 89 FR at 49838.

preliminarily relied upon facts otherwise available with adverse inferences (AFA) for the China-wide entity, including each of the companies selected for individual examination that later withdrew their participation: Ungar Automation Technology Co., Ltd.; Able Packaging Jiangsu Co., Ltd.; and Henan Aluminium Corporation (Henan Aluminum). For a full description of the methodology underlying Commerce's preliminary determination, see the Preliminary Decision Memorandum.

Preliminary Affirmative Determination of Critical Circumstances

In accordance with section 733(e) of the Act and 19 CFR 351.206, Commerce preliminarily determines that critical circumstances exist with respect to imports of aluminum containers from China for the separate-rate companies and the China-wide entity. For a full description of the methodology and results of Commerce's critical circumstances analysis, see the Preliminary Decision Memorandum.

Combination Rates

In the *Initiation Notice*,⁷ Commerce stated that it would calculate producer/

exporter combination rates for the respondents that are eligible for a separate rate in this investigation. Policy Bulletin 05.1 describes this practice.⁸ In this investigation, we calculated producer/exporter combination rates for respondents eligible for separate rates.

Separate Rates

We have preliminarily granted a separate rate to certain separate rate respondents that we did not select for individual examination.⁹ In calculating the rate for non-individually examined separate rate respondents in a non-market economy LTFV investigation, Commerce normally looks to section 735(c)(5)(A) of the Act, which pertains to the calculation of the all-others rate in a market economy LTFV investigation, for guidance. Pursuant to section 735(c)(5)(A) of the Act, normally this rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for those companies individually-examined, excluding any dumping margins that are zero, *de minimis*, or based entirely under section 776 of the Act.

Because each company selected for individual examination in this investigation subsequently notified Commerce of its withdrawal from participation, the estimated weighted-average dumping margins in this preliminary determination are based entirely under section 776 of the Act. In investigations where no estimated weighted-average dumping margins other than zero, *de minimis*, or those determined entirely under section 776 of the Act have been established for individually-examined entities, in accordance with section 735(c)(5)(B) of the Act, Commerce typically calculates a simple average of the margins alleged in the petition and applies the results to the entities not individually examined but found eligible for a separate rate.¹⁰ In this investigation, the simple average of the rates in the Petition is 193.90 percent.¹¹ See the table below in the "Preliminary Determination" section of this notice.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Producer	Exporter	Estimated weighted-average dumping margin (percent)
Foshan Bossfoil Aluminum Products Co., Ltd	Aikou Packaging Co., Ltd	193.90
Guangzhou Huafeng Aluminum Foil Technologies Co. Ltd	Guangzhou Huafeng Aluminum Foil Technologies Co. Ltd	193.90
Guangzhou Vanzhen Aluminum Foil Products Co., Ltd	Guangzhou Vanzhen Aluminum Foil Products Co., Ltd	193.90

of Sales at Less Than Fair Value and Final Affirmative Critical Circumstances Determination, 89 FR 55559 (July 5, 2024).

¹¹ See Petitioners' Letter, "Antidumping Duty Petition Volume II China," dated May 16, 2024 (Petition), at Exhibit AD-CN-5.

Suspension of Liquidation

In accordance with section 733(d)(2) and (e)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the dates discussed below. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the weighted average amount by which normal value exceeds U.S. price, as indicated in the chart above as follows: (1) for the producer/exporter combinations listed in the table above, the cash deposit rate is equal to the estimated weighted-average dumping margin listed for that combination in the table; (2) for all combinations of China producers/exporters of merchandise under consideration that have not established eligibility for their own separate rates, the cash deposit rate will be equal to the estimated weighted-average dumping margin established for the China-wide entity; and (3) for all third-country exporters of merchandise under consideration not listed in the table above, the cash deposit rate is the cash deposit rate applicable to the China producer/exporter combination (or the China-wide entity) that supplied that third-country exporter.

Section 733(e)(2) of the Act provides that, given an affirmative determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of merchandise entered, or withdrawn from warehouse, for consumption on or after the later of (a) the date which is 90 days before the date on which the suspension of liquidation was first ordered, or (b) the date on which notice of initiation of the investigation was published. Commerce preliminarily finds that critical circumstances exist for imports of subject merchandise from the non-selected companies eligible for a separate rate and the China-wide entity.¹² In accordance with section 733(e)(2)(A) of the Act, the suspension of liquidation shall apply to all unliquidated entries of merchandise from the non-selected companies eligible for a separate rate and the China-wide entity that were entered, or withdrawn from warehouse, for consumption on or after the date that is 90 days before the publication of this notice in the **Federal Register**.

To determine the cash deposit rate, Commerce normally adjusts the

estimated weighted-average dumping margin by the amount of domestic subsidy pass-through and export subsidies determined in a companion countervailing duty (CVD) proceeding when CVD provisional measures are in effect. Commerce determined in the preliminary determination of the companion CVD investigation that the mandatory respondent (*i.e.*, Henan Aluminum) and the non-selected respondents (*i.e.*, the “All Others” companies) did not benefit from export subsidies.¹³ Thus, we have not adjusted the cash deposit rates to account for export subsidies. Furthermore, because no respondent cooperated in this proceeding, we do not have any information to conclude whether any respondent is entitled to an adjustment for domestic subsidies passed-through. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Normally, Commerce discloses to interested parties the calculations performed in connection with a preliminary determination within five days of its public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b). However, because Commerce preliminarily applied AFA to the mandatory respondents in this investigation in accordance with section 776 of the Act, and the applied AFA rate is based solely on the Petition, and the rate assigned to the separate rate companies was a simple average of the Petition rates, there are no calculations to disclose.

Verification

Because the mandatory respondents in this investigation did not provide information requested by Commerce and Commerce preliminarily determines each of the mandatory respondents to have been uncooperative, verification will not be conducted.

Public Comment

Pursuant to 19 CFR 351.309(c)(1)(i), interested parties may submit a case brief no later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than

five days after the date for filing case briefs.¹⁴ Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.¹⁵

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this investigation, we instead request that interested parties provide at the beginning of their briefs a public, executive summary for each issue raised in their briefs.¹⁶ Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final determination in this investigation. We request that interested parties include footnotes for relevant citations in the executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).¹⁷

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective briefs. An electronically filed hearing request must be received successfully in its entirety by Commerce's electronic records system, ACCESS, by 5 p.m. Eastern Time within 30 days after the date of publication of this notice.

U.S. International Trade Commission (ITC) Notification

In accordance with section 733(f) of the Act, Commerce will notify the ITC

¹⁴ See 19 CFR 351.309(d); see also *Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings*, 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Final Rule*).

¹⁵ See 19 CFR 351.309(c)(2) and (d)(2).

¹⁶ We use the term “issue” here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

¹⁷ See *APO and Service Final Rule*.

¹² See Preliminary Decision Memorandum.

¹³ See *Disposable Aluminum Containers, Pans, Trays, and Lids from the People's Republic of China: Preliminary Affirmative Countervailing Duty Determination, Preliminary Affirmative Determination of Critical Circumstances, and Alignment of Final Determination With Final Antidumping Duty Determination*, 89 FR 85495–85497 (October 28, 2024).

of its preliminary determination of sales at LTFV. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether imports of subject merchandise are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This preliminary determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: December 19, 2024.

Abdelali Elouaradia,

Deputy Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is disposable aluminum containers, pans, trays, and lids produced primarily from flat-rolled aluminum. The subject merchandise includes disposable aluminum containers, pans, trays, and lids regardless of shape or size and whether or not wrinkled or smooth.

The term “disposable” is used to identify an aluminum article that is designed to be used once, or for a limited number of times, and then recycled or otherwise disposed.

“Containers, pans, and trays” are receptacles for holding goods.

The subject disposable aluminum lids are intended to be used in combination with disposable containers produced from aluminum or other materials (e.g., paper or plastic). Where a disposable aluminum lid is imported with a non-aluminum container, only the disposable aluminum lid is included in the scope.

Disposable aluminum containers, pans, trays, and lids are also included within the scope regardless of whether the surface has been embossed, printed, coated (including with a non-stick substance), or decorated, and regardless of the style of the edges. The inclusion of a non-aluminum lid or dome sold or packaged with an otherwise in-scope article does not remove the article from the scope, however, only the disposable aluminum container, pan, tray, and lid is covered by the scope definition.

Disposable aluminum containers, pans, trays, and lids are typically used in food-related applications, including but not limited to food preparation, packaging, baking, barbecuing, reheating, takeout, or storage, but also have other uses. Regardless of end use, disposable aluminum containers, pans, trays, and lids that meet the scope definition and are not otherwise excluded are subject merchandise.

Excluded from the scope are disposable aluminum casks, drums, cans, boxes and similar containers (including disposable aluminum cups and bottles) properly classified under Harmonized Tariff Schedule of the United States (HTSUS) subheading 7612.90. However, aluminum containers,

pans, trays, and lids that would otherwise be covered by the scope are not excluded based solely on the fact that they are being classified under HTSUS subheading 7612.90.5000 due to the thickness of aluminum being less than 0.04 mm or greater than 0.22 mm.

The flat-rolled aluminum used to produce the subject articles may be made to ASTM specifications ASTM B479 or ASTM B209–14, but can also be made to other specifications. Regardless of the specification, however, all disposable aluminum containers, pans, trays, and lids meeting the scope description are included in the scope.

Disposable aluminum containers, pans, trays, and lids are currently classifiable under HTSUS subheading 7615.10.7125. Further, merchandise that falls within the scope of this proceeding may also be entered into the United States under HTSUS subheadings 7612.90.1090, 7615.10.3015, 7615.10.3025, 7615.10.7130, 7615.10.7155, 7615.10.7180, 7615.10.9100, and 8309.90.0000. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this proceeding is dispositive.

Appendix II

List of Topics Discussed in the Preliminary Decision Memorandum

- I. Summary
- II. Background
- III. Period of Investigation
- IV. Single Entity Analysis
- V. Discussion of the Methodology
- VI. Critical Circumstances
- VII. Adjustment Under Section 777(A)(f) of the Act
- VIII. Adjustment to Cash Deposit Rates for Export Subsidies
- IX. Recommendation

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Establishment of the Methane Plume Remote Sensing Measurements Consortium

AGENCY: National Institute of Standards and Technology (NIST).

ACTION: Notice of Research Consortium.

SUMMARY: NIST is establishing the Methane Plume Remote Sensing Measurements Consortium (“Consortium”) to support the rapidly growing field of remote sensing for the detection and quantification of methane emissions, primarily from point sources. This Consortium aims to unite Federal and State agencies, academia, business, and industry to enhance robust transparency, accuracy, reliability, and interoperability of methane plume detection and quantification data products. In this evolving field of

measurement and analysis, consistency across products and results, an understanding of the drivers of error, and a well-constructed validation strategy, are important to increase trust in the data products. To achieve this, the Consortium is focused on identifying the strengths and limitations of current methodologies and analysis approaches. The Consortium seeks to foster transparency through improved documentation, consensus building around best practices and the development of documentary consensus standards. In addition, the Consortium seeks to support the coordination and standardization of validation approaches for these measurements and the utilization of controlled releases. By fostering collaboration among business, Federal agencies, local governmental stakeholders, and researchers, the Consortium aims to drive advancements in methane plume detection and quantification and the analysis supported by them.

Participants will be required to sign a Cooperative Research and Development Agreement (CRADA).

DATES: The Consortium’s activities will commence on January 15, 2024 (“Commencement Date”). NIST will accept letters of interest to participate in this Consortium on an ongoing basis.

ADDRESSES: Completed letters of interest or requests for additional information about the Consortium can be directed via mail to the Consortium Manager, Dr. Annmarie Eldering, Greenhouse Gas Measurements Program of NIST’s Special Programs Office, 100 Bureau Drive, Mail Stop 2100, Gaithersburg, Maryland 20899, or via electronic mail annmarie.eldering@nist.gov, or by telephone at (301) 975–5558.

FOR FURTHER INFORMATION CONTACT: Dr. Saikat Ghosh, Partnership Officer, National Institute of Standards and Technology’s Technology Partnerships Office, by mail to 100 Bureau Drive, Mail Stop 2200, Gaithersburg, Maryland 20899, by electronic mail to Saikatghosh@nist.gov or by telephone at (301) 975–3084.

SUPPLEMENTARY INFORMATION: NIST is establishing the Methane Plume Remote Sensing Measurements Consortium (“Consortium”) to support the rapidly growing field of remote sensing for the detection and quantification of methane emissions, primarily from point sources. This Consortium aims to unite Federal and State agencies, academia, business, and industry to enhance robust transparency, accuracy, reliability, and interoperability of methane plume detection and quantification data products. In this rapidly growing and

evolving field of measurement and analysis, consistency across products and results, an understanding of the drivers of error, and a well-constructed validation strategy are important to increase trust in the data products. To achieve this, the Consortium is focused on identifying strengths and limitations current methodologies and analysis approaches. The Consortium seeks to foster transparency through improved documentation, consensus building around best practices and the development of documentary consensus standards. In addition, the Consortium seeks to support the coordination and standardization of validation approaches for these measurements and the utilization of controlled releases. By fostering collaboration among business, Federal agencies, local governmental stakeholders, and researchers, the Consortium aims to drive advancements in methane plume detection and quantification and the analysis supported by them.

Consortium Goals

The Consortium brings together NIST, state and local governments, academia, businesses, and other stakeholders to collaborate on analysis, documentation, and consensus building that will improve transparency, trust, and usability of remote sensing methane plume detections and quantification. The Consortium will also develop a tiered validation framework and assist in efficient deployment of controlled release experiments. Collaborative work across the wide range of measurement and analysis teams will be the most efficient approach to achieve our goals.

This initiative aims to achieve the following goals, with work in two task groups:

Task Group 1

- Develop consensus terminology and a taxonomy of terminology. Publish a NIST report or other document with these definitions.
- Develop a set of written consensus standards that capture the best practices, recommendations for data product formats, and methodology documentation. This will be achieved through collaborative evaluation of intercomparison exercises and common datasets analyzed by multiple teams.
- Implement and analyze alternative validation strategies, incorporating information from simulations, cross-team analysis, controlled releases, and well characterized industrial emission sources.
- All of these activities will support the goals of developing standards for detection and quantification of methane

plumes with remote sensing data to ensure consistency, reliability, and trust in the data used by all stakeholders.

Task Group 2

- Develop definitions for a tiered validation framework, allowing for approaches such as algorithm validation (with data from other measurement systems), algorithm assessment with simulated data, performance assessment with well-characterized industrial emissions, and controlled release experiments
 - Consensus validation strategies will be developed and documented, incorporating information from simulations, cross-team analysis, controlled releases, and well characterized industrial emission sources.
 - Document consensus standards for analysis and reporting of results of controlled release experiments
 - Develop platforms for improved communication and utilization of controlled release experiments, maximizing participation by measurement teams and opportunities for cross comparison of results
 - Create a repository of controlled release measurement datasets for easy access by new participants and for community analysis.
- Sharing of proprietary information developed by the Consortium will be subject to that detailed in the CRADA. Participants will not be required to contribute any funds or pay any fee. Contributions of data and/or methodologies is highly encouraged.

Participation Process

Eligibility will be determined by NIST based on information provided by prospective participants in response to this notice. Submitted responses from prospective participants will be evaluated by NIST to determine eligibility to participate in this Consortium. Prospective participants should provide a letter of interest with the following information to NIST's Consortium Manager:

- (1) A description of their interest and experience in methane plume detection and quantification from remote sensing measurements and/or experience conducting and analyzing data from controlled release experiment for methane plume validation and/or related expertise necessary to contribute to Consortium activities.
- (2) List of interested party's anticipated participants.

Letters of interest must not include business proprietary information. NIST will not treat any information provided in response to this notice as proprietary

information. Following review, each organization will be notified of its eligibility. In order to participate in this Consortium, each eligible organization must sign a CRADA for this Consortium. All participants in this Consortium will be bound by the same terms and conditions. NIST does not guarantee participation in the Consortium to any organization submitting a letter of interest.

Authority: 15 U.S.C. 3710a.

Alicia Chambers,

NIST Executive Secretariat.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE574]

Western Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Western Pacific Fishery Management Council (Council) will hold a joint meeting of its Archipelagic Plan Team (APT) and Pelagic Plan Team (PPT) to discuss fishery management issues and develop recommendations for future management of fisheries in the Western Pacific Region.

DATES: The APT and PPT will meet jointly from Tuesday to Thursday, January 21–23, 2025, between 12 p.m. and 5 p.m. Hawaii Standard Time (HST). For specific times and agendas, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting will be held virtually with remote participation (Webex) options available for the members, and public attendance limited to web conference via Webex. Specific information on joining the meeting, connecting to the web conference and making oral public comments will be posted on the Council website at www.wpcouncil.org. For assistance with the web conference connection, contact the Council office at (808) 522–8220.

FOR FURTHER INFORMATION CONTACT: Kitty M. Simonds, Executive Director, Western Pacific Fishery Management Council, (808) 522–8220 (voice) or (808) 522–8226 (fax).

SUPPLEMENTARY INFORMATION: The APT and PPT meeting will be held Tuesday to Thursday, January 21–23, 2025, between 12 p.m. and 5 p.m. Hawaii

Standard Time (HST) (11 a.m. to 4 p.m. Samoa Standard Time (SST); 8 a.m. to 1 p.m. on January 22–24, 2025, Chamorro Standard Time (ChST)). Opportunities to present oral public comment will be provided on the agenda. The order of the agenda may change, and will be announced in advance at the meeting. The meeting may run past the scheduled times noted above to complete scheduled business.

Agenda for the Archipelagic Plan Team Meeting

Tuesday, January 21, 2025, 12 Noon to 5 p.m. Hawaii Standard Time (HST) (11 a.m. to 4 p.m. Samoa Standard Time (SST); 8 a.m. to 1 p.m. on January 22–24, 2025, Chamorro Standard Time (ChST)).

1. Welcome and Introductions
2. Report on 2024 Plan Team Recommendations and Work Items
- A. Fishery Performance Work Items
 - i. American Samoa
 - a. Creel Survey Data Evaluation
 - b. Species-Specific Catch Reporting and Annual Catch Limit Tracking
 - c. Available Fish Aggregating Device Program Data
 - ii. Commonwealth of the Northern Mariana Islands (CNMI)
 - a. Commercial Data Update
 - iii. Guam
 - a. Impact of Weather and Military Closures on Fishing Effort
 - iv. Hawaii
 - a. Bottomfish Management Unit Species (MUS) Aggregation
 - b. Bottomfish Prevalence at United Fishing Agency
 - v. Pelagics
 - a. Socioeconomic Observer Data Collection
 - b. Life History Module
 - vi. Commercial Fishery Data
 - a. Low Territorial Commercial Reporting
 - b. Discrepancies in Commercial Data Streams
 - vii. Oceanic and Ecosystem Indicators
 - a. Brainstorm of New Recruitment Indices
 - b. Tula Observatory Data
 - c. Data Integration/Fishery-Ecosystem Relationships
 - viii. Online Portal Review
 - B. Public Comment on Day 1 Agenda Items

Wednesday, January 22, 2025, 12 p.m. to 5 p.m. Hawaii Standard Time (HST) (11 a.m. to 4 p.m. Samoa Standard Time (SST); 8 a.m. to 1 p.m. on January 22–24, 2025, Chamorro Standard Time (ChST)).

C. Ecosystem Component Species (ECS) Management

- i. Presentation on How to Manage ECS

- ii. Examples from other Councils
- iii. Ecosystem Objectives
- iv. How to promote back an MUS
- v. General Council Pacific Islands Perspective
3. Non-Commercial Fishery Performance
 - a. Pelagic Territorial Non-commercial Module
 - b. Marine Recreational Information Program (MRIP) Presentation on Nature of MRIP Surveys and Hawaii Marine Recreational Fisheries Survey
 - c. A new Approach to the Hawaii MUS Non-commercial Module
 - d. Discussion on Hawaii Non-Commercial Module stemming from December Scientific and Statistical Committee Meeting
 - e. Including Uku Non-Commercial Catch
4. Public Comment on Day 2 Agenda Items

Thursday, January 23, 2025, 12 p.m. to 5 p.m. Hawaii Standard Time (HST) (11 a.m. to 4 p.m. Samoa Standard Time (SST); 8 a.m. to 1 p.m. on January 22–24, 2025, Chamorro Standard Time (ChST)).

5. Annual Stock Assessment and Fishery Evaluation Report Revamp Status Update
6. Council Actions
 - a. Tier 6 Acceptable Biological Catch Control Rule
 - b. American Samoa Bottomfish MUS Revision Updates
 - c. ACL Specifications
1. CNMI Bottomfish
2. Main Hawaiian Islands (MHI) Uku
3. MHI Kona Crab
4. MHI Deepwater Shrimp and Precious Corals
 - d. Pelagic Action Updates and Discussion
1. Electronic Monitoring
2. Crew Training
3. North Pacific Striped Marlin
7. Other Business
8. Public Comment on Day 3 Agenda Items
9. Discussion and Recommendations

Special Accommodations

These meetings are accessible to people with disabilities. Please direct requests for sign language interpretation or other auxiliary aids to Kitty M. Simonds (see **FOR FURTHER INFORMATION CONTACT** section above) at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 23, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XE557]

Fisheries of the Gulf of Mexico; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 98 Post-Data Workshop Webinar for Gulf of Mexico Red Snapper.

SUMMARY: The SEDAR 98 assessment process of Gulf of Mexico red snapper will consist of a Data Workshop, and a series of assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 98 Post-Data Workshop webinar will be held Tuesday, January 14, 2025, from 1 p.m. to 4 p.m., Eastern Time.

ADDRESSES:

Meeting address: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; (843) 571–4366; email: Julie.neer@safmc.net.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop, (2) a series of assessment webinars, and (3) A Review Workshop. The product of the Data Workshop is a report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The assessment webinars produce a report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions,

and recommends research and monitoring needs. The product of the Review Workshop is an Assessment Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion during the Post-Data Workshop webinar are as follows:

Participants will review additional information and data analysis on outstanding data issues and make final recommendations.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 20, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648-XE556]

Notice of Availability of Draft Environmental Assessment on the Effects of NOAA's National Marine Fisheries Service, Office of Protected Resources Coordination and Continued Operation of the Sea Turtle Stranding and Salvage Network

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; availability of a draft environmental assessment; request for comments.

SUMMARY: NMFS announces the availability of the draft Environmental Assessment (EA) on NMFS Office of Protected Resources' (OPR) role coordinating the Sea Turtle Stranding and Salvage Network (STSSN). The STSSN responds to and documents sick, injured, and dead sea turtles that are found in coastal areas under U.S. jurisdiction along the Atlantic Ocean and Gulf of Mexico, and U.S. Caribbean Territories. Although the STSSN has been in operation for several decades, the National Coordination role formally shifted to the OPR in 2022, which prompted an evaluation of STSSN operations and development of a formal Operating Procedures Handbook, which are subject to National Environmental Policy Act (NEPA) review. NMFS is requesting comments on the draft EA.

DATES: Written comments must be received (see **ADDRESSES**) on or before January 29, 2025.

ADDRESSES: The EA is available for download and review at <https://www.fisheries.noaa.gov/national/marine-life-distress/sea-turtle-stranding-and-salvage-network> under the section heading Sea Turtle Stranding and Salvage Network Operations. The draft EA is also available upon written request (see **FOR FURTHER INFORMATION CONTACT**).

You may submit comments on this document, identified by NOAA-NMFS-2024-0148, by the following method:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to <https://www.regulations.gov> and enter NOAA-NMFS-2024-0148 in the Search box. Click on the "Comment" icon, complete the required fields, and enter or attach your comments.

Instructions: Comments sent by any other method, to any other address or

individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on <https://www.regulations.gov> without change. All personal identifying information (*e.g.*, name, address, *etc.*), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Sara Wissmann, NMFS, Office of Protected Resources at sara.wissmann@noaa.gov, 301-427-8402; Wendy Piniak, NMFS, Office of Protected Resources at wendy.piniak@noaa.gov, 301-427-8402.

SUPPLEMENTARY INFORMATION:

Publication of this notice begins the official public comment period for this draft EA. Per the NEPA, the purpose of the draft EA is to evaluate the potential direct, indirect, and cumulative impacts caused by continued operation of the STSSN under the coordination of the NMFS, OPR using the 2024 STSSN Operating Procedures Handbook.

Section 9 of the Endangered Species Act (ESA) and Federal regulations prohibit the 'taking' of a species listed as endangered or threatened. The ESA defines "take" to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. Section 4(f) of the ESA (16 U.S.C. 1531-1544) provides for the creation of Recovery Plans for endangered and threatened species and provides NMFS and US Fish and Wildlife Service (USFWS) with authority "to procure the services of appropriate public and private agencies and institutions and other qualified persons" in order to implement those plans. To advance the conservation and recovery of listed sea turtles, each recovery plan developed jointly by the NMFS and USFWS identifies and highlights the need to maintain an active stranding network.

Species Covered in This Notice

The following species are included in the EA: North Atlantic and South Atlantic Distinct Population Segments of green (*Chelonia mydas*), Kemp's ridley (*Lepidochelys kempii*), hawksbill (*Eretmochelys imbricata*), leatherback (*Dermochelys coriacea*), and Northwest Atlantic Ocean DPS of loggerhead (*Caretta caretta*) sea turtles.

Background

The draft EA analyzes the continued operation of the STSSN under the

coordination of NMFS OPR. NMFS has conducted an environmental review of OPR's coordination role related to the STSSN and the formalization of their program protocols and roles described in the Draft 2024 STSSN Operating Procedures Handbook.

The STSSN is a cooperative effort to reduce causes of morbidity and mortality in sea turtles by responding to and documenting sea turtles, found either dead or alive (but compromised), in a manner sufficient to inform conservation management and recovery. The proposed activities considered in the draft EA are limited to the coordination role that OPR holds, activities NMFS staff will conduct in the field related to stranding coordination, response, and mortality investigation, and direct takes of sea turtles while responding to stranding incidents that have occurred because of human activity or natural causes of illness, injury, or mortality.

National Environmental Policy Act

This notice is provided pursuant to section 10(c) of the ESA and the NEPA (42 U.S.C. 4321, *et seq.*). This draft EA was prepared in accordance with NEPA (42 U.S.C. 4321, *et seq.*) and NOAA policy and procedures (NOAA Administrative Order [NAO] 216–6A and the Companion Manual [CM] for the NAO 216–6A).

Alternatives Considered

NMFS' proposed action is the continued coordination of the STSSN by NMFS OPR and the review of program protocols and best practices, which have been consolidated and updated in the Draft 2024 STSSN Operating Procedures Handbook. In preparing the draft EA, NMFS considered the following two alternatives for the proposed action.

Alternative 1: No Action. In accordance with the NOAA CM for NAO 216–6A, section 6.B.i, Under the No Action Alternative, NMFS OPR would absolve its role coordinating the STSSN. Under this alternative, the STSSN would continue to operate as prescribed in the species Recovery Plans, but only under existing state programs that are permitted through the USFWS permit authority, or through direct permits to stranding response organizations and rehabilitation facilities. Stranding response activities would be maintained, but without NMFS OPR involvement. The Council on Environmental Quality Regulations and the CM for NAO 216–6A require consideration and analysis of a no action alternative for the purposes of presenting a comparative analysis to the action alternatives. The no action

alternative, serves as a baseline against which the impacts of the action alternatives will be compared and contrasted.

Alternative 2: Continued Operation of the STSSN under NMFS Coordination, Guided by the Draft 2024 STSSN Operating Procedures Handbook. Under Alternative 2, NMFS OPR would continue to coordinate the STSSN and would finalize the Draft 2024 STSSN Operating Procedures Handbook as a guide for the continued operation of the STSSN. The STSSN has been in operation for decades, and the Operating Procedures seeks to consolidate various guidance documents and clearly outline the roles and responsibilities of STSSN participants.

Final determinations will not be completed until after the end of the 30-day comment period and NMFS will fully consider all public comments received during the comment period. If finalized and adopted, NMFS will publish the Final STSSN Operating Procedures Handbook to its website.

Dated: December 20, 2024.

Caroline Good,

Acting Chief, Marine Mammal and Sea Turtle Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of hybrid meeting.

SUMMARY: The North Pacific Fishery Management Council (Council) Crab Plan Team will meet January 14, 2025 to January 15, 2025.

DATES: The meeting will be held on Tuesday, January 14, 2025, through Wednesday, January 15, 2025, from 9 a.m. to 5 p.m., AK time.

ADDRESSES: The meeting will be a hybrid meeting. Attend in-person at the North Pacific Fishery Management Council office, 1007 West Third Ave., Suite 400, Anchorage, AK 99501, or join the meeting online through the link at <https://meetings.npfmc.org/Meeting/Details/3072>.

Council address: North Pacific Fishery Management Council, 1007 West Third Ave., Suite 400, Anchorage, AK 99501–2252; telephone: (907) 271–2809. Instructions for attending the meeting via video conference are given under **SUPPLEMENTARY INFORMATION**, below.

FOR FURTHER INFORMATION CONTACT:

Anita Kroska, Council staff; phone: (907) 271–2809; email: anita.kroska@noaa.gov. For technical support, please contact our admin Council staff, email: npfmc.admin@noaa.gov.

SUPPLEMENTARY INFORMATION:

Agenda

Tuesday, January 14, 2025 Through Wednesday, January 15, 2025

The agenda will include (a) tools for constructing model-based indices of survey data, (b) GMACS coding updates, stock assessment model developments, simulations, and (c) other business. The agenda is subject to change, and the latest version will be posted at <https://meetings.npfmc.org/Meeting/Details/3072>, prior to the meeting, along with meeting materials.

Connection Information

You can attend the meeting online using a computer, tablet, or smart phone, or by phone only. Connection information will be posted online at: <https://meetings.npfmc.org/Meeting/Details/3072>.

Public Comment

Public comment letters will be accepted and should be submitted electronically to <https://meetings.npfmc.org/Meeting/Details/3072>.

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public hybrid meeting of its Groundfish Recreational Advisory Panel Meeting to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). This meeting will be held in-person with a webinar option. Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This meeting will be held on Tuesday, January 21, 2025 at 12:30 p.m.

ADDRESSES:

Meeting address: This meeting will be held at the 9Four Points by Sheraton, One Audubon Road, Wakefield, MA, 01880; telephone: (781) 245-9300.

Webinar registration URL information: https://nefmc-org.zoom.us/j/9tJpD06uqjgiHNI_hrYl-4FKkLnONGRO7HY8.

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Cate O'Keefe, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Groundfish Recreational Advisory Panel will meet to discuss and develop recommendations to the Groundfish Committee on fishing year 2025 recreational measures for Western Gulf of Maine cod and Gulf of Maine haddock. They will also receive an overview of the Council's groundfish priorities for 2025. Discuss other businesses, as necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Cate O'Keefe, Executive Director, at (978) 465-0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 20, 2024.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648-XE560]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public online meeting.

SUMMARY: The Pacific Fishery Management Council (Pacific Council) and the NMFS Northwest Fisheries Science Center will convene an online pre-assessment workshop to review proposed data and modeling approaches to inform a groundfish stock assessment for yellowtail rockfish in the area north of 40°10' N. latitude, scheduled for assessment during 2025. The workshop is open to the public.

DATES: The pre-assessment workshop will be held Thursday, January 30, 2025, from 9 a.m. until 12 p.m. (Pacific Standard Time) or until business for the day has been completed.

ADDRESSES: The pre-assessment workshop will be conducted as an online meeting. Specific meeting information, including the agenda and directions on how to join the meeting and system requirements, will be provided in the workshop announcement on the Pacific Council's website (see www.pcouncil.org). You may send an email to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov) or contact him at (503) 820-2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220.

FOR FURTHER INFORMATION CONTACT:

Marlene A. Bellman, Staff Officer, Pacific Council; telephone: (503) 820-2414; email: marlene.bellman@noaa.gov.

SUPPLEMENTARY INFORMATION: The purpose of the pre-assessment workshop is to review proposed data inputs, modeling approaches, and any other pertinent information to inform the 2025 stock assessment for yellowtail rockfish in the area north of 40°10' N. latitude. The goal of the pre-assessment workshop is to promote dialogue and a common understanding between assessment teams and data providers of the best data and analytical and modeling approaches applicable to these assessments. Stock assessment

teams will solicit advice from data stewards, stakeholders, and fishery managers knowledgeable about these species.

No management actions will be decided by the workshop participants. The participants' role will be development of recommendations for consideration by the stock assessment teams assigned to conduct these assessments. The assessment for this stock is tentatively scheduled for peer review during a Stock Assessment Review (STAR) panel on May 19-23, 2025. The Pacific Council and the Pacific Council's Scientific and Statistical Committee are scheduled to consider this draft assessment for use in informing management decisions at their September 2025 meeting in Spokane, WA.

Although nonemergency issues not contained in the workshops' agendas may be discussed, those issues may not be the subject of formal action during these workshops. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent of the workshop participants to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov; (503) 820-2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 91 Assessment Webinar I for U.S. Caribbean Spiny Lobster.

SUMMARY: The SEDAR 91 assessment of the U.S. Caribbean stock of Spiny Lobster will consist of a data scoping webinar, a workshop, a series of assessment webinars, and a review workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 91 Assessment Webinar I will be held Wednesday, January 29, 2025, from 1 p.m. until 4 p.m., EST. The established times may be adjusted as necessary to accommodate the timely completion of discussion relevant to the assessment process. Such adjustments may result in the meeting being extended from or completed prior to the time established by this notice. Additional SEDAR 91 workshops and webinar dates and times will publish in a subsequent issue in the **Federal Register**.

ADDRESSES:

Meeting address: The SEDAR 91 Assessment Webinar 1 will be held via webinar. The webinar is open to members of the public. Registration is available by contacting the SEDAR coordinator via email at Emily.Ott@safmc.net.

SEDAR address: South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405; www.sedarweb.org.

FOR FURTHER INFORMATION CONTACT: Emily Ott, SEDAR Coordinator, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; phone: (843) 571-4373; email: Emily.Ott@safmc.net.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management

Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion at the workshop are as follows:

- Finalize any data decisions remaining
- Continue discussion on modelling issues and decisions.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

South Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold three port meetings via webinar gathering input on Atlantic king mackerel and Atlantic Spanish mackerel as managed by the Fishery Management Plan for Coastal Migratory Pelagic Resources in the Gulf of Mexico and Atlantic Region.

DATES: The port meetings will take place January 21, 2025, January 23, 2025, and January 29, 2025. The port meetings will begin at 6 p.m., local time. For additional information, including webinar registration, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: *Council address:* South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Christina Wiegand, Fishery Social Scientist, SAFMC; phone: (843) 571–4366 or toll free: (866) SAFMC–10; fax: (843) 769–4520; email: christina.wiegand@safmc.net.

SUPPLEMENTARY INFORMATION: The Council hosted a series of port meetings along the Atlantic coast throughout 2024 in order to take a focused look at the Atlantic king mackerel and Atlantic Spanish mackerel fisheries. They are now hosting a webinar version of these port meetings to gather input from

members of the public that may have been unable to attend one of the previously held in-person port meetings.

The agenda for the port meetings is as follows: Council staff will briefly introduce port meetings and the Council's goals and objectives. Attendees will then have the opportunity to provide input on a variety of issues related to the Atlantic king mackerel and Spanish mackerel fisheries including changing environmental conditions, needed management changes, commercial and recreational fishery dynamics, and the goals and objectives of the Coastal Migratory Pelagics Fishery Management Plan. Information provided during port meetings will be summarized and presented to the Council for use in management decision-making.

Webinar Information

These port meetings will be conducted via webinar. The port meetings will begin at 6 p.m. Registration for the webinars is required. Registration information will be posted on the Council's website at <https://safmc.net/king-and-spanish-mackerel-port-meetings/> as it becomes available.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for auxiliary aid should be directed to the Council office (see **ADDRESSES**) 5 days prior to the meeting.

FOR FURTHER INFORMATION CONTACT: Cate O'Keefe, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION: Agenda:

The Groundfish Committee will meet to discuss Fishing Year 2025 Recreational Measures and the recommendations from the Recreational Advisory Panel and discuss and develop recommendations to the Council on fishing year 2025 recreational measures for Western Gulf of Maine cod and Gulf of Maine haddock. They will also receive an overview of the Council's groundfish priorities for 2025, and discuss other business, if necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Cate O'Keefe,

Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 20, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

Innovation Fund Advisory Committee

AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice; reopening of application window for advisory committee nominations.

SUMMARY: On November 15, 2024, the National Telecommunications and Information Administration (NTIA) published a notice seeking applications from persons interested in serving on the Public Wireless Supply Chain Innovation Fund Advisory Committee (hereinafter “the IFAC” or “the Committee”) for a two-year term. The notice established a deadline of December 16, 2024, for the transmittal of applications. This notice reopens the application window until January 15, 2025.

DATES: The application window for the notice published November 15, 2024 at 89 FR 90267 is reopened. To be considered for calendar year 2025 appointments, applications must be postmarked or electronically transmitted on or before January 15, 2025.

ADDRESSES: Persons may submit applications to Richard Upchurch, Designated Federal Officer, by email to IFAC@ntia.gov or by U.S. mail or commercial delivery service to Office of Public Safety Communications, National Telecommunications and Information Administration, 1401 Constitution Ave. NW, Room 73022, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Richard Upchurch, Designated Federal Officer, at (202) 617-6592 or rupchurch@ntia.gov. Please direct media inquiries to NTIA’s Office of Public Affairs at (202) 482-7002 or press@ntia.gov.

SUPPLEMENTARY INFORMATION: On November 15, 2024, NTIA published a Notice in the **Federal Register** seeking applications from persons interested in serving on the IFAC. See Innovation Fund Advisory Committee; Call for applications to serve on the Innovation

Fund Advisory Committee, 89 FR 90267 (Nov. 15, 2024), available at <https://www.federalregister.gov/documents/2024/11/15/2024-26635/innovation-fund-advisory-committee>. The Notice established a deadline of December 16, 2024, for the transmittal of applications. Through this Notice, NTIA is reopening the application window until January 15, 2025 to ensure that all interested parties have an opportunity to submit applications.

Persons interested in applying to serve on the IFAC are reminded that members *may not* apply for Innovation Fund grants, hold a financial interest in applicants, or be employed by applicants of the Innovation Fund grant program during their tenure on the IFAC. As such, individuals with or affiliated with an outstanding application to the Innovation Fund’s third Notice of Funding Opportunity (NOFO 3), released on December 17, 2024, will not be appointed if their application is pending at the time of appointment. Appointments are expected to occur after the NOFO 3 application deadline.

Likewise, IFAC members and their affiliated organizations will not be permitted to apply to any ongoing or future funding opportunities during their service on the committee. However, individuals who are current recipients of an Innovation Fund grant, employed by a grant recipient, or hold a financial interest in a recipient of an Innovation Fund grant are eligible to apply for IFAC membership and serve on the committee, provided no new grant applications are submitted during their tenure.

Dated: December 20, 2024.

Stephanie Weiner,

Chief Counsel, National Telecommunications and Information Administration.

BILLING CODE 3510-60-P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Deletions from the Procurement List.

SUMMARY: This action deletes product(s) from the Procurement List that were furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: Date added to and deleted from the Procurement List: January 26, 2025.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 355 E Street SW, Suite 325, Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 489-1322, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION:

Deletions

On November 15, 2024 (89 FR 90270) and 11/22/2024 (89 FR 92657), the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed deletions from the Procurement List. This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51-2.3.

After consideration of the relevant matter presented, the Committee has determined that the product(s) and service(s) listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 8501-8506 and 41 CFR 51-2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action may result in authorizing small entities to furnish the product(s) and service(s) to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O’Day Act (41 U.S.C. 8501-8506) in connection with the product(s) and service(s) deleted from the Procurement List.

End of Certification

Accordingly, the following product(s) and service(s) are deleted from the Procurement List:

Product(s)

NSN(s)—Product Name(s):

8415-01-546-0124—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, X-Small/Short

8415-01-546-0128—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, X-Small/Regular

8415-01-546-0160—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, Small/Short

8415-01-538-8598—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, Small/Regular

8415-01-546-0166—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, Small/Long

8415-01-538-8614—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, Medium/Regular

8415-01-546-0305—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, Medium/Long

8415-01-538-8621—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, Large/Regular

8415-01-538-8701—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, Large/Long

8415-01-538-8705—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, X-Large/Regular

8415-01-538-8711—Shirt, Underwear, Midweight Cold Weather Gen III, ECWCS, Army, Desert Sand, X-Large/Long

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Additions to and Deletions from the Procurement List.

SUMMARY: The Committee is proposing to add service(s) to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities and deletes product(s) previously furnished by such agencies.

DATES: Comments must be received on or before: January 26, 2025.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 355 E Street SW, Suite 325, Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 489-1322, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503 (a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Additions

In accordance with 41 CFR 51-5.3(b), the Committee intends to add this services requirement to the Procurement List as a mandatory purchase only for the contracting activity listed at the location listed with the proposed qualified nonprofit agency as the authorized source of supply. Prior to adding the service to the Procurement List, the Committee will consider other pertinent information, including

information from Government personnel and relevant comments from interested parties regarding the Committee's intent to geographically limit this services requirement.

The following service(s) are proposed for addition to the Procurement List for production by the nonprofit agencies listed:

Service(s)

Service Type: Operation of Postal Service Center

Mandatory for: US Air Force, Postal Service Center, Joint Base Andrews, MD

Authorized Source of Supply: VersAbility Resources, Inc., Hampton, VA

Contracting Activity: DEPT OF THE AIR FORCE, FA2860 11 CONS LGC

Deletions

The following product(s) are proposed for deletion from the Procurement List:

Product(s)

NSN(s)—Product Name(s):

6645-01-491-9825—Clock, Wall, Mahogany, Octagon, 12" Quartz

6645-01-491-9835—Clock, Wall, Mahogany Octagon, Custom Logo 12" Quartz

6645-01-557-4607—Clock, Wall, Self-Set, Custom Logo, Mahogany, Octagon, 12" Diameter Frame

6645-01-557-4608—Clock, Wall, Self-Set, Mahogany, Octagon, 12" Diameter Frame

Mandatory Source of Supply: Chicago Lighthouse Industries, Chicago, IL

Contracting Activity: GSA/FAS ADMIN SVCS ACQUISITION BR(2, NEW YORK, NY

NSN(s)—Product Name(s):

7520-01-357-6839—Pen, Ballpoint, Stick, Refillable, Rubberized Barrel, Red, Fine Point

Mandatory Source of Supply: Alphapointe, Kansas City, MO

Contracting Activity: GSA/FAS ADMIN SVCS ACQUISITION BR(2, NEW YORK, NY

CONSUMER FINANCIAL PROTECTION BUREAU

Open Call for Credit Card Price and Availability Data From Credit Card Issuers

AGENCY: Consumer Financial Protection Bureau.

ACTION: Open call for credit card price and availability data from credit card issuers.

SUMMARY: The Consumer Financial Protection Bureau (CFPB) is publishing this notice to advise credit card issuers

that they may voluntarily submit credit card price and availability data through the CFPB's Terms of Credit Card Plans (TCCP) Survey.

FOR FURTHER INFORMATION CONTACT:

Sarah Schwartzberg, Office of Markets, at 202-435-7000 or CFPB_collect_support@cfpb.gov. If you require this document in an alternative electronic format, please contact CFPB_Accessibility@cfpb.gov.

SUPPLEMENTARY INFORMATION: When shopping online or in a brick-and-mortar store, people like to weigh the costs and benefits of different products before they make a purchase, but this can be a challenge for consumers seeking to compare interest rates across credit cards.¹ The lack of transparency in credit card terms and conditions is not new. In 1988, Congress passed the Fair Credit and Charge Card Disclosure Act to provide for a more detailed and uniform disclosure of credit card rates and fees by issuers.

Twice per year, at least 150 credit card issuers submit information to the CFPB on their largest credit card plans, including interest rates and fees, through our TCCP Survey.² This notice is part of our efforts to invite a broader range of credit card issuers to contribute information on their credit card offerings to this data set. Our goal is to spur competition and give Americans the power to shop around and choose the best credit card for their needs. This open call is just one step in our plan to update the TCCP Survey to make it a more useful resource on credit card price and availability for consumers.

Credit card issuers are invited to voluntarily contribute credit card price and availability data. Get started now: <https://www.consumerfinance.gov/data-research/credit-card-data/terms-credit-card-plans-survey/>.

Rohit Chopra,

Director, Consumer Financial Protection Bureau.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Agency Information Collection Activities; Comment Request; AmeriCorps Member Application, Enrollment, and Exit Forms

AGENCY: Corporation for National and Community Service.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Corporation for National and Community Service, operating as AmeriCorps (AmeriCorps) is proposing to revise the information collection for its application, enrollment, and exit forms. The revisions add an option for members to share their information with other entities for additional service opportunities.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by February 28, 2025.

ADDRESSES: You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) Electronically through www.regulations.gov (preferred method).

(2) *By mail sent to:* AmeriCorps, Attention: Sharron Tendai, 250 E Street SW, Washington, DC 20525.

(3) By hand delivery or by courier to the AmeriCorps mailroom at the mail address given in paragraph (1) above, between 9 a.m. and 4 p.m. Eastern Time, Monday through Friday, except Federal holidays.

Comments submitted in response to this notice may be made available to the public through [regulations.gov](http://www.regulations.gov). For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comment that may be made available to the public, notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT: Amy Borgstrom 202-422-2781 or by email at aborgstrom@americorps.gov.
SUPPLEMENTARY INFORMATION:

Title of Collection: Enrollment, Exit, and Member Application Form.

OMB Control Number: 3054-0054.

Type of Review: Revision.

Respondents/Affected Public: Individuals.

Total Estimated Number of Annual Responses: 225,000.

Total Estimated Number of Annual Burden Hours: 168,750.

Abstract: This collection of information includes AmeriCorps' member application, enrollment, and exit forms. The application form is used by applicants interested in serving as AmeriCorps members. The enrollment form is used by AmeriCorps members to enroll in the National Service Trust to earn Eli Segal Education Awards. The exit form is used to document the completion of a member's term of service with AmeriCorps. AmeriCorps seeks to revise the exit form to add options for granting AmeriCorps permission to share the outgoing member's name and email address with other Federal partners to help the outgoing member stay engaged in service. AmeriCorps also seeks to continue using the currently approved information collection until the revised information collection is approved by OMB. The currently approved information collection is due to expire on April 30, 2025.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train

¹ Consumer Fin. Prot. Bureau, *Examining the factors driving high credit card interest rates* (Aug. 12, 2022), <https://www.consumerfinance.gov/about-us/blog/examining-the-factors-driving-high-credit-card-interest-rates/>.

² Consumer Fin. Prot. Bureau, *Terms of Credit Card Plans (TCCP) survey*, <https://www.consumerfinance.gov/data-research/credit-card-data/terms-credit-card-plans-survey/>.

personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. All written comments will be available for public inspection on [regulations.gov](https://www.regulations.gov).

Carly Bruder,

Acting Chief Program Officer.

BILLING CODE 6050–28–P

COUNCIL ON ENVIRONMENTAL QUALITY

Emergencies and the National Environmental Policy Act Guidance

AGENCY: Council on Environmental Quality.

ACTION: Notice.

SUMMARY: On December 18, 2024, the Council on Environmental Quality (CEQ) issued guidance in a memorandum to the heads of Federal departments and agencies (agencies) to assist agencies with compliance with the National Environmental Policy Act (NEPA) during emergencies. The CEQ regulations implementing NEPA provide for alternative arrangements during emergencies when an agency's action is likely to have significant effects and would require preparation of an environmental impact statement. This guidance also addresses compliance with NEPA when the action is unlikely to have significant effects and might require preparation of an environmental assessment or application of a categorical exclusion.

DATES: This guidance was issued on December 18, 2024.

FOR FURTHER INFORMATION CONTACT: Jomar Maldonado, Director for NEPA, 202–395–5750, Jomar.MaldonadoVazquez@ceq.eop.gov.

SUPPLEMENTARY INFORMATION:

Memorandum for Heads of Federal Departments and Agencies

FROM: Brenda Mallory, Chair

SUBJECT: Emergencies and the National Environmental Policy Act Guidance

This guidance¹ updates and replaces previous guidance from the Council on Environmental Quality (CEQ) on the environmental review of proposed

emergency response actions under the National Environmental Policy Act, 42 U.S.C. 4321–4347 (NEPA).² Federal departments and agencies (agencies) should distribute this guidance as part of their general guidance on emergency actions to agency offices that are or may become involved in developing and taking actions in response to emergencies.

As agencies respond to situations involving immediate threats to human health or safety, or immediate threats to valuable natural resources, they must consider whether there is sufficient time to follow the procedures for environmental review established in CEQ's National Environmental Policy Act Implementing Regulations, 40 CFR parts 1500 through 1508 (CEQ NEPA regulations),³ and their agency NEPA procedures.

CEQ established the regulation addressing alternative arrangements in emergency circumstances in 1978⁴ and amended it in 2020 and 2024⁵ to clarify that it provides for alternative arrangements for agencies to comply with section 102(2)(C) of NEPA (42 U.S.C. 4332(C)). See 40 CFR 1506.11. Alternative arrangements do not waive the requirement to comply with NEPA. Rather, they establish an alternative means for NEPA compliance. CEQ has approved, and agencies have applied successfully, numerous alternative arrangements to allow a wide range of proposed actions in emergency circumstances including natural disasters, catastrophic wildfires, threats to species and their habitat, economic crises, infectious disease outbreaks, potential dam failures, and insect infestations.⁶

This guidance includes two attachments with step-by-step guides to help agencies when planning for and responding to emergencies. Attachment 1 provides agencies with a process for determining the appropriate path forward for the NEPA environmental review of all actions proposed in response to an emergency situation and what steps to take depending on the appropriate level of NEPA review. Attachment 2 provides guidance for preparing a concise and focused EA for emergency actions.

² This guidance replaces guidance issued by CEQ on September 14, 2020 (85 FR 60137 (Sept. 29, 2020)), September 29, 2016, May 12, 2010, and September 8, 2005. CEQ rescinds the prior guidance.

³ See <https://www.ecfr.gov/current/title-40/chapter-V/subchapter-A>.

⁴ 43 FR 55977 (Nov. 29, 1978).

⁵ 85 FR 43304 (July 16, 2020); 89 FR 35442 (May 1, 2024).

⁶ A synopsis of previous alternative arrangements is available at www.NEPA.gov.

Environmental Impact Statements

The CEQ regulations, at 40 CFR 1506.11, provide for alternative arrangements for NEPA compliance in emergency situations when the agency proposal has the potential for significant environmental effects and would require an environmental impact statement (EIS) if the situation were not an emergency:

Where emergency circumstances make it necessary to take an action with significant effects without observing the provisions of the regulations in [40 CFR parts 1500 through 1508], the Federal agency taking the action shall consult with the Council about alternative arrangements for compliance with section 102(2)(C) of NEPA. Agencies and the Council shall limit such arrangements to actions necessary to control the immediate impacts of the emergency; other actions remain subject to NEPA review consistent with [40 CFR parts 1500 through 1508]. Alternative arrangements do not waive the requirement to comply with the statute, but establish an alternative means for NEPA compliance.

Agencies develop these alternative arrangements, based on emergency-specific facts and circumstances, during consultation with CEQ. The alternative arrangements developed by an agency address the actions necessary to control the immediate impacts of an emergency. The long-term response to the emergency, including recovery actions, remains subject to the regular NEPA process set forth in the statute and the CEQ NEPA regulations.

Here again, alternative arrangements do not waive the requirement to comply with the statute, but establish an alternative means for NEPA compliance from the process set forth in the CEQ NEPA regulations. Alternative arrangements for NEPA compliance do not satisfy or alter other legal requirements, including other environmental legal requirements (except as provided by other applicable statutes or regulations); however, engaging other resource and regulatory agencies about other environmental requirements during development and implementation of alternative arrangements for NEPA compliance can potentially facilitate meeting other environmental compliance requirements. Final agency action taken pursuant to alternative arrangements for compliance with NEPA under 40 CFR 1506.11 may be subject to judicial review if a statute, such as the Administrative Procedure Act, provides for such review.

¹ The contents of this guidance do not have the force and effect of law and are not meant to bind the public in any way. This guidance does not establish new requirements. This memorandum is intended only to provide clarity to the public regarding existing requirements under the law or agency policies.

Attachment 1 describes the factors for an agency to address when requesting and designing alternative arrangements. Once the agency and CEQ develop the alternative arrangements, CEQ will provide documentation detailing the alternative arrangements and the considerations on which they are based.

Environmental Assessments

When agencies are considering proposed actions that are not likely to have significant effects or the significance of the effects are unknown, the agency can prepare a concise, focused environmental assessment (EA). Attachment 2 of this memorandum provides guidance for preparing an EA. Some agency NEPA procedures provide processes for preparing EAs for emergency actions,⁷ which the CEQ NEPA Regulations encourage agencies to include in their procedures. For emergency actions that require preparation of an EA, agencies should not delay taking action necessary to address immediate threats to human health or safety, or immediate threats to valuable natural resources. Agencies should follow any agency-specific direction regarding preparation of an EA for emergency actions, which may include preparing an EA before, during, or after the emergency. Agencies must continue their efforts to notify, inform, and engage with the affected public and relevant Federal, State, Tribal, and local governments and agency representatives of the Federal agency activities and proposed actions. Agencies must comply with the CEQ NEPA regulatory requirements implementing the statute for content, interagency coordination, and public engagement to the extent practicable.⁸

Attachment 1

Process for Emergency Actions Under the National Environmental Policy Act (NEPA)

This attachment provides a step-by-step process for managing the NEPA review of all actions proposed in response to an emergency situation, consistent with the Emergencies and the National Environmental

Policy Act Guidance. In the case of an emergency:

1. Do not delay immediate actions necessary to secure lives and safety of citizens or to protect valuable resources. Consult with CEQ as soon as feasible. Please coordinate any communications with your Federal agency NEPA contacts.

2. Determine if NEPA applies and the appropriate level of NEPA analysis:

■ Determine if a Federal agency is taking the proposed action (e.g., city or State action does not trigger NEPA; Federal decisions to fund city or State action may trigger NEPA, depending on the nature of the funding arrangements) or is exempt from NEPA (e.g., certain Federal Emergency Management Agency response actions under the Stafford Act are statutorily excluded from NEPA; additional information is available at <https://www.fema.gov/emergency-managers/practitioners/environmental-historic/laws/NEPA/statutory-exclusions>).

■ If the Federal agency's proposed emergency action is not statutorily exempt from NEPA, and the agency has a categorical exclusion (CE) that covers the type of activity, then apply the CE unless there are extraordinary circumstances that indicate using the CE in this particular case is not appropriate. Agency NEPA personnel can assist in identifying agency-specific actions that are categorically excluded. Additionally, the agency should review CEs established in other agencies' NEPA procedures to determine whether there is a CE that would cover the agency's proposed emergency action. If so, the agency may adopt and apply the CE consistent with 40 CFR 1501.4(e) and Section 109 of NEPA (42 U.S.C. 4336c).

■ If the proposed Federal agency emergency action is not statutorily exempt from NEPA, a CE is not available, and the agency does not expect the potential environmental effects of the proposed response activity to be significant, then an environmental assessment (EA) is appropriate. Where applicable, follow the agency's emergency procedures as set forth in the agency's NEPA implementing procedures, or prepare a focused, concise EA as described in Attachment 2. Alternative arrangements, as outlined at 40 CFR 1506.11, do not apply because the environmental effects are not expected to be significant. Agency NEPA personnel can assist in identifying agency-specific actions that typically require an EA.

■ If the proposed Federal emergency action is not statutorily exempt from NEPA, and the agency expects it would have significant environmental effects, the agency should determine whether an existing NEPA analysis covers the action (e.g., implementing pre-existing spill response plans). If so, the agency may rely upon its existing analysis or adopt the analysis of another agency consistent with 40 CFR 1506.3.

■ If the proposed Federal emergency action is not statutorily exempt from NEPA, the agency expects it to have significant environmental effects, and an existing NEPA analysis does not cover the action, then the agency should consult with CEQ to determine whether alternative arrangements can take the place of an EIS. Contact CEQ to develop alternative arrangements under 40

CFR 1506.11. CEQ encourages agencies to submit inquiries via email at NEPA@ceq.eop.gov. Agencies may also contact CEQ at (202) 395-5750.

3. Factors to address when requesting and designing alternative arrangements include the:

- Nature and scope of the emergency;
- Actions necessary to control the immediate impacts of the emergency;
- Potential adverse effects of the proposed action;
- Components of the NEPA process that the agency can follow and provide value to decision making (e.g., coordination with Tribal Nations, affected agencies, and the public);
- Duration of the emergency; and
- Potential mitigation measures.

Attachment 2

Preparing Focused, Concise, and Timely Environmental Assessments

An agency can prepare a concise and focused EA in a short time in those situations where:

- There is no statutory exemption from NEPA requirements;
- There is no CE that covers the action, or there are extraordinary circumstances requiring the preparation of an EA or EIS;
- An existing NEPA analysis (EA or EIS) does not cover the proposed action; and
- The environmental effects of the proposed actions are not likely to be significant.

The following outline with notations addresses the core elements of an EA as required by 40 CFR 1501.5:

- The purpose and need for the proposed action;
- Alternatives, as required by NEPA section 102(2)(H);
- The description of environmental effects of the proposed action and the alternatives;
- The list of agencies and persons consulted;
- The unique identification number of the EA.

Purpose and Need for the Proposed Action

The agency should briefly describe information that substantiates the purpose and need for the action and incorporate by reference information that is reasonably available to the public. For example, "This agency is preparing to erect a temporary emergency response facility to replace facilities disrupted or destroyed by the [hurricane/flooding/contamination/etc.] to facilitate rescue or relief efforts in an effort to [minimize further adverse health conditions/restore communications/restore power]."

The agency should briefly describe the existing conditions and the projected future conditions of the area impacted by the action. For example, "The area(s) in which the temporary facility will be located or relocated is identified in the attached map. This area consists of [add brief description of the environmental state of the area that will be affected by the location and operation of the facility, focusing on those areas that are potentially sensitive. The goal is to show that environmental effects have been considered

⁷ See Agency NEPA procedures, for example: Department of Homeland Security Instruction Manual 023-01-001-01, Revision 01 at VI-1, https://www.dhs.gov/sites/default/files/publications/DHS_Instruction%20Manual%20023-01-001-01%20Rev%2001_508%20Admin%20Rev.pdf; U.S. Forest Service, 36 CFR 220.4(b), <https://www.ecfr.gov/current/title-36/chapter-II/part-220/section-220.4>; and Department of the Interior, 43 CFR 46.150, https://www.ecfr.gov/cgi-bin/retrieveECFR?gp=&SID=2a2ce144c79da6f3e773bfa9cdf17bcf&mc=true&n=sp43.1.46.b&r=SUBPART&ty=HTML#se43.1.46_1150.

⁸ 40 CFR 1501.5, 1501.6, and 1501.9 (these regulations address required content and public and governmental engagement for preparing EAs and findings of no significant impact).

and the facts found indicate no significant impact (for example, refueling sites are not on top of aquifers, nesting areas, graves, sacred sites, etc.). These are examples to show the utility of and need to identify actual place-based environmental issues rather than compiling lists of environmental resources not at issue].”

Proposed Action and Alternatives

The agency should list and briefly describe its proposed action and reasonable alternatives that meet the purpose and need. The agency must use its discretion to ensure the number and reasonable range of alternatives is reasoned and not arbitrary or capricious. The purpose and need for the proposed action and its environmental effects should focus the alternatives. For example, the need to use existing infrastructure necessary to support the facility is a reasoned basis for focusing on a discrete number of alternatives.

When there is no unresolved conflict concerning alternative uses of available resources with respect to the proposed action based on input from interested parties, the agency can consider the proposed action and proceed without consideration of additional alternatives. Otherwise, the agency must identify reasonable alternatives that meet the action’s purpose and need, consistent with section 102(2)(H) of NEPA.

Environmental Effects of the Proposed Action and Alternatives

The agency must describe the environmental effects of its proposed action and each alternative. 40 CFR 1501.5(c)(2)(iii). The description should provide enough information to support a determination to either prepare an EIS or a finding of no significant impact.

The agency should focus on whether the action would significantly affect the quality of the human environment. The agency should follow the CEQ NEPA regulations in considering whether the effects of a proposed action are significant. See 40 CFR 1501.3(d). Agency NEPA contacts and contacts at resource agencies can assist in this effort.

Tailor the length of the discussion to the complexity of each issue. Focus on those human and natural environment issues where effects are a concern. Telephone or email discussions with State, Tribal, and local governments and agencies and other Federal agencies that operate in the area will help focus those issues.

The agency must discuss the effects of each alternative and may discuss those effects together in a comparative description or discuss each alternative separately. The agency should use the approach that will be most effective in the time available. The agency may contrast the effects of the proposed action and alternatives with the current condition and expected future condition in the absence of the action. This constitutes consideration of a no action alternative as well as demonstrating the need for the action.

The agency should incorporate by reference data, inventories, other information, and analyses relied on in the EA. See 40 CFR 1501.12. CEQ encourages the

use of digital references, such as hyperlinks. This information must be reasonably available for review by potentially interested persons. For example, include relevant existing programmatic agreements and generally accepted best management practices.

The agency should be clear and concise about its conclusions and their bases.

List of Agencies and Persons Consulted

The agency must involve the public, State, Tribal, and local governments, relevant agencies, and any applicants, to the extent practicable in preparing EAs, and list the agencies and persons consulted. 40 CFR 1501.5(c)(3) and 1501.5(f). For example, include the people, offices, and agencies that the agency coordinated with to ensure that the location of the action did not cause unintentionally an adverse effect. Also include information about individuals consulted to comply with substantive environmental requirements and regulations, for example: the Clean Water Act, the National Historic Preservation Act, and the Endangered Species Act (ESA). Note that the ESA emergency provisions at 50 CFR 402.05 may be applicable to the proposed action.

DEPARTMENT OF DEFENSE

Defense Acquisition Regulations System

[Docket Number DARS–2024–0038]

Department of Defense Progress Payment Incentive Pilot

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Request for information.

SUMMARY: DoD is seeking public input to inform the implementation of a section of the National Defense Authorization Act for Fiscal Year 2024 that authorizes DoD to establish a pilot program to incentivize performance for specific, measurable criteria under approved contracts by increasing the customary progress payment rate.

DATES: DoD will consider all comments received by January 29, 2025.

ADDRESSES: Submit comments to the questions provided below, using either of the following methods:

○ *Federal eRulemaking Portal:* <https://www.regulations.gov>. Search for “Docket Number DARS–2024–0038.” Select “Comment” and follow the instructions to submit a comment.

Please include your name, company name (if any), and “Docket Number DARS–2024–0038” on any attached document(s).

○ *Email:* osd.pentagon.ousd-a-s.mbx.dpc-pcf@mail.mil. Include “DoD Progress Payment Incentive Pilot” in the subject line of the message.

Comments received generally will be posted without change to <https://www.regulations.gov>, including any personal information provided. To confirm receipt of your comment(s), please check <https://www.regulations.gov>, approximately two to three days after submission to verify posting.

FOR FURTHER INFORMATION CONTACT: Ms. Sara Higgins, telephone 937–200–4020.

SUPPLEMENTARY INFORMATION:

A. Background

Section 874 of the National Defense Authorization Act for Fiscal Year 2024 authorizes the Under Secretary of Defense for Acquisition and Sustainment to establish and implement a progress payment pilot program to incentivize contractor performance on a contract-by-contract basis. By statute, the incentive criteria must be clear and measurable, and contractor participation must be voluntary.

This notice requests comments and information from the public on DoD’s possible implementation of the pilot program, in accordance with section 874. DoD is particularly interested in comments and information from companies currently in the Defense Industrial Base.

B. Possible Implementation

DoD is planning to focus the Progress Payment Incentive Pilot (PPIP) on payment time to subcontractors in order to improve cash flow throughout the supply base. This is a key interest area highlighted in the 2023 Defense Contract Finance Study, available at <https://www.acq.osd.mil/asda/dpc/pcf/finance-study.html>.

DoD is particularly interested in comments and information from all business sizes with regard to DoD’s notional eligibility and incentive criteria, and supporting documentation concept, especially the following:

1. Eligibility Criteria

Section 874 authorizes an increase of up to 10 percentage points higher than the current customary progress payment rate (80 percent for large businesses) for contractor performance against clear, measurable criteria on a contract-by-contract basis. To be eligible for the PPIP, a participant must be eligible for customary progress payments, and their

participation must be voluntary. Notionally, the participant must be performing under a new sole-source, noncommercial, definitized contract or order. The progress payment rate for small entities has been temporarily increased to 95 percent, which is 5 percentage points higher than the maximum incentive rate eligible to be earned under the authority of section 874. Therefore, the pilot program will be open only to other than small entities.

For inclusion in the pilot program, DoD is planning to require contract actions to be nominated by the cognizant contracting officer and approved by the Director, Price, Cost and Finance, Defense Pricing, Contracting, and Acquisition Policy during the preaward phase of the acquisition, since the extent of contract financing provided by the Government is required to be a consideration in price negotiations after contract award. It is also anticipated that the nominated contract or order must have a performance period of no more than three years to ensure that all performance, including options and potential new work, will be completed before the pilot program's sunset date.

DoD anticipates requiring that the bill of material, excluding material from affiliated concerns and indirect costs, will constitute at least 25 percent of the nominated contract or order's estimated value to ensure the incentive benefits the supply chain and to assess the efficacy of using an increased progress payment rate as an incentive.

To optimize pilot program participation and to collect insights from multiple sources, DoD plans to approve only one contract per parent entity (including all divisions, business segments, subsidiaries, etc.).

2. Incentive Criteria

DoD anticipates structuring the progress payment incentive as follows, with a focus on incentivizing payment time to the supply base:

a. The maximum incentive (a progress payment rate of 90 percent in lieu of the customary 80 percent rate for large businesses) may be earned if more than 95 percent of the cumulative invoice dollars have been or will be paid within 20 calendar days of receipt of subcontract invoices.

b. A progress payment rate of 85 percent may be earned if more than 85 percent but less than or equal to 95 percent of the cumulative invoice dollars have been or will be paid within 20 calendar days of receipt of subcontract invoices.

c. If 85 percent or less of the cumulative invoice dollars have been or

will be paid within 20 calendar days of receipt of subcontract invoices, no incentive is earned, and the customary large business progress payment rate of 80 percent will be used.

d. DoD plans to reassess the progress payment rate with each contractor request for progress payment, based on the reported payment time for cumulative subcontract invoice dollars. If the contractor's performance against the incentive criterion merits an increase or decrease to the progress payment rate currently on contract, it is anticipated that the rate will be changed by a unilateral contract modification.

e. If the progress payment rate on the contract is decreased based on the contractor's cumulative performance against the incentive criterion, this may result in an overpayment status. For purposes of overpayments arising in this manner, the expectation is not to issue a demand for repayment, but to withhold additional progress payments until either—

(1) The progress payment rate is increased as a result of the contractor's performance against the incentive criterion; or

(2) The incurred cost increases to the point that the total incurred cost multiplied by the current progress payment rate is greater than the amount of progress payments already paid to the contractor.

3. Supporting Documentation Concept

DoD plans to measure contractor performance against incentive criteria through the use of a Government-provided spreadsheet, which the PPIP participant will submit as an attachment to each SF 1443, Contractor's Request for Progress Payment. It is envisioned that the completed spreadsheet will list each subcontract delivery invoice reflected in the incurred cost claimed in the progress payment request and include the following information at a minimum:

- Subcontractor, supplier, or vendor name;
 - Subcontract or purchase order number; part number; description of part or service;
 - Subcontract invoice number and any tracking number affixed by the prime;
 - Subcontract invoice date;
 - Subcontract invoice amount;
 - Actual or anticipated date of invoice payment;
 - Amount of payment;
 - Calculated payment time (date of payment minus date of invoice) for the invoice; and
 - Any unpaid amount on the invoice.
- The spreadsheet will calculate the percentage of cumulative subcontract

invoice dollars paid within the established payment time criterion. It is planned that the PPIP participant will update and mark new and actual payment data with each progress payment request.

It is anticipated that the PPIP participant will be required to provide any additional documentation required by the contracting officer to support its claimed progress against incentive criteria. DoD plans for the Defense Contract Audit Agency to audit PPIP participants' claimed subcontract payment timing semi-annually.

Needs and Uses: The DoD Office of Financial Readiness Information (FINRED) is sponsoring a website usability study to collect opinions, ideas, and concerns from members of the military community on their level of satisfaction with the FINRED website content, layout, and navigation of financial resources. This study will be used only for research purposes and the results and recommendations will be anonymous when shared with government officials. The feedback and insights will be used to drive future improvements to the FINRED website. The purpose of the FINRED Card Sorting User Testing of the Financial Readiness website (User Testing/ Usability Study) is to provide key metrics to the Office of Financial Readiness to support DoD Instruction (DoDI) 1322.34 "Financial Readiness of Service Members". The User Testing/ Card Sorting Usability Study will provide results from the collection of opinions, ideas, and concerns from members of the military community on their level of satisfaction with the taxonomy and navigation of the FINRED website. Results will also provide a new taxonomy of the FINRED website, that will allow the Office of Financial

Readiness to adjust the layout and organization of the website to meet the needs and layout of what the users intend to find when on the website.

Affected Public: Individuals or households.

FOR FURTHER INFORMATION CONTACT:

Reginald Lucas, (571) 372-7574, whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Request for Individual Access and Consent for Disclosure to Records Protected Under the Privacy Act; DD Forms 3213 and 3214; OMB Control Number 0704-CASE.

Type of Request: New.
Number of Respondents: 30,000.
Responses per Respondent: 1.
Annual Responses: 30,000.
Average Burden per Response: 45 minutes.

Annual Burden Hours: 22,500.

Needs and Uses: This information collection requirement is necessary to allow an individual to request access to their records or to provide prior written consent authorizing disclosure of such records. The Creating Advanced Streamlined Electronic Services for Constituents Act of 2019 (CASES Act) was enacted to modernize and simplify the process by which individuals can request access to and consent to the disclosure of their personal records held by Federal agencies. This Act addresses the inefficiencies and inconsistencies that previously existed in obtaining written consent for information disclosure. Under the Privacy Act of 1974, individuals have the right to access their records and control the disclosure of their personal information. However, the traditional process of obtaining written consent was often cumbersome, requiring physical signatures and manual transmission of forms. This not only delayed the resolution of constituent inquiries but also created variability in how different Components within DoD handled these requests. The CASES Act mandates the use of electronic access and consent forms, which can be submitted digitally. By allowing digital submissions, the Act aims to streamline the process, reduce delays, and enhance the efficiency of government services.

Affected Public: Current and former DoD employees and their authorized dependents.

Frequency: On occasion.

Respondent's Obligation: Voluntary.
DOD Clearance Officer: Mr. Reginald Lucas.

Dated: December 18, 2024.

BILLING CODE 6001-FR-P

DEPARTMENT OF DEFENSE**Department of the Navy**

[Docket ID: USN-2024-HQ-0018]

Proposed Collection; Comment Request

AGENCY: Department of the Navy, Department of Defense (DoD).

ACTION: 60-Day information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995*, the United States Marine Corps announces a proposed public information collection and seeks public comment on

the provisions thereof. Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by February 28, 2025.

ADDRESSES:

You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, Regulatory Directorate, 4800 Mark Center Drive, Mailbox #24 Suite 05F16, Alexandria, VA 22350-1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to Headquarters Marine Corps Records, Reports, Directives, and Forms Management Section, 3000 Marine Corps, Pentagon Rm. 2B253, Mr. Mark Kazzi, (571) 256-8883.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB No.: Non-appropriated Fund Human Resource Management System (NAF HRMS); NAVMC Form 12000/499; OMB Control No. 0712-0007.

Needs and Uses: The information collection is necessary for Marine Corps Community Service (MCCS) to successfully manage and administer an effective and efficient recruiting and hiring process. MCCS's use of

innovative technologies in the Non-Appropriated Fund Human Resource Management System (NAF HRMS) enables MCCS to streamline the employment application process, reduce processing and recruiter response times, and decrease the need for applicant calls and inquiries; therefore, improving the applicant's experience. The information collection is also necessary to allow MCCS retirees receiving an annuity to request changes to their current NAF Group medical, dental, or life insurance plans; their NAF Group Retirement plan; and/or their beneficiary information. Retirees request these changes via NAVMC Form 12000/499.

Affected Public: Business or other for-profit; individuals or households.

Annual Burden Hours: 35,002.

Number of Respondents: 70,003.

Responses per Respondent: 1.

Annual Responses: 70,003.

Average Burden per Response: 30 minutes.

Frequency: On occasion.

Dated: December 18, 2024.

associated collection instruments, please write to Office of the Deputy Assistant Secretary of Defense (Housing), 3400 Defense Pentagon, Room 5C756, Washington, DC 20301–3400; ATTN: Ms. Megan Purkey, or call 703–614–0867.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Application for Homeowners Assistance; DD Form 1607; OMB Control Number 0704–0463.

Needs and Uses: In accordance with section 3374 of United States Code Title 42; the American Recovery and Reinvestment Act of 2009 (Pub. L. 111–5); 32 CFR part 239; and DoD Directive 4165.50E, “Homeowners Assistance Program (HAP),” the DoD provides funds to financially compensate eligible members of the Armed Forces who incur a wound, injury, or illness in the line of duty during a deployment in support of the Armed Forces on or after September 11, 2001; wounded DoD and Coast Guard civilian homeowners reassigned in furtherance of medical treatment or rehabilitation or due to medical retirement in connection with a disability incurred in the performance of his or her duties during a forward deployment occurring on or after September 11, 2001 in support of the Armed Forces; and surviving spouses of fallen warriors who move within two years of the death of such employee or member. Additionally, during times of Base Realignment and Closure, the HAP program can be authorized to assist civilian and active-duty homeowners who are impacted by the closure or realignment of their job duties. Priority access to the funds goes to surviving spouses of those killed during deployment and those who were wounded, injured, or ill during deployment on or after September 11, 2001. HAP applicants use DD Form 1607, “Application for Homeowner’s Assistance Program (HAP),” to apply for HAP benefits.

Affected Public: Individuals or households.

Annual Burden Hours: 15.

Number of Respondents: 15.

Responses per Respondent: 1.

Annual Responses: 15.

Average Burden per Response: 1 hour.

Frequency: On occasion.

Applicants most often complete the form with the assistance of a representative of the Family Housing Office. After it has been filled out, the form is then emailed, faxed, hand-carried, or—in rare cases—mailed to the district HAP office for processing. An action officer in the district HAP office processes the form to ensure all the

necessary information has been provided. If necessary, the applicant is provided with the appropriate instructions for the necessary supplemental information. When the case file is deemed complete by the action officer, it is provided to a counselor for approval or rejection recommendation based on program criteria related to economic impact, service requirements, the applicant’s homeowner status, the applicant’s primary residence status, and other assistance received by the homeowner. A formal response regarding eligibility or appeal status is provided to the applicant via mail.

Dated: December 18, 2024.

Stephanie J. Bost,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2024–30891 Filed 12–27–24; 8:45 am]

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE**Office of the Secretary****[Docket ID: DoD–2024–OS–0142]****Proposed Collection; Comment Request**

AGENCY: Office of the Under Secretary of Defense for Personnel and Readiness (OUSD(P&R)), Department of Defense (DoD).

ACTION: 60-Day information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995*, the Office of the Under Secretary of Defense for Personnel and Readiness announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by February 28, 2025.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, Regulatory Directorate, 4800 Mark Center Drive, Mailbox #24, Suite 05F16, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to M&RA (MPP/Accession Policy), 4000 Defense Pentagon, 3D1066, Washington, DC 20301, LTC Charles Manning, 703–695–5527.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Police Records Check; DD Form 369; OMB Control Number 0704–0007.

Needs and Uses: Title 10, United States Code, Sections 504, 505, and 12102 establish minimal standards for enlistment into the Armed Forces. Among other items, these sections specifically prohibit the enlistment of those convicted of a felony. The Services have therefore developed standards which address the acceptability for Service persons with police records, adverse juvenile adjudications, or court convictions. The standards are designed to screen out categories of persons who have probability of either having serious disciplinary problems or may not be able to adjust to the disciplinary demands of the Armed Forces. This information collection is needed to identify persons who may be undesirable for military service. The existence of a police record is one of the factors considered in establishing eligibility for enlistment or entry into highly sensitive career fields. Therefore, verification data from the individual and law enforcement agencies must be obtained before enlistment can occur. The form associated with this information collection is DD Form 369, “Police Record Check.” It is used by recruiters to inquire on applicants’

backgrounds prior to acceptance to the Armed Forces, when, in the judgment of the recruiter, an applicant may be withholding information of prior offense history.

Affected Public: Individuals or households.

Annual Burden Hours: 78,750.

Number of Respondents: 175,000.

Responses per Respondent: 1.

Annual Responses: 175,000.

Average Burden per Response: 27 minutes.

Frequency: On occasion.

Dated: December 18, 2024.

Stephanie J. Bost,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Notice of Federal Advisory Committee Meeting—Defense Policy Board

AGENCY: Department of Defense (DoD).

ACTION: Notice of Federal advisory committee meeting.

SUMMARY: The DoD is publishing this notice to announce the following Federal advisory committee meeting of the Defense Policy Board (DPB) will take place.

DATES: Closed to the public; Tuesday, January 7, 2025, from 10:45 a.m. to 5:00 p.m.

ADDRESSES: The closed meeting will be held in the Rodman Conference Room, 3D852, at The Pentagon, 2000 Defense Pentagon, Washington, DC 20301–2000.

FOR FURTHER INFORMATION CONTACT:

James E. Benkowski, DPB Designated Federal Officer (DFO), 703–697–4758 (Voice), james.e.benkowski2.civ@mail.mil (Email). Mailing address is 2000 Defense Pentagon, Attn: 5E420, Washington, DC 20301–2000.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of chapter 10 of title 5, United States Code (U.S.C.) (commonly known as the “Federal Advisory Committee Act” or “FACA”); 5 U.S.C. 552b (commonly known as the “Government in the Sunshine Act”); and sections 102–3.140 and 102–3.150 of title 41 Code of Federal Regulations (CFR). Due to circumstances beyond the control of the DFO and the DoD, the DPB was unable to provide public notification required by 41 CFR 102–3.150(a) concerning its January 7, 2025 meeting. Accordingly, the Advisory

Committee Management Officer for the DoD, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

Purpose of the Meeting: To obtain, review, and evaluate classified information related to the DPB’s mission to advise on: (a) issues central to strategic DoD planning; (b) policy implications of U.S. force structure and modernization on DoD’s ability to execute U.S. defense strategy; (c) U.S. regional defense policies; and (d) other defense policy topics of special interest to the DoD, as determined by the Secretary of Defense, the Deputy Secretary of Defense, or the Under Secretary of Defense for Policy.

Agenda: On January 7, 2025 the DPB will receive classified briefings to evaluate key trends, assumptions, and uncertainties associated with the future security environment.

- James Benkowski, DPB DFO, will provide opening remarks; Ms. Amanda Dory, Acting Under Secretary of Defense for Policy, Ms. Madeline Mortelmans, Performing the Duties of Assistant Secretary of Defense for Strategy, Plans, and Capabilities, and Dr. Janine Davidson, DPB Chair, will welcome the DPB and provide an overview of the meeting’s purpose and its key objectives focused on a high-level evaluation of key trends, assumptions, and uncertainties associated with the future security environment;

- Representatives from the Strategic Futures Group of the National Intelligence Council will discuss major structural trends and sources of uncertainty in the international system, their potential impacts on the future security environment, and help identify plausible alternative future scenarios against which DoD should plan;

- DPB will discuss key medium-to-long term risks and opportunities facing the DoD, including the most significant trends that are guiding DoD planning;

- Representatives from the Defense Intelligence Agency will discuss major trends in the Indo-Pacific, Europe, and the Middle East, including the interaction of geopolitical dynamics, transboundary challenges, and technological change;

- Dr. Janine Davidson will lead the DPB in drawing on its own expertise and experience to discuss key trends, challenges, and opportunities in the future security environment and to develop recommendations to out brief the Secretary of Defense.

- The DPB will then provide advice and recommendations to Hon. Lloyd Austin, Secretary of Defense.

Meeting Accessibility: In accordance with 5 U.S.C. 1009(d) and 41 CFR 102–

3.155 the DoD has determined that this meeting shall be closed to the public. The Acting Under Secretary of Defense (Policy), in consultation with the DoD FACA Attorney, has determined in writing that this meeting is closed to the public because the discussions fall under the purview of 5 U.S.C. 552b(c)(1) and are so inextricably intertwined with unclassified material that they cannot reasonably be segregated into separate discussions without disclosing classified material.

Written Statements: In accordance with 5 U.S.C. 1009(a)(3) and 41 CFR 102–3.140(c) and 102–3.150(6) the public or interested organizations may submit written statements to the membership of the DPB at any time regarding its mission or in response to the stated agenda of a planned meeting. Written statements should be submitted to the DPB's DFO, who's information is listed above in this notice in the **FOR FURTHER INFORMATION CONTACT** section or can be obtained from the GSA's FACA Database—<http://www.facadatabase.gov/>. Written statements that do not pertain to a scheduled meeting of the DPB may be submitted at any time. However, if individual comments pertain to a specific topic being discussed at a planned meeting, then these statements must be submitted no later than one business day prior to the meeting in question. The DFO will review all submitted written statements and provide copies to all members.

Dated: December 20, 2024.

Stephanie J. Bost,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DoD–2024–OS–0140]

Proposed Collection; Comment Request

AGENCY: Office of the Under Secretary of Defense for Acquisition and Sustainment (USD(A&S)), Department of Defense (DoD).

ACTION: 60-Day information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995*, the Defense Logistics Agency (DLA) announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: whether the

proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by February 28, 2025.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, Regulatory Directorate, 4800 Mark Center Drive, Mailbox #24, Suite 05F16, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to Defense Logistics Agency, 4800 Mark Center Drive, Suite 14G07–01, Alexandria, VA 22350, ATTN: Carla Smith, (804) 279–1340.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Defense Logistics Agency Child and Youth Program Forms; DLA Forms 1849, 1849–1, 1849–2, 1849–3, 1849–4, 1855, 1855–1, 1855–1A, 1855–1B, 1855–1C, 1855–1D (Parts I and II), 1855–1E, 1855–1F; OMB Control Number 0704–0582.

Needs and Uses: The DoD requires the information in the proposed collection in support of the DLA Child and Youth Programs (CYPs). This collection includes fourteen DLA forms, some of which are used by all the collection respondents and some of which are

used under specific circumstances. The information collected is used for program planning, management, and health and safety purposes. More specifically, the information in the proposed collection allows CYP staff to provide safe, developmentally appropriate day care services and to ensure proper, effective response in the event of an emergency. Respondents include patrons enrolling their children in a CYP; these patrons may include active-duty military, DoD civilian employees, and DoD contractors.

Affected Public: Individuals or households.

Annual Burden Hours: 1,004.6.

Number of Respondents: 828.

Responses per Respondent: 14.56.

Annual Responses: 12,056.

Average Burden per Response: 5 minutes.

Frequency: On occasion.

Dated: December 18, 2024.

Stephanie J. Bost,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Adoption of Categorical Exclusion From the Department of the Navy Under the National Environmental Policy Act

AGENCY: Office of Local Defense Community Cooperation (OLDCC), Department of Defense (DoD).

ACTION: Notice of adoption of the Department of Navy's (DoN) Categorical Exclusion for facility renovation pursuant to section 109 of the National Environmental Policy Act (NEPA).

SUMMARY: OLDCC is adopting the DoN's Categorical Exclusion 14 for the alteration of an existing building. This notice describes the proposed action for which OLDCC intends to use the DoN Categorical Exclusion and details the consultation between the agencies.

FOR FURTHER INFORMATION CONTACT: Patrick J. O'Brien, Director, Office of Local Defense Community Cooperation, Office of the Secretary of Defense, 2231 Crystal Drive, Suite 520, Arlington VA 22202–4704, (703) 697–2130.

SUPPLEMENTARY INFORMATION:

I. NEPA and Categorical Exclusions

NEPA and Categorical Exclusions, 42 United States Code (U.S.C.) 4321–4347, requires all Federal agencies to assess the environmental impacts of their

actions. Congress enacted NEPA to encourage productive and enjoyable harmony between humans and the environment, recognizing the profound impact of human activity and the critical importance of restoring and maintaining environmental quality to the overall welfare of humankind. NEPA seeks to ensure agencies consider the environmental effects of their proposed actions in their decision-making processes and inform and involve the public in that process. NEPA created the Council on Environmental Quality (CEQ), which based on 42 U.S.C. 4336c, promulgated NEPA implementing guidance at 40 Code of Federal Regulations (CFR) parts 1500 through 1508 (CEQ regulations).

To comply with NEPA, agencies determine the appropriate level of review—an Environmental Impact Statement (EIS), Environmental Assessment (EA), or categorical exclusion (42 U.S.C. 4336). If a proposed action is likely to have significant environmental effects, the agency must prepare an EIS and document its decision in a record of decision. *Id.* If the proposed action is not likely to have significant environmental effects or the effects are unknown, the agency may instead prepare an EA, which involves a more concise analysis and process than an EIS. *Id.* Following the EA, the agency may conclude the process with a finding of no significant impact if the analysis shows that the action will have no significant effects. If the analysis in the EA finds that the action is likely to have significant effects, however, then an EIS is required. Under NEPA and the CEQ regulations, a Federal agency may establish in its NEPA implementing procedures categorical exclusions, which are categories of actions the agency has determined normally do not significantly affect the quality of the human environment (40 CFR 1501.4, 1507.3(e)(2)(ii), 1508.1(d)). If an agency determines that a categorical exclusion covers a proposed action, it then evaluates the proposed action for extraordinary circumstances in which a normally excluded action may have a significant effect (40 CFR 1501.4(b)). If no extraordinary circumstances are present, or if further analysis determines that the extraordinary circumstances do not involve the potential for significant environmental impacts, the agency may apply the categorical exclusion to the proposed action without preparing an EA or EIS (40 CFR 1501.4). If the extraordinary circumstances have the potential to result in significant effects,

the agency is required to prepare an EA or EIS.

Section 109 of NEPA, enacted as part of the Fiscal Responsibility Act of 2023, allows a Federal agency to adopt a categorical exclusion listed in another agency's NEPA procedures for a category of proposed agency actions for which the categorical exclusion was established (42 U.S.C. 4336(c)). To adopt another agency's categorical exclusion under section 109, an agency must identify the relevant categorical exclusion listed in that agency's ("establishing agency") NEPA procedures that cover its category of proposed actions or related actions; consult with the establishing agency to ensure that the proposed adoption of the categorical exclusion to a category of actions is appropriate; identify to the public the categorical exclusion that the agency plans to use for its proposed actions; and document adoption of the categorical exclusion. *Id.* This notice documents OLDCC's adoption of DoN's categorical exclusion under Section 109 of NEPA.

II. Identification of the Categorical Exclusion

DoN's categorical exclusion for the alteration to an existing building when the environmental effects will remain substantially the same and the use is consistent with applicable regulations is codified in DoN's NEPA procedures as categorical exclusion 14 in 32 CFR 775.6(f)(14).

Proposed Action

The Manufacturers' Association of South-Central Pennsylvania (Association) proposes to renovate their existing facility at 3405 Board Road, York, Pennsylvania to simulate a manufacturing environment as part of the association's scope of work undertaken as part of an OLDCC Defense Manufacturing Community Support Program funded grant.

III. Rationale for the Categorical Exclusion

The proposed renovation will take place within the existing envelope of the facility by expanding training and classroom space. All proposed renovation activities will not require any ground disturbance or external changes. The proposed renovation will alter 6,000 square feet of the existing interior warehouse space, adjacent to the Association's currently occupied space of 12,000 square feet.

IV. Consideration of Extraordinary Circumstances

If an agency determines that a categorical exclusion covers a proposed action, the agency must evaluate the proposed action for extraordinary circumstances in which a normally excluded action may have a significant effect (40 CFR 1501.4(b)). OLDCC does not currently have its own NEPA implementing procedures to guide its application of extraordinary circumstances. Until OLDCC establishes NEPA implementing procedures, for purposes of considering extraordinary circumstances in connection with the DoN categorical exclusion discussed in this notice, OLDCC has considered whether the proposed action has the potential to result in significant effects, including by considering the factors listed in DoN's definition of extraordinary circumstances (32 CFR 775.6(e)(1)).

OLDCC has assessed the proposed action and determined that none of the extraordinary circumstances listed in 32 CFR 775.6(e)(1) that preclude the use of categorical exclusion 14 are applicable to the proposed action.

V. Consultation With DoN and Determination of Appropriateness

OLDCC and DoN consulted on the appropriateness of OLDCC's adoption of the categorical exclusion from July to September 2024. DoN has provided OLDCC with a "no objection concurrence" for OLDCC's proposed adoption of the categorical exclusion. This consultation included a review of DoN's experience applying the categorical exclusion and the proposed action for which OLDCC plans to utilize it. Following this consultation and review, OLDCC has determined that the impacts of the proposed action to renovate the Association's facility is similar to the impacts, which are not significant, of projects for which DoN may apply the categorical exclusion. Additionally, OLDCC determined that there are no extraordinary circumstances. Therefore, OLDCC has determined that its proposed use of DoN's categorical exclusion 14, as described within this notice, would be appropriate.

Notice to the Public and Documentation of Adoption

This notice documents adoption of the DoN categorical exclusion listed above in accordance with 42 U.S.C. 4336(c) and 32 CFR 775.6(e)(1) and is available for use by OLDCC, effective immediately.

Dated: December 19, 2024.

Stephanie J. Bost,

Alternate OSD Federal Register Liaison
Officer, Department of Defense.

BILLING CODE 6001-FR-P

DEPARTMENT OF ENERGY

[EERE-2024-BT-DET-0007]

RIN 1904-AF66

Determination Regarding Energy Efficiency Improvements in the 2024 International Energy Conservation Code

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notification of determination.

SUMMARY: The U.S. Department of Energy (DOE) has reviewed the 2024 International Energy Conservation Code (IECC) and determined the updated edition would improve energy efficiency in residential buildings. DOE analysis indicates that buildings meeting the 2024 IECC, as compared with buildings meeting the 2021 IECC, would result in national site energy savings of 7.80 percent, source energy savings of 6.80 percent, and energy cost savings of approximately 6.60 percent of residential building energy consumption. Under the Energy Conservation and Production Act, as amended (ECPA), upon publication of an affirmative determination, each State must review the energy efficiency provisions of its residential building code and determine whether it is appropriate for such state to revise its building code to meet or exceed the 2024 IECC. Additionally, this notification provides guidance on state code review processes and associated certifications.

DATES: Certification statements provided by States shall be submitted by December 30, 2026.

ADDRESSES: A copy of the supporting analysis and a link to the Federal docket are available at <https://www.energycodes.gov/determinations>.

Certification Statements must be addressed to the Building Technologies Office—Building Energy Codes Program Manager, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, 1000 Independence Avenue SW, EE-5B, Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremiah Williams; U.S. Department of Energy, Office of Energy Efficiency and

Renewable Energy, 1000 Independence Avenue SW, EE-5B, Washington, DC 20585; (202) 441-1288; Jeremiah.Williams@ee.doe.gov.

For legal issues, please contact: Ms. Laura Zuber; U.S. Department of Energy, Office of the General Counsel, 1000 Independence Avenue SW, GC-33, Washington, DC 20585; (202) 586-4798; Laura.Zuber@hq.doe.gov.

SUPPLEMENTARY INFORMATION:

- I. Background
- II. Determination Statement
- III. State Certification

I. Background

Title III of the Energy Conservation and Production Act, as amended (ECPA), establishes requirements for DOE to review consensus-based building energy conservation standards. 42 U.S.C. 6831 *et seq.* Section 304(a) of ECPA, as amended, provides that whenever the 1992 Council of American Building Officials (CABO) Model Energy Code, or any successor to that code, is revised, the Secretary of Energy (Secretary) must make a determination, no later than 12 months after such revision, whether the revised code would improve energy efficiency in residential buildings, and must publish notice of such determination in the **Federal Register**. 42 U.S.C. 6833(a)(5)(A). If the Secretary makes an affirmative determination, within two years of the publication of the determination, each State is required to certify that it has reviewed the provisions of its residential building code regarding energy efficiency and made a determination as to whether it is appropriate to revise its code to meet or exceed the provisions of the successor code. 42 U.S.C. 6833(a)(5)(B).

The International Energy Conservation Code (IECC) is the contemporary successor to the CABO Model Energy Code specified in ECPA. The IECC is revised every three years through an established code development and consensus process administered by the International Code Council (ICC). The ICC published the most recent edition of the IECC in August 2024 (the 2024 IECC) and triggered the statutorily required DOE review process. As part of the ICC process, any interested party may submit proposals, as well as written comments or suggested changes to any proposal, and make arguments before a committee of experts assembled by the ICC. The collection of accepted proposals forms the revised edition of the IECC. More information on the ICC code development process is available at <https://www.iccsafe.org/products->

[and-services/i-codes/code-development/cs/iecc-residential-consensus-committee](https://www.iccsafe.org/products-and-services/i-codes/code-development/cs/iecc-residential-consensus-committee).

As required by ECPA, DOE conducts a technical analysis to assess the energy savings impacts associated with the updated code, the 2024 IECC. DOE's review under ECPA is technical in nature and helps to inform and advise interested industry stakeholders of the effects of the updated code, and informs states and local governments who ultimately adopt, implement, and enforce building codes. Although DOE is an active participant in the review and update process for the 2024 IECC, as directed under ECPA (42 U.S.C. 6836(b)), the Department neither administers nor publishes the model energy codes. Additionally, the directive for states to update their energy efficiency codes based on the updated edition of the 2024 IECC is required by ECPA. DOE's technical analysis serves as the basis for DOE's determination and helps inform states who seek to update their codes and comply with ECPA.

DOE's full technical analysis, including assumptions and parameters applied in the analysis, is published as a separate technical support document (TSD) and available for review at <https://www.energycodes.gov/determinations>.

DOE publishes a wide range of technical assistance resources supporting building energy codes. These include additional technical analyses evaluating the impacts of updated building energy codes, such as quantifying the energy and environmental benefits, as well as additional resources supporting the adoption and successful implementation of energy codes across states and local governments. New Federal assistance is also available to support state and local adoption and implementation of building energy codes through the Bipartisan Infrastructure Law (Section 40511) and Inflation Reduction Act (Section 50131). Visit www.energycodes.gov to learn more about these initiatives and technical assistance resources.

II. Determination Statement

Residential buildings meeting the 2024 IECC are expected to experience the following savings on a weighted national average basis (compared to the previous 2021 edition):

- 7.80 percent *site* energy savings
- 6.80 percent *source* energy savings
- 6.60 percent *energy cost* savings
- 6.51 percent *carbon emissions* savings

DOE concludes that the 2024 IECC will improve energy efficiency in residential buildings and, therefore, receives an affirmative determination under Section 304(a) of ECPA.

III. State Certification

Upon publication of this affirmative DOE determination, ECPA requires each State to certify that it has reviewed the provisions of its residential building code regarding energy efficiency and made a determination as to whether it is appropriate for such State to revise its residential building code to meet or exceed the 2024 IECC. 42 U.S.C. 6833(a)(5)(B). Each State must complete its certification not later than 2 years from the date this Notice of Determination is published in the **Federal Register**, unless an extension is provided.

In the 2024 IECC development cycle, the IECC-Residential technical development committee approved several proposals that were later appealed to the ICC Board of Directors. Per the Board's decision, several measures that increased building energy performance and reliance on nondepletable sources of energy were removed from the code prior to publication and were relegated to optional appendices within the 2024 IECC. These measures will provide substantial benefits for consumers, such as supporting grid integration and reliability, and enabling homes to more readily incorporate high-performance equipment and appliances, electric vehicle charging and renewable energy systems, as well as increase resilience against climate hazards. Consequently, DOE strongly encourages states and local governments to consider adopting these appendices and measures when updating and certifying their building energy codes in accordance with the 2024 IECC. The DOE technical assistance and funding opportunities described below are available to states and local governments for assessing and adopting these measures.

State Review & Update

The State certification must be: (1) made after public notice and hearing; (2) in writing; (3) based upon findings and the evidence presented at the hearing; and (4) made available to the public. 42 U.S.C. 6833(a)(2). States have discretion regarding the hearing procedures they use, as long as they provide an adequate opportunity for members of the public to be heard and present relevant information. The Department recommends publication of any notice of public hearing through appropriate and prominent media outlets, such as in

a newspaper of general circulation or electronic formats commonly relied upon for public announcements. States should also be aware that this DOE determination does not apply to IECC chapters specific to nonresidential buildings, as defined in the IECC. Therefore, States must certify their evaluations of their State building codes for residential buildings with respect to all provisions of the IECC, except for those chapters not affecting residential buildings. DOE determinations regarding earlier editions of the IECC are available on the DOE Building Energy Codes Program website.¹ Further technical analysis is also available to help quantify the anticipated impacts of updated building energy codes for states, local governments and other stakeholders.²

State Certification Statements

Section 304(b) of ECPA, as amended, requires each State to certify to the Secretary of Energy that it has reviewed the energy efficiency provisions of its residential building code and made a determination whether it is appropriate to revise its code to meet or exceed the provisions of the successor code. 42 U.S.C. 6833(a)(4). If a State intends to certify that its residential building energy code already meets or exceeds the requirements of the 2024 IECC, the State should provide an explanation of the basis for this certification (e.g., the 2024 IECC is incorporated by reference in the State's building code regulations). The chief executive of the State (e.g., the governor), or a designated State official (e.g., director of the State energy office, State code commission, utility commission, or equivalent State agency having primary responsibility for residential building energy codes), must provide the certification to the Secretary. For states that do not have a statewide building energy code, the designated state official must compile and submit a list of building energy codes in place across units of local governments as part of the state certification.

State and Local Technical Assistance

The DOE Building Energy Codes Program tracks and reports State code adoption and certification.³ DOE provides technical assistance to states, as well as units of local government with authority to adopt building energy codes, to assist them in evaluating building energy code updates. This

assistance is available by request and may include technical analysis of expected energy code impacts, such as energy and cost savings or environmental impacts, as well as evaluation of proposed amendments, market trends, or other design and construction data, as available. Following the adoption of an updated energy code, DOE strives to provide technical assistance supporting the successful implementation of such codes, including compliance tools, education and training, and support for the updated code. DOE has issued previous guidance on how it intends to respond to technical assistance requests related to implementation resources, such as building energy code compliance software. 79 FR 15112. The Bipartisan Infrastructure Law (BIL)⁴ and Inflation Reduction Act (IRA)⁵ also provide substantial assistance—over \$1.2 billion in new Federal funding—supporting adoption and implementation of updated building energy codes. DOE does not prescribe how each State adopts and enforces its energy codes.

Requests for Extensions

Section 304(c) of ECPA requires the Secretary to extend the deadline for complying with the certification requirements described previously, if a State demonstrates that it has made a good faith effort to comply with such requirements and that it has made significant progress toward meeting its certification obligations. 42 U.S.C. 6833(c). Such demonstrations could include one or both of the following: (1) a plan to respond to the requirements in Section 304; or (2) a statement that the State has appropriated or requested funds (within State funding procedures) to implement a plan that would respond to the requirements of Section 304 of ECPA. This list is not exhaustive. States must send requests to the address provided in the **ADDRESSES** section or submit them to *BuildingEnergyCodes@ee.doe.gov*.

Signing Authority

This document of the Department of Energy was signed on December 20, 2024, by Jeffrey M. Marootian, Principal Deputy Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP25–35–000]

Columbia Gas Transmission, LLC; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on December 17, 2024, Columbia Gas Transmission, LLC (Columbia), 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700, filed in the above referenced docket, a prior notice request pursuant to sections 157.205 and 157.213 of the Commission's regulations under the Natural Gas Act (NGA), and Columbia's blanket certificate issued in Docket No. CP83–76–000, for authorization to install and operate one new injection/withdrawal well, connecting pipeline, and appurtenant facilities all located in its Donegal Storage Field in Washington County, Pennsylvania (Donegal New Drill 12653 Project). Columbia states that the project is designed to maintain services for its existing customers and will allow Columbia to operate the Donegal Storage Field more efficiently. Columbia does not propose to change the certificated parameters of the storage field as part of the project. The estimated cost for the project is \$10 million, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>). From the Commission's Home Page on the internet, this information is available on eLibrary.

The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

Any questions concerning this request should be directed to David A. Alonzo, Manager of Project Authorizations, Columbia Gas Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700, at (832) 320–5477, or david_alonzo@tcenergy.com.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5:00 p.m. Eastern Time on February 18, 2025. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,¹ any person² or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then

withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

Protests must comply with the requirements specified in section 157.205(e) of the Commission's regulations,³ and must be submitted by the protest deadline, which is February 18, 2025. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure⁴ and the regulations under the NGA⁵ by the intervention deadline for the project, which is February 18, 2025. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at <https://www.ferc.gov/resources/guides/how-to-intervene.asp>.

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by

¹ 18 CFR 157.205.

² Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

³ 18 CFR 157.205(e).

⁴ 18 CFR 385.214.

⁵ 18 CFR 157.10.

the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the appropriate action to be taken. To ensure that your comments are timely and properly recorded, please submit your comments on or before February 18, 2025. The filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP25–35–000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the Commission's eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to Documents and Filings. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; first select "General" and then select "Protest", "Intervention", or "Comment on a Filing"; or⁶

(2) You can file a paper copy of your submission by mailing it to the address below. Your submission must reference the Project docket number CP25–35–000.

To file via USPS:

Debbie-Anne A. Reese, Secretary,
Federal Energy Regulatory Commission,
888 First Street NE, Washington, DC
20426.

To file via any other method: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of submissions (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or FercOnlineSupport@ferc.gov.

Protests and motions to intervene must be served on the applicant either by mail at: David A. Alonzo, Manager of Project Authorizations, Columbia Gas

Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700, or by email (with a link to the document) at david_alonzo@tcenergy.com. Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at www.ferc.gov using the "eLibrary" link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to www.ferc.gov/docs-filing/esubscription.asp.

Dated: December 20, 2024.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 13318–018]

Swan Lake North Hydro LLC; Notice of Intent To Prepare an Environmental Assessment

On April 12, 2024, as supplemented on October 3, 2024, Swan Lake North Hydro LLC. filed an application for Non-Capacity Amendment of License for the Swan Lake North Pumped Storage Hydroelectric Project No. 13318. The unconstructed project will be located about 11 miles northeast of the city of Klamath Falls in Klamath County, Oregon. The project will occupy Federal land administered by the U.S. Bureau of Land Management and the U.S. Bureau of Reclamation.

The licensee proposes to amend project to replace the three authorized

131.1 megawatt (MW) turbine generating units with two 182.4 MW units; modify the location and size of the powerhouse; reduce the size of the spillways; lower the bottom elevation of the powerhouse, upper and lower reservoirs, and water conveyance structures; bury the authorized surface-mounted penstocks; realign a portion of the transmission line; modify the project boundary; and modify construction materials used for the reservoir embankments and liners, among other modifications.

On October 30, 2024, the Commission issued a public notice for the proposed amendment. On November 22 and November 25, 2024, the Oregon Department of Environmental Quality and Oregon Department of Fish and Wildlife, respectively, filed motions to intervene in the proceeding.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the project.¹ Commission staff plans to issue an EA by September 12, 2025. Revisions to the schedule may be made as appropriate. The EA will be issued for a 30-day comment period. All comments filed on the EA will be reviewed by staff and considered in the Commission's final decision on the proceeding.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members, and others to access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Any questions regarding this notice may be directed to Elizabeth Moats at 202–502–6632 or Elizabeth.OsierMoats@ferc.gov.

Dated: December 20, 2024.

Debbie-Anne A. Reese,

Secretary.

BILLING CODE 6717–01–P

⁶ Additionally, you may file your comments electronically by using the eComment feature, which is located on the Commission's website at www.ferc.gov under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project.

¹ In accordance with the Council on Environmental Quality's regulations, the unique identification number for documents relating to this environmental review is EAXX–019–20–000–1734453403. 40 CFR 1501.5(c)(4) (2024).

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****Combined Notice of Filings**

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: RP25–295–000.
Applicants: El Paso Natural Gas Company, L.L.C.
Description: 4(d) Rate Filing; Negotiated Rate Agreements Update (Pioneer Jan-Mar 2025) to be effective 1/1/2025.

Filed Date: 12/19/24.

Accession Number: 20241219–5280.

Comment Date: 5 p.m. ET 12/31/24.

Docket Numbers: RP25–296–000.
Applicants: Florida Gas Transmission Company, LLC.

Description: 4(d) Rate Filing; Interim Fuel Adjustment on 12–20–2024 to be effective 1/1/2025.

Filed Date: 12/20/24.

Accession Number: 20241220–5010.

Comment Date: 5 p.m. ET 1/1/25.

Docket Numbers: RP25–297–000.

Applicants: Iroquois Gas

Transmission System, L.P.

Description: 4(d) Rate Filing; 12.20.24 Negotiated Rates—Twin Eagle Resource Management, LLC R–7300–31 to be effective 1/1/2025.

Filed Date: 12/20/24.

Accession Number: 20241220–5033.

Comment Date: 5 p.m. ET 1/1/25

Docket Numbers: RP25–298–000.

Applicants: Iroquois Gas

Transmission System, L.P.

Description: 4(d) Rate Filing; 12.20.24 Negotiated Rates—Twin Eagle Resource Management, LLC R–7300–32 to be effective 1/1/2025.

Filed Date: 12/20/24.

Accession Number: 20241220–5038.

Comment Date: 5 p.m. ET 1/1/25.

Docket Numbers: RP25–299–000.

Applicants: Southern Natural Gas Company, L.L.C.

Description: 4(d) Rate Filing; SNG CSS–ISS Transfer Tariff Modifications to be effective 1/1/2025.

Filed Date: 12/20/24.

Accession Number: 20241220–5075.

Comment Date: 5 p.m. ET 1/1/25.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be

considered, but intervention is necessary to become a party to the proceeding.

Filings in Existing Proceedings

Docket Numbers: PR25–15–001.

Applicants: Pelico Pipeline, LLC.

Description: Amendment Filing; Pelico Pipeline Amended Statement of Operating Conditions Filing to be effective 11/1/2024.

Filed Date: 12/18/24.

Accession Number: 20241218–5180.

Comment Date: 5 p.m. ET 1/8/25.

284.123(g) Protest: 5 p.m. ET 2/18/25.

Any person desiring to protest in any of the above proceedings must file in accordance with Rule 211 of the Commission's Regulations (18 CFR 385.211) on or before 5:00 p.m. Eastern time on the specified comment date.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercensearch.asp>) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <https://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Dated: December 20, 2024.

Secretary.

[FR Doc. 2024–31336 Filed 12–27–24; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Docket No. CP24–20–001]

**Wyoming Interstate Company, L.L.C.;
 Notice of Request for Extension of Time**

Take notice that on December 16, 2024, Wyoming Interstate Company,

L.L.C (WIC) requested that the Commission grant an extension of time, until June 1, 2025, to complete construction and place into service the Cheyenne to Piceance Expansion Project (Project) located in Sweetwater County, Wyoming. On December 6, 2023, the Commission issued a Notice of Request Under Blanket Authorization, which established a 60-day comment period, ending on February 5, 2024, to file protests. No protests were filed during the comment period, and accordingly the project self-implemented on February 5, 2024. By Rule, the Project should have been constructed and place into service by February 5, 2025.

WIC states that it has encountered delays due to contractor-related issues that pushed construction from the second quarter of 2024 to August 21, 2024, resulting in winter-related slowdowns, and industry-wide delivery delays for key equipment like axial check valves and valve actuators, with actuators not available until April 2025. These challenges have significantly impacted the construction timeline and required an updated schedule.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on WIC's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (NGA) (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities when such requests are contested before order issuance. For those extension requests that are contested,¹ the Commission will aim to issue an order acting on the request within 45 days.² The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.³ The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience

¹ Contested proceedings are those where an intervenor disputes any material issue of the filing. 18 CFR 385.2201(c)(1).

² *Algonquin Gas Transmission, LLC*, 170 FERC ¶ 61,144, at P 40 (2020).

³ *Id.* at P 40.

and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act (NEPA).⁴ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.⁵ The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502-8371, TTY (202) 502-8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

The Commission strongly encourages electronic filings of comments in lieu of paper using the "eFile" link at <http://www.ferc.gov>. In lieu of electronic filing, you may submit a paper copy which must reference the Project docket number.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other courier: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help

members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ID-10232-000]

White, William T.; Notice of Filing

Take notice that on December 18, 2024, of William T. White, submitted for filing, application for authority to hold interlocking positions, pursuant to section 305(b) of the Federal Power Act, 16 U.S.C. 825d (b) and Part 45.8 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR part 45.8.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>). Description: 4(d) Rate Filing: MEP December 2024 NRA Filing to be effective 1/1/2025.

Filed Date: 12/19/24.

Accession Number: 20241219–5180.

Comment Date: 5 p.m. ET 12/31/24.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

Filings in Existing Proceedings

Docket Numbers: PR25–16–001.

Applicants: Black Hills Energy Arkansas, Inc.

Description: 284.123(g) Rate Filing: BHEA Amended SOC Filing to be effective 10/14/2024.

Filed Date: 12/19/24.

Accession Number: 20241219–5151.

Comment Date: 5 p.m. ET 1/9/25.

Any person desiring to protest in any of the above proceedings must file in

accordance with Rule 211 of the Commission's Regulations (18 CFR 385.211) on or before 5:00 p.m. Eastern time on the specified comment date.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Dated: December 19, 2024.

Carlos D. Clay,

Acting Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 3240–000]

Briar Hydro Associates; Notice of Authorization for Continued Project Operation

The license for the Rolfe Canal Hydroelectric Project No. 3240 was issued for a period ending November 30, 2024.

Section 15(a)(1) of the FPA, 16 U.S.C. 808(a)(1), requires the Commission, at the expiration of a license term, to issue from year-to-year an annual license to the then licensee(s) under the terms and conditions of the prior license until a new license is issued, or the project is otherwise disposed of as provided in section 15 or any other applicable section of the FPA. If the project's prior license waived the applicability of section 15 of the FPA, then, based on section 9(b) of the Administrative Procedure Act, 5 U.S.C. 558(c), and as set forth at 18 CFR 16.21(a), if the

licensee of such project has filed an application for a subsequent license, the licensee may continue to operate the project in accordance with the terms and conditions of the license after the minor or minor part license expires, until the Commission acts on its application. If the licensee of such a project has not filed an application for a subsequent license, then it may be required, pursuant to 18 CFR 16.21(b), to continue project operations until the Commission issues someone else a license for the project or otherwise orders disposition of the project.

If the project is subject to section 15 of the FPA, notice is hereby given that an annual license for Project No. 3240 is issued to Briar Hydro Associates for a period effective December 1, 2024, through November 30, 2025, or until the issuance of a new license for the project or other disposition under the FPA, whichever comes first.

If issuance of a new license (or other disposition) does not take place on or before November 30, 2025, notice is hereby given that, pursuant to 18 CFR 16.18(c), an annual license under section 15(a)(1) of the FPA is renewed automatically without further order or notice by the Commission, unless the Commission orders otherwise.

If the project is not subject to section 15 of the FPA, notice is hereby given that Briar Hydro Associates is authorized to continue operation of the Rolfe Canal Hydroelectric Project under the terms and conditions of the prior license until the issuance of a subsequent license for the project or other disposition under the FPA, whichever comes first.

Dated: December 19, 2024.

Carlos D. Clay,

Acting Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. AC25–38–000]

Western Power Pool; Notice of Filing

Take notice that on December 13, 2024, Northwest Power Pool d/b/a Western Power Pool (WPP) submitted a request for waiver of the Federal Energy Regulatory Commission's (Commission) requirement to file a certified public accountant (CPA) certification on a calendar-year basis and for extensions of time to file certain CPA certifications.

Any person desiring to intervene or to protest this filing must file in

accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at 202-502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502-8371, TTY (202) 502-8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFiling" link at <http://www.ferc.gov>. Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available

information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Comment Date: 5:00 p.m. Eastern Time on January 17, 2025.

Dated: December 18, 2024.

American Efficient, LLC; Modern Energy Group LLC; MIH LLC; Midcontinent Energy LLC; Wylan Energy, L.L.C.; Affirmed Energy LLC; Updated Notice of Designation of Commission Staff as Non-Decisional

With respect to an order issued by the Commission on December 16, 2024, in the above-captioned docket, with the exceptions noted below, the staff of the Office of Enforcement are designated as non-decisional in deliberations by the Commission in this docket.¹

Accordingly, pursuant to 18 CFR 385.2202 (2024), they will not serve as advisors to the Commission or take part in the Commission's review of any offer of settlement. Likewise, as non-decisional staff, pursuant to 18 CFR 385.2201 (2024), they are prohibited from communicating with advisory staff concerning any deliberations in this docket.

Exceptions to this designation as non-decisional are:

Nicholas Stavlas
Michael Raibman
Thomas Olson
Mark Maneche
Yvonne Yegge
Kevin Dinan
Charles Kitcher
Jennifer Gordon
Gareth Jones
Ian McDonald
Sam Malech
Erin Miller
Sara Brehm
Serrita Hill
Steven Bundick

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Institution of Section 206 Proceeding and Refund Effective Date

Date	Docket Nos.
Altavista Solar, LLC	EL25-24-000.
Great Bay Solar I, LLC	EL25-25-000.
GSG 6, LLC	EL25-26-000.
Minonk Wind, LLC	EL25-27-000.
Sandy Ridge Wind, LLC	EL25-28-000.
Sandy Ridge Wind 2, LLC	EL25-29-000.
Shady Oaks Wind 2, LLC	EL25-30-000.

On December 20, 2024, the Commission issued an order in Docket Nos. EL25-24-000, EL25-25-000, EL25-26-000, EL25-27-000, EL25-28-000, EL25-29-000, and EL25-30-000 pursuant to section 206 of the Federal Power Act (FPA), 16 U.S.C. 824e, instituting an investigation to determine whether Altavista Solar, LLC, Great Bay Solar I, LLC, GSG 6, LLC, Minonk Wind, LLC, Sandy Ridge Wind, LLC, Sandy Ridge Wind 2, LLC, and Shady Oaks Wind 2, LLC's Rate Schedules are unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. *Altavista Solar et al.*, 189 FERC ¶ 61,222 (2024).

The refund effective date in Docket Nos. EL25-24-000, EL25-25-000, EL25-26-000, EL25-27-000, EL25-28-000, EL25-29-000, and EL25-30-000, established pursuant to section 206(b) of the FPA, will be the date of publication of this notice in the **Federal Register**.

Any interested person desiring to be heard in Docket Nos. EL25-24-000, EL25-25-000, EL25-26-000, EL25-27-000, EL25-28-000, EL25-29-000, and EL25-30-000 must file a notice of intervention or motion to intervene, as appropriate, with the Federal Energy Regulatory Commission, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214 (2024), within 21 days of the date of issuance of the order.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number

field to access the document. From FERC's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field. User assistance is available for eLibrary and the FERC's website during normal business hours from FERC Online Support at 202-502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502-8371, TTY (202) 502-8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the "eFile" link at <http://www.ferc.gov>. In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP25-36-000]

Columbia Gas Transmission, LLC; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on December 17, 2024, Columbia Gas Transmission, LLC (Columbia), 700 Louisiana Street, Suite 1300, Houston, Texas 77002-2700, filed in the above referenced docket, a prior notice requests pursuant to sections 157.205 and 157.216 of the Commission's regulations under the Natural Gas Act (NGA) and Columbia's blanket certificate issued in Docket No. CP83-76-000 for authorization to abandon five injection/withdrawal wells, connecting pipeline, and appurtenant facilities located in the Lorain, Lucas, Pavonia, and Weaver Storage Fields (Project). All of the above facilities are located in Ashland, Lorain, and Richland Counties, Ohio. The Project is necessary to comply with the Pipeline and Hazardous Materials Safety Administration's (PHMSA) Storage Final Rule which requires operators to assess and minimize well integrity risks. The five wells proposed for abandonment, and associated facilities are no longer necessary due to their low performance and inability to contribute significantly to the total deliverability of the Lorain, Lucas, Pavonia, and Weaver Storage Fields. Columbia states that abandoning these facilities will eliminate routine maintenance requirements and the associated costs. The estimated cost for the Project is 3.4 million, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website

during normal business hours from FERC Online Support at (202) 502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502-8371, TTY (202) 502-8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

Any questions concerning this request should be directed to David A. Alonzo, Manager of Project Authorizations, Columbia Gas Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002, at (832) 320-5477 or by email to David_alonzo@tcenergy.com.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5:00 p.m. Eastern Time on February 18, 2025. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595 or OPP@ferc.gov.

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,¹ any person² or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

¹ 18 CFR 157.205.

² Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

Protests must comply with the requirements specified in section 157.205(e) of the Commission's regulations,³ and must be submitted by the protest deadline, which is February 18, 2025. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure⁴ and the regulations under the NGA⁵ by the intervention deadline for the project, which is February 18, 2025. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at <https://www.ferc.gov/resources/guides/how-to-intervene.asp>.

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the

appropriate action to be taken. To ensure that your comments are timely and properly recorded, please submit your comments on or before February 18, 2025. The filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP25–36–000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the Commission's eFiling feature, which is located on the Commission's website (www.ferc.gov) under the link to Documents and Filings. New eFiling users must first create an account by clicking on "eRegister." You will be asked to select the type of filing you are making; first select "General" and then select "Protest", "Intervention", or "Comment on a Filing"; or⁶

(2) You can file a paper copy of your submission by mailing it to the address below. Your submission must reference the Project docket number CP25–36–000.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other method: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of submissions (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or FercOnlineSupport@ferc.gov.

Protests and motions to intervene must be served on the applicant either by mail at: David A. Alonzo, Manager of Project Authorizations, Columbia Gas Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002, or by email (with a link to the document) to David_alonzo@tcenergy.com. Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

⁶ Additionally, you may file your comments electronically by using the eComment feature, which is located on the Commission's website at www.ferc.gov under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at www.ferc.gov using the "eLibrary" link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to www.ferc.gov/docs-filing/esubscription.asp.

Dated: December 20, 2024.

Debbie-Anne A. Reese,
Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2459–279]

Lake Lynn Generation, LLC; Notice of Application Ready for Environmental Analysis and Soliciting Comments, Recommendations, Terms and Conditions, and Prescriptions

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* 2459–279.

c. *Date filed:* November 30, 2022.

d. *Applicant:* Lake Lynn Generation, LLC (Lake Lynn Generation).

e. *Name of Project:* Lake Lynn Hydroelectric Project (Lake Lynn Project, or project).

f. *Location:* The existing project is located on the Cheat River, near the city of Morgantown, in Monongalia County, West Virginia, and near the borough of Point Marion, in Fayette County, Pennsylvania.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Jody Smet, Vice President, Engineering and Regulatory Affairs, Eagle Creek Renewable Energy, LLC, 7315 Wisconsin Avenue, Suite

³ 18 CFR 157.205(e).

⁴ 18 CFR 385.214.

⁵ 18 CFR 157.10.

1100W, Bethesda, MD 20814; Phone at (240) 482-2700; or email at jody.smet@eaglecreekre.com.

i. *FERC Contact*: Allan Creamer at (202) 502-8365, or email at allan.creamer@ferc.gov.

j. *Deadline for filing comments, recommendations, terms and conditions, and prescriptions*: 60 days from the issuance date of this notice; reply comments are due 105 days from the issuance date of this notice.

The Commission strongly encourages electronic filing. Please file comments, recommendations, terms and conditions, and prescriptions using the Commission's eFiling system at <https://ferconline.ferc.gov/FEROnline.aspx>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <https://ferconline.ferc.gov/QuickComment.aspx>. For assistance, please contact FERC Online Support at FEROnlineSupport@ferc.gov, (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. All filings must clearly identify the project name and docket number on the first page: Lake Lynn Hydroelectric Project (P-2459-279).

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application has been accepted and is now ready for environmental analysis.

l. *Project Description*: The Lake Lynn Project consists of: (1) a 13 mile-long, 1,729-acre impoundment (Cheat Lake; originally named Lake Lynn) with a maximum storage capacity of 72,300 acre-feet at a normal water surface elevation of 870 feet National Geodetic Vertical Datum of 1929 (NGVD 29) and a normal minimum storage capacity of 51,100 acre-feet at 857 feet NGVD 29; (2) a 1,000-foot-long, 125-foot-high, concrete gravity dam with a 624-foot-

long spillway section controlled by 26, 21-foot-wide by 17-foot-high, Tainter gates; (3) a concrete intake structure equipped with a log boom and eight trash racks with 4-inch clear bar spacing; (4) eight 12-foot-wide by 18-foot-deep gated reinforced concrete penstocks; (5) a 160-foot-long by 94.5-foot-wide powerhouse containing four Francis generating units with a combined capacity of 51.2 megawatts; and (6) two 800-foot-long transmission lines that run from the powerhouse to a substation within the project boundary.

The Lake Lynn Project is currently operated as a peaking facility with storage. Peaking hours and operations are dictated by market value. Seasonal peaking during winter typically occurs in the morning for 5 hours and in the afternoon for 5 hours to meet demand. During the summer, peaking occurs between 6:00 p.m.-11:00 p.m. in the evening. The maximum drawdown rate to meet peak demand is one-half a foot/hour. Typical drawdown is 0.2-0.4 feet/day, which can vary depending on environmental and economic considerations. The current license requires Lake Lynn Generation to maintain Cheat Lake between 868 feet and 870 feet NGVD 29 from May 1 through October 31, 857 feet and 870 feet NGVD 29 from November 1 through March 31, and 863 feet and 870 feet NGVD 29 from April 1 through April 30 each year. The current license also requires Lake Lynn Generation to release a downstream minimum flow of 212 cubic-feet-per-second (cfs), or inflow, from the dam when not generating, with an absolute minimum flow of 100 cfs regardless of inflow, when not generating. The project generates about 144,741 megawatt-hours annually.

Lake Lynn Generation does not propose any changes to existing project facilities. However, Lake Lynn Generation proposes to: (1) continue operating the project as a peaking facility with storage, maintain minimum flows and lake levels as required by the existing license, and maintain the existing recreation facilities; (2) develop a number of plans, including an operations plan, a water quality monitoring plan, a recreation management plan, a shoreline management plan, and a historic properties management plan, as well as bat protection measures; and (3) remove approximately 244 acres of land from the project boundary.

m. A copy of the application can be viewed on the Commission's website at <http://www.ferc.gov>, using the "eLibrary" link. Enter the docket

number excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC Online Support.

All filings must: (1) bear in all capital letters the title "COMMENTS," "REPLY COMMENTS," "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502-6595, or at OPP@ferc.gov.

You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

n. The applicant must file no later than 60 days from the issuance date of this notice: (1) a copy of the water quality certification; (2) a copy of the request for certification, including proof of the date on which the certifying agency received the request; or (3) evidence of a waiver of water quality certification.

o. *Procedural schedule*: The application will be processed according to the following schedule. Revisions to the schedule will be made as appropriate.

Milestones	Target date
Deadline for filing comments, recommendations, terms and conditions, and pre-descriptions.	February 17, 2025.
Deadline for filing reply comments.	April 3, 2025.

p. Final amendments to the application must be filed with the Commission no later than 30 days from the issuance date of this notice.

Dated: December 19, 2024.

Debbie-Anne A. Reese,
Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 15292–001]

Dashiields Hydropower Corporation; Notice of Intent To File License Application, Filing of Pre-Application Document, and Approving Use of the Traditional Licensing Process

a. *Type of Filing:* Notice of Intent to File License Application and Request to Use the Traditional Licensing Process (TLP).

b. *Project No.:* 15292–001.

c. *Date Filed:* October 31, 2024.

d. *Submitted By:* Dashiields Hydropower Corporation ¹ (Dashiields Hydropower).

e. *Name of Project:* Dashiields Locks and Dam Hydropower Project.

f. *Location:* The project would be located on the Ohio River, at the existing U.S. Army Corps of Engineers' (Corps) Dashiields Locks and Dam, in Moon Township, Allegheny County, Pennsylvania. The project would partially occupy federal land administered by the Corps.

g. *Filed Pursuant to:* 18 CFR 5.3 of the Commission's regulations.

h. *Potential Applicant Contact:* Jeremy King, CEO; Current Hydro LLC; 3120 Southwest Freeway; Suite 101, PMB 50808; Houston, TX 77098. Email: jeremy@currenthydro.com; Phone: (706) 835–8516.

i. *FERC Contact:* Silvia Pineda-Munoz at (202) 502–8388; or email at silvia.pineda-munoz@ferc.gov.

j. Dashiields Hydropower filed its request to use the Traditional Licensing Process on October 31, 2024, and

provided public notice of its request on November 3, 2024. In a letter dated December 18, 2024, the Director of the Division of Hydropower Licensing approved Dashiields Hydropower's request to use the Traditional Licensing Process.

k. With this notice, we are initiating informal consultation with the U.S. Fish and Wildlife Service under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR, Part 402; and NOAA Fisheries under section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act and implementing regulations at 50 CFR 600.920. We are also initiating consultation with the Pennsylvania State Historic Preservation Officer, as required by section 106, National Historic Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating Dashiields Hydropower, as the Commission's non-federal representative for carrying out informal consultation pursuant to section 7 of the Endangered Species Act and section 305(b) of the Magnuson-Stevens Fishery Conservation and Management Act; and consultation pursuant to section 106 of the National Historic Preservation Act.

m. Dashiields Hydropower filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD may be viewed on the Commission's website (<http://www.ferc.gov>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov, (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

You may register online at <https://ferconline.ferc.gov/FEROnline.aspx> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

o. The applicant states its unequivocal intent to submit an application for an original license for Project No. 15292.

p. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission

processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Dated: December 18, 2024.

Debbie-Anne A. Reese,
Secretary.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <https://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Dated: December 20, 2024.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. P–2725–076]

Oglethorpe Power Corporation: Notice of Application Tendered for Filing With the Commission and Soliciting Additional Study Requests and Establishing Procedural Schedule for Licensing and a Deadline for Submission of Final Amendments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* 2725–076.

c. *Date filed:* December 6, 2024.

d. *Applicant:* Oglethorpe Power Corporation (OPC).

e. *Name of Project:* Rocky Mountain Pumped Storage Hydroelectric Project.

f. *Location:* On Heath Creek, in Floyd County, Georgia.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Jeff Swartz, Oglethorpe Power Corporation, Senior Vice President of Plant Operations, 2100 East Exchange Place, Tucker, Georgia 30084, email at Jeff.Swartz@opc.com.

i. *FERC Contact:* David Gandy at 202–502–8560, or david.gandy@ferc.gov.

j. *Cooperating agencies:* Federal, state, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item l below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. *See*, 94 FERC ¶ 61,076 (2001).

k. Pursuant to section 4.32(b)(7) of 18 CFR of the Commission's regulations, if any resource agency, Indian Tribe, or person believes that an additional scientific study should be conducted in order to form an adequate factual basis for a complete analysis of the application on its merit, the resource agency, Indian Tribe, or person must file a request for a study with the Commission not later than 60 days from the date of filing of the application, and serve a copy of the request on the applicant.

l. *Deadline for filing additional study requests and requests for cooperating agency status:* February 4, 2025.

The Commission strongly encourages electronic filing. Please file additional study requests and requests for cooperating agency status using the Commission's eFiling system at <https://ferconline.ferc.gov/FEROnline.aspx>. For assistance, please contact FERC Online Support at

FEROnlineSupport@ferc.gov, (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A.

Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All filings must clearly identify the project name and docket number on the first page: Rocky Mountain Pumped Storage Hydroelectric Project (P-2725-076).

m. The application is not ready for environmental analysis at this time.

n. *The Rocky Mountain Pumped Storage Project consists of the following existing facilities:* (1) a 120-foot-high, 12,895-foot-long earth and rockfill upper dam; (2) a 221 acre upper reservoir with 10,650 acre-feet of storage and a normal operating pool elevation of 1,392 feet NAVD88; (3) a 35-foot-diameter, 567-foot-high concrete-lined power shaft; (4) a 35-foot-diameter, 1,935-foot-long concrete lined tunnel with two concrete lined bifurcations; (5) three 19-foot-diameter, 470-foot-long steel lined penstocks; (6) a 348-foot-long, 156-foot-wide, 175-foot-high powerhouse containing three reversible Francis pump-turbines, with a combined installed capacity of 904 megawatts; (7) three 230 kilovolt, 2.7-mile-long transmission lines; (8) a substation; and (9) appurtenant facilities.

The project has reserve storage water contained in two auxiliary pools adjacent to the lower reservoir. Pool I's surface area is 400 acres and is formed by four dams. The pool I dams consist of: (a) a 25-foot-high earthen dam of unspecified length; (b) a 20-foot-high, 775-foot-long earth and rockfill dam; (c) a 50-foot-high, 700-foot-long earth and rockfill dam; (d) a 50-foot-high, 405-foot-long earth and rockfill dam. Pool II surface area is 200 acres and is formed by a 30-foot-high, 335-foot-long earth and rockfill dam.

The Rocky Mountain Pumped Storage Project is operated in a pumped storage mode and OPC proposes to continue operating the project in that mode.

o. A copy of the application can be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document (P-2725). For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov or call tollfree, (866) 208-3676 or (202) 502-8659 (TTY).

You may also register online at <https://ferconline.ferc.gov/ferconline.aspx> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

The Commission's Office of Public Participation (OPP) supports meaningful

public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202)502-6595 or OPP@ferc.gov.

p. *Procedural schedule and final amendments:* The application will be processed according to the following preliminary schedule. Revisions to the schedule will be made as appropriate.

Milestone	Target date
Issue Deficiency Letter (if necessary).	February 2025.
Request for Additional Information.	February 2025.
Issue Notice of Acceptance	May 2025.
Issue Scoping Document 1 for comments.	June 2025.
Issue Scoping Document 2 (if necessary).	August 2025.

q. Final amendments to the application must be filed with the Commission no later than 30 days from the issuance date of the notice of ready for environmental analysis.

Dated: December 18, 2024.

Debbie-Anne A. Reese,
Secretary.

[FR Doc. 2024-30864 Filed 12-27-24; 8:45 am]

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP23-516-000; CP23-516-001]

East Tennessee Natural Gas, LLC; Notice of Availability of the Final Environmental Impact Statement for the Proposed Ridgeline Expansion Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared a final environmental impact statement (EIS) for the Ridgeline Expansion Project (Project), proposed by East Tennessee Natural Gas, LLC (East Tennessee) in the above-referenced docket. East Tennessee requests authorization to construct and operate 122.2 miles of 30-inch-diameter natural gas pipeline and associated facilities in Trousdale, Smith, Jackson, Putnam, Overton, Fentress, Morgan, and Roane Counties, Tennessee. The purpose of the Project is to provide

about 300,000 dekatherms per day of new firm natural gas transportation capacity and up to 95,000 dekatherms of customized delivery service (*i.e.*, peaking service) from multiple providers to the site of Tennessee Valley Authority's Kingston Fossil Plant.

The final EIS assesses the potential environmental effects of the construction and operation of the Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed Project would have some limited adverse environmental effects; however, with implementation of East Tennessee's impact avoidance, minimization, and mitigation measures, as well as adherence to the mitigation measures recommended in the EIS, these effects would be avoided, mitigated, or reduced to less-than-significant levels.

The U.S. Army Corps of Engineers (USACE), the U.S. Environmental Protection Agency, the U.S. Fish and Wildlife Service, and the National Park Service participated as cooperating agencies in the preparation of the EIS. Cooperating agencies have jurisdiction by law or special expertise with respect to resources potentially affected by the proposal and participate in the NEPA analysis. The USACE will adopt and use the EIS to consider the issuance of an Individual Permit under section 404 of the Clean Water Act. Although the USACE provided input to the conclusions and recommendations presented in the final EIS, the USACE will present its own conclusions and recommendations in its Record of Decision for the Project.

The final EIS addresses the potential environmental effects of the construction and operation of the following Project facilities, all in the State of Tennessee:

- 122.2 miles of 30-inch-diameter pipeline in Trousdale, Smith, Jackson, Putnam, Overton, Fentress, Morgan, and Roane Counties, including 4.0 miles of header pipeline and 118.2 miles of mainline pipeline (collectively referred to as the Mainline);
- a new 14,600-horsepower, electric-driven compressor station (Hartsville Compressor Station) and an associated solar array to partially power the facility in Trousdale County;
- a new meter and regulating station to receive gas from Columbia Gulf Transmission, LLC in Trousdale County;
- modifications to two existing meter and regulating stations to receive gas from Texas Eastern Transmission, LP and Midwestern Gas Transmission Company in Trousdale County;

- a new delivery meter station to measure gas delivered to the Kingston Fossil Plant in Roane County; and
- related appurtenances.

East Tennessee also proposes to remove approximately 24 miles of previously abandoned-in-place pipe segments along East Tennessee's existing 22-inch-diameter Line 3100–1 associated with various prior pipeline replacement projects. East Tennessee would relay the new 30-inch-diameter Mainline pipe into the same trench.

The Commission mailed a copy of the *Notice of Availability* to Federal and State resources agencies, elected officials, environmental groups and non-governmental organizations, Native American Tribes, potentially affected landowners, local libraries and newspapers, and other stakeholders. The final EIS is only available in electronic format. It may be viewed and downloaded from FERC's website (www.ferc.gov), on the natural gas environmental documents page (<https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents>). In addition, the final EIS may be accessed by using the eLibrary link on FERC's website. Click on the eLibrary link (<https://elibrary.ferc.gov/eLibrary/search>), select "General Search," and enter the docket number in the "Docket Number" field, excluding the last three digits (*i.e.* CP23–516). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

The final EIS is not a decision document. It presents Commission staff's independent analysis of the environmental issues for the Commission to consider when addressing the merits of all issues in this proceeding. Additional information about the Project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website (www.ferc.gov) using the eLibrary link. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as

interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

In addition, the Commission offers a free service called eSubscription that allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to <https://www.ferc.gov/ferc-online/overview> to register for eSubscription.

Dated: December 20, 2024.

Debbie-Anne A. Reese,
Secretary.

[FR Doc. 2024–31338 Filed 12–27–24; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Western Area Power Administration

Colorado River Storage Project—Rate Order No. WAPA–220

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of proposed transmission and ancillary services formula rates.

SUMMARY: The Colorado River Storage Project (CRSP) Management Center (MC) of the Western Area Power Administration (WAPA) proposes new formula rates for CRSP transmission and ancillary services for CRSP MC's costs to be recovered under the Southwest Power Pool's (SPP) Open Access Transmission Tariff (Tariff) should CRSP MC decide to become a member of SPP. The proposed formula rates will become effective on the latter of CRSP MC's membership date or the go-live date of the expansion of the SPP Regional Transmission Organization (RTO) into the Western Interconnection (scheduled for April 1, 2026, as of the date of this notice) and will remain in effect for 5 years from the effective date, which with an effective date of April 1, 2026, will be March 31, 2031, or until superseded.

DATES: A consultation and comment period will begin December 30, 2024 and end March 31, 2025. CRSP MC will present a detailed explanation of the proposed formula rates and other modifications at a public information forum that will be held on February 19, 2025, at 2 p.m. MST to no later than 3 p.m. MST. CRSP MC will also host a public comment forum on February 19, 2025, at 3:15 p.m. MST to no later than 4 p.m. MST. The public information

forum and the public comment forum will be conducted virtually. Instructions for participating in the forums will be posted on CRSP MC's Rates website at least 14 days prior to the public information and comment forums at: www.wapa.gov/about-wapa/regions/crsp/rates/2026-rate-adjustment-transmission-and-ancillary-services/.

CRSP MC will accept comments any time during the consultation and comment period.

ADDRESSES: Written comments and requests to be informed of Federal Energy Regulatory Commission (FERC) actions concerning the proposed formula rates submitted by WAPA to FERC for approval should be sent to: Rodney G. Bailey, CRSP Manager, Colorado River Storage Project Management Center, Western Area Power Administration, 1800 South Rio Grande Avenue, Montrose, CO 81401, or email CRSPMC-rate-adj@wapa.gov. CRSP MC will post information about the proposed formula rates and written comments received to its rates website at: www.wapa.gov/about-wapa/regions/crsp/rates/2026-rate-adjustment-transmission-and-ancillary-services/.

FOR FURTHER INFORMATION CONTACT: Tamala D. Gheller, Rates Manager, Colorado River Storage Project Management Center, Western Area Power Administration, (970) 240–6545 or email: gheller@wapa.gov.

SUPPLEMENTARY INFORMATION: On April 28, 2023, WAPA published a **Federal Register** notice titled "Recommendation for the Western Area Power Administration's Rocky Mountain Region and Colorado River Storage Project Management Center to Pursue Final Negotiations Regarding Membership in the Southwest Power Pool Regional Transmission Organization, and for the Upper Great Plains Region to Expand its Participation" (88 FR 26298). On June 4, 2024, SPP submitted revisions to its Tariff, Bylaws, and Membership Agreement to expand the SPP RTO into the Western Interconnection to FERC.¹ If SPP succeeds in obtaining FERC's approval of its Tariff, Bylaws, and Membership Agreement revisions, and upon further approval by the Administrator, CRSP MC plans to become a member of SPP.²

¹ Southwest Power Pool, Inc., Submission of Revisions to Tariff, Bylaws, and Membership Agreement to Expand the Regional Transmission Organization into the Western Interconnections (Part 1 of 2) and (Part 2 of 2), Docket Nos. ER24–2184, ER24–2185 (June 4, 2024).

² WAPA's Rocky Mountain region also plans to become a member of the SPP RTO, and WAPA's Upper Great Plains region plans to expand its

CRSP MC's membership will include CRSP MC becoming a Transmission Owner member of SPP. WAPA will transfer functional control of eligible CRSP transmission facilities to SPP. At such time, for the eligible facilities, CRSP transmission and ancillary services will no longer be available under WAPA's Tariff, and the existing transmission and ancillary services rate schedules, specifically SP-NW6, SP-PTP10, SP-NFT9, SP-UU3, L-AS1, L-AS2, L-AS3, SP-El6, SP-SSR6, will no longer be applicable.

CRSP transmission service for these eligible facilities will be provided under the SPP Tariff by SPP as the transmission service provider. Accordingly, CRSP MC will need new rate designs/rate schedules and rate implementation protocols in place for specific costs to be recovered under the SPP Tariff.

CRSP MC will continue to be the transmission service provider for specific transmission facilities associated with serving a customer group in its Southern Division marketing area, who requested a pseudo-tie into the Western Area Lower Colorado Balancing Authority (WALC BA). CRSP MC will provide firm transmission service to serve this pseudo-tie and will not transfer functional control of such facilities to SPP.

As of the date of this notice, SPP's anticipated deadline for filing certain SPP Tariff documents for CRSP MC (including annual revenue requirements (ARR), formula rate templates, and formula rate implementation protocols proposed in this rate filing, as well as other pertinent documents not included in this rate filing) with FERC is October 2025. CRSP MC is publishing this notice of proposed formula rates and initiating the rate consultation and comment period at this time in order for CRSP MC to obtain FERC-approved formula rates prior to this SPP deadline.

If CRSP MC does not become a member of SPP, further actions under this notice of proposed rates will be canceled, and existing formula rates will remain in effect. If canceled, CRSP MC will inform customers by letter and by posting notice of such on CRSP MC's Rates website (www.wapa.gov/about-wapa/regions/crsp/rates/2026-rate-adjustment-transmission-and-ancillary-services/) and will withdraw the formula rates proposed in this notice.

CRSP MC is proposing a new formula rate to calculate the ARR for its CRSP

transmission facilities that will be transferred to the functional control of SPP under the SPP Tariff. CRSP MC is also proposing a new formula rate to calculate the ARR for Scheduling, System Control, and Dispatch Service (SSCD Service) under the SPP Tariff. CRSP MC's revenue requirements will be added to the annual revenue requirements of other transmission owners in the SPP pricing Zone 103, also identified as the Colorado River Storage Project Zone (CRSPZ), for transmission service billed by SPP within the CRSPZ. CRSP MC's revenue requirements under these proposed rates will also impact other costs for transmission service within the broader SPP footprint. For transmission and ancillary services provided under the SPP Tariff, CRSP MC also proposes to provide information related to CRSP MC's rate implementation and annual updates in "Formula Rate Implementation Protocols" (Protocols). CRSP MC is also proposing changes to its existing Firm Point-to-Point (PTP) Transmission Service rate design in order to accommodate transmission service deliveries into the WALC BA. Each of these topics is described in more detail below.

The proposed formula rates will provide sufficient revenue to recover annual operation, maintenance, replacement, and interest expense while ensuring repayment of the project within the cost recovery criteria set forth in Department of Energy (DOE) Order RA6120.2. For more specific information on the proposed formula rates, please see the customer rate brochure located on CRSP MC's Rates website at: www.wapa.gov/about-wapa/regions/crsp/rates/2026-rate-adjustment-transmission-and-ancillary-services/.

Proposed Transmission Formula Rate

For transmission service provided by SPP under SPP's Tariff, under Rate Schedule CRCMT-ATRR, CRSP MC proposes to provide its overall CRSP annual transmission revenue requirement (ATRR) as separate subtotals to distinguish CRSP transmission facilities in the CRSPZ from facilities in other SPP zones. SPP will utilize these CRSP ATRR subtotals, along with zonal and regional load and other applicable information, to calculate the applicable charges and revenue distribution for SPP transmission service under the SPP Tariff.

Consistent with CRSP MC's current transmission formula rates, CRSP MC proposes to continue recovering transmission-related expenses and

investments on a forward-looking basis by using projections to estimate transmission costs for the upcoming year, with a true-up of incurred costs in a subsequent year. Transmission-related annual costs include operation and maintenance, administrative and general costs, interest, and depreciation. The annual costs will be reduced by applicable revenue credits received by CRSP MC under the SPP Tariff.

Revenue requirement data will be submitted to SPP in standard formula rate templates with costs classified as either "Zonal" or "Regional," applying the definitions in the SPP Tariff. "Zonal" costs are those that meet certain criteria and are recovered within the local pricing zone, while "Regional" costs are those meeting certain criteria eligible to be recovered across SPP's Western BA area. The Formula Rate Template for the CRSP ATRR and related information will be posted on CRSP MC's Colorado River Colorado Missouri (CRCM) Open Access Same-Time Information System (OASIS) website (www.oasis.oati.com/CRCM/index.html), on CRSP MC's Rates website (www.wapa.gov/about-wapa/regions/crsp/rates/2026-rate-adjustment-transmission-and-ancillary-services/), and on SPP's Member Related Postings website (opsportal.spp.org/OASIS/Directory/Member%20Related%20Postings).

Proposed Formula Rate for Scheduling, System Control, and Dispatch Service

SSCD Service is required to operate a Transmission Owner's SPP Tariff facilities and schedule movement of power through, out of, within, or into one or both of the SPP BA areas and certain parts of the transmission system not located within a SPP BA area. Under this proposal, CRSP MC's ARR for SSCD Service, under Rate Schedule CRCMT-AS1, will be submitted to SPP in a standard formula rate template for inclusion in the SPP Tariff Schedule 1. The SSCD Service ARR will be used by SPP to determine the regional SPP Schedule 1 rate and revenue distribution for SPP through-and-out transactions and to determine the zonal SPP Schedule 1 rate and revenue distribution for the CRSPZ under the SPP Tariff.

For consistency with the CRSP ATRR proposal, CRSP MC proposes a formula-based rate methodology to calculate its SSCD Service ARR on a forward-looking basis by using projections to estimate costs associated with SSCD Service for the upcoming year, with a true-up of incurred costs in a subsequent year. CRSP MC's SSCD Service ARR will be derived by calculating CRSP MC's

membership participation in the SPP RTO. These regions are proposing new formula rate designs/rate schedules under separate Rate Order Nos. WAPA-219 and WAPA-218, respectively.

applicable annual costs associated with the provision of SSCD Service, including operation and maintenance, administrative and general, interest, and depreciation. The annual costs will be reduced by any applicable revenue received by CRSP MC under the SPP Tariff. The Formula Rate Template for the SSCD Service and related information will be posted on CRSP MC's CRCM OASIS website, on CRSP MC's Rates website, and on SPP's Member Related Postings website (see web addresses listed previously).

Formula Rate Implementation Protocols

For transmission service provided by SPP under SPP's Tariff, CRSP MC proposes to provide information relating to CRSP MC's rate implementation and annual update procedures and timelines in "Formula Rate Implementation Protocols" (Protocols). The Protocols, together with the above-mentioned formula rate templates, comprise the Formula Rates that will be submitted to SPP to be incorporated in the SPP Tariff. All relevant information pertaining to CRSP MC's annual updates, customer notifications and review periods, and meetings will be contained in the Protocols. The Protocols will be posted on CRSP MC's CRCM OASIS website, on CRSP MC's Rates website, and on SPP's Member Related Postings website (see web addresses listed previously).

CRSP Deliveries Into WALC BA

CRSP MC proposes to pseudo-tie certain generation into the WALC BA to serve a group of customers in its Southern Division marketing area. As part of these arrangements, CRSP MC will retain a portion of its transmission system from Glen Canyon to Pinnacle Peak under WAPA's functional control and under WAPA's Tariff. Accordingly, this identified portion of CRSP MC transmission system will not be transferred to SPP's functional control and will not be governed by SPP's Tariff.

For transmission service provided by CRSP MC under WAPA's Tariff, under Rate Schedule CRCMT-PTP, CRSP MC proposes a revenue requirement consistent with CRSP MC's current PTP Transmission Formula Rate. For consistency with the CRSP ATRR proposal, and consistent with CRSP MC's current transmission formula rates, CRSP MC proposes to continue recovering transmission-related expenses and investments on a forward-looking basis by using projections to estimate transmission costs for the upcoming year, with a true-up of incurred costs in a subsequent year.

Transmission-related annual costs include operation and maintenance, administrative and general costs, interest, and depreciation. The Formula Rate Template for the CRSP PTP ATRR and related information will be posted on CRSP MC's CRCM OASIS website and on CRSP MC's Rates website (see web addresses listed previously).

Legal Authority

DOE procedures for public participation in power and transmission rate adjustments are located at 10 CFR part 903. The proposed action is a major rate adjustment, as defined by 10 CFR 903.2(d). In accordance with 10 CFR 903.15(a) and 10 CFR 903.16(a), CRSP MC will hold public information and public comment forums for this rate adjustment. CRSP MC will review and consider all timely public comments at the conclusion of the consultation and comment period and adjust the proposal as appropriate. The rates will then be approved on an interim basis.

WAPA is establishing the formula rates for CRSP in accordance with section 302 of the DOE Organization Act (42 U.S.C. 7152).³

By Delegation Order No. S1-DEL-RATES-2016, effective November 19, 2016, the Secretary of Energy delegated: (1) the authority to develop power and transmission rates to the WAPA Administrator; (2) the authority to confirm, approve, and place such rates into effect on an interim basis to the Deputy Secretary of Energy; and (3) the authority to confirm, approve, and place into effect on a final basis, or to remand or disapprove such rates, to FERC. By Delegation Order No. S1-DEL-S3-2024, effective August 30, 2024, the Secretary of Energy also delegated the authority to confirm, approve, and place such rates into effect on an interim basis to the Under Secretary for Infrastructure. By Redelegation Order No. S3-DEL-WAPA1-2023, effective April 10, 2023, the Under Secretary for Infrastructure further redelegated the authority to confirm, approve, and place such rates into effect on an interim basis to WAPA's Administrator.

Availability of Information

All brochures, studies, comments, letters, memorandums, or other

³ This Act transferred to, and vested in, the Secretary of Energy the power marketing functions of the Secretary of the Department of the Interior and the Bureau of Reclamation (Reclamation) under the Reclamation Act of 1902 (ch. 1093, 32 Stat. 388), as amended and supplemented by subsequent laws, particularly section 9(c) of the Reclamation Project Act of 1939 (43 U.S.C. 485h(c)) and section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s); and other acts that specifically apply to the projects involved.

documents that CRSP MC initiates or uses to develop the proposed formula rates are available for inspection and copying at the Colorado River Storage Project Management Center located at 1800 South Rio Grande Avenue, Montrose, Colorado. Many of these documents and supporting information are also available on CRSP MC's Rates website at: www.wapa.gov/about-wapa/regions/crsp/rates/2026-rate-adjustment-transmission-and-ancillary-services/.

Ratemaking Procedure Requirements

Environmental Compliance

WAPA is in the process of determining whether an environmental assessment or an environmental impact statement should be prepared or if this action can be categorically excluded from those requirements.⁴

Determination Under Executive Order 12866

WAPA has an exemption from centralized regulatory review under Executive Order 12866; accordingly, no clearance of this notice by the Office of Management and Budget is required.

Signing Authority

This document of the Department of Energy was signed on December 19, 2024, by Tracey A. LeBeau, Administrator, Western Area Power Administration, pursuant to delegated authority from the Secretary of Energy. That document, with the original signature and date, is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on December 19, 2024.

Jennifer Hartzell,

*Alternate Federal Register Liaison Officer,
U.S. Department of Energy.*

BILLING CODE 6450-01-P

⁴ In compliance with the National Environmental Policy Act (NEPA) of 1969, as amended, 42 U.S.C. 4321-4347; the Council on Environmental Quality Regulations for implementing NEPA (40 CFR parts 1500-1508); and DOE NEPA Implementing Procedures and Guidelines (10 CFR part 1021).

DEPARTMENT OF ENERGY

Western Area Power Administration

Pick-Sloan Missouri Basin Program—
Eastern Division—Rate Order No.
WAPA-218

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of proposed transmission and ancillary services formula rates.

SUMMARY: The Upper Great Plains (UGP) region of the Western Area Power Administration (WAPA) proposes new formula rates for the Pick-Sloan Missouri Basin Program—Eastern Division (P-SMBP—ED) transmission and ancillary services for UGP's costs to be recovered under the Southwest Power Pool's (SPP) Open Access Transmission Tariff (Tariff) should UGP decide to expand its participation in SPP in the Western Interconnection. These rates will be used by UGP to provide rate data to SPP, the Regional Transmission Organization (RTO) of which UGP is a member, after SPP's planned expansion of the RTO into the Western Interconnection on April 1, 2026. The existing UGP rates for services expire on September 30, 2025, but are being extended under a separate rate process, Rate Order No. WAPA-217, to continue to provide existing rate data to SPP between October 1, 2025, and final implementation date of the planned RTO expansion into the Western Interconnection. The proposed rates will address UGP operating changes and new provisions and settlement requirements under the proposed revisions to SPP's Tariff filed with the Federal Energy Regulatory Commission (FERC) to accommodate their RTO expansion into the Western Interconnection. The proposed formula rates will become effective on the go-live date of the expansion of the SPP RTO into the Western Interconnection (scheduled for April 1, 2026, as of the date of this notice) and will remain in effect for five years from the effective date, which with an effective date of April 1, 2026, will be March 31, 2031, or until superseded.

DATES: A consultation and comment period will begin December 30, 2024 and end March 31, 2025. UGP will present a detailed explanation of the proposed formula rates and other modifications at a public information forum that will be held on February 19, 2025, at 8 a.m. MST to no later than 9 a.m. MST. UGP will also host a public comment forum on February 19, 2025, at 9:15 a.m. MST to no later than 10 a.m. MST. The public information forum and

the public comment forum will be conducted virtually. Instructions for participating in the forums will be posted on UGP's Rates website at least 14 days prior to the public information and comment forums at: www.wapa.gov/about-wapa/regions/ugp/ugp-rates and other posting locations noted below.

UGP will accept comments any time during the consultation and comment period.

ADDRESSES: Written comments and requests to be informed of FERC actions concerning the proposed formula rates submitted by WAPA to FERC for approval should be sent to: Lloyd Linke, Regional Manager, Upper Great Plains Region, Western Area Power Administration, 2900 4th Ave. North, 6th Floor, Billings, MT 59101-1266, or email UGPTRates@wapa.gov. UGP will post information about the proposed formula rates and written comments received to its Rates website at: www.wapa.gov/about-wapa/regions/ugp/ugp-rates and other posting locations noted below in the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Linda Cady-Hoffman, Rates Manager, Upper Great Plains Region, Western Area Power Administration, (406) 255-2920 or email: cady@wapa.gov.

SUPPLEMENTARY INFORMATION: On September 28, 2020, FERC approved and confirmed Rate Schedules WAUGP-ATRR, WAUGP-AS1, WAUW-AS3, WAUW-AS4, WAUW-AS5, WAUW-AS6, and WAUW-AS7 under Rate Order No. WAPA-188 on a final basis through September 30, 2025.¹ These existing formula-based rate schedules are for transmission and ancillary services for the transmission facilities in the P-SMBP—ED that UGP transferred to the functional control of SPP for its existing membership. The existing formula rates are viewable online at the following locations: (1) UGP's Open Access Same-time Information System (OASIS) at: <https://www.oasis.oati.com/wapa/index.html>; (2) UGP's Rates website at: www.wapa.gov/about-wapa/regions/ugp/ugp-rates; and (3) the "Western Area Power Administration UGP Information" link on SPP's Member Related Postings website at: opsportal.spp.org/OASIS/Directory/Member%20Related%20Postings.

On April 28, 2023, WAPA published a **Federal Register** notice titled "Recommendation for the Western Area

Power Administration's Rocky Mountain Region and Colorado River Storage Project Management Center to Pursue Final Negotiations Regarding Membership in the Southwest Power Pool Regional Transmission Organization, and for the Upper Great Plains Region to Expand its Participation" (88 FR 26298). On June 4, 2024, SPP submitted revisions to its Tariff, Bylaws, and Membership Agreement to expand the SPP RTO into the Western Interconnection to FERC.² If SPP succeeds in obtaining FERC's approval of its Tariff, Bylaws, and Membership Agreement revisions, and upon further approval by the Administrator, UGP plans to expand its participation in SPP in the Western Interconnection.

As of the date of this notice, SPP's anticipated deadline for filing certain SPP Tariff documents for UGP (including annual revenue requirements (ARR), formula rate templates, and formula rate implementation protocols proposed in this rate filing, as well as other pertinent documents not included in this rate filing) with FERC is October 2025. UGP is publishing this notice of proposed formula rates and initiating the rate consultation and comment period at this time in order for UGP to obtain FERC-approved formula rates prior to this SPP deadline.

If UGP does not expand its participation in SPP in the Western Interconnection, further actions under this notice of proposed rates will be canceled, and existing formula rates will remain in effect. If canceled, UGP will inform customers by letter and by posting notice of such on UGP's OASIS website (www.oasis.oati.com/wapa/index.html), on UGP's Rates website (www.wapa.gov/about-wapa/regions/ugp/ugp-rates), and on the "Western Area Power Administration UGP Information" link on SPP's Member Related Postings website (opsportal.spp.org/OASIS/Directory/Member%20Related%20Postings) and will withdraw the formula rates proposed in this notice.

UGP needs to adopt new formula rates for transmission and ancillary services so that UGP's costs can continue to be recovered under the SPP Tariff with the SPP expansion of its RTO and Integrated Marketplace into the Western Interconnection, and to address the new and revised SPP settlements proposed in SPP's FERC filing for the RTO

² Southwest Power Pool, Inc., Submission of Revisions to Tariff, Bylaws, and Membership Agreement to Expand the Regional Transmission Organization into the Western Interconnections (Part 1 of 2) and (Part 2 of 2), Docket Nos. ER24-2184, ER24-2185 (June 4, 2024).

¹ Order Confirming and Approving Rate Schedules on a Final Basis, FERC Docket Nos. EF20-3-000 and EF20-3-001.

expansion. UGP's revenue requirements are added to the annual revenue requirements of other transmission owners in the multi-owner SPP pricing Zone 19, also identified as the Upper Missouri Zone (UMZ) for transmission service billed by SPP within the UMZ. UGP's revenue requirements under these proposed rates also impact other costs for transmission service within the broader SPP footprint.

The proposed rates continue the formula-based methodology that includes an annual update on January 1 of every year, to the financial data in the rate formulas, and include Rate Formula Implementation Protocols to clarify UGP's rate implementation and annual update procedures with changes related to the planned RTO expansion in the Western Interconnection to: (1) Terminate the Balancing Authority Area (BAA)-related ancillary services (and associated worksheets in the Rate Formula Templates) for Regulation and Frequency Response Service, Operating Reserves—Spinning Reserve Service and Supplemental Reserve Service, Energy Imbalance Service (EI), and Generator Imbalance Service (GI); (2) Incorporate changes in the Rate Formula Templates to calculate the Annual Transmission Revenue Requirement (ATRR) for the Miles City Direct Current (DC) Tie for SPP's settlements purposes related to SPP's proposed DC Tie Access Charge;³ (3) Incorporate changes in the Rate Formula Templates to calculate the subtotals of the ATRR for the SPP West and East BAAs separately for SPP's settlements purposes; (4) Incorporate a new worksheet in the Rate Formula Templates to calculate the Incremental Market Efficiency Use⁴ (Incremental MEU) share for the Miles City DC Tie; (5) Incorporate changes in the Rate Formula Templates to calculate the ATRRs for SPP Base Plan Upgrades separately for SPP's settlements purposes in each of the SPP West and East BAAs; and (6) Update, as needed, the existing Rate Formula Templates to smooth the true-up process impacts, increase transparency, and incorporate the changes noted above. The proposed

formula rates will remain in effect for five years from the effective date, which with an effective date of April 1, 2026, will be March 31, 2031, or until WAPA changes the formula rates through another public rate process pursuant to 10 CFR part 903, whichever occurs first.

UGP is a Transmission Owner member of SPP pursuant to negotiated provisions in its SPP Membership Agreement, Bylaws, and SPP Tariff. Transmission and ancillary services are provided by SPP under the SPP Tariff for UGP's facilities transferred to the functional control of SPP. UGP has transmission facilities in both the Eastern and Western Interconnections separated by the Miles City DC Tie and the Fort Peck Power Plant substation. UGP currently operates its Western Area Power Administration, Upper Great Plains West (WAUW) BAA in the Western Interconnection as the Balancing Authority (BA) and has not previously placed the portion of its transmission system located in the Western Interconnection into SPP's Integrated Marketplace. However, with the planned SPP expansion of its RTO into the Western Interconnection, UGP will merge its WAUW BAA into the SPP West BAA and discontinue its current role as a BA. UGP will also place its remaining transmission system and other generation and load located in the Western Interconnection (in the existing WAUW BAA footprint) into SPP's Integrated Marketplace on the effective date of UGP's expanded participation in SPP in the Western Interconnection.

The proposed formula rates will provide sufficient revenue to recover annual operation, maintenance, replacement, and interest expense while ensuring repayment of the project within the cost recovery criteria set forth in Department of Energy (DOE) Order RA 6120.2. For more information on the proposed rates, please see the customer rate brochure located on UGP's OASIS website, on UGP's Rates website, and on SPP's Member Related Postings website (see web addresses listed previously).

Proposed Transmission Formula Rates

UGP proposes changes to its current formula rate calculation methodology for its ATRR, currently provided under Rate Schedule WAUGP-ATRR. These changes will more clearly, transparently, and separately document UGP's facilities in the Western Interconnection, the Eastern Interconnection, and at the Miles City DC Tie and associated subtotals of the overall ATRR for each of these sub-sets of facilities. SPP will utilize these ATRR subtotals, along with zonal and regional

load and other applicable information, to calculate the applicable charges and revenue distribution for SPP transmission service under the SPP Tariff.

Consistent with UGP's current formula rates, UGP proposes to continue recovering transmission-related expenses and investments on a forward-looking basis by using projections to estimate transmission costs for the upcoming year, with a true-up of incurred costs in a subsequent year. Transmission-related annual costs include operation and maintenance, administrative and general costs, interest, and depreciation. The annual costs will be reduced by applicable revenue credits received by UGP under the SPP Tariff.

Revenue requirement data will be submitted to SPP in standard formula rate templates with costs classified as either "Zonal" or "Regional," applying the definitions in the SPP Tariff. "Zonal" costs are those that meet certain criteria and are recovered within the local pricing zone, while "Regional" costs are those meeting certain criteria eligible to be recovered across SPP's applicable West or East BAA, dependent upon where the transmission upgrade is located in the Western or Eastern Interconnection for SPP's settlement purposes under the SPP Tariff. The Formula Rate Template for UGP ATRR and related information will be posted on UGP's OASIS website, on UGP's Rates website, and on SPP's Member Related Postings website (see web addresses listed previously).

Proposed Miles City DC Tie Incremental Market Efficiency Use Share Formula Rate

In its FERC filing for the proposed expansion of the RTO into the Western Interconnection, SPP proposes to expand its Integrated Marketplace across the seam between the Eastern and Western Interconnections by including the West DC Ties⁵ into the Integrated Marketplace 5-minute market dispatch. To enable this market dispatch between the Eastern and Western Interconnections, SPP included a new Section 8.11 to Attachment AE of the SPP Tariff for the calculation of the Incremental MEU amounts. The

³ "DC Tie Access Charge: A charge on a transmission reservation utilizing a West DC Tie that sinks outside of the Zone where the West DC Tie is located. The Transmission Customer shall be responsible for DC Tie Access Charge determined in accordance with Schedule 14." (SPP Proposed Tariff at Part I, Section 1, D Definitions.)

⁴ "Incremental Market Efficiency Use (Incremental MEU) Charge: A market recovery mechanism to compensate West DC Tie Transmission Owners for the expected loss of life of certain West DC Tie facilities due to increased utilization of the West DC Ties by the Integrated Marketplace." (SPP Proposed Tariff at Part I, Section 1, I Definitions.)

⁵ "West DC Ties: A direct current interconnection between the Eastern Interconnection and Western Interconnection for which the DC Tie Access Charge and the Incremental Market Efficiency Use Charge may be applicable. In the Integrated Marketplace, the West DC Ties will be Non-Biddable Locations that will be used in the settlements in the TCR [Transmission Congestion Rights] Markets. The West DC Ties are Miles City, Stegall, or Sidney." (SPP Proposed Tariff at Part I, Section W Definitions.)

Incremental MEU compensates each West DC Tie Transmission Owner for the expected loss of life of that owner's West DC Tie facilities due to increased utilization of the West DC Ties by the Integrated Marketplace.

For SPP to compensate UGP as a West DC Tie Transmission Owner of the Miles City DC Tie for Incremental MEU under SPP's Tariff, UGP proposes to provide its Miles City DC Tie Incremental MEU share under Rate Schedule UGP-DCTIE-IMEU. SPP will utilize this Miles City DC Tie Incremental MEU share along with other applicable information to calculate the amount to be paid to UGP for the expected loss of life of certain Miles City DC Tie facilities due to increased utilization of those West DC Tie facilities by SPP in the Integrated Marketplace.

To simplify the calculation of the Incremental MEU and provide a consistent forward-looking known amount to be included in the market uplift, a loss-of-life will be estimated for each of the eligible groups of West DC Tie equipment due to expected market operation impacts, and a leveled annual estimate will be provided to SPP. The loss-of-life calculations will be based upon pre-defined impact metrics directly related to the increased market use for each of the West DC Tie equipment groups eligible for cost recovery. Revenue received from SPP for UGP's Miles City DC Tie Incremental MEU share will be credited against the Miles City DC Tie portion of the UGP ATRR described above.

The Miles City DC Tie Incremental MEU share data will be submitted to SPP in a standard formula rate template in accordance with the new SPP Tariff Attachment AE, Addendum 3A. The Formula Rate Template for the Miles City DC Tie Incremental MEU share will be posted on UGP's OASIS website, on UGP's Rates website, and on SPP's Member Related Postings website (see web addresses listed previously).

Proposed Formula Rate for Scheduling, System Control, and Dispatch Service

UGP proposes to continue to use its current formula rate calculation methodology for Scheduling, System Control, and Dispatch Service (SSCD), currently provided under Rate Schedule WAUGP-AS1. This rate schedule will continue to include transmission facilities in the Western Interconnection. The Formula Rate Template for SSCD and related information will be posted on UGP's OASIS website, on UGP's Rates website, and on SPP's Member Related Postings

website (see web addresses listed previously).

Formula Rate Implementation Protocols

For transmission service provided by SPP under SPP's Tariff, UGP will continue to provide information relating to UGP's rate implementation and annual update procedures and timelines in "Formula Rate Implementation Protocols" (Protocols). The Protocols, together with the above-mentioned formula rate templates, comprise the Formula Rates that will be submitted to SPP to be incorporated into the SPP Tariff. All relevant information pertaining to UGP's annual updates, customer notifications and review periods, and meetings will be contained in the Protocols. The Protocols will be posted on UGP's OASIS website, on UGP's Rates website, and on SPP's Member Related Postings website (see web addresses listed previously).

Proposed Termination of Regulation and Frequency Response Service Formula Rate

UGP proposes to terminate its current formula rate calculation methodology for Regulation and Frequency Response Service (Regulation), currently provided under Rate Schedule WAUW-AS3. This rate schedule addresses Regulation associated with UGP's WAUW BAA in the Western Interconnection. Given the SPP Integrated Marketplace will extend into the Western Interconnection, and UGP will merge its WAUW BAA into the SPP West BAA, UGP will no longer provide Regulation in the WAUW BAA as the BA.

Proposed Termination of Operating Reserves Service-Spinning and Supplemental Formula Rates

UGP proposes to terminate its current formula rate calculation methodology for Operating Reserve-Spinning Reserve Service and for Operating Reserve-Supplemental Reserve Service (collectively, Operating Reserves), currently provided under Rate Schedules WAUW-AS5 and WAUW-AS6, respectively. These rate schedules address Operating Reserves associated with UGP's WAUW BAA in the Western Interconnection. Given the SPP Integrated Marketplace will extend into the Western Interconnection, and UGP will merge its WAUW BAA into the SPP West BAA, UGP will no longer provide Operating Reserves in the WAUW BAA as the BA.

Proposed Termination of Energy Imbalance and Generator Imbalance Service Formula Rates

UGP proposes to terminate its current formula rate calculation methodologies for EI, currently provided under Rate Schedule WAUW-AS4, and GI, currently provided under Rate Schedule WAUW-AS7. These rate schedules address Energy Imbalance and Generator Imbalance associated with UGP's WAUW BAA in the Western Interconnection. Given that the SPP Integrated Marketplace will extend into the Western Interconnection, and UGP will merge its WAUW BAA into the SPP West BAA, UGP will no longer provide Energy Imbalance and Generator Imbalance in the WAUW BAA as the BA.

Legal Authority

DOE procedures for public participation in power and transmission rate adjustments are located at 10 CFR part 903. The proposed action is a major rate adjustment, as defined by 10 CFR 903.2(d). In accordance with 10CFR 903.15(a) and 10CFR 903.16(a), UGP will hold public information and public comment forums for this rate adjustment. UGP will review and consider all timely public comments at the conclusion of the consultation and comment period and adjust the proposal as appropriate. The rates will then be approved on an interim basis.

WAPA is establishing the formula rates for UGP in accordance with section 302 of the DOE Organization Act (42 U.S.C. 7152).⁶

By Delegation Order No. S1-DEL-RATES-2016, effective November 19, 2016, the Secretary of Energy delegated: (1) the authority to develop power and transmission rates to the WAPA Administrator; (2) the authority to confirm, approve, and place such rates into effect on an interim basis to the Deputy Secretary of Energy; and (3) the authority to confirm, approve, and place into effect on a final basis, or to remand or disapprove such rates, to FERC. By Delegation Order No. S1-DEL-S3-2024, effective August 30, 2024, the Secretary of Energy also delegated the authority to confirm, approve, and place such rates into effect on an interim basis to the

⁶ This Act transferred to, and vested in, the Secretary of Energy the power marketing functions of the Secretary of the Department of the Interior and the Bureau of Reclamation (Reclamation) under the Reclamation Act of 1902 (ch. 1093, 32 Stat. 388), as amended and supplemented by subsequent laws, particularly section 9(c) of the Reclamation Project Act of 1939 (43 U.S.C. 485h(c)) and section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s); and other acts that specifically apply to the projects involved.

Under Secretary for Infrastructure. By Redesignation Order No.S3–DEL–WAPA1–2023, effective April 10, 2023, the Under Secretary for Infrastructure further redelegated the authority to confirm, approve, and place such rates into effect on an interim basis to WAPA’s Administrator.

Availability of Information

All brochures, studies, comments, letters, memorandums, or other documents that UGP initiates or uses to develop the proposed formula rates are available for inspection and copying at the Upper Great Plains Regional office located at 2900 4th Ave. North, 6th Floor, Billings, Montana. Many of these documents and supporting information are also available on UGP’s Rates website at: www.wapa.gov/about-wapa/regions/ugp/ugp-rates and other posting locations noted.

Ratemaking Procedure Requirements

Environmental Compliance

WAPA is in the process of determining whether an environmental assessment or an environmental impact statement should be prepared or if this action can be categorically excluded from those requirements.⁷

Determination Under Executive Order 12866

WAPA has an exemption from centralized regulatory review under Executive Order 12866; accordingly, no clearance of this notice by the Office of Management and Budget is required.

Signing Authority

This document of the Department of Energy was signed on December 19, 2024, by Tracey A. LeBeau, Administrator, Western Area Power Administration, pursuant to delegated authority from the Secretary of Energy. That document, with the original signature and date, is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

⁷ In compliance with the National Environmental Policy Act (NEPA) of 1969, as amended, 42 U.S.C. 4321–4347; the Council on Environmental Quality Regulations for implementing NEPA (40 CFR parts 1500–1508); and DOE NEPA Implementing Procedures and Guidelines (10 CFR part 1021).

Signed in Washington, DC, on December 19, 2024.

Jennifer Hartzell,

*Alternate Federal Register Liaison Officer,
U.S. Department of Energy.*

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OLEM–2022–0174; FRL 12525–01–OLEM]

Accidental Release Prevention Requirements: Risk Management Programs Under the Clean Air Act; Safer Communities by Chemical Accident Prevention; Final Action on Petition for Reconsideration

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final action denying petition for reconsideration.

SUMMARY: The U.S. Environmental Protection Agency (EPA) received a petition for reconsideration of the final revisions to the Accidental Release Prevention Requirements: Risk Management Programs Under the Clean Air Act; Safer Communities by Chemical Accident Prevention, published in the **Federal Register** on March 11, 2024. The agency is providing notice that it is denying the petition for reconsideration. The basis for EPA’s action is set out fully in a letter addressed to the petitioner, available in the rulemaking docket.

DATES: December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Kristina Guarino, United States Environmental Protection Agency, Office of Land and Emergency Management, 1200 Pennsylvania Ave. NW (Mail Code 5104A), Washington, DC 20460; telephone number: (202) 566–1235; email address: guarino.kristina@epa.gov.

SUPPLEMENTARY INFORMATION:

I. How can I get copies of this document and other related information?

A copy of this **Federal Register** notice, the petition for reconsideration, and the letter describing the full basis for this action are available in the rulemaking docket (Docket ID No. EPA–HQ–OLEM–2022–0174). Publicly available docket materials are available electronically through www.regulations.gov. In addition, following signature, an electronic copy of this final action and the letter will be available on the internet at [https://www.epa.gov/rmp/risk-management-](https://www.epa.gov/rmp/risk-management-program-safer-communities-chemical-accident-prevention-final-rule)

[program-safer-communities-chemical-accident-prevention-final-rule](https://www.epa.gov/rmp/risk-management-program-safer-communities-chemical-accident-prevention-final-rule). Publicly available docket materials are available either electronically at <https://www.regulations.gov> or in hard copy at the Environmental Protection Agency, EPA Docket Center, William Jefferson Clinton West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744. For further information on EPA Docket Center services and the current status, please visit <https://www.epa.gov/dockets>.

II. Judicial Review

Section 307(b)(1) of the CAA indicates which Federal Courts of Appeal have venue for petitions of review of final actions by the EPA. This section provides, in part, that “a petition for review of action of the Administrator in promulgating . . . any standard of performance or requirement under section [111] of [the CAA],” or any other “nationally applicable” final action, “may be filed only in the United States Court of Appeals for the District of Columbia.” The EPA has determined that its action denying the petition for reconsideration is nationally applicable for purposes of CAA section 307(b)(1) because the action directly relates to the Risk Management Program regulations promulgated under CAA section 112(r), which are nationally applicable requirements. Thus, any petition for review of the final letter denying the petition for reconsideration must be filed in the Court of Appeals for the District of Columbia Circuit on or before February 28, 2025.

Michael S. Regan,
Administrator.

BILLING CODE 1610-02-P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-1328; FR ID 270090]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written PRA comments should be submitted on or before February 28, 2025. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email PRA@fcc.gov and to nicole.ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418-2991.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

OMB Control Number: 3060-1328.

Title: Participation Information Collection for the IoT Labeling Program.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit; Not-for-profit institutions.

Number of Respondents and Responses: 332 respondents; 3,150 responses.

Estimated Time per Response: 20 hours.

Frequency of Response: One-time and on occasion reporting requirements; recordkeeping requirements.

Obligation to Respond: Voluntary. Statutory authority for this collection is contained in 1, 2, 4(i), 4(n), 302, 303(r), 312, 333, and 503, of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(n), 302a, 303(r), 312, 333, 503; the IoT Cybersecurity Improvement Act of 2020, 15 U.S.C. 278g-3a to 278g-3e.

Total Annual Burden: 43,100 hours.

Total Annual Cost: No Cost.

Needs and Uses: The Commission seeks to revise this collection to reflect changes to these rules adopted by the Commission in a Public Notice on September 10, 2024 (opening an application filing window and adopting for Cybersecurity Label Administrator (CLA) and Lead Administrator). The FCC's consumer IoT cybersecurity labeling program will provide consumers with easily understood, accessible information on the relative security of a consumer IoT product they are considering for purchase, which will increase the security of devices consumers bring into their homes and as part of a national IoT ecosystem. CLAs will be authorized by the Commission to certify use of the FCC IoT Label, which includes the U.S. government certification mark (U.S. Cyber Trust Mark), by manufacturers whose products are found to be in compliance with the Commission's IoT

cybersecurity labeling program rules. The September 2024 Public Notice adopted rules for the CLAs and the Lead Administrator to reduce the risk of unauthorized access, use, disclosure, disruption, modification, or destruction of program data. Under this collection, each CLA will be required to create, update, and implement a cybersecurity risk management plan identifying the cyber risks that the entity faces, the controls used to mitigate those risks, and the steps taken to ensure that these controls are applied effectively to their operations. The plan must also describe how the CLA employs its organizational resources and processes to ensure the confidentiality, integrity, and availability of its information and information systems. The CLA's cybersecurity risk management plan must be available to the Commission upon request.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712-01-P

FEDERAL RESERVE SYSTEM

FEDERAL DEPOSIT INSURANCE CORPORATION

Community Reinvestment Act Regulations Asset-Size Thresholds

AGENCY: Board of Governors of the Federal Reserve System (Board); Federal Deposit Insurance Corporation (FDIC).

ACTION: Announcement of 2025 asset-size thresholds.

SUMMARY: Under their Community Reinvestment Act (CRA) regulations, the Board and the FDIC (collectively, the Agencies) annually adjust the asset-size thresholds used to define "small bank" and "intermediate small bank." As required by the CRA regulations, the adjustment to the threshold amounts is based on the annual percentage change in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W). Applying this annual inflation adjustment methodology, the Agencies are announcing that, from January 1, 2025, through December 31, 2025, "small bank" will mean a bank that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.609 billion; and "intermediate small bank" will mean a small bank with assets of at least \$402 million as of December 31 of both of the prior two calendar years and less than \$1.609 billion as of December 31 of either of the prior two calendar years.

DATES: These asset-size thresholds are in effect from January 1, 2025, through December 31, 2025.

FOR FURTHER INFORMATION CONTACT:

Board: Amal S. Patel, Senior Counsel, Division of Consumer and Community Affairs; or Sumeet Shroff, Counsel, or Cody Gaffney, Counsel, Legal Division, Board of Governors of the Federal Reserve System at (202) 452-2412. For the hearing impaired and users of Telecommunications Device for the Deaf (TDD) and TTY-TRS, please call 711 from any telephone, anywhere in the United States.

FDIC: Patience R. Singleton, Senior Policy Analyst, Supervisory Policy Branch, Division of Depositor and Consumer Protection, (202) 898-6859, psingleton@fdic.gov; Cassandra Duhaney, Counsel, (202) 898-6804, cduhaney@fdic.gov; or Alys V. Brown, Senior Attorney, (202), 898-3565, alybrown@fdic.gov, Legal Division, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

Community Reinvestment Act Asset-Size Thresholds

Under the current CRA regulations,¹ “small bank” means a bank that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.564 billion; and “intermediate small bank” means a small bank with assets of at least \$391 million as of December 31 of both of the prior two calendar years and less than \$1.564 billion as of December 31 of either of the prior two calendar years.² Pursuant to the annual inflation adjustment methodology described below, the Agencies are announcing that from January 1, 2025, through December 31, 2025, “small bank” will mean a bank that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.609 billion; and “intermediate small bank” will mean a small bank with assets of at least \$402 million as of

December 31 of both of the prior two calendar years and less than \$1.609 billion as of December 31 of either of the prior two calendar years.³

Calculation Methodology

The Agencies’ CRA regulations establish CRA performance standards for small banks and intermediate small banks. The CRA regulations define small and intermediate small banks by reference to asset-size criteria expressed in dollar amounts, and they further require the Agencies to publish annual adjustments to these dollar figures based on the year-to-year change in the average of the CPI-W, not seasonally adjusted, for each 12-month period ending in November, with rounding to the nearest million.⁴ This adjustment formula was first adopted for CRA purposes by the Agencies and the OCC in 2005.⁵

During the 12-month period ending November 2024, the CPI-W increased by 2.91 percent. Because the year-to-year change in the CPI-W was non-zero, the Agencies are making this annual adjustment. Beginning January 1, 2025, banks that, as of December 31 of either of the prior two calendar years, had assets of less than \$1.609 billion are small banks. Small banks with assets of at least \$402 million as of December 31 of both of the prior two calendar years and less than \$1.609 billion as of December 31 of either of the prior two calendar years are intermediate small banks.

The Agencies publish current and historical asset-size thresholds on the

³ Historically, the Agencies have announced these annual inflation adjustments via rulemakings that amend the “small bank” and “intermediate small bank” definitions in their CRA regulations. *See, e.g.*, 88 FR 87895 (Dec. 20, 2023) (implementing annual inflation adjustments for 2024). However, because the eCFR has been updated to reflect the text of the October 2023 final rule, and because the October 2023 final rule is currently enjoined, the Agencies have determined that this document (rather than a rulemaking) is the best vehicle for announcing the annual inflation adjustments for 2025. Once the litigation is resolved, the Agencies expect to resume their historical practice of announcing these annual inflation adjustments via rulemakings. The OCC adjusts the asset-size criteria for institutions that are subject to OCC-issued CRA regulations, including national banks and Federal and State savings associations, separately from the Agencies.

⁴ *See* 12 CFR 228.12(u)(2) and 345.12(u)(2) of the current CRA regulations.

⁵ *See* 70 FR 44256 (Aug. 2, 2005). Subsequently, the Office of Thrift Supervision (OTS), the agency then responsible for regulating savings associations, adopted an annual inflation adjustment methodology consistent with that of the Agencies and the OCC for its CRA regulations, previously set forth at 12 CFR part 563e. *See* 72 FR 13429 (Mar. 22, 2007). The Dodd-Frank Wall Street Reform and Consumer Protection Act transferred CRA rulemaking authority for Federal and State savings associations from the OTS to the OCC. *See* 12 U.S.C. 5412.

website of the Federal Financial Institutions Examination Council.⁶

By order of the Board of Governors of the Federal Reserve System, acting through the Secretary of the Board under delegated authority.

Ann E. Misback,

Secretary of the Board.

Federal Deposit Insurance Corporation.

Dated at Washington, DC, on December 15, 2024.

James P. Sheesley,

Assistant Executive Secretary.

BILLING CODE 6210-01-P; 6714-01-P

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of filing of the following agreement under the Shipping Act of 1984. Interested parties may submit comments, relevant information, or documents regarding the agreement to the Secretary by email at Secretary@fmc.gov, or by mail, Federal Maritime Commission, 800 North Capitol Street, Washington, DC 20573. Comments will be most helpful to the Commission if received within 12 days of the date this notice appears in the **Federal Register**, and the Commission requests that comments be submitted within 7 days on agreements that request expedited review. Copies of agreement are available through the Commission’s website (www.fmc.gov) or by contacting the Office of Agreements at (202)-523-5793 or tradeanalysis@fmc.gov.

Agreement No.: 201438.

Agreement Name: Maesk/HL Mediterranean Vessel Sharing Agreement.

Parties: Maersk A/S; Hapag-Lloyd AG.

Filing Party: Wayne Rohde, Cozen O’Connor.

Synopsis: The Agreement authorizes the Parties to share vessels in the trades between the U.S. East Coast on the one hand and ports in Turkey, Italy, and Morocco on the other hand.

Proposed Effective Date: 1/27/2025.

Location: <https://www2.fmc.gov/FMC/Agreements/Web/Public/AgreementHistory/87583>.

Agreement No.: 201439.

Agreement Name: Hapag-Lloyd/ZIM Med-North America/Jamaica Slot Exchange and Slot Charter Agreement.

Parties: Hapag Lloyd AG; ZIM Integrated Shipping Services Ltd.

⁶ *See* <https://www.ffiec.gov/cra/examinations.htm> (“Current and Historical Asset-Size Thresholds and Examples”).

¹ In October 2023, the Agencies and the Office of the Comptroller of the Currency (OCC) jointly issued a final rule to strengthen and modernize their Community Reinvestment Act regulations. *See* 89 FR 6574 (Feb. 1, 2024). Although the final rule was intended to take effect on April 1, 2024, the final rule has been challenged in litigation, and the final rule is currently enjoined. As such, the legacy CRA regulations (referred to in this notice as the “current CRA regulations”) remain in effect. The text of the current CRA regulations may be found: (i) in the 2022, 2023, or 2024 bound versions of title 12 of the Code of Federal Regulations; (ii) in the historical version of the Electronic Code of Federal Regulations (eCFR) as of March 29, 2024; or (iii) in appendix G of the final rule, as published in the eCFR on February 1, 2024.

² *See* 12 CFR 228.12(u)(1) and 345.12(u)(1) of the current CRA regulations.

Filing Party: Wayne Rohde, Cozen O'Connor.

Synopsis: The Agreement authorizes the parties to exchange slots and charter space on their respective services in the trades between the U.S. East Coast on the one hand and ports in Greece, Israel, Italy, Jamaica, Morocco, Spain, and Turkey on the other hand.

Proposed Effective Date: 01/27/2025.

Location: <https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/87584>.

Agreement No.: 201429-001.

Agreement Name: Gemini Cooperation Agreement.

Parties: Hapag Lloyd AG; Hapag-Lloyd USA, LLC; Maersk A/S.

Filing Party: Wayne Rohde, Cozen O'Connor.

Synopsis: The amendment revises Articles 5.A.2(f) and 12.2(d) to clarify the use of space to transport preference cargoes.

Proposed Effective Date: 1/27/2025.

Location: <https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/86566>.

Agreement No.: 201440.

Agreement Name: North Europe-USEC Vessel Sharing Agreement.

Parties: CMA CGM S.A.; COSCO SHIPPING Lines Co., Ltd.; Evergreen Marine (U.K.) Limited; Ocean Network Express Pte. Ltd.; Orient Overseas Container Line Limited; OOCL (Europe) Limited.

Filing Party: Joshua Stein, Cozen O'Connor.

Synopsis: The purpose of this Agreement is to authorize the Parties to charter and exchange space on one another's vessels and to coordinate and cooperate with respect to the Parties' transportation services and operations in the trades between, on the one hand, ports in North Europe (including Belgium, France, Germany, United Kingdom, and Netherlands), and on the other hand, Mexico and U.S. ports in the Atlantic coast range.

Proposed Effective Date: 01/30/2025.

Location: <https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/87586>.

Agreement No.: 201441.

Agreement Name: ONE/CMA CGM AL5-California Bridge Vessel Sharing Agreement.

Parties: CMA CGM S.A.; Ocean Network Express Pte. Ltd.

Filing Party: Joshua Stein, Cozen O'Connor.

Synopsis: The Agreement authorizes the parties to share vessels in the trade between ports on the U.S. East Coast/ Gulf and the U.S. West Coast on the one hand and ports in the United Kingdom,

Germany, France, the Netherlands, Belgium, Colombia, Panama, and Dominican Republic on the other.

Proposed Effective Date: 02/01/2025.

Location: <https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/87587>.

Agreement No.: 201442.

Agreement Name: ONE to YML AP1 Slot Charter Agreement.

Parties: Ocean Network Express Pte. Ltd.; Yang Ming Marine Transport Corporation & Yangming (UK) Ltd.

Filing Party: Joshua Stein, Cozen O'Connor.

Synopsis: The Agreement authorizes ONE to charter space to YML in the ports in China, Taiwan and Vietnam on the one hand and ports on the U.S. West Coast on the other hand.

Proposed Effective Date: 02/02/2025.

Location: <https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/87588>.

Dated: December 20, 2024.

BILLING CODE 6730-02-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Notice of Award of a Sole Source Cooperative Agreement To Fund Burkina Faso Ministry of Health, Direction of Disease Control Epidemics and Pandemics (DLMEP), Pasteur Institute of Ivory Coast (ICPI), National Public Health Institute of Liberia (NPHIL), Nigeria Center for Disease Control (NCDC), Senegal Ministry of Health and Social Action, and Sierra Leone Ministry of Health (MoH)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Disease Control and Prevention (CDC), located within the Department of Health and Human Services (HHS), announces seven separate awards to fund Burkina Faso Ministry of Health, Direction of Disease Control Epidemics and Pandemics in Cameroon, Pasteur Institute of Ivory Coast in Cote d'Ivoire, National Public Health Institute of Liberia in Liberia, Nigeria Center for Disease Control in Nigeria, Senegal Ministry of Health and Social Action in

Senegal, and Ministry of Health in Sierra Leone. For Burkina Faso Ministry of Health, the award is for approximately \$1,000,000, with an expected total funding of approximately \$5,000,000. For Direction of Disease Control Epidemics and Pandemics, the award is for approximately \$500,000, with an expected total funding of approximately \$2,500,000. For Pasteur Institute of Ivory Coast (ICPI), the award is for approximately \$2,000,000, with an expected total funding of approximately \$10,000,000. For National Public Health Institute of Liberia (NPHIL), the award is for approximately \$1,000,000 with an expected total funding of approximately \$5,000,000. For Nigeria Center for Disease Control (NCDC), the award is for approximately \$500,000 with an expected total funding of approximately \$2,500,000. For Senegal Ministry of Health and Social Action, the award is for approximately \$500,000 with an expected total funding of approximately \$2,500,000. For Sierra Leone Ministry of Health (MoH), the award is for approximately \$1,000,000, with an expected total funding of approximately \$5,000,000. The total 5-year period amount for the seven recipients is \$32,500,000, subject to the availability of funds. The awards will protect Americans and people worldwide from public health threats by building capacity within their respective countries to strengthen public health preparedness; early pathogen detection to mitigate the impact of global disease outbreaks and public health; and bolstering rapid response to global health emergencies.

DATES: The period for these awards will be September 30, 2025 through September 29, 2030.

FOR FURTHER INFORMATION CONTACT: Broderick Yoerg, Division of Global Health Protection, Global Health Center, Centers for Disease Control and Prevention, 1600 Clifton Rd., Atlanta, GA 30329, Telephone: (404) 234-0666, Email: DGHPNOFOs@cdc.gov.

SUPPLEMENTARY INFORMATION: The sole source award will provide support around disease surveillance and outbreak response, including establishing routine surveillance and developing information technology tools and systems. Broad areas of support include, but are not limited to: emergency management, ensuring countries have the knowledge and resources they need, including emergency operations centers that can mount a fast, coordinated response when outbreaks happen; safe laboratory systems and diagnostics, building the capacity to identify disease threats close

to the source and inform decision-making; and developing the workforce, training frontline responders, laboratorians, disease detectives, emergency managers, and other health professionals who are responsible for taking the lead when crisis strikes.

These are the only entities that can carry out this work, as they are in a unique position to conduct this work as host government ministries of health. They have the authority to support health service delivery through capacity building and oversee the national coordination of surveillance, preparedness, prevention, and response activities to all forms of health threats and public health emergencies.

Summary of the Award

Recipient: Burkina Faso Ministry of Health, Direction of Disease Control Epidemics and Pandemics, Pasteur Institute of Ivory Coast, National Public Health Institute of Liberia, Nigeria Center for Disease Control, Senegal Ministry of Health and Social Action, and Sierra Leone Ministry of Health.

Purpose of the Award: The purpose of these awards is to support disease surveillance and outbreak response, emergency management, safe laboratory systems and diagnostics and developing the public health workforce in Burkina Faso, Cameroon, Cote d'Ivoire, Liberia, Nigeria, Senegal, and Sierra Leone.

Amount of Award: For Burkina Faso Ministry of Health, the award is for approximately \$1,000,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately \$5,000,000 for the 5-year period of performance, subject to availability of funds. For Direction of Disease Control Epidemics and Pandemics (DLMEP), the award is for approximately \$500,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately \$2,500,000 for the 5-year period of performance, subject to availability of funds. For Pasteur Institute of Ivory Coast (IPCI), the award is for approximately \$2,000,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately \$10,000,000 for the 5-year period of performance, subject to availability of funds. For National Public Health Institute of Liberia (NPHIL), the award is for approximately \$1,000,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately \$5,000,000 for the 5-year period of performance, subject to availability of funds. For Nigeria Center for Disease Control (NCDC), the award is for approximately \$500,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately

\$2,500,000 for the 5-year period of performance, subject to availability of funds. For Senegal Ministry of Health and Social Action, the award is for approximately \$500,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately \$2,500,000 for the 5-year period of performance, subject to availability of funds. For Sierra Leone Ministry of Health (MoH), the award is for approximately \$1,000,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately \$5,000,000 for the 5-year period of performance, subject to availability of funds.

Authority: This program is authorized under Section 307 of the Public Health Service Act [42 U.S.C. 242] and Section 301(a) [42 U.S.C. 241(a)] of the Public Health Service Act.

Period of Performance: September 20, 2025 through September 29, 2030.

Dated: December 17, 2024.

Terrance Perry,

*Acting Director, Office of Grants Services,
Centers for Disease Control and Prevention.*

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Notice of Award of a Sole Source Cooperative Agreement To Fund Guinea Agence Nationale de Sécurité Sanitaire (ANSS), Kementerian Kesehatan RI, Pakistan National Institute of Health, and Tanzania Ministry of Health (MoH)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Disease Control and Prevention (CDC), located within the Department of Health and Human Services (HHS), announces four separate awards to fund Agence Nationale de Sécurité Sanitaire, Kementerian Kesehatan RI, Pakistan National Institute of Health, and Tanzania Ministry of Health. For Guinea Agence Nationale de Sécurité Sanitaire, the award is for approximately \$2,000,000, with an expected total funding of approximately \$10,000,000. For Kementerian Kesehatan RI, the award is for approximately \$1,500,000, with an expected total funding of approximately \$7,500,000. For Pakistan National Institute of Health, the award

is for approximately \$700,000, with an expected total funding of approximately \$3,500,000. For Tanzania Ministry of Health, the award is for approximately \$2,000,000, with an expected total funding of approximately \$10,000,000. The total 5-year period amount for the four recipients is \$31,000,000. The awards will protect Americans and people worldwide from public health threats by building capacity within their respective countries to strengthen public health preparedness; early pathogen detection to mitigate the impact of global disease outbreaks and public health; and bolstering rapid response to global health emergencies.

DATES: The period for these awards will be September 30, 2025 through September 29, 2030.

FOR FURTHER INFORMATION CONTACT:

Broderick Yoerg, Division of Global Health Protection, Global Health Center, Centers for Disease Control and Prevention, 1600 Clifton Rd, Atlanta, GA 30329, Telephone: (404) 234–0666, Email: DGHPNFOs@cdc.gov.

SUPPLEMENTARY INFORMATION: The sole source award will provide support around disease surveillance and outbreak response, including establishing routine surveillance and developing information technology tools and systems. Broad areas of support include, but are not limited to: emergency management, ensuring countries have the knowledge and resources they need, including emergency operations centers that can mount a fast, coordinated response when outbreaks happen; safe laboratory systems and diagnostics, building the capacity to identify disease threats close to the source and inform decision-making; and developing the workforce, training frontline responders, laboratorians, disease detectives, emergency managers, and other health professionals who are responsible for taking the lead when crisis strikes.

These are the only entities that can carry out this work as they are in a unique position to conduct this work as host government ministries of health. They have the authority to support health service delivery through capacity building and oversee the national coordination of surveillance, preparedness, prevention, and response activities to all forms of health threats and public health emergencies.

Summary of the Award

Recipient: Guinea Agence Nationale de Sécurité Sanitaire, Ministry of Health Indonesia, Pakistan National Institute of Health, and Ministry of Health Tanzania.

Purpose of the Award: The purpose of these awards is to support disease surveillance and outbreak response, emergency management, safe laboratory systems and diagnostics and developing the public health workforce in Guinea, Indonesia, Pakistan, and Tanzania.

Amount of Award: For Guinea Agence Nationale de Securite Santiare, the award is for approximately \$2,000,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately \$10,000,000 for the, 5-year period of performance, subject to availability of funds. For Kementerian Kesehatan RI, the award is for approximately \$1,500,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately \$7,500,000 for the 5-year period of performance, subject to availability of funds. For Pakistan National Institute of Health, the award is for approximately \$700,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately \$3,500,000 for the 5-year period of performance, subject to availability of funds. For Ministry of Health Tanzania, the award is for approximately \$2,000,000 in Federal Fiscal Year (FFY) 2025, with an expected total funding of approximately \$10,000,000 for the 5-year period of performance, subject to availability of funds.

Authority: This program is authorized under Section 307 of the Public Health Service Act [42 U.S.C. 242] and Section 301(a) [42 U.S.C. 241(a)] of the Public Health Service Act.

Period of Performance: September 30, 2025 through September 29, 2030.

Dated: December 17, 2024.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Notice of Award of a Single Source Cooperative Agreement To Fund Ponce Health Sciences Foundation, Inc.

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Disease Control and Prevention (CDC), located within the Department of Health and

Human Services (HHS), announces the award of approximately \$5,000,000, with an expected total funding of approximately \$25,000,000 over a 5-year period, to Ponce Health Sciences Foundation, Inc. The award will support surveillance and research studies for endemic and emerging arboviruses in Puerto Rico.

DATES: The period for this award will be 09/01/2025 through 08/31/2030.

FOR FURTHER INFORMATION CONTACT:

Gregory Anderson, MS, MPH, Scientific Review Officer, National Center for HIV, Viral Hepatitis, STD, and TB Prevention, Centers for Disease Control and Prevention, 1600 Clifton Road, NE, Mailstop H24–6, Atlanta, Georgia 30329–4027. Telephone: (404) 718–8833; Email: gca5@cdc.gov.

SUPPLEMENTARY INFORMATION: The single source award will strengthen an established research platform for arboviruses in hospital and community settings to identify emerging and endemic pathogens like dengue and Oropouche viruses, improve patient management, and evaluate prevention and control strategies. The core objectives include: 1) strengthen hospital surveillance of acute febrile illness (AFI); 2) maintain an AFI platform for conducting clinical research on special populations such as children and pregnant women; 3) maintain a community cohort to assess incidence and prevalence of arboviral infections and other AFIs, while also evaluate the effectiveness of vector control strategies; 4) strengthen the infrastructure for project data management and analysis; and 5) strengthen collaborations with the local government, community leaders, and other stakeholders to ensure continuity of the established program.

Ponce Health Sciences Foundation (PHSF), Inc. is in a unique position to conduct this work, as it is the only institution with the infrastructure, training, and established community trust to implement study objectives rapidly and effectively. It successfully implemented the Sentinel Enhanced Dengue Surveillance System (SEDSS) at the St. Luke's Episcopal Hospital (SLEH) in 2012 and Centro de Emergencia y Medicina Integrada (CEMI) in 2016 in Ponce, PR. PHSF successfully built and managed a community cohort of >3000 participants with annual visits and implemented interventions to evaluate efficacy of vector control techniques. PHSF has built long-standing relationships with the community stakeholders, which facilitates rapid implementation of public health programs and

interventions. In addition, it has the following: an extensive historical database and well-developed data management systems in place to handle the large volume of data generated by this work; a well-trained workforce familiar with the local epidemiology, cultural context, and public health challenges; and laboratories equipped to process arbovirus samples quickly and efficiently, with validated protocols and established quality control measures.

Summary of the Award

Recipient: Ponce Health Sciences Foundation, Inc.

Purpose of the Award: The purpose of this award is to support surveillance and research studies for endemic and emerging arboviruses in Puerto Rico.

Amount of Award: \$5,000,000 in Federal Fiscal Year (FFY) 2025 funds, with a total estimated \$25,000,000 for the five-year period of performance, subject to availability of funds.

Authority: This program is authorized under Public Health Service Act, sections 301(a) (42 U.S.C. 241) and 317(k)(2) (42 U.S.C. 247b), as amended.

Period of Performance: 09/01/2025 through 08/31/2030.

Dated: December 23, 2024.

Terrance Perry,

*Acting Director, Office of Grants Services,
Centers for Disease Control and Prevention.*

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Notice of Award of a Single Source Cooperative Agreement To Fund University of Oslo (UiO).

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Disease Control and Prevention (CDC), located within the Department of Health and Human Services (HHS), announces the award of approximately \$1,500,000, with an expected total funding of approximately \$7,500,000 over a 5-year period, to the University of Oslo (UiO). This award will protect Americans and people worldwide from public health threats by building capacity within their respective countries to strengthen public health preparedness; early pathogen detection to mitigate the impact of global disease outbreaks and

public health; and bolstering rapid response to global health emergencies.

DATES: The period for this award will be September 30, 2025 through September 29, 2030.

FOR FURTHER INFORMATION CONTACT: Broderick Yoerg, Division of Global Health Protection, Global Health Center, Centers for Disease Control and Prevention, 1600 Clifton Rd., Atlanta, GA 30329, Telephone: (404) 234-0666, Email: DGHPNOFOs@cdc.gov.

SUPPLEMENTARY INFORMATION: The single source award will enhance public health surveillance, outbreak detection and response for disease that pose global health security risks by delivering high-quality, effective, and timely informatics solutions to strengthen data and health information systems. This award will strengthen the core District Health Information System 2 (DHIS2) software, improve interoperability with laboratory information systems, and enhance electronic Integrated Disease Surveillance and Response's functionality in support Integrated Disease Surveillance and Response, National Disease Surveillance, and other types of public health surveillance systems.

University of Oslo is in a unique position to conduct this work, as it is the only organization that can modify and share the core DHIS2 software therefore, CDC can only work with them to provide enhancements that are then available to all countries, globally.

Summary of the Award

Recipient: University of Oslo.

Purpose of the Award: The purpose of this award is to support and further scale the DHIS2, an open-source software platform developed and maintained by UiO. The global strategy seeks to leverage the Health Information Systems Program (HISP) partnership network to collect, validate, analyze, visualize, and implement public health data, while building local capacity to strengthen health information systems in countries worldwide. This effort is expected to significantly strengthen global health surveillance systems, contribute to improved public health outcomes and respond more effectively to global health threats.

Amount of Award: \$1,500,000 in Federal Fiscal Year (FFY) 2025 funds, with a total estimated \$7,500,000 for the 5-year period of performance, subject to availability of funds.

Authority: This program is authorized under Section 307 of the Public Health Service Act [42 U.S.C. 242j] and Section 301(a) [42 U.S.C. 241](a) of the Public Health Service Act.

Period of Performance: September 30, 2025 through September 29, 2030.

Dated: December 17, 2024.

Terrance Perry,

Acting Director, Office of Grants Services, Centers for Disease Control and Prevention.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity: Unaccompanied Children Bureau Assessments for Children and Sponsors (Office of Management and Budget #: 0970-NEW)

AGENCY: Office of Refugee Resettlement, Administration for Children and Families, Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Office of Refugee Resettlement (ORR), Administration for Children and Families (ACF), U.S. Department of Health and Human Services, is inviting public comments on the proposed information collection, including proposed changes. The request consists of several forms that will allow the Unaccompanied Children Bureau (UCB) to continue conducting statutorily mandated assessments of unaccompanied children in ORR care and custody as well as their sponsors. These assessments allow ORR to understand the status and needs of the child and their potential sponsor; assessment findings inform all decisions concerning the child's care while in ORR custody and eventual reunification with a sponsor.

DATES: *Comments due* February 28, 2025. In compliance with the requirements of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described in this notice.

ADDRESSES: You can obtain copies of the proposed collection of information and submit comments by emailing infocollection@acf.hhs.gov. Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: ORR has undertaken a reorganization of its information collections to promote operational efficiency. The reorganization will result in more collections that contain fewer forms under a single Office of Management and Budget (OMB)

number. This request is to create a new information collection that contains forms associated with the provision of critical assessments to unaccompanied children and their sponsors. This information collection will contain seven forms transferred from one existing information collection and two new forms. The forms and the information collection under which they are currently approved are as follows:

- Services Provided to Unaccompanied Children (OMB #0970-0553)
 - Sponsor Assessment (Form S-5)
 - Adult Contact Profile (Form S-7)
 - Initial Intakes Assessment (Form S-8)
 - Assessment for Risk (Form S-9)
 - UC Assessment (Form S-11)
 - UC Case Review (Form S-12)
 - Individual Service Plan (Form S-13)
- Newly Developed Category 4 Initiative Forms:
 - Category 4 Reunification Case Review and Staffing (Form TBD-#)
 - Family Finding and Mobility Mapping (Form TBD-#)

These forms are completed by care provider case managers and clinicians at care provider facilities, and exclusively for the Sponsor Assessment (Form S-5), by unification specialists operating remotely. These forms assess the suitability of potential sponsors applying to reunify with an unaccompanied child; capture critical historical, biographic and medical data for children upon admission to the UCB care provider; assess the child for sexual abuse history and risk of abusive behavior towards others; review and update prior assessment data over time; and collaboratively identify potential sponsors for children without a viable sponsor (referred to as "Category 4" cases) utilizing child-friendly interactive techniques and extensive kinship network mapping. These forms are documentary in nature and a critical component of the child's case file. In addition to grouping forms related to Assessments together in this information collection, ORR is proposing the following revisions:

- Global Changes across all currently approved forms:
 - Replace "UC", "UAC", and "Minor" with "Child" or "Unaccompanied Child" wherever they appear
 - Update dropdown options for the "Gender" field, wherever it appears, to include male, female, and nonbinary
 - Replace "Primary" language with "Preferred"

- Simplify certain fields that capture both date and time to only capture the date when hour and minute of completion/certification is immaterial
- Include Physical Location of the Child field in the UC Basic Information section across all forms to conform with changes concurrently proposed in the Services Provided to Unaccompanied Children Information Collection (OMB# 0970–0553)
- Minor terminology edits to conform with UCB style guide standards as established in the UC Program Foundational Rule (45 CFR 410) as well as to improve clarity and consistency with other form titles and/or fields
- Add translator or interpreter certification to assessments requiring input directly from a child or sponsor, as relevant.
- **Sponsor Assessment (Form S–5):** Currently, there are two approved versions of this form—one for UC Portal and one for the UC Path system, which was never implemented. ORR plans to discontinue the UC Path version of this form, which was never deployed, and make the following revisions to the UC Portal version.
 - Add new Current Sponsor Status field to the Sponsor Assessment to provide a high-level progress status for each assessment to inform concurrent planning efforts to identify alternative sponsors and Case Review (Form S–12)
 - Add Date Sponsor Identified to Adult Contact Profile section to improve data tracking for program performance evaluation
 - Add “Mail—Letter from Unification Specialist” option to Sponsor Document Type dropdown menu in the document upload field
 - Revise “Substance Abuse Disclosed by Sponsor” under Criminal History and Background Checks Self Disclosure section to read “Legal issues related to drug or alcohol use (e.g., D.U.I, D.W.I, Possession, Manufacture, Distribution of controlled substances)” to better capture data concerning the sponsor’s risk profile
 - Add several questions to the Care Plan section of the form to document the sponsor’s awareness and ability to care for the child’s healthcare needs
 - Add functionality to add multiple adult caregivers to the Care Plan section of the form and identify one as the current or primary caregiver
- Add a sponsor-child debt attestation question to the Trafficking and Fraud section of the form to document the sponsor’s understanding and intent to comply with ORR policy prohibiting the sponsor from seeking or collecting any financial remuneration from the child or their family or encouraging the child to work counter to child labor laws or without a legal permit
- Rename “Summary Case Manager Assessment Tab” to “Sponsor Assessment Summary Tab” to reflect inclusion of the Unification Specialist role and emphasize that the summary step before certification of the form
- Add Unification Specialist role, contact information, and recommendation fields to the “Summary Sponsor Assessment” section
- Add an open text field that is triggered by conditional logic when the assessment is completed outside of the five-calendar day deadline, prompting the respondent to indicate a reason for the delay
- Adjust the burden estimate to account for an increase in the number of children placed in ORR care thus increasing the number of potential sponsors assessed, reflect that the form is completed by four different groups of respondents, and to reflect a slight increase in the overall number of fields the respondents will need to complete. The annual number of Case Manager respondents increased from 216 to 300. The annual number of Unification Specialist respondents is estimated to be approximately 680, the annual number of Interpreter respondents is estimated to be 300; and the number of sponsors expected to participate in the assessment is expected to increase from 57,195 to 98,185. The annual number of responses per respondent changed as follows: the number of responses per sponsor remains unchanged at 1; the number of responses per Case Manager is expected to increase from 265 to 327; the number of responses per Unification Specialist is estimated to be 144; and the number of responses per Interpreter is estimated to be 327. The average burden hours per response remains unchanged at 1 hour, reflecting the minimal substantive changes described above.
- **Adult Contact Profile (Form S–7):** The Adult Contact Profile was developed for the UC Path case management system which was never implemented; the Adult Contact Profile is currently approved under the Services Provided to Unaccompanied Children information collection (OMB# 0970–0553) is being renewed with one substantive change. ORR plans to incorporate the adult contact profile with all UC Path features into the UC Portal case management system at a future date, which will allow ORR to establish unique UC Portal profiles for non-sponsor adults, such as household members, relatives in home country, and designated alternate caregivers. This will facilitate improved data tracking and flagging across cases should these individuals later apply to sponsor a child.
 - Remove the “Legal Status” question from the form as irrelevant and immaterial to facilitating better data tracking across cases
- **Initial Assessment (Form S–8):** Currently, there are two approved versions of this form—one for UC Portal and one for the UC Path system, which was never implemented. ORR plans to discontinue the UC Path version of this form, which was never deployed, and make the following revisions to the UC Portal version.
 - Add a field to document the child’s preferred gender pronouns to initial intakes assessment section.
 - Clarify instructions to the respondent mandating the assessment to be completed within 24 hours of admission to the care provider program
 - Introduce questions related to languages spoken, fluency, and comprehension to document the child’s understanding of the assessment questions
 - Add a field to the Family Information section to indicate if a relative might be a potential sponsor
 - Rephrase sensitive questions pertaining to mental health concerns using more specific and child-friendly terms and eliminating redundant questions
 - Adjust the burden estimate to account for a projected increase in the number of children placed in ORR care since the form’s last renewal and reflect that the form is completed by three different potential respondents with input from the child. The annual number of Case Manager respondents is expected to increase from 216 to 300, the annual number of Clinician

respondents is estimated to be 300, the annual number of Interpreter respondents is estimated to be 300, and the number of children projected to be referred in FY 2025 is expected to increase from 60,048 to 98,185. The annual number of responses per respondent changed as follows: the number of responses per child remains unchanged at 1, the number of responses per Case Manager is expected to decrease from 265 to 164, the number of responses per Clinician is estimated to be 164, and the number of responses per Interpreter is estimated to be 327. The average burden hours per response remains unchanged at .33 hours, reflecting the minimal substantive changes described above.

• *Assessment for Risk (Form S-9):*

- Currently, there are two approved versions of this form—one for UC Portal and one for the UC Path system, which was never implemented. ORR plans to discontinue the UC Path version of this form, which was never deployed, and make the following revisions to the UC Portal version.
 - Clarify terminology concerning the purpose of the assessment in the instructions to the respondent
 - Revise question text in the following ways:
 - Include more specific and child-friendly terminology concerning sensitive topics related to sexual activity and sexual abuse history
 - Incorporate inclusive terminology concerning gender identity and expression
 - Incorporate “suspected or diagnosed” terminology to questions pertaining to disabilities
 - Add fields to document the following:
 - If the child would like to be referred to a mental health counselor or clinician to discuss their past sexual activity and/or sexual abuse history
 - If the child or caretaker in home country report any issues with the child’s ability to carry out tasks of daily living that may affect the child’s housing assignment while in ORR care
 - The creation of an individual 504 plan under the “Actions Taken” question of the “Housing,” “Other Service Assignments,” and “Follow-Up” Section
 - Adjust the burden estimate to account for a projected decrease in the number of children placed in ORR care since the form’s last renewal and reflect that the form is completed by three

different potential respondents with input from the child. The annual number of Case Manager respondents is expected to increase from 216 to 300, the annual number of Clinician respondents is estimated to be 300, the annual number of Interpreter respondents is estimated to be 300, and the number of children projected to be referred in FY 2025 is expected to decrease from 120,096 to 98,185. The annual number of responses per respondent changed as follows: the number of responses per child remains unchanged at 1, the number of responses per Case Manager is expected to decrease from 556 to 164, the number of responses per Clinician is estimated to be 164, and the number of responses per Interpreter is estimated to be 327. The average burden hours per response remains unchanged at .75 hours, reflecting the minimal substantive changes described above.

Unaccompanied Child Assessment

(Form S-11): ORR currently maintains two approved versions of this form under the Services Provided to Unaccompanied Children information collection (OMB# 0970-0553), one version for the UC Portal case management system currently in use, and a second version developed for the UC Path system which was never implemented. ORR plans to discontinue the UC Path version of the Unaccompanied Child Assessment, which was never deployed, renewing only the UC Portal version with the changes described below:

- Add the following fields to the Journey and Apprehension section:
 - What neighbors or other people were important in your daily life in COO?
 - Did someone you know come to the U.S. before you and tell you about opportunities?
 - Did you meet any adults along the journey with whom you built a trusting relationship? If yes, what are their names and where are they now?
 - Who are some trusted adults that the child knows at their intended destination?
 - As a sub-question to “Have you been to the U.S. before?”—Ask: “if yes, with whom did you live?”
 - Under the Family/Significant Relationships section, add:
 - Name, address, contact, and relationship of parent or legal guardian fields
 - Field to capture current address/residence of other family remaining in country of origin

- Fields to capture contact info and indicate sponsorship potential of identified friends and/or family residing in the U.S.
- A field to document any family members who previously lived in the U.S., their dates of residence and if they maintain contact with any former U.S.-based contacts
 - Revise Medical Assessment questions to capture more specific health status and health concern data as follows:
- Adding fields related to current health status, allergies, diet, mobility, and the child’s need for assistance with daily activities
- Add field to capture if the child has any health concerns they’d like to discuss with a health care provider
- Add fields to capture data concerning any medication the child arrived with, their prescribed dosing interval and last dose administered
 - Add the following question to the Education section: “Have you ever been diagnosed with a learning disability (dyslexia, dysgraphia, auditory processing disorder, etc.)? (Yes/No) If yes, specify”
 - Update terminology concerning the ORR mandated Legal Screening to read “Confidential Legal Consultation”, as required by the UCB Foundational Rule (45 CFR 410)
 - Revise the Mental Health section of the form as follows:
- Add “Future Oriented” option to Thought Process field
- Revise terminology throughout and split compound questions into simpler, distinct questions to improve child-friendliness of the assessment and the specificity of their responses
- Add question concerning the use of inhalants to the Substance Use History sub-section
 - Revise the Trafficking section, adding questions to document contacts with others that the child made during their journey to the U.S. and capture their contact information
 - Add explanatory text to the Americans with Disabilities Act of 1990, 42 U.S.C. 12102(1) citation under the Trafficking Victims Protection Reauthorization Act (TVPRA) section and the subsequent question documenting disability concerns that require further evaluation
 - Add document upload field to Additional Information section to link the child’s journey mapping file to the UC Assessment
 - Adjust the burden estimate to

- account for a projected decrease in the number of children placed in ORR care since the form's last renewal and reflect that the form is completed by three different potential respondents with input from the child. The annual number of Case Manager respondents is expected to increase from 216 to 300, the annual number of Clinician respondents is estimated to be 300, the annual number of Interpreter respondents is estimated to be 300, and the number of children projected to be referred in FY 2025 is expected to decrease from 120,096 to 98,185. The annual number of responses per respondent changed as follows: the number of responses per child remains unchanged at 1, the number of responses per Case Manager is expected to decrease from 556 to 164, the number of responses per Clinician is estimated to be 164, and the number of responses per Interpreter is estimated to be 327. The average burden hours per response is expected to increase from 2.0 to 2.25 hours, reflecting the addition of new fields described above.
- *Unaccompanied Child Case Review (Form S-12)*: Currently, there are two approved versions of this form—one for UC Portal and one for the UC Path system, which was never implemented. ORR plans to discontinue the UC Path version of this form, which was never deployed, and make the following revisions to the UC Portal version.
 - Revise the Medical Section with the following:
 - Remove the following fields:
 - “List any allergies”
 - “Do you feel unwell”
 - “If yes, what are your symptoms?”
 - “Additional medical information”
 - Entire Medical History Checklist as redundant to information captured in the UC Portal Health Tab
 - Entire Medication History subsection as redundant to information captured in the UC Portal Health Tab
 - Add the following fields:
 - “Does the child have any health concerns (medical, mental health, dental) that have not been evaluated by a healthcare professional? If yes, specify:”
 - “Does the child have any health-related travel restrictions? If yes, specify:”
 - “Provide a short summary of the child's medical and/or psychological functioning:”
 - “If the child is ready for discharge,
- does the child have any health problems, including dental and mental health, that requires follow-up after release from ORR care? If yes, specify:”
- “Describe follow-up care plan:”
 - Replace “Legal Screening” with “Confidential Legal Consultation” consistent with the UC Program Foundational Rule (45 CFR 410).
 - Remove all fields from the “Mental Health” section to avoid duplication under the “Medical” section and remove “Axis” evaluation terminology which no longer conforms to standard psychiatric practice as specified in the 5th edition of the Diagnostic and Statistical Manual (DSM-V).
 - Revise the Trafficking Section as follows:
 - Add auto-populated fields added to Unaccompanied Child Assessment (Form S-11) to capture who the child met along their journey and if they have their contact information
 - Revise the TVPRA section as follows:
 - Mirror changes to the TVPRA section as pertaining to the addition of explanatory text for the Americans with Disabilities Act of 1990 and related fields.
 - Add fields to document the recommended level of post-release services and type of home study
 - Revise the Recommendation section to include a concurrent planning subsection capturing the following:
 - If the case is undergoing concurrent planning
 - Name, contact info, sponsor category, and status of additional potential sponsors
 - Revise Care plan section as follows:
 - Add fields to capture and distinguish Unification Specialist, Clinician, and Case Manager comments
 - Remove Legal comments as field duplicates information collected in Legal section
 - Adjust the burden estimate to account for a projected decrease in the number of children placed in ORR care since the form's last renewal and reflect that the form is completed by three different potential respondents. The annual number of Case Manager respondents is expected to increase from 216 to 300, the annual number of Clinician respondents is estimated to be 300, the annual number of Unification Specialist respondents is estimated to be 300, and the number of children projected to be referred in FY 2025 is expected to decrease from 120,096 to 98,185. The annual
- number of responses per respondent changed as follows: the number of responses per Case Manager is expected to decrease from 556 to 164, the number of responses per Clinician is estimated to be 164, and the number of responses per Unification Specialist is estimated to be 144. The average burden hours per response is expected to decrease from 2.0 to .5 hours, reflecting the removal of numerous fields described above.
- *Individual Service Plan (Form S-13)*: Two versions of this form are approved under the Services Provided to Unaccompanied Children information collection (OMB# 0970-0553), one associated with the UC Portal case management system, and another designed for the UC Path system which was never implemented. ORR plans to discontinue the UC Path version of this form, which was never deployed, and incorporate features from the UC Path version into UC Portal with this transfer. ORR has made the following modifications to the form:
 - Add a field to the Data Entry—Admission Assessment Individual Service Plan to identify if the child has a 504 Service Plan to document any services or accommodations needed due to their disability status.
 - Add the following auto-populated and system generated fields to the UC Portal Individual Service Plan display window:
 - Assessment Status
 - Does the child have a 504 Service Plan?
 - Submitted Date
 - Remove certain fields native to the UC Path system which do not have a corresponding feature or function in the UC Portal:
 - Under New Admission Assessment Section:
 - Assessment ID
 - Admission
 - Under New Service Mandatory Section:
 - Contract Number (SYSTEM GENERATED)
 - Individual Service Plan (SYSTEM GENERATED)
 - Name (AUTO-POPULATE)
 - Under Document Upload Tab Section:
 - Verified by Government Agency/Consulate
 - Entity
 - Individual
 - Adult Contact Relationship
 - Under Certification by Case Manager Section:

- Legacy ID (SYSTEM GENERATED)
- Revise the Legal Orientation task from “Legal Screening” to “Confidential Legal Consultation” to conform with terminology presented in the UC Program Foundational Rule (45 CFR 410)
- Replace “Contract” with “Service” where it appears on the form
- Display content entered in the New Contract “Notes” field to each internet Service Provider Service
- Adjust the burden estimate to account for a projected decrease in the number of children placed in ORR care since the form’s last renewal and reflect that the form is completed by three different potential respondents with input from the child. The annual number of Case Manager respondents is expected to increase from 216 to 300, the annual number of Clinician respondents is estimated to be 300, the annual number of Interpreter respondents is estimated to be 300, and the number of children projected to be referred in FY 2025 is expected to decrease from 120,096 to 98,185. The annual number of responses per respondent changed as follows: The number of responses per Case Manager is expected to decrease from 694 to 167, the number of responses per Clinician is estimated to be 167, and the number of responses per Translator is estimated to be 327. The average burden hours per response remains unchanged at .33 hours reflecting the minimal substantive changes described above.
- *Category 4 Reunification Case Review and Staffing (Form TBD-#)*: This is a new form created by ORR to support sponsor identification and outreach for children designated “Category 4” or without a viable sponsor. The form is completed by the care provider case manager, and in complex cases, by the care provider clinician in response to the child’s Mobility Map, also submitted for approval under this information collection. The contents of the form, once complete, are shared with a concurrent planning team comprised of the care provider Case

Manager, Supervising Case Manager, Clinician, Case Coordinator, and Federal Field Specialist at a staffing meeting to discuss findings and develop a permanency action plan to identify a qualified sponsor for the child. The burden estimate for this form is as follows:

- ORR estimates, based on historic averages that approximately 35,347 children or 36 percent of cases referred to ORR care and custody in FY 2025 will be designated “Category 4” at some point during their length of care. The number of case managers completing the form is estimated to be 300 annually, the number of clinicians completing the form is estimated to be 300 annually. The average number of responses per respondent is estimated to be approximately 147 per case manager and approximately 74 per clinician as clinicians will only complete the form if the case is deemed “complex” due to extended length of stay, medically fragile status of the child, trafficking, abuse, or neglect history concerns, or other extenuating circumstances that may make reunification with a vetted sponsor more difficult. The average burden hour per response associated with this form is estimated to be 1.88 hours for standard, non-complex cases involving only the child’s case manager and 2.5 hours for complex cases requiring the involvement of a clinician.
- *Family Finding and Mobility Mapping (Form TBD-#)*: This form is an instructional guide for use by care provider case managers and clinicians to facilitate the creation of a “Mobility Map” by a Category 4 child. The mobility map is a visual representation of the child’s life in their home country and their journey to the U.S., which is intended to identify parents, legal guardians, extended family members, family friends, kinship networks, and other potential sponsor leads as well as identify

potential sponsor fraud and parental rights violations. The Mobility Map is created by the child in response to child-friendly questions and facilitative techniques deployed by a care provider case manager, and potentially a clinician if the child’s case is complex. The Family Finding and Mobility Mapping Guide provides instructions to care provider staff to engage the child safely and effectively in this Participatory Learning and Action process. The burden estimate for the Mobility Map is as follows:

- ORR estimates, based on historic averages that approximately 35,347 children or 36 percent of cases referred to ORR care and custody in FY 2025 will be designated “Category 4” at some point during their length of care. The number of children completing the form is estimated to be approximately 35,247, the number of case managers completing the form is estimated to be approximately 300, and the number of clinicians completing the form is estimated to be approximately 300. The average number of responses per respondent is estimated to be approximately 1.5 per child, approximately 177 per case manager and approximately 88 per clinician as clinicians will only participate in the Mobility Mapping process if the case is deemed “complex” due to extended length of stay, medically fragile status of the child, trafficking, abuse, or neglect history concerns, or other extenuating circumstances that may make reunification with a vetted sponsor more difficult. The average burden hour per response associated with this form is estimated to be 1.5 hours for the each of the respondents, including the child, case manager, and clinician.

Respondents: ORR grantee and contractor staff, unaccompanied children, and their sponsors.

ANNUAL BURDEN ESTIMATES

Form	Annual number of respondents	Number of responses per respondent	Average burden hours per response	Annual total burden hours
Sponsor Assessment (Form S-5)—Sponsor	98,185	1.0	1.00	98,185.0
Sponsor Assessment (Form S-5)—Case Manager	300	327.0	1.00	98,100.0
Sponsor Assessment (Form S-5)—Unification Specialist	680	144.0	1.00	97,920.0
Sponsor Assessment (Form S-5)—Interpreter	300	327.0	1.00	98,100.0
Adult Contact Profile (Form S-7)—Unification Specialist	680	144.0	0.75	73,440.0
Initial Assessment (Form S-8)—Case Manager	300	164.0	0.33	16,236.0

ANNUAL BURDEN ESTIMATES—Continued

Form	Annual number of respondents	Number of responses per respondent	Average burden hours per response	Annual total burden hours
Initial Assessment (Form S-8)—Clinician	300	164.0	0.33	16,236.0
Initial Assessment (Form S-8)—Child	98,185	1.0	0.33	32,401.0
Initial Assessment (Form S-8)—Interpreter	300	327.0	0.33	32,373.0
Assessment for Risk (Form S-9)—Case Manager	300	164.0	0.75	36,900.0
Assessment for Risk (Form S-9)—Clinician	300	164.0	0.75	36,900.0
Assessment for Risk (Form S-9)—Child	98,185	1.0	0.75	73,639.0
Assessment for Risk (Form S-9)—Interpreter	300	327.0	0.75	73,575.0
Unaccompanied Child Assessment (Form S-11)—Case Manager	300	164.0	2.25	110,700.0
Unaccompanied Child Assessment (Form S-11)—Clinician	300	164.0	2.25	110,700.0
Unaccompanied Child Assessment (Form S-11)—Child	98,185	1.0	2.25	220,917.0
Unaccompanied Child Assessment (Form S-11)—Interpreter	300	327.0	2.25	220,725.0
Unaccompanied Child Case Review (Form S-12)—Case Manager	300	327.0	0.50	49,050.0
Unaccompanied Child Case Review (Form S-12)—Clinician	300	327.0	0.50	49,050.0
Unaccompanied Child Case Review (Form S-12)—Unification Specialist	680	144.0	0.50	48,960.0
Individual Service Plan (Form S-13)—Case Manager	300	164.0	0.33	16,236.0
Individual Service Plan (Form S-13)—Clinician	300	164.0	0.33	16,236.0
Individual Service Plan (Form S-13)—Interpreter	300	327.0	0.33	32,373.0
Category 4 Reunification Case Review and Staffing (Form TBD-#)—Case Manager	300	147.0	1.88	82,688.0
Category 4 Reunification Case Review and Staffing (Form TBD-#)—Clinician	300	74.0	2.50	55,500.0
Family Finding and Mobility Mapping (Form TBD-#)—Child	35,347	2.0	1.50	106,041.0
Family Finding and Mobility Mapping (Form TBD-#)—Case Manager	300	177.0	1.50	79,650.0
Family Finding and Mobility Mapping (Form TBD-#)—Clinician	300	88.0	1.50	39,600.0
Estimated Annual Burden Hours Total				1,728,226.0

Comments: The Department specifically requests comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Authority: 6 U.S.C. 279; 8 U.S.C. 1232.

Mary C. Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184-45-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Evaluation of the Center for Legal and Judicial Innovation and Advancement (CLJIA) (Previously Evaluation of the Child Welfare Capacity Building Collaborative) (Office of Management and Budget #0970-0576)

AGENCY: Children's Bureau, Administration for Children and Families, Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: This collection relates to survey instruments to be administered in conjunction with technical assistance (TA) delivered to legal and judicial staff who participate in strategic planning workshops and attorneys and judicial trainings with a Children's Bureau TA provider. This is a revision and extension to Office of Management and Budget (OMB) #0970-0576 to remove instruments that are no longer in use, revise the title of the collection, and to revise the name of the TA provider in the instruments still in use.

DATES: *Comments due February 28, 2025.* In compliance with the requirements of the Paperwork

Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above.

ADDRESSES: You can obtain copies of the proposed collection of information and submit comments by emailing infocollection@acf.hhs.gov. Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: This request will remove most of the prior instruments approved under OMB #0970-0576. The larger project was successful in getting information about the broad array of TA. It also showed therein that there was more diversity among the audiences being served than anticipated, and thus, CB had opted to pursue evaluation individually by Center going forward. There were larger scope and approach changes for the other prior Centers, and those evaluations will need to be reimaged.

The remaining three instruments are and will continue to be used by the Center for Legal and Judicial Innovation and Advancement (CLJIA) and the Children's Bureau to improve the development and delivery of CLJIA services, specifically the Academies and Workshops, and assess the quality, satisfaction with services, and impact on their intended outcomes, including increased knowledge and skills. Data collection includes online and paper-

based surveys and assessments administered to participants in Academies and Workshops.

There are no significant changes to the instruments. The name of the TA provider was changed and that has been updated.

Respondents: Child welfare and court professionals.

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours	Annual burden hours
Workshop Feedback Survey	480	1	0.07	46.1	15
Academy Feedback Survey	1,050	1	0.07	73.5	25
Pre/Post Academy Assessment	1,050	2	0.22	462	154
Estimated Total Annual Burden Hours					194

Comments: The Department specifically requests comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Authority: 42 U.S.C. 5106(b)(5); 42 U.S.C. 5113(b)(4); 42 U.S.C. 629h.

Mary C. Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184-29-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; National Youth in Transition Database (NYTD) and Youth Outcomes Survey (Office of Management and Budget #0970-0340)

AGENCY: Children's Bureau, Administration for Children and

Families, Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Administration for Children and Families (ACF) is requesting a three-year extension of the National Youth in Transition Database (NYTD) and Youth Outcomes Survey (Office of Management and Budget (OMB)#: 0970-0340, expiration date May 31, 2025). There are no changes requested to the form.

DATES: *Comments due* February 28, 2025. In compliance with the requirements of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described above.

ADDRESSES: You can obtain copies of the proposed collection of information and submit comments by emailing infocollection@acf.hhs.gov. Identify all requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: The Foster Care Independence Act of 1999 (42 U.S.C. 1305 *et seq.*) as amended by Public Law 106-169 requires state child welfare agencies to collect and report to ACF data on the characteristics of youth receiving independent living services and information regarding their outcomes. The regulation implementing the NYTD, listed in 45 CFR 1356.80, contains standard data collection and reporting requirements for states to meet the law's requirements. Additionally,

the Family First Prevention Services Act of 2017 (House of Representatives 253) further outlines the expectation of the collection and reporting of data and outcomes regarding youth who are in receipt of independent living services. ACF will continue to use the information collected under the regulation to track independent living services, assess the collective outcomes of youth, and potentially to evaluate state performance regarding those outcomes consistent with the law's mandate.

Respondents: State agencies that administer the Chafee Foster Care Program for Successful Transition to Adulthood (Chafee program) report on the young people who are served by the program and who complete the youth outcomes survey.

Annual Burden Estimates

The annual burden estimates are based on data to inform 2025 estimates. Estimates for years further out are likely to be similar, but the number of youth respondents and time to complete the state data file may fluctuate and more detail will be provided in the submission to OMB and the corresponding notice published in the **Federal Register**.

Instrument	Total number of respondents	Number of responses per respondent	Average burden hours per response	Annualized burden hours
State Data File	52	2 (annually)	1,317	136,968
Youth Outcomes Survey	9,300	1	0.5	4,650

Estimated Total Annual Burden Hours: 141,618.

Comments: The Department specifically requests comments on (a)

whether the proposed collection of information is necessary for the proper

performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Authority: NYTD is authorized by Public Law 106–169, enacted December 14, 1999. This public law establishes the John H. Chafee Foster Care Independence Program (CFCIP) now known as Chafee Foster Care Program for Successful Transition to Adulthood (Chafee program) at section 477 of the Social Security Act. NYTD data are collected pursuant to 45 CFR 1356.80.

Mary C. Jones,
ACF/OPRE Certifying Officer.

BILLING CODE 4184–73–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–E–0223]

Determination of Regulatory Review Period for Purposes of Patent Extension; OMISIRGE

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has determined the regulatory review period for OMISIRGE and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human biological product.

DATES: Anyone with knowledge that any of the dates as published (see **SUPPLEMENTARY INFORMATION**) are incorrect must submit either electronic or written comments and ask for a redetermination by February 28, 2025. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence

during the regulatory review period by June 30, 2025. See “Petitions” in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of February 28, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2024–E–0223 for “Determination of Regulatory Review Period for Purposes of Patent Extension; OMISIRGE.”

Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- *Confidential Submissions—*To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6200, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984

(Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug or biologic product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human biological products, the testing phase begins when the exemption to permit the clinical investigations of the biological product becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human biological product and continues until FDA grants permission to market the biological product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human biological product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human biologic product OMISIRGE (omidubicel-only). OMISIRGE is indicated for use in adults and pediatric patients 12 years and older with hematologic malignancies who are planned for umbilical cord blood transplantation following myeloablative conditioning to reduce the time to neutrophil recovery and the incidence of infection. Subsequent to this approval, the USPTO received a patent term restoration application for OMISIRGE (U.S. Patent No. 7,955,852) from Gamida Cell Ltd., and the USPTO requested FDA's assistance in determining this patent's eligibility for patent term restoration. In a letter dated April 3, 2024, FDA advised the USPTO that this human biological product had undergone a regulatory review period and that the approval of OMISIRGE represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for OMISIRGE is 4,563 days. Of this time, 4,242 days occurred during the testing phase of the regulatory review period, while 321 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(i)) became effective:* October 21, 2010. FDA has verified the applicant's claim that the date the investigational new drug application became effective was on October 21, 2010.

2. *The date the application was initially submitted with respect to the human biological product under section 351 of the Public Health Service Act (42 U.S.C. 262):* June 1, 2022. FDA has verified the applicant's claim that the biologics license application (BLA) for OMISIRGE (BLA B125738) was initially submitted on June 1, 2022.

3. *The date the application was approved:* April 17, 2023. FDA has verified the applicant's claim that BLA B125738 was approved on April 17, 2023.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 1,826 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see **DATES**). Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: must be timely (see **DATES**), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to <https://www.regulations.gov> at Docket

No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: December 19, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–5603]

Agency Information Collection Activities; Proposed Collection; Comment Request; New Animal Drug and Veterinary Master Files

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA, Agency, or we) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the collection of information associated with new animal drug applications and veterinary master files.

DATES: Either electronic or written comments on the collection of information must be submitted by February 28, 2025.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of February 28, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the

instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2024-N-5603 for "Agency Information Collection Activities; Proposed Collection; Comment Request; Reporting Associated with New Animal Drug and Veterinary Master Files." Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The

Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT:

Amber Sanford, Office of Operations, Food and Drug Administration, Three White Flint North, 10A-12M, 11601 Landsdown St., North Bethesda, MD 20852, 301-796-8867, PRAStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501-3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

New Animal Drug Applications and Veterinary Master Files—21 CFR 514 and 558, and Section 571 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360ccc)

OMB Control Number 0910-0032—Extension

This information collection supports implementation of section 512 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360b), which governs new animal drugs. Agency regulations in 21 CFR part 514 (part 514) and associated regulations 21 CFR part 558, establish format and content requirements regarding new animal drug application (NADA) submissions, as well as provide for pre-application submissions, amended applications, and application supplements. This information collection also supports implementation of section 571 of the FD&C Act (21 U.S.C. 360ccc) regarding application for conditional approval of new animal drug (CNADA) submissions. As set forth in the FD&C Act and regulations, requisite elements include safety and effectiveness data, proposed labeling, product manufacturing information, and where necessary, complete information on food safety (including microbial food safety) and any methods used to determine residues of drug chemicals in edible tissue from food producing animals. Applications must be prepared as appropriate to support the submission. Respondents to the information collection are persons developing, manufacturing, and/or researching new animal drugs.

We developed Form FDA 356v (Application for Approval of a New Animal Drug (or Submission to Support New Animal Drug Approval)) to provide a uniform format for submitting requisite information and to ensure efficient processing by the Agency.

Form FDA 356v is available for download at <https://www.fda.gov/about-fda/reports-manuals-forms/forms>. We also develop Agency guidance documents that may assist respondents with understanding NADA/CNADA requirements and related information collection activity. This includes FDA Guidance #152 (<https://www.fda.gov/regulatory-information/search-fda-guidance-documents/cvm-gfi-152-evaluating-safety-antimicrobial-new-animal-drugs-regard-their-microbiological-effects>), which outlines a risk assessment approach for evaluating the microbial food safety of antimicrobial new animal drugs and includes Agency recommendations in this regard.

Under section 512(b)(3) of the FD&C Act, any person intending to file an NADA or supplemental NADA or a request for an investigational exemption under section 512(j) of the FD&C Act may request a conference prior to making a submission. Section 514.5 of our regulations (21 CFR 514.5) sets forth procedures for pre-submission conferences and describes documentation associated with making requests, and preparing for and conducting meetings. We encourage sponsors to submit data for review at the most appropriate and productive times in the drug development process. Rather than submitting all data for review as part of a complete application, we have

found that the submission of data supporting discrete technical sections during the investigational phase is most appropriate and productive. This “phased review” of data submissions has created efficiencies for both us and the animal pharmaceutical industry.

We also encourage, as appropriate, the submission of a Veterinary Master File (VMF). For more information on VMFs we invite you to visit <https://www.fda.gov/animal-veterinary/development-approval-process/veterinary-master-files>. A VMF provides detailed information used in support of application submissions. Questions regarding VMF submissions may be directed to the Center for Veterinary Medicine at cvmesubmitter@fda.hhs.gov. We have found that utilizing VMFs has increased the efficiency of the animal drug development and animal drug review processes for both FDA and the animal pharmaceutical industry, providing for the confidential exchange of information with FDA, and a process for reporting information outside of an NADA/CNADA or an Investigational New Animal Drug file, as well as an opportunity for increased communication with FDA during early stages of product development. A holder of a VMF may also authorize other parties to reference information included in the VMF without disclosing information in the file to those parties.

Veterinary master files can be used as repositories for information that can be referenced in multiple submissions to the Agency.

Section 558.5(i) of our regulations (21 CFR 558.5(i)) describes the procedure for requesting a waiver of the labeling requirements in § 558.5(h) if there is evidence to indicate that it is unlikely a new animal drug would be used in the manufacture of a liquid medicated feed.

Finally, section 571 of the FD&C Act established requirements for the conditional approval of certain drugs¹ and the procedures for submitting CNADAs. Although FDA receives fewer than one application submission annually under section 571 of the FD&C Act when averaged over a 3-year period, we use a place holder of one response and 1 hour annually to account for burden associated with these submissions.

The reporting associated with NADAs/CNADAs and related submissions is necessary to ensure that new animal drugs are in compliance with sections 512(b)(1) and 571 of the FD&C Act. We use the information collected to review the data, labeling, and manufacturing controls and procedures to evaluate the safety and effectiveness of the proposed new animal drug.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN^{1 2}

21 CFR part, activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
§ 514; applications and amendments, pre-submission conference requests, evidence to establish safety and effectiveness, manufacturing, labeling, and other changes, submission of data studies and other changes.	254	2.8	711	42.25	30,040
§ 558.5(i); requirements for liquid medicated feed	254	.01	2.5	5	13
Applications for conditional approval submitted under section 571 of the FD&C Act.	3	1	3	1	3
Form FDA 356V	254	30.8	7,823	0.75 (45 minutes).	5,867
VMF submissions	16	1	16	20	320
Total			8,556		36,243

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

² Totals may not sum due to rounding.

Although we have characterized the information collection activity as a reporting burden, we include in our estimate time required for searching data sources and preparing and maintaining necessary and applicable records. Based on the number of

sponsors subject to animal drug user fees, we estimate that there are 254 respondents. We use this estimate to calculate the “number of responses per respondent” by dividing the total annual responses by the number of respondents except for CNADA

submission and VMFs. For CNADAs we calculate an average of three responses and for VMF submissions we calculate and average of 16 VMFs.

Our estimated burden for the information collection reflects an overall decrease of 2,606 hours and an increase of 928 responses. We attribute

¹ Animal drugs intended for use in minor species, minor use in major species, or for serious or life-

threatening conditions or unmet animal or human health needs where a demonstration of effectiveness

would require a complex or particularly difficult study or studies.

this adjustment to an increase in the number of submissions which generate a Form FDA 0356v; however, there is also a decrease to the submissions we received reported under part 514.

Dated: December 16, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket Nos. FDA–2024–E–0299, FDA–2024–E–0301, and FDA–2024–E–0302]

Determination of Regulatory Review Period for Purposes of Patent Extension; VEOZAH

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has determined the regulatory review period for VEOZAH and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of applications to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human drug product.

DATES: Anyone with knowledge that any of the dates as published (see **SUPPLEMENTARY INFORMATION**) are incorrect may submit either electronic or written comments and ask for a redetermination by February 28, 2025. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by June 30, 2025. See “Petitions” in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of February 28, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket Nos. FDA–2024–E–0299, FDA–2024–E–0301, and FDA–2024–E–0302 for “Determination of Regulatory Review Period for Purposes of Patent Extension; VEOZAH.” Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two

copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6200, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug or biological product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product’s regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human drug product, VEOZAH (fezolinetant) indicated for treatment of moderate to severe vasomotor symptoms due to menopause. Subsequent to this approval, the USPTO received patent term restoration applications for VEOZAH (U.S. Patent No. 9,422,299; 9,987,274; 10,836,768) from Ogeda SA and the USPTO requested FDA's assistance in determining the patents' eligibility for patent term restoration. In a letter dated February 6, 2024, FDA advised the USPTO that this human drug product had undergone a regulatory review period and that the approval of VEOZAH represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for VEOZAH is 2,573 days. Of this time, 2,248 days occurred during the testing phase of the regulatory review period, while 325 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(i)) became effective:* April 27, 2016. FDA has verified the applicant's claim that the date the investigational new drug application became effective was on April 27, 2016.

2. *The date the application was initially submitted with respect to the human drug product under section 505 of the FD&C Act:* June 22, 2022. FDA has verified the applicant's claim that

the new drug application (NDA) for VEOZAH (NDA 216578) was initially submitted on June 22, 2022.

3. *The date the application was approved:* May 12, 2023. FDA has verified the applicant's claim that NDA 216578 was approved on May 12, 2023.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its applications for patent extension, this applicant seeks 616 days, 1,064 days, or 1,141 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see **DATES**). Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: must be timely (see **DATES**), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to <https://www.regulations.gov> at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: December 20, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–5720]

General and Plastic Surgery Devices Panel of the Medical Devices Advisory Committee; Notice of Meeting; Establishment of Public Docket; Request for Comments—Dermal Fillers

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; establishment of a public docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA or Agency) announces a forthcoming public advisory committee meeting of the General and Plastic Surgery Devices Panel of the Medical Devices Advisory Committee (the Committee). The general function of the Committee is to provide advice and recommendations to FDA on regulatory issues. The meeting will be open to the public. FDA is establishing a docket for public comment on this document.

DATES: The meeting will take place virtually on February 20, 2025, from 9 a.m. to 6 p.m. Eastern Time.

ADDRESSES: All meeting participants will be heard, viewed, captioned, and recorded for this advisory committee meeting via an online teleconferencing and/or video conferencing platform.

Answers to commonly asked questions about FDA advisory committee meetings may be accessed at: <https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm>.

FDA is establishing a docket for public comment on this meeting. The docket number is FDA–2024–N–5720. The docket will close on March 20, 2025. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of March 20, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Comments received on or before January 30, 2025, will be provided to the Committee. Comments received after that date will be taken into consideration by FDA. In the event that the meeting is cancelled, FDA will continue to evaluate any relevant applications or information, and consider any comments submitted to the docket, as appropriate.

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2024-N-5720 for "General and Plastic Surgery Devices Panel of the Medical Devices Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments." Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be

made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." FDA will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information, be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify the information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Akinola Awojope, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5216, Silver Spring, MD 20993-0002, Akinola.Awojope@fda.hhs.gov, 301-636-0512, or FDA Advisory Committee Information Line, 1-800-741-8138 (301-443-0572 in the Washington, DC area). A notice in the **Federal Register** about last-minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the Agency's website at <https://www.fda.gov/AdvisoryCommittees/default.htm> and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before the meeting.

SUPPLEMENTARY INFORMATION:

Agenda: The meeting presentations will be heard, viewed, captioned, and recorded through an online teleconferencing and/or video conferencing platform.

On February 20, 2025, the Committee will discuss and make recommendations regarding the benefits and risks of dermal fillers with new indications for use such as in the décolletage area. The discussion will include the following topics: (1) risks associated with new potential indications for use for dermal filler devices such as (a) the décolletage injection location and the potential impact of filler material on imaging studies (e.g., breast cancer screening), and (b) anatomic locations that may require larger volume injections, (2) removal of dermal filler implant material, and (3) benefit-risk assessments, the informed decision process, and patient preference.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will be made publicly available on FDA's website at the time of the advisory committee meeting, and the background material will be posted on FDA's website after the meeting. Background material and the link to the online teleconference and/or video conferencing meeting will be available at <https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee meeting link.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the Committee. All electronic and written submissions to the Docket (see **ADDRESSES**) on or before January 30, 2025, will be provided to the Committee. Oral presentations from the public will be scheduled on February 20, 2025, between approximately 11:30 a.m. and 12:30 p.m. Eastern Time. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before January 21, 2025. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session,

FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by January 22, 2025.

For press inquiries, please contact the Office of Media Affairs at fdaoma@fda.hhs.gov or 301-796-4540.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Artair Mallett at Artair.Mallett@fda.hhs.gov or 301-796-9638, at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our website at <https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm> for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. 1001 *et seq.*). This meeting notice also serves as notice that, pursuant to 21 CFR 10.19, the requirements in 21 CFR 14.22(b), (f), and (g) relating to the location of advisory committee meetings are hereby waived to allow for this meeting to take place using an online meeting platform. This waiver is in the interest of allowing greater transparency and opportunities for public participation, in addition to convenience for advisory committee members, speakers, and guest speakers. The conditions for issuance of a waiver under 21 CFR 10.19 are met.

Dated: December 19, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2024-N-0008]

Request for Nominations for Individuals and Consumer Organizations for Advisory Committees

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is requesting that any consumer organizations interested in participating in the selection of voting and/or nonvoting consumer representatives to serve on its advisory committees or panels notify FDA in writing. FDA is also requesting nominations for voting and/or nonvoting consumer representatives to serve on advisory committees and/or panels for which vacancies currently exist or are expected to occur in the near future. Nominees recommended to serve as a voting or nonvoting consumer representative may be self-nominated or may be nominated by a consumer organization. FDA seeks to include the views of individuals on its advisory committees regardless of their gender identification, religious affiliation, racial and ethnic identification, or disability status, and, therefore, encourages nominations of appropriately qualified candidates from all groups.

DATES: Any consumer organization interested in participating in the selection of an appropriate voting or nonvoting member to represent consumer interests on an FDA advisory committee or panel may send a letter or email stating that interest to FDA (see **ADDRESSES**) by February 13, 2025, for vacancies listed in this notice.

Concurrently, nomination materials for prospective candidates should be sent to FDA (see **ADDRESSES**) by February 13, 2025. Nominations will be accepted for current vacancies and for those that will or may occur through December 31, 2025.

ADDRESSES: All statements of interest from consumer organizations interested in participating in the selection process should be submitted electronically to ACOMSSubmissions@fda.hhs.gov or by mail to Advisory Committee Oversight and Management Staff, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 5122, Silver Spring, MD 20993-0002.

Consumer representative nominations should be submitted electronically by logging into the FDA Advisory Committee Membership Nomination Portal: <https://www.accessdata.fda.gov/scripts/FACTRSPortal/FACTRS/index.cfm>, or by mail to Advisory Committee Oversight and Management Staff, 10903 New Hampshire Ave., Bldg. 32, Rm. 5122, Silver Spring, MD 20993-0002. Additional information about becoming a member of an FDA advisory committee can also be obtained by visiting FDA's website at <https://www.fda.gov/AdvisoryCommittees/default.htm>.

FOR FURTHER INFORMATION CONTACT:

For questions relating to participation in the selection process: Kimberly Hamilton, Advisory Committee Oversight and Management Staff, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 5122, Silver Spring, MD 20993-0002, 301-796-8220, Kimberly.Hamilton@fda.hhs.gov.

For questions relating to specific advisory committees or panels, contact the appropriate contact person listed in table 1.

Dental Products Panel; Ophthalmic Devices Panel; Orthopaedic and Rehabilitation Devices Panel.

SUPPLEMENTARY INFORMATION: FDA is or nonvoting consumer representatives requesting nominations for voting and/ for the vacancies listed in table 2:

TABLE 2—COMMITTEE DESCRIPTIONS, TYPE OF CONSUMER REPRESENTATIVE VACANCY, AND APPROXIMATE DATE NEEDED

Committee/panel/areas of expertise needed	Type of vacancy	Approximate date needed
FDA Science Board Advisory Committee—The Science Board provides advice to the Commissioner of Food and Drugs (the Commissioner) and other appropriate officials on specific complex scientific and technical issues important to FDA and its mission, including emerging issues within the scientific community. Additionally, the Science Board provides advice that supports the Agency in keeping pace with technical and scientific developments, including in regulatory science; and input into the Agency's research agenda, and on upgrading its scientific and research facilities and training opportunities. It also provides, where requested, expert review of Agency-sponsored intramural and extramural scientific research programs.	1—Voting	Immediately.
Blood Products Advisory Committee—Knowledgeable in the fields of clinical and administrative medicine, hematology, immunology, blood banking, surgery, internal medicine, biochemistry, engineering, biological and physical sciences, biotechnology, computer technology, statistics, epidemiology, sociology/ethics, and other related professions.	1—Voting	October 1, 2025.
Cellular, Tissue and Gene Therapies—Knowledgeable in the fields of cellular therapies, tissue transplantation, gene transfer therapies and xenotransplantation (biostatistics, bioethics, hematology/oncology, human tissues and transplantation, reproductive medicine, general medicine and various medical specialties including surgery and oncology, immunology, virology, molecular biology, cell biology, developmental biology, tumor biology, biochemistry, rDNA technology, nuclear medicine, gene therapy, infectious diseases, and cellular kinetics).	1—Voting	April 1, 2025.
Vaccines and Related Biological Products Advisory Committee—Knowledgeable in the fields of immunology, molecular biology, rDNA, virology, bacteriology, epidemiology or biostatistics, allergy, preventive medicine, infectious diseases, pediatrics, microbiology, and biochemistry.	1—Voting	February 1, 2025.
Anesthetic and Analgesic Drug Products Advisory Committee—Knowledgeable in the fields of anesthesiology, analgesics (such as: abuse deterrent opioids, novel analgesics, and issues related to opioid abuse), epidemiology or statistics, and related specialties.	1—Voting	Immediately.
Obstetrics, Reproductive and Urologic Drugs Advisory Committee—Knowledgeable in the fields of obstetrics, gynecology, urology, pediatrics, epidemiology or statistics, and related specialties.	1—Voting	Immediately.
Psychopharmacologic Drugs Advisory Committee—Knowledgeable in the fields of psychopharmacology, psychiatry, epidemiology or statistics, and related specialties.	1—Voting	Immediately.
Antimicrobial Drugs Advisory Committee—Knowledgeable in the fields of infectious disease, internal medicine, microbiology, pediatrics, epidemiology or statistics, and related specialties.	1—Voting	Immediately.
Drug Safety and Risk Management Advisory Committee—Knowledgeable in risk communication, risk management, drug safety, medical, behavioral, and biological sciences as they apply to risk management, and drug abuse.	1—Voting	Immediately.
Non-Prescription Drugs Advisory Committee—Knowledgeable in the fields of internal medicine, family practice, clinical toxicology, clinical pharmacology, pharmacy, dentistry, and related specialties.	1—Voting	Immediately.
Oncologic Drugs Advisory Committee—Knowledgeable in the fields of general oncology, pediatric oncology, hematologic oncology, immunologic oncology, biostatistics, and other related professions.	1—Voting	Immediately.

TABLE 2—COMMITTEE DESCRIPTIONS, TYPE OF CONSUMER REPRESENTATIVE VACANCY, AND APPROXIMATE DATE NEEDED—Continued

Committee/panel/areas of expertise needed	Type of vacancy	Approximate date needed
Pharmaceutical Science and Clinical Pharmacology—Knowledgeable in the fields of pharmaceutical sciences (pharmaceutical manufacturing, bioequivalence research, laboratory analytical techniques, pharmaceutical chemistry, physiochemistry, biochemistry, molecular biology, immunology, microbiology) and clinical pharmacology (dose-response, pharmacokinetics-pharmacodynamics, modeling and simulation, pharmacogenomics, clinical trial design, pediatrics and special populations and innovative methods in drug development), biostatistics, related biomedical and pharmacological specialties, current good manufacturing practices, and quality systems implementation.	1—Voting	December 1, 2025.
Cardiovascular and Renal Drugs Advisory Committee—Knowledgeable in the fields of cardiology, hypertension, arrhythmia, angina, congestive heart failure, diuresis, and biostatistics.	1—Voting	Immediately.
Dermatologic and Ophthalmic Drugs Advisory Committee—Knowledgeable in the fields of dermatology, ophthalmology, internal medicine, pathology, immunology, epidemiology or statistics, and other related professions.	1—Voting	September 1, 2025.
Endocrinologic and Metabolic Drugs Advisory Committee—Knowledgeable in the fields of endocrinology, metabolism, epidemiology or statistics, and related specialties.	1—Voting	Immediately.
Medical Imaging Drugs Advisory Committee—Knowledgeable in the fields of nuclear medicine, radiology, epidemiology, statistics, and related specialties.	1—Voting	Immediately.
Peripheral and Central Nervous Systems Drugs Advisory Committee—Knowledgeable in the fields of neurology, neuropharmacology, neuropathology, otolaryngology, epidemiology or statistics, and related specialties.	1—Voting	Immediately.
Anesthesiology and Respiratory Therapy Devices Panel—Anesthesiologists, pulmonary medicine specialists, or other experts who have specialized interests in ventilator support, pharmacology, physiology, or the effects and complications of anesthesia.	1—Nonvoting	Immediately.
Clinical Chemistry and Clinical Toxicology Devices Panel—Doctor of Medicine or Philosophy with experience in clinical chemistry (<i>e.g.</i> , cardiac markers), clinical toxicology, clinical pathology, clinical laboratory medicine, and endocrinology.	1—Nonvoting	Immediately.
Ear, Nose and Throat Devices Panel—Otolologists, neurotologists, audiologists	1—Nonvoting	Immediately.
General and Plastic Surgery Devices Panel—Surgeons (general, plastic, reconstructive, pediatric, thoracic, abdominal, pelvic, and endoscopic); dermatologists; experts in biomaterials, lasers, wound healing, and quality of life; and biostatisticians.	1—Nonvoting	Immediately.
Circulatory System Devices Panel—Interventional cardiologists, electrophysiologists, invasive (vascular) radiologists, vascular and cardiothoracic surgeons, and cardiologists with special interest in congestive heart failure.	1—Nonvoting	Immediately.
General Hospital and Personal Use Devices Panel—Internists, pediatricians, neonatologists, endocrinologists, nurses, biomedical engineers or microbiologists/infection control practitioners or experts.	1—Nonvoting	Immediately.
Hematology and Pathology Devices Panel—Hematologists (benign and/or malignant hematology), hematopathologists (general and special hematology, coagulation and homeostasis, and hematological oncology), gynecologists with special interests in gynecological oncology, cytopathologists, and molecular pathologists with special interests in development of predictive biomarkers.	1—Nonvoting	Immediately.
Immunology Devices Panel—Persons with experience in medical, surgical, or clinical oncology, internal medicine, clinical immunology, allergy, molecular diagnostics, or clinical laboratory medicine.	1—Nonvoting	Immediately.
Medical Devices Dispute Resolution Panel—Experts with broad, cross-cutting scientific, clinical, analytical, or mediation skills.	1—Nonvoting	October 1, 2024.
Microbiology Devices Panel—Clinicians with an expertise in infectious disease, <i>e.g.</i> , pulmonary disease specialists, sexually transmitted disease specialists, pediatric infectious disease specialists, experts in tropical medicine and emerging infectious diseases, mycologists; clinical microbiologists and virologists; clinical virology and microbiology laboratory directors, with expertise in clinical diagnosis and in vitro diagnostic assays, <i>e.g.</i> , hepatologists; molecular biologists.	1—Nonvoting	Immediately.
Molecular and Clinical Genetics Devices Panel—Experts in human genetics and in the clinical management of patients with genetic disorders, <i>e.g.</i> , pediatricians, obstetricians, neonatologists. The Agency is also interested in considering candidates with training in inborn errors of metabolism, biochemical and/or molecular genetics, population genetics, epidemiology, and related statistical training. Additionally, individuals with experience in genetic counseling, medical ethics, and ancillary fields of study will be considered.	1—Nonvoting	Immediately.
Radiological Devices Panel—Physicians with experience in general radiology, mammography, ultrasound, magnetic resonance, computed tomography, other radiological subspecialties, and radiation oncology; scientists with experience in diagnostic devices, radiation physics, statistical analysis, digital imaging, and image analysis.	1—Nonvoting	Immediately.
Dental Products Panel—Dentists, engineers and scientists who have expertise in the areas of dental implants, dental materials, periodontology, tissue engineering, and dental anatomy.	1—Nonvoting	Immediately.
Ophthalmic Devices Panel—Ophthalmologists with expertise in corneal-external disease, vitreo-retinal surgery, glaucoma, ocular immunology, ocular pathology; optometrists; vision scientists; and ophthalmic professionals with expertise in clinical trial design, quality of life assessment, electrophysiology, low vision rehabilitation, and biostatistics.	1—Nonvoting	Immediately.
Orthopaedic and Rehabilitation Devices Panel—Orthopedic surgeons (joint spine, trauma, and pediatric); rheumatologists; engineers (biomedical, biomaterials, and biomechanical); experts in rehabilitation medicine, sports medicine, and connective tissue engineering; and biostatisticians.	1—Nonvoting	Immediately.

I. Functions and General Description of the Committee Duties**A. FDA Science Board Advisory Committee**

The Science Board Advisory Committee (Science Board) provides advice to the Commissioner and other appropriate officials on specific complex scientific and technical issues important to FDA and its mission, including emerging issues within the scientific community. Additionally, the Science Board provides advice that supports the Agency in keeping pace with technical and scientific developments, including in regulatory science, and input into the Agency's research agenda and on upgrading its scientific and research facilities and training opportunities. It also provides, where requested, expert review of Agency-sponsored intramural and extramural scientific research programs.

B. Blood Products Advisory Committee

Reviews and evaluates available data concerning the safety, effectiveness, and appropriate use of blood products derived from blood and serum or biotechnology which are intended for use in the diagnosis, prevention, or treatment of human diseases as well as the safety, effectiveness, and labeling of the products, on clinical and laboratory studies involving such products, on the affirmation or revocation of biological product licenses, and on the quality and relevance of FDA's research program which provides the scientific support for regulating these products.

C. Cellular, Tissue, and Gene Therapies

Reviews and evaluates available data relating to the safety, effectiveness, and appropriate use of human cells, human tissues, gene transfer therapies, and xenotransplantation products which are intended for transplantation, implantation, infusion, and transfer in the prevention and treatment of a broad spectrum of human diseases and in the reconstruction, repair, or replacement of tissues for various conditions, as well as considers the quality and relevance of FDA's research program which provides scientific support for the regulation of these products.

D. Vaccines and Related Biological Products

Reviews and evaluates data concerning the safety, effectiveness, and appropriate use of vaccines and related biological products which are intended for use in the prevention, treatment, or diagnosis of human diseases, as well as considers the quality and relevance of FDA's research program which provides

scientific support for the regulation of these products.

E. Anesthetic and Analgesic Drug Products Advisory Committee

Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational human drug products, including analgesics (e.g., abuse-deterrent opioids, novel analgesics) and issues related to opioid abuse, and those for use in anesthesiology, and makes appropriate recommendations to the Commissioner.

F. Obstetrics, Reproductive and Urologic Products Advisory Committee

Reviews and evaluates data on the safety and effectiveness of marketed and investigational human drug products for use in the practice of obstetrics, gynecology, urology, and related specialties.

G. Psychopharmacologic Drugs Advisory Committee

Reviews and evaluates data concerning the safety and effectiveness of marketed and investigational human drug products for use in the practice of psychiatry and related fields.

H. Antimicrobial Drugs Advisory Committee

Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational human drug products for use in the treatment of infectious diseases and disorders.

I. Drug Safety and Risk Management Advisory Committee

Reviews and evaluates information on risk management, risk communication, and quantitative evaluation of spontaneous reports for drugs for human use and for any other product for which FDA has regulatory responsibility. Advises on the scientific and medical evaluation of all information gathered by the Department of Health and Human Services (HHS) and the Department of Justice with regard to safety, efficacy, and abuse potential of drugs or other substances, and recommends actions to be taken by HHS with regard to the marketing, investigation, and control of such drugs or other substances.

J. Nonprescription Drugs Advisory Committee

Reviews and evaluates available data concerning the safety and effectiveness of over the counter (nonprescription) human drug products, or any other FDA-regulated product, for use in the treatment of a broad spectrum of human symptoms and diseases, and advises the

Commissioner either on the promulgation of monographs establishing conditions under which these drugs are generally recognized as safe and effective and not misbranded or on the approval of new drug applications for such drugs. The Committee serves as a forum for the exchange of views regarding the prescription and nonprescription status, including switches from one status to another, of these various drug products and combinations thereof. The Committee may also conduct peer review of Agency-sponsored intramural and extramural scientific biomedical programs in support of FDA's mission and regulatory responsibilities.

K. Oncologic Drugs Advisory Committee

Reviews and evaluates data concerning the safety and effectiveness of marketed and investigational human drug products for use in the treatment of cancer.

L. Pharmaceutical Science and Clinical Pharmacology

Reviews and evaluates scientific, clinical, and technical issues related to the safety and effectiveness of drug products for use in the treatment of a broad spectrum of human diseases, the quality characteristics which such drugs purport or are represented to have, and as required, any other product for which FDA has regulatory responsibility, and makes appropriate recommendations to the Commissioner. The Committee may also review Agency-sponsored intramural and extramural biomedical research programs in support of FDA's drug regulatory responsibilities and its critical path initiatives related to improving the efficacy and safety of drugs and improving the efficiency of drug development.

M. Cardiovascular and Renal Drugs Advisory Committee

Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational human drug products for use in the treatment of cardiovascular and renal disorders.

N. Dermatologic and Ophthalmic Drugs

Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational human drug products for use in the treatment of dermatologic and ophthalmic disorders.

O. Endocrinologic and Metabolic Drugs Advisory Committee

Reviews and evaluates data concerning the safety and effectiveness of marketed and investigational human

drug products for use in the treatment of endocrine and metabolic disorders.

P. Medical Imaging Drugs Advisory Committee

Reviews and evaluates data concerning the safety and effectiveness of marketed and investigational human drug products for use in diagnostic and therapeutic procedures using radioactive pharmaceuticals and contrast media used in diagnostic radiology.

Q. Gastrointestinal Drugs Advisory Committee

Reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational human drug products for use in the treatment of gastrointestinal diseases.

R. Peripheral and Central Nervous System Drugs Advisory Committee

Reviews and evaluates data concerning the safety and effectiveness of marketed and investigational human drug products for use in the treatment of neurologic diseases.

S. Medical Devices Advisory Committee Panels

The Medical Devices Advisory Committee has established certain panels to review and evaluate data on the safety and effectiveness of marketed and investigational devices and make recommendations for their regulation. With the exception of the Medical Devices Dispute Resolution Panel, each panel, according to its specialty area: (1) advises on the classification or reclassification of devices into one of three regulatory categories and advises on any possible risks to health associated with the use of devices; (2) advises on formulation of product development protocols; (3) reviews premarket approval applications for medical devices; (4) reviews guidelines and guidance documents; (5) recommends exemption of certain devices from the application of portions of the Federal Food, Drug, and Cosmetic Act; (6) advises on the necessity to ban a device; and (7) responds to requests from the Agency to review and make recommendations on specific issues or problems concerning the safety and effectiveness of devices. With the exception of the Medical Devices Dispute Resolution Panel, each panel, according to its specialty area, may also make appropriate recommendations to the Commissioner on issues relating to the design of clinical studies regarding the safety and effectiveness of marketed and investigational devices.

The Medical Devices Dispute Resolution Panel provides advice to the Commissioner on complex or contested scientific issues between FDA and medical device sponsors, applicants, or manufacturers relating to specific products, marketing applications, regulatory decisions and actions by FDA, and Agency guidance and policies. The Panel makes recommendations on issues that are lacking resolution, are highly complex in nature, or result from challenges to regular advisory panel proceedings or Agency decisions or actions.

II. Criteria for Members

Persons nominated for membership as consumer representatives on committees or panels should meet the following criteria: (1) demonstrate an affiliation with and/or active participation in consumer or community-based organizations, (2) be able to analyze technical data, (3) understand research design, (4) be able to discuss benefits and risks, and (5) be able to evaluate the safety and efficacy of products under review. The consumer representative should be able to represent the consumer perspective on issues and actions before the advisory committee; serve as a liaison between the committee and interested consumers, associations, coalitions, and consumer organizations; and facilitate dialogue with the advisory committees on scientific issues that affect consumers.

III. Selection Procedures

Selection of members representing consumer interests is conducted through procedures that include the use of organizations representing the public interest and public advocacy groups. These organizations recommend nominees for the Agency's selection. Representatives from the consumer health branches of Federal, State, and local governments also may participate in the selection process. Any consumer organization interested in participating in the selection of an appropriate voting or nonvoting member to represent consumer interests should send a letter stating that interest to FDA (see **ADDRESSES**) within 30 days of publication of this document.

Within the subsequent 45 days, FDA will compile a list of consumer organizations that will participate in the selection process and will forward to each such organization a ballot listing at least two qualified nominees selected by the Agency based on the nominations received, together with each nominee's current curriculum vitae or resume. Ballots are to be filled out and returned

to FDA within 30 days. The nominee receiving the highest number of votes ordinarily will be selected to serve as the member representing consumer interests for that particular advisory committee or panel.

IV. Nomination Procedures

Any interested person or organization may nominate one or more qualified persons to represent consumer interests on the Agency's advisory committees or panels. Self-nominations are also accepted. Nominations must include a current, complete resume or curriculum vitae for each nominee and a signed copy of the *Acknowledgement and Consent* form available at the FDA Advisory Nomination Portal (see **ADDRESSES**), and a list of consumer or community-based organizations for which the candidate can demonstrate active participation.

Nominations must also specify the advisory committee(s) or panel(s) for which the nominee is recommended. In addition, nominations must also acknowledge that the nominee is aware of the nomination unless self-nominated. FDA will ask potential candidates to provide detailed information concerning such matters as financial holdings, employment, and research grants and/or contracts to permit evaluation of possible sources of conflicts of interest. Members will be invited to serve for terms of up to 4 years.

FDA will review all nominations received within the specified timeframes and prepare a ballot containing the names of qualified nominees. Names not selected will remain on a list of eligible nominees and be reviewed periodically by FDA to determine continued interest. After selecting qualified nominees for the ballot, FDA will provide those consumer organizations that are participating in the selection process with the opportunity to vote on the listed nominees. Only organizations vote in the selection process. Persons who nominate themselves to serve as voting or nonvoting consumer representatives will not participate in the selection process.

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. app. 2) and 21 CFR part 14, relating to advisory committees.

Dated: December 16, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2024-D-5580]

M15 General Principles for Model-Informed Drug Development; International Council for Harmonisation; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled “M15 General Principles for Model-Informed Drug Development.” The draft guidance was prepared under the auspices of the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH). The draft guidance discusses the multidisciplinary principles of model-informed drug development (MIDD). This includes recommendations on MIDD planning, model evaluation, and evidence documentation. The draft guidance also includes a harmonized framework for assessing evidence derived from MIDD. The draft guidance is intended to facilitate multidisciplinary understanding, appropriate use, and harmonized assessment of MIDD and its associated evidence.

DATES: Submit either electronic or written comments on the draft guidance by February 28, 2025 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact

information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2024-D-5580 for “M15 General Principles for Model-Informed Drug Development.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For

more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002, or the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist the office in processing your requests. The draft guidance may also be obtained by mail by calling CBER at 1-800-835-4709 or 240-402-8010. See the **SUPPLEMENTARY**

INFORMATION section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT:

Regarding the guidance: Hao Zhu, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 3134, Silver Spring, MD 20993-0002, Hao.Zhu@fda.hhs.gov; or James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911.

Regarding the ICH: Jill Adleberg, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6364, Silver Spring, MD 20993-0002, 301-796-5259, Jill.Adleberg@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “M15 General Principles for Model-Informed Drug Development.” The draft

guidance was prepared under the auspices of ICH. ICH seeks to achieve greater regulatory harmonization worldwide to ensure that safe, effective, high-quality medicines are developed, registered, and maintained in the most resource-efficient manner.

By harmonizing the regulatory requirements in regions around the world, ICH guidelines enhance global drug development, improve manufacturing standards, and increase the availability of medications. For example, ICH guidelines have substantially reduced duplicative clinical studies, prevented unnecessary animal studies, standardized the reporting of important safety information, and standardized marketing application submissions.

The six Founding Members of the ICH are FDA; the Pharmaceutical Research and Manufacturers of America; the European Commission; the European Federation of Pharmaceutical Industries Associations; the Japanese Ministry of Health, Labour, and Welfare; and the Japanese Pharmaceutical Manufacturers Association. The Standing Members of the ICH Association include Health Canada and Swissmedic. ICH membership continues to expand to include other regulatory authorities and industry associations from around the world (refer to <https://www.ich.org/>).

ICH works by engaging global regulatory and industry experts in a detailed, science-based, and consensus-driven process that results in the development of ICH guidelines. The regulators around the world are committed to consistently adopting these consensus-based guidelines, realizing the benefits for patients and for industry.

As a Founding Regulatory Member of ICH, FDA plays a major role in the development of each of the ICH guidelines, which FDA then adopts and issues as guidance for industry. FDA's guidance documents do not establish legally enforceable responsibilities. Instead, they describe the Agency's current thinking on a topic and should be viewed only as recommendations, unless specific regulatory or statutory requirements are cited.

In November 2024, the ICH Assembly endorsed the draft guideline entitled "M15 General Principles for Model-Informed Drug Development" and agreed that the guideline should be made available for public comment. The draft guideline is the product of the Multidisciplinary Expert Working Group of the ICH. Comments about this draft will be considered by FDA and the Multidisciplinary Expert Working Group.

The draft guidance promotes multidisciplinary understanding and harmonized assessment of MIDD by discussing principles, assessment frameworks, evaluation, and reporting of MIDD and its generated evidence. Appropriate use of MIDD can enable greater efficiency in drug development, while harmonized approaches to assessment can promote consistent and transparent evaluation of MIDD evidence to inform regulatory decision making.

This draft guidance has been left in the original ICH format. The final guidance will be reformatted and edited to conform with FDA's good guidance practices regulation (21 CFR 10.115) and style before publication. The draft guidance, when finalized, will represent the current thinking of FDA on "M15 General Principles for Model-Informed Drug Development." It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information for submission of regulatory information, including nonclinical and clinical data, prior information of drug and disease characteristics derived from model-informed drug development, have been approved under OMB control numbers 0910–0014, 0910–0001, and 0910–0338.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at <https://www.regulations.gov>, <https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs>, <https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances>, or <https://www.fda.gov/regulatory-information/search-fda-guidance-documents>.

Dated: December 16, 2024.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket Nos. FDA–2024–E–0440 and FDA–2024–E–0441]

Determination of Regulatory Review Period for Purposes of Patent Extension; ROCTAVIAN

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has determined the regulatory review period for ROCTAVIAN and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of applications to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human biological product.

DATES: Anyone with knowledge that any of the dates as published (see

SUPPLEMENTARY INFORMATION) are incorrect must submit either electronic or written comments and ask for a redetermination by February 28, 2025. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by June 30, 2025. See "Petitions" in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of February 28, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a

third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket Nos. FDA-2024-E-0440 and FDA-2024-E-0441 for "Determination of Regulatory Review Period for Purposes of Patent Extension; ROCTAVIAN." Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- *Confidential Submissions—*To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and

contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6200, Silver Spring, MD 20993, 301-796-3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100-670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug or biological product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human biological products, the testing phase begins when the exemption to permit the clinical investigations of the biological product becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human biological product and continues until FDA grants permission to market the biological product. Although only a portion of a regulatory review period may count

toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human biological product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human biological product ROCTAVIAN (valoctocogene roxaparvovec-rvox). ROCTAVIAN is indicated for the treatment of adults with severe hemophilia A (congenital factor VIII deficiency with factor VIII activity <1 IU/dL) without pre-existing antibodies to adeno-associated virus serotype 5 detected by an FDA-approved test. Subsequent to this approval, the USPTO received patent term restoration applications for ROCTAVIAN (U.S. Patent Nos. 9,504,762 and 11,406,690) from BioMarin Pharmaceutical, Inc., and the USPTO requested FDA's assistance in determining the patents' eligibility for patent term restoration. In a letter dated April 24, 2024, FDA advised the USPTO that this human biological product had undergone a regulatory review period and that the approval of ROCTAVIAN represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for ROCTAVIAN is 2,101 days. Of this time, 816 days occurred during the testing phase of the regulatory review period, while 1,285 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(i)) became effective:* September 29, 2017. The applicant claims October 5, 2017, as the date the investigational new drug application (IND) became effective. However, FDA records indicate that the IND effective date was September 29, 2017, which was the first date after receipt of the IND that the investigational studies were allowed to proceed.

2. *The date the application was initially submitted with respect to the human biological product under section 351 of the Public Health Service Act (42 U.S.C. 262):* December 23, 2019. FDA has verified the applicant's claim that

the biologics license application (BLA) for ROCTAVIAN (BLA B125720) was initially submitted on December 23, 2019.

3. *The date the application was approved:* June 29, 2023. FDA has verified the applicant's claim that BLA B125720 was approved on June 29, 2023.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its applications for patent extension, this applicant seeks 803 days or 1,023 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see DATES). Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: must be timely (see DATES), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to <https://www.regulations.gov> at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: December 20, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit

both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6200, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug or biological product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product’s regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory

review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA’s determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human drug product, XTAMPZA ER (oxycodone myristate), indicated for the management of pain severe enough to require daily, around-the-clock, long-term opioid treatment and for which alternative treatment options are inadequate. Subsequent to this approval, the USPTO received patent term restoration applications for XTAMPZA ER (U.S. Patent Nos. 7,399,488; 7,771,707; and 8,449,909) from Collegium Pharmaceutical, Inc., and the USPTO requested FDA’s assistance in determining the patents’ eligibility for patent term restoration. In a letter dated October 19, 2023, FDA advised the USPTO that this human drug product had undergone a regulatory review period and that the approval of XTAMPZA ER represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product’s regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for XTAMPZA ER is 3,214 days. Of this time, 2,712 days occurred during the testing phase of the regulatory review period, while 502 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(i)) became effective:* July 11, 2007. FDA has verified the applicant’s claim that the date the investigational new drug application became effective was on July 11, 2007.

2. *The date the application was initially submitted with respect to the human drug product under section 505 of the FD&C Act:* December 12, 2014. FDA has verified the applicant’s claim that the new drug application (NDA) for XTAMPZA ER (NDA 208090) was initially submitted on December 12, 2014.

3. *The date the application was approved:* April 26, 2016. FDA has

verified the applicant’s claim that NDA 208090 was approved on April 26, 2016.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its applications for patent extension, this applicant seeks 784 days, 1,295 days, or 1,673 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see DATES). Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: must be timely (see DATES), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to <https://www.regulations.gov> at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: December 13, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2023–E–3269]

Determination of Regulatory Review Period for Purposes of Patent Extension; NEXOBRID

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has

determined the regulatory review period for NEXOBRID and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human biological product.

DATES: Anyone with knowledge that any of the dates as published (see SUPPLEMENTARY INFORMATION) are incorrect must submit either electronic or written comments and ask for a redetermination by February 28, 2025. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by June 30, 2025. See “Petitions” in the SUPPLEMENTARY INFORMATION section for more information.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of February 28, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the

manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2023-E-3269 for “Determination of Regulatory Review Period for Purposes of Patent Extension; NEXOBRID.” Received comments, those filed in a timely manner (see ADDRESSES), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6200, Silver Spring, MD 20993, 301-796-3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100-670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug or biologic product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human biological products, the testing phase begins when the exemption to permit the clinical investigations of the biological product becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human biological product and continues until FDA grants permission to market the biological product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human biological product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human biologic product NEXOBRID (anacaulase-bcdb). NEXOBRID is indicated for eschar removal in adults with deep partial thickness and/or full

thickness thermal burns. Subsequent to this approval, the USPTO received a patent term restoration application for NEXOBRID (U.S. Patent No. 8,540,983) from MediWound, Ltd., and the USPTO requested FDA's assistance in determining this patent's eligibility for patent term restoration. In a letter dated January 30, 2024, FDA advised the USPTO that this human biological product had undergone a regulatory review period and that the approval of NEXOBRID represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for NEXOBRID is 7,427 days. Of this time, 6,514 days occurred during the testing phase of the regulatory review period, while 913 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(i)) became effective:* August 30, 2002. The applicant claims August 29, 2002, as the date the investigational new drug application (IND) became effective. However, FDA records indicate that the IND effective date was August 30, 2002, which was 30 days after FDA receipt of the IND.

2. *The date the application was initially submitted with respect to the human biological product under section 351 of the Public Health Service Act (42 U.S.C. 262):* June 29, 2020. FDA has verified the applicant's claim that the biologics license application (BLA) for NEXOBRID (BLA 761192) was initially submitted on June 29, 2020.

3. *The date the application was approved:* December 28, 2022. FDA has verified the applicant's claim that BLA 761192 was approved on December 28, 2022.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 5 years of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see **DATES**).

Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: must be timely (see **DATES**), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to <https://www.regulations.gov> at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: December 13, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2023–D–5016]

Protocol Deviations for Clinical Investigations of Drugs, Biological Products, and Devices; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled “Protocol Deviations for Clinical Investigations of Drugs, Biological Products, and Devices.” This draft guidance provides recommendations to assist sponsors, clinical investigators, and institutional review boards (IRBs) in defining, identifying, and reporting protocol deviations. The guidance provides definitions for protocol deviations and important protocol deviations. In addition, the guidance provides a recommended classification system for sponsors to report protocol deviations to FDA in clinical study reports for drugs, biological products, and devices; for

investigators to report protocol deviations to sponsors and to IRBs; and for IRBs to evaluate protocol deviations.

DATES: Submit either electronic or written comments on the draft guidance by February 28, 2025 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2023–D–5016 for “Protocol Deviations for Clinical Investigations of Drugs, Biological Products, and Devices.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at

<https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002; the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002; or the Office of Policy, Guidance and Policy Development, Center for Devices

and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Dat Doan, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 3334, Silver Spring, MD 20993, 240–402–8926; or James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911; or Soma Kalb, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. G318, Silver Spring, MD 20993–0002, 301–796–6359.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled “Protocol Deviations for Clinical Investigations of Drugs, Biological Products, and Devices.” Protocols document the study design, objectives, population, planned procedures, investigational product management, method(s) of data capture, monitoring and oversight plans, and statistical analysis plans either directly or by reference to associated investigational plans. In the conduct of a clinical investigation, some deviations from the specifics outlined in the protocol may occur.

This guidance provides recommendations to assist sponsors, clinical investigators, and IRBs in defining, identifying, and reporting protocol deviations. FDA regulations do not include a definition of the term protocol deviation or provide a system for classifying the various types of deviations that may occur during the conduct of a clinical investigation. A system that applies consistent classification, reporting, and documentation standards is important to assure the most interpretable and useful information emerges from the reporting of protocol deviations. To address these considerations, this guidance includes (1) definitions for protocol deviations and important protocol deviations, (2) recommendations on the types of protocol deviations that sponsors should report to FDA in clinical study reports, (3) recommendations on the

types of protocol deviations that investigators should report to sponsors and to IRBs, and (4) recommendations for IRBs in their evaluation of protocol deviations.

This draft guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on “Protocol Deviations for Clinical Investigations of Drugs, Biological Products, and Devices.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information in 21 CFR part 56 have been approved under OMB control number 0910–0130; the collections of information in 21 CFR part 312 have been approved under OMB control number 0910–0014; the collections of information in 21 CFR part 314 have been approved under OMB control number 0910–0001; the collections of information in 21 CFR part 320 have been approved under OMB control number 0910–0291; the collections of information in 21 CFR part 601 have been approved under OMB control number 0910–0338; the collections of information in 21 CFR part 812 have been approved under OMB control number 0910–0078; and the collections of information in 21 CFR part 814 have been approved under OMB control number 0910–0231.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at <https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs>, <https://www.fda.gov/regulatory-information/search-fda-guidance-documents>, <https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances>, <https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance/guidance-documents-medical-devices-and-radiation-emitting-products>, or <https://www.regulations.gov>.

Dated: December 17, 2024.
P. Ritu Nalubola,
Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–2149]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; De Novo Classification Process (Evaluation of Automatic Class III Designation)

AGENCY: Food and Drug Administration, HHS.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.
DATES: Submit written comments (including recommendations) on the collection of information by January 29, 2025.
ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be submitted to <https://www.reginfo.gov/public/do/PRAMain>. Find this particular information collection by selecting “Currently under Review—Open for Public Comments” or by using the search function. The OMB control number for this information collection is 0910–0844. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Amber Sanford, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD

20852, 301–796–8867, PRAStaff@fda.hhs.gov.
SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.
De Novo Classification Process (Evaluation of Automatic Class III Designation)—21 CFR Part 860, Subpart D
OMB Control Number 0910–0844—Revision

This information collection supports FDA regulations and information collection discussed in associated guidance. Sections 201(h), 513(a) and (f), 701(a), and 704 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 321(h), 360c(a) and (f), 371(a), and 374) establish a comprehensive system for the regulation of medical devices intended for human use. Section 513(f)(2) of the FD&C Act provides for a “De Novo” classification process, most recently amended by section 3101 of the 21st Century Cures Act (Pub. L. 114–255). The final rule “Medical Device De Novo Classification Process” (86 FR 54826), established part 860, subpart D (21 CFR part 860, subpart D) (§§ 860.200 through 860.260) to implement provisions in section 513(f)(2) of the FD&C Act. These regulations govern format and content elements for De Novo device classification requests, as well as withdrawal of the requests, and explain FDA procedures for acceptance, review, and granting or denying a request. FDA’s guidance for industry and FDA staff, “De Novo Classification Process (Evaluation of Automatic Class III Designation)”, provides guidance on the process for the submission and review of a De Novo classification request under section 513(f)(2) of the FD&C Act, also known as the De Novo classification process. This process provides a pathway to class I or class II classification for medical devices for which general controls or general and special controls provide a reasonable assurance of safety and effectiveness,

but for which there is no legally marketed predicate device.
In addition to regulatory requirements set forth in part 860, subpart D, the guidance document entitled “Acceptance Review for De Novo Classification Requests” communicates our thinking on criteria set out in § 860.230, in assessing whether a De Novo request should be accepted for substantive review. The guidance document includes an “Acceptance Checklist” to assist respondents in this regard.
The guidance document “Electronic Submission Template for Medical Device De Novo Requests,” provides the standards for the submission of De Novo requests by electronic format, a timetable for establishment of these standards, and criteria for waivers of and exemptions from the requirements to meet a statutory requirement. This guidance is also intended to represent one of several steps in meeting FDA’s commitment to the development of electronic submission templates to serve as guided submission preparation tools for industry to improve submission consistency and enhance efficiency in the review process.
The collections of information described by this notice are necessary to satisfy the previously mentioned statutory requirements for administration of this voluntary submission program. FDA uses the information to evaluate whether a medical device may be reclassified from class III into class I or II and, if applicable, to determine the general and/or special controls necessary to sufficiently regulate the medical device. Respondents to this information collection are private sector or other for-profit businesses.
In the **Federal Register** of May 29, 2024 (89 FR 46402), FDA published a 60-day notice requesting public comment on the proposed collection of information. No comments were received.
FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN

21 CFR part 860, subpart D; information collection activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
§§ 860.210, 860.220, 860.230; De Novo requests—format, content, and acceptance elements.	79	1	79	182	14,378
§ 860.230; FDA acceptance of request (<i>GFI Acceptance Checklist</i> ; Appendix A) ¹ .	79	1	79		

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN—Continued

21 CFR part 860, subpart D; information collection activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
\$ 860.250; withdrawal of request	5	1	5	0.17 (10 mins.)	1
Total					14,379

¹ FDA assumes activities associated with review of the Acceptance Checklist are included in burden for submission of requests captured in row 1.

Our estimated burden for the information collection reflects an overall increase of 2,002 hours and a corresponding increase of 11 responses. We attribute this adjustment to an increase in the number of submissions we received over the last few years. Since the publication of the 60-day notice, we issued the guidance document entitled “Electronic Submission Template for Medical Device De Novo Requests” (August 23, 2024, 89 FR 68166; <https://www.fda.gov/regulatory-information/search-fda-guidance-documents/electronic-submission-template-medical-device-de-novo-requests>) and are including it in this information collection. Given that all submissions were previously received electronically and the ability to voluntarily submit De Novo requests using eSTAR was included in the previous information collection request (ICR), inclusion of the guidance in this ICR is not expected to impact the estimated burden.

Dated: December 13, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–0008]

Request for Nominations of Individuals and Industry Organizations for the Patient Engagement Advisory Committee

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is requesting that any industry organizations interested in participating in the selection of a pool of nonvoting industry representatives to serve as temporary nonvoting members on the Patient Engagement Advisory

Committee (the Committee) in the Center for Devices and Radiological Health notify FDA in writing. FDA is also requesting nominations for temporary nonvoting industry representatives to be included in a pool of individuals to serve on the Committee. Nominees recommended to serve as a temporary nonvoting industry representative may either be self-nominated or nominated by an industry organization. This position may be filled by representatives from different medical device areas based on expertise relevant to the topics being considered by the Committee. Nominations will be accepted for upcoming vacancies effective with this notice. FDA seeks to include the views of women and men, members of all racial and ethnic groups, and individuals with and without disabilities on its advisory committees and, therefore, encourages nominations of appropriately qualified candidates from these groups.

DATES: Any industry organization interested in participating in the selection of an appropriate nonvoting member to represent industry interest must send a letter stating that interest to the FDA by January 29, 2025, (see sections I and II of this document for details). Concurrently, nomination materials for prospective candidates should be sent to FDA by January 29, 2025.

ADDRESSES: All statements of interest from industry organizations interested in participating in the selection process of a pool of nonvoting industry representatives should be sent electronically to Margaret Ames (see **FOR FURTHER INFORMATION CONTACT**). All nominations for nonvoting industry representatives should be submitted electronically by accessing the FDA Advisory Committee Membership Nomination Portal: <https://www.accessdata.fda.gov/scripts/FACTRSPortal/FACTRS/index.cfm> or by mail to Advisory Committee Oversight and Management Staff, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Rm. 5103, Silver Spring, MD 20993–0002. Information about becoming a member on an FDA advisory

committee can also be obtained by visiting FDA’s website at <https://www.fda.gov/AdvisoryCommittees/default.htm>.

FOR FURTHER INFORMATION CONTACT:

Margaret Ames, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5213, Silver Spring, MD 20993–0002, 301–796–5960, email: margaret.ames@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: FDA is requesting nominations for a pool of nonvoting industry representatives for the Committee. The list of needed expertise on May 1, 2025, is identified below:

- Cybersecurity
- Communication of Benefit & Risk Information to Patients; Medical Device Labeling
- Digital Health Technology/Artificial Intelligence
- Health Equity
- Patient Engagement
- Patient Preference Elicitation
- Patient-Reported Outcomes Development, Validation, and Use in Regulatory Studies or Clinical Practice
- Postmarket Studies, Including Observational and Registry-Based Studies
- Human Factors

FDA is publishing separate documents regarding:

1. Request for Nominations for Voting Members for the Patient Engagement Advisory Committee
2. Request for Nominations for Consumer Representative for the Patient Engagement Advisory Committee

I. General Description of the Committee’s Duties

The Committee provides advice on complex issues relating to medical devices, the regulation of devices, and their use by patients. Agency guidance and policies, clinical trial or registry design, patient preference study design, benefit-risk determinations, device labeling, unmet clinical needs, available alternatives, patient reported outcomes and device-related quality of life or

health status issues are among the topics that may be considered by the Committee. Members are knowledgeable in areas such as clinical research, primary care patient experience, healthcare needs of patient groups in the United States or are experienced in the work of patient and health professional organizations, methodologies for eliciting patient preferences, and strategies for communicating benefits, risks and clinical outcomes to patients and research subjects. The Commissioner of Food and Drugs (the Commissioner), or designee, shall have the authority to select from a group of individuals nominated by industry to serve temporarily as nonvoting members who are identified with industry interests. The number of temporary members selected for a particular meeting will depend on the meeting topic(s).

II. Qualifications

Persons nominated for the Patient Engagement Advisory Committee should be full-time employees of firms that manufacture medical device products, or consulting firms that represent manufacturers or have similar appropriate ties to industry.

III. Selection Procedure

Any industry organization interested in participating in the selection of an appropriate nonvoting member to represent industry interest must send a letter stating that interest to the FDA contact (see **FOR FURTHER INFORMATION CONTACT**) within 30 days of publication of this document (see **DATES**). Within the subsequent 30 days, FDA will send a letter to each organization that has expressed an interest, attaching a complete list of all such organizations; and a list of all nominees along with their current résumés or curriculum vitae. The letter will also state that it is the responsibility of the interested organizations to confer with one another and to select a candidate or candidates (to serve in a pool of individuals with varying areas of expertise) to represent industry interest for the Committee, within 60 days after the receipt of the FDA letter. The interested organizations are not bound by the list of nominees in selecting a candidate or candidates. However, if no individual is selected within 60 days, the Commissioner will select temporary nonvoting members (or pool of individuals) to represent industry interests.

IV. Nomination Procedure

Individuals may self-nominate and/or an organization may nominate one or more individuals to serve as a

temporary nonvoting industry representative. Nominations must include a cover letter and a current, complete résumé or curriculum vitae for each nominee, including current business and/or home address, telephone number, and email address if available, and a signed copy of the Acknowledgement and Consent form available at the FDA Advisory Committee Membership Nomination Portal (see **ADDRESSES**). Nominations should specify the advisory committee for which the nominee is recommended within 30 days of publication of this document (see **DATES**). In addition, nominations should acknowledge that the nominee is aware of the nomination, unless self-nominated. FDA will forward all nominations to the organizations expressing interest in participating in the selection process for the Committee. Only interested industry organizations participate in the selection process. Persons who nominate themselves as nonvoting industry representatives will not participate in the selection process.

This notice is issued under the Federal Advisory Committee Act (5 U.S.C. 1001 *et seq.*) and 21 CFR part 14, relating to advisory committees.

Dated: December 20, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–0846]

Agency Information Collection Activities; Announcement of Office of Management and Budget Approval; National Agriculture and Food Defense Strategy Survey

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing that a collection of information entitled “National Agriculture and Food Defense Strategy Survey” has been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA).

FOR FURTHER INFORMATION CONTACT: Amber Sanford, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601

Landsdown St., North Bethesda, MD 20852, 301–796–8867, PRASStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: On August 15, 2024, the Agency submitted a proposed collection of information entitled “National Agriculture and Food Defense Strategy Survey” to OMB for review and clearance under 44 U.S.C. 3507. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB has now approved the information collection and has assigned OMB control number 0910–0855. The approval expires on November 30, 2027. A copy of the supporting statement for this information collection is available on the internet at <https://www.reginfo.gov/public/do/PRAMain>.

Dated: December 16, 2024.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2022-D-1562]

E11A Pediatric Extrapolation; International Council for Harmonisation; Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a final guidance for industry entitled “E11A Pediatric Extrapolation.” The guidance was prepared under the auspices of the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH). The guidance provides a comprehensive and systematic approach to pediatric extrapolation during drug development. Notably, the guidance discusses approaches to safety extrapolation and defining extrapolation as a continuum. The guidance also includes approaches to study designs and statistical methodologies, including modeling and simulation, for developing and implementing pediatric extrapolation. The guidance is intended to provide approaches that can increase the efficiency of pediatric drug development and accelerate the availability of safe and effective drugs approved for use in children. The guidance replaces the draft guidance “E11A Pediatric Exploration” issued on August 29, 2022.

DATES: The announcement of the guidance is published in the **Federal Register** on December 30, 2024.

ADDRESSES: You may submit either electronic or written comments on Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2022-D-1562 for “E11A Pediatric Exploration.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS

CONFIDENTIAL INFORMATION.” The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of this guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002, or the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. The guidance may also be obtained by mail by calling CBER at 1-800-835-4709 or 240-402-8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT:

Regarding the guidance: Lynne Yao, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 5412, Silver Spring, MD 20993-0002, 301-796-2141,

Lynne.Yao@fda.hhs.gov; or James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911.

Regarding the ICH: Jill Adleberg, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6364, Silver Spring, MD 20993-0002, 301-796-5259, jill.adleberg@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled “E11A Pediatric Exploration.” The guidance was prepared under the auspices of ICH. ICH seeks to achieve greater regulatory harmonization worldwide to ensure that safe, effective, high-quality medicines are developed, registered, and maintained in the most resource-efficient manner.

By harmonizing the regulatory requirements in regions around the world, ICH guidelines enhance global drug development, improve manufacturing standards, and increase the availability of medications. For example, ICH guidelines have substantially reduced duplicative clinical studies, prevented unnecessary animal studies, standardized the reporting of important safety information, and standardized marketing application submissions.

The six Founding Members of the ICH are FDA; the Pharmaceutical Research and Manufacturers of America; the European Commission; the European Federation of Pharmaceutical Industries Associations; the Japanese Ministry of Health, Labour, and Welfare; and the Japanese Pharmaceutical Manufacturers Association. The Standing Members of the ICH Association include Health Canada and Swissmedic. ICH membership continues to expand to include other regulatory authorities and industry associations from around the world (refer to <https://www.ich.org/>).

ICH works by engaging global regulatory and industry experts in a detailed, science-based, and consensus-driven process that results in the development of ICH guidelines. The regulators around the world are committed to consistently adopting these consensus-based guidelines, realizing the benefits for patients and for industry.

As a Founding Regulatory Member of ICH, FDA plays a major role in the development of each of the ICH guidelines, which FDA then adopts and issues as guidance for industry. FDA’s

guidance documents do not establish legally enforceable responsibilities. Instead, they describe the Agency’s current thinking on a topic and should be viewed only as recommendations, unless specific regulatory or statutory requirements are cited.

In the **Federal Register** of August 29, 2022 (87 FR 52788), FDA published a notice announcing the availability of a draft guidance entitled “E11A Pediatric Extrapolation.” The notice gave interested persons an opportunity to submit comments by October 28, 2022.

After consideration of the comments received and revisions to the guideline, a final draft of the guideline was submitted to the ICH Assembly and endorsed by the regulatory agencies in August 2024.

This guidance finalizes the draft guidance issued on August 29, 2022. The final guidance includes clarification and minor formatting changes to its recommendations on pediatric extrapolation concepts and approaches. The guidance was restructured for easier navigability and includes additional details on key concepts like study designs, modeling approaches, and the role of biomarkers. Additionally, the final guidance includes updates to the figure on the continuum of pediatric extrapolation.

This guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on “E11A Pediatric Extrapolation.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information relating to submission of investigational new drug applications, including efficient approaches to clinical trial design and study protocols, have been approved under OMB control number 0910-0014. The collections of information relating to submission of new drug applications have been approved under OMB control number 0910-0001. The collections of information relating to submission of biologics license applications have been

approved under OMB control number 0910-0338.

III. Electronic Access

Persons with access to the internet may obtain the guidance at <https://www.regulations.gov>, <https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs>, <https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances>, or <https://www.fda.gov/regulatory-information/search-fda-guidance-documents>.

Dated: December 16, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–D–4490]

Combined Food and Drug Administration and Sponsor Oncologic Drugs Advisory Committee Briefing Document; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled “Combined FDA and Sponsor Oncologic Drugs Advisory Committee (ODAC) Briefing Document.” This draft guidance provides recommendations to sponsors regarding use and development of a combined version of the ODAC briefing document, as part of the Oncology Center of Excellence’s (OCE) Project Point/Counterpoint initiative. This single document includes information that customarily would be contained in separate briefing documents prepared individually by the Sponsor and FDA. Project Point/Counterpoint is an option for advisory committee meetings for oncology products. Sponsors in non-oncology therapeutic areas who want to discuss whether a combined advisory committee briefing document may be appropriate for their applications should contact the relevant review division. This briefing document format may provide efficiencies by allowing Sponsors and FDA to choose to use a single document that provides the views of the Sponsor and FDA on key issues.

DATES: Submit either electronic or written comments on the draft guidance by February 28, 2025 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier** (for written/paper submissions): Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2024-D-4490 for "Combined FDA and Sponsor Oncologic Drugs Advisory Committee (ODAC) Briefing Document." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT:

Jennifer Gao or Jamie Brewer, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993-0002, 240-402-4683 or 240-

402-4463; or James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993, 240-402-5923.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "Combined FDA and Sponsor Oncologic Drugs Advisory Committee (ODAC) Briefing Document." This guidance provides recommendations to sponsors regarding use and development of a combined version of the briefing document for matters before the ODAC, as part of the OCE Project Point/Counterpoint initiative. This single briefing document includes information that customarily would be contained in separate briefing documents prepared individually by the Sponsor and FDA. Project Point/Counterpoint is an option for advisory committee meetings for oncology products. Sponsors in non-oncology therapeutic areas who want to discuss whether a combined advisory committee briefing document may be appropriate for their applications should contact the relevant review division.

Sponsors and FDA customarily prepare their own separate ODAC briefing documents. This can lead to repetition of information (*i.e.*, trial design, endpoints, eligibility criteria, etc.) and increases the number of documents that ODAC committee members need to review. Additionally, ODAC committee members may need to go back and forth from each briefing document to consider the Sponsor's and FDA's position on each issue. Project Point/Counterpoint may provide efficiencies by allowing Sponsors and FDA to choose to use a single document that provides the views of the Sponsor and FDA on key issues.

The combined briefing document was first piloted for use at an ODAC meeting in December 2019. This format decreases the number of documents ODAC members must review by providing the applicant's and FDA's positions in one document. It serves as a stand-alone document containing the background information and an objective description of the data for the clinical trial or topic under discussion at ODAC, followed by the positions of the Sponsor and FDA.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on "Combined FDA and Sponsor

Oncologic Drugs Advisory Committee (ODAC) Briefing Document.” It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

FDA tentatively concludes that this draft guidance contains no collection of information. Therefore, clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1995 is not required.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at <https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs>, <https://www.fda.gov/regulatory-information/search-fda-guidance-documents>, or <https://www.regulations.gov>.

Dated: December 18, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–5717]

Cardiovascular and Renal Drugs Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments—Supplemental New Drug Application 218276 S–004 for FABHALTA (iptacopan) Oral Capsules in the Treatment of Adults With C3G

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; establishment of a public docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming public advisory committee meeting of the Cardiovascular and Renal Drugs Advisory Committee (the Committee). The general function of the Committee is to provide advice and recommendations to FDA on regulatory issues. The meeting will be open to the public. FDA is establishing a docket for public comment on this document.

DATES: The meeting will be held on February 24, 2025, from 9 a.m. to 5 p.m. Eastern Time.

ADDRESSES: FDA White Oak Campus, 10903 New Hampshire Ave., Bldg. 31

Conference Center, the Great Room (Rm. 1503), Silver Spring, MD 20993–0002. The public will also have the option to participate, and the advisory committee meeting will be heard, viewed, captioned, and recorded through an online teleconferencing and/or video conferencing platform.

Answers to commonly asked questions about FDA advisory committee meetings, including information regarding special accommodations due to a disability, visitor parking, and transportation, may be accessed at: <https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm>.

FDA is establishing a docket for public comment on this meeting. The docket number is FDA–2024–N–5717. The docket will close on February 21, 2025. Please note that late, untimely filed comments will not be considered. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of February 21, 2025. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Comments received on or before February 7, 2025, will be provided to the Committee. Comments received after that date will be taken into consideration by FDA. In the event that the meeting is cancelled, FDA will continue to evaluate any relevant applications or information, and consider any comments submitted to the docket, as appropriate.

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA–2024–N–5717 for “Cardiovascular and Renal Drugs Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments—Supplemental New Drug Application (sNDA) 218276 S–004 for FABHALTA (iptacopan) Oral Capsules in the Treatment of Adults with C3G.” Received comments, those filed in a timely manner (see ADDRESSES), will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” FDA will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify the information as “confidential.” Any information marked

as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Jessica Seo, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993-0002, 301-796-7699, email: CRDAC@fda.hhs.gov, or FDA Advisory Committee Information Line, 1-800-741-8138 (301-443-0572 in the Washington, DC area). A notice in the **Federal Register** about last-minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check FDA’s website at <https://www.fda.gov/AdvisoryCommittees/default.htm> and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before the meeting.

SUPPLEMENTARY INFORMATION: Agenda: The meeting presentations will be heard, viewed, captioned, and recorded through an online teleconferencing and/or video conferencing platform. The Committee will discuss supplemental new drug application (sNDA) 218276 S-004, for FABHALTA (iptacopan) oral capsules, submitted by Novartis Pharmaceuticals Corporation, for the treatment of adults with complement 3 glomerulopathy (C3G).

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will be made publicly available on FDA’s website at the time of the advisory committee meeting. Background material and the link to the online teleconference and/or video conference meeting will be available at the location of the advisory committee meeting and

at <https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee meeting link. The online presentation of materials will include slide presentations with audio and video components to allow the presentation of materials in a manner that most closely resembles an in-person advisory committee meeting.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the Committee. All electronic and written submissions to the Docket (see **ADDRESSES**) on or before February 7, 2025, will be provided to the Committee. Oral presentations from the public will be scheduled between approximately 1:15 p.m. and 2:15 p.m. Eastern Time. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, whether they would like to present online or in-person, and an indication of the approximate time requested to make their presentation on or before January 30, 2025. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. Similarly, room for interested persons to participate in-person may be limited. If the number of registrants requesting to speak in-person during the open public hearing is greater than can be reasonably accommodated in the venue for the in-person portion of the advisory committee meeting, FDA may conduct a lottery to determine the speakers who will be invited to participate in-person. The contact person will notify interested persons regarding their request to speak by January 31, 2025. Persons attending FDA’s advisory committee meetings are advised that FDA is not responsible for providing access to electrical outlets.

For press inquiries, please contact the Office of Media Affairs at fdaoma@fda.hhs.gov or 301-796-4540.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Jessica Seo (see **FOR FURTHER INFORMATION CONTACT**)

at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our website at <https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm> for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. 1001 *et seq.*). This meeting notice also serves as notice that, pursuant to 21 CFR 10.19, the requirements in 21 CFR 14.22(b), (f), and (g) relating to the location of advisory committee meetings are hereby waived to allow for this meeting to take place using an online meeting platform in conjunction with the physical meeting room (see location). This waiver is in the interest of allowing greater transparency and opportunities for public participation, in addition to convenience for advisory committee members, speakers, and guest speakers. The conditions for issuance of a waiver under 21 CFR 10.19 are met.

Dated: December 20, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2024-D-5601]

E6(R3) Good Clinical Practice: Annex 2; International Council for Harmonisation; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled “E6(R3) Good Clinical Practice: Annex 2.” The draft guidance was prepared under the auspices of the International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH). The draft guidance is the second annex to “E6(R3) Good Clinical Practice” published June of 2023. This annex provides additional considerations for the application of good clinical practices to a variety of trial designs and data sources.

Specifically, this draft guidance discusses trials with decentralized and pragmatic elements and real-world data sources. This draft guidance highlights the importance of quality by design and focusing efforts and resources on critical aspects of the trials that might impact the safety of participants and the reliability of results. The draft guidance is intended to encourage innovation in trial design and provides flexible, modern, and clear good clinical practices for conducting trials, while avoiding unnecessary complexities.

DATES: Submit either electronic or written comments on the draft guidance by February 28, 2025 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked, and

identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2024-D-5601 for "E6(R3) Good Clinical Practice: Annex 2." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions**—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building,

4th Floor, Silver Spring, MD 20993-0002, or the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. The guidance may also be obtained by calling CBER at 1-800-835-4709 or 240-402-8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT:

Regarding the guidance: Amy Chi, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6334, Silver Spring, MD 20993-0002, amy.chi@fda.hhs.gov; or James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993-0002, 240-402-7911.

Regarding the ICH: Jill Adleberg, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6364, Silver Spring, MD 20993-0002, 301-796-5259, Jill.Adleberg@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled "E6(R3) Good Clinical Practice: Annex 2." The draft guidance was prepared under the auspices of ICH. ICH seeks to achieve greater regulatory harmonization worldwide to ensure that safe, effective, and high-quality medicines are developed, registered, and maintained in the most resource-efficient manner.

By harmonizing the regulatory requirements in regions around the world, ICH guidelines enhance global drug development, improve manufacturing standards, and increase the availability of medications. For example, ICH guidelines have substantially reduced duplicative clinical studies, prevented unnecessary animal studies, standardized the reporting of important safety information, and standardized marketing application submissions.

The six Founding Members of the ICH are FDA; the Pharmaceutical Research and Manufacturers of America; the European Commission; the European Federation of Pharmaceutical Industries Associations; the Japanese Ministry of

Health, Labour, and Welfare; and the Japanese Pharmaceutical Manufacturers Association. The Standing Members of the ICH Association include Health Canada and Swissmedic. ICH membership continues to expand to include other regulatory authorities and industry associations from around the world (refer to <https://www.ich.org>).

ICH works by engaging global regulatory and industry experts in a detailed, science-based, and consensus-driven process that results in the development of ICH guidelines. The regulators around the world are committed to consistently adopting these consensus-based guidelines, realizing the benefits for patients and for industry.

As a Founding Regulatory Member of ICH, FDA plays a major role in the development of each of the ICH guidelines, which FDA then adopts and issues as guidance for industry. FDA's guidance documents do not establish legally enforceable responsibilities. Instead, they describe the Agency's current thinking on a topic and should be viewed only as recommendations, unless specific regulatory or statutory requirements are cited.

In November 2024, the ICH Assembly endorsed the draft guideline entitled "E6(R3) Good Clinical Practice: Annex 2" and agreed that the guideline should be made available for public comment. The draft guideline is the product of the Efficacy Expert Working Group of the ICH. FDA and the Efficacy Expert Working Group will consider comments on this draft.

The draft guidance provides guidance on good clinical practices for trial design and conduct, with a focus on trials with decentralized and pragmatic elements as well as trials that utilize real-world data. Since the original E6 guidance was published in 1996, clinical trials have evolved significantly with new designs and technological innovations. Annex 2 provides additional considerations to the previously published draft guidance entitled "E6(R3) Good Clinical Practice (GCP)," which includes a Principles document and Annex 1. This draft guidance, entitled "E6(R3) Good Clinical Practice: Annex 2," is intended to be read and implemented with E6(R3) Principles and Annex 1.

This draft guidance has been left in the original ICH format. The final guidance will be reformatted and edited to conform with FDA's good guidance practices regulation (21 CFR 10.115) and style before publication. The draft guidance, when finalized, will represent the current thinking of FDA on "E6(R3) Good Clinical Practice: Annex 2." It

does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3502). The collections of information in 21 CFR part 312.145 pertaining to good clinical practices have been approved under OMB control number 0910–0014. The collections of information in 21 CFR parts 50 and 56 pertaining to protection of human subjects, institutional review boards, and informed consent have been approved under OMB control number 0910–0130. The collections of information in 21 CFR part 11 pertaining to electronic records and electronic signatures have been approved under OMB control number 0910–0303.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at <https://www.regulations.gov>, <https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs>, <https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances>, or <https://www.fda.gov/regulatory-information/search-fda-guidance-documents>.

Dated: December 20, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–5702]

Transfer of Regulatory Responsibility From the Center for Devices and Radiological Health to the Center for Biologics Evaluation and Research; Medical Maggots and Medicinal Leeches

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; announcement of transfer.

SUMMARY: The Food and Drug Administration (FDA) is announcing the transfer of regulatory responsibility for medical maggots and medicinal leeches to the Center for Biologics Evaluation and Research (CBER). These products are currently regulated by the Center for Devices and Radiological Health (CDRH). FDA is transferring regulatory responsibility of these products to CBER because these products are living organisms that more closely align with products regulated by CBER. This action affects only Center assignment and does not change requirements applicable to these products.

DATES: FDA is transferring regulatory responsibility to CBER on December 30, 2024.

FOR FURTHER INFORMATION CONTACT:

Annette Marthaler, Office of Combination Products, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 32, Silver Spring, MD 20993, 301–796–8930, annette.marthaler@fda.hhs.gov or combination@fda.gov.

SUPPLEMENTARY INFORMATION: FDA is announcing the transfer of regulatory responsibility for medical maggots (*Phaenicia sericacta* (blow fly) larvae) and medicinal leeches (*Hirudo medicinalis*) from CDRH to CBER.

Medical maggots (including maggots and larvae) (product code NQK) (also referred to as maggot therapy) are harvested and provided disinfected for use in debriding non-healing necrotic skin and soft tissue wounds, including pressure ulcers, venous stasis ulcers, neuropathic foot ulcers, and non-healing traumatic or post-surgical wounds. Medicinal leeches (product code NRN) belong to the *Annelida* worm classification. The animal is a bloodsucking aquatic animal living in fresh water indicated as an adjunct to graft tissue healing when problems of venous congestion may delay healing, or to overcome the problem of venous congestion by creating prolonged localized bleeding.

FDA is transferring the regulatory responsibility for medical maggots and medicinal leeches to CBER so that these products are regulated by the same Center that regulates other living organisms for human use. The transfer will help ensure the consistent and effective regulation of products that are living organisms for human use. This transfer affects only Center assignment and does not change requirements applicable to these products.

For the transferred products, submissions, communications, and required reports should be directed to CBER after December 30, 2024. CDRH will continue to handle submissions

received (including those under review or on hold) until the publication date of this **Federal Register** document for transferred products and, if applicable, until a final decision on the submission is reached. For questions on any submissions with CDRH, please contact CDRH Product Jurisdiction at CDRHProductJurisdiction@fda.hhs.gov. For questions on submissions to CBER, please contact CBERProductJurisdiction@fda.hhs.gov.

Dated: December 20, 2024.

P. Ritu Nalubola,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2024–N–3248]

Fosun Pharma USA Inc., et al.; Withdrawal of Approval of 23 Abbreviated New Drug Applications; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice that appeared in the **Federal Register** on July 29, 2024. The document announced the withdrawal of approval of 23 abbreviated new drug applications (ANDAs) from multiple applicants, withdrawn as of August 28, 2024. The document indicated that FDA was withdrawing approval of the ANDAs 073462 for tolmetin sodium capsules, equivalent to (EQ) 400 milligrams (mg) base; 073588 for tolmetin sodium tablets, EQ 200 mg base; 074002 for tolmetin sodium tablets, EQ 600 mg base; 077040 for citalopram hydrobromide tablets, EQ 10 mg base, EQ 20 mg base; EQ 40 mg base; 085787 for trifluoperazine hydrochloride (HCl) concentrate, EQ 10 mg base/milliliters (mL); 086808 for cyproheptadine HCl tablets, 4 mg; 087774 for phenylbutazone capsules, 100 mg; and 088602 for pseudoephedrine HCl; triprolidine HCl tablets, 60 mg/2.5 mg, held by Fosun Pharma USA Inc., 104 Carnegie Center, Suite 204, Princeton, NJ 08540. Additionally, ANDAs 075631 for ketorolac tromethamine injectable, 15 mg/mL and 30 mg/mL; 076427 for milrinone lactate injectable, EQ 1 mg base/mL; 076791 for haloperidol lactate injectable, EQ 5 mg base/mL; 076828

haloperidol lactate injectable, EQ 5 mg base/mL; 077947 for fluconazole injectable, 200 mg/100 mL (2 mg/mL) and 400 mg/200 mL (2 mg/mL); 078197 for granisetron HCl injectable, EQ 0.1 mg base/mL (EQ 0.1 mg base/mL); 091436 for levofloxacin injectable, EQ 500 mg/20 mL (EQ 25 mg/mL); 207101 for sumatriptan succinate injectable, EQ 6 mg base/0.5 mL (EQ 12 mg base/mL); and 215065 for methocarbamol solution, 1 gram/10 mL (100 mg/mL), held by Baxter Healthcare Corp., One Baxter Parkway, Deerfield, IL 60015; and the ANDAs 090367 for levofloxacin tablets, 250 mg, 500 mg, 750 mg; and 211959 for clobazam tablets, 10 mg and 20 mg, held by Celltrion USA, Inc., U.S. Agent for Celltrion, Inc., One Evertrust Plaza, Suite 1207, Jersey City, NJ 07302; and the ANDA 212053 for chlorzoxazone tablet, 375 mg and 750 mg, held by i3 Pharmaceuticals LLC, 200 Park Ave., Warminster, PA 18974. Before FDA withdrew the approval of these ANDAs, Fosun Pharma USA Inc.; Baxter Healthcare Corp.; Celltrion USA, Inc., U.S. Agent for Celltrion, Inc.; and i3 Pharmaceuticals LLC, 200 Park Ave., Warminster, PA 18974, informed FDA that they did not want the approval of the ANDAs withdrawn. Because Fosun Pharma USA Inc.; Baxter Healthcare Corp.; Celltrion USA, Inc., U.S. Agent for Celltrion, Inc.; and i3 Pharmaceuticals, LLC, timely requested that approval of their respective ANDAs not be withdrawn, the approvals are still in effect. This notice corrects these errors.

FOR FURTHER INFORMATION CONTACT: Martha Nguyen, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 75, Rm. 1676, Silver Spring, MD 20993–0002, 301–796–3471, Martha.Nguyen@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of Monday, July 29, 2024 (89 FR 60902), appearing on page 60902 in FR Doc. 2024–16627, the following correction is made:

On page 60902, in the table, the entries for ANDA 073462, ANDA 073588, ANDA 074002, ANDA 075631, ANDA 076427, ANDA 076791, ANDA 076828, ANDA 077040, ANDA 077947, ANDA 078197, ANDA 085787, ANDA 086808, ANDA 087774, ANDA 088602, ANDA 090367, ANDA 091436 ANDA 207101, ANDA 211959, ANDA 212053, and ANDA 215065 are removed.

Dated: December 20, 2024.

P. Ritu Nalubola,

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Update to the Health Resources and Services Administration-Supported Women's Preventive Services Guidelines

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: The Health Resources and Services Administration (HRSA) published a **Federal Register** Notice on October 22, 2024, with proposed updates to the HRSA-supported Women's Preventive Services Guidelines (Guidelines). The proposed updates specifically relate to recommendations for Screening and Counseling for Intimate Partner and Domestic Violence, Breast Cancer Screening for Women at Average Risk, and Patient Navigation Services for Breast and Cervical Cancer Screening. Recommendations to update the Guidelines are developed by the Women's Preventive Services Initiative (WPSI) for consideration by HRSA. WPSI convenes expert health professionals to conduct rigorous reviews of the evidence following the National Academy of Medicine standards for establishing foundations for and rating strengths of recommendations, articulation of recommendations, and external reviews and it develops draft recommendations for HRSA's consideration. After consideration of public comment, HRSA has accepted the recommendations as revised and detailed in this notice. Under applicable law, non-grandfathered group health plans and health insurance issuers offering non-grandfathered group and individual health insurance coverage must include coverage, without cost sharing, for certain preventive services, including those provided for in the HRSA-supported Guidelines. The Departments of Labor, Health and Human Services, and the Treasury have previously issued regulations describing how group health plans and health insurance issuers apply the coverage requirements. Please see <https://www.hrsa.gov/womens-guidelines> for additional information.

FOR FURTHER INFORMATION CONTACT: Kimberly Sherman, HRSA, Maternal and Child Health Bureau, telephone: (301) 443–2170, email: wellwomancare@hrsa.gov.

SUPPLEMENTARY INFORMATION: Under the Patient Protection and Affordable Care Act, Public Law 111–148, the preventive care and screenings set forth in the HRSA-supported Women’s Preventive Services Guidelines (Guidelines) are required to be covered without cost-sharing by certain group health plans and health insurance issuers. HRSA established the Guidelines in 2011 based on expert recommendations by the Institute of Medicine, now known as the National Academy of Medicine, developed under a contract with the Department of Health and Human Services. Since 2016, HRSA has funded cooperative agreements with the American College of Obstetricians and Gynecologists for the Women’s Preventive Services Initiative (WPSI) to convene a coalition representing clinicians, academics, and consumer-focused health professional organizations to conduct a rigorous review of current scientific evidence, solicit and consider public input, and make recommendations to HRSA regarding updates to the Guidelines to improve adult women’s health across the lifespan. HRSA then determines whether to support, in whole or in part, the recommended updates to the Guidelines.

WPSI includes an Advisory Panel and two expert committees, the Multidisciplinary Steering Committee and the Dissemination and Implementation Steering Committee, which are comprised of a broad coalition of experts in disease prevention and women’s health issues. With oversight by the Advisory Panel, and with input from the Multidisciplinary Steering Committee, WPSI examines the evidence to develop new (and update existing) recommendations for women’s preventive services. WPSI’s Dissemination and Implementation Steering Committee takes HRSA-approved recommendations and disseminates them through the development of implementation tools and resources for both patients and practitioners.

For clarity, note that the Implementation Considerations of the WPSI documents address aspects of clinical and practical application of the Clinical Recommendations. Research Recommendations are provided to highlight areas where further research and clinical trials are needed to inform the development of Clinical Recommendations. The Implementation Considerations and Research Recommendations sections are not a part of the Clinical Recommendations accepted by the HRSA Administrator,

and therefore have no impact on health insurance coverage without cost-sharing.
