WPSI bases its recommended updates to the Guidelines on review and synthesis of existing clinical guidelines and new scientific evidence, following the National Academy of Medicine standards for establishing foundations for and rating strengths of recommendations, articulation of recommendations, and external reviews. Additionally, HRSA requires that WPSI incorporate processes to assure opportunity for public comment, including participation by patients and consumers, in the development of the updated Guidelines.

Discussion of Recommended Updated Guidelines

As is standard practice, HRSA published a **Federal Register** Notice seeking public comment regarding the proposed updates to the Guidelines (89 FR 84354).¹ WPSI considered all public comments as part of its deliberative process, provided the comments to HRSA for its consideration, and submitted final recommended updates for Screening and Counseling for Intimate Partner and Domestic Violence, Breast Cancer Screening for Women at Average Risk, and Patient Navigation Services for Breast and Cervical Cancer Screening. A total of 28 comments were received and considered.

Screening and Counseling for Intimate Partner and Domestic Violence

WPSI largely recommended retaining the existing Guideline on Screening and Counseling for Intimate Partner and Domestic Violence with several minor updates. The first proposed change was a revision to the title of the Guideline, with corresponding revisions throughout, to better reflect current clinical terminology by replacing “Interpersonal and Domestic Violence” with “Intimate Partner and Domestic Violence.” WPSI also recommended adding the word “adult” prior to “women” in the recommendation, to clarify that both adolescent and adult women are included in the screening and counseling guidance. The words “referral to” were removed from the last sentence to improve clarity.

WPSI received eight comments on these proposed updates. One commenter suggested adding universal education as a mechanism to address intimate partner violence in health care settings. Based on this comment, WPSI

added universal education to the Implementation Considerations section for the recommendation. Another comment recommended an expansion of research into intimate partner violence, which WPSI added to the Research Recommendations. Another commenter suggested adding referral and consult to a forensic medical examiner to the recommendation, which was not accepted as it was not represented in the evidence review for this topic. Several commenters supported WPSI’s recommendations and one suggested the development of continuous care frameworks for follow-up services and the use of telehealth in support of those services. These comments were not accepted as they are already included in the implementation considerations of the recommendation or are beyond the scope of the review, which did not include the development of a continuous care frameworks. One comment suggested alignment with the U.S. Preventive Services Task Force (USPSTF), which describes specific populations, including vulnerable patients, and another suggested specifying the inclusion of “older adult women.” These comments were not accepted, as WPSI’s evidence review and recommendation supports screening of all women, not just certain vulnerable populations or age groups.

Breast Cancer Screening for Women at Average Risk

WPSI recommended several updates to the existing Guideline on Breast Cancer Screening for Women at Average Risk. WPSI recommended updates to the first sentence of this Guideline, replacing the phrase “average-risk women” with “women at average risk for breast cancer” to clarify the target population for this recommendation and to use person-first language that puts the individual before the diagnosis or screening modality. The title was also changed from “Breast Cancer Screening for Average-Risk Women” to “Breast Cancer Screening for Women at Average Risk” for similar reasons. Two new sentences were added following the first sentence: “Women may require additional imaging to complete the screening process or to address findings on the initial screening mammography. If additional imaging (e.g., MRI, ultrasound, mammography) and pathology exams are indicated, those services are also recommended to complete the screening process for malignancies.” These two sentences were added to ensure women who need additional screening to complete their initial screening receive it. Imaging in addition to initial screening

¹ See <https://www.federalregister.gov/documents/2024/10/22/2024-24445/notice-of-request-for-public-comments-on-draft-recommendations-for-the-hrsa-supported-womens>.

mammography, such as special mammography views, ultrasound, or MRI, may be needed in individual clinical situations when clinicians require an enhanced view of breast tissue to differentiate normal from abnormal findings. A tissue biopsy may also need to be performed to determine whether abnormal findings are cancer, normal tissue, or other type of lesion. WPSI also recommended removing the following sentence from the existing Guideline, “These screening recommendations are for women at average risk of breast cancer” as this information is now included in the revised first sentence of the updated Guideline.

WPSI received thirteen comments on this proposed update. One comment requested a definition for “women at average risk,” which is provided in the full evidence review and will be restated on WPSI’s website, as the 2016 evidence review defined “women at average risk” as those without risk factors indicating high risk (includes deleterious BRCA mutations and their untested first-degree relatives; other hereditary genetic syndromes; previously diagnosed high-risk breast lesions; and history of high dose radiation therapy to the chest between the ages of 10 to 30 years). Two commenters requested screening for women under age 40. No change was made as WPSI did not document new evidence changes in its review. Others requested screening for women of increased risk. No change was made in response to these comments as this specific guideline relates to women at average risk of breast cancer. Another comment requested edits to the recommendation related to racial disparities and gender inclusivity WPSI made no changes given that the proposed recommendation is intended to address all women at average risk. Three commenters requested that the recommendation address “annual screening” and one commenter opposed ending screening at age 74. No changes were made based on these comments as they were not supported by evidence that met WPSI’s inclusion criteria. One commenter suggested that the recommendation would be clearer if the phrase “pathology exams” was changed to “pathology tests.” In response to this comment, WPSI updated the recommendation to “pathology evaluation” to improve clarity. Multiple commenters requested language to address dense breast tissue, and one recommended using digital mammography for women with dense breast tissue. While there are currently

no randomized controlled trials to support separate recommendations for women with dense breasts, the updated clinical recommendation supports additional testing to complete initial screening, if needed, which may be more common for women with dense breasts. No changes were made in response to these comments. One comment recommended WPSI align with the U.S. Preventive Services Task Force (USPSTF) recommendations on breast cancer screening. No changes were made in response to this comment as WPSI’s charge differs from that of the USPSTF, with WPSI’s statutory authority including coverage of additional preventive care and screenings not described in evidence-based items or services that have a rating of “A” or “B” in the current recommendations of the USPSTF.

Patient Navigation Services for Breast and Cervical Cancer Screening

Based on clinical research, patient navigation services for breast and cervical cancer screening have been found to be effective in reducing barriers to screening and follow-up care, resulting in higher screening rates. WPSI recommended a new Guideline on Patient Navigation Services for Breast and Cervical Cancer Screening. Breast cancer screening rates were 14.1% higher for 35,752 patients randomized to patient navigation services versus usual care or active controls in a WPSI meta-analysis of 33 randomized control trials based in U.S. health care settings. The same meta-analysis showed rates for cervical cancer screening and follow-up were higher with patient navigation by 15.7%, based on 22 randomized control trials with 12,221 participants. In one study included in WPSI’s meta-analysis, prevention care managers working in federally qualified health centers (FQHCs) who employed patient navigation services increased breast cancer screening among patients without a mammogram in the past 18 months to 68% compared to 57% for patients in usual care.

Research also shows that reducing barriers to screening and follow-up care can result in earlier identification of breast and cervical cancer, enabling patients to enter into treatment earlier, preventing progression of these conditions, improving health outcomes and survival rates, and ultimately can reduce disparities in cancer morbidity and mortality. In the meta-analysis, patient navigation services increased screening and follow-up for breast cancer by 10.2% in populations described as low-income.

WPSI received seven comments on this proposed recommendation. Comments were generally supportive and WPSI appreciated the positive feedback. Two commenters recommended adding culturally appropriate components to patient navigation services and addressing relevant social determinants of health. No changes were made based on these comments as these considerations are outlined in the Implementation Considerations section. Three commenters requested including billing and coding guidance to support the implementation of the recommendation. One comment suggested it may be premature to release the guideline without such information. Under its cooperative agreement with HRSA, WPSI develops tools and resources for patients and providers that include information on billing and coding, which will be updated to address these patient navigation services. Another comment requested WPSI expand the Research Recommendations to include comparative effectiveness trials of patient navigation services. WPSI updated the Research Recommendations to include this suggestion. Two commenters questioned the level of evidence available to support the guideline and one of them requested the evidence review. The October 22, 2024, **Federal Register** notice provided data from the WPSI evidence review to detail the clinical effect of the proposed recommendation and the final evidence review includes a comprehensive listing of the clinical evidence considered by WPSI. A final comment requested cervical cancer screening guidelines be updated. WPSI will begin reviewing the evidence for cervical cancer screening in 2025, if funds are available to support the review.

Acceptance of Recommendation

On December 20, 2024, the HRSA Administrator accepted WPSI’s recommendations, which are revised as described above, and, as such, updated the HRSA-supported Women’s Preventive Services Guidelines. The final Guidelines for these topics read as follows:

(1) Screening and Counseling for Intimate Partner and Domestic Violence

The final Guideline for Screening and Counseling for Intimate Partner and Domestic Violence reads: “The Women’s Preventive Services Initiative recommends screening adolescent and adult women for intimate partner and domestic violence, at least annually, and, when needed, providing or referring to intervention services.

Intimate partner and domestic violence includes physical violence, sexual violence, stalking and psychological aggression (including coercion), reproductive coercion, neglect, and the threat of violence, abuse, or both. Intervention services include, but are not limited to, counseling, education, harm reduction strategies, and appropriate supportive services.”

(2) Breast Cancer Screening for Women at Average Risk

The final Guideline for Breast Cancer Screening for Women at Average Risk reads: “The Women’s Preventive Services Initiative recommends that women at average risk of breast cancer initiate mammography screening no earlier than age 40 years and no later than age 50 years. Screening mammography should occur at least biennially and as frequently as annually. Women may require additional imaging to complete the screening process or to address findings on the initial screening mammography. If additional imaging (e.g., magnetic resonance imaging (MRI), ultrasound, mammography) and pathology evaluation are indicated, these services also are recommended to complete the screening process for malignancies. Screening should continue through at least age 74 years, and age alone should not be the basis for discontinuing screening.

Women at increased risk also should undergo periodic mammography screening, however, recommendations for additional services are beyond the scope of this recommendation.”

(3) Patient Navigation Services for Breast and Cervical Cancer Screening

The final Guideline for Patient Navigation Services for Breast and Cervical Cancer Screening reads: “The Women’s Preventive Services Initiative recommends patient navigation services for breast and cervical cancer screening and follow-up, as relevant, to increase utilization of screening recommendations based on an assessment of the patient’s needs for navigation services. Patient navigation services involve person-to-person (e.g., in-person, virtual, hybrid models) contact with the patient. Components of patient navigation services should be individualized. Services include, but are not limited to, person-centered assessment and planning, health care access and health system navigation, referrals to appropriate support services (e.g., language translation, transportation, and social services), and patient education.”

Non-grandfathered group health plans and health insurance issuers offering group or individual health insurance coverage must cover without cost-sharing the services and screenings listed on the updated Women’s Preventive Services Guidelines for plan years (in the individual market, policy years) that begin 1 year after this date. Thus, for most plans, this update will take effect for purposes of the Section 2713 coverage requirement in 2026. Additional information regarding the Women’s Preventive Services Guidelines can be accessed at the following link: <https://www.hrsa.gov/womens-guidelines>.

Authority: Section 2713(a)(4) of the Public Health Service Act, 42 U.S.C. 300gg–13(a)(4).

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Children’s Hospitals Graduate Medical Education Payment Program: Updated Methodology To Determine Full-Time Equivalent Resident Count

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Request for public comment.

SUMMARY: This notice seeks public comment on updating the Children’s Hospitals Graduate Medical Education (CHGME) Payment Program’s method of determining an eligible children’s hospital (as defined within the Public Health Service Act) weighted allopathic and osteopathic full-time equivalent (FTE) resident count when a children’s hospital’s weighted allopathic and osteopathic FTE resident count exceeds its direct graduate medical education (GME) FTE resident cap in order to be consistent with the methodology used by the Centers for Medicare & Medicaid Services (CMS) beginning in the fiscal year (FY) 2026 application cycle.

DATES: Comments on this notice should be received no later than January 29, 2025.

ADDRESSES: Written comments should be submitted to Robyn Duarte, Public Health Analyst, by email RDuarte1@hrsa.gov.

FOR FURTHER INFORMATION CONTACT: Robyn Duarte, Public Health Analyst,

Bureau of Health Workforce, Division of Medicine and Dentistry, HRSA, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3254.

SUPPLEMENTARY INFORMATION: The CHGME Payment Program is authorized by section 340E of the Public Health Service Act. For direct GME payments, section 340E(c)(1)(B) requires that the average number of FTE residents in the hospital’s approved residency programs be determined according to section 1886(h)(4) of the Social Security Act. As noticed in the March 1, 2001, **Federal Register** (66 FR 12940), section 1886(h)(4) has been implemented by regulations at 42 CFR 413.78 through 413.83 (formerly 42 CFR 413.86(f)–(i)), which HRSA has used to determine the total and weighted numbers of FTE residents. In the CMS FY 2023 inpatient prospective payment systems (IPPS) and long-term care hospital prospective payment system (LTCH PPS) final rule published in the **Federal Register** on August 10, 2022 (87 FR 48780, 49065–49072) (referred to as the “FY 2023 IPPS/LTCH PPS final rule”), CMS modified the Medicare direct GME payment methodology and amended section 413.79 by revising paragraphs (c)(2)(iii) and (d)(3). Through this notice, HRSA is seeking comment on its intent to adopt the same direct GME payment methodology as CMS when HRSA calculates FTE residents for the CHGME Payment Program beginning in the FY 2026 application cycle.

Background

To the extent feasible, HRSA has historically sought consistency with CMS regulations to minimize burden for children’s teaching hospitals participating in the CHGME Payment Program that must also comply with CMS regulations. Consistency reduces the potential challenges in reporting FTE resident counts to Medicare and CHGME.

Currently, the CHGME Payment Program methodology for determining the weighted allopathic and osteopathic FTE resident count applies the direct GME FTE resident cap when a hospital’s weighted allopathic and osteopathic FTE resident count is greater than its direct GME FTE resident cap. The current CHGME direct GME methodology reduces a hospital’s weighted direct GME resident count by a proportion equal to the ratio of its GME FTE resident cap to its unweighted direct GME resident count. The direct GME FTE resident cap is applied to reduce the weighting factor of residents who are beyond their initial residency

period to an amount less than 0.5. See 66 FR 12940.

CMS GME Final Regulation Change

In August 2022, CMS finalized a new methodology for applying the direct GME FTE resident cap when a hospital's weighted allopathic and osteopathic FTE resident count is greater than its direct GME FTE resident cap, in a way that does not reduce the weighting factor of residents that are beyond their initial residency period to an amount less than 0.5. Under the new method, if a hospital's unweighted allopathic and osteopathic FTE resident count exceeds its direct GME FTE resident cap, then the weighted allopathic and osteopathic FTE resident count is equal to the hospital's direct GME FTE resident cap or its actual weighted allopathic and osteopathic FTE resident count, whichever is lesser. The direct GME FTE resident cap reflects the maximum number of allopathic and osteopathic residents that a hospital may count for purposes of direct GME payment in a cost reporting period.

Alignment of CHGME and Medicare GME Policy

For more than two decades, HRSA has followed CMS's approach to calculating the FTE resident count. [See March 1, 2001, **Federal Register Notice** (66 FRN 12940), "*The Department follows Medicare rules regarding the use of the initial residency period. The Medicare rules reduce counts for all hospitals that train residents beyond their initial residency period (i.e., fellows) with regard to the [direct medical education] DME and [indirect Medical Education] IME portions of the GME reimbursement.*"] Therefore, HRSA proposes to adopt CMS's modified direct GME payment methodology with respect to determining the weighted number of allopathic and osteopathic FTE residents (i.e., fellows) for all eligible children's hospitals participating in the CHGME Payment Program beginning in FY 2026.

In this notice, we refer to the FTE adjusted cap (or 2013 CHGME Reauthorization cap pursuant to Pub. L. 113–98) reported on Line 4.06, 5.06, and 6.06 of the HRSA 99–1 Form as the "direct GME FTE resident cap" to correspond with CMS terminology.

HRSA proposes to modify its methodology to adopt the CMS methodology described in the amended 42 CFR 413.79 in whole. HRSA anticipates implementing the updated methodology for determining the weighted allopathic and osteopathic FTE resident count starting in the FY 2026 application cycle (project period

October 1, 2025, through September 30, 2026).

Direct GME Methodology in FY 2026—Proposal for Public Comment

Starting in FY 2026, where a CHGME participating hospital's unweighted allopathic and osteopathic FTE resident count exceeds the hospital's FTE resident cap, and the weighted allopathic and osteopathic FTE resident count also exceeds that FTE resident cap, the respective weighted allopathic and osteopathic FTE resident count is adjusted to make the total weighted allopathic and osteopathic FTE resident count equal the FTE resident cap. If the weighted allopathic and osteopathic FTE resident count does not exceed that FTE resident cap, then the allowable weighted allopathic and osteopathic FTE resident count for direct GME payment is the actual weighted allopathic and osteopathic FTE resident count.

This proposed update to the methodology for determining the weighted allopathic and osteopathic FTE resident count for the CHGME Program is intended to reconcile weighted FTE resident counts reported in Lines 4.13 (both Hospital Data columns), 5.13, and 6.13 of the HRSA Form 99–1 with Lines 9 and 22 of the CMS Form 2552–10, Worksheet E–4, respectively. Entries in Lines 4.13 (both Hospital Data columns), 5.13, and 6.13 report the weighted resident FTE count for allopathic and osteopathic programs following application of the direct GME FTE resident cap.

This updated methodology for determining weighted allopathic and osteopathic FTE resident count may result in adjustments to the weighted FTE resident 3-year rolling average used to determine direct medical education (DME) payment amounts for the eligible children's hospitals participating in the CHGME Payment Program.

The DME payment amounts for CHGME are impacted by many factors including the number of residents the hospital trained during the year, the hospital's wage index, as well as the overall appropriation. The updated methodology for determining the weighted FTE resident count will impact awardees that add more residents and fellows above their hospital's direct GME FTE resident cap. The updated methodology may also impact the DME payments for awardees overall as a hospital may receive a different relative share of the CHGME appropriation due to these shifts in the weighted FTE resident counts experienced by some hospitals.

The CHGME Payment Program proposes to implement this updated methodology beginning in FY 2026 to reduce burden on hospitals participating in CHGME and Medicare GME and to reduce the risk of potential audit discrepancies that may impact payments.

Diana Espinosa,

Principal Deputy Administrator.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Final Scientific Integrity Policy of the U.S. Department of Health and Human Services

AGENCY: Office of the Assistant Secretary for Planning and Evaluation, Office of the Secretary, HHS.

ACTION: Notice of final policy.

SUMMARY: The Department of Health and Human Services (HHS) is publishing its Scientific Integrity Policy to increase access to and raise awareness of the Policy.

DATES: The effective date of the Policy is October 16, 2024.

FOR FURTHER INFORMATION CONTACT: Karen Wehner, Ph.D., Scientific Integrity Officer, Office of Science and Data Policy, Office of the Assistant Secretary for Planning and Evaluation, Office of the Secretary, HHS at 240–453–8435 or scientificintegrity@hhs.gov.

SUPPLEMENTARY INFORMATION: Scientific integrity plays a vital role in the mission of HHS. Ensuring integrity in science throughout the Department allows HHS to foster and produce high-quality science, communicate effectively with the public, and base critical policy decisions on trustworthy and rigorous scientific findings. HHS has adopted a Department-wide scientific integrity policy to further strengthen scientific integrity and evidence-based policymaking throughout the Department.

The Scientific Integrity Policy of the U.S. Department of Health and Human Services (Policy) was approved on September 16, 2024. The finalized Policy was announced to the HHS community and posted on the HHS scientific integrity website, at <https://www.hhs.gov/programs/research/scientificintegrity/index.html>, on September 30, 2024. The effective date of the Policy is October 16, 2024.

The content of the finalized Policy, reformatted to conform to the requirements of the **Federal Register**, is

provided below. This content is also available in its original format on the HHS website, at <https://www.hhs.gov/sites/default/files/hhs-scientific-integrity-policy.pdf>.

The Scientific Integrity Policy of the U.S. Department of Health and Human Services

Purpose

The purpose of this policy is to promote a continuing culture of scientific integrity at the U.S. Department of Health and Human Services (HHS). This policy aims to ensure the integrity of all aspects of HHS scientific activities, including proposing, conducting, reviewing, managing, and communicating about science and scientific activities, and using the results of science to inform policy and program decision-making.

Core Values That Support Scientific Integrity at HHS

The success of HHS's mission to enhance the health and well-being of all Americans depends on the development and use of accurate, complete, and timely scientific and technical information. Scientific integrity requires that such information be developed under and subjected to well-established scientific processes, free from inappropriate interference that undermines impartiality, nonpartisanship, or professional judgment. HHS agencies work to maximize the quality, accuracy, objectivity, utility, and timeliness of the scientific and technological information they produce, use, and disseminate. In turn, this information enables HHS to employ innovative approaches to effectively address the many public health and human services challenges that our work targets. These efforts allow accurate, complete, and timely scientific and technical information to improve the design, delivery, and impact of HHS policies and programs, and support equity, justice, and trust. Responsibility for upholding scientific integrity lies with the entire scientific ecosystem, including all HHS employees, its contractors and grantees, and those engaged in science and scientific activities outside HHS.

Definition of Scientific Integrity and Scientific Integrity Official

HHS adopts the following Official Federal Definition of Scientific Integrity:

Scientific integrity is the adherence to professional practices, ethical behavior, and the principles of honesty and objectivity when conducting, managing, using the results of, and communicating about science and scientific activities. Inclusivity,

transparency, and protection from inappropriate influence are hallmarks of scientific integrity.¹

HHS designates a senior career employee as the HHS Scientific Integrity Official (HHS SIO)² to oversee implementation and iterative improvement of the HHS Scientific Integrity Policy and related processes. The roles and responsibilities of the HHS SIO are described in more detail on pages 17–18.

This policy empowers the HHS SIO with the independence necessary to gather and protect information to support the review and assessment of scientific integrity concerns and ensure implementation of corrective scientific actions such as policy changes or correction or retraction of published materials. The HHS SIO also advocates for appropriate engagement of scientific leadership in decision making.

Effective Date and Policy Amendments

This policy is effective 30 days after the date of finalization. This policy will be reviewed by HHS one year after its effective date and every two years thereafter. Proposals to amend this policy will be overseen by the HHS SIO, in collaboration with the HHS Scientific Integrity Council described below and communicated to the Director of the White House Office of Science and Technology Policy (OSTP) no later than 30 days after adoption.

Applicability & Scope

Scientific integrity is the responsibility of the entire HHS workforce. Covered individuals who are required to adhere to this policy include all HHS employees, including all Operating and Staff Division (OpDiv/StaffDiv) employees; Public Health Service Commissioned Corps officers; political appointees; HHS fellows, trainees, and interns; and advisory committee members in their capacity as special government employees, when in the course of their official duties they propose, conduct, review, or communicate about science and scientific activities, and all levels of employees who manage or supervise scientific activities and use scientific information in decision making.

HHS is composed of OpDivs/StaffDivs (hereinafter “Division”), some of which have division-specific scientific integrity policies and procedures. The HHS Scientific Integrity Policy applies to all covered individuals, as listed above; Division-specific Scientific Integrity policies apply to covered individuals within that division. Division-specific policies align with and support the HHS-wide policy at a

minimum but may institute additional requirements and responsibilities as appropriate for the mission of the division. In addition to Division-specific policies, Divisions may develop their own scientific integrity procedures (e.g., procedures for resolving differences of scientific opinion) at their discretion.

HHS contractors; partners; permittees; lessees; grantees; extramural trainees and fellows (*i.e.*, those supported by HHS grants to non-HHS organizations); and volunteers who engage or assist in HHS scientific activities are not considered covered individuals but are strongly encouraged to uphold the principles of scientific integrity described in this policy, particularly those described in the Protecting Scientific Processes, Ensuring the Free Flow of Scientific Information, Protections, and Professional Development sections. Specific requirements may be incorporated into the terms of their engagement with HHS. In addition, each institution that applies for or receives Public Health Service (PHS) support for biomedical or behavioral research, research training, or activities related to that research or research training must comply with 42 CFR part 93, PHS Policies on Research Misconduct, overseen by the HHS Office of Research Integrity (ORI), and may need to comply with other applicable laws, regulations, and policies. Research misconduct, which includes fabrication, falsification, and plagiarism, is one way in which scientific integrity can be compromised.

Authorities

Pursuant to the 2021 Presidential Memorandum on Restoring Trust in Government Through Scientific Integrity and Evidence-Based Policymaking,³ and consistent with the 2009 Presidential Memorandum on Scientific Integrity⁴ and the 2010 Memorandum from the White House Office of Science and Technology Policy on Scientific Integrity,⁵ all Federal agencies must establish a scientific integrity policy. The requirements of this policy are derived from the 2022 National Science and Technology Council (NSTC) Report of the Scientific Integrity Fast Track Action Committee (SI-FTAC), Protecting the Integrity of Government Science⁶ (SI-FTAC Report), and align with the 2021 NSTC Framework for Federal Scientific Integrity Policy and Practice.⁷

This policy is established in accordance with:

1. Public Law No 111–358—The America COMPETES Reauthorization Act of 2010, Section 103, as amended.
2. Public Law No 115–435—The Foundations

- for Evidence-based Policymaking Act of 2018.
3. Public Law No 106–554—The Information Quality Act of 2000.
 4. 67 FR 8451—OMB Guidelines for Ensuring and Maximizing the Quality, Objectivity, Utility, and Integrity of Information Disseminated by Federal Agencies.
 5. 70 FR 2664—OMB Final Information Quality Bulletin for Peer Review.
 6. 65 FR 76260–76264—Federal Policy on Research Misconduct.
 7. Pub. L. 101–12—The Whistleblower Protection Act (WPA) of 1989, as amended.
 8. 41 U.S.C. 4712—The National Defense Authorization Act, Enhancement of contractor protection from reprisal for disclosure of certain information.
 9. 5 U.S.C. 13103 *et seq.*—The Ethics in Government Act of 1978, as amended, and 5 CFR part 2635, Standards of Ethical Conduct for Employees of the Executive Branch.
 10. 18 U.S.C. 201–209—Statutes regarding Bribery, Gift, and Conflicts of Interest.
 11. 5 CFR parts 5501 and 5502—Supplemental Standards of Ethical Conduct for Employees of the Department of Health and Human Services.
 12. 5 U.S.C. Ch. 10—The Federal Advisory Committee Act of 1972.
 13. 45 CFR part 73—Standards of Conduct.
 14. 5 CFR part 735—Employee Responsibilities and Conduct.
 15. 45 CFR part 46—HHS Protection of Human Subjects Regulation.
 16. PPD 19—Protecting Whistleblowers with Access to Classified Information, 2012.
 17. M–20–12—OMB Phase 4 Implementation of the Foundations for Evidence-Based Policymaking Act of 2018: Program Evaluation Standards and Practices.
 18. 42 CFR part 93—Public Health Service Policies on Research Misconduct.
 19. 10 U.S.C. 1034, made applicable to the Public Health Service Commissioned Corps through 42 U.S.C. 213a(a)(18), and implemented by Commissioned Corps Directive (CCD) 121.06.
 20. Pub. L. No 117–328—Health Extenders, Improving Access to Medicare, Medicaid, and CHIP, and Strengthening Public Health Act of 2022, Division FF, Title II, Section 2321.
 21. Pub. L. No 117–167—CHIPS and Science Act of 2022, Title VI, Subtitle D, Section 10631.

Exceptions

This policy will be implemented consistent with applicable federal law and Executive Orders.

Definitions

For the purposes of this policy, HHS adopts the following definitions:

Allegation refers to a disclosure of a suspected loss of scientific integrity.

Corrective scientific action refers to actions taken to restore the accuracy of the scientific record after a loss of scientific integrity has been determined, consistent with this policy, such as

correction or retraction of published materials.

Covered individuals who are required to adhere to this policy include all HHS employees; Public Health Service Commissioned Corps officers; political appointees; HHS fellows, trainees, and interns; and advisory committee members in their capacity as special government employees, when in the course of their official duties they propose, conduct, review, or communicate about science and scientific activities, and all levels of employees who manage or supervise scientific activities and use scientific information in decision making.

Decision making refers to the (1) development of policies or making determinations about policy or management; (2) making determinations about expenditures of Federal agency funds; (3) implementing or managing activities that involve, or rely on, scientific activities.

Ethical behavior refers to activities that reflect norms for conduct that distinguish between acceptable and unacceptable behavior, such as honesty, lawfulness, equity, and professionalism, and adherence to statutes, regulations, policies, and guidelines governing employee conduct.

Federal agency refers to an Executive department, a Government corporation, or an independent establishment.

Inclusivity refers to the practice of providing equal access to opportunities for full participation of all people and all groups, including marginalized, underserved, and underrepresented contributors, without bias or prejudice. Full participation is enabled through implementation of strategies that promote equitable access and fair treatment in the organization.

Inappropriate influence refers to the attempt to shape or interfere in scientific activities or the communication about or use of scientific activities, against well-accepted scientific methods and theories and without scientific, legal, or security justification.^{8,9}

Interference refers to inappropriate, scientifically unjustified intervention in the conduct, management, communication, or use of science. It includes censorship, suppression, or distortion of scientific or technological findings, data, information, or conclusions; inhibiting scientific independence during clearance and review; scientifically unjustified intervention in research and data collection; and inappropriate engagement or participation in peer review processes or on Federal advisory committees.

Loss of scientific integrity refers to the failure to comply with this Scientific Integrity Policy or to adhere to objectivity, transparency, and ethical behavior when conducting, managing, using the results of, and communicating about science and scientific activities. This loss may include research misconduct or inappropriate influence in the conduct, communication, management, and use of science.

Policy refers to laws, regulations, procedures, administrative requirements or actions, incentives, or voluntary practices of governments and other institutions.

Political interference is inappropriately shaping or interfering in the conduct, management, communication, or use of science for political advantage or such that it undermines impartiality, nonpartisanship, or professional judgment.

Research integrity refers to the use of honest and verifiable methods in proposing, performing, and evaluating research; reporting research results with particular attention to adherence to rules, regulations, and guidelines; and following commonly accepted professional codes or norms.

Research misconduct refers to fabrication, falsification, or plagiarism in proposing, performing, or reviewing research, or in reporting research results. Research misconduct does not include honest error or differences of opinion.¹⁰

Research security refers to safeguarding the research enterprise against the misappropriation of research and development to the detriment of national or economic security, related violations of research integrity, and foreign government interference.

Retaliation refers to taking or failing to take or threatening to take or fail to take a personnel action with respect to any employee or applicant for employment because of any disclosure of information that the employee or applicant reasonably believes evidences any violation of any law, rule, or regulation or gross mismanagement, a gross waste of funds, an abuse of authority, or a substantial and specific danger to public health or safety if such disclosure is not specifically prohibited by law and if such information is not specifically required by Executive Order to be kept secret in the interest of national defense or the conduct of foreign affairs. An employee or applicant is protected from retaliation for the disclosure of information the employee or applicant reasonably believes is evidence of censorship

related to research, analysis, or technical information.^{11 12}

Science refers to the full spectrum of scientific endeavors, including basic science, applied science, evaluation, engineering, technology, economics, social sciences, and statistics, as well as the scientific and technical information derived from these endeavors.

Scientific activities refer to activities that involve the application of well-accepted scientific methods and theories in a systematic manner, and includes, but is not limited to, data collection, inventorying, monitoring, evaluation, statistical analysis, surveying, observations, experimentation, study, research, integration, economic analysis, forecasting, predictive analytics, modeling, technology development, and scientific assessment, as well as any findings derived from these activities.

Scientific integrity is the adherence to professional practices, ethical behavior, and the principles of honesty and objectivity when conducting, managing, using the results of, and communicating about science and scientific activities. Inclusivity, transparency, and protection from inappropriate influence are hallmarks of scientific integrity.

Scientific record refers to published information resulting from scientific activities. HHS is responsible for ensuring the accuracy of elements of the scientific record that are published by HHS.

Scientist refers to an individual whose responsibilities include collection, generation, use, or evaluation of scientific and technical data, analyses, or products. HHS scientists are HHS employees and other covered individuals who conduct these activities. It does not refer to individuals with scientific and technical training whose primary job functions are in non-scientific roles (e.g., policymakers, communicators).

Policy Requirements

Promoting a Culture of Scientific Integrity

HHS leadership at all levels recognizes, supports, and promotes this policy and its underlying principles, and models behavior consistent with a strong culture of scientific integrity.

HHS works to promote a culture of scientific integrity by creating an empowering environment for innovation and protecting scientists and the process of science from inappropriate interference. Scientific findings and products must not be suppressed, delayed, or altered for political purposes and must not be

subjected to political interference or inappropriate influence.

A strong culture of scientific integrity begins with ensuring a professional environment that is safe, equitable, and inclusive. Issues of diversity, equity, inclusion, and accessibility are an integral component of the entire scientific process. Attention to these issues can improve the representativeness and eminence of the scientific workforce, foster innovation in the conduct and use of science, and provide for more equitable participation in science by diverse communities. The responsible and ethical conduct of research and other scientific activities requires an environment that is equitable, inclusive, safe, and free from harassment, and discrimination.

To instill and enhance a culture of scientific integrity, HHS has posted this policy prominently on its website, at <https://www.hhs.gov/programs/research/scientificintegrity/index.html>, and educates all covered individuals, as well as contractors who perform scientific activities for HHS, on their rights and responsibilities related to scientific integrity. Training will be made available to all covered individuals to make them aware of their responsibilities under the HHS Scientific Integrity Policy upon hiring, and some covered individuals may be required to complete role-specific training or refresher training as appropriate. Training will be tracked to ensure covered entities have received appropriate training.

HHS also works to apply scientific integrity practices in ways that are inclusive of non-traditional modes of science, such as citizen science, community-engaged research, participatory science, and crowdsourcing. This may include expanded scientific integrity practices and expectations, such as granting communities more autonomy over research questions and research design, recognition of data and knowledge sovereignty, and inclusion of multiple forms of evidence, such as Indigenous Knowledge, as applicable.

To promote a culture of scientific integrity at HHS, this policy outlines seven specific areas:

- I. Protecting Scientific Processes
- II. Ensuring the Free Flow of Scientific Information
- III. Supporting Decision Making Processes
- IV. Ensuring Accountability
- V. Protections
- VI. Professional Development for Government Scientists, and
- VII. Federal Advisory Committees

I. Protecting Scientific Processes

Scientific integrity fosters “honest scientific investigation, open discussion, refined understanding, and a firm commitment to evidence” (OSTP 2010). It also enables consideration and documentation of differing scientific opinions. Practices that support scientific integrity may include peer review and open science. Science, and public trust in science, thrives in an environment that prevents political interference and inappropriate influence from impacting scientific data and analyses and their use in decision making.

It is the policy of HHS to:

1. Prohibit political interference or other inappropriate influence in the design, proposal, conduct, review, management, evaluation, communication about, and use of scientific activities and scientific information.
2. Prohibit inappropriate restrictions on resources and capacity that limit and reduce the availability of science and scientific products (e.g., manuscripts for scientific journals, presentations for workshops, conferences, and symposia) outside of normal budgetary or priority-setting processes or without scientific, legal, or security justification.
3. Require that leadership and management ensure that covered individuals engaged in scientific activities can conduct their work objectively, free from political interference or other inappropriate influence, and free from retaliation.
4. Require reasonable efforts by covered individuals to ensure the fidelity of the scientific record and to correct identified inaccuracies that pertain to their contribution to any scientific records.
5. Require that covered individuals represent their contributions to scientific work fairly and accurately and neither accept nor assume unauthorized and/or unwarranted credit for another's accomplishments. To be named as an author, contributors should, at a minimum, have (1) made a substantial contribution to the scientific product or provided editorial revisions that include critical intellectual content, (2) approved the final version, and (3) agreed to be accountable for all aspects of the work to which they contributed. Prior consent should be obtained from each author to be represented on a particular work. Obtaining prior consent for acknowledgements is also a good practice. This policy sets a minimum requirement for authorship attribution, and HHS OpDivs/StaffDivs may have additional authorship criteria. Different

scientific disciplines use a range of strategies to attribute scientific work to individuals, and documents may be published without authorship attributions.

6. Ensure independent review of scientific facilities, methodologies, and other scientific activities as appropriate to ensure scientific integrity.

7. Require that covered individuals comply with HHS policies and procedures for planning and conducting scientific activities and show appropriate diligence toward protecting and conserving Federal research resources, such as equipment and other property, and records of data and results that are entrusted to them.

8. Prohibit research misconduct, the deliberate or reckless use of improper or inappropriate research methods or processes, and noncompliance with practices that safeguard the quality of research and other scientific activities or enhance research security.

9. Require that covered individuals design, conduct, manage, evaluate, and communicate about scientific research and other scientific activities honestly and thoroughly, and disclose any conflicts of interest to their supervisor or other appropriate HHS official(s) for their determination as to whether a recusal, disclaimer, or other action is appropriate, consistent with HHS ethics policies and procedures.

10. Require that research involving the participation of human subjects and the use of non-human animals is conducted in accordance with applicable, established laws, regulations, policies, and ethical considerations.

11. Support and enhance scientific integrity with the understanding that violations of scientific integrity can have a disproportional impact on underrepresented groups or weaken the equitable delivery of Federal Government programs.

12. Consistent with OSTP guidance and relevant HHS policy, prohibit HHS personnel engaged in intramural research from participating in foreign talent recruitment programs, unless participation is in an international conference or other international exchange, partnership, or program for which such participation has been approved by the appropriate authority in HHS.¹³

13. Consistent with OSTP guidance and relevant HHS policy, require disclosure of participation in foreign talent recruitment programs, including the provision of copies of all grants, contracts, or other agreements related to such programs, and other supporting documentation related to such

programs, as a condition of receipt of Federal extramural research funding awarded through HHS.¹⁰

14. Prohibit the suspension or early termination of a grant except as consistent with applicable law and grants policies.^{14 15 16}

II. Ensuring the Free Flow of Scientific Information

Open and timely communication of HHS science plays a valuable role in building public trust and understanding of HHS work. HHS facilitates the free flow of scientific and technological information and supports scientific integrity in the communication of scientific activities, findings, and products.

It is the policy of HHS to:

1. Facilitate the free flow of scientific and technological information, to the extent permissible by federal laws and regulations. Consistent with open government requirements, HHS will expand and promote access to scientific and technological information by making it available freely and without embargo to the public in an online digital format.^{17 18}

2. Ensure that scientific findings and products are not unduly suppressed, delayed, or altered for political purposes and are not subjected to inappropriate influence.

3. Require that technical review and clearance processes include provisions for timely clearance and expressly forbid censorship, unreasonable delay, and suppression of objective communication of data and results without valid scientific, legal, or security justification. Deviations from clearance policies or procedures that result in suppression, delay, or alteration of scientific and technological information without scientific, legal, or security justification may constitute violations of the HHS Scientific Integrity Policy and may be treated under the Procedures: Addressing Scientific Integrity Concerns section in this document.

4. Prohibit HHS officials, including communications officers, from altering, or directing HHS scientists and technology experts to alter, scientific and technological research findings or presentation of research findings in a manner that may compromise the objectivity or accurate representation of those findings.

5. Ensure that scientific information is accurately represented in responses provided by HHS to Congressional inquiries, testimony, and other requests.

6. Ensure that the work and conclusions of HHS scientists and the work and conclusions of scientists

funded or supported by the federal government are accurately represented in HHS communications. If communication documents significantly rely on a scientist's research, identify them as an author, or represent their scientific opinion, the scientist will be given the option to review the scientific content of proposed communication documents prior to publication or public release.

7. Accurately represent the work and conclusions of scientists in HHS social media communications and provide appropriate guidance to HHS scientists on the use of HHS social media. If scientists whose work is represented in HHS social media identify any errors in those representations, HHS social media managers are responsible for making appropriate corrections expeditiously.

8. Require HHS or its OpDivs/StaffDivs, when offering spokespersons in response to media requests, to offer knowledgeable spokespersons who can, in an objective and nonpartisan manner, describe the relevant scientific or technological aspects of their work.

9. Ensure that HHS scientists may communicate their scientific activities objectively without political interference or other inappropriate influence, consistent with HHS and OpDivs/StaffDivs communication and media policies. Scientific products must adhere to relevant HHS technical review procedures.

10. Encourage, but not require, HHS scientists to communicate with the media in their official capacities regarding their scientific activities and areas of expertise, subject to limitations of government ethics rules.¹⁹ In communicating with the media, HHS scientists are encouraged to seek advice from career HHS communications experts.

11. Allow covered individuals to communicate their personal or individual views to the media or the public in their personal capacities, including on social media, subject to the limitations of government ethics rules, HHS supplemental ethics regulations, social media regulations, and obligation to protect nonpublic information.²⁰ HHS scientists and other covered individuals presenting their personal views may name HHS as their employer as one biographical fact among several; however, their title and position cannot receive more prominence than any other biographical fact and they must make clear that they are presenting their personal and/or individual views—not the views of HHS—and they should not be sourced by the media as an HHS representative.

III. Supporting Decision Making Processes

It is the policy of HHS to:

1. Ensure the quality, accuracy, and transparency of scientific information used to support policy and decision making, including by:
 - a. Using scientific information that is subject to well-established scientific processes.
 - b. Ensuring that scientific data and research used to support policy decisions undergo review by qualified experts, where feasible and appropriate, and consistent with law.
 - c. Adhering to the Office of Management and Budget Final Information Quality Bulletin for Peer Review.²¹ For example, as described in the Bulletin, when independent peer reviews of scientific information products are conducted by contractors, a conflict-of-interest review will be conducted.
 - d. Reflecting scientific information appropriately and accurately and making scientific findings or conclusions considered or relied on in policy decisions publicly available online and in open formats, to the extent practicable.
2. Where legally permissible and appropriate, directly consult with scientists whose work is being used in policy and management decisions to ensure that the science is accurately represented and interpreted.
3. Ensure, to the extent possible, the accuracy of HHS communication of the science upon which a policy decision is based.
4. Ensure that the HHS SIO, with input from the HHS Scientific Integrity Council, develops a transparent mechanism for covered individuals to express differing scientific opinions free from political interference or inappropriate influence.

IV. Ensuring Accountability

It is the policy of HHS to:

1. Ensure correction of the scientific record and implementation of corrective scientific actions when allegations of a loss of scientific integrity are substantiated. Corrective scientific actions may include correction or retraction of published scientific work or related media releases, release of inappropriately suppressed scientific materials, monitoring or supervision of future scientific activities, or required validation of data sources.
2. Encourage and facilitate early informal or formal consultation between employees and scientific integrity officials to advise on preventing loss of scientific integrity, to determine

whether a loss of scientific integrity has potentially occurred, and to ascertain whether an allegation should be referred elsewhere for resolution.

3. Provide clear guidance on how to formally and confidentially report concerns and allegations of loss of scientific integrity. Those who report concerns and allegations need not be directly involved or witness a violation.
4. Ensure that the HHS SIO, together with other Scientific Integrity Council members, as applicable, draft procedures to respond to allegations of loss of scientific integrity at HHS in a timely, objective, and thorough manner. These procedures will include an initial assessment and review, a fact-finding process, an adjudication or determination including description of remedies and preventative measures to safeguard the science, an appeals process, follow-up to track implementation of remedies, and reporting. OpDivs/StaffDivs may develop and implement division-specific procedures for handling allegations within their Divisions.
5. These procedures will document the necessary aspects for each step of the process including burden of proof, any necessary determination of intentionality, and reporting, as well as the roles of the HHS SIO and HHS staff in the process.
6. Ensure that relevant HHS OpDivs/StaffDivs have scientific integrity policies that are consistent and in alignment with this policy.

V. Protections

HHS assures the protection of covered individuals as appropriate from retaliation in implementation of this policy.

It is the policy of HHS to:

1. Select and retain candidates for scientific and technical positions based on the candidate's scientific and technical knowledge, credentials, experience, and integrity, and hold them and their supervisors to the highest standards of professional and scientific ethics.
2. Promote diversity, equity, inclusion, and accessibility in the scientific workforce and create safe workspaces that are free from harassment and discrimination. Support scientists and researchers including, but not limited to, Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders and other persons of color; members of religious minorities; lesbian, gay, bisexual, transgender, queer, intersex, and asexual (LGBTQIA+) persons; persons with disabilities; persons who live in rural

areas; and persons otherwise adversely affected by persistent poverty or inequality; and advance the equitable delivery of Federal programs.

3. Protect from retaliation those individuals who report in good faith allegations of loss of scientific integrity. Efforts will be made to protect the privacy of individuals involved in allegations.

4. Prevent HHS employees from intimidating or coercing scientists to alter scientific data, findings, or professional opinions or from inappropriately influencing scientific advisory boards.

5. Comply with whistleblower protections, specifically:

a. The requirements of the Whistleblower Protection Act of 1989, and its expanded protections enacted by Public Law 103-424 and the Whistleblower Protection Enhancement Act of 2012. 5 U.S.C. part 2302(b)(8)–(9).

b. The National Defense Authorization Act's expansion of certain whistleblower protections to employees of federal government contractors, subcontractors, and grant recipients. 41 U.S.C. part 4712.

c. Presidential Policy Directive 19, which prohibits supervisors from taking, failing to take, or threatening to take or fail to take any action affecting an employee's eligibility for access to classified information in retaliation for making a protected disclosure.

d. The Military Whistleblower Protection Act (codified at 10 U.S.C. 1034), which is made applicable to the Public Health Service Commissioned Corps (PHSCC) officers through 42 U.S.C. 213a(a)(18), and implemented by Commissioned Corps Directive (CCD) 121.06.

6. The HHS SIO and OpDiv/StaffDiv SIOs are protected by all applicable employee rights as required by law. An SIO or other scientific integrity staff may only be terminated or reassigned for reasons consistent with applicable law.^{22 23}

VI. Professional Development for Government Scientists

HHS encourages its scientists and other covered individuals involved in HHS scientific activities to interact with the broader scientific community, in a manner that is consistent with Federal rules of ethics, employment responsibilities, and to the extent that is practical, given the availability of funding to support such interactions.²⁴

It is the policy of HHS to:

1. Encourage timely publication of research such as in peer-reviewed, professional, scholarly journals, HHS

technical reports and publications or other appropriate outlets.

2. Encourage the sharing of scientific activities, findings, and materials through appropriate avenues including digital repositories.

3. Encourage participation in and presentation of research at professional meetings including workshops, conferences, and symposia.

4. When appropriate, permit service on editorial boards, as peer reviewers, or as editors of professional or scholarly journals.

5. When appropriate, permit participation in professional societies, committees, task forces, and other specialized bodies of professional societies, including removing barriers to serving as officers or on governing boards of such societies, to the extent allowed by law.

6. Permit government scientists to receive honors and awards for contributions to scientific activities and discoveries to the extent allowed by law, and to accrue the professional recognition of such honors or awards.

7. Permit HHS scientists to perform outreach and engagement activities, such as speaking to community and student groups, as part of their official duties, as appropriate.

VII. Federal Advisory Committees (FACs)

Federal Advisory Committees (FACs), as defined by the Federal Advisory Committee Act, at <https://www.gsa.gov/policy-regulations/policy/federal-advisory-committee-management/legislation-and-regulations/the-federal-advisory-committee-act>, are an important tool within HHS for ensuring the credibility, quality, and transparency of HHS science. HHS will adhere to the Federal Advisory Committee Act and develop policies in coordination with the General Services Administration and consistent with the guidance on lobbyists serving on FACs when convening FACs tasked with giving scientific advice.

Consistent with all applicable laws and guidance regarding FACs, it is the policy of HHS to:

1. Promote transparency in the recruitment of new FAC members, including, when practical and appropriate, announcing vacancies with a notification in the **Federal Register**.

2. Select members to serve on a scientific or technical FAC based on expertise, knowledge, and contribution to the relevant subject area. Additional factors that may be considered are availability of the member to serve, alignment with relevant Federal Advisory Committee Membership

Balance Plan, and the ability to work effectively on advisory committees. Ensure committee membership is fairly balanced in terms of points of view represented with respect to the functions to be performed by the FAC.²⁵

3. Comply with current standards governing conflict of interest as defined in statutes and implementing regulations.

4. Except when prohibited by law and to the extent practical, agencies should appoint members of scientific and technical FACs as Special Government Employees.

5. Treat all reports, recommendations, and products produced by FACs solely as the reports, recommendations, and products of such committees rather than of the U.S. Government, and thus not subject to intra- or inter-agency revision. The role of the FACs is to provide advice or recommendations to the agency. The agency may then craft policy based on the FACs' advice or recommendations if it chooses to adopt those recommendations.

Scientific Integrity Council

HHS will establish a Scientific Integrity Council (Council) comprising one senior career employee from each relevant HHS OpDiv/StaffDiv. Relevant HHS divisions include those that conduct, manage, use, and communicate about scientific activities, as defined by the HHS Scientific Integrity Policy. The Council may engage with other HHS divisions as needed to support its responsibilities. The Council will be chaired by the HHS SIO. Where an OpDiv/StaffDiv has established a division SIO, that person will represent the division; where an OpDiv/StaffDiv has not established a division SIO, a similarly high-ranking career official with the appropriate scientific expertise, stature, and authority will represent the division.

Council members will ensure consistent implementation of the Scientific Integrity Policy at HHS, act as liaisons for their respective OpDivs/StaffDivs, assist with training and policy assessment, updates, and amendments, and be available to address any questions or concerns regarding this policy. The HHS SIO, together with the Council, will draft a Scientific Integrity Council Charter outlining criteria for selection as a member, other duties of members, and the frequency of meetings. The primary responsibilities of the Council are to:

1. Ensure that a well-informed and high-level group of experts supports scientific integrity at HHS.

2. Ensure that the HHS Scientific Integrity Policy is implemented consistently across the Department.

3. Review, assess, and revise the HHS Scientific Integrity Policy every two years, or more frequently as needed.

4. Serve on scientific integrity review panels and adjudicate allegations of losses of scientific integrity originating at HHS divisions that do not have their own scientific integrity policy, originating from more than one HHS division, or originating within the Office of the Secretary.

5. Determine handling of investigation and adjudication proceedings from which the HHS SIO is recused.

6. Engage HHS and division leadership in upholding the principles of scientific integrity, and maintain leadership awareness of scientific integrity issues as necessary and appropriate.

7. Support the education of all Department employees on their rights and responsibilities related to scientific integrity.

Procedures

The HHS SIO, in conjunction with the Scientific Integrity Council, has developed the following procedures for addressing scientific integrity concerns, handling differing scientific opinions, and clearance of scientific products and communications.

Addressing Scientific Integrity Concerns

The HHS SIO has primary responsibility for addressing scientific integrity concerns raised to the Department. The Scientific Integrity Council will support and assist the HHS SIO as needed. Full policies and procedures for handling scientific integrity concerns will be made available on the HHS website, at <https://www.hhs.gov/programs/research/scientificintegrity/index.html>. HHS OpDivs/StaffDivs may have their own procedures for addressing scientific integrity concerns that arise in their own divisions. For information about rights and remedies against retaliation, employees may contact the HHS OIG Whistleblower Protection Coordinator.²⁶ In general:

1. Concerns about a potential loss of scientific integrity at HHS may be reported to the HHS SIO by any individual who has knowledge of the situation. Reporting may be done anonymously.

2. Employees of HHS or its OpDivs/StaffDivs are encouraged to seek an informal consultation with the HHS SIO or the relevant division SIO to discuss whether a concern constitutes a potential loss of scientific integrity

before submitting a formal complaint. Employees ultimately have the discretion to submit a formal complaint as they see fit without reprisal.

3. If an OpDiv/StaffDiv has its own procedures in place for handling scientific integrity concerns, formal complaints submitted to HHS that involve actions and outcomes specific to that division will be directed to that division for follow up. For divisions without their own procedures, formal complaints will be handled by the HHS Scientific Integrity Council.

4. The HHS SIO, with the help of the Scientific Integrity Council as needed, will complete an initial assessment of each reported concern and determine whether to request additional information from the complainant or others and to determine whether a formal investigation is warranted.

5. Should an investigation be opened, an investigation committee consisting of the HHS SIO and at least two other Scientific Integrity Council members, or their delegates, will be convened. The committee will develop a factual record by exploring the allegation(s) in detail and consulting with subject matter experts, interviewing witnesses, and reviewing documentation as needed. This record will be documented in a report from the committee to the HHS SIO.

6. Once the investigation is complete and a report has been submitted to the HHS SIO, the HHS SIO will determine whether scientific integrity was lost, and if so, what corrective scientific actions are recommended.

7. The complainant and respondent will be given the opportunity to appeal a finding or any corrective scientific actions taken.

Handling Differing Scientific Opinions

Science and decisions based on science are strengthened by vigorous discussion and debate and by considering all available evidence. The process of challenging and improving ideas helps to guard against inadequate science and flawed analysis. Scientists can hold differing opinions without violating scientific integrity, and HHS encourages its scientists to respectfully express and engage with differing views as an integral part of the scientific process. Differing scientific opinions are diverging views held by researchers who are substantively engaged in the science subject area. In some cases, such as when a scientific dispute has a significant impact on public health or policy, a formal scientific dispute resolution process may be necessary. The goal of scientific dispute resolution should be to ensure that all perspectives

are heard and documented in an unbiased way. A satisfactory resolution may involve adopting one opinion over another, deciding to conduct additional studies, formulating an alternate theory reconciling the differing opinions, or documenting the disagreement for the benefit of policymakers and fellow scientists. HHS OpDivs/StaffDivs may have dispute resolution policies in place; employees of these divisions must follow any such policies and guidelines. If a division does not have a dispute resolution process already in place, the following steps may be used as a guide. These steps may be completed in any order and are not necessarily an exhaustive list of dispute resolution measures. In general:

- A team member or group of team members with a differing opinion may engage with their colleagues to resolve the issue as soon as the difference of opinion is known. HHS recommends this type of internal discussion as a first step in most dispute resolution proceedings.

- A team may choose to consult a manager. First-level managers may defer to an appropriate higher-level manager if the first-level manager has a conflict of interest or cannot offer an impartial opinion for any reason.

- If the matter cannot be satisfactorily resolved by other means, a team may request assistance from their division's SIO. The HHS SIO may be consulted if the division SIO requests their assistance, if there is no division SIO, or if there is a conflict of interest or perceived conflict of interest with the division SIO. The HHS SIO will review the dispute history and may recommend additional internal discussion, peer review, or involvement of subject matter experts. The HHS SIO may also serve as a mediator or engage the services of a professional mediator to help end the dispute. The HHS SIO acting in this capacity serves to uphold scientific integrity and will not advocate for a particular scientific position.

Roles and Responsibilities

Scientific Integrity is everyone's responsibility. The following individuals have specific scientific integrity roles and responsibilities under this policy:

I. The Secretary of Health and Human Services

1. Provides leadership for HHS on scientific integrity, by leading through example, upholding scientific integrity principles, and regularly communicating the importance of scientific integrity.

2. Ensures that all HHS activities associated with scientific and technological processes are conducted in accordance with this policy.

3. Ensures that all supervisors and managers comply with this policy and ensures accountability for those who do not.

4. Ensures that violations of this policy are investigated to the full extent that is described herein, and that appropriate corrective scientific and/or administrative actions are taken as a result of such investigations.

5. Ensures that HHS scientific integrity efforts support HHS plans for making evidence-based policies, including the evidence-building plans required by 5 U.S.C. 312(a) and the annual evaluation plans required by 5 U.S.C. 312(b).

6. Provides adequate resources and funding to implement this policy including staffing, monitoring, evaluation, reporting, and training.

7. Ensures that SIOs are afforded all applicable career employee rights and appeals and are protected against retaliation of any kind.

8. Supports and respects the HHS SIO's independence, recommendations, and designation of and HHS compliance with corrective scientific actions when violations of this policy are substantiated. Assistance may be sought from the National Science and Technology Council (NSTC) Subcommittee on Scientific Integrity (SOSI) in cases of disagreement.

9. In cooperation with the HHS SIO, oversees the implementation and iterative improvement of policies and processes affecting the integrity of scientific activities funded, conducted, or overseen by HHS, as well as policies affecting the Federal and non-Federal scientists who support the scientific activities of HHS, including scientific-integrity policies.

10. Ensures that HHS establishes as necessary clear administrative actions for substantiated violations of this policy, designating responsibility for each aspect of accountability.

II. HHS Scientific Integrity Official

1. Is a designated, full-time equivalent, career employee who holds a permanent appointment and has appropriate scientific credentials and is designated at a senior level.

2. Oversees implementation and iterative improvement of scientific-integrity policies and processes, provides leadership on matters of scientific integrity, and serves as the primary HHS-level contact for questions regarding scientific integrity.

3. Leads training and outreach initiatives to facilitate employee awareness and understanding of this policy.

4. Serves as a neutral point of contact for receiving allegations of loss of scientific integrity, provides informal consultation for employees who have scientific integrity concerns, and adheres to privacy and confidentiality policies, as applicable.

5. Conducts an initial assessment of all formal complaints and submitted materials, following established procedures, to determine whether the allegations pertain to loss of scientific integrity and the appropriate handling of said allegations. Provides independent oversight of HHS responses to allegations of loss of scientific integrity referred for an inquiry or investigation, including:

a. Reviewing HHS-submitted reports of allegations and their disposition.

b. Maintaining a status report of responses to allegations as a means of monitoring the progress toward resolution.

6. Leads efforts to update this policy and any accompanying guidance, as appropriate.

7. Reports to the HHS Deputy Assistant Secretary for Science and Data Policy on matters involving scientific integrity.

8. Coordinates as necessary with the HHS Offices of Research Integrity (ORI), Human Research Protections (OHRP), Inspector General (OIG), the General Counsel (OGC), Human Resources, Civil Rights, the Assistant Secretary for Public Affairs, and the Chief Information Officer, among others.

9. Reports any potentially criminal behavior related to waste, fraud, abuse, or potential employee misconduct to OIG that is uncovered while responding to an allegation of loss of scientific integrity and coordinates as appropriate related to the referral provided to OIG.

10. Keeps the HHS Secretary informed on the status of the implementation of this policy and any compliance concerns, as warranted.

11. Publishes an annual scientific integrity report as described below.

12. Leads efforts for the iterative improvement of this policy and scientific integrity initiatives overall including development and implementation of an evaluation plan to regularly monitor and evaluate ongoing scientific integrity activities and outcomes.

13. To the extent possible, is involved in high level discussions and strategic planning on the recruitment, retention, development, and advancement of scientists—including scientists from

underrepresented communities—to help ensure that scientific integrity is appropriately and carefully considered.

III. HHS Scientific Integrity Council Members

1. As delegated by the HHS SIO, oversees implementation and iterative improvement of scientific integrity policies and processes.

2. Coordinates with the HHS SIO in implementing scientific-integrity policies and processes.

3. Provides oversight for the implementation of the Scientific Integrity Policy at HHS.

4. Acts as liaisons for their respective HHS OpDivs/StaffDivs.

5. Assists with training and policy assessment, updates, and amendments.

6. Is available to address any questions or concerns regarding this policy.

7. Other duties as delegated.

IV. HHS Managers and Supervisors

1. Comply with and ensure HHS and employee compliance with the scientific integrity policy, including reporting or advising others on reporting allegations of loss of scientific integrity.

2. Make themselves aware of and uphold the principles contained in this policy. Lead through example by upholding scientific integrity principles and communicating the importance of doing so.

3. Report any knowledge of potential loss of scientific integrity to the HHS SIO or OpDiv/StaffDiv scientific integrity officials without reprisal.

4. Consult, as appropriate, with the HHS SIO or relevant OpDiv/StaffDiv SIOs, human resources officers, contracting and grant personnel, ethics officers, ORI, OIG, OGC, and the Office for Civil Rights.

V. HHS Employees and Other Covered Individuals

1. Make themselves aware of the principles contained in this policy and how the policy applies to their duties.

2. Comply with this policy.

3. Adhere to accepted professional values and practices of the relevant research/scientific communities to which they belong.

4. Are encouraged to report to the HHS SIO or OpDiv/StaffDiv SIO any concern of loss of scientific integrity and are encouraged to report retaliation or potential criminal activity to the HHS OIG Hotline.²⁷

Monitoring and Evaluating Scientific Integrity Activities and Outcomes

HHS will develop and implement an evaluation plan to regularly measure,

monitor, and evaluate ongoing scientific integrity activities and outcomes. The plan will include a roadmap of activities, evaluation metrics, and methods of measurement for the purpose of ongoing improvement of SI processes, procedures, and policies. The plan will include expected metrics and measurement methods for evaluating the HHS Scientific Integrity Policy; workforce training; scientific integrity leadership, staffing, and communication; and reporting mechanisms. As part of the monitoring and evaluation plan, HHS will publish an annual report on the number and outcomes of investigations and appeals involving allegations of loss of scientific integrity. To the extent possible, all descriptions of investigations and appeals will be anonymized.

The plan shall also include a timeline for implementation and frequency of data collection, analysis, review, recommendations, and implementing recommendations. Monitoring and evaluation results, recommendations, and policy/procedure changes based on results will be reported to HHS leadership and will be made available to HHS staff and the public in a timely manner.

Reporting

The HHS SIO, with input from the Scientific Integrity Council, is responsible for developing and making prominently available on HHS's public facing website, at <https://www.hhs.gov/programs/research/scientificintegrity/index.html>, an annual report to HHS leadership on the status of scientific integrity within HHS. The report shall highlight scientific integrity successes, accomplishments, or progress across HHS and identify areas for improvement and plans for addressing critical weaknesses, if any. The report shall describe progress toward achieving key metrics, including comparisons to the same metrics from prior years to show trends over time, whenever feasible. It will also include the number of investigations and appeals involving alleged or actual violations of this scientific integrity policy, including pending investigations and appeals. For investigations that have been resolved, the report will include an aggregate summary of the types of corrective actions recommended by the investigation panel to restore scientific integrity, and a summary of the types of actions ultimately taken.

Related Policies and Statutes

Involving SIOs at HHS and its OpDivs/StaffDivs in the writing and updating of related policies can help

provide needed perspectives before such policies are issued and better ensure they support scientific integrity. Officials should consider the scientific integrity-related components of other policies (e.g., professional development of scientists, science-related communications, etc.) and determine where those other policies should be referenced, or perhaps reinforced, within the agency scientific integrity policy to help ensure their longevity. Violations of related and supporting policies may result in a loss of scientific integrity and it is appropriate for SIOs to coordinate with their agency counterparts in these matters.

SIOs should have an awareness of policies and programs that intersect with the development of the culture of scientific integrity within the agency. SIOs, where possible, shall be involved in the development or revision of the broader set of policies and practices that affect the culture and applicability of scientific integrity within HHS.

BILLING CODE 4150–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Information Technology Advisory Committee Schedule of Meetings

AGENCY: Assistant Secretary for Technology Policy (ASTP), HHS.

ACTION: Notice of meetings.

SUMMARY: The Health Information Technology Advisory Committee (HITAC) was established in accordance with the 21st Century Cures Act and the Federal Advisory Committee Act. The HITAC, among other things, identifies priorities for standards adoption and makes recommendations to the Assistant Secretary for Technology Policy/National Coordinator for Health Information Technology. The HITAC will hold public meetings throughout 2025. See list of public meetings below.

FOR FURTHER INFORMATION CONTACT: Seth Pazinski, Designated Federal Officer, at Seth.Pazinski@hhs.gov, (202) 384–2246.

SUPPLEMENTAL INFORMATION: Section 4003(e) of the 21st Century Cures Act (Pub. L. 114–255) establishes the Health Information Technology Advisory

Committee (referred to as the “HITAC”). The HITAC will be governed by the provisions of the Federal Advisory Committee Act (FACA) (Pub. L. 92–463), as amended, (5 U.S.C. app.), which sets forth standards for the formation and use of federal advisory committees.

Composition: The HITAC is comprised of at least 25 members, of which:

- No fewer than 2 members are advocates for patients or consumers of health information technology;
- 3 members are appointed by the HHS Secretary
 - 1 of whom shall be appointed to represent the Department of Health and Human Services; and
 - 1 of whom shall be a public health official;
- 2 members are appointed by the majority leader of the Senate;
- 2 members are appointed by the minority leader of the Senate;
- 2 members are appointed by the Speaker of the House of Representatives;
- 2 members are appointed by the minority leader of the House of Representatives;
- Other members are appointed by the Comptroller General of the United States.

Members serve for one-, two-, or three-year terms. All members may be reappointed for a subsequent three-year term. Each member is limited to two three-year terms, not to exceed six years of service. Members serve without pay but will be provided per-diem and travel costs for committee services, if warranted.

Recommendations: The HITAC recommendations to the Assistant Secretary for Technology Policy/ National Coordinator for Health Information Technology are publicly available at <https://www.healthit.gov/topic/federal-advisory-committees/recommendations-national-coordinator-health-it>.

Public Meetings: All HITAC meetings will be virtual. Please note that some HITAC meetings may also have an in-person meeting option. For web conference instructions and the most up-to-date information, including in-person meeting location (if applicable), please visit the HITAC calendar on the ONC website, www.healthit.gov/topic/federal-advisory-committees/hitac-calendar.

The schedule of meetings to be held in 2025 is as follows:

- February 13, 2025, from approximately 10:00 a.m. to 3:00 p.m./ Eastern Time
- March 20, 2025, from approximately 10:00 a.m. to 3:00 p.m./ Eastern Time

- April 10, 2025, from approximately 10:00 a.m. to 3:00 p.m./Eastern Time
- May 8, 2025, from approximately 10:00 a.m. to 3:00 p.m./Eastern Time
- June 12, 2025, from approximately 10:00 a.m. to 3:00 p.m./Eastern Time
- July 17, 2025, from approximately 10:00 a.m. to 3:00 p.m./Eastern Time
- August 14, 2025, from approximately 10:00 a.m. to 3:00 p.m./ Eastern Time
- September 18, 2025, from approximately 10:00 a.m. to 3:00 p.m./ Eastern Time
- October 16, 2025, from approximately 10:00 a.m. to 3:00 p.m./ Eastern Time
- November 13, 2025, from approximately 10:00 a.m. to 3:00 p.m./ Eastern Time

All meetings are open to the public. Additional meetings may be scheduled as needed.

Contact Person for Meetings: Seth Pazinski, Seth.Pazinski@hhs.gov. A notice in the **Federal Register** about last minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Please email Seth Pazinski for the most current information about meetings.

Agenda: As outlined in the 21st Century Cures Act, the HITAC will develop and submit recommendations to the Assistant Secretary for Technology Policy/National Coordinator on Health Information Technology on the topics of interoperability, privacy and security, patient access to information, use of technologies that support public health, design and use of technologies that advance health equity, and use of artificial intelligence that improves health and health care. In addition, the committee will also address any administrative matters and hear periodic reports from ASTP. ASTP intends to make background material available to the public no later than 24 hours prior to the meeting start time. If ASTP is unable to post the background material on its website prior to the meeting, the material will be made publicly available on ASTP’s website after the meeting, at www.healthit.gov/hitac.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person prior to the meeting date. An oral public comment period will be scheduled at each meeting. Time allotted for each commenter will be limited to three minutes. If the number of speakers requesting to comment is

greater than can be reasonably accommodated during the scheduled public comment period, ASTP will take written comments after the meeting.

ASTP welcomes the attendance of the public at its HITAC meetings. If you require special accommodations due to a disability, please contact Seth Pazinski at least seven (7) days in advance of the meeting.

Notice of these meetings are given under the Federal Advisory Committee Act (Pub. L. No. 92–463, 5 U.S.C., App. 2).

Dated: November 22, 2024.

Stanley S. Pazinski,

Designated Federal Officer, Assistant Secretary for Technology Policy/Office of the National Coordinator for Health Information Technology.

BILLING CODE 4150–45–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Indian Health Service

Organization, Functions, and Delegations of Authority; Part G; Indian Health Service; Headquarters, Office of the Director, Office of Quality

AGENCY: Indian Health Service, Department of Health and Human Services.

ACTION: Final notice.

SUMMARY: Part G of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (HHS) is hereby amended to reflect a reorganization of the Indian Health Service (IHS). The purpose of this reorganization proposal is to update the current approved IHS, Office of the Director (GA), Congressional and Legislative Affairs Staff (GA1) and the Office of Quality (GAP) in their entirety and replace with the following:

SUPPLEMENTARY INFORMATION: The IHS is an Operating Division within the Department of Health and Human Services (HHS) and is under the leadership and direction of a Director who is directly responsible to the Secretary of Health and Human Services. The IHS Headquarters is proposing to reorganize the following major component: Office of Quality (OQ).

Part G of the Statement of Organization, Functions, and Delegations of Authority was most recently amended at 89 FR 61126, July 30, 2024.

Office of the Director, IHS (GA)

Congressional and Legislative Affairs Staff (CLAS) (GA1)

(1) Serves as the principal advisor to the IHS Director on all legislative and congressional relations matters; (2) advises the IHS Director and other IHS officials on the need for changes in legislation and manages the development of IHS legislative initiatives; (3) serves as the IHS liaison office for congressional and legislative affairs with Congressional offices, the HHS, the Office of Management and Budget (OMB), the White House, and other federal agencies; (4) tracks all major legislative proposals in the Congress that would impact Indian health; (5) ensures that the IHS Director and appropriate IHS and HHS officials are briefed on the potential impact of proposed legislation; (6) develops legislative strategy for key policy and legislative initiatives; (7) provides technical assistance and advice relative to the effect that initiatives/implementation would have on the IHS; (8) provides support and collaborates with the Office of Finance and Accounting relative to IHS appropriations efforts; (9) directs the development of IHS briefing materials for congressional hearings, testimony, and bill reports; (10) analyzes legislation for necessary action within the IHS; (11) develops appropriate legislative implementation plans; (12) coordinates with IHS HQ and Area Offices as appropriate to provide leadership, advocacy, and technical support to respond to requests from the public, including tribal governments, tribal organizations, and Indian community organizations regarding IHS legislative issues.

Office of Quality (GAP)

The Office of Quality (OQ) provides leadership and direction for quality improvement and patient safety activities and oversees compliance and risk management throughout the agency. Specifically, the office (1) advises the Indian Health Service (IHS) Director on assuring quality health care, maximizing the patient experience, and systematizing quality improvement activities to improve clinical outcomes and administrative processes; (2) develops and implements a strategic quality framework; (3) oversees accreditation readiness activities and compliance with accreditation requirements at all IHS Direct Service facilities; (4) conducts performance improvement, quality assurance, innovative thinking, and risk management trainings; (5) oversees IHS

facilities and staff in intra-agency quality improvement activities; (6) advises on development and monitoring of quality assurance and governance metrics for health care delivery processes and outcomes; (7) develops programs to assess, address, and improve systems and processes to improve health care quality; (8) advises on compliance with relevant federal regulations and accreditation and professional standards; (9) provides guidance for standardization of health care delivery policies, protocols, and governance; (10) advises and guides IHS patient-centered care processes, ensuring engagement of patients as partners in care; (11) oversees the IHS Enterprise Risk Management (ERM) vision, culture, strategy, and framework and clinical risk management; (12) oversees and coordinates the agency's efforts to establish and maintain proper internal controls; (13) ensures requirements are met under OMB Circular A-123; (14) develops programs to promote patient safety management and reporting systems and processes, sentinel event investigations/root cause analysis; and (15) participates in cross-cutting issues and processes, including but not limited to, emergency preparedness/security, quality assurance, recruitment, budget formulation, self-determination issues, and resolution of audit findings as may be needed and appropriate.

Division of Quality Assurance and Patient Safety (GAPA)

(1) Develops and implements programs to promote sustained compliance with relevant federal regulations related to accreditation and professional standards for health care facilities; (2) manages and coordinates continuous accreditation compliance programs using multidisciplinary integration of survey readiness activities; (3) coordinates health care accreditation resource management; (4) tracks health care accreditation and certification survey reports; (5) develops and implements programs to manage credentialing standards and policy, acquires and maintains centralized credentialing software system, promotes unification of medical staff professionals (MSP), and promotes standardized training and support resources for MSP; (6) develops and implements policies and procedures to promote patient safety, infection control practices, and environment of care and life safety practices; (7) establishes policies and guidelines to reduce adverse events; (8) develops education and training related to the application of established patient safety and adverse

event reporting systems and metrics; (9) establishes and maintains oversight mechanisms for incident identification and reporting, adverse events and good catches, comprehensive systemic analysis/root cause analysis process and documentation; (10) implements strategies to improve patient and workforce safety; (11) enhances collaborative communication to facilitate the sharing of best practices and learning related to identified risks and mitigation actions across the agency; (12) identifies IHS and National patient safety trends and investigates positive and negative patient safety outcomes across the agency; and (13) provides patient safety consultation regarding industry standards, best practices, and development of policy, processes, and procedures.

Division of Enterprise Risk Management (GAPB)

(1) Oversees and coordinates the IHS ERM vision, culture, strategy, and framework; (2) develops goals and objectives for the ERM program, integrated with broader IHS-wide strategic goals/objectives, and tracks progress toward achieving them; (3) coordinates the development of risk policy, including a risk appetite statement, to guide Agency decision-making and documentation related to risk; (4) advises and collaborates in the development of the IHS ERM portfolio of enterprise risks and ensures appropriate and effective management by accountable individual risk owners; (5) integrates risk assessment activities across the IHS risk portfolio; (6) advises on ERM and provides expertise, advice, and assistance to the agency leadership on compliance matters; (7) provides guidance and training on the risk management process and prioritization; (8) facilitates the governance policy, process, and reporting to establish consistency and quality of documentation of fiduciary responsibilities of governing bodies; (9) oversees tracking of high-risk administrative, clinical, or personnel incidents to ensure appropriate local and agency-wide response, timely closure, assessment of internal controls, and review of case studies to promote a safety culture based on risk-awareness; (10) collaborates with key HQ Offices to ensure consistency in cross-cutting agency strategic planning, ERM, and management of internal controls across IHS; (11) collaborates with strategic planning process to integrate risk management and strategic thinking; (12) reviews tort claims files; (13) represents the IHS when claims are presented for review by the Malpractice Claims

Review Panel chartered by the HHS, and assists providers with Malpractice Claims Review Panel interactions; (14) submits payment reports to the National Practitioner Data Bank; (15) maintains case files and a malpractice claims database; (16) provides case summaries, peer review, outcome information, and feedback of risk management recommendations; (17) disseminates information about the review process; (18) responds to outside organizations requesting tort claim-involvement histories on former employees; and (19) responds to Tort Claims inquiries from governmental agencies, media, Tribal and Urban Indian organizations, and advocacy groups with the Office of General Council guidance.

Division of Innovation and Improvement (GAPC)

(1) Provides trainings on innovative thinking and performance improvement techniques; (2) provides training on empathy and relational intelligence to better understand colleagues and stakeholders and maximize teamwork; (3) integrates innovative thinking into quality improvement and policy formation processes to stimulate rapid idea generation; (4) oversees training programs to increase quality improvement capacity and standardize improvement methodology to test small-scale changes at the local level; (5) reviews use of health information technology and data to improve performance, quality and service; (6) monitors patient and staff satisfaction with health care service delivery; (7) leads change management for practice transformation to embrace new models of care delivery and to enhance efficiency of the care delivery process; (8) develops programs to promote the implementation of patient-centered care models; (9) coordinates sharing of best practices between Area Quality Managers and Service Unit Quality Assurance and Performance Improvement officers; and (10) supports and promotes patient-centered care including Patient and Family Engagement, and promotes unification of Area Quality Managers and Service Unit Quality Assurance and Performance Improvement Officers.

Division of Compliance (GAPD)

(1) Coordinates the IHS's compliance program; (2) administers the agency's internal control program in accordance with the Federal Managers' Financial Integrity Act, OMB Circular No. A-123, GAO Green Book, and other applicable requirements; (3) oversees and coordinates the agency's efforts to establish and maintain proper internal

controls; (4) oversees and institutionalizes a continuous compliance review process; (5) manages goals and objectives for the Compliance program, integrates them with broader IHS-wide strategic goals/objectives, and tracks progress toward achieving them; (6) evaluates and monitors systems of internal control across IHS and uses the assessments of the internal control program as an integral part of ERM to effectively manage risks across IHS; (7) Serves as the IHS liaison office to the Government Accountability Office (GAO) and Office of Inspector General (OIG); (8) coordinates the development, clearance, and transmittal of IHS responses and follow-up to reports issued by the OIG, the GAO, and other federal internal and external authorities reviewing risk management and internal controls; (9) provides leadership and direction on activities for continuous improvement of management accountability and administrative systems for effective and efficient program support services IHS-wide; and (10) oversees and coordinates the annual development and submission of the agency's federal Activities Inventory Reform Act report to the HHS.

Section GA-30, Indian Health Service—Delegations of Authority

All delegations of authority and re-delegations of authority made to IHS officials that were in effect immediately prior to this reorganization, and that are consistent with this reorganization, shall continue in effect pending further re-delegation.

Roselyn Tso,

Director, Indian Health Service.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Eunice Kennedy Shriver National Institute of Child Health & Human Development; Notice of Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Advisory Board on Medical Rehabilitation Research.

This will be a hybrid meeting held in-person and virtually and will be open to the public as indicated below.

Individuals who plan to attend in-person or view the virtual meeting and need special assistance or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The meeting can be accessed from the NIH Videocast at the following link: <https://videocast.nih.gov/>.

Name of Committee: National Advisory Board on Medical Rehabilitation Research.

Date: May 5–6, 2025.

Time: May 05, 2025, 10:00 a.m. to 5:00 p.m.

Agenda: NICHD Director's Report, NCMRR Director's Report, Scientific Research Updates.

Address: Eunice Kennedy Shriver National Institute of Child Health and Human Development, 6710 B Rockledge Drive, Bethesda, MD 20817.

Meeting Format: In Person and Virtual Meeting.

Time: May 06, 2025, 10:00 a.m. to 5:00 p.m.

Agenda: NIH Rehabilitation Research Conference Follow-up and Other Relevant Policy and Research Issues.

Address: Eunice Kennedy Shriver National Institute of Child Health and Human Development, 6710 B Rockledge Drive, Bethesda, MD 20817.

Meeting Format: In Person and Virtual Meeting.

Contact Person: Ralph M. Nitkin, Ph.D., Deputy Director, National Center for Medical Rehabilitation, Eunice Kennedy Shriver National Institute of Child Health and Human Development, NIH, 6710B Rockledge Drive, Room 2116, Bethesda, MD 20892-7510, (301) 402-4206, nitkinr@mail.nih.gov.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Persons listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Any member of the public interested in presenting oral comments to the committee may notify the Contact Person listed on this notice at least 10 days in advance of the meeting. Interested individuals and representatives of an organization may submit a letter of intent, a brief description of the organization represented and a short description of the oral presentation. Only one representative of an organization may be allowed to present oral comments and presentations may be limited to five minutes. Both printed and electronic copies are requested for the record. In addition, any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has procedures at <https://www.nih.gov/about->

nih/visitor-information/campus-access-security for entrance into on-campus and off-campus facilities. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors attending a meeting on campus or at an off-campus federal facility will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the NABMRR website: <https://www.nichd.nih.gov/about/advisory/nabmrr>, where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Final Revised Human Immunodeficiency Virus (HIV) Organ Policy Equity Act Safeguards and Research Criteria for Transplantation of Organs From Donors With HIV

AGENCY: National Institutes of Health, Department of Health and Human Services.

ACTION: Final notice.

SUMMARY: Kidney and liver transplants from donors with HIV no longer require institutional review board (IRB)-approved research protocols or compliance with HHS research criteria per a November 27, 2024, final rule. Through this notice, the U.S. Department of Health and Human Services (HHS) announces the publication of this accompanying Final Revised Safeguards and Research Criteria for Transplantation of Organs from Donors with HIV to apply to non-kidney and non-liver organs from donors with HIV for transplantation in recipients with HIV. Under the HOPE Act, these transplants must still occur under an IRB-approved research protocol that is compliant with federal regulations governing human subjects' research. The goal of this research is to increase knowledge about the safety, efficacy, and effectiveness of transplants

other than liver and kidney, from donors with HIV, thereby expanding access to organs for patients with HIV in need of transplants. HHS published Draft Revised Safeguards and Research Criteria on December 12, 2024. A summary of the public comments and HHS' responses follows. As explained below, NIH adopts revised research criteria as proposed except that NIH removed residual stigmatizing language from the title of the Research Criteria.

FOR FURTHER INFORMATION CONTACT: Dr. Jonah Odum, Chief Clinical Transplantation Section, Transplantation Branch, 5601 Fishers Lane, Room 6B21, MSC 9827, Rockville, MD 20892–9827; by email at odimj@niaid.nih.gov; by telephone at (301) 828–7220.

SUPPLEMENTARY INFORMATION:

Background

A. HHS Oversight of Organ Allocation and Transplantation

HHS is responsible for overseeing the operation of the nation's OPTN, including assisting in the equitable allocation of donor organs for transplantation. 42 U.S.C. 274(b)(2)(D). The OPTN is a network of transplant centers, organ procurement organizations, and other providers who work collectively to develop, implement, and monitor organ allocation policy and performance of the organ transplant system. The OPTN is also charged with developing policies on many subjects related to organ donation and transplantation, which include establishing standards of quality pertaining to organs procured for use in transplantation. 42 U.S.C. 274(b)(2)(E).

B. HOPE Act Requirements and Implementation

The enactment of the HOPE Act in 2013, Public Law 113–51, eliminated the prohibition in the United States on transplantation of organs from persons with HIV, allowing transplantation of these organs if certain requirements are satisfied. Under the HOPE Act, organs from donors with HIV may be transplanted only in recipients living with HIV prior to receiving such an organ. 42 U.S.C. 274(b)(3)(A). Further, the HOPE Act requires that transplants of HIV-positive organs occur only in recipients with HIV who are participating in institutional review board (IRB)-approved research protocols that adhere to certain criteria, standards, and regulations. 42 U.S.C. 274(b)(3)(B)(i). However, the Secretary may lift the research and IRB requirements if the Secretary has determined that participation in such

clinical research, as a requirement for such transplants, is no longer warranted. 42 U.S.C. 274(b)(3)(B)(ii).

The HOPE Act outlines the process by which the Secretary may make such a determination under 42 U.S.C. 274(b)(3)(B)(ii). Specifically, the Secretary must routinely review the results of scientific research, in conjunction with the OPTN, to determine whether the results warrant revision of the OPTN standards of quality regarding organs from donors with HIV. If the Secretary determines that those standards of quality should be revised, the Secretary must direct the OPTN to revise the standards. 42 U.S.C. 274f–5(c)(2). The Secretary is also required to revise the regulatory provision implementing the HOPE Act, 42 CFR 121.6, upon determining that revisions to the OPTN standards of quality are warranted. 42 U.S.C. 274f–5(c)(3).

C. Research Criteria for HOPE Act Transplants

In 2015, NIH published proposed research criteria for HOPE Act transplants in the **Federal Register** and solicited public comment. 80 FR 34912 (June 18, 2015). After consideration of public comments received, NIH published the “Final Human Immunodeficiency Virus (HIV) Organ Policy Equity (HOPE) Act Safeguards and Research Criteria for Transplantation of Organs Infected With HIV” (“2015 Research Criteria”). 80 FR 73785 (November 25, 2015). The goals of the 2015 Research Criteria were to ensure that research using organs from donors with HIV was conducted under conditions protecting the safety of research participants and the public and that the results of this research provide a basis for evaluating the safety of transplants of organs from donors with HIV in recipients with HIV. 80 FR 73785.

Introduction

The HOPE Act requires the Secretary of Health and Human Services (the Secretary) to develop and publish criteria for research involving transplantation of organs from donors with HIV to recipients with HIV. In 2015, the National Institutes of Health (NIH), U.S. Department of Health and Human Services (HHS) published the initial Research Criteria applicable to such transplants, which was in effect for all transplants involving organs from donors with HIV as authorized by the HOPE Act. Through a final rule published in the **Federal Register** on November 27, 2024 (89 FR 93484), the Secretary determined that participation

in clinical research should no longer be a requirement for transplantation of kidneys and livers from donors with HIV to recipients with HIV and amended the HHS regulations governing the operation of the Organ Procurement and Transplantation Network (OPTN) to reflect this determination. As a result, HOPE Act transplants involving kidneys and livers from donors with HIV no longer need to comply with the NIH Research Criteria. Given this regulatory change, NIH proposed revised Research Criteria and solicited public comments on such revisions by publication in the **Federal Register** on November 27, 2024 (89 FR 93616). NIH proposed deleting aspects of the Research Criteria that are specific to kidney and liver transplantation. NIH made additional proposed changes to the Research Criteria based on its review of scientific evidence and in consideration of prior public feedback concerning the criteria, including comments provided in the recent rulemaking procedure that modified the OPTN regulations. There were 4 public comments to the Draft Revised HOPE Safeguards and Research Criteria. After considering the public comments, NIH now finalizes the Revised HOPE Safeguards and Research Criteria. As explained below, NIH adopts revised research criteria as proposed except that NIH removed residual stigmatizing language from the title of the 2015 Research Criteria.

Overview of and Response to Comments

Recipient Eligibility Criteria

One commenter supported eliminating the organ-specific experience criteria of 5 HIV D – /R+ transplants over 4 years. Per the commenter, this benchmark was too high a bar for U.S. heart and lung transplant programs to satisfy; thereby, prohibiting participation in HOPE Act transplantation. This commenter proposed eliminating the recipient eligibility criteria of an HIV viral load <50 copies/mL in deference to investigator clinical judgement. NIH chose to maintain the undetectable viral load threshold (<50 copies/mL) that aligns with strong expert opinion from the Guidelines for the use of antiretroviral agents in adults and adolescents with HIV: Transplantation in people with HIV current as of 24 September 2024, <https://clinicalinfo.hiv.gov/en/guidelines/hiv-clinical-guidelines-adult-and-adolescent-arv/transplantation>. This criteria, which applies to transplants involving donors with HIV, does not preclude transplant programs from

listing suitable recipients for organs from donors without HIV.

Removal of Clinical Research Criteria for Living Donors With HIV

One commenter raised concerns over removal of clinical research criteria for living donors with HIV given needs for longer term outcome data. As described above, the final rule issued by the Secretary has removed the mandated IRB-approved research protocol requirements for HOPE Act kidney and liver transplantation. Living heart and lung donors with HIV are rare occurrences in today’s transplant practice. In the event of an intended living donation other than liver and kidney from a person with HIV, we include protections for living donors in the Revised Research Criteria. The revised criteria provide that for such transplants, the deceased donor eligibility criteria will apply. Further, the OPTN collects data on all living donors and transplants, which allows for additional oversight.

Removal of Stigmatizing Language (e.g., Donors Infected With HIV)

One commenter requested the removal of residual stigmatizing language from the title of the 2015 Research Criteria, which has been modified in this final document.

Elimination of Mandatory Pre-Implantation Donor Biopsies

This commenter endorsed the elimination of mandatory pre-implantation donor biopsies, since this is not routinely required for solid organ transplants, and the trend towards standardizing the evaluation of donors with HIV to that of donors without HIV.

A final commenter supported the proposed changes to Research Criteria for HOPE Act kidney and liver transplants and applauded measures taken to improve kidney transplant access for people with HIV.

Conclusion

HHS appreciates the time and effort responding to the Request for Comments. The comments represented the efforts of truly dedicated individuals and organizations in transplantation. The deliberations over the last 3 years and the responses surrounding the NPRM and the Draft Revised Research Criteria were helpful in completing the Final Revised Human Immunodeficiency Virus (HIV) Organ Policy Equity (HOPE) Act Safeguards and Research Criteria for Transplantation of Organs from Donors with HIV.

Changes to the 2015 Research Criteria

NIH has made several changes to the 2015 Research Criteria to reflect the Secretary’s determination, published by regulation on November 27, 2024 that HOPE Act kidney and liver transplants are no longer required to be conducted as research subject to the 2015 Research Criteria, and to continue to further the goals shared in 2015 with respect to HOPE Act transplants of other organs from donors with HIV that remain subject to the Research Criteria. NIH has removed the requirements from the 2015 Research Criteria applicable to HOPE Act kidney and liver transplants.

NIH has also made other changes to the 2015 NIH Research Criteria for conducting HOPE Act transplants of organs other than kidneys and livers (primarily heart and lung transplants) in

IRB-approved research. These changes are intended to accelerate research, ensure research participant safety, and maintain stakeholder confidence in clinical research conducted under the HOPE Act. Notable revisions include the elimination of (i) the transplant program experience requirement of five organ-specific transplants of organs from a donor without HIV in a recipient with HIV conducted over 4 years; (ii) mandated pre-implant biopsies; and (iii) the requirement for HIV independent advocates for living donors with HIV and recipients with HIV. Other organs (including multi visceral organs such as small intestine, stomach, liver, pancreas and colon) and multi organ transplants (e.g., heart-kidney) must comply with the Revised Research Criteria for inclusion of any non-kidney or non-liver organs from donors with HIV and subject to IRB approval.

The revisions to the 2015 Research Criteria are as follows:

Final Revised Human Immunodeficiency Virus (HIV) Organ Policy Equity (HOPE) Act Safeguards and Research Criteria for Transplantation of Organs From Donors With HIV

NIH	National Institutes of Health.
NPRM	Notice of proposed rule making.
OI	Opportunistic infection.
OPO	Organ procurement organization.
PML	Progressive multifocal leukoencephalopathy.
R–	Recipient HIV negative.
R+	Recipient HIV positive.
RNA	Ribonucleic acid.
SOPs	Standard operating procedures.

Definitions

Antiretroviral therapy (ART) resistance.	When an HIV strain develops drug resistance and/or genetic mutations associated with drug resistance.
HIV superinfection	Systemic HIV superinfection is defined as the detection of HIV viral sequences that phylogenetically cluster with the donor's viral population at two or more time points in circulating blood cells, plasma, or recipient tissues other than the allograft.
Suppressed viral load	HIV RNA below 50 copies per mL with current technology at time of publication of this research criteria document.

The NIH Research Criteria are set forth in six broad categories (Donor Eligibility, Recipient Eligibility, Transplant Hospital Criteria, Organ Procurement Organization (OPO)

Responsibilities, Prevention of Inadvertent Transmission of HIV, and Study Design/Required Data Elements and Outcome Measures). Table 1 summarizes the Final Revised HOPE

Act Research Criteria in each category and compares them to the 2015 Research Criteria.

TABLE 1—FINAL REVISED HUMAN IMMUNODEFICIENCY VIRUS (HIV) ORGAN POLICY EQUITY (HOPE) ACT SAFEGUARDS AND RESEARCH CRITERIA FOR TRANSPLANTATION OF ORGANS FROM DONORS WITH HIV ¹

Category	Previous criteria	Revised criteria [No longer pertains to kidney and liver transplants ¹]
Donor Eligibility: <i>All deceased donors with HIV</i>	No evidence of invasive opportunistic complications of HIV infection. Pre-implant donor organ biopsy	No evidence of invasive opportunistic complications of HIV infection. There is no requirement for a pre-implantation biopsy.*
<i>Deceased donor with known history of HIV and prior antiretroviral therapy (ART).</i>	Viral load: no requirement	Viral load: no requirement.
<i>Living donor with HIV</i>	The study team must describe the anticipated post-transplant antiretroviral regimen(s) to be prescribed for the recipient and justify its conclusion that the regimen will be safe, tolerable, and effective. Well-controlled HIV infection defined as: • Cluster of Differentiation 4 (CD4) + T-cell count $\geq 500/\mu\text{L}$ for the 6-month period before donation. • HIV-1 ribonucleic acid (RNA) < 50 copies/mL • No evidence of invasive opportunistic complications of HIV infection. Pre-implant donor organ biopsy.	The study team must describe the anticipated post-transplant antiretroviral regimen(s) to be prescribed for the recipient and justify its conclusion that the regimen will be safe, tolerable, and effective. <i>Thoracic Organs Exception:</i> The living donor standards are not relevant for thoracic organ transplant except in the rare instances of living donor lung transplant or "domino" heart transplant. In such circumstances, the deceased donor eligibility criteria should be followed. <i>Other Organs:</i> If a living donor with HIV donates another type or organ (other than kidney and liver), the deceased donor eligibility criteria should be followed.*
Recipient Eligibility	CD4+ T-cell count $\geq 200/\mu\text{L}$ (kidney) CD4+ T-cell count $\geq 100 \mu\text{L}$ (liver) within 16 weeks prior to transplant and no history of opportunistic infection (OI); or $\geq 200 \mu\text{L}$ if history of OI is present. HIV-1 RNA < 50 copies/mL and on a stable antiretroviral regimen. No evidence of active opportunistic complications of HIV infection. No history of primary central nervous system (CNS) lymphoma or progressive multifocal leukoencephalopathy (PML).	CD4+ T-cell count: no minimum threshold when all other recipient eligibility criteria are met.* HIV-1 RNA < 50 copies/mL and on a stable antiretroviral regimen. No evidence of active opportunistic complications of HIV infection. No history of primary central nervous system (CNS) lymphoma or progressive multifocal leukoencephalopathy (PML).
Transplant Hospital Criteria	Transplant hospital with established program for care of subjects with HIV. HIV program expertise on the transplant team Organ-specific experience with transplants of organs from donors without HIV to recipients with HIV (5 D-/R+ transplant cases over 4 years). Standard operating procedures (SOPs) and training for the organ procurement, implanting/operative, and post-operative care teams for handling subjects with HIV, and organs and tissues from individuals with HIV. IRB-approved research protocol for transplantation of organs from donors with HIV in recipients with HIV.	Transplant hospital with established program for care of patients with HIV. HIV program expertise on the transplant team. There is no longer a center specific case experience requirement with transplants of organs from donors without HIV to recipients with HIV.* Transplant patients with organs from donors with HIV must be managed with a multidisciplinary team before, during, and after transplant. The multidisciplinary team must include transplant surgeons, physicians, HIV specialists, nurses, social workers, and pharmacists capable of therapeutic drug monitoring to minimize drug-drug interactions. Standard operating procedures (SOPs) and training for the organ procurement, implanting/operative, and post-operative care teams for handling HIV-infected subjects with HIV, and organs and tissues from individuals with HIV. IRB-approved research protocol for transplantation of organs from donors with HIV in recipients with HIV for the applicable organs.*

¹ Consistent with the final rule amending the OPTN regulations, transplants using kidneys and livers from donors with HIV no longer need to comply with the HOPE Act Research Criteria. When multiple organs from donors with HIV are implanted simultaneously (e.g., dual heart-kidney or dual lung-kidney), the Research Criteria apply to such multiple organ transplants if the transplant of

any of the organs are subject to the revised Research Criteria. For example, while a kidney transplant from a donor with HIV no longer is required to be conducted in accordance with the Research Criteria, a dual heart-kidney or dual lung-kidney transplant with organs from donors with HIV is required to be conducted in accordance with the Research Criteria and in accordance with an IRB-approved research

protocol. A dual liver-kidney transplant with from donors with HIV is not required to be conducted in accordance with the Research Criteria, as neither liver transplants nor kidney transplants from donors with HIV are required to be conducted as research.

TABLE 1—FINAL REVISED HUMAN IMMUNODEFICIENCY VIRUS (HIV) ORGAN POLICY EQUITY (HOPE) ACT SAFEGUARDS AND RESEARCH CRITERIA FOR TRANSPLANTATION OF ORGANS FROM DONORS WITH HIV ¹—Continued

Category	Previous criteria	Revised criteria [No longer pertains to kidney and liver transplants ¹]
OPO Responsibilities	Institutional biohazard plan outlining measures to prevent and manage inadvertent exposure to and/or transmission of HIV. Provide each living donor with HIV and recipient with HIV with an “independent advocate”. Policies and SOPs governing the necessary knowledge, experience, skills, and training for independent advocates. SOPs and staff training procedures for working with deceased donors with HIV and their families in pertinent history taking; medical chart abstraction; the consent process; and handling blood, tissues, organs, and biospecimens. Biohazard plan to prevent and manage HIV exposure and/or transmission.	Institutional biohazard plan outlining measures to prevent and manage inadvertent exposure to and/or transmission of HIV. There is no longer a requirement to provide an HIV independent advocate beyond standard site practices.* Policies and SOPs governing the necessary knowledge, experience, skills, and training for independent advocates. SOPs and staff training procedures for working with deceased donors with HIV and their families in pertinent history taking; medical chart abstraction; the consent process; and handling blood, tissues, organs, and biospecimens. Biohazard plan to prevent and manage HIV exposure and/or transmission.
Prevention of Inadvertent Transmission of HIV.	Each participating Transplant Program and OPO shall develop an institutional biohazard plan for handling organs from HIV-positive donors that is designed to prevent and/or manage inadvertent transmission or exposure to HIV. Procedures must be in place to ensure that human cells, tissues, and cellular and tissue-based products (HCT/Ps) are not recovered from donors with HIV for implantation, transplantation, infusion, or transfer into a human recipient; however, HCT/Ps from a donor determined to be ineligible may be made available for non-clinical purposes.	Each participating Transplant Program and OPO shall develop an institutional biohazard plan for handling organs from HIV-positive donors that is designed to prevent and/or manage inadvertent transmission or exposure to HIV. Procedures must be in place to ensure that human cells, tissues, and cellular and tissue-based products (HCT/Ps) are not recovered from donors with HIV for implantation, transplantation, infusion, or transfer into a human recipient; however, HCT/Ps from a donor determined to be ineligible may be made available for non-clinical purposes.
Required Data Elements and Outcome Measures**		
Wait List Candidates	HIV status CD4+ T-cell counts Co-infection (hepatitis C virus [HCV], hepatitis B virus [HBV]). HIV viral load ART resistance Removal from wait list (death or other reason) Time on wait list	HIV status. CD4+ T-cell counts. Co-infection: • Hepatitis C (HCV RNA). • Hepatitis B (HBV deoxyribonucleic acid, HBV antibody). • Cytomegalovirus (CMV immunoglobulin G [IgG]).* HIV viral load. ART resistance. Removal from wait list (death or other reason). Time on wait list. Renal dysfunction.* Liver dysfunction.* Indication for transplant.* Use of mechanical circulatory devices.* Use of extracorporeal membrane oxygenation, intra-aortic balloon pump, ventricular assist device.*
Donors (all)	Type (Living or deceased) HIV status (new diagnosis of HIV, or known diagnosis of HIV). CD4+ T-cell count Co-infection (HCV, HBV) HIV viral load ART resistance	Type Donation after Brain Death vs. Donation after Circulatory Death vs. Living Donor.* HIV status (new diagnosis of HIV, or known diagnosis of HIV). CD4+ T-cell count. Co-infection (HCV, HBV). HIV viral load. ART resistance. Ex-vivo perfusion.* • Duration. • Warm and cold ischemia time. • Normothermic regional perfusion.* • Duration. • Warm and cold ischemia time.
Living Donors	Progression to renal insufficiency in kidney donors Progression to hepatic insufficiency in liver donors. Change in ART regimen as a result of organ dysfunction Progression to acquired immunodeficiency syndrome (AIDS). Failure to suppress viral replication (persistent HIV viremia). Death Rejection rate (annual up to 5 years) Progression to AIDS New OI Failure to suppress viral replication (persistent HIV viremia). HIV-associated organ failure Malignancy Graft failure	These data elements no longer apply since kidney or liver donation from a living donor with HIV no longer falls under the Research Criteria except that these data elements apply to simultaneous multiple organ transplants. Change in ART regimen as a result of organ dysfunction. Progression to AIDS. Failure to suppress viral replication (persistent HIV viremia). Death. Rejection rate (annual through 5 years). Progression to AIDS. New OI. Failure to suppress viral replication (persistent HIV viremia). HIV-associated organ failure. Malignancy. Graft failure.
Transplant Recipients

Category	Previous criteria	Revised criteria [No longer pertains to kidney and liver transplants ¹]
	Mismatched ART resistance versus donor Death	Mismatched ART resistance versus donor. Death. Type of rejection (antibody mediated versus cellular rejection). Chronic heart allograft vasculopathy.* Chronic lung allograft dysfunction.* Hospitalized infections.* Estimated glomerular filtration rate.* HIV superinfection.* Re-transplantation.* Simultaneous multiple organ transplants.

* Denotes a revision of the 2015 Research Criteria.

** The previous category of outcome measures (from the original 2015 Research Criteria) is modified to also include data elements.

A summary of the revisions in each category of the Research Criteria is provided below as compared with the 2015 Research Criteria.

Donor Eligibility

The only change to this category applies to all deceased donors with HIV. NIH has removed the requirement for a pre-implantation donor organ biopsy. Although pre-implantation biopsies for kidneys and livers have occurred regularly, pre-implant donor heart and lung biopsies are not routinely performed. Likewise, donor biopsies for other organs are not routine. Given that kidney and liver transplants are no longer subject to the Research Criteria, NIH has removed the requirement for pre-implantation biopsies. Any pre-implant biopsies obtained, as part of future IRB-approved research protocols, should be stored in accordance with local institutional requirements and the federal regulations applicable to slides, tissues and blocks, if applicable. 42 CFR 493.1105 (<https://www.ecfr.gov/current/title-42/chapter-IV/subchapter-G/part-493/subpart-J/section-493.1105>).

With respect to living donors with HIV, the 2015 Research Criteria defined a well-controlled HIV infection and required pre-implant donor organ biopsies. The last living lobar lung transplant procedure in the U.S. was performed in 2013. NIH has removed this element as not relevant for heart and lung transplantation except in the rare instances of living donor lung transplant or “domino” heart transplants. In such circumstances, the deceased donor eligibility criteria apply. If another type of organ is donated by a living donor with HIV, the deceased donor eligibility criteria apply.

Recipient Eligibility

The only change in this category concerns CD4+ T-cell counts. The 2015 Research Criteria imposed requirements with respect to the CD4+ T-cell counts

specific to livers and kidneys. Given that kidney and liver transplants are no longer required to comply with the Research Criteria, there is no minimum threshold CD4+ T-cell counts for other organs when all other eligibility criteria are met.

Transplant Hospital

NIH made several changes to this category. The requirement for prior experience with transplantation of organs from donors without HIV in recipients with HIV. The 2015 Research Criteria required experience with five transplants over the four preceding years involving organs from donors without HIV transplanted into recipients with HIV. NIH has removed this requirement, which was perceived by many as burdensome and a barrier to entry to transplant hospitals wishing to perform HOPE Act transplants. To maximize favorable outcomes and effectively prevent and manage adverse events, NIH has specified that all patients with transplants involving donors with HIV be managed by multidisciplinary teams before, during, and after transplantation. NIH outlines specific members of this multidisciplinary team.

NIH has removed the requirement that each living donor with HIV and each transplant recipient with HIV be provided with an HIV independent advocate. NIH advises that standard site practices apply. Based on a decade of HOPE Act clinical experience, stakeholder surveys have indicated that a requirement for an independent advocate is widely perceived as a redundant layer of consent and a potential barrier for some HIV patients who would otherwise benefit from an HIV donor transplant. The NIH notes that per current OPTN policy and guidance, all living donors, including those with HIV, have an independent advocate. NIH’s change to the 2015 Research Criteria will not alter that.

Organ Procurement Organization (OPO) Responsibilities

NIH did not make any changes to this category.

Prevention of Inadvertent Transmission of HIV

NIH did not make any changes to this category.

Required Outcome Measures and Data Elements

The 2015 Research Criteria referenced required outcome measures. NIH is using the more precise “Required Data Elements and Outcome Measures.” NIH notes that data on these existing and new outcome measures is collected by the OPTN as specified by the Secretary. NIH does not intend to incorporate data collection requirements beyond those collected by the OPTN.

Waitlist Candidates: NIH has added several data elements for waitlist candidates. NIH has added cytomegalovirus (CMV immunoglobulin G [IgG]) as a required outcome measure for co-infection. NIH also included the following additional data elements and outcome measures: renal dysfunction, liver dysfunction, indication for transplant, use of mechanical circulatory devices, and use of extracorporeal membrane oxygenation, intra-aortic balloon pump, and ventricular assist device.

Donors (All): First, NIH included additional elements related to type of deceased donation: after brain death (DBD) or after circulatory death (DCD) given the increasing use of the latter technique in the U.S. In addition, NIH has added the following data elements for all donors (if applicable): *ex-vivo* perfusion and normothermic regional perfusion including durations of warm and cold ischemia.

Living Donors: The 2015 Research Criteria included as required outcome measures progression to renal insufficiency in kidney living donors.

Because kidney and liver transplants are no longer subject to the Research Criteria, NIH plans to retain these outcomes only where applicable (e.g., for deceased donor heart-living donor kidney transplants, deceased donor heart-living donor liver transplants, and for other organs subject to the Research Criteria).

Transplant Recipients: NIH has added several additional data elements and outcome measures to those included for transplant recipients in the 2015 Research Criteria. NIH has added the following outcome measures: type of rejection (antibody mediated versus cellular rejection), chronic allograft vasculopathy (heart), chronic lung allograft dysfunction (lung), hospital infections, estimated glomerular filtration rate (heart and lung), HIV superinfection, graft failure (heart and lung), re-transplantation, and simultaneous multiple organ transplants.

While not included as a requirement of the Research Criteria, NIH has included the following recommendation regarding patient management:

NIH recommends that transplant programs and healthcare providers follow current and updated practice management guidelines. For specific guidance, transplant programs and healthcare providers should consult vaccination guidance (<https://www.cdc.gov/acip-recs/hcp/vaccine-specific/index.html>) and expert guidance for the management of patients with HIV pre-, during-, and post-transplant summarized in: Transplantation in people with HIV (<https://clinicalinfo.hiv.gov/en/guidelines/hiv-clinical-guidelines-adult-and-adolescent-arv/whats-new>).

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Office of the Secretary; Notice of Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting of Interagency Autism Coordinating Committee.

The meeting will be virtually held and is open to public viewing. The connection information and how to access the meeting will be available on the IACC website <https://iacc.hhs.gov/meetings/iacc-meetings/2025/summary-of-advances/january14/>. Advanced registration is recommended. Individuals wishing to participate virtually that need special assistance or other reasonable accommodations should submit a request to the Contact Person listed on this notice at least seven (7) business days prior to the meeting.

The purpose of the IACC meeting is to discuss the committee's nominations of articles for the 2024 IACC *Summary of Advances in Autism Research* report. The final report will summarize the top 20 advances in autism biomedical and services research, as selected by the IACC.

Name of Committee: Interagency Autism Coordinating Committee 2024 IACC Summary of Advances in Autism Research.

Date: January 14, 2025.

Time: 2:00 p.m. to 4:00 p.m.

Agenda: To discuss the committee's nominations of articles for the 2024 IACC Summary of Advances in Autism Research report.

Address: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852.

Meeting Format: Virtual Meeting.

Cost: The meeting is free and open to the public.

Registration: A registration web link will be posted on the IACC website (www.iacc.hhs.gov) prior to the meeting. Pre-registration is recommended.

Contact Person: Ms. Rebecca Martin, Office of National Autism Coordination, National Institute of Mental Health, NIH, Phone: 301-435-0886, Email: IACCPublicInquiries@mail.nih.gov.

Technical issues: If you experience any technical problems with the zoom webcast, please email IACCPublicInquiries@mail.nih.gov.

Disability Accommodations: All IACC Full Committee Meetings provide Closed Captioning through the Zoom platform. Individuals whose full participation in the meeting will require special accommodations (e.g., sign language or interpreting services, etc.) must submit a request to the Contact Person listed on the notice at least seven (7) business days prior to the meeting. Such requests should include a detailed description of the accommodation needed and a way for the IACC to contact the requester if more information is needed to fill the request. Special requests should be made at least seven (7) business days prior to the meeting; last-minute requests may be made but may not be possible to accommodate. Meeting schedule subject to change.

More Information: Information about the IACC is available on the website: <http://www.iacc.hhs.gov>.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person. In the interest of security, NIH has procedures at <https://www.nih.gov/about-nih/visitor-information/campus-access-security> for entrance into on-campus and off-campus facilities. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors attending a meeting on campus or at an off-campus federal facility will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Dated: December 20, 2024.

David W. Freeman,

Supervisory Program Analyst, Office of Federal Advisory Committee Policy.

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[CIS No. 2796–25; DHS Docket No. USCIS–2022–0011]

Termination of Trial Testing of Redesigned Naturalization Test for Naturalization Applications

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice.

SUMMARY: On December 15, 2022, DHS published a **Federal Register** Notice entitled “*Trial Testing of Redesigned Naturalization Test for Naturalization Applications*,” which announced it intended to conduct a nationwide trial of planned changes to the naturalization test, including a standardized English-speaking test, as part of the requirement to demonstrate an understanding of the English language, and a civics test with updated content and format. Most comments received on the proposed trial test, including those from immigrant advocacy organizations and external stakeholders, expressed concerns about the trial test. Therefore, USCIS will no longer pursue the announced trial test.

DATES: As of December 30, 2024, USCIS will no longer pursue the trial test as described in 87 FR 76634 (Dec. 15, 2022).

FOR FURTHER INFORMATION CONTACT:

Mary Flores, Office of Citizenship, U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS), 5900 Capital Gateway Drive, Camp Springs, MD 20746; telephone 240–721–3000 or email natzredesign22@uscis.dhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

On December 15, 2022, USCIS issued a notice indicating its plan to conduct a trial of both a standardized English-speaking test (use of photographs which the applicant would be asked to describe) as part of the requirement to demonstrate an understanding of the English language and a civics test with updated content and format (multiple choice test).¹ The Executive Order on Restoring Faith in Our Legal Immigration Systems and Strengthening Integration and Inclusion Efforts for New Americans,² directed DHS to eliminate barriers in and otherwise improve the existing naturalization process including the civics and English language tests. Along with the Executive Order and feedback from stakeholders about the standardization and structure of the naturalization test, USCIS developed the trial test for the naturalization test redesign. USCIS announced conducting the trial as part of its effort to redesign the naturalization test to better ensure that the English-speaking part of the English Language requirements is standardized and sufficiently tests the ability to understand words in ordinary usage in the English language.³ Furthermore, USCIS intended to update the civics test content to reflect current best practices in test design and to redesign the civics test.⁴

II. Rationale for Termination

USCIS hosted virtual public engagements on the naturalization test redesign trial tests on January 12, 2023, March 3, 2023, April 28, 2023, and May 31, 2023.⁵ Additionally, USCIS and the Department of Homeland Security (DHS) Office of the CIS Ombudsman

hosted a webinar on July 19, 2023.⁶ These engagements provided an overview of the proposed changes and next steps, including seeking volunteer community-based organizations (CBOs) that work with immigrant English language learners and lawful permanent residents preparing for naturalization to take the trial test, and utilizing the results of the trial to support changes to the naturalization test. During these engagements, USCIS invited all interested parties to submit written data, views, comments, and arguments on all aspects of the proposed trial testing. At these engagements, some comments USCIS received were in opposition to the trial test. USCIS also received comments through email or submitted letters that opposed the trial test or had positive comments. USCIS received more than 1300 comments from stakeholders from engagements, emails and submitted letters. The majority of comments opposed the trial testing.

USCIS received some positive comments about the trial English Test which indicated an appreciation for a revised test, a focus of analysis-driven approach, and attempt to make the test fairer and more efficient, and that the trial test may be easier for lower-level students. Most of the public feedback, however, expressed concerns about the proposed changes to the English-speaking naturalization test. These commenters stated the change:

- Would create new barriers to naturalization rather than improve the naturalization process in keeping with Executive Order 14012 on Restoring Faith in Our Legal Immigration Systems and Strengthening Integration and Inclusion Efforts for New Americans.⁷
- Would be adding a testing requirement, creating an additional task for the naturalization interview and a new exam for the applicant to prepare for, and would not elicit an applicant's English proficiency in as relevant or accurate a manner as the current speaking evaluation.⁸

USCIS received some positive comments on the announcement of the multiple-choice format of the trial test, including that it would level the test

⁸ *Id.*

better for English as a second language students at all levels. Most feedback, however, opposed changing the civics test to a multiple-choice format. These commenters stated the change:

- Would require reading comprehension skills at a significantly higher level of English proficiency and reading vocabulary knowledge than is currently required for naturalization.⁹
- Would require test-taking skills in multiple choice format that is not currently required of naturalization applicants.¹⁰
- Would create new challenges for adult learners because it requires a higher level of reading ability that cannot be met by low-literacy adults who learn orally.¹¹
- Would pose a barrier to those without formal education.¹²

The objective of the trial was to determine an efficient way to reduce undue barriers¹³ to taking the naturalization test and the majority of the feedback received revealed concerns that the trial version of the test may increase burdens on applicants. Therefore, USCIS has decided to terminate the previously proposed trial test altogether.

III. Termination Is Immediately Effective

The proposed trial test is terminated effective immediately. USCIS continues to use the current 2008 version of the English and civics test.¹⁴

Ur M. Jaddou,

Director, U.S. Citizenship and Immigration Services, Department of Homeland Security.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6505–N–01]

Request for Information Regarding Resilience Measures and Insurance Coverage

AGENCY: Office of Policy Development and Research, Department of Housing and Urban Development (HUD).

ACTION: Request for information.

SUMMARY: Homeowners and housing providers have experienced significant increases in property insurance premiums and deductibles in the past several years, along with reductions in insurance coverage, added requirements, and withdrawals of insurance companies from certain markets. In July 2024, HUD convened an insurance summit to address challenges in the property insurance market. The insurance summit highlighted the need to increase property resilience to natural hazards and to clarify the relationship between resilience measures and costs to property owners, including the cost of insurance. Through this Request for Information (RFI), HUD seeks public input regarding how best to assess measures to increase the resilience of residential properties to natural hazards and extreme weather. This information will allow HUD to develop policies that better support HUD's program participants in increasing resilience to natural hazards, including extreme weather, and accessing affordable insurance for their properties.

DATES: *Comment Due Date:* February 28, 2025. Late-filed comments will be considered to the extent practicable.

ADDRESSES: Interested persons are invited to submit comments responsive to this RFI. All submissions must refer to the docket number and title of the RFI. Commenters are encouraged to identify the number of the specific question or questions to which they are responding. Responses should include the name(s) of the person(s) or organization(s) filing the comment; however, because any responses received by HUD will be publicly available, responses should not include any personally identifiable information or confidential commercial information.

There are two methods for submitting public comments.

1. **Electronic Submission of Comments.** Interested persons may submit comments electronically through the Federal eRulemaking Portal at <http://www.regulations.gov>.

2. **Submission of Comments by Mail.** Comments may be submitted by mail to

the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW, Room 10276, Washington, DC 20410–0500. HUD strongly encourages commenters to submit their feedback and recommendations electronically. Electronic submission of comments allows the commenter maximum time to prepare and submit a response, ensures timely receipt by HUD, and enables HUD to make comments immediately available to the public. Comments submitted electronically through the <http://www.regulations.gov> website can be viewed by other commenters and interested members of the public. Commenters should follow the instructions provided on that site to submit comments electronically.

Note: To receive consideration as public comments, comments must be submitted through one of the two methods specified above. Again, all submissions must refer to the docket number and title of the notice.

No Facsimile Comments. Facsimile (FAX) comments are not acceptable.

Public Inspection of Public Comments. All comments and communications properly submitted to HUD will be available for public inspection and copying between 8 a.m. and 5 p.m. weekdays at the above address. Due to security measures at the HUD Headquarters building, an advance appointment to review the public comments must be scheduled by calling the Regulations Division at (202) 708–3055 (this is not a toll-free number). HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as from individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

FOR FURTHER INFORMATION CONTACT: Todd Richardson, General Deputy Assistant Secretary, Office of Policy Development and Research, Department of Housing and Urban Development, 451 7th Street SW, Room 8100, Washington, DC 20410–0500; telephone number 202–402–5706 (this is not a toll-free number). HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit <https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs>.

SUPPLEMENTARY INFORMATION:

I. Background

Homeowners and housing providers have experienced significant increases in property insurance premiums and deductibles in the past several years, along with reductions in insurance coverage, added requirements, and withdrawals of insurance companies from certain markets. Increased insurance costs and the unavailability of coverage are negatively impacting HUD's program participants, including public housing authorities (PHAs), multifamily property owners, and Tribal communities, as well as borrowers of FHA insured mortgages. In July 2024, HUD convened an insurance summit to address challenges in the property insurance market. The insurance summit highlighted the need to increase property resilience to natural hazards, including extreme weather, and to clarify the relationship between resilience measures and costs to property owners, including the cost of insurance.

Increasing insurance costs and lack of insurance availability pose unique challenges to HUD's program participants. Unlike owners who provide market-rate housing, affordable housing providers generally cannot pass their insurance cost increases on to tenants through increased rents. Currently, some affordable housing properties faced with suddenly higher insurance costs report that they are coping in short-term ways, including reducing insurance coverage or cutting back on providing services or amenities to cut costs. Owners and PHAs have also reported that they may have to resort to delaying capital repairs or consider the sale of properties and further consolidation of their portfolios. Additionally, financing deals for the development of new properties are becoming more difficult to pencil out or close.

Difficulty obtaining sufficient insurance coverage at a reasonable price also affects both new and existing FHA borrowers in all property types, including site-built single family, manufactured housing, and multifamily housing. For existing FHA borrowers, rising insurance costs increase monthly housing expenses, causing financial stress on the borrower and affecting their ability to maintain monthly mortgage payments. Some cash-strapped borrowers resort to canceling their insurance policies, taking them out of compliance with mortgage requirements and potentially affecting their ability to receive federal assistance in the case of a disaster. In many instances, companies simply are not renewing

existing insurance policies, leaving consumers searching for new, and often more expensive, policies that often provide less coverage. Additionally, the lack of affordable and available insurance coverage can also make it more challenging for individuals to sell their home. For potential borrowers, increasing insurance costs may limit affordable housing options or participation in the market altogether.

These challenges are occurring at the same time the nation faces a housing supply shortage, and they could further decrease housing affordability and availability across the nation.

Improving resilience measures for properties can reduce their damage from natural disasters and extreme weather, and, therefore, reduce costs to insurers. HUD's insurance summit highlighted examples of state programs such as those in Alabama and Louisiana connecting resilience standards to reduced insurance costs. Following the summit, HUD is releasing this RFI to better understand the challenges facing property owners and determine what more HUD can be doing to promote and encourage resilience investments in communities and reduced insurance costs for property owners.

II. Purpose of This Request for Information

The purpose of this RFI is to solicit information regarding resilience measures to mitigate damage from natural hazards, including extreme weather, to allow HUD to develop policies that better support HUD's program participants in increasing resilience and their ability to access affordable insurance coverage for their properties.

III. Specific Information Requested

While HUD welcomes all comments relevant to increasing resilience of HUD-supported housing and reducing insurance costs, HUD is particularly interested in receiving input from interested parties on the questions outlined below.

Single Family and Multifamily Housing, Public Housing and Insurance Risk Pools

Question for comment #1: What are the financial savings (e.g., insurance premiums or avoided casualty loss) and other benefits associated with modifications to existing single family or multifamily properties, including public housing, to mitigate damage from natural hazards or increase resilience in the event of a natural hazard? How do these savings compare to the costs associated with those modifications?

Please list modifications and each of their damage mitigation benefits as well as financial and time costs. Distinguish by peril type (earthquake, hurricane, floods, hail, drought, wildfire, extreme heat, landslide, etc.) or geography as appropriate, as well as by building and construction type.

Question for comment #2: What are the financial savings (e.g., insurance premiums or avoided casualty loss) and other benefits associated with building new construction properties with building and design features that mitigate damage from natural hazards or increase resilience in the event of a natural hazard? How do these savings compare to the costs associated with those features? Please list building and design features and each of their damage mitigation benefits as well as financial and time costs. Distinguish by peril type (earthquake, hurricane, floods, hail, drought, wildfire, extreme heat, landslide, etc.) or geography as appropriate, as well as by building and construction type.

Question for comment #3: What data exist around the additional time or financial costs, if any, of rebuilding to or above code post-disaster instead of waiving requirements? Is there information on the longer-term costs (e.g., financial or damage-related) related to waiving building requirements when rebuilding post-disaster?

Question for comment #4: Are there local or state statutes, regulations, or incentives that help property owners reduce costs or save on expenses, including insurance costs, when they invest in resilience (e.g., reduced insurance premiums, tax abatements, subsidies/discounts)? If possible, please provide data on how successful these measures have been in saving on expenses.

Question for comment #5: Please identify any industry standards related to resilience that you have used or referenced in your work. If possible, please document where the standard has been applied, at what scale, and to what effect.

Question for comment #6: Are there local, state, or regional outreach or education efforts that have been successful in helping homeowners and housing providers understand the direct and indirect benefits of investing in resilience measures?

Question for comment #7: What data would be useful for insurers (including risk pools) and reinsurers on efforts to mitigate damage from natural hazards or increase resilience to natural hazards, such as housing elevations, home

resilience upgrades, and infrastructure improvements?

Tribal Communities

Question for comment #8: What unique challenges do Tribal communities face when implementing housing resilience measures? How can HUD support Tribal communities in addressing these challenges?

Question for comment #9: What partnerships between Tribal governments, local authorities, and other organizations exist to enhance housing resilience on Tribal lands? Are there ways in which these partnerships can be expanded or improved? Please explain and provide specific recommendations, successes, and challenges as well as any supporting data as applicable.

Question for comment #10: How can Tribes or organizations in remote locations with limited options for resilience investments better access or incorporate resilience strategies, resources, or methods? What resources can HUD provide in partnership with groups in these areas?

Question for comment #11: What Traditional Knowledge and Indigenous Knowledge about building practices can be integrated with modern resilience measures in tribal communities? Please explain and provide specific recommendations, as well as any supporting data.

Manufactured Housing

Question for comment #12: In addition to addressing manufactured housing in the above questions where relevant, how else can manufactured home resilience be enhanced during all types of natural disasters (e.g., hurricanes, floods, earthquakes, wildfires, or tornadoes)? Please provide relevant research as well as any supporting data as applicable.

Solomon Greene,

Principal Deputy Assistant Secretary.

BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

Geological Survey

[GX25GK009970000]

Public Meetings of the Advisory Committee on Landslides

AGENCY: Geological Survey, Department of the Interior.

ACTION: Notice of public meetings.

SUMMARY: In accordance with the Federal Advisory Committee Act

(FACA) of 1972, the U.S. Geological Survey (USGS) is publishing this notice to announce that Federal Advisory Committee meetings of the Advisory Committee on Landslides (ACL) will take place and are open to members of the public.

DATES:

Meeting: The ACL will meet via web conference on Thursday, January 16, 2025, from 2:00 p.m. to 6:00 p.m. Eastern Standard Time.; and in-person on Tuesday, April 1, 2025, from 9:00 a.m. to 5:00 p.m. and Wednesday, April 2, 2025, from 9:00 a.m. to 1:00 p.m. Eastern Standard Time.

Registration: Registration to attend or participate in the meetings is required. To register, please contact the Designated Federal Officer (DFO) (see **FOR FURTHER INFORMATION CONTACT**).

ADDRESSES: The meeting on January 16, 2025, will be held via web conference. Meetings on April 1, 2025, and April 2, 2025, will be held in the Stewart Lee Udall Department of the Interior Building, 1849 C Street NW, Washington, District of Columbia, 20240. Members of the public may attend the meeting in-person or can attend via web conference. Please note admittance instructions under the **SUPPLEMENTARY INFORMATION** section of this notice. Comments can be sent to the DFO (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Mr. Jonathan Godt, Landslide Hazards Program Coordinator, Geological Hazards Science Center, USGS, by email at jgodt@usgs.gov; or by telephone at (303) 905-9468.

Individuals in the United States who are deaf, blind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside of the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the FACA of 1972 (5 U.S.C. ch. 10), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR part 102-3.

The ACL is composed of no fewer than 11 members, appointed by the Secretary of the Interior, who are selected for their established qualifications in landslide hazard and risk or related fields, records of distinguished service in their professional community, knowledge of issues affecting the National Landslide Hazards Reduction Program (NLHRP),

and to represent a cross-section of views and expertise, including a range of geographies and communities impacted by landslide hazards in the United States.

Purpose of the Meeting: The ACL provides advice and recommendations to the Secretary of the Interior through the Interagency Coordinating Committee on Landslide Hazards on implementation of NLHRP. Additional information about the ACL is available at Advisory Committee on Landslides (ACL) | U.S. Geological Survey.

The purpose of the meetings is for the ACL to establish its business; complete required ethics and FACA briefings; receive an overview of the USGS, the USGS Landslide Hazards Program, and the National Landslide Preparedness Act (Pub. L. 116-323); consider appointments of a Chair and Vice-Chair; and discuss agency activities under the NLHRP. Agendas may change to accommodate ACL business. Final agendas will be posted on the ACL website at Advisory Committee on Landslides (ACL) | U.S. Geological Survey.

Members of the public wishing to participate in the web conference meeting should contact the DFO (see **FOR FURTHER INFORMATION CONTACT**) at least three (3) business days prior to the meeting. After pre-registering, participants will be provided with instructions on how to join via web conference. Any member of the public wishing to attend the in-person meeting in person must pre-register to be admitted into the building. Please contact the DFO (see **FOR FURTHER INFORMATION CONTACT**) at least five (5) business days prior to the meeting. Non-U.S. citizens may need to submit additional information. Seating for in-person attendees may be limited due to room capacity. Please note that federal agencies, including DOI, can only accept a state-issued driver's license or identification card for access to federal facilities if such license or identification card is issued by a state that is compliant with the REAL ID Act of 2005 (Pub. L. 109-13), or by a state that has an extension for REAL ID compliance. DOI currently accepts other forms of federal-issued identification in lieu of a state-issued driver's license. For detailed information please email Jonathan Godt (see **FOR FURTHER INFORMATION CONTACT**).

Meeting Accessibility/Special Accommodations: Please make requests in advance for sign language interpreter services, assistive listening devices, language translation services, or other reasonable accommodations. We ask that you contact the DFO (see **FOR**

FURTHER INFORMATION CONTACT) at least seven (7) business days prior to the meeting to give the USGS sufficient time to process your request. All reasonable accommodation requests are managed on a case-by-case basis.

Public Disclosure of Comments: There will be an opportunity for public comment during each day of the meetings. Depending on the number of people who wish to speak and the time available, the time for individual oral comments may be limited. Written comments may also be sent to the ACL for consideration. To allow for full consideration of information by the ACL members, written comments must be provided to Jonathan Godt (see **FOR FURTHER INFORMATION CONTACT**) at least three (3) business days prior to the meeting. Individuals who wish to expand upon their oral statements, those who had wished to speak but could not be accommodated, and those who were unable to participate are invited to submit written statements by email to at Jonathan Godt (see **FOR FURTHER INFORMATION CONTACT**).

Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, be aware that your entire comment—including your PII—may be made publicly available at any time. While you may ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Authority: 5 U.S.C. ch. 10.

Gary Latzke,

*Chief of Staff, Natural Hazards Mission Area,
U.S. Geological Survey.*

Interior.

ACTION: Notice.

SUMMARY: Under the Navajo-Hopi Land Dispute Settlement Act of 1996 (Act), Congress approved a final settlement of multiple claims the Hopi Tribe had against the United States. Under the Act, Congress authorized the Hopi Tribe to acquire up to 500,000 acres of land in northern Arizona to be taken into trust, including private land purchased

from willing sellers and interspersed State trust land held by the State of Arizona located within the exterior boundaries of the purchased private land. The Hopi Tribe purchased 161,423.58 acres of private land from willing sellers, which are held in trust by the United States. Additionally, together with the State of Arizona, the Hopi Tribe has identified for acquisition an additional 110,759.17 acres of interspersed State trust lands. At the request of the Department of the Interior, the Department of Justice has initiated proceedings to condemn the interspersed State trust lands identified by the Hopi Tribe and the State of Arizona under the authority of section 6 of the Act and applicable Federal law. The parcels to be condemned and then taken into trust are described below.

DATES: The decision takes effect on December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Jessie H. Durham, Regional Director, Western Region, Bureau of Indian Affairs 2600 N Central Ave., Phoenix, Arizona 85004, jessie.durham@bia.gov, (480) 535–2247.

SUPPLEMENTARY INFORMATION: The Assistant Secretary—Indian Affairs, on behalf of the Secretary of the Interior, will immediately acquire the title to the lands described below in the name of the United States of America in trust for the Hopi Tribe, upon title vesting in the name of the United States pursuant to section 6 of the Navajo-Hopi Land Dispute Settlement Act of 1996 and 40 U.S.C. 3114(b).

 Department Record No. 95-98643,
 situated within the NE $\frac{1}{4}$ NE $\frac{1}{4}$ NE $\frac{1}{4}$,
 being more particularly described as
 follows:
Beginning at the Northeast corner of said
 Section 10;
Thence S. 0°28'50" W., along the East line
 of said Section 10, a distance of 55.68 feet to
 the Northeasterly right-of-way line of U.S.
 Highway 66;
Thence N. 65°21'45" W., along said
 Highway right-of-way line, a distance of
 110.10 feet to the North line of said Section
 10;
Thence S. 89°19'50" E., along said North
 Section line, a distance of 125.07 feet to the
 Point of Beginning;
 And, except that portion of Interstate
 Highway 40 right-of-way according to the
 State of Arizona Department of
 Transportation (State Highway Department)
 Right of Way Plan of the Flagstaff-Holbrook
 Hwy. Canyon Padre-Buffalo Range Rd. State
 Highway Project No. I-40-4(38)214. Right of
 Way Map No. D-3-T-537;
 And also, except that portion described as
 "PUE-3" in Arizona State Land Department
 Record No. 16-121651, situated within the
 NE $\frac{1}{4}$, being more particularly described as
 follows:
Commencing at the East $\frac{1}{4}$ corner of said
 Section 10 (being marked by a found
 U.S.G.L.O. Brass Cap), from which the North
 $\frac{1}{4}$ corner of said Section 10 (being marked
 by a U.S.G.L.O Brass Cap), bears N. 45°19'22"
 W., a distance of 3,736.19 feet;
Thence N. 0°28'32" W. (calced) along the
 East line of the Northeast quarter of said
 Section 10, a distance of 2,311.33 feet to a
 point on the Southeasterly right-of-way line
 of Interstate 40, said point being the Point of
 Beginning;
Thence departing said East line, N.
 66°20'49" W. along said right-of-way line, a
 distance of 808.60 feet to a point on the
 North line of the Northeast quarter of said
 Section 10;
Thence N. 89°44'13" E. along said North
 line of the Northeast quarter, a distance of
 123.34 feet;
Thence departing said North line S.
 66°20'49" E., along a line that is parallel with
 and 50.00 feet Northeasterly of said right-of-
 way line, a distance of 673.46 feet to a point
 on the East line of the Northeast quarter of
 said Section 10;
Thence S. 0°28'32" E. (calced) along said
 East line, a distance of 54.79 feet to the Point
 of Beginning;
 Sec. 12, that portion being more
 particularly described as follows:

Parcel 1

Beginning at the Southwest corner of said
 Section 12;
Thence North, along the West line of said
 Section 12, to the Southerly line of the 50
 foot wide utility easement described in R/W
 No. 16-121651-00 of the Arizona State Land
 Department records;
Thence Southeasterly, along said Southerly
 line, to the East line of the West half of the
 Northwest quarter of the Southwest quarter
 of said Section 12;
Thence South, along said East line, to the
 Northerly line of the 30 foot wide buried
 communications cables right of way
 described in R/W No. 71-3434 of the Arizona
 State Land Department records;
Thence Southeasterly, along said Northerly
 line, to the North line of the Southwest
 quarter of the Southwest quarter of said
 Section 12;
Thence East, along said North line, to the
 Northwest corner of the Southeast quarter of
 the Southwest quarter;
Thence South, along the West line of said
 Southeast quarter of the Southwest quarter,
 to the Southwest corner of said Southeast
 quarter of the Southwest quarter;
Thence West, along the South line of said
 Section 12, to the Point of Beginning;

Parcel 2

Beginning at the Southeast corner of said
 Section 12;
Thence West, along the South line of said
 Section 12, to the Southeast corner of the
 Southeast quarter of the Southwest quarter of
 said Section 12;
Thence North, along the East line of said
 Southeast quarter of the Southwest quarter to
 the Southerly line of the 50 foot wide utility
 easement described in R/W No. 16-121651-
 00 of the Arizona State Land Department
 records;
Thence Southeasterly, along said Southerly
 line, to the East line of said Section 12;
Thence South, along said East line, to the
 Point of Beginning;
 Except any portion(s) of Parcel 1 or Parcel
 2 lying within the Interstate Highway 40
 right-of-way, according to the State of
 Arizona Department of Transportation (State
 Highway Department) Right of Way Plan of
 the Flagstaff-Holbrook State Highway
 Project No. I-40-4(41)220. Right of Way Map
 No. D-3-T-538;

 Sec. 8;
 Sec. 10;
 Sec. 16, except that portion described as
 "AREA #19" in Arizona State Land
 Department Record No. 95-98643, being
 more particularly described as follows:

Commencing at the Northwest corner of said Section 16;

Thence S. 0°30'45" W., along the West line of said Section 16, a distance of 2,478.30 feet to the Point of Beginning;

Thence S. 83°00'15" E., a distance of 5,332.19 feet to the East line of said Section 16;

Thence S. 0°29'15" W., along said East line, a distance of 56.32 feet to the existing Northerly right-of-way line of the Flagstaff-Holbrook Highway;

Thence Westerly, along said existing right-of-way line, 5,332 feet, more or less, to the West line of Section 16;

Thence N. 0°30'45" E., along said Section line, 56.32 feet to the Point of Beginning.

And, except that portion of Interstate Highway 40 right-of-way, and that 50'x150' Drainage Easement (Sta. 1642+03 to Sta. 1642+53), according to the State of Arizona Department of Transportation (State Highway Department) Right of Way Plan of the Flagstaff-Holbrook State Highway Project No. I-40-4(41)220. Right of Way Map No. D-3-T-538;

And also, except that portion described as "PUE-6" in Arizona State Land Department Record No. 16-121651, being more particularly described as follows:

Commencing at the Southeast corner of said Section 16 (being marked by a found U.S.G.L.O. Brass Cap), from which the East $\frac{1}{4}$ corner of said Section 10 (being marked by a U.S.G.L.O. Brass Cap), bears N. 0°29'39" W., a distance of 2,640.78 feet;

Thence N. 0°29'39" W. along the East line of the Southeast quarter of said Section 16, a distance of 1,908.63 feet to an A.D.O.T. brass cap (1686+21.80) on the Southerly right-of-way line of Interstate 40, said brass cap being the Point of Beginning;

Thence departing said East line, N. 83°59'21" W. along said Southerly right-of-way line, a distance of 5,332.05 feet to a found A.D.O.T. aluminum cap (1632+89.57) on the West line of the Southwest quarter of said Section 16, from which the Southwest corner of said Section 16 (being marked by a pile of limestone rocks) bears S. 0°32'30" E., a distance of 2,512.93 feet;

Thence departing said Southerly right-of-way line, N. 0°28'36" W., along the West line of the Southwest quarter of said Section 16, a distance of 50.32 feet;

Thence departing said West line, S. 83°59'21" E., along a line 50.00 feet Northerly of and Parallel with said right-of-way line, a distance of 5,332.03 feet to a point on the East line of the Southeast quarter of said Section 16;

Thence S. 0°29'39" E., along the East line of the Southeast quarter of said Section 16, a distance of 50.32 feet to the Point of Beginning;

Sec. 18, lots 1 thru 4, E $\frac{1}{2}$, and E $\frac{1}{2}$ W $\frac{1}{2}$, except that portion described as "AREA #18" in Arizona State Land Department Record No. 95-98643, being more particularly described as follows:

Commencing at the Northwest corner of said Section 18;

Thence S. 0°31'15" W., along the West line of said Section 18, a distance of 208.43 feet to the Point of Beginning;

Thence from a local tangent bearing of S. 65°51'55" E., along a curve concave to the

Northeast, with a radius of 22,712.31 feet, a distance of 5,451.72 feet to the East line of said Section 18;

Thence S. 0°27'45" W., along said East Section line, 20 feet, more or less, to the existing Northerly right-of-way line of the Flagstaff-Holbrook Highway;

Thence Westerly, along said existing right-of-way line, 5,440 feet, more or less, to the West line of Section 18;

Thence North 0°31'15" E., along said West line, 116.10 feet to the Point of Beginning;

And, except that portion of Interstate Highway 40 right-of-way according to the State of Arizona Department of Transportation (State Highway Department) Right of Way Plan of the Flagstaff-Holbrook State Highway Project No. I-40-4(41)220. Right of Way Map No. D-3-T-538;

And also, except that portion described as "PUE-5" in Arizona State Land Department Record No. 16-121651, being more particularly described as follows:

Commencing at the East quarter corner of said Section 18 (being marked by a found U.S.G.L.O. brass cap), from which the Northeast corner of said Section 18 (being marked by a U.S.G.L.O. brass cap) bears N. 0°32'00" W., a distance of 2,641.11 feet;

Thence N. 0°32'00" W. along the East line of the Northeast quarter of said Section 18, a distance of 507.79 feet to an A.D.O.T. aluminum cap (1579+65.56) on the Southerly right-of-way line of Interstate 40, said aluminum cap being the Point of Beginning;

Thence departing said East line, along said Southerly right-of-way line, along the arc of a non-tangent curve, concave Northerly, with a radius of 23,129.63 feet, a radial bearing of S. 9°16'06" W., through a delta angle of 13°28'53", an arc length of 5,442.32 feet to a point on the West line of said Section 18, from which the Northwest corner of said Section 18 (being marked by a found U.S.G.L.O. brass cap) bears N. 0°32'42" W., a distance of 595.34 feet;

Thence departing said right-of-way, N. 0°32'42" W., along the West line of the Northwest quarter of said Section 18, a distance of 54.45 to the point of curvature for a non-tangent curve, concave Northerly, with a radius of 23,079.63 feet, a radial bearing of S. 22°46'55" W.;

Thence departing said West line, Southeasterly along the arc of said curve, through a delta angle of 13°30'49", an arc length of 5,443.44 feet to a point on the East line of the Northeast quarter of said Section 18;

Thence S. 0°32'16" E., along said East line, a distance of 50.74 feet to the Point of Beginning;

Bureau of Indian Affairs

[256A2100DD/AAKC001030/A0A51010.999900]

Proclaiming Certain Lands as Reservation for the Rincon Band of Luiseno Mission Indians of Rincon Reservation, California

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of reservation proclamation.

SUMMARY: This notice informs the public that the Assistant Secretary—Indian Affairs proclaimed approximately 56.66 acres, more or less, an addition to the reservation of the Rincon Band of Luiseno Mission Indians of Rincon Reservation, California.

DATES: This proclamation was made on December 17, 2024.

FOR FURTHER INFORMATION CONTACT: Ms. Carla H. Clark, Bureau of Indian Affairs, Division of Real Estate Services, 1001 Indian School Road NW, Box #44,

Albuquerque, New Mexico 87104,
Carla.Clark@bia.gov, (720) 424–3233.

SUPPLEMENTARY INFORMATION: This notice is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by part 209 of the Departmental Manual.

A proclamation was issued according to the Act of June 18, 1934 (48 Stat. 984; 25 U.S.C. 5110) for the lands described below. The lands are proclaimed to be the Rincon Reservation for the Rincon Band of Luiseno Mission Indians of Rincon Reservation, California in San Diego, California.

587 T 5625—Rodriguez

The land referred to herein is situated in the State of California, County of San Diego, and described as follows:

All that portion of the Pauma Rancho, in the County of San Diego, State of California, according to map thereof attached to the record of patent in Book 1, Page 67 of Patents, records of said San Diego County, described as follows:

Commencing at the most westerly corner of land described in deed to Pete Dykzuel, recorded March 12, 1942 in Book 1315, Page 239 of Official Records, said point being also the most Westerly corner of land described in Parcel 1 of Deed to Kenneth A. Chapman ET UX, recorded September 8, 1976 AS FILE/PAGE NO. 76–292966 of Official Records; THENCE along the boundary of said land of Chapman, as follows: North 38°00′20″ East 1010.34 Feet (Record North 38°09′40″ East 1012.19 Feet) North 51°50′20″ West 437.25 Feet to the center line of California State Highway NO–195, Section “D” as said Highway existed on February 1944, said point being on a 320.70 Foot radius curve, concave Southerly the radial line to said point bears North 34°22′05″ West; Northeasterly along said center line curve through an angle of 25°00′05″ a distance of 139.94 Feet; tangent to said curve, North 80°38′00″ East 70.93 Feet (Record North 81°44′16″ East 69.20 Feet) TO POINT “A” OF THIS DESCRIPTION; Thence South 45°29′00″ East 527.46 Feet; Thence South 38°00′20″ West 179.00 Feet; Thence South 45°29′00″ East 438.30 Feet; Thence South 38°00′20″ West 614.76 Feet to an intersection with the Southerly Boundary of said Pauma Rancho, said Point of Intersection being the TRUE POINT OF BEGINNING; Thence retracing the last four courses to said POINT “A”; Thence North 80°38′00″ East 73.62 Feet to the most Westerly corner of land described in Deed to O.K. Anderson, Recorded May 29, 1947 as FILE/PAGE NO. 56307 of Official Records; said point being also an angle point in the boundary of land described in deed to Suzanne W. D’Aumant-Post, Recorded September 21, 1959 in BOOK 7891, Page 41 of Official Records; Thence along the boundary of said land of D’Aumant-Post as follows: South 45°29′00″ East 588.50 Feet; North 70°34′00″ East 393.80 Feet; North 76°57′00″ East 636.03 Feet; South 40°13′30″ East 1772.09 Feet; South 16°45′00″ West 430.18 Feet (Record 560.47 Feet) to the

southerly boundary of said Pauma Rancho; and along said southerly boundary, North 75°39′48″ West 2377.12 Feet to the TRUE POINT OF BEGINNING.

Pursuant to Certificate of Compliance recorded April 28, 1977 as Instrument NO. 77–159162 of Official Records.

The above described lands contain a total of 56.66 acres, more or less, which are subject to all valid rights, reservations, rights-of-way, and easements of record.

This proclamation does not affect title to the lands described above, nor does it affect any valid existing easements for public roads, highways, public utilities, railroads and pipelines, or any other valid easements or rights-of-way or reservations of record.

Bryan Newland,

Assistant Secretary—Indian Affairs.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO #4820000251]

BLM Director’s Response to the Wyoming Governor’s Appeal of the BLM Wyoming State Director’s Governor’s Consistency Review Determination for the Buffalo Field Office Proposed Resource Management Plan Amendment and Final Supplemental Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of response.

SUMMARY: The Bureau of Land Management (BLM) is publishing this notice of the reasons for the BLM Director’s determination to reject the Governor of Wyoming’s recommendations regarding the Buffalo Field Office Proposed Resource Management Plan Amendment (RMPA) and Final Supplemental Environmental Impact Statement (SEIS).

ADDRESSES: A copy of the Record of Decision and Approved RMPA is available on the BLM website at: <https://eplanning.blm.gov/eplanning-ui/project/2021239/570>.

FOR FURTHER INFORMATION CONTACT: Heather Bernier, Division Chief for Decision Support, Planning, and National Environmental Policy Act; telephone 303–239–3635; address P.O. Box 151029, Lakewood, CO 80215; email hbernier@blm.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a

speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Bernier. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: On May 17, 2024, the BLM released the Proposed RMPA/Final SEIS for the Buffalo Field Office (89 FR 43431). In accordance with the regulations at 43 CFR 1610.3–2(e), the BLM submitted the Proposed RMPA/Final SEIS for the Buffalo Field Office to the Governor of Wyoming for a 60-day Governor’s Consistency Review in order for the Governor to review the Proposed RMPA and identify any inconsistencies with State plans, policies, or programs. On July 16, 2024, the Governor of Wyoming submitted a response for the Buffalo Field Office planning effort to the BLM Wyoming State Director. After careful consideration of the concerns raised in the Governor’s response, the State Director decided not to accept the Governor’s recommendations. The BLM sent a written response to the Governor on August 16, 2024.

On September 12, 2024, the Governor of Wyoming appealed the State Director’s decision to the BLM Director. In reviewing these appeals, the regulations at 43 CFR 1610.3–2(e) state that “[t]he Director shall accept the (consistency) recommendations of the Governor(s) if he/she determines they provide for a reasonable balance between the state’s interest and the national interest.” On November 6, 2024, the BLM Director issued a response to the Governor detailing the reasons that the recommendations did not meet this standard. Pursuant to 43 CFR 1610.3–2(e), the basis for the BLM’s determination on the Governor’s appeal is presented below. The appeal response is being published verbatim.

“I am in receipt of your letter dated September 12, 2024, which contains the State of Wyoming’s appeal to the Bureau of Land Management (BLM) Wyoming State Director response to the Governor’s consistency review of the Buffalo Field Office Proposed Resource Management Plan Amendment (PRMPA) and Final Supplemental Environmental Impact Statement (FSEIS). The Governor’s consistency review is an important part of the BLM land use planning process, and we appreciate the significant time and attention that you and your staff have committed to this effort.

The applicable regulations at 43 CFR 1610.3–2(e) provide you with the opportunity to appeal the State Director's decision to not accept the recommendations you made in your consistency review letter. These regulations also guide my review of the appeal, in which I must consider whether you have raised inconsistencies with State or local plans, policies, and or programs. If inconsistencies are raised, I would consider whether your recommendations address the inconsistencies and provide for a reasonable balance between the national interest and the State of Wyoming's interest.

I have completed my review of your appeal and determined that the recommendation you have provided does not meet this standard for reasons as detailed in the following paragraphs.

In your consistency review and subsequent appeal, you allege 11 inconsistencies with State or local plans, policies, and programs. Your alleged inconsistencies are as follows:

- The No Leasing Alternative interferes with the Wyoming Constitution's policy of supporting public services with severance taxes from Federal coal development.
- The No Leasing Alternative is inconsistent with State law requiring the optimization of its State trust lands.
- The No Leasing Alternative is inconsistent with Wyoming Energy Policy.
- The No Leasing Alternative is inconsistent with the Wyoming Environmental Quality Act.
- The No Leasing Alternative conflicts with the State's Interstate Compact Statute.
- The No Leasing Alternative is inconsistent with the Natural Resource Protection Act.
- The No Leasing Alternative is inconsistent with the Campbell County's Plan Principles.
- The No Leasing Alternative is inconsistent with Campbell County's Plan Policy.
- The No Leasing Alternative is inconsistent with Campbell County's Plan Goals.
- The No Leasing Alternative is inconsistent with Campbell County's Plan Objectives.
- The No Leasing Alternative is inconsistent with the Johnson County Plan Objectives.

To address these inconsistencies, it is your recommendation that the BLM adopt the No Action Alternative (Alternative B) for the Buffalo PRMPA. Upon review, I find that your recommendation does not present a reasonable balance between the national

interest and the State's interest, because Alternative B is inconsistent with national policy.

The Buffalo FSEIS/PRMPA was developed under the BLM's authority to manage coal under all the applicable statutes and regulations including, but not limited to; the Federal Land Policy and Management Act (FLPMA) of 1976, as amended; the Mineral Leasing Act of 1920, as amended; the Mineral Leasing Act on Acquired Lands of 1947, as amended; and all applicable regulations developed from these statutes found in 43 CFR 3000 and 3400.

Section 102(a)(7) of FLPMA declares that it is the policy of the United States that management of the public lands be based on "multiple use" and "sustained yield." Section 103(c) of FLPMA defines "multiple use" as the management of the public lands and their various resource values so that they are used in the combination that will best meet the present and future needs of the American people. FLPMA's multiple-use policy does not require that all uses be allowed on all areas of the public lands. Through the land use planning process, the BLM evaluates and chooses an appropriate balance of resource uses that involves tradeoffs between competing uses, and the BLM has discretion to allocate the public lands to particular uses and to employ the mechanism of land use allocation to protect for certain resource values.

As explained in the FSEIS/PRMPA, the BLM has determined that the economic benefits from coal leasing no longer balance with the adverse effects to other public land resources, including but not limited to, air quality and environmental justice, as well as social and economic considerations. In addition, the BLM has determined that continued coal leasing at any level in the planning area is no longer consistent with presidential executive orders and policies. For instance, continued coal leasing in the planning area is inconsistent with Presidential Executive Orders 13990, entitled, *Protecting Public Health and the Environment and Restoring Science to Tackle the Climate Crisis*, and 14008, entitled, *Tackling the Climate Crisis at Home and Abroad*, as well as Department of the Interior Secretary's Order 3399, entitled, *Department-Wide Approach to the Climate Crisis and Restoring Transparency and Integrity to the Decision-Making Process*. These executive orders and policies direct agencies to, among other things, work on confronting the climate crisis to improve public health and the environment, reduce greenhouse gas (GHG) emissions, increase renewable

energy production on public lands and waters, and to review potential climate and other impacts from oil and natural gas development on public lands.

As explained in the Buffalo FSEIS/PRMPA, the mining of coal in the planning area would continue to contribute to GHG emissions, which in turn adds to ongoing impacts from climate change on human health and disease in numerous ways (Buffalo FSEIS/PRMPA section 3.5.1). The BLM also determined that the potential environmental justice health-related impacts would be highest under Alternative B, and therefore, not in alignment with the Nation's interest in addressing climate-related public health concerns. Moreover, additional coal leasing in the planning area would not support the Nation's long term climate strategy (November 2021) of limiting global temperature rise and putting the U.S. on a pathway to net-zero GHG emissions by 2050. Coal production is in decline, both nationally and in the Wyoming Powder River Basin, where coal production has been declining since the late 2000's. As such, the Nation's energy market is moving away from coal towards natural gas and renewable energy, which are more aligned with the Nation's long term climate strategy, and continued coal leasing in the planning area would not support the national interest.

Regarding Campbell County's Plan, the BLM did determine that the previous version of the Buffalo FSEIS/PRMPA (2019) was consistent with the 2022 Campbell County Natural Resource Land Use Plan. However, since that time, Federal policy direction regarding continued coal mining has shifted, as discussed above. As such, the BLM determined in this current planning effort that the 2022 Campbell County Natural Resource Land Use Plan is not consistent with Federal policies and executive orders applicable to BLM-administered lands.

For these reasons outlined above, I find that your recommendation does not present a reasonable balance between the national interest and the State's interest.

Your consistency review and subsequent appeal also alleged 12 issues related to Federal laws, regulations, and policies including the Federal Land Policy and Management Act of 1976, the Mineral Leasing Act of 1920, Federal Coal Leasing Amendments Act of 1976, the Surface Mining and Coal Reclamation Act, the Federal Coal Screening regulations, and others. These Federal issues do not raise inconsistencies with State or local plans, policies, or programs and are

outside the scope of the Governor's Appeal process.

Finally, the BLM has prepared the Buffalo PRMPA/FSEIS in accordance with all applicable Federal laws, regulations, and policies. The BLM did carefully review and consider applicable State, local, and other Federal agency plans, policies, and programs in the development of the Buffalo PRMPA/FSEIS. The BLM is consistent, to the extent practicable, with these plans as per the provisions of FLPMA and the planning regulations at 43 CFR 1610–3–2.”

(Authority: 43 CFR 1610.3–2(e))

Nada Wolff Culver,
Principal Deputy Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO4820000251]

Filing of Plats of Survey: Oregon/ Washington

AGENCY: Bureau of Land Management, Interior

ACTION: Notice of official filing.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Bureau of Land Management (BLM), Oregon State Office, Portland, Oregon, 30 calendar days from the date of this publication.

DATES: Protests must be received by the BLM prior to the scheduled date of official filing, January 29, 2025.

ADDRESSES: A copy of the plats may be obtained from the Public Room at the Bureau of Land Management, Oregon State Office, 1220 SW 3rd Avenue, Portland, Oregon 97204, upon required payment. The plats may be viewed at this location at no cost.

FOR FURTHER INFORMATION CONTACT: Robert Femling, telephone: (503) 808–6633, email: rfemling@blm.gov, Branch of Geographic Sciences, Bureau of Land Management, 1220 SW 3rd Avenue, Portland, Oregon 97204. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 1–800–877–8339 to contact Mr. Femling during normal business hours. The service is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The plats of survey of the following described lands are scheduled to be officially filed

in the Bureau of Land Management, Oregon State Office, Portland, Oregon:

WILLAMETTE MERIDIAN, OREGON

T. 34 S., R. 7 W. accepted September 11, 2024

T. 36 S., R. 3 E., accepted October 22, 2024

T. 37 S., R. 3 E., accepted October 22, 2024

A person or party who wishes to protest one or more plats of survey identified above must file a written notice of protest with the Chief Cadastral Surveyor for Oregon/ Washington, Bureau of Land Management. The notice of protest must identify the plat(s) of survey that the person or party wishes to protest. The notice of protest must be filed before the scheduled date of official filing for the plat(s) of survey being protested. Any notice of protest filed after the scheduled date of official filing will be untimely and will not be considered. A notice of protest is considered filed on the date it is received by the Chief Cadastral Surveyor for Oregon/ Washington during regular business hours; if received after regular business hours, a notice of protest will be considered filed the next business day. A written statement of reasons in support of a protest, if not filed with the notice of protest, must be filed with the Chief Cadastral Surveyor for Oregon/ Washington within 30 calendar days after the notice of protest is filed. If a notice of protest against a plat of survey is received prior to the scheduled date of official filing, the official filing of the plat of survey identified in the notice of protest will be stayed pending consideration of the protest. A plat of survey will not be officially filed until the next business day following dismissal or resolution of all protests of the plat.

Before including your address, phone number, email address, or other personal identifying information in a notice of protest or statement of reasons, you should be aware that the documents you submit—including your personal identifying information—may be made publicly available in their entirety at any time. While you can ask us to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

(Authority: 43 U.S.C., chapter 3)

Robert Femling,

Chief Cadastral Surveyor of Oregon/ Washington.

BILLING CODE 4331–25–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Fish and Wildlife Service

[PO #4820000251]

Notice of Availability of the Records of Decision for Reconsideration of a Highway Right-of-Way Application and Associated Amendment of an Incidental Take Permit, Washington County, UT

AGENCY: Bureau of Land Management, Interior; Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Land Management (BLM) and the United States Fish and Wildlife Service (FWS), as co-lead agencies, announce the availability of the records of decision (RODs) for the Northern Corridor highway right-of-way (ROW) and associated amendment of an incidental take permit (ITP) located in Washington County, Utah. The RODs constitute the decisions of the BLM and FWS.

DATES: The Acting Deputy Secretary of the Interior signed a ROD for the Northern Corridor highway ROW on December 19, 2024. The FWS's Deputy Regional Director for the Mountain-Prairie Region (Region 6) signed a ROD to amend the ITP issued to Washington County (County) on December 19, 2024.

ADDRESSES: The RODs are available on the BLM ePlanning project website at <https://eplanning.blm.gov/eplanning-ui/project/2026562/510>.

FOR FURTHER INFORMATION CONTACT:

Dawna Ferris-Rowley, National Conservation Area (NCA) Manager, Red Cliffs and Beaver Dam Wash NCAs, telephone (435) 688–3200; address 345 East Riverside Drive, St. George, UT 84790; email BLM_UT_NorthernCorridor@blm.gov. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Ferris-Rowley. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-

contact in the United States. Replies are provided during normal business hours.

SUPPLEMENTARY INFORMATION: The BLM and FWS are issuing this Notice of availability pursuant to the National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*; the Council on Environmental Quality's regulations for implementing NEPA, 40 CFR parts 1500 through 1508 (as amended on May 20, 2022, 87 FR 23453); and the Department of the Interior's NEPA regulations, 43 CFR part 46.

On September 4, 2018, the Utah Department of Transportation (UDOT) applied for a ROW grant for the Northern Corridor project north of the City of St. George, Utah, on BLM-managed and non-Federal lands within the Red Cliffs NCA and the Red Cliffs Desert Reserve. The Red Cliffs NCA was established through the passage of the Omnibus Public Land Management Act of 2009 (16 U.S.C. 460www). Prior to the NCA's designation, the Red Cliffs Desert Reserve was established for the protection of the Mojave desert tortoise as part of the 1995 Washington County Habitat Conservation Plan (HCP). In 2015, pursuant to section 10(a)(1)(B) of the Endangered Species Act (ESA), Washington County applied to renew and amend the HCP and associated ITP. The restated and amended HCP described the Northern Corridor highway as a potential changed circumstance, which would be partially offset with the addition of a sixth zone to the Red Cliffs Desert Reserve (Zone 6) as the primary conservation strategy. To consider the ROW application and the proposed Zone 6, the BLM needed to also consider amending the St. George Field Office and Red Cliffs NCA Resource Management Plans (RMPs).

In 2019 and 2020, the BLM and FWS prepared an environmental impact statement (EIS) to analyze the environmental impacts associated with the proposed actions and reasonable alternatives. The BLM also consulted with the FWS to meet the requirements in section 7(a)(2) of the ESA. The FWS issued a biological opinion to the BLM that determined the ROW and the amendments to the RMPs were not likely to jeopardize the continued existence of the Mojave desert tortoise or destroy or adversely modify designated critical habitat for the Mojave desert tortoise. In addition, the FWS issued an intra-agency biological opinion that determined that the ITP was not likely to jeopardize the continued existence of the Mojave desert tortoise, Holmgren milkvetch, Shiwits milkvetch, dwarf bear-poppy, Siler pincushion cactus, Gierisch

mallow, and Fickeisen plains cactus or result in the adverse modification of critical habitat for any of the above-listed species.

On January 13, 2021, the Secretary of the Interior signed a ROD that approved the Northern Corridor ROW application and approved the amendments to the RMPs. The decision approving the ROW was effective immediately. The BLM then signed and issued the ROW grant to UDOT on the same day. Also on January 13, 2021, the FWS Regional Director for the Mountain-Prairie Region signed a ROD approving the issuance of an ITP to Washington County. The FWS issued the ITP to Washington County on January 13, 2021. Because the BLM approved the UDOT ROW application, the changed circumstance was triggered, and Zone 6 was formally added to the Reserve.

On June 3, 2021, seven conservation organizations (collectively, Plaintiffs) filed an initial complaint in the United States District Court for the District of Columbia, Case No. 1:21-cv-01506. Among other claims, plaintiffs alleged the BLM's ROW decision violated both NEPA and the National Historic Preservation Act (NHPA). The Plaintiffs stated, in part, the Final EIS did not fully address the changed circumstances of wildfire in the region and the impacts it may have on the Mojave desert tortoise, desert tortoise habitat, and the spread of invasive annual grasses. The Plaintiffs also alleged that the BLM failed to comply with the consultation requirements under section 106 of the NHPA. On July 27, 2021, Plaintiffs amended their complaint to include the FWS and additional claims related to NEPA and the ESA.

During the litigation, the United States and plaintiffs reached a settlement agreement that was signed on August 30, 2023. Prior to executing that agreement, the United States moved for the remand and partial vacatur of the BLM's and FWS's 2021 decisions. In the motion, the United States acknowledged the BLM did not fully comply with the NHPA and the agencies had concerns that the Final EIS may lack sufficient analysis of certain resource effects, including the effects of the construction and use of the Northern Corridor project in the context of the following: (1) the trend in the increasing frequency and extent of wildfires in the Mojave Desert; (2) the rise of non-native/exotic and invasive vegetation in post-burn areas; and (3) the impacts increased fire and new non-native/exotic and invasive vegetation have on desert tortoise. On November 16, 2023, the court issued an Order that granted the remand of all decisions associated with the January

2021 RODs issued by the BLM and FWS and denied the BLM's request to vacate the ROW grant issued to UDOT in January 2021. On March 8, 2024, at the request of the BLM and consistent with the Settlement Agreement, the FWS withdrew the Biological Opinion for the Northern Corridor ROW grant.

A 30-day public scoping period for a supplemental EIS was initiated with the publication of a Notice of Intent in the **Federal Register** on November 16, 2023 (88 FR 78781). The scoping period was extended at the request of Washington County and the State of Utah until December 28, 2023. The scoping period included a public open house held in St. George, Utah on December 6, 2023, with over 200 attendees. A total of 8,993 comment submissions were received, of which 8,145 were form letters, 793 were unique submissions, and 55 did not include a comment or were comments not relevant to scoping. The BLM and FWS considered all comments received during the scoping period in preparation of the Draft Supplemental EIS. A scoping report is available for public review on the BLM ePlanning project website (see **ADDRESSES**).

A Notice of Availability for the Draft Supplemental EIS was published in the **Federal Register** on May 10, 2024 (89 FR 40504), initiating a 45-day public review and comment period. In addition, the BLM issued media releases and sent notifications via email to cooperating agencies, Tribal Nations, and the updated project mailing list. The BLM and FWS held an in-person public open house on June 4, 2024, at the Dixie Convention Center in St. George, Utah, during the public comment period.

Agencies, organizations, and individual stakeholders were able to submit comments through the U.S. Postal Service and the BLM ePlanning project website (see **ADDRESSES**). The comment period was extended until July 9, 2024, after an updated Traffic Analysis Memorandum, prepared by the Dixie Metropolitan Planning Organization, and an Assessment, Inventory, and Monitoring Vegetation Survey Technical Report were made available for public review on the BLM ePlanning project website. The BLM and FWS announced the availability of these documents, and the date of the extended public review and comment period, through social media releases, a posting on the BLM ePlanning project website, and email messages to the project mailing list.

A total of 4,255 comment submissions were received during the 60-day public comment period, of which 3,354 were part of organized letter-writing

campaigns and 901 were unique comment submissions. The BLM and FWS considered all comments received during the extended comment period in the preparation of the Final Supplemental EIS. The BLM and FWS responded to substantive comments and made appropriate revisions in the Final Supplemental EIS or explained why a comment did not warrant a change, as documented in Appendix F of the Final Supplemental EIS.

The BLM's 2024 ROD decision is to terminate the UDOT ROW grant issued on January 13, 2021, and to endorse the Red Hills Parkway Expressway alternative. The termination of the BLM ROW grant is effective immediately. The FWS's ROD amends the 2021 ITP to authorize incidental take of the desert tortoise to Washington County caused by covered activities, without the Northern Corridor changed circumstance. The amended ITP reinstates take authorization of desert tortoise in the 3,341 acres of State and private land in Zone 6, previously required as mitigation under the Northern Corridor changed circumstance.

BILLING CODE 4331-25-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO #4820000251]

Notice of Termination of the Environmental Impact Statement for the Twin Metals Project in the Superior National Forest, Lake and St. Louis Counties, Minnesota

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of termination.

SUMMARY: By this notice, the Bureau of Land Management (BLM), Northeastern States District, located in Milwaukee, Wisconsin, is announcing the termination of the Twin Metals Project Environmental Impact Statement (EIS). **DATES:** This termination takes effect immediately.

FOR FURTHER INFORMATION CONTACT: Kurt Wadzinski, NSDO Planning and Environmental Coordinator, at 414-297-4408 or by email to kwadzins@blm.gov.

blm.gov. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1-800-877-8339 to contact during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: Pursuant to the National Environmental Policy Act of 1969 (NEPA) and Council on Environmental Quality (CEQ) NEPA regulations, the BLM published its Notice of Intent (NOI) to prepare an EIS for the Twin Metals Project in the **Federal Register** on June 30, 2020 (85 FR 39206). The EIS would have analyzed the potential impacts of issuing a proposed new preference right lease (MNES 57965) and approving a mine plan of operations for that lease and an existing lease (MNES 1352) held by Twin Metals Minnesota (Twin Metals) in the Superior National Forest in Lake and St. Louis counties, Minnesota.

In October 2021, the USDA Forest Service submitted an application to withdraw the lands in question from disposition under the United States mineral and geothermal leasing laws. The BLM published a notice of its receipt of that application in the **Federal Register** (86 FR 58299), which segregated the lands from the operation of the mineral and geothermal leasing laws, and the BLM subsequently rejected the preference right lease application submitted by Twin Metals in accordance with 43 CFR 2310.2(d).

In January 2022, the Department of the Interior cancelled two hardrock mineral leases held by Twin Metals, including lease MNES 1352, because the leases were improperly renewed. Because Twin Metals did not have an underlying land use authorization, the BLM subsequently rejected the mine plan of operations. On January 31, 2023, the Secretary of the Interior issued Public Land Order 7917 (88 FR 6308), which withdrew approximately 225,504 acres of National Forest System lands in Cook, Lake, and Saint Louis counties, Minnesota, from disposition under the United States mineral and geothermal leasing laws for a period of 20 years, subject to valid existing rights. As a result, new mineral leasing is prohibited for 20 years from the date of the withdrawal.

Based on BLM environmental policy, the bureau must announce in the **Federal Register** when it does not complete previously initiated NEPA actions.

(Authority: 40 CFR 1501.9)

Mitchell Leverette,
Eastern States State Director.

BILLING CODE 4331-18-P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[PO #4820000251]

Public Land Order No. PLO 7954; Withdrawal of National Forest System Lands for the Schwartz and Leff Administrative Site; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This Public Land Order (PLO) withdraws 39.6 acres of National Forest System lands from location and entry under the United States mining laws, but not from leasing under the mineral or geothermal leasing laws or disposal under the Mineral Materials Act of 1947, for a period of 20 years, subject to valid existing rights, to protect the integrity of the historic and cultural resources located within the Schwartz and Leff Administrative Site along the North Fork of the Salmon River in Siskiyou County, California.

DATES: This PLO takes effect on December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Heather Daniels, BLM California State Office, telephone: (916) 978-4674, email: hdaniels@blm.gov; or Zareen Ali, Forest Service Regional Office, telephone: (707) 562-8964 during regular business hours, 8:00 a.m. to 4:30 p.m. Monday through Friday, except holidays. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The United States Forest Service will manage the lands to protect the integrity of the historic and cultural resources located within the Schwarzs and Leff Administrative Site along the North Fork of the Salmon River in the Klamath National Forest, Siskiyou County, California.

Order

By virtue of the authority vested in the Secretary of the Interior by Section

204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described National Forest System lands are hereby withdrawn from location and entry under the United States mining laws, but not from leasing under the mineral or geothermal leasing laws or disposal under the Mineral Materials Act of 1947, for the protection of the cultural and historic resources within the Schwartz and Leff Administrative Site in the Klamath National Forest, California.

National Forest System Lands

Klamath National Forest

Humboldt Meridian, California

T. 10 N., R. 8 E.,

M.S. 6686 EXCEPT that portion within Tract 44 of said T. 10 N., R. 8 E., Humboldt Meridian

The area described contains 39.60 acres in Siskiyou County.

2. The withdrawal made by this order does not alter the applicability of those laws governing the use of National Forest System lands under lease, license, or permit, or governing the disposal of the mineral or vegetative resources other than under the mining laws.

3. This withdrawal will expire 20 years from the effective date of this order, unless, as a result of a review conducted before the expiration date pursuant to Section 204(f) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714(f), the Secretary determines that the withdrawal shall be extended.

(Authority: 43 U.S.C. 1714)

Robert T. Anderson,
Solicitor.

Notice of Inventory Completion: University of Illinois Urbana- Champaign, Champaign, IL

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Illinois Urbana-Champaign has completed an inventory

of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after January 29, 2025.

ADDRESSES: Krystiana Krupa, University of Illinois Urbana-Champaign, 601 E. John Street, Champaign, IL 61820, telephone (217) 244-2587, email klkrupa@illinois.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of Illinois Urbana-Champaign, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing, at least, 132 individuals have been identified. The six associated funerary objects are one lot of botanical remains; one lot of ceramics; one lot of faunal bone; one lot of historic tools and ornaments; one lot of lithics; and one lot of shell. The human remains and associated funerary objects were excavated from Will County, IL by George Langford and by the University of Chicago between 1912 and 1941. The collection dates to approximately A.D. 800-1400 and the late 17th century. No hazardous substances are known to have been used to treat any of the human remains or associated funerary objects.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

The University of Illinois Urbana-Champaign has determined that:

- The human remains described in this notice represent the physical remains of at least 132 individuals of Native American ancestry.
- The six lots of objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the

time of death or later as part of the death rite or ceremony.

- There is a connection between the human remains and associated funerary objects described in this notice and the Absentee-Shawnee Tribe of Indians of Oklahoma; Citizen Potawatomi Nation, Oklahoma; Eastern Shawnee Tribe of Oklahoma; Forest County Potawatomi Community, Wisconsin; Hannahville Indian Community, Michigan; Ho-Chunk Nation of Wisconsin; Iowa Tribe of Kansas and Nebraska; Iowa Tribe of Oklahoma; Kickapoo Traditional Tribe of Texas; Kickapoo Tribe of Indians of the Kickapoo Reservation in Kansas; Kickapoo Tribe of Oklahoma; Match-e-be-nash-she-wish Band of Pottawatomi Indians; Miami Tribe of Oklahoma; Minnesota Chippewa Tribe, Minnesota (Fond du Lac Band; Mille Lacs Band); Nottawaseppi Huron Band of the Potawatomi, Michigan; Omaha Tribe of Nebraska; Otoe-Missouria Tribe of Indians, Oklahoma; Peoria Tribe of Indians of Oklahoma; Pokagon Band of Potawatomi Indians, Michigan and Indiana; Prairie Band Potawatomi Nation; Sac & Fox Nation of Missouri in Kansas and Nebraska; Sac & Fox Nation, Oklahoma; Sac & Fox Tribe of the Mississippi in Iowa; Shawnee Tribe; and the Winnebago Tribe of Nebraska.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the human remains and associated funerary objects described in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received, the University of Illinois Urbana-Champaign must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The University of Illinois Urbana-Champaign is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: December 19, 2024.

Melanie O'Brien,

Manager, National NAGPRA Program.

Notice of Intended Repatriation: University of Georgia, Laboratory of Archaeology, Athens, GA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Georgia, Laboratory of Archaeology intends to repatriate certain cultural items that meet the definition of objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after January 29, 2025.

ADDRESSES: Amanda Thompson, University of Georgia, Laboratory of Archaeology, 1125 Whitehall Road, Athens, GA 30605, telephone (706) 542–8737, email arobthom@uga.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of Georgia, Laboratory of Archaeology, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of two cultural items has been requested for repatriation. The two objects of cultural patrimony are baskets that were donated to the University of Georgia libraries in 2016 from Nancy Montgomery. The objects of cultural patrimony were appraised prior to their donation and the appraisal details that the objects of cultural patrimony were from the following locations: Carson

Valley and Lake Tahoe region in Nevada and California to the first half of the 20th century. The Laboratory has been unable to locate information for any research on these objects and does not have any history of contamination.

Determinations

The University of Georgia, Laboratory of Archaeology has determined that:

- The two objects of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.

- There is a reasonable connection between the cultural items described in this notice and the Washoe Tribe of Nevada & California (Carson Colony, Dresslerville Colony, Woodfords Community, Stewart Community, & Washoe Ranches).

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received, the University of Georgia, Laboratory of Archaeology must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The University of Georgia, Laboratory of Archaeology is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: December 19, 2024.

Notice of Inventory Completion: University of California, Riverside, Riverside, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of California, Riverside has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after January 29, 2025.

ADDRESSES: Megan Murphy, University of California, Riverside, 900 University Avenue, Riverside, CA 92517–5900, telephone (951) 827–6349, email megan.murphy@ucr.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of California, Riverside, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. The eight associated funerary objects are one lot of ceramic sherds, one lot of glass objects, one lot of lithic materials, one lot of metal objects, one lot of botanical materials, one lot of unmodified shell, one lot of fire-altered rock, and one lot of geological materials. In 1978, the University of California, Riverside Department of Anthropology led an archaeological field school under

the direction of Philip Wilke. The field school consisted of the student excavation of archaeological site CA-SBR-1577 (formerly CA-SBR-911 and SBCM-65). The site was first recorded by Gerald Smith in 1940 as a “large campsite on [a] terrace overlooking [the Santa Ana] riverbed.” Objects such as manos, metates, cogstones, and projectile points had previously been reported by residents on the surface of the site. The students excavated a total of 6 units to an average depth of 70cm. A total of 3,092 items were cataloged and housed at the University of California, Riverside, under Accession Number 59. During the excavation, students uncovered a human burial in Unit 1, which was misidentified as faunal remains. In 2024, at the request of tribal representatives, an osteologist reviewed the collection and identified the remains as human. Tribal representatives also identified the objects in the collection as being associated funerary objects. These objects included ceramic sherds, glass objects, lithic materials, metal objects, botanical materials, unmodified shell, fire-altered rock, and geological materials. Based on biological information, the human remains were determined to be Native American. Archaeologists have asserted that Serrano peoples have continuously occupied the San Bernardino Mountains and the Santa Ana River Watershed for up to 5,000–6,000 years BP. Ethnographer John Peabody Harrington recorded several Serrano place names throughout the Watershed during his interviews with Yuhaaviatam leader, Santos Manuel in 1918. Manuel told Harrington that the Santa Ana River is called hu’napat patr, meaning “bears water,” and a Serrano village, Junubabit, was situated on the Santa Ana River’s southeast bank in today’s Colton, CA. Santos Manuel’s testimony and Traditional Knowledge identify Colton and the surrounding region as within Serrano Ancestral Territory since time immemorial, sharing a group identity with the human remains taken from Morgan’s Bluff.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

The University of California, Riverside has determined that:

- The human remains described in this notice represent the physical

remains of one individual of Native American ancestry.

- The eight objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.

- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Morongo Band of Mission Indians, California and the Yuhaaviatam of San Manuel Nation (*previously* listed as San Manuel Band of Mission Indians, California).

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received, the University of California, Riverside must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The University of California, Riverside is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: December 19, 2024.

Notice of Inventory Completion: California State University, Sacramento, Sacramento, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the California State University, Sacramento has completed an inventory of associated funerary objects and has determined that there is a cultural affiliation between the associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the associated funerary objects in this notice may occur on or after January 29, 2025.

ADDRESSES: Dr. Mark R. Wheeler, Senior Advisor to President Luke Wood, California State University, Sacramento, 6000 J Street Sacramento, CA 95819, telephone (916) 460–0490, email mark.wheeler@csus.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service’s administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the California State University, Sacramento, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

One lot of associated funerary objects have been identified that likely originate from CA–PLA–14, located in Placer County, CA. Currently, at least seven objects are missing, and California State University, Sacramento continues to look for them. The funerary objects were donated to California State University, Sacramento by the estate of Anthony Zallio in the 1950s. The circumstances around their collection are unknown. They have since been housed at the University under accessions 81–172.12 and 81–172.16.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the

associated funerary objects described in this notice.

Determinations

The California State University, Sacramento has determined that:

- The one lot of objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.

- There is a connection between the associated funerary objects described in this notice and the Ione Band of Miwok Indians of California; Shingle Springs Band of Miwok Indians, Shingle Springs Rancheria (Verona Tract), California; United Auburn Indian Community of the Auburn Rancheria of California; and the Wilton Rancheria, California.

Requests for Repatriation

Written requests for repatriation of the associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.

2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.

Repatriation of the associated funerary objects described in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received, the California State University, Sacramento must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the associated funerary objects are considered a single request and not competing requests. The California State University, Sacramento is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: December 19, 2024.

Notice of Intended Repatriation: The University of Kansas, Lawrence, KS

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Kansas intends to repatriate a certain cultural item that meets the definition of an unassociated funerary object and that has a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural item in this notice may occur on or after January 29, 2025.

ADDRESSES: Dr. Thomas Torma, University of Kansas, Office of Audit, Risk & Compliance, The University of Kansas, 1450 Jayhawk Boulevard, 351 Strong Hall Lawrence, KS 66045, telephone (406) 850-2220, email t-torma@ku.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of Kansas, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of one cultural item has been requested for repatriation. The one unassociated funerary object is a silver ring. The ring was taken from an Arapaho man named Wox-Ei-Bet', also known as Walks-a-Bed, after having been killed by an individual known only as "K-" in 1874 at Camp Supply, Indian Country—present day Fort Supply, Oklahoma. Wox-Ei-Bet' had a great-great-great-grandson who is related to the Birdshead Family of the Southern Arapaho in Oklahoma. The Birdshead family has deferred to the Cheyenne and Arapaho Tribes, Oklahoma on this repatriation.

The ring was given to the Benedictine College Museum in Atchison, KS by a person identified as R. Kitching, likely in the 1920s. Father Felix Nolte was the curator of the Benedictine College

Museum and the items collected during his tenure are referred to as the Father Felix Nolte collection. The collections from Benedictine College were transferred to the University of Kansas Museum of Anthropology (KUMA) in 1998. KUMA closed to the public in August 2002 and the collections were renamed the Anthropological Research and Cultural Collections (ARCC) in July 2005. The collections were then transferred internally within the University of Kansas from the ARCC to the Spencer Museum of Art in January 2007.

There is no known presence of any potentially hazardous substances used to treat the cultural item mentioned in this notice.

Determinations

The University of Kansas has determined that:

- The one unassociated funerary object described in this notice is reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The unassociated funerary object has been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.

- There is a reasonable connection between the cultural item described in this notice and the Cheyenne and Arapaho Tribes, Oklahoma.

Requests for Repatriation

Additional, written requests for repatriation of the cultural item in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received, the University of Kansas must determine the most appropriate requestor prior to repatriation. Requests

for joint repatriation of the cultural item are considered a single request and not competing requests. The University of Kansas is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Carson National Forest, Taos, NM

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Carson National Forest (CAF), intends to carry out the disposition of human remains removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains in this notice may occur on or after January 29, 2025. If no claim for disposition is received by December 30, 2025, the human remains in this notice will become unclaimed human remains.

ADDRESSES: Erin E. Brown, Forest Archeologist, USDA Forest Service, Carson National Forest, 208 Cruz Alta Road, Taos, NM 87571, telephone (575) 779–4827, email erin.brown@usda.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the CAF, and additional information on the human remains in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual have been reasonably identified. No associated funerary objects are present. A single human tooth was mailed to the Jicarilla Ranger District of the Carson National Forest in August 2002 by a private individual. While hiking the individual encountered what was initially thought to be the bottom of a ceramic vessel near a fallen log. The individual removed soil around the “vessel” and found the vessel was actually a human skull. The individual explained the tooth was removed so the Forest Service could “date” the site. Attempts to locate the source of the tooth were unsuccessful. Known archeological sites in the area of the discovery are a mix of Ancestral Puebloan Pueblo I and Early Navajo sites. The Jicarilla Ranger District is located in Rio Arriba County, NM.

Determinations

The CAF has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Based on geographic affiliation, the Apache Tribe of Oklahoma; Cheyenne and Arapaho Tribes, Oklahoma; Comanche Nation, Oklahoma; Fort Sill Apache Tribe of Oklahoma; Hopi Tribe of Arizona; Jicarilla Apache Nation, New Mexico; Kiowa Indian Tribe of Oklahoma; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Navajo Nation, Arizona, New Mexico, & Utah; Ohkay Owingeh, New Mexico; Pueblo of Acoma, New Mexico; Pueblo of Cochiti, New Mexico; Pueblo of Isleta, New Mexico; Pueblo of Jemez, New Mexico; Pueblo of Laguna, New Mexico; Pueblo of Nambe, New Mexico; Pueblo of Picuris, New Mexico; Pueblo of Pojoaque, New Mexico; Pueblo of San Felipe, New Mexico; Pueblo of San Ildefonso, New Mexico; Pueblo of Sandia, New Mexico; Pueblo of Santa Ana, New Mexico; Pueblo of Santa Clara, New Mexico; Pueblo of Taos, New Mexico; Pueblo of Tesuque, New Mexico; Pueblo of Zia, New Mexico; Santo Domingo Pueblo; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; Ute Mountain Ute Tribe; White Mountain Apache Tribe of the Fort Apache Reservation, Arizona; Wichita and Affiliated Tribes (Wichita, Keechi, Waco, & Tawakonie), Oklahoma; Yselta del Sur Pueblo; and the Zuni Tribe of the Zuni Reservation, New Mexico have priority for disposition of the human remains described in this notice.

Claims for Disposition

Written claims for disposition of the human remains in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by December 30, 2025, the human remains in this notice will become unclaimed human remains. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains in this notice may occur on or after January 29, 2025. If competing claims for disposition are received, the CAF must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains are considered a single request and not competing requests. The CAF is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: December 19, 2024.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Mendocino National Forest, Willows, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Mendocino National Forest intends to carry out the disposition of human remains or objects of cultural patrimony removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains or cultural items in this notice may occur on or after January 29, 2025. If no claim for disposition is received by December 30, 2025, the human remains or cultural items in this notice will become unclaimed human remains or cultural items.

ADDRESSES: Wade McMaster, Mendocino National Forest Supervisor, U.S. Department of Agriculture, Forest Service, Mendocino National Forest, 825 N. Humboldt Avenue, Willows, CA 95988, telephone (530) 934-3316, email wade.mcmaster@usda.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Mendocino National Forest and additional information on the human remains or cultural items in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

TEH-926

Based on the information available, human remains representing, at least, one individual (Ancestor) has been reasonably identified. The 239 objects of cultural patrimony are various stone tools (milling slabs, manos, etc.), debitage, and unmodified faunal remains. No funerary objects or sacred objects have been identified based on the available documentation from the rest of the collection.

CA-TEH-926 is located in Tehama County, California on the Mendocino National Forest. The fragmentary human remains, representing at minimum one individual, and objects of cultural patrimony were removed from the site in 1999. Excavations at CA-TEH-926 took place via a Passport in Time (PIT) project as part of the larger Nomlaki Archaeological Research project which began in 1996. Tribal members from the Paskenta Band of Nomlaki Indians and Round Valley Indian Reservation were present during all phases of fieldwork. Based on existing documentation, at the time of excavation, identified human remains were left in situ and the respective unit terminated. The human remains identified as part of this Notice were initially misidentified as nonhuman animal and were discovered in September 2024.

TEH-984

Based on the information available, human remains representing, at least,

two individuals (Ancestors) have been reasonably identified. No associated funerary objects are present. The 1,035 objects of cultural patrimony are unmodified and modified faunal remains, modified stone tools (including bifaces, edge modified flakes, hammerstones, hand stones, milling stones, drills, etc.), projectile points, debitage, and various plant seeds. No funerary objects or sacred objects have been identified based on the available documentation.

The fragmentary human remains, representing at minimum two individuals, and objects of cultural patrimony were removed from CA-TEH-984 between 1999 and 2000. Excavations at CA-TEH-984 took place via a Passport in Time (PIT) project as part of the larger Nomlaki Archaeological Research project which began in 1996. The site is classified as a seasonal base camp culturally affiliated with the Nomlaki due to its geographic location. At the time of excavation, all identified human remains remained in situ per the established Plan of Action. The fragmentary human remains identified as part of this Notice were initially misidentified as nonhuman animal and only identified as human during subsequent cataloging efforts. The previously unknown human remains were discovered in September 2024.

TEH-1722

Based on the information available, human remains representing, at least, two individuals (Ancestors) have been reasonably identified. The 851 objects of cultural patrimony are unmodified and modified faunal remains, modified stone tools (including bifaces, edge modified flakes, hammerstones, hand stones, milling stones, drills, etc.), projectile points, debitage, and various plant seeds. No funerary objects or sacred objects have been identified based on the available documentation.

CA-TEH-1722 is located in Tehama County, California on the Mendocino National Forest. The fragmentary human remains, representing at minimum two individuals, and 851 cultural objects were removed from the site between 1996 and 1997. The excavations were conducted as part of a Passport in Time (PIT) project under the larger Nomlaki Archaeological Research Project which began following requests for archaeological research from the Paskenta Band of Nomlaki Indians. Tribal members were present and participated in the 1996 and 1997 excavations. The artifact assemblage indicates significant seasonal occupation at the site by the Nomlaki.

The fragmentary human remains were not identified at the time of excavation and thus were likely initially misidentified as nonhuman animal. The previously unknown human remains identified as part of this Notice were discovered in September 2024.

Determinations

The Mendocino National Forest has determined that:

- The human remains described in this notice represent the physical remains of five individuals of Native American ancestry.
- The 2,125 objects of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- The Paskenta Band of Nomlaki Indians of California have priority for disposition of the human remains and cultural items described in this notice.

Claims for Disposition

Written claims for disposition of the human remains or cultural items in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by December 30, 2025, the human remains or cultural items in this notice will become unclaimed human remains or cultural items. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains or cultural items in this notice may occur on or after January 29, 2025. If competing claims for disposition are received, the Mendocino National Forest must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains or cultural items are considered a single request and not competing requests. The Mendocino National Forest is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Santa Fe National Forest, Santa Fe, NM

AGENCY: National Park Service, Interior.
ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Santa Fe National Forest (Forest Service), intends to carry out the disposition of human remains removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains in this notice may occur on or after January 29, 2025. If no claim for disposition is received by December 30, 2025, the human remains in this notice will become unclaimed human remains.

ADDRESSES: Kathryn Turner, U.S. Forest Service, Santa Fe National Forest, 11 Forest Lane, Santa Fe, NM 87508, telephone (505) 438–5380, email kathryn.turner@usda.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Forest Service and additional information on the human remains or cultural items in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, two individuals have been reasonably identified. No associated funerary objects are present.

On August 8, 2006, human remains representing two individuals were recovered from Forest Service site 03–

10–02–01363/LA 90334 during excavations undertaken by the U.S. Forest Service when they were found eroding from the site during a wildfire. The individuals were sent to the University of Oregon for analysis shortly thereafter and later returned to the Santa Fe National. There are no known associated funerary objects.

Site 03–10–02–01363/LA 90334 is located within the Cuba Ranger District, Santa Fe National Forest, Rio Arriba County, NM. The site is located on a north to south trending ridge north of Forest Road 313 and consists of two features, a unit house and an undefined rock alignment which may have been a terrace. The artifact assemblage numbers in the thousands and is comprised of pottery sherds and flaked and ground stone. Diagnostic pottery types documented include Gallina Black-on-gray, Red Mesa Black-on-white, and utility wares. Flaked stone includes chert and obsidian. Ground stone present includes several manos. The structure type and presence of Gallina Black-on-gray pottery suggests that this site was occupied by the Gallina from A.D. 1100 to A.D. 1300.

Determinations

The U.S. Forest Service has determined that:

- The human remains described in this notice represent the physical remains of two individuals of Native American ancestry.
- Based on geographic location the Hopi Tribe of Arizona; Jicarilla Apache Nation, New Mexico; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Navajo Nation, Arizona, New Mexico, & Utah; Ohkay Owingeh, New Mexico; Pueblo of Acoma, New Mexico; Pueblo of Cochiti, New Mexico; Pueblo of Isleta, New Mexico; Pueblo of Jemez, New Mexico; Pueblo of Laguna, New Mexico; Pueblo of Nambe, New Mexico; Pueblo of Picuris, New Mexico; Pueblo of Pojoaque, New Mexico; Pueblo of San Felipe, New Mexico; Pueblo of San Ildefonso, New Mexico; Pueblo of Sandia, New Mexico; Pueblo of Santa Ana, New Mexico; Pueblo of Santa Clara, New Mexico; Pueblo of Taos, New Mexico; Pueblo of Tesuque, New Mexico; Pueblo of Zia, New Mexico; Santo Domingo Pueblo; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; Ute Mountain Ute Tribe; and the Zuni Tribe of the Zuni Reservation, New Mexico has priority for disposition of the human remains or cultural item described in this notice.

Claims for Disposition

Written claims for disposition of the human remains in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by December 30, 2025, the human remains or cultural items in this notice will become unclaimed human remains. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains in this notice may occur on or after January 29, 2025. If competing claims for disposition are received, the Forest Service must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains are considered a single request and not competing requests. The Forest Service is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Notice of Intended Repatriation: San Francisco State University NAGPRA Program, San Francisco, CA

AGENCY: National Park Service, Interior.
ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the San Francisco State University (SF State) NAGPRA Program intends to repatriate certain cultural items that meet the definition of sacred objects and objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after January 29, 2025.

ADDRESSES: Victor Javier Aguilar, San Francisco State University NAGPRA Program, 1600 Holloway Avenue, San Francisco, CA 94132, telephone (415) 405-3545, email vaguila4@sfsu.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the SF State NAGPRA Program, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of three cultural items have been requested for repatriation. The three sacred objects/objects of cultural patrimony are a coiled basket jar, a coiled flare bowl, and a coiled tray basket. These baskets were donated to the Treganza Anthropology Museum (TAM) at San Francisco State University in the 1960s and 1970s. When the TAM closed in 2012, all the Native American items were transferred to the SF State NAGPRA Program. All baskets are from the California Basket Collection.

It was once common practice by museums to use chemicals on cultural items to prevent deterioration by mold, insects, and moisture. To date, the SF State NAGPRA Program has no records documenting use of chemicals at our facilities, and we currently do not use chemicals on any cultural items. A former SF State professor, Dr. Michael Moratto, stated that staff used glues, polyvinyl acetate, and a solution called Glyptol to mend and stabilize cultural objects in the past. Prior non-invasive and non-destructive hazardous chemical tests conducted at the SF State NAGPRA Program repositories show arsenic, mercury, and/or lead in some storage containers, surfaces, and certain cultural items.

Determinations

The SF State NAGPRA Program has determined that:

- The three sacred objects/objects of cultural patrimony described in this notice are, according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization, specific ceremonial objects needed by a traditional Native American religious leader for present-day adherents to practice traditional Native

American religion, and have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision).

- There is a reasonable connection between the cultural items described in this notice and the Jamul Indian Village of California.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received, the SF State NAGPRA Program must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The SF State NAGPRA Program is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: December 19, 2024.

Melanie O'Brien,

Manager, National NAGPRA Program.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS-WASO-OIA-DTS-39203;
PPWODIREIO-PIN00IO15.XI0000]

Submission of U.S. Nomination to the World Heritage List

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The Department of the Interior has submitted a nomination to the World Heritage List for Okefenokee National Wildlife Refuge. This is the third notice required by the Department

of the Interior's World Heritage Program regulations.

ADDRESSES: To request paper copies of documents discussed in this notice, contact April Brooks, Office of International Affairs, National Park Service, 1849 C St. NW, Room 2415, Washington, DC 20240 (202) 354-1808, or send electronic mail (Email) to: april_brooks@nps.gov.

FOR FURTHER INFORMATION CONTACT: Jonathan Putnam, Acting Chief, Office of International Affairs, at 202-354-1809. Information on the U.S. World Heritage program can be found at: <https://www.nps.gov/subjects/internationalcooperation/worldheritage.htm>.

SUPPLEMENTARY INFORMATION: This constitutes the official notice of the decision by the United States Department of the Interior to submit a nomination to the World Heritage List for Okefenokee National Wildlife Refuge, as enumerated in the Summary above, and serves as the Third Notice referred to in 36 CFR 73.7(j) of the World Heritage Program regulations (36 CFR part 73).

The nomination was submitted through the U.S. Department of State to the World Heritage Centre of the United Nations Educational, Scientific and Cultural Organization (UNESCO) for consideration by the World Heritage Committee, which will likely occur at the Committee's 48th annual session in mid-2026.

This property has been selected from the U.S. World Heritage Tentative List, which comprises properties that appear to qualify for World Heritage status, and which may be considered for nomination by the United States to the World Heritage List, as required by the World Heritage Committee's *Operational Guidelines*.

The U.S. World Heritage Tentative List appeared in a **Federal Register** notice on June 7, 2023 (88 FR 37270), as required by 36 CFR 73.7(c) with a request for public comment on possible nominations from the 19 sites on the Tentative List. A summary of the comments received, the Department of the Interior's responses to them and the Department's decision to request preparation of this nomination appeared in a subsequent **Federal Register** notice published on September 25, 2023 (88 FR 65748-65749). These are the First and Second Notices required by 36 CFR 73.7(c) and (f).

In making the decision to submit this U.S. World Heritage nomination, pursuant to 36 CFR 73.7(h) and (i), the Department's Assistant Secretary for Fish and Wildlife and Parks evaluated

the draft nomination and the recommendations of the Federal Interagency Panel for World Heritage. She determined that the property meets the prerequisites for nomination by the United States to the World Heritage List that are detailed in 36 CFR part 73. The property is nationally significant, being a National Natural Landmark designated by the Department of the Interior. The owner of the property has concurred in writing with the nomination, and the property is well protected legally and functionally as documented in the nomination. It appears to meet two of the World Heritage criteria for natural properties.

Okefenokee National Wildlife Refuge is nominated under World Heritage natural criteria (ix) and (x), as provided in 36 CFR 73.9(c)(1), as a property that appears to justify criterion (ix) as a diverse mosaic of wetlands, savannas, forests, and prairie ecosystems and ecotones with a unique reliance on the natural interplay between fire and precipitation. The property also justifies criterion (x) as it is uniquely situated to be a thriving habitat for many important and rare plant and animal species. The refuge also meets the World Heritage requirements for integrity.

The World Heritage List is an international list of cultural and natural properties nominated by the signatories to the World Heritage Convention (1972). The World Heritage Committee, composed of representatives of 21 nations elected as the governing body of the World Heritage Convention, makes the final decisions on which nominations to accept on the World Heritage List at its annual meeting each summer. There are 1,223 World Heritage sites in 168 of the 196 signatory countries. The United States has 26 sites inscribed on the World Heritage List.

U.S. participation and the role of the Department of the Interior are authorized by title IV of the National Historic Preservation Act Amendments of 1980, Public Law 96–515, 94 Stat. 2987, 3000, codified as amended at 54 U.S.C. 307101, and conducted by the Department through the National Park Service in accordance with the regulations at 36 CFR part 73 which implement the Convention pursuant to the 1980 Amendments.

Neither inclusion in the Tentative List nor inscription as a World Heritage Site imposes legal restrictions on owners or neighbors of sites, nor do they give the United Nations any management authority or ownership rights in U.S. World Heritage Sites, which continue to be subject only to U.S. federal and local laws, as applicable.

Authority: 54 U.S.C. 307101; 36 CFR part 73.

Shannon A. Estenoz,

Assistant Secretary for Fish and Wildlife and Parks.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Carson National Forest, Taos, NM

AGENCY: National Park Service, Interior.
ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Carson National Forest (CAF), intends to carry out the disposition of objects of cultural patrimony removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the cultural items in this notice may occur on or after January 29, 2025. If no claim for disposition is received by December 30, 2025, the cultural items in this notice will become unclaimed cultural items.

ADDRESSES: Erin E. Brown, Forest Archeologist, USDA Forest Service, Carson National Forest, 208 Cruz Alta Road, Taos, NM 87571, telephone (575) 779–4827, email erin.brown@usda.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the CAF, and additional information on the cultural items in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, seven objects of cultural patrimony include a small Dinetah Grayware jar, a wooden feather effigy, and five wooden cradle board pieces. The Dinetah Grayware pot has flat to slightly concave base, with some striations on the surface of the vessel. At the time of discovery, the wooden feather effigy was resting on

top of the vessel. Both items were located in a crevice under a large sandstone boulder, and the items had been walled in with thin sandstone slabs and adobe. Approximately 35 feet north of the first crevice, a second crevice contained the five wooden cradleboard pieces. The seven items were found in two crevices, separated by approximately 35 feet, in 1991 by a member of the public. The items were removed from site AR–03–02–03–00524 in Pueblita Canyon located within the Jicarilla Ranger District of the Carson National Forest, Rio Arriba County, New Mexico.

Determinations

The CAF has determined that:

- The seven objects of cultural patrimony described in this notice have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.

- The Navajo Nation, Arizona, New Mexico, & Utah has priority for disposition of the cultural items described in this notice.

Claims for Disposition

Written claims for disposition of the cultural items in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by December 30, 2025, the cultural items in this notice will become unclaimed cultural items. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the cultural items in this notice may occur on or after January 29, 2025. If competing claims for disposition are received, the CAF must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the cultural items are considered a single request and not competing requests. The CAF is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25

U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: December 19, 2024.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Milwaukee Public Museum has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after January 29, 2025.

ADDRESSES: Dawn Scher Thomae, Milwaukee Public Museum, 800 W Wells Street, Milwaukee, WI 53233 telephone (414) 278–6157, email thomae@mpm.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Milwaukee Public Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing, at least, 67 individuals have been identified. The 3,967 associated funerary objects are hornstone blades, bifaces, chert blades, flakes; charcoal; copper artifacts including awls, crescents, points, beads; wood fragments; quartzite flakes; stone fragments; soil samples; stone points and cores; birchbark fragments; shell beads, red sandstone/catlinite fragments; worked stone or whetstones;

limonite; seeds, bark, deer premolar, and a shell.

The Riverside Site was excavated jointly by the Oshkosh Public Museum (OPM) and MPM between 1961 and 1963. The excavation was led by Robert Hrushka of OPM and Robert Ritzenthaler of MPM. Most of the site collections were donated to the MPM by the Oshkosh Public Museum on 9/26/1968. The Riverside Site is considered a multicomponent site representing Late Archaic to the Mississippian time periods, with the main component being a Late Archaic/Early Woodland Transition/Red Ochre Culture cemetery dating between 1000 and 100 BC.

The MPM is unaware of the presence of any potentially hazardous substances used to treat any of the human remains or associated funerary objects.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human remains and associated funerary objects described in this notice.

Determinations

The Milwaukee Public Museum has determined that:

- The human remains described in this notice represent the physical remains of at least 67 individuals of Native American ancestry.
- The 3,967 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a connection between the human remains and associated funerary objects described in this notice and the Menominee Indian Tribe of Wisconsin.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
 2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or an Indian Tribe or Native Hawaiian organization with cultural affiliation.
- Repatriation of the human remains and associated funerary objects described in this notice to a requestor may occur on or after January 29, 2025.

If competing requests for repatriation are received, the Milwaukee Public Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The Milwaukee Public Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: December 19, 2024.

Notice of Intended Repatriation: Brooklyn Children's Museum, Brooklyn, NY

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Brooklyn Children's Museum intends to repatriate certain cultural items that meet the definition of sacred objects and objects of cultural patrimony and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after January 29, 2025.

ADDRESSES: Kiani Kodama and Kate Mirand Calleri, Brooklyn Children's Museum, 145 Brooklyn Avenue, Brooklyn, NY 11213, telephone (718) 735–4400, email kkodama@brooklynkids.org and kcalleri@brooklynkids.org.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Brooklyn Children's Museum, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The

National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of five cultural items have been requested for repatriation by the Onondaga Nation of NY. The five sacred objects of cultural patrimony are false face masks and rattles.

Miniature Cornhusk Mask (object number 66.87.4), False Face Mask (object number 66.87.7), Miniature Cornhusk Mask (object number 66.113.3), Snapping Turtle Claw Rattles (object number 67.86.3ab), and False Face Mask (object number 59.1) are listed in Brooklyn Children's Museum records as "Onondaga." The items were reportedly acquired in North America and gifted to or purchased by Brooklyn Children's Museum between 1959–1982. Brooklyn Children's Museum records indicate no known hazardous substances.

Determinations

The Brooklyn Children's Museum has determined that:

- The five sacred objects/objects of cultural patrimony described in this notice are, according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization, specific ceremonial objects needed by a traditional Native American religious leader for present-day adherents to practice traditional Native American religion, and have ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision).
- There is a reasonable connection between the cultural items described in this notice and the Onondaga Nation.

Requests for Repatriation

Additional, written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received, the Brooklyn Children's Museum must determine the most appropriate requestor prior to repatriation. Requests

for joint repatriation of the cultural items are considered a single request and not competing requests. The Brooklyn Children's Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: December 19, 2024.

Notice of Intended Repatriation: University of Oregon, Museum of Natural and Cultural History, Eugene, OR

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Oregon Museum of Natural and Cultural History intends to repatriate a certain cultural item that meets the definition of an object of cultural patrimony and that has a cultural affiliation with the Indian Tribes in this notice.

DATES: Repatriation of the cultural item in this notice may occur on or after January 29, 2025.

ADDRESSES: Dr. Pamela Endzweig, Director of Anthropological Collections, University of Oregon Museum of Natural and Cultural History, 1224 University of Oregon, Eugene, OR 97403–1224, telephone (541) 346–5120, email endzweig@uoregon.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of Oregon Museum of Natural and Cultural History and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

One cultural item has been requested for repatriation. The one object of cultural patrimony, catalog 2–967, is a coiled basket donated in 1937 by former University of Oregon student A. (Ada) Ossie Walton (1867–1944). A newspaper article, which appears to be from 1937, mentions that Walton began collecting while still a student. She graduated in 1885. A hand-written note in the Museum's accessions files, which we presume to be the donor's, lists the basket as "Large basket (told one of tribes adjoining Navahoes)". This is also what the partial old label on the base of the basket reads. We believe this to be an incorrect identification. Museum staff have described the coiled basket as "Mission style" and attributed it to Southern California Native peoples. There is no additional information in the Museum's files relating to the provenance of the basket.

Cultural Affiliation

The cultural item in this notice is connected to one or more identifiable earlier groups, tribes, peoples, or cultures. There is a relationship of shared group identity between the identifiable earlier groups, tribes, peoples, or cultures and one or more Indian Tribes or Native Hawaiian organizations. The following types of information were used to reasonably trace the relationship: expert opinion, including Native American traditional knowledge.

Determinations

Pursuant to NAGPRA and its implementing regulations, and after consultation with the appropriate Indian Tribes and Native Hawaiian organizations, the University of Oregon Museum of Natural and Cultural History has determined that:

- The one object of cultural patrimony described in this notice has ongoing historical, traditional, or cultural importance central to the Native American group, including any constituent sub-group (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.

- There is a reasonable connection between the cultural item described in this notice and the Pechanga Band of Indians (*previously* listed as Pechanga Band of Luiseno Mission Indians of the Pechanga Reservation, California).

Requests for Repatriation

Additional, written requests for repatriation of the cultural item in this

notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received, the University of Oregon Museum of Natural and Cultural History must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural items are considered a single request and not competing requests. The University of Oregon Museum of Natural and Cultural History is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Notice of Inventory Completion: University of California, Riverside, Riverside, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of California, Riverside has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after January 29, 2025.

ADDRESSES: Megan Murphy, University of California, Riverside, 900 University Avenue, Riverside, CA 92517-5900, telephone (951) 827-6349, email megan.murphy@ucr.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the University of California, Riverside, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual has been reasonably identified. The three associated funerary objects are one lot of lithic materials, one lot of pottery sherds, and one lot of grinding stones. In 1975, the University of California, Riverside Archaeological Research Unit (UCRARU) was contracted by Hirsch and Koptonak Consulting Engineers and Planners to conduct an archaeological filed reconnaissance of the Mason Valley Ranch. The property is in Oriflamme Canyon, adjacent to the Anza-Borrego Desert State Park in central San Diego County. During the survey archaeologists recorded twenty archaeological sites and a test unit in archaeological site CA-SDI-4812. Archaeologists removed approximately 175 items from the unit including pottery sherds, lithic materials, and grinding stones. A burnt bone fragment was also removed from the unit and initially identified as faunal remains. In 2024, at the request of tribal representatives, an osteologist reviewed the bone fragment and identified it as a human rib fragment. During consultation tribal representatives also identified the objects in the collection to be associated funerary objects. In the report for the project, ARU Report #151, archaeologists noted that cremation burials have been previously identified in the canyon as well as village sites and surface artifacts. Tribal representatives confirmed this to be true during consultation and noted that they had conducted repatriations of other burials removed from the area.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is clearly identified by the information available about the human

remains and associated funerary objects described in this notice.

Determinations

The University of California, Riverside has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The three objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- There is a reasonable connection between the human remains and associated funerary objects described in this notice and the Campo Band of Diegueno Mission Indians of the Campo Indian Reservation, California; Capitan Grande Band of Diegueno Mission Indians of California (Barona Group of Capitan Grande Band of Mission Indians of the Barona Reservation, California; Viejas (Baron Long) Group of Capitan Grande Band of Mission Indians of the Viejas Reservation, California); Ewiiapaayp Band of Kumeyaay Indians, California; Iipay Nation of Santa Ysabel, California; Inaja Band of Diegueno Mission Indians of the Inaja and Cosmit Reservation, California; Jamul Indian Village of California; La Posta Band of Diegueno Mission Indians of the La Posta Indian Reservation, California; Manzanita Band of Diegueno Mission Indians of the Manzanita Reservation, California; Mesa Grande Band of Diegueno Mission Indians of the Mesa Grande Reservation, California; San Pasqual Band of Diegueno Mission Indians of California; and the Sycuan Band of the Kumeyaay Nation.

Requests for Repatriation

Written requests for repatriation of the human remains and associated funerary objects in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by:

1. Any one or more of the Indian Tribes or Native Hawaiian organizations identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the human remains and associated funerary objects in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received,

the University of California, Riverside must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The University of California, Riverside is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Notice of Intended Repatriation: Sam Noble Oklahoma Museum of Natural History, Norman, OK

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Sam Noble Oklahoma Museum of Natural History (SNOMNH) intends to repatriate certain cultural items that meet the definition of unassociated funerary objects and that have a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural items in this notice may occur on or after January 29, 2025.

ADDRESSES: Dr. Marc Levine, Associate Curator of Archaeology, Sam Noble Oklahoma Museum of Natural History, University of Oklahoma, 2401 Chautauqua Avenue, Norman, OK 73072-7029, telephone (405) 325-1994, email mlevine@ou.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the SNOMNH, and additional information on the determinations in this notice, including the results of consultation, can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of 731 cultural items from four sites have been requested for repatriation.

The 138 unassociated funerary objects were removed from the A.W. Davis site (34Mc6) in McCurtain County, OK. Following extensive looting, the University of Oklahoma carried out excavations at the site in June and July of 1955 and transferred the objects to the Museum that same year. The 138 unassociated funerary objects include one reconstructed decorated ceramic bowl, three decorated potsherds, 133 undecorated potsherds, and one sample of hematite pigment.

The 452 unassociated funerary objects were removed from the Clement 1 site (34Mc8) in McCurtain County, OK. The site was excavated in 1941 by the Works Progress Administration (WPA) and the associated material was transferred to the Museum the same year. The 452 unassociated funerary objects include one Taylor engraved ceramic bowl, five ceramic vessels, 44 Hodges engraved potsherds, three decorated potsherds, and 399 undecorated potsherds.

The 115 unassociated funerary objects were removed from the McDonald 1 site (34Mc11) in McCurtain County, OK. This site was excavated by the WPA in 1941 and 1942, then resurveyed in 1965 by the University of Oklahoma. The associated materials were transferred to the Museum in 1965. The 115 unassociated funerary objects are 17 ceramic vessels, five bowls, four bottles, three jars, three partially reconstructed vessels, 82 potsherds, and one clay sample.

The 26 unassociated funerary objects were removed from the McDonald 2 site (34Mc12) in McCurtain County, OK. This site was excavated by the WPA in 1941 and 1942, and the associated material was transferred to the Museum in 1965. The 26 unassociated funerary objects are two ceramic bowls, two undecorated ceramic vessels, three partially reconstructed vessels, one bag of decorated potsherds, 17 sherds, and one sample of baked clay.

Determinations

The SNOMNH has determined that:

- The 731 unassociated funerary objects described in this notice are reasonably believed to have been placed intentionally with or near human remains, and are connected, either at the time of death or later, as part of the death rite or ceremony of a Native American culture according to the Native American traditional knowledge of a lineal descendant, Indian Tribe, or Native Hawaiian organization. The

unassociated funerary objects have been identified by a preponderance of the evidence as related to human remains, specific individuals, or families, or removed from a specific burial site or burial area of an individual or individuals with cultural affiliation to an Indian Tribe or Native Hawaiian organization.

- There is a connection between the cultural items described in this notice and the Caddo Nation of Oklahoma.

Requests for Repatriation

Additional written requests for repatriation of the cultural items in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural items in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received, the SNOMNH must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains and associated funerary objects are considered a single request and not competing requests. The SNOMNH is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004, and the implementing regulations, 43 CFR 10.9.

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Santa Fe National Forest, Santa Fe, NM

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Santa Fe National Forest (Forest Service), intends to carry out the disposition of human remains and associated funerary objects removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains and associated funerary objects in this notice may occur on or after January 29, 2025. If no claim for disposition is received by December 30, 2025, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects.

ADDRESSES: Kathryn Turner, U.S. Forest Service, Santa Fe National Forest, 11 Forest Lane, Santa Fe, NM 87508, telephone (505) 438-5380, email kathryn.turner@usda.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Forest Service, and additional information on the human remains and associated funerary objects in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, one individual, has been reasonably identified. The 46 associated funerary objects are pottery sherds and charcoal fragments.

On October 30, 2012, human remains representing one individual were recovered from Forest Service site 03-10-02-01064/LA 74378 by the U.S. Forest Service when found eroding from a well-travelled Forest Service Road which leads to an active communication site. The possible associated funerary objects include 45 pottery sherds and charcoal fragments.

Site 03-10-02-01064/LA 74378 is located in the Cuba Ranger District, Santa Fe National Forest, Rio Arriba County, NM. The site is located on Forest Road 312J on a small ridge south of Wolf Draw. This site has been almost completely destroyed and currently has a radio tower built on top of it. All that remains are a few structural stones and an artifact assemblage comprised of pottery sherds, flaked stone, and a

cobble tool. Diagnostic pottery types documented include Gallina Black-on-gray and plainware. Flaked stone includes chert, chalcedony, and quartzite. The presence of Gallina Black-on-gray pottery suggests that this site was occupied by the Gallina from A.D. 1100 to A.D. 1300.

Determinations

The Forest Service has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The 46 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Based on geographic location the Hopi Tribe of Arizona; Jicarilla Apache Nation, New Mexico; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Navajo Nation, Arizona, New Mexico, & Utah; Ohkay Owingeh, New Mexico; Pueblo of Acoma, New Mexico; Pueblo of Cochiti, New Mexico; Pueblo of Isleta, New Mexico; Pueblo of Jemez, New Mexico; Pueblo of Laguna, New Mexico; Pueblo of Nambe, New Mexico; Pueblo of Picuris, New Mexico; Pueblo of Pojoaque, New Mexico; Pueblo of San Felipe, New Mexico; Pueblo of San Ildefonso, New Mexico; Pueblo of Sandia, New Mexico; Pueblo of Santa Ana, New Mexico; Pueblo of Santa Clara, New Mexico; Pueblo of Taos, New Mexico; Pueblo of Tesuque, New Mexico; Pueblo of Zia, New Mexico; Santo Domingo Pueblo; Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado; Ute Mountain Ute Tribe; and the Zuni Tribe of the Zuni Reservation, New Mexico has priority for disposition of the human remains and associated funerary objects described in this notice.

Claims for Disposition

Written claims for disposition of the human remains and associated funerary objects in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by December 30, 2025, the human remains and associated funerary objects in this notice will become unclaimed human remains and associated funerary objects. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows,

by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains and associated funerary objects in this notice may occur on or after January 29, 2025. If competing claims for disposition are received, the Forest Service must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains and associated funerary objects are considered a single request and not competing requests. The Forest Service is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: December 19, 2024.

Notice of Intended Repatriation: Peabody Essex Museum, Salem, MA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Peabody Essex Museum (PEM) intends to repatriate a certain cultural item that meets the definition of an object of cultural patrimony and that has a cultural affiliation with the Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the cultural item in this notice may occur on or after January 29, 2025.

ADDRESSES: Kathryn Smith, Registrar of Collections, Peabody Essex Museum, 161 Essex Street, Salem, MA 01970, telephone (978) 542-1559, email kathryn_smith@pem.org.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Peabody Essex Museum, and additional information on the determinations in this notice, including the results of consultation,

can be found in the summary or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

A total of one cultural item has been requested for repatriation. The one object of cultural patrimony is a group of shell wampum beads, alternating white and purple tubes, about 5.9 inches long, strung on white cotton with each end tied together. This was donated to the Peabody Museum of Salem (now PEM) on October 14, 1884 by Miss Erminnie A. Smith. Museum accession record 1759 recorded the cultural item as "Beads of Tuscarora [sic] Indian Chief." It was assigned in the logbook as catalog number E991, and described as "Beads of a Chief, Tuscarora" given by Miss E.F. [sic] Smith. Its corresponding 20th century catalog card described the cultural item as "Beads, Wampum, of Tuscarora Chief." The donor is confirmed as Mrs. Erminnie A. Smith of Jersey City, N.J. in *Peabody Academy of Science Annual Report* (Salem: 1885, 90). In 1880, the Smithsonian Institution appointed Smith as a "scientific explorer" charged with studying the language and culture of the Six Nations and the collection of cultural items. From published memorial volume, *In Memoriam: Mrs. Erminnie A. Smith* (Boston: Lee and Shepard, 1890, 33–34), Smith was adopted into the White Bear Clan at Tuscarora Nation and given the name Ka-tci'-tcis-tä'-kwäst.

Determinations

The Peabody Essex Museum has determined that:

- The one object of cultural patrimony described in this notice has ongoing historical, traditional, or cultural importance central to the Tuscarora Nation, including any constituent sub-groups (such as a band, clan, lineage, ceremonial society, or other subdivision), according to the Native American traditional knowledge of an Indian Tribe or Native Hawaiian organization.
- There is a reasonable connection between the cultural item described in this notice and the Tuscarora Nation.

Requests for Repatriation

Additional, written requests for repatriation of the cultural item in this notice must be sent to the authorized representative identified in this notice under **ADDRESSES**. Requests for repatriation may be submitted by any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by

a preponderance of the evidence, that the requestor is a lineal descendant or a culturally affiliated Indian Tribe or Native Hawaiian organization.

Repatriation of the cultural item in this notice to a requestor may occur on or after January 29, 2025. If competing requests for repatriation are received, the Peabody Essex Museum must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the cultural item are considered a single request and not competing requests. The Peabody Essex Museum is responsible for sending a copy of this notice to the Indian Tribes and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3004 and the implementing regulations, 43 CFR 10.9.

Dated: December 19, 2024.

Melanie O'Brien,

Manager, National NAGPRA Program.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NAGPRA–NPS0039251; PPWOCRADNO–PCU00RP14.R50000]

Notice of Intended Disposition: U.S. Department of Agriculture, Forest Service, Santa Fe National Forest, Santa Fe, NM

AGENCY: National Park Service, Interior.
ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the U.S. Department of Agriculture, Forest Service, Santa Fe National Forest (Forest Service), intends to carry out the disposition of human remains and removed from Federal or Tribal lands to the lineal descendants, Indian Tribe, or Native Hawaiian organization with priority for disposition in this notice.

DATES: Disposition of the human remains in this notice may occur on or after January 29, 2025. If no claim for disposition is received by December 30, 2025, the human remains in this notice will become unclaimed human remains.

ADDRESSES: Kathryn Turner, U.S. Forest Service, Santa Fe National Forest, 11 Forest Lane, Santa Fe, NM 87508, telephone (505) 438–5380, email kathryn.turner@usda.gov.

SUPPLEMENTARY INFORMATION: This notice is published as part of the

National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the Forest Service, and additional information on the human remains in this notice, including the results of consultation, can be found in the related records. The National Park Service is not responsible for the identifications in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, 10 individuals have been reasonably identified. No associated funerary objects are present.

In 1996, 2005, and 2006, human remains representing 10 individuals were recovered from Forest Service site 03–10–02–00389/LA 49387 by the U.S. Forest Service after being found eroding from the cut bank along the west edge of the road beneath the site. Prior to recovery consultation was conducted with the State Historic Preservation Office and the Pueblo of Jemez, New Mexico. The individuals were sent to the University of Oregon for analysis shortly thereafter and later returned to the Santa Fe National Forest. There are possible associated funerary objects which include pottery sherds, flaked stone, and charcoal.

Site 03–10–02–00389/LA 49387 is located within the Cuba Ranger District, Santa Fe National Forest, Rio Arriba County, NM. The site is located on a terrace west of Forest Road 517 and consists of two features, a rectangular shaped unit house and a possible pithouse. The artifact assemblage is comprised of pottery sherds, flaked stone, and ground stone. Diagnostic pottery types documented include Gallina Black-on-gray, corrugated, and utility wares. Flaked stone includes chert, quartzite, and obsidian. The structure type and presence of Gallina Black-on-gray pottery suggests that this site was occupied by the Gallina from A.D. 1100 to A.D. 1300.

Determinations

The U.S. Forest Service has determined that:

- The human remains described in this notice represent the physical remains of, at least, 10 individuals of Native American ancestry.
- Based on geographic location the Hopi Tribe of Arizona; Jicarilla Apache Nation, New Mexico; Mescalero Apache Tribe of the Mescalero Reservation, New Mexico; Navajo Nation, Arizona, New Mexico, & Utah; Ohkay Owingeh, New Mexico; Pueblo of Acoma, New Mexico; Pueblo of Cochiti, New Mexico; Pueblo of Isleta, New Mexico; Pueblo of Jemez,

New Mexico; Pueblo of Laguna, New Mexico; Pueblo of Nambé, New Mexico; Pueblo of Picuris, New Mexico; Pueblo of Pojoaque, New Mexico; Pueblo of San Felipe, New Mexico; Pueblo of San Ildefonso, New Mexico; Pueblo of Sandia, New Mexico; Pueblo of Santa Ana, New Mexico; Pueblo of Santa Clara, New Mexico; Pueblo of Taos, New Mexico; Pueblo of Tesuque, New Mexico; Pueblo of Zia, New Mexico; Santo Domingo Pueblo; Southern Ute Indian Tribe of the Southern Ute Reservation, New Mexico; Ute Mountain Ute Tribe; and the Zuni Tribe for the Zuni Reservation, New Mexico has priority for disposition of the human remains described in this notice.

Claims for Disposition

Written claims for disposition of the human remains in this notice must be sent to the appropriate official identified in this notice under **ADDRESSES**. If no claim for disposition is received by December 30, 2025, the human remains in this notice will become unclaimed human remains. Claims for disposition may be submitted by:

1. Any lineal descendant, Indian Tribe, or Native Hawaiian organization identified in this notice.
2. Any lineal descendant, Indian Tribe, or Native Hawaiian organization not identified in this notice who shows, by a preponderance of the evidence, that they have priority for disposition.

Disposition of the human remains in this notice may occur on or after January 29, 2025. If competing claims for disposition are received, the U.S. Forest Service must determine the most appropriate claimant prior to disposition. Requests for joint disposition of the human remains are considered a single request and not competing requests. The U.S. Forest Service is responsible for sending a copy of this notice to the lineal descendants, Indian Tribes, and Native Hawaiian organizations identified in this notice and to any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3002, and the implementing regulations, 43 CFR 10.7.

Dated: December 19, 2024.

Melanie O'Brien,

Manager, National NAGPRA Program.

BILLING CODE 4312–52–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1356]

Certain Dermatological Treatment Devices and Components Thereof; Notice of Request for Submissions on the Public Interest

AGENCY: International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that on December 19, 2024, the presiding administrative law judge (“ALJ”) issued an Initial Determination on Violation of section 337. The ALJ also issued a Recommended Determination on remedy and bonding should a violation be found in the above-captioned investigation. The Commission is soliciting submissions on public interest issues raised by the recommended relief should the Commission find a violation. This notice is soliciting comments from the public and interested government agencies only.

FOR FURTHER INFORMATION CONTACT:

Panyin A. Hughes, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3042. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission’s electronic docket (EDIS) at <https://edis.usitc.gov>. For help accessing EDIS, please email EDIS3Help@usitc.gov. General information concerning the Commission may also be obtained by accessing its internet server at <https://www.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission’s TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: Section 337 of the Tariff Act of 1930 provides that, if the Commission finds a violation, it shall exclude the articles concerned from the United States unless, after considering the effect of such exclusion upon the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers, it finds that such articles should not be excluded from entry. (19 U.S.C. 1337(d)(1)). A similar provision applies to cease and desist orders. (19 U.S.C. 1337(f)(1)).

The Commission is soliciting submissions on public interest issues raised by the recommended relief

should the Commission find a violation, specifically: a limited exclusion order directed to certain dermatological treatment devices and components thereof imported, sold for importation, and/or sold after importation by Respondents Jeisys Medical Inc. of Seoul, Korea (“Jeisys”); Cynosure, LLC of Westford, MA (“Cynosure”); EndyMed Medical, Ltd. of Caesarea, Israel; EndyMed Medical, Ltd. of New York, New York and EndyMed Medical Inc. of Freehold, New Jersey (together, “EndyMed”); and cease and desist orders directed to Cynosure and EndyMed. Parties are to file public interest submissions pursuant to 19 CFR 210.50(a)(4).

The Commission is interested in further development of the record on the public interest in this investigation. Accordingly, members of the public and interested government agencies are invited to file submissions of no more than five (5) pages, inclusive of attachments, concerning the public interest in light of the ALJ’s Recommended Determination on Remedy and Bonding issued in this investigation on December 19, 2024. Comments should address whether issuance of the recommended remedial orders in this investigation, should the Commission find a violation, would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

- (i) explain how the articles potentially subject to the recommended remedial orders are used in the United States;
- (ii) identify any public health, safety, or welfare concerns in the United States relating to the recommended orders;
- (iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;
- (iv) indicate whether complainant, complainant’s licensees, and/or third-party suppliers have the capacity to replace the volume of articles potentially subject to the recommended orders within a commercially reasonable time; and
- (v) explain how the recommended orders would impact consumers in the United States.

Written submissions must be filed no later than by close of business on January 20, 2025.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. The Commission's paper filing requirements in 19 CFR 210.4(f) are currently waived. 85 FR 15798 (Mar. 19, 2020). Submissions should refer to the investigation number ("Inv. No. 337-TA-1356") in a prominent place on the cover page and/or the first page. (See Handbook for Electronic Filing Procedures, https://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf). Persons with questions regarding filing should contact the Secretary (202-205-2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment by marking each document with a header indicating that the document contains confidential information. This marking will be deemed to satisfy the request procedure set forth in Rules 201.6(b) and 210.5(e)(2) (19 CFR 201.6(b) & 210.5(e)(2)). Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. Any non-party wishing to submit comments containing confidential information must serve those comments on the parties to the investigation pursuant to the applicable Administrative Protective Order. A redacted non-confidential version of the document must also be filed simultaneously with any confidential filing and must be served in accordance with Commission Rule 210.4(f)(7)(ii)(A) (19 CFR 210.4(f)(7)(ii)(A)). All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this investigation may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements. All nonconfidential written submissions will be available for public inspection on EDIS.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's

Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: December 20, 2024.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-722-725 and 731-TA-1690-1693 (Preliminary)]

Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled into Modules, From Cambodia, Malaysia, Thailand and Vietnam; Institution of Antidumping and Countervailing Duty Investigations and Scheduling of Preliminary Phase Investigations

AGENCY: International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping and countervailing duty investigation Nos. 701-TA-722-725 and 731-TA-1690-1693 (Preliminary) pursuant to the Tariff Act of 1930 ("the Act") to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of crystalline silicon photovoltaic cells, whether or not assembled into modules, from Cambodia, Malaysia, Thailand and Vietnam, provided for in statistical reporting numbers 8541.42.0010, and 8541.43.0010 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value and alleged to be subsidized by the Governments of Cambodia, Malaysia, Thailand and Vietnam. Crystalline silicon photovoltaic cells, whether or not assembled into modules, may also be imported under HTS subheadings 8501.71, 8501.72, and 8501.80 and statistical reporting number 8507.20.8010. Unless the Department of Commerce ("Commerce") extends the time for initiation, the Commission must reach a preliminary determination in antidumping and countervailing duty investigations in 45 days, or in this case by June 10, 2024. The Commission's views must be transmitted to Commerce

within five business days thereafter, or by June 17, 2024.

DATES: April 24, 2024.

FOR FURTHER INFORMATION CONTACT: Julie Duffy (202-708-2579), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>.

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), in response to a petition filed on April 24, 2024, by the American Alliance for Solar Manufacturing Trade Committee.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

Participation in the investigations and public service list.—Persons (other than petitioner) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping duty and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these investigations available to

authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—The Office of Investigations will hold a staff conference in connection with the preliminary phase of these investigations beginning at 9:30 a.m. on Wednesday, May 15, 2024. Requests to appear at the conference should be emailed to preliminaryconferences@usitc.gov (DO NOT FILE ON EDIS) on or before 5:15 p.m. on Monday, May 13, 2024. Please provide an email address for each conference participant in the email. Information on conference procedures, format, and participation, including guidance for requests to appear as a witness via videoconference, will be available on the Commission's Public Calendar (Calendar (USITC) ✓ United States International Trade Commission). A nonparty who has testimony that may aid the Commission's deliberations may request permission to participate by submitting a short statement.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, <https://edis.usitc.gov>). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Written submissions.—As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before 5:15 p.m. on May 20, 2024, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than noon on Tuesday, May 14. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures*, available on the Commission's website at https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf, elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information that it submits to the Commission during these investigations may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.

Issued: December 20, 2024.

Lisa Barton,

Secretary to the Commission.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–1461]

Bulk Manufacturer of Controlled Substances Application: Irvine Labs Inc.

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Irvine Labs Inc. has applied to be registered as a bulk manufacturer of basic class(es) of controlled substance(s). Refer to Supplementary Information listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before February 28, 2025. Such persons may also file a written request for a hearing on the application on or before February 28, 2025.

ADDRESSES: The Drug Enforcement Administration requires that all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to <https://www.regulations.gov> and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on <https://www.regulations.gov>. If you have received a Comment Tracking

Number, your comment has been successfully submitted and there is no need to resubmit the same comment.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.33(a), this is notice that on August 26, 2024, Irvine Labs Inc., 7305 Murdy Circle,

Huntington Beach, California 92647–3533, applied to be registered as a bulk manufacturer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
Lysergic acid diethylamide	7315	I
Mescaline	7381	I
Peyote	7415	I
Diethyltryptamine	7434	I
Dimethyltryptamine	7435	I
Psilocybin	7437	I
Psilocyn	7438	I

The company plans to bulk manufacture the above listed controlled substances for research and development purposes internally and for distribution to its research customers. No other activities for these drug codes are authorized for this registration.

Matthew Strait,
Deputy Assistant Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Soroosh Armandi, D.O.; Decision and Order

On February 1, 2024, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Soroosh Armandi, D.O., of San Pedro, California (Registrant). Request for Final Agency Action (RFAA), Attachment (RFAAX) A, at 1, 3. The OSC proposed the revocation of Registrant’s Certificate of Registration No. FA0060359, alleging that Registrant’s registration should be revoked because Registrant is “currently without authority to handle controlled substances in the State of California, the state in which [he is] registered with DEA.” *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).¹

The OSC notified Registrant of his right to file a written request for hearing, and that if he failed to file such a request, he would be deemed to have waived his right to a hearing and be in default. *Id.* (citing 21 CFR 1301.43). Here, Registrant did not request a

¹ According to Agency records, Registrant’s registration expired on June 30, 2024. The fact that a registrant allows his registration to expire during the pendency of an OSC does not impact the Agency’s jurisdiction or prerogative under the Controlled Substances Act (CSA) to adjudicate the OSC to finality. *Jeffrey D. Olsen, M.D.*, 84 FR 68474, 68476–68479 (2019).

hearing. RFAA, at 2.² “A default, unless excused, shall be deemed to constitute a waiver of the [registrant’s] right to a hearing and an admission of the factual allegations of the [OSC].” 21 CFR 1301.43(e).

Further, “[i]n the event that a registrant . . . is deemed to be in default . . . DEA may then file a request for final agency action with the Administrator, along with a record to support its request. In such circumstances, the Administrator may enter a default final order pursuant to [21 CFR] § 1316.67.” *Id.* § 1301.43(f)(1). Here, the Government has requested final agency action based on Registrant’s default pursuant to 21 CFR 1301.43(c), (f), 1301.46. RFAA, at 1; *see also* 21 CFR 1316.67.

Findings of Fact

The Agency finds that, in light of Registrant’s default, the factual allegations in the OSC are admitted. According to the OSC, Registrant’s California medical license expired on March 31, 2023. RFAAX A, at 2. Further, effective June 29, 2023, the

² Based on the Government’s submissions in its RFAA dated May 24, 2024, the Agency finds that service of the OSC on Registrant was adequate. The included declaration from a DEA Diversion Investigator (DI) indicates that she was “unable to locate Registrant and [she was] under the belief that Registrant was out of the country;” accordingly, on February 2, 2024, the DI emailed a copy of the OSC to Registrant’s registered email address. RFAAX 1, at 2. The DI did not state that an undeliverable message was ever received. *Id.* On the same date, the DI mailed a copy of the OSC to Registrant’s registered address. *Id.* On February 5, 2024, however, the OSC was returned to the DI, along with a notice of a forwarding address for Registrant. *Id.*; *see also id.*, Attachment B. On February 14, 2024, the DI mailed a copy of the OSC to Registrant’s forwarding address and later received confirmation via the certified mailing receipt that the OSC was successfully delivered on February 17, 2024. *Id.* at 2; *see also id.*, Attachment C. The Agency finds that the DI’s efforts to serve Registrant were “reasonably calculated, under all the circumstances, to apprise [Registrant] of the pendency of the action.” *Jones v. Flowers*, 547 U.S. 220, 226 (2006) (quoting *Mullane v. Central Hanover Bank & Trust Co.*, 339 U.S. 306, 314 (1950)). Therefore, due process notice requirements have been satisfied.

Osteopathic Medical Board of California revoked Registrant’s California medical license. *Id.* According to California online records, of which the Agency takes official notice, Registrant’s California medical license remains revoked.³ California DCA License Search, <https://search.dca.ca.gov> (last visited date of signature of this Order).⁴ Accordingly, the Agency finds that Registrant is not licensed to practice medicine in California, the state in which he is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under 21 U.S.C. 823 “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” With respect to a practitioner, DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. *Gonzales v.*

³ Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Registrant may dispute the Agency’s finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to Office of the Administrator, Drug Enforcement Administration at dea.addo.attorneys@dea.gov.

⁴ The OSC lists the number for Registrant’s California medical license as 20A9741, RFAAX A, at 1; however, the California DCA License Search lists Registrant’s California medical license number as 9741.

Oregon, 546 U.S. 243, 270 (2006) (“The Attorney General can register a physician to dispense controlled substances ‘if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.’ . . . The very definition of a ‘practitioner’ eligible to prescribe includes physicians ‘licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices’ to dispense controlled substances. § 802(21).”). The Agency has applied these principles consistently. *See, e.g.*, *James L. Hooper, M.D.*, 76 FR 71371, 71372 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27616, 27617 (1978).⁵

According to California statute, “dispense” means “to deliver a controlled substance to an ultimate user or research subject by or pursuant to the lawful order of a practitioner, including the prescribing, furnishing, packaging, labeling, or compounding necessary to prepare the substance for that delivery.” Cal. Health & Safety Code § 11010 (West 2024). Further, a “practitioner” means a person “licensed, registered, or otherwise permitted, to distribute, dispense, conduct research with respect to, or administer, a controlled substance in the course of professional practice or research in [the] state.” *Id.* § 11026(c).

Here, the undisputed evidence in the record is that Registrant lacks authority to practice medicine in California. As discussed above, an individual must be a licensed practitioner to dispense a controlled substance in California. Thus, because Registrant lacks authority to practice medicine in California and, therefore, is not authorized to handle controlled substances in California, Registrant is not eligible to maintain a

DEA registration. Accordingly, the Agency will order that Registrant’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. FA0060359 issued to Soroosh Armandi, D.O. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Soroosh Armandi, D.O., to renew or modify this registration, as well as any other pending application of Soroosh Armandi, D.O., for additional registration in California. This Order is effective January 29, 2025.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 20, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 24–52]

Maria Dewitt, N.P.; Decision and Order

On June 21, 2024, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Maria Dewitt, N.P. (Respondent). OSC, at 1, 3. The OSC proposed the revocation of Respondent’s DEA Certificate of Registration No. MD7143960, at the registered address of 9038 High Branch, San Antonio, Texas. *Id.* at 1. The OSC alleged that Respondent’s DEA registration should be revoked because Respondent is “without authority to handle controlled substances in the State of Texas, the state in which [she is] registered with DEA.” *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).

On June 25, 2024, Respondent requested a hearing and filed an Answer to the OSC.¹ On June 28, 2024, the Government filed a Notice of Filing of Evidence and Motion for Summary Disposition, which Respondent opposed.² On August 2, 2024, Administrative Law Judge Teresa A. Wallbaum (the ALJ) granted the Government’s Motion for Summary Disposition and recommended the revocation of Respondent’s registration, finding that because Respondent lacks state authority to handle controlled substances in Texas, the state in which she is registered with DEA, “[t]here is no genuine issue of material fact in this case.” Order Granting the Government’s Motion for Summary Disposition, and Recommended Rulings, Findings of Fact, Conclusions of Law, and Decision of the Administrative Law Judge (RD), at 8–9. Respondent did not file exceptions to the RD.³

Having reviewed the entire record, the Agency adopts and hereby incorporates by reference the entirety of the ALJ’s rulings, findings of fact, conclusions of law, and recommended sanction as found in the RD and summarizes and expands upon portions thereof herein.

Findings of Fact

The Government has alleged that Respondent lacks a prescriptive authority delegation agreement with a physician, which is required for a Texas advanced practice registered nurse to handle controlled substances. RD, at 4, 7–8.⁴ According to Texas online records, of which the Agency takes official notice, Respondent does not currently have a prescriptive authority delegation agreement with a physician.⁵

¹ Respondent’s June 25, 2024, hearing request was an amended version of an initial document filed on June 24, 2024. Respondent also submitted an amended version of her Answer on the same day of its initial filing, June 25, 2024.

² *See* Respondent’s Response to Government’s Motion for Summary Disposition and Request for Hearing (Opposition).

³ On August 5, 2024, Respondent filed a letter, dated August 2, 2024, seeking to appeal the ALJ’s Recommended Decision; however, in this letter, Respondent did not present any additional arguments for the Agency to consider.

⁴ *See also* Government’s Notice of Filing of Evidence and Motion for Summary Disposition, Exhibit (GX) 2.

⁵ Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Respondent may dispute the Agency’s finding by

Continued

⁵ This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g.*, *James L. Hooper, M.D.*, 76 FR at 71371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39130, 39131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51104, 51105 (1993); *Bobby Watts, M.D.*, 53 FR 11919, 11920 (1988); *Frederick Marsh Blanton, M.D.*, 43 FR at 27617.

Texas Medical Board, Healthcare Provider Search, <https://profile.tmb.state.tx.us/Search.aspx> (last visited date of signature of this Order). Accordingly, the Agency finds that Respondent is not currently authorized to handle controlled substances in Texas, the state in which she is registered with the DEA.⁶

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the Controlled Substances Act (CSA) “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” With respect to a practitioner, DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. *Gonzales v. Oregon*, 546 U.S. 243, 270 (2006) (“The Attorney General can register a physician to dispense controlled substances ‘if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.’ . . . The very definition of a ‘practitioner’ eligible to prescribe includes physicians ‘licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices’ to dispense controlled substances. § 802(21).”). The Agency has applied these principles consistently. *See, e.g., James L. Hooper, M.D.*, 76 FR 71371, 71372 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th

Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27616, 27617 (1978).⁷

According to Texas statute, “dispense” means “the delivery of a controlled substance in the course of professional practice or research, by a practitioner or person acting under the lawful order of a practitioner, to an ultimate user or research subject. The term includes the prescribing, administering, packaging, labeling, or compounding necessary to prepare the substance for delivery.” Tex. Health & Safety Code Ann. § 481.002(12) (2024). Further, a “practitioner” includes “an advanced practice registered nurse or physician assistant to whom a physician has delegated the authority to prescribe or order a drug or device” *Id.* § 481.002(39)(D). Texas statute provides that “[a] physician may delegate to an advanced practice registered nurse or physician assistant, acting under adequate physician supervision, the act of prescribing or ordering a drug or device as authorized through a prescriptive authority agreement between the physician and the advanced practice registered nurse or physician assistant, as applicable.” Tex. Occ. Code Ann. § 157.0512(a) (2024).

Here, the undisputed evidence in the record is that Respondent lacks authority to handle controlled substances in Texas because she does not have a prescriptive authority delegation agreement with a physician. As discussed above, a Texas advanced practice registered nurse must have a prescriptive authority delegation agreement with a physician to dispense controlled substances in Texas. Thus, because Respondent lacks authority to handle controlled substances in Texas, Respondent is not eligible to maintain a DEA registration. RD, at 8. Accordingly,

the Agency will order that Respondent’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. MD7143960 issued to Maria Dewitt, N.P. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Maria Dewitt, N.P., to renew or modify this registration, as well as any other pending application of Maria Dewitt, N.P., for additional registration in Texas. This Order is effective January 29, 2025.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 20, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Heather Achbach,

Federal Register Liaison Officer, Drug Enforcement Administration.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Robert Esser, D.D.S.; Decision and Order

On December 18, 2023, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Robert Esser, D.D.S., of Erie, Pennsylvania (Registrant). Request for Final Agency Action (RFAA), Exhibit (RFAAX) 2, at 1, 3. The OSC proposed the revocation of Registrant’s Certificate of Registration No. BE3510193, alleging that Registrant’s registration should be revoked because Registrant is “currently without authority to handle controlled substances in the Commonwealth of Pennsylvania, the state in which [he is] registered with DEA.” *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).

filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to Office of the Administrator, Drug Enforcement Administration at dea.addo.attorneys@dea.gov.

⁶In her Opposition, Respondent argues that there are material facts in dispute that require a hearing, specifically mentioning her state and federal authority to handle controlled substances. Respondent’s Opposition, at 6. However, as the ALJ correctly notes in the RD, Respondent does not actually dispute the material fact that she lacks state and federal authority to handle controlled substances, with Respondent admitting that she has no current prescriptive authority delegation agreement with a physician. RD, at 9; Respondent’s Opposition, at 2, 11. The Agency also agrees with the ALJ’s finding that the other facts in dispute, such as Respondent’s address, are immaterial and not dispositive to the adjudication of the current matter. RD, at 9 n.7 (citing *Michael Jones, M.D.*, 86 FR 20728, 20729 (2021)).

⁷This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper, M.D.*, 76 FR at 71371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39130, 39131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51104, 51105 (1993); *Bobby Watts, M.D.*, 53 FR 11919, 11920 (1988); *Frederick Marsh Blanton*, 43 FR at 27617.

The OSC notified Registrant of his right to file a written request for hearing, and that if he failed to file such a request, he would be deemed to have waived his right to a hearing and be in default. *Id.* (citing 21 CFR 1301.43). Here, Registrant did not request a hearing, RFAA, at 2.¹ “A default, unless excused, shall be deemed to constitute a waiver of the [registrant’s] right to a hearing and an admission of the factual allegations of the [OSC].” 21 CFR 1301.43(e).

Further, “[i]n the event that a registrant . . . is deemed to be in default . . . DEA may then file a request for final agency action with the Administrator, along with a record to support its request. In such circumstances, the Administrator may enter a default final order pursuant to [21 CFR] § 1316.67.” *Id.* § 1301.43(f)(1). Here, the Government has requested final agency action based on Registrant’s default pursuant to 21 CFR 1301.43(c), (f), 1301.46. RFAA, at 3; *see also* 21 CFR 1316.67.

Findings of Fact

The Agency finds that, in light of Registrant’s default, the factual allegations in the OSC are admitted. According to the OSC, on October 20, 2022, the Pennsylvania State Board of Dentistry suspended Registrant’s Pennsylvania dental license. RFAAX 2, at 2. According to Pennsylvania online records, of which the Agency takes official notice, Registrant’s Pennsylvania dental license remains suspended.²

¹ Based on the Government’s submissions in its RFAA dated March 4, 2024, the Agency finds that service of the OSC on Registrant was adequate. Specifically, the included Declaration from a DEA Diversion Investigator (DI) indicates that on January 3, 2024, the DI emailed a copy of the OSC to Registrant’s registered email address and received confirmation that the email was successfully delivered. RFAAX 3, at 2, Attachment B; *Mohammed S. Aljanaby, M.D.*, 82 FR 34552, 34552 (2017) (finding that service by email satisfies due process where the email is not returned as undeliverable and other methods have been unsuccessful). On December 28, 2023, the DI had attempted in-person service of the OSC at Registrant’s registered address, and after receiving no response, left a business card on the premises. RFAAX 3, at 2. Further, on January 3, 2024, DEA had mailed a copy of the OSC to Registrant’s registered address via certified mail, but the mailing was returned. *Id.* at 2, Attachment A.

² Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Registrant may dispute the Agency’s finding by filing a properly supported motion for

Pennsylvania Licensing System Verification Service, <https://www.pals.pa.gov/#!/page/search> (last visited date of signature of this Order). Accordingly, the Agency finds that Registrant is not licensed to practice dentistry in Pennsylvania, the state in which he is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under 21 U.S.C. 823 “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” With respect to a practitioner, DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. *Gonzales v. Oregon*, 546 U.S. 243, 270 (2006) (“The Attorney General can register a physician to dispense controlled substances ‘if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.’ . . . The very definition of a ‘practitioner’ eligible to prescribe includes physicians ‘licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices’ to dispense controlled substances. § 802(21).”). The Agency has applied these principles consistently. *See, e.g., James L. Hooper, M.D.*, 76 FR 71371, 71372 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27616, 27617 (1978).³

reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to the DEA Office of the Administrator, Drug Enforcement Administration at dea.addo.attorneys@dea.gov.

³ This rule derives from the text of two provisions of the Controlled Substances Act (CSA). First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer

According to Pennsylvania statute, “dispense” means “to deliver a controlled substance, other drug or device to an ultimate user or research subject by or pursuant to the lawful order of a practitioner, including the prescribing, administering, packaging, labeling, or compounding necessary to prepare such item for that delivery.” 35 Pa. Stat. and Cons. Stat. Ann. section 780–102(b) (West 2024). Further, a “practitioner” means “a physician . . . dentist . . . or other person licensed, registered or otherwise permitted to distribute, dispense, conduct research with respect to or to administer a controlled substance, other drug or device in the course of professional practice or research in the Commonwealth of Pennsylvania.” *Id.*

Here, the undisputed evidence in the record is that Registrant lacks authority to practice dentistry in Pennsylvania. As discussed above, an individual must be a licensed practitioner to dispense a controlled substance in Pennsylvania. Thus, because Registrant lacks authority to practice dentistry in Pennsylvania and, therefore, is not authorized to handle controlled substances in Pennsylvania, Registrant is not eligible to maintain a DEA registration. Accordingly, the Agency will order that Registrant’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. BE3510193 issued to Robert Esser, D.D.S. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Robert Esser, D.D.S., to renew or modify this registration, as well as any other pending application of Robert Esser, D.D.S., for additional registration in Pennsylvania. This Order is effective January 29, 2025.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 20, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE
Drug Enforcement Administration

[Docket No. DEA–1475]

Importer of Controlled Substances Application: Siegfried USA, LLC

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Siegfried USA, LLC has applied to be registered as an importer of basic class(es) of controlled substance(s). Refer to Supplementary Information listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before January 29, 2025. Such persons may also file a written request for a hearing on the application on or before January 29, 2025.

ADDRESSES: The Drug Enforcement Administration requires that all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to <https://www.regulations.gov> and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be

aware that submitted comments are not instantaneously available for public view on <https://www.regulations.gov>. If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment. All requests for a hearing must be sent to: (1) Drug Enforcement Administration, Attn: Hearing Clerk/OALJ, 8701 Morrisette Drive, Springfield, Virginia 22152; and (2) Drug Enforcement Administration, Attn: DEA **Federal Register** Representative/DPW, 8701 Morrisette Drive, Springfield, Virginia 22152. All requests for a hearing should also be sent to: Drug Enforcement Administration, Attn: Administrator, 8701 Morrisette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.34(a), this is notice that on November 20, 2024, Siegfried USA, LLC, 33 Industrial Park Road, Pennsville, New Jersey 08070, applied to be registered as an importer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
Phenylacetone	8501	II
Opium, Raw	9600	II
Poppy Straw Concentrate	9670	II

The company plans to import the listed controlled substances to manufacture bulk Active Pharmaceuticals Ingredients for distribution to its customers. No other activities for these drug codes are authorized for this registration.

Approval of permit applications will occur only when the registrant’s business activity is consistent with what is authorized under 21 U.S.C. 952(a)(2). Authorization will not extend to the import of Food and Drug Administration approved or non-approved finished dosage forms for commercial sale.

Matthew Strait,
Deputy Assistant Administrator.

BILLING CODE P

DEPARTMENT OF JUSTICE
Drug Enforcement Administration

Matthew Okeke, M.D.; Decision and Order

On February 14, 2024, the Drug Enforcement Administration (DEA or Government) issued an Order to Show

Cause (OSC) to Matthew Okeke, M.D., of Las Vegas, Nevada (Registrant). Request for Final Agency Action (RFAA), Exhibit (RFAAX) 1, at 1, 3. The OSC proposed the revocation of Registrant’s Certificate of Registration No. FO4173845, alleging that Registrant’s registration should be revoked because Registrant is “currently without authority to handle controlled substances in Nevada, the state in which [he is] registered with DEA.” *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).

The OSC notified Registrant of his right to file a written request for hearing, and that if he failed to file such a request, he would be deemed to have waived his right to a hearing and be in default. *Id.* (citing 21 CFR1301.43). Here, Registrant did not request a hearing. RFAA, at 2.¹ “A default, unless

excused, shall be deemed to constitute a waiver of the registrant’s/applicant’s right to a hearing and an admission of the factual allegations of the [OSC].” 21 CFR 1301.43(e).

Further, “[i]n the event that a registrant . . . is deemed to be in default . . . DEA may then file a request for final agency action with the Administrator, along with a record to support its request. In such circumstances, the Administrator may enter a default final order pursuant to [21 CFR] § 1316.67.” *Id.* § 1301.43(f)(1). Here, the Government has requested

also id., Attachments D–E. Finally, on February 28, 2024, the DI left another copy of the OSC at Registrant’s residential address. *Id.* at 2–3. The Agency finds that Registrant was successfully served the OSC by email on February 26, 2024, as the emails to Registrant’s registered email address and to Registrant’s attorney were not returned as undeliverable. *Mohammed S. Aljanaby, M.D.*, 82 FR 34,552, 34,552 (2017) (finding that service by email satisfies due process where the email is not returned as undeliverable and other methods have been unsuccessful). The Agency finds that the DI’s efforts to serve Registrant by other means were “reasonably calculated, under all the circumstances, to apprise [Registrant] of the pendency of the action.” *Jones v. Flowers*, 547 U.S. 220, 226 (2006) (quoting *Mullane v. Central Hanover Bank & Trust Co.*, 339 U.S. 306, 314 (1950)). Therefore, due process notice requirements have been satisfied.

¹ Based on the Government’s submissions in its RFAA dated April 16, 2024, the Agency finds that service of the OSC on Registrant was adequate. The included declaration from a DEA Diversion Investigator (DI) indicates that on February 26, 2024, the DI left a copy of the OSC at Registrant’s registered address. RFAAX 2, at 2. On the same date, the DI emailed a copy of the OSC to Registrant’s registered email address and to Registrant’s attorney. *Id.* at 2; *see also id.*, Attachment C. On February 27, 2024, the OSC was mailed to Registrant’s residential address, with delivery confirmed on March 2, 2024. *Id.* at 2; *see*

final agency action based on Registrant's default pursuant to 21 CFR 1301.43(c), (f), 1301.46. RFAA, at 1; *see also* 21 CFR 1316.67.

Findings of Fact

The Agency finds that, in light of Registrant's default, the factual allegations in the OSC are admitted. According to the OSC, Registrant's Nevada medical license is inactive. RFAAX 1, at 1. Further, on January 17, 2024, Registrant's Nevada controlled substance registration was revoked. *Id.* at 2. According to Nevada online records, of which the Agency takes official notice, Registrant's Nevada medical license and Nevada controlled substance registration are currently listed as "Inactive-Probation" and "Inactive" respectively.² Nevada State Board of Medical Examiners Licensee Search, <https://nsbme.us.thentiacloud.net/webs/nsbme/register> (last visited date of signature of this Order); Nevada State Board of Pharmacy License Verification, <https://online.nvbop.org/#/verifylicense> (last visited date of signature of this Order). Accordingly, the Agency finds that Registrant is not licensed to practice medicine nor to handle controlled substances in Nevada, the state in which he is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under 21 U.S.C. 823 "upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances."

With respect to a practitioner, DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining

a practitioner's registration. *Gonzales v. Oregon*, 546 U.S. 243, 270 (2006) ("The Attorney General can register a physician to dispense controlled substances 'if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.' . . . The very definition of a 'practitioner' eligible to prescribe includes physicians 'licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices' to dispense controlled substances. § 802(21)."). The Agency has applied these principles consistently. *See, e.g., James L. Hooper, M.D.*, 76 FR 71371, 71372 (2011), *pet. for rev. denied*, 481 F. App'x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27616, 27617 (1978).³

According to Nevada statute, "[e]very practitioner or other person who dispenses any controlled substance within th[e] State or who proposes to engage in the dispensing of any controlled substance within th[e] State shall obtain biennially a registration issued by the [Nevada State Board of Pharmacy] in accordance with its regulations." Nev. Rev. Stat. § 453.226(1) (2023). Further, according to Nevada statute, "dispense" means "to deliver a controlled substance to an ultimate user, patient or research subject by or pursuant to the lawful order of a practitioner, including the prescribing, administering, packaging, labeling or compounding necessary to prepare the substance for that delivery." *Id.* at § 453.056(1).

Here, the undisputed evidence in the record is that Registrant lacks authority to dispense controlled substances in Nevada because his Nevada controlled substance registration is inactive. As discussed above, an individual must

³ This rule derives from the text of two provisions of the CSA. First, Congress defined the term "practitioner" to mean "a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice." 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that "[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices." 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper, M.D.*, 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.*, 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton, M.D.*, 43 FR at 27,617.

hold a Nevada controlled substance registration to dispense a controlled substance in Nevada. Thus, because Registrant lacks authority to handle controlled substances in Nevada, Registrant is not eligible to maintain a DEA registration. Accordingly, the Agency will order that Registrant's DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. FO4173845, issued to Matthew Okeke, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Matthew Okeke, M.D., to renew or modify this registration, as well as any other pending application of Matthew Okeke, M.D., for additional registration in Nevada. This Order is effective January 29, 2025.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 20, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA **Federal Register** Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Kevin Petersen, M.D.; Decision and Order

On November 22, 2023, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Kevin Petersen, M.D., of Las Vegas, Nevada (Registrant). Request for Final Agency Action (RFAA), Exhibit (RFAAX) 2, at 1, 3. The OSC proposed the revocation of Registrant's Certificate of Registration No. BP0967818, alleging that Registrant's registration should be revoked because

² Under the Administrative Procedure Act, an agency "may take official notice of facts at any stage in a proceeding—even in the final decision." United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), "[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary." Accordingly, Registrant may dispute the Agency's finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to the DEA Office of the Administrator, Drug Enforcement Administration at dea.addo.attorneys@dea.gov.

Registrant is “currently without authority to prescribe, administer, dispense, or otherwise handle controlled substances in the State of Nevada, the state in which [he is] registered with DEA.” *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).¹

The OSC notified Registrant of his right to file a written request for hearing, and that if he failed to file such a request, he would be deemed to have waived his right to a hearing and be in default. *Id.* (citing 21 CFR 1301.43). Here, Registrant did not request a hearing. RFAA, at 3.² “A default, unless excused, shall be deemed to constitute a waiver of the registrant’s/applicant’s right to a hearing and an admission of the factual allegations of the [OSC].” 21 CFR 1301.43(e).

Further, “[i]n the event that a registrant . . . is deemed to be in default . . . DEA may then file a request for final agency action with the Administrator, along with a record to support its request. In such circumstances, the Administrator may enter a default final order pursuant to [21 CFR] § 1316.67.” *Id.* § 1301.43(f)(1). Here, the Government has requested final agency action based on Registrant’s default pursuant to 21 CFR 1301.43(c),

¹ According to Agency records, Registrant’s registration expired on March 31, 2024. The fact that a registrant allows his registration to expire during the pendency of an OSC does not impact the Agency’s jurisdiction or prerogative under the Controlled Substances Act (CSA) to adjudicate the OSC to finality. *Jeffrey D. Olsen, M.D.*, 84 FR 68474, 68476–79 (2019).

² Based on the Government’s submissions in its RFAA dated March 15, 2024, the Agency finds that service of the OSC on Registrant was adequate. The included declaration from the DEA Diversion Investigator (DI) indicates that on November 27, 2023, under the belief that Registrant no longer lived in Nevada, the DI sent a copy of the OSC to DEA’s California Riverside Office for DEA investigators from that office to attempt to personally serve Registrant with a copy of the OSC at two California addresses associated with Registrant. RFAAX 1, at 1. Registrant was not present at either California address. *Id.* On November 30, 2023, the DI sent copies of the OSC, via certified mail, to three different addresses associated with Registrant, including two in California and one in Nevada. *Id.* at 2. On or about December 13, 2023, the DI received all three certified mailings back as undeliverable. *Id.* Finally, on or about January 30, 2024, the DI sent a copy of the OSC via email to two email addresses Registrant previously provided to DEA. *Id.* The Agency finds that Registrant was successfully served the OSC by email and that the DI’s efforts to serve Registrant by other means were “reasonably calculated, under all the circumstances, to apprise [Registrant] of the pendency of the action.” *Jones v. Flowers*, 547 U.S. 220, 226 (2006) (quoting *Mullane v. Central Hanover Bank & Trust Co.*, 339 U.S. 306, 314 (1950)); see also *Mohammed S. Aljanaby, M.D.*, 82 FR 34552, 34552 (2017) (finding that service by email satisfies due process where the email is not returned as undeliverable and other methods have been unsuccessful). Therefore, due process notice requirements have been satisfied.

(f), 1301.46. RFAA, at 1; see also 21 CFR 1316.67.

Findings of Fact

The Agency finds that, in light of Registrant’s default, the factual allegations in the OSC are admitted. According to the OSC, Registrant’s Nevada medical license expired on June 30, 2023. RFAAX 1, at 2. Further, according to the OSC, Registrant’s Nevada controlled substance license was suspended and set to expire on October 31, 2024. *Id.* According to Nevada online records, of which the Agency takes official notice,³ Registrant’s Nevada medical license is revoked. Nevada State Board of Medical Examiners Licensee Search, <https://nsbme.us.thenticcloud.net/webs/nsbme/register/#> (last visited date of signature of this Order).⁴

Accordingly, the Agency finds that Registrant is not licensed to practice medicine in Nevada, the state in which he is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under 21 U.S.C. 823 “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” With respect to a practitioner, DEA has also long held that the possession of

³ Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Registrant may dispute the Agency’s finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to the DEA Office of the Administrator, Drug Enforcement Administration at dea.addo.attorneys@dea.gov.

⁴ According to Nevada online records, Registrant’s Nevada controlled substance license referenced in the OSC is revoked; however, there is an additional Nevada controlled substance license, not referenced in the OSC, that is active and is recorded under the same name as Registrant. Nevada State Board of Pharmacy License Verification, <https://online.nvbop.org/#/verifylicense> (last visited date of signature of this Order). Nonetheless, because Registrant’s Nevada medical license is undoubtedly revoked, even if this active Nevada controlled substance license belongs to Registrant, Registrant would still lack authority to handle controlled substances in Nevada. See *infra* (Discussion).

authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. *Gonzales v. Oregon*, 546 U.S. 243, 270 (2006) (“The Attorney General can register a physician to dispense controlled substances ‘if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.’ . . . The very definition of a ‘practitioner’ eligible to prescribe includes physicians ‘licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices’ to dispense controlled substances. § 802(21).”). The Agency has applied these principles consistently. See, e.g., *James L. Hooper, M.D.*, 76 FR 71371, 71372 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27616, 27617 (1978).⁵

According to Nevada statute, “dispense” means “to deliver a controlled substance to an ultimate user, patient or research subject by or pursuant to the lawful order of a practitioner, including the prescribing, administering, packaging, labeling or compounding necessary to prepare the substance for that delivery.” Nev. Rev. Stat. § 453.056(1) (2023). Further, a “practitioner” includes a “physician . . . who holds a license to practice his or her profession in [Nevada] and is registered pursuant to [the Nevada Uniform Controlled Substances Act].” *Id.* at § 453.126(1).

Here, the undisputed evidence in the record is that Registrant lacks authority to practice medicine in Nevada. As discussed above, an individual must be a licensed practitioner to dispense a

⁵ This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. See, e.g., *James L. Hooper, M.D.*, 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39130, 39131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51104, 51105 (1993); *Bobby Watts, M.D.*, 53 FR 11919, 11920 (1988); *Frederick Marsh Blanton, M.D.*, 43 FR at 27617.

controlled substance in Nevada. Thus, because Registrant lacks authority to practice medicine in Nevada, and, therefore, is not authorized to handle controlled substances in Nevada, Registrant is not eligible to maintain a DEA registration. Accordingly, the Agency will order that Registrant's DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. BP0967818 issued to Kevin Petersen, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Kevin Petersen, M.D., to renew or modify this registration, as well as any other pending application of Kevin Petersen, M.D., for additional registration in Nevada. This Order is effective January 29, 2025.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 20, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 24-67]

Jason Lee Ray, PA-C; Decision and Order

On August 22, 2024, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Jason Lee Ray, PA-C, of Marbleton, Wyoming (Respondent). OSC, at 1, 4. The OSC proposed the revocation of Respondent's DEA Certificate of Registration No. MR4038293, alleging that Respondent's DEA registration should be revoked

because Respondent is "without authority to prescribe, administer, dispense, or otherwise handle controlled substances in the State of Wyoming, the state in which [he is] registered with DEA." *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).

On September 4, 2024, Respondent requested a hearing and filed an Answer. On September 11, 2024, the Government filed a Motion for Summary Disposition, to which Respondent did not respond. On September 20, 2024, Administrative Law Judge Paul E. Soeffing (the ALJ) granted the Government's Motion for Summary Disposition and recommended the revocation of Respondent's registration, finding that because Respondent lacks state authority to handle controlled substances in Wyoming, the state in which he is registered with DEA, "there is no other fact of consequence for th[e] tribunal to decide." Order Granting the Government's Motion for Summary Disposition, and Recommended Rulings, Findings of Fact, Conclusions of Law, and Decision of the Administrative Law Judge (RD), at 5-6. Respondent did not file exceptions to the RD.

Having reviewed the entire record, the Agency adopts and hereby incorporates by reference the entirety of the ALJ's rulings, findings of fact, conclusions of law, and recommended sanction as found in the RD and summarizes and expands upon portions thereof herein.

Findings of Fact

On February 15, 2024, the Wyoming Board of Medicine suspended Respondent's Wyoming physician assistant license. RD, at 3.¹ According to Wyoming online records, of which the Agency takes official notice, Respondent's Wyoming physician assistant license remains suspended.²

¹ See also Government's Submission of Evidence and Motion for Summary Disposition (Motion for Summary Disposition), Exhibit 2, Attachment C, at 11. The Agency notes that there is some inconsistency regarding the naming of the attachments included with the Government's Exhibit 2 (the submitted Declaration from a DEA Diversion Investigator) when comparing how the attachments are named in the Declaration versus the Motion for Summary Disposition itself; however, this inconsistency does not appear to be substantive.

² Under the Administrative Procedure Act, an agency "may take official notice of facts at any stage in a proceeding—even in the final decision." United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), "[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary." Accordingly,

Wyoming Board of Medicine, Physician and PA License Lookup, <https://wyomedboard.wyo.gov/consumers/license-lookup> (last visited date of signature of this Order). Accordingly, the Agency finds that Respondent is not currently licensed to practice as a physician assistant in Wyoming, the state in which he is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the Controlled Substances Act (CSA) "upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances." With respect to a practitioner, DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. *Gonzales v. Oregon*, 546 U.S. 243, 270 (2006) ("The Attorney General can register a physician to dispense controlled substances 'if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.' . . . The very definition of a 'practitioner' eligible to prescribe includes physicians 'licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices' to dispense controlled substances. § 802(21)."). The Agency has applied these principles consistently. See, e.g., *James L. Hooper, M.D.*, 76 FR 71371, 71372 (2011), *pet. for rev. denied*, 481 F. App'x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27616, 27617 (1978).³

Respondent may dispute the Agency's finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to Office of the Administrator, Drug Enforcement Administration at dea.addo.attorneys@dea.gov.

³ This rule derives from the text of two provisions of the CSA. First, Congress defined the term "practitioner" to mean "a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice." 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that "[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he

Continued

Under Wyoming law, “dispense” means “to deliver a controlled substance to an ultimate user or research subject by or pursuant to the lawful order of a practitioner, including the prescribing, administering, packaging, labeling, or compounding necessary to prepare the substance for that delivery.” Wyo. Stat. Ann. section 35–7–1002(a)(vii) (2024). Further, a “practitioner” includes “[a] physician . . . or other person licensed, registered or otherwise permitted to distribute, dispense, conduct research with respect to or administer a controlled substance in the course of professional practice or research in th[e] state.” *Id.* section 35–7–1002(a)(xx)(A).

Here, the undisputed evidence in the record is that Respondent currently lacks authority to practice as a physician assistant in Wyoming. As discussed above, a physician assistant must be a licensed practitioner to dispense controlled substances in Wyoming. Thus, because Respondent currently lacks authority to practice as a physician assistant in Wyoming and, therefore, is not currently authorized to handle controlled substances in Wyoming, Respondent is not eligible to maintain a DEA registration. RD, at 4–6. Accordingly, the Agency will order that Respondent’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. MR4038293 issued to Jason Lee Ray, PA–C. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Jason Lee Ray, PA–C, to renew or modify this registration, as well as any other pending application of Jason Lee Ray, PA–C, for additional registration in Wyoming. This Order is effective January 29, 2025.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 20, 2024, by Administrator Anne Milgram. That document with the

practices.” 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper, M.D.*, 76 FR 71371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39130, 39131 (2006); *Dominick A. BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 24–58]

Shiva Akula, M.D.; Decision and Order

On June 24, 2024, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Shiva Akula, M.D., of New Orleans, Louisiana (Respondent). OSC, at 1, 4. The OSC proposed the revocation of Respondent’s DEA Certificate of Registration No. BA7786013, alleging that Respondent’s DEA registration should be revoked because Respondent is “without authority to prescribe, administer, dispense, or otherwise handle controlled substances in the State of Louisiana, the state in which [he is] registered with DEA.” *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).

By letter dated July 29, 2024, (filed August 7, 2024) Respondent requested a hearing. On August 29, 2024, the Government filed a Motion for Summary Disposition, to which Respondent did not respond. On September 26, 2024, Administrative Law Judge Teresa A. Wallbaum (the ALJ) granted the Government’s Motion for Summary Disposition and recommended the revocation of Respondent’s registration, finding that because Respondent lacks state authority to handle controlled substances in Louisiana, the state in which he is registered with DEA, “[t]here is no genuine issue of material fact in this case.” Order Granting the Government’s Motion for Summary Disposition, and Recommended Rulings, Findings of Fact, Conclusions of Law, and Decision of the Administrative Law Judge (RD), at 5.

Respondent did not file exceptions to the RD.¹

Having reviewed the entire record, the Agency adopts and hereby incorporates by reference the entirety of the ALJ’s rulings, findings of fact, conclusions of law, and recommended sanction as found in the RD and summarizes and expands upon portions thereof herein.

Findings of Fact

On January 12, 2024, the Louisiana State Board of Medical Examiners suspended Respondent’s Louisiana medical license. RD, at 4.² On March 31, 2024, Respondent’s Louisiana medical license expired. RD, at 3. On June 1, 2024, Respondent’s Louisiana controlled substance license expired. *Id.* at 4.

According to Louisiana online records, of which the Agency takes official notice, Respondent’s Louisiana medical license remains suspended.³ Louisiana State Board of Medical Examiners, License Verification, <https://online.lasbme.org/#/verifylicense> (last visited date of signature of this Order). Further, Respondent’s Louisiana controlled substance license status is “[l]apsed; not valid for practice.” Louisiana Board of Pharmacy, License Lookup, <https://secure.pharmacy.la.gov/Lookup/LicenseLookup.aspx> (last visited date of signature of this Order).

Accordingly, the Agency finds that Respondent is not currently licensed to practice medicine nor to handle controlled substances in Louisiana, the state in which he is registered with DEA.

¹ By letter dated September 18, 2024, (filed October 7, 2024) Respondent requested a 60-day extension to respond to the RD due to the pending appeal of an underlying conviction. Respondent’s Request for Extension to File Response to Pending Action on DEA License (Respondent’s Extension Request), at 1. The request was denied.

² *See also* Government’s Notice of Filing of Evidence and Motion for Summary Disposition, Exhibit 1.

³ Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Respondent may dispute the Agency’s finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to Office of the Administrator, Drug Enforcement Administration at dea.addo.attorneys@dea.gov.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the Controlled Substances Act (CSA) “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” With respect to a practitioner, DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. *Gonzales v. Oregon*, 546 U.S. 243, 270 (2006) (“The Attorney General can register a physician to dispense controlled substances ‘if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.’ . . . The very definition of a ‘practitioner’ eligible to prescribe includes physicians ‘licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices’ to dispense controlled substances. § 802(21).”). The Agency has applied these principles consistently. *See, e.g., James L. Hooper, M.D.*, 76 FR 71371, 71372 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27616, 27617 (1978).⁴

Under Louisiana statute, “dispense” means “to deliver a controlled dangerous substance to the ultimate user or human research subject by or pursuant to the lawful order of a practitioner, including the packaging, labeling, or compounding necessary to

prepare the substance for such delivery.” La. Stat. Ann. section 40:961(14) (2024). A “practitioner” means “a physician . . . or other person licensed, registered, or otherwise permitted to distribute, dispense, conduct research with respect to, or administer a controlled dangerous substance in the course of professional practice or research in th[e] state.” *Id.* section 40:961(35).

Further, Louisiana statute states that “[e]very person who . . . distributes, procures, possesses, prescribes, or dispenses any controlled dangerous substance within th[e] state . . . shall obtain a controlled dangerous substance license issued by the Louisiana Board of Pharmacy in accordance with the rules and regulations promulgated by the board prior to engaging in such activity.” *Id.* section 40:973(A)(1).

Here, the undisputed evidence in the record is that Respondent currently lacks authority to handle controlled substances in Louisiana because Respondent’s Louisiana medical license is suspended, and Respondent’s Louisiana controlled substance license is lapsed. As discussed above, an individual must be a licensed practitioner and must hold a Louisiana controlled substance license to dispense controlled substances in Louisiana. Thus, because Respondent lacks authority to practice medicine in Louisiana, as well as lacks authority to handle controlled substances in Louisiana, Respondent is not eligible to maintain a DEA registration. RD, at 5–6. Accordingly, the Agency will order that Respondent’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. BA7786013 issued to Shiva Akula, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Shiva Akula, M.D., to renew or modify this registration, as well as any other pending application of Shiva Akula, M.D., for additional registration in Louisiana. This Order is effective January 29, 2025.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 20, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal

Register, the undersigned DEA Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Heather Achbach,

Federal Register Liaison Officer, Drug Enforcement Administration.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–1463]

Importer of Controlled Substances Application: Curia New York, Inc.

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Curia New York, Inc. has applied to be registered as an importer of basic class(es) of controlled substance(s). Refer to Supplementary Information listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants, therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before January 29, 2025. Such persons may also file a written request for a hearing on the application on or before January 29, 2025.

ADDRESSES: The Drug Enforcement Administration requires that all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to <https://www.regulations.gov> and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on <https://www.regulations.gov>. If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment. All requests for a hearing must be sent to: (1) Drug Enforcement Administration, Attn: Hearing Clerk/OALJ, 8701 Morrisette Drive, Springfield, Virginia 22152; and (2) Drug Enforcement

⁴ This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper, M.D.*, 76 FR 71371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39130, 39131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51104, 51105 (1993); *Bobby Watts, M.D.*, 53 FR 11919, 11920 (1988); *Frederick Marsh Blanton, M.D.*, 43 FR 27617.

Administration, Attn: DEA Federal Register Representative/DPW, 8701 Morrisette Drive, Springfield, Virginia 22152. All requests for a hearing should also be sent to: Drug Enforcement Administration, Attn: Administrator,

8701 Morrisette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.34(a), this is notice that on November 13, 2024,

Curia New York, Inc., 33 Riverside Avenue, Rensselaer, New York 12144, applied to be registered as an importer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
Gamma Hydroxybutyric Acid	2010	I

The company plans to import the listed controlled substances for bulk manufacturing into other controlled substances to be distributed to their customers. No other activity for this drug code is authorized for this registration.

Approval of permit applications will occur only when the registrant's business activity is consistent with what is authorized under 21 U.S.C. 952(a)(2). Authorization will not extend to the import of Food and Drug Administration approved or non-approved finished dosage forms for commercial sale.

Matthew Strait,

Deputy Assistant Administrator.

BILLING CODE P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Samreen Riaz, D.D.S.; Decision and Order

On February 27, 2024, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Samreen Riaz, D.D.S., of Hawthorne, California (Registrant). Request for Final Agency Action (RFAA), Exhibit (RFAAX) 2, at 1, 3. The OSC proposed the revocation of Registrant's Certificate of Registration No. FR4257792, alleging that Registrant's registration should be revoked because Registrant is "currently without authority to prescribe, administer, dispense, or otherwise handle controlled substances in the State of California, the state in which [she is] registered with DEA." *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).

The OSC notified Registrant of her right to file a written request for hearing, and that if she failed to file such a request, she would be deemed to have waived her right to a hearing and be in default. *Id.* (citing 21 CFR 1301.43). Here, Registrant did not request a

hearing. RFAA, at 3.¹ "A default, unless excused, shall be deemed to constitute a waiver of the [registrant's] right to a hearing and an admission of the factual allegations of the [OSC]." 21 CFR 1301.43(e).

Further, "[i]n the event that a registrant . . . is deemed to be in default . . . DEA may then file a request for final agency action with the Administrator, along with a record to support its request. In such circumstances, the Administrator may enter a default final order pursuant to [21 CFR] § 1316.67." *Id.* § 1301.43(f)(1). Here, the Government has requested final agency action based on Registrant's default pursuant to 21 CFR 1301.43(c), (f), 1301.46. RFAA, at 1; *see also* 21 CFR 1316.67.

Findings of Fact

The Agency finds that, in light of Registrant's default, the factual allegations in the OSC are admitted. According to the OSC, effective September 1, 2023, the Dental Board of

California revoked Registrant's California dental license. RFAAX 2, at 2. According to California online records, of which the Agency takes official notice, Registrant's California dental license remains revoked.² California DCA License Search, <https://search.dca.ca.gov> (last visited date of signature of this Order). Accordingly, the Agency finds that Registrant is not licensed to practice as a dentist in California, the state in which she is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under 21 U.S.C. 823 "upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances." With respect to a practitioner, DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. *Gonzales v. Oregon*, 546 U.S. 243, 270 (2006) ("The Attorney General can register a physician to dispense controlled substances 'if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.' . . . The very definition of a 'practitioner' eligible to

¹ Based on the Government's submissions in its RFAA dated May 23, 2024, the Agency finds that service of the OSC on Registrant was adequate. The included declaration from a DEA Diversion Investigator (DI) indicates that on March 12, 2024, the DI attempted to serve Registrant with the OSC at Registrant's registered address, a clinic. RFAAX 1, at 1. However, the clinic manager who was at the registered location claimed to not know Registrant, despite working at the location for nearly five years. *Id.* The DI then left several voicemails with the clinic's Human Resources department, which went unanswered. *Id.* at 2. On March 19, 2024, the DI mailed a copy of the OSC to a different address Registrant had on file with DEA; however, as of April 5, 2024, the mailing was never claimed by Registrant and was scheduled to be returned to DEA. *Id.* Finally, on April 5, 2024, the DI emailed a copy of the OSC to Registrant's registered email address. *Id.*; *see also id.*, Attachment A. The DI did not receive any error message in response to the email. *Id.* at 2. Accordingly, the Agency finds that Registrant was successfully served the OSC by email. *Mohammed S. Aljanaby, M.D.*, 82 FR 34552, 34552 (2017) (finding that service by email satisfies due process where the email is not returned as undeliverable and other methods have been unsuccessful). Further, the Agency finds that the DI's efforts to serve Registrant by other means were "reasonably calculated, under all the circumstances, to apprise [Registrant] of the pendency of the action." *Jones v. Flowers*, 547 U.S. 220, 226 (2006) (quoting *Mullane v. Central Hanover Bank & Trust Co.*, 339 U.S. 306, 314 (1950)). Therefore, due process notice requirements have been satisfied.

² Under the Administrative Procedure Act, an agency "may take official notice of facts at any stage in a proceeding—even in the final decision." United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), "[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary." Accordingly, Registrant may dispute the Agency's finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to Office of the Administrator, Drug Enforcement Administration at dea.addo.attorneys@dea.gov.

prescribe includes physicians ‘licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices’ to dispense controlled substances. § 802(21).’). The Agency has applied these principles consistently. *See, e.g., James L. Hooper, M.D.*, 76 FR 71,371, 71,372 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27616, 27617 (1978).³

According to California statute, “dispense” means “to deliver a controlled substance to an ultimate user or research subject by or pursuant to the lawful order of a practitioner, including the prescribing, furnishing, packaging, labeling, or compounding necessary to prepare the substance for that delivery.” Cal. Health & Safety Code section 11010 (West 2024). Further, a “practitioner” means a person “licensed, registered, or otherwise permitted, to distribute, dispense, conduct research with respect to, or administer, a controlled substance in the course of professional practice or research in [the] state.” *Id.* section 11026(c).

Here, the undisputed evidence in the record is that Registrant currently lacks authority to practice as a dentist in California. As discussed above, an individual must be a licensed practitioner to dispense a controlled substance in California. Thus, because Registrant currently lacks authority to practice as a dentist in California and, therefore, is not currently authorized to handle controlled substances in California, Registrant is not eligible to maintain a DEA registration. Accordingly, the Agency will order that Registrant’s DEA registration be revoked.

³ This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper, M.D.*, 76 FR 71371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39130, 39131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51104, 51105 (1993); *Bobby Watts, M.D.*, 53 FR 11919, 11920 (1988); *Frederick Marsh Blanton, M.D.*, 43 FR 27617.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. FR4257792 issued to Samreen Riaz, D.D.S. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Samreen Riaz, D.D.S., to renew or modify this registration, as well as any other pending application of Samreen Riaz, D.D.S., for additional registration in California. This Order is effective January 29, 2025.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 20, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA **Federal Register Liaison Officer** has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Jeffrey W. Young, Jr., N.P.; Decision and Order

On June 8, 2021, the Drug Enforcement Administration (DEA or Government) issued an Order to Show Cause (OSC) to Jeffrey W. Young, Jr., N.P., of Jackson, Tennessee (Registrant). Request for Final Agency Action (RFAA), Exhibit (RFAAX) 2, at 1, 4. The OSC proposed the revocation of Registrant’s Certificate of Registration No. MY1093424, alleging that Registrant’s registration should be revoked because Registrant is “currently without authority to handle controlled substances in Tennessee, the state in which [he is] registered with DEA.” *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).

The OSC notified Registrant of his right to file a written request for hearing, and that if he failed to file such a request, he would be deemed to have waived his right to a hearing and be in

default. *Id.* at 2–3 (citing 21 CFR 1301.43). Here, Registrant did not request a hearing. RFAA, at 2.¹ “A default, unless excused, shall be deemed to constitute a waiver of the registrant’s/applicant’s right to a hearing and an admission of the factual allegations of the [OSC].” 21 CFR 1301.43(e).

Further, “[i]n the event that a registrant . . . is deemed to be in default . . . DEA may then file a request for final agency action with the Administrator, along with a record to support its request. In such circumstances, the Administrator may enter a default final order pursuant to [21 CFR] § 1316.67.” *Id.* § 1301.43(f)(1). Here, the Government has requested final agency action based on Registrant’s default pursuant to 21 CFR 1301.43(e). RFAA, at 1.

Findings of Fact

The Agency finds that, in light of Registrant’s default, the factual allegations in the OSC are admitted. According to the OSC, on September 30, 2019, Registrant’s Tennessee registered nurse license and Tennessee advanced practice registered nurse certificate both expired. RFAAX 2, 2. According to Tennessee online records, of which the Agency takes official notice, both Registrant’s Tennessee registered nurse license and Tennessee advanced practice registered nurse certificate are revoked.² NURSUS License Verification Search, <https://www.nursys.com/LQC/LQCSearch.aspx> (last visited date of signature of this Order). Accordingly, the Agency finds that Registrant is not licensed to practice as a nurse

¹ Based on the Government’s submissions in its RFAA dated June 11, 2024, the Agency finds that service of the OSC on Registrant was adequate. Specifically, the included Declaration from a DEA Diversion Investigator (DI) indicates that on June 14, 2021, a DEA Task Force Officer (TFO) personally served a copy of the OSC to Registrant at the West Tennessee Detention Facility in Mason, Tennessee, where Registrant remained incarcerated. RFAAX 3, at 2–3, Attachment C.

² Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Registrant may dispute the Agency’s finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion and response shall be filed and served by email to the other party and to the DEA Office of the Administrator, Drug Enforcement Administration at dea.addo.attorneys@dea.gov.

practitioner in Tennessee, the state in which he is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under 21 U.S.C. 823 “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” With respect to a practitioner, DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. *Gonzales v. Oregon*, 546 U.S. 243, 270 (2006) (“The Attorney General can register a physician to dispense controlled substances ‘if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.’ . . . The very definition of a ‘practitioner’ eligible to prescribe includes physicians ‘licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices’ to dispense controlled substances. § 802(21).”). The Agency has applied these principles consistently. See, e.g., *James L. Hooper, M.D.*, 76 FR 71371, 71372 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27616, 27617 (1978).³

According to Tennessee statute, “dispense” means “to deliver a controlled substance to an ultimate user or research subject by or pursuant to the lawful order of a practitioner, including

the prescribing, administering, packaging, labeling, or compounding necessary to prepare the substance for that delivery.” Tenn. Code Ann. § 39–17–402(7) (2024). Further, a “practitioner” means “a physician . . . or other person licensed, registered or otherwise permitted to distribute, dispense, conduct research with respect to or administer a controlled substance in the course of professional practice or research in [the] state.” *Id.* § 39–17–402(23)(A).

Here, the undisputed evidence in the record is that Registrant lacks authority to practice as a nurse practitioner in Tennessee. As discussed above, an individual must be a licensed practitioner to dispense a controlled substance in Tennessee. Thus, because Registrant lacks authority to practice as a nurse practitioner in Tennessee and, therefore, is not authorized to handle controlled substances in Tennessee, Registrant is not eligible to maintain a DEA registration. Accordingly, the Agency will order that Registrant’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. MY1093424, issued to Jeffrey W. Young, Jr., N.P. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(g)(1), I hereby deny any pending applications of Jeffrey W. Young, Jr., N.P., to renew or modify this registration, as well as any other pending application of Jeffrey W. Young, Jr., N.P., for additional registration in Tennessee. This Order is effective January 29, 2025.

Signing Authority

This document of the Drug Enforcement Administration was signed on December 20, 2024, by Administrator Anne Milgram. That document with the original signature and date is maintained by DEA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DEA Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of DEA. This administrative process in no way alters the legal effect of this

document upon publication in the **Federal Register**.

Heather Achbach,

Federal Register Liaison Officer, Drug Enforcement Administration.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response Compensation and Liability Act

On December 19, 2024, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Western District of Virginia in the lawsuit entitled *United States and Commonwealth of Virginia, Secretary of Natural and Historic Resources v. FMC Corporation*, Civil Action No. 5:24–CR–108.

The lawsuit was initiated by a complaint filed by the United States and the Commonwealth of Virginia (the “Trustees”) in their capacity as the legally designated trustees for natural resources in Virginia. The complaint alleged, *inter alia*, that the Defendant was liable for damages for injury to, destruction of, or loss of natural resources resulting from the release of hazardous substances at and from the Avtex Fibers, Inc. Site (the “Site”) in Front Royal, Virginia, pursuant to three statutes: the Comprehensive Environmental Response, Compensation and Liability Act of 1980, the Virginia State Water Control Law, and the Virginia Waste Management Act.

The Consent Decree resolves the claims of the Trustees against the Defendant for a total payment of \$1,674,361. Of this amount, \$1,393,219 will be paid into the United States’ Natural Resource Damages Assessment and Restoration (“NRDAR”) Fund managed by the U.S. Department of the Interior, which will reimburse the Department’s natural resource damages assessment activities and fund projects aimed at restoring the injured natural resources at the Site. The remaining \$281,142 will be paid to the Commonwealth of Virginia for restoration of injured natural resources arising from groundwater contamination at the Site, and to reimburse the Commonwealth’s natural resource damages assessment costs. In addition, as part of the settlement the United States will pay \$2,496,305 into the NRDAR Fund to support restoration projects. This latter amount will resolve the alleged liability of four settling

³ This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(g)(1). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. See, e.g., *James L. Hooper, M.D.*, 76 FR at 71371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39130, 39131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51104, 51105 (1993); *Bobby Watts, M.D.*, 53 FR 11919, 11,920 (1988); *Frederick Marsh Blanton, M.D.*, 43 FR at 27617.

federal agencies—the U.S. Department of Defense, the Department of Commerce, the General Services Administration, and the National Aeronautics and Space Administration—that allegedly contributed to the natural resource damages incurred at and from the Site. In return for these payments, the United States and the Commonwealth will confer on the Defendant and the settling federal agencies covenants not to sue for natural resource damages known or reasonably ascertainable as of the date of lodging of the Consent Decree.

The publication of this notice opens a period for public comment on the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and Commonwealth of Virginia, Secretary of Natural and Historic Resources v. FMC Corporation*, D.J. Ref. No. 90–11–3–10912. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

On December 19, 2024, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Eastern District of

Wisconsin in the lawsuit entitled *United States v. The Manitowoc Company, Inc., et al.*, Civil Action No. 2:24–cv–1635.

The United States filed a Complaint, on behalf of the United States Environmental Protection Agency, against The Manitowoc Company, Inc. and its subsidiaries Grove U.S. L.L.C. and Manitowoc Crane Group Germany GMBH, alleging violations of sections 203(a) and 213(d) of the Clean Air Act, 42 U.S.C. 7522(a) and 7547(d), and implementing regulations, by their importation, introduction into commerce, and sale of heavy nonroad construction equipment containing diesel engines that were not certified to model year engine emission standards. The Complaint also alleges violations of labeling, bonding, and reporting requirements and seeks civil penalties and appropriate injunctive relief.

Under the proposed Consent Decree, the Defendants will pay a civil penalty of \$42,600,000 and will complete a project to mitigate harm caused by excess nitrogen oxide and particulate matter emissions from the noncompliant engines.

The publication of this notice opens a period for public comment on the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. The Manitowoc Company, Inc., et al.*, D.J. Ref. No. 90–5–2–1–12216. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	pubcomment-ees.enrd@usdoj.gov .
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Any comments submitted in writing may be filed by the United States in whole or in part on the public court docket without notice to the commenter.

During the public comment period, the proposed Consent Decree may be examined and downloaded at this Justice Department website: <https://www.justice.gov/enrd/consent-decrees>. If you require assistance accessing the proposed Consent Decree, you may request assistance by email or by mail

to the addresses provided above for submitting comments.

Jason A. Dunn,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE P

DEPARTMENT OF LABOR

Employment and Training Administration

Employment and Training Administration Program Year 2024 Workforce Innovation and Opportunity Act Section 167, National Farmworker Jobs Program Final State Allotments

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This Notice announces final allotments for the National Farmworker Jobs Program (NFJP) Career Services and Training grants for Program Year (PY) 2024, finalizing the preliminary planning estimates provided in a prior **Federal Register** notice.

DATES: The PY 2024 NFJP allotments are effective for the grant period that began July 1, 2024.

ADDRESSES: Questions on this notice can be submitted via email to NFJP@dol.gov.

FOR FURTHER INFORMATION CONTACT:

Steven Rietzke, Chief, Division of National Programs, Tools and Technical Assistance, Office of Workforce Investment, at 202–693–3980. (This is not a toll-free number). If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to Section 182(d) of the Workforce Innovation and Opportunity Act, Prompt Allotment of Funds.

I. Background

The Department is announcing final allotments for the National Farmworker Jobs Program (NFJP) Career Services and Training (CST) grants for Program Year (PY) 2024. Specifically, this notice provides information on the amount of funds available during PY 2024 to state service areas awarded through the PY 2024 Funding Opportunity Announcement (“the FOA”) for the NFJP CST grants (FOA–ETA–24–15). In distributing funds, the Employment and Training Administration (ETA) calculated allotments for CST grantees through an administrative formula. The

allotments are based on the funds appropriated in the Further Consolidated Appropriations Act, 2024, Public Law 118–47.

PY 2024 funding levels are based on the full-year funding levels for the NFJP program in PY 2023 as indicated in **Federal Register** notice 88 FR 31279, May 16, 2023, pro-rated based on the availability of funding for NFJP formula grants in PY 2024. For PY 2024, Congress has provided \$90,134,000 for formula grants (of which \$90,048,000 is available for formula grants after setting aside \$86,000 for program integrity). While Congress appropriated the same amount for formula grants in PY 2023 and PY 2024, ETA is setting aside less funding in PY 2024 for program integrity. Accordingly, as noted above and explained further below, ETA is calculating state allotment amounts by pro-rating the PY 2024 allotment amounts based on the results of the PY 2023 formula and the updated availability of formula funding after set-asides in PY 2024.

In the competition for CST grants, the Department did not receive competitive applications from eligible applicants for some states. The Department did not reopen the competition to seek prospective applicants to provide services in those states. In determining a course of action for those states’ funds, the Department followed the procedures described in the FOA for the competition. Thus, for states where the Department did not receive any competitive applications and did not award an NFJP grant under the PY 2024 competition, the Department instead redistributed the remaining funds among the grants awarded to other state service areas, distributing funds proportionally based on the NFJP allotment formula results for PY 2024.

As background, the PY 2024 appropriation also provides \$6,591,000 for migrant and seasonal farmworker

housing (of which \$6,585,000 was allotted after \$6,000 was set aside for program integrity and of which not less than 70 percent shall be for permanent housing), as well as \$671,000 for other discretionary purposes. The Housing grant allotments are distributed as a result of a separate competition and are not the subject of this Notice.

This notice includes the following sections:

- Section II of this notice provides a discussion of the data used to populate the formula.
- Section III describes the prorated method for allotments for the implementation year starting in PY 2024.
- Section IV provides final state allotments for PY 2024.

II. Description of Data Files and Allotment Formula

The formula’s original methodology is described in the **Federal Register** notice 64 FR 27390, May 19, 1999. In PY 2018, ETA incorporated two modifications to the allotment formula to provide more accurate estimates of each state service area’s relative share of persons eligible for the program. The formula also used updated data from each of the four data files serving as the basis of the formula since 1999. The revised formula methodology is described in the **Federal Register** notice 83 FR 32151, July 11, 2018. In PY 2021, ETA incorporated two modifications to the allotment formula. These modifications are described in **Federal Register** notice 86 FR 32063, June 16, 2021. The **Federal Register** notices are accessible at <https://www.federalregister.gov/>.

Like the PY 2023 appropriation, the PY 2024 appropriation includes language expanding program eligibility to farmworkers who are in families with total family incomes at or below 150 percent of the poverty line (rather than the higher of the poverty line or 70 percent of the lower living standard

income level). Because the PY 2024 allotments will be prorated based on the results of the PY 2023 formula, the PY 2024 allotment results continue to reflect modifications to the formula related to this expansion. ETA will subsequently revise relevant guidance regarding the definition of “low-income individual” as needed if the same expansion of eligibility is not included in subsequent appropriations.

III. Description of the Prorated Method for Allotments

The Department used a prorated method for PY 2024 allotments. For PY 2024, each state service area received a prorated allotment based on their PY 2023 allotment percentage, as applied to the PY 2024 formula funds available. ETA anticipates updating data and reimplementing a staged stop loss/stop gain in PY 2026. ETA will explain its approach to calculating allotments in PY 2026 in a subsequent notice at a later date.

IV. Program Year 2024 Final State Allotments

The allotments set forth in the Table appended to this notice reflect the distribution resulting from the prorated methodology described above, including redistribution of funds remaining after the PY 2024 competition.

For purposes of illustrating the effects of redistribution of funds remaining after the PY 2024 competition, columns 2 and 3 show the state allotments for PY 2024 prorated and PY 2024 prorated including redistribution.

José Javier Rodríguez,
Assistant Secretary, Employment and Training, Labor.

U.S. Department of Labor, Employment and Training Administration, National Farmworker Jobs Program—Career Services and Training Grants

PROGRAM YEAR 2024 ALLOTMENTS TO STATES INCLUDING REDISTRIBUTION OF FUNDS REMAINING AFTER THE PY 2024 COMPETITION

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Request for Earnings Information Report**ACTION:** Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Office of Workers' Compensation Programs (OWCP)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for

review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before January 29, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

Comments are invited on: (1) whether the collection of information is

necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Nicole Bouchet by telephone at 202–693–0213, or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: The Request for Earnings Information Report gathers information regarding an employee's average weekly wage. This information is needed for determination of compensation benefits in accordance with section 10 of the Longshore and Harbor Workers' Compensation Act. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on September 40, 2024 (89 FR 71935).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–OWCP.

Title of Collection: Request for Earnings Information Report.

OMB Control Number: 1240–0025.

Affected Public: Individuals or Households.

Total Estimated Number of Respondents: 100.

Total Estimated Number of Responses: 100.

Total Estimated Annual Time Burden: 25 hours.

Total Estimated Annual Other Costs Burden: \$3.00.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Nicole Bouchet,
Senior PRA Analyst.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Mingo Logan Coal, LLC.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before January 29, 2025.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0117 by any of the following methods:

1. *Federal eRulemaking Portal:*

<https://www.regulations.gov>. Follow the instructions for submitting comments for MSHA–2024–0117.

2. *Fax:* 202–693–9441.

3. *Email:* petitioncomments@dol.gov.

4. *Regular Mail or Hand Delivery:*

MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk, 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), Petitionsformodification@dol.gov (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–089–C.

Petitioner: Mingo Logan Coal, LLC, Sharples, WV 25183.

Mine: Mountaineer II Mine, MSHA ID No. 46–09029, located in Logan County, West Virginia.

Regulation Affected: 30 CFR 75.507–1(a), Permissible electric equipment.

Modification Request: The petitioner requests a modification of 30 CFR 75.507–1(a) to allow the use of an alternative method of respirable dust protection. Specifically, the petitioner is requesting to use the 3M Versaflo TR–800 Intrinsically Safe Powered Air Purifying Respirator (PAPR) and the CleanSpace EX PAPR in return air outby the last open crosscut.

The petitioner states that:

(a) Mountaineer II Mine has previously used the 3M Airstream Headgear-Mounted PAPR System to provide additional protection for its miners against exposure to respirable coal mine dust. There are clear long-term health benefits from using such technology. One of the benefits of PAPRs is that they provide a constant flow of air inside the headtop or helmet. This constant airflow helps to provide both respiratory protection and comfort in hot working environments.

(b) 3M elected to discontinue the 3M Airstream helmet, replacing it with the 3M Versaflo TR–800, which benefits from additional features and reduced weight. Because of its reduced weight, it provides significant ergonomic benefits.

(c) For more than 40 years the 3M Airstream has been used by many mine operators to help protect their workers. During those years there have been technological advancements in products and services for industrial applications. 3M indicated that they faced multiple key component supply disruptions for the Airstream product line that created issues with providing acceptable supply service levels. Because of those issues, 3M discontinued the Airstream in June 2020, and that discontinuation was global.

(d) 3M announced that February 2020 was the final time to place an order for systems and components and that June 2020 was the final date to purchase Airstream components.

(e) Currently there are no replacement 3M PAPRs that meet applicable MSHA standards for permissibility. Electronic equipment used in underground mines in potentially explosive atmospheres are required to be approved by MSHA in

accordance with 30 CFR. 3M and other manufacturers offer alternative products for many other environments and applications.

(f) Following the discontinuation, mines that currently use the Airstream do not have an MSHA-approved alternative PAPR to provide to miners.

(g) Application of the standard results in a diminution of safety at the mine.

(h) The 3M Versaflo TR-800 motor/blower and battery qualify as intrinsically safe in the U.S., Canada, and any other country accepting IECEx (International Electrotechnical Commission System for Certification to Standards Relating to Equipment for Use in Explosive Atmospheres) reports. The 3M Versaflo TR-800 has a blower that is UL-certified with an intrinsically safe (IS) rating of Division 1: IS Class I, II, III; Division 1 (includes Division 2) Groups C, D, E, F, G; T4, under the most current standard (UL 60079, 6th Edition, 2013). It is ATEX-certified with an IS rating of "ia." (ATEX refers to European directives for controlling explosive 2 atmospheres.) It is rated and marked with Ex ia I Ma, Ex ia IIB T4 Ga, Ex ia IIC 135 °C Da, -20 °C ≤ Ta ≤ +55 °C, under the current standard (IEC 60079).

(i) Mountaineer II Mine seeks modification to also permit the use of the CleanSpace EX powered respirator under the same conditions as it proposes with respect to the 3M Versaflo TR-800. It too has been determined to be intrinsically safe.

(j) The 3M Versaflo TR-800 is not MSHA approved as permissible, and 3M is not pursuing approval.

(k) The CleanSpace EX Power Unit is not MSHA approved as permissible, and CleanSpace is not pursuing approval.

(l) The standards for approval of these respirators are an acceptable alternative to MSHA's standards and provide an equivalent level of protection.

(m) The alternative method will guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

The petitioner proposes the following alternative method:

(a) Affected mine employees shall be trained in the proper use and maintenance of the 3M Versaflo TR-800 and the CleanSpace EX in accordance with established manufacturer guidelines. This training shall alert the affected employee that neither the 3M Versaflo TR-800 nor the CleanSpace EX is approved under 30 CFR part 18 and shall be deenergized when 1.0 or more percent methane is detected. The training shall also include the proper method to deenergize these PAPRs. In addition to manufacturer guidelines, the petitioner shall require that mine

employees be trained to inspect the units before use to determine if there is any damage to the units that would negatively impact intrinsic safety as well as all stipulations in the Proposed Decision and Order (PDO) granted by MSHA.

(b) The PAPRs, battery packs, and all associated wiring and connections shall be inspected before use to determine if there is any damage to the units that would negatively impact intrinsic safety. If any defects are found, the PAPR shall be removed from service.

(c) Mountaineer II Mine shall maintain a separate logbook for the 3M Versaflo TR-800 and CleanSpace EX PAPRs that shall be kept with the equipment or in a location with other mine record books and shall be made available to MSHA upon request. The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.512-1 and the examination results recorded in the logbook. Since float coal dust is removed by the air filter prior to reaching the motor, the PAPR user shall conduct regular examinations of the filter and perform periodic testing for proper operation of the "high filter load alarm" on the 3M Versaflo TR-800 and the "blocked filter" alarm on the CleanSpace EX. Examination entries may be expunged after one year.

(d) All 3M Versaflo TR-800 and CleanSpace EX PAPRs to be used in the return air outby the last open crosscut shall be physically examined prior to initial use, and each unit shall be assigned a unique identification number. Each unit shall be examined by the person who will be operating the equipment prior to taking the equipment underground to ensure the equipment is being used according to the original equipment manufacturer's recommendations and maintained in a safe operating condition.

(e) The examination for the 3M Versaflo TR-800 shall include:

(1) Check the equipment for any physical damage and the integrity of the case;

(2) Remove the battery and inspect for corrosion;

(3) Inspect the contact points to ensure a secure connection to the battery;

(4) Reinsert the battery and power up and shut down to ensure proper connections;

(5) Check the battery compartment cover or battery attachment to ensure that it is securely fastened; and

(6) For equipment utilizing lithium type cells, ensure that lithium cells and/or packs are not damaged or swelled in size.

(f) The CleanSpace EX does not have an accessible/removable battery. The battery and motor/blower assembly are both contained within the sealed four power pack assembly and cannot be removed, reinserted, or fastened. The pre-use examination is limited to inspecting the equipment for indications of physical damage.

(g) Mountaineer II Mine shall ensure that all 3M Versaflo TR-800 and CleanSpace EX PAPRs are serviced according to the manufacturer's recommendations. Dates of service shall be recorded in the equipment's logbook and shall include a description of the work performed.

(h) The 3M Versaflo TR-800 and CleanSpace EX PAPRs that will be used in the return air outby the last open crosscut, or in areas where methane may enter the air current, shall not be put into service until MSHA has initially inspected the equipment and determined that it is following all the terms and conditions of the PDO granted by MSHA.

(i) Prior to energizing the 3M Versaflo TR-800 or the CleanSpace EX in the return air outby the last open crosscut, methane tests shall be made in accordance with 30 CFR 75.323(a).

(j) All hand-held methane detectors shall be MSHA-approved and maintained in permissible and proper operating condition as defined by 30 CFR 75.320. All methane detectors shall provide visual and audible warnings when methane is detected at or above 1.0 percent.

(k) A qualified person as defined in 30 CFR 75.151 shall continuously monitor for methane immediately before and during the use of the 3M Versaflo TR-800 or CleanSpace EX in the return air outby the last open crosscut or in areas where methane may enter the air current.

(l) Neither the 3M Versaflo TR-800 nor the CleanSpace EX shall be used if methane is detected in concentrations at or above 1.0 percent. When 1.0 percent or more of methane is detected while the 3M Versaflo TR-800 or CleanSpace EX is being used, the equipment shall be deenergized immediately and the equipment withdrawn outby the last open crosscut.

(m) Mountaineer II Mine shall use only the 3M TR-830 Battery Pack, which meets lithium battery safety standard UL 1642 or IEC 62133 in the 3M Versaflo TR-800. The petitioner shall use only the CleanSpace EX Power 5 Unit which meets lithium battery safety standard UL 1642 or IEC 62133 in the CleanSpace EX.

(n) The battery packs shall be "changed out" in intake air outby the

last open crosscut. Before each shift when the 3M Versaflo TR-800 or CleanSpace EX is to be used, all batteries and power units for the equipment shall be charged sufficiently so that they are not expected to be replaced on that shift.

(o) The following maintenance and use conditions shall apply to equipment containing lithium-type batteries:

(1) Always correctly use and maintain the lithium-ion battery packs. Neither the 3M TR-830 Battery Pack nor the CleanSpace EX Power Unit may be disassembled or modified by anyone other than persons permitted by the manufacturer of the equipment.

(2) The 3M TR-830 Battery Pack shall only be charged in an area free of combustible material, readily monitored, and located on the surface of the mine. The 3M TR-830 Battery Pack is to be charged by either:

(i) 3M Battery Charger Kit TR-641N, which includes one 3M Charger Cradle TR-640 and one 3M Power Supply TR-941N, or

(ii) 3M 4-Station Battery Charger Kit TR-644N, which includes four 3M Charger Cradles TR-640 and one 3M 4-Station Battery Charger Base/Power Supply TR-944N.

(iii) The CleanSpace EX Power Unit is to be charged only by the CleanSpace Battery Charger EX, Product Code PAF-0066.

(iv) The batteries shall not be allowed to get wet. This does not preclude incidental exposure of sealed battery packs.

(v) The batteries shall not be used, charged, or stored in locations where the manufacturer's recommended temperature limits are exceeded. The batteries shall not be placed in direct sunlight or used or stored near a source of heat.

(p) Personnel engaged in the use of the 3M Versaflo TR-800 and CleanSpace EX PAPRs shall be properly trained to recognize the hazards and limitations associated with the use of the equipment in areas where methane could be present. Additionally, personnel shall be trained regarding proper procedures for donning Self-Contained Self Rescuers (SCSRs) during a mine emergency while wearing the 3M Versaflo TR-800 or CleanSpace EX. The mine operator shall submit proposed revisions to update the Mine Emergency Evacuation and Firefighting Program of Instruction under 30 CFR 75.1502 to address this issue.

(q) Within 60 days after the PDO granted by MSHA becomes final, Mountaineer II Mine shall submit proposed revisions for its approved 30 CFR part 48 training plans to the Mine

Safety and Health Enforcement District Manager. These proposed revisions shall specify initial and refresher training regarding the terms and conditions stated in the PDO granted by MSHA. When training is conducted on the terms and conditions in the PDO granted by MSHA, an MSHA Certificate of Training (Form 5000-23) shall be completed. Comments shall be included on the Certificate of Training indicating that the training received was for use of the 3M Versaflo TR-800 or CleanSpace EX.

(r) All personnel who will be involved with or affected by the use of the 3M Versaflo TR-800 or CleanSpace EX shall receive training in accordance with 30 CFR 48.7 on the requirements of the PDO granted by MSHA within 60 days of the date the PDO granted by MSHA becomes final. Such training shall be completed before any 3M Versaflo TR-800 or CleanSpace EX can be used in return air outby the last open crosscut. The operator shall keep a record of such training and provide such record to MSHA upon request.

(s) Mountaineer II Mine shall provide annual retraining to all personnel who will be involved with or affected by the use of the 3M Versaflo TR-800 or CleanSpace EX in accordance with 30 CFR 48.8. The operator shall train new miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.5 and shall train experienced miners on the requirements of the PDO granted by MSHA in accordance with 30 CFR 48.6. The operator shall keep a record of such training and provide such record to MSHA upon request.

(t) Mountaineer II Mine shall post the PDO granted by MSHA in unobstructed locations on the bulletin boards and/or in other conspicuous places where notices to miners are ordinarily posted for a period of not less than 60 consecutive days.

(u) There are no representatives of miners at Mingo Logan Coal, LLC, Mountaineer II Mine. A copy of this petition has been posted on the bulletin board as of November 11, 2024.

The petitioner asserts that the alternative method will guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520-43-P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by Harrison County Coal Resources, Inc.

DATES: All comments on the petition must be received by MSHA's Office of Standards, Regulations, and Variances on or before January 29, 2025.

ADDRESSES: You may submit comments identified by Docket No. MSHA-2024-0118 by any of the following methods:

1. *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments for MSHA-2024-0118.

2. *Fax:* 202-693-9441.

3. *Email:* petitioncomments@dol.gov.

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, 4th Floor West, Arlington, Virginia 22202-5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202-693-9455 to make an appointment.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202-693-9440 (voice), Petitionsformodification@dol.gov (email), or 202-693-9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–072–C.

Petitioner: Harrison County Coal Resources, Inc., 464 North Portal Rd., Wallace, WV 26448.

Mine: Harrison County Mine, MSHA ID No. 46–01318, located in Marion County, West Virginia.

Regulation Affected: 30 CFR 75.503, Permissible electric face equipment; maintenance; Specified in 30 CFR 18.35(a)(5)(i), Portable (trailing) cables and cords.

Modification Request: The petitioner requests a modification of 30 CFR 75.503 to increase the maximum length of trailing cables specified in 30 CFR 18.35(a)(5)(i) that supply power to loading machines to 1,000 feet.

The petitioner states that:

(a) The Harrison County Mine is developing longwall panels as part of a continuing mining cycle. The longwall development panels consist of a three-entry system with 300-foot deep cuts to improve roof and abutment pressure control during longwall mining. Ventilation is also improved by limiting the number of stoppings, which have a built-in ventilation pressure loss factor. The Harrison County Mine is also developing main and submain sections as part of the continuing mining cycle. The petitioner has provided typical section prints showing the need for cable lengths greater than 700 feet for this development system.

(b) The petitioner has also provided a summary of short-circuit calculations justifying the instantaneous trip setting for the circuit breakers protecting the trailing cables supplying power to 995 Volt loading machines in Harrison County Mine.

(c) The proposed alternative method will at all times guarantee no less than the same measure of protection to all miners as would be provided by the mandatory standard.

The petitioner proposes the following alternative method:

(a) The proposed decision and order (PDO) granted by MSHA shall apply only to trailing cables supplying three-phase, 995-volt power to loading machines.

(b) The maximum lengths of the trailing cables shall be 1,000 feet.

(c) All trailing cables exceeding 700 feet in length and supplying three-phase, 995-volt power to loading machines shall be No. 2 American wire gauge (AWG), or larger.

(d) All circuit breakers used to protect the No. 2 AWG trailing cables exceeding 700 feet in length shall have instantaneous trip units calibrated to trip at 800 amperes (amps). The trip setting of these circuit breakers shall be sealed or locked, and these circuit breakers shall have permanent, legible labels. The calibration, sealing and labeling shall be performed by the manufacturer or at a repair facility outfitted with calibrated test equipment. The labels shall be maintained in legible condition.

(e) Replacement circuit breakers and/or instantaneous trip units used to protect the No. 2 AWG trailing cables shall be calibrated to trip at 800 amperes, and this setting shall be sealed or locked. The calibration, sealing, and labeling shall be performed by the manufacturer or a repair facility outfitted with calibrated test equipment.

(f) During each production day, persons designated by the operator shall visually examine the trailing cables to ensure that the cables are in safe operating condition and that the instantaneous settings of the specially calibrated breakers do not have seals or locks removed and that they do not exceed the stipulated settings specified in items (d) and (e).

(g) Any trailing cable that is not in safe operating condition shall be removed from service immediately and repaired or replaced.

(h) Each splice or repair in the trailing cable shall be made in a workmanlike manner and in accordance with the instructions of the manufacturer of the splice or repair materials. The outer jacket of each splice or repair shall be vulcanized with flame-resistant material or made with material that has been accepted by MSHA as flame resistant.

(i) In the event the mining method or operating procedures cause or contribute to the damage of any trailing cable, the cable shall be removed from service immediately and repaired or replaced. Also, additional precautions shall be taken to ensure that, in the future, the cable is protected and maintained in safe operating condition.

(j) Permanent warning labels shall be installed and maintained on the cover(s) of the power center identifying the location of each sealed or locked short-circuit protective device. The label shall identify the circuit breakers as being suitable for protecting No. 2 AWG

cables and shall warn miners not to change or alter these short-circuit settings.

(k) The alternative method shall not be implemented until all miners, who have been designated to examine the integrity of seals and verify the short-circuit settings and proper procedures for examining trailing cables for defects and damage, have received the elements of training specified in item (l).

(l) Within sixty (60) days after the PDO is granted by MSHA, the petitioner shall submit proposed revisions for its approved 30 CFR part 48 training plan to the Coal Mine Safety and Health District Manager for the area in which the mine is located. The training shall include the following elements:

(1) Training in mining methods and operating procedures that shall protect the trailing cables against damage.

(2) Training in the proper procedures for examining the trailing cables to ensure that the cables are in safe operating condition.

(3) Training in hazards of setting the instantaneous circuit breakers too high to adequately protect the trailing cables.

(4) Training in how to verify that circuit interrupting devices protecting the trailing cables are properly set and maintained.

(m) The procedures of 30 CFR 48.3 for approval of proposed revisions to already approved training plans shall apply.

(n) The miners at Harrison County Coal Resources, Inc., Harrison County Mine, are represented by a labor organization and a copy of this petition has been provided to the representative of the miners at the mine on October 30, 2024.

In support of the proposed alternative method, the petitioner submitted: schematic diagrams showing the lengths and locations of trailing cables; a fault analysis summary; a short-circuit analysis including specific cable information for all high voltage cables from the utility service drop to the section power center; and one-line diagrams.

The petitioner asserts that the alternate method proposed will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standard.

Song-ae Aromie Noe,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–43–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2007–0039]

Intertek Testing Services NA, Inc.:
Grant of Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the final decision to expand the scope of recognition of Intertek Testing Services NA, Inc. as a Nationally Recognized Testing Laboratory (NRTL).

DATES: The expansion of the scope of recognition becomes effective on December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, telephone: (202) 693–1999; email: meilinger.francis2@dol.gov.

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, phone: (202) 693–2300 or email: robinson.kevin@dol.gov.

SUPPLEMENTARY INFORMATION:

I. Notice of Final Decision

OSHA hereby gives notice of the expansion of the scope of recognition for Intertek Testing Services NA, Inc. (ITSNA), as a NRTL. ITSNA’s expansion

covers the addition of two test standards to the NRTL scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL’s scope of recognition includes: (1) the type of products the NRTL may test, with each type specified by the applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL’s scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by a NRTL for initial recognition and for an expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides a final decision on the application. These notices set forth the NRTL’s scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including ITSNA, which details the NRTL’s scope of recognition. These pages are available from the OSHA website at <https://www.osha.gov/dts/otpca/nrtl/index.html>.

ITSNA submitted an application dated June 24, 2024 (OSHA–2007–

0039–0058), requesting the addition of two test standards to the NRTL scope of recognition. OSHA staff performed a detailed analysis of the application packet and reviewed other pertinent information. OSHA did not perform any on-site reviews in relation to this application.

OSHA published the preliminary notice announcing ITSNA’s expansion application in the **Federal Register** on November 6, 2024 (89 FR 88064). The agency requested comments by November 21, 2024, but it received no comments in response to this notice. OSHA is now proceeding with this notice to grant expansion of ITSNA’s NRTL scope of recognition.

To obtain or review copies of all public documents pertaining to the ITSNA expansion application, go to www.regulations.gov or contact the Docket Office at (202) 693–2350 (TTY (877) 889–5627. Docket No. OSHA–2007–0039 contains all materials in the record containing ITSNA’s recognition.

II. Final Decision and Order

OSHA staff examined ITSNA’s expansion application and examined other pertinent information. OSHA did not conduct an on-site assessment in relation to this application. Based on review of this evidence, OSHA finds that ITSNA meets the requirements of 29 CFR 1910.7 for expansion of recognition, subject to the specified limitations and conditions listed in this notice. OSHA, therefore, is proceeding with this final notice to grant ITSNA’s scope of recognition. OSHA limits the expansion of ITSNA’s recognition to testing and certification of products for demonstration of conformance to the test standards listed below in Table 1.

TABLE 1—APPROPRIATE TEST STANDARDS FOR INCLUSION IN ITSNA’S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
UL 60335–2–89	Household and Similar Electrical Appliances—Safety—Part 2–89: Particular Requirements for Commercial Refrigerating Appliances with an Incorporated or Remote Refrigerant Unit or Compressor.
UL 60335–2–24	Safety Requirements for Household and Similar Electrical Appliances, Part 2: Refrigerating Appliances, Ice-Cream Appliances, and Ice-Makers.

OSHA’s recognition of any NRTL for a particular test standard is limited to equipment or materials for which OSHA standards require third-party testing and certification before using them in the workplace. Consequently, if a test standard also covers any products for which OSHA does not require such testing and certification, a NRTL’s scope

of recognition does not include these products.

A. Conditions

Recognition is contingent on continued compliance with 29 CFR 1910.7, including, but not limited to, abiding by the following conditions of the recognition:

1. ITSNA must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in its operations as a NRTL, and provide details of the change(s);

2. ITSNA must meet all the terms of its recognition and comply with all OSHA policies pertaining to this recognition; and

3. ITSNA must continue to meet the requirements for recognition, including all previously published conditions on ITSNA's scope of recognition, in all areas for which it has recognition.

Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the scope of recognition of ITSNA as a NRTL, subject to the limitations and conditions specified above.

V. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8–2020 (85 FR 58393, Sept. 18, 2020), and 29 CFR 1910.7.

Signed at Washington, DC, on December 19, 2024.

James S. Frederick

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2019–0009]

DEKRA Certification Inc.: Application for Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the application of DEKRA Certification Inc., for expansion of the recognition as a Nationally Recognized Testing Laboratory (NRTL) and presents the agency's preliminary finding to grant the application.

DATES: Submit comments, information, and documents in response to this notice, or requests for an extension of time to make a submission, on or before January 14, 2025.

ADDRESSES: Comments may be submitted as follows:

Electronically: You may submit comments, including attachments, electronically at <http://www.regulations.gov>, the Federal eRulemaking Portal. Follow the online instructions for submitting comments.

Instructions: All submissions must include the agency's name and the docket number for this rulemaking (Docket No. OSHA–2019–0009). All comments, including any personal

information you provide, are placed in the public docket without change and may be made available online at <https://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting information they do not want made available to the public, or submitting materials that contain personal information (either about themselves or others), such as Social Security numbers and birthdates.

Docket: To read or download comments or other material in the docket, go to <http://www.regulations.gov>. Documents in the docket (including this **Federal Register** notice) are listed in the <http://www.regulations.gov> index; however, some information (e.g., copyrighted material) is not publicly available to read or download through the website. All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693–2350 (TTY (877) 889–5627) for assistance in locating docket submissions.

Extension of comment period: Submit requests for an extension of the comment period on or before January 14, 2025 to the Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room N–3653, Washington, DC 20210, or by fax to (202) 693–1644.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, phone: (202) 693–1999 or email: meilinger.francis2@dol.gov.

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, phone: (202) 693–1911 or email: robinson.kevin@dol.gov.

SUPPLEMENTARY INFORMATION:

I. Notice of the Application for Expansion

OSHA is providing notice that DEKRA Certification Inc. (DEKRA), is applying for expansion of the current recognition as a NRTL. DEKRA requests the addition six test standards to the NRTL scope of recognition.

OSHA's recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL's scope of recognition includes: (1) the type of products the NRTL may test, with each type specified by the applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by a NRTL for initial recognition and for an expansion or renewal of this recognition, following requirements in appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides a final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including DEKRA, which details the NRTL's scope of recognition. These pages are available from the OSHA website at <http://www.osha.gov/dts/otpc/nrtl/index.html>.

II. General Background on the Application

DEKRA submitted an application to OSHA for expansion of the NRTL scope of recognition on January 5, 2023 (OSHA–2019–0009–0013), requesting the addition of six recognized testing standards. OSHA staff performed a detailed analysis of the application packets and reviewed other pertinent information. OSHA did not perform an on-site review associated with this application. OSHA staff has preliminarily determined that OSHA should grant the application.

Table 1, below, lists the appropriate test standards found in DEKRA's application for expansion for testing and certification of products under the NRTL Program.

TABLE 1—PROPOSED APPROPRIATE TEST STANDARDS FOR INCLUSION IN DEKRA'S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
FM 3600	Electrical Equipment for Use in Hazardous (Classified) Locations, General Requirements.
FM 3610 *	Intrinsically Safe Apparatus and Associated Apparatus for Use in Class I, II and III, Division 1 Hazardous (Classified) Locations.
FM 3611	Electrical Equipment for Use in Class I, Division 2; Class II, Division 2; and Class III, Division 1 and 2 Hazardous Locations.
FM 3615 *	Explosion-proof Electrical Equipment, General Requirements.
FM 3810 *	Electrical and Electronic Test, Measuring and Process Control Equipment.
UL 857	Electric Busways and Associated Fittings.

* OSHA notes that the title to this standard in the table is taken from OSHA's List of Appropriate Test Standards (see <https://www.osha.gov/nationally-recognized-testing-laboratory-program/list-standards>). This title is not the same as the title currently used by the Standards Developing Organization that issued the test standard. OSHA intends to update the List of Appropriate Test Standards to reflect the currently used title in the near future.

III. Preliminary Findings on the Application

DEKRA submitted an acceptable application for expansion of the scope of recognition. OSHA's review of the application files and pertinent documentation indicates that DEKRA has met the requirements prescribed by 29 CFR 1910.7 for expanding the recognition to include the addition of the six test standards for NRTL testing and certification listed in Table 1. This preliminary finding does not constitute an interim or temporary approval of DEKRA's application.

OSHA seeks comment on this preliminary determination.

IV. Public Participation

OSHA welcomes public comment as to whether DEKRA meets the requirements of 29 CFR 1910.7 for expansion of recognition as a NRTL. Comments should consist of pertinent written documents and exhibits.

Commenters needing more time to comment must submit a request in writing, stating the reasons for the request by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer time period. OSHA may deny a request for an extension if it is not adequately justified.

To review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor. These materials also are generally available online at <https://www.regulations.gov> under Docket No. OSHA-2019-0009 (for further information, see the "Docket" heading in the section of this notice titled ADDRESSES).

OSHA staff will review all comments to the docket submitted in a timely manner. After addressing the issues raised by these comments, staff will make a recommendation to the Assistant Secretary of Labor for Occupational

Safety and Health on whether to grant DEKRA's application for expansion of the scope of recognition. The Assistant Secretary will make the final decision on granting the application. In making this decision, the Assistant Secretary may undertake other proceedings prescribed in appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of the final decision in the **Federal Register**.

V. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8-2020 (85 FR 58393, Sept. 18, 2020), and 29 CFR 1910.7.

Signed at Washington, DC, on December 20, 2024.

James S. Frederick

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510-26-P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA-2010-0046]

QPS Evaluation Services, Inc.: Grant of Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the final decision to expand the scope of recognition for QPS Evaluation Services, Inc. as a Nationally Recognized Testing Laboratory (NRTL).

DATES: The expansion of the scope of recognition becomes effective on December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor; telephone (202) 693-1999 or email meilinger.francis2@dol.gov.

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor; telephone (202) 693-1911 or email robinson.kevin@dol.gov.

SUPPLEMENTARY INFORMATION:

I. Notice of Final Decision

OSHA hereby gives notice of the expansion of the scope of recognition of QPS Evaluation Services, Inc. (QPS) as a NRTL. QPS's expansion covers the addition of five test standards to the NRTL scope of recognition.

OSHA's recognition of a NRTL signifies that the organization meets the requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL's scope of recognition includes: (1) the type of products the NRTL may test, with each type specified by the applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by a NRTL for initial recognition and for an expansion or renewal of this recognition, following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides a preliminary finding. In the second notice, the agency provides a final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including QPS which details the NRTL's scope of recognition. These pages are available from the OSHA website at <https://www.osha.gov/dts/otpc/nrtl/index.html>.

QPS submitted an application to OSHA for expansion of the NRTL scope of recognition on February 13, 2024 (OSHA-2010-0046-0021), requesting the addition of five standards to the NRTL scope of recognition. OSHA staff performed a detailed analysis of the application packet and reviewed other pertinent information. OSHA did not perform an on-site review related to this application.

OSHA published the preliminary notice announcing QPS's expansion application in the **Federal Register** on November 7, 2024 (89 FR 88306). The agency requested comments by November 22, 2024, however no comments were received in response to this notice.

To obtain or review copies of all public documents pertaining to the QPS's application, go to <https://www.regulations.gov> or contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor. Docket No. OSHA-2010-0046 contains all materials in the record concerning QPS's recognition. Contact the OSHA Docket Office at (202) 693-2350 (TTY (877) 889-5627) for assistance in locating docket submissions.

II. Final Decision and Order

OSHA staff examined QPS's expansion application, its capability to meet the requirements of the test standards, and other pertinent information. Based on its review of this evidence, OSHA finds that QPS meets the requirements of 29 CFR 1910.7 for expansion of its recognition, subject to the limitations and conditions listed in this notice. OSHA, therefore, is proceeding with this final notice to grant QPS's application for an expansion of the scope of recognition. OSHA limits the expansion of QPS's

recognition to testing and certification of products for demonstration of conformance to the test standards listed below in table 1.

TABLE 1—APPROPRIATE TEST STANDARDS FOR INCLUSION IN QPS'S NRTL SCOPE OF RECOGNITION

Test Standard	Test standard title
UL 22	Amusement and Gaming Machines.
UL 751	Vending Machines.
UL 1012	Power Units Other Than Class 2.
UL 891	Standard for Switchboards.
ASME A17.5 ¹	Elevator and Escalator Electrical Equipment.

OSHA's recognition of any NRTL for a particular test standard is limited to equipment or materials for which OSHA standards require third-party testing and certification before using them in the workplace. Consequently, if a test standard also covers any products for which OSHA does not require such testing and certification, a NRTL's scope of recognition does not include these products.

The American National Standards Institute (ANSI) may approve the test standards listed above as American National Standards. However, for convenience, we may use the designation of the standards-developing organization for the standard as opposed to the ANSI designation. Under the NRTL Program's policy (see OSHA Instruction CPL 1-0.3, Appendix C, paragraph XIV), any NRTL recognized for a particular test standard may use either the proprietary version of the test standard or the ANSI version of that standard. Contact ANSI to determine whether a test standard is currently ANSI-approved.

A. Conditions

In addition to those conditions already required by 29 CFR 1910.7, QPS must abide by the following conditions of the recognition:

1. QPS must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major change in its operations as a NRTL, and provide details of the change(s);
2. QPS must meet all the terms of its recognition and comply with all OSHA policies pertaining to this recognition; and
3. QPS must continue to meet the requirements for recognition, including all previously published conditions on

¹ The preliminary notice announcing QPS's expansion application contained a typographical error. The designation of the Elevator and Escalator Electrical Equipment test standard was incorrectly listed as ASME 17.5. See 89 FR 88307. OSHA corrects this typographical error in this Notice.

QPS's scope of recognition, in all areas for which it has recognition.

Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the scope of recognition of QPS as a NRTL, subject to the limitations and conditions specified above.

III. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8-2020 (85 FR 58393, Sept. 18, 2020), and 29 CFR 1910.7.

Signed at Washington, DC, on December 19, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510-26-P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA-2007-0042]

TUV Rheinland of North America, Inc.: Application for Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the application of TUV Rheinland of North America, Inc., for expansion of the scope of recognition as a Nationally Recognized Testing Laboratory (NRTL) and presents the agency's preliminary finding to grant the application.

DATES: Submit comments, information, and documents in response to this notice, or requests for an extension of time to make a submission, on or before January 14, 2025.

ADDRESSES: Comments may be submitted as follows:

Electronically: You may submit comments, including attachments, electronically at <http://www.regulations.gov>, the Federal eRulemaking Portal. Follow the online instructions for submitting comments.

Instructions: All submissions must include the agency's name and the docket number for this rulemaking (Docket No. OSHA-2007-0042). All comments, including any personal information you provide, are placed in

the public docket without change and may be made available online at <https://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting information they do not want made available to the public, or submitting materials that contain personal information (either about themselves or others), such as Social Security numbers and birthdates.

Docket: To read or download comments or other material in the docket, go to <http://www.regulations.gov>. Documents in the docket (including this **Federal Register** notice) are listed in the <http://www.regulations.gov> index; however, some information (e.g., copyrighted material) is not publicly available to read or download through the website. All submissions, including copyrighted material, are available for inspection through the OSHA Docket Office. Contact the OSHA Docket Office at (202) 693-2350 (TTY (877) 889-5627) for assistance in locating docket submissions.

Extension of comment period: Submit requests for an extension of the comment period on or before January 14, 2025 to the Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW, Room N-3653, Washington, DC 20210, or by fax to (202) 693-1644.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, telephone: (202) 693-1999; email: meilinger.francis2@dol.gov.

General and technical information: Contact Mr. Kevin Robinson, Director, Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, phone: (202) 693-1911 or email: robinson.kevin@dol.gov.

SUPPLEMENTARY INFORMATION:

I. Notice of the Application for Expansion

OSHA is providing notice that TUV Rheinland of North America, Inc. (TUVRNA), is applying for an expansion of current recognition as a NRTL. TUVRNA requests the addition of one test site to the NRTL scope of recognition.

OSHA recognition of a NRTL signifies that the organization meets the

requirements specified in 29 CFR 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within the scope of recognition. Each NRTL's scope of recognition includes (1) the type of products the NRTL may test, with each type specified by the applicable test standard and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL's scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification.

The agency processes applications by a NRTL for initial recognition, as well as for an expansion or renewal of recognition, following requirements in appendix A to 29 CFR 1910.7. This appendix requires that the agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides the preliminary finding. In the second notice, the agency provides the final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. OSHA maintains an informational web page for each NRTL, including TUVRNA, which details that NRTL's scope of recognition. These pages are available from the OSHA website at <http://www.osha.gov/dts/otpc/nrtl/index.html>.

TUVRNA currently has ten facilities (sites) recognized by OSHA for product testing and certification, with the headquarters located at: TUV Rheinland of North America, Inc., 295 Foster Street, Suite 100, Littleton, Massachusetts 01460. A complete list of TUVRNA sites recognized by OSHA is available at <https://www.osha.gov/nationally-recognized-testing-laboratory-program/tuv>.

II. General Background on the Application

TUVRNA submitted an application, dated November 16, 2020 (OSHA-2007-0042-0081), to expand recognition as a NRTL to include one additional testing site located at: TUV Rheinland Taiwan Ltd. Taoyuan Testing Laboratories, 4F-1, No. 38, Huaya 1st Road Guishan District, Taoyuan City 333, Taiwan, R.O.C. OSHA staff performed a detailed analysis of the application packet and reviewed other pertinent information. OSHA performed an on-site review of TUVRNA's Taoyuan facility on May 1-

6, 2024, in which assessors found some nonconformances with the requirements of 29 CFR 1910.7. TUVRNA has addressed these issues sufficiently, and OSHA staff has preliminarily determined that OSHA should grant the application.

III. Preliminary Finding on the Application

TUVRNA submitted an acceptable application for expansion of the scope of recognition. OSHA's review of the application files and pertinent documentation preliminarily indicates that TUVRNA can meet the requirements prescribed by 29 CFR 1910.7 for expanding its recognition to include one additional test site for NRTL testing and certification. This preliminary finding does not constitute an interim or temporary approval of TUVRNA's application.

OSHA seeks public comment on this preliminary determination.

IV. Public Participation

OSHA welcomes public comment as to whether TUVRNA meets the requirements of 29 CFR 1910.7 for expansion of recognition as a NRTL. Comments should consist of pertinent written documents and exhibits.

Commenters needing more time to comment must submit a request in writing, stating the reasons for the request by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer time period. OSHA may deny a request for an extension if it is not adequately justified.

To review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor. These materials also are generally available online at <https://www.regulations.gov> under Docket No. OSHA-2007-0042 (for further information, see the "Docket" heading in the section of this notice titled **ADDRESSES**).

OSHA staff will review all comments to the docket submitted in a timely manner. After addressing the issues raised by these comments, staff will make a recommendation to the Assistant Secretary of Labor for Occupational Safety and Health on whether to grant TUVRNA's application for expansion of the scope of recognition. The Assistant Secretary will make the final decision on granting the application. In making this decision, the Assistant Secretary may undertake other proceedings prescribed in appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of the final decision in the **Federal Register**.

V. Authority and Signature

James S. Frederick, Deputy Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue NW, Washington, DC 20210, authorized the preparation of this notice. Accordingly, the agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 8–2020 (85 FR 58393; Sept. 18, 2020), and 29 CFR 1910.7.

Signed at Washington, DC, on December 20, 2024.

James S. Frederick,

Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

NATIONAL CREDIT UNION ADMINISTRATION

Revision of Agency Information Collection of a Previously Approved Collection; Request for Comments

AGENCY: National Credit Union Administration (NCUA).

ACTION: Notice of submission to the Office of Management and Budget.

SUMMARY: As required by the Paperwork Reduction Act of 1995, the National Credit Union Administration (NCUA) is submitting the following revision of currently approved collection to the Office of Management and Budget (OMB) for renewal. The revisions are proposed to take effect with the March 31, 2025, report date.

DATES: Written comments should be received on or before January 29, 2025 to be assured consideration.

ADDRESSES: You may submit written comments on the information collection by any of the following methods identified by the OMB Control Number 3133–0004 or by Document Number (Please send comments by one method only):

Federal Register Portal: <https://www.federalregister.gov> Find this information collection by searching for “National Credit Union Administration”, then selecting “Past 90 days”, and scrolling through the list of documents.

Regulations.gov: <https://www.regulations.gov/search?filter=ncua> Find this information collection by scrolling through the search results and looking for Call Report Form 2025–Q1.

Rulemakings and Proposals for Comment: <https://ncua.gov/regulation->

supervision/rulemakings-proposals-comment NCUA will post a link to the [regulations.gov](https://www.regulations.gov) web page where you can submit a comment by selecting Comment.

Mail: 1775 Duke Street, Suite 5067, Alexandria, Virginia 22314.

Fax: 703–519–8161.

Email: PRAComments@NCUA.gov.

FOR FURTHER INFORMATION CONTACT:

Copies of the submission may be obtained by contacting Dacia Rogers at (703) 518–6547, emailing PRAComments@ncua.gov, or viewing the entire information collection request at www.reginfo.gov. Enhanced content is also available from the Notice on the **Federal Register** website. (www.federalregister.gov). In addition, copies of the NCUA Form 5300, Call Report Form and Instructions can be obtained at the NCUA's website (<https://ncua.gov/regulation-supervision/regulatory-reporting/cuonline>).

SUPPLEMENTARY INFORMATION:

OMB Number: 3133–0004.

Title: NCUA Call Report.

Type of Review: Revision of a currently approved collection.

Abstract: Sections 106 and 202 of the Federal Credit Union Act require federally insured credit unions to submit financial reports to the NCUA. Section 741.5 of the NCUA regulations describes the method federally insured credit unions must use to submit this information to NCUA. Specifically, credit unions use NCUA Form 5300, Call Report to file quarterly financial and statistical data through NCUA's online portal, CUOnline. This financial and statistical information is essential to NCUA's supervision of federal credit unions and the data gathered through the Form 5300, Call Report facilitates NCUA's monitoring of other credit unions with share accounts insured by the National Credit Union Share Insurance Fund (Share Insurance Fund).

Form 5300 Credit Union Call Report—Proposed Changes and Comments Received

In the September 16, 2024, notice, the NCUA proposed revisions to the Form 5300, Call Report including revisions to Schedule A, Section 4; Schedule C, Section 4; Schedule D, Section 2; and Schedule D, Section 3.¹ The comment period for the September 2024 notice ended on November 15, 2024. The NCUA received 20 comment letters, 2 of which did not apply to the actual information collection.

¹ 89 FR 75590 (September 16, 2024).

Schedule A, Section 4

The NCUA proposed two additional accounts for credit unions to report the year-to-date number and amount of loans granted to credit union officials and senior executive staff. Four commenters objected to reporting the year-to-date number and amount of loans granted to credit union officials and senior executive staff because the information is included in the Items Needed List for an examination. These commenters did not see the benefit of providing this information quarterly. After considering these comments, the NCUA will not proceed with the proposed changes.

The NCUA proposed to remove two accounts for credit unions to report information related to Purchased Credit Impaired Loans. No comments were received related to removing these accounts.

Schedule C, Section 4

The NCUA proposed to remove three accounts where credit unions previously reported information related to FRB Paycheck Protection Program Lending Facility loans. No comments were received related to removing these accounts.

The NCUA also proposed to add an account for credit unions to report assets pledged to secure deposits, other funding arrangements, and other counterparty requirements. No comments were received related to adding this account.

Schedule D, Section 2

The NCUA proposed adding or changing accounts on Schedule D, Section 2 as noted in the September 16, 2024, **Federal Register** Notice. One commenter objected to adding the accounts related to non-member term deposits because this information is already reported in the same section. Reporting these deposits in Items 15 and 16 assists the NCUA in monitoring compliance with NCUA regulations § 701.32(b). The NCUA will proceed with the proposed change.

Schedule D, Section 3

The NCUA proposed adding three accounts for credit unions to report the maturity distribution of total uninsured shares and deposits. Ten commenters indicated that the instructions needed more detail to enable credit unions to determine how to report the maturity distribution. The NCUA revised the proposed instructions for Schedule D, Section 3. The proposed instruction changes indicate credit unions should assume the longest maturity term shares are insured first.

One commenter was concerned that the reporting of the maturity distribution of uninsured shares contradicted NCUA regulations § 745.200(c), which states that insurance coverage will be prorated among the member's interest in all accounts. The maturity distribution information reported on the Form 5300, Call Report will not be used to determine share insurance coverage and will be used to monitor uninsured share behavior. Shares will be evaluated by NCUA to determine insurance coverage only when a credit union fails.

One commenter stated the reason NCUA provided for adding these accounts was not sufficient. Regulators and industry analysts cite uninsured deposit runoff as a contributing factor in postmortem assessments of the 2023 banking failures. Uninsured deposits are not as important to the funding mix for credit unions as they are for banks; however, the amount of uninsured shares has been increasing in the credit union system. Trends in uninsured depositor behavior can signal emerging risks to credit union system stability and the share insurance fund.

The NCUA already collects total uninsured deposit information on the Form 5300, Call Report. The maturity distribution will enable a more complete assessment of depositor behavior at the system and individual institution levels.

Four commenters were also concerned that the core processor would not be able to implement these changes in time to accurately report for the March 2025 quarter. While the NCUA continues to believe the information obtained will be useful for evaluating depositor behavior and the movement between uninsured non-maturity shares and share certificates, the need for additional time to develop adequate reporting systems is understandable. To provide time for credit unions to work with their core processors, the NCUA will not require credit unions to report the maturity distribution of uninsured shares in March 2025.

Other Comments Received

The NCUA also received comments related to the added burden on credit unions, the requirement to add negative share accounts to loans, and a Community Development Financial Institution (CDFI) designator.

Burden

Seven commenters were concerned with the increase in burden. Before the NCUA proposes adding items to the Form 5300, Call Report, it weighs the burden on credit unions against the

benefit of the information. The NCUA feels the modest increase in burden is justified to protect the Share Insurance Fund and facilitate offsite development of an examination scope. While the NCUA understands these concerns, the agency does not expect these revisions will result in a material increase in reporting burden.

Negative Shares Added to Loans

One commenter wanted to eliminate the requirement to add negative shares to unsecured loans and to shares. The NCUA cannot eliminate this requirement because it is a requirement of generally accepted accounting principles.

Community Development Financial Institution Designator

One commenter suggested that the NCUA add a designator for credit unions to self-report as a CDFI. CDFI is a designation given by the CDFI Fund to financial institutions that provide financial services in low-income communities and to people who lack access to financing. The NCUA does not give CDFI designations, therefore the agency does not maintain a database of CDFI credit unions. Interested parties may obtain a list of CDFI credit unions at the CDFI Fund website—(<https://www.cdfifund.gov/programs-training/certification/cdfi>).

The NCUA will consider adding a checkbox for credit unions to voluntarily disclose their CDFI designation on a future Form 4501A, Profile. If the NCUA adds a CDFI designator, the Form 4501A, Profile would be the appropriate form because the designation, once reported, would not need to be changed every quarter.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Number of Respondents: 4,499.

Estimated Number of Responses per Respondent: 4.

Estimated Total Annual Responses: 17,996.

Estimated Hours per Response: 4.

Estimated Total Annual Burden Hours: 71,984.

Reason for Change: Burden decreased due to a decrease in the number of respondents.

Request for Comments: Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record. The public is invited to submit comments concerning: (a) whether the collection of information is necessary for the proper performance of the function of the

agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of the information on the respondents, including the use of automated collection techniques or other forms of information technology.

By the National Credit Union Administration Board.

Melane Conyers-Ausbrooks,
Secretary of the Board.

[FR Doc. 2024-31250 Filed 12-27-24; 8:45 am]

BILLING CODE 7535-01-P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

Tribal Consultation

AGENCY: National Endowment for the Arts.

ACTION: Request for comments.

SUMMARY: In accordance with the National Endowment for the Arts (NEA) tribal consultation policy, the NEA solicits written comments from federally recognized tribes.

DATES: Written comments for the FY2025 Tribal Consultation will be solicited for a 60-day window or until March 6, 2025. Comments must be submitted to the office listed in the address section below on or before the close of business on March 6, 2025. Comments received after that date will be considered to the extent practicable. A summary report of the written comments, NEA responses, recommendations, and items identified for follow-up or additional action will be drafted and distributed via the **Federal Register** no later than 30 days after the closing of the comment period. Following dissemination of the draft summary, the record will remain open for 21 days to allow tribes to submit written testimony or additional comments before the report is finalized and published on the NEA website.

ADDRESSES: Please send comments to Native Arts Working Group, National Endowment for the Arts, via email at NativeArts@arts.gov.

SUPPLEMENTARY INFORMATION: Through this Request for Comments, the NEA is seeking input and comments from elected or appointed tribal leaders and

officials or their authorized representatives. This Request for Comments also will be posted to the agency's website.

Subject issues for consultation and related questions are listed below.

1. NEA Resources

The NEA, established by Congress in 1965, is an independent federal agency that is the largest funder of the arts and arts education in communities nationwide and a catalyst of public and private support for the arts. By advancing equitable opportunities for arts participation and practice, the NEA aims to foster and sustain an environment in which the arts benefit everyone in the United States. This is accomplished primarily by providing resources to support the creative lives of all communities in the United States.

Grants are awarded for specific projects to 501(c)(3) nonprofit organizations, federally recognized tribes, or units of state or local government. Individual makers, artists, and culture bearers are recognized and supported through programs such as the NEA National Heritage Fellowships, NEA Jazz Masters Fellowships, and Creative Writing Fellowships. Forty percent of the NEA's program budget is granted to State Arts Agencies and Regional Arts Organizations, which make subgrants to support additional arts activities across the nation.

i. What is your awareness of our agency's efforts in your community and nationally?

ii. Have NEA resources affected your tribal community? If so, how?

iii. To what extent do you see the arts and cultural activities of your tribal community reflected in the resources we offer?

iv. The review criteria for our primary grant program, Grants for Arts Projects, includes artistic excellence, which is defined as "The quality of the artists and other key individuals, creative process, works of art, organizations, arts education providers, artistic partners, and/or services involved in the project and their relevance to the audience or communities the project aims to serve." Does this definition of artistic excellence resonate with the artistic and cultural activities of your tribal community? How could this criteria better assess the creative projects of applicants from your community?

2. Executive Order 14112

The NEA is committed to adhering to the provisions outlined in E.O. 14112: Reforming Federal Funding and Support for Tribal Nations To Better Embrace Our Trust Responsibilities and Promote

the Next Era of Tribal Self-Determination, dated December 11, 2023. The NEA has made progress on those commitments as outlined in our Equity Action Plan, outreach to Native communities to participate in our Grants for Arts Projects grant opportunities, and our overall tribal consultation approach. As we continue to improve our outreach to Native communities, we will provide updates on changes that are implemented to better serve Native constituents. The NEA is in the process of recruiting a new NEA Director of Native Arts & Tribal Affairs to lead agency efforts to better reach and serve the tribal communities.

i. How can the NEA best prioritize its support for tribal sovereignty and self-governance?

ii. How can NEA programs provide your community with the flexibility to improve its economic growth and address your community's specific needs?

iii. What funding and programmatic needs do you have?

3. Tribal Engagement

In recent years, the NEA has made grants to tribal governments and Tribal Colleges & Universities (TCUs). We also have recognized Indigenous artists with NEA National Heritage Fellowships. These direct grants to tribes, tribal citizens, and TCUs are in addition to the grants we make to Native-serving nonprofits.

i. How can the NEA expand on this engagement with tribes and increase awareness of these opportunities?

ii. If the NEA has the resources to send staff representatives to in-person events (e.g. national conferences and regional convenings of importance to tribal communities), where would our participation be most effective? Can you provide a point-of-contact for follow up?

4. Federal Resources for Native Arts & Cultural Activities

The NEA has previously provided annual updates of the Federal Resources for Native Arts & Cultural Activities, which is a consolidation of opportunities offered by federal agencies for organizations looking for funding and other resources to support Native arts and cultural activities.

i. Have you ever accessed this publication? Is this publication a useful resource to make available to tribal communities?

5. Tribal Consultation

The NEA's Tribal Consultation Policy, formally established in October 2021, is

being reviewed for any necessary updates. In order to assist us in our review of the Policy, please share your thoughts on the following questions:

i. What recommendations do you have regarding the NEA's Tribal Consultation Policy?

Dated: December 20, 2024.

RaShaunda Thomas,

Deputy Director, Office of Administrative Services & Contracts, National Endowment for the Arts.

[FR Doc. 2024–31224 Filed 12–27–24; 8:45 am]

BILLING CODE 7537–01–P

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

National Endowment for the Humanities

Civil Penalty Adjustments for 2025

AGENCY: National Endowment for the Humanities; National Foundation on the Arts and the Humanities.

ACTION: Notice of civil penalty adjustments for 2025.

SUMMARY: The National Endowment for the Humanities (NEH) is giving notice of the adjusted maximum and minimum civil monetary penalties that may be imposed for violations of its New Restrictions on Lobbying and Program Fraud Civil Remedies Act regulations to reflect the requirements of the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015. The updated penalty amounts are adjusted for inflation and are effective from January 15, 2025, through January 14, 2026.

DATES: The updated civil penalties in this notice are applicable to penalties assessed on or after January 15, 2025, if the associated violations occurred after November 2, 2015.

FOR FURTHER INFORMATION CONTACT: Elizabeth Voyatzis, Deputy General Counsel, Office of the General Counsel, National Endowment for the Humanities, 400 7th Street SW, Room 4060, Washington, DC 20506; (202) 606–8322; gencounsel@neh.gov.

SUPPLEMENTARY INFORMATION:

1. Background

The Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the Inflation Adjustment Act)¹ directs each Executive agency to make an annual inflation adjustment for each

¹ 28 U.S.C. 2461 note.

civil monetary penalty provided by law within the jurisdiction of the agency, and to publish notice of each such adjustment in the **Federal Register**. An agency adjusts a civil monetary penalty by increasing the maximum amount of such penalty (or the range of minimum and maximum amounts, as applicable) by the percentage by which the Consumer Price Index for All Urban Consumers (CPI-U) for the month of October preceding the date of adjustment (in this case, October 2024) exceeds the CPI-U for the October one year prior to the October immediately preceding the date of the adjustment (in this case, October 2023), then rounding each amount to the nearest dollar.

NEH administers two civil monetary penalties subject to adjustment pursuant to the Inflation Adjustment Act: A civil monetary penalty that NEH may impose for violation of its New Restrictions on Lobbying regulation (the Lobbying Civil Monetary Penalty)² and a civil monetary penalty that NEH may impose under its Program Fraud Civil Remedies Act Regulations (the PFCRA Civil Monetary Penalty).³ NEH made the initial “catch-up” adjustments to the Lobbying Civil Monetary Penalty for years 2016–2020 when it amended its New Restrictions on Lobbying regulation on April 21, 2020,⁴ and to the PFCRA Civil Monetary Penalty for years 2016–2021 when it adopted its Program Fraud Civil Monetary Penalties Act regulations on August 13, 2021.⁵ NEH then adjusted the amount of those civil monetary penalties accordingly when it codified the statutory formula for inflation adjustments in NEH’s New Restrictions on Lobbying and Program Fraud Civil Remedies Act regulations on March 30, 2023.⁶ Each regulation provides for subsequent annual adjustment of its respective civil monetary penalty by notice in the **Federal Register**.⁷

2. 2025 Adjustments for Inflation

OMB has issued guidance on implementing and calculating the 2025 adjustment under the Inflation Adjustment Act.⁸ Per this guidance, the CPI-U adjustment multiplier for this annual adjustment is 1.02598.⁹ The post-adjustment penalty or range is obtained by multiplying the pre-adjustment penalty or range by the

percent change in the CPI-U over the relevant time period and rounding to the nearest dollar. Between October 2023 and October 2024, the CPI-U increased by a multiplier of 102.598%. Therefore, NEH will adjust each civil monetary penalty amount by multiplying it by 1.02598 and rounding to the nearest dollar.

A. 2025 Adjustment to Lobbying Civil Monetary Penalty

For 2024, the Lobbying Civil Monetary Penalty had a minimum amount of \$24,496 and a maximum amount of \$244,958. Therefore, the adjusted minimum Lobbying Civil Monetary Penalty for 2025 is \$25,132 (\$24,496 multiplied by 1.02598) and the adjusted maximum Lobbying Civil Monetary Penalty for 2025 is \$251,322 (\$244,958 multiplied by 1.02598).

Thus, the Lobbying Civil Monetary Penalty, following the 2025 adjustment, has a minimum amount of \$25,132 and a maximum amount of \$251,322.

B. 2025 Adjustment to PFCRA Civil Monetary Penalty

For 2024, the PFCRA Civil Monetary Penalty had a maximum amount of \$13,946. Therefore, the new, post-adjustment maximum penalty for 2025 under NEH’s PFCRA regulation is \$14,308 (\$13,946 multiplied by 1.02598).

Dated: December 20, 2024.

Jessica Graves,

Paralegal Specialist, National Endowment for the Humanities.

BILLING CODE 7536–01–P

NATIONAL SCIENCE FOUNDATION

Notice of Open to the Public Meetings of the Networking and Information Technology Research and Development (NITRD) Program

AGENCY: Networking and Information Technology Research and Development (NITRD) National Coordination Office (NCO), National Science Foundation.
ACTION: Notice of public meetings.

SUMMARY: The NITRD Joint Engineering Team (JET) and Middleware And Grid Interagency Coordination (MAGIC) Communities of Practice (COPs) hold meetings that are open to the public to attend. The JET and MAGIC COPs provide an opportunity for the public to engage and participate in information sharing with federal agencies. The JET and MAGIC COPs report to the NITRD Large Scale Networking Interagency Working Group.

DATES: January 2025–December 2025.

FOR FURTHER INFORMATION CONTACT: Paul Love for the JET COP and Mallory Hinks for the MAGIC COP at nco@nitrd.gov or (202) 459–9674. *Mail:* Attn: Paul Love or Mallory Hinks, 2415 Eisenhower Avenue, Alexandria, VA 22314, USA. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday, except for U.S. Federal Government holidays.

SUPPLEMENTARY INFORMATION: The Joint Engineering Team (JET) COP, established in 1997, provides an opportunity for information sharing among Federal agencies and non-Federal participants who have an interest in high-performance research and engineering or research and education networking (REN) and networking to support science applications.

The MAGIC COP, established in 2002, provides an opportunity for information sharing among Federal agencies and non-Federal participants involved in middleware, grid, and cloud research and infrastructure; implementing or operating grids and clouds; or the use of grids, clouds, and middleware.

The JET and MAGIC COPs’ meetings are hosted by the NITRD NCO with Zoom participation available for each meeting.

Public Meetings Website: The JET and MAGIC COPs’ meetings are scheduled 30 days in advance of the meeting date. Please reference the NITRD Public Meetings web page (<https://www.nitrd.gov/public-meetings/>) for each COP’s upcoming meeting dates and times, in addition to the agendas, minutes, and other meeting materials and information.

Public Meetings Mailing Lists: Members of the public may be added to the mailing lists by sending their full name and email address to jet-signup@nitrd.gov for JET and magic-signup@nitrd.gov for MAGIC, with the subject line: “Add to JET” and/or “Add to MAGIC”, respectively. Meeting notifications and information are shared via the mailing lists.

Public Comments: The government seeks individual input; attendees/participants may provide individual advice only. Members of the public are welcome to submit their comments for JET to jet-comments@nitrd.gov and for MAGIC to magic-comments@nitrd.gov. Please note that under the provisions of the Federal Advisory Committee Act (FACA), all public comments and/or presentations will be treated as public

BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION

RIN 3145–AA58

Notice on Penalty Inflation Adjustments for Civil Monetary Penalties

AGENCY: National Science Foundation.

ACTION: Notice announcing updated penalty inflation adjustments for civil monetary penalties for 2025.

SUMMARY: The National Science Foundation (NSF or Foundation) is providing notice of its adjusted maximum civil monetary penalties, effective January 15, 2025. These adjustments are required by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015.

FOR FURTHER INFORMATION CONTACT: Bijan Gilanshah, Assistant General Counsel, Office of the General Counsel, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314. Telephone: 703.292.5055.

SUPPLEMENTARY INFORMATION: On June 27, 2016, NSF published an interim final rule amending its regulations to adjust, for inflation, the maximum civil monetary penalties that may be imposed for violations of the Antarctic Conservation Act of 1978 (ACA), as amended, 16 U.S.C. 2401 *et seq.*, and the Program Fraud Civil Remedies Act of 1986 (PFCRA), 31 U.S.C. 3801, *et seq.* These adjustments are required by the 2015 Act. The 2015 Act also requires agencies to make subsequent annual adjustments for inflation. Pursuant to OMB guidance dated December 17, 2024, the cost-of-living adjustment multiplier for 2025 is 1.02598. Accordingly, the 2025 annual inflation adjustments for the maximum penalties under the ACA are \$21,568 (\$21,022 $\times$ 1.02598) for violations and \$36,498

(\$35,574 $\times$ 1.02598) for knowing violations of the ACA. Finally, the 2025 annual inflation adjustment for the maximum penalty for violations under PFCRA is \$14,308 (\$13,946 $\times$ 1.02598).

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request; Annual and Final Report Template

AGENCY: National Science Foundation.

ACTION: Notice.

SUMMARY: The National Science Foundation (NSF) is announcing plans to establish this collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, we are providing an opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting Office of Management and Budget (OMB) clearance of this collection for no longer than 3 years.

DATES: Written comments on this notice must be received by February 28, 2025 to be assured consideration. Comments received after that date will be considered to the extent practicable. Send comments to the address below.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Room E6447, Alexandria, Virginia 22314; telephone (703) 292–7556; or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including Federal holidays).

SUPPLEMENTARY INFORMATION:

Title of Collection: Grantee Reporting Requirements for the NSF Accelerating Research through International Network-to-Network Collaboration (AccelNet) Program.

OMB Control No.: 3145–New.

Expiration Date of Approval: Not applicable.

Abstract: We are proposing a modified annual/final report template specific to the Accelerating Research through International Network-to-Network Collaborations program (AccelNet, as described in the following program solicitations: NSF 19–501, NSF

21–511, and NSF 23–619). Briefly, the program funds planning and implementation awards to investigators forming international networks of networks that will work collaboratively to create a research agenda that will advance science in a way not possible with a concerted international cooperative effort. More information on the current solicitation can be found on the program website: <https://new.nsf.gov/funding/opportunities/accelerating-research-through-international>. While NSF requires awardees to submit annual reports each year of the award and a final report at the end of the award period, the template is focused on research outcomes at the national scale whereas our program is focused on networking activities and workforce development at the international scale. The NSF standard report template does not include prompts that are meaningful to the scope of work awarded and does not provide program directors useful information about achievements and international activities.

Respondents: Awardees.

Estimated Number of Annual Respondents: 70.

Burden on the Public: 8 hours or 1 workday per award.

Dated: December 20, 2024.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

NATIONAL SCIENCE FOUNDATION

Notice of Intent To Seek Approval To Extend an Information Collection

AGENCY: National Science Foundation.

ACTION: Notice and request for comments.

SUMMARY: The National Science Foundation (NSF) is announcing plans to request clearance of this collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, we are providing opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting that OMB approve clearance of this collection for no longer than three years.

DATES: Written comments on this notice must be received by February 28, 2025 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

FOR FURTHER INFORMATION CONTACT: Contact Suzanne H. Plimpton, Reports Clearance Officer, National Science

Foundation, 2415 Eisenhower Avenue, Alexandria, Virginia 22314; telephone (703) 292-7556; or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays). You also may obtain a copy of the data collection instrument and instructions from Ms. Plimpton.

SUPPLEMENTARY INFORMATION:

Title of Collection: Grantee Reporting Requirements for Science and Technology Centers (STC): Integrative Partnerships.

OMB No.: 3145-0194.

Expiration Date of Approval: February 28, 2022.

Type of Request: Intent to seek approval to extend an information collection.

Proposed Project:

The Science and Technology Centers (STC): Integrative Partnerships Program supports innovation in the integrative conduct of research, education and knowledge transfer. Science and Technology Centers build intellectual and physical infrastructure within and between disciplines, weaving together knowledge creation, knowledge integration, and knowledge transfer. STCs conduct world-class research through partnerships of academic institutions, national laboratories, industrial organizations, and/or other public/private entities. New knowledge thus created is meaningfully linked to society.

STCs enable and foster excellent education, integrate research and education, and create bonds between learning and inquiry so that discovery and creativity more fully support the learning process. STCs capitalize on diversity through participation in center activities and demonstrate leadership in the involvement of groups underrepresented in science and engineering.

Centers selected will be required to submit annual reports on progress and plans, which will be used as a basis for performance review and determining the level of continued funding. To support this review and the management of a Center, STCs will be required to develop a set of management and performance indicators for submission annually to NSF via an NSF evaluation technical assistance contractor. These indicators are both quantitative and descriptive and may include, for example, the characteristics of center personnel and students;

sources of financial support and in-kind support; expenditures by operational component; characteristics of industrial and/or other sector participation; research activities; education activities; knowledge transfer activities; patents, licenses; publications; degrees granted to students involved in Center activities; descriptions of significant advances and other outcomes of the STC effort. Part of this reporting will take the form of a database which will be owned by the institution and eventually made available to an evaluation contractor. This database will capture specific information to demonstrate progress towards achieving the goals of the program. Such reporting requirements will be included in the cooperative agreement which is binding between the academic institution and the NSF.

Each Center's annual report will address the following categories of activities: (1) research, (2) education, (3) knowledge transfer, (4) partnerships, (5) diversity, (6) management and (7) budget issues.

For each of the categories the report will describe overall objectives for the year, problems the Center has encountered in making progress towards goals, anticipated problems in the following year, and specific outputs and outcomes.

Use of the Information: NSF will use the information to continue funding of the Centers, and to evaluate the progress of the program.

Estimate of Burden: 100 hours per center for twelve centers for a total of 1,200 hours.

Respondents: Non-profit institutions; federal government.

Estimated Number of Responses per Report: One from each of the twelve centers.

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: December 20, 2024.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-498, 50-499, and 72-1041; NRC-2024-0169]

In the Matter of STP Nuclear Operating Company; South Texas Project, Units 1 and 2 and the Associated Independent Spent Fuel Storage Installation; Direct Transfer of License

AGENCY: Nuclear Regulatory Commission.

ACTION: Order; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an order approving the application dated July 31, 2024, filed by STP Nuclear Operating Company, acting on behalf of the City of San Antonio, Texas, acting by and through the City Public Service Board of San Antonio (CPS Energy) and Constellation South Texas, LLC. Specifically, the order approves the direct transfer of a two percent ownership interest of Renewed Facility Operating License Nos. NPF-76 and NPF-80 for South Texas Project, Units 1 and 2, respectively, and its generally licensed independent spent fuel storage installation from Constellation South Texas, LLC to CPS Energy.

DATES: The order was issued on December 11, 2024, and is effective for 1 year.

ADDRESSES: Please refer to Docket ID NRC-2024-0169 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- **Federal Rulemaking Website:** Go to <https://www.regulations.gov> and search for Docket ID NRC-2024-0169. Address questions about Docket IDs in [Regulations.gov](https://www.regulations.gov) to Stacy Schumann; telephone: 301-415-0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- **NRC's Agencywide Documents Access and Management System (ADAMS):** You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select

“Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to PDR.Resource@nrc.gov. The order and safety evaluation supporting the order are available in ADAMS under Package Accession No. ML24319A032.

- *NRC’s PDR*: The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Thomas Byrd, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–3719; email: Thomas.Byrd@nrc.gov.

SUPPLEMENTARY INFORMATION: The text of the order is attached.

Dated: December 20, 2024.

For the Nuclear Regulatory Commission.

Thomas J. Byrd,

Project Manager, Licensing Branch 4, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

Attachment—Order Approving the Direct Transfer of License

United States of America

Nuclear Regulatory Commission

In the Matter of: STP Nuclear Operating Company, (South Texas Project, Units 1 and 2 and 72–1041 the Associated Independent Spent Fuel Storage Installation), Docket Nos. 50–498, 50–499, and, Renewed License Nos. NPF–76 and NPF–80

Order Approving Direct Transfer of License

I.

STP Nuclear Operating Company (STPNOC) is the licensed operator, and the City of San Antonio, Texas, acting by and through the City Public Service Board of San Antonio (CPS Energy), Constellation South Texas, LLC (Constellation South Texas), and the City of Austin, Texas, are the licensed owners for Renewed Facility Operating License Nos. NPF–76 and NPF–80 and the general license for the independent spent fuel storage installation (ISFSI) (collectively, the licenses), which authorize the possession, use, and operation of South Texas Project, (STP), Units 1 and 2 and the STP ISFSI, respectively (the facilities). The

facilities are located in Matagorda County, Texas.

II.

Pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Section 50.80, “Transfer of licenses,” and 10 CFR 72.50, “Transfer of license,” and by letter dated July 31, 2024 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML24213A084), STPNOC, acting on behalf of Constellation South Texas, and CPS Energy (collectively, the “Applicants”), requested that the U.S. Nuclear Regulatory Commission (NRC, the Commission) consent to the transfer of a 2 percent ownership interest of STP, Units 1 and 2 and its generally licensed ISFSI from Constellation South Texas to CPS Energy. Currently, Constellation South Texas holds a 44 percent ownership interest in the facilities, while CPS Energy holds a 40 percent ownership interest in the facilities. Upon completion of the proposed direct transfer, Constellation South Texas and CPS Energy would each hold a 42 percent ownership in the facilities. The proposed direct transfer does not involve the City of Austin’s 16 percent ownership interest in the facilities.

On October 4, 2024, the NRC published a notice of consideration of approval of the application in the **Federal Register** (89 FR 80965). This notice provided an opportunity to comment, request a hearing, and petition for leave to intervene on the application. The NRC did not receive any written comments or hearing requests in response to the notice.

Pursuant to 10 CFR 50.80, no license for a utilization facility, or any right thereunder, shall be transferred, either voluntarily or involuntarily, directly or indirectly, through transfer of control of the license to any person, unless the Commission gives its consent in writing. Pursuant to 10 CFR 72.50, no license or any part included in a license issued under 10 CFR part 72 for an ISFSI shall be transferred, assigned, or in any manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of control of the license to any person, unless the Commission gives its consent in writing. Upon review of the information in the application, and other information before the Commission, and relying upon the representations contained in the application, the NRC staff has determined that the Applicants are qualified to hold the licenses, to the extent described in the application, and that the transfer of the licenses is otherwise consistent with applicable

provisions of law, regulations, and orders issued by the Commission pursuant thereto, subject to the condition set forth below.

The findings set forth above are supported by an NRC staff safety evaluation dated the same date as this order, which is available at Agencywide Documents Access and Management System (ADAMS) Accession No. ML24319A034.

III.

Accordingly, pursuant to Sections 161b, 161i, 161o, and 184 of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2201(b), 2201(i), 2201(o), and 2234; and 10 CFR 50.80 and 10 CFR 72.50, *it is hereby ordered* that that the application regarding the proposed direct license transfer is approved for STP, Units 1 and 2, and the ISFSI.

It is ordered that after receipt of all required regulatory approvals of the proposed transaction, the Applicants shall inform the Director of the Office of Nuclear Reactor Regulation in writing of such receipt no later than 5 business days prior to the planned closing of the proposed transaction. Should the proposed transaction not be completed within 1 year of the date of this order, this order shall become null and void, provided, however, that upon written application to the Director of the Office of Nuclear Reactor Regulation and for good cause shown, such date may be extended by order. The condition of this order may be amended upon application by the Applicants and approval by the NRC.

This Order is effective upon issuance.

For further details with respect to this Order, see the application dated July 31, 2024, and the associated NRC safety evaluation dated the same date as this order. Publicly available documents created or received at the NRC are accessible electronically through ADAMS in the NRC Library at <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC Public Document Room reference staff by telephone at 1–800–397–4209, or 301–415–4737, or by email to pdr.resource@nrc.gov.

For the Nuclear Regulatory Commission
/RA/
Aida Rivera-Varona, Deputy Director
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-238; NRC-2024-0207]

United States Department of Transportation Maritime Administration; Nuclear Ship Savannah; Environmental Assessment and Finding of No Significant Impact

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is considering a license amendment request to approve the License Termination Plan (LTP) of License No. NS-1 for the Nuclear Ship Savannah (NSS) located at Pier 13, Canton Marine Terminal, in Baltimore, Maryland. If approved, the amendment would add a condition to the NSS license reflecting the NRC's approval of the LTP and establishing criteria for determining when changes to the LTP require prior NRC approval. The NRC staff has prepared an environmental assessment (EA) for this proposed license amendment in accordance with NRC regulations. Based on the EA, the NRC has concluded that a finding of no significant impact (FONSI) is appropriate. Therefore, in accordance with NRC regulations, preparation of an environmental impact statement (EIS) is not warranted for the proposed action. The NRC staff also is conducting a safety evaluation of the proposed license amendment.

DATES: The EA and FONSI referenced in this document are available on December 30, 2024.

ADDRESSES: Please refer to Docket ID NRC-2024-0207 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2024-0207. Address questions about Docket IDs to Stacy Schumann; telephone: 301-415-0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For

problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to PDR.Resource@nrc.gov. For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the "Availability of Documents" section.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Diana Diaz Toro, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-0930, email: Diana.Diaz-Toro@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is considering issuance of a license amendment request to approve the LTP for NSS, located at Pier 13, Canton Marine Terminal, in Baltimore, Maryland, as part of the United States Department of Transportation Maritime Administration's (MARAD) part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), "Domestic Licensing of Production and Utilization Facilities," License No. NS-1. If granted, the license amendment would add a condition to the NSS license reflecting the NRC's approval of MARAD's LTP and establishing criteria for determining when changes to the LTP require prior NRC approval. As required by 10 CFR part 51, "Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions," the NRC staff prepared an EA.

Based on the EA, the NRC staff has determined that an EIS is not required for this proposed action and a FONSI is appropriate. The NRC staff is also conducting a safety evaluation of the proposed license renewal request pursuant to 10 CFR part 50 and the results will be documented in a separate safety evaluation report.

II. Summary of Environmental Assessment

Description of the Proposed Action

The proposed action is the review and approval, if appropriate, of MARAD's LTP for NSS located in Pier 13, Canton Marine Terminal, in Baltimore,

Maryland. If approved by the NRC, the NSS license will be amended by adding a license condition that documents approval of the LTP and stipulating the changes that MARAD can make to the LTP without prior NRC approval. If the NRC approves the LTP, MARAD would implement the LTP to complete NSS decommissioning activities. Once decommissioning is complete, MARAD plans to submit a request to the NRC to terminate the license.

Purpose and Need for the Proposed Action

The purpose and need for the proposed action is to authorize MARAD to complete decommissioning of NSS to meet the unrestricted use criteria as specified in 10 CFR 20.1402, "Radiological criteria for unrestricted use." If the NRC approves the LTP, MARAD would complete decommissioning of NSS, followed by a request to terminate the NSS license. Upon NRC's termination of the license, MARAD would proceed to disposition the ship (e.g., preservation, shipbreaking, or artificial reefing) consistent with the process established in the Programmatic Agreement (PA) executed in accordance with the National Historic Preservation Act (NHPA).

Environmental Impacts of the Proposed Action

The NRC staff has assessed the potential environmental impacts of the proposed action. The results of the NRC's environmental review can be found in the EA. The NRC staff performed its environmental review in accordance with the requirements in 10 CFR part 51. The NRC staff relied on the NRC's NUREG-0586, Supplement 1, "Generic Environmental Impact Statement on Decommissioning of Nuclear Facilities" (Decommissioning GEIS), as appropriate. In the Decommissioning GEIS, the NRC previously evaluated the potential environmental impacts of nuclear reactor decommissioning from the time that a licensee certifies it has permanently ceased power operations until the license is terminated. While NSS is not a nuclear power plant in the traditional sense, the ship was powered by an 80-megawatt thermal (MW_{th}) pressurized water reactor (PWR). Therefore, some of the analyses and conclusions in the Decommissioning GEIS are applicable to the decommissioning of the ship.

NSS ceased operations in 1970 and the 80 MW_{th} PWR was defueled in 1971. In 1972, the spent fuel elements were shipped to the U.S. Department of

Energy's Savannah River Site in Aiken, South Carolina. In 1976 the NRC license was changed to a possession-only license.

The ship was operated as a museum from 1981 to 1994 at the Patriots Point Naval and Maritime Museum in Mount Pleasant, South Carolina. In 1983, the ship was listed in the National Register of Historic Places and in 1991 it was designated as a National Historic Landmark for exhibiting exceptional value in illustrating the nuclear, maritime, transportation, and political heritages of the United States. The ship was moved to Baltimore, Maryland in 2008.

The license boundary for NSS is defined as the hull of the ship, therefore everything outside of the ship itself is considered off-site area. The site contains no soils or groundwater. There are no residences within 1.6 kilometers (km) (1 mile [mi]), however, NSS is berthed within the Port of Baltimore, a large industrial facility supporting over 15,000 direct jobs. There are two communities within 3.2 km (2 mi) of NSS with residences, medical facilities, schools, and parks. There are no nearby off-site wells or potable water sources.

Because MARAD's decommissioning, license termination, and final disposition involve dismantlement and remediation activities, including removal of some systems, structures, and components of the ship's nuclear power plant, MARAD determined that these activities would have an adverse effect per 36 CFR 800, "Protection of Historic Properties." In March 2023, MARAD executed a PA to minimize harm to landmarks, to the maximum extent possible, consistent with under section 110(f) of the NHPA. The purpose of the PA is to facilitate preservation of NSS during decommissioning. The PA was signed by Advisory Council on Historic Preservation, the NRC, and the Maryland State Historic Preservation Officer. The NRC is a signatory to the PA and, accordingly, has satisfied its obligations under the NHPA. The PA includes several concurring parties, including the National Park Service, Smithsonian Institution, on behalf of the National Museum of American History, the Steamship Historical Society of America, the N/S Savannah Association, the National Museum of Nuclear Science and History, and the Health Physics Society.

As part of the license termination plan, the ship itself would not be dismantled, and license termination activities would be conducted, to the greatest extent practicable, within the ship's license site boundary (*e.g.*, onboard the ship). To minimize impacts

to adjacent facilities and the environment and to avoid changes to the license boundary, MARAD separates and packages waste onboard NSS for subsequent transport of the waste for disposal at a permitted facility.

Chapter 3 of the LTP describes the activities that MARAD has completed as well as the remaining decommissioning activities. MARAD has dismantled the reactor auxiliary systems and components outside of the reactor compartment and disposed of it as low-level radiological waste (LLRW) in 2022. MARAD has completed the removal of major components including the control rod drive tower, port and starboard steam generator tubes and tube sheets, and the reactor pressure vessel head and internal components. In 2023, MARAD removed the lower section of the pressurizer and shipped it offsite as LLRW. MARAD plans to retain the remaining portions of the pressurizer as well as the containment vessel and secondary shield. Primary ship structures such as the decks, bulkheads, and contaminated liquid storage tanks will be decontaminated and remediated to meet the criteria for unrestricted use. After decontamination, the final status survey will be performed to verify that residual radioactivity has been reduced to meet the radiological criteria for unrestricted use in 10 CFR 20.1402.

The license termination activities would not impact the water quality of the port where the ship is moored as all waste is handled onsite to avoid impacting adjacent lands and water quality. Compliance with all Federal, State, and local permits pertaining to water quality throughout decommissioning activities ensures that surface water impacts are either minimal or evaluated in an appropriate environmental review. During current ship operations, anticipated discharges would consist of stormwater and condensate from the heating, ventilation and air conditioning system. MARAD has consulted with the Maryland Department of the Environment to ensure all liquid discharges from the ship are within state limits. The Maryland Department of the Environment concluded NSS did not require a permit, thus, MARAD does not have a National Pollutant Discharge Elimination System permit. Wastewater was collected in drums during decommissioning activities and shipped and disposed of offsite.

MARAD has been conducting remediation throughout the decommissioning process based on the results of radiological surveys. Routine radiological surveys along with historical survey data indicate that

minimal contamination has been identified to date. MARAD's occupational exposure as of September 30, 2023, is approximately 0.02168 person-Sv (2.168 person-rem) and the estimated exposure from all remaining activities would be approximately 0.02178 person-Sv (2.178 person-rem). MARAD does not anticipate any radioactive releases to unrestricted areas during the remaining decommissioning activities. The non-radiological hazards are typical of decommissioning activities, such as operation of heavy equipment, falling objects, or fires. MARAD would implement operating procedures and safety measures in accordance with Occupational Safety Health Administration regulations. Accordingly, no significant radiological or non-radiological impacts are expected to result from approval of the LTP. Therefore, the NRC staff does not anticipate impacts to public or workers' health and safety from radiological and non-radiological hazards, air quality, and transportation beyond those discussed in the Decommissioning GEIS, which concluded that the impact level for these issues was SMALL. Additionally, the NRC staff finds that impacts to off-site land use, geology and soils, water quality (surface and groundwater), visual resources, noise, socioeconomics, and waste management would be SMALL and not be significant. As discussed in section 3.8 of the EA, the NRC staff determined that impacts to terrestrial and aquatic ecology from the proposed license termination activities would be SMALL and not significant. Also, there would be no disproportionately high and adverse impacts on minority and low-income populations as a result of license termination activities at NSS.

The NRC staff determined that the proposed action would have no effect on any Federally listed species under the Endangered Species Act (ESA) because no Federally listed species are expected to occur within the action area as the action area does not provide suitable habitat for the listed species. Therefore, the NRC staff concludes that the proposed action would have no effect on any Federally listed, proposed, or candidate species. No critical habitats occur within the action area. Shortnose sturgeons are known to be present in Chesapeake Bay, however, they are unlikely to be present in the vicinity of the ship. Federal agencies are not required to consult with the U.S. Fish and Wildlife Service if they determine that an action will have no effect on Federally listed species or critical habitats. Thus, the ESA does not require

consultation on the proposed license termination activities at NSS. The NRC staff considers its obligations under ESA section 7 to be fulfilled for the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

The NRC staff also assessed the potential environmental impacts of alternatives to the proposed action, including alternative sites and the no-action alternative.

MARAD evaluated the environmental impacts of decommissioning NSS at three different ports: Baltimore, Maryland; Philadelphia, Pennsylvania; and Hampton Roads, Virginia. All three sites are in industrial areas along a deep-water waterfront with restricted access. Decommissioning activities would be similar regardless of the location; therefore, most of the environmental impacts anticipated at the Philadelphia or Hamptons Roads locations would not be significantly different from the environmental impacts discussed in the EA for the Port of Baltimore. The Port of Baltimore was selected as the location for decommissioning NSS using the DECON method because the ship is

currently docked there, therefore selecting any other location would require MARAD to tow the ship to the new location, which could result in additional potential environmental impacts.

The no-action alternative would consist of the NRC's denial of MARAD's LTP. Decommissioning and onsite maintenance activities would continue at the site. MARAD would not be able to request license termination until a revised LTP was submitted and approved by the NRC. Under this scenario, until MARAD resubmits an updated LTP, berthing of NSS at the Port in Baltimore would likely continue, including maintenance activities. Environmental impacts would neither significantly increase nor decrease because of the additional time, except for the costs associated with continuing to maintain the ship in a protective storage condition.

Agencies and Persons Consulted

On August 22, 2024, the NRC staff submitted the draft EA to the State of Maryland for their review and comment. On September 30, 2024, the State of Maryland provided comments regarding: (i) National Ambient Air

Quality Standards (NAAQS) designation (attainment/nonattainment status) for the State of Maryland, (ii) air emissions from NAAQS-criteria pollutants, (iii) and coastal effects in accordance with the Coastal Zone Management Act. The NRC staff addressed all comments from the State of Maryland in the final EA.

III. Finding of No Significant Impact

In accordance with the requirements in 10 CFR part 51, the NRC staff has concluded that the proposed action will not significantly affect the quality of the human environment. Therefore, the NRC staff has determined, pursuant to 10 CFR 51.31, "Determinations based on environmental assessment," that preparation of an EIS is not required for the proposed action, and pursuant to 10 CFR 51.32, "Finding of no significant impact," a FONSI is appropriate. Consistent with 10 CFR 51.32(a)(4), this FONSI incorporates the EA set forth in this notice by reference.

IV. Availability of Documents

The documents identified in the following table are available to interested persons through ADAMS, as indicated.

Document description	ADAMS accession No.
MARAD's Docket No. 50-238; License No. NS-1; N.S. Savannah, Submittal of Finding of No Significant Impact and Environmental Assessment, transmitted to NRC on October 3, 2008.	ML082810182.
MARAD's Docket No. 50-238; License No. NS-1; N.S. Savannah, Supplemental Environmental Assessment and Finding of No Significant Impact, CR-137, transmitted to NRC on May 21, 2024.	ML24145A128.
MARAD's Programmatic Agreement among the U.S. Department of Transportation, Maritime Administration, the U.S. Nuclear Regulatory Commission, the Advisory Council on Historic Preservation, and the Maryland State Historic Preservation Officer for the Decommissioning and Disposition of the Nuclear Ship Savannah, Baltimore, Maryland, dated March 17, 2023.	ML24191A138 (Package).
MARAD's Docket No. 50-238; License No. NS-1; N.S. Savannah, License Amendment Request No. LAR 2023-01. Submittal and Request for Approval of the License Termination Plan, dated October 23, 2023.	ML23298A041.
MARAD's Docket No. 50-238; License No. NS-1; N.S. Savannah, License Amendment Request No. LAR 2023-01, Response to Requests for Additional Information, dated June 27, 2024.	ML24183A271.
MARAD's Docket No. 50-238; License No. NS-1; N.S. Savannah, License Amendment Request No. LAR 2023-01, Response to Second Request for Additional Information, dated October 16, 2024.	ML24292A030.
NRC's NUREG-0586, Supplement 1, "Generic Environmental Impact Statement on Decommissioning of Nuclear Facilities," dated November 2002	ML023470304, ML023470323, ML023500187, ML023500211, ML023500223.
Environmental Assessment for the License Termination Plan for the Nuclear Ship Savannah in Baltimore, Maryland, dated December 2024.	ML24351A024.

Dated: December 20, 2024.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2024-0001]

Sunshine Act Meetings

TIME AND DATE: Weeks of December 30, 2024 and January 6, 13, 20, 27, and February 3, 2025. The schedule for Commission meetings is subject to change on short notice. The NRC Commission Meeting Schedule can be found on the internet at: <https://www.nrc.gov/public-involve/public-meetings/schedule.html>.

PLACE: The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings or need this meeting notice or the transcript or other information from the public meetings in another format (e.g., braille, large print), please notify Anne Silk, NRC Disability Program Specialist, at 301-287-0745, by videophone at 240-428-3217, or by email at Anne.Silk@nrc.gov. Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

STATUS: Public.

Members of the public may request to receive the information in these notices electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555, at 301-415-1969, or by email at

Betty.Thweatt@nrc.gov or
Samantha.Miklaszewski@nrc.gov.

MATTERS TO BE CONSIDERED:

Week of December 30, 2024

There are no meetings scheduled for the week of December 30, 2024.

Week of January 6, 2025—Tentative

There are no meetings scheduled for the week of January 6, 2025.

Week of January 13, 2025—Tentative

Tuesday, January 14, 2025

9:00 a.m. Strategic Programmatic Overview of the Decommissioning and Low-Level Waste and Nuclear Materials Users Business Lines (Public Meeting) (Contact: Araceli Billoch Colon: 301-415-3302)

Additional Information: The meeting will be held in the Commissioners' Hearing Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via webcast at the Web address—<https://video.nrc.gov/>.

Week of January 20, 2025—Tentative

There are no meetings scheduled for the week of January 20, 2025.

Week of January 27, 2025—Tentative

There are no meetings scheduled for the week of January 27, 2025.

Week of February 3, 2025—Tentative

Thursday, February 6, 2025

9:00 a.m. Briefing on ADVANCE Act Activities (Public Meeting) (Contact: Wesley Held: 301-287-3591)

Additional Information: The meeting will be held in the Commissioners' Hearing Room, 11555 Rockville Pike, Rockville, Maryland. The public is invited to attend the Commission's meeting in person or watch live via

webcast at the Web address—<https://video.nrc.gov/>.

CONTACT PERSON FOR MORE INFORMATION:

For more information or to verify the status of meetings, contact Wesley Held at 301-287-3591 or via email at Wesley.Held@nrc.gov.

The NRC is holding the meetings under the authority of the Government in the Sunshine Act, 5 U.S.C. 552b.

Dated: December 26, 2024.

For the Nuclear Regulatory Commission.

Richard Laufer,

Technical Coordinator, Office of the Secretary.

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the

Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 31, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202-789-6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
- II. Public Proceeding(s)
- III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (<http://www.prc.gov>). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.¹

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s)

identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

II. Public Proceeding(s)

1. Docket No(s): MC2025–907 and K2025–908; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1126 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Almaroof Agoro; Comments Due: December 31, 2024.

2. Docket No(s): MC2025–908 and K2025–909; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1127 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Almaroof Agoro; Comments Due: December 31, 2024.

3. Docket No(s): MC2025–909 and K2025–910; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1128 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public

Representative: Almaroof Agoro; Comments Due: December 31, 2024.

4. Docket No(s): MC2025–911 and K2025–912; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1129 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Almaroof Agoro; Comments Due: December 31, 2024.

5. Docket No(s): MC2025–912 and K2025–913; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1130 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Almaroof Agoro; Comments Due: December 31, 2024.

6. Docket No(s): MC2025–913 and K2025–914; Filing Title: USPS Request to Add Priority Mail & USPS Ground Advantage Contract 557 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Almaroof Agoro; Comments Due: December 31, 2024.

7. Docket No(s): MC2025–916 and K2025–917; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1133 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Almaroof Agoro; Comments Due: December 31, 2024.

8. Docket No(s): MC2025–917 and K2025–918; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1134 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Almaroof Agoro; Comments Due: December 31, 2024.

9. Docket No(s): MC2025–918 and K2025–919; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1135 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing

¹ See Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

26. Docket No(s).: MC2025-950 and K2025-950; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1164 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public

Representative: Maxine Bradley;
Comments Due: December 31, 2024.

27. Docket No(s): MC2025–951 and K2025–951; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1165 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Gregory Stanton; Comments Due: December 31, 2024.

28. Docket No(s): MC2025–952 and K2025–952; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1166 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Gregory Stanton; Comments Due: December 31, 2024.

29. Docket No(s): MC2025–953 and K2025–953; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1167 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Gregory Stanton; Comments Due: December 31, 2024.

30. Docket No(s): MC2025–954 and K2025–954; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1168 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Katalin Clendenin; Comments Due: December 31, 2024.

31. Docket No(s): MC2025–955 and K2025–955; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1169 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Katalin Clendenin; Comments Due: December 31, 2024.

32. Docket No(s): MC2025–956 and K2025–956; Filing Title: USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1170 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance

Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Katalin Clendenin; Comments Due: December 31, 2024.

33. Docket No(s): MC2025–957 and K2025–957; Filing Title: USPS Request to Add Priority Mail & USPS Ground Advantage Contract 560 to the Competitive Product List and Notice of Filing Materials Under Seal; Filing Acceptance Date: December 19, 2024; Filing Authority: 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; Public Representative: Katalin Clendenin; Comments Due: December 31, 2024.

III. Summary Proceeding(s)

None. See Section II for public proceedings.

This Notice will be published in the **Federal Register**.

Erica A. Barker,
Secretary.

POSTAL SERVICE

Product Change—Priority Mail Express, Priority Mail, and USPS Ground Advantage® Negotiated Service Agreement

AGENCY: Postal Service™.

ACTION: Notice.

SUMMARY: The Postal Service gives notice of filing a request with the Postal Regulatory Commission to add a domestic shipping services contract to the list of Negotiated Service Agreements in the Mail Classification Schedule's Competitive Products List.

DATES: *Date of required notice:* December 30, 2024.

FOR FURTHER INFORMATION CONTACT: Sean C. Robinson, 202–268–8405.

SUPPLEMENTARY INFORMATION: The United States Postal Service® hereby gives notice that, pursuant to 39 U.S.C. 3642 and 3632(b)(3), on December 18, 2024, it filed with the Postal Regulatory Commission a *USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage® Contract 1143 to Competitive Product List*. Documents are available at www.prc.gov, Docket Nos. MC2025–927, K2025–928.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102005; File No. SR-NYSEARCA-2024-112]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change To Amend Rule 7.31-E To Adopt the Selective Midpoint Order

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 18, 2024, NYSE Arca, Inc. (“NYSE Arca” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.31-E to adopt the Selective Midpoint Order. The proposed rule change is available on the Exchange’s website at www.nyse.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of,

and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 7.31-E(h)(3) to decommission the Discretionary Pegged Order (“DPO”) and introduce the Selective Midpoint Order (“SeMi Order”). The SeMi Order will be similar to the DPO in that it is a discretionary order type, but will, unlike the current DPO, provide price protection during periods of market instability based on input from a gradient-boosting machine learning model.

Background

The Exchange currently offers the DPO, which is a non-displayed order to buy (sell) that is pegged to the same side of the PBBO and assigned a working price equal to the lower (higher) of the midpoint of the PBBO (the “Midpoint Price”) or the limit price of the order.³ Any untraded shares of such order are assigned a working price equal to the lower (higher) of PBB (PBO) or the order’s limit price, which is automatically adjusted in response to changes to the PBB (PBO) for buy (sell) orders up (down) to the order’s limit price. A DPO will exercise the least amount of discretion necessary from its working price to its discretionary price (defined as the lower (higher) of the Midpoint Price or the limit price of the order) to trade with contra-side interest.

Prior to November 2022, the DPO would not exercise discretion if the PBBO was determined to be unstable via a “quote instability calculation” that assessed the probability of a change to the PBB or PBO.⁴ The Exchange used the quote instability calculation along with real-time relative quoting activity of protected quotations to assess the

probability of an imminent change to the PBBO (the “quote instability factor”). When the quoting activity met certain predefined criteria and the quote instability factor calculated was greater than the Exchange’s predefined quote instability threshold, the Exchange treated the quote as unstable and restricted DPOs from exercising discretion. In November 2022, the Exchange amended Rule 7.31-E(h)(3) to eliminate the quote stability calculation, allowing DPOs to exercise discretion even during potential periods of quote instability.⁵

Proposed Rule Change

The Exchange proposes to modify Rule 7.31-E(h)(3) to replace the DPO with the SeMi Order. The SeMi Order will share the same basic attributes as the DPO. Like the DPO, the SeMi Order would be a non-displayed order to buy (sell) that is pegged to the same side of the PBBO and assigned a working price equal to the lower (higher) of the Midpoint Price or the limit price of the order. Any untraded shares of a SeMi Order would be assigned a working price equal to lower (higher) of the PBB (PBO) or the order’s limit price and automatically adjusted in response to changes to the PBB (PBO) for buy (sell) orders up (down) to the order’s limit price. In order to trade with contra-side orders on the NYSE Arca Book, a SeMi Order to buy (sell) would exercise the least amount of price discretion necessary from its working price to its discretionary price, which is defined as the lower (higher) of the Midpoint Price or the SeMi Order’s limit price.

SeMi Orders would not be displayed, must be designated Day, and would be eligible to be designated for the Core Trading Session only. SeMi Orders designated for the Early Trading Session or Late Trading Session would be rejected.

When exercising discretion, SeMi Orders (like DPOs today) would maintain their time priority at their working price as Priority 3—Non-Display Orders and are prioritized behind Priority 3—Non-Display Orders with a working price equal to the discretionary price of a SeMi Order at the time of execution. If multiple SeMi

³ See Rule 7.31-E(h)(3). As defined in NYSE Arca Rule 1.1, “PBBO” means the Best Protected Bid and the Best Protected Offer. Rule 1.1 also defines “PBB” as the highest Protected Bid and “PBO” as the lowest Protected Offer.

⁴ See Securities Exchange Act Release No. 95154 (June 24, 2022), 87 FR 39134 (June 30, 2022) (SR-NYSEARCA-2022-13) (Notice of Filing of Amendment No. 2 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 2, To Amend Rule 7.31-E(h)(3) Relating to Discretionary Pegged Orders).

⁵ See Securities Exchange Act Release No. 96322 (November 15, 2022), 87 FR 69376 (November 18, 2022) (SR-NYSEARCA-2022-76) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Amend Rule 7.31-E). The Exchange resumed offering the DPO in November 2022, after previously filing to temporarily suspend its use in August 2022. See Securities Exchange Act Release No. 95584 (August 23, 2022), 87 FR 52826 (August 29, 2022) (SR-NYSEARCA-2022-54) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 7.31-E).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

Orders are exercising price discretion during the same book processing action, they would maintain their relative time priority at the discretionary price.

Accordingly, the Exchange proposes to replace existing references to the “Discretionary Pegged Order” in Rule 7.31–E(h)(3) and subparagraphs (A) and (B) thereunder with references to the “Selective Midpoint Order.”⁶

The Exchange proposes to add new Rule 7.31–E(h)(3)(C) to provide that the SeMi Order, as proposed, would exercise price discretion to its discretionary price, except during periods of quote instability as identified by the Selective Midpoint Indicator (“SMI”) (as discussed in further detail below). If the SMI determines the PBBO for a particular security to be an unstable quote, both an arriving and resting SeMi Order would wait for a PBBO that is stable before the order’s working price is adjusted and the order becomes eligible to trade. In other words, a SeMi Order would be ineligible to trade when the SMI identifies unstable market conditions and would remain in that state until the SMI determines that market conditions have stabilized, thereby preventing potentially undesirable executions during volatile or unstable market conditions. Whereas the DPO previously relied on one static logistical regression model to forecast market instability and prevented DPOs in any symbol from exercising discretion to trade when the model anticipated an unstable market, the SeMi Order, as proposed, would rely on the SMI to predict market instability using a symbol-specific gradient-boosting machine learning model and would protect SeMi Orders from trading when the SMI predicts quote instability for a given symbol.

The Exchange also proposes new Rule 7.31–E(h)(3)(D) to provide for SeMi Orders to be optionally designated as Liquidity Providing. Proposed Rule 7.31–E(h)(3)(D)(i) would provide that a SeMi Order designated as Liquidity Providing will only execute on arrival against resting orders that include a Non-Display Remove Modifier and are priced within the Liquidity Providing SeMi Order’s discretionary range.⁷

⁶ The Exchange also proposes conforming changes in Rules 7.18–E(b)(1), 7.18–E(c)(1) and (5), 7.31–E(i)(3), and 7.34–E(c)(1)(A) to replace references to “Discretionary Pegged Orders” with references to “Selective Midpoint Orders.”

⁷ The Exchange also proposes related conforming changes to Rules 7.31–E(d)(2)(B), 7.31–E(d)(3)(F), and 7.31–E(e)(1)(C) to provide that Non-Displayed Limit Orders, MPL Orders, and Non-Routable Limit Orders designated with a Non-Display Remove Modifier will trade as takers against Liquidity Providing SeMi Orders.

Proposed Rule 7.31–E(h)(3)(D)(ii) would provide that if a resting contra-side order that does not include a Non-Display Remove Modifier is priced within an arriving Liquidity Providing SeMi Order’s discretionary range, the Liquidity Providing SeMi Order will be placed on the NYSE Arca Book, and its discretionary range will be adjusted to equal the resting price of a non-displayed contra-side order or to one MPV less aggressive than the resting price of a displayed contra-side order.⁸

Proposed Rule 7.31–E(h)(3)(D)(iii) provides that a Liquidity Providing SeMi Order resting on the NYSE Arca Book will not trade with an arriving contra-side order that cannot remove liquidity.⁹ Once such arriving contra-side order is placed on the NYSE Arca Book, the discretionary range of the Liquidity Providing SeMi Order will be adjusted to equal the resting price of a non-displayed contra-side order or to one MPV less aggressive than the resting price of a displayed contra-side order.

Proposed Rule 7.31–E(h)(3)(D)(iv) would provide that, once resting on the NYSE Arca Book, the discretionary range of a Liquidity Providing SeMi Order will be adjusted based on resting contra-side interest as described in proposed subparagraphs (ii) and (iii) of this Rule when its working price Changes. In addition, proposed Rule

⁸ The Exchange notes that allowing Liquidity Providing SeMi Orders to trade with resting orders with a Non-Display Remove Modifier, as well as adjusting the discretionary range of such orders, would be consistent with how similar discretionary order types function on other equities exchanges. See, e.g., Cboe EDGX Exchange, Rule 11.8(g)(5) (“[Midpoint Discretionary Orders (“MDOs”)] that are not entered with a [Quote Depletion Protection (“QDP”)] instruction, as defined in Rule 11.8(g)(10), will only act as the liquidity provider. MDOs entered with a QDP instruction will instead be allowed to remove liquidity, by default, unless the User chooses to require that the MDO only act as a liquidity provider. If the instructions included on an MDO do not permit the MDO to remove liquidity, it will only execute on entry against resting orders that include a Super Aggressive instruction priced at the MDO’s pegged price if the MDO also contains a Displayed instruction, and against resting orders that include an NDS instruction priced either at the MDO’s pegged price or within its discretionary range. If a resting contra-side order that does not include [a Non-Displayed Swap] instruction is priced within the discretionary range of an incoming MDO that is not permitted to remove liquidity, the incoming MDO will be placed on the EDGX Book and its discretionary range will be shortened to equal the limit price of the resting contra-side order. Likewise, where an incoming order with a Post Only instruction does not remove liquidity on entry pursuant to Rule 11.6(n)(4) against a resting MDO, the discretionary range of the resting MDO will be shortened to equal the limit price of the incoming contra-side order with a Post Only instruction.”).

⁹ The Exchange notes that this proposed handling is also consistent with the handling of similar discretionary order types by other equities exchanges. See *id.*

7.31–E(h)(3)(D)(iv)(a) and (b) provide that a Liquidity Providing SeMi Order to buy (sell) will not be eligible to trade at a price equal to or above (below) any sell (buy) orders that are displayed and that have a working price equal to or below (above) the working price of such Liquidity Providing SeMi Order, or at a price above (below) any sell (buy) orders that are not displayed and that have a working price below (above) the working price of such Liquidity Providing SeMi Order.

Finally, the Exchange proposes to renumber current Rule 7.31–E(h)(3)(C) as 7.31–E(h)(3)(E). The Exchange proposes that, as with DPOs, if the PBBO is locked or crossed, SeMi Orders would wait for a PBBO that is not locked or crossed before the working price is adjusted and the order becomes eligible to trade. Accordingly, the Exchange proposes to substitute “Selective Midpoint Order” for “Discretionary Pegged Order” in the text of proposed Rule 7.31–E(h)(3)(E).

Selective Midpoint Indicator

As described in further detail in the white paper attached as Exhibit 3 to this proposed rule change,¹⁰ the SMI was developed using a decision tree model, which is a supervised learning algorithm used for classification and regression tasks. A decision tree model is trained sequentially, and each successive model seeks to improve on errors in the previous model by focusing on accurately predicting where the previous model performs poorly.

The Exchange determined to use a decision tree model in developing the SMI in large part because of the transparency it offers to its designers. The output of a decision tree is a hierarchy of questions that allows a user to follow the model’s decision-making process, assess the importance of a given feature to the model’s output, and examine the reasons underlying a specific output from the model. The Exchange believed it was important to build a model that could be interpreted and understood in this way to allow for the evaluation of, among other things, the relationships between market shifts, feature selection, and feature weightings, as well as to be able to assess overall model performance.

Market Instability Assessment

The Exchange set out to develop a model that would allow the SMI to predict market instability. For purposes of the model, the Exchange defined

¹⁰ See Exhibit 3, Selective Midpoint Indicator (SMI): A Gradient Boosted Signal Enabling Stable Order Executions (the “White Paper”).

“instability” at a high level as relatively large price moves during a relatively short time frame. The Exchange chose PBBO updates as the fundamental data points for the model based on the evenly distributed nature of PBBO updates throughout the trading day and the granular level of information such updates offer. The model’s objective is to identify windows where changes to the PBBO are unstable, in order to predict unstable markets in real time and prevent SeMi Order trading accordingly.

The Exchange established the concept of a “price jump” to further understand and categorize periods of instability. A price jump is defined as a PBBO mid-price change of a pre-defined percentage of a symbol’s spread (referred to as the spread threshold X), in either direction, within a configurable time interval (referred to as the time horizon G). The Exchange sought to identify price jumps following a PBBO update, whether positive or negative. A price jump is marked at a given point in time if, looking back to the start of the time horizon, the mid-price was at least the spread threshold in difference from the current mid-price. This approach identifies discrete price jumps over configurable time intervals, thereby offering the Exchange flexibility to adjust the spread threshold and/or time horizon parameters according to symbol-specific dynamics.¹¹

To build the SMI as a continuous signal of market instability, the Exchange next applied the price jump definition to delineate continuous periods of market instability. At each PBBO update (at index time i), the Exchange determined whether there had been a price jump. If there was no price jump, the market would be considered stable. If there was a price jump, the Exchange continued to look for price jumps within the time horizon G , until no price jump occurred. At that point, the Exchange would mark an unstable time window starting at the PBBO update that occurred at $i-1$ or 50 microseconds prior to the PBBO update at time i , whichever is closest to i , and ending at the last price jump identified.¹²

Finally, the Exchange employed an additional parameter for a minimum time increment g to establish that unstable windows identified using the spread threshold and time horizon parameters are indicative of persistent

price instability. If multiple price jumps occur within a small timeframe, such that the distance between the first and last price jumps is less than g , the Exchange would not mark the window as unstable. The application of the minimum time increment parameter allows the Exchange to more accurately identify true periods of instability by filtering out temporary price jumps that are quickly followed by a reversion to the price prior to the observed price jump.¹³

In developing the SMI to facilitate the SeMi Order’s ability to provide protection against potentially unfavorable executions, the Exchange also wanted to be able to differentiate between quote instability on the bid side and ask side. For example, the Exchange would not want to prevent executions of buy orders based on upwards instability of the mid-price of the PBBO because executions under those conditions would likely be favorable. Accordingly, if the mid-price of the PBBO is higher at the end of an unstable window, the Exchange would only mark PBBO updates during such window as unstable for the ask side (and vice versa for the bid side).

Model Development

To develop and train the models underlying the SMI, the Exchange used data from the NYSE Arca Book from August 29, 2024 through October 22, 2024 for a set of 500 symbols selected to reflect a representative sample of the U.S. equity markets.¹⁴ The Exchange created evaluation data points for each PBBO update that include the closest book depth state at the time of that update. This merged data set of PBBO updates and book depth data has the benefit of the information from both types of data without overinflating the size of the data set. All features and parameters used by the models are calculated based on this merged data set.

The Exchange identified a set of features based on NYSE Arca Book data—*e.g.*, book depth information, PBBO updates, number of IOC orders—that would contribute to the models. The Exchange selected 83 unique

features that could be considered for incorporation into the model.¹⁵ These features were identified based on an iterative process, and features were selected based on their ability to explain unstable periods identified by the application of the parameters discussed above and, going forward, to predict market instability on a real-time basis so that the SMI can effectively protect SeMi Orders from potentially unfavorable executions. In production, the Exchange proposes to select a subset of these 83 features to be weighted in the model’s assessment of market instability (rather than having the model utilize all available features), because focusing on the features that have been identified as most important in predicting market instability for a given symbol would both optimize prediction accuracy and processing speed.¹⁶

Symbol-Specific Models

The Exchange proposes that the SMI will rely on symbol-specific models to leverage the ability of the models to incorporate different features and weightings to respond to individual symbols’ unique profiles (*e.g.*, the features most likely to accurately predict instability for a given symbol). To explore how symbol-specific models should be distributed, the Exchange ranked each of the 500 symbols in the representative data set according to the total number of unstable data points. The Exchange trained a model for each of the 500 symbols and used the model trained for the symbol SPY as a default “market model.”

The Exchange found that the SMI performed better with a symbol-specific model for more active symbols (*i.e.*, those with more unstable data points) than on the market model (*i.e.*, testing showed sharp declines in precision and increases in overlocking behavior using the market model), whereas the SMI with a market model performed well for less active symbols (*i.e.*, high recall with relatively small loss of precision and minimally more overlocking). The Exchange concluded that, for the SMI to provide optimal information and protection to SeMi Orders, more active symbols would benefit significantly from symbol-specific models, while less active symbols (which have fewer unstable data points to inform a symbol-

¹¹ Figure 1 in Section 4.1 of the White Paper provides a detailed example of how a price jump is calculated.

¹² Figure 2 in Section 4.2 of the White Paper provides an example of the identification of unstable windows.

¹³ Figure 3 in Section 4.2 of the White Paper demonstrates the operation of the minimum time increment parameter.

¹⁴ The full symbol list is included in Appendix B of the White Paper. Symbols were chosen based on criteria including absolute price level, spread in dollars, spread in basis points, and liquidity (daily ADV). Because stable periods generally far outnumber unstable periods in the U.S. equity markets, the Exchange used under-sampling methods where appropriate to reduce the number of stable data points in the data set and randomly shuffled data before training.

¹⁵ The full list of features is included in Appendix A to the White Paper. Appendix A also identifies the subset of features that were selected for the model training described in the White Paper.

¹⁶ Once the SMI is implemented in production, the full list of features currently calculated in real-time and available for evaluation for inclusion in the SMI models will be published daily on the Exchange’s website.

specific model) could successfully default to a market model.

The Exchange believes that models tailored to individual symbols' specific characteristics would provide for better performance by the SMI and thus enhanced price protection by the SeMi Order. Accordingly, in production, the Exchange anticipates that at least 200 (and up to approximately 1,000) symbols that trade on the Exchange will have an individualized model that incorporates features that have been specifically identified for predicting market stability for that symbol. The remaining symbols that trade on the Exchange would use the market model, which would apply the same features and weightings for all symbols.¹⁷ Each day, the Exchange will identify the 1,000 symbols with most unstable data points and evaluate those symbols to determine whether a symbol-specific model or market model would yield better performance. The Exchange will publish on its website a list of the symbols that have an individual model to provide transparency to market participants regarding the operation of SeMi Orders.

Performance Metrics

The Exchange strategically prioritized developing the models to have a high rate of recall, which was intended to maximize the models' ability to accurately capture unstable PBBO updates while accepting that the models might identify more periods of instability than would exist in realistic market conditions. The Exchange focused on three metrics: (1) recall, or the model's ability to accurately identify true unstable data points; (2) precision, or the model's ability to identify only true unstable data points (*i.e.*, to not misidentify stable data points as unstable); and (3) overlocking, or the model's ability to minimize the amount of time (measured in seconds) that the model incorrectly predicts unstable market conditions.¹⁸ The Exchange intends for the models to maximize recall and precision, while minimizing overlocking.

To evaluate the performance of the models, the Exchange selected initial baseline values for each the three parameters X , G , and g to maximize these performance metrics. To define an

unstable PBBO period, the Exchange selected a minimum time increment g of 100 microseconds; spread threshold X of 25%; and time horizon G of one millisecond.¹⁹

In final performance testing of the model, the aggregate results demonstrate that the model achieves an average recall rate or 90% and average precision of 30%, with overlocking occurring for an additional 3.8 seconds on average.²⁰

Production Integration

The models' compact size and average prediction speed of approximately two microseconds allows for seamless integration of the model's prediction process into the NYSE Pillar trading platform ("Pillar") on which the Exchange operates.²¹ The Exchange believes that it has designed the SMI to produce an output rapidly enough to keep up with real-time trading, without overburdening Exchange systems or otherwise impacting current system performance.

Pillar will have access to full real-time trading data and will continuously maintain required features for the model, including PBBO updates, order entries, order cancellations, and book depth information. The models are invoked as soon as an evaluation trigger (*e.g.*, a PBBO update) is received.²² The evaluation process concludes by sending a message the Pillar matching engine to indicate the beginning and end of an unstable period, which would inform whether SeMi Orders are eligible to trade. For example, when Pillar receives a SeMi Order, the SMI will indicate whether the market is stable or unstable. If the market is stable, the SeMi Order will be allowed to post to the NYSE Arca Book and trade. If the market is unstable, the order will be prevented from trading until the SMI

next predicts that the market is stable. For as long as the SMI predicts that the market will be unstable, a SeMi Order will remain ineligible to trade and will not execute until the SMI evaluates the market as stable.

On a given trading day, the SMI models will use the feature weights determined from the previous night's training, and the features will be calculated using real-time intraday data. The list of symbols with individualized models will be dynamically constructed daily and published before the start of trading each day.

The model will not change intra-day. The Exchange proposes to continue to retrain the model within the parameters described in this filing and the White Paper daily, outside of the Core Trading Session (on days when trading takes place on the Exchange). Retraining will be based on the last three trading days' worth of historical data. Retraining may result in changes to the features used by the model and/or the weighting of such features. The values assigned to the three parameters X , G , and g will not be adjusted as a result of regular model training but may be updated periodically based on the Exchange's analysis of overall model performance. Retraining is a standard and accepted process in the use of machine learning models like the ones underlying the SMI. The retraining process is not intended to result in significant or unexpected changes to the performance of the SMI or the behavior of the SeMi Order. Rather, retraining would help ensure that the SMI continues to perform well in dynamic circumstances, by allowing the models to learn from and incorporate more recent data points and would facilitate improved model performance over time. The Exchange also notes that retraining would build on the models' existing state (*i.e.*, existing data inputs and knowledge base) and would not alter the model's objectives; retraining would result in new behaviors only to the extent that the model had not previously encountered a given scenario, and even then, any new behavior would be consistent with the model's objectives. If the Exchange determines that a retrained model would not be as successful as an existing model in achieving its objectives based on the metrics defined above, the Exchange will not implement the retrained model in production.

The Exchange will file a subsequent proposed rule change if it seeks to modify the underlying structure of the models underlying the SMI, such as the parameters X , G , and g used to label unstable windows or new features that

¹⁷ The Exchange proposes that a new symbol will operate on the market model until the Exchange has gathered at least three days' worth of data to be able to train a symbol-specific model and determine whether it outperforms the market model for that symbol.

¹⁸ Recall, precision, and overlocking are discussed in more detail in Section 6.1 of the White Paper.

¹⁹ The analysis the Exchange performed to arrive at these parameter values is discussed in more detail in Section 6.2 of the White Paper. The Exchange expects that the parameter values may change over time to ensure proper calibration. The Exchange anticipates implementing the SMI in production with these parameter values, but will continue to analyze data and train the models until the date of implementation and may update these values to the extent that its analysis suggests that different values would improve performance.

²⁰ Additional discussion of the Exchange's performance testing of the models appears in Section 6.4 of the White Paper.

²¹ Section 7 of the White Paper discusses the Exchange's analysis of the model's prediction time in more detail, as well as the integration of the model into the Pillar platform (*see* Figure 9).

²² In addition to PBBO updates, Pillar will respond to a timer-based evaluation trigger. The timer-based trigger is intended to ensure that the model remains updated when the NYSE Arca Book changes in the absence of a PBBO update (such as when non-displayed liquidity is added to the NYSE Arca Book).

could be incorporated into the models, but will not seek Commission approval prior to retraining the models to adjust the weighting of features that have been disclosed as potential inputs for the models or modifications to the value of any of the three identified parameters. The Exchange will also retain copies of each historical iteration of the models as part of its books and records and will make such records available to the Commission upon request. The Exchange will also publish a Trader Update in advance of implementing a retrained version of the SMI models when the Exchange has a reasonable belief that the retrained version(s) would yield results that differ materially from the prior version(s).

* * * * *

Because of the technology changes associated with this proposed rule change, the Exchange will announce the implementation of this change by Trader Update. Subject to approval of this rule filing, the Exchange is prepared to implement the proposed rule change in 2025.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,²³ in general, and furthers the objectives of Section 6(b)(5),²⁴ in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that the proposed change to eliminate the DPO and introduce the SeMi Order would remove impediments to, and perfect the mechanism of, a free and open market and a national market system, as well as protect investors and the public interest, by continuing to provide market participants with the benefits of an order type that can exercise discretion to trade with contra-side interest. The SeMi Order will operate in a substantially similar manner to the existing DPO, with the benefit of the SMI to provide price protection to SeMi Orders during periods of market instability. The Exchange also believes that the proposed rule change would remove impediments to, and perfect the mechanism of, a free and open market

and a national market system and protect investors and the public interest because the SMI would provide improved functionality as compared to the regression model previously used by the DPO to predict market instability, which used static parameters for all symbols. Specifically, the Exchange believes that the SMI would provide enhanced price protection for SeMi Orders because its fast, lightweight, and transparent models can be seamlessly integrated into Pillar to predict future microsecond-level market stability on a symbol-specific basis. The Exchange believes that SeMi Orders, as proposed, would perfect the mechanism of, a free and open market and a national market system and protect investors and the public interest by relying on the SMI to restrict SeMi Orders from trading during times of predicted high market volatility, thereby avoiding potentially undesirable executions and increasing the potential for price improvement for such orders at the cost of slightly reduced fill rates.

The Exchange further believes that the proposed change to allow SeMi Orders to be designated as Liquidity Providing (an option that was not previously available to DPOs) would remove impediments to, and perfect the mechanism of, a free and open market and a national market system and protect investors and the public interest because it would afford increased flexibility to users of the order type.

The Exchange believes that the proposed change would remove impediments to, and perfect the mechanism of, a free and open market and a national market system and promote just and equitable principles of trade because the SeMi Order and SMI will operate within strict, well-defined, and transparent parameters. Although the SMI models will undergo daily retraining (outside of market hours), such retraining will aim to improve the performance of the SMI in achieving its stated objectives; retraining is not intended to alter the basic design parameters, features, or objectives of the models without prior Commission approval.²⁵ Moreover, the Exchange will not deploy a retrained model if it fails to achieve performance improvements based on the metrics described above. As noted above, a list of all features that may be incorporated in the models will

²⁵ As discussed above, the Exchange will not seek Commission approval prior to allowing the models, as part of its retraining process, to vary the weighting of the features it uses. The Exchange believes this is appropriate because such variance will only occur to the extent that it will improve a model's performance with respect to pre-defined objectives.

be publicly available, and the Exchange will publish on its website daily the full list of features used for real-time calculation and available for inclusion in the SMI models. The Exchange will also retain each historical iteration of models employed by the SMI as part of its books and records and make such information available to the Commission upon request. The Exchange will also publish a Trader Update in advance of implementing a retrained version of an SMI model when the Exchange has a reasonable belief that the retrained version(s) would yield results that differ materially from the prior version(s).

The Exchange notes that neither the SMI nor the SeMi Order are designed or intended to further the performance of any participant or any category of participant over others. The Exchange believes the models underlying the SMI are objective and designed to avoid bias and discrimination. Use of the SeMi Order (like use of the DPO) remains voluntary for all market participants. Accordingly, if any market participant feels that the SeMi Order does not meet their needs, they are free to pursue other trading strategies.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that the proposed change would promote competition by offering market participants the optional use of an order type designed to protect against potentially undesirable executions by preventing trading during periods of market instability as identified by the SMI.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

²³ 15 U.S.C. 78f(b).

²⁴ 15 U.S.C. 78f(b)(5).

- A. by order approve or disapprove such proposed rule change, or
- B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSEARCA-2024-112 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NYSEARCA-2024-112. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSEARCA-2024-112 and should

be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁶

Vanessa A. Countryman,
Secretary.

[FR Doc. 2024-30916 Filed 12-27-24; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101993; File No. SR-FINRA-2024-022]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing of a Proposed Rule Change To Amend the Codes of Arbitration Procedure To Make Clarifying, Technical, and Procedural Changes to the Arbitrator List Selection Process

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act" or "Exchange Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 19, 2024, the Financial Industry Regulatory Authority, Inc. ("FINRA") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by FINRA. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to amend the Code of Arbitration Procedure for Customer Disputes ("Customer Code") and the Code of Arbitration Procedure for Industry Disputes ("Industry Code") (together, "Codes") to make changes to certain provisions relating to arbitrator list selection.

The proposed rule change would amend FINRA Rules 12403 (Cases with Three Arbitrators) and 13403 (Generating and Sending Lists to the Parties) to increase the opportunity for public arbitrators who are not qualified to serve as chairpersons³ to be selected by a computer algorithm, known as the "list selection algorithm," for the list of arbitrators that is sent to the parties in

certain customer and industry disputes that have a three-arbitrator panel.

In addition, the proposed rule change would make changes to the Codes that are consistent with FINRA's focus on increasing the transparency of arbitrator list selection and with current practices that were developed to efficiently administer arbitrator list selection. Specifically, the proposed rule change would amend FINRA Rule 12402 (Cases with One Arbitrator), FINRA Rule 12403 (Cases with Three Arbitrators), FINRA Rule 13403 (Generating and Sending Lists to the Parties), FINRA Rules 12404 and 13407 (Additional Parties), FINRA Rule 13404 (Striking and Ranking Arbitrators), FINRA Rules 12407 and 13410 (Removal of Arbitrator by Director), and FINRA Rule 13804 (Temporary Injunctive Orders; Requests for Permanent Injunctive Relief). The proposed rule change also would make non-substantive, technical changes to FINRA Rules 13406 (Appointment of Arbitrators; Discretion to Appoint Arbitrators Not on List) and 13411 (Replacement of Arbitrators) to update cross-references in those rules.

The text of the proposed rule change is available on FINRA's website at <http://www.finra.org>, at the principal office of FINRA and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

I. Overview of FINRA's Arbitrator List Selection Process

Decisions in the FINRA Dispute Resolution Services ("DRS") arbitration forum are made by independent arbitrators.⁴ To ensure fairness to all

⁴ As a neutral administrator of the arbitration forum, DRS does not participate in the decision-making process by arbitrators. DRS maintains a roster of over 8,300 arbitrators. See FINRA, Arbitration and Mediation, Dispute Resolution

²⁶ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See *infra* note 9 and accompanying text.

parties during arbitrator list selection, FINRA uses a computer algorithm, known as the list selection algorithm, to generate lists of arbitrators on a random basis from its rosters of arbitrators for the selected hearing location.⁵ DRS maintains three rosters of arbitrators: public arbitrators, non-public arbitrators, and arbitrators who are eligible to serve as chairperson of a panel.⁶ In general, a public arbitrator is a person who is otherwise qualified to serve as an arbitrator and is not disqualified from service as a public arbitrator due to their current or past ties to the financial industry.⁷ A non-public arbitrator is a person who is otherwise qualified to serve as an arbitrator and is disqualified from service as a public arbitrator due to their current or previous association with the financial industry.⁸ An arbitrator is eligible to serve as a chairperson if they have completed FINRA's chairperson training and (1) have a law degree and are a member of a bar of at least one jurisdiction and have served as an arbitrator through award on at least one arbitration administered by a self-regulatory organization ("SRO") in which hearings were held; or (2) have served as an arbitrator through award on at least three arbitrations administered by an SRO in which hearings were held.⁹

The number and composition of the arbitrator lists that are generated using the list selection algorithm varies depending on the nature of the dispute and whether it will be heard by a panel of three arbitrators or by a single arbitrator. With respect to both customer disputes with three arbitrators and industry disputes involving associated persons with three arbitrators¹⁰—the two types of disputes affected by the proposed amendments to the procedures for generating lists of public arbitrators—DRS uses the list selection algorithm to generate three lists: (1) a list of 10 public arbitrators from the

FINRA chairperson roster ("Chairperson List"); (2) a list of 15 arbitrators (in customer disputes) or 10 arbitrators (in industry disputes involving associated persons) from the FINRA public arbitrator roster ("Public List"); and (3) a list of 10 arbitrators from the FINRA non-public arbitrator roster ("Non-Public List").¹¹

Once the lists of arbitrators are generated,¹² the Director¹³ sends the lists to the parties.¹⁴ The parties then select their arbitrators through a process that involves striking and ranking the arbitrators on the lists, which is described in more detail in Section III below in connection with the discussion of the proposed amendments to increase the transparency of the arbitrator selection process.¹⁵

II. Proposed Amendments to the Procedures for Generating Public Lists

Currently, under the Codes, when generating the three lists of arbitrators to send to the parties in both customer disputes with three-person panels and industry disputes involving associated persons with three-person panels, the list selection algorithm will first generate a Chairperson List from FINRA's roster of chair-qualified public arbitrators.¹⁶ When the list selection algorithm selects the chair-qualified public arbitrators for the Chairperson List for an arbitration, those chair-qualified public arbitrators will not be eligible to be selected for a Public List for the arbitration and, therefore, will be automatically removed from the list selection algorithm before the Public

List is generated for the arbitration.¹⁷ However, the chair-qualified public arbitrators who are not selected by the list selection algorithm for the Chairperson List for an arbitration will be eligible to be selected for the Public List for the arbitration.¹⁸ Thus, chair-qualified public arbitrators have two chances to be selected for lists for an arbitration: they may be selected for the Chairperson List, and if they are not selected for the Chairperson List, they may be selected for the Public List.¹⁹

Public arbitrators who are not chair-qualified do not have the same opportunity. Rather, public arbitrators who are not chair-qualified can only be selected for a Public List and, therefore, have only one chance to be selected for a list of arbitrators. As a result, public arbitrators who are not chair-qualified are less likely to be selected for a list than chair-qualified public arbitrators, even though the number of public arbitrators who are not chair-qualified greatly exceeds the number of chair-qualified public arbitrators.²⁰

To address this imbalance and increase the opportunity for public arbitrators who are not chair-qualified to be selected for the Public List, the proposed rule change would amend FINRA Rules 12403(a)(3) and 13403(b)(4) to provide that, in preparing the Public List, the list selection algorithm will provide two chances for selection to public arbitrators who are not chair-qualified, and will continue to provide one chance for selection to chair-qualified public arbitrators.²¹ The procedures for generating the Public List would not otherwise be modified under the proposed rule change.

FINRA believes it is appropriate to address this imbalance and increase the opportunity for public arbitrators who are not chair-qualified to be selected for Public Lists. By providing an additional

¹¹ See FINRA Rules 12403(a)(1) and 13403(b)(2).

¹² The list selection algorithm will automatically exclude arbitrators from the lists based upon current conflicts of interest identified within the list selection algorithm. See FINRA Rules 12402(b)(2), 12403(a)(3), 13403(a)(4), and 13403(b)(4). In addition, DRS conducts a review for other conflicts not identified within the list selection algorithm. See FINRA Rules 12402(b)(3), 12403(a)(4), 13403(a)(5), and 13403(b)(5). If any arbitrators are removed due to such conflicts, the list selection algorithm is used to generate replacement arbitrators. See FINRA Rules 12402(b)(3), 12403(a)(4), 13403(a)(5), and 13403(b)(5).

¹³ The term "Director" means the Director of DRS. Unless the Code provides that the Director may not delegate a specific function, the term includes FINRA staff to whom the Director has delegated authority. See FINRA Rules 12100 (m) and 13100(m).

¹⁴ See FINRA Rules 12403(b) and 13403(c).

¹⁵ See *infra* Section A.1.III. ("Proposed Amendments to Increase the Transparency of the Arbitrator Selection Process"); see also FINRA Rules 12400(a), 12403(c)-(e), 13400(a), 13404, 13405, and 13406. FINRA notes that the proposed rule change would impact all members, including members that are funding portals or have elected to be treated as capital acquisition brokers ("CABs"), given that the funding portal and CAB rule sets incorporate the impacted FINRA rules by reference.

¹⁶ See FINRA Rules 12403(a)(2) and 13403(b)(3).

¹⁷ See FINRA Rules 12403(a)(2) and 13403(b)(3).

¹⁸ See FINRA Rules 12403(a)(2) and 13403(b)(3).

¹⁹ An individual arbitrator cannot be selected for both the Chairperson List and the Public List for the same case. See FINRA Rules 12403(a)(2) and 13403(b)(3).

²⁰ See *infra* Section B.ii. (Economic Baseline).

²¹ See proposed FINRA Rules 12403(a)(3) and 13403(b)(4). The list selection algorithm would affect the proposed rule change by including the names of public arbitrators who are not chair-qualified twice on the roster of available public arbitrators used to randomly generate a Public List. For more information on how the list selection algorithm currently generates a Public List, see <https://www.finra.org/arbitration-mediation/about/arbitration-process/arbitrator-selection>. Although the proposed rule change would give public arbitrators who are not chair-qualified two chances to be selected for a Public List, proposed FINRA Rules 12403(a)(3) and 13403(b)(4) would provide that an individual arbitrator cannot appear more than once on the Public List selected for the same case.

Statistics, <https://www.finra.org/arbitration-mediation/dispute-resolution-statistics>; FINRA, Arbitration and Mediation, Become an Arbitrator, <https://www.finra.org/arbitration-mediation/become-arbitrator>.

⁵ See FINRA Rules 12400(a) and 13400(a).

⁶ See FINRA Rules 12400(b) and 13400(b).

⁷ See FINRA Rules 12100(aa) and 13100(x).

⁸ See FINRA Rules 12100(t) and 13100(r).

⁹ See FINRA Rules 12400(c) and 13400(c).

¹⁰ The panel will consist of three arbitrators in both customer and industry disputes when (1) the amount of the claim is more than \$50,000 but not more than \$100,000, exclusive of interest and expenses, and the parties agree in writing to three arbitrators; or (2) the amount of the claim is more than \$100,000, exclusive of interest and expenses, is unspecified, or the claim does not request money damages, unless the parties agree in writing to one arbitrator. See FINRA Rules 12401 and 13401.

opportunity to be selected for Public Lists, the proposed rule change may increase the likelihood for public arbitrators who are not chair-qualified to be selected by parties to serve as panelists, which could help FINRA retain these arbitrators on its roster. FINRA has observed that parties appear to prefer chair-qualified public arbitrators who have experience in the DRS arbitration forum and a record of previous arbitration award outcomes. If arbitrators who are new to the roster or have less experience in the forum are never selected by parties to serve as panelists, they may lose interest in serving as arbitrators in the DRS arbitration forum. The proposed rule change could help incent new or less experienced public arbitrators to remain on FINRA's arbitrator roster by providing a higher likelihood of selection by the parties as a panelist than currently exists under the Codes.²²

The proposed rule change also may help FINRA increase the roster of chair-qualified public arbitrators. By increasing the opportunity for public arbitrators who are not chair-qualified to be selected by the parties to serve as panelists, the proposed rule change would help these arbitrators to gain the experience they need to become chair-qualified. This, in turn, could help FINRA increase the number of local chairpersons across hearing locations.²³ Parties generally prefer chair-qualified public arbitrators who live near their hearing location and who are more likely to be familiar with local laws and customs. However, 78 percent of hearing locations lack a sufficient number of local chairpersons to generate enough arbitrators for Chairperson Lists, which means that the list selection algorithm must often generate lists that include chair-qualified public arbitrators from other hearing locations.²⁴ In over half of these hearing locations, the roster of local chair-qualified public arbitrators could be filled by non-chair-qualified public arbitrators if they became chair-qualified. By increasing the number of local chairpersons, the list selection algorithm would be able to generate Chairperson Lists that include more local chair-qualified public arbitrators to address parties' preferences.

III. Proposed Amendments To Increase the Transparency of the Arbitrator Selection Process

FINRA is also proposing to codify certain practices that DRS has

developed to efficiently administer arbitrator list selection, establish new timeframes for objecting to requests for additional information from arbitrators, withdrawing such requests for additional information, and filing motions to remove arbitrators after disclosures of causal challenges, and align provisions of the Codes related to the expungement of customer dispute information. These proposed amendments are explained in detail below.

A. Shortening the Time for Sending Arbitrator Lists to Parties

FINRA Rules 12402(c)(1), 12403(b)(1), and 13403(c)(1) currently provide that the Director will send lists of arbitrators generated by the list selection algorithm to all parties at the same time, within approximately 30 days after the last answer is due, regardless of the parties' agreement to extend any answer due date. In practice, however, DRS sends lists of arbitrators to the parties well within the 30-day timeframe provided by the rules.

To align FINRA Rules 12402(c)(1), 12403(b)(1), and 13403(c)(1) with current practice, which, in turn, would increase transparency and efficiency in arbitrator list selection, FINRA is proposing to decrease the number of days within which the Director sends the lists to the parties from 30 days to 20 days. Specifically, under the proposed rule change, FINRA Rules 12402(c)(1), 12403(b)(1), and 13403(c)(1) would be amended to provide that the Director will send the lists generated by the list selection algorithm to all parties at the same time, within approximately 20 days after the last answer is due, regardless of the parties' agreement to extend any answer due date.

B. Providing Arbitrator Disclosure Reports to Parties

FINRA Rules 12402(c)(1), 12403(b)(1), 12404(a), 13403(c)(1), 13407(a), and 13804(b)(3)(A)(i) and (B)(i) currently provide that when the Director sends lists of arbitrators to the parties, the parties will also receive employment history for the past 10 years and other background information for each arbitrator listed. In practice, however, DRS requests from arbitrators their full employment history after the completion of their education, and it sends this employment history and other background information to the parties in a document that DRS refers to as a "disclosure report."

To align FINRA Rules 12402(c)(1), 12403(b)(1), 12404(a), 13403(c)(1), 13407(a), and 13804(b)(3)(A)(i) and (B)(i) with current practice and increase

transparency, the proposed rule change would remove the language stating that the parties will be provided with each arbitrator's employment history only "for the past 10 years." These same rules would be amended to clarify that an arbitrator's employment history and other background information will be provided to the parties in a document called a "disclosure report."

C. Requesting Additional Information About Arbitrators

FINRA Rules 12405(a) and 13408(a) impose upon each arbitrator an obligation to make a reasonable effort to learn of, and disclose to DRS, any circumstances that might preclude the arbitrator from rendering an objective and impartial determination in a proceeding. This obligation to disclose interests, relationships, or circumstances that might preclude an arbitrator from rendering an objective and impartial determination is continuous, requiring an arbitrator who accepts appointment to an arbitration proceeding to disclose to DRS and the parties, at any stage of the proceeding, any such interests, relationships or circumstances that arise, or that the arbitrator recalls or discovers.²⁵

In addition to imposing these affirmative disclosure obligations on arbitrators, paragraph (c)(2) of FINRA Rules 12402 and 13403 and paragraph (b)(2) of FINRA Rule 12403 provide that if a party requests additional information about an arbitrator, the Director will request the additional information from the arbitrator, and will send any response to all of the parties at the same time.²⁶ Because these provisions appear in parts of the Codes that focus on the appointment of arbitrators, however, FINRA is concerned that they could be misinterpreted as only allowing parties to request additional information about arbitrators prior to panel appointment. In practice, DRS permits the parties to request additional information about an arbitrator at any point during the arbitration proceeding. If an opposing

²⁵ See FINRA Rules 12405(b) and 13408(b).

²⁶ FINRA is proposing to move this language to new paragraphs (c)(2)(D) of FINRA Rule 12402, (b)(2)(D) of FINRA Rule 12403, and (c)(2)(D) of FINRA Rule 13403, without any substantive changes. FINRA Rules 12402(c)(2), 12403(b)(2), and 13403(c)(2) also currently provide that when a party requests additional information, the Director may, but is not required to, toll the time for parties to return the ranked lists. FINRA is proposing to move this language to new paragraphs (c)(2)(E) of FINRA Rule 12402, (b)(2)(E) of FINRA Rule 12403, and (c)(2)(E) of FINRA Rule 13403, without any substantive changes. These technical changes would result from the proposed rule changes discussed below, which would create new subparagraphs under these rules.

²² See *infra* Section B.iii. (Economic Impact).

²³ See *infra* Section B.iii. (Economic Impact).

²⁴ See *infra* Section B.iii. (Economic Impact).

party does not object to the request for additional information, DRS will permit the request for additional information to be submitted to the arbitrator anonymously. If there is an objection, however, DRS will disclose to the arbitrator the identity of the party submitting the request and forward any requests and objections to the arbitrator who is the subject of the request.

The proposed rule change would align the Codes to DRS's current practice of allowing requests for additional information about an arbitrator at any stage of the proceeding. Specifically, the proposed rule change would amend FINRA Rules 12402, 12403, and 13403 to add new paragraphs (c)(2)(A), (b)(2)(A), and (c)(2)(A), respectively, to provide that a party may request additional information about an arbitrator "at any stage of the proceeding" by filing with the Director and serving all other parties with a written request.

FINRA believes it is appropriate to permit parties to request additional information about arbitrators at any stage of the proceeding because such requests could uncover circumstances that might preclude an arbitrator from rendering an objective and impartial decision. Although, as explained above, arbitrators have a continuing duty to disclose potential conflicts,²⁷ allowing the parties to request additional information at any stage of the proceeding complements arbitrators' continuing duty to disclose, further ensures the integrity of final awards, and helps to minimize the number of requests for vacatur based on an arbitrator's failure to disclose. Additionally, because DRS currently allows parties as a matter of practice to make requests for additional information at any stage of the proceeding, the proposed rule change would align the Codes to increase transparency and ensure that all parties are aware of their ability to request additional information about arbitrators at any stage of the proceeding.

The proposed rule change also would align the Codes to DRS's current practice of preserving the anonymity of parties who request additional information about arbitrators, unless an opposing party objects to the request for additional information within the specified timeframe. Specifically, the proposed rule change would provide in new paragraphs (c)(2)(A), (b)(2)(A), and (c)(2)(A) of FINRA Rules 12402, 12403, and 13403, respectively, that a written request for additional information about an arbitrator may omit any information

that would reveal the identity of the party making the request. The proposed rule change would further amend FINRA Rules 12402, 12403, and 13403 to add new paragraphs (c)(2)(C), (b)(2)(C), and (c)(2)(C), respectively, to provide that, if no opposing party objects to the request for additional information, the Director and the parties shall not disclose the identity of the requesting party to the arbitrator. FINRA believes it is appropriate to preserve the confidentiality of the requesting parties' identities to minimize any potential bias. However, when any opposing parties object to requests, FINRA believes it is then appropriate to disclose the requesting parties' identities to minimize the risk of any potential bias shifting to the opposing parties. Opposing parties have expressed concerns that an arbitrator or panel may erroneously attribute requests for additional information to opposing parties and make negative inferences against the opposing parties based on the request. Moreover, in cases involving only two parties, opposing parties may choose to file objections to requests that disclose their identities, which would result in the arbitrator or panel being able to identify the requesting party by process of elimination.

Finally, to increase efficiency in arbitrator list selection, the proposed rule change would establish new timeframes for an opposing party to object to a party's request for additional information, and for the Director to forward the request together with any objections to the arbitrator who is the subject of the request. In addition, the proposed rule change would make clear that the requesting party may withdraw their request for additional information prior to the Director forwarding the request and any objections to the arbitrator. Specifically, paragraphs (c)(2)(B), (b)(2)(B), and (c)(2)(B) of FINRA Rules 12402, 12403, and 13403, respectively, would be amended to provide that: (i) within ten days of receipt of the request for additional information, an opposing party may object to the request by filing objections with the Director and serving the objections on all other parties; and (ii) after five days have elapsed from the service of any objections and provided that the request for additional information has not been withdrawn, the Director will forward the request together with any objections to the arbitrator who is the subject of the request.

FINRA believes it is important for the proposed rules to establish timeframes for objecting to requests for additional

information and for withdrawing requests for additional information, so that the parties are aware of their ability to object to or to withdraw a request and the timeframes for doing so. Further, FINRA believes that the proposed ten days for an opposing party to object to a request for additional information, and the five days for a requesting party to withdraw a request for additional information following an objection, would help ensure that the arbitrator list selection process and the arbitration proceedings are efficient.

D. Allowing Parties to Strike Arbitrators From Lists for Any Reason

Once the parties receive the lists of arbitrators generated by the list selection algorithm, they have the opportunity to strike a certain number of arbitrators, as set forth in FINRA Rules 12402(d)(1), 12403(c)(1)(A), 12403(c)(2)(A), and 13404(a) and (b).²⁸ In describing the striking process, FINRA Rules 12402(d)(1), 12403(c)(2)(A), and 13404(a) and (b) provide that each separately represented party may strike arbitrators from lists "for any reason." Although Rule 12403(c)(1)(A) also describes the arbitrator striking process, unlike the other rules related to the striking process, it does not expressly provide that each separately represented party may strike arbitrators from the list "for any reason," even though there are no limitations on the reasons a party may strike an arbitrator. To make the provisions describing the striking process consistent, the proposed rule change would amend FINRA Rule 12403(c)(1)(A) to expressly provide that each separately represented party may strike any or all of the arbitrators from the Non-Public List *for any reason*.

E. Conducting List Selection Electronically

FINRA Rules 12402(d)(1), 12403(c)(1)(A) and (c)(2)(A), and

²⁸ See FINRA Rule 12402(d)(1) (allowing each separately represented party in a customer dispute with one arbitrator to strike up to four of the arbitrators from the list); FINRA Rule 12403(c)(1)(A) (allowing each separately represented party in a customer dispute with three arbitrators to strike any or all of the arbitrators from a Non-Public List); FINRA Rule 12403(c)(2)(A) (allowing each separately represented party in a customer dispute with three arbitrators to strike up to four of the arbitrators from a Chairperson List and up to six of the arbitrators from a Public List); FINRA Rule 13404(a) (allowing each separately represented party in an industry dispute to strike up to four of the arbitrators from each list, except for lists generated, pursuant to FINRA Rule 13403(a)(2), in disputes between members with a panel of three non-public arbitrators); and FINRA Rule 13404(b) (allowing each separately represented party in a dispute between members with a panel of three non-public arbitrators to strike up to eight of the arbitrators from a Non-Public List and up to four of the arbitrators from a non-public Chairperson List).

²⁷ See FINRA Rules 12405(b) and 13408(b).

13404(a) and (b) currently provide that each separately represented party may strike arbitrators from the list or lists of arbitrators “by crossing through the names of the arbitrators.” In practice, however, parties generally use the Party Portal, the web-based system that is accessible by arbitration and mediation parties and their representatives, to complete arbitrator list selection electronically.²⁹ To update the Codes and align them with the method by which parties generally select arbitrators, the proposed rule change would amend FINRA Rules 12402(d)(1), 12403(c)(1)(A) and (c)(2)(A), and 13404(a) and (b) to remove the phrase “by crossing through the names of the arbitrators.”

FINRA is aware that FINRA Rule 12300(a)(2) permits *pro se* customers to opt out of using the Party Portal. As a result, these parties may receive hard copy lists of arbitrators that would require them to manually strike names. However, FINRA believes that, even as amended to remove the phrase “by crossing through the names of the arbitrators,” FINRA Rules 12402(d)(1), 12403(c)(1)(A), and 12403(c)(2)(A) are broad enough to appropriately instruct *pro se* customers on how to strike arbitrators manually from hard copy lists.³⁰

F. Extensions of Time To Complete Ranked Lists

FINRA Rules 12402(d)(3), 12403(c)(3), 12404(a), 13404(d), and 13407(a) currently provide that, after striking arbitrators and ranking the remaining arbitrators according to preference, each separately represented party must complete and return their ranked lists to the Director (generally via the Party Portal)³¹ either within 20 days or no more than 20 days after the date upon which the Director sent the lists to the parties.³² If the Director does not receive

a party's ranked list within that time, the Director will proceed as though the party did not want to strike any arbitrator or have any preferences among the listed arbitrators. However, FINRA has observed that parties frequently file requests with the Director to extend the 20-day deadline only after it has elapsed. Though FINRA Rules 12207(c) and 13207(c) provide that the Director may extend or modify any deadline or time period set by the Code for good cause, in practice, the Director typically declines a party's request for an extension of time to complete the ranked list(s) when such request is filed after the 20-day deadline has elapsed, absent a showing of extraordinary circumstances.

In its cover letters to parties that accompany the lists of arbitrators, DRS currently advises parties of the due date for the ranked lists. In addition, the language in these cover letters provides that if the Director does not receive the party's ranked lists on or before the due date, the party will be deemed to have accepted all arbitrators on the lists.

FINRA is proposing to align FINRA Rules 12402(d)(3), 12403(c)(3), 12404(a), 13404(d), and 13407(a) with current practice, to expressly provide, that absent extraordinary circumstances, the Director will not grant a party's request for an extension to complete the ranked lists that is filed after the deadline has elapsed. FINRA believes it is appropriate for the Director to require a showing of extraordinary circumstances before granting parties' requests to extend the time to complete ranked list(s) when such requests are filed after the deadline has elapsed. FINRA is concerned that allowing the Director to grant parties' requests to extend the deadline for completing arbitrator list selection only by a showing of good cause, especially when such requests are filed after the deadline has elapsed, could lead to unnecessary delays in the appointment of arbitration panels and arbitration proceedings.

By requiring a showing of extraordinary circumstances, the proposed rule change would help ensure that the arbitrator list selection process and proceedings are efficient. FINRA believes it is appropriate to align the Codes with this practice, so that parties may be made aware of the deadline and encouraged to complete and return their ranked lists to the Director within the 20-day timeframe, or so that parties may be encouraged to file

requests with the Director for extensions of the deadline before it has elapsed.

G. Allowing Parties To Agree To Remove an Arbitrator

DRS makes clear in its training materials for arbitrators that, pursuant to the requirements of the ABA's Code of Ethics for Arbitrators in Commercial Disputes, an arbitrator must withdraw from a panel if all of the parties request that the arbitrator do so.³³ This requirement is also supported by *Notice to Members* 01–13, which announced approval of amendments to the Director's authority to remove arbitrators for cause and described how arbitrators could be removed when “all the parties agree that the arbitrator should be removed.”³⁴ To help ensure that parties are aware of the ability to remove an arbitrator upon party agreement, the proposed rule change would codify the current guidance by amending FINRA Rules 12407 and 13410 to add new paragraph (d)(1) to provide that, at any stage of the arbitration proceeding, the Director may remove an arbitrator if all of the named parties agree in writing to the arbitrator's removal.³⁵

The proposed rule change would also add new paragraph (d)(2) to FINRA Rules 12407 and 13410 that would provide that the parties may not agree to remove an arbitrator who is considering a request to expunge customer dispute information, except that a party shall be permitted to challenge any arbitrator selected for cause pursuant to FINRA Rule 12407(a)(1) or (b) or FINRA Rule 13410(a)(1) or (b).

FINRA rules specify a narrow set of circumstances in which expungement of customer dispute information from the Central Registration Depository (CRD®) is appropriate.³⁶ In addition, FINRA recently amended its rules to make a number of significant enhancements to address concerns with the expungement

²⁹ See FINRA Rules 12100(v) and 13100(t).

³⁰ See proposed FINRA Rule 12402(d)(1) (providing that “[e]ach separately represented party may strike up to four of the arbitrators from the list for any reason”); proposed FINRA Rule 12403(c)(1)(A) (providing that “[e]ach separately represented party may strike any or all of the arbitrators from the non-public arbitrator list for any reason”); proposed FINRA Rule 12403(c)(2)(A) (providing that “[e]ach separately represented party may strike up to four of the arbitrators from the chairperson list and up to six of the arbitrators from the public arbitrator list for any reason”).

³¹ If a party is a *pro se* customer who opted out of using the Party Portal, pursuant to FINRA Rule 12300(a), the party may return their ranked list to the Director by first-class mail, overnight mail service, overnight delivery service, hand delivery, email, or facsimile. See FINRA Rules 12402(d)(3) and 12403(c)(3).

³² FINRA Rules 12404(a) and 13407(a) provide that the parties must return their ranked lists “within 20 days” after the date upon which the

Director sent the lists to the parties. FINRA Rules 12402(d)(3), 12403(c)(3) and 13404(d) provide that the parties must return their ranked lists “no more than 20 days” after the date upon which the Director sent the lists to the parties.

³³ See FINRA, Basic Arbitrator Training, <https://www.finra.org/arbitration-mediation/rules-case-resources/arbitrator-training#basic>; ABA Code of Ethics for Arbitrators in Commercial Disputes, Canon II(G) (requiring that “[i]f an arbitrator is requested by all parties to withdraw, the arbitrator must do so.”), https://www.adr.org/sites/default/files/document_repository/Commercial_Code_of_Ethics_for_Arbitrators_2010_10_14.pdf.

³⁴ See *Notice to Members* 01–13 (March 2001), <https://www.finra.org/rules-guidance/notices/01-13>; see also Securities Exchange Act Release No. 43291 (September 14, 2000), 65 FR 57413 (September 22, 2000) (Notice of Filing of File No. SR–NASD–00–34).

³⁵ Requests to remove an arbitrator may not be granted when there are extraordinary circumstances which make removal inappropriate (e.g., requests based on discriminatory grounds).

³⁶ See FINRA Rules 12805(c)(8) and 13805(c)(9); see also FINRA Rule 2080(b)(1).

process and to provide additional safeguards for ensuring that the information in CRD is accurate and complete.³⁷ FINRA believes that the proposed rule change is consistent with these changes related to enhancing the expungement process. For example, proposed paragraph (d)(2) of FINRA Rule 12407 would align with FINRA Rule 12800(d) by prohibiting the parties from agreeing to remove an arbitrator if there is a request to expunge customer dispute information during a simplified investment-related, customer-initiated arbitration (“simplified arbitration”) under FINRA Rule 12800.³⁸

Accordingly, as required by FINRA Rule 12800(d), the arbitrator who has considered the merits of the customer dispute in the simplified arbitration would also decide the expungement request. As noted above, however, the proposed rule change would permit a party to challenge any arbitrator selected for cause pursuant to FINRA Rule 12407(a)(1) or (b).

In addition, proposed paragraph (d)(2) of FINRA Rule 13410 would align with FINRA Rule 13806, which limits parties’ ability to have input into the arbitrators who decide straight-in requests.³⁹ Specifically, FINRA Rule 13806 provides that the list selection algorithm will select randomly the three public arbitrators from a roster of experienced public arbitrators with enhanced expungement training to decide a straight-in request. The parties are not permitted to strike any arbitrators selected by the list selection algorithm or stipulate to their removal. In addition, the parties are not permitted to agree to fewer than three arbitrators or stipulate to the use of pre-selected arbitrators. The parties are permitted, however, to challenge an arbitrator

selected for cause pursuant to FINRA Rule 13410(a)(1) or (b).

FINRA believes the proposed rule change would help ensure that the expungement process operates efficiently and as intended by aligning FINRA Rules to make clear that parties may not agree to remove an arbitrator who is considering a request to expunge customer dispute information. However, a party could challenge an arbitrator selected for cause.

H. Prohibiting Disclosure of Party-Initiated Challenges To Remove Arbitrators

FINRA Rules 12407 and 13410 permit the parties to challenge arbitrators for cause. If the challenge occurs after the Director sends the lists(s) generated by the list selection algorithm to the parties, but before the first hearing session begins, the Director will grant a party’s request to remove an arbitrator if it is reasonable to infer, based on information known at the time of the request, that the arbitrator is biased, lacks impartiality, or has a direct or indirect interest in the outcome of the arbitration.⁴⁰ If the challenge occurs after the first hearing session begins, the Director may remove an arbitrator based only on information required to be disclosed by an arbitrator that was not previously known by the parties.⁴¹

In two separate letters—one that accompanies the lists of arbitrators and another that advises the parties of the panel composition—DRS currently advises parties during arbitrator list selection that they may not inform an arbitrator or panel of an opposing party’s request to remove an arbitrator for cause. The language in both letters reads, “Parties are advised that they may not inform the panel of an opposing party’s causal challenge.”

The proposed rule change would align FINRA Rules 12407 and 13410 with the guidance provided by DRS, by adding a new paragraph (e)(1) to each rule, to expressly provide that a party may not inform the panel or arbitrator of another party’s request to remove an arbitrator for cause.

The proposed rule change also would establish a remedy if a party discloses to the arbitrator or panel an opposing party’s request to remove an arbitrator for cause. Specifically, the proposed rule change would amend FINRA Rules 12407 and 13410 to add a new paragraph (e)(2), which would give the party that requested removal of an arbitrator the option to file a written motion with the Director for removal of

the arbitrator within five days of being made aware of the disclosure. The requesting party may be made aware of the disclosure in several different ways, including in a pleading or other document filed with the Director, or during a prehearing conference or hearing. If the requesting party does not make a motion for removal of the arbitrator within five days of being made aware of the disclosure, then the requesting party would forfeit the opportunity to request removal of the arbitrator because of the disclosure.⁴² Finally, if the party that made the request to remove the arbitrator timely files a motion for removal of the arbitrator based on the disclosure, the proposed rule change would provide that, absent extraordinary circumstances, the Director shall grant the motion.⁴³

Disclosure of a party’s request to remove an arbitrator could prejudice the arbitrator or create the appearance of bias against the requesting party. FINRA recognizes the importance to the fairness and credibility of the DRS arbitration forum of having processes that are—and that are perceived to be—operated in a fair and neutral manner. As a result, FINRA believes it is appropriate to prohibit a party from disclosing an opposing party’s request to remove an arbitrator. Although DRS currently advises the parties by letter that they may not inform the panel of an opposing party’s causal challenge, FINRA believes that aligning the Codes with DRS’s guidance would more effectively curb the disclosure of a party’s request to remove an arbitrator because parties will be incented to comply with the Codes.

Furthermore, FINRA believes that, in the event a party improperly discloses an opposing party’s causal challenge, it is appropriate to require that the requesting party either make a motion for removal of the arbitrator within five days of being made aware of the disclosure or forfeit the opportunity to request removal of the arbitrator. By requiring that any motion to remove an arbitrator be made within five days, the proposed rule change would strike the right balance between providing an opportunity for any aggrieved party to seek a remedy while, at the same time, allowing for the efficient processing of the proceeding.

³⁷ See Securities Exchange Act Release No. 95455 (August 9, 2022), 87 FR 50170 (August 15, 2022) (Notice of Filing of File No. SR-FINRA-2022-024); Securities Exchange Act Release No. 97294 (April 12, 2023), 88 FR 24282 (April 19, 2023) (Order Approving File No. SR-FINRA-2022-024); see also *Regulatory Notice* 23-12 (August 2023).

³⁸ FINRA Rule 12800(d)(1)(B)(ii) provides that, if an associated person requests expungement during a simplified arbitration, the arbitrator from the simplified arbitration must consider and decide the expungement request regardless of how the simplified arbitration closes.

³⁹ A “straight-in request” refers to arbitration proceedings in which an associated person requests expungement of customer dispute information separate from a customer arbitration. Straight-in requests must be filed against the member firm at which the person was associated at the time the customer dispute arose. See FINRA Rule 13805(a)(1). These requests are less likely to be opposed or adversarial in nature because they generally involve two parties—associated persons and member firms—whose interests may be aligned. Like the associated person, the member firm may also have an interest in removing information from the associated person’s CRD record.

⁴⁰ See FINRA Rules 12407(a)(1) and 13410(a)(1).

⁴¹ See FINRA Rules 12407(b) and 13410(b).

⁴² See proposed FINRA Rules 12407(e)(2) and 13410(e)(2).

⁴³ See proposed FINRA Rules 12407(e)(2) and 13410(e)(2).

I. Updating Cross-References to the Non-Public Arbitrator Definition in the Industry Code

FINRA Rules 13406(c) and 13411(d) cross-reference to FINRA Rule 13100(r), which provides the definition of “non-public arbitrator.” Prior to 2017, paragraphs (r)(1), (r)(2), (r)(3), and (r)(4) of FINRA Rule 13100 listed the specific criteria for inclusion on FINRA’s non-public arbitrator roster. However, in 2017, FINRA amended the non-public arbitrator definition to eliminate paragraphs (r)(1) through (r)(4).⁴⁴ As a result of this amendment, FINRA Rule 13100(r) currently defines a “non-public arbitrator” as a person who is otherwise qualified to serve as an arbitrator, and is disqualified from service as a public arbitrator under FINRA Rule 13100(x).⁴⁵ FINRA Rule 13100(x), in turn, lists the criteria for exclusion from FINRA’s public arbitrator roster for a person who is otherwise qualified to serve as an arbitrator.⁴⁶ The proposed rule change would update FINRA Rules 13406(c) and 13411(d) with the correct cross-references to FINRA Rule 13100(x)(2) through (11) to provide the necessary clarification in light of the amended definition of a “non-public arbitrator.”

If the Commission approves the proposed rule change, FINRA will announce the effective date of the proposed rule change in a *Regulatory Notice*.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,⁴⁷ which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

FINRA believes that the proposed rule change will protect investors and the public interest by enhancing arbitrator list selection in the DRS arbitration forum. By increasing the opportunity for public arbitrators who are not chair-qualified to be selected for Public Lists, the proposed rule change will increase the likelihood that these arbitrators, who are often new to the arbitrator roster or less experienced arbitrators, may be selected to serve as panelists. As

a result, the proposed rule change will help DRS retain new or less experienced arbitrators on its arbitrator roster and expand the number of local public arbitrators who are chair-qualified to address shortages in local hearing locations.

The proposed rule change also will protect investors and the public interest by codifying certain practices that DRS has developed to efficiently administer arbitrator list selection, establishing new timeframes for objecting to requests for additional information from arbitrators, withdrawing such requests for additional information, and filing motions to remove arbitrators after disclosures of causal challenges, and aligning provisions of the Codes related to the expungement of customer dispute information. Together, these proposed changes will increase the transparency and efficiency of the arbitration process for forum users.

B. Self-Regulatory Organization’s Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Economic Impact Assessment

FINRA has undertaken an economic impact assessment to analyze the regulatory need for the proposed rule change, its potential economic impacts, including anticipated costs, benefits, and distributional and competitive effects, relative to the current baseline, and the alternatives FINRA considered in assessing how best to meet FINRA’s regulatory objectives. FINRA does not expect that the proposed rule change would affect the advantages and costs of the DRS arbitration forum relative to other arbitration fora.

i. Regulatory Need

FINRA is concerned that non-chair-qualified public arbitrators have disproportionately fewer opportunities than chair-qualified public arbitrators to be selected for arbitrator lists. The proposed rule change is anticipated to address this imbalance by increasing the number of opportunities for non-chair-qualified public arbitrators to be selected for Public Lists. Also, FINRA is concerned that some parties are not familiar with the current practices and published guidance for arbitrator list selection. The proposed rule change would increase the transparency and efficiency of the arbitrator list selection process by codifying certain practices that DRS has developed to efficiently administer arbitrator list selection,

establishing new timeframes for objecting to requests for additional information from arbitrators, withdrawing such requests for additional information, and filing motions to remove arbitrators after disclosures of causal challenges, and aligning provisions of the Codes related to the expungement of customer dispute information.

ii. Economic Baseline

In general, the economic baseline for the proposed rule change consists of the current provisions under the Codes, current practices, and published guidance that address arbitrator list selection. Relevant features of the economic baseline are described below. The proposed rule change is expected to affect the parties to cases in the DRS arbitration forum and the arbitrators on the FINRA public arbitrator roster.

As of January 2024, there were 4,072 arbitrators on the FINRA public arbitrator roster. The public arbitrator roster consists of 1,104 public arbitrators who are chair-qualified (27 percent = (1,104/4,072)) and 2,968 public arbitrators who are non-chair-qualified (73 percent = (2,968/4,072)).⁴⁸

Chair-qualified public arbitrators appeared relatively more frequently on Chairperson Lists and Public Lists combined. Between January 2018 and December 2023 (“sample period”), 17,544 arbitrations were filed and closed. Chairperson Lists and Public Lists were generated in 9,598 of the 17,544 arbitrations that involved customer disputes with three arbitrators or industry disputes involving associated persons with three arbitrators. Chair-qualified public arbitrators appeared 143,381 times (99,773 appearances on Chairperson Lists and 43,608 appearances on Public Lists) and non-chair-qualified public arbitrators appeared 92,356 times on Public Lists only. Thus, with their additional opportunity to appear on Public Lists, chair-qualified public arbitrators made 61 percent (= 143,381/(143,381 + 92,356)) of appearances but make up just 27 percent of all public arbitrators.⁴⁹

⁴⁸ Among the 1,104 public arbitrators who are chair-qualified, 187 public arbitrators are chair-qualified but currently unwilling to serve as chairpersons. Similar to public arbitrators who are not chair-qualified, chair-qualified public arbitrators who are unwilling to serve as chairperson would have only one chance to be selected for Public Lists.

⁴⁹ Due to data limitations, the number of chair-qualified public arbitrators that we identify as appearing on Public Lists would include public arbitrators who were previously qualified and willing to serve as chairpersons but subsequently

⁴⁴ See Securities Exchange Act Release No. 81572 (September 11, 2017), 82 FR 43436 (September 15, 2017) (Order Approving File No. SR-FINRA-2017-025).

⁴⁵ See FINRA Rule 13100(r).

⁴⁶ See Securities Exchange Act Release No. 74383 (February 26, 2015), 80 FR 11695 (March 4, 2015) (Order Approving File No. SR-FINRA-2014-028).

⁴⁷ 15 U.S.C. 78o-3(b)(6).

Relative to non-chair-qualified public arbitrators, a higher percentage of chair-qualified public arbitrators are selected by parties from Public Lists.⁵⁰ Chair-qualified public arbitrators were selected by parties in 16 percent of the times they made appearances on Public Lists (6,860 of 43,608 appearances) and non-chair-qualified public arbitrators were selected by parties in 10 percent of the times they made appearances on Public Lists (9,411 of 92,356 appearances). Selection by parties may encourage arbitrators to remain on the FINRA public arbitrator roster. For example, of all the non-chair-qualified public arbitrators who left the roster during the sample period, the median time in the forum for those who were never appointed was five years while the median time for those who were appointed at least once was 10 years.

Using appearances during the sample period as an estimate, the proposed rule change may increase the percentage of non-chair-qualified public arbitrators who appear on affected Public Lists from 68 percent to 81 percent.⁵¹ On a Public List with 15 arbitrators, this translates to two additional appearances by non-chair-qualified public arbitrators; and on a Public List with 10 arbitrators, this translates to one additional appearance by non-chair-qualified public arbitrators.

The economic baseline for the proposed rule change also consists of the current practices and published guidance that address arbitrator selection. Relative to other parties, parties who are less familiar with current practices or published guidance may have greater difficulty understanding their options when selecting arbitrators. As a result,

ceased being qualified or willing to serve as chairpersons when the Public Lists were generated. These arbitrators would have only one chance to be selected for Public Lists. *See supra* note 48. The 61 percent of appearances made by chair-qualified public arbitrators, therefore, overstates the actual percentage and represents an upper bound for the estimate.

⁵⁰ *See, e.g., supra* Section II. (Proposed Amendments to the Procedures for Generating Public Lists) (discussing FINRA's observations as to why parties may prefer chair-qualified public arbitrators).

⁵¹ To calculate the percentage increase in the appearances by non-chair-qualified public arbitrators, FINRA assumes that the number of appearances is proportional to the pools of public arbitrators available to appear on a Public List. FINRA calculates the 68 percent as the number of appearances by non-chair-qualified public arbitrators divided by the total number of appearances of non-chair-qualified and chair-qualified public arbitrators ($= 92,356 / (92,356 + 43,608)$). FINRA estimates the 81 percent by doubling the number of appearances by non-chair-qualified public arbitrators (from 92,356 to 184,712) and recalculating ($81 \text{ percent} = 184,712 / (184,712 + 43,608)$).

arbitrator panels may reflect the preferences of these parties less closely than would occur otherwise.

iii. Economic Impact

FINRA anticipates that, over time, the proposed rule change would increase the likelihood for non-chair-qualified public arbitrators to be selected by parties to serve as panelists. The benefits to arbitrators from selection include the experience, networking opportunities, and supplemental income. The benefits also include an increased likelihood of being selected in future arbitrations if, over time, parties become confident in the quality of arbitrators' decision-making or are better able to predict how arbitrators may react to a specific fact pattern. Future selections may incent non-chair-qualified public arbitrators to take necessary steps to remain on FINRA's roster of arbitrators. For some non-chair-qualified public arbitrators, the benefits from the additional selections may include obtaining the experience necessary to become chair-qualified.⁵²

A larger pool of chair-qualified public arbitrators also may increase the availability of chair-qualified public arbitrators in the same general geographic area as parties (and who may be familiar with local laws and practices), help facilitate scheduling, and reduce arbitrator travel expenses incurred by the DRS arbitration forum. Currently, 78 percent of the 69 hearing locations have fewer than the requisite number of local chair-qualified public arbitrators to complete Chairperson Lists. In over half of these hearing locations, the roster of local chair-qualified public arbitrators could be filled by non-chair-qualified public arbitrators if they became chair-qualified.

In general, an increase in the selection of non-chair-qualified public arbitrators would tend to reduce the average level of experience of arbitration panels. This could lessen the ability of some parties to anticipate awards. With a shorter award history, some parties may be less able to predict how an arbitrator might react to a specific fact pattern. Parties with preferences for more experienced public arbitrators may feel constrained by having fewer chair-qualified public arbitrators from which to choose. In addition, chair-qualified public arbitrators may not experience the same level of benefits over time from remaining active in the forum as the likelihood of their selection from Public Lists decreases.

⁵² *See supra* note 9 and accompanying text.

The magnitude of the economic impact, including the eventual impact on the combined forum experience of arbitrators who are selected for panels, is dependent on the preferences of parties for chair-qualified public arbitrators. For example, although fewer chair-qualified public arbitrators would appear on Public Lists, stronger preferences among parties for chair-qualified public arbitrators and their continued selection from Public Lists would result in the proposed rule change having little impact relative to the baseline. As noted above, parties with preferences for more experienced public arbitrators may feel constrained by having fewer chair-qualified public arbitrators from which to choose. Parties' selection of arbitrators, however, is dependent on multiple factors, including the lists that parties receive and their preferences for certain arbitrator characteristics. For this reason, FINRA does not believe that the proposed change to the Public List generation process would materially affect their decision to file a claim in the DRS arbitration forum (and not, for example, directly settling the dispute if the situation allows) or the number of claims filed in the forum.

The proposed rule change would establish new timeframes for objecting to requests for additional information from arbitrators, withdrawing such requests for additional information, and filing motions to remove arbitrators after disclosures of causal challenges. The new timeframes would help the efficiency of the arbitration proceedings by ensuring that issues relating to arbitrator selection do not delay or disrupt the proceedings. As discussed above, the timeframes are consistent with those relating to similar motions and should therefore not impose an undue burden.

The proposed rule change would align FINRA Rules to current guidance providing that at any stage of the arbitration proceeding, the Director may remove an arbitrator if all of the named parties agree in writing to the arbitrator's removal.⁵³ The proposed rule change would also add that parties may not agree to remove an arbitrator who is considering a request to expunge customer dispute information.⁵⁴ The proposed rule change may help further ensure that arbitrators issue awards containing expungement relief only when appropriate and that the customer dispute information in CRD reflects the

⁵³ *See* proposed FINRA Rules 12407(d)(1) and 13410(d)(1).

⁵⁴ *See* proposed FINRA Rules 12407(d)(2) and 13410(d)(2).

conduct of associated persons.⁵⁵ The inability to agree to remove an arbitrator may result in some associated persons choosing to forego requesting expungement in the DRS arbitration forum, though requesting expungement in the DRS arbitration forum may continue to be the preferred option. Associated persons who decide not to request expungement in the DRS arbitration forum may incur additional costs or delays in requesting expungement of the customer dispute information other than through the DRS arbitration forum. Associated persons who are delayed in requesting expungement may experience a loss of business and professional opportunities.

Finally, the proposed rule change would codify current practices and DRS guidance relating to arbitrator selection. The codification may increase the efficient administration of the arbitrator selection process if it results in an increase in the transparency of the process and proves to be informative for parties who are unfamiliar with current practices or unaware of the DRS guidance. These parties may be more likely to resolve the dispute by filing a claim in the DRS arbitration forum.

As best FINRA can determine, in the vast majority of sample cases, few cases would have been affected by the proposed rule change to align the Codes with current practices.⁵⁶ For example, in the vast majority of sample cases, data suggests that the forum sends lists of arbitrators to the parties within 20 days of when the last answer is due. FINRA can also identify 63 requests for additional information about a listed arbitrator in 38 cases (less than one percent of the 17,544 sample cases) and 54 requests for additional information about an appointed arbitrator in 45 cases. FINRA can also identify nine challenges to remove a listed arbitrator in nine cases, and 165 challenges to remove an appointed arbitrator in 132 cases (one percent). Information

describing the basis for challenges to remove a listed or appointed arbitrator (e.g., due to the disclosure of a causal challenge) is not available.⁵⁷

While it is not known how many parties are unfamiliar with current practices or DRS guidance, FINRA believes that the small number of instances likely reflects informed decisions by most parties, and so the proposed rule change is therefore not likely to cause a large increase in the number of these instances.

iv. Alternatives Considered

FINRA developed the proposed amendments over a multi-year process during which FINRA considered and modified proposals based on feedback from forum users, including investors, securities industry professionals, and FINRA arbitrators. In evaluating proposals, FINRA considered numerous factors including efficiency, cost, fairness and transparency, and certain tradeoffs among these factors.

The proposed amendments that relate to the generation of Public Lists strike an appropriate balance between leveling the opportunities for selection and minimizing the disruption to the selection process and its associated costs. As an alternative, FINRA considered amending the Codes to provide that, in preparing the Public List, the list selection algorithm would generate a list that includes a fixed number of non-chair-qualified public arbitrators. This would ensure that non-chair-qualified public arbitrators have a designated opportunity to appear on the Public List for selection. However, depending on list size, there is an insufficient number in approximately one-quarter to two-fifths of hearing locations of non-chair-qualified public arbitrators to fill Public Lists. Thus, for selected hearing locations with few arbitrators, the alternative may require generating Public Lists that include non-chair-qualified public arbitrators who live outside of the local hearing location to fill Public Lists. FINRA believes that the proposed rule change would increase the opportunity for non-chair-qualified public arbitrators to be selected for the Public List, and will monitor the impact of the proposed rule change if approved by the Commission and continue to consider if additional changes are warranted.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

- (A) by order approve or disapprove such proposed rule change, or
- (B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-FINRA-2024-022 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-FINRA-2024-022. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the

⁵⁵ The proposed rule change would primarily affect expungement requests in non-simplified customer arbitrations. See *supra* notes 38 and 39 and accompanying text (discussing existing requirements under the Codes for simplified arbitrations and straight-in requests). There were 2,195 non-simplified customer arbitrations filed and closed between January 2018 and December 2023 where parties requested expungement. Information is not available describing party agreements to remove arbitrators where parties requested expungement.

⁵⁶ Other information describing the potential impact of the proposed amendments that address arbitrator selection under the baseline is not available. This information includes requests for additional time to complete ranked lists and grants or denials of these requests, objections to requests for additional information and withdrawals of these requests, and disclosures of challenges to remove arbitrators.

⁵⁷ This estimate does not account for any potential changes in the behaviors of associated persons with respect to requesting expungement during a customer case in response to recently amended rules. See *supra* note 37 and accompanying text.

provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of FINRA. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-FINRA-2024-022 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁸

J. Matthew DeLesDernier,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35425; File No. 812-15543]

Morgan Stanley Direct Lending Fund,
et al.

December 19, 2024.

AGENCY: Securities and Exchange Commission ("Commission" or "SEC").
ACTION: Notice.

Notice of application for an order under sections 17(d) and 57(i) of the Investment Company Act of 1940 (the "Act") and rule 17d-1 under the Act to permit certain joint transactions otherwise prohibited by sections 17(d) and 57(a)(4) of the Act and rule 17d-1 under the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain business development companies ("BDCs") and closed-end management investment companies to co-invest in portfolio companies with each other and with certain affiliated investment entities.

APPLICANTS: Morgan Stanley Direct Lending Fund, MS Capital Partners Adviser Inc., NH Credit Partners III Holdings L.P., NH Expansion Credit Fund Holdings LP, North Haven Credit Partners II L.P., North Haven Credit Partners III L.P., North Haven Senior Loan Fund (ALMA) Designated Activity

Company, North Haven Senior Loan Fund L.P., North Haven Senior Loan Fund Offshore L.P., North Haven Senior Loan Fund Unleveraged Offshore L.P., North Haven Tactical Value Fund (AIV) LP, North Haven Tactical Value Fund LP, North Haven Unleveraged Senior Loan Fund (Yen) L.P., NH Senior Loan Fund Offshore Holdings L.P., NH Senior Loan Fund Onshore Holdings LLC, DLF CA SPV LLC, DLF Equity Holdings LLC, DLF SPV LLC, DLF Financing SPV LLC, SL Investment Fund II LLC, SLIF II CA SPV LLC, SLIC CA SPV LLC, SLIC Equity Holdings LLC, SLIC Financing SPV LLC, T Series Middle Market Loan Fund LLC, T Series CA SPV LLC, T Series Equity Holdings LLC, T Series Financing SPV LLC, T Series Financing II SPV LLC, T Series Financing III SPV LLC, North Haven Private Income Fund LLC, North Haven Private Income Fund A LLC, LGAM Private Credit LLC, PIF CA SPV LLC, NHPF Equity Holdings SPV LLC, Broadway Funding Holdings LLC, PIF Financing SPV LLC, PIF Financing II SPV LLC, PIF A CA SPV LLC, Broadway Funding Holdings II LLC, PIF A Financing SPV LLC, PIF A Equity Holdings LLC, 1585 Koala Holdings LLC, LGAM CA SPV LLC, LGAM Financing SPV LLC, LGAM Equity Holdings LLC, Credit Opportunities (Series M) LP, NH-G 2022 SCSp, North Haven Senior Loan Fund (ALMA) II Designated Activity Company, North Haven Expansion Credit II L.P., North Haven Direct Lending Fund Aggregator L.P., NHDL I SPV LLC, North Haven Credit Partners IV Holdings A L.P., North Haven Credit Partners IV Holdings B L.P., North Haven Tactical Value Fund II Lux AIV-B SCSp, North Haven Tactical Value Fund II Lux AIV-C SCSp, NHTV II Onshore Aggregator LP, North Haven Structured Solutions Fund LP and Morgan Stanley Senior Funding, Inc.

FILING DATES: The application was filed on January 29, 2024 and amended on August 20, 2024.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at Secretarys-Office@sec.gov and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on January 13, 2025 and should be accompanied by proof of service on the Applicants, in the form

of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0-5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary at Secretarys-Office@sec.gov.

ADDRESSES: The Commission: Secretarys-Office@sec.gov. Applicants: Orit Mizrahi, 1585 Broadway, 23rd floor, New York, NY 10036, with a copy to: Thomas Friedmann, Dechert LLP, One International Place, 100 Oliver St., 40th Floor, Boston, MA 02110.

FOR FURTHER INFORMATION CONTACT: Adam Lovell, Senior Counsel, or Terri Jordan, Branch Chief, at (202) 551-6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' amended and restated application, dated August 20, 2024, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field, on the SEC's EDGAR system. The SEC's EDGAR system may be searched at, <https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html>. You may also call the SEC's Public Reference Room at (202) 551-8090.

For the Commission, by the Division of Investment Management, under delegated authority.

J. Matthew DeLesDernier,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101999; File No. SR-CboeBYX-2024-049]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fees Schedule Related to Physical Port Fees

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

⁵⁸ 17 CFR 200.30-3(a)(12).

18, 2024, Cboe BYX Exchange, Inc. (the “Exchange” or “BYX”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (the “Exchange” or “BYX Equities”) proposes to amend its Fees Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s website (http://markets.cboe.com/us/equities/regulation/rule_filings/BYX/), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule relating to physical connectivity fees.³

³ The Exchange initially filed the proposed fee changes on July 3, 2023 (SR-CboeBYX-2023-010). On September 1, 2023, the Exchange withdrew that filing and submitted SR-CboeBYX-2023-013. On September 29, 2023, the Securities and Exchange Commission issued a Suspension of and Order Instituting Proceedings to Determine whether to Approve or Disapprove a Proposed Rule Change to Amend its Fees Schedule Related to Physical Port Fees (the “OIP”) in anticipation of a possible U.S. government shutdown. On September 29, 2023, the Exchange filed the proposed fee change (SR-CboeBYX-2023-014). On October 13, 2023, the Exchange withdrew that filing and submitted SR-CboeBYX-2023-015. On December 12, 2023, Exchange filed the proposed fee change (SR-CboeBYX-2023-018). On December 12, 2023, the Exchange withdrew that filing and submitted SR-CboeBYX-2023-019. On February 9, 2024, the

By way of background, a physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange’s servers are located. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,500 per physical port for a 1 gigabit (“Gb”) circuit and \$7,500 per physical port for a 10 Gb circuit. The Exchange proposes to increase the monthly fee for 10 Gb physical ports from \$7,500 to \$8,500 per port. The Exchange notes the proposed fee change better enables it to continue to maintain and improve its market technology and services and also notes that the proposed fee amount, even as amended, continues to be in line with, or even lower than, amounts assessed by other exchanges for similar connections.⁴ The Exchange also notes that a single 10 Gb physical port can be used to access the Systems of the following affiliate exchanges: the Cboe BZX Exchange, Inc. (options and equities), Cboe EDGX Exchange, Inc. (options and equities platforms), Cboe EDGA Exchange, Inc., and Cboe C2 Exchange, Inc., (“Affiliate Exchanges”).⁵ Notably, only one monthly fee currently (and will continue) to apply per 10 Gb physical port regardless of how many affiliated exchanges are accessed through that one port.⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations

Exchange withdrew that filing and submitted SR-CboeBYX-2024-006. On April 9, 2024, the Exchange withdrew that filing and submitted SR-Cboe-BYX-2024-012. On June 7, 2024, the Exchange withdrew that filing and submitted SR-CboeBYX-2024-021. On August 29, 2024, the Exchange withdrew that filing and submitted SR-CboeBYX-2024-032. On October 25, 2024, the Exchange withdrew that filing and submitted SR-CboeBYX-2024-039. On December 18, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ See e.g., The Nasdaq Stock Market LLC (“Nasdaq”), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gb Ultra fiber connection to the respective exchange, which is analogous to the Exchange’s 10Gb physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gb LX LCN Circuits (which are analogous to the Exchange’s 10 Gb physical port) are assessed \$22,000 per month, per port.

⁵ The Affiliate Exchanges are also submitting contemporaneous identical rule filings.

⁶ The Exchange notes that conversely, other exchange groups charge separate port fees for access to separate, but affiliated, exchanges. See e.g., Securities and Exchange Release No. 99822 (March 21, 2024), 89 FR 21337 (March 27, 2024) (SR-MIAX-2024-016).

thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁷ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁸ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁹ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)¹⁰ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities. This belief is based on various factors as described below.

First, the Exchange believes its proposal is reasonable as it reflects a moderate increase in physical connectivity fees for 10 Gb physical ports and its offering, even as amended, continues to be more affordable as compared to analogous physical connectivity offerings at competitor exchanges.¹¹

The Exchange also believes the current fee does not properly reflect the quality of the service and product, as fees for 10 Gb physical ports have been static in nominal terms since 2018, and therefore falling in real terms due to inflation. As a general matter, the Producer Price Index (“PPI”) is a family of indexes that measures the average change over time in selling prices received by domestic producers of

⁷ 15 U.S.C. 78f(b).

⁸ 15 U.S.C. 78f(b)(5).

⁹ *Id.*

¹⁰ 15 U.S.C. 78f(b)(4).

¹¹ See e.g., The Nasdaq Stock Market LLC (“Nasdaq”), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gbps Ultra fiber connection to the respective exchange, which is analogous to the Exchange’s 10Gbps physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gbps LX LCN Circuits (which are analogous to the Exchange’s 10 Gbps physical port) are assessed \$22,000 per month, per port.

goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (CPI), that measure price change from the purchaser's perspective.¹² About 10,000 PPIs for individual products and groups of products are tracked and released each month.¹³ PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector's output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing, hosting and related services ("Data PPI") and more particularly the more granular service line Data Processing, Hosting and Related Services: Hosting, Active Server Pages (ASP), and Other Information Technology (IT) Infrastructure Provisioning Services.¹⁴

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics ("BLS") as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS—518210 in the North American Industry Classification System ("NAICS").¹⁵ According to the BLS "[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers' transactions and data. Price movements for the NAICS 518210 index are based on changes in

the revenue received by companies that provide data processing services and price movements for the service line NAICS 518210 index are based on changes in the revenue received by companies that provide, among other things, IT infrastructure provisioning services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract."¹⁶

The service (product) lines for which price indexes are available under the Data PPI are: (1) business process management services (2) data management and storage information transformation and other services and (3) hosting ASP and other IT infrastructure provisioning services. The most apt of these industry and product specific categorizations for purposes of this present proposal to modify fees for the 10 Gb physical port fee measures inflation for the provision of data processing, hosting and related services as well as other information technology infrastructure provisioning services which BLS identifies as identified as NAICS—518210.¹⁷ The Exchange believes that this measure of inflation is particularly appropriate because the Exchange's connectivity services involve hosting and providing connections to its customers' telecommunications and information technology equipment, as well as preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity. The Exchange also uses its "proprietary software," *i.e.*, its own proprietary matching engine software, to receive orders on the Exchange's proprietary trading platform as well as to collect, organize, store and report customers' transactions. In other words, the Exchange is in the business of data processing, hosting, ASP, and providing other IT infrastructure provisioning services.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a

greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. For example, the average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.¹⁸

As noted above, the current 10 Gb physical port fee remained unchanged for six years, particularly since June 2018.¹⁹ Since its last increase over 6 years ago however, there has been notable inflation, including under the industry- and product-specific PPI, which as described above is a tailored measure of inflation. Particularly, the Hosting, ASP and other IT Infrastructure Provisioning Services inflation measure had a starting value of 102.2 in June 2018 (the month the Exchange started assessing the current fee) and an ending value of 115.66 in November 2024, representing an 13% increase.²⁰ This indicates that companies who are also in the hosting ASP and other IT infrastructure provisioning services have generally increased prices for a specified service covered under NAICS 518210 by an average of 13% during this period.

The Exchange also believes that it is reasonable to increase its fees to compensate for inflation because, over time, inflation has degraded the value of each dollar that the Exchange collects in fees, such that the real revenue collected today is considerably less than that same revenue collected in 2018. The impact of this inflationary effect is also independent of any change in the Exchange's costs in providing its goods and services. The Exchange therefore believes that it is reasonable for it to offset, in part, this erosion in the value of the revenues it collects. Additionally, the Exchange historically does not increase fees every year notwithstanding inflation. Other exchanges have also filed for increases in certain fees, based in part on comparisons to inflation.²¹ Accordingly, based on the above-

described percentage change based on an industry- and product-specific inflationary measure, and in conjunction with the rationale further described above and below, the Exchange believes the proposed fee increase is reasonable.

Next, the Exchange believes significant investments into, and enhanced performance of, the Exchange, in the years following the last 10 Gb physical port fee increase support the reasonableness of the proposed fee increase. These investments enhanced the quality of its services, as measured by, among other things, increased throughput and faster processing speeds. Customers have therefore greatly benefitted from these investments, while the Exchange's ability to recoup its investments has been hampered.

For example, the Exchange and its affiliated exchanges recently launched a multi-year initiative to improve Cboe Exchange Platform performance and capacity requirements to increase competitiveness, support growth and advance a consistent world class platform. The goal of the project, among other things, is to provide faster and more consistent order handling and matching performance for options, while ensuring quicker processing time and supporting increasing volumes and capacity needs. For example, the Exchange recently performed switch hardware upgrades. Particularly, the Exchange replaced existing customer access switches with newer models, which the Exchange believes resulted in increased determinism. The recent switch upgrades also increased the Exchange's capacity to accommodate more physical ports by nearly 50%. Network bandwidth was also increased nearly two-fold as a result of the upgrades, which among other things, can lead to reduce message queuing. The Exchange also believes these newer models result in less natural variance in the processing of messages. The Exchange notes that it incurred costs associated with purchasing and upgrading to these newer models, of which the Exchange has not otherwise passed through or offset.

As of April 1, 2024, market participants also having the option of connecting to a new data center (*i.e.*, Secaucus NY6 Data Center ("NY6")), in addition to the current data centers at NY4 and NY5. The Exchange made NY6 available in response to customer requests in connection with their need for additional space and capacity. In order to make this space available, the Exchange expended significant resources to prepare this space, and will

also incur ongoing costs with respect to maintaining this offering, including costs related to power, space, fiber, cabinets, panels, labor and maintenance of racks. The Exchange also incurred a large cost with respect to ensuring NY6 would be latency equalized, as it is for NY4 and NY5.

The Exchange also has made various other improvements since the current physical port rates were adopted in 2018. For example, the Exchange has updated its customer portal to provide more transparency with respect to firms' respective connectivity subscriptions, enabling them to better monitor, evaluate and adjust their connections based on their evolving business needs. The Exchange also performs proactive audits on a weekly basis to ensure that all customer cross connects continue to fall within allowable tolerances for Latency Equalized connections. Accordingly, the Exchange expended, and will continue to expend, resources to innovate and modernize technology so that it may benefit its Members and continue to compete among other equities markets. The ability to continue to innovate with technology and offer new products to market participants allows the Exchange to remain competitive in the equities space which currently has 16 equities markets and potential new entrants. If the Exchange were not able to assess incrementally higher fees for its connectivity, it would effectively impact how the Exchange manages its technology and hamper the Exchange's ability to continue to invest in and fund access services in a manner that allows it to meet existing and anticipated access demands of market participants. Disapproval of fee changes such as the proposal herein, could also have the adverse effect of discouraging an exchange from improving its operations and implementing innovative technology to the benefit of market participants if it believes the Commission would later prevent that exchange from recouping costs and monetizing its operational enhancements, thus adversely impacting competition as well as the interests of market participants and investors.

Finally, the proposed fee is also the same as is concurrently being proposed for its Affiliate Exchanges. Further, Members are able to utilize a single port to connect to all of its Affiliate Exchanges and will only be charged one single fee (*i.e.*, a market participant will only be assessed the proposed \$8,500 even if it uses that physical port to connect to the Exchange and another (or even all 6) of its Affiliate Exchanges. Particularly, the Exchange believes the

proposed monthly per port fee is reasonable, equitable and not unfairly discriminatory since as the Exchange has determined to not charge multiple fees for the same port. Indeed, the Exchange notes that several ports are in fact purchased and utilized across one or more of the Exchange's affiliated Exchanges (and charged only once).

The Exchange also believes that the proposed fee change is not unfairly discriminatory because it would be assessed uniformly across all market participants that purchase the physical ports. The Exchange believes increasing the fee for 10 Gb physical ports and charging a higher fee as compared to the 1 Gb physical port is equitable as the 1 Gb physical port is 1/10th the size of the 10 Gb physical port and therefore does not offer access to many of the products and services offered by the Exchange (*e.g.*, ability to receive certain market data products). Thus, the value of the 1 Gb alternative is lower than the value of the 10 Gb alternative, when measured based on the type of Exchange access it offers. Moreover, market participants that purchase 10 Gb physical ports utilize the most bandwidth and therefore consume the most resources from the network. The Exchange also anticipates that firms that utilize 10 Gb ports will benefit the most from the Exchange's investment in offering NY6 as the Exchange anticipates there will be much higher quantities of 10 Gb physical ports connecting from NY6 as compared to 1 Gb ports. Indeed, the Exchange notes that 10 Gb physical ports account for approximately 90% of physical ports across the NY4, NY5, and NY6 data centers, and to date, 80% of new port connections in NY6 are 10 Gb ports. As such, the Exchange believes the proposed fee change for 10 Gb physical ports is reasonably and appropriately allocated.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed fee change will not impact intramarket competition because it will apply to all similarly situated Members equally (*i.e.*, all market participants that choose to purchase the 10 Gb physical port). Additionally, the Exchange does not believe its proposed pricing will impose a barrier to entry to smaller participants and notes that its proposed connectivity pricing is associated with relative usage of the various market participants. For example, market participants with modest capacity needs

can continue to buy the less expensive 1 Gb physical port (which cost is not changing) or may choose to obtain access via a third-party re-seller. While pricing may be increased for the larger capacity physical ports, such options provide far more capacity and are purchased by those that consume more resources from the network. Accordingly, the proposed connectivity fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation reflects the network resources consumed by the various size of market participants—lowest bandwidth consuming members pay the least, and highest bandwidth consuming members pays the most.

The proposed fee change also does not impose a burden on competition or on other Self-Regulatory Organizations that is not necessary or appropriate. As described above, the Exchange evaluated its proposed fee change using objective and stable metric with limited volatility. Utilizing Data Processing PPI over a specified period of time is a reasonable means of recouping a portion of the Exchange's investment in maintaining and enhancing the connectivity service identified above. The Exchange believes utilizing Data Processing PPI, a tailored measure of inflation, to increase certain connectivity fees to recoup the Exchange's investment in maintaining and enhancing its services and products would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²² and paragraph (f) of Rule 19b-4²³ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings

to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBYX-2024-049 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeBYX-2024-049. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBYX-2024-049 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁴

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102003; File No. SR-CboeBZX-2024-126]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing of a Proposed Rule Change to List and Trade Shares of the BondBlox Private Credit Trust Under BZX Rule 14.11(f), Trust Issued Receipts

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 17, 2024, Cboe BZX Exchange, Inc. ("Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. ("BZX" or the "Exchange") is filing with the Securities and Exchange Commission ("Commission" or "SEC") a proposed rule change to list and trade shares of the BondBlox Private Credit Trust (the "Trust"), under BZX Rule 14.11(f), Trust Issued Receipts.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the

²² 15 U.S.C. 78s(b)(3)(A).

²³ 17 CFR 240.19b-4(f).

²⁴ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to list and trade the Shares of the Trust under BZX Rule 14.11(f)(4), which governs the listing and trading of Trust Issued Receipts³ on the Exchange.⁴ The Trust seeks to provide attractive risk-adjusted returns primarily through distributions of current income from the Trust's portfolio, as further described below. The Trust has filed a registration statement on Form S-1 under the Securities Act of 1933.⁵

³ Rule 14.11(f)(4) applies to Trust Issued Receipts that invest in "Investment Shares" or "Financial Instruments". The term "Investment Shares," as defined in Rule 14.11(f)(4)(A)(i), means a security (a) that is issued by a trust, partnership, commodity pool or other similar entity that invests in any combination of futures contracts, options on futures contracts, forward contracts, commodities, swaps or high credit quality short-term fixed income securities or other securities; and (b) issued and redeemed daily at net asset value in amounts correlating to the number of receipts created and redeemed in a specified aggregate minimum number. The term "Financial Instruments," as defined in Rule 14.11(f)(4)(A)(iv), means any combination of investments, including cash; securities; options on securities and indices; futures contracts; options on futures contracts; forward contracts; equity caps, collars and floors; and swap agreements.

⁴ The Commission approved BZX Rule 14.11(f)(4) in Securities Exchange Act Release No. 68619 (January 10, 2013), 78 FR 3489 (January 16, 2013) (SR-BZX-2012-044).

⁵ The Trust has filed a registration statement on Form S-1 under the Securities Act of 1933, dated December 13, 2024 (File No. 333-283852) ("Registration Statement"). The description of the Trust and the Shares contained herein are based on the Registration Statement. The Registration Statement for the Trust is not yet effective, and the Trust will not trade on the Exchange until such time that the Registration Statement is effective.

⁶ The Trust intends to operate its business so that it is falls outside of the definition of an investment company under the Investment Company Act of 1940 (the "1940 Act"). Section 3(a)(1)(C) of the 1940 Act generally defines an investment company as an entity primarily engaged in investing, reinvesting, or trading in securities and holds investment securities exceeding 40% of its total assets (exclusive of U.S. federal government securities and cash items) on a non-consolidated basis, which the Trust refers to as the 40% test. Excluded from the term "investment securities," among other things, are securities issued by majority-owned subsidiaries that are not themselves investment companies and are not relying on the exclusions from the definition of investment company set forth in Section 3(c)(1) or Section 3(c)(7) of the 1940 Act. The Trust intends to comply with this 40% test by primarily conducting its

Description of the Trust

BondBloxx Investment Management Corporation (the "Advisor") is the advisor to the Trust and is responsible for the overall management of the Trust's business activities. HCG Fund Management LP (the "Sub-Advisor") will assist in the day-to-day management of the Trust's assets. Brown Brothers Harriman & Co. serves as the administrator (the "Administrator"), custodian (the "Custodian"), and the transfer agent (the "Transfer Agent"). CSC Delaware Trust Company, a Delaware trust company, is the sole trustee of the Trust.

If the Advisor to the Trust issuing the Trust Issued Receipts is affiliated with a broker-dealer, such Advisor to the Trust shall erect and maintain a "fire wall" between the Advisor and the broker-dealer with respect to access to information concerning the composition and/or changes to the Trust's portfolio. The Advisor is not a broker-dealer or affiliated with a broker-dealer. In the event that (a) the Advisor becomes a broker-dealer or newly affiliated with a broker-dealer, or (b) any new Advisor is a broker-dealer or becomes affiliated with a broker-dealer, it will implement and maintain a fire wall with respect to its relevant personnel or such broker-dealer affiliate, as applicable, regarding access to information concerning the composition and/or changes to the portfolio, and will be subject to procedures designed to prevent the use and dissemination of material non-public information regarding the portfolio.

The Trust seeks to provide attractive risk-adjusted returns to Shareholders primarily through distributions of current income from the Trust's portfolio. The Trust intends to achieve this objective by constructing a diversified portfolio of consumer and small business private credit assets. The

business through its majority-owned subsidiaries, which are not classified as investment companies and not relying on either the Section 3(c)(1) or Section 3(c)(7) exclusions from registration under the 1940 Act.

The Trust anticipates that its subsidiaries will primarily qualify for exclusions under Section 3(c)(5)(A) of the 1940 Act, which applies to issuers primarily engaged in the business of purchasing or otherwise acquiring notes, drafts, acceptances, open accounts receivable, and other obligations representing part or all of the sales price of merchandise, insurance and services, or Section 3(c)(5)(B) of the 1940 Act, which is available to entities primarily engaged in the business of making loans to manufacturers, wholesalers, and retailers of, and to prospective purchasers of, specified merchandise, insurance and services. These exceptions require that at least 55% of the subsidiaries' portfolios consist of qualifying assets that meet the requirements of the relevant exception.

Trust intends to target primarily whole loans that the Advisor believes will offer stable and predictable cash flows. The Trust generally intends to focus on loans that have short and medium terms (e.g., less than 60 months) which, through principal amortization, tend to have low duration (e.g., less than 30 months). The Trust believes that targeting assets with a combination of short duration and high cash yields will enhance the liquidity of the Trust's portfolio and provide the Trust the opportunity to earn attractive returns while managing the risk of losses in market value that can result from increases in interest rates. The Trust expects to acquire its initial portfolio of assets using the net proceeds of this offering.

Investable Instruments and Trust Liquidity

The Trust intends to hold the following instruments: personal installment loans, small business loans, student loans, point of sale loans, and asset backed securities that are backed by such loans (collectively "Private Credit Assets"), investment grade bonds, U.S. Treasuries, shares of certain exchange traded funds that invest in U.S. Treasuries or other short-term, interest bearing assets and cash and cash equivalents,⁷ including funds of an affiliated Trust for which the Advisor acts as the investment adviser.

The Trust plans to participate in the rapidly growing market for small balance, short duration, amortizing loans enabled by Fintech lending platforms. The Advisor believes consumer and small business loans sourced through Fintech lending platforms offer investors attractive value propositions that have primarily been available to institutional investors. However, there is limited sell-side liquidity available in the market for Private Credit Assets. As such, the Advisor is proposing to utilize the following strategy to facilitate redemptions in the Trust:

1. The Trust will maintain a portion of the portfolio in cash and cash equivalents (the "Liquidity Sleeve"). Under normal circumstances, the Trust expects to hold approximately 20% of the portfolio in these liquid assets. The Advisor expects that it will generally be

⁷ Cash equivalents are short-term instruments with maturities of less than 3 months, specifically including U.S. Government securities, certificates of deposit, bankers' acceptances, repurchase and reverse repurchase agreements, bank time deposits, commercial paper, and money market funds. This definition is consistent with the definition of cash and cash equivalents in Exchange Rule 14.11(i)(4)(C)(iii).

able to fulfill redemption orders using this position. The Advisor may also strategically increase the size of the Liquidity Sleeve in order to better facilitate anticipated redemptions by retaining, rather than distributing the paydowns from Private Credit Assets as further described below.

2. The remaining 80% of the Trust's holdings will consist of Private Credit Assets. These are short duration, high yielding products that are underwritten to pay a weighted average of 8% of the total Trust AUM per month or 10% of the private credit AUM per month. The underwritten yields are currently 10% and at origination typically have an underwritten average duration limit of 3 years, with a target for the initial portfolio of less than 1 year. The monthly cash flows, which are received throughout the month, may be reinvested to the extent necessary to maintain the approximate 20/80 allocation between the Liquidity Sleeve and Private Credit Assets described above. The Trust will consider the current level of the Liquidity Sleeve, among other factors, in determining its distribution policy, and may determine to use accumulated cash received from payments of interest and principal on its Private Credit Assets as well as cash proceeds from loan repayments to replenish or increase the Liquidity Sleeve before distributing such amounts to shareholders.

3. In the event that the cash and cash equivalents required to accommodate a series of redemptions or a single large redemption approaches the size of the Trust's Liquidity Sleeve, the Trust may:

- a. Sell Private Credit Assets in the secondary market to raise cash;
- b. Arrange a line of credit or other financing facility with a bank or broker dealer, using the portfolio of Private Credit Assets as collateral.

These options will likely come at a cost to the Trust or may not be available to the Trust depending on market conditions.

4. In the event that items 1–3 above do not provide sufficient cash and cash equivalents to the Liquidity Sleeve to accommodate redemptions in the Trust, redemptions may be suspended until the Trust accumulates enough cash to facilitate additional redemptions, which the Advisor does not expect to last for longer than approximately 2.5 months. In the event that the Advisor implements a restriction on redemptions, the Shares on the secondary market may trade at deep discount. The discount could potentially serve to prompt investors to buy shares and potentially trigger primary market activity.

The Advisor believes that the liquidity strategy laid out above will be sufficient to address concerns that may arise from the relative illiquidity of the secondary market for selling Private Credit Assets. Specifically, the Advisor believes that the 20% Liquidity Sleeve (with the flexibility to increase the sleeve during times of potentially high redemptions) will provide the Trust with sufficient liquidity to manage redemptions under the vast majority of market conditions. Additionally, because the Trust will target shorter duration loans that are underwritten to generate cash payments of interest and principal amortization of approximately 8% of the Trust's AUM per month, even in the event that the Trust's Liquidity Sleeve is exhausted, it is expected to be replenished by the cash payments generated by the Private Credit Assets. In the event that the cash generated by the Private Credit Assets is insufficient to satisfy incoming redemptions the Trust would then have the ability to facilitate additional redemptions by selling certain of the Private Credit Assets and/or using the Private Credit Assets as collateral for a cash loan from a bank or broker dealer. In a worst case scenario, the Trust would temporarily suspend redemptions. However, as noted above, the Advisor does not expect such a suspension to last for longer than approximately 2.5 months because of the cash expected to be generated by the Private Credit Assets.

In addition to the specific liquidity strategy described above, the Advisor also notes that the small size of loans sourced through Fintech lending platforms will enable the Trust to hold a portfolio that is diversified by sector, source, vintage, count and geography, which will help to manage idiosyncratic risk and ensure a diverse universe of lenders. Further to this point, the small loan size means that the Trust will need to hold a significant number of Private Credit Assets, further ensuring diversity and minimizing the risk that any single Private Credit Asset would have on the portfolio. The Advisor further believes that the cash yields and short duration through regular principal amortization will, in addition to enhancing the liquidity of the Trust, help manage volatility of returns.

Purchases and Redemptions of Creation Units

The Trust will create and redeem Shares from time to time only in large blocks of a specified number of Shares or multiples thereof ("Creation Units"). A Creation Unit is a block of at least 50,000 Shares. Except when aggregated in Creation Units, the Shares are not

redeemable securities. Creation Units are only redeemable by authorized participants.

On any Business Day, an authorized participant may place an order with the Advisor to create one or more Creation Units.⁸ The total cash payment required to create each Creation Unit is the NAV of at least 50,000 Shares on the purchase order date plus the applicable transaction fee.

The procedures by which an authorized participant can redeem one or more Creation Units mirror the procedures for the purchase of Creation Units. On any Business Day, an authorized participant may place an order with the Transfer Agent to redeem one or more Creation Units. The redemption proceeds from the Trust consist of the cash redemption amount. The cash redemption amount is equal to the NAV of the number of Creation Unit(s) of the Trust requested in the authorized participant's redemption order on the business day the redemption order is received by the Transfer Agent, less transaction fees.

Availability of Information

The NAV for the Trust will be calculated by an independent third party once each Business Day and will be disseminated daily to all market participants at the same time.⁹ Pricing information will be available on the Advisor's website including: (1) the prior Business Day's reported NAV, the closing market price or the bid/ask price, daily trading volume, and a calculation of the premium and discount of the closing market price or bid/ask price against the NAV; and (2) data in chart format displaying the frequency distribution of discounts and premiums of the daily closing price against the NAV, within appropriate ranges, for each of the four previous calendar quarters. The Trust will also disclose its portfolio holdings on a daily basis on its website. The aforementioned information will be published as of the close of business and available on the Advisor's website at www.bondbloxetf.com.

Generally, the Trust values its assets using market quotations when they are readily available. Whole loans, asset backed securities and certain other

⁸ Authorized participants have a cut-off time of 2:00 p.m. ET to place creation and redemption orders and orders received after 2:00 p.m. will not be deemed to be received until the following business day.

⁹ NAV means the total assets of the Trust including, but not limited to, all cash and cash equivalents and private credit assets, less any liabilities, divided by the total number of Shares outstanding. The Trust's NAV is generally calculated at 4 p.m. ET.

types of private credit assets that Trust may hold may not have readily available market quotations and typically are fair valued based on prices provided by a third-party pricing service. Each loan and fractional loan is valued using inputs that factor in individual borrower performance data (e.g. payment history) that is updated as often as the NAV is calculated to reflect new information about the borrower or loan. Generally, fair value represents the amount that the Trust could reasonably expect to receive if its assets were sold at the time of valuation, based on information reasonably available at the time the valuation is made and that the Advisor and the Sub-Advisor believe to be reliable. Fair valuation involves subjective judgments, and it is possible that the fair value determined for an asset may differ materially from the value that could be realized upon the sale of such asset.

Quotation and last-sale information regarding the Shares will be disseminated through the facilities of the Consolidated Tape Association (“CTA”). Pricing information regarding cash equivalents in which the Trust will invest is generally available through nationally recognized data services providers, such as Reuters and Bloomberg, through subscription agreements.

Additional information regarding the Trust and the Shares, including investment strategies, risks, creation and redemption procedures, fees, portfolio holdings, disclosure policies, distributions and taxes will be included in the registration statement.

The Intraday Indicative Value (“IIV”) will be updated during Regular Trading Hours to reflect changes in the value of the Trust’s holdings during the trading day. The IIV disseminated during Regular Trading Hours should not be viewed as an actual real-time update of the NAV, which will be calculated only once at the end of each trading day. The IIV will be updated every 15 seconds, as calculated by the Exchange or a third-party financial data provider during the Exchange’s Regular Trading Hours (9:30 a.m. to 4:00 p.m. Eastern time). The IIV will be widely disseminated on a per Share basis every 15 seconds during the Exchange’s Regular Trading Hours through the facilities of the consolidated tape association (CTA) and Consolidated Quotation System (CQS) high speed lines. In addition, the IIV will be available through on-line information services such as Bloomberg and Reuters.

Initial and Continued Listing

The Shares will conform to the initial and continued listing criteria under BZX Rule 14.11(f)(4). A minimum of 100,000 Shares will be outstanding at the commencement of trading on the Exchange. The Exchange will obtain a representation from the Advisor of the Shares that the NAV per Share for the Trust will be calculated daily and will be made available to all market participants at the same time.

Trading Halts

With respect to trading halts, the Exchange may consider all relevant factors in exercising its discretion to halt or suspend trading in the Shares. The Exchange will halt trading in the Shares under the conditions specified in BZX Rule 11.18. Trading may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. These may include: (1) the extent to which trading is not occurring in the securities and/or the financial instruments composing the daily disclosed portfolio of the Trust; or (2) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present.

Trading Rules

The Exchange deems the Shares to be equity securities, thus rendering trading in the Shares subject to the Exchange’s existing rules governing the trading of equity securities. The Exchange will allow trading in the Shares from 8:00 a.m. until 8:00 p.m. ET and has the appropriate rules to facilitate transactions in the Shares during all trading sessions. As provided in BZX Rule 11.11(a), the minimum price variation for quoting and entry of orders in securities traded on the Exchange is \$0.01, with the exception of securities that are priced less than \$1.00, for which the minimum price variation for order entry is \$0.0001.

Surveillance

Trading of the Shares through the Exchange will be subject to the Exchange’s existing surveillance for securities traded on the Exchange. The Exchange also has a general policy prohibiting the distribution of material, non-public information by its employees.

All statements and representations made in this filing regarding (a) the description of the portfolio, reference assets, and index, (b) limitations on portfolio holdings or reference assets, or (c) the applicability of Exchange rules shall constitute continued listing

requirements for listing the Shares on the Exchange. The issuer has represented to the Exchange that it will advise the Exchange of any failure by the Trust or the Shares to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will surveil for compliance with the continued listing requirements. If the Trust or the Shares are not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under Exchange Rule 14.12.

Information Circular

Prior to the commencement of trading, the Exchange will inform its members in an Information Circular of the special characteristics and risks associated with trading the Shares. Specifically, the Information Circular will discuss the following: (1) the procedures for purchases and redemptions of Shares in Creation Units (and that Shares are not individually redeemable); (2) BZX Rule 3.7, which imposes suitability obligations on Exchange members with respect to recommending transactions in the Shares to customers; (3) Interpretation and Policy .01 of BZX Rule 3.7 which imposes a duty of due diligence on its Members to learn the essential facts relating to every customer prior to trading the Shares;¹⁰ (4) how information regarding the IIV and the Trust’s holdings is disseminated; (5) the risks involved in trading the Shares during the Pre-Opening¹¹ and After Hours Trading Sessions¹² when an updated IIV will not be calculated or publicly disseminated; (6) the requirement that members deliver a prospectus to investors purchasing newly issued Shares prior to or concurrently with the confirmation of a transaction; and (7) trading information.

In addition, the Information Circular will advise members, prior to the commencement of trading, of the prospectus delivery requirements applicable to the Trust. Members purchasing Shares from the Trust for

¹⁰ Specifically, in part, Interpretation and Policy .01 of Rule 3.7 states “[n]o Member shall recommend to a customer a transaction in any such product unless the Member has a reasonable basis for believing at the time of making the recommendation that the customer has such knowledge and experience in financial matters that he may reasonably be expected to be capable of evaluating the risks of the recommended transaction and is financially able to bear the risks of the recommended position.”

¹¹ The Pre-Opening Session is from 8:00 a.m. to 9:30 a.m. ET.

¹² The After Hours Trading Session is from 4 p.m. to 8:00 p.m. ET.

resale to investors will deliver a prospectus to such investors. The Information Circular will also discuss any exemptive, no-action and interpretive relief granted by the Commission from any rules under the Act. In addition, the Information Circular will reference that the Trust is subject to various fees and expenses described in the Trust's registration statement. The Information Circular will also disclose the trading hours of the Shares and the applicable NAV calculation time for the Shares. The Information Circular will disclose that information about the Shares will be publicly available on the Advisor's website.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.¹³ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹⁴ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹⁵ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange notes that the Commission has approved numerous series of Trust Issued Receipts¹⁶ to be listed on U.S. national securities exchanges and several other vehicles holding private credit instruments have recently launched.¹⁷

Trust Issued Receipts

Trading of the Shares through the Exchange will be subject to the Exchange's existing surveillance for

securities traded on the Exchange. The Exchange also has a general policy prohibiting the distribution of material, non-public information by its employees. All statements and representations made in this filing regarding (a) the description of the portfolio, reference assets, and index, (b) limitations on portfolio holdings or reference assets, or (c) the applicability of Exchange rules shall constitute continued listing requirements for listing the Shares on the Exchange. The issuer has represented to the Exchange that it will advise the Exchange of any failure by the Trust or the Shares to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will surveil for compliance with the continued listing requirements. If the Trust or the Shares are not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under Exchange Rule 14.12.

The Sponsor has represented to the Exchange that it will advise the Exchange of any failure by the Trust or the Shares to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Exchange Act, the Exchange will surveil for compliance with the continued listing requirements. If the Trust or the Shares are not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under Exchange Rule 14.12.

Investable Instruments and Trust Liquidity

The Trust intends to hold Private Credit Assets, investment grade bonds, U.S. Treasuries, shares of certain exchange traded funds that invest in U.S. Treasuries or other short-term, interest bearing assets and cash and cash equivalents, including funds of an affiliated Trust for which the Advisor acts as the investment adviser.

The Trust plans to participate in the rapidly growing market for small balance, short duration, amortizing loans enabled by Fintech lending platforms. The Advisor believes consumer and small business loans sourced through Fintech lending platforms offer investors attractive value propositions that have primarily been available to institutional investors. However, there is limited sell-side liquidity available in the market for Private Credit Assets. As such, the Advisor is proposing to utilize the following strategy to facilitate redemptions in the Trust:

1. The Trust will maintain a portion of the portfolio in its Liquidity Sleeve. Under normal circumstances, the Trust expects to hold approximately 20% of the portfolio in these liquid assets. The Advisor expects that it will generally be able to fulfill redemption orders using this position. The Advisor may also strategically increase the size of the Liquidity Sleeve in order to better facilitate anticipated redemptions by retaining, rather than distributing the paydowns from Private Credit Assets as further described below.

2. The remaining 80% of the Trust's holdings will consist of Private Credit Assets. These are short duration, high yielding products that are underwritten to pay a weighted average of 8% of the total Trust AUM per month or 10% of the private credit AUM per month. The underwritten yields are currently 10% and at origination typically have an underwritten average duration limit of 3 years, with a target for the initial portfolio of less than 1 year. The monthly cash flows, which are received throughout the month, may be reinvested to the extent necessary to maintain the approximate 20/80 allocation between the Liquidity Sleeve and Private Credit Assets described above. The Trust will consider the current level of the Liquidity Sleeve, among other factors, in determining its distribution policy, and may determine to use accumulated cash received from payments of interest and principal on its Private Credit Assets as well as cash proceeds from loan repayments to replenish or increase the Liquidity Sleeve before distributing such amounts to shareholders.

3. In the event that the cash and cash equivalents required to accommodate a series of redemptions or a single large redemption approaches the size of the Trust's Liquidity Sleeve, the Trust may:

- Sell Private Credit Assets in the secondary market to raise cash;
- Arrange a line of credit or other financing facility with a bank or broker dealer, using the portfolio of Private Credit Assets as collateral.

These options will likely come at a cost to the Trust or may not be available to the Trust depending on market conditions.

4. In the event that items 1–3 above do not provide sufficient cash and cash equivalents to the Liquidity Sleeve to accommodate redemptions in the Trust, redemptions may be suspended until the Trust accumulates enough cash to facilitate additional redemptions, which the Advisor does not expect to last for longer than approximately 2.5 months. In the event that the Advisor implements a restriction on

¹⁵ *Id.*

¹⁶ See Exchange Rule 14.11(f).

¹⁷ See "First Private-Credit ETFs Launch," December 3, 2024, <https://www.wsj.com/livecoverage/stock-market-today-dow-sp500-nasdaq-live-12-03-2024/card/first-private-credit-etfs-launch-s0032D60wa2zg12uy7pY>.

redemptions, the Shares on the secondary market may trade at deep discount. The discount could potentially serve to prompt investors to buy shares and potentially trigger primary market activity.

The Advisor believes that the liquidity strategy laid out above will be sufficient to address concerns that may arise from the relative illiquidity of the secondary market for selling Private Credit Assets. Specifically, the Advisor believes that the 20% Liquidity Sleeve (with the flexibility to increase the sleeve during times of potentially high redemptions) will provide the Trust with sufficient liquidity to manage redemptions under the vast majority of market conditions. Additionally, because the Trust will target shorter duration loans that are underwritten to generate cash payments of interest and principal amortization of approximately 8% of the Trust's AUM per month, even in the event that the Trust's Liquidity Sleeve is exhausted, it is expected to be replenished by the cash payments generated by the Private Credit Assets. In the event that the cash generated by the Private Credit Assets is insufficient to satisfy incoming redemptions the Trust would then have the ability to facilitate additional redemptions by selling certain of the Private Credit Assets and/or using the Private Credit Assets as collateral for a cash loan from a bank or broker dealer. In a worst case scenario, the Trust would temporarily suspend redemptions. However, as noted above, the Advisor does not expect such a suspension to last for longer than approximately 2.5 months because of the cash expected to be generated by the Private Credit Assets.

In addition to the specific liquidity strategy described above, the Advisor also notes that the small size of loans sourced through Fintech lending platforms will enable the Trust to hold a portfolio that is diversified by sector, source, vintage, count and geography, which will help to manage idiosyncratic risk and ensure a diverse universe of lenders. Further to this point, the small loan size means that the Trust will need to hold a significant number of Private Credit Assets, further ensuring diversity and minimizing the risk that any single Private Credit Assets would have on the portfolio. The Advisor further believes that the cash yields and short duration through regular principal amortization will, in addition to enhancing the liquidity of the Trust, help manage volatility of returns.

Availability of Information

The NAV for the Trust will be calculated by an independent third

party once each Business Day and will be disseminated daily to all market participants at the same time. Pricing information will be available on the Advisor's website including: (1) the prior Business Day's reported NAV, the closing market price or the bid/ask price, daily trading volume, and a calculation of the premium and discount of the closing market price or bid/ask price against the NAV; and (2) data in chart format displaying the frequency distribution of discounts and premiums of the daily closing price against the NAV, within appropriate ranges, for each of the four previous calendar quarters. The Trust will also disclose its portfolio holdings on a daily basis on its website. The aforementioned information will be published as of the close of business and available on the Advisor's website at www.bondbloxxtf.com.

Generally, the Trust values its assets using market quotations when they are readily available. Whole loans, asset backed securities and certain other types of private credit assets that Trust may hold may not have readily available market quotations and typically are fair valued based on prices provided by a third-party pricing service. Each loan and fractional loan is valued using inputs that factor in individual borrower performance data (e.g. payment history) that is updated as often as the NAV is calculated to reflect new information about the borrower or loan. Generally, fair value represents the amount that the Trust could reasonably expect to receive if its assets were sold at the time of valuation, based on information reasonably available at the time the valuation is made and that the Advisor and the Sub-Advisor believe to be reliable. Fair valuation involves subjective judgments, and it is possible that the fair value determined for an asset may differ materially from the value that could be realized upon the sale of such asset.

Quotation and last-sale information regarding the Shares will be disseminated through the facilities of the CTA. Pricing information regarding cash equivalents in which the Trust will invest is generally available through nationally recognized data services providers, such as Reuters and Bloomberg, through subscription agreements.

Additional information regarding the Trust and the Shares, including investment strategies, risks, creation and redemption procedures, fees, portfolio holdings, disclosure policies, distributions and taxes will be included in the registration statement.

The IIV will be updated during Regular Trading Hours to reflect changes in the value of the Trust's holdings during the trading day. The IIV disseminated during Regular Trading Hours should not be viewed as an actual real-time update of the NAV, which will be calculated only once at the end of each trading day. The IIV will be updated every 15 seconds, as calculated by the Exchange or a third-party financial data provider during the Exchange's Regular Trading Hours (9:30 a.m. to 4:00 p.m. Eastern time). The IIV will be widely disseminated on a per Share basis every 15 seconds during the Exchange's Regular Trading Hours through the facilities of the consolidated tape association (CTA) and Consolidated Quotation System (CQS) high speed lines. In addition, the IIV will be available through on-line information services such as Bloomberg and Reuters.

The proposed rule change is designed to perfect the mechanism of a free and open market, and, in general, to protect investors and the public interest in that it will facilitate the listing and trading of an additional type of exchange-traded product that will enhance competition among market participants, to the benefit of investors and the marketplace. As noted above, the Exchange has in place surveillance procedures relating to trading in the Shares and may obtain information via ISG from other exchanges that are members of ISG or with which the Exchange has entered into a surveillance sharing agreement. The Exchange or FINRA, on behalf of the Exchange, or both, will communicate as needed regarding trading in the Shares. The Exchange may obtain information regarding trading in the Shares from other exchanges who are members or affiliates of the ISG,¹⁸ or with which the Exchange has entered into a comprehensive surveillance sharing agreement.

For the above reasons, the Exchange believes that the proposed rule change is consistent with the requirements of Section 6(b)(5) of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that the proposed rule change, rather will facilitate the listing and trading of an additional exchange-

¹⁸ For a list of the current members and affiliate members of ISG, see www.isgportal.com.

traded product that will enhance competition among both market participants and listing venues, to the benefit of investors and the marketplace.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

A. by order approve or disapprove such proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBZX-2024-126 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-CboeBZX-2024-126. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the

proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBZX-2024-126 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101983; File No. SR-CBOE-2024-055]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Update its Fees Schedule in Connection With the Exchange's Plans To List and Trade Options That Overlie the Cboe Bitcoin U.S. ETF Index and the Cboe Mini Bitcoin U.S. ETF Index

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 11, 2024, Cboe Exchange, Inc. (the "Exchange" or "Cboe Options") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

¹⁹ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the "Exchange" or "Cboe Options") proposes to update its Fees Schedule in connection with the Exchange's plans to list and trade options that overlie the Cboe Bitcoin U.S. ETF Index and the Cboe Mini Bitcoin U.S. ETF Index. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (<http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx>), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fees Schedule in connection with its plans to list and trade options that overlie the Cboe Bitcoin U.S. ETF Index ("CBTX options") and the Cboe Mini Bitcoin U.S. ETF Index ("MBTX options").³ By way of background, the Cboe Bitcoin U.S. ETF Index is a modified market capitalization-weighted index that is designed to track the performance of a basket of spot Bitcoin ETFs listed on U.S. exchanges. CBTX options are cash-settled options based on the Cboe Bitcoin U.S. ETF Index. MBTX options are cash-settled options on the Cboe Mini Bitcoin U.S. ETF Index, which is a reduced value index based on 1/10th the value of the Cboe Bitcoin U.S. ETF Index.

The Exchange proposes to amend its Fees Schedule to accommodate the

³ The Exchange initially filed the proposed fee changes on December 2, 2024 (SR-CBOE-2024-054). On December 11, 2024, the Exchange withdrew that filing and submitted this proposal.

planned listing and trading of CBTX and MBTX options.

Standard Transaction Rates and Surcharges

First, the Exchange proposes to adopt certain standard transaction fees in connection with CBTX and MBTX options. Specifically, the proposed rule change adopts certain fees for CBTX and MBTX options in the Rate Table for All Products Excluding Underlying Symbol A,⁴ as follows:

- Adopts fee code B1, appended to all Customer (capacity “C”) orders in CBTX options and assesses a fee of \$0.50 per contract;⁵

- Adopts fee code B2, which is appended to all non-Customer (*i.e.*, Clearing Trading Permit Holders (capacity “F”), Non-Clearing Trading Permit Holder Affiliates (capacity “L”), Market-Maker (capacity “M”), Broker-Dealers (capacity “B”), Joint Back-Offices (capacity “J”), Non-Trading Permit Holder Market-Makers (capacity “N”), and Professionals (capacity “U”)) orders in CBTX options and assesses a fee of \$1.00 per contract;

- Adopts fee code M1, appended to all Customer (capacity “C”) orders in MBTX options and assesses a fee of \$0.25 per contract; and

- Adopts fee code M2, which is appended to all non-Customer (*i.e.*, Clearing Trading Permit Holders (capacity “F”), Non-Clearing Trading Permit Holder Affiliates (capacity “L”), Market-Maker (capacity “M”), Broker-Dealers (capacity “B”), Joint Back-Offices (capacity “J”), Non-Trading Permit Holder Market-Makers (capacity “N”), and Professionals (capacity “U”)) orders in MBTX options and assesses a fee of \$0.50 per contract.

In addition to the above transaction fees, the proposed rule change also adopts a surcharge to CBTX and MBTX options transactions within the Rate Table—All Products Excluding Underlying Symbol List A. Specifically, the proposed rule change adds CBTX and MBTX options to the list of options for which the FLEX Surcharge Fee of

\$0.10 (capped at \$250 per trade) applies to electronic FLEX orders executed by all capacity codes, except for Cboe Compression Services (“CCS”) and FLEX Micro transactions.⁶

The Exchange also proposes to exclude non-Customer complex orders in CBTX and MBTX from the Complex Surcharge by amending Footnote 35 (appended to the Complex Surcharge) to provide that the Complex Surcharge applies per contract per side surcharge for noncustomer complex order executions that remove liquidity from the Complex Order Book (“COB”) and auction responses in the Complex Order Auction (“COA”) and AIM in all classes except CBTX, MBTX, MRUT, NANOS, XSP, FLEX Micros, Sector Indexes and Underlying Symbol List A.

Fees Programs

The Exchange proposes to exclude CBTX and MBTX options from the Liquidity Provider Sliding Scale, which offers credits on Market-Maker orders where a Market-Maker achieves certain volume thresholds based on total national Market-Maker volume in all underlying symbols, excluding Underlying Symbol List A, MRUT, MXACW, MXUSA, MXWLD, NANOS, XSP and FLEX Micros during the calendar month. Specifically, the proposed rule change updates the Liquidity Provider Sliding Scale table to provide that volume thresholds are based on total national Market-Maker volume in all underlying symbols excluding Underlying Symbol List A, CBTX, MBTX, MRUT, MXACW, MXUSA, MXWLD, NANOS, XSP and FLEX Micros during the calendar month, and that it applies in all underlying symbols excluding Underlying Symbol List A, CBTX, MBTX, MRUT, MXACW, MXUSA, MXWLD, NANOS, XSP and FLEX Micros. The proposed rule change also updates Footnote 10 (appended to the Liquidity Provider Sliding Scale) to provide that the Liquidity Provider Sliding Scale applies to Liquidity Provider (Exchange Market-Maker, DPM and LMM) transaction fees in all products except (1) Underlying Symbol List A, CBTX, MBTX, MRUT, MXACW, MXUSA, MXWLD, NANOS, XSP and FLEX Micros, (2) volume executed in open outcry, and (3) volume executed via AIM Responses.

The proposed rule change also updates Footnote 44 (appended to the Liquidity Provider Sliding Scale Adjustment Table) to exclude CBTX and

MBTX volume from the program by providing (in relevant part) that the Make Rate under the Liquidity Provider Sliding Scale Adjustment Table be derived from a Liquidity Provider’s electronic volume the previous month in all symbols excluding Underlying Symbol List A, CBTX, MBTX, and XSP.

The proposed rule change updates the Volume Incentive Program (“VIP”) table to also exclude CBTX and MBTX volume from the VIP, which currently offers a per contract credit for certain percentage threshold levels of monthly Customer volume in all underlying symbols, excluding Underlying Symbol List A, Sector Indexes, DJX, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, NANOS, XSP and FLEX Micros. The proposed rule change also amends Footnote 36 (appended to the VIP table) to reflect the proposed exclusion of CBTX and MBTX from the VIP by providing (in relevant part) that: the Exchange shall credit each TPH the per contract amount resulting from each public customer (“C” capacity code) order transmitted by that TPH which is executed electronically on the Exchange in all underlying symbols excluding Underlying Symbol List A, Sector Indexes, DJX, CBTX, MBTX, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, NANOS, XSP, FLEX Micros, QCC trades, public customer to public customer electronic complex order executions, and executions related to contracts that are routed to one or more exchanges in connection with the Options Order Protection and Locked/Crossed Market Plan referenced in Rule 5.67, provided the Trading Permit Holder (“TPH”) meets certain percentage thresholds in a month as described in the Volume Incentive Program (VIP) table; the percentage thresholds are calculated based on the percentage of national customer volume in all underlying symbols excluding Underlying Symbol List A, Sector Indexes, CBTX, MBTX, MRUT, MXACW, MXEA, MXEF, MXUSA, MXWLD, NANOS, DJX, XSP, and FLEX Micros entered and executed over the course of the month; and in the event of a Cboe Options System outage or other interruption of electronic trading on Cboe Options, the Exchange will adjust the national customer volume in all underlying symbols excluding Underlying Symbol List A, Sector Indexes, CBTX, MBTX, MRUT, MXACW, MXEA, MXEF, MXUSA, MXWLD, NANOS, DJX, XSP, and FLEX Micros for the entire trading day.

The proposed rule change excludes CBTX and MBTX options from the list of products eligible to receive Break-Up Credits in orders executed in AIM,

⁴ Underlying Symbol List A includes OEX, XEO, RUT, RLG, RLV, RUI, UKXM, SPX (includes SPXW), SPESG and VIX. See Exchange Fees Schedule, Footnote 34.

⁵ Under the proposed changes, the Customer Large Trade Discount Program, set forth in the Exchange Fees Schedule, will apply to Customer orders in CBTX and MBTX (included in “Other Index Options” under the program). Under the program, a customer large trade discount program in the form of a cap on customer (“C” capacity code) transaction fees is in effect for the options set forth in the Customer Large Trade Discount table. For CBTX and MBTX options, regular customer transaction fees will only be charged for up to 5,000 contracts per order, similar to other index options other than VIX, SPX/SPXW, SPESG, and XSP.

⁶ The FLEX Surcharge Fee will only be charged up to the first 2,500 contracts per trade. See Exchange Fees Schedule, Footnote 17.

SAM, FLEX AIM, and FLEX SAM, by amending the Break-Up Credits table to exclude CBTX and MBTX along with the products currently excluded—Underlying Symbol List A, Sector Indexes, DJX, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, NANOS, XSP and FLEX Micros.

The Exchange proposes to exclude CBTX and MBTX options from the Marketing Fee Program by updating the Marketing Fee table to provide that the marketing fee will be assessed on transactions of Market-Makers (including DPMs and LMMs), resulting from customer orders at the per contract rate provided above on all classes of equity options, options on ETFs, options on ETNs and index options, except that the marketing fee shall not apply to Sector Indexes, DJX, CBTX, MBTX, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, XSP, NANOS, FLEX Micros or Underlying Symbol List A. The Exchange notes that, in this way, CBTX and MBTX options will be treated as most of the Exchange's other exclusively listed products that are currently excluded from the Marketing Fee Program. The Exchange does believe that it is necessary at the point of newly listing and trading for CBTX and MBTX options to be eligible for the Marketing Fee Program and may determine in the future to submit a fee filing to add CBTX and MBTX to the Marketing Fee Program if the Exchange believes it would potentially generate more customer order flow in CBTX and MBTX options.

The Exchange proposes to exclude CBTX and MBTX options from the Floor Broker Sliding Scale Rebate Program, which offers rebates for Firm Facilitated and non-Firm Facilitated orders that correspond to certain volume tiers and is designed to incentivize order flow in multiply listed options to the Exchange's trading floor. The Exchange proposes to update the Floor Broker Sliding Scale Rebate Program to provide that the Floor Broker Sliding Scale Rebate Program applies to all products except Underlying Symbol List A, Sector Indexes, DJX, CBTX, MBTX, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, NANOS, XSP and FLEX Micros.

The Exchange next proposes to exclude CBTX and MBTX options from eligibility for the Order Router Subsidy ("ORS") and Complex Order Router Subsidy ("CORS") Programs, in which Participating TPHs or Participating Non-Cboe TPHs may receive a payment from the Exchange for every executed contract routed to the Exchange through their system in certain classes. Specifically, the proposed rule change

updates the ORS/CORS Program tables to provide that ORS/CORS participants whose total aggregate non-customer ORS and CORS volume is greater than 0.25% of the total national volume (excluding volume in options classes included in Underlying Symbol List A, Sector Indexes, DJX, CBTX, MBTX, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, NANOS, XSP or FLEX Micros) will receive an additional payment for all executed contracts exceeding that threshold during a calendar month. The proposed rule change also updates Footnote 29 (appended to the ORS Program table) to provide that Cboe Options does not make payments under the program with respect to executed contracts in options classes included in Underlying Symbols List A, Sector Indexes, DJX, CBTX, MBTX, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, NANOS, XSP or FLEX Micros or with respect to complex orders or spread orders; and updates Footnote 30 (appended to the CORS Program table) to provide that Cboe Options does not make payments under the program with respect to executed contracts in options classes included in Underlying Symbols List A, Sector Indexes, DJX, CBTX, MBTX, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, NANOS, XSP or FLEX Micros.

The Exchange also proposes to amend Footnote 6, which states that in the event of an Exchange System outage or other interruption of electronic trading on the Exchange that lasts longer than 60 minutes, the Exchange will adjust the national volume in all underlying symbols excluding Underlying Symbol List A, Sector Indexes, MRUT, MXEA, MXEF, MXACW, MXUSA, MXWLD, NANOS, DJX, XSP and FLEX Micros for the entire trading day. The Exchange proposes to add CBTX and MBTX options to the list of options.

The Exchange also proposes to exclude Firm (*i.e.*, Clearing Trading Permit Holders (capacity "F") and Non-Clearing Trading Permit Holder Affiliates (capacity "L")) transactions in CBTX and MBTX from the Clearing TPH Fee Cap. Specifically, it amends footnote 22 (appended to the Clearing TPH Fee Cap table) to provide that all non-facilitation business executed in AIM or open outcry, or as a QCC or FLEX transaction, transaction fees for Clearing TPH Proprietary and/or their Non-TPH Affiliates in all products except CBTX, MBTX, MRUT, NANOS, XSP, FLEX Micros, Sector Indexes and Underlying Symbol List A, in the aggregate, are capped at \$65,000 per month per Clearing TPH. The proposed rule change additionally updates Footnote 11 (which is also appended to

the Clearing TPH Fee Cap table) to provide that the Clearing TPH Fee Cap in all products except CBTX, MBTX, MRUT, NANOS, XSP, FLEX Micros, Underlying Symbol List A and Sector Indexes (the "Fee Cap"), the Cboe Options Proprietary Products Sliding Scale for Clearing TPH Proprietary Orders, and the Clearing TPH Proprietary VIX Sliding Scale apply to (i) Clearing TPH proprietary orders ("F" capacity code), and (ii) orders of Non-TPH Affiliates of a Clearing TPH.

LMM Incentive Programs

Finally, the Exchange proposes to adopt financial programs in connection with CBTX and MBTX options for LMMs appointed to the programs (collectively, the "LMM Incentive Programs").⁷ Each LMM Incentive Program provides a rebate to TPHs with LMM appointments to the respective incentive program that meet certain quoting standards in the applicable series in a month. The Exchange notes that meeting or exceeding the quoting standards (as proposed; described in further detail below) in each of the LMM Incentive Program products to receive the applicable rebate (as proposed; described in further detail below) is optional for an LMM appointed to a program. Rather, an LMM appointed to an incentive program is eligible to receive the corresponding rebate if it satisfies the applicable quoting standards, which the Exchange believes encourages the LMM to provide liquidity in the applicable class and trading session. The Exchange may consider other exceptions to the programs' quoting standards based on demonstrated legal or regulatory requirements or other mitigating circumstances. In calculating whether an LMM appointed to an incentive program meets the applicable program's quoting standards each month, the Exchange excludes from the calculation in that month the business day in which the LMM missed meeting or exceeding the quoting standards in the highest number of the applicable series.

The Exchange notes that it currently offers several LMM Incentive Programs for other proprietary Exchange products. The proposed heightened quoting standards are similar to the detail and

⁷ See Exchange Rule 3.55(a). In advance of the LMM Incentive Program effective date, the Exchange will send a notice to solicit applications from interested TPHs for the LMM role and will, from among those applications, select the program LMMs. Factors to be considered by the Exchange in selecting LMMs include adequacy of capital, experience in trading options, presence in the trading crowd, adherence to Exchange rules and ability to meet the obligations specified in Rule 5.55.

format (corresponding premiums, quote widths, and sizes) of the quoting standards currently in place for LMM Incentive Programs for other proprietary Exchange products,⁸ and, similar to the LMM Incentive Programs with respect to other propriety [sic] Exchange products, the heightened quoting requirements offered by each of the proposed LMM Incentive Programs are designed to incentivize LMMs appointed to the LMM Incentive Programs to provide liquidity in CBTX and MBTX options during the trading

day upon their listing and trading on the Exchange and thereafter, which, in turn, would provide greater trading opportunities, added market transparency and enhanced price discovery for all market participants in CBTX and MBTX options.

The Exchange first proposes to adopt a MBTX/MBTXW LMM Incentive Program (“MBTX LMM Incentive Program”). As proposed, the MBTX LMM Incentive Program provides that if an LMM appointed to the MBTX LMM Incentive Program provides continuous electronic quotes during Regular

Trading Hours (“RTH”) that meet or exceed the proposed heightened quoting standards (below) in at least 85% of MBTX series 85% of the time in a given month, the LMM will receive (i) a payment for that month in the amount of \$10,000 (or pro-rated amount if an appointment begins after the first trading day of the month or ends prior to the last trading day of the month) for that month and (ii) a credit of \$0.25/contract applied to all MBTX contracts executed in Market-Maker capacity during RTH.

	6 days or less		7 days to 14 days		15 days to 60 days		61 to 120 days		121 to 270 days	
	Width	Size	Width	Size	Width	Size	Width	Size	Width	Size
\$0.00–\$5.00	\$0.15	20	\$0.20	15	\$0.25	10	\$0.30	5	\$0.80	5
\$5.01–\$15.00	0.50	20	0.35	15	0.40	10	0.50	5	1.00	5
\$15.01–\$20.00	1.00	5	1.50	5	0.50	10	0.50	5	2.00	3
\$20.01–\$50.00	1.20	5	3.00	5	4.00	5	1.00	5	5.00	3
\$50.01–\$100.00	5.00	1	8.00	1	8.00	1	8.00	1	8.00	3

Greater than \$200.00	10.00	1	12.00	1	14.00	1	14.00	1	16.00	1

The Exchange next proposes to adopt a CBTX/CBTXW LMM Incentive Program (“CBTX LMM Incentive Program”). As proposed, the CBTX LMM Incentive Program provides that if an LMM appointed to the CBTX LMM Incentive Program provides continuous

electronic quotes during RTH that meet or exceed the proposed heightened quoting standards (below) in at least 85% of CBTX series 85% of the time in a given month, the LMM will receive (i) a payment for that month in the amount of \$10,000 (or pro-rated amount if an

appointment begins after the first trading day of the month or ends prior to the last trading day of the month) and (ii) a credit of \$0.50/contract applied to all CBTX contracts executed in Market-Maker capacity during RTH.

	6 days or less		7 days to 14 days		15 days to 60 days		61 to 120 days		121 to 270 days	
	Width	Size	Width	Size	Width	Size	Width	Size	Width	Size
\$0.00–\$5.00	\$0.40	10	\$0.60	10	\$1.00	10	\$1.00	5	\$2.00	5
\$5.01–\$15.00	0.80	10	1.50	10	1.50	10	1.50	5	3.00	5
\$15.01–\$20.00	2.00	5	3.00	5	3.50	5	3.50	5	5.00	5
\$20.01–\$50.00	4.00	5	5.00	5	5.00	5	5.00	5	8.00	3
\$50.01–\$100.00	6.00	5	8.00	5	8.00	5	8.00	5	12.00	3
\$100.01–\$200.00	12.00	1	12.00	1	12.00	1	12.00	3	12.00	1
Greater than \$200.00	16.00	1	16.00	1	16.00	1	16.00	1	18.00	1

The heightened quoting requirements offered by the CBTX and MBTX LMM Incentive Programs are designed to incentivize LMMs appointed to the LMM Incentive Programs to provide significant liquidity in CBTX and MBTX options during the trading day upon their listing and trading on the Exchange, which, in turn, would provide greater trading opportunities, added market transparency and enhanced price discovery for all market

participants in CBTX and MBTX options.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁹ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹⁰ requirements that the rules of

an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

⁸ See Exchange Fees Schedule, “MRUT LMM Incentive Program”, “MSCI LMM Incentive Program”, “MXACW LMM Incentive Program”, “MXUSA LMM Incentive Program”, “MXWLD LMM Incentive Program”, “NANOS LMM Incentive

Program”, “GTH VIX/VIXW LMM Incentive Program”, “GTH1 SPX/SPXW LMM Incentive Program”, “GTH2 SPX/SPXW LMM Incentive Program”, “RTH XSP LMM Incentive Program”, “GTH1 XSP LMM Incentive Program”, “GTH2 XSP

LMM Incentive Program”, and “RTH SPESG LMM Incentive Program”.

⁹ 15 U.S.C. 78f(b).

¹⁰ 15 U.S.C. 78f(b)(5).

Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹¹ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4) of the Act,¹² which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its TPHs and other persons using its facilities.

Standard Transaction Rates and Surcharges

The Exchange believes that the proposed amendments to the Fees Schedule in connection with standard transaction rates and surcharges for CBTX and MBTX options transactions are reasonable, equitable and not unfairly discriminatory. The Exchange believes that the proposed standard transaction rates for Customer and non-Customer orders in CBTX and MBTX options are reasonable. Specifically, the proposed fees are in line with or less than fees for transactions in similar industry products,¹³ when taking into account adjustments for notional size differences, based on the spot value of the underlying index of CBTX and MBTX options as compared to the spot value of other similar industry products and considering the difference in multipliers among the various products.

Additionally, the Exchange believes it is reasonable to charge different fee amounts to different user types in the manner proposed because the proposed fees are consistent with the price differentiation that exists today for other index products. Moreover, the Exchange believes that it is reasonable to assess lower fees for MBTX options orders (as compared to CBTX options orders), because of the relation between MBTX options and CBTX options, wherein MBTX options overlie an index with 1/10th the value of the index that underlies CBTX options.

The Exchange believes it is reasonable to apply the FLEX Surcharge Fee to CBTX and MBTX options, as the FLEX Surcharge Fee assists the Exchange in recouping the cost of developing and maintaining the FLEX system. Moreover, the Exchange believes it is reasonable to exclude CBTX and MBTX options from the Complex Surcharge because the proposed surcharge exclusions will provide consistency

between the fees assessed for orders in other proprietary products, including MRUT, NANOS, XSP, FLEX Micros, Sector Indexes and Underlying Symbol List A.

The Exchange believes the proposed standard transaction rates and exclusion from certain surcharges are equitable and not unfairly discriminatory because they will apply automatically and uniformly to all capacities as applicable (*i.e.*, Customer and non-Customer), in CBTX and MBTX options. The Exchange also believes that it is equitable and not unfairly discriminatory to assess lower fees to Customers as compared to other market participants because Customer order flow enhances liquidity on the Exchange for the benefit of all market participants. Specifically, Customer liquidity benefits all market participants by providing more trading opportunities, which attracts Market-Makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants. The fees offered to Customers are intended to attract more Customer trading volume to the Exchange. Moreover, the options industry has a long history of providing preferential pricing to Customers, and the Exchange's current Fees Schedule currently does so in many places, as do the fees structures of many other exchanges. Finally, all fee amounts listed as applying to Customers will be applied equally to all Customers (meaning that all Customers will be assessed the same amount).

Fees Programs

The Exchange believes that the proposed updates to the Fees Schedule in connection with the application of certain fees programs to transactions in CBTX and MBTX options are reasonable, equitable and not unfairly discriminatory. The Exchange believes it is reasonable to exclude CBTX and MBTX options from the Liquidity Provider Sliding Scale, the VIP, Break-Up Credits applicable to Customer Agency Orders in AIM and SAM, the Marketing Fee, the Floor Broker Sliding Scale Rebate Program, and the ORS/CORS program because other proprietary index products are also excepted from these programs.¹⁴ Moreover, the Exchange notes that the

proposed rule change does not alter any of the existing programs, but instead, merely proposes not to include transactions in CBTX and MBTX options in those programs.

The Exchange believes that excluding CBTX and MBTX options transactions from certain fees programs is equitable and not unfairly discriminatory because the programs will equally not apply to, or exclude in the same manner, all market participants' orders in CBTX and MBTX options. The Exchange notes that the proposed rule change does not alter any of the existing program rates or volume calculations, but instead, merely proposes to include (or not to) include transactions in CBTX and MBTX options in those programs and volume calculations in the same way that transactions in proprietary index products are (or are not) currently included.

LMM Incentive Programs

The Exchange believes the proposed LMM Incentive Programs are reasonable, equitable and not unfairly discriminatory. Particularly, the proposed CBTX and MBTX LMM Incentive Programs are reasonable financial incentive programs because the proposed heightened quoting standards and rebate amount for meeting the heightened quoting standards in each CBTX and MBTX series, as applicable, are reasonably designed to incentivize LMMs appointed to the Programs to meet the proposed heightened quoting standards during RTH for CBTX and MBTX, as applicable, thereby providing liquid and active markets, which facilitates tighter spreads, increased trading opportunities, and overall enhanced market quality to the benefit of all market participants, particularly in newly listed and traded products on the Exchange during the trading day.

The Exchange believes that the proposed heightened quoting standards are reasonable because they are similar to the detail and format (corresponding premiums, quote widths, and sizes) of the quoting standards currently in place for LMM Incentive Programs for other proprietary Exchange products.¹⁵ The Exchange believes the proposed

¹⁵ See Exchange Fees Schedule, "MRUT LMM Incentive Program", "MSCI LMM Incentive Program", "MXACW LMM Incentive Program", "MXUSA LMM Incentive Program", "MXWLD LMM Incentive Program", "NANOS LMM Incentive Program", "GTH VIX/VIXW LMM Incentive Program", "GTH1 SPX/SPXW LMM Incentive Program", "GTH2 SPX/SPXW LMM Incentive Program", "RTH XSP LMM Incentive Program", "GTH1 XSP LMM Incentive Program", "GTH2 XSP LMM Incentive Program", and "RTH SPESG LMM Incentive Program".

¹¹ *Id.*

¹² 15 U.S.C. 78f(b)(4).

¹³ See CME Fees Schedule, Bitcoin Futures & Options, Micro Bitcoin Futures & Options.

¹⁴ See Exchange Fees Schedule, Liquidity Provider Sliding Scale, Volume Incentive Program, Break-Up Credits, Marketing Fee, Floor Broker Sliding Scale Rebate Program, Order Router Subsidy Program and Complex Order Router Subsidy Program.

heightened quoting standards for the CBTX and MBTX LMM Incentive Programs reasonably reflect what the Exchange believes will be typical market characteristics in CBTX and MBTX options, given their relative spot value, notional value and general anticipated retail base.

Further, the Exchange believes the proposed percentage of the series (85% of each series) in which an LMM must meet the proposed heightened quoting requirements is reasonable given the new market ecosystem for CBTX and MBTX options. Because the CBTX/MBTX market is still new and not yet as robust as that of other products, such as SPX/SPXW, it may pose more difficulty for LMMs in CBTX and MBTX options to offset risk and hedge, thus more difficulty in achieving the heightened quoting requirement. Therefore, the Exchange believes the proposed percentage of the series is reasonably commensurate with the potentially higher risk, and challenge in achieving the heightened quoting requirements, LMMs would have to take on in the new CBTX/MBTX market. The Exchange notes that the percentage of the series in place under the LMM Programs for MXACW and MXUSA options (90% of series and 85% of series, respectively), which are comparable in terms of potentially higher risk and challenge in achieving heightened quoting requirements, are tailored in a similar manner.

The Exchange further believes that the proposed rebate amounts received for CBTX (\$10,000) and MBTX (\$10,000) options are reasonable because they are comparable to the rebates offered by other LMM Incentive Programs offered by the Exchange. For example, the LMM Programs for MXACW and MXUSA options, which are comparable in terms of potentially higher risk and challenge in achieving heightened quoting requirements, each currently offer \$10,000 per class, per month to appointed LMMs for MXACW and MXUSA options if the heightened quoting standards are met in a given month. The Exchange believes that the proposed rebate amounts are reasonably designed to continue to incentivize an LMM appointed to the respective program to meet the applicable quoting standards for CBTX and MBTX options, thereby providing liquid and active markets, which facilitates tighter spreads, increased trading opportunities, and overall enhanced market quality to the benefit of all market participants.

Similarly, the Exchange believes that the additional per contract credits for Market-Maker CBTX and MBTX options

orders executed in RTH offered by the LMM Incentive Programs are reasonable and equitable as LMM Incentive Programs for other products have, in the past, offered similar additional per contract credits.¹⁶ All appointed LMMs are eligible for the additional per contract credits, which is designed to incentivize LMMs in these newly listed products to provide liquid and active markets in these products to encourage their growth.

Finally, the Exchange believes it is equitable and not unfairly discriminatory to offer the financial incentive to LMMs appointed to the LMM Incentive Programs, because it will benefit all market participants trading in CBTX and MBTX during RTH by encouraging the appointed LMMs to satisfy the heightened quoting standards, which incentivizes continuous increased liquidity and thereby may provide more trading opportunities and tighter spreads. Indeed, the Exchange notes that these LMMs serve a crucial role in providing quotes and the opportunity for market participants to trade CBTX and MBTX, which can lead to increased volume, providing for robust markets. The Exchange ultimately proposes to offer the CBTX and MBTX LMM Incentive Programs to sufficiently incentivize the appointed LMMs to provide key liquidity and active markets in the newly listed and traded CBTX and MBTX options during the trading day to encourage liquidity, thereby protecting investors and the public interest. The Exchange also notes that an LMM appointed to the LMM Incentive Programs may undertake added costs each month to satisfy heightened quoting standards (e.g., having to purchase additional logical connectivity). The Exchange believes the proposed programs are equitable and not unfairly discriminatory because similar programs currently exist for LMMs appointed to programs in other proprietary products,¹⁷ and the proposed programs will equally apply to any TPH that is appointed as an LMM to the each of the LMM Incentive Programs, as applicable. Additionally, if an appointed LMM does not satisfy the heightened quoting standards in CBTX and MBTX (as applicable) for any given

month, then it simply will not receive the offered payment for that month.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed CBTX and MBTX transaction fees for the separate types of market participants will be assessed automatically and uniformly to all such market participants, *i.e.*, all qualifying Customer orders in CBTX and MBTX options will be assessed the same amount and all qualifying non-Customer orders in CBTX and MBTX will be assessed the same amount. As discussed above, while different fees are assessed to different market participants in some circumstances, these different market participants have different obligations and different circumstances as discussed above. For example, preferential pricing to Customers is a long-standing options industry practice which serves to enhance Customer order flow, thereby attracting Market-Makers to facilitate tighter spreads and trading opportunities to the benefit of all market participants. Additionally, the proposed surcharge will be assessed uniformly to all market participants to whom the FLEX Surcharge applies.

Further, the proposed rule change will uniformly exclude all transactions in CBTX and MBTX options from certain programs and surcharge (*i.e.*, Liquidity Provider Sliding Scale, the VIP, Break-Up Credits applicable to Customer Agency Orders in AIM and SAM, the Marketing Fee, the Floor Broker Sliding Scale Rebate Program, the ORS/CORS program, and the Complex Surcharge), as it currently does for many of the Exchange's other proprietary products. Overall, the proposed rule change is designed to increase incentive for customer order flow providers to submit customer order flow in a newly listed and traded product, which, as indicated above, contributes to a more robust market ecosystem to the benefit of all market participants.

The Exchange also does not believe that the proposed LMM Incentive Programs for CBTX and MBTX options would impose any burden on intramarket competition because it applies to all LMMs appointed to each of the LMM Incentive Programs in a

¹⁶ See, for example, Securities Exchange Act Release No. 96510 (December 15, 2022), 87 FR 78150 (December 21, 2022) (SR-CBOE-2022-061), wherein the Exchange adopted an additional per contract credit for Market-Maker XSP orders executed in RTH, as part of its GTH1 XSP LMM Incentive Program.

¹⁷ *Id.*

uniform manner, in the same way similar programs apply to appointed LMMs in other proprietary products today. To the extent appointed LMMs receive a benefit that other market participants do not, these LMMs in their role as Market-Makers on the Exchange have different obligations and are held to different standards. For example, Market-Makers play a crucial role in providing active and liquid markets in their appointed products, especially in the newly developing CBTX and MBTX market, thereby providing a robust market which benefits all market participants. Such Market-Makers also have obligations and regulatory requirements that other participants do not have. The Exchange also notes that an LMM appointed to an incentive program may undertake added costs each month to satisfy heightened quoting standards (e.g., having to purchase additional logical connectivity). The Exchange also notes that the LMM Incentive Programs, like the other LMM Incentive Programs, is designed to attract additional order flow to the Exchange, wherein greater liquidity benefits all market participants by providing more trading opportunities, tighter spreads, and added market transparency and price discovery, and signals to other market participants to direct their order flow to those markets, thereby contributing to robust levels of liquidity.

The Exchange does not believe that the proposed rule change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because the proposed rule changes apply only to products exclusively listed on the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁸ and paragraph (f) of Rule 19b-4¹⁹ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the

public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CBOE-2024-055 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-CBOE-2024-055. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number

SR-CBOE-2024-055 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁰

Vanessa A. Countryman,
Secretary.

[FR Doc. 2024-30902 Filed 12-27-24; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102018; File No. SR-OCC-2024-018]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Update The Options Clearing Corporation's By-Laws

December 20, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Exchange Act" or "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 19, 2024, the Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared primarily by OCC. OCC filed the proposed rule change pursuant to Section 19(b)(3)(A)³ of the Act and Rule 19b-4(f)(6)⁴ thereunder. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would amend the definition of "Fund Share" in Article I of OCC's By-Laws (including the Interpretation and Policy), consistent with the staff advisory ("Advisory") recently issued by the Commodity Futures Trading Commission ("CFTC") regarding the clearing of options on spot commodity exchange traded funds ("ETFs")⁵ (hereinafter "Proposed Rule Change").

The proposed changes to OCC's By-Laws are included [sic] in Exhibit 5 of

²⁰ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ 15 U.S.C. 78s(b)(3)(A).

⁴ 17 CFR 240.19b-4(f)(6).

⁵ See CFTC Staff Advisory Relating to the Clearing of Options on Spot Commodity Exchange Traded Funds (ETFs), Letter No. 24-16 (Nov. 15, 2024), available at <https://www.cftc.gov/csl/24-16/download>.

¹⁸ 15 U.S.C. 78s(b)(3)(A).

¹⁹ 17 CFR 240.19b-4(f).

File No. SR-OCC-2024-018. Material proposed to be added to OCC's By-Laws as currently in effect is underlined and material proposed to be deleted is marked in strikethrough text. All capitalized terms not defined herein have the same meaning as set forth in the OCC By-Laws and Rules.⁶

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

OCC clears and settles options on ETFs. Such ETFs are classified under the definition of "Fund Share" in OCC's By-Laws. An Interpretation and Policy to the fund share definition lists by name certain precious metals commodity-based ETFs for which OCC can provide clearance and settlement services on related options and security futures contracts. This practice began in 2008 because of the uncertain jurisdictional status of options or security futures on precious metals commodity-based ETFs.⁷ As exchanges have launched more of these products since 2008, OCC has, for each product, (i) sought CFTC exemptive relief pursuant to Section 4(c) of the Commodity Exchange Act ("CEA")⁸ from regulations that would be inconsistent with the trading and

clearing of these products if the underlying were considered a commodity that is not a security⁹ and then (ii) filed a proposed rule change with the Commission to incorporate the name of the product for which relief was granted into the Interpretation and Policy of the fund share definition.¹⁰

On November 15, 2024, the CFTC issued the Advisory relating to the clearing of options on spot commodity ETFs. The Advisory provided that it is "substantially likely" that these spot commodity ETF shares would be held to be securities.¹¹ The Advisory further concluded that "these shares listed on SEC registered national securities exchanges do not implicate the [CFTC's] jurisdiction, and therefore, the clearing of these options by OCC would be undertaken in its capacity as a registered clearing agency subject to SEC oversight."¹² OCC believes the Advisory largely forecloses any potential liability under the CEA, as amended, including the argument that OCC's clearance and settlement of options on spot commodity ETFs constitutes a violation of the CEA.

In light of the Advisory, OCC will no longer seek product-by-product exemptive relief from the CFTC to clear spot commodity-based ETF products. OCC will, therefore, no longer need to specifically identify commodity-based products in the fund share definition. OCC proposes to make clarifications to the fund share definition based on the contents of the Advisory and delete the Interpretation and Policy to the fund share definition, which is no longer relevant or necessary, as further described below.

1. Purpose

The purpose of the Proposed Rule Change is to amend the definition of "Fund Share" in Article I of OCC's By-Laws (including the Interpretation and Policy), consistent with the Advisory recently issued by the CFTC regarding the clearing of options on spot commodity ETFs.¹³ Currently, Article I, Section 1, of OCC's By-Laws defines "Fund Share" as a publicly traded

security (as defined in Section 3(a)(10) of the Act, as amended) that represents an interest in a trust, investment company, commodity pool, or similar entity holding and/or trading in one or more investments. Where the investments are commodities, the amended definition would clarify that such term is subject to any applicable advisory, exemption or other relief or guidance issued by the CFTC. This proposed change is intended to facilitate the clearance of these products in a manner that is consistent with the Advisory and applicable regulations.

Additionally, the Interpretation and Policy to the fund share definition currently identifies on a product-by-product basis specific precious metals commodity-based ETFs that OCC includes within the definition of fund share. The Commission previously approved proposed rule changes by OCC in which OCC added these precious metals commodity-based ETFs to the Interpretation and Policy.¹⁴ As discussed above, the purpose of adding specific ETF names to the Interpretation and Policy was to clarify the jurisdictional status of options or security futures on these products, and was done in conjunction with the CFTC's issuance of a 4(c) order exempting the trading and clearing of the specific ETF names from CFTC regulations with which trading and clearing would be inconsistent if the products were commodities that were not securities.¹⁵ Because the Advisory finds it "substantially likely" likely that spot commodity ETF shares would be held to be securities, OCC believes that it no longer needs to seek product-by-product exemptive relief from the CFTC to clear spot commodity-based ETF products, including precious metals commodity-based ETFs. OCC will no longer need to specifically identify commodity-based products in the fund share definition. OCC thus proposes a clean-up change to delete in its entirety the Interpretation and Policy to the fund share definition, which is no longer

⁶ OCC's By-Laws and Rules can be found on OCC's public website: <https://www.theocc.com/Company-Information/Documents-and-Archives/By-Laws-and-Rules>.

⁷ In seeking comment to an OCC request to clear and settle options on streetTRACKS® Gold Trust Shares, the CFTC indicated that, "novel derivative products that implicate areas of overlapping regulatory concern should be permitted to trade in either or both a CFTC- or SEC- regulated environment [. . .]" The CFTC further noted that in considering the exemption, "the CFTC need not—and does not—find that [these options] are (or are not) subject to the CEA" and that the options were "novel instruments" and the "determination as to [their] jurisdiction is not straightforward." Given their potential usefulness to the market, however, the [CFTC] believes that this may be an appropriate case for issuing an exemption without making a finding as to the nature of these particular instruments." See Proposal to Exempt the Trading and Clearing of Certain Products Related to streetTRACKS® Gold Trust Shares, 73 FR 21917, at 21918 (Apr. 23, 2008).

relevant or necessary, to avoid potential confusion.

In general, OCC believes that the proposed changes would provide additional certainty to market participants regarding OCC's treatment of fund shares, including commodity-based ETF products, in accordance with applicable regulatory requirements and guidance. OCC believes that this proposed rule change does not make any substantive modifications to the fund share definition. Instead, the proposed changes update the definition with current details and remove those details that have become irrelevant due to the Advisory. Such changes would further ensure that OCC's By-Laws remain up-to-date, clear, and transparent.

2. Statutory Basis

OCC believes the Proposed Rule Change is consistent with Section 17A of the Exchange Act¹⁶ and the rules and regulations thereunder applicable to OCC. In particular, OCC believes that the Proposed Rule Change is consistent with Section 17A(b)(3)(F) of the Act¹⁷ and Rule 17Ad-22(e)(21)¹⁸ thereunder, for the reasons described below.

Section 17A(b)(3)(F)¹⁹ of the Act requires, among other things, that the rules of a clearing agency be designed to remove impediments to and perfect the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions. OCC believes the proposed changes would facilitate the clearance of spot commodity-based ETF products in a manner that is consistent with regulatory requirements and guidance. OCC believes the proposed changes would provide additional certainty to market participants regarding OCC's treatment of such products, which would reduce the likelihood that OCC Clearing Members would have jurisdictional concerns over trading these products. Reducing jurisdictional concerns that could impede the trading of new products would remove impediments to and perfect the mechanism of a national system for the prompt and accurate clearance and settlement of securities transactions by providing certainty regarding the treatment of fund shares.

Commission Rule 17Ad-22(e)(21) requires OCC to establish, implement, maintain, and enforce written policies and procedures reasonably designed to "be efficient and effective in meeting

the requirements of its [clearing members] and the markets it serves" ²⁰ OCC believes the Proposed Rule Change is consistent with this provision because, as described above, by providing clarity in its By-Laws, it will (i) reduce the likelihood that OCC Clearing Members would have jurisdictional concerns over trading these products and (ii) ensure that OCC's By-Laws remain up-to-date and transparent. The proposed changes to the fund share definition are intended to facilitate the clearance of commodity-based ETF products in a manner that is consistent with the Advisory and applicable regulations and to provide additional certainty regarding OCC's treatment of such products. The proposed deletion of the Interpretation and Policy to the fund share definition would prevent potential confusion, as this provision is no longer relevant or necessary. Moreover, the Proposed Rule Change is not inconsistent with the By-Laws and Rules of OCC.

(B) Clearing Agency's Statement on Burden on Competition

Section 17A(b)(3)(I) of the Act²¹ requires that the rules of a clearing agency not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. OCC does not believe that the proposed amendments to the fund share definition, including the Interpretation and Policy, would impose any burden on competition because they would merely establish clear treatment of fund shares in a manner that is consistent with regulatory requirements and guidance. OCC believes that this Proposed Rule Change does not make any substantive modifications to the fund share definition but, instead, updates the definition with current details and removes those details that have become irrelevant due to the Advisory. The proposed changes would not inhibit access to OCC's services in any way, would apply to all Clearing Members uniformly and would not disadvantage or favor any particular user in relationship to another user. Accordingly, OCC does not believe that the Proposed Rule Change would have any impact or impose a burden on competition.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments were not and are not intended to be solicited with respect to the Proposed Rule Change, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

- (i) significantly affect the protection of investors or the public interest;
- (ii) impose any significant burden on competition; and
- (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act²² and Rule 19b-4(f)(6)²³ thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.²⁴

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-OCC-2024-018 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-OCC-2024-018. This file

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102017; File No. SR-CboeEDGX-2024-086]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend its Fees Schedule Related to Physical Port Fees

December 20, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934

(“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 18, 2024, Cboe EDGX Exchange, Inc. (the “Exchange” or “EDGX”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. (the “Exchange” or “EDGX Options”) proposes to amend its Fees Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/options/regulation/rule_filings/edgx/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule relating to physical connectivity fees.³

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ The Exchange initially filed the proposed fee changes on July 3, 2023 (SR-CboeEDGX-2023-045). On September 1, 2023, the Exchange withdrew that filing and submitted SR-CboeEDGX-2023-058. On September 29, 2023, the Securities and Exchange Commission issued a Suspension of and Order Instituting Proceedings to Determine whether to Approve or Disapprove a Proposed Rule Change to Amend its Fees Schedule Related to Physical Port Fees (the “OIP”) in anticipation of a possible U.S. government shutdown. On September 29, 2023, the Exchange filed the proposed fee change (SR-CboeEDGX-2023-063). On October 13, 2023, the

By way of background, a physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,500 per physical port for a 1 gigabit (“Gb”) circuit and \$7,500 per physical port for a 10 Gb circuit. The Exchange proposes to increase the monthly fee for 10 Gb physical ports from \$7,500 to \$8,500 per port. The Exchange notes the proposed fee change better enables it to continue to maintain and improve its market technology and services and also notes that the proposed fee amount, even as amended, continues to be in line with, or even lower than, amounts assessed by other exchanges for similar connections.⁴ The Exchange also notes that a single 10 Gb physical port can be used to access the Systems of the following affiliate exchanges: the Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc. (options and equities platforms), Cboe EDGA Exchange, Inc., and Cboe C2 Exchange, Inc., (“Affiliate Exchanges”).⁵ Notably, only one monthly fee currently (and will continue) to apply per 10 Gb physical port regardless of how many affiliated exchanges are accessed through that one port.⁶

Exchange withdrew that filing and submitted SR-CboeEDGX-2023-064. On December 12, 2023, the Exchange withdrew that filing and submitted SR-CboeEDGX-2023-080. On February 12, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-014. On April 9, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-021. On June 7, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-036. On August 29, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-057. On October 25, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-072. On December 18, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ See e.g., The Nasdaq Stock Market LLC (“Nasdaq”), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gb Ultra fiber connection to the respective exchange, which is analogous to the Exchange's 10Gb physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gb LX LCN Circuits (which are analogous to the Exchange's 10 Gb physical port) are assessed \$22,000 per month, per port.

⁵ The Affiliate Exchanges are also submitting contemporaneous identical rule filings.

⁶ The Exchange notes that conversely, other exchange groups charge separate port fees for access to separate, but affiliated, exchanges. See e.g., Securities and Exchange Release No. 99822 (March 21, 2024), 89 FR 21337 (March 27, 2024) (SR-MIAX-2024-016).

²⁵ 17 CFR 200.30-3(a)(12).

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁷ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁸ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁹ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)¹⁰ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities. This belief is based on various factors as described below.

First, the Exchange believes its proposal is reasonable as it reflects a moderate increase in physical connectivity fees for 10 Gb physical ports and its offering, even as amended, continues to be more affordable as compared to analogous physical connectivity offerings at competitor exchanges.¹¹

The Exchange also believes the current fee does not properly reflect the quality of the service and product, as fees for 10 Gb physical ports have been static in nominal terms since 2018, and

therefore falling in real terms due to inflation. As a general matter, the Producer Price Index (“PPI”) is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (CPI), that measure price change from the purchaser’s perspective.¹² About 10,000 PPIs for individual products and groups of products are tracked and released each month.¹³ PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector’s output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing, hosting and related services (“Data PPI”) and more particularly the more granular service line Data Processing, Hosting and Related Services: Hosting, Active Server Pages (ASP), and Other Information Technology (IT) Infrastructure Provisioning Services.¹⁴

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (“BLS”) as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS—518210 in the North American Industry Classification System (“NAICS”).¹⁵ According to the BLS “[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services

market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers’ transactions and data. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services and price movements for the service line NAICS 518210 index are based on changes in the revenue received by companies that provide, among other things, IT infrastructure provisioning services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.”¹⁶

The service (product) lines for which price indexes are available under the Data PPI are: (1) business process management services (2) data management and storage information transformation and other services and (3) hosting ASP and other IT infrastructure provisioning services. The most apt of these industry and product specific categorizations for purposes of this present proposal to modify fees for the 10 Gb physical port fee measures inflation for the provision of data processing, hosting and related services as well as other information technology infrastructure provisioning services which BLS identifies as identified as NAICS—5182105.¹⁷ The Exchange believes that this measure of inflation is particularly appropriate because the Exchange’s connectivity services involve hosting and providing connections to its customers’ telecommunications and information technology equipment, as well as preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity. The Exchange also uses its “proprietary software,” *i.e.*, its own proprietary matching engine software, to receive orders on the Exchange’s proprietary trading platform as well as to collect, organize, store and report customers’ transactions. In other words, the Exchange is in the business of data processing, hosting, ASP, and providing other IT infrastructure provisioning services.

⁷ 15 U.S.C. 78f(b).

⁸ 15 U.S.C. 78f(b)(5).

⁹ *Id.*

¹⁰ 15 U.S.C. 78f(b)(4).

¹¹ See *e.g.*, The Nasdaq Stock Market LLC (“Nasdaq”), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gbps Ultra fiber connection to the respective exchange, which is analogous to the Exchange’s 10Gbps physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gbps LX LCN Circuits (which are analogous to the Exchange’s 10 Gbps physical port) are assessed \$22,000 per month, per port.

¹² See <https://www.bls.gov/ppi/overview.htm>.

¹³ *Id.*

¹⁴ Provisioning is the process of preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity, according to user requirements. It is a critical part of IT operations, as it ensures that computing resources are available when needed and that they are set up and connected to work correctly.

¹⁵ See <https://www.bls.gov/ppi/overview.htm>. Among the industry-specific PPIs is for North American Industry Classification System (“NAICS”) Code 518210: “Data Processing and Related Services.” NAICS index codes categorize products and services that are common to particular industries. According to BLS, these codes “provide comparability with a wide assortment of industry-based data for other economic programs, including productivity, production, employment, wages, and earnings.”

¹⁶ See <https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-services-industry-naics-518210.htm>.

¹⁷ See <https://data.bls.gov/timeseries/PCU5182105182105>.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. For example, the average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.¹⁸

As noted above, the current 10 Gb physical port fee remained unchanged for six years, particularly since June 2018.¹⁹ Since its last increase over 6 years ago however, there has been notable inflation, including under the industry- and product-specific PPI, which as described above is a tailored measure of inflation. Particularly, the Hosting, ASP and other IT Infrastructure Provisioning Services inflation measure had a starting value of 102.2 in June 2018 (the month the Exchange started assessing the current fee) and an ending value of 115.66 in November 2024, representing an 13% increase.²⁰ This indicates that companies who are also in the hosting ASP and other IT infrastructure provisioning services have generally increased prices for a specified service covered under NAICS 5182105 by an average of 13% during this period.

The Exchange also believes that it is reasonable to increase its fees to compensate for inflation because, over time, inflation has degraded the value of each dollar that the Exchange collects in fees, such that the real revenue collected today is considerably less than that same revenue collected in 2018. The impact of this inflationary effect is also independent of any change in the Exchange's costs in providing its goods and services. The Exchange therefore believes that it is reasonable for it to offset, in part, this erosion in the value of the revenues it collects. Additionally, the Exchange historically does not increase fees every year notwithstanding

inflation. Other exchanges have also filed for increases in certain fees, based in part on comparisons to inflation.²¹ Accordingly, based on the above-described percentage change based on an industry- and product-specific inflationary measure, and in conjunction with the rationale further described above and below, the Exchange believes the proposed fee increase is reasonable.

Next, the Exchange believes significant investments into, and enhanced performance of, the Exchange, in the years following the last 10 Gb physical port fee increase support the reasonableness of the proposed fee increase. These investments enhanced the quality of its services, as measured by, among other things, increased throughput and faster processing speeds. Customers have therefore greatly benefitted from these investments, while the Exchange's ability to recoup its investments has been hampered.

For example, the Exchange and its affiliated exchanges recently launched a multi-year initiative to improve Cboe Exchange Platform performance and capacity requirements to increase competitiveness, support growth and advance a consistent world class platform. The goal of the project, among other things, is to provide faster and more consistent order handling and matching performance for options, while ensuring quicker processing time and supporting increasing volumes and capacity needs. For example, the Exchange recently performed switch hardware upgrades. Particularly, the Exchange replaced existing customer access switches with newer models, which the Exchange believes resulted in increased determinism. The recent switch upgrades also increased the Exchange's capacity to accommodate more physical ports by nearly 50%. Network bandwidth was also increased nearly two-fold as a result of the upgrades, which among other things, can lead to reduce message queuing. The Exchange also believes these newer models result in less natural variance in the processing of messages. The Exchange notes that it incurred costs associated with purchasing and upgrading to these newer models, of which the Exchange has not otherwise passed through or offset.

As of April 1, 2024, market participants also having the option of connecting to a new data center (*i.e.*, Secaucus NY6 Data Center ("NY6")), in

addition to the current data centers at NY4 and NY5. The Exchange made NY6 available in response to customer requests in connection with their need for additional space and capacity. In order to make this space available, the Exchange expended significant resources to prepare this space, and will also incur ongoing costs with respect to maintaining this offering, including costs related to power, space, fiber, cabinets, panels, labor and maintenance of racks. The Exchange also incurred a large cost with respect to ensuring NY6 would be latency equalized, as it is for NY4 and NY5.

The Exchange also has made various other improvements since the current physical port rates were adopted in 2018. For example, the Exchange has updated its customer portal to provide more transparency with respect to firms' respective connectivity subscriptions, enabling them to better monitor, evaluate and adjust their connections based on their evolving business needs. The Exchange also performs proactive audits on a weekly basis to ensure that all customer cross connects continue to fall within allowable tolerances for Latency Equalized connections. Accordingly, the Exchange expended, and will continue to expend, resources to innovate and modernize technology so that it may benefit its Members and continue to compete among other options markets. The ability to continue to innovate with technology and offer new products to market participants allows the Exchange to remain competitive in the options space which currently has 18 registered options markets and potential new entrants. If the Exchange were not able to assess incrementally higher fees for its connectivity, it would effectively impact how the Exchange manages its technology and hamper the Exchange's ability to continue to invest in and fund access services in a manner that allows it to meet existing and anticipated access demands of market participants. Disapproval of fee changes such as the proposal herein, could also have the adverse effect of discouraging an exchange from improving its operations and implementing innovative technology to the benefit of market participants if it believes the Commission would later prevent that exchange from recouping costs and monetizing its operational enhancements, thus adversely impacting competition as well as the interests of market participants and investors.

Finally, the proposed fee is also the same as is concurrently being proposed for its Affiliate Exchanges. Further,

¹⁸ See <https://www.usinflationcalculator.com/inflation/consumer-price-index-and-annual-percent-changes-from-1913-to-2008/>.

¹⁹ See Securities and Exchange Release No. 83430 (June 14, 2018), 83 FR 28697 (June 20, 2018) (SR-CboeEDGX-2018-017).

²⁰ See <https://data.bls.gov/timeseries/PCU5182105182105>.

²¹ See, *e.g.*, Securities Exchange Act Release Nos. 34-100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR-NYSEARCA-2024-79).

Members are able to utilize a single port to connect to all of its Affiliate Exchanges and will only be charged one single fee (*i.e.*, a market participant will only be assessed the proposed \$8,500 even if it uses that physical port to connect to the Exchange and another (or even all 6) of its Affiliate Exchanges. Particularly, the Exchange believes the proposed monthly per port fee is reasonable, equitable and not unfairly discriminatory since as the Exchange has determined to not charge multiple fees for the same port. Indeed, the Exchange notes that several ports are in fact purchased and utilized across one or more of the Exchange's affiliated Exchanges (and charged only once).

The Exchange also believes that the proposed fee change is not unfairly discriminatory because it would be assessed uniformly across all market participants that purchase the physical ports. The Exchange believes increasing the fee for 10 Gb physical ports and charging a higher fee as compared to the 1 Gb physical port is equitable as the 1 Gb physical port is 1/10th the size of the 10 Gb physical port and therefore does not offer access to many of the products and services offered by the Exchange (*e.g.*, ability to receive certain market data products). Thus, the value of the 1 Gb alternative is lower than the value of the 10 Gb alternative, when measured based on the type of Exchange access it offers. Moreover, market participants that purchase 10 Gb physical ports utilize the most bandwidth and therefore consume the most resources from the network. The Exchange also anticipates that firms that utilize 10 Gb ports will benefit the most from the Exchange's investment in offering NY6 as the Exchange anticipates there will be much higher quantities of 10 Gb physical ports connecting from NY6 as compared to 1 Gb ports. Indeed, the Exchange notes that 10 Gb physical ports account for approximately 90% of physical ports across the NY4, NY5, and NY6 data centers, and to date, 80% of new port connections in NY6 are 10 Gb ports. As such, the Exchange believes the proposed fee change for 10 Gb physical ports is reasonable and appropriately allocated.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed fee change will not impact intramarket competition because it will apply to all similarly situated Members equally (*i.e.*, all market participants that

choose to purchase the 10 Gb physical port). Additionally, the Exchange does not believe its proposed pricing will impose a barrier to entry to smaller participants and notes that its proposed connectivity pricing is associated with relative usage of the various market participants. For example, market participants with modest capacity needs can continue to buy the less expensive 1 Gb physical port (which cost is not changing) or may choose to obtain access via a third-party re-seller. While pricing may be increased for the larger capacity physical ports, such options provide far more capacity and are purchased by those that consume more resources from the network.

Accordingly, the proposed connectivity fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation reflects the network resources consumed by the various size of market participants—lowest bandwidth consuming members pay the least, and highest bandwidth consuming members pay the most.

The proposed fee change also does not impose a burden on competition or on other Self-Regulatory Organizations that is not necessary or appropriate. As described above, the Exchange evaluated its proposed fee change using objective and stable metric with limited volatility. Utilizing Data Processing PPI over a specified period of time is a reasonable means of recouping a portion of the Exchange's investment in maintaining and enhancing the connectivity service identified above. The Exchange believes utilizing Data Processing PPI, a tailored measure of inflation, to increase certain connectivity fees to recoup the Exchange's investment in maintaining and enhancing its services and products would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²² and paragraph (f) of Rule 19b-4²³ thereunder. At any time within 60 days of the filing of the proposed rule

change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeEDGX-2024-086 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-CboeEDGX-2024-086. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available

²² 15 U.S.C. 78s(b)(3)(A).

²³ 17 CFR 240.19b-4(f).

publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeEDGX-2024-086 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁴

J. Matthew DeLesDernier,

Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101992; File No. SR-CboeBYX-2024-048]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Update its Fee Schedule Regarding Uncontrolled External Distributors

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 16, 2024, Cboe BYX Exchange, Inc. (the “Exchange” or “BYX”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (the “Exchange” or “BYX”) proposes to update its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s website (http://markets.cboe.com/us/equities/regulation/rule_filings/BYX/), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Market Data section of its Fee Schedule to adopt a new fee waiver for Uncontrolled External Distributors.³ Particularly, the Exchange proposes to: (i) adopt a waiver of External Distribution fees for Uncontrolled External Distributors of the Summary Depth Feed and Top Feed, and (ii) adopt fee waiver of External Distribution fees and Data Consolidation fees for Uncontrolled External Distributors of the Cboe One Summary Feed and Cboe One Premium Feed.⁴

BYX Top and Summary Depth Data

By way of background, the Exchange offers the BYX Top Data Feed, which is a data feed that offers top-of-book quotations and last sale information based on orders entered into the Exchange’s System. The BYX Top Data Feed benefits investors by facilitating their prompt access to real-time top-of-book information contained in BYX Top Data. The Exchange’s affiliated equities exchanges (*i.e.*, Cboe EDGA, Inc. (“EDGA”), Cboe BZX Exchange, Inc. (“BZX”), and Cboe EDGX Exchange, Inc. (“EDGX”) (collectively, “Affiliates” and together with the Exchange, “Cboe Equities Exchanges”) also offer similar top-of-book data feeds. Particularly, each of the Exchange’s Affiliates offer top-of-book quotation and last sale information based on their own quotation and trading activity that is substantially similar to the information

provided by the Exchange through the BYX Top Data Feed.

In addition to BYX Top Data Feed, the Exchange offers BYX Summary Depth Data Feed, which is a data feed that offers aggregated two-sided quotations for all displayed orders entered into the System for up to five (5) price levels. The BYX Summary Depth Data Feed also contains the individual last sale information, Market Status, Trading Status, and Trade Break messages.⁵ The BYX Summary Depth Data Feed benefits investors by facilitating their prompt access to real-time market depth information contained in BYX Summary Depth Data. The Exchange’s Affiliates also offer similar depth-of-book data feeds. Particularly, each of the Exchange’s Affiliates offer depth-of-book quotations up to five (5) price levels based on their own quotation and trading activity that is substantially similar to the information provided by the Exchange through the BYX Summary Depth.

The Exchange proposes to make the following fee changes relating to both BYX Top and BYX Summary Depth.

BYX Top Data Feed and BYX Summary Depth Data Feed New Uncontrolled External Distributor External Distribution Fee Waiver

Currently, the Exchange assesses all External Distributors of BYX Top Data Feed an External Distribution fee of \$250 per month and External Distributors of BYX Summary Depth Data Feed an External Distribution fee of \$2,500 per month.⁶ The Exchange proposes to adopt a fee waiver which will provide that new Uncontrolled External Distributors of the BYX Top and/or Summary Depth feeds will not be charged the External Distributor fees until such time they enlist one or more Users⁷ to receive the BYX Top Feed or Summary Depth Feed (the “New Uncontrolled External Distributor BYX Top and Depth Fee Waiver”).⁸

⁵ See Exchange Rule 11.22(k).

⁶ External Distribution Fees for both BYX Top and Summary Depth are subject to the New External Distributor Credit and eligible for a free trial. See BYX Equities Exchange Fees Schedule, Market Data Fees.

⁷ The Exchange defines a “User” of an Exchange Market Data Product as a natural person, a proprietorship, corporation, partnership or entity, or device (computer or other automated service), that is entitled to receive Exchange data. See BYX Equities Exchange Fees Schedule, Market Data Fees.

⁸ The proposed waivers of the External Distribution fees for each of BYX Top and BYX Summary Depth will be applied separately. For example, when an Uncontrolled External Distributor that is receiving a fee waiver for both BYX Top and BYX Summary Depth enlists a first User for BYX Top, the Uncontrolled External

Continued

²⁴ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ The Exchange initially adopted this fee waiver on December 2, 2024 (SR-CboeBYX-2024-046). On December 16, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ For clarity, the Exchange also proposes to modify the applicable sections of its Fee Schedule for these data feeds to use numbered footnotes in lieu of asterisks.

“Uncontrolled External Distributors” distribute data externally to a User that is not an affiliate of the Uncontrolled Distributor and is unable to control the entitlements of and display of information to such User (*i.e.*, a data feed subscriber).⁹ To be eligible for the New Uncontrolled External Distributor BYX Top and Depth Fee Waiver, a new Uncontrolled External Distributor must not have received the data feed(s) for which it seeks a waiver (BYX Top and/or Depth) within the last 18 months.¹⁰ As discussed further below, the Exchange seeks to adopt the proposed New Uncontrolled External Distributor BYX Top and Depth Fee Waiver to incentivize vendors to adopt the BYX Top and Summary Depth feeds proactively without having to wait for customer demand to start development and integration of data feeds. The Exchange notes that both the Exchange and its Affiliates currently offer similar credits to External Distributors (which both Uncontrolled and Controlled External Distributors are eligible for) for the purposes of allowing them time to enlist new users to receive certain data feeds. For example, the Exchange and its Affiliates currently offer a one (1) month New External Distributor Credit applicable to External Distributors of top-of-book data feeds.¹¹ They also offer a three (3) month new External Credit applicable to External Distributors of summary depth-of-book feeds.¹²

Distributor will no longer eligible to receive the waiver for BYX Top, but will still receive the waiver for BYX Summary Depth until and unless it enlists a new subscriber for BYX Summary Depth. Additionally Uncontrolled External Distributors will receive at least the one month New External Distributor Credit for BYX Top and the New External Distributor credit of at least three months for BYX Summary Depth. For example, if an Uncontrolled Distributor enlists a new subscriber of BYX Summary Depth during its second month taking BYX Summary Depth, the Uncontrolled External Distributor will still receive a credit for the remainder of the second month, as well as the third month under the existing New External Distributor Credit program.

⁹ See Cboe Global Markets North American Data Policies. The Exchange proposes to codify the definition of an “Uncontrolled External Distributor” in the Definitions section of the Market Data Fees schedule in the Exchange’s Fees Schedule for transparency and clarity.

¹⁰ The Exchange notes that its affiliate exchange, EDGA, has a similar 18 month requirement for participants to be considered eligible for the New Member Program. See EDGA Equities Exchange Fees Schedule, New Member Program.

¹¹ With the exception that EDGA does not offer this credit as the monthly cost is \$0. See *e.g.*, EDGA Equities Exchange Fees Schedule, Market Data Fees and EDGX Equities Exchange Fees Schedule, Market Data Fees.

¹² See *e.g.*, EDGX Equities Exchange Fees Schedule, Market Data Fees.

Cboe One Summary and Premium

By way of background, Cboe One Premium is a data feed that disseminates, on a real-time basis, the aggregate best bid and offer (“BBO”) of all displayed orders for securities traded on BYX and its Affiliates and contains optional functionality which enables recipients to receive aggregated two-sided quotations from BYX and its Affiliates for up to five (5) price levels.¹³ The Cboe One Premium Data Feed is created using the data from the Exchange and its Affiliates’ Summary Depth data feeds. In contract, Cboe One Summary is a data feed that disseminates, on a real-time basis, the aggregate BBO of all displayed orders for securities traded on BYX and its affiliated equities exchanges and also contains individual last sale information for the BYX and its affiliated equities exchanges.¹⁴ The Cboe One Summary Data Feed is created using the data from the Exchange and its Affiliates’ Top data feeds. Currently, the Exchange offers the New External Distributor Credit which provide that new External Distributors of the Cboe One Premium Feed and Cboe One Summary Feed will not be charged an External Distributor Fee for their first three (3) months and one (1) month, respectively, in order to allow them to enlist new Users to receive the respective feed.¹⁵ The Exchange proposes to make the following fee change relating to both the Cboe One Summary Data Feed and the Cboe One Premium Data Feed.

Cboe One Summary and Premium New Uncontrolled External Distributor External Distribution and Data Consolidation Fee Waivers

Currently, the Exchange assesses all External Distributors of Cboe One Summary an External Distribution fee of \$5,000 per month and External Distributors of Cboe One Premium an

¹³ The Cboe Aggregated Market (“Cboe One”) Feed is a data feed that contains the aggregate best bid and offer of all displayed orders for securities traded on the Exchange and its affiliated exchanges (*i.e.*, EDGX, EDGA, and BZX). See Exchange Rule 11.22(i). The Cboe One Feed contains optional functionality which enables recipients to receive aggregated two-sided quotations from the Cboe Equities Exchanges for up to five (5) price levels (“Cboe One Premium Feed”). The Cboe One Premium external distribution fee is equal to the aggregate BYX Summary Depth, BYX Summary Depth, EDGA Summary Depth, and BZX Summary Depth external distribution fees.

¹⁴ The Exchange notes that when it first adopted the New External Distributor Credit for Cboe One Summary, it similarly applied for a new External Distributor’s first three (3) months. See Securities Exchange Act Release No. 74284 (February 18, 2015), 80 FR 9792 (February 24, 2015) (SR-BYX–2015–09).

¹⁵ See BYX Fee Schedule.

External Distribution fee of \$12,500 per month.¹⁶ The Exchange proposes to adopt fee waivers which will provide that new Uncontrolled External Distributors of the Cboe One Summary and Cboe One Premium feeds will not be charged either the (i) External Distribution fees nor (ii) Data Consolidation fee until such time they enlist one or more Users to receive the Cboe One Summary or Cboe One Premium Feeds (the “New Uncontrolled External Distributor Cboe One Summary and Cboe One Premium Fee Waiver”).¹⁷ To be eligible for either fee waiver for the applicable feed(s) (Cboe One Summary and/or Cboe One Premium), the new Uncontrolled Data Distributor must not have received the applicable data feed(s) for which it seeks a waiver in the last 18 months.¹⁸ For clarity, similar to the New Uncontrolled External Distributor BYX Top and Depth Fee Waiver, while the Uncontrolled External Distributor receives the New Uncontrolled External Distributor Cboe One Summary and Cboe One Premium Fee Waiver, the Uncontrolled External Distributor will not have any customers receiving this data. As described herein, once the New Uncontrolled External Distributor enlists its first User, it is no longer eligible to receive the New Uncontrolled External Distributor Cboe One Summary and Cboe One Premium Fee Waiver.

To start, the Exchange’s proposal to waive the External Distributor fee for New Uncontrolled External Distributors until a User is enlisted, will prevent the combined cost of subscribing to BYX, EDGA, EDGX, and BZX Summary Depth feeds for new Uncontrolled External Distributors to be greater than those

¹⁶ External Distribution Fees for both Cboe One Summary and Cboe One Premium are subject to the New External Distribution Credit and eligible for a free trial. See BYX Equities Exchange Fees Schedule.

¹⁷ The proposed waivers of the External Distribution fees for each of Cboe One Summary and Cboe One Premium will be applied separately. For example, when an Uncontrolled External Distributor that is receiving a fee waiver for both Cboe One Summary and Cboe One Premium enlists a first User for Cboe One Summary, the Uncontrolled External Distributor will no longer eligible to receive the waiver for Cboe One Summary, but will still receive the waiver for Cboe One Premium until and unless it enlists a new subscriber for Cboe One Premium. Additionally Uncontrolled External Distributors will receive at least the one month New External Distributor Credit for Cboe One Summary and the New External Distributor credit of at least three months for Cboe One Premium. For example, if an Uncontrolled Distributor enlists a new subscriber of Cboe One Premium during its second month taking Cboe One Premium, the Uncontrolled External Distributor will still receive a credit for the remainder of the second month, as well as the third month under the existing New External Distributor Credit program.

¹⁸ See *supra* note 10.

currently charged to subscribe to the Cboe One Premium feed. Similarly, the proposed External Distributor fee waiver for Cboe One Summary will prevent the combined cost of subscribing to BYX, EDGA, EDGX, and BZX Top feeds for new Uncontrolled External Distributors to be greater than those currently charged to subscribe to the Cboe One Summary feed.

Next, the Exchange proposes to waive the Data Consolidation fee for New Uncontrolled External Distributors until its first User enlists for the Cboe One feeds. The Exchange currently charges Distributors of the Cboe One Feeds a separate Data Consolidation Fee of \$1,000 per month, which reflects the value of the aggregation and consolidation function the Exchange performs in creating the Cboe One Options Feed.¹⁹ As stated above, the Exchange creates the Cboe One feeds from data derived from the Cboe Equities Exchanges. Distributors (including vendors) could similarly create a competing product to the Cboe One feeds based on these individual data feeds offered by the Exchanges and could charge its clients a fee that it believes reflects the value of the aggregation and consolidation function.

The Exchange proposes to adopt this fee waiver to similarly prevent new Uncontrolled External Distributors of the Cboe One Summary or Cboe One Premium feeds from being charged a Data Consolidation Fee until such time they enlist one or more Users to receive the Cboe One Premium or Cboe One Summary feeds.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.²⁰ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)²¹ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to,

and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes this proposal is consistent with Section 6(b)(8) of the Act, which requires that the rules of an exchange not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.²² In addition, the Exchange believes that the proposed rule change is consistent with Section 11(A) of the Act as it supports (i) fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets, and (ii) the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities.²³

First, the Exchange notes that the BYX Top Feed, BYX Summary Depth Feed, Cboe One Summary Data Feed and Cboe One Premium Data Feed (together, the “Applicable Feeds”) are distributed and purchased on a voluntary basis, in that neither the Exchange nor market data distributors are required by any rule or regulation to make these data products available. Distributors (including vendors) and Users can therefore discontinue use at any time and for any reason, including due to an assessment of the reasonableness of fees charged. Further, the Exchange is not required to make any proprietary data products available or to offer any specific pricing alternatives to any customers.

The Exchange proposes that the proposed waivers applicable to BYX Top & Depth and Cboe One Feeds (together, the “New Uncontrolled External Distributor Fee Waivers”) only apply to Uncontrolled External Distributors for two reasons. The first is to account for Uncontrolled External Distributors needing to develop to the data feed itself. By way of background, the other category of External Data Distributors are Controlled Distributors.²⁴ Controlled Distributors

both (i) provides data to a User and (ii) controls the entitlements of and display of information to such User.²⁵ Therefore, the key distinction between Uncontrolled Distributors and Controlled Distributors is that Uncontrolled Distributors distribute a data feed and Controlled Distributors enable visible data for one of its Users. The proposed fee waivers will allow Uncontrolled External Distributors the necessary time to develop to the data feed itself and program all of the different messages, fields and flags and not subject them to any fees until such time they are able to recoup their costs from end-users. Additionally, once the data feed is setup on the Uncontrolled External Distributors end, there are typically long lead times for Uncontrolled External Distributors to onboard new downstream data feed customers. The lead times, or sales cycles, are vastly different for Uncontrolled versus Controlled Distributors, as Uncontrolled Distributors are attempting to locate Users who need to receive a real-time market data feed for downstream ingestion on their side (whether this be for trading, analysis, or application development). In contrast, Controlled Distributors are only entitling individual Users to view the data on a pre-existing Display application. For an Uncontrolled Distributor to both set up and find its first User as a data feed subscriber, it can easily take several months. As there is more uncertainty with the viability of both developing a data feed and finding Users for this data feed after the Uncontrolled External Distributor develops it, the Exchange believes it is therefore reasonable, equitable and not unfairly discriminatory for this discount to only apply to Uncontrolled External Distributors to encourage development of their data offerings.

The Exchange has also taken into consideration its affiliated relationship with its Affiliates in its design of the proposed waivers²⁶ to ensure that vendors would be able to offer similar products to its Cboe One Summary and Cboe One Premium Feeds on the same terms as the Exchange from a cost perspective. While the Cboe Equities Exchanges are the exclusive distributors of the individual data feeds from which

control the entitlement of and display of info to such User.

²⁵ *Id.*

²⁶ The Exchange notes that its Affiliates will also be proposing to adopt these same credits with the exception of the EDGA Top Data Feed as the External Distribution monthly cost is \$0 for that particular data feed. See EDGA Equities Fees Schedule, Market Data Fees.

¹⁹ See Cboe BYX Fee Schedule. If a vendor distributes the Cboe One Options Feed to another firm, who then re-distributes the Cboe One Options Feed, both entities would be subject to the Data Consolidation Fee. A vendor will only be assessed a single Data Consolidated Fee, even if it distributes Cboe One Options Feed to more than one entity.

²⁰ 15 U.S.C. 78f(b).

²¹ 15 U.S.C. 78f(b)(5).

²² 15 U.S.C. 78f(b)(8).

²³ 15 U.S.C. 78k-1.

²⁴ Controlled Distributors may be Internal or External Distributors. See *supra* note 9. “Controlled External Distributors” provide data to an unaffiliated User (*i.e.*, externally distribute) and unlike Uncontrolled External Distributors, they

certain data elements may be taken to create the Cboe One feeds, they are not the exclusive distributors of the aggregated and consolidated information that comprises the Cboe One feeds. Any entity that receives, or elects to receive, the individual data feeds would be able to, if it so chooses, to create a data feed with the same information included in either of the Cboe One feeds and sell and distribute it to its clients so that it could be received by those clients as quickly as the Cboe One feeds would be received by those same clients. Such entities would also not be assessed any greater fees by the Exchange than the Exchange assess for the Cboe One feeds (*i.e.*, those who elect to distribute and consolidate the individual data fees and those who elect to distribute the Cboe One feeds will all be eligible for the proposed fee waivers offered by the Exchange).

New External Distributor Credit

The Exchange believes it is reasonable to not charge Uncontrolled External Distributors of an Applicable Feed(s) until such time they enlist one or more Users to receive the applicable feed as such Distributors will not be subject to the External Distribution Fees for the applicable product(s) during this period.²⁷ Additionally, the Exchange and its Affiliates offer a similar credit now that all External Distributors, including Controlled External Distributors, may receive.²⁸ The proposed credit is intended to incentivize new Uncontrolled External Distributors to enlist Users to subscribe to the Applicable Feeds in an effort to broaden the products' distribution to data feed Users. While this incentive is not available to Internal Distributors of these products, the Exchange believes it is appropriate as Internal Distributors have no Users outside of their own firm. Furthermore, External Distributors are subject to higher risks of launch as the data is provided outside their own firm. In contrast, Internal Distributors who only subscribe to a specific Exchange offered market data product when there is a need as they themselves are using the information, External Distributors do not use the data themselves, but as noted, take the risk of onboarding the data to sell as a service to downstream customers.²⁹ For these reasons, the

Exchange believes it is appropriate, equitable and not unfairly discriminatory to provide additional incentives to External Distributors so they have sufficient time to test the data within their own systems prior to going live externally. As discussed above, the Exchange also believes it is appropriate to limit this specific credit to Uncontrolled External Distributors given the longer development times associated with both the integration of the data feed and onboarding Users.

Data Consolidation Fee

The Exchange believes it is reasonable to not charge Uncontrolled External Distributors of Cboe One Summary and Cboe One Premium a Data Consolidation Fee until such time they enlist one or more Users to receive the applicable feed as such Distributors will not be subject to the Data Consolidation Fee for the applicable product(s) during this period. For the avoidance of doubt, once an Uncontrolled External Distributor enlists its first User, this waiver will no longer be applicable—at no time will an Uncontrolled External Distributor receive this waiver while it has customers receiving the applicable data feed. As previously discussed, the Exchange believes the proposed Data Consolidation Fee Waiver for Uncontrolled External Distributors is not designed to permit unfair discrimination against Controlled External Distributors because of the longer lead times in the development Uncontrolled External Distributors experience. Further, as previously discussed, the Exchange believes only applying this to a subset of External Distributors and not any Internal Distributors is equitable and not unfairly discriminatory given the additional risk External Distributors assume when building out a product for which they have no existing use cases. Therefore, the Exchange believes the proposed application of the Data Consolidation Fee Waiver is reasonable and would not permit unfair discrimination.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

it and its affiliates, other exchanges have offered similar waivers for external redistribution. See BYX Equities Exchange Fees Schedule, Market Data Fees and Securities Exchange Act Release No. 90407 (November 12, 2020), 85 FR 73570 (November 18, 2020) (SR-NYSE-2020-91).

The proposed rule changes are grounded in the Exchange's efforts to compete more effectively and to assist in mitigating business costs (*i.e.*, the costs associated with the development of data feeds and seeking Users to onboard for such data feeds) for Uncontrolled External Distributors. Further, as previously discussed, the Exchange believes the proposed Data Consolidation Fee Waiver for Uncontrolled External Distributors is not designed to permit unfair discrimination against Controlled External Distributors because of the longer lead times in the development Uncontrolled External Distributors experience. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges. Further, the Exchange believes that these changes will not cause any unnecessary or inappropriate burden on intermarket competition, as the proposed incentive program applies uniformly to all Uncontrolled External Distributors.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act³⁰ and paragraph (f) of Rule 19b-4³¹ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

³⁰ 15 U.S.C. 78s(b)(3)(A).

³¹ 17 CFR 240.19b-4(f).

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBYX-2024-048 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeBYX-2024-048. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBYX-2024-048 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³²

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101994; File No. SR-CboeEDGA-2024-051]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend its Fees Schedule Related to Physical Port Fees

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 18, 2024, Cboe EDGA Exchange, Inc. (the "Exchange" or "EDGA") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (the "Exchange" or "EDGA Equities") proposes to amend its Fees Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/edga/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule relating to physical connectivity fees.³

By way of background, a physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,500 per physical port for a 1 gigabit ("Gb") circuit and \$7,500 per physical port for a 10 Gb circuit. The Exchange proposes to increase the monthly fee for 10 Gb physical ports from \$7,500 to \$8,500 per port. The Exchange notes the proposed fee change better enables it to continue to maintain and improve its market technology and services and also notes that the proposed fee amount, even as amended, continues to be in line with, or even lower than, amounts assessed by other exchanges for similar connections.⁴ The Exchange also notes that a single 10 Gb physical port can be used to access the Systems of the following affiliate exchanges: the Cboe

³ The Exchange initially filed the proposed fee changes on July 3, 2023 (SR-CboeEDGA-2023-011). On September 1, 2023, the Exchange withdrew that filing and submitted SR-CboeEDGA-2023-015. On September 29, 2023, the Securities and Exchange Commission issued a Suspension of and Order Instituting Proceedings to Determine whether to Approve or Disapprove a Proposed Rule Change to Amend its Fees Schedule Related to Physical Port Fees (the "OIP") in anticipation of a possible U.S. government shutdown. On September 29, 2023, the Exchange filed the proposed fee change (SR-CboeEDGA-2023-016). On October 13, 2023, the Exchange withdrew that filing and submitted SR-CboeEDGA-2023-017. On December 12, 2023, the Exchange withdrew that filing and submitted SR-CboeEDGA-2023-022. On February 9, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGA-2024-006. On April 9, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGA-2024-013. On June 7, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGA-2024-022. On August 29, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGA-2024-036. On October 25, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGA-2024-043. On December 18, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ See e.g., The Nasdaq Stock Market LLC ("Nasdaq"), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gb Ultra fiber connection to the respective exchange, which is analogous to the Exchange's 10Gb physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gb LX LCN Circuits (which are analogous to the Exchange's 10 Gb physical port) are assessed \$22,000 per month, per port.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³² 17 CFR 200.30-3(a)(12).

BYX Exchange, Inc., Cboe BZX Exchange, Inc. (options and equities platforms), Cboe EDGX Exchange, Inc. (options and equities platforms), and Cboe C2 Exchange, Inc., (“Affiliate Exchanges”).⁵ Notably, only one monthly fee currently (and will continue) to apply per 10 Gb physical port regardless of how many affiliated exchanges are accessed through that one port.⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁷ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁸ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁹ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)¹⁰ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities. This belief is based on various factors as described below.

First, the Exchange believes its proposal is reasonable as it reflects a moderate increase in physical connectivity fees for 10 Gb physical ports and its offering, even as amended, continues to be more affordable as compared to analogous physical

connectivity offerings at competitor exchanges.¹¹

The Exchange also believes the current fee does not properly reflect the quality of the service and product, as fees for 10 Gb physical ports have been static in nominal terms since 2018, and therefore falling in real terms due to inflation. As a general matter, the Producer Price Index (“PPI”) is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (CPI), that measure price change from the purchaser’s perspective.¹² About 10,000 PPIs for individual products and groups of products are tracked and released each month.¹³ PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector’s output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing, hosting and related services (“Data PPI”) and more particularly the more granular service line Data Processing, Hosting and Related Services: Hosting, Active Server Pages (ASP), and Other Information Technology (IT) Infrastructure Provisioning Services.¹⁴

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (“BLS”) as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS—518210 in the North American

Industry Classification System (“NAICS”).¹⁵ According to the BLS “[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers’ transactions and data. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services and price movements for the service line NAICS 518210 index are based on changes in the revenue received by companies that provide, among other things, IT infrastructure provisioning services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.”¹⁶

The service (product) lines for which price indexes are available under the Data PPI are: (1) business process management services (2) data management and storage information transformation and other services and (3) hosting ASP and other IT infrastructure provisioning services. The most apt of these industry and product specific categorizations for purposes of this present proposal to modify fees for the 10 Gb physical port fee measures inflation for the provision of data processing, hosting and related services as well as other information technology infrastructure provisioning services which BLS identifies as identified as NAICS—5182105.¹⁷ The Exchange believes that this measure of inflation is particularly appropriate because the Exchange’s connectivity services involve hosting and providing connections to its customers’ telecommunications and information

⁵ The Affiliate Exchanges are also submitting contemporaneous identical rule filings.

⁶ The Exchange notes that conversely, other exchange groups charge separate port fees for access to separate, but affiliated, exchanges. See e.g., Securities and Exchange Release No. 99822 (March 21, 2024), 89 FR 21337 (March 27, 2024) (SR-MIAX-2024-016).

⁷ 15 U.S.C. 78f(b).

⁸ 15 U.S.C. 78f(b)(5).

⁹ *Id.*

¹⁰ 15 U.S.C. 78f(b)(4).

¹¹ See e.g., The Nasdaq Stock Market LLC (“Nasdaq”), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gbps Ultra fiber connection to the respective exchange, which is analogous to the Exchange’s 10Gbps physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gbps LX LCN Circuits (which are analogous to the Exchange’s 10 Gbps physical port) are assessed \$22,000 per month, per port.

¹² See <https://www.bls.gov/ppi/overview.htm>.

¹³ *Id.*

¹⁴ Provisioning is the process of preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity, according to user requirements. It is a critical part of IT operations, as it ensures that computing resources are available when needed and that they are set up and connected to work correctly.

¹⁵ See <https://www.bls.gov/ppi/overview.htm>. Among the industry-specific PPIs is for North American Industry Classification System (“NAICS”) Code 518210: “Data Processing and Related Services.” NAICS index codes categorize products and services that are common to particular industries. According to BLS, these codes “provide comparability with a wide assortment of industry-based data for other economic programs, including productivity, production, employment, wages, and earnings.”

¹⁶ See <https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-services-industry-naics-518210.htm>.

¹⁷ See <https://data.bls.gov/timeseries/PCU5182105182105>.

technology equipment, as well as preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity. The Exchange also uses its “proprietary software,” *i.e.*, its own proprietary matching engine software, to receive orders on the Exchange’s proprietary trading platform as well as to collect, organize, and report customers’ transactions. In other words, the Exchange is in the business of data processing, hosting, ASP, and providing other IT infrastructure provisioning services.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. For example, the average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.¹⁸

As noted above, the current 10 Gb physical port fee remained unchanged for six years, particularly since June 2018.¹⁹ Since its last increase over 6 years ago however, there has been notable inflation, including under the industry- and product-specific PPI, which as described above is a tailored measure of inflation. Particularly, the Hosting, ASP and other IT Infrastructure Provisioning Services inflation measure had a starting value of 102.2 in June 2018 (the month the Exchange started assessing the current fee) and an ending value of 115.66 in November 2024, representing an 13% increase.²⁰ This indicates that companies who are also in the hosting ASP and other IT infrastructure provisioning services have generally increased prices for a specified service covered under NAICS 5182105 by an average of 13% during this period.

The Exchange also believes that it is reasonable to increase its fees to

compensate for inflation because, over time, inflation has degraded the value of each dollar that the Exchange collects in fees, such that the real revenue collected today is considerably less than that same revenue collected in 2018. The impact of this inflationary effect is also independent of any change in the Exchange’s costs in providing its goods and services. The Exchange therefore believes that it is reasonable for it to offset, in part, this erosion in the value of the revenues it collects. Additionally, the Exchange historically does not increase fees every year notwithstanding inflation. Other exchanges have also filed for increases in certain fees, based in part on comparisons to inflation.²¹ Accordingly, based on the above-described percentage change based on an industry- and product-specific inflationary measure, and in conjunction with the rationale further described above and below, the Exchange believes the proposed fee increase is reasonable.

Next, the Exchange believes significant investments into, and enhanced performance of, the Exchange, in the years following the last 10 Gb physical port fee increase support the reasonableness of the proposed fee increase. These investments enhanced the quality of its services, as measured by, among other things, increased throughput and faster processing speeds. Customers have therefore greatly benefitted from these investments, while the Exchange’s ability to recoup its investments has been hampered.

For example, the Exchange and its affiliated exchanges recently launched a multi-year initiative to improve Cboe Exchange Platform performance and capacity requirements to increase competitiveness, support growth and advance a consistent world class platform. The goal of the project, among other things, is to provide faster and more consistent order handling and matching performance for options, while ensuring quicker processing time and supporting increasing volumes and capacity needs. For example, the Exchange recently performed switch hardware upgrades. Particularly, the Exchange replaced existing customer access switches with newer models, which the Exchange believes resulted in increased determinism. The recent switch upgrades also increased the Exchange’s capacity to accommodate more physical ports by nearly 50%. Network bandwidth was also increased

nearly two-fold as a result of the upgrades, which among other things, can lead to reduce message queuing. The Exchange also believes these newer models result in less natural variance in the processing of messages. The Exchange notes that it incurred costs associated with purchasing and upgrading to these newer models, of which the Exchange has not otherwise passed through or offset.

As of April 1, 2024, market participants also having the option of connecting to a new data center (*i.e.*, Secaucus NY6 Data Center (“NY6”)), in addition to the current data centers at NY4 and NY5. The Exchange made NY6 available in response to customer requests in connection with their need for additional space and capacity. In order to make this space available, the Exchange expended significant resources to prepare this space, and will also incur ongoing costs with respect to maintaining this offering, including costs related to power, space, fiber, cabinets, panels, labor and maintenance of racks. The Exchange also incurred a large cost with respect to ensuring NY6 would be latency equalized, as it is for NY4 and NY5.

The Exchange also has made various other improvements since the current physical port rates were adopted in 2018. For example, the Exchange has updated its customer portal to provide more transparency with respect to firms’ respective connectivity subscriptions, enabling them to better monitor, evaluate and adjust their connections based on their evolving business needs. The Exchange also performs proactive audits on a weekly basis to ensure that all customer cross connects continue to fall within allowable tolerances for Latency Equalized connections. Accordingly, the Exchange expended, and will continue to expend, resources to innovate and modernize technology so that it may benefit its Members and continue to compete among other equities markets. The ability to continue to innovate with technology and offer new products to market participants allows the Exchange to remain competitive in the equities space which currently has 16 equities markets and potential new entrants. If the Exchange were not able to assess incrementally higher fees for its connectivity, it would effectively impact how the Exchange manages its technology and hamper the Exchange’s ability to continue to invest in and fund access services in a manner that allows it to meet existing and anticipated access demands of market participants. Disapproval of fee changes such as the proposal herein, could also have the adverse effect of discouraging

¹⁸ See <https://www.usinflationcalculator.com/inflation/consumer-price-index-and-annual-percent-changes-from-1913-to-2008/>.

¹⁹ See Securities and Exchange Release No. 83449 (June 15, 2018), 83 FR 28890 (June 21, 2018) (SR–CboeEDGA–2018–010).

²⁰ See <https://data.bls.gov/timeseries/PCU5182105182105>.

²¹ See, *e.g.*, Securities Exchange Act Release Nos. 34–100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR–NYSEARCA–2024–79).

an exchange from improving its operations and implementing innovative technology to the benefit of market participants if it believes the Commission would later prevent that exchange from recouping costs and monetizing its operational enhancements, thus adversely impacting competition as well as the interests of market participants and investors.

Finally, the proposed fee is also the same as is concurrently being proposed for its Affiliate Exchanges. Further, Members are able to utilize a single port to connect to all of its Affiliate Exchanges and will only be charged one single fee (*i.e.*, a market participant will only be assessed the proposed \$8,500 even if it uses that physical port to connect to the Exchange and another (or even all 6) of its Affiliate Exchanges. Particularly, the Exchange believes the proposed monthly per port fee is reasonable, equitable and not unfairly discriminatory since as the Exchange has determined to not charge multiple fees for the same port. Indeed, the Exchange notes that several ports are in fact purchased and utilized across one or more of the Exchange's affiliated Exchanges (and charged only once).

The Exchange also believes that the proposed fee change is not unfairly discriminatory because it would be assessed uniformly across all market participants that purchase the physical ports. The Exchange believes increasing the fee for 10 Gb physical ports and charging a higher fee as compared to the 1 Gb physical port is equitable as the 1 Gb physical port is 1/10th the size of the 10 Gb physical port and therefore does not offer access to many of the products and services offered by the Exchange (*e.g.*, ability to receive certain market data products). Thus, the value of the 1 Gb alternative is lower than the value of the 10 Gb alternative, when measured based on the type of Exchange access it offers. Moreover, market participants that purchase 10 Gb physical ports utilize the most bandwidth and therefore consume the most resources from the network. The Exchange also anticipates that firms that utilize 10 Gb ports will benefit the most from the Exchange's investment in offering NY6 as the Exchange anticipates there will be much higher quantities of 10 Gb physical ports connecting from NY6 as compared to 1 Gb ports. Indeed, the Exchange notes that 10 Gb physical ports account for approximately 90% of physical ports across the NY4, NY5, and NY6 data centers, and to date, 80% of new port connections in NY6 are 10 Gb ports. As such, the Exchange believes the proposed fee change for 10 Gb

physical ports is reasonably and appropriately allocated.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed fee change will not impact intramarket competition because it will apply to all similarly situated Members equally (*i.e.*, all market participants that choose to purchase the 10 Gb physical port). Additionally, the Exchange does not believe its proposed pricing will impose a barrier to entry to smaller participants and notes that its proposed connectivity pricing is associated with relative usage of the various market participants. For example, market participants with modest capacity needs can continue to buy the less expensive 1 Gb physical port (which cost is not changing) or may choose to obtain access via a third-party re-seller. While pricing may be increased for the larger capacity physical ports, such options provide far more capacity and are purchased by those that consume more resources from the network. Accordingly, the proposed connectivity fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation reflects the network resources consumed by the various size of market participants—lowest bandwidth consuming members pay the least, and highest bandwidth consuming members pay the most.

The proposed fee change also does not impose a burden on competition or on other Self-Regulatory Organizations that is not necessary or appropriate. As described above, the Exchange evaluated its proposed fee change using objective and stable metric with limited volatility. Utilizing Data Processing PPI over a specified period of time is a reasonable means of recouping a portion of the Exchange's investment in maintaining and enhancing the connectivity service identified above. The Exchange believes utilizing Data Processing PPI, a tailored measure of inflation, to increase certain connectivity fees to recoup the Exchange's investment in maintaining and enhancing its services and products would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²² and paragraph (f) of Rule 19b-4²³ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeEDGA-2024-051 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-CboeEDGA-2024-051. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the

²² 15 U.S.C. 78s(b)(3)(A).

²³ 17 CFR 240.19b-4(f).

Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeEDGA-2024-051 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁴

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102024; File No. SR-CboeBZX-2024-131]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt Fees for New Logical Ports in Connection With a New Connectivity Offering on Its Equity Options Platform

December 20, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 20, 2024, Cboe BZX Exchange, Inc. (the "Exchange" or "BZX") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the "Exchange" or "BZX") proposes to adopt fees for new logical ports in connection with a new connectivity offering on its equity options platform. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/BZX/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule to adopt fees for Unitized Logical Ports, a new connectivity offering for its equity options platform ("BZX Options") and adopt new Average Daily Quote and Average Daily Order fees.³

Unitized Port Fees

By way of background, Exchange Members may interface with the Exchange's Trading System by utilizing either the Financial Information Exchange ("FIX") protocol or the Binary Order Entry ("BOE") protocol. The Exchange further offers a variety of logical ports,⁴ which provide users of

these ports with the ability within the Exchange's System to accomplish a specific function through a connection, such as order entry, data receipt or access to information. For example, such ports include Logical Ports,⁵ Purge Ports,⁶ and Ports with Bulk Quoting Capabilities⁷ ("Bulk Ports"). By way of further background, each of these ports corresponds to a single running order handler. Each order handler processes the messages it receives from these ports from the connected Members. This processing includes determining whether the message contains the required information to enter the System, whether the message parameters satisfy port-level (*i.e.*, pre-trade) risk controls, and where to send that message within the System (*i.e.*, to which matching engine).⁸ Once an order handler completes the processing of a message, it sends that message to the appropriate matching engine.

Historically, all order handlers connect to all matching engines. That is, under the BOEv2 and FIX protocols, Members were able to access all symbols from a single logical port since each port corresponds to a single order handler that conveniently connects to all matching engines ("convenience layer"). Although the Exchange configures the software and hardware for its order handlers in the same manner, there can be a natural variance in the amount of time it takes individual order handlers to process messages of

(which grants users the ability to receive and/or send drop copies) and ports that are used for receipt of certain market data feeds.

⁵ The term "Logical Ports" used herein shall refer to FIX and BOE ports (used for order entry). See Cboe BZX Options Fee Schedule, Options Logical Port Fees, "Logical Ports" (which exclude Purge Port, Multicast PITCH Spin Server Port or GRP Port).

⁶ Purge Ports provide users the ability to cancel a subset (or all) of open orders across Executing Firm ID(s) ("EFID(s)"). Underlying symbol(s), or CustomGroupID(s), across multiple logical ports/sessions. See Securities Exchange Act Release 79956 (February 3, 2017), 82 FR 10102 (February 9, 2017) (SR-BatsBZX-2017-05). See also https://cdn.cboe.com/resources/membership/US_Options_BOE_Specification.pdf and https://cdn.cboe.com/resources/membership/US_Options_FIX_Specification.pdf.

⁷ See Exchange Rule 21.1 (l)(3), definition of "bulk port." Bulk Ports provide users with the ability to submit and update multiple quote bids and offers in one message through logical ports enabled for bulk-quoting.

⁸ A matching engine is a part of the Exchange's System that processes options quotes and trades on a symbol-by-symbol basis. Some matching engines will process option classes with multiple root symbols, and other matching engines will be dedicated to one single option root symbol (for example, options on SPY will be processed by one single matching engine that is dedicated only to SPY). A particular root symbol may only be assigned to a single designated matching engine. A particular root symbol may not be assigned to multiple matching engines.

²⁴ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ The Exchange initially submitted the proposed rule change on August 30, 2024 and was effective September 3, 2024 (SR-CboeBZX-2024-082). On September 13, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-088. On November 12, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-113. On December 20, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ See Exchange Rule 21.1 (l)(2), definition of "logical port." Logical ports include FIX and BOE ports (used for order entry), drop logical port

the same type under this architecture. Factors that contribute to this differentiation in processing times include the availability of shared resources (such as memory), which is impacted by (among other things) then-current message rates, the number of active symbols (*i.e.*, classes), and recent messages for a symbol. This natural differentiation in processing times inherently may cause some messages to be sent from an order handler to a matching engine ahead of other messages that the Exchange's System may have received earlier on a different order handler.

The Exchange recently implemented a new architecture and protocol which includes, among other things, a single gateway per matching engine ("unitized layer"), which renders the above-described natural variance of order handler processing irrelevant for Members that connect to the unitized

order handler.⁹ More specifically, effective August 19, 2024, the Exchange implemented this new unitized access architecture and a new version of its Binary Order Entry (BOE) protocol¹⁰ ("BOEv3"), which also resulted in the adoption of new logical port types ("Unitized Logical Ports"), for which the Exchange is now seeking to establish fees.¹¹ Under the new unitized BOEv3 architecture, a single BOEv3 order handler corresponds to a single matching engine and all message traffic (including FIX and current BOEv2¹² port traffic) pass through this unitized BOEv3 order handler before reaching that order handler's corresponding matching engine. If a Member desires to access this optional unitized layer of the BOEv3 architecture (which it is not required to do), the Member would need to obtain a Unitized Logical Port for each unitized BOEv3 order handler and

corresponding matching engine(s) that process the symbol(s) that Member desires to trade.¹³ The three new port types that have been adopted are: (1) BOE Unitized Logical Ports,¹⁴ (2) Bulk Unitized Logical Ports,¹⁵ and (3) Purge Unitized Logical Ports.¹⁶ As noted above, use of Unitized Logical Ports is completely voluntary, and no Member is required, or under any regulatory obligation, to utilize them.

The Exchange proposes to establish fees for the new Unitized Logical Ports, which can be purchased on an individual basis (*i.e.*, capable of accessing a specified matching engine ("Matching Unit")) and/or as a set ("Unitized Logical Port Set") (*i.e.*, will include the total number of ports needed to connect to each available Matching Unit). The proposed fees for Unitized Logical Ports purchased individually and as sets are as follows:

BOE Unitized Logical Port	\$350/port/month.
Bulk Unitized Logical Port	\$550/port/month.
Purge Unitized Logical Port	\$400/port/month.
BOE Unitized Logical Port (Set)	\$2,500/month for 1st and 2nd port set. \$3,000/month for 3rd–14th port set. \$3,500/month for 15th–20th port set.
Bulk Unitized Logical Port (Set)	\$5,500/month for 1st and 2nd port set. \$6,000/month for 3rd–14th port set. \$6,500/month for 15th–20th port set.
Purge Unitized Logical Port (Set)	\$2,500/month for 1st and 2nd port set. \$3,000/month for 3rd–14th port set. \$3,500/month for 15th–20th port set.

The proposed fees for Unitized Logical Port Sets are progressive. For example, if a User were to purchase 11 BOE Unitized Logical Port Sets, it will be charged a total of \$32,000 per month ($\$2,500 \times 2 + \$3,000 \times 9$). As is the case today for existing logical ports, the monthly fees are assessed and applied in their entirety and are not prorated. The Exchange notes the current standard fees assessed for existing logical ports will remain applicable and unchanged.¹⁷ The proposed fees for Unitized Logical Port Sets will be assessed per set, per Port Type. As an example, if a Member requests three

BOE Unitized Logical Port Sets, one Bulk Unitized Logical Port Set, and one Purge Unitized Logical Port Set, the firm would be charged \$8,000 ($\$2,500 + \$2,500 + \$3,000$) for the three BOE Unitized Logical Port Sets, \$5,500 for the one Bulk Unitized Logical Port Set, and \$2,500 for the one Purge Unitized Logical Port Set.¹⁸

Since the Exchange has a finite amount of capacity, it also proposes to prescribe a maximum limit on the number of Unitized Logical Ports that may be purchased and used on a per firm, per Matching Unit basis. The purpose of establishing these limits is to

manage the allotment of Unitized Logical Ports in a fair and reasonable manner while preventing the Exchange from being required to expend large amounts of resources in order to provide an unlimited capacity to its matching engines. Particularly, the Exchange proposes to provide that the two structures (*i.e.*, individual unitized ports or unitized port sets) can be combined for up to a maximum of 20 Unitized Logical Ports per Member, per Matching Unit, per port type. As an example, a Member may request 2 BOE Unitized Logical Port Sets and 18 individual BOE Unitized Logical Ports for Matching

⁹ See Securities Exchange Act Release 100582 (July 23, 2024), 89 FR 60958 (July 29, 2024) (SR–CboeBZX–2024–071).

¹⁰ The BOE protocol is a proprietary order entry protocol used by Members to connect to the Exchange. The current version is BOEv2.

¹¹ See Securities Exchange Act Release No. 100582 (July 23, 2024) 89 FR 60958 (July 29, 2024) (SR–CboeBZX–2024–071).

¹² The Exchange anticipates decommissioning BOEv2 in February 2025.

¹³ Members will be able to purchase Unitized Logical Ports individually or may purchase a "set," which will provide the total number of ports

needed to connect to each available matching engine.

¹⁴ Similar to the Exchange's preexisting Logical Ports, the new Unitized Logical Ports allow Members to submit orders and quotes.

¹⁵ Similar to the Exchange's preexisting Bulk Ports, the new Bulk Unitized Logical Ports allow Members to submit and update multiple quote bids and offers in one message and are particularly useful for Members that provide quotations in many different options.

¹⁶ Similar to the Exchange's preexisting Purge Ports, the new Purge Unitized Logical Ports are dedicated logical ports that provide the ability to cancel/purge all open orders, or a subset thereof, across multiple logical ports through a single

cancel/purge message. They also solely process purge messages and are designed to assist Members, including Market Makers, in the management of, and risk control over, their orders and quotes, particularly if the Member is dealing with a large number of options.

¹⁷ For example, the Exchange currently assesses a monthly per port fee of \$750 for Logical Ports and Purge Ports. It also assesses \$1,500 per port month for the 1st and 2nd Bulk Ports and \$2,500 for the 3rd or more Bulk Ports. See Cboe BZX Options Fee Schedule, Options Logical Port Fees.

¹⁸ The Exchange proposes to include this example in the Fee Schedule to provide further clarity as to the application of the proposed fees.

Unit 1, providing a total max of 20 BOE Unitized Logical Ports on Matching Unit 1 specifically. This would result in having 20 BOE Unitized Logical Ports on Matching Unit 1 and 2 BOE Unitized Ports on all additional Matching Units as part of the 2 BOE Unitized Logical Port Sets requested. Additionally, a firm may request 20 Bulk Unitized Logical Port Sets and 20 Purge Unitized Logical Port Sets as those would constitute different port types.¹⁹ The Exchange believes the proposed cap will be sufficient for the vast majority of Members.²⁰ The Exchange notes that it will monitor interest in Unitized Logical Ports and system capacity availability with the goal of increasing these limits to meet Members needs if and when the demand is there, and the Exchange is able to accommodate it. Additionally, Members will still be able to utilize the existing logical port connectivity

offerings with no maximum limit in addition to their Unitized Logical Port allocation.

Average Daily Quotes and Average Daily Order Fees

The Exchange also proposes to adopt Average Daily Order (“ADO”) and Average Daily Quote (“ADQ”) fees. “ADO” represents the total number of orders for the month, divided by the number of trading days. “ADQ” represents the total number of quotes for the month, divided by the number of trading days. When measuring a Member’s ADO and ADQ, orders, quotes, cancel/replace modify orders, and quote updates which submit a bid or offer and do not include cancels, are included. Further ADO and ADQ will include orders and quotes submitted by a Member from all logical port types (*i.e.*, non-unitized logical ports and

Unitized Logical Ports). Each Member may submit up to 2,000,000 average daily orders or up to 250,000,000 average daily quotes per calendar month without incurring any ADO or ADQ fees. In the event that the average number of quotes per trading day during a calendar month submitted exceeds 250,000,000, each incremental usage of up to 20,000 average daily quotes will incur an additional fee as set forth in the table below. Similarly, in the event that the average number of orders per trading day during a calendar month submitted exceeds 2,000,000, each incremental usage of up to 1,000 average daily orders will incur an additional ADO fee as set forth in the table below.²¹ A Member’s ADO and ADQ will be aggregated together with any affiliated Member sharing at least 75% common ownership.

ADQ Fee rate per 20,000 ADQ	Fee				
	Tier 1 <= 250,000,000	Tier 2 >250,000,000	Tier 3 >500,000,000	Tier 4 >1,000,000,000	Tier 5 >3,500,000,000
	\$0.00	\$0.05	\$0.075	\$0.10	\$0.20
ADO Fee Rate per 1,000 ADO	Tier 1 <= 2,000,000 \$0.00	Tier 2 >2,000,000 \$1.00	Tier 3 >2,500,000 \$1.50	Tier 4 >3,000,000 \$2.00	Tier 5 >3,500,000 \$2.50

As an example, a Member that has 510,000,000 ADQ would subsequently have 25,500 “ADQ increments” (510,000,000 ADQ/20,000 ADQ increments). While 12,500 of the 25,500 ADQ increments are free within Tier 1, 12,500 of the ADQ increments would be fee liable at \$0.050 within Tier 2, while the remaining 500 ADQ increments would be fee liable at \$0.075 within Tier 3, resulting in a total ADQ fee of \$662.50 for that month.²²

The Exchange notes that market participants with incrementally higher ADO or ADQ have the potential residual effect of exhausting system resources, bandwidth, and capacity. Higher ADO or ADQ may therefore, in turn, create latency and impact other Members’ ability to receive timely executions. The proposed fee structure has multiple thresholds, and the proposed fees are incrementally greater at higher ADO and ADQ rates because the potential impact

on exchange systems, bandwidth and capacity becomes greater with increased ADO and ADQ rates. As noted above, the proposal contemplates that a Member would have to exceed the high ADO rate of 2,000,000 and a Market Maker would have to exceed the high ADQ rate of 250,000,000 before that market participant would be charged a fee under the proposed respective tiers. The Exchange believes that it is in the interests of all Members and market participants who access the Exchange to not allow other market participants to exhaust System resources, but to encourage efficient usage of network capacity. The Exchange also believes this proposal (and in particular the proposed fee amounts associated with higher ADO and ADQ) will reduce the incentive for market participants to engage in excessive order/quote and trade activity that may require the Exchange to otherwise increase its

storage capacity and will encourage such activity to be submitted in good faith for legitimate purposes.

The Exchange also represents that the proposed fees are not intended to raise revenue; rather, as noted above, it is intended to encourage efficient behavior so that market participants do not exhaust System resources. Moreover, the Exchange intends to provide Members with daily reports, free of charge, which will detail their order and trade activity in order for those firms to be fully aware of all order and trade activity they (and their affiliates) are sending to the Exchange. This will allow Members to monitor their behavior and determine whether it is approaching any of the ADO or ADQ thresholds that trigger the proposed fees.

The Exchange lastly notes that other exchanges have adopted various fee programs that assess incrementally

¹⁹ The Exchange proposes to include this example in its Fee Schedule to provide clarity as to how Unitized Logical Port fees will be assessed.

²⁰ The Exchange notes that one Member has indicated that it *may* desire more than the current maximum in the future.

²¹ The term “quote” refers to bids and offers submitted in bulk messages. A bulk message means a single electronic message a user submits with an M (Market-Maker) capacity to the Exchange in which the User may enter, modify, or cancel up to an Exchange-specified number of bids and offers. A

User may submit a bulk message through a bulk port as set forth in Exchange Rule 21.1(j)(3). See Rule 16.1 (definition of bulk message).

²² The Exchange proposes to include this example in the Fees Schedule to provide further clarity as to the application of the proposed fees.

²³ See, *e.g.*, Securities Exchange Act Release No. 60102 (June 11, 2009), 74 FR 29251 (June 19, 2009) (SR-NYSEArca-2009-50) (adopting fees applicable to Members based on the number of orders entered compared to the number of executions received in a calendar month). It appears that Nasdaq similarly

assesses a penalty charge to its members that exceed certain “weighted order-to-trade ratios”. See *Price List—Trading Connectivity*, NASDAQ, available at <https://www.nasdaqtrader.com/trader.aspx?id=pricelisttrading2>. See also Securities Exchange Act Release No. 91406 (March 25, 2021), 86 FR 16795 (March 31, 2023) (SR-EMERALD-2021-10) (adopting an “Excessive Quoting Fee” to ensure that Market Makers do not over utilize the exchange’s System by sending messages to the MIAX Emerald, to the detriment of all other Members of the exchange).

higher fees to Members that have incrementally higher order and/or quoting trading activity for similar reasons.²³

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.²⁴ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)²⁵ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)²⁶ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)²⁷ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities.

The Exchange believes the proposed fees are reasonable because Unitized Logical Ports provide an optional, valuable service in that the ports are intended to create a more consistent, deterministic experience for messages once received within the Exchange’s System under the recently adopted unitized BOEv3 architecture. As discussed above, the new architecture (and thereby the new Unitized Logical Ports) was designed to create a more consistent, deterministic experience for messages once received within the Exchange’s System, which the Exchange believes improves the overall access experience on the Exchange and will enable future system enhancements. As noted, the BOEv3 protocol and architecture, along with the three new corresponding Unitized Logical Ports,

are intended to reduce the natural variance of order handler processing times for messages, and as a result reduce the potential resulting “reordering” of messages when they are sent from order handlers to matching engines. The adoption of the unitized BOEv3 structure (including the corresponding new Unitized Ports) was a technical solution that is intended to reduce the potential of this reordering and increase determinism.²⁸ The Exchange believes the proposed fees are also reasonable to offset costs incurred in order to build out an entirely new unitized architecture.

The Exchange also emphasizes that the use of the Unitized Logical Ports is not necessary for trading on the Exchange and, as noted above, is entirely optional. Users can also continue to access the Exchange through existing logical port offerings at existing rates. It is a Member’s specific business needs that will drive its decision whether to use Unitized Logical Ports in lieu of, or in addition to, existing logical ports (or, as emphasized, not use them at all). If a User finds little benefit in having these ports based on its business model and trading strategies, or determines the Unitized Logical ports are not cost-efficient for its needs, or does not provide sufficient value to the firm, such User may continue connecting to the Exchange in the manner it does today, unchanged. Indeed, the Exchange notes that since the adoption of Unitized Logical Ports on August 19, only approximately 27% of logical ports, bulk ports and purge ports being used are Unitized Logical Ports and approximately 73% are the preexisting Logical Ports, Bulk Ports and Purge Ports. Moreover, the Exchange believes that providing Members the option of purchasing Unitized Logical Ports individually or in sets provides Members further flexibility and an opportunity for cost savings for those Members that wish to only trade a subset of classes.

The Exchange also believes that the proposed Unitized Logical Port fees are equitable and not unfairly discriminatory because they continue to be assessed uniformly to similarly situated users in that all Users who choose to purchase Unitized Logical Ports will be subject to the same proposed tiered fee schedule. Moreover, Members purchasing Unitized Logical Ports will only do so if they find a benefit and sufficient value in such ports as, all Members can otherwise

continue to use the preexisting logical connectivity options. As such, Members can choose whether or not to purchase Unitized Logical Ports based on their respective business needs.

The proposed ascending tier structure for Unitized Logical Port Sets is reasonable, equitable and not unfairly discriminatory as it’s designed to encourage market participants to be efficient with their respective Unitized Logical Port usage. It also is designed so that Members that use a higher allotment of the Exchange’s system resources pay higher rates, rather than placing that burden on market participants that have more modest needs. The Exchange believes the proposed ascending fee structure is therefore another appropriate means, in conjunction with an established Unitized Logical Port limit, to manage this finite resource (system capacity) and ensure its apportioned fairly. Furthermore, the Exchange already assesses higher fees to those that consume more Exchange resources for the existing non-Unitized Bulk Ports.²⁹ The proposed limit on Unitized Logical Ports is also reasonable, equitable and not unfairly discriminatory as the Exchange believes that it is in the interests of all Members and market participants who access the Exchange to not allow Members to exhaust System resources, but to encourage efficient usage of network capacity. The Exchange also notes that the new BOEv3 unitized architecture is subject to software limitations on the number of sessions that can be created on any one unitized process. Consideration was given to this limitation as well as to the amount of ports firms had indicated they would need prior to the implementation of Unitized Logical Ports.

The Exchange believes the proposed ADO and ADQ fees are reasonable as Members that do not exceed the high thresholds of 2,000,000 ADO and 250,000,000 ADQ will not be charged any fee under the proposed tiers. The Exchange notes that in establishing the proposed thresholds, it evaluated average ADO and ADQ rates over several months and the thresholds were designed to protect the Exchange’s Matching Engines from being adversely impacted from sustained and excessive orders/quotes throughout the course of a given month. The ADQ thresholds are also designed to ensure Market Makers quoting activity, which acts as important source of liquidity, is not

²⁴ 15 U.S.C. 78f(b).

²⁵ 15 U.S.C. 78f(b)(5).

²⁶ *Id.*

²⁷ 15 U.S.C. 78f(b)(4).

²⁸ See Securities Exchange Act Release 100582 (July 23, 2024), 89 FR 60958 (July 29, 2024) (SR–CboeBZX–2024–071).

²⁹ See Cboe U.S. Options Fees Schedule, BZX Options, Options Logical Port Fees, Ports with Bulk Quoting Capabilities.

impeded by the proposal.³⁰ The Exchange believes it's reasonable, equitable and not unfairly discriminatory to assess higher fees when a Member has higher ADO and ADQ rates because the potential impact on exchange systems, bandwidth and capacity becomes greater with increased ADO and ADQ rates. The Exchange believes the proposed fee amounts are reasonable as the Exchange believes them to be commensurate with the proposed thresholds. Particularly, the proposed fee amounts that correspond to higher ADO and ADQ rates are designed to incentivize Members to reduce excessive order and quoting trade activity that the Exchange believes can be detrimental to all market participants at those levels and encourage such activity to be made in good faith and for legitimate purposes. As noted above, the Exchange believes that it is in the interests of all Members and market participants who access the Exchange to not allow Members to exhaust System resources, but to encourage efficient usage of network capacity. The Exchange therefore also believes that the proposed fees appropriately reflect the benefits to different firms of being able to send orders and quotes into the Exchange's System and also believes the proposed fees are one method of facilitating the Commission's goal of ensuring that critical market infrastructure has "levels of capacity, integrity, resiliency, availability, and security adequate to maintain their operational capability and promote the maintenance of fair and orderly markets."³¹

The Exchange believes adopting the proposed ADO and ADQ fees are reasonable as unfettered usage of System capacity and network resource consumption can have a detrimental effect on all market participants who access and use the Exchange. As discussed above, high ADO and ADQ rates may adversely impact system resources, bandwidth, and capacity which may, in turn, create latency and impact other Members' ability to receive timely executions. The Exchange believes the proposed fees are therefore reasonable as they are designed to focus on activity that is truly disproportionate while fairly allocating costs.

Further, the Exchange believes that the proposed ADO and ADQ fees are equitable and not unfairly discriminatory because they will be assessed uniformly to similarly situated users in that all Members that exceed the thresholds in connection with ADO and ADQ will be assessed the proposed ADO and ADQ rates. Regarding ADO and ADQ, no market participant is assessed any fees unless it exceeds the proposed thresholds. As noted above, the Exchange believes the proposed ADO and ADQ thresholds (i.e., 2,000,000 ADO and 250,000,000 ADQ) are appropriately high rates respectively, such that the Exchange expects the vast majority of Members to not exceed them. While the Exchange has no way of predicting with certainty how the proposed changes will impact Member activity, based on trading activity from the prior months the Exchange would expect that, absent any changes to Member behavior, all Members would fall within proposed ADO Tier 1 (and thus not be subject to any new fees) and approximately 74% of Members would fall within proposed ADQ Tier 1 (and thus also not be subject to any new fees). With respect to the remaining Members (approximately 26%) that would exceed the ADQ Tier 1 threshold based on current activity, the Exchange would anticipate, absent any change in behavior, approximately 3 Members to fall within Tier 2, approximately 6 Members to fall within Tier 3, approximately 3 Members to fall within Tier 4 and no Members to fall within Tier 5. Notwithstanding this impact, the Exchange believes that Market Makers are able to continue providing important liquidity to the Exchange and meet their quoting obligations [sic].

The Exchange believes it's equitable and not unfairly discriminatory to assess incrementally higher fees to Members that have higher ADO and ADQ rates because the potential impact on exchange systems, bandwidth and capacity becomes greater with increased ADO and ADQ. The Exchange also believes it's equitable and not unfairly discriminatory to aggregate Members trading activity with any affiliated Member sharing at least 75% common ownership in order to prevent members from shifting their order flow or quoting activity to other affiliates in order to circumvent the proposed fees.

The Exchange lastly believes that its proposal is reasonable, equitably allocated and not unfairly discriminatory because it is not intended to raise revenue for the Exchange; rather, it is intended to encourage efficient behavior so that Members do not exhaust System

resources. Moreover, as noted above, competing options exchanges similarly assess fees to deter Members from over utilizing the exchange's System by having excessive order and/or quoting trading activity.³²

The Exchange finally notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. The Exchange is only one of 18 options exchanges which market participants may direct their order flow and/or participate on, and it represents a small percentage of the overall market.³³

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change to adopt fees for Unitized Logical Ports will impose any burden on intramarket competition that is not necessary in furtherance of the purposes of the Act because the proposed fees for will apply equally to all similarly situated Members. As discussed above, Unitized Logical Ports are optional and Members may choose to utilize Unitized Logical Ports, or not, based on their views of the additional benefits and added value provided by these ports. The Exchange believes the proposed fees will be assessed proportionately to the potential value or benefit received by Members with a greater number of Unitized Logical Ports and notes that Members may determine to cease using Unitized Logical Ports. As discussed, Members can also continue to access the Exchange through existing Logical Ports, which fees are not changing.

Similarly, the Exchange does not believe that the proposed rule change to adopt ADO and ADQ fees will impose any burden on intramarket competition that is not necessary in furtherance of the purposes of the Act because such fees will apply equally to all similarly situated Members. Particularly, the proposed fees apply uniformly to all Members, in that any Member who exceeds the ADO and/or ADQ Tier 1 thresholds will be subject to a fee under the proposed corresponding tiers. The Exchange believes that the proposed change neither favors nor penalizes one or more categories of market participants in a manner that would

³⁰ Since the implementation of the proposal on September 3, 2024, the Exchange notes that it has not received any feedback from Market Maker participants that the proposal has impeded their ability to meet their quoting obligations.

³¹ See Securities Exchange Act Release No. 73639 (November 19, 2014), 79 FR 72251 (December 5, 2014) (File No. S7-01-13) (Regulation SCI Adopting Release).

³² See *supra* note 20.

³³ See Cboe Global Markets, U.S. Options Market Volume Summary, Month-to-Date (August 27, 2024), available at https://www.cboe.com/us/options/market_statistics/ which reflects the Exchange representing only 3.3% of total market share.

impose an undue burden on competition. Rather, the proposal seeks to benefit all market participants by encouraging the efficient utilization of the Exchange's network while taking into account the important liquidity provided by its Members. As discussed above potential impact on exchange systems, bandwidth and capacity becomes greater with increased ADO and ADQ rates. The Exchange also anticipates that the vast majority of Members on the Exchange will not be subject to any fees under the proposed tiers. Accordingly, the Exchange believes that the proposed ADO and ADQ fees do not favor certain categories of market participants in a manner that would impose a burden on competition.

Next, the Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market, including competition for exchange memberships. Market Participants have numerous alternative venues that they may participate on, including 17 other options exchanges (including 3 other non-Cboe options exchanges), as well as off-exchange venues, where competitive products are available for trading. Indeed, participants can readily choose to submit their order flow to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system "has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies."³⁴ The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: "[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its

market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'"³⁵ Accordingly, the Exchange does not believe its proposed change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act³⁶ and paragraph (f) of Rule 19b-4³⁷ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBZX-2024-131 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

³⁵ *NetCoalition v. SEC*, 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782-83 (December 9, 2008) (SR-NYSEArca-2006-21)).

³⁶ 15 U.S.C. 78s(b)(3)(A).

³⁷ 17 CFR 240.19b-4(f).

All submissions should refer to file number SR-CboeBZX-2024-131. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBZX-2024-131 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³⁸

J. Matthew DeLesDernier,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35426; 812-15590]

Kurv ETF Trust and Kurv Investment Management LLC

December 19, 2024.

AGENCY: Securities and Exchange Commission ("Commission" or "SEC").
ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 ("Act") for an exemption from section 15(a) of the Act, as well as from certain disclosure requirements in rule

³⁴ See Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005).

³⁸ 17 CFR 200.30-3(a)(12).

20a–1 under the Act, Item 19(a)(3) of Form N–1A, Items 22(c)(1)(ii), 22(c)(1)(iii), 22(c)(8) and 22(c)(9) of Schedule 14A under the Securities Exchange Act of 1934, and Sections 6–07(2)(a), (b), and (c) of Regulation S–X (“Disclosure Requirements”).

SUMMARY OF APPLICATION: The requested exemption would permit Applicants to enter into and materially amend subadvisory agreements with certain subadvisors without shareholder approval and grant relief from the Disclosure Requirements as they relate to fees paid to the subadvisors.

APPLICANTS: Kurv ETF Trust and Kurv Investment Management LLC.

FILING DATES: The application was filed on June 20, 2024, and amended on September 17, 2024.

HEARING OR NOTIFICATION OF HEARING:

An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC’s Secretary at *Secretaries-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on January 13, 2025, and should be accompanied by proof of service on the Applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer’s interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission’s Secretary.

ADDRESSES: The Commission: *Secretaries-Office@sec.gov*. Applicants: David J. Baum, Esq., Alston & Bird, LLP, *David.Baum@alston.com*, and Howard Chan, Kurv ETF Trust, c/o Kurv Investment Management LLC, 1 Letterman Drive, Building C, Suite 3–500, San Francisco, CA 94129.

FOR FURTHER INFORMATION CONTACT: Christine Y. Greenlees, Senior Counsel, or Lisa Reid Ragen, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel’s Office).

SUPPLEMENTARY INFORMATION: For Applicants’ representations, legal analysis, and conditions, please refer to Applicants’ amended application, dated September 17, 2024, which may be obtained via the Commission’s website by searching for the file number at the

top of this document, or for an Applicant using the Company name search field on the SEC’s EDGAR system. The SEC’s EDGAR system may be searched at <https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html>. You may also call the SEC’s Public Reference Room at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

J. Matthew DeLesDernier,

Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102015; File No. SR–C2–2024–023]

Self-Regulatory Organizations; Cboe C2 Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend its Fees Schedule Related to Physical Port Fees

December 20, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on December 18, 2024, Cboe C2 Exchange, Inc. (the “Exchange” or “C2”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe C2 Exchange, Inc. (the “Exchange” or “C2 Options”) proposes to amend its Fees Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s website (http://markets.cboe.com/us/options/regulation/rule_filings/ctwo/), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule relating to physical connectivity fees.³

By way of background, a physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange’s servers are located. The Exchange currently assesses the following physical connectivity fees for Trading Permit Holders (“TPHs”) and non-TPHs on a monthly basis: \$2,500 per physical port for a 1 gigabit (“Gb”) circuit and \$7,500 per physical port for a 10 Gb circuit. The Exchange proposes to increase the monthly fee for 10 Gb physical ports from \$7,500 to \$8,500 per port. The Exchange notes the proposed fee change better enables it to continue to maintain and improve its market technology and services and also notes that the proposed fee amount, even as amended,

³ The Exchange initially filed the proposed fee changes on July 3, 2023 (SR–C2–2023–014). On September 1, 2023, the Exchange withdrew that filing and submitted SR–C2–2023–020. On September 29, 2023, the Securities and Exchange Commission issued a Suspension of and Order Instituting Proceedings to Determine whether to Approve or Disapprove a Proposed Rule Change to Amend its Fees Schedule Related to Physical Port Fees (the “OIP”) in anticipation of a possible U.S. government shutdown. On September 29, 2023, the Exchange filed the proposed fee change (SR–C2–2023–021). On October 13, 2023, the Exchange withdrew that filing and submitted SR–C2–2023–022. On December 12, 2023, the Exchange withdrew that filing and submitted SR–C2–2023–025. On February 9, 2024, the Exchange withdrew that filing and submitted SR–C2–2024–004. On April 9, 2024, the Exchange withdrew that filing and submitted SR–C2–2024–005. On June 7, 2024 the Exchange withdrew that filing and submitted SR–C2–2024–010. On August 29, 2024, the Exchange withdrew that filing and submitted SR–C2–2024–015. On October 25, 2024, the Exchange withdrew that filing and submitted SR–C2–2024–019. On October 28, 2024, the Exchange withdrew that filing and submitted SR–C2–2024–020. On December 18, 2024 the Exchange withdrew that filing and submitted this filing.

continues to be in line with, or even lower than, amounts assessed by other exchanges for similar connections.⁴ The Exchange also notes that a single 10 Gb physical port can be used to access the Systems of the following affiliate exchanges: the Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc. (options and equities platforms), Cboe EDGX Exchange, Inc. (options and equities platforms), and Cboe EDGA Exchange, Inc., (“Affiliate Exchanges”).⁵ Notably, only one monthly fee currently (and will continue) to apply per 10 Gb physical port regardless of how many affiliated exchanges are accessed through that one port.⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁷ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁸ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁹ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)¹⁰ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities. This belief is based on various factors as described below.

First, the Exchange believes its proposal is reasonable as it reflects a moderate increase in physical connectivity fees for 10 Gb physical ports and its offering, even as amended, continues to be more affordable as compared to analogous physical connectivity offerings at competitor exchanges.¹¹

The Exchange also believes the current fee does not properly reflect the quality of the service and product, as fees for 10 Gb physical ports have been static in nominal terms since 2018, and therefore falling in real terms due to inflation. As a general matter, the Producer Price Index (“PPI”) is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (CPI), that measure price change from the purchaser’s perspective.¹² About 10,000 PPIs for individual products and groups of products are tracked and released each month.¹³ PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector’s output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing, hosting and related services (“Data PPI”) and more particularly the more granular service line Data Processing, Hosting and

Related Services: Hosting, Active Server Pages (ASP), and Other Information Technology (IT) Infrastructure Provisioning Services.¹⁴

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (“BLS”) as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS—518210 in the North American Industry Classification System (“NAICS”).¹⁵ According to the BLS “[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers’ transactions and data. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services and price movements for the service line NAICS 518210 index are based on changes in the revenue received by companies that provide, among other things, IT infrastructure provisioning services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.”¹⁶

The service (product) lines for which price indexes are available under the Data PPI are: (1) business process management services (2) data management and storage information transformation and other services and (3) hosting ASP and other IT infrastructure provisioning services. The

⁴ See e.g., The Nasdaq Stock Market LLC (“Nasdaq”), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gb Ultra fiber connection to the respective exchange, which is analogous to the Exchange’s 10Gb physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gb LX LCN Circuits (which are analogous to the Exchange’s 10 Gb physical port) are assessed \$22,000 per month, per port.

⁵ The Affiliate Exchanges are also submitting contemporaneous identical rule filings.

⁶ The Exchange notes that conversely, other exchange groups charge separate port fees for access to separate, but affiliated, exchanges. See e.g., Securities and Exchange Release No. 99822 (March 21, 2024), 89 FR 21337 (March 27, 2024) (SR–MIAX–2024–016).

⁷ 15 U.S.C. 78f(b).

⁸ 15 U.S.C. 78f(b)(5).

⁹ *Id.*

¹⁰ 15 U.S.C. 78f(b)(4).

¹¹ See e.g., The Nasdaq Stock Market LLC (“Nasdaq”), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gbps Ultra fiber connection to the respective exchange, which is analogous to the Exchange’s 10Gbps physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gbps LX LCN Circuits (which are analogous to the Exchange’s 10 Gbps physical port) are assessed \$22,000 per month, per port.

¹² See <https://www.bls.gov/ppi/overview.htm>.

¹³ *Id.*

¹⁴ Provisioning is the process of preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity, according to user requirements. It is a critical part of IT operations, as it ensures that computing resources are available when needed and that they are set up and connected to work correctly.

¹⁵ See <https://www.bls.gov/ppi/overview.htm>. Among the industry-specific PPIs is for North American Industry Classification System (“NAICS”) Code 518210: “Data Processing and Related Services.” NAICS index codes categorize products and services that are common to particular industries. According to BLS, these codes “provide comparability with a wide assortment of industry-based data for other economic programs, including productivity, production, employment, wages, and earnings.”

¹⁶ See <https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-services-industry-naics-518210.htm>.

most apt of these industry and product specific categorizations for purposes of this present proposal to modify fees for the 10 Gb physical port fee measures inflation for the provision of data processing, hosting and related services as well as other information technology infrastructure provisioning services which BLS identifies as identified as NAICS—5182105.¹⁷ The Exchange believes that this measure of inflation is particularly appropriate because the Exchange's connectivity services involve hosting and providing connections to its customers' telecommunications and information technology equipment, as well as preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity. The Exchange also uses its "proprietary software," *i.e.*, its own proprietary matching engine software, to receive orders on the Exchange's proprietary trading platform as well as to collect, organize, store and report customers' transactions. In other words, the Exchange is in the business of data processing, hosting, ASP, and providing other IT infrastructure provisioning services.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. For example, the average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.¹⁸

As noted above, the current 10 Gb physical port fee remained unchanged for six years, particularly since June 2018.¹⁹ Since its last increase over 6 years ago however, there has been notable inflation, including under the industry- and product-specific PPI, which as described above is a tailored measure of inflation. Particularly, the

Hosting, ASP and other IT Infrastructure Provisioning Services inflation measure had a starting value of 102.2 in June 2018 (the month the Exchange started assessing the current fee) and an ending value of 115.66 in November 2024, representing an 13% increase.²⁰ This indicates that companies who are also in the hosting ASP and other IT infrastructure provisioning services have generally increased prices for a specified service covered under NAICS 5182105 by an average of 13% during this period.

The Exchange also believes that it is reasonable to increase its fees to compensate for inflation because, over time, inflation has degraded the value of each dollar that the Exchange collects in fees, such that the real revenue collected today is considerably less than that same revenue collected in 2018. The impact of this inflationary effect is also independent of any change in the Exchange's costs in providing its goods and services. The Exchange therefore believes that it is reasonable for it to offset, in part, this erosion in the value of the revenues it collects. Additionally, the Exchange historically does not increase fees every year notwithstanding inflation. Other exchanges have also filed for increases in certain fees, based in part on comparisons to inflation.²¹ Accordingly, based on the above-described percentage change based on an industry- and product-specific inflationary measure, and in conjunction with the rationale further described above and below, the Exchange believes the proposed fee increase is reasonable.

Next, the Exchange believes significant investments into, and enhanced performance of, the Exchange, in the years following the last 10 Gb physical port fee increase support the reasonableness of the proposed fee increase. These investments enhanced the quality of its services, as measured by, among other things, increased throughput and faster processing speeds. Customers have therefore greatly benefitted from these investments, while the Exchange's ability to recoup its investments has been hampered.

For example, the Exchange and its affiliated exchanges recently launched a multi-year initiative to improve Cboe Exchange Platform performance and capacity requirements to increase competitiveness, support growth and

advance a consistent world class platform. The goal of the project, among other things, is to provide faster and more consistent order handling and matching performance for options, while ensuring quicker processing time and supporting increasing volumes and capacity needs. For example, the Exchange recently performed switch hardware upgrades. Particularly, the Exchange replaced existing customer access switches with newer models, which the Exchange believes resulted in increased determinism. The recent switch upgrades also increased the Exchange's capacity to accommodate more physical ports by nearly 50%. Network bandwidth was also increased nearly two-fold as a result of the upgrades, which among other things, can lead to reduce message queuing. The Exchange also believes these newer models result in less natural variance in the processing of messages. The Exchange notes that it incurred costs associated with purchasing and upgrading to these newer models, of which the Exchange has not otherwise passed through or offset.

As of April 1, 2024, market participants also having the option of connecting to a new data center (*i.e.*, Secaucus NY6 Data Center ("NY6")), in addition to the current data centers at NY4 and NY5. The Exchange made NY6 available in response to customer requests in connection with their need for additional space and capacity. In order to make this space available, the Exchange expended significant resources to prepare this space, and will also incur ongoing costs with respect to maintaining this offering, including costs related to power, space, fiber, cabinets, panels, labor and maintenance of racks. The Exchange also incurred a large cost with respect to ensuring NY6 would be latency equalized, as it is for NY4 and NY5.

The Exchange also has made various other improvements since the current physical port rates were adopted in 2018. For example, the Exchange has updated its customer portal to provide more transparency with respect to firms' respective connectivity subscriptions, enabling them to better monitor, evaluate and adjust their connections based on their evolving business needs. The Exchange also performs proactive audits on a weekly basis to ensure that all customer cross connects continue to fall within allowable tolerances for Latency Equalized connections. Accordingly, the Exchange expended, and will continue to expend, resources to innovate and modernize technology so that it may benefit its TPHs and continue to compete among other

²¹ See, *e.g.*, Securities Exchange Act Release Nos. 34-100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR-NYSEARCA-2024-79).

options markets. The ability to continue to innovate with technology and offer new products to market participants allows the Exchange to remain competitive in the options space which currently has 18 registered options markets and potential new entrants. If the Exchange were not able to assess incrementally higher fees for its connectivity, it would effectively impact how the Exchange manages its technology and hamper the Exchange's ability to continue to invest in and fund access services in a manner that allows it to meet existing and anticipated access demands of market participants. Disapproval of fee changes such as the proposal herein, could also have the adverse effect of discouraging an exchange from improving its operations and implementing innovative technology to the benefit of market participants if it believes the Commission would later prevent that exchange from recouping costs and monetizing its operational enhancements, thus adversely impacting competition as well as the interests of market participants and investors.

Finally, the proposed fee is also the same as is concurrently being proposed for its Affiliate Exchanges. Further, TPHs are able to utilize a single port to connect to all of its Affiliate Exchanges and will only be charged one single fee (*i.e.*, a market participant will only be assessed the proposed \$8,500 even if it uses that physical port to connect to the Exchange and another (or even all 6) of its Affiliate Exchanges. Particularly, the Exchange believes the proposed monthly per port fee is reasonable, equitable and not unfairly discriminatory since as the Exchange has determined to not charge multiple fees for the same port. Indeed, the Exchange notes that several ports are in fact purchased and utilized across one or more of the Exchange's affiliated Exchanges (and charged only once).

The Exchange also believes that the proposed fee change is not unfairly discriminatory because it would be assessed uniformly across all market participants that purchase the physical ports. The Exchange believes increasing the fee for 10 Gb physical ports and charging a higher fee as compared to the 1 Gb physical port is equitable as the 1 Gb physical port is $\frac{1}{10}$ th the size of the 10 Gb physical port and therefore does not offer access to many of the products and services offered by the Exchange (*e.g.*, ability to receive certain market data products). Thus, the value of the 1 Gb alternative is lower than the value of the 10 Gb alternative, when measured based on the type of Exchange access it

offers. Moreover, market participants that purchase 10 Gb physical ports utilize the most bandwidth and therefore consume the most resources from the network. The Exchange also anticipates that firms that utilize 10 Gb ports will benefit the most from the Exchange's investment in offering NY6 as the Exchange anticipates there will be much higher quantities of 10 Gb physical ports connecting from NY6 as compared to 1 Gb ports. Indeed, the Exchange notes that 10 Gb physical ports account for approximately 90% of physical ports across the NY4, NY5, and NY6 data centers, and to date, 80% of new port connections in NY6 are 10 Gb ports. As such, the Exchange believes the proposed fee change for 10 Gb physical ports is reasonably and appropriately allocated.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed fee change will not impact intramarket competition because it will apply to all similarly situated TPHs equally (*i.e.*, all market participants that choose to purchase the 10 Gb physical port). Additionally, the Exchange does not believe its proposed pricing will impose a barrier to entry to smaller participants and notes that its proposed connectivity pricing is associated with relative usage of the various market participants. For example, market participants with modest capacity needs can continue to buy the less expensive 1 Gb physical port (which cost is not changing) or may choose to obtain access via a third-party re-seller. While pricing may be increased for the larger capacity physical ports, such options provide far more capacity and are purchased by those that consume more resources from the network.

Accordingly, the proposed connectivity fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation reflects the network resources consumed by the various size of market participants—lowest bandwidth consuming members pay the least, and highest bandwidth consuming members pays the most.

The proposed fee change also does not impose a burden on competition or on other Self-Regulatory Organizations that is not necessary or appropriate. As described above, the Exchange evaluated its proposed fee change using objective and stable metric with limited volatility. Utilizing Data Processing PPI

over a specified period of time is a reasonable means of recouping a portion of the Exchange's investment in maintaining and enhancing the connectivity service identified above. The Exchange believes utilizing Data Processing PPI, a tailored measure of inflation, to increase certain connectivity fees to recoup the Exchange's investment in maintaining and enhancing its services and products would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²² and paragraph (f) of Rule 19b-4²³ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-C2-2024-023 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102007; File No. SR-NYSE-2024-80]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Certain Fees for the NYSE Integrated Data Feed

December 19, 2024.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934

(“Act”)² and Rule 19b-4 thereunder,³ notice is hereby given that, on December 16, 2024, New York Stock Exchange LLC (“NYSE” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend certain fees for the NYSE Integrated data feed. The proposed rule change is available on the Exchange's website at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the NYSE Proprietary Market Data Fees Schedule (“Fee Schedule”) to amend certain fees for the NYSE Integrated data feed (“NYSE Integrated Feed”) that would be operative February 3, 2025. Specifically, the Exchange proposes a one-time adjustment to certain of its fees for subscribing to the NYSE Integrated Feed,⁴ with certain exceptions. The Fee Schedule includes the Exchange's fees for subscribing to the NYSE Integrated

Feed, including an Access Fee, Redistribution Fee, Per User fees for Professional and Non-Professional Users, various categories of Non-Display Fees, a Non-Display Declaration Late Fee and a Multiple Data Feed Fee.⁵ With the exception of the Non-Professional User Fee, the Non-Display Declaration Late Fee and the Multiple Data Feed Fee, the Exchange proposes to increase the remaining fees by up to 12.31% on a one-time basis.⁶

The Exchange currently charges the following fees to subscribe to the NYSE Integrated Feed on a monthly basis: an Access Fee of \$7,500; a Redistribution Fee of \$4,000; a Professional User Fee and Non-Professional User Fee, on a per user basis, of \$70 and \$16, respectively; a Non-Display Fee of \$20,000, whether the use is for category 1, category 2 or category 3, with a category 3 cap of \$60,000;⁷ a Non-Display Declaration Late Fee of \$1,000; and a Multiple Data Feed Fee of \$200. The Exchange proposes to increase the aforementioned fees on a one-time basis as follows: the Access Fee, from \$7,500/month to \$8,400/month; the Redistribution Fee from \$4,000/month to \$4,400/month; the Professional User Fee (Per User) from \$70/month to \$78/month; and the Non-Display Fee from \$20,000/month to \$22,400/month, whether the use is for category 1, category 2 or category 3, with a category 3 cap of \$67,200/month. The Exchange's proposal to adjust fees excludes the Non-Professional User fee, the Non-Display Declaration Late fee and the Multiple Data Feed fee.

The NYSE Integrated Feed was established almost a decade ago. The

⁵ See Securities Exchange Act Release Nos. 76485 (November 20, 2015), 80 FR 74158 (November 27, 2015) (SR-NYSE-2015-57) (establishing access fee, user fees, non-display use fees, non-display declaration late fee and redistribution fee for NYSE Integrated Feed); and 76973 (January 26, 2016), 81 FR 5158 (February 1, 2016) (SR-NYSE-2016-09) (amending fees for NYSE Integrated Feed by adopting a multiple data feed fee).

⁶ The Exchange proposes to exclude the Non-Display Declaration Late Fee and the Multiple Data Feed Fee from the proposed fee increase because unlike the other fees for subscribing to the NYSE Integrated Feed, the Non-Display Declaration Late Fee and the Multiple Data Feed Fee are administrative fees and are uniform across all of the Exchange's market data products. The Exchange also proposes to exclude the Non-Professional User fees from the proposed fee increase because these fees are applicable to retail investors.

⁷ Category 1 Fees apply when a data recipient's Non-Display Use of real-time market data is on its own behalf as opposed to use on behalf of its clients. Category 2 Fees apply when a data recipient's Non-Display Use of real-time market data is on behalf of its clients as opposed to use on its own behalf. Category 3 Fees apply when a data recipient's Non-Display Use of real-time market data is for the purpose of internally matching buy and sell orders within an organization, including matching customer orders on a data recipient's own behalf and/or on behalf of its clients.

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

⁴ The proposed rule change establishing the NYSE Integrated Feed was immediately effective on January 21, 2015. See Securities Exchange Act Release No. 74128 (January 23, 2015), 80 FR 4951 (January 29, 2015) (SR-NYSE-2015-03) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change Establishing the NYSE Integrated Feed Data Feed).

²⁴ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

Exchange has not amended fees for the NYSE Integrated Feed since the fees were initially adopted in 2016. Between the implementation of fees for the NYSE Integrated Feed in January 2016 and October 2024, there was a remarkable increase in the number of messages processed by the Exchange. The following message rate metrics illustrate this increase in throughput:⁸

- Peak Rate by Millisecond: up approximately 116%
- Average Rate per Millisecond: up approximately 27%
- Peak Rate per Second: up approximately 34%⁹
- Average Rate per Second: up approximately 92%
- Peak Total Messages: up approximately 39%
- Average Total Messages: up approximately 92%
- Average Daily Volume: up approximately 32%

With this increase in message traffic the Exchange expended significant resources to improve its market data products to meet customer expectations, including continued investment in all aspects of the technology ecosystem (e.g., software, hardware, and network). During the period between 2016 (when the Exchange first adopted fees for the NYSE Integrated Feed) and 2024, advancements in system performance as measured by latency not only accommodated the high message traffic volumes, but stayed well ahead of it. The following latency metrics¹⁰ illustrate the increase in message processing speed, despite the significant message traffic growth:

- Median: down approximately 77%
- Average: down approximately 67%
- Max: down approximately 64%

The Exchange continues to invest heavily in enhancing its technology for the benefit and often at the behest of its customers, and these investments have increased the performance of the NYSE Integrated Feed. Yet the Exchange has not adjusted any of the fees included in this proposal since 2016, to even partially offset the costs of maintaining and enhancing its market data offerings.

As discussed below, the Exchange proposes to adjust its fees by an industry- and product-specific

inflationary measure. It is reasonable and consistent with the Act for the Exchange to recoup its investments, at least in part, by adjusting its fees. Continuing to operate at fees frozen at 2016 levels impacts the Exchange's ability to enhance its offerings and the interests of market participants and investors.

The fee increases the Exchange proposes are based on an industry-specific Producer Price Index (PPI), which is a tailored measure of inflation.¹¹ As a general matter, the Producer Price Index is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (CPI), that measure price change from the purchaser's perspective.¹² About 10,000 PPIs for individual products and groups of products are tracked and released each month.¹³ PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector's output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing and Related Services PPI ("Data PPI"), which is an industry net-output PPI that measures the average change in selling prices received by companies that provide data processing services.

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (BLS) as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS—518210 in the North American Industry Classification System.¹⁴ According to the BLS "[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary

software—to process customers' transactions and data. Companies that offer processing services collect, organize, and store a customer's transactions and other data for record-keeping purposes. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract."¹⁵

The Exchange believes the Data PPI is an appropriate measure to be considered in the context of the proposed rule change to modify the fee for its proprietary market data products because the Exchange uses its "own computer systems" and "proprietary software," i.e., its own data center and proprietary matching engine software, respectively, to collect, organize, store and report customers' transactions in U.S. equity securities on Pillar, the Exchange's proprietary trading platform. In other words, the Exchange is in the business of data processing and related services.

For purposes of this proposed rule change, the Exchange examined the Data PPI value for the period from January 2016 to October 2024. The Data PPI had a starting value of 103.2 in January 2016 and an ending value of 115.902 in October 2024, a 12.31% increase. This indicates that companies who are also in the data storage and processing business have generally increased prices for a specified service covered under NAICS 518210 by an average of 12.31% during this period. Based on that percentage change, the Exchange proposes to make a one-time fee increase by up to 12.31% for the NYSE Integrated Feed, which reflects an increase covering the entire period since the fees for NYSE Integrated Feed were initially adopted.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002.

⁸ The message rate metrics are for the period from January 2017 through October 2024.

⁹ Due to a technology upgrade, the Peak Rate per Second metric is for the period from December 2019 through October 2024.

¹⁰ These measurements compare the time difference between events on the NYSE matching engine and the time these events are published on the NYSE Integrated Feed. The latency metrics are for the period from January 2017 through October 2024.

¹¹ See <https://fred.stlouisfed.org/series/PCU51825182#0>.

¹² See <https://www.bls.gov/ppi/overview.htm>.

¹³ *Id.*

¹⁴ NAICS appears in table 5 of the PPI Detailed Report and is available at <https://data.bls.gov/timeseries/PCU518210518210>.

¹⁵ See <https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-services-industry-naics-518210.htm>.

The average calendar year change from January 2002 to December 2023 was .62%,¹⁶ with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.¹⁷

The Exchange believes the Data PPI, and significant investments into, and enhanced performance of, the Exchange support the reasonableness of the proposed fee increases.¹⁸

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the provisions of Section 6 of the Act,¹⁹ in general, and Sections 6(b)(4) and 6(b)(5) of the Act,²⁰ in particular, in that it provides an equitable allocation of reasonable fees among users and recipients of the data and is not designed to permit unfair discrimination among customers, issuers, and brokers.

This belief is based on two factors. First, the current fees do not properly reflect the quality of the services and products, as fees for the services and products in question have been static in nominal terms, and therefore falling in real terms due to inflation. Second, the Exchange believes that investments made in enhancing the capacity and speed of Exchange systems increase the performance of the services and products.

The Proposed Rule Change Is Reasonable

As noted above, the Exchange has not increased any of the fees included in the proposal since 2016. However, in the years since the adoption of the initial fees the Exchange has made significant investments in upgrades to Exchange systems, enhancing the quality of its services, as measured by, among other things, increased throughput and faster processing speeds. In other words, Exchange customers have greatly

benefitted, while the Exchange's ability to recoup its investments has been hampered.

Between 2016 and 2024, the inflation rate is 3.48% per year, on average, producing a cumulative inflation rate of 31.52%.²¹ Using the more targeted inflation number of Data PPI, the cumulative inflation rate was 12.31%. The exchange believes the Data PPI is a reasonable metric to base this fee increase on because it is targeted to producer-side increases in the data processing industry, which based on the definition adopted by BLS would include the Exchange's market data products.

Notwithstanding inflation, as noted above, the Exchange has not increased its fees at all for over nine years for the subject services. The proposed fee changes represent a modest increase from the current fees.

The Exchange believes the proposed fee increase is reasonable in light of the Exchange's continued expenditure in maintaining a robust technology ecosystem. Furthermore, the Exchange continues to invest in maintaining and enhancing its market data products—for the benefit and often at the behest of its customers and global investors. Such enhancements include refreshing all aspects of the technology ecosystem including software, hardware, and network while introducing new and innovative products.²² The goal of the enhancements discussed above, among other things, is to provide faster and more consistent market data products, while ensuring quicker processing time. Accordingly, the Exchange continues to expend resources to innovate and modernize technology so that it may benefit its members in offering its market data products.

The Proposed Fees Are Equitably Allocated and Not Unfairly Discriminatory

The Exchange believes that the proposed fee increases are equitably allocated and not unfairly discriminatory because they would apply to all data recipients that choose to subscribe to the NYSE Integrated Feed. Any subscriber that chooses to subscribe to the NYSE Integrated Feed would be subject to the same Fee Schedule, regardless of what type of business they operate or the use they

plan to make of the data feed. Additionally, the fee increase would be applied uniformly to subscribers without regard to Exchange membership status or the extent of any other business with the Exchange or affiliated entities.

The Exchange also believes that the proposal represents an equitable allocation of reasonable dues, fees and other charges because Exchange fees have fallen in real terms during the relevant period.

Finally, the Exchange believes that the proposed fee changes are not unfairly discriminatory because the fees would be assessed uniformly across all market participants, in the same manner they are today, that voluntarily subscribe to the NYSE Integrated Feed, which would remain available for purchase by all market participants.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed fees will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition. The Exchange believes that the proposed fees do not put any market participants at a relative disadvantage compared to other market participants. As noted above, the fee schedule would continue to apply to all subscribers of the NYSE Integrated Feed in the same manner as it does today albeit at inflation-adjusted rates for certain fees, and customers may choose whether to subscribe to the feed at all. The Exchange also believes that the level of the proposed fees neither favor nor penalize one or more categories of market participants in a manner that would impose an undue burden on competition.

Intermarket Competition. The Exchange believes that the proposed fees do not impose a burden on competition or on other SROs that is not necessary or appropriate. In determining the proposed fees, the Exchange utilized an objective and stable metric with limited volatility. Utilizing Data PPI over a specified period of time is a reasonable means of recouping the Exchange's investment in maintaining and enhancing the NYSE Integrated Feed. The Exchange believes utilizing Data PPI, a tailored measure of inflation, to increase certain fees for NYSE Integrated Feed to recoup the Exchange's investment in maintaining and enhancing its market data products would not impose a burden on competition.

¹⁶ The Data PPI through the calendar year 2024 does not become available until January 2025.

¹⁷ See <https://www.usinflationcalculator.com/inflation/consumer-price-index-and-annual-percent-changes-from-1913-to-2008/>.

¹⁸ See *supra* discussion of system performance advancements. Additionally, the Exchange's affiliate, NYSE Arca, Inc. recently increased certain fees for subscribing to the NYSE Arca Integrated Feed, based on comparisons to inflation. See Securities Exchange Act Release Nos. 34–100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR–NYSEARCA–2024–79).

²⁰ 15 U.S.C. 78f(b)(4), (5).

²¹ See <https://www.officialdata.org/us/inflation/2016?amount=1>.

²² See, e.g., Securities Exchange Act Release No. 99689 (March 7, 2024), 89 FR 18466 (March 13, 2024) (SR–NYSE–2024–12) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Establish the NYSE Aggregated Lite Market Data Feed).

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A) ²³ of the Act and subparagraph (f)(2) of Rule 19b-4 ²⁴ thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) ²⁵ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NYSE-2024-80 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-NYSE-2024-80. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/>

[rules/sro.shtml](https://www.sec.gov/rules/sro.shtml)). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSE-2024-80 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁶

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102000; File No. SR-NYSE-2024-82]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend the Timeline To Implement the Proposed Rule Change To Enhance How NYSE Would Make Certain Information the Exchange Receives From Its Listed Companies Publicly Available

December 19, 2024.

Pursuant to Section 19(b)(1) ¹ of the Securities Exchange Act of 1934 ("Act") ² and Rule 19b-4 thereunder,³ notice is hereby given that on December 18, 2024, New York Stock Exchange LLC ("NYSE" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the

proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to implement the change to make certain information the Exchange receives from its listed companies publicly available, in the first quarter of 2025. The proposed rule change is available on the Exchange's website at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

On October 28, 2024, the Exchange filed a proposed rule change to describe an enhancement to how NYSE would publicly disseminate information received by the Exchange in its role as a listing venue.⁴ In SR-NYSE-2024-68, the Exchange indicated that because of the technology changes associated with the proposed rule change, the Exchange would announce the implementation date by Trader Update, which, subject to the effectiveness of the proposed rule change, would be no later than in the fourth quarter of 2024. The Exchange now proposes to announce the implementation of the enhancement described in SR-NYSE-2024-68 in the first quarter of 2025.

This proposed rule change will allow the Exchange to conduct additional testing of its software delivery prior to

²³ 15 U.S.C. 78s(b)(3)(A).

²⁴ 17 CFR 240.19b-4(f)(2).

²⁵ 15 U.S.C. 78s(b)(2)(B).

²⁶ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

⁴ See Securities Exchange Act Release No. 101516 (November 5, 2024), 89 FR 89061 (November 12, 2024) (SR-NYSE-2024-68).

implementation. The Exchange will issue a Trader Update notifying market participants prior to implementing the enhancement described in SR–NYSE–2024–68.

2. Statutory Basis

The Exchange believes that its proposed rule change is consistent with section 6(b) of the Act⁵ in general, and furthers the objectives of section 6(b)(5) of the Act⁶ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in, securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest by allowing the Exchange additional time to plan and implement the proposed enhancement.

The Exchange notes that the substance of the enhancement described in SR–NYSE–2024–68 is not changing, only the implementation timeline is changing with this proposal.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange's proposal to implement the enhancement described in SR–NYSE–2024–68 in the first quarter of 2025 does not impose an undue burden on intermarket or on intramarket competition. The proposed rule change will simply allow the Exchange additional time to properly plan and put into place the enhancement described in SR–NYSE–2024–68.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant

burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁷ and Rule 19b–4(f)(6) thereunder.⁸

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR–NYSE–2024–82 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. All submissions should refer to file number SR–NYSE–2024–82. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the

provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–NYSE–2024–82 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁹

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–102029; File No. SR–NASDAQ–2024–083]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing of Proposed Rule Change To Assume Operational Responsibility for Litigating Contested Disciplinary Proceedings Arising Out of Nasdaq-Led Investigations and Enforcement Activities and Amend Rules 9131 and 9810 (of General 5, the Nasdaq Discipline Rules) To Grant Nasdaq Regulation the Same Authority as FINRA In Contested Disciplinary Proceedings To Serve Complaints and Memoranda of Authority

December 23, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on December 11, 2024, The Nasdaq Stock Market LLC (“Nasdaq” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

⁹ 17 CFR 200.30–3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

⁷ 15 U.S.C. 78s(b)(3)(A).

⁸ 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

⁵ 15 U.S.C. 78f(b).

⁶ 15 U.S.C. 78f(b)(5).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to assume operational responsibility for certain enforcement functions currently performed by the Financial Industry Regulatory Authority ("FINRA") under the Exchange's authority and supervision. Specifically, the Exchange proposes to (1) assume operational responsibility for litigating contested disciplinary proceedings arising out of Nasdaq-led investigations and enforcement activities, and (2) amend Rules 9131 and 9180[sic] (of General 5, the Nasdaq Discipline Rules) to grant Nasdaq Regulation the same authority as FINRA in contested disciplinary proceedings to serve complaints and memoranda of authority.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Section 6 of the Act requires that national securities exchanges enforce their members' compliance with federal securities laws and rules as well as the exchanges' own rules.³ As a self-regulatory organization ("SRO"), Nasdaq must have a comprehensive regulatory program that includes the investigation and prosecution of rule violations. Since it became a national securities exchange, Nasdaq has contracted with FINRA through various regulatory services agreements ("RSAs") to perform certain of these regulatory functions on its behalf. However, as the Commission has made clear, "the

Nasdaq Exchange bears the responsibility for self-regulatory conduct and primary liability for self-regulatory failures, not the SRO retained to perform regulatory functions on the Exchange's behalf."⁴

a. Background

In April 2019, Nasdaq received Commission approval to reallocate operational responsibility from FINRA to Nasdaq Regulation Department⁵ for certain investigation and enforcement activity,⁶ namely:

- investigation and enforcement responsibilities for conduct occurring on The Nasdaq Options Market,⁷ and
- investigation and enforcement responsibilities for conduct occurring on Nasdaq's equity market only, *i.e.*, conduct not also on non-Nasdaq-affiliated equities markets.⁸

In March 2020, Nasdaq received Commission approval to reallocate operational responsibility from FINRA to Nasdaq Regulation for additional enforcement activity, namely the handling of certain contested disciplinary proceedings.⁹ Specifically, Nasdaq requested and received authority to handle contested disciplinary proceedings arising out of Nasdaq-led investigation and enforcement activities that "FINRA is unable or unwilling to handle due to strained resources or other similar limitations."¹⁰ For those contested disciplinary proceedings over which Nasdaq did not request approval to assume operational responsibility, FINRA continues to litigate those matters under the Exchange's supervision.

⁴ Securities Exchange Act Release No. 53128 (January 13, 2006), 71 FR 3550, 3556 (January 23, 2006).

⁵ Under Nasdaq Rule 9120(t), Nasdaq Regulation includes the Nasdaq Enforcement Department.

⁶ Securities Exchange Act Release No. 85505 (April 3, 2019), 84 FR 14170, 14171 (April 9, 2019).

⁷ As appropriate, Nasdaq Regulation coordinates with other SROs to avoid regulatory duplication in cross-market investigations, primarily through the Cross Market Regulation Working Group.

⁸ With respect to the operational responsibilities described, Nasdaq Regulation already performed these functions for the Nasdaq PHLX LLC ("Phlx"), Nasdaq ISE, LLC ("ISE"), Nasdaq GEMX, LLC ("GEMX"), and Nasdaq MRX, LLC ("MRX") because there is no comparable rule to Rule General 2, Section 7 on those markets. Nasdaq BX, Inc. ("BX"), which does have a comparable rule to Rule General 2, Section 7, received Commission approval to perform these functions in June 2019. See Securities Exchange Act Release No. 86051 (June 6, 2019), 84 FR 27387 (June 22, 2019).

⁹ See Securities Exchange Act Release No. 88209 (February 13, 2020), 85 FR 9870 (February 20, 2020), as modified by Amendment No. 1.; Securities Exchange Act Release No. 88516 (March 30, 2020), 85 FR 19042 (April 3, 2020).

¹⁰ *Id.*

b. Proposed Rule Change

Now the Exchange requests approval to (1) assume operational responsibility for litigating contested disciplinary proceedings arising out of Nasdaq-led investigations and enforcement activities, and (2) amend Rules 9131 and 9180[sic] (of General 5, the Nasdaq Discipline Rules) to grant Nasdaq Regulation the same authority as FINRA in contested disciplinary proceedings to serve complaints and memoranda of authority.

Reallocation of Operational Responsibility

The March 2020 Commission approval vested Nasdaq with the authority to litigate a subset of contested disciplinary proceedings pertinent to the Exchange (*i.e.*, those contested disciplinary matters arising out of Nasdaq-led investigations and enforcement activities that "FINRA is unable or unwilling to handle due to strained resources or other similar limitations").¹¹ This proposal expands Nasdaq's enforcement authority by enabling Nasdaq Regulation to litigate contested disciplinary proceedings arising out of Nasdaq-led investigations and enforcement activities in the first instance, regardless of FINRA's ability or willingness to handle the matter.

Nasdaq's assumption of broader operational responsibility for litigating contested disciplinary proceedings arising out of Nasdaq-led investigations and enforcement activities allows for the more immediate and efficient enforcement of federal securities laws and rules and Nasdaq's own rules. Nasdaq enjoys deep expertise in its own market structure and in surveillance on the Exchange. When a Nasdaq investigation identifies impermissible activity on its Exchange and Nasdaq cannot settle the matter with the responsible Nasdaq member, Nasdaq Regulation's assumption of the ability to litigate the contested disciplinary proceeding avoids the need for FINRA's Enforcement Department to familiarize itself with the Nasdaq-led investigation and consequently helps expedites the enforcement of Nasdaq's rules and the securities laws and rules with which Nasdaq members must comply.

The Exchange notes that this proposal would not change the disciplinary process or the procedural protections already afforded to Nasdaq members in contested disciplinary proceedings. For example, the rules applicable to the disciplinary process remain the same, and FINRA's Office of Hearing Officers

³ 15 U.S.C. 78(f).

¹¹ See *supra* n. 9.

will continue to administer the hearing process for all contested disciplinary proceedings. Therefore, regardless of whether FINRA or the Exchange is responsible for litigating the matter, FINRA's Office of Hearing Officers will administer the hearing process.¹²

Nasdaq Rule General 2, Section 7 requires that Nasdaq obtain Commission approval if regulatory functions subject to RSAs in effect at the time that Nasdaq began to operate as a national securities exchange are no longer performed by FINRA or an affiliate thereof, or by another independent self-regulatory organization. Nasdaq believes that assuming operational responsibility for contested disciplinary proceedings arising out of Nasdaq-led investigations will further its regulatory program and benefit investors and the markets. Commission approval of the proposal would allow Nasdaq to deliver increased efficiencies in the regulation of its market and to more effectively and promptly regulate activity on its market.

Notwithstanding that approval, FINRA will continue to perform certain functions pursuant to a RSA,¹³ including, among other things, the handling of certain contested disciplinary proceedings arising out of FINRA-led investigation and enforcement activities.¹⁴

Technical Amendments Permitting Nasdaq Regulation To Serve Complaints and Memoranda of Authorities

Nasdaq also proposes two technical updates to its Code of Procedure. Specifically, the proposed amendments will permit Nasdaq Regulation Department to serve (1) complaints and; (2) memoranda of authority in support of temporary cease-and-desist orders in contested disciplinary proceedings. Under the current rules, which Nasdaq adopted before the March 2020 rule change permitting Nasdaq Regulation to litigate certain contested disciplinary matters, only FINRA's Department of Enforcement may serve a respondent with either a complaint or a memorandum of authorities supporting a temporary cease-and-desist order. These technical amendments would

avoid the need for FINRA to serve Nasdaq-authored complaints and memoranda of authority on respondents, streamlining litigation in contested disciplinary proceedings handled by Nasdaq Regulation. These technical amendments also align the two affected rules with the remainder of General 5 (the Nasdaq Discipline Rules), which rules grant Nasdaq Regulation and FINRA's Department of Enforcement equivalent powers.

Pursuant to Rule 9131(a) (contained in General 5), "a complaint shall be served on each Party by the [FINRA] Department of Enforcement." The proposed amendment would permit Nasdaq Regulation to also serve a complaint. Similarly, in contested disciplinary proceedings in which Nasdaq or FINRA seeks a temporary cease-and-desist order, Rule 9810(b)(2) (contained in General 5) permits only FINRA's Department of Enforcement to serve a memorandum of authorities in support of the temporary cease-and-desist request. This proposed amendment grants Nasdaq Regulation the same authority as FINRA's Department of Enforcement to serve a memorandum of authorities.

2. Statutory Basis

The Exchange believes that its proposals are consistent with Section 6(b) of the Act,¹⁵ in general, and furthers the objectives of Section 6(b)(5) of the Act,¹⁶ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

In addition, the Exchange believes that the proposals furthers the objectives of Section 6(b)(7) of the Act,¹⁷ in particular, in that these changes will continue to provide for fair procedures for the disciplining of members and persons associated with members, the denial of membership to any person seeking membership therein, the barring of any person from becoming associated with a member thereof, and the prohibition or limitation by the Exchange of any person with respect to access to services offered by the Exchange or a member thereof.

The Exchange believes that its proposal is in keeping with those principles because it will ensure that contested matters retained by the Nasdaq Regulation Department are handled effectively, efficiently and with

immediacy. Nasdaq will manage these cases directly in all instances, with Nasdaq retaining the option to refer cases to FINRA if Nasdaq's resources are constrained or if another circumstance warrants FINRA litigating a contested disciplinary proceeding under Nasdaq's supervision. This approach allows Nasdaq to take timely action when appropriate, enforce its rules, and uphold investor protection and market integrity. The proposed amendments, however, would not change or alter in any way the disciplinary processes around how contested matters are handled. Rather, they will result in more effective regulation because it will facilitate timely and more efficient action. Internalizing the litigation function in Nasdaq-led contested matters will also facilitate effective regulation because the Exchange will continue to bring to bear its overall market and surveillance expertise throughout the disciplinary proceedings. Permitting Nasdaq to serve (1) complaints and (2) memoranda of authority in support of temporary cease-and-desist orders are ministerial changes that will enable Nasdaq to more quickly and efficiently litigate contested disciplinary matters arising out of Nasdaq-led investigations.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is primarily administrative in nature and does not introduce any competitive concerns. Rather than addressing competitive issues, the purpose and effect of the proposed rule change is to enable Nasdaq to litigate contested disciplinary proceedings arising out of Nasdaq-led investigations and enforcement activities. Permitting Nasdaq to serve (1) complaints and (2) memoranda of authority in support of temporary cease-and-desist orders are ministerial changes and do not introduce any competitive concerns.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal**

¹² FINRA's Office of Hearing Officers plays no role in uncontested disciplinary proceedings.

¹³ In addition to work performed pursuant to a RSA, FINRA also performs work for matters covered by agreements to allocate regulatory responsibility under Rule 17d-2 of the Act.

¹⁴ Although Nasdaq anticipates handling contested disciplinary proceedings arising out of Nasdaq-led investigations and enforcement activities, Nasdaq retains the right to refer particular matters arising out of Nasdaq-led investigations or enforcement activities to FINRA's Department of Enforcement to handle in appropriate circumstances.

¹⁵ 15 U.S.C. 78f(b).

¹⁶ 15 U.S.C. 78f(b)(5).

¹⁷ 15 U.S.C. 78f(b)(7).

Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) by order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NASDAQ-2024-083 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-NASDAQ-2024-083. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication

submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NASDAQ-2024-083 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁸

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101980; File No. SR-CboeEDGA-2024-050]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Update Its Fee Schedule Regarding Uncontrolled External Distributors

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 16, 2024, Cboe EDGA Exchange, Inc. (the "Exchange" or "EDGA") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (the "Exchange" or "EDGA") proposes to update its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/edga/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements

concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Market Data section of its Fee Schedule to adopt a new fee waiver for Uncontrolled External Distributors.³ Particularly, the Exchange proposes to: (i) adopt a waiver of External Distribution fees for Uncontrolled External Distributors of the Summary Depth Feed and (ii) adopt fee waiver of External Distribution fees and Data Consolidation fees for Uncontrolled External Distributors of the Cboe One Summary Feed and Cboe One Premium Feed.⁴

EDGA Top and Summary Depth Data

By way of background, the Exchange offers the EDGA Top Data Feed, which is a data feed that offers top-of-book quotations and last sale information based on orders entered into the Exchange's System. The EDGA Top Data Feed benefits investors by facilitating their prompt access to real-time top-of-book information contained in EDGA Top Data. The Exchange's affiliated equities exchanges (*i.e.*, Cboe BYX, Inc. ("BYX"), Cboe BZX Exchange, Inc. ("BZX"), and Cboe EDGX Exchange, Inc. ("EDGX") (collectively, "Affiliates" and together with the Exchange, "Cboe Equities Exchanges") also offer similar top-of-book data feeds. Particularly, each of the Exchange's Affiliates offer top-of-book quotation and last sale information based on their own quotation and trading activity that is substantially similar to the information provided by the Exchange through the EDGA Top Data Feed.

In addition to EDGA Top Data Feed, the Exchange offers EDGA Summary Depth Data Feed, which is a data feed that offers aggregated two-sided quotations for all displayed orders

³ The Exchange initially adopted this fee waiver on December 2, 2024 (SR-CboeEDGA-2024-049). On December 16, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ For clarity, the Exchange also proposes to modify the applicable sections of its Fee Schedule for these data feeds to use numbered footnotes in lieu of asterisks.

¹⁸ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

entered into the System for up to five (5) price levels. The EDGA Summary Depth Data Feed also contains the individual last sale information, Market Status, Trading Status, and Trade Break messages.⁵ The EDGA Summary Depth Data Feed benefits investors by facilitating their prompt access to real-time market depth information contained in EDGA Summary Depth Data. The Exchange's Affiliates also offer similar depth-of-book data feeds. Particularly, each of the Exchange's Affiliates offer depth-of-book quotations up to five (5) price levels based on their own quotation and trading activity that is substantially similar to the information provided by the Exchange through the EDGA Summary Depth.

The Exchange proposes to make the following fee changes relating to EDGA Summary Depth.

EDGA Summary Depth Data Feed New Uncontrolled External Distributor External Distribution Fee Waiver

Currently, the Exchange does not assess an External Distribution fee to any External Distributor⁶ of the EDGA Top Data Feed and as such, the Exchange does not propose a fee waiver for this. However, all External Distributors of EDGA Summary Depth Data Feed are charged an External Distribution fee of \$2,500 per month.⁷ The Exchange proposes to adopt a new waiver which will provide that new Uncontrolled External Distributors of the EDGA Summary Depth feed will not be charged the External Distributor fee until such time they enlist one or more Users⁸ to receive the EDGA Summary Depth Feed (the "New Uncontrolled External Distributor EDGA Depth Fee Waiver").⁹ "Uncontrolled External Distributors" distribute data externally to a User that is not an affiliate of the Uncontrolled Distributor and is unable to control the entitlements of and

display of information to such User (*i.e.*, a data feed subscriber).¹⁰ To be eligible for the New Uncontrolled External Distributor EDGA Depth Fee Waiver, a new Uncontrolled External Distributor must not have received EDGA Summary Depth feed within the last 18 months.¹¹ As discussed further below, the Exchange seeks to adopt the proposed New Uncontrolled External Distributor EDGA Depth Fee Waiver to incentivize vendors to adopt the EDGA Summary Depth feed proactively without having to wait for customer demand to start development and integration of data feeds. The Exchange notes that both the Exchange and its Affiliates currently offer similar credits to External Distributors (which both Uncontrolled and Controlled External Distributors are eligible for) for the purposes of allowing them time to enlist new users to receive certain data feeds. For example, the Exchange and its Affiliates currently offer a one (1) month New External Distributor Credit applicable to External Distributors of top-of-book data feeds.¹² They also offer a three (3) month new External Credit applicable to External Distributors of summary depth-of-book feeds.¹³

Cboe One Summary and Premium

By way of background, Cboe One Premium is a data feed that disseminates, on a real-time basis, the aggregate best bid and offer ("BBO") of all displayed orders for securities traded on EDGA and its Affiliates and contains optional functionality which enables recipients to receive aggregated two-sided quotations from EDGA and its Affiliates for up to five (5) price levels.¹⁴ The Cboe One Premium Data Feed is created using the data from the

Exchange and its Affiliates' Summary Depth data feeds. In contract, Cboe One Summary is a data feed that disseminates, on a real-time basis, the aggregate BBO of all displayed orders for securities traded on EDGA and its affiliated equities exchanges and also contains individual last sale information for the EDGA and its affiliated equities exchanges.¹⁵ The Cboe One Summary Data Feed is created using the data from the Exchange and its Affiliates' Top data feeds. Currently, the Exchange offers the New External Distributor Credit which provide that new External Distributors of the Cboe One Premium Feed and Cboe One Summary Feed will not be charged an External Distributor Fee for their first three (3) months and one (1) month, respectively, in order to allow them to enlist new Users to receive the respective feed.¹⁶ The Exchange proposes to make the following fee change relating to both the Cboe One Summary Data Feed and the Cboe One Premium Data Feed.

Cboe One Summary and Premium New Uncontrolled External Distributor External Distribution and Data Consolidation Fee Waivers

Currently, the Exchange assesses all External Distributors of Cboe One Summary an External Distribution fee of \$5,000 per month and External Distributors of Cboe One Premium an External Distribution fee of \$12,500 per month.¹⁷ The Exchange proposes to adopt fee waivers which will provide that new Uncontrolled External Distributors of the Cboe One Summary and Cboe One Premium feeds will not be charged either the (i) External Distribution fees nor (ii) Data Consolidation fee until such time they enlist one or more Users to receive the Cboe One Summary or Cboe One Premium Feeds (the "New Uncontrolled External Distributor Cboe One Summary and Cboe One Premium Fee Waiver").¹⁸

⁵ See Exchange Rule 13.8(f).

⁶ See EDGA Fees Schedule noting a cost a monthly External Distribution cost of \$0.

⁷ External Distribution Fees for EDGA Summary Depth is subject to the New External Distributor Credit and eligible for a free trial. See EDGA Equities Exchange Fees Schedule, Market Data Fees.

⁸ The Exchange defines a "User" of an Exchange Market Data Product as a natural person, a proprietorship, corporation, partnership or entity, or device (computer or other automated service), that is entitled to receive Exchange data. See EDGA Equities Exchange Fees Schedule, Market Data Fees.

⁹ Uncontrolled External Distributors will receive at least the New External Distributor credit of at least three months for EDGA Summary Depth. For example, if an Uncontrolled Distributor enlists a new subscriber of EDGA Summary Depth during its second month taking EDGA Summary Depth, the Uncontrolled External Distributor will still receive a credit for the remainder of the second month, as well as the third month under the existing New External Distributor Credit program.

¹⁰ See Cboe Global Markets North American Data Policies. The Exchange proposes to codify the definition of an "Uncontrolled External Distributor" in the Definitions section of the Market Data Fees schedule in the Exchange's Fees Schedule for transparency and clarity.

¹¹ The Exchange notes that it has a similar 18 month requirement for participants to be considered eligible for the New Member Program. See EDGA Equities Exchange Fees Schedule, New Member Program.

¹² See *e.g.*, EDGX Equities Exchange Fees Schedule, Market Data Fees.

¹³ See *e.g.*, *Id.*

¹⁴ The Cboe Aggregated Market ("Cboe One") Feed is a data feed that contains the aggregate best bid and offer of all displayed orders for securities traded on the Exchange and its affiliated exchanges (*i.e.*, EDGX, EDGA, and BZX). See Exchange Rule 13.8(b). The Cboe One Feed contains optional functionality which enables recipients to receive aggregated two-sided quotations from the Cboe Equities Exchanges for up to five (5) price levels ("Cboe One Premium Feed"). The Cboe One Premium external distribution fee is equal to the aggregate EDGX Summary Depth, BYX Summary Depth, EDGA Summary Depth, and BZX Summary Depth external distribution fees.

¹⁵ The Exchange notes that when it first adopted the New External Distributor Credit for Cboe One Summary, it similarly applied for a new External Distributor's first three (3) months. See Securities Exchange Act Release No. 74283 (February 18, 2015), 80 FR 9809 (February 24, 2015) (SR-EDGA-2015-09).

¹⁶ See EDGA Fee Schedule.

¹⁷ External Distribution Fees for both Cboe One Summary and Cboe One Premium are subject to the New External Distribution Credit and eligible for a free trial. See EDGA Equities Exchange Fees Schedule.

¹⁸ The proposed waivers of the External Distribution fees for each of Cboe One Summary and Cboe One Premium will be applied separately. For example, when an Uncontrolled External Distributor that is receiving a fee waiver for both Cboe One Summary and Cboe One Premium enlists a first User for Cboe One Summary, the Uncontrolled External Distributor will no longer

To be eligible for either fee waiver for the applicable feed(s) (Cboe One Summary and/or Cboe One Premium), the new Uncontrolled Data Distributor must not have received the applicable data feed(s) for which it seeks a waiver in the last 18 months.¹⁹ For clarity, similar to the New Uncontrolled External Distributor EDGA Depth Fee Waiver, while the Uncontrolled External Distributor receives the New Uncontrolled External Distributor Cboe One Summary and Cboe One Premium Fee Waiver, the Uncontrolled External Distributor will not have any customers receiving this data. As described herein, once the New Uncontrolled External Distributor enlists its first User, it is no longer eligible to receive the New Uncontrolled External Distributor Cboe One Summary and Cboe One Premium Fee Waiver.

To start, the Exchange's proposal to waive the External Distributor fee for New Uncontrolled External Distributors until a User is enlisted, will prevent the combined cost of subscribing to BYX, EDGA, EDGX, and BZX Summary Depth feeds for new Uncontrolled External Distributors to be greater than those currently charged to subscribe to the Cboe One Premium feed. Similarly, the proposed External Distributor fee waiver for Cboe One Summary will prevent the combined cost of subscribing to BYX, EDGA, EDGX, and BZX Top feeds for new Uncontrolled External Distributors to be greater than those currently charged to subscribe to the Cboe One Summary feed.

Next, the Exchange proposes to waive the Data Consolidation fee for New Uncontrolled External Distributors until its first User enlists for the Cboe One feeds. The Exchange currently charges Distributors of the Cboe One Feeds a separate Data Consolidation Fee of \$1,000 per month, which reflects the value of the aggregation and consolidation function the Exchange performs in creating the Cboe One Options Feed.²⁰ As stated above, the

eligible to receive the waiver for Cboe One Summary, but will still receive the waiver for Cboe One Premium until and unless it enlists a new subscriber for Cboe One Premium. Additionally, Uncontrolled External Distributors will receive at least the one month New External Distributor Credit for Cboe One Summary and the New External Distributor credit of at least three months for Cboe One Premium. For example, if an Uncontrolled Distributor enlists a new subscriber of Cboe One Premium during its second month taking Cboe One Premium, the Uncontrolled External Distributor will still receive a credit for the remainder of the second month, as well as the third month under the existing New External Distributor Credit program.

¹⁹ See *supra* note 11.

²⁰ See Cboe EDGA Fee Schedule. If a vendor distributes the Cboe One Options Feed to another firm, who then re-distributes the Cboe One Options

Exchange creates the Cboe One feeds from data derived from the Cboe Equities Exchanges. Distributors (including vendors) could similarly create a competing product to the Cboe One feeds based on these individual data feeds offered by the Exchanges and could charge its clients a fee that it believes reflects the value of the aggregation and consolidation function.

The Exchange proposes to adopt this fee waiver to similarly prevent new Uncontrolled External Distributors of the Cboe One Summary or Cboe One Premium feeds from being charged a Data Consolidation Fee until such time they enlist one or more Users to receive the Cboe One Premium or Cboe One Summary feeds.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.²¹ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)²² requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes this proposal is consistent with Section 6(b)(8) of the Act, which requires that the rules of an exchange not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.²³ In addition, the Exchange believes that the proposed rule change is consistent with Section 11(A) of the Act as it supports (i) fair competition among brokers and dealers, among exchange markets, and between

exchange markets and markets other than exchange markets, and (ii) the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities.²⁴

First, the Exchange notes that the EDGA Summary Depth Feed, Cboe One Summary Data Feed and Cboe One Premium Data Feed (together, the "Applicable Feeds") are distributed and purchased on a voluntary basis, in that neither the Exchange nor market data distributors are required by any rule or regulation to make these data products available. Distributors (including vendors) and Users can therefore discontinue use at any time and for any reason, including due to an assessment of the reasonableness of fees charged. Further, the Exchange is not required to make any proprietary data products available or to offer any specific pricing alternatives to any customers.

The Exchange proposes that the proposed waivers applicable to EDGA Depth and Cboe One Feeds (together, the "New Uncontrolled External Distributor Fee Waivers") only apply to Uncontrolled External Distributors for two reasons. The first is to account for Uncontrolled External Distributors needing to develop to the data feed itself. By way of background, the other category of External Data Distributors are Controlled Distributors.²⁵ Controlled Distributors both (i) provides data to a User and (ii) controls the entitlements of and display of information to such User.²⁶ Therefore, the key distinction between Uncontrolled Distributors and Controlled Distributors is that Uncontrolled Distributors distribute a data feed and Controlled Distributors enable visible data for one of its Users. The proposed fee waivers will allow Uncontrolled External Distributors the necessary time to develop to the data feed itself and program all of the different messages, fields and flags and not subject them to any fees until such time they are able to recoup their costs from end-users. Additionally, once the data feed is setup on the Uncontrolled External Distributors end, there are typically long lead times for Uncontrolled External Distributors to onboard new downstream data feed customers. The lead times, or sales cycles, are vastly different for

²⁴ 15 U.S.C. 78k-1.

²⁵ Controlled Distributors may be Internal or External Distributors. See *supra* note 10. "Controlled External Distributors" provide data to an unaffiliated User (*i.e.*, externally distribute) and unlike Uncontrolled External Distributors, they control the entitlement of and display of info to such User.

²⁶ *Id.*

Feed, both entities would be subject to the Data Consolidation Fee. A vendor will only be assessed a single Data Consolidated Fee, even if it distributes Cboe One Options Feed to more than one entity.

²¹ 15 U.S.C. 78f(b).

²² 15 U.S.C. 78f(b)(5).

²³ 15 U.S.C. 78f(b)(8).

Uncontrolled versus Controlled Distributors, as Uncontrolled Distributors are attempting to locate Users who need to receive a real-time market data feed for downstream ingestion on their side (whether this be for trading, analysis, or application development). In contrast, Controlled Distributors are only entitling individual Users to view the data on a pre-existing Display application. For an Uncontrolled Distributor to both set up and find its first User as a data feed subscriber, it can easily take several months. As there is more uncertainty with the viability of both developing a data feed and finding Users for this data feed after the Uncontrolled External Distributor develops it, the Exchange believes it is therefore reasonable, equitable and not unfairly discriminatory for this discount to only apply to Uncontrolled External Distributors to encourage development of their data offerings.

The Exchange has also taken into consideration its affiliated relationship with its Affiliates in its design of the proposed waivers²⁷ to ensure that vendors would be able to offer similar products to its Cboe One Summary and Cboe One Premium Feeds on the same terms as the Exchange from a cost perspective. While the Cboe Equities Exchanges are the exclusive distributors of the individual data feeds from which certain data elements may be taken to create the Cboe One feeds, they are not the exclusive distributors of the aggregated and consolidated information that comprises the Cboe One feeds. Any entity that receives, or elects to receive, the individual data feeds would be able to, if it so chooses, to create a data feed with the same information included in either of the Cboe One feeds and sell and distribute it to its clients so that it could be received by those clients as quickly as the Cboe One feeds would be received by those same clients. Such entities would also not be assessed any greater fees by the Exchange than the Exchange assess for the Cboe One feeds (*i.e.*, those who elect to distribute and consolidate the individual data fees and those who elect to distribute the Cboe One feeds will all be eligible for the proposed fee waivers offered by the Exchange).

New External Distributor Credit

The Exchange believes it is reasonable to not charge Uncontrolled External Distributors of an Applicable Feed(s) until such time they enlist one or more Users to receive the applicable feed as

such Distributors will not be subject to the External Distribution Fees for the applicable product(s) during this period.²⁸ Additionally, the Exchange and its Affiliates offer a similar credit now that all External Distributors, including Controlled External Distributors, may receive.²⁹ The proposed credit is intended to incentivize new Uncontrolled External Distributors to enlist Users to subscribe to the Applicable Feeds in an effort to broaden the products' distribution to data feed Users. While this incentive is not available to Internal Distributors of these products, the Exchange believes it is appropriate as Internal Distributors have no Users outside of their own firm. Furthermore, External Distributors are subject to higher risks of launch as the data is provided outside their own firm. In contrast, Internal Distributors who only subscribe to a specific Exchange offered market data product when there is a need as they themselves are using the information, External Distributors do not use the data themselves, but as noted, take the risk of onboarding the data to sell as a service to downstream customers.³⁰ For these reasons, the Exchange believes it is appropriate, equitable and not unfairly discriminatory to provide additional incentives to External Distributors so they have sufficient time to test the data within their own systems prior to going live externally. As discussed above, the Exchange also believes it is appropriate to limit this specific credit to Uncontrolled External Distributors given the longer development times associated with both the integration of the data feed and onboarding Users.

Data Consolidation Fee

The Exchange believes it is reasonable to not charge Uncontrolled External Distributors of Cboe One Summary and Cboe One Premium a Data Consolidation Fee until such time they enlist one or more Users to receive the applicable feed as such Distributors will not be subject to the Data Consolidation Fee for the applicable product(s) during this period. For the avoidance of doubt,

²⁸ As noted above, Distributors may still receive this credit for any of the applicable feeds of which there are no Users (*i.e.*, the Uncontrolled Distributor may still receive this credit for Cboe One Summary if there is a User subscribed for EDGA Summary Depth).

²⁹ See *e.g.*, EDGX Equities Exchange Fees Schedule, Market Data Fees.

³⁰ The Exchange notes that in addition to the existing New External Distributor Credit offered by it and its affiliates, other exchanges have offered similar waivers for external redistribution. See EDGA Equities Exchange Fees Schedule, Market Data Fees and Securities Exchange Act Release No. 90407 (November 12, 2020), 85 FR 73570 (November 18, 2020) (SR-NYSE-2020-91).

once an Uncontrolled External Distributor enlists its first User, this waiver will no longer be applicable—at no time will an Uncontrolled External Distributor receive this waiver while it has customers receiving the applicable data feed. As previously discussed, the Exchange believes the proposed Data Consolidation Fee Waiver for Uncontrolled External Distributors is not designed to permit unfair discrimination against Controlled External Distributors because of the longer lead times in the development Uncontrolled External Distributors experience. Further, as previously discussed, the Exchange believes only applying this to a subset of External Distributors and not any Internal Distributors is equitable and not unfairly discriminatory given the additional risk External Distributors assume when building out a product for which they have no existing use cases. Therefore, the Exchange believes the proposed application of the Data Consolidation Fee Waiver is reasonable and would not permit unfair discrimination.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The proposed rule changes are grounded in the Exchange's efforts to compete more effectively and to assist in mitigating business costs (*i.e.*, the costs associated with the development of data feeds and seeking Users to onboard for such data feeds) for Uncontrolled External Distributors. Further, as previously discussed, the Exchange believes the proposed Data Consolidation Fee Waiver for Uncontrolled External Distributors is not designed to permit unfair discrimination against Controlled External Distributors because of the longer lead times in the development Uncontrolled External Distributors experience. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges. Further, the Exchange believes that these changes will not cause any unnecessary or inappropriate burden on intermarket competition, as the proposed incentive program applies uniformly to all Uncontrolled External Distributors.

²⁷ The Exchange notes that its Affiliates will also be proposing to adopt these same credits.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act³¹ and paragraph (f) of Rule 19b-4³² thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeEDGA-2024-050 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to file number SR-CboeEDGA-2024-050. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the

Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeEDGA-2024-050 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³³

Vanessa A. Countryman,
Secretary.

[FR Doc. 2024-30900 Filed 12-27-24; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101997; File No. SR-CboeBZX-2024-127]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fees Schedule Related to Physical Port Fees

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 18, 2024, Cboe BZX Exchange, Inc. (the "Exchange" or "BZX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the "Exchange" or "BZX Equities") proposes to amend its Fees Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/BZX/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule relating to physical connectivity fees.³

By way of background, a physical port is utilized by a Member or non-Member

³ The Exchange initially filed the proposed fee changes on July 3, 2023 (SR-CboeBZX-2023-046). On September 1, 2023, the Exchange withdrew that filing and submitted SR-CboeBZX-2023-067. On September 29, 2023, the Securities and Exchange Commission issued a Suspension of and Order Instituting Proceedings to Determine whether to Approve or Disapprove a Proposed Rule Change to Amend its Fees Schedule Related to Physical Port Fees (the "OIP") in anticipation of a possible U.S. government shutdown. On October 2, 2023, the Exchange filed the proposed fee change (SR-CboeBZX-2023-080). On October 13, 2023, the Exchange withdrew that filing and on business date October 16, 2023 submitted SR-CboeBZX-2023-084. On December 12, 2023, the Exchange withdrew that filing and submitted SR-CboeBZX-2023-103. On February 9, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-016. On April 9, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-027. On June 7, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-051. On August 29, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-079. On October 25, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-106. On October 28, 2024, the Exchange withdrew that filing and submitted SR-CboeBZX-2024-108. On December 18, 2024, the Exchange withdrew that filing and submitted this filing.

² 17 CFR 240.19b-4.

to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,500 per physical port for a 1 gigabit ("Gb") circuit and \$7,500 per physical port for a 10 Gb circuit. The Exchange proposes to increase the monthly fee for 10 Gb physical ports from \$7,500 to \$8,500 per port. The Exchange notes the proposed fee change better enables it to continue to maintain and improve its market technology and services and also notes that the proposed fee amount, even as amended, continues to be in line with, or even lower than, amounts assessed by other exchanges for similar connections.⁴ The Exchange also notes that a single 10 Gb physical port can be used to access the Systems of the following affiliate exchanges: the Cboe BYX Exchange, Inc., Cboe EDGX Exchange, Inc. (options and equities platforms), Cboe EDGA Exchange, Inc., and Cboe C2 Exchange, Inc., ("Affiliate Exchanges").⁵ Notably, only one monthly fee currently (and will continue) to apply per 10 Gb physical port regardless of how many affiliated exchanges are accessed through that one port.⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the "Act") and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁷ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁸ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation

and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁹ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)¹⁰ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities. This belief is based on various factors as described below.

First, the Exchange believes its proposal is reasonable as it reflects a moderate increase in physical connectivity fees for 10 Gb physical ports and its offering, even as amended, continues to be more affordable as compared to analogous physical connectivity offerings at competitor exchanges.¹¹

The Exchange also believes the current fee does not properly reflect the quality of the service and product, as fees for 10 Gb physical ports have been static in nominal terms since 2018, and therefore falling in real terms due to inflation. As a general matter, the Producer Price Index ("PPI") is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (CPI), that measure price change from the purchaser's perspective.¹² About 10,000 PPIs for individual products and groups of products are tracked and released each month.¹³ PPIs are available for the output of nearly all industries in the

goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector's output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing, hosting and related services ("Data PPI") and more particularly the more granular service line Data Processing, Hosting and Related Services: Hosting, Active Server Pages (ASP), and Other Information Technology (IT) Infrastructure Provisioning Services.¹⁴

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics ("BLS") as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as NAICS—518210 in the North American Industry Classification System ("NAICS").¹⁵ According to the BLS "[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers' transactions and data. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services and price movements for the service line NAICS 518210 index are based on changes in the revenue received by companies that provide, among other things, IT infrastructure provisioning services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining

⁴ See e.g., The Nasdaq Stock Market LLC ("Nasdaq"), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gb Ultra fiber connection to the respective exchange, which is analogous to the Exchange's 10Gb physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gb LX LCN Circuits (which are analogous to the Exchange's 10 Gb physical port) are assessed \$22,000 per month, per port.

⁵ The Affiliate Exchanges are also submitting contemporaneous identical rule filings.

⁶ The Exchange notes that conversely, other exchange groups charge separate port fees for access to separate, but affiliated, exchanges. See e.g., Securities and Exchange Release No. 99822 (March 21, 2024), 89 FR 21337 (March 27, 2024) (SR-MIAX-2024-016).

⁷ 15 U.S.C. 78f(b).

⁸ 15 U.S.C. 78f(b)(5).

⁹ *Id.*

¹⁰ 15 U.S.C. 78f(b)(4).

¹¹ See e.g., The Nasdaq Stock Market LLC ("Nasdaq"), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gbps Ultra fiber connection to the respective exchange, which is analogous to the Exchange's 10Gbps physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gbps LX LCN Circuits (which are analogous to the Exchange's 10 Gbps physical port) are assessed \$22,000 per month, per port.

¹² See <https://www.bls.gov/ppi/overview.htm>.

¹³ *Id.*

¹⁴ Provisioning is the process of preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity, according to user requirements. It is a critical part of IT operations, as it ensures that computing resources are available when needed and that they are set up and connected to work correctly.

¹⁵ See <https://www.bls.gov/ppi/overview.htm>. Among the industry-specific PPIs is for North American Industry Classification System ("NAICS") Code 518210: "Data Processing and Related Services." NAICS index codes categorize products and services that are common to particular industries. According to BLS, these codes "provide comparability with a wide assortment of industry-based data for other economic programs, including productivity, production, employment, wages, and earnings."

characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.”¹⁶

The service (product) lines for which price indexes are available under the Data PPI are: (1) business process management services (2) data management and storage information transformation and other services and (3) hosting ASP and other IT infrastructure provisioning services. The most apt of these industry and product specific categorizations for purposes of this present proposal to modify fees for the 10 Gb physical port fee measures inflation for the provision of data processing, hosting and related services as well as other information technology infrastructure provisioning services which BLS identifies as identified as NAICS—5182105.¹⁷ The Exchange believes that this measure of inflation is particularly appropriate because the Exchange’s connectivity services involve hosting and providing connections to its customers’ telecommunications and information technology equipment, as well as preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity. The Exchange also uses its “proprietary software,” *i.e.*, its own proprietary matching engine software, to receive orders on the Exchange’s proprietary trading platform as well as to collect, organize, store and report customers’ transactions. In other words, the Exchange is in the business of data processing, hosting, ASP, and providing other IT infrastructure provisioning services.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. For example, the average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a

cumulative increase of over 73% over the same period.¹⁸

As noted above, the current 10 Gb physical port fee remained unchanged for six years, particularly since June 2018.¹⁹ Since its last increase over 6 years ago however, there has been notable inflation, including under the industry- and product-specific PPI, which as described above is a tailored measure of inflation. Particularly, the Hosting, ASP and other IT Infrastructure Provisioning Services inflation measure had a starting value of 102.2 in June 2018 (the month the Exchange started assessing the current fee) and an ending value of 115.66 in November 2024, representing an 13% increase.²⁰ This indicates that companies who are also in the hosting ASP and other IT infrastructure provisioning services have generally increased prices for a specified service covered under NAICS 5182105 by an average of 13% during this period.

The Exchange also believes that it is reasonable to increase its fees to compensate for inflation because, over time, inflation has degraded the value of each dollar that the Exchange collects in fees, such that the real revenue collected today is considerably less than that same revenue collected in 2018. The impact of this inflationary effect is also independent of any change in the Exchange’s costs in providing its goods and services. The Exchange therefore believes that it is reasonable for it to offset, in part, this erosion in the value of the revenues it collects. Additionally, the Exchange historically does not increase fees every year notwithstanding inflation. Other exchanges have also filed for increases in certain fees, based in part on comparisons to inflation.²¹ Accordingly, based on the above-described percentage change based on an industry- and product-specific inflationary measure, and in conjunction with the rationale further described above and below, the Exchange believes the proposed fee increase is reasonable.

Next, the Exchange believes significant investments into, and enhanced performance of, the Exchange, in the years following the last 10 Gb physical port fee increase support the

reasonableness of the proposed fee increase. These investments enhanced the quality of its services, as measured by, among other things, increased throughput and faster processing speeds. Customers have therefore greatly benefitted from these investments, while the Exchange’s ability to recoup its investments has been hampered.

For example, the Exchange and its affiliated exchanges recently launched a multi-year initiative to improve Cboe Exchange Platform performance and capacity requirements to increase competitiveness, support growth and advance a consistent world class platform. The goal of the project, among other things, is to provide faster and more consistent order handling and matching performance for options, while ensuring quicker processing time and supporting increasing volumes and capacity needs. For example, the Exchange recently performed switch hardware upgrades. Particularly, the Exchange replaced existing customer access switches with newer models, which the Exchange believes resulted in increased determinism. The recent switch upgrades also increased the Exchange’s capacity to accommodate more physical ports by nearly 50%. Network bandwidth was also increased nearly two-fold as a result of the upgrades, which among other things, can lead to reduce message queuing. The Exchange also believes these newer models result in less natural variance in the processing of messages. The Exchange notes that it incurred costs associated with purchasing and upgrading to these newer models, of which the Exchange has not otherwise passed through or offset.

As of April 1, 2024, market participants also having the option of connecting to a new data center (*i.e.*, Secaucus NY6 Data Center (“NY6”)), in addition to the current data centers at NY4 and NY5. The Exchange made NY6 available in response to customer requests in connection with their need for additional space and capacity. In order to make this space available, the Exchange expended significant resources to prepare this space, and will also incur ongoing costs with respect to maintaining this offering, including costs related to power, space, fiber, cabinets, panels, labor and maintenance of racks. The Exchange also incurred a large cost with respect to ensuring NY6 would be latency equalized, as it is for NY4 and NY5.

The Exchange also has made various other improvements since the current physical port rates were adopted in 2018. For example, the Exchange has

¹⁶ See <https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-services-industry-naics-518210.htm>.

¹⁹ See Securities and Exchange Release No. 83442 (June 14, 2018), 83 FR 28675 (June 20, 2018) (SR–CboeBZX–2018–037).

²⁰ See <https://data.bls.gov/timeseries/PCU5182105182105>.

²¹ See, *e.g.*, Securities Exchange Act Release Nos. 34–100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR–NYSEARCA–2024–79).

updated its customer portal to provide more transparency with respect to firms' respective connectivity subscriptions, enabling them to better monitor, evaluate and adjust their connections based on their evolving business needs. The Exchange also performs proactive audits on a weekly basis to ensure that all customer cross connects continue to fall within allowable tolerances for Latency Equalized connections. Accordingly, the Exchange expended, and will continue to expend, resources to innovate and modernize technology so that it may benefit its Members and continue to compete among other equities markets. The ability to continue to innovate with technology and offer new products to market participants allows the Exchange to remain competitive in the equities space which currently has 16 equities markets and potential new entrants. If the Exchange were not able to assess incrementally higher fees for its connectivity, it would effectively impact how the Exchange manages its technology and hamper the Exchange's ability to continue to invest in and fund access services in a manner that allows it to meet existing and anticipated access demands of market participants. Disapproval of fee changes such as the proposal herein, could also have the adverse effect of discouraging an exchange from improving its operations and implementing innovative technology to the benefit of market participants if it believes the Commission would later prevent that exchange from recouping costs and monetizing its operational enhancements, thus adversely impacting competition as well as the interests of market participants and investors.

Finally, the proposed fee is also the same as is concurrently being proposed for its Affiliate Exchanges. Further, Members are able to utilize a single port to connect to all of its Affiliate Exchanges and will only be charged one single fee (*i.e.*, a market participant will only be assessed the proposed \$8,500 even if it uses that physical port to connect to the Exchange and another (or even all 6) of its Affiliate Exchanges. Particularly, the Exchange believes the proposed monthly per port fee is reasonable, equitable and not unfairly discriminatory since as the Exchange has determined to not charge multiple fees for the same port. Indeed, the Exchange notes that several ports are in fact purchased and utilized across one or more of the Exchange's affiliated Exchanges (and charged only once).

The Exchange also believes that the proposed fee change is not unfairly discriminatory because it would be

assessed uniformly across all market participants that purchase the physical ports. The Exchange believes increasing the fee for 10 Gb physical ports and charging a higher fee as compared to the 1 Gb physical port is equitable as the 1 Gb physical port is 1/10th the size of the 10 Gb physical port and therefore does not offer access to many of the products and services offered by the Exchange (*e.g.*, ability to receive certain market data products). Thus, the value of the 1 Gb alternative is lower than the value of the 10 Gb alternative, when measured based on the type of Exchange access it offers. Moreover, market participants that purchase 10 Gb physical ports utilize the most bandwidth and therefore consume the most resources from the network. The Exchange also anticipates that firms that utilize 10 Gb ports will benefit the most from the Exchange's investment in offering NY6 as the Exchange anticipates there will be much higher quantities of 10 Gb physical ports connecting from NY6 as compared to 1 Gb ports. Indeed, the Exchange notes that 10 Gb physical ports account for approximately 90% of physical ports across the NY4, NY5, and NY6 data centers, and to date, 80% of new port connections in NY6 are 10 Gb ports. As such, the Exchange believes the proposed fee change for 10 Gb physical ports is reasonably and appropriately allocated.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed fee change will not impact intramarket competition because it will apply to all similarly situated Members equally (*i.e.*, all market participants that choose to purchase the 10 Gb physical port). Additionally, the Exchange does not believe its proposed pricing will impose a barrier to entry to smaller participants and notes that its proposed connectivity pricing is associated with relative usage of the various market participants. For example, market participants with modest capacity needs can continue to buy the less expensive 1 Gb physical port (which cost is not changing) or may choose to obtain access via a third-party re-seller. While pricing may be increased for the larger capacity physical ports, such options provide far more capacity and are purchased by those that consume more resources from the network. Accordingly, the proposed connectivity fees do not favor certain categories of market participants in a manner that

would impose a burden on competition; rather, the allocation reflects the network resources consumed by the various size of market participants—lowest bandwidth consuming members pay the least, and highest bandwidth consuming members pays the most.

The proposed fee change also does not impose a burden on competition or on other Self-Regulatory Organizations that is not necessary or appropriate. As described above, the Exchange evaluated its proposed fee change using objective and stable metric with limited volatility. Utilizing Data Processing PPI over a specified period of time is a reasonable means of recouping a portion of the Exchange's investment in maintaining and enhancing the connectivity service identified above. The Exchange believes utilizing Data Processing PPI, a tailored measure of inflation, to increase certain connectivity fees to recoup the Exchange's investment in maintaining and enhancing its services and products would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²² and paragraph (f) of Rule 19b-4²³ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

²² 15 U.S.C. 78s(b)(3)(A).

²³ 17 CFR 240.19b-4(f).

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeBZX-2024-127 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-CboeBZX-2024-127. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeBZX-2024-127 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁴

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101995; File No. SR-CboeEDGX-2024-085]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fees Schedule Related to Physical Port Fees

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 18, 2024, Cboe EDGX Exchange, Inc. (the "Exchange" or "EDGX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. (the "Exchange" or "EDGX Equities") proposes to amend its Fees Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/options/regulation/rule_filings/edgx/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its fee schedule relating to physical connectivity fees.³

By way of background, a physical port is utilized by a Member or non-Member to connect to the Exchange at the data centers where the Exchange's servers are located. The Exchange currently assesses the following physical connectivity fees for Members and non-Members on a monthly basis: \$2,500 per physical port for a 1 gigabit ("Gb") circuit and \$7,500 per physical port for a 10 Gb circuit. The Exchange proposes to increase the monthly fee for 10 Gb physical ports from \$7,500 to \$8,500 per port. The Exchange notes the proposed fee change better enables it to continue to maintain and improve its market technology and services and also notes that the proposed fee amount, even as amended, continues to be in line with, or even lower than, amounts assessed by other exchanges for similar connections.⁴ The Exchange also notes that a single 10 Gb physical port can be

³ The Exchange initially filed the proposed fee changes on July 3, 2023 (SR-CboeEDGX-2023-044). On September 1, 2023, the Exchange withdrew that filing and submitted SR-CboeEDGX-2023-057. On September 29, 2023, the Securities and Exchange Commission issued a Suspension of and Order Instituting Proceedings to Determine whether to Approve or Disapprove a Proposed Rule Change to Amend its Fees Schedule Related to Physical Port Fees (the "OIP") in anticipation of a possible U.S. government shutdown. On September 29, 2023, the Exchange filed the proposed fee change (SR-CboeEDGX-2023-62). On October 13, 2023, the Exchange withdrew that filing and on business date October 16, 2023 submitted SR-CboeEDGX-2023-065. On December 12, the Exchange withdrew that filing and submitted SR-CboeEDGX-2023-079. On December 20, the Exchange withdrew that filing and submitted SR-CboeEDGX-2023-081. On February 12, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-013. On April 9, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-020. On June 7, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-035. On August 29, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-056. On October 25, 2024, the Exchange withdrew that filing and submitted SR-CboeEDGX-2024-071. On December 18, 2024, the Exchange withdrew that filing and submitted this filing.

⁴ See e.g., The Nasdaq Stock Market LLC ("Nasdaq"), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gb Ultra fiber connection to the respective exchange, which is analogous to the Exchange's 10Gb physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gb LX LCN Circuits (which are analogous to the Exchange's 10 Gb physical port) are assessed \$22,000 per month, per port.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

²⁴ 17 CFR 200.30-3(a)(12).

used to access the Systems of the following affiliate exchanges: the Cboe BYX Exchange, Inc., Cboe BZX Exchange, Inc. (options and equities platforms), Cboe EDGA Exchange, Inc., and Cboe C2 Exchange, Inc., (“Affiliate Exchanges”).⁵ Notably, only one monthly fee currently (and will continue) to apply per 10 Gb physical port regardless of how many affiliated exchanges are accessed through that one port.⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.⁷ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁸ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)⁹ requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The Exchange also believes the proposed rule change is consistent with Section 6(b)(4)¹⁰ of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Members and other persons using its facilities. This belief is based on various factors as described below.

First, the Exchange believes its proposal is reasonable as it reflects a moderate increase in physical connectivity fees for 10 Gb physical ports and its offering, even as amended, continues to be more affordable as

compared to analogous physical connectivity offerings at competitor exchanges.¹¹

The Exchange also believes the current fee does not properly reflect the quality of the service and product, as fees for 10 Gb physical ports have been static in nominal terms since 2018, and therefore falling in real terms due to inflation. As a general matter, the Producer Price Index (“PPI”) is a family of indexes that measures the average change over time in selling prices received by domestic producers of goods and services. PPI measures price change from the perspective of the seller. This contrasts with other metrics, such as the Consumer Price Index (CPI), that measure price change from the purchaser’s perspective.¹² About 10,000 PPIs for individual products and groups of products are tracked and released each month.¹³ PPIs are available for the output of nearly all industries in the goods-producing sectors of the U.S. economy—mining, manufacturing, agriculture, fishing, and forestry—as well as natural gas, electricity, and construction, among others. The PPI program covers approximately 69 percent of the service sector’s output, as measured by revenue reported in the 2017 Economic Census.

For purposes of this proposal, the relevant industry-specific PPI is the Data Processing, hosting and related services (“Data PPI”) and more particularly the more granular service line Data Processing, Hosting and Related Services: Hosting, Active Server Pages (ASP), and Other Information Technology (IT) Infrastructure Provisioning Services.¹⁴

The Data PPI was introduced in January 2002 by the Bureau of Labor Statistics (“BLS”) as part of an ongoing effort to expand Producer Price Index coverage of the services sector of the U.S. economy and is identified as

NAICS—518210 in the North American Industry Classification System (“NAICS”).¹⁵ According to the BLS “[t]he primary output of NAICS 518210 is the provision of electronic data processing services. In the broadest sense, computer services companies help their customers efficiently use technology. The processing services market consists of vendors who use their own computer systems—often utilizing proprietary software—to process customers’ transactions and data. Price movements for the NAICS 518210 index are based on changes in the revenue received by companies that provide data processing services and price movements for the service line NAICS 518210 index are based on changes in the revenue received by companies that provide, among other things, IT infrastructure provisioning services. Each month, companies provide net transaction prices for a specified service. The transaction is an actual contract selected by probability, where the price-determining characteristics are held constant while the service is repriced. The prices used in index calculation are the actual prices billed for the selected service contract.”¹⁶

The service (product) lines for which price indexes are available under the Data PPI are: (1) business process management services (2) data management and storage information transformation and other services and (3) hosting ASP and other IT infrastructure provisioning services. The most apt of these industry and product specific categorizations for purposes of this present proposal to modify fees for the 10 Gb physical port fee measures inflation for the provision of data processing, hosting and related services as well as other information technology infrastructure provisioning services which BLS identifies as identified as NAICS—518210.¹⁷ The Exchange believes that this measure of inflation is particularly appropriate because the Exchange’s connectivity services involve hosting and providing connections to its customers’

⁵ The Affiliate Exchanges are also submitting contemporaneous identical rule filings.

⁶ The Exchange notes that conversely, other exchange groups charge separate port fees for access to separate, but affiliated, exchanges. See e.g., Securities and Exchange Release No. 99822 (March 21, 2024), 89 FR 21337 (March 27, 2024) (SR-MIAX-2024-016).

⁸ 15 U.S.C. 78f(b)(5).

⁹ *Id.*

¹⁰ 15 U.S.C. 78f(b)(4).

¹¹ See e.g., The Nasdaq Stock Market LLC (“Nasdaq”), General 8, Connectivity to the Exchange. Nasdaq and its affiliated exchanges charge a monthly fee of \$15,000 for each 10Gbps Ultra fiber connection to the respective exchange, which is analogous to the Exchange’s 10Gbps physical port. See also New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Chicago Inc., NYSE National, Inc. Connectivity Fee Schedule, which provides that 10 Gbps LX LCN Circuits (which are analogous to the Exchange’s 10 Gbps physical port) are assessed \$22,000 per month, per port.

¹² See <https://www.bls.gov/ppi/overview.htm>.

¹³ *Id.*

¹⁴ Provisioning is the process of preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity, according to user requirements. It is a critical part of IT operations, as it ensures that computing resources are available when needed and that they are set up and connected to work correctly.

¹⁵ See <https://www.bls.gov/ppi/overview.htm>. Among the industry-specific PPIs is for North American Industry Classification System (“NAICS”) Code 518210: “Data Processing and Related Services.” NAICS index codes categorize products and services that are common to particular industries. According to BLS, these codes “provide comparability with a wide assortment of industry-based data for other economic programs, including productivity, production, employment, wages, and earnings.”

¹⁶ See <https://www.bls.gov/ppi/factsheets/producer-price-index-for-the-data-processing-and-related-services-industry-naics-518210.htm>.

¹⁷ See <https://data.bls.gov/timeseries/PCU5182105182105>.

telecommunications and information technology equipment, as well as preparing, assigning, and activating IT infrastructure components, such as servers, storage, and network connectivity. The Exchange also uses its “proprietary software,” *i.e.*, its own proprietary matching engine software, to receive orders on the Exchange’s proprietary trading platform as well as to collect, organize, store and report customers’ transactions. In other words, the Exchange is in the business of data processing, hosting, ASP, and providing other IT infrastructure provisioning services.

The Exchange further believes the Data PPI is an appropriate measure for purposes of the proposed rule change on the basis that it is a stable metric with limited volatility, unlike other consumer-side inflation metrics. In fact, the Data PPI has not experienced a greater than 2.16% increase for any one calendar year period since Data PPI was introduced into the PPI in January 2002. For example, the average calendar year change from January 2002 to December 2023 was .62%, with a cumulative increase of 15.67% over this 21-year period. The Exchange believes the Data PPI is considerably less volatile than other inflation metrics such as CPI, which has had individual calendar-year increases of more than 6.5%, and a cumulative increase of over 73% over the same period.¹⁸

As noted above, the current 10 Gb physical port fee remained unchanged for six years, particularly since June 2018.¹⁹ Since its last increase over 6 years ago however, there has been notable inflation, including under the industry- and product-specific PPI, which as described above is a tailored measure of inflation. Particularly, the Hosting, ASP and other IT Infrastructure Provisioning Services inflation measure had a starting value of 102.2 in June 2018 (the month the Exchange started assessing the current fee) and an ending value of 115.66 in November 2024, representing an 13% increase.²⁰ This indicates that companies who are also in the hosting ASP and other IT infrastructure provisioning services have generally increased prices for a specified service covered under NAICS 5182105 by an average of 13% during this period.

The Exchange also believes that it is reasonable to increase its fees to compensate for inflation because, over time, inflation has degraded the value of each dollar that the Exchange collects in fees, such that the real revenue collected today is considerably less than that same revenue collected in 2018. The impact of this inflationary effect is also independent of any change in the Exchange’s costs in providing its goods and services. The Exchange therefore believes that it is reasonable for it to offset, in part, this erosion in the value of the revenues it collects. Additionally, the Exchange historically does not increase fees every year notwithstanding inflation. Other exchanges have also filed for increases in certain fees, based in part on comparisons to inflation.²¹ Accordingly, based on the above-described percentage change based on an industry- and product-specific inflationary measure, and in conjunction with the rationale further described above and below, the Exchange believes the proposed fee increase is reasonable.

Next, the Exchange believes significant investments into, and enhanced performance of, the Exchange, in the years following the last 10 Gb physical port fee increase support the reasonableness of the proposed fee increase. These investments enhanced the quality of its services, as measured by, among other things, increased throughput and faster processing speeds. Customers have therefore greatly benefitted from these investments, while the Exchange’s ability to recoup its investments has been hampered.

For example, the Exchange and its affiliated exchanges recently launched a multi-year initiative to improve Cboe Exchange Platform performance and capacity requirements to increase competitiveness, support growth and advance a consistent world class platform. The goal of the project, among other things, is to provide faster and more consistent order handling and matching performance for options, while ensuring quicker processing time and supporting increasing volumes and capacity needs. For example, the Exchange recently performed switch hardware upgrades. Particularly, the Exchange replaced existing customer access switches with newer models, which the Exchange believes resulted in increased determinism. The recent switch upgrades also increased the Exchange’s capacity to accommodate

more physical ports by nearly 50%. Network bandwidth was also increased nearly two-fold as a result of the upgrades, which among other things, can lead to reduce message queuing. The Exchange also believes these newer models result in less natural variance in the processing of messages. The Exchange notes that it incurred costs associated with purchasing and upgrading to these newer models, of which the Exchange has not otherwise passed through or offset.

As of April 1, 2024, market participants also having the option of connecting to a new data center (*i.e.*, Secaucus NY6 Data Center (“NY6”)), in addition to the current data centers at NY4 and NY5. The Exchange made NY6 available in response to customer requests in connection with their need for additional space and capacity. In order to make this space available, the Exchange expended significant resources to prepare this space, and will also incur ongoing costs with respect to maintaining this offering, including costs related to power, space, fiber, cabinets, panels, labor and maintenance of racks. The Exchange also incurred a large cost with respect to ensuring NY6 would be latency equalized, as it is for NY4 and NY5.

The Exchange also has made various other improvements since the current physical port rates were adopted in 2018. For example, the Exchange has updated its customer portal to provide more transparency with respect to firms’ respective connectivity subscriptions, enabling them to better monitor, evaluate and adjust their connections based on their evolving business needs. The Exchange also performs proactive audits on a weekly basis to ensure that all customer cross connects continue to fall within allowable tolerances for Latency Equalized connections. Accordingly, the Exchange expended, and will continue to expend, resources to innovate and modernize technology so that it may benefit its Members and continue to compete among other equities markets. The ability to continue to innovate with technology and offer new products to market participants allows the Exchange to remain competitive in the equities space which currently has 16 equities markets and potential new entrants. If the Exchange were not able to assess incrementally higher fees for its connectivity, it would effectively impact how the Exchange manages its technology and hamper the Exchange’s ability to continue to invest in and fund access services in a manner that allows it to meet existing and anticipated access demands of market participants. Disapproval of fee changes

¹⁸ See <https://www.usinflationcalculator.com/inflation/consumer-price-index-and-annual-percent-changes-from-1913-to-2008/>.

¹⁹ See Securities and Exchange Release No. 83450 (June 15, 2018), 83 FR 28884 (June 21, 2018) (SR–CboeEDGX–2018–016).

²⁰ See <https://data.bls.gov/timeseries/PCU5182105182105>.

²¹ See, *e.g.*, Securities Exchange Act Release Nos. 34–100994 (September 10, 2024), 89 FR 75612 (September 16, 2024) (SR–NYSEARCA–2024–79).

such as the proposal herein, could also have the adverse effect of discouraging an exchange from improving its operations and implementing innovative technology to the benefit of market participants if it believes the Commission would later prevent that exchange from recouping costs and monetizing its operational enhancements, thus adversely impacting competition as well as the interests of market participants and investors.

Finally, the proposed fee is also the same as is concurrently being proposed for its Affiliate Exchanges. Further, Members are able to utilize a single port to connect to all of its Affiliate Exchanges and will only be charged one single fee (*i.e.*, a market participant will only be assessed the proposed \$8,500 even if it uses that physical port to connect to the Exchange and another (or even all 6) of its Affiliate Exchanges. Particularly, the Exchange believes the proposed monthly per port fee is reasonable, equitable and not unfairly discriminatory since as the Exchange has determined to not charge multiple fees for the same port. Indeed, the Exchange notes that several ports are in fact purchased and utilized across one or more of the Exchange's affiliated Exchanges (and charged only once).

The Exchange also believes that the proposed fee change is not unfairly discriminatory because it would be assessed uniformly across all market participants that purchase the physical ports. The Exchange believes increasing the fee for 10 Gb physical ports and charging a higher fee as compared to the 1 Gb physical port is equitable as the 1 Gb physical port is 1/10th the size of the 10 Gb physical port and therefore does not offer access to many of the products and services offered by the Exchange (*e.g.*, ability to receive certain market data products). Thus, the value of the 1 Gb alternative is lower than the value of the 10 Gb alternative, when measured based on the type of Exchange access it offers. Moreover, market participants that purchase 10 Gb physical ports utilize the most bandwidth and therefore consume the most resources from the network. The Exchange also anticipates that firms that utilize 10 Gb ports will benefit the most from the Exchange's investment in offering NY6 as the Exchange anticipates there will be much higher quantities of 10 Gb physical ports connecting from NY6 as compared to 1 Gb ports. Indeed, the Exchange notes that 10 Gb physical ports account for approximately 90% of physical ports across the NY4, NY5, and NY6 data centers, and to date, 80% of new port connections in NY6 are 10 Gb

ports. As such, the Exchange believes the proposed fee change for 10 Gb physical ports is reasonably and appropriately allocated.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed fee change will not impact intramarket competition because it will apply to all similarly situated Members equally (*i.e.*, all market participants that choose to purchase the 10 Gb physical port). Additionally, the Exchange does not believe its proposed pricing will impose a barrier to entry to smaller participants and notes that its proposed connectivity pricing is associated with relative usage of the various market participants. For example, market participants with modest capacity needs can continue to buy the less expensive 1 Gb physical port (which cost is not changing) or may choose to obtain access via a third-party re-seller. While pricing may be increased for the larger capacity physical ports, such options provide far more capacity and are purchased by those that consume more resources from the network. Accordingly, the proposed connectivity fees do not favor certain categories of market participants in a manner that would impose a burden on competition; rather, the allocation reflects the network resources consumed by the various size of market participants—lowest bandwidth consuming members pay the least, and highest bandwidth consuming members pays the most.

The proposed fee change also does not impose a burden on competition or on other Self-Regulatory Organizations that is not necessary or appropriate. As described above, the Exchange evaluated its proposed fee change using objective and stable metric with limited volatility. Utilizing Data Processing PPI over a specified period of time is a reasonable means of recouping a portion of the Exchange's investment in maintaining and enhancing the connectivity service identified above. The Exchange believes utilizing Data Processing PPI, a tailored measure of inflation, to increase certain connectivity fees to recoup the Exchange's investment in maintaining and enhancing its services and products would not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²² and paragraph (f) of Rule 19b-4²³ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-CboeEDGX-2024-085 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.
- All submissions should refer to file number SR-CboeEDGX-2024-085. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the

²² 15 U.S.C. 78s(b)(3)(A).

²³ 17 CFR 240.19b-4(f).

Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-CboeEDGX-2024-085 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁴

Vanessa A. Countryman,
Secretary.

Submission for OMB Review; Comment Request; Extension: Rule 17Ad-2(c), (d), and (h)

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget ("OMB") a request for approval of extension of the previously approved collection of information provided for in Rule 17Ad-2(c), (d), and (h), (17 CFR 240.17Ad-2(c), (d), and (h)), under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Rule 17Ad-2(c), (d), and (h) enumerates the requirements with which transfer agents must comply to inform the Commission or the

appropriate regulator of a transfer agent's failure to meet the minimum performance standards set by the Commission rule by filing a notice.

While it is estimated that there are 740 transfer agents, only approximately three notices pursuant to Rule 17Ad-2(c), (d), and (h) are filed annually. In view of: (a) the readily available nature of most of the information required to be included in the notice (since that information must be compiled and retained pursuant to other Commission rules); (b) the summary fashion that such information must be presented in the notice (most notices are one page or less in length); and (c) the experience of the staff regarding the notices, the Commission staff estimates that, on average, most notices require approximately one-half hour to prepare. The Commission staff thus estimates that transfer agents spend an average of a total of one and a half hours per year complying with the rule (3 × .5 hours = 1.5 hours).

The retention period for the recordkeeping requirement under Rule 17Ad-2(c), (d), and (h) is not less than two years following the date the notice is submitted. The recordkeeping requirement under this rule is mandatory to assist the Commission in monitoring transfer agents who fail to meet the minimum performance standards set by the Commission rule. This rule does not involve the collection of confidential information. Please note that a transfer agent is not required to file under the rule unless it does not meet the minimum performance standards for turnaround, processing or forwarding items received for transfer during a month.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view and comment on this information collection request at: https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202410-3235-005 or send an email comment to MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov within 30 days of the day after publication of this notice by January 30, 2025.

Dated: December 23, 2024.

Sherry R. Haywood,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270-653, OMB Control No. 3235-0703]

Submission for OMB Review; Comment Request; Extension: Regulation SCI, Form SCI

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549-2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ("PRA") (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget ("OMB") a request for approval of extension of the previously approved collection of information provided for in Regulation Systems Compliance and Integrity ("Regulation SCI") (17 CFR 242.1000-1007) and Form SCI (17 CFR 249.1900) under the Securities Exchange Act of 1934 ("Exchange Act") (15 U.S.C. 78a *et seq.*).

Regulation SCI requires certain key market participants to, among other things: (1) have comprehensive policies and procedures in place to help ensure the robustness and resiliency of their technological systems, and also that their technological systems operate in compliance with the federal securities laws and with their own rules; and (2) provide certain notices and reports to the Commission to improve Commission oversight of securities market infrastructure.

Regulation SCI advances the goals of the national market system by enhancing the capacity, integrity, resiliency, availability, and security of the automated systems of entities important to the functioning of the U.S. securities markets, as well as reinforcing the requirement that such systems operate in compliance with the Exchange Act and rules and regulations thereunder, thus strengthening the infrastructure of the U.S. securities markets and improving its resilience when technological issues arise. In this respect, Regulation SCI establishes an updated and formalized regulatory framework, thereby helping to ensure more effective Commission oversight of such systems.

Respondents consist of national securities exchanges and associations, registered clearing agencies, exempt clearing agencies, plan processors, and alternative trading systems. There are currently 48 respondents, and the Commission staff estimates that, on

²⁴ 17 CFR 200.30-3(a)(12).

average, 2 new respondents may become SCI entities each year, 1 of which would be a self-regulatory organization ("SRO"). Accordingly, Commission staff estimates that over the next three years there will be an average of 50 respondents per year.

In addition, in December 2020, the Commission adopted amendments to Regulation SCI in connection with updates to the national market system for the collection, consolidation, and dissemination of information with respect to quotations for and transactions in national market system ("NMS") stocks ("Infrastructure Amendments"). Specifically, the Commission adopted a definition of "SCI competing consolidator" that will subject competing consolidators to Regulation SCI, after a transition period, if they are above a specified consolidated market data gross revenue threshold.¹ The Infrastructure Amendments increased the number of respondents to the collections of information in Regulation SCI, and the Commission estimates that seven competing consolidators will meet this definition and be subject to the requirements of Regulation SCI.²

Rule 1001(a) requires each SCI entity to establish, maintain, and enforce written policies and procedures reasonably designed to ensure that its SCI systems and, for purposes of security standards, indirect SCI systems, have levels of capacity, integrity, resiliency, availability, and security, adequate to maintain the SCI entity's operational capability and promote the maintenance of fair and orderly markets. The Commission staff estimates that the total annual initial recordkeeping burden for 7 new respondents will be 4,511 hours, and the annual ongoing recordkeeping burden for all 55 respondents will be, on average, 12,760 hours. The Commission staff estimates that the 7 new respondents would incur, on average, an annual initial internal cost of compliance of \$1,696,578, as well as outside legal or consulting costs of \$305,500. In addition, all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$4,801,060.

Rule 1001(b) requires each SCI entity to establish, maintain, and enforce written policies and procedures

reasonably designed to ensure that its SCI systems operate in a manner that complies with the Exchange Act and the rules and regulations thereunder and the entity's rules and governing documents, as applicable. The Commission staff estimates that the total annual initial recordkeeping burden for 7 new respondents will be 1,755 hours, and the annual ongoing recordkeeping burden for all respondents will be, on average, 8,105 hours. The Commission staff estimates that the 7 new respondents would incur an initial internal cost of compliance of \$628,160, as well as outside legal or consulting costs of \$175,500. In addition, all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$2,881,660.

Rule 1001(c) requires each SCI entity to establish, maintain, and enforce reasonably designed written policies and procedures that include the criteria for identifying responsible SCI personnel, the designation and documentation of responsible SCI personnel, and escalation procedures to quickly inform responsible SCI personnel of potential SCI events. The Commission staff estimates that the total annual initial recordkeeping burden for 7 new respondents will be 741 hours, and the annual ongoing recordkeeping burden for all respondents will be, on average, 2,145. The Commission staff estimates that the 7 new respondents would incur an initial internal cost of compliance of \$309,868, and all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$958,485.

Rule 1004 requires each SCI entity to establish standards for the designation of certain members or participants for BC/DR plan testing, to designate members or participants in accordance with these standards, to require participation by designated members or participants in such testing at least annually, and to coordinate such testing on an industry- or sector-wide basis with other SCI entities. The Commission staff estimates that the total annual initial recordkeeping burden for 9 new respondents will be 2,700 hours, and the annual ongoing recordkeeping burden for all respondents that are not plan processors will be, on average, 7,425 hours. The Commission staff estimates that the 7 new respondents would incur an initial internal cost of compliance of \$902,865. In addition, all respondents that are not plan processors will incur, on average, an estimated ongoing annual internal cost of compliance of \$2,217,600. In addition, the Commission staff estimates that the 2 plan processor respondents will incur

an estimated ongoing annual cost of \$108,000 for outside legal services (\$54,000 per plan processor respondent $\times$ 2 respondents).

Rule 1002(b)(1) requires each SCI entity, upon any responsible SCI personnel having a reasonable basis to conclude that an SCI event has occurred, to notify the Commission immediately. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 440 hours. The Commission staff estimates that respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$151,882.50.

Rule 1002(b)(2) requires each SCI entity, within 24 hours of any responsible SCI personnel having a reasonable basis to conclude that the SCI event has occurred, to submit a written notification to the Commission pertaining to the SCI event on a good faith, best efforts basis. These notifications are required to be submitted on Form SCI. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 6,600 hours. The Commission staff estimates that respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$2,427,325.

Rule 1002(b)(3) requires each SCI entity to provide updates to the Commission pertaining to an SCI event on a regular basis, or at such frequency as reasonably requested by a representative of the Commission, until the SCI event is resolved and the SCI entity's investigation of the SCI event is closed. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 578 hours. The Commission staff estimates that all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$202,235.

Rule 1002(b)(4) requires each SCI entity to submit written interim reports, as necessary, and a written final report regarding an SCI event to the Commission. These reports are required to be submitted on Form SCI. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 9,625 hours. The Commission staff estimates that all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$3,795,800.

Rule 1002(b)(5) requires each SCI entity to submit to the Commission quarterly reports containing a summary description of any systems disruption or systems intrusion that has had, or the

¹ See Securities Exchange Act Release No. 34-90610 (December 9, 2020), 86 FR 18596 (April 9, 2021) (File No. S7-03-20) ("Infrastructure Adopting Release").

² Some of these respondents were estimated to incur no, or only part of, the estimated initial burdens because they were already subject to Regulation SCI (*i.e.*, as plan processors, SROs or affiliates of SROs).

SCI entity reasonably estimates would have, no or a de minimis impact on the SCI entity's operations or on market participants. These reports are required to be submitted on Form SCI. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 8,800 hours. The Commission staff estimates that respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$3,329,040.

In addition, the Commission staff estimates that all 55 respondents will incur, on average, annual costs of \$319,000 for outside legal advice in preparation of certain notifications required by Rule 1002(b).

Rule 1002(c)(1)(i) requires each SCI entity, promptly after any responsible SCI personnel has a reasonable basis to conclude that an SCI event (other than a systems intrusion) has occurred, to disseminate certain information to its members or participants. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 1,155 hours. The Commission staff estimates that all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$506,815.

Rule 1002(c)(1)(ii) requires each SCI entity, when known, to promptly disseminate additional information about an SCI event (other than a systems intrusion) to its members or participants. Rule 1002(c)(1)(iii) requires each SCI entity to provide to its members or participants regular updates of any information required to be disseminated under Rules 1002(c)(1)(i) and (ii) until the SCI event is resolved. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 6,435 hours. The Commission staff estimates that all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$2,841,795.

Rule 1002(c)(2) requires each SCI entity to disseminate certain information regarding a systems intrusion to its members or participants, and provides an exception when the SCI entity determines that dissemination of such information would likely compromise the security of its SCI systems or indirect SCI systems, or an investigation of the systems intrusion, and documents the reasons for such determination. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 550 hours. The Commission staff estimates that all respondents will incur, on average, an estimated ongoing

annual internal cost of compliance of \$242,330.

In addition, the Commission staff estimates that all 55 respondents will incur, on average, annual costs of \$182,600 for outside legal advice in preparation of certain notifications required by Rule 1002(c).

Rule 1003(a)(1) requires each SCI entity to submit to the Commission quarterly reports describing completed, ongoing, and planned material changes to its SCI systems and security of indirect SCI systems during the prior, current, and subsequent calendar quarters. These reports are required to be submitted on Form SCI. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 27,500 hours. The Commission staff estimates that all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$9,204,800.

Rule 1003(a)(2) requires each SCI entity to promptly submit a supplemental report notifying the Commission of a material error in or material omission from a report previously submitted under Rule 1003(a)(1). These reports are required to be submitted on Form SCI. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 825 hours. The Commission staff estimates that all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$293,040.

Rule 1003(b)(1) requires each SCI entity to conduct an SCI review of its compliance with Regulation SCI not less than once each calendar year, with an exception for penetration test reviews, which are required to be conducted not less than once every three years. Rule 1003(b)(1) also provides an exception for assessments of SCI systems directly supporting market regulation or market surveillance, which are required to be conducted at a frequency based on the risk assessment conducted as part of the SCI review, but in no case less than once every three years. Rule 1003(b)(2) requires each SCI entity to submit a report of the SCI review to senior management no more than 30 calendar days after completion of the review. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 37,950 hours. The Commission staff estimates that all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$13,623,225.

Rule 1003(b)(3) requires each SCI entity to submit the report of the SCI

review to the Commission and to its board of directors or the equivalent of such board, together with any response by senior management, within 60 calendar days after its submission to senior management. These reports are required to be submitted on Form SCI. The Commission staff estimates that the total annual ongoing burden for all 55 respondents will be, on average, 55 hours. The Commission staff estimates that all respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$25,410.

In addition, the Commission staff estimates that all respondents will incur, on average, annual costs of \$2,750,000 for outside legal advice in preparation of certain notifications required by Rule 1003(b).

Rule 1006 requires each SCI entity, with a few exceptions, to file any notification, review, description, analysis, or report to the Commission required under Regulation SCI electronically on Form SCI through the EDFS. An SCI entity will submit to the Commission an EAUF to register each individual at the SCI entity who will access the EDFS system on behalf of the SCI entity. The Commission staff estimates that the total annual initial burden for 7 new respondents will be 2 hours, and the annual ongoing burden for all respondents will be, on average, 8 hours. The Commission staff estimates that the 7 new respondents would incur an initial internal cost of compliance of \$903. In addition, all 55 respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$3,795, as well as outside costs to obtain a digital ID of \$2,750.

Rule 1002(a) requires each SCI entity, upon any responsible SCI personnel having a reasonable basis to conclude that an SCI event has occurred, to begin to take appropriate corrective action. The Commission staff estimates that the total annual initial recordkeeping burden for 7 new respondents will be 741 hours, and the annual ongoing recordkeeping burden for all 55 respondents will be, on average, 2,145 hours. The Commission staff estimates that the 7 new respondents would incur an initial internal cost of compliance of \$309,868. In addition, all 55 respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$949,190.

Rule 1003(a)(1) requires each SCI entity to establish reasonable written criteria for identifying a change to its SCI systems and the security of indirect SCI systems as material. The Commission staff estimates that the total annual initial recordkeeping burden for 7 new respondents will be 741 hours,

and the annual ongoing recordkeeping burden for all 55 respondents will be, on average, 1,485 hours. The Commission staff estimates that the 7 new respondents would incur an initial internal cost of compliance of \$309,868. In addition, all 55 respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$711,095.

Regulation SCI also requires SCI entities to identify certain types of events and systems. The Commission staff estimates that the total annual initial recordkeeping burden for 7 new respondents will be 1,287 hours, and the annual ongoing recordkeeping burden for all 55 respondents will be, on average, 2,145 hours. The Commission staff estimates that the 7 new respondents would incur an initial internal cost of compliance of \$507,936. In addition, all 55 respondents will incur, on average, an estimated ongoing annual internal cost of compliance of \$949,190.

Rules 1005 and 1007 establish recordkeeping requirements for SCI entities other than SROs. The Commission staff estimates that for 6 new respondents that are not SROs the average annual initial burden would be 935 hours, and the annual ongoing burden for all 19 respondents will be, on average, 475 hours. The Commission staff estimates that 6 new respondents would incur an estimated internal initial internal cost of compliance of \$72,930, as well as a one-time cost of \$5,400 to modify existing recordkeeping systems. In addition, all 19 respondents will incur, on average, an estimated ongoing internal cost of compliance of \$37,050.

The Commission estimates that the increase in the number of SCI entities raises the total industry annual burden hours to 150,619 hours and cost to \$3,848,749 respectively.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101998; File Nos. SR-NASDAQ-2024-028; SR-CboeBZX-2024-091]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Cboe BZX Exchange, Inc.; Order Granting Approval of a Proposed Rule Change, as Modified by Amendment No. 1, To List and Trade Shares of the Hashdex Nasdaq Crypto Index US ETF and Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1, To List and Trade Shares of the Franklin Crypto Index ETF, a Series of the Franklin Crypto Trust

December 19, 2024.

I. Introduction

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Exchange Act”) ¹ and Rule 19b-4 thereunder, ² each of The Nasdaq Stock Market LLC (“Nasdaq”) and Cboe BZX Exchange, Inc. (“BZX”, and together with Nasdaq, the “Exchanges”) filed with the Securities and Exchange Commission (“Commission”) proposed rule changes to list and trade shares of the following. Nasdaq proposes to list and trade shares of the Hashdex Nasdaq Crypto Index US ETF ³ under Nasdaq Rule 5711(d) (Commodity-Based Trust Shares); and BZX proposes to list and trade shares of the Franklin Crypto Index ETF, a series of the Franklin Crypto Trust, ⁴ under BZX Rule 14.11(e)(4) (Commodity-Based Trust Shares). Each filing was subject to notice and comment. ⁵

Each of the foregoing proposed rule changes, as modified by their respective amendments, is referred to herein as a “Proposal” and together as the “Proposals.” Each trust (or series of a trust) described in a Proposal is referred to herein as a “Trust” and together as the “Trusts.” As described in more detail in the Proposals’ respective

amended filings, ⁶ each Proposal seeks to list and trade shares of a Trust that would hold both spot bitcoin ⁷ and spot ether, ⁸ in whole or in part. ⁹ This order approves the Proposals. ¹⁰

II. Discussion and Commission Findings

After careful review, the Commission finds that the Proposals are consistent with the Exchange Act and rules and regulations thereunder applicable to a national securities exchange. ¹¹ In particular, the Commission finds that the Proposals are consistent with Section 6(b)(5) of the Exchange Act, ¹² which requires, among other things, that the Exchanges’ rules be designed to “prevent fraudulent and manipulative acts and practices” and, “in general, to protect investors and the public interest;” and with Section 11A(a)(1)(C)(iii) of the Exchange Act, ¹³ which sets forth Congress’ finding that it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities.

A. Exchange Act Section 6(b)(5)

The Commission has explained that one way an exchange that lists bitcoin-based or ether-based exchange-traded products (“ETPs”) can meet the obligation under Exchange Act Section 6(b)(5) that its rules be designed to prevent fraudulent and manipulative acts and practices is by demonstrating that the exchange has a comprehensive surveillance-sharing agreement with a

⁶ See *supra* notes 3–4.

⁷ Bitcoins are digital assets that are issued and transferred via a distributed, open-source protocol used by a peer-to-peer computer network through which transactions are recorded on a public transaction ledger known as the “Bitcoin blockchain.” The Bitcoin protocol governs the creation of new bitcoins and the cryptographic system that secures and verifies bitcoin transactions.

⁸ Ether is a digital asset that is native to, and minted and transferred via, a distributed, open-source protocol used by a peer-to-peer computer network through which transactions are recorded on a public transaction ledger known as “Ethereum.” The Ethereum protocol governs the creation of new ether and the cryptographic system that secures and verifies transactions on Ethereum.

⁹ Each Trust could also hold cash and cash equivalents. See Hashdex Filing at 80970; Franklin Filing at 8.

¹⁰ The Franklin Filing is being approved on an accelerated basis. See *infra* Section III.

¹¹ In approving the Proposals, the Commission has considered the Proposals’ impacts on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

¹² 15 U.S.C. 78f(b)(5).

¹³ 15 U.S.C. 78k-1(a)(1)(C)(iii).

³ See Securities Exchange Act Release No. 101218 (Sept. 30, 2024), 89 FR 80970 (Oct. 4, 2024) (SR-NASDAQ-2024-028) (“Hashdex Filing”).

⁴ See Amendment No. 1 to Proposed Rule Change to List and Trade Shares of the Franklin Crypto Index ETF, a Series of the Franklin Crypto Trust, under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares (SR-CboeBZX-2024-091), filed Dec. 17, 2024, available at: <https://www.sec.gov/comments/sr-cboebzx-2024-091/sr-cboebzx2024091.htm> (“Franklin Filing”).

⁵ The Commission did not receive any comments on the Franklin Filing. Comments received on the Hashdex Filing are available at: <https://www.sec.gov/comments/sr-nasdaq-2024-028/srnasdaq2024028.htm>.

regulated market of significant size related to the underlying or reference assets.¹⁴ Such an agreement would assist in detecting and deterring fraud and manipulation related to that underlying asset.

The Commission has also consistently recognized, however, that this is not the *exclusive* means by which an ETP listing exchange can meet this statutory obligation.¹⁵ A listing exchange could, alternatively, demonstrate that “other means to prevent fraudulent and manipulative acts and practices will be sufficient” to justify dispensing with a surveillance-sharing agreement with a regulated market of significant size.¹⁶

In the Spot Bitcoin ETP Approval Order, the Commission determined that having a comprehensive surveillance-sharing agreement with a U.S.-regulated market that, based on evidence from robust correlation analysis, is consistently highly correlated with the ETPs’ underlying assets (spot bitcoin)

¹⁵ See, e.g., Order Setting Aside Action by Delegated Authority and Disapproving a Proposed Rule Change, as Modified by Amendments No. 1 and 2, To List and Trade Shares of the Winklevoss Bitcoin Trust, Securities Exchange Act Release No. 83723 (July 26, 2018), 83 FR 37579, 37580 (Aug. 1, 2018) (SR–BatsBZX–2016–30) (“Winklevoss Order”); Spot Bitcoin ETP Approval Order at 3009; Spot Ether ETP Approval Order at 46938; Second Spot Bitcoin ETP Approval Order at 62822; Second Spot Ether ETP Approval Order at 59786.

¹⁶ See, e.g., Spot Bitcoin ETP Approval Order at 3009 (quoting Winklevoss Order at 37580).

constituted “other means” sufficient to satisfy the Exchange Act Section 6(b)(5) standard.¹⁷ Specifically, given the consistently high correlation between the bitcoin futures market of the Chicago Mercantile Exchange (“CME”) and a sample of spot bitcoin markets—confirmed by the Commission through robust¹⁸ correlation analysis using data at hourly, five-minute, and one-minute intervals—the Commission was able to conclude that fraud or manipulation that impacts prices in spot bitcoin markets would likely similarly impact CME bitcoin futures prices. And because the CME’s surveillance can assist in detecting those impacts on CME bitcoin futures prices, the Commission was able to conclude that the comprehensive surveillance-sharing agreement among the listing exchanges and the CME can be reasonably expected to assist in surveilling for fraudulent and manipulative acts and practices in the specific context of the spot bitcoin ETPs considered in the Spot Bitcoin ETP Approval Order.

The Commission reached similar conclusions in the Spot Ether ETP Approval Order with respect to the spot ether ETPs considered in that order, having confirmed the consistently high correlation between the CME ether futures market and a sample of spot ether markets.¹⁹

The Trusts in the present Proposals will hold both spot bitcoin and spot ether, and the proportion of bitcoin and ether to be held by each Trust will be based on free-float market capitalizations, as described by the Exchanges in their respective amended filings.²⁰ Other than that the Trusts will hold both spot bitcoin and spot ether,²¹

¹⁷ See *id.* at 3009–11. See also Second Spot Bitcoin ETP Approval Order at 62822.

¹⁸ The Commission stated that the “robustness” of its correlation analysis rested on the pre-requisites of (1) the correlations being calculated with respect to bitcoin futures that trade on the CME, a U.S. market regulated by the Commodity Futures Trading Commission, (2) the lengthy sample period of price returns for both the CME bitcoin futures market and the spot bitcoin market, (3) the frequent intra-day trading data in both the CME bitcoin futures market and the spot bitcoin market over that lengthy sample period, and (4) the consistency of the correlation results throughout the lengthy sample period. See Spot Bitcoin ETP Approval Order at 3010 n.38.

¹⁹ See Spot Ether ETP Approval Order at 46938–41. See also Second Spot Ether ETP Approval Order at 59786–87.

²⁰ See Hashdex Filing at 80972; Franklin Filing at 10.

²¹ The Commission has previously approved the listing and trading of commodity-based trust shares where the underlying trust held more than one commodity. See, e.g., Securities Exchange Act Release Nos. 82448 (Jan. 5, 2018) 83 FR 1428 (Jan. 11, 2018) (SR–NYSEARCA–2017–131) (Notice of Filing of Amendment No. 2 and Order Approving on an Accelerated Basis a Proposed Rule Change,

the structure of the Trusts, the terms of their operation and the trading of their shares, and the representations in their respective amended filings are substantially similar to those of the spot bitcoin ETP and spot ether ETP proposals approved in prior Commission orders.²² In addition, the Commission finds that the spot bitcoin market continues to be consistently highly correlated with the CME bitcoin futures market,²³ and that the spot ether market continues to be consistently highly correlated with the CME ether futures market.²⁴ As such, based on the record before the Commission, including the Commission’s correlation analyses, the Commission is able to conclude that the Exchanges’ comprehensive surveillance-sharing agreements with the CME²⁵ can be reasonably expected to assist in surveilling for fraudulent and

as Modified by Amendment No. 2, To List and Trade Shares of the Sprott Physical Gold and Silver Trust Under NYSE Arca Rule 8.201–E); 62692 (Aug. 11, 2010), 75 FR 50789 (Aug. 17, 2010) (SR–NYSEARCA–2010–56) (Order Granting Approval of Proposed Rule Change To List and Trade Shares of the ETFS Precious Metals Basket Trust). See also Franklin Filing at 7 n.16; Letter from Hashdex Asset Management, Ltd., dated Oct. 25, 2024, regarding SR–NASDAQ–2024–028, at 2–3.

²² See Spot Bitcoin ETP Approval Order; Spot Ether ETP Approval Order; Second Spot Bitcoin ETP Approval Order; Second Spot Ether ETP Approval Order. See also *infra* Section II.B.

²³ The Commission examined correlation between the CME bitcoin futures market and the Coinbase and Kraken spot bitcoin trading platforms at hourly, five-minute, and one-minute intervals, using the same data sources and methodology as in the Spot Bitcoin ETP Approval Order (see Spot Bitcoin ETP Approval Order at 3010 n.35), for the period from October 1, 2021, to August 22, 2024. The correlation between the CME bitcoin futures market and this subset of spot bitcoin platforms for the full sample period is no less than 98.9 percent using data at an hourly interval, 93.9 percent using data at a five-minute interval, and 83.1 percent using data at a one-minute interval. The rolling three-month correlation results range between 94.9 and 99.5 percent using data at an hourly interval, 83.8 and 96.1 percent using data at a five-minute interval, and 79.0 and 87.3 percent using data at a one-minute interval.

²⁴ The Commission examined correlation between the CME ether futures market and the Coinbase and Kraken spot ether trading platforms at hourly, five-minute, and one-minute intervals, using the same data sources and methodology as in the Spot Ether ETP Approval Order (see Spot Ether ETP Approval Order at 46939–40 n.45), for the period from October 1, 2021, to August 22, 2024. The correlation between the CME ether futures market and this subset of spot ether platforms for the full sample period is no less than 98.9 percent using data at an hourly interval, 92.8 percent using data at a five-minute interval, and 81.6 percent using data at a one-minute interval. The rolling three-month correlation results range between 96.0 and 99.5 percent using data at an hourly interval, 87.9 and 95.8 percent using data at a five-minute interval, and 78.4 and 85.1 percent using data at a one-minute interval.

²⁵ Both Exchanges and the CME are members of the Intermarket Surveillance Group. See Hashdex Filing at 80979; Franklin Filing at 6.

manipulative acts and practices in the specific context of the Proposals.

B. Exchange Act Section 11A(a)(1)(C)(iii)

Each Proposal sets forth aspects of its proposed ETP, including the availability of pricing information, transparency of portfolio holdings, and types of surveillance procedures, that are consistent with other ETPs that the Commission has approved.²⁶ This includes commitments regarding: the availability of quotation and last-sale information for the shares of each Trust; the availability on the websites of each Trust of certain information related to the Trusts, including net asset values; the dissemination of intra-day indicative values by one or more major market data vendors, updated every 15 seconds throughout the Exchanges' regular trading hours; the Exchanges' surveillance procedures and ability to obtain information regarding trading in the shares of the Trusts; the conditions under which the Exchanges would implement trading halts and suspensions; and the requirements of registered market makers in the shares of each Trust.²⁷ In addition, in each Proposal, the applicable Exchange deems the shares of the applicable Trust to be equity securities, thus rendering trading in such shares subject to that Exchange's existing rules governing the trading of equity securities.²⁸ Further, the applicable listing rules of each Exchange require that all statements and representations made in its filing regarding, among others, the description of the applicable Trust's holdings, limitations on such holdings, and the applicability of that Exchange's listing rules specified in the filing, will constitute continued listing requirements.²⁹ Moreover, each Proposal states that: the applicable Trust will represent to the applicable Exchange that it will advise that Exchange of any failure to comply with the applicable continued listing requirements; pursuant to obligations under Section 19(g)(1) of the Exchange Act, that Exchange will monitor for compliance with the continued listing requirements; and if the applicable Trust is not in compliance with the applicable listing requirements, that

Exchange will commence delisting procedures.³⁰

The Commission therefore finds that the Proposals, as with other ETPs that the Commission has approved,³¹ are reasonably designed to promote fair disclosure of information that may be necessary to price the shares of the Trusts appropriately, to prevent trading when a reasonable degree of transparency cannot be assured, to safeguard material non-public information relating to the Trusts' portfolios, and to ensure fair and orderly markets for the shares of the Trusts.

III. Accelerated Approval of the Franklin Filing

The Commission finds good cause to approve the Franklin Filing prior to the 30th day after the date of publication of notice of its Amendment No. 1³² in the **Federal Register**. The amendment clarified the description of its Trust; further described the terms of the Trust; and conformed various representations in the amended filing to BZX's listing standards and to representations that exchanges have made for other ETPs that the Commission has approved.³³ The amended filing is now substantially similar to filings for other spot bitcoin ETPs and spot ether ETPs that the Commission has approved,³⁴ and as discussed above in Section II.A, both (i) the spot bitcoin market and the CME bitcoin futures market and (ii) the spot ether market and the CME ether futures market remain consistently highly correlated. Accordingly, the Commission finds good cause, pursuant to Section 19(b)(2) of the Exchange Act,³⁵ to approve the Franklin Filing on an accelerated basis.

IV. Conclusion

This approval order is based on all of the Exchanges' representations and descriptions in their respective amended filings, which the Commission has carefully evaluated as discussed above.³⁶ For the reasons set forth above,

including the Commission's correlation analyses, the Commission finds, pursuant to Section 19(b)(2) of the Exchange Act,³⁷ that the Proposals are consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to a national securities exchange, and in particular, with Section 6(b)(5) and Section 11A(a)(1)(C)(iii) of the Exchange Act.³⁸

It is therefore ordered, pursuant to Section 19(b)(2) of the Exchange Act,³⁹ that the Hashdex Filing (SR–NASDAQ–2024–028) be, and hereby is, approved; and that the Franklin Filing (SR–CboeBZX–2024–091) be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁴⁰

Vanessa A. Countryman,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–101985; File No. SR–NYSEARCA–2024–89]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Amendment No. 1 to a Proposed Rule Change To Adopt Temporary Rule 7.34–E(T) and Revise Rules 1.1 and 7.34–E to Lengthen the Current Extended Trading Sessions

December 19, 2024.

On October 25, 2024, NYSE Arca, Inc. ("NYSE Arca" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b–4 thereunder,² a proposed rule change to adopt temporary rule 7.34–E(T) and revise rules 1.1 and 7.34–E to lengthen the current extended trading sessions. The proposed rule change was published for comment in the **Federal Register** on November 14, 2024.³ On December 13, 2024, the Exchange filed Amendment No. 1 to the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. Amendment No. 1

amended and replaced the proposed rule change in its entirety. The Commission is publishing this notice to solicit comments on the proposed rule change, as modified by Amendment No. 1, from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt temporary Rule 7.34–E(T) and revise Rules 1.1 and 7.34–E to permit the Exchange to lengthen the current extended trading hours for NMS stocks to 1:30 a.m. E.T. through 11:30 p.m. E.T. on Monday through Thursday, and 1:30 a.m. E.T. through 8:00 p.m. E.T. on Friday. This Amendment No. 1 supersedes the Initial Proposal in its entirety.

The text of the proposed rule change is available on the Exchange's website at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt temporary Rule 7.34–E(T) and revise Rules 1.1 (Definitions) and 7.34–E (Trading Sessions) to permit the Exchange to lengthen current extended trading hours for NMS stocks to 1:30 a.m. E.T. through 11:30 p.m. E.T. on Monday through Thursday, and 1:30 a.m. E.T. through 8:00 p.m. E.T. on Friday. The Exchange also proposes certain technical, conforming changes to Rule 5.1–E(a) (General Provisions and Unlisted Trading Privileges) and Commentary .08 to Rule 9.5320–E (Prohibition Against Trading Ahead of Customer Orders).

Background

The Exchange currently offers three trading sessions each day the Exchange

is open for business unless the Exchange determines otherwise, as follows.

The Exchange's first trading session, the Early Trading Session, begins at 4:00 a.m. Eastern Time ("E.T.") and concludes at the commencement of the Core Trading Session.⁴ The Exchange begins accepting orders 90 minutes before the Early Trading Session begins.⁵

The second or Core Trading Session begins for each security at 9:30 a.m. E.T. and ends at the conclusion of Core Trading Hours or the Core Closing Auction, whichever comes later.⁶ The final session is the Late Trading Session, which begins following the conclusion of the Core Trading Session and concludes at 8:00 p.m. E.T.

Current Rule 7.34–E(b) requires that orders entered into the Exchange marketplace include a designation for which trading session(s) the order will remain in effect. The Exchange will reject orders entered without a trading session designation. An order is only eligible to participate in the designated trading session(s) and may remain in effect for one or more consecutive trading sessions on a particular day. Unless otherwise specified, an order designated for a later trading session will be accepted but not eligible to trade until the designated trading session begins. The Exchange will reject orders designated solely for a trading session that has already ended.

Current Rule 7.34–E(c) describes the order types that are permitted in each session, as follows.

Early Trading Session

Orders and modifiers defined in Rule 7.31–E designated for the Early Trading Session are eligible to participate in the Early Trading Session unless otherwise specified in Rule 7.34–E(c)(1)(A)–(F).

Pursuant to Rule 7.34–E(c)(1)(A), Market Orders and Pegged Orders are not eligible to participate in the Early Trading Session, and such orders that include a designation for the Early Trading Session will be rejected. Market Pegged Orders and Discretionary Pegged Orders, regardless of the session designated for the order, may not be entered before or during the Early Trading Session and will also be rejected. Under Rule 7.34–E(c)(1)(B), Limit Orders designated Immediate or Cancel ("IOC") are ineligible to participate in the Early Open Auction

and will be rejected if entered before the Early Open Auction concludes. Pursuant to Rule 7.34–E(c)(1)(C), Limit Orders designated IOC entered before or during the Early Trading Session and designated for the Core Trading Session will be rejected if entered before the Auction Processing Period for the Core Open Auction.

Rule 7.34–E(c)(1)(D) provides that for securities that are not eligible for an auction on the Exchange, Market Orders designated for the Core Trading Session and Auction-Only Orders will be routed to the primary listing market on arrival. Any order routed directly to the primary listing market on arrival will be cancelled if that market is not accepting orders.

Pursuant to Rule 7.34–E(c)(1)(E), Market-on-Open Orders ("MOO Orders"), Market-on-Close Orders ("MOC Orders"), Limit-on-Close Orders ("LOC Orders"), Primary Only Orders, and Directed Orders designated for the Early Trading Session will be rejected.

Finally, pursuant to Rule 7.34–E(c)(1)(F), Non-Displayed Limit Orders, Mid-Point Liquidity Orders ("MPL Orders"), Tracking Orders, and RPI Orders entered before the Auction Processing Period for the Early Open Auction concludes will also be rejected.

Core Trading Session

All orders and modifiers defined in Rule 7.31–E that are designated for the Core Trading Session are eligible to participate in the Core Trading Session unless otherwise specified in Rules 7.34–E(c)(2)(A)–(C).

Pursuant to Rule 7.34–E(c)(2)(A), Market Orders in securities that are not eligible for the Core Open Auction will be routed to the primary listing market until the first opening print of any size on the primary listing market or 10:00 a.m. E.T., whichever is earlier. Pursuant to Rule 7.34–E(c)(2)(B), Auction-Only Orders in securities that are not eligible for an auction on the Exchange will be accepted and routed directly to the primary listing market. Finally, Rule 7.34–E(c)(2)(C) provides that Limit Orders designated IOC entered before or during the Core Trading Session and designated for the Late Trading Session will be rejected if entered before the Auction Processing Period for the Closing Auction.

Late Trading Session

The orders and modifiers defined in Rule 7.31–E that are designated for the Late Trading Session are eligible to participate in the Late Trading Session unless otherwise specified in Rules 7.34–E(c)(3)(A)–(C).

⁴ See Rule 7.34–E(a)(1).

⁵ See *id.*

⁶ See Rule 7.34–E(a)(2). "Core Trading Hours" means the hours of 9:30 a.m. E.T. through 4:00 p.m. E.T. or such other hours as may be determined by the Exchange from time to time. See Rule 1.1.

Pursuant to Rule 7.34–E(c)(3)(A), Market Orders and Pegged Orders are not eligible to participate in the Late Trading Session. The Exchange will reject Market Orders and Pegged Orders that include a designation for the Late Trading Session. Further, under Rule 7.34–E(c)(3)(B), orders that are routed directly to the primary listing market on arrival will be cancelled if that market is not accepting orders. Finally, pursuant to Rule 7.34–E(c)(3)(C), MOO Orders, MOC Orders, LOC Orders, Primary Only Orders, and Directed Orders designated for the Late Trading Session will be rejected.

Customer Disclosures

Rule 7.34–E(d) provides that no ETP Holder may accept an order from a non-ETP Holder for execution in the Early or Late Trading Session without disclosing to such non-ETP Holder that Limit Orders are the only orders that are eligible for execution during the Early and Late Trading Sessions⁷ and that an order must be designated specifically for trading in the Early and/or Late Trading Session to be eligible for trading in the Early and/or Late Trading Session.⁸ In addition, Rule 7.34–E(d)(3) provides that an ETP Holder must disclose to non-ETP Holders that extended hours trading involves material trading risks, including the possibility of lower liquidity, high volatility, changing prices, unlinked markets, an exaggerated effect from news announcements, wider spreads and any other relevant risk. The absence of an updated underlying index value or intraday indicative value is an additional trading risk in extended hours for Derivative Securities Products.

The disclosures required pursuant to Rule 7.34–E(d)(3) may take the form described in subparagraphs (1) through (7) thereunder or such other form as provides substantially similar information, including risks of lower liquidity; higher volatility; changing prices; unlinked markets; news announcements; wider spreads; and lack of calculation or dissemination of underlying index value or intraday indicative value.

Finally, Rule 7.34–E(e) provides that trades on the Exchange executed and reported outside of the Core Trading Session are designated as .T trades.

Proposed Rule Change

As recently announced,⁹ the Exchange proposes to facilitate the

trading of NMS securities on the Exchange beginning at 1:30 a.m. E.T. through 11:30 p.m. E.T. on Monday through Thursday, and 1:30 a.m. E.T. through 8:00 p.m. E.T. on Friday. The Exchange would retain the current structure of the Early and Late Trading Sessions, including eligible order types and required disclosures as described above, while extending the beginning of the Early Trading Session and end time of the Late Trading Session and accepting orders earlier than currently.

To effectuate these changes, the Exchange proposes to adopt a temporary Rule 7.34–E titled “7.34–E(T).” The proposed temporary rule would be identical to current Rule 7.34–E with three exceptions.

First, the beginning and ending times of the Early and Late Trading Sessions, respectively, as set forth in Rule 7.34–E(a)(1) and (3) would be changed to reflect the proposed longer extended trading hours. The Exchange proposes to end the Late Trading Session at 8:00 p.m. E.T. on Friday in order to maximize the available time to make changes at the end of the week before weekend testing.

Second, the Exchange would shorten the time it will begin accepting orders before commencement of the Early Trading Session as set forth in proposed Rule 7.34–E(a)(1) from 90 minutes to 30 minutes such that orders would be accepted beginning at 1:00 a.m. E.T. The Exchange does not propose to change the time when the Core Trading Session would begin or end or make any other rule changes impacting the Core Trading Session.

Third, the Exchange proposes to supplement its current customer disclosures set forth in proposed Rule 7.34–E(d)(3) to add six additional potential risks associated with Extended Hours Trading based on the recently approved rules of 24X National Exchange LLC,¹⁰ as follows:

- Proposed Rule 7.34–E(d)(viii) would address the potential risks of trading during when financial market infrastructure companies such as other markets, banks, Fedwire Funds Service, and certain other providers of settlement services, would be closed.

Exchange to 22 Hours a Day,” October 25, 2024, available at <https://ir.theice.com/press/news-details/2024/The-New-York-Stock-Exchange-Plans-to-Extend-Weekday-Trading-on-its-NYSE-Arca-Equities-Exchange-to-22-Hours-a-Day/default.aspx>.

¹⁰ See Securities Exchange Act Release No. 101777 (November 27, 2024), 89 FR 97092, 97110–111 (December 06, 2024) (In the Matter of the Application of 24X National Exchange LLC for Registration as a National Securities Exchange; Findings, Opinion, and Order of the Commission) (“Release No. 101777”); see 24X Rule 3.21(g) & (i)(1)–(5).

The proposed rule would advise that during hours in which these financial market infrastructure companies are closed may lead to an increased passage of time between execution and final settlement of the resulting transaction. Proposed Rule 7.34–E(d)(viii) is based on and substantially the same as 24X Rule 3.21(g).

- Proposed Rule 7.34–E(d)(ix) would address the potential risks of trading during hours in which primary listing markets may not be open. As proposed, proposed [sic] Rule 7.34–E(d)(ix) would provide that during Extended Hours Trading, the primary listing exchanges for securities traded on the Exchange may not be open and, thus, trading in listed securities may not be occurring on the primary listing exchanges. The proposed rule would also advise customers that the primary listing exchanges may not be available to perform their regulatory surveillance and other regulatory obligations with regard to their listed securities during Extended Hours Trading. Proposed Rule 7.34–E(d)(ix) is based on and substantially the same as 24X Rule 3.21(i)(1).

- Proposed Rule 7.34–E(d)(x) would address the potential risks of trading during hours in which there may be limited or different regulatory protections. As proposed, the rule would advise that the regulatory protections available during Extended Hours Trading may be more limited or different than those available during the Core Trading Session. For example, the proposed rule would note that certain mechanisms that address volatility in individual symbols and the equities market may not be available during Extended Hours Trading. Proposed Rule 7.34–E(d)(x) is based on and substantially the same as 24X Rule 3.21(i)(2).

- Proposed Rule 7.34–E(d)(xi) would address the potential risk of trading because of limited trading alternatives. As proposed, the rule would advise that Exchange may be the only exchange trading certain securities during Extended Hours Trading and that, with more limited trading alternatives during Extended Hours Trading, customers may experience losses if their orders cannot be executed normally due to systems failures or other issues on the Exchange. Proposed Rule 7.34–E(d)(xi) is based on and substantially the same as 24X Rule 3.21(i)(3).

- Proposed Rule 7.34–E(d)(xii) would address the potential risk related to continuous trading during Extended Hours Trading. As proposed, the rule would advise that, with more limited breaks in trading, there may be a greater

⁷ See Rule 7.34–E(d)(1).

⁸ See *id.* at (d)(2).

⁹ See “The New York Stock Exchange Plans to Extend Weekday Trading on its NYSE Arca Equities

risk related to system maintenance and testing, as well as the pausing and resumption of trading. Proposed Rule 7.34–E(d)(xii) is based on and substantially the same as 24X Rule 3.21(i)(4).

• Finally, proposed Rule 7.34–E(d)(xiii) would advise that Extended Hours Trading may present additional unforeseen risks in addition to those discussed above. Proposed Rule 7.34–E(d)(xiii) is based on and substantially the same as 24X Rule 3.21(i)(5).

The current version of Rule 7.34–E would remain operative until transition to the proposed new Extended Trading Hours set forth in Rule 7.34–E(T)(a) becomes operative. As proposed, the Exchange would not commence operation of Extended Hours Trading as set forth in Rule 7.34–E(T)(a) unless the Equity Data Plans (as proposed to be defined in Rule 1.1, discussed below) have established a mechanism to collect, consolidate, process and disseminate quotation and transaction information at all times during Extended Trading Hours that is equivalent to the mechanism established for the Core Trading Session, and (2) have provided the Exchange with notification that they are prepared to collect, consolidate, process and disseminate quotation and transaction information to accommodate Extended Trading Hours. Specifically, prior to commencing operation during Extended Hours Trading as set forth in Rule 7.34–E(T)(a), the Exchange will file a proposed rule change pursuant to Section 19(b) of the Act and the rules thereunder to amend its rules to delete the current version of Rule 7.34–E and preamble and delete the “T” designation in Rule 7.34–E(T), and confirm that the Exchange is able to comply with its obligations under the Act and the rules thereunder during Extended Trading Hours and that such Equity Data Plans are prepared to collect, consolidate, process and disseminate quotation and transaction information at all times during Extended Trading Hours. The Exchange believes that these limitations are designed to reasonably ensure that consolidated quotation and transaction data are provided in a manner that is consistent with the existing extended hours sessions on exchanges.¹¹

The Exchange would accordingly add the following legend to current Rule 7.34–E (new text italicized):

This version of Rule 7.34–E will remain operative until Extended Hours Trading as set forth in Rule 7.34–E(T) is operative. For the avoidance of doubt, notwithstanding

anything to the contrary in these Rules, the Exchange shall not commence operation of Extended Hours Trading as set forth in Rule 7.34–E(T) unless the Equity Data Plans (1) have established a mechanism to collect, consolidate, process and disseminate quotation and transaction information at all times during Extended Trading Hours that is equivalent to the mechanism established for the Core Trading Session, and (2) have provided the Exchange with notification that they are prepared to collect, consolidate, process and disseminate quotation and transaction information to accommodate Extended Trading Hours. Prior to commencing operation during Extended Hours Trading as set forth in Rule 7.34–E(T), the Exchange will file a proposed rule change pursuant to Section 19(b) of the Exchange Act and the rules thereunder to amend its rules to delete the current version of Rule 7.34–E and preamble and delete the “T” designation in Rule 7.34–E(T), and confirm that the Exchange is able to comply with its obligations under the Exchange Act and the rules thereunder during Extended Trading Hours and that such Equity Data Plans are prepared to collect, consolidate, process and disseminate quotation and transaction information at all times during Extended Trading Hours. The rule change must be filed with the SEC within 18 months of the SEC’s approval of the Exchange’s rule filing adopting Rule 7.34–E(T). If the Exchange fails to file such a rule change within 18 months of approval of Rule 7.34–E(T), the Exchange will promptly file a proposed rule change to delete Rule 7.34–E(T).

The proposed language is substantially the same as text contained in 24X Rule 1.5(c) (Definitions). The Exchange would also revise current Rule 1.1 to add two definitions.

First, the Exchange would define “Equity Data Plans” to mean the effective national market system plan(s) governing the collection, consolidation, processing and dissemination of consolidated equity market data via the exclusive securities information processors (“SIPs”), including (1) Consolidated Tape Association Plan (“CTA Plan”), (2) Consolidated Quotation Plan (“CQ Plan”), (3) the Joint Self-Regulatory Organization Plan Governing the Collection, Consolidation and Dissemination of Quotation and Transaction Information for Nasdaq-Listed Securities Traded on Exchanges on an Unlisted Trading Privileges Basis (“UTP Plan”), (4) the CT Plan established by the Limited Liability Company Agreement of CT Plan LLC, and (5) any successor thereto to the named Plan(s). Except for the reference to the CT Plan established by the Limited Liability Company Agreement of CT Plan LLC, the proposed definition is the same as 24X Rule 1.5(o).

Second, the Exchange would define Extended Hours Trading to mean trading during the Early Trading Session

and the Late Trading Session. The term is used without capitalization in current Rule 7.34–E(d) describing required customer disclosures. The Exchange proposes to use the proposed definition in proposed Rule 7.34–E(T)(d) and current Rule 7.34–E(d), with the exception of subsection (d)(4) of the current and proposed temporary rules, which use the phrase generically. The Exchange believes the proposal would add transparency and clarity to the Exchange’s rules.

The Exchange would also make certain technical, conforming changes to Rule 5.1–E(a) and Commentary .08 to Rule 9.5320–E as follows.

First, the Exchange would replace obsolete references to the “Opening session” and “Late Trading Session” and the associated session start and end times in Pacific Time in Rule 5.1–E(a)(2)(i) with the defined term “Extended Hours Trading.” The Exchange would also delete a stray period at the end of the rule heading. The proposed changes would add transparency and clarity to the Exchange’s rules.

Finally, the Exchange would replace the obsolete reference to “6:30 a.m. to 1:00 p.m. Pacific Standard Time” in Commentary .08 to Rule 9.5320–E with “the Core Trading Session.” The proposed change would also add transparency and clarity to the Exchange’s rules.

The Exchange believes that the proposal will benefit investors and the national market system by increasing market accessibility, promoting capital formation, and facilitating portfolio management. The proposed extended trading sessions would operate in the same fashion as the current sessions, and the rules that apply to the current sessions would apply to the proposed longer Early and Late Trading Sessions in unmodified form. In addition, all NMS stocks would continue to be eligible to trade in the proposed longer extended hours sessions. Moreover, as discussed below, the existing safeguards applicable to pre-market and post-market sessions including, among other things, operational safeguards, availability of consolidated last sale and quotation information, and specific disclosures to investors regarding the heightened risks of after-hours trading, and market surveillance capabilities, would be applicable to the proposed extended Early and Late Trading Sessions.

Operations

As noted, the proposed longer trading sessions will operate in the same way as the current sessions from an operational

¹¹ See Release No. 101777, 89 FR at 97105.

perspective. All order types eligible for such sessions and order type behaviors will remain unchanged. The Exchange will also route to away markets between 1:30 a.m. E.T. through 11:30 p.m. E.T. on Monday through Thursday, and 1:30 a.m. E.T. through 8:00 p.m. E.T. on Friday, just as it currently does between 4:00 a.m. E.T. and 9:30 a.m. E.T. and between 4:00 p.m. E.T. and 8:00 p.m. E.T. Order processing during the proposed longer trading sessions will also function the same way as it does in the current sessions. There will be no changes to the ranking, display, or decrementation processes or rules. The Exchange will report the best bid and offer on the Exchange to the appropriate network processor, as it currently does beginning at 4:00 a.m. E.T. using the same formats and delivery mechanisms. Trades executed and reported outside of the Core Trading Session as proposed will be reported to the appropriate network processor with the “.T” modifier, just as currently. No fee changes are proposed in connection with this proposal.

In addition, the Exchange will continue to work with primary listing exchanges to coordinate trading halts where appropriate, including halts implemented due to significant material events (*i.e.*, a bankruptcy declaration). During the proposed extended Early and Late Trading Sessions, the Exchange would pause trading in the underlying security until trading resumes on the primary listing market for the security. Generally, regardless of trading session, when a halt has been declared on the primary market, the Exchange will also halt trading automatically in the subject security on NYSE Arca. Exchange staff will be available during the proposed extended trading sessions in order to maintain a fair and orderly market, make any necessary rulings or take any action that may be necessary. Similarly, Exchange staff will be available if any action such as declaration of a halt in a NYSE Arca primary symbol would be necessary in the event of a system malfunction or significant material event such as a bankruptcy declaration.

The Exchange notes that, to the extent material corporate news is released during the Extended Trading Hours and the primary listing market does not impose a halt, the requirements of proposed Rule 7.34–E(T)(d)(3)(v) (which is part of the current rule) and proposed Rules 7.34–E(T)(d)(3)(viii)–(xiii) that disclosures be provided to investors relating to the risks associated with news announcements and the additional risks of trading during Extended Trading Hours, respectively, will help ensure that market participants,

including investors, are informed about the potential risks associated with trading during that time period.¹²

Securities Information Processor (“SIP”) Readiness

The Exchange will submit all quotes and trades that are generated in the extended Early and Late Trading Session to the consolidated quote and trade systems maintained by the SIPs for public dissemination. Accordingly, once these extended trading hours are operative, quotes and trades will be made available to the investing public in the same manner that quotes and trades are currently made available.

The two SIPs—the Securities Industry Automation Corporation (“SIAC”) and Nasdaq—both currently operate from 4:00 a.m. E.T. through 8:00 p.m. E.T. The Exchange has informed both SIPs, as well as the Operating Committee of the CTA and the CQ Plans and the UTP Plan (collectively, the “Operating Committee”), of its intention to extend trading hours to commence at 1:30 a.m. E.T. through 11:30 p.m. E.T. on Monday through Thursday, and 1:30 a.m. E.T. through 8:00 p.m. E.T. on Friday, and has submitted change requests to both SIPs requesting that the SIPs similarly extend their hours of operation. The Exchange will work with the Operating Committee and the SIPs regarding the extension of the SIPs’ operating hours and, in the near term, expects to request a vote of the Operating Committee instructing the SIPs to proceed with such extension.

As noted above, the Exchange will not make the proposed extended hours operative unless the Equity Data Plans have established a mechanism to collect, consolidate, process and disseminate quotation and transaction information at all times during Extended Trading Hours that is equivalent to the mechanism established for the Core Trading Session, and provided the Exchange with notification that they are prepared to collect, consolidate, process and disseminate quotation and transaction information to accommodate Extended Trading Hours. As also previously noted, at that point the Exchange will file a proposed rule change to, among other things, confirm that such Equity Data Plans are prepared to collect, consolidate, process and disseminate quotation and transaction information at all times during Extended Trading Hours.

Market Surveillance

Trading on the Exchange is subject to a comprehensive regulatory program applicable to the current Early, Core, and Late Trading Sessions that includes a suite of surveillances that reviews trading during each trading session as well as routine examinations of ETP Holders consistent with the current exam-based regulatory program. The Exchange’s current regulatory program would be fully applicable to trading in the proposed extended Early and Late Trading Sessions.

Customer Disclosures

As noted above, given the potential trading and other risks of extended hours trading Products, Rule 7.34–E(d) prohibits ETP Holders from accepting orders from non-ETP Holders for execution during the Early or Late Trading Session without making the specified disclosures in the Rule. As further discussed above, the Exchange proposes to enhance these disclosures by including additional mandatory disclosures regarding the potential risks associated with trading during Extended Hours Trading based on recently approved 24X Rule 3.21.¹³ The Exchange notes that Rule 7.34–E(d), as amended, would be fully applicable to the proposed extended trading sessions and would place the same disclosure obligation on ETP Holders.

Implementation

The Exchange will begin accepting orders for the extended Early and Late Trading Session as set forth in proposed Rule 7.34–E(T) subject to the effectiveness of this proposed rule change and subject to the conditions set forth in the proposed legend to current Rule 7.34–E described above.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,¹⁴ in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

Generally, the Exchange believes that the proposal, including the proposed temporary rule to support longer extended hours trading, would remove

¹³ See text accompanying note 10, *supra*.

¹⁴ 15 U.S.C. 78f(b)(5).

¹² See Release No. 101777, 89 FR at 97109.

impediments to and perfect the mechanism of a free and open market and a national market system by providing a rules framework to support the lengthening of the current extended trading hours for NMS stocks to 1:30 a.m. E.T. through 11:30 p.m. E.T. on Monday through Thursday, and 1:30 a.m. E.T. through 8:00 p.m. E.T. on Friday, which the Exchange believes will increase market accessibility, promote capital formation, and facilitate portfolio management.

The Exchange further believes that adopting a temporary rule that would only be operative upon transition to the new proposed Extended Trading Hours, and adding a legend to the current version of Rule 7.34–E specifying that the current rule will remain operative until that time, would promote transparency in Exchange rules and add clarity as to which rules are operative and when, thereby reducing potential confusion, and making the Exchange's rules easier to navigate. Moreover, the proposed legend would provide that the Exchange will not commence operation of the longer Extended Trading Hours prior to filing a proposed rule change to amend its rules confirming that the Exchange is able to comply with its obligations under the Act during the longer extended trading session and that the Equity Data Plans are prepared to collect, consolidate, process and disseminate quotation and transaction information at all times during the proposed Extended Trading Hours. This requirement would promote transparency because trading will not occur unless the Equity Data Plans are able to collect, consolidate, process and disseminate consolidated quotation and transaction data during the proposed longer session. The requirement would also be designed to ensure that consolidated quotation and transaction data are provided in a manner that is consistent with the Exchange's current extended hours sessions, and that the proposed change is thus designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to and facilitating transactions in NMS stocks, and perfect the mechanism of a free and open market and a national market system.

Finally, the Exchange believes that applying the current requirements for extended hours trading such as order designation, permitted orders, and mandatory customer disclosures as well as the operational and regulatory safeguards already in place for the

current Early, Core, and Late Sessions to the proposed extended sessions, would promote just and equitable principles of trade and protect investors and the public interest. In addition, the proposed enhanced disclosures based on the approved rules of another exchange will, together with the existing disclosures, provide investors with important information that should help to inform their decisions as to whether trading during the Exchange's proposed longer extended hours is suitable for them. The Exchange believes that the expanded customer disclosures are consistent with the Act and, in particular, the Section 6(b)(5)¹⁵ requirement that an exchange's rules be designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanisms of a free and open market and a national market system, and protect investors and the public interest.

The Exchange believes that adding a definition of Equity Data Plan to Rule 1.1 would remove impediments to and perfect the mechanism of a free and open market and national market system by adding clarity and transparency to the Exchange's rules with respect to the a [sic] critical element that must be in place for the proposed longer extended trading session. As discussed above, trading in the new extended session will not occur unless the Equity Data Plans are able to collect, consolidate, process and disseminate consolidated quotation and transaction data during the new session. Similarly, the Exchange believes that adding a definition of Extended Hours Trading to Rule 1.1 would remove impediments to and perfect the mechanism of a free and open market and national market system by adding clarity to the Exchange's rules through the introduction of a definition that can be utilized immediately and that would not need to be updated once the Exchange migrates to 22 hour trading, 5 days a week. The Exchange further believes that eliminating obsolete legacy material from Rule 5.1–E(a) and Commentary .08 to Rule 9.5320–E similarly removes impediments to and perfects the mechanism of a free and open market by removing confusion that may result from having obsolete material in the Exchange's rulebook. The Exchange believes that eliminating such obsolete material would not be inconsistent with the public interest and the protection of investors because investors will not be harmed and in fact would benefit from increased transparency, thereby reducing potential confusion.

¹⁵ 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is designed to propose rule changes to lengthen the current extended trading hours for NMS stocks to 1:30 a.m. E.T. through 11:30 p.m. E.T. on Monday through Thursday, and 1:30 a.m. E.T. through 8:00 p.m. E.T. on Friday. The Exchange operates in a highly competitive environment in which unaffiliated exchange competitors and new entrants could compete to offer extended hours trading of similar duration, and the proposal would therefore enable the Exchange to compete on a more level playing field with these competitors.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change, as modified by Amendment No. 1, is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR–NYSEARCA–2024–89 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–NYSEARCA–2024–89. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule

change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NYSEARCA-2024-89 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

Vanessa A. Countryman,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-102006; File No. SR-NASDAQ-2024-085]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Exchange Rules 1015, 9261, 9341, 9524 and 9830 To Permit Hearings by Video Conference

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 19, 2024, The Nasdaq Stock Market LLC ("Nasdaq" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Exchange Rules 1015, 9261, 9341, 9524 and 9830 to allow for video conference hearings before the Office of Hearing Officers ("OHO") and the Exchange Review Council ("ERC") under specified conditions.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to harmonize Exchange Rules 1015, 9261, 9341, 9524 and 9830 with changes by the Financial Industry Regulatory Authority, Inc. ("FINRA") to its Rules 1015, 9261, 9341, 9524 and 9830 that would allow for the use of video conference for reasons in addition to COVID-19. The proposal also deletes expired references to temporary amendments.³ The Exchange originally filed proposed rule change SR-NASDAQ-2020-076, which allowed the Exchange's Office of Hearing Officers ("OHO") and the Exchange Review Council ("ERC") to conduct hearings, on a temporary basis, by video conference, if warranted by the COVID-19-related public health risks posed by an in-person hearing.⁴ These were extended several times due to the continuing public health risks and

logistical challenges related to COVID-19, including whether hearing participants could safely travel and abide by state or local quarantine requirements.⁵ The use of high quality, secure and user-friendly video conference technology in hearings has demonstrated that video is an effective and efficient alternative to in-person hearings.⁶

The Exchange is proposing to make the temporary amendments regarding video conference hearings permanent, with some modifications that would allow for the use of video conference for reasons in addition to COVID-19. The proposed rule change will continue to improve and modernize the Exchange's operations so that parties, panelists, and the Exchange staff may proceed expeditiously by video conference in the event of certain circumstances, including where unforeseen events make appearing in person difficult or impracticable. As described below, impracticability is intended to account for an uncommon situation or extraordinary circumstance. The proposed rule change further promotes efficiency by giving OHO and the ERC authority to act quickly if a future unexpected event impaired their ability to conduct in-person hearings safely.

OHO conducts hearings in disciplinary proceedings and hearings for temporary and permanent cease and desist orders. When orders in disciplinary proceedings are appealed, the ERC holds hearings on oral argument. The ERC also conducts hearings in membership proceedings and eligibility proceedings. Under the proposed rule change, OHO and the ERC's authority to order hearings by

⁵ See Securities Exchange Act Release No. 90774 (December 22, 2020), 85 FR 86614 (December 30, 2020) (Notice of Filing and Immediate Effectiveness of File No. SR-NASDAQ-2020-092); Securities Exchange Act Release No. 91763 (May 4, 2021), 86 FR 25055 (May 10, 2021) (Notice of Filing and Immediate Effectiveness of File No. SR-NASDAQ-2021-033); Securities Exchange Act Release No. 92911 (September 9, 2021), 86 FR 51395 (September 15, 2021) (Notice of Filing and Immediate Effectiveness of File No. SR-NASDAQ-2021-067); Securities Exchange Act Release No. 93852 (December 22, 2021), 86 FR 74201 (December 29, 2021) (Notice of Filing and Immediate Effectiveness of File No. SR-NASDAQ-2021-104); Securities Exchange Act Release No. 94610 (April 5, 2022), 87 FR 21225 (April 11, 2022) (Notice of Filing and Immediate Effectiveness of File No. SR-NASDAQ-2022-028); Securities Exchange Act Release No. 95436 (August 5, 2022), 87 FR 49624 (August 11, 2022) (Notice of Filing and Immediate Effectiveness of File No. SR-NASDAQ-2022-044); Securities Exchange Act Release No. 96282 (November 9, 2022), 87 FR 68788 (November 16, 2022) (Notice of Filing and Immediate Effectiveness of File No. SR-NASDAQ-2022-059).

⁶ See Securities Exchange Act Release No. 97403 (April 28, 2023), 88 FR 28645 (May 4, 2023) (SR-FINRA-2023-008).

³ See Securities Exchange Act Release No. 96282 (November 9, 2022), 87 FR 68788 (November 16, 2022) (Notice of Filing and Immediate Effectiveness of File No. SR-NASDAQ-2022-059) (temporary amendments expiring on January 31, 2023).

⁴ See Securities Exchange Act Release No. 90390 (November 10, 2020), 85 FR 73302 (November 17, 2020) (Notice of Filing and Immediate Effectiveness of File No. SR-NASDAQ-2020-076).

¹⁶ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

video conference would extend beyond the public health risks posed by COVID-19 to other similar situations in which proceeding in person may endanger the health or safety of the participants or would be impracticable. For example, appearing in person may be impracticable in the event of a natural disaster or terrorist attack that caused travel to be cancelled for a period of time. As with the temporary amendments, under the proposed rule change, in-person hearings will remain the default method for hearings before OHO and the ERC, and their exercise of authority under the proposed rule change would be discretionary. In-person hearings may take place where safe and appropriate.

Evidentiary Hearings

For evidentiary hearings, the proposed rule change would give OHO or the ERC authority to order an evidentiary hearing to occur by video conference, in whole or in part, if OHO or the ERC determines that proceeding in person may endanger the health or safety of the participants or would be impracticable. OHO and the ERC would have such authority on their own. In addition, under the proposed rule change, parties could file a joint motion requesting the hearing to occur, in whole or in part, by video conference based on a showing of good cause. Whether acting on its own or based on a joint motion of the parties, OHO and the ERC would have reasonable discretion to exercise their authority under the proposed rule change. In deciding whether to schedule a hearing by video conference, OHO and the ERC could consider and balance a variety of factors including, for example and without limitation, a hearing participant's individual health concerns and access to the connectivity and technology necessary to participate in a video conference hearing.

Oral Argument

The proposed rule change would give the ERC authority to order an oral argument hearing to occur by video conference, in whole or in part, if it determines that proceeding in person may endanger the health or safety of the participants or would be impracticable. The ERC would have such authority on its own. In addition, under the proposed rule change, the ERC would have authority—on its own or on consideration of a motion by any party—to order oral argument to occur by video conference, in whole or in part, for other reasons (*i.e.* reasons not limited to public health, safety or impracticability). Under such

circumstances, an opposing party would have the opportunity to demonstrate that the hearing should proceed in person because proceeding by video conference would materially disadvantage that party. Whether a party has shown material disadvantage would depend on the facts and circumstances. Considerations may include, for example and without limitation, case complexity, the issues on appeal, and whether the respondent is pro se and desires to appear in person. Whether acting on its own or based on a motion of a party, the ERC would have reasonable discretion to exercise its authority under the proposed rule change. In deciding whether to order an oral argument hearing by video conference, the ERC could consider and balance a variety of factors including, for example and without limitation, a hearing participant's individual health concerns, access to video conference technology, whether a party has delayed or refused to appear in person, and whether proceeding by video conference would materially disadvantage any party.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁷ in general, and furthers the objectives of Section 6(b)(5) of the Act,⁸ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by continuing to provide greater harmonization between the Exchange rules and FINRA rules of similar purpose,⁹ resulting in less burdensome and more efficient regulatory compliance. The proposal also deletes expired references to temporary amendments.

The Exchange believes that the proposed rule change protects investors and the public interest by permitting the use of broadly available technology to allow hearings to proceed by video conference under certain circumstances. The Exchange's disciplinary and eligibility proceedings and other review processes serve a critical role in providing investor protection and maintaining fair and orderly markets by, for example, sanctioning misconduct and preventing further customer harm

by members and associated persons. The proposed rule change would encourage the prompt resolution of these cases while preserving a fair process.

The proposed rule change promotes efficiency by permitting hearings to occur by video conference in situations where the hearings would otherwise be postponed for an uncertain period of time. As discussed, COVID-19 necessitated the Exchange to propose the temporary amendments, which were extended due to the continuing health risks of COVID-19, as well as limitations on travel, quarantine requirements, and other logistical challenges to safely conducting hearings in person. The proposed rule change further promotes efficiency by giving OHO and the ERC authority to act quickly if a future unexpected event impaired their ability to conduct in-person hearings safely.

The proposed rule change also serves to provide a fair procedure for the disciplining of members and persons associated with members by allowing hearings to proceed by video conference not only due to public health or safety reasons, but also at a party or the parties' request for reasons particular to them. The Adjudicator could allow a hearing to proceed by video conference in the exercise of reasonable discretion and subject to procedural safeguards that ensure fairness.

Thus, the proposed rule change represents a significant step toward modernizing the Exchange's procedures in a manner that preserves in-person hearings, but allows for the use of high quality, secure and user-friendly video conference technology under certain circumstances.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues but is rather intended solely to allow for the use of video conference for reasons in addition to COVID-19 where unforeseen events make appearing in person difficult or impracticable. In its filing, FINRA provided an economic impact assessment analyzing the potential impacts of the proposed rule change, including anticipated costs, benefits,

⁷ 15 U.S.C. 78f(b).

⁸ 15 U.S.C. 78f(b)(5).

and distributional and competitive effects.¹⁰

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹¹ and subparagraph (f)(6) of Rule 19b-4 thereunder.¹²

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NASDAQ-2024-085 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange

Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NASDAQ-2024-085. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly.

We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NASDAQ-2024-085 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹³

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-101978; File No. SR-NASDAQ-2024-084]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing of Proposed Rule Change To Modify Certain Initial Listing Liquidity Requirements

December 19, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934

(“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on December 12, 2024, The Nasdaq Stock Market LLC (“Nasdaq” or “Exchange”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify certain initial listing liquidity requirements.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Nasdaq is proposing to modify Listing Rules 5405 and 5505 to require that a company listing on the Nasdaq Global Market or Nasdaq Capital Market in connection with an initial public offering (“IPO”) satisfy the applicable minimum Market Value of Unrestricted Publicly Held Shares (“MVUPHS”) requirement solely from the proceeds of the offering. Nasdaq is also proposing to make similar changes affecting companies that uplist to Nasdaq from the U.S. over-the-counter market (“OTC market”) in conjunction with a public offering.

Nasdaq Listing Rules require a company to have a minimum Market Value of Unrestricted Publicly Held

¹⁰ See Securities Exchange Act Release No. 97403 (April 28, 2023), 88 FR 28645 (May 4, 2023) [SR-FINRA-2023-008].

¹¹ 15 U.S.C. 78s(b)(3)(A)(iii).

¹² 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹³ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

Shares. For initial listing on the Nasdaq Global Market, a company must have a minimum MVUPHS of \$8 million under the Income Standard, \$18 million under the Equity Standard, and \$20 million under either the Market Value or Total Assets/Total Revenue Standards.³ For initial listing on the Nasdaq Capital Market, a company must have a minimum MVUPHS of \$5 million under the Net Income Standard, and \$15 million under either the Equity or Market Value of Listed Securities Standards.⁴

Unrestricted Publicly Held Shares are shares that are not held by an officer, director or 10% shareholder of the company and which are not subject to resale restrictions of any kind.⁵ In the case of a company listing in conjunction with a public offering, previously issued shares registered for resale ("Resale Shares"), and not held by an officer, director or 10% shareholder of the company, are counted as Unrestricted Publicly Held Shares in addition to the shares being sold in the offering.

The MVUHPS standard is one of the core liquidity requirements within the Nasdaq listing rules. Like the other liquidity requirements, it is meant to ensure that there is sufficient liquidity to provide price discovery and support an efficient and orderly market for the company's securities. Nonetheless, Nasdaq has observed that the securities companies that meet the applicable MVUPHS requirement by including Resale Shares have experienced higher volatility on the date of listing than those of similarly situated companies that meet the requirement with only the proceeds from the offering. Nasdaq believes that the Resale Shares may not contribute to liquidity to the same degree as the shares sold in the public offering. As such, Nasdaq believes it is appropriate to modify the rules to exclude the Resale Shares from the calculation of MVUPHS for initial listing of companies listing in conjunction with a public offering.

Accordingly, Nasdaq proposes to modify Listing Rules 5405(b) and 5505(b) to provide that a company listing in connection with an initial public offering, including through the issuance of American Depositary Receipts, must satisfy the applicable MVUPHS requirement for each initial listing standard for primary equity

securities⁶ with the proceeds of that offering.

Related to this change, Nasdaq believes it also is appropriate to apply a similar requirement to companies trading in the OTC market that qualify for listing based on an offering. Specifically, a company trading in the OTC market prior to listing must currently satisfy either a minimum daily trading volume on the OTC market of 2,000 shares over the past 30 trading days with trading occurring in at least 50% of those days (the "ADV Requirement") or, alternatively, list in connection with a firm commitment underwritten public offering of at least \$4 million.⁷ This alternative recognizes that where a company is listing in connection with a significant firm commitment underwritten public offering the liquidity characteristics of the prior trading will change and reflect the offering, just like in an IPO, and shares in the offering will be the primary source of liquidity upon listing.

Given Nasdaq's observations about the liquidity characteristics of IPOs with Resale Shares, Nasdaq believes it is appropriate to treat OTC companies relying on an offering in a similar manner, given that the liquidity in such listings is also expected to be supported by the offering. Accordingly, Nasdaq proposes to modify the alternative to the ADV requirement in Listing Rules 5405(a)(4) and 5505(a)(5). As revised, a company relying on the alternative will be required to satisfy the applicable MVUPHS requirements with only the proceeds from the offering. As a result, Nasdaq also proposes to modify Listing Rules 5405(a)(4) and 5505(a)(5) to increase the size of the required public offering for this alternative to the ADV Requirement from \$4 million to \$5 million for Capital Market applicants and \$8 million for Global Market applicants to align with the minimum MVUHPS requirement for each market.⁸ If the company qualifies under a different standard, instead of the income standard, the minimum raise instead would have to satisfy the MVUPHS requirement of the applicable standard.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁹ in general, and furthers the objectives of Section 6(b)(5) of the Act,¹⁰

in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. Specifically, Nasdaq believes that the proposal to modify Listing Rules 5405(b) and 5505(b) to require that a company listing on the Nasdaq Global Market or Capital Market in connection with an IPO satisfy the applicable minimum MVUPHS requirement solely from the proceeds of the offering is designed to protect investors and the public interest and to remove impediments to and perfect the mechanism of a free and open market and a national market system because Nasdaq believes that the change will likely result in less volatile trading of affected companies upon listing. As described above, the MVUHPS standard is one of the core liquidity requirements within the Nasdaq listing rules designed to ensure that there is sufficient liquidity to provide price discovery and support an efficient and orderly market for the company's securities. Based on Nasdaq's experience, companies that meet the applicable MVUPHS requirement by including Resale Shares are more likely to be subject to volatile trading on the date of listing than similarly situated companies that meet the requirement with only the proceeds from the offering. Nasdaq believes that this proposed change will help ensure that the initial pool of liquidity available for trading meets or exceeds the minimum applicable MVUHPS requirement.

Nasdaq also believes that the proposal to modify Listing Rules 5405(a)(4) and 5505(a)(5) to require that a company that is trading on the OTC market at the time of its application and that is listing in conjunction with a firm commitment public offering in lieu of meeting the ADV Requirement must satisfy the applicable MVUPHS requirements with only the proceeds from the offering is designed to protect investors and the public interest and to remove impediments to and perfect the mechanism of a free and open market and a national market system because, Nasdaq believes it is appropriate to align the minimum offering size for this alternative to the ADV Requirement with the minimum MVUHPS requirement for each market¹¹ by modifying Listing Rules 5405(a)(4) and 5505(a)(5) to set the minimum offering under this alternative to \$5 million on

⁶ See footnotes 3 and 4, above.

⁷ See Listing Rules 5405(a) and 5505(a). This requirement is the same under the listing rules of both the Nasdaq Global Market and Nasdaq Capital Market.

⁸ See footnotes 3 and 4, above.

⁹ 15 U.S.C. 78f(b).

¹⁰ 15 U.S.C. 78f(b)(5).

¹¹ See text accompanying footnotes 3 and 4, above.

³ See Listing Rules 5405(b)(1)(C), 5405(b)(2)(C), 5405(b)(3)(B), and 5405(b)(4)(B).

⁴ See Listing Rules 5505(b)(1)(B), 5505(b)(2)(C), and 5505(b)(3)(C).

⁵ See Listing Rule 5005(a)(46).

the Capital Market and to \$8 million on the Global Market because, in the case where a company does not meet the ADV Requirement, the offering serves as the primary source of price discovery in the same way the offering does in an IPO, as described above. Moreover, failure to align these requirements could allow a company to begin trading on the OTC market and then uplist to Nasdaq a short time later with an offering that does not satisfy the proposed new requirements for companies listed in connection with an IPO, as described above.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. While Nasdaq does not believe there will be any impact on inter-market competition from the proposed change, any impact on competition that does arise will be necessary to better protect investors, in furtherance of a central purpose of the Act. Moreover, each national securities exchange can elect how to structure its listing requirements and respond in a competitive manner. In that regard, Nasdaq notes, for example, that in 2019 Nasdaq first enhanced its initial listing requirements to exclude holders of restricted stock from the calculation of the market value of publicly held shares and to impose a requirement that a minimum number of shareholders hold at least \$2,500 worth of unrestricted stock, however New York Stock Exchange and NYSE American have not adopted comparable requirements and compete for listings on such basis.¹²

Nasdaq also believes that any impact on intra-market competition from the proposed change affecting companies listing on the Nasdaq Global and Capital Markets in connection with an IPO or uplisting from the OTC market, as described above, will be necessary to better protect investors, in furtherance of a central purpose of the Act. In that regard, companies listing on Nasdaq through other means, such as those listing on the Nasdaq Global Select Market or listing through a Direct Listing, are already subject to higher initial listing standards than companies impacted by this proposed change and Nasdaq has not observed similar concerns with the trading of these companies' securities.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) by order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<https://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include file number SR-NASDAQ-2024-084 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to file number SR-NASDAQ-2024-084. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<https://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be

available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR-NASDAQ-2024-084 and should be submitted on or before January 21, 2025.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹³

Vanessa A. Countryman,

Secretary.

BILLING CODE 8011-01-P

SMALL BUSINESS ADMINISTRATION

Interest Rates

The Small Business Administration publishes an interest rate called the Optional Peg Rate (13 CFR 120.214) on a quarterly basis. This rate is a weighted average cost of money to the government for maturities similar to the average SBA direct loan. This rate may be used as a base rate for guaranteed fluctuating interest rate SBA loans. This rate will be 4.38 percent for the January-March quarter of FY 2025.

Pursuant to 13 CFR 120.921(b), the maximum legal interest rate for any Third Party Lender's commercial loan which funds any portion of the cost of a 504 project (see 13 CFR 120.801) shall be 6% over the New York Prime rate or, if that exceeds the maximum interest rate permitted by the constitution or laws of a given State, the maximum interest rate will be the rate permitted by the constitution or laws of the given State.

David Parrish,

Chief, Secondary Market Division.

SOCIAL SECURITY ADMINISTRATION**[Docket No. SSA–2024–0043]****Privacy Act of 1974; Matching Program****AGENCY:** Social Security Administration (SSA).**ACTION:** Notice of a new matching program.

SUMMARY: In accordance with the provisions of the Privacy Act, as amended, this notice announces a new matching program with the United States Department of Health and Human Service, the Office of Child Support Services (OCSS). Under this matching program, OCSS will provide SSA with online query access to the National Directory of New Hires (NDNH) for administration of the Supplemental Security Income (SSI), Disability Insurance (DI), and Ticket-to-Work and Self-Sufficiency (Ticket) programs, and will provide SSA with quarterly wage and unemployment insurance data from NDNH through a batch match for administration of the SSI program.

DATES: The deadline to submit comments on the proposed matching program is January 29, 2025.

The matching program will be applicable on January 29, 2025, or once a minimum of 30 days after publication of this notice has elapsed, whichever is later. The matching program will be in effect for a period of 18 months.

ADDRESSES: You may submit comments by any one of three methods—internet, fax, or mail. Do not submit the same comments multiple times or by more than one method. Regardless of which method you choose, please state that your comments refer to Docket No. SSA–2024–0043 so that we may associate your comments with the correct regulation.

Caution: You should be careful to include in your comments only information that you wish to make publicly available. We strongly urge you not to include in your comments any personal information, such as Social Security numbers or medical information.

1. *Internet:* We strongly recommend that you submit your comments via the internet. Please visit the Federal eRulemaking portal at <https://www.regulations.gov>. Use the Search function to find docket number SSA–2024–0043 and then submit your comments. The system will issue you a tracking number to confirm your submission. You will not be able to view your comment immediately because we must post each submission manually. It may take up to a week for your comments to be viewable.

2. *Fax:* Fax comments to (833) 410–1613.

3. *Mail:* Matthew Ramsey, Executive Director, Office of Privacy and Disclosure, Office of the General Counsel, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235–6401, or emailing Matthew.Ramsey@ssa.gov. Comments are also available for public viewing on the Federal eRulemaking portal at <https://www.regulations.gov> or in person, during regular business hours, by arranging with the contact person identified below.

FOR FURTHER INFORMATION CONTACT:

Interested parties may submit general questions about the matching program to Cynthia Scott, Division Director, Office of Privacy and Disclosure, Office of the General Counsel, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235–6401, at telephone: (410) 966–1943, or send an email to Cynthia.Scott@ssa.gov.

SUPPLEMENTARY INFORMATION: None.

Matthew Ramsey,

Executive Director, Office of Privacy and Disclosure, Office of the General Counsel.

PARTICIPATING AGENCIES:

SSA and OCSS.

AUTHORITY FOR CONDUCTING THE MATCHING PROGRAM:

The legal authorities for disclosures under this agreement are the Act and the Privacy Act of 1974, as amended. Section 453(j)(4) of the Social Security Act (Act) provides that OCSS shall provide the Commissioner of Social Security with all information in the NDNH. 42 U.S.C. 653(j)(4). SSA has authority to use data to determine entitlement and eligibility for, and to conduct, programs it administers pursuant to 1631(e)(1)(B) and (f) (SSI), 224(h) (DI), 1148 (Ticket) of the Act. 42 U.S.C. 1383(e)(1)(B) and (f), 42 U.S.C. 424a(h), and 42 U.S.C. 1320b–19, and 222(d) (Rehabilitation Services), 42 U.S.C. 422(d), and 1615(d) and (e), 42 U.S.C. 1382d(d) and (e). Disclosures under this agreement shall be made in accordance with 5 U.S.C. 552a(b)(3), and in compliance with the matching procedures in 5 U.S.C 552a(o), (p), and (r).

With respect to the SSI program, subsection 1631(f) of the Act (42 U.S.C. 1383(f)) provides that “the head of any federal agency shall provide such information as the Commissioner of Social Security needs for purposes of determining eligibility for or amount of benefits, or verifying information with respect thereto.”

With respect to the DI program, subsection 224(h) of the Act (42 U.S.C.

424a(h)) provides that “the head of any Federal agency shall provide such information within its possession as the Commissioner of Social Security may require for purposes of making a timely determination of the amount of the reduction, if any, required by this section in benefits payable under this subchapter, or verifying other information necessary in carrying out the provisions of this section.”

With respect to the Ticket program, subsections 1148(b)(4)(d), and (h) of the Act (42 U.S.C. 1320b–19(b)(4), (d), and (h)) require SSA to verify earnings of beneficiaries and recipients to make payments to employment network providers under the Ticket program. With respect to cost-reimbursement payments to State Vocational Rehabilitation (VR) Agencies for services to beneficiaries outside of the Ticket program, subsections 222(d) and 1615(d) and (e) of the Act (42 U.S.C. 422(d), 1382d(d) and (e)) requires SSA to verify earnings of beneficiaries and recipients to ensure accurate payments.

PURPOSE(S):

This agreement governs a matching program between OCSS and SSA. The agreement covers the following information exchange operations wherein OCSS will provide SSA with online query access to the NDNH for administration of SSI, DI, and Ticket programs, and will provide SSA with quarterly wage and unemployment insurance data from NDNH through a batch match for administration of the SSI program.

The Commissioner of Social Security is required to verify eligibility of a recipient or applicant for SSI using independent or collateral sources. SSI benefits may not be determined solely based on declarations by the applicant concerning eligibility factors or other relevant facts. Information is also obtained, as necessary, in order to assure that SSI benefits are only provided to eligible individuals (or eligible spouses) and that the amounts of such benefits are correct. Section 1631(e)(1)(B) of the Act (42 U.S.C. 1383(e)(1)(B)). The Commissioner of Social Security may review DI benefits to determine if a reduction in benefits is required based on wages or self-employment. Section 224(h) of the Act (42 U.S.C. 424a(h)).

The Commissioner also evaluates the work activity (employment and earnings levels) of DI and SSI beneficiaries as a basis to make payments to Employment Networks and State VR Agencies under the Ticket program Public Law (Pub. L.) 106–170 and to State VR Agencies pursuant to the State VR reimbursement

program, subsections 222(d) and 1615(d) and (e) of the Act (42 U.S.C. 422(d), 1382d(d) and (e).

This agreement assists SSA in:

(1) establishing or verifying eligibility or payment amounts, or both under the SSI program;

(2) establishing or verifying eligibility or continuing entitlement under the DI program; and

(3) administering the Ticket program.

These activities include overpayment avoidance and recovery for all three programs. SSA evaluates the cost-benefits, including programmatic and operational impact, which NDNH information has on SSA programs and operations. OCSS and SSA have been parties to matching agreements and recertification for these purposes since 2001.

SSA will use the NDNH comparison information stored in SSA electronic folders, paper folders, and obtained through online query of the NDNH to administer the SSI, DI, and Ticket programs efficiently, as set forth in this agreement. SSA will make the online request through its authorized query applications. This query will submit the request through OCSS' web service. SSA's use of authorized query applications to access the OCSS web service is understood by OCSS and SSA to apply throughout the agreement. This agreement also governs the use, treatment, and safeguarding of the information exchanged.

CATEGORIES OF INDIVIDUALS:

The individuals whose information is involved in this matching program are individuals who are applicants or recipients of Title II, Title XVI, Ticket-to-Work and Self-Sufficiency programs.

CATEGORIES OF RECORDS:

SSA will provide electronically to OCSS the following data elements in the finder file:

- Individual's Social Security number (SSN); and

- Name (first, middle, last)

For the Quarterly Batch Match (SSI), OCSS will provide electronically to SSA the following data elements from the NDNH in the quarterly wage file:

- Quarterly wage record identifier
- For employees:

- (1) Name (first, middle, last)

- (2) SSN

- (3) Verification request code

- (4) Processed date

- (5) Non-verifiable indicator

- (6) Wage amount

- (7) Reporting period

- For employers of individuals in the quarterly wage file of the NDNH:

- (1) Name

- (2) Employer identification number

- (3) Address(es)

- Transmitter agency code

- Transmitter state code

- State or agency name

OCSS will provide electronically to SSA the following data elements from the NDNH in the unemployment insurance file:

- Unemployment insurance record identifier

- Processed date

- SSN

- Verification request code

- Name (first, middle, last)

- Address

- Unemployment insurance benefit amount

- Reporting period

- Transmitter agency code

- Transmitter state code

- State or agency name

Online Query Access (SSI, DI, and Ticket programs). Data elements on quarterly wage screen:

- Quarterly wage record identifier

- Date report processed

- Name/SSN verified

- For Employees:

- (1) SSN

- (2) Name (first, middle, last)

- (3) Date of hire

- For Employers:

- (1) Name

- (2) Employer identification number

- (3) Employer Federal Information Processing System (FIPS) code (if present)

- (4) Address(es)

Data elements on the new hire screen:

- New hire record identifier

- Name/SSN verified

- Date report processed

- For Employees

- (1) Name

- (2) Employer identification number

- (3) Employer FIPS code (if present)

- (4) Address(es)

Data elements on the unemployment insurance screen:

- Unemployment insurance record identifier

- Name/SSN verified

- SSN

- Name (first, middle, last)

- Address

- Unemployment insurance benefit amount

- Reporting period

- Payer state

- Date report processed

SYSTEM(S) OF RECORDS:

BILLING CODE 4710-05-P

DEPARTMENT OF STATE

[Public Notice: 12619]

Notice of Public Meeting in Preparation for International Maritime Organization PPR 12 Meeting

ACTION: Notice of public meeting.

The Department of State will conduct a public meeting at 12:00 p.m. EST on Tuesday, January 21, 2025, virtually via Microsoft Teams. The primary purpose of the meeting is to prepare for the 12th session of the International Maritime Organization’s (IMO) Pollution Prevention and Response Sub-Committee (PPR 12) to be held in London, United Kingdom from January 27th to 31st, 2025.

Members of the public may participate in the public meeting up to the capacity of the Microsoft Teams line. The Microsoft Teams information is Conference Call-in number +1 410-874-6742; Phone Conference ID 751 408 844#. To RSVP, participants should contact the meeting coordinator, Ms. Nicole M. Schindler, by email at Nicole.M.Schindler@uscg.mil no later than Monday, January 20, 2025.

The agenda items to be considered at this meeting mirror those to be considered at PPR 12, and include:

- Adoption of the agenda;
- Decisions of other IMO bodies;
- Safety and pollution hazards of chemicals and preparation of consequential amendments to the IBC Code (7.3);
- Amendments to MARPOL Annex II in order to improve the effectiveness of cargo tank stripping, tank washing operations and prewash procedures

for products with a high melting point and/or high viscosity 7.38);

- Development of guidance on matters relating to in-water cleaning (1.21);
- Reduction of the impact on the Arctic of Black Carbon emissions from international shipping (3.3);
- Evaluation and harmonization of rules and guidance on the discharge of discharge water from EGCS into the aquatic environment, including conditions and areas (1.23);
- Amendments to the 2017 Guidelines addressing additional aspects of the NOx Technical Code 2008 with regard to particular requirements related to marine diesel engines with Selective Catalytic Reduction (SCR) systems (resolution MEPC.291(71), as amended by resolution MEPC.313(74)) (7.46);
- Review of the IBTS Guidelines and amendments to the IOPP Certificate and Oil Record Book (2.13);
- Revision of MARPOL Annex IV and associated guidelines (1.26);
- Follow-up work emanating from the Action Plan to address marine plastic litter from ships (4.3);
- Unified interpretation of provisions of IMO environment-related conventions (7.1);
- Biennial agenda and provisional agenda for PPR 13;
- Election of Chair and Vice-Chair for 2026;
- Any other business; and
- Report to the Marine Environment Protection Committee.

Please note: The IMO may, on short notice, adjust the PPR 12 agenda to accommodate the constraints associated with the meeting format. Any changes to the agenda will be reported to those who RSVP.

Those who plan to participate should contact the meeting coordinator, Ms. Nicole M. Schindler, by email at Nicole.M.Schindler@uscg.mil no later than Monday, January 20, 2025, by phone at (206) 820-5710 no later than Monday, January 20, 2025, or in writing at United States Coast Guard (CG-OES), ATTN: Ms. Nicole M. Schindler, 2703 Martin Luther King Jr. Ave. SE, Stop 7509, Washington, DC 20593-7509 no later than Thursday, January 16, 2025. Any requests for reasonable accommodation should be provided to Ms. Schindler no later than January 14, 2025. Additional information regarding this and other IMO public meetings may be found at: <https://www.dco.uscg.mil/IMO>.

(Authority: 22 U.S.C. 2656 and 5 U.S.C. 552)

Leslie W. Hunt,

Coast Guard Liaison Officer, Office of Ocean and Polar Affairs, Department of State.

BILLING CODE 4710-09-P

DEPARTMENT OF STATE

[Public Notice: 12622]

Cultural Property Advisory Committee Meeting

ACTION: Notice of meeting.

SUMMARY: The Department of State announces the location, dates, times, and agenda for the next meeting of the Cultural Property Advisory Committee (“the Committee”).

DATES: The Committee will meet from February 4–6, 2025, from 9 a.m. to 5 p.m. (EST). The public may participate in, or observe, the virtual open session on February 4, 2025, from 1 p.m. to 2 p.m. (EST).

ADDRESSES: The Committee will meet at 2200 C Street NW, Washington, DC 20520. The public will participate via videoconference.

FOR FURTHER INFORMATION CONTACT:

Allison Davis Lehmann, Cultural Heritage Center, Bureau of Educational and Cultural Affairs: (202) 904-0878; (culprop@state.gov).

SUPPLEMENTARY INFORMATION: The Principal Deputy Assistant Secretary for the Bureau of Educational and Cultural Affairs calls a meeting of the Cultural Property Advisory Committee (“the Committee”) in accordance with the Convention on Cultural Property Implementation Act (19 U.S.C. 2601–2613) (“the Act”). A portion of this meeting will be closed to the public pursuant to 5 U.S.C. 552b(c)(9)(B) and 19 U.S.C. 2605(h).

Meeting Agenda: The Committee will review a request from the Government of the Socialist Republic of Vietnam seeking import restrictions on archaeological and ethnological materials, the proposed extension of the agreement with the Government of the Republic of Chile, the proposed extension of the agreement with the Government of the Italian Republic, and the proposed extension of the agreement with the Government of the Kingdom of Morocco.

The Open Session: The public can observe the virtual open session on February 4, 2025. Registered participants may provide oral comments for up to a maximum of five (5) minutes each. The Department provides specific

instructions on how to observe or provide oral comments at the open session at <https://eca.state.gov/highlight/cultural-property-advisory-committee-meeting-february-4-6-2025>.

Register to speak at the open session by sending an email with your name and organizational affiliation, as well as any requests for reasonable accommodation, by January 27, 2025. Those who submit written comments in advance of the meeting are not required to make an oral comment during the open session.

The Committee will review written comments if received by 11:59 p.m. (EST) on January 27, 2025. Written comments may be submitted in two ways, depending on whether they contain confidential information:

General Comments: For general comments, use <https://www.regulations.gov>, enter the docket DOS-2024-0048 and follow the prompts.

Confidential Comments: For comments that contain privileged or confidential information (within the meaning of 19 U.S.C. 2605(i)(1)), please email submissions to culprop@state.gov. Include “Vietnam,” “Chile,” “Italy,” and/or “Morocco” in the subject line.

Disclaimer: The Cultural Heritage Center website contains additional information about each agenda item, including categories of archaeological and ethnological material that may be included in import restrictions: <https://eca.state.gov/highlight/cultural-property-advisory-committee-meeting-february-4-6-2025>. Comments should relate specifically to the determinations specified in the Act at 19 U.S.C. 2602(a)(1). Written comments submitted via [regulations.gov](https://www.regulations.gov) are not private and are posted at <https://www.regulations.gov>. Because written comments cannot be edited to remove any personally identifying or contact information, we caution against including any such information in an electronic submission without appropriate permission to disclose that information (including trade secrets and commercial or financial information that is privileged or confidential within the meaning of 19 U.S.C. 2605(i)(1)). We request that any party soliciting or aggregating written comments from other persons inform those persons that the Department will not edit their comments to remove any identifying or contact information and that they therefore should not include any such

information in their comments that they do not want publicly disclosed.

Allison R. Davis Lehmann,
Executive Director, Cultural Property Advisory Committee, Department of State.

BILLING CODE 4710-05-P

DEPARTMENT OF STATE

[Public Notice: 12620]

Notice of Determinations; Culturally Significant Objects Being Imported for Exhibition—Determinations: “Recasting the Past: The Art of Chinese Bronzes, 1100–1900” Exhibition

SUMMARY: Notice is hereby given of the following determinations: I hereby determine that certain objects being imported from abroad pursuant to agreements with their foreign owners or custodians for temporary display in the exhibition “Recasting the Past: The Art of Chinese Bronzes, 1100–1900” at The Metropolitan Museum of Art, New York, New York, and at possible additional exhibitions or venues yet to be determined, are of cultural significance, and, further, that their temporary exhibition or display within the United States as aforementioned is in the national interest. I have ordered that Public Notice of these determinations be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Reed Liriano, Program Coordinator, Office of the Legal Adviser, U.S. Department of State (telephone: 202-632-6471; email: section2459@state.gov). The mailing address is U.S. Department of State, L/PD, 2200 C Street NW (SA-5), Suite 5H03, Washington, DC 20522-0505.

SUPPLEMENTARY INFORMATION: The foregoing determinations were made pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.*; 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, Delegation of Authority No. 236-3 of August 28, 2000, and Delegation of Authority No. 523 of December 22, 2021.

Nicole L. Elkon,
Deputy Assistant Secretary for Professional and Cultural Exchanges, Bureau of Educational and Cultural Affairs, Department of State.

DEPARTMENT OF STATE

[Public Notice: 12621]

Notice of Receipt of Request From the Government of the Socialist Republic of Vietnam

ACTION: Notice.

SUMMARY: Notice of receipt of request from Vietnam for cultural property protection.

FOR FURTHER INFORMATION CONTACT: Anne Compton, Cultural Heritage Center, Bureau of Educational and Cultural Affairs: (202) 904-0878; culprop@state.gov; include “Vietnam” in the subject line.

SUPPLEMENTARY INFORMATION: The Government of the Socialist Republic of Vietnam made a request to the Government of the United States on November 13, 2024, under Article 9 of the 1970 UNESCO Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property. Vietnam’s request seeks U.S. import restrictions on archaeological and ethnological materials representing Vietnam’s cultural patrimony. The Cultural Heritage Center website will provide instructions for public comment and additional information on the request, including categories of material that may be included in import restrictions: <https://eca.state.gov/highlight/cultural-property-advisory-committee-meeting-february-4-6-2025>. This notice is published pursuant to authority vested in the Principal Deputy Assistant Secretary of State for Educational and Cultural Affairs and pursuant to 19 U.S.C. 2602(f)(1).

Allison R. Davis Lehmann,
Executive Director, Cultural Property Advisory Committee, Department of State.

BILLING CODE 4710-05-P

DEPARTMENT OF STATE

[Public Notice: 12610]

Review of the Foreign Terrorist Organization Designations of al-Qa'ida in the Indian Subcontinent, Boko Haram, Hizballah, ISIS-West Africa, and Jemaah Islamiyah

Based upon a review of the Administrative Records assembled pursuant to section 219(a)(4)(C) of the Immigration and Nationality Act, as amended (8 U.S.C. 1189(a)(4)(C)) ("INA"), and in consultation with the Attorney General and the Secretary of the Treasury, the Secretary of State concluded that the circumstances that were the basis for the designations of al-Qa'ida in the Indian Subcontinent (and other aliases); Boko Haram (and other aliases); Hizballah (and other aliases); ISIS-West Africa (and other aliases); and Jemaah Islamiyah (and other aliases) as Foreign Terrorist Organizations have not changed in such a manner as to warrant revocation of the designations and that the national security of the United States does not warrant a revocation of the designations.

Therefore, the Secretary of State has determined that the designations of the aforementioned organizations, pursuant to Section 219 of the INA (8 U.S.C. 1189), shall be maintained.

This determination shall be published in the **Federal Register**.

Hillary Batjer Johnson,

Deputy Coordinator, Bureau of Counterterrorism, Department of State.

DEPARTMENT OF STATE

[Public Notice: 12616]

U.S. Advisory Commission on Public Diplomacy

ACTION: Notice of meeting.

SUMMARY: The U.S. Advisory Commission on Public Diplomacy (ACPD) will hold an in-person public meeting with online access. A panel of experts will discuss the People's

Republic of China's approach to public diplomacy and utilizing the information space to advance PRC objectives.

DATES: Thursday, January 16, 2025, from 11:00am until 12:30pm.

ADDRESSES: The meeting will be held at the U.S. Capitol Visitor Center, First St SE, Washington, DC 20515, Room SVC-203.

SUPPLEMENTARY INFORMATION: This meeting is open to the public, including the media and members and staff of governmental and non-governmental organizations. To attend the event, please register at: https://iipstate.my.site.com/CRMEventRegistration/s/registration-page?event=VR10qHSXpuwn44sd2aGpqbWFigDBWJtQeXEveDMms_. Doors will open at 10:30 a.m. Please allow time to pass through security and check in at the appointment desk with photo identification. To request reasonable accommodation, please contact Kristy Zamary via email ZamaryKK@state.gov or phone 202-472-8198 by Thursday, December 27, 2024.

Since 1948, the ACPD has been charged with appraising activities intended to understand, inform, and influence foreign publics and to increase the understanding of, and support for, these same activities. The ACPD conducts research and public and private symposia that provides honest assessments of public diplomacy efforts, and disseminates findings through reports, white papers, and other publications. The Commission reports to the President, Secretary of State, and Congress and is supported by the Office of the Under Secretary of State for Public Diplomacy and Public Affairs.

For more information please visit <https://www.state.gov/bureaus-offices/under-secretary-for-public-diplomacy-and-public-affairs/united-states-advisory-commission-on-public-diplomacy/>, or contact Executive Director Sarah Arkin at ArkinSE@state.gov or Senior Advisor Dan Langenkamp at LangenkampDB@state.gov, both reachable at 202-472-8198.

(Authority: 22 U.S.C. 2651a, 22 U.S.C. 1469, 5 U.S.C. 1001 *et seq.*, and 41 CFR 102-3.150.)

Kristina K. Zamary,

Program Assistant, U.S. Advisory Commission on Public Diplomacy, Department of State.

BILLING CODE 4710-45-P

**OFFICE OF THE UNITED STATES
TRADE REPRESENTATIVE**

[Docket Nos. USTR–2024–0024 and USTR–
2024–0025]

**Initiation of Section 301 Investigation;
Hearing; and Request for Public
Comments: China's Acts, Policies, and
Practices Related to Targeting of the
Semiconductor Industry for
Dominance**

AGENCY: Office of the United States
Trade Representative (USTR).

ACTION: Notice of initiation of
investigation and a hearing, and a
request for comments.

SUMMARY: The U.S. Trade
Representative has initiated an
investigation, of China's acts, policies,
and practices related to targeting of the
semiconductor industry for dominance.
The inter-agency Section 301 Committee
is holding a public hearing and seeking
public comments in connection with
this investigation.

DATES:

December 23, 2024: The U.S. Trade
Representative initiated the
investigation.

January 6, 2025: USTR will open
dockets for submission of written
comments and requests to appear at the
hearing.

February 5, 2025, at 11:59 p.m. EST:
To be assured of consideration, submit
written comments by this date.

February 24, 2025, at 11:59 p.m. EST:
To be assured of consideration, submit
requests to appear at the hearing, along
with a summary of the testimony, by
this date.

March 11–12, 2025: Public hearing.
*Seven calendar days after the last day
of the public hearing:* Due date for
submission of post-hearing rebuttal
comments.

ADDRESSES: Submit documents in
response to this notice, including
written comments, hearing appearance
requests, summaries of testimony, and
post-hearing rebuttal comments through
the online USTR portal: [https://
comments.ustr.gov/s/](https://comments.ustr.gov/s/).

FOR FURTHER INFORMATION CONTACT: For
procedural questions concerning
comments or participating in the public
hearing, contact the USTR Section
support line at 202.395.5725. Direct all
other questions regarding this notice to
Philip Butler and Megan Grimbail,
Chairs of the Section 301 Committee;
Brian Janovitz, Chief Counsel for Trade
Enforcement Strategy and
Competitiveness; or Erin Biel, Assistant
General Counsel at 202.395.5725.

SUPPLEMENTARY INFORMATION:**I. China's Acts, Policies, and Practices**

Evidence indicates that the People's
Republic of China (the PRC or China)
has adopted acts, policies, and practices
related to targeting of the semiconductor
industry for dominance. China
apparently seeks to dominate domestic
and global markets in the
semiconductor industry and undertakes
extensive anticompetitive and non-
market means, including setting and
pursuing market share targets, to
achieve indigenization and self-
sufficiency. The PRC's acts, policies,
and practices also appear to have and to
threaten detrimental impacts on the
United States and other economies,
undermining the competitiveness of
American industry and workers, critical
U.S. supply chains, and U.S. economic
security.

Evidence indicates that the PRC's
acts, policies, and practices have been
reflected in various economic and
industrial plans issued by the PRC. For
example, Made in China 2025 set
numerical targets for the PRC's domestic
semiconductor capacity and production
that reflect China's targeting of the
semiconductors sector for dominance.
Evidence further indicates that the PRC
pursues its targeting of the
semiconductor industry through an
extensive range of anticompetitive and
non-market means, including through
Chinese Communist Party guidance,
directives, and control within state and
private enterprises; activities of state-
owned or state-controlled enterprises;
market access restrictions; opaque
regulatory preferences and
discrimination; wage-suppressing labor
practices; massive and persistent state
financial support of industry, including
government guidance funds; and forced
technology transfer, including state-
directed cyber intrusions and cybertheft
of intellectual property.

Evidence indicates that the PRC's
targeting of the semiconductor industry
for dominance is leading to significant
capacity expansion, artificially and
unsustainably lower domestic and
global prices, a protected domestic
market, and emerging overconcentration
of production capacity in the PRC.
Evidence indicates that in just six years,
China has nearly doubled its global
share of foundational logic
semiconductors production capacity.
Based on announced new fabrication
plants (fabs), China's share is projected
to reach approximately half of the
world's capacity by 2029. In addition,
projections show that China will lead in
production capacity for other types of
legacy semiconductors, such as power
chips. Evidence further suggests that the

PRC's non-market-oriented expansion of
capacity is already discouraging
investment by market-oriented actors.

**II. Initiation of Section 301
Investigation**

Section 302(b)(1)(A) of the Trade Act
of 1974, as amended (Trade Act),
authorizes the U.S. Trade
Representative to initiate an
investigation to determine whether an
act, policy, or practice of a foreign
country is actionable under section 301
of the Trade Act. Actionable matters
under section 301 include acts, policies,
and practices of a foreign country that
are unreasonable or discriminatory and
burden or restrict U.S. commerce. An
act, policy, or practice is unreasonable
if, while not necessarily in violation of,
or inconsistent with, the international
legal rights of the United States, it is
otherwise unfair and inequitable.

On December 23, 2024, the U.S. Trade
Representative initiated a section 301
investigation of China's acts, policies,
and practices related to targeting of the
semiconductor industry for dominance.
Pursuant to section 302(b)(1)(B) of the
Trade Act, USTR has consulted with
appropriate advisory committees and
the inter-agency Section 301 Committee.
Pursuant to section 303(a) of the Trade
Act, USTR is requesting consultations
with the Government of China.

Pursuant to section 304 of the Trade
Act, USTR must determine whether the
act, policy, or practice under
investigation is actionable under section
301. If that determination is affirmative,
the U.S. Trade Representative must
determine whether action is
appropriate, and if so, what action to
take.

This investigation initially will focus
on PRC manufacturing of foundational
semiconductors (also known as legacy
or mature node semiconductors),
including to the extent that they are
incorporated as components into
downstream products for critical
industries like defense, automotive,
medical devices, aerospace,
telecommunications, and power
generation and the electrical grid. The
investigation also will initially assess
whether the impact of the PRC's acts,
policies, and practices on the
production of silicon carbide substrates
(or other wafers used as inputs into
semiconductor fabrication) contribute to
any unreasonableness or discrimination
or burden or restriction on U.S.
commerce. In addition, the investigation
will examine the relationship between
the PRC's acts, policies, and practices
and existing or threatened non-market
excess capacity or overconcentration of
semiconductor production in the PRC,

and resulting dependencies and vulnerabilities that create risks for certain critical downstream industries, as well as harm to U.S. semiconductor producers and foundries.

III. Request for Public Comments

You may submit written comments on any issue covered by the investigation. In particular, USTR invites comments regarding:

- China's acts, policies, and practices related to its targeting of the semiconductor industry for dominance.

- Anticompetitive and non-market means employed by the PRC in pursuit of its semiconductor industry targeting objectives, including political guidance, directives, and control within state and private enterprises, activities of state-owned or state-controlled enterprises, market access restrictions, opaque regulatory preferences and discrimination, wage-suppressing labor practices, massive state support of industry (including government guidance funds), and forced technology transfer (including state-directed cyber intrusions and cybertheft of intellectual property).

- Whether China's acts, policies, and practices are unreasonable or discriminatory.

- Whether China's acts, policies, and practices burden or restrict U.S. commerce, and if so, the nature and level of the burden or restriction. This would include economic assessments of the burden or restriction on semiconductors, semiconductor manufacturing including foundries, silicon carbide substrates or other wafers, and downstream products, with a particular focus on critical industries, such as defense, automotive, medical devices, aerospace, telecommunications, and power generation and the electrical grid.

- Whether China's acts, policies, and practices are actionable under section 301(b) of the Trade Act, and what action, if any, should be taken, including tariff and non-tariff actions.

To be assured of consideration, USTR must receive written comments by 11:59 p.m. EST on February 5, 2025. Additional instructions on how to submit written comments are provided below in Part V.

IV. Hearing Participation

The Section 301 Committee will convene a public hearing on March 11, 2025, and if needed, the hearing will continue on March 12, 2025. To testify at the hearing, you must submit a request to appear using the electronic portal at <https://comments.ustr.gov/s/>, following the instructions in Part V

below. Requests to appear must include a summary of testimony, and may be accompanied by a prehearing submission. Remarks at the hearing are limited to five minutes to allow for possible questions from the Section 301 Committee. All submissions must be in English. To be assured of consideration, USTR must receive your request to appear and summary of the testimony by February 24, 2025.

Post-hearing rebuttal comments, which should be limited to rebutting or supplementing testimony presented at the hearing, may be submitted within seven calendar days after the last day of the public hearing. Rebuttal comments must be submitted using the electronic portal at <https://comments.ustr.gov/s/>, following the instructions in Part V below.

V. Submissions Instructions

Interested persons must submit written comments, requests to appear at the hearing, summaries of testimony, and post-hearing rebuttal comments using the appropriate docket on the portal at <https://comments.ustr.gov/s/>. To make a submission, use the docket on the portal entitled 'Request for Comments on the Section 301 Investigation of China's Acts, Policies, and Practices Related to Targeting of the Semiconductor Industry for Dominance,' docket number USTR–2024–0024. Interested persons wishing to provide testimony at the hearing must submit a notification of intent and summary of testimony using the docket entitled 'Request to Appear at the Hearing on the Section 301 Investigation of China's Acts, Policies, and Practices Related to Targeting of the Semiconductor Industry for Dominance,' docket number USTR–2024–0025.

You do not need to establish an account to submit comments or a notification of intent to testify. The first screen allows you to enter identification and contact information. Third party organizations such as law firms, trade associations, or customs brokers should identify the full legal name of the organization they represent and identify the primary point of contact for the submission. Information fields are optional. However, USTR may not consider your comment or request if insufficient information is provided. Fields with a gray Business Confidential Information (BCI) notation are for BCI information that will not be made publicly available. Fields with a green (Public) notation will be viewable by the public. After entering the identification and contact information, you can complete the remainder of the comment,

or any portion of it, by clicking 'Next.' You may upload documents at the end of the form and indicate whether USTR should treat the documents as business confidential or public information. Any page containing BCI must be clearly marked 'BUSINESS CONFIDENTIAL' on the top of that page and the submission should clearly indicate, via brackets, highlighting, or other means, the specific information that is BCI. If you request business confidential treatment, you must certify in writing that the information would not customarily be released to the public. Parties uploading attachments containing BCI also must submit a public version of their comments. If these procedures are not sufficient to protect BCI or otherwise protect business interests, please contact the USTR section 301 support line at 202.395.5725 to discuss whether alternative arrangements are possible. USTR will post attachments uploaded to the docket for public inspection, except for properly designated BCI. You can view submissions on USTR's electronic portal at <https://comments.ustr.gov/s/>.

Juan Millan,

Acting General Counsel, Office of the United States Trade Representative.

BILLING CODE 3390–F4–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No.: FAA–2024–2728; Summary Notice No. –2024–46]

Petition for Exemption; Summary of Petition Received; Hermeus Corp.

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of Federal Aviation Regulations. The purpose of this notice is to improve the public's awareness of, and participation in, the FAA's exemption process. Neither publication of this notice nor the inclusion nor omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number and must be received on or before January 21, 2025.

ADDRESSES: Send comments identified by docket number [FAA–2024–2728] using any of the following methods:

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov> and follow the online instructions for sending your comments electronically.

- **Mail:** Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

- **Hand Delivery or Courier:** Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- **Fax:** Fax comments to Docket Operations at (202) 493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to <http://www.regulations.gov>, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <http://www.dot.gov/privacy>.

Docket: Background documents or comments received may be read at <http://www.regulations.gov> at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jake Troutman, (202) 267–2928, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591.

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC.

Dan A. Ngo,

Manager, Part 11 Petitions Branch, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2024–2728.

Petitioner: Hermeus Corp.

Section(s) of 14 CFR Affected: 91.7(a); 91.151(a)(1); 91.403(b); 91.405(a); 91.407(a)(1); 91.409(a)(1) and (2); 91.417(a); 91.417(b).

Description of Relief Sought: Hermeus Corp. seeks relief to operate Hermeus Quarterhorse Mark 1 (QH Mk 1) unmanned aircraft system (UAS) to conduct developmental flight testing. The QH Mk 1 is a subsonic, fixed-wing, remotely-piloted aircraft with a

maximum takeoff weight (MTOW) of 9,500 pounds (lbs.) that will be used to demonstrate high-speed takeoff and landings. The QH Mk 1 is test vehicle that will inform the future development of a Hermeus hypersonic-capable aircraft. The flight testing will occur at Edwards Air Force Base (AFB), California in restricted airspace (R–2515) and over U.S. Department of Defense (DoD) controlled property.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2024–2754]

Agency Information Collection Activities: Requests for Comments; Clearance of a Renewed Approval of Information Collection: Aviation Insurance

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The collection involves obtaining information from air carriers to establish legally binding aviation war risk insurance policies with the FAA. The information to be collected is necessary to determine whether applicants are eligible for insurance and the amount of coverage necessary; populate insurance policies with business information; and meet conditions of coverage required by each insurance policy.

DATES: Written comments should be submitted by February 28, 2025.

ADDRESSES: Please send written comments:

By Electronic Docket:

www.regulations.gov (Enter docket number into search field).

By mail: Stacy Ditto, 4848 Lambs Knoll Road, Boonsboro, MD 21713.

By fax: 301–432–7901.

FOR FURTHER INFORMATION CONTACT:

Stacy Ditto by email at: stacy.m.ditto@faa.gov; phone: 301–432–3046.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's

performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–0514.

Title: Aviation Insurance.

Form Numbers: Not applicable.

Type of Review: Renewal of an information collection.

Background: The FAA Aviation Insurance Program derives its authority from Title 49, United States Code, chapter 443 to issue aviation war risk insurance to air carriers with and without premium. FAA coverage is issued in support of mission objectives and operations when insurance is not available commercially on reasonable terms and conditions. Air carriers never insured must submit an application before the FAA can provide coverage. Applicants provide business information, aircraft to be covered by the policy, and information about commercial insurance policies. As a condition of FAA coverage, air carriers must submit any changes to the initial application information as necessary. Air carriers must also provide a copy of their current commercial insurance policy on an ongoing basis, as well as information for any new aircraft the air carrier would like to add to the FAA policy. This information is provided electronically to the FAA through a web-based system. The information is used to form the insurance policy between the FAA and the air carrier.

Respondents: Air carriers applying for aviation insurance and updating required information.

Frequency: Initial one-time application and updates to application information 1–2 times per year.

Estimated Average Burden per

Response: Initial application—4 hours; commercial policy submission—10 minutes; business information update—5 minutes; and aircraft schedule update—2 minutes per aircraft.

Estimated Total Annual Burden: 10 minutes to 4 hours per respondent. Cumulative total 158 hours (maximum).

Issued in Boonsboro, MD, on December 20, 2024.

Stacy Ditto,

Program Manager, Aviation Insurance, Command and Control Communications (C3) Division (AXE–400), Office of National Security Programs and Incident Response, Federal Aviation Administration.

DEPARTMENT OF TRANSPORTATION**Federal Highway Administration****[Docket No. FHWA–2024–0086]****Agency Information Collection****Activities: Request for Comments for a New Information Collection****AGENCY:** Federal Highway Administration (FHWA), DOT.**ACTION:** Notice and request for comments.

SUMMARY: The FHWA has forwarded the information collection request described in this notice to the Office of Management and Budget (OMB) to approve a new information collection. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by January 29, 2025.

ADDRESSES: You may submit comments identified by DOT Docket ID Number 0086 by any of the following methods:

Website: For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to <http://www.regulations.gov>.

Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

Kasandre Reeves, (564) 544–0350, Office of Highway Policy Information, Highway Funding and Motor Fuels division (HPPI–10) Federal Highway Administration, Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: We published a **Federal Register** Notice with a 60-day public comment period on this information collection on September 20, 2024, at [89 FR 77222]. There were 3 comments received and FHWA's responses are below:

One comment received was a test. The second comment received was voicing support of this product by the Bureau of Economic Analysis. The third comment

was a duplicate comment submitted of this support by the Bureau of Economic Analysis.

Title: 500-Series Reporting Guidebook.

Background: A 500-Series Data Reporting Guidebook provides for the collection of information by describing policies and procedures for assembling highway related data from the existing files of State agencies. The data includes motor-vehicle registration and fees, motor-fuel use and taxation, driver licensing, and highway taxation and finance. Federal, State, and local governments use the data for transportation policy discussions and decisions. Motor-fuel data are used in attributing receipts to the Highway Trust Fund and subsequently in the apportionment formula that are used to distribute Federal-Aid Highway Funds. The data are published annually in the FHWA's Highway Statistics.

Information from Highway Statistics is used in the joint FHWA and Federal Transit Administration required biennial report to Congress, Status of the Nation's Highways, Bridges, and Transit: Conditions and Performance, which contrasts present status to future investment needs.

Respondents: State and local governments of the 50 States, the District of Columbia and the Commonwealth of Puerto Rico share this burden.

Frequency: Annually.

Estimated Average Burden per Response: The burden for each form varies from 4 hours to 380 hours. The estimated average reporting burden per response for the annual collection and processing of the data is 2,462 hours for each of the States (including local governments), the District of Columbia, the Commonwealth of Puerto Rico.

Estimated Total Annual Burden Hours: The estimated total annual burden for all respondents is 29,574 hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.48.

Issued on: December 23, 2024.

Jazmyne Lewis,

Information Collection Officer.

Office hours are from 7 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: We published a **Federal Register** Notice

with a 60-day public comment period on this information collection on October 21, 2024, at 89 FR 84240. There were no comments received.

Title: National Scenic Byway Program (NSBP).

Background: The Federal Highway Administration (FHWA) administers the NSBP. It was established by the Intermodal Surface Transportation Efficiency Act of 1991 in section 162 of title 23, United States Code (U.S.C.), and reauthorized and expanded significantly in 1998 under the Transportation Equity Act for the 21st Century and again under the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users in 2005. The NSBP is a grass-roots collaborative effort established to help recognize, preserve, and enhance selected roads throughout the United States. Before 2019, Congress last authorized discretionary NSBP funds in 2012 under the Surface Transportation Extension Act of 2012. Between 1992 and 2012, FHWA awarded over \$505 million in NSBP grants. In 2022, FHWA awarded approximately \$21.8 million in grants to 33 projects.

Respondents: The Notice of Funding Opportunity (NOFO), announcing up to \$26.95 million of Fiscal Year (FY) 2023 and 2024 funding for the National Scenic Byways Program (NSBP) discretionary grants is now available for State DOTs and federally recognized Indian Tribes on [grants.gov](https://www.grants.gov). FHWA is expecting roughly 200 applicants to apply for NSBP grant funding.

Frequency: NOFOs and grant solicitations will be published annually by FHWA but, are subject to the availability of funds in appropriations or, any legislation signed into law authorizing funds.

Estimated Average Burden per Response: 3 hours per respondent per applicant.

Estimated Total Annual Burden Hours: It is expected that the respondents will complete approximately 200 applications for an estimated total of 600 annual burden hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or

include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.48.

Issued on: December 23, 2024.

BILLING CODE 4910-22-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2024-0289]

Commercial Driver's License: State of Hawaii; Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA announces that the State of Hawaii has applied for an exemption from specified portions of the commercial driver's license (CDL) skills test and entry-level driver training (EDLT) curriculum requirements. The State of Hawaii currently has a two-year exemption that expires on February 20, 2026, under which it may waive portions of the CDL skills test for CDL applicants who take the skills test on the islands of Lanai and Molokai and grant restricted CDLs to successful applicants. The State of Hawaii now requests a five-year exemption of these provisions, with the addition of an exemption from certain portions of the ELDT curriculum requirements for providers of behind-the-wheel (BTW) public road training on the islands of Lanai and Molokai. FMCSA requests public comment on the applicant's request for an exemption and whether the Agency should withdraw Hawaii's current exemption that expires on February 20, 2026, and grant a new five-year exemption from both the CDL skills test and the ELDT requirements.

DATES: Comments must be received on or before January 29, 2025.

ADDRESSES: You may submit comments identified by Federal Docket Management System (FDMS) Number FMCSA-2024-0289 by any of the following methods:

- **Federal eRulemaking Portal:** www.regulations.gov. See the Public Participation and Request for Comments section below for further information.

- **Mail:** Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Washington, DC 20590-0001.

- **Hand Delivery or Courier:** West Building, Ground Floor, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m. E.T., Monday through Friday, except Federal holidays.

- **Fax:** (202) 493-2251.

Each submission must include the Agency name and the docket number (FMCSA-2024-0289) for this notice. Note that DOT posts all comments received without change to www.regulations.gov, including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: If you do not have access to the internet, you may view the docket by visiting Docket Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366-9317 or (202) 366-9826 before visiting Dockets Operations.

Privacy Act: In accordance with 49 U.S.C. 31315(b), DOT solicits comments from the public to better inform its regulatory process. DOT posts these comments, including any personal information the commenter provides, to www.regulations.gov as described in the system of records notice DOT/ALL-14 FDMS, which can be reviewed under the "Department Wide System of Records Notices" at <https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices>. The comments are posted without edit and are searchable by the name of the submitter.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Clemente, Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards, FMCSA; (202) 366-2722; or richard.clemente@dot.gov. If you have questions on viewing or submitting material to the docket, contact Dockets Operations at (202) 366-9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA-2024-0289), indicate

the specific section of this document to which the comment applies, and provide a reason for your suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to www.regulations.gov and put the docket number “FMCSA–2024–0289” in the “Keyword” box, and click “Search.” When the new screen appears, click on the “Comment” button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all comments and material received during the comment period.

Confidential Business Information (CBI)

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to the notice contain commercial or financial information that is customarily treated as private, and that you actually treat as private, and that is relevant or responsive to the notice, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission that constitutes CBI as “PROPIN” to indicate it contains proprietary information. FMCSA will treat such marked submissions as confidential under the Freedom of Information Act, and they will not be placed in the public docket of the notice. Submissions containing CBI should be sent to Brian Dahlin, Chief, Regulatory Evaluation Division, Office of Policy, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 or via email at brian.g.dahlin@dot.gov. At this time, you need not send a duplicate hardcopy of your electronic CBI submissions to FMCSA headquarters. Any comments FMCSA receives not specifically designated as

CBI will be placed in the public docket for this notice.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant’s safety analyses. The Agency must provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted and determines whether granting the exemption would likely maintain a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305(a)). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision(s) from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reasons for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Applicant’s Request

The State of Hawaii seeks a five-year exemption from the requirements in 49 CFR 383.113(c) that an applicant for a CDL must demonstrate the ability to signal appropriately when changing direction in traffic and the ability to choose a safe gap for changing lanes, passing other vehicles, and crossing or entering traffic (49 CFR 383.113(c)(2) and (4)). The Agency granted this same relief to Hawaii on February 20, 2024, until February 20, 2026 (89 FR 12940). Hawaii maintains that the islands of Lanai and Molokai do not have at least two miles of a straight section of urban business street and at least two miles of an expressway or highway section with multiple lanes going in each direction to allow the ability to legally change lanes. The applicant states that there are no plans to change the infrastructure to include sections of roadway meeting these parameters prior to the expiration date of the current exemption.

The applicant further requests regulatory relief for any provider of ELDT BTW public road training on these islands from full compliance with the ELDT requirements in 49 CFR part 380, appendix A and B. Specifically, the applicant requests relief from Unit A3.1

of the class A CDL training curriculum, and Unit B3.1 of the Class B CDL training curriculum. Both units are titled, “Vehicle Controls Including: Left Turns, Right Turns, Lane Changes, Curves at Highway Speeds, and Entry and Exit on the Interstate or Controlled Access Highway.”

A copy of the State of Hawaii’s application for exemption is available for review in the docket for this notice.

IV. Request for Comments

In accordance with 49 U.S.C. 31315(b), FMCSA requests public comment from all interested persons on the State of Hawaii’s application for an exemption. FMCSA specifically requests comment on whether the Agency should withdraw the applicant’s existing exemption that expires on February 20, 2026 (89 FR 12940) and grant a new five-year exemption from the same requirements in 49 CFR 383.113(c) and the requested regulatory relief to providers of ELDT BTW public road training on the islands of Lanai and Molokai. All comments received before the close of business on the comment closing date indicated at the beginning of this notice will be considered and will be available for examination in the docket at the location listed under the **ADDRESSES** section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.

Larry W. Minor,

Associate Administrator for Policy.

[FR Doc. 2024–31267 Filed 12–27–24; 8:45 am]

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2009–0072]

Petition for Extension of Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on October 8, 2024, Tri-County Metropolitan Transportation District of Oregon (TriMet) petitioned the Federal Railroad Administration (FRA) for an extension of a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at

49 CFR part 222 (Use of Locomotive Horns at Public Highway-Rail Grade Crossings). The relevant Docket Number is FRA–2009–0072.

Specifically, TriMet seeks an extension of relief from §§ 222.21(a) and 222.21(b)(2), which require locomotive horns to be sounded when approaching public highway-rail grade crossings, using the “long-long-short-long” pattern that begins 15 to 20 seconds before the locomotive reaches the crossing, but no further than ¼ mile from the crossing. The current waiver permits TriMet to use a 60 dB(A) locomotive bell in lieu of the locomotive horn at three crossings on the Lombard segment of TriMet’s Westside Express Service (WES) in Beaverton, Oregon.

In support of its petition, TriMet stated that the three crossings are equipped with flashing lights, bells, and either traffic signals or crossing gates. Further, TriMet stated that “WES train speeds are positively enforced at a maximum of 10 [miles per hour] along the Lombard segment,” which includes the three crossings. TriMet additionally noted that the waiver relief “has not been the cause of any accidents, nor has it created any safety hazards at or near the specified crossings.”

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at www.regulations.gov. Follow the online instructions for submitting comments.

Communications received by February 28, 2025 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

Anyone can search the electronic form of any written communications and comments received into any of the U.S. Department of Transportation’s (DOT) dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT

solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.transportation.gov/privacy>. See also <https://www.regulations.gov/privacy-notice> for the privacy notice of www.regulations.gov.

Issued in Washington, DC.

John Karl Alexy,

Chief Safety Officer.*

[FR Doc. 2024–31055 Filed 12–27–24; 8:45 am]

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2007–28340]

Petition for Extension of Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on October 14, 2024, and December 13, 2024, Union Pacific Railroad Company (UP) petitioned the Federal Railroad Administration (FRA) for an extension of a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR parts 215 (Railroad Freight Car Safety Standards) and 232 (Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment; End-of-Train Devices). The relevant Docket Number is FRA–2007–28340.

Specifically, UP seeks an extension of relief from part 215 and § 232.205(a)(1), *Class I brake test—initial terminal inspection*, to move freight cars received in interchange from Kansas City Southern de Mexico at the West Rail International Bridge, located west of Brownsville, Texas, to Olmito, Texas. The required inspections are conducted at the Olmito yard, which is 5.65 miles north of the bridge.

In support of its petition, UP stated that the movement “expedit[es] any delays caused by port of entry inspections and allow[s] a more efficient use of the bridge window.” UP added that completing inspections and testing of equipment at Olmito is “safer/more secure than attempting it on the bridge precisely at the US border line,” as the “Olmito facility infrastructure supports inspections, and repair associated activities, including switching out bad

orders.” Finally, UP noted that the relief avoids “unnecessary public disruptions within the city of Brownsville, [Texas], including, but not limited to, excessively blocked crossings” as well as “alleviates undue additional locomotive emissions from excessive idling times.”

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at www.regulations.gov. Follow the online instructions for submitting comments.

Communications received by February 28, 2025 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

Anyone can search the electronic form of any written communications and comments received into any of the U.S. Department of Transportation’s (DOT) dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at <https://www.transportation.gov/privacy>. BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION**Federal Transit Administration****[FTA Docket No. FTA 2024–0019]****Agency Information Collection Activity Under OMB Review: Transit COVID–19 Response Program****AGENCY:** Federal Transit Administration, Department of Transportation (DOT).**ACTION:** Notice of request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, this notice announces that the Information Collection Requirements (ICRs) abstracted below have been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describe the nature of the information collection and their expected burdens.

DATES: Comments must be submitted on or before January 29, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to <https://www.reginfo.gov/public/do/PRAMain>. Find this particular information collection by selecting “Currently under Review—Open for Public Comments” or by using the search function.

Comments are Invited On: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department’s estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology. A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this notice in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Tia Swain, Office of Administration, Management Planning Division, 1200 New Jersey Avenue SE, Mail Stop TAD–10, Washington, DC 20590 (202) 366–0354 or tia.swain@dot.gov.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1995 (PRA), Public Law 104–13, section 2, 109 Stat. 163 (1995) (codified as revised at 44 U.S.C. 3501–3520), and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on

information collection activities before OMB may approve paperwork packages. 44 U.S.C. 3506, 3507; 5 CFR 1320.5, 1320.8(d)(1), 1320.12. On October 24, 2024, FTA published a 60-day notice (89 FR 85000) in the **Federal Register** soliciting comments on the ICR that the agency was seeking OMB approval. FTA received (1) comment after issuing this 60-day notice. Accordingly, DOT announces that these information collection activities have been re-evaluated and certified under 5 CFR 1320.5(a) and forwarded to OMB for review and approval pursuant to 5 CFR 1320.12(c).

Before OMB decides whether to approve these proposed collections of information, it must provide 30 days for public comment. 44 U.S.C. 3507(b); 5 CFR 1320.12(d). Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30-day notice is published. 44 U.S.C. 3507 (b)–(c); 5 CFR 1320.12(d); *see also* 60 FR 44978, 44983. OMB believes that the 30-day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect. 5 CFR 1320.12(c); *see also* 60 FR 44983.

The summaries below describe the nature of the information collection requirements (ICRs) and the expected burden. The requirements are being submitted for clearance by OMB as required by the PRA.

Title: Transit COVID–19 Response Program.

OMB Control Number: 2132–0581.

Background: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Federal Transit Administration (FTA) is requesting a three-year approval without change of an existing information collection from the Office of Management and Budget (OMB). Although the Public Health Emergency for the COVID–19 pandemic ended in May 2023 and the FTA discontinued COVID–19 reporting requirements in September 2022, the FTA is seeking to renew this information collection to ensure that an existing framework can be readily updated to address future health emergencies. This renewal would allow the FTA to respond more swiftly to future public health emergencies by gathering data on their impact on the transit industry.

FTA began collecting monthly data in April 2021 related to impacts from the

coronavirus disease 2019 (COVID–19) on public transportation agencies, including transit workforce counts; transit service levels; counts of COVID–19 positives, fatalities, recoveries, and unvaccinated employees; whether or not a transit agency has implemented the U.S. Centers for Disease Control and Prevention (CDC) Order and Transportation Security Administration (TSA) Security Directive requiring workers and passengers to wear masks; and whether or not the agency used FTA funds to support vaccine access services. FTA used this data to inform FTA’s COVID–19 response and recovery actions, including monitoring of safety measures and impacts, development of technical assistance and safety advisories, monitoring use of FTA grant funds to address COVID–19 considerations, and monitoring compliance with Federal requirements.

Current Action: Extension without change of a currently approved collection.

Respondents: Recipients and sub-recipients of FTA funds under the Urbanized Area Formula Funding program or the Formula Grants for Rural Areas program that operate transit systems or pass-through funds to sub-recipients that operate transit systems. Recipients of FTA funds under the Enhanced Mobility of Seniors and Individuals with Disabilities program were requested to provide this information on a voluntary basis.

Estimated Total Annual Respondents: 2,390.

Estimated Annual Total Responses: 28,680.

Estimated Annual Burden Hours on Respondents: 10,356.

Frequency: As needed.

Kusum Dhyani,

Director, Office of Management Planning.

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION**Federal Transit Administration****[Docket No. FTA–2024–0020]****Notice of Proposed Policy Statement Regarding the Applicability of FTA’s Drug and Alcohol Testing Program to Transportation Network Companies**

AGENCY: Federal Transit Administration (FTA), Department of Transportation (DOT).

ACTION: Notice; request for comments.

SUMMARY: This notice proposes to clarify FTA’s policy on the applicability of

FTA's drug and alcohol testing program to transportation network companies. FTA proposes to update the Shared Mobility frequently asked questions, published in 2016 on FTA's website, to correct an error that has resulted in the misapplication of what is commonly known as the taxicab exception and clarify when the exception applies. FTA seeks comment from all interested parties. After review and consideration of the comments, FTA will issue a final notice announcing the policy statement and the revised FAQs.

DATES: Comments must be received by February 13, 2025. Late-filed comments will be considered to the extent practicable.

ADDRESSES: Please submit all comments electronically to the Federal eRulemaking Portal. Go to <https://www.regulations.gov> and follow the instructions for submitting comments. **Instructions:** All submissions must refer to the Federal Transit Administration and the docket number of this notice. Note that all submissions received, including any personal information provided, will be posted without change and will be available to the public on <https://www.regulations.gov>. You may review DOT's complete Privacy Act Statement in the **Federal Register** published April 11, 2000 (65 FR 19477), or at <https://www.transportation.gov/privacy>.

FOR FURTHER INFORMATION CONTACT: For legal questions, Emily Jessup, Attorney-Advisor, (202) 366-8907, or Emily.Jessup@dot.gov. For program questions, Iyon Rosario, Sr. Drug and Alcohol Program Manager, (202) 366-2010, or Iyon.Rosario@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

As transit agencies increasingly partner with transportation network companies (TNCs) to provide service, FTA is responding regularly to inquiries regarding whether and when FTA's Drug and Alcohol rule applies.

As required by Federal transit law at 49 U.S.C. 5331 and FTA's Drug and Alcohol rule at 49 CFR part 655, recipients of funding under FTA's Urbanized Area Formula Program, Capital Investment Grants Program, and Rural Areas Formula Program (49 U.S.C. 5307, 5309, and 5311, respectively) must establish and implement drug and alcohol testing programs for employees and contractors that are designed to help prevent accidents, injuries, and fatalities resulting from the misuse of alcohol and use of prohibited drugs by personnel who perform safety-sensitive functions, including vehicle operators.

These testing requirements apply to contractors who perform a safety-sensitive function for an FTA recipient, even if the service the contractor provides is not federally funded. This includes drivers of taxicabs and transportation network companies (TNCs) who perform the safety-sensitive function of operating a revenue service vehicle under contract with transit agencies.

Specifically, 49 U.S.C. 5331 provides, in relevant part:

(b) Testing Program for Public Transportation Employees.—

(1)(A) In the interest of public transportation safety, the Secretary shall prescribe regulations that establish a program requiring public transportation operations that receive financial assistance under section 5307, 5309, or 5311 of this title to conduct preemployment, reasonable suspicion, random, and post-accident testing of public transportation employees responsible for safety-sensitive functions (as decided by the Secretary) for the use of a controlled substance in violation of law or a United States Government regulation, and to conduct reasonable suspicion, random, and post-accident testing of such employees for the use of drugs and alcohol in violation of law or a United States Government regulation. The regulations shall permit such operations to conduct preemployment testing of such employees for the use of drugs and alcohol.

This language has remained substantively unchanged since 1991. FTA applies the statute to all services of recipients of sections 5307, 5309, and 5311, including their subrecipients and contractors.

FTA's Drug and Alcohol rule, 49 CFR part 655, provides in relevant part:

§ 655.3 Applicability.

(a) Except as specifically excluded in paragraphs (b) [FRA], and (c) [USCG] of this section, this part applies to:

(1) Each recipient and subrecipient receiving Federal assistance under 49 U.S.C. 5307, 5309, or 5311; and (2) Any contractor of a recipient or subrecipient of Federal assistance under 49 U.S.C. 5307, 5309, 5311.

§ 655.4 Definitions.

Contractor means a person or organization that provides a safety-sensitive service for a recipient, subrecipient, employer, or operator consistent with a specific understanding or arrangement. The understanding can be a written contract or an informal arrangement that reflects an ongoing relationship between the parties.

Covered employee means a person, including an applicant or transferee, who performs or will perform a safety-sensitive function for an entity subject to this part.

Employer means a recipient or other entity that provides public transportation service or which performs a safety sensitive function for such recipient or other entity. This term includes subrecipients, operators, and contractors.

Safety-sensitive function means any of the following duties, when performed by employees of recipients, subrecipients, operators, or contractors:

(1) Operating a revenue service vehicle, including when not in revenue service[.]
* * *

As transit-TNC service partnerships have become more prominent, questions have arisen over the applicability of what is generally known as the "taxicab exception." Further, as explained in detail in Section III of this notice, an error in one of FTA's current Shared Mobility FAQs has contributed to the exception being implemented in a way inconsistent with the original intent of the taxicab exception. FTA is proposing this update and clarification to the FAQs in response to these inquiries, as well as to correct the error, to ensure recipients and TNCs have a better understanding of when the Drug and Alcohol rule applies and when it does not.

The taxicab exception is based on a lack of contractual or informal arrangement between the transit agency and taxicab company and who controls the selection of the company/driver providing the trip. In 1994, when the exception was issued, many taxicab drivers were independent operators, providing service to any individual who hailed them from the curb. The selection was random and non-predictable, with the rider flagging down the next taxicab that appeared. Because of this randomness, it would have been impractical for the transit agency to require all the local taxicab drivers to take a "pre-employment" test or be part of its random testing pool if there was even a slight possibility that a rider might hail them using transit-agency issued scrip or vouchers. However, if the transit agency contracted with a taxicab company, or if there were only one or two taxicab companies providing service in the area, then the transit agency could establish a known pool of participating drivers and include the drivers in the agency's testing program.

A rider-initiated vehicle selection via a rider-controlled app, such as for first mile-last mile service with TNCs, is today's functional equivalent of a street-corner or curbside flag-down of a taxicab. A TNC driver providing service to the general public has no expectation they will be selected for a transit agency subsidized trip when they are selected by the app, and where there are two or more providers, the transit agency has little or no control over the rider's selection of a company/driver. In contrast, in situations where the rider contacts a transit agency to schedule a

ride, and the agency has either pre-approved one or more providers or created a pool of designated drivers, such as for ADA paratransit trips where an agency uses taxicabs or TNCs, the transit agency has a demonstrable measure of control over the selection of the company/driver and therefore has the ability to include those drivers within its testing program in the interest of public safety.

II. Background

Subsequent to passage of the Omnibus Transportation Employee Testing Act of 1991 (Pub. L. 102–143, codified at 49 U.S.C. 5331), FTA issued its first round of drug and alcohol abuse prevention rules on February 15, 1994.¹ In the preambles, the final rules said this about taxicabs providing service for or on behalf of transit agencies:

User-side subsidies. A user-side subsidy refers to the practice of providing passengers publicly subsidized scrip or vouchers, which the passenger then uses to pay for transportation from a private carrier such as a taxicab company. In essence, a recipient provides transportation services indirectly through such subsidies. The regulation applies to certain recipients of FTA funding, and to transit operators providing service under contract or other arrangements with those recipients. To the extent that a taxi operator does not provide service under an arrangement with an FTA recipient but is chosen at random by the passenger, it would not be subject to the rule. If, however, the taxicab company or private operator does provide service under an arrangement with an FTA recipient, it is covered by the rule as a contractor, as defined by the rule. In such cases, the taxi company may wish to designate only certain drivers to provide such service, in which case only those designated drivers would be subject to the rule's drug and alcohol testing program.²

The distinction between contracting with a taxi company to provide service as opposed to merely providing vouchers without any sort of contract or arrangement arises, at least in part, from the legislative history of the Omnibus Transportation Employee Testing Act, which includes the following floor statement:

Drug and alcohol-testing requirements must not be circumvented through contracting out of work. Safety-sensitive employees of recipients of the Federal transit grant money identified in the bill, and those safety-sensitive employees working for contractors of such recipients must be covered exactly to the same extent and in the same fashion. I know that I speak for all conferees when I say that we will not tolerate a situation where employees performing substantially the same safety-sensitive

function are covered or not covered depending on whether they work directly for a public authority or an outside contractor. 137 Cong Rec. S14766 (daily ed. Oct. 16, 1991). (Statement of Sen. D'Amato).

This statement demonstrates congressional intent to include in the testing program contractors who are performing the same work as a transit agency employee.

Since the issuance of those first drug and alcohol rules, FTA has consistently, as a matter of policy, indicated that the drug and alcohol rules do not apply when the transit agency has no contractual or informal arrangement with local taxicab companies, the transit agency provides user-side subsidies in the form of scrip or vouchers, and the passenger chooses among more than two taxicab companies to provide a trip. The 2016 FAQs changed this to “two or more” for added flexibility. Prior to the availability of TNCs, such arrangements were for incidental use that supports public transportation, such as guaranteed ride home programs.

Thus, the exception is based on who controls the selection of the company/driver providing each trip; only when there is no contract or informal arrangement for service between the transit agency and the taxicab company or TNC, *and* the passenger selects the provider for each trip, does the Drug and Alcohol rule not apply.

In the preamble to the 2001 Drug and Alcohol final rule, FTA stated,

FTA policy continues to recognize the practical difficulty of administering a drug and alcohol testing program to taxi companies that only incidentally provide transit service. Therefore, the drug and alcohol testing rules apply when the transit provider enters into a contract with one or more entities to provide taxi service. The rules do not apply when the patron (using subsidized vouchers) selects the taxi company that provides the transit service. This guidance reflects the FTA Master Agreement, which requires recipients to include appropriate clauses in third party contracts requiring contractors to comply with applicable Federal requirements. It also recognizes the practical difficulty of administering a drug and alcohol testing program to entities that only incidentally provide taxi service on behalf of a transportation service provider.³

III. Current Implementation

As stated above, a rider-initiated vehicle selection via a rider-controlled app, such as for first mile-last mile service with TNCs, is today's functional equivalent of a street-corner or curbside flag-down of a taxicab. In such instances, when the rider selects the provider and the transit agency has no

control over the selection, the Drug and Alcohol rule does not apply. However, the use of TNCs has gone beyond “incidental” support of public transportation with first mile-last mile and guaranteed ride home programs to regularly supplementing or replacing public transportation service. For example, many transit agencies are contracting with TNCs to provide same-day ADA paratransit trips and are not including TNC drivers in an FTA/DOT-approved testing program. Other agencies are canceling late-night fixed route service and contracting with TNCs for demand-responsive service or adding new demand-responsive service provided by taxicabs or TNCs and not including those drivers in the agency's testing program. This exclusion means passengers are exposed to drivers who are not subject to drug and alcohol testing, raising safety concerns. Because in these situations, the taxicabs/TNCs are supplementing or replacing transit service and have some sort of contractual or informal arrangement with the transit agency, the taxicab companies or TNCs should be identifying an established group of drivers for these arrangements, and the drivers should be included in the transit agency's drug and alcohol testing program, or an FTA/DOT-compliant testing program conducted by the taxicab company or TNC.

In 2016, FTA published Shared Mobility Frequently Asked Questions (FAQs) on the applicability of the Drug and Alcohol rule to TNCs. One of those questions included an erroneous answer that has resulted in numerous transit agencies incorrectly concluding that the Drug and Alcohol rule does not apply under various scenarios where there is a contractual relationship between the transit agency and one or more TNCs.

While the transportation industry has evolved beyond hailing taxicabs on the corner, the basis for the inapplicability of the Drug and Alcohol rule to some taxicab and TNC operations that provide transit agency-subsidized trips remains the same: a lack of a contractual or informal arrangement between the transit agency and the TNC or taxicab operator, and the randomness of the customer choosing the provider for each trip.

1. Lack of Contractual Relationship

In 2016, TNCs were starting up and partnering with transit agencies to provide first mile-last mile and same-day ADA paratransit service. Many transit agencies using TNCs for same-day ADA paratransit or other on-demand service entered into contracts

¹ 59 FR 7531; 49 CFR parts 653 and 654, replaced with part 655 in 2001 (66 FR 41996).

² 59 FR 7531 at 7542 and 7582, Feb. 15, 1994.

³ 66 FR 41996, Aug. 9, 2001.

or informal arrangements with TNCs to provide the service.

FTA developed FAQs related to the eligibility of such services, requirements related to the ADA, and FTA's controlled substance and alcohol testing requirements.⁴

One of the FAQs included an erroneous answer:

Question: Does the taxicab exception apply to ridesourcing companies?

Answer: It depends. The rationale for the taxicab exception is the same for ridesourcing companies when a public transit agency has a contractual or informal arrangement with two or more ridesourcing companies or taxicab companies to provide a specific service or type of service, and the public transit passenger chooses among the providers. In this case, the public transit agency would have to contract with at least two ridesourcing companies and/or taxicab companies to ensure the passenger has a choice of which provider to contact for a ride.

There may be some situations in which a public transit agency contracts with two or more ridesourcing companies as well as one or more taxicab companies in order to ensure the service is available for all passengers. For example, the taxicab company may be the only contractor with accessible vehicles, or may be the only contractor able to schedule trips over the phone or accept cash payment from passengers. While some passengers may have only one choice, this does not change the fact that many passengers will have more than one choice, and so the taxicab exception will apply to all of the providers.

The answer should read, "a public transit agency does not have a contractual or informal arrangement . . ." but instead reads, "a public transit agency has a contractual or informal arrangement . . ." The error in the answer to this question has led to a situation in which the regulation is applied in a manner inconsistent with its original intent. The statement, "is the same for ridesourcing companies when a public transit agency has a contractual or other arrangement with two or more ridesourcing companies or taxicab companies" is erroneous as the Drug and Alcohol rule does not apply when there is a lack of a contractual or other arrangement. This answer is inconsistent with FTA's long-standing policy related to the applicability of the rule to taxicabs, and also is inconsistent with other FAQs which indicate the Drug and Alcohol rule applies when there is a contract or other arrangement, and has caused confusion in the industry. As explained above, when a transit agency enters into a contract or informal arrangement with another

entity to provide service, the contractor's employees must be part of an FTA/DOT-compliant drug and alcohol testing program. See 49 CFR 655.3(a)(2). Today's proposed policy statement and updated FAQs would amend the FAQs to be consistent with the original intent of the inapplicability of the Drug and Alcohol rule to taxicabs providing a safety-sensitive function for transit agencies in certain situations.

2. Customer Choice Every Ride

An additional condition that must be met for the Drug and Alcohol rule to not apply is that customers must choose their provider for every trip, as they would if they were hailing a cab or using a TNC app. Some transit agencies are challenged by the "customer choice" component and have sought additional guidance from FTA. FTA has consistently expressed that for the rule not to apply, the customer must choose the TNC or taxicab provider for each trip. Some agencies have developed apps where the passenger makes a provider selection when signing up for the app but is not offered a choice of provider for each ride. In this case, because the passenger is not making a provider choice for each ride, the Drug and Alcohol rule applies. This interpretation is consistent with the original rationale for the inapplicability of the rule in that rider selection of a provider for each ride is random and non-predictable.

Some transit agencies have argued this customer choice requirement is burdensome and if the passenger is given the option to select their provider from two or more companies when they first sign up for service, the Drug and Alcohol rule should not apply. This argument is inconsistent with the reasoning behind the original rationale for inapplicability of the rule, which is that when a transit agency provides a voucher to a passenger for use with any TNC or taxicab provider in the area, the transit agency does not know and/or cannot control which provider a passenger contacts for service, and thus it would be impracticable to include the drivers of those providers in a testing program. When the transit agency knows which entity will provide the trip, it exercises control, and the drivers must be part of an FTA/DOT-compliant testing program.

Some agencies have expressed concern regarding passenger choice and how the transit agency can keep track of usage. Transit agencies need to know who is using the TNC or taxi service and whether the trip is within the service area in order for the TNC to be reimbursed for the trip and to ensure

only eligible trips are reimbursed. Notably, user-side subsidies or vouchers can be electronic, such as providing a unique code to each passenger who uses the app to request a ride from a TNC or taxi provider. This set-up enables the transit agency to monitor usage while maintaining the user choice element for each ride.

IV. Policy Statement

a. Background

The availability of TNCs to provide same-day ADA paratransit, late night on-demand, first mile-last mile, and other services has been valuable to transit agencies as they strive to provide exceptional public transportation service. Over time, this use of TNCs to supplement public transit has moved from incidental to regular, with TNCs providing millions of trips per year to public transit passengers. Transit agencies have sometimes found FTA's TNC FAQs difficult to interpret, and this has led to findings during FTA drug and alcohol audits. By this proposed update to the FAQs, FTA intends to remove ambiguities and ensure transit agencies and TNCs are clear about the applicability of FTA's Drug and Alcohol rule to TNCs.

As with everything we do at FTA, safety is paramount. The Drug and Alcohol program combats prohibited drug use and alcohol misuse by drivers engaged in the provision of public transit. When a taxicab or TNC provides service on behalf of a public transit agency, the passenger can reasonably expect the driver of that vehicle to be subject to the same requirements as a bus or train operator.

If a transit agency has a contract or arrangement in place with TNCs or taxicabs to transport passengers, it is critical that drivers are not impaired while performing this safety-sensitive duty. This is especially important when TNCs or taxicabs are providing service for seniors, persons with disabilities, or youth, who may not have the ability to depart a vehicle being operated by an impaired driver, especially if the passenger needs assistance to exit the vehicle, or it is late at night, in inclement weather, or in an unfamiliar neighborhood. This leaves the passenger in the difficult situation of having to complete the ride, knowing their safety is at risk. Parity in the application of regulations intended to address drug and alcohol use and abuse will ensure all passengers are afforded the same protections.

For those TNCs operating service under contract or informal arrangement with a transit agency, it is likely not

⁴ See <https://www.transit.dot.gov/regulations-and-guidance/shared-mobility-faqs-controlled-substance-and-alcohol-testing-requirements>.

necessary to include every driver in a drug and alcohol testing program. TNCs are welcome to identify a subset of drivers that serve the transit agency contract. TNCs may wish to require all new drivers joining their platforms participate in the drug and alcohol testing program as a means of building the number of drivers eligible to drive for the public transit agency contract. TNCs may not have to create a separate random testing pool; the identified subset of drivers may be placed into the transit agency's random testing pool at the discretion of the transit agency and the TNC. If the TNC creates its own testing program, the testing program must meet FTA/DOT requirements. In either case, drivers will be subject to all testing requirements of 49 CFR parts 40 and 655.

b. Proposed Policy

FTA proposes modifying its Shared Mobility Controlled Substance and Alcohol Testing Requirements FAQs to clarify when the exception applies and to fix the existing error. FTA proposes the relevant set of FAQs would read as follows:

Shared Mobility Controlled Substance and Alcohol Testing Requirements

Under Federal transit law (49 U.S.C. 5331), public transportation recipients that receive financial assistance under the FTA's Urbanized Area, Capital Investment Grant, and Rural Area programs must conduct controlled substance and alcohol testing of public transportation employees responsible for safety-sensitive functions, including operating, dispatching, and maintaining revenue service vehicles. These FAQs describe the extent to which ridesourcing companies are subject to the drug and alcohol testing requirements. For questions, contact Iyon Rosario (iyon.rosario@dot.gov), FTA's Senior Drug and Alcohol Program Manager.

When does the Drug and Alcohol rule apply?

The Federal Transit Administration (FTA) Drug and Alcohol rule (49 CFR part 655) provides that the rule applies to recipients and subrecipients of Urbanized Area (section 5307), Capital Investment Grant (section 5309), and Rural Area (section 5311) funds, as well as their contractors and subcontractors. A ridesourcing company may be a contractor. Under the rule, a contractor is any entity providing a safety-sensitive function for a recipient or subrecipient. The contract may be a written contract or an informal arrangement "that

reflects an ongoing relationship between the parties."

The intent of the Drug and Alcohol rule is to cover only those situations in which a transit operator has a contract or arrangement with taxicab or TNC operators. In these instances, the public knows that to take advantage of services funded in part by a transit agency, it must deal with a particular taxicab or TNC. On the other hand, where there is no contract or informal arrangement and a passenger randomly chooses among a variety of different taxi and/or TNC companies, these FAQs recognize the practical difficulties of trying to administer a drug and alcohol testing program in connection with all of those companies; accordingly, FTA's rule on drug and alcohol testing would not cover such services.

Does the testing requirement apply to employees and independent drivers of contractors not otherwise providing public transportation?

Yes. The Drug and Alcohol rule (49 CFR part 655) extends the controlled substance and alcohol testing requirement to employees of contractors performing a safety-sensitive function. This includes the independent drivers of a ridesourcing company contracting with a public transportation agency. FTA has consistently interpreted the regulation (49 CFR part 655) to include contractors who do not directly engage in public transportation operations, including taxicab operators and TNCs unless there is no contractual or informal arrangement, the transit agency merely provides user-side vouchers, and the passenger chooses the provider for each trip.

Are private companies like ridesourcing companies required to comply with DOT drug and alcohol testing requirements?

Recipients of Urbanized Area (section 5307), Capital Investment Grant (section 5309), and Rural Area (section 5311) funds must conduct drug and alcohol testing of all employees or contractors performing safety-sensitive functions. Ridesourcing companies are subject to the testing requirement to the extent they are a contractor of a recipient and perform a safety-sensitive function. However, as described below, in some situations, the Drug and Alcohol rule may not apply to ridesourcing companies.

Under what circumstances must TNC drivers be included in a drug and alcohol testing program?

TNC and taxicab drivers who provide or may provide transportation service

under a contract or informal arrangement with a transit agency must be included in an FTA/DOT compliant drug and alcohol testing program. Further, when a passenger does not choose the TNC or taxicab company providing the service for each trip, the TNC and taxicab drivers must be included in an FTA/DOT compliant drug and alcohol testing program. TNC and taxicab drivers may be added to a transit agency's existing testing pool or the TNC or taxicab company may establish its own FTA/DOT compliant testing program that includes drivers for the transit agency contract. For example, some transit agencies contract with TNCs, taxicab companies, and other entities to provide ADA paratransit service to eligible passengers. In those situations, the Drug and Alcohol rule applies to the TNC or taxicab company providing the service. Similarly, if a public transit agency provides vouchers to passengers to use with only one TNC or taxicab company, the passenger does not have a choice of which company to contact, so the Drug and Alcohol rule applies.

Under what circumstances does the Drug and Alcohol rule not apply to ridesourcing companies?

TNCs and taxicab companies are not required to include their drivers in an FTA/DOT compliant drug and alcohol testing program when all of the following apply:

- There are two or more providers available to provide the service, and
- There is no contractual or informal arrangement between the TNC or taxicab company and the FTA recipient to provide service and
- The passenger randomly selects a provider for each trip from two or more available providers.

If the transit agency does not contract or have an informal arrangement with the TNC or taxicab company but only provides user-side subsidies to the passenger and the passenger contacts the TNC or taxicab company directly for each ride and has a choice of two or more providers, the Drug and Alcohol rule will not apply. In this case, the public transit agency would have to inform its passengers of which TNCs or taxicab companies they may contact for a ride, and the passenger would schedule their own rides with their preferred provider for each trip. **NOTE:** A passenger who does not have a smartphone or other means to contact a provider directly may contact the transit agency to assist in scheduling the trip, even though the transit agency has no contractual relationship with any

provider. FTA expects this to be rare and to not occur where there is a provider that will schedule trips over the phone.

There may be some situations in which a public transit agency permits passengers to schedule trips with a choice of two or more ridesourcing companies as well as one or more taxicab companies in order to ensure the service is available for all passengers. In some cases, the taxicab company may be the only provider able to schedule trips over the phone or accept cash payment from passengers without a smart phone or credit card. As long as there is no contract or informal arrangement, the Drug and Alcohol rule does not apply to situations where there are multiple providers but only one provider that accepts phone reservations and/or accepts cash. While some passengers may have only one choice, this does not change the fact that many passengers will have more than one choice, so the Drug and Alcohol rule will not apply to these providers.

May a transit agency develop an App for users to schedule rides with TNCs?

A transit agency may develop an app for passenger convenience to schedule unsubsidized rides with the TNCs and taxicab companies in its area. Such an app does not constitute a contractual or informal arrangement for purposes of the drug and alcohol testing requirement. A shared app, on its own, without a link to a transit-agency subsidized TNC or taxicab trip, is not a safety-sensitive function. However, if the transit agency is subsidizing trips (e.g., with vouchers) scheduled with the app, the Drug and Alcohol rule applies unless there are two or more providers available with the same app, with no contractual or informal arrangement for the transportation service, and passengers can choose the provider for each trip.

If my project is funded with Public Transportation Innovation (Section 5312) research funds, does the drug and alcohol testing requirement apply?

No. If the project is funded with research dollars, the law permits the Secretary to prescribe terms and conditions for the grant award. FTA has determined the Drug and Alcohol rule does not apply to these funds, even if the recipient of Public Transportation Innovation (Section 5312) research funds is also a recipient of Urbanized Area (Section 5307), Capital Investment Grant (Section 5309) or Rural Area (Section 5311) funds.

Does the Drug and Alcohol rule apply to pilot programs that do not use any FTA funds?

Yes. If a transit agency receiving FTA funds under 49 U.S.C. 5307, 5309, or 5311 subsidizes ridesourcing services under a pilot program that does not use FTA funds, the transit agency must incorporate the ridesourcing company drivers into an FTA/DOT compliant drug and alcohol testing program, unless there are two or more providers, there is no contractual or informal arrangement for the transportation service, and passengers can choose the provider for each trip. Drivers may be included in a transit agency's testing pool or a TNC's or taxicab company's testing pool, as long as the testing program complies with FTA's drug and alcohol testing regulation.

FTA seeks comment from all interested parties. After consideration of the comments, FTA will issue a second **Federal Register** notice with a final set of Frequently Asked Questions.

Veronica Vanterpool,

Deputy Administrator.

BILLING CODE 4910–57–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2019–0093]

Deepwater Port License Application: Texas GulfLink LLC (GulfLink)— Special Notice

AGENCY: Maritime Administration,
Department of Transportation.

ACTION: Notice.

SUMMARY: The Maritime Administration (MARAD) is providing notice to the public of the delay in issuing the Record of Decision for the proposed Texas GulfLink Deepwater Port, as the agency continues to process and consider public submissions on the proposed project.

FOR FURTHER INFORMATION CONTACT:

Brian Barton, Office of Deepwater Ports and Port Conveyance, MARAD, telephone: 202–366–4610, email: Deepwater.Ports@dot.gov.

SUPPLEMENTARY INFORMATION: Under section 5(k) of the Deepwater Port Act of 1974 (DWPA) (33 U.S.C. 1504(k)), MARAD is required to publish a written statement in the **Federal Register** regarding delays in the processing of applications for oil or natural gas terminals licensed under the DWPA. On May 30, 2019, MARAD and the U.S.

Coast Guard (USCG) received a license application from GulfLink for all Federal authorizations required for a license to construct, own, and operate a deepwater port for the export of oil in the Gulf of Mexico off the coast of Brazoria County, TX. A Notice of Application summarizing and providing further information regarding the GulfLink Deepwater Port License application was published in the **Federal Register** on June 26, 2019 (84 FR 30298). After extensive public and interagency review, a Final Environmental Impact Statement (FEIS) was published on July 5, 2024, and the final public hearing was held on September 13, 2024. Over 44,000 public submissions on the FEIS and final public hearing were received in the TGL docket number MARAD–2019–0093 at [Regulations.gov](https://www.regulations.gov). MARAD is still reviewing and considering the comments received and issuance of a Record of Decision is therefore delayed. The applicable deadline for issuance of the Record of Decision is set forth in DWPA section 5(i)(1) (33 U.S.C. 1504(i)(1)). This ongoing review will ensure that all substantive public comments are considered and that the information, data, and viewpoints received during this phase of the project review are fully assessed and evaluated before MARAD renders a final decision.

Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment if submitted on behalf of an association, business, labor union, etc.). For information on DOT's compliance with the Privacy Act, visit www.transportation.gov/privacy.

(Authority: DWPA, Pub. L. 93–627 (33 U.S.C. 1501 *et seq.*); 49 CFR 1.93(h))

By Order of the Maritime Administrator.

T. Mitchell Hudson, Jr.,

Secretary, Maritime Administration.

[FR Doc. 2024–30974 Filed 12–27–24; 8:45 am]

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2021–0035; Notice 2]

Michelin North America, Inc., Grant of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic
Safety Administration (NHTSA),
Department of Transportation (DOT).

ACTION: Grant of petition.

SUMMARY: Michelin North America, Inc. (MNA), has determined that certain Michelin Primacy Tour A/S replacement passenger car tires do not fully comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 139, *New Pneumatic Radial Tires for Light Vehicles*. MNA filed an original noncompliance report dated March 25, 2021, and subsequently, MNA petitioned NHTSA on April 7, 2021, for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety. This notice announces the grant of MNA's petition.

FOR FURTHER INFORMATION CONTACT:

Jayton Lindley, Office of Vehicle Safety Compliance, the National Highway Traffic Safety Administration (NHTSA), telephone (325) 655-0547, email Jayton.Lindley@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Overview

MNA has determined that certain Michelin Primacy Tour A/S replacement passenger car tires do not fully comply with the requirements of paragraph S5.5.1(b) of FMVSS No. 139, *New Pneumatic Radial Tires for Light Vehicles* (49 CFR 571.139). MNA filed a noncompliance report dated March 25, 2021, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports*. MNA subsequently petitioned NHTSA on April 7, 2021, for an exemption from the notification and remedy requirements of 49 U.S.C. chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety, pursuant to 49 U.S.C. 30118(d) and 30120(h) and 49 CFR part 556, *Exemption for Inconsequential Defect or Noncompliance*.

Notice of receipt of MNA's petition was published with a 30-day public comment period, on November 18, 2021, in the **Federal Register** (86 FR 64595). No comments were received. To view the petition and all supporting documents log onto the Federal Docket Management System (FDMS) website at <https://www.regulations.gov/>. Then follow the online search instructions to locate docket number "NHTSA-2021-0035."

II. Tires Involved

Approximately 1,196 Michelin Primacy Tour A/S replacement passenger car tires, size 235/65R18 106H, manufactured between January 3, 2021, and January 23, 2021, were identified by MNA as being potentially involved, however, MNA clarified that

1,139 tires were captured and retained in MNA's inventory. Any decision on this petition will only apply to the approximately 57 tires that MNA no longer controlled at the time it determined that the noncompliance existed.

III. Noncompliance

MNA explains that the noncompliance is due to a mold error in which the subject tires contain a tire identification number (TIN) with an inverted plant code and, therefore, do not comply with the requirements specified in paragraph S5.5.1(b) of FMVSS No. 139.

IV. Rule Requirements

Paragraph S5.5.1(b) of FMVSS No. 139 includes the requirements relevant to this petition.

- For tires manufactured on or after September 1, 2009, each tire must be labeled with the tire identification number required by 49 CFR part 574 on the intended outboard sidewall of the tire.
- Except for retreaded tires, if a tire does not have an intended outboard sidewall, the tire must be labeled with the tire identification number required by 49 CFR part 574 on one sidewall and with either the tire identification number or a partial tire identification number, containing all characters in the tire identification number except for the date code and, at the discretion of the manufacturer, any optional code, on the other sidewall.

V. Summary of MNA's Petition

The following views and arguments presented in this section, "V. Summary of MNA's Petition," are the views and arguments provided by MNA and do not reflect the views of the Agency. MNA describes the subject noncompliance and contends that the noncompliance is inconsequential as it relates to motor vehicle safety.

In support of its petition, MNA submitted the following reasoning:

1. The TIN marking noncompliance does not create any operational safety risk for the vehicle. The tires comply with applicable FMVSS and all other applicable regulations.
2. The incorrect orientation of the TIN plant code has no bearing on tire performance.
3. The subject tires are marked with all other markings required under FMVSS No. 139, such as S5.5(c) maximum permissible inflation pressure and S5.5(d) maximum load rating. The necessary information is available on the sidewall of the tire to ensure proper application and usage.

4. The subject tires contain the DOT symbol on both sidewalls, thus, indicating conformance to applicable FMVSS.

5. The plant code on the intended outboard side of the tires contain all the information required by 49 CFR 574.5 for the TIN (plant code + size code + option code + date code), however the 3-digit plant code is inverted. The text should read "DOT 1M3" and instead reads "DOT vWL."

6. The plant code orientation discrepancy only exists on the intended inboard sidewall of the tire. The intended inboard sidewall has the correct sequence of DOT + plant code + size code + option code + manufacturing date, with all characters oriented in the proper direction.

7. For identification and traceability purposes the key information of plant code and manufacturing date is present on the tire.

8. In the event that dealer/owner notifications are required, either the intended marking (DOT 1M3) or the actual marking (DOT inverted "1M3") would serve as an identifier of the tire.

9. Upon identification of the mismarking, Michelin instituted a block on the affected tires and initiated a sorting of inventories. A total of 1,139 of the 1,196 tires produced with the incorrect marking were captured and retained in Michelin inventory.

10. The plant code plate in the affected mold has been restored to its correct orientation.

11. The mismarking has been communicated to Michelin Customer Care representatives in order to effectively handle any inquiries from dealers or owners regarding the subject tires.

12. MNA contends that NHTSA has concluded in other petitions related to similar TIN marking errors that this type of noncompliance is inconsequential to safety. Most notably, Cooper Tire & Rubber Company, 81 FR 43708 (July 5, 2016) petitioned for tires produced with an inverted date code. MNA states that NHTSA concluded that the inverted marking did not affect the consumers' ability to identify the tire and other examples exist where TIN information was incorrect, missing, or molded in the wrong sequence and NHTSA granted the petition.

MNA concludes its petition by stating that the subject noncompliance is inconsequential as it relates to motor vehicle safety and that its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the

noncompliance, as required by 49 U.S.C. 30120, should be granted.¹

VII. NHTSA's Analysis: In determining inconsequentiality of a noncompliance, NHTSA focuses on the safety risk to individuals who experience the type of event against which a recall would otherwise protect.² In general, NHTSA does not consider the absence of complaints or injuries when determining if a noncompliance is inconsequential to safety. The absence of complaints does not mean vehicle occupants have not experienced a safety issue, nor does it mean that there will not be safety issues in the future.³ Further, because each inconsequential noncompliance petition must be evaluated on its own facts and determinations are highly fact-dependent, NHTSA does not consider prior determinations as binding precedent. Petitioners are reminded that they have the burden of persuading NHTSA that the noncompliance is inconsequential to safety.

NHTSA has evaluated the merits of the petition submitted by MNA and is granting MNA's request for relief from notification and remedy based on the following:

1. Based on its review of the information MNA submitted, NHTSA has no basis to believe that tires do not meet the performance and labeling requirements of FMVSS 139, with the exception of the inverted plant code.

2. NHTSA believes that manufacturers and consumers will be able to identify the affected tires in the event of a recall for the following reasons:

a. The oval surrounding the plant code portion of the TIN visually groups the 3 characters from the rest of the TIN.

This helps the reader to understand that the mold plate for the plant code portion of the TIN was put in place inverted.

b. The font style is such that it is evident that the characters are inverted, however the inverted plant code could possibly be read as "EWI," "EWL," or "EW1." None of these are currently assigned to an active tire plant registered with NHTSA, and EWI in particular would not be assigned because "I" is not a permitted symbol.

c. The inboard sidewall of the tire has the plant code molded in the correct orientation.

3. NHTSA believes that the manufacturer has taken sufficient steps to ensure that the affected tires are included in any future recalls by:

a. Ensuring that the affected tires may be registered with either the correct TIN or any of the possible interpretations of the inverted characters.

b. Ensuring that any future safety-related recalls for the affected tires will include TIN numbers with all the possible interpretations of the inverted characters.

c. Coordinating with customer care representatives to handle inquiries related to the inverted plant code characters.

VII. NHTSA's Decision: In consideration of the foregoing, NHTSA finds that MNA has met its burden of persuasion that the subject FMVSS No. 139 noncompliance in the affected tires is inconsequential to motor vehicle safety. Accordingly, MNA's petition is hereby granted, and MNA is consequently exempted from the obligation of providing notification of, and a free remedy for, that noncompliance under 49 U.S.C. 30118 and 30120.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, this decision only applies to the subject tires that MNA no longer controlled at the time it determined that the noncompliance existed. However, the granting of this petition does not relieve tire distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant tires under their control after MNA notified them that the subject noncompliance existed.

BILLING CODE 4910-59-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA-2021-0096; Notice 3]

Hercules Tire & Rubber Company, Grant of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Grant of petition.

SUMMARY: Hercules Tire & Rubber Company, (Hercules), has determined that certain Hercules Power ST2 radial trailer tires do not fully comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 119, *New Pneumatic Tires for Motor Vehicles with a GVWR of More Than 4,536 Kilograms (10,000 Pounds), Specialty Tires, and Tires for Motorcycles*. Hercules filed an original noncompliance report dated December 9, 2021, and amended the report on December 14, 2021, and March 9, 2022. Hercules petitioned NHTSA on December 16, 2021, and amended the petition on March 9, 2022, for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety. This document announces the grant of Hercules's petition.

FOR FURTHER INFORMATION CONTACT: Jayton Lindley, General Engineer, NHTSA, Office of Vehicle Safety Compliance, (325) 655-0547.

SUPPLEMENTARY INFORMATION:

I. Overview: Hercules determined that certain Hercules Power ST2 radial trailer tires do not fully comply with the requirements of paragraph S6.5(b) of FMVSS No. 119, *New Pneumatic Tires for Motor Vehicles with a GVWR of More Than 4,536 Kilograms (10,000 Pounds), Specialty Tires, and Tires for Motorcycles* (49 CFR 571.119).

Hercules filed an original noncompliance report dated December 9, 2021, and amended the report on December 14, 2021, and March 9, 2022, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports*. Hercules petitioned NHTSA on December 16, 2021, and amended its petition on March 9, 2022, for an

¹ NHTSA requested that Michelin provide compliance test data for the subject tires while processing this request. Michelin provided this data but requested confidential treatment under 49 CFR part 512. This is reflected in a memo placed in the docket.

² See *Gen. Motors, LLC; Grant of Petition for Decision of Inconsequential Noncompliance*, 78 FR 35355 (June 12, 2013) (finding noncompliance had no effect on occupant safety because it had no effect on the proper operation of the occupant classification system and the correct deployment of an air bag); *Osram Sylvania Prods. Inc.; Grant of Petition for Decision of Inconsequential Noncompliance*, 78 FR 46000 (July 30, 2013) (finding occupant using noncompliant light source would not be exposed to significantly greater risk than occupant using similar compliant light source).

³ See *Morgan 3 Wheeler Limited; Denial of Petition for Decision of Inconsequential Noncompliance*, 81 FR 21663, 21666 (Apr. 12, 2016); see also *United States v. Gen. Motors Corp.*, 565 F.2d 754, 759 (D.C. Cir. 1977) (finding defect poses an unreasonable risk when it "results in hazards as potentially dangerous as sudden engine fire, and where there is no dispute that at least some such hazards, in this case fires, can definitely be expected to occur in the future").

exemption from the notification and remedy requirements of 49 U.S.C. chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety, pursuant to 49 U.S.C. 30118(d) and 30120(h) and 49 CFR part 556, *Exemption for Inconsequential Defect or Noncompliance*.

Notice of receipt of Hercules's petition was published with a 30-day public comment period, on August 10, 2022, in the **Federal Register** (87 FR 48760). A correction to the notice of receipt of Hercules's petition was published on December 30, 2022, in the **Federal Register** (87 FR 80257) and extended the public comment period. No comments were received. To view the petition and all supporting documents log onto the Federal Docket Management System (FDMS) website at <https://www.regulations.gov/>. Then follow the online search instructions to locate docket number "NHTSA-2021-0096."

II. Tires Involved: Approximately 67 Hercules Power ST2 size ST205/75R15 radial trailer tires, manufactured between November 23, 2020, and November 29, 2020, were reported by the manufacturer.

III. Noncompliance: Hercules explains that the noncompliance is due to a mold error in which the subject tires contain a tire identification number (TIN) with the second and third numerical symbols in the date code transposed and therefore, do not meet the requirements of paragraph S6.5(b) of FMVSS No. 119. Specifically, the TIN on the subject tires incorrectly states the date code as "4280," when it should state "4820."

IV. Rule Requirements: Paragraph S6.5(b) of FMVSS No. 119 and part 574.5(b)(3) include the requirements relevant to this petition. FMVSS No. 119 states the TIN must meet the requirements set forth in part 574. Part 574.5(b)(3), states that the date code portion of the TIN must identify the week and year of manufacture. The first and second symbols of the date code must identify the week of the year by using "01" for the first full calendar week in each year, "02" for the second full calendar week, and so on. The third and fourth symbols of the date code must identify the last two digits of the year of manufacture.

V. Summary of Hercules's Petition: The following views and arguments presented in this section, "V. Summary of Hercules's Petition," are the views and arguments provided by Hercules. They do not reflect the views of the Agency. Hercules describes the subject noncompliance and contends that the

noncompliance is inconsequential as it relates to motor vehicle safety.

Hercules explains that the subject noncompliance does not result in an increased risk to safety because the incorrect date code ("4280") indicates that the subject tires were manufactured in the 42nd week of either 1980 or 2080. According to Hercules, "[t]he only years that a year code of 80 could potentially relate to are 1980, over 40 years ago, or 2080, which is so far into the future to be implausible." Hercules claims the subject noncompliance would not cause a consumer to use the tire beyond its recommended maximum service life because a "consumer would not simply assume that the year code listed on the tire is in fact the correct date and be misled." Hercules says that if a consumer did follow the date code listed on the subject tires, "the guidance provided on NHTSA's website," informs consumers that "tires should be replaced within six to 10 years regardless of treadwear." In addition, because the year the date code indicates is implausible if a dealer were to store the subject tires for multiple years before selling them, Hercules believes "there is no risk of misleading the consumer about the age of the tire."

Hercules says that while the second and third symbols in the date code were transposed in the TIN, "all other content within the TIN is accurate and the tires otherwise conform to the performance requirements applicable to specialty trailer tires." Hercules states that the subject noncompliance "affects only the single week of tire production and the condition has been corrected in production."

Hercules states that granting its petition would be consistent with similar decisions that NHTSA has previously granted for inconsequentiality. Hercules cited the following prior petitions that NHTSA has granted, and that Hercules believes support the granting of its petition:

- Bridgestone Firestone North America Tire, LLC, Grant of Petition for Decision of Inconsequential Noncompliance, 71 FR 4396 (January 26, 2006);

- Bridgestone/Firestone, Inc., Grant of Application for Decision That Noncompliance Is Inconsequential to Motor Vehicle Safety, 66 FR 45076 (August 27, 2001).

Hercules believes that NHTSA's primary concern related to mislabeled or inaccurate TINs is the potential for adverse safety consequences due to consumers using aged tires that are beyond the manufacturer's recommended service life and regardless of the service condition of the

tire. *See Cooper Tire & Rubber Company*, 86 FR 47726 (August 26, 2021).

In the event of a recall, Hercules says that it has taken steps to ensure that it would be able to identify the subject tires and notify consumers successfully. Hercules says they have ensured that consumers will be able to register the tires with the noncompliant TIN (date code "4280") and that their database will identify the tire "as having been produced in calendar week 48, calendar year 2020" (correct date code "4820"). If a recall were necessary, Hercules says it would be able to contact consumers whose tires were registered and would include the TIN "as it is listed on the tire sidewall so that consumers could check the recall notification against the tire sidewall for verification purposes." Hercules believes that this further supports the granting of its petition because it says NHTSA has stated in prior grants of inconsequentiality petitions that the purpose of a date code is to identify the tire so that, if necessary, the appropriate action can be taken in the interest of public safety—such as a safety recall notice.

Hercules concludes by stating its belief that the subject noncompliance is inconsequential as it relates to motor vehicle safety and its petition to be exempted from providing notification of the noncompliance, as required by 49 U.S.C. 30118, and a remedy for the noncompliance, as required by 49 U.S.C. 30120, should be granted.

VI. NHTSA's Analysis: In determining inconsequentiality of a noncompliance, NHTSA focuses on the safety risk to individuals who experience the type of event against which a recall would otherwise protect.¹ In general, NHTSA does not consider the absence of complaints or injuries when determining if a noncompliance is inconsequential to safety. The absence of complaints does not mean vehicle occupants have not experienced a safety issue, nor does it mean that there will not be safety issues in the future.²

¹ See *Gen. Motors, LLC; Grant of Petition for Decision of Inconsequential Noncompliance*, 78 FR 35355 (June 12, 2013) (finding noncompliance had no effect on occupant safety because it had no effect on the proper operation of the occupant classification system and the correct deployment of an air bag); *Osram Sylvania Prods. Inc.; Grant of Petition for Decision of Inconsequential Noncompliance*, 78 FR 46000 (July 30, 2013) (finding occupant using noncompliant light source would not be exposed to significantly greater risk than occupant using similar compliant light source).

² See *Morgan 3 Wheeler Limited; Denial of Petition for Decision of Inconsequential Noncompliance*, 81 FR 21663, 21666 (Apr. 12, 2016); see also *United States v. Gen. Motors Corp.*, 565 F.2d 754, 759 (D.C. Cir. 1977) (finding defect

Further, because each inconsequential noncompliance petition must be evaluated on its own facts and determinations are highly fact-dependent, NHTSA does not consider prior determinations as binding precedent. Petitioners are reminded that they have the burden of persuading NHTSA that the noncompliance is inconsequential to safety.

In response to the petitioner's statement that subject tires that have remained in dealer inventory for an extended period would not lead to confusion on the part of a consumer, NHTSA notes that noncompliant tires may not be offered for sale, sold, or introduced into interstate commerce. Thus, entities should be aware that selling noncompliant tires could result in civil penalties, regardless if the petition is granted or denied.

NHTSA has evaluated the merits of the petition submitted by Hercules and is granting Hercules' request for relief from notification and remedy based on the following:

1. Based on its review of the information Hercules submitted, NHTSA has no basis for to believe that the tires do not meet the performance and labeling requirements of FMVSS No. 119, except for the incorrect date code.

2. While NHTSA recognizes that TIN labeling errors might prevent consumers from successfully registering their tires and this would impact safety, in the subject petition the noncompliance would not prevent tire registration. One purpose of the TIN is to provide a means of identifying tires, and while the date code portion of the TIN is useful to identifying tires, it also provides information to consumers about the age of their tires which could be safety related. In this specific instance, where the numbers two and eight were interchanged in the date code, the agency believes that consumers will recognize that the code is an error. It is unlikely that a reasonable person will believe that the tires were manufactured in 1980. Therefore, NHTSA does not believe the incorrect date code will cause consumers to use the tire beyond its recommended service life, but rather recognize that there is an error in the date code portion of the TIN.

3. NHTSA believes that the manufacturer has taken sufficient steps to ensure that the affected tires are included in future recalls by:

poses an unreasonable risk when it "results in hazards as potentially dangerous as sudden engine fire, and where there is no dispute that at least some such hazards, in this case fires, can definitely be expected to occur in the future").

a. Verifying that the tires having the incorrect date code may be registered using their tire registration system.

b. Ensuring that their registration database will correctly identify the tires as having been produced in week 48 of 2020, when the date code 4280 is entered.

VII. NHTSA's Decision: In consideration of the foregoing, NHTSA finds that Hercules has met its burden of persuasion that the subject FMVSS No. 119 noncompliance in the affected tires is inconsequential to motor vehicle safety. Accordingly, Hercules's petition is hereby granted and Hercules is consequently exempted from the obligation of providing notification of, and a free remedy for, that noncompliance under 49 U.S.C. 30118 and 30120.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, this decision only applies to the subject tires that Hercules no longer controlled at the time it determined that the noncompliance existed. However, the granting of this petition does not relieve tire distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant tires under their control after they were notified that the subject noncompliance existed.

(Authority: 49 U.S.C. 30118, 30120; delegations of authority at 49 CFR 1.95 and 501.8)

Eileen Sullivan,

Associate Administrator for Enforcement.

BILLING CODE 4910-59-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA-2024-0056]

Agency Information Collection Activities; Notice and Request for Comment; Female Occupant Anthropometry and Seating

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for comments on a request for approval of a new information collection.

SUMMARY: NHTSA invites public comments about our intention to request approval from the Office of Management and Budget (OMB) for a new information collection. Before a Federal agency can collect certain information from the public, it must receive approval from OMB. Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatement of previously approved collections. This document describes a collection of information for which NHTSA intends to seek OMB approval on Occupant Anthropometry and Seating.

DATES: Comments must be submitted on or before February 28, 2025.

ADDRESSES: You may submit comments identified by the Docket No. NHTSA-2024-0056 through any of the following methods:

- *Electronic submissions:* Go to the Federal eRulemaking Portal at <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- *Fax:* (202) 493-2251.
- *Mail or Hand Delivery:* Docket Management, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays. To be sure someone is there to help you, please call (202) 366-9322 before coming.

Instructions: All submissions must include the agency name and docket number for this notice. Note that all comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. Please see the Privacy Act heading below.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477-78) or you may visit <https://www.transportation.gov/privacy>.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov> or the street address listed above. Follow the online

instructions for accessing the dockets via internet.

FOR FURTHER INFORMATION CONTACT: For additional information or access to background documents, contact Elizabeth Lafferty, Office of Vehicle Safety Research, Human Injury Research Division NSR-220, West Building, W46-311, 1200 New Jersey Ave. SE, Washington, DC 20590; Email: Elizabeth.lafferty@dot.gov; Phone: 202-366-6222.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulation (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) how to enhance the quality, utility, and clarity of the information to be collected; and (d) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. In compliance with these requirements, NHTSA asks for public comments on the following proposed collection of information for which the agency is seeking approval from OMB.

Title: Occupant Anthropometry and Seating.

OMB Control Number: New.

Form Number(s): NHTSA Form 1824, NHTSA Form 1825, NHTSA Form 1826, NHTSA Form 1827, NHTSA Form 1828, and NHTSA Form 1848.

Type of Request: New information collection.

Type of Review Requested: Regular.

Requested Expiration Date of

Approval: 3 years from date of approval.

Summary of the Collection of Information:

NHTSA proposes to collect information from the public as part of a

study to collect detailed information on current body size and shape, posture, and motion of vehicle occupants. This research will support NHTSA in the development of tools used for occupant protection during crashes, particularly in the context of equity in crashworthiness. This research will add to the body of knowledge and is not immediately intended to inform regulations or policy.

The designs of anthropomorphic test devices (ATDs, commonly known as crash test dummies) are based on measurements of volunteers sitting in vehicle and laboratory seats. The current generation of ATDs is based on data gathered at University of Michigan Transportation Research Institute (UMTRI) in the 1980s. Since that time, the U.S. population has change substantially, most notably due to the large increase in body mass. Measurement technologies have also improved dramatically with the development of fast three-dimensional surface measurement systems. Seating configurations have also expanded from the traditional seat posture collected in the 1980s with increased recline angles in modern vehicles. This combination of a population size shift and more variable seat configurations presents a clear need for updated seated anthropometry to be collected with new advanced anthropometry measurement capabilities.

The data collections, approved by the Institutional Review Board at the University of Michigan, will be performed once to obtain the target number of valid test participants. Study participants will be male and female licensed adult drivers from the general public, and participation will be voluntary with monetary compensation provided. Participants are recruited using University of Michigan's Health Research portal, <https://umhealthresearch.org/>. The voluntary study would involve recruiting licensed drivers for two studies (in-lab and in-vehicle). For the in-lab study, the following information collections include: (1) an online screening questionnaire; (2) an eligibility phone call to confirm eligibility, interest, and schedule a time in the lab; (3) informed consent for the in-lab study and anthropometric measurement. A subset of the in-lab participants will be asked to participate in the in-vehicle study and the following information collections include: (1) a pre-drive questionnaire for the in-vehicle study; (5) informed consent and anthropometric measurements for the in-vehicle study; and (6) a post-drive questionnaire for the in-vehicle study.

In this study, 3D surface scan data quantifying body size and shape in a range of postures will be obtained. Posture, position, and belt fit in driver and passenger seating mockups that are adjusted to a wide range of vehicle configurations and using multiple seats will be measured. The participants will be selected to span a wide range of stature and weight, spanning the 5th percentile female to 95th percentile male values. Individuals with high body mass will be preferentially selected to address the current lack of data from that cohort. An in-vehicle study will be conducted using participants recruited from among those participating in the laboratory study. Participants will be provided an instrumented vehicle to drive in place of their own for a 7-to-10-day period. Given unknown budget appropriations the drive time may be reduced from 7-to-10-days to two hours. Independent of budget appropriations the burden to the public is two hours. The two hours will either be spent as more detailed check in/check out time for the 7-to-10-day plus questionnaire post-drive or as a 2-hr drive starting and ending at the lab. The goal of the in-vehicle study is to validate the driver postures measured in the laboratory and to obtain high-resolution 3D data on postures and movements during driving. A particular focus is on the lower extremities, where crash injury data have indicated a large difference in risk between male and female drivers. Body scans, measurements, and any video will be de-identified prior to submission to NHTSA. Statistical models will also be developed from de-identified data and made available to the public through a software tool.

This research study will gather a new database of information on adult body size, shape, posture, and motion to support advancement in these safety applications. This study will add to the body of the knowledge on motor vehicle anthropometry and will support female crash safety and equitable occupant protection through the development of human body models (HBMs) and anthropomorphic test devices (ATDs).

Description of the Need for the Information and Proposed Use of the Information:

Early ATDs, including the Hybrid-III family that was initially designed in the 1970s, were constructed using manually gathered anthropometric data, such as segment lengths and circumferences. Minimal 3D information was available, and seated postures were approximated. In 1980, NHTSA funded a large-scale study at UMTRI to develop anthropometric specifications for a new generation of ATDs. The Anthropometry

of Motor Vehicle Occupants (AMVO) study gathered data and developed detailed 3D body shapes for small female, midsize male, and large male occupants, using 5th percentile female, 50th percentile male, and 95th percentile male stature and body weight as the target reference values. Drawing packages were developed detailing landmark and joint locations, and physical 3D surface shells were constructed using landmark data and minimal 3D contour information. These data have formed the anthropometric basis for most adult ATDs developed since that time, including the THOR family.

AMVO had some limitations, however. Due to the limits of the technology available at the time, a small number of participants were measured (25 per size bin were used to create the final specifications), and no 3D surface information was collected. Moreover, the analysis was based on simple averaging per size bins, so no information was provided for other occupant sizes. Most importantly, the midsize female was dropped for cost reasons, so the only female data were gathered from very small individuals.

Over the past 20 years, HBMs have become an important addition to the biomechanics toolkit. Using the same logic that was applied to selecting body sizes for ATDs, the HBMs have typically been targeted to the same stature and body weight reference values as were used in AMVO. However, unlike the averaging process used in AMVO, most HBMs have developed using data primarily or entirely from a single individual. A consequence of this approach is that HBM development has not provided meaningful additions to the anthropometric data available to characterize vehicle occupants.

In the decades since AMVO, UMTRI has conducted a large number of studies of occupant posture and body shape and has developed advancements in both measurement and analysis methodology. Of particular importance, rather than averaging data to create a representation of a single body size, UMTRI has developed continuous statistical models that can generate accurate specifications for a wide range of sizes and shapes (for examples, see <http://HumanShape.org>). Simultaneously analyzing both landmark locations and 3D body shapes has enabled the development of parametric human body modeling, in which HBMs are morphed to represent people with widely varying size and shape.

Concurrent with the development of parametric HBMs, crash injury data

analyses have highlighted the potential benefits of these new tools. In particular, the field data indicate that female occupants experience higher risks of some injuries in certain types of crashes. Notably, lower-extremity injury risks are markedly higher for female drivers than for male drivers in frontal impacts. Detailed anthropometric and posture data for female drivers could help to elucidate the causes of this difference. Crash injury data also show that individuals with high body mass are at higher risks of some injuries, possibly due to differences in the interaction with the restraint systems. Minimal data are available to describe the seated postures and body shapes of this cohort, which is increasingly important in the U.S.

Affected Public:

Respondents will be licensed drivers, ages 18+, in the Ann Arbor, MI region and willing to travel to UMTRI. Study participants will be male and female licensed adult drivers from the general public, and participation will be voluntary with monetary compensation provided. Participants are recruited using University of Michigan's Health Research portal, <https://umhealthresearch.org/>. Prospective participants will respond to the U-M Health Research posting by completing a screening questionnaire on a Google Form. Eligible participants are those whose answers to the Google Form questions are consistent with the inclusion and exclusion criteria.

Eligibility requirements include the ability to read and speak English, ability to drive for two hours continuously, hold a current and unrestricted U.S. driver's license, have been a licensed driver for at least one year, drive a car daily for an average of at least 15 minutes, and comfortable driving on the highway and local roads. Exclusion criteria include individuals with musculoskeletal ailments impeding the ability to walk or sit comfortably or musculoskeletal deformities such as scoliosis or amputations.

Estimated Number of Respondents:

2000. We estimate that 2000 screening questionnaires will be filled out to obtain the needed number of subjects. The form has 23 questions, including name, address, and time slots available. We estimate that up to 600 individuals will need to be contacted to obtain the needed number of 300 subjects for the lab study. This considers that some people's schedules may not match up with lab openings or they may not show up for their scheduled appointment. A subset of the in-lab study participants will be asked to participate in the in-

vehicle study with the targeted 100 participants.

Frequency: Once.

This is a one-time collection of information with two studies: in-lab and in-vehicle. A subset of the in-lab participants will be asked to participate in the in-vehicle study. The initial pre-screening time is roughly 5 minutes and can be done at the respondents' convenience using a device of their choosing. The only requirement is an internet connection to access the online pre-screening. Not all who begin this pre-screening will complete the form in its entirety, and not everyone will meet study criteria. Those who meet study criteria could be contacted for an eligibility phone call prior to study enrollment.

Estimated Total Annual Burden Hours:

The annual estimated time burden to complete the collection of information is 347 hours and an annual opportunity cost of \$16,373.05 over the study period. To minimize the burden of the screening questionnaire and eligibility phone call, individuals for the in-vehicle study will be selected from the in-lab study pool. An estimate of up to 2000 individuals will initiate a response to the online screening questionnaire due to the broad range of inclusion criteria. Of the screened individuals we anticipate that up to 600 will need to be contacted for an eligibility phone call to obtain the needed number of 300 participants scheduled for the in-lab study. Scheduled participants that do not show up will be replaced from the remaining pool of screened participants and eligibility phone call to ensure 300 individuals arrive for in-lab measurements. After completion of the 2-hour process for informed consented and in-lab data collection, some participants will be asked if they are interested in the in-vehicle study. From the 300 in-lab participants, 100 will be scheduled to return to the lab for the in-vehicle study. The in-vehicle pre-drive and post-drive questionnaires will each take 5 mins, the informed consent, vehicle check-out, and vehicle check-in processes will take 110 min. totaling 2 hrs. for all of the in-vehicle study.

To calculate the opportunity cost associated with the forms and other relevant activities necessary for this collection of new information, NHTSA looked at average hourly earnings for employees across all occupations in the Ann Arbor, MI area. The Bureau of Labor Statistics (BLS) estimates that the average hourly wage for this group is \$33.43, thus serving as the opportunity cost per hour. The Bureau of Labor Statistics estimates that private industry

workers' wages represent 70.3% of total labor compensation costs. Therefore, NHTSA estimates the hourly labor costs to be \$47.55. NHTSA estimates the total opportunity cost associated with the

1033 burden hours to be \$49,119.15. Annual burden cost is estimated to be \$16,373.05, and annual burden hours is estimated to be 347. There may be a slight variation in the comparison of

total to annual burden over the three years due to rounding. The annual burden figures will be those represented in ROCIS.

TABLE 1—BURDEN ESTIMATES

NHSTA form No.	Information collection	Number of respondents total/annual	Time per response (min)	Cost per response	Frequency of response	Burden hours total/annual	Burden cost (dollars) total/annual
1824	Online Screening questionnaire	2000/667	5	\$3.96	1	167/56	\$7,940.85/\$2,646.95
1825	Eligibility Phone Call	600/200	5	3.96	1	50/17	2,377.50/792.50
1826	Informed Consent, In-Lab	300/100	120	95.10	1	600/200	28,530.00/9,510.00
1827	In-Vehicle Pre-Drive Questionnaire	100/34	5	3.96	1	8/3	380.40/126.80
1828	Informed Consent, In-Vehicle	100/34	120	95.10	1	200/68	9,510.00/3,170.00
1848	In-Vehicle Post-Drive Questionnaire	100/34	5	3.96	1	8/3	380.40/126.80
	Total Burden/Annual Burden					1033/347	49,119.15/16,373.05

Estimated Total Annual Burden Cost:

NHTSA estimates that the total travel costs to all respondents will be no more than \$10,720. The total estimated cost to the Government for this one-time information collection is \$49,119.15 plus \$10,720 totaling \$59,839.15 where the annual estimated cost is \$19,946.38.

Public Comments Invited: You are asked to comment on any aspects of this information collection, including (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (b) the accuracy of the Department's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; 49 CFR 1.49; and DOT Order 1351.29A.

Cem Hatipoglu,

Associate Administrator, Vehicle Safety Research.

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2024–0005]

Pipeline Safety: Meeting of the Liquid and Gas Pipeline Advisory Committees.

AGENCY: Pipeline and Hazardous Materials Safety Administration

(PHMSA); Department of Transportation (DOT).

ACTION: Notice of advisory committee meeting.

SUMMARY: This notice announces a public meeting of the Technical Hazardous Liquid Pipeline Safety Standards Committee, also known as the Liquid Pipeline Advisory Committee (LPAC), and the Technical Pipeline Safety Standards Committee, also known as the Gas Pipeline Advisory Committee (GPAC), to discuss the notices of proposed rulemaking (NPRMs) titled “Periodic Standards Update II” and “Cost Recovery for Siting Reviews for LNG Facilities.”

DATES: PHMSA will hold a public meeting on Thursday, January 16, 2025. The LPAC and GPAC (Committees) will meet from 10:30 a.m. to 6:00 p.m. EST to discuss the NPRMs. However, the meeting may end early or late depending on when the Committees complete their review of the proposed rules. Members of the public who wish to attend are asked to register no later than January 2, 2025. PHMSA requests that individuals who require accommodations because of a disability notify Joe Berry by email at joseph.berry1@dot.gov at least five days prior to the meeting. Public comments on the proceedings of this meeting must be submitted by February 20, 2025.

ADDRESSES: The meeting will be held virtually. The agenda and any additional information, including information on how to participate in the meeting, will be published on the meeting website at *Liquid Pipeline Advisory Committee (LPAC) and Gas Pipeline Advisory Committee (GPAC) Meeting—PHMSA Public Meetings*. Presentations will be available on the meeting website and at <https://www.regulations.gov> in docket number PHMSA–2024–0005 no later than 30

days following the meeting. You may submit comments, identified by Docket No. PHMSA–2024–0005, by any of the following methods:

- **Web:** <https://www.regulations.gov>.

This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

- **Fax:** 202–493–2251.

- **Mail:** Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building: Room W12–140, Washington, DC 20590–0001.

- **Hand Delivery:** U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building: Room W12–140, Washington, DC 20590–0001, between 9:00 a.m. and 5:00 p.m. EST, Monday through Friday, except federal holidays.

- **Instructions:** Identify Docket No. PHMSA–2024–0179 at the beginning of your comments. If you submit your comments by mail, submit two copies. Internet users may submit comments at <https://www.regulations.gov>. If you would like confirmation that PHMSA received your comments, please include a self-addressed stamped postcard labeled “Comments on PHMSA–2024–0005.” The docket clerk will date stamp the postcard prior to returning it to you via U.S. mail.

- **Note:** All comments received will be posted without edits to <https://www.regulations.gov>, including any personal information provided. Please see the Privacy Act heading for more information. Anyone can use the site to search all comments by the name of the submitting individual or, if the comment was submitted on behalf of an association, business, labor union, etc., the name of the signing individual. Therefore, please review the complete DOT Privacy Act Statement in the **Federal Register** at 65 FR 19477 or the

Privacy Notice at <https://www.regulations.gov> before submitting comments.

- **Privacy Act Statement:** DOT may solicit comments from the public regarding certain general notices. DOT posts these comments without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy.

- **Confidential Business Information:** Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments in response to this notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this notice, it is important that you clearly designate the submitted comments as CBI. Pursuant to 49 CFR 190.343, you may ask PHMSA to provide confidential treatment to information you give to the Agency by taking the following steps: (1) mark each page of the original document submission containing CBI as "Confidential;" (2) send PHMSA a copy of the original document with the CBI deleted along with the original, unaltered document; and (3) explain why the information you are submitting is CBI. Submissions containing CBI should be sent to Joseph Berry, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590-0001. Submissions containing CBI can also be emailed to Joseph Berry by encrypted email at joseph.berry1@dot.gov. Any commentary PHMSA receives that is not specifically designated as CBI will be placed in the public docket.

- **Docket:** For access to the docket or to read background documents or comments, go to <https://www.regulations.gov>. Follow the online instructions for accessing the dockets. Alternatively, this information is available by visiting DOT at 1200 New Jersey Avenue SE, West Building: Room W12-140, Washington, DC 20590-0001, between 9:00 a.m. and 5:00 p.m. EST, Monday through Friday, except federal holidays.

FOR FURTHER INFORMATION CONTACT: Joe Berry, Office of Pipeline Safety, by phone at 202-366-3593 or by email at joseph.berry1@dot.gov.

SUPPLEMENTARY INFORMATION:

I. Meeting Agenda

The Committees will meet virtually on Thursday, January 16, 2025, to discuss the "Periodic Standards Update II" NPRM that PHMSA published in the **Federal Register** on August 29, 2022, (87 FR 52713),¹ and the "Cost Recovery for Siting Reviews for LNG Facilities" NPRM that PHMSA published in the **Federal Register** on August 19, 2024, (89 FR 67040).² The Committees will review the NPRMs and their associated regulatory analyses, including, but not limited to, the preamble discussions of the proposals within each NPRM; regulatory impact analyses; environmental assessments; and other materials pertaining to the NPRMs provided in the respective public dockets. The committees will discuss the Cost Recovery for Siting Reviews for LNG facilities NPRM first. While the meeting is scheduled from 10:30 a.m. to 6:00 p.m. EST, the Committees may complete their review of the proposed rules before or after 6:00 p.m. EST. PHMSA will post additional details on the meeting website in advance of the meeting as they become available.

In the "Periodic Standards Update II" NPRM, PHMSA proposes amendments that would incorporate by reference all or parts of updated editions of some of those standards. The NPRM also proposes non-substantive edits and clarifications to certain other provisions of the federal pipeline safety regulations.

In the "Cost Recovery for Siting Reviews for LNG Facilities" NPRM, PHMSA proposes a new fee for cost recovery for siting reviews of liquefied natural gas (LNG) facility project applications where the design and construction costs total \$2.5 billion or more. This proposed rule is necessary to implement section 103 of the Protecting our Infrastructure of Pipelines and Enhancing Safety Act of 2020 (PIPES Act of 2020), and to help provide adequate resources for siting reviews to promote PHMSA's public safety and environmental protection objectives. This proposed rule also revises current regulations authorizing PHMSA's cost recovery for design safety reviews of gas, hazardous liquid, and carbon dioxide pipeline facilities to improve the clarity of the regulations and reduce unnecessary administrative burdens.

Following the LPAC and GPAC meeting, PHMSA will evaluate the

¹ The public docket for the Periodic Standards Update II NPRM can be found at <https://www.regulations.gov> in Docket No. PHMSA-2020-0013.

² The public docket for the Cost Recovery for Siting Reviews for LNG Facilities Notice can be found at <https://www.regulations.gov> in Docket No. PHMSA-2022-0118.

Committees' recommendations and publish final rules that address the comments received and relevant information from the meeting report.

II. Background

The Committees are statutorily mandated advisory committees that provide PHMSA and the Secretary of Transportation with recommendations on proposed standards for the transportation of hazardous liquid and gas by pipelines. The Committees were established in accordance with 49 U.S.C. 60115 and the Federal Advisory Committee Act (FACA) (5 U.S.C. Ch. 10) to review PHMSA's regulatory initiatives and determine their technical feasibility, reasonableness, cost-effectiveness, and practicability. Each committee consists of 15 members, with membership evenly divided among federal and state governments, regulated industry, and the general public.

III. Public Participation

The meeting will be open to the public. Members of the public who wish to attend must register on the meeting website and include their names and affiliations. PHMSA will provide members of the public reasonable opportunity to make a statement during this meeting. Additionally, PHMSA will record the meeting and post a record to the public docket. PHMSA is committed to providing all participants with equal access to this meeting. Public comments on the proceedings of the LPAC and GPAC meeting must be submitted by February 20, 2025.

PHMSA is not always able to publish a notice in the **Federal Register** quickly enough to provide timely notice regarding last-minute issues that impact a previously announced advisory committee meeting. Therefore, individuals should check the meeting website or contact Joe Berry regarding any possible changes.

Issued in Washington, DC, on December 20, 2024, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,

Associate Administrator for Pipeline Safety.

[FR Doc. 2024-30981 Filed 12-27-24; 8:45 am]

BILLING CODE 4910-60-P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons and vessels that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them. The vessels placed on the SDN List have been identified as property in which a blocked person has an interest. OFAC is also updating the entry on the SDN List for one person.

DATES: This action was issued on December 19, 2024. See **SUPPLEMENTARY INFORMATION** for relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, 202–622–2420; Assistant Director for Licensing, 202–622–2480; Assistant Director for Sanctions Compliance, 202–622–2490; or <https://ofac.treasury.gov/contact-ofac>.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: <https://ofac.treasury.gov>.

Notice of OFAC Action

On December 19, 2024, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authorities listed below.

Individuals

1. ABD–AL–WADUD, Wail Muhammad Said (a.k.a. ABDULWADOD, Wail Mohammed Saeed), Yemen; DOB 10 Feb 1994; POB Hodaidah, Yemen; nationality Yemen; Gender Male; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886; Passport 07872046 (Yemen) expires 25

Jul 2028 (individual) [SDGT] (Linked To: ANSARALLAH).

Designated pursuant to section 1(a)(iii)(A) of Executive Order 13224 of September 23, 2001, "Blocking Property and Prohibiting Transactions With Persons Who Commit, Threaten to Commit, or Support Terrorism," 66 FR 49079, as amended by Executive Order 13886 of September 9, 2019, "Modernizing Sanctions To Combat Terrorism," 84 FR 48041 (E.O. 13224, as amended), for having acted or purported to act for or on behalf of, directly or indirectly, ANSARALLAH, a person whose property and interests in property are blocked pursuant to E.O. 13224, as amended.

2. HAJJ, Umar Ahmad Umar Ahmad (a.k.a. HAG, Omar Ahmed Omar Ahmed), Yemen; DOB 03 Feb 1994; POB Hodaidah, Yemen; nationality Yemen; Gender Male; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886; Passport 06138572 (Yemen) expires 26 Mar 2030 (individual) [SDGT] (Linked To: ANSARALLAH).

Designated pursuant to section 1(a)(iii)(C) of E.O. 13224, as amended, for having materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services to or in support of, SA'ID AHMAD MUHAMMAD AL-JAMAL, a person whose property and interests in property are blocked pursuant to E.O. 13224, as amended.

BILLING CODE 4810-AL-C

On December 19, 2024, OFAC also identified the following vessels as property in which a blocked person has an interest under the relevant sanctions authority listed below.

Vessels

1. MS ENOLA (a.k.a. KOHO I) (J2GJ) Crude Oil Tanker Djibouti flag; Vessel Registration Identification IMO 9251951; MMSI 621819078 (vessel) [IRAN-EO13902] (Linked To: JOURNEY INVESTMENT COMPANY).

Identified as property in which JOURNEY INVESTMENT COMPANY, a person whose property and interests in

property are blocked pursuant to E.O. 13902, has an interest.

2. MS ANGIA (a.k.a. GATHER VIEW) (T7Ax8) Crude Oil Tanker San Marino flag; Vessel Registration Identification IMO 9246281; MMSI 268241201 (vessel) [IRAN-EO13902] (Linked To: ROSE SHIPPING LIMITED).

Identified as property in which ROSE SHIPPING LIMITED, a person whose property and interests in property are blocked pursuant to E.O. 13902, has an interest.

3. MS MELENIA (3FSO7) Crude Oil Tanker Panama flag; Other Vessel Flag Djibouti; Vessel Registration

Identification IMO 9302023; MMSI 374128000 (vessel) [IRAN-EO13902] (Linked To: ROSE SHIPPING LIMITED).

Identified as property in which ROSE SHIPPING LIMITED, a person whose property and interests in property are blocked pursuant to E.O. 13902, has an interest.

On December 19, 2024, OFAC updated the entry on the SDN List for the following person, whose property and interests in property subject to U.S. jurisdiction continue to be blocked under the relevant sanctions authority listed below.

Individual

1. AL-JAMAL, Sa'id Ahmad Muhammad (a.k.a. AL GAMAL, Saeed Ahmed Mohammed; a.k.a. RAMI, Abu-Ahmad; a.k.a. SAEIDI, Ahmad; a.k.a. SA'IDI, Ahmad; a.k.a. "ABU-'ALI"; a.k.a. "AHMAD, Abu"; a.k.a. "CAIHONG" (Chinese Simplified: "彩虹"); a.k.a. "HISHAM"), Iran; DOB 01 Jan 1979; alt. DOB 28 Jul 1978; nationality Yemen; Gender Male; Secondary sanctions risk: section 1(b) of Executive Order 13224, as amended by Executive Order 13886; Passport 04716186 (Yemen); alt. Passport U63475649 (Iran) expires 24 Jun 2028; alt. Passport E49297849 (Iran) expires 24 Aug 2024 (individual) [SDGT] [IFSR] (Linked To: ISLAMIC REVOLUTIONARY GUARD CORPS (IRGC)-QODS FORCE).

Designated pursuant to section 1(a)(iii)(C) of E.O. 13224, as amended, for having materially assisted, sponsored, or provided financial, material, or technological support for, or goods or services to or in support of, the ISLAMIC REVOLUTIONARY GUARD CORPS-QODS FORCE, a person whose property and interests in property are blocked pursuant to E.O. 13224.

The Secretary of State has identified the following person in a list submitted to the appropriate congressional committees pursuant to section 106(a) of the Countering America's Adversaries Through Sanctions Act (CAATSA). The Secretary of State has determined that such person, on or after the date of enactment of CAATSA, is responsible for extrajudicial killings, torture, or other gross violations of internationally recognized human rights committed against individuals in Iran who seek: (a) to expose illegal activity carried out by officials of the Government of Iran; or (b) to obtain, exercise, defend, or promote internationally recognized human rights and freedoms, such as the freedoms of religion, expression, association, and assembly, and the rights to a fair trial and democratic

elections. On December 19, 2024, OFAC, acting pursuant to delegated authority, has taken the action described below to impose the sanctions set forth in section 106(b)(1) of CAATSA with respect to the person listed below.

Entity

1. GHEZEL HESAR PRISON (a.k.a. GHEZEL HESAR PENITENTIARY; a.k.a. QEZEL HESAR PENITENTIARY), Payam Rd, Mehrshahr, Karaj, Alborz Province, Iran; Additional Sanctions Information—Subject to Secondary Sanctions [CAATSA—IRAN].

Pursuant to section 106(b) of CAATSA, OFAC has blocked all transactions in all property and interests in property that are in the United States, come within the United States, or come within the possession or control of any United States person, of the above

person. This person has been added to the SDN List and includes the identifying tag "CAATSA—IRAN."

Lisa M. Palluconi,
Acting Director, Office of Foreign Assets Control.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Actions

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets

Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: This action was issued on December 19, 2024. See Supplementary Information for relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, 202–622–2420; Assistant Director for Sanctions Compliance, 202–622–2490; or <https://ofac.treasury.gov/contact-ofac>.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: <https://ofac.treasury.gov>.

Notice of OFAC Actions

On December 19, 2024, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authority listed below.

Individuals

1. GOMELAURI, Vakhtang, Varketili 3, 1 Micro Distr, Tbilisi, Georgia; DOB 24 Dec 1975; POB Tbilisi, Georgia; nationality Georgia; Gender Male; Passport 10DP02703 (Georgia) issued 05 Feb 2018 expires 05 Feb 2023; National ID No. 01013018848 (Georgia) (individual) [GLOMAG].

Designated pursuant to section 1(a)(ii)(C)(1) of Executive Order 13818 of December 20, 2017, "Blocking the Property of Persons Involved in Serious Human Rights Abuse or Corruption," (E.O. 13818), 82 FR 60839 (Dec. 26, 2017), for being a foreign person who is or has been a leader or official of an entity, including any government entity, that has engaged in, or whose members have engaged in, serious human rights abuse relating to the leader's or official's tenure.

2. KEZEVADZE, Mirza, Tbilisi, Georgia; DOB 23 May 1980; POB Terjola, Georgia; nationality Georgia; Gender Male (individual) [GLOMAG].

Designated pursuant to section 1(a)(ii)(C)(1) of E.O. 13818 of December 20, 2017, "Blocking the Property of Persons Involved in Serious Human Rights Abuse or Corruption," (E.O. 13818), 82 FR 60839 (Dec. 26, 2017), for being a foreign person who is or has been a leader or official of an entity, including any government entity, that has engaged in, or whose members have engaged

in, serious human rights abuse relating to the leader's or official's tenure.

Lisa M. Palluconi,

Acting Director, Office of Foreign Assets Control.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Multiple Alcohol and Tobacco Tax and Trade Bureau Information Collection Requests

AGENCY: Departmental Offices, Department of the Treasury.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on these requests.

DATES: Comments should be received on or before January 29, 2025 to be assured of consideration.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Copies of the submissions may be obtained from Spencer W. Clark by emailing PHA@treasury.gov, calling (202) 927–5331, or viewing the entire information collection request at www.reginfo.gov.

SUPPLEMENTARY INFORMATION:

Alcohol and Tobacco Tax and Trade Bureau (TTB)

1. *Title:* Drawback on Distilled Spirits Exported.

OMB Control Number: 1513–0042.

Type of Request: Extension without change of a currently approved collection.

Description: Under the Internal Revenue Code (IRC) at 26 U.S.C. 5062, persons who export tax-paid or tax-determined distilled spirits may claim drawback (refund) of the Federal

alcohol excise tax paid on those spirits, as the Secretary of the Treasury prescribes by regulation. Under the TTB regulations in 27 CFR part 28, distilled spirits exporters use TTB F 5110.30 to submit such claims to TTB. The form collects information regarding the claimant, the identity and amount of the distilled spirits exported, and the amount of drawback claimed. This collection is necessary to protect the revenue as TTB uses the information on TTB F 5110.30 and its attached documents to verify distilled spirits export drawback claims, prevent fraudulent or mistaken drawback payments, and identify unusual activities, errors, or omissions regarding such claims.

Form: TTB F 5110.30.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 20.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 360.

Estimated Time per Response: 2 hours.

Estimated Total Annual Burden Hours: 720.

2. *Title:* Application and Permit to Ship Puerto Rican Spirits to the United States Without Payment of Tax.

OMB Control Number: 1513–0043.

Type of Request: Extension without change of a currently approved collection.

Description: The Internal Revenue Code (IRC) at 26 U.S.C. 7652 imposes on Puerto Rican distilled spirits shipped to the United States for consumption or sale a tax equal to the internal revenue (excise) tax imposed in the United States on distilled spirits of domestic manufacture. However, the IRC at 26 U.S.C. 5232 provides that distilled spirits imported or brought into the United States in bulk containers may, under regulations prescribed by the Secretary, be withdrawn from Customs custody and transferred to the bonded premises of a domestic distilled spirits plant without payment of the internal revenue tax imposed on such spirits. The IRC at 26 U.S.C. 5314 also states that spirits may be withdrawn from the bonded premises of a distilled spirits plant in Puerto Rico pursuant to an authorization issued under the laws of Puerto Rico. Under those IRC authorities, TTB has issued regulations in 27 CFR part 26, Liquors and Articles from Puerto Rico and the Virgin Islands, which require respondents to use form TTB F 5110.31 to apply for and receive permission to ship Puerto Rican distilled spirits to the United States without payment of Federal excise tax.

The form identifies the specific spirits to be shipped, the amount of spirits shipped and received, and the shipper's consignee in Puerto Rico and consignee in the United States. The collected information is necessary to protect the revenue.

Form: TTB F 5110.31.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents:

10.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 600.

Estimated Time per Response: 45 minutes.

Estimated Total Annual Burden Hours: 450.

3. *Title:* Distilled Spirits Production Records (TTB REC 5110/01), and Monthly Report of Production Operations.

OMB Control Number: 1513-0047.

Type of Request: Extension without change of a currently approved collection.

Description: The Internal Revenue Code (IRC) at 26 U.S.C. 5001 sets forth, in general, the Federal excise tax rates for distilled spirits produced in or imported into the United States. The IRC at 26 U.S.C. 5207 also requires distilled spirit plant (DSP) proprietors to maintain records of production, storage, denaturation, and processing activities and to render reports covering those operations, as the Secretary of Treasury prescribes by regulation. The TTB regulations in 27 CFR part 19 require DSP proprietors to keep records regarding the materials used to produce distilled spirits, the amount of spirits produced, the withdrawal of spirits from the production account, and the production of spirits byproducts, which must be maintained for at least 3 years. Based on those records, the part 19 regulations also require DSP proprietors to submit monthly reports of production operations using TTB F 5110.40. This collection is necessary to protect the revenue as TTB uses the collected information to account for the amount of distilled spirits produced at a DSP, and to determine the proprietor's resulting excise tax liability and the amount of bond coverage needed, if such coverage is required.

Form: TTB F 5110.40.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 4,800.

Frequency of Response: Monthly.

Estimated Total Number of Annual Responses: 57,600.

Estimated Time per Response: 2 hours.

Estimated Total Annual Burden Hours: 115,200.

4. *Title:* Wholesale Dealers Records of Receipt of Alcoholic Beverages, Disposition of Distilled Spirits, and Monthly Summary Report, TTB REC 5170/2.

OMB Control Number: 1513-0065.

Type of Request: Extension without change of a currently approved collection.

Description: The Internal Revenue Code (IRC) at 26 U.S.C. 5121 requires wholesale dealers in liquors to keep daily records of all distilled spirits received and disposed of, and, at the Secretary of the Treasury's discretion, to submit periodic summaries of those daily records. That IRC section also requires wholesale dealers in liquors and wholesale dealers in beer to keep daily records of all wine and beer received. Section 5121 also authorizes the Secretary to issue regulations regarding the keeping and submission of these records and summary reports by such wholesale dealers. In addition, the IRC at 26 U.S.C. 5123 sets forth retention and inspection requirements for the required wholesale dealer records and reports. Under these IRC authorities, TTB has issued regulations applicable to wholesale dealers, which are contained in 27 CFR part 31. Those regulations require wholesale dealers to keep usual and customary business records, such as consignment and purchase invoices, documenting their daily receipt and disposition of distilled spirits and their daily receipt of wine and beer. TTB, at its discretion, also may require a particular wholesale liquor dealer to submit monthly summary reports regarding all distilled spirits received and disposed of on a daily basis. In addition, the TTB regulations require that wholesaler dealers keep the required records and copies of any required monthly summary reports at their place of business, available for TTB inspection, for at least 3 years.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 36,500.

Frequency of Response: On occasion, Monthly.

Estimated Total Number of Annual Responses: 37,100.

Estimated Time per Response: 2 hours per monthly report for 50 wholesale dealers. No burden for recordkeeping as these are kept as part of usual and customary business practice.

Estimated Total Annual Burden Hours: 1,200.

5. *Title:* Alcohol, Tobacco, and Firearms Related Documents for Tax Returns and Claims (TTB REC 5000/24).

OMB Control Number: 1513-0088.

Type of Request: Extension without change of a currently approved collection.

Description: The Alcohol and Tobacco Tax and Trade Bureau (TTB) is responsible for the collection of Federal excise taxes on distilled spirits, wine, beer, tobacco products, cigarette papers and tubes, and firearms and ammunition, and the collection of special occupational taxes related to tobacco products and cigarette papers and tubes. The Internal Revenue Code (IRC, 26 U.S.C.) requires that such taxes be collected on the basis of a return, and it requires taxpayers to maintain records that document the information provided on such returns. The IRC also allows for the filing of claims for the abatement, credit, remission, or refund (drawback) of taxes under certain circumstances, and it requires claimants to maintain records to support such claims. TTB uses the collected information to determine the amount of excise and special occupational taxes rightly due, and to verify respondent computations on tax returns or the correctness of claims for refund or other adjustments to tax liabilities.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 67,000.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 536,000.

Estimated Time per Response: 1 hour.

Estimated Total Annual Burden Hours: 536,000.

6. *Title:* Federal Firearms and Ammunition Quarterly Excise Tax Return.

OMB Control Number: 1513-0094.

Type of Request: Extension without change of a currently approved collection.

Description: The Internal Revenue Code (IRC) at 26 U.S.C. 4181 imposes a Federal excise tax on the sale of pistols, revolvers, other firearms, and shells and cartridges (ammunition) sold by manufacturers, producers, and importers of such articles. The IRC, at 26 U.S.C. 6001, 6011, and 6302, also authorizes the Secretary of the Treasury to issue regulations regarding IRC-based taxes, returns and records, including the mode and time for collecting taxes due. Under this authority, the TTB regulations in 27 CFR part 53 require respondents who have firearms and/or ammunition excise tax liability to submit a quarterly tax return using form

TTB F 5300.26. The information collected on this return is necessary to identify the taxpayer, the amount and type of taxes due, and the amount of payments made. TTB uses the return information to determine whether the taxpayer has paid the correct amount of tax and to take additional action, such as assessment or refund, as necessary.

Form: TTB F 5300.26.

Affected Public: Businesses or other for-profits, Individuals.

Estimated Number of Respondents: 635.

Frequency of Response: Quarterly.

Estimated Total Number of Annual Responses: 2,540.

Estimated Time per Response: 7 hours.

Estimated Total Annual Burden Hours: 17,780.

7. *Title:* Reports of Removal, Transfer, or Sale of Processed Tobacco.

OMB Control Number: 1513–0130.

Type of Request: Extension without change of a currently approved collection.

Description: The Internal Revenue Code (IRC) at 26 U.S.C. 5722 requires importers and manufacturers of tobacco products, processed tobacco, or cigarette papers and tubes to make reports containing such information, in such form, at such times, and for such periods as the Secretary of the Treasury prescribes by regulation. While processed tobacco is not subject to Federal excise tax under the IRC, tobacco products subject to such taxes may be manufactured using processed tobacco. To protect the revenue by preventing diversion of processed tobacco to illegal, unpermitted tobacco product manufacturers, TTB has issued regulations that require persons holding TTB permits as importers or manufacturers of processed tobacco or tobacco products to report all removals, transfers, or sales of processed tobacco made for export or for shipment to any domestic entity that does not hold a such a permit or a permit to operate as an export warehouse proprietor. In general, respondents must report each such shipment by the close of the next business day using form TTB F 5250.2. However, exporters may apply to TTB to report removals made for export using a monthly summary report. TTB F 5250.2 and the monthly summary report require information identifying the TTB permit holder making the processed tobacco shipment, the type and quantity of processed tobacco shipped, the person(s) purchasing (or receiving) and delivering the processed tobacco, and the destination address of the shipment.

Form: TTB F 5250.2.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 50.

Frequency of Response: Monthly, Daily.

Estimated Total Number of Annual Responses: 530.

Estimated Time per Response: 30 minutes for Form 5250.2, 2 hours for monthly summary report.

Estimated Total Annual Burden Hours: 460.

8. *Title:* Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

OMB Control Number: 1513–0132.

Type of Request: Extension without change of a currently approved collection.

Description: The Alcohol and Tobacco Tax and Trade Bureau (TTB) uses the surveys, focus groups, usability tests, and other information collections approved under this generic clearance to gather timely feedback from its customers and stakeholders regarding its programs and services. TTB analyzes the collected information to help improve its programs and service delivery to ensure that regulated persons and others have effective, efficient, and satisfactory experiences when interacting with the agency.

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 25,000.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 25,000.

Estimated Time per Response: 1 hour.

Estimated Total Annual Burden Hours: 25,000.

9. *Title:* Specific and Continuing Export Bonds for Distilled Spirits or Wine.

OMB Control Number: 1513–0135.

Type of Request: Extension without change of a currently approved collection.

Description: The Internal Revenue Code (IRC) at 26 U.S.C. 5175, 5214, and 5362 authorizes exporters (other than proprietors of distilled spirits plants or bonded wine premises) to withdraw distilled spirits and wine, without payment of tax, for export, use on certain vessels or aircraft, transfer to a foreign trade zone, or transfer to a customs bonded warehouse pending exportation, subject to such regulations as the Secretary of the Treasury. Under that IRC authority, to protect the revenue and provide exporters with a degree of flexibility based on individual need, the TTB alcohol export regulations in 27 CFR part 28 allow

exporters to file either a specific bond using TTB F 5100.25 to cover a single export shipment or a continuing bond using TTB F 5100.30 to cover export shipments made from time to time.

Form: TTB F 5100.25, TTB F 5100.30.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 20.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 20.

Estimated Time per Response: 1 hour.

Estimated Total Annual Burden Hours: 20.

Authority: 44 U.S.C. 3501 et seq.

Spencer W. Clark,

Treasury PRA Clearance Officer.

[FR Doc. 2024–31097 Filed 12–27–24; 8:45 am]

BILLING CODE 4810–31–P

DEPARTMENT OF THE TREASURY

Agreement for a Social Impact Partnership Project

AGENCY: Department of the Treasury.

ACTION: Notice.

SUMMARY: In accordance with the Social Impact Partnerships to Pay for Results Act (“SIPRA”), the U.S. Department of the Treasury (“Treasury”) has entered into six agreements for social impact partnership projects (the “Project Grant Agreement”) with the following recipients; (1) City of Boise, ID (\$7.5 million), (2) City of Jacksonville, FL (\$5.8 million), (3) City of New York, NY (\$6.3 million), (4) School Board of Leon County, FL (\$4.6 million), (5) County of New Castle, DE (\$11 million), and (6) County of Spartanburg, SC (\$11.5 million) for a total award amount of \$46.9 million.

SUPPLEMENTARY INFORMATION:

The Project Grant Agreement for the City of Boise, ID (Boise) Contains the Following Features

1. The outcome goals of the social impact partnership project:

Boise expects to realize a reduction in healthcare expenditures covered by Medicaid, including emergency room visits, hospital overnight stays, ambulance rides, detox visits, and savings due to a reduction in arrests and cost associated with county correctional facilities. The project objective is to decrease these expenditures by 25 percent.

2. A description of each intervention in the project:

Boise and its partners (the Idaho Community Foundation (ICF), and Terry Reilly Health Services (TRHS)) propose

the Permanent Supportive Housing Pipeline Pay for Success project (the PSHP). The PSHP will provide Permanent Supportive Housing (PSH) and services using an Intensive Case Management (ICM) model including wrap-around services to 143 prioritized households who are experiencing long-term homelessness and have high service needs. These households are at increased risk for avoidable, high-cost service utilization paid through local, state, and federal outlays.

3. *The target population that will be served by the project:*

The target population is households with and without children experiencing long-term homelessness with at least one household member with at least one morbidity condition (chronic health condition, mental health condition, or substance use) in Ada County, Idaho. In Ada County, 765 households meet these criteria. Boise expects the project to reach 159 adults and 64 children.

4. *The expected social benefits to participants who receive the intervention and others who may be impacted:*

The primary expected social benefits from the project include:

- Reduced rate of homelessness among the most vulnerable populations;
- Reduced utilization of emergency medical services;
- Decreased criminal justice involvement; and
- Increased housing stability and retention.

5. *The detailed roles, responsibilities, and purposes of each Federal, State, or local government entity, intermediary, service provider, independent evaluator, investor, or other stakeholder:*

Role	Entity	Responsibilities
Government	City of Boise, ID	Repay investors with SIPPRA funds if performance benchmarks are met. Coordinate with the Treasury program team on administration of the program.
Intermediary	n/a	n/a.
Service Provider	Terry Reilly Health Services	Facilitate housing accesses with program enrollment into program using coordinated entry referrals. Provide intensive case management. Evaluate the project using a regression discontinuity design.
Independent Evaluator ...	Idaho Policy Institute (IPI), Boise State University.	
Investor	Idaho Community Foundation.	Provide the upfront capital for the program from the Supportive Housing Investment Fund (SHIF).

6. *The payment terms, the methodology used to calculate outcome payments, the payment schedule, and performance thresholds:*

Boise will be eligible for a payment from Treasury if there is a statistically significant difference between the treatment and the comparison group at the 80 percent level using the evaluation

design strategy defined below. Boise is eligible to be paid each year from June 2028 to June 2032 for a total of five eligible payments.

7. *The project budget:*

Project budget	Year 0	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Total
TRHS (Family)	\$254,719	\$764,157	\$802,365	\$842,483	\$884,608	\$928,838	\$975,280	\$341,348	\$5,793,798
TRHS (Adult)		488,710	1,172,903	1,231,548	1,293,125	1,357,782	1,425,671	498,985	7,468,723
Total Project Costs	254,719	1,252,867	1,975,268	2,074,031	2,177,733	2,286,620	2,400,951	840,333	13,262,522

8. *The project timeline:*

There is a seventy-six month-intervention period for the project term to provide IPI with the maximum allowed period to evaluate the impact of this project on the SIPPRA outcome of reduced net federal, state, and local expenditures. The project will begin the

intervention in September 2025 and end in December 2031.

9. *The project eligibility criteria:*

Eligible households must have at least 12 points from the Length of Time and at least 3 points from the Tri-Morbidity sections of the PSHP Prioritization Formula outlined in Table 2. Those households that are both eligible for the

PSHP and score the highest on the prioritization formula will be referred for enrollment. Ties will be broken in through coordinated clinical discretion, driven by self-reported health and criminal data and corroborating system utilization data available at the time of referral.

PSHP prioritization formula	Factor 1	Factor 2	Factor 3
Length of Time Homeless: 22 points max	1 point every month up to 12 months	1 point for every year up to 10 years (10 max).	
FUSE Functionality: 10 points max	5 points max: number of emergency medical interactions.	5 points max: # criminal justice interactions.	
Tri-Morbidity: 9 points max	3 points: chronic illness	3 points: mental illness	3 points: substance use.
DV survivor: 6 points max	3 points: DV within last 6 mo	3 points: currently fleeing DV.	
Dependents: 6 points max	2 points: any dependents in household ...	1 point: kids 6–18	2 points: kids aged 0–5.
Age: 6 points max	2 points: 18–24 yrs	4 points: 55–61 yrs	6 point: 62+ yrs.
Unsheltered: 2 points max	1 point: HoH has been unsheltered more than 50% of last 6 months.	1 point: HoH facing persistent barriers in assessing emergency shelters.	
Income Level: 2 points max	1 point: household sustainable income is at 30% AMI.	2 points: household has zero sustainable income.	
Discrimination: 1 point	1 point: experienced discrimination based on protected class.		

10. The evaluation design:

To determine significance of impact, IPI will employ the following evaluative strategies: (1) a regression discontinuity, (2) Analysis of Variance (ANOVA) omnibus test, and (3) paired pairwise t-test. To determine the amount of any net reductions in local, state, and federal expenditures, IPI will facilitate collection of the utilization and costs data for 36 months prior to Participants entering the intervention (time 0) and annually thereafter. To determine the amount of any net reductions in expenditures, IPI will compare the associated utilization costs for enrolled Participants against those not enrolled using individual-level data.

11. The metrics that will be used in the evaluation to determine whether the outcomes have been achieved as a result of each intervention and how these metrics will be measured:

The metrics used will be:

- Reduction in costs related to arrests and jail.
- Reduction in costs related to the number of days in mental health and substance abuse treatment.
- Reduction in costs associated with paramedic calls, emergency department visits, and days in the hospital.

12. The estimate of the savings to the Federal, State, and local government, on a program-by-program basis and in the aggregate, if the agreement is entered into and implemented and the outcomes are achieved as a result of each intervention:

The estimated savings to the federal government are \$12,434,017.

The estimated savings to the State of Idaho are \$4,034,880.

The estimated savings to the City of Boise are \$1,133,396.

The Project Grant Agreement for the City of Jacksonville, FL (Jacksonville) Contains the Following Features**1. The outcome goals of the social impact partnership project:**

The anticipated outcome goals include substantial improvements in early literacy, parental engagement, and school readiness among preschool-aged children, and measurable reductions in healthcare utilization, especially for newborn ER visits and utilizations connected to maternal depression.

2. A description of each intervention in the project:

The READ JAX project includes two interventions, Family Connects and Reach Out and Read. Family Connects provides a universal nurse home visit

for new parents to reduce infant emergency medical care visits and maternal postpartum depression rates. Reach Out and Read is a universal early literacy initiative through which health care providers coach parents on reading to their children to improve early literacy, parental engagement, and school readiness among preschool-aged children.

3. The target population that will be served by the project:

The READ JAX is available to each newborn and their family within Jacksonville, FL.

4. The expected social benefits to participants who receive the intervention and others who may be impacted:

The primary expected social benefits from the project include:

- Family Connects
 - Lower emergency department visits
 - Reduced hospital readmissions for infants
- Read Out and Read
 - Reduction in maternal depression

5. The detailed roles, responsibilities, and purposes of each Federal, State, or local government entity, intermediary, service provider, independent evaluator, investor, or other stakeholder:

Role	Entity	Responsibilities
Government	City of Jacksonville, FL	Repay investors with SIPRA funds if performance benchmarks are met. Coordinate with the Treasury program team on administration of the program.
Intermediary	Kids Hope Alliance	Provide administrative and operational support.
Project Manager	Institute for Child Success ...	Provide project management services.
Service Provider	Reach Out and Read Florida. Children's Home Society of Florida.	Provide pediatric literacy support for new parents. Provide home visiting services to expectant and new mothers.
Independent Evaluator ...	Riley Institute	Evaluate the project using a quasi-experimental design supported by synthetic control methodology.
Investor	The Community Outcome Fund at Maycomb Capital Partners.	Provide the upfront capital.

6. The payment terms, the methodology used to calculate outcome payments, the payment schedule, and performance thresholds:

Jacksonville will be eligible for a payment from Treasury if there is a reduction in newborn emergency room visits and a reduction in treating

complications from postpartum depression.

7. The project budget:

Project budget							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Total project costs
\$4,500,000	\$4,500,000	\$4,500,000	\$4,500,000	\$4,500,000	\$4,500,000	\$4,500,000	\$31,500,000

8. The project timeline:

There is a seven-year intervention period. The project will begin the intervention in year two (2025) and end in year seven (2030).

9. The project eligibility criteria:

The project program is open to all young, low-income mothers residing within the City of Jacksonville, FL

10. The evaluation design:

Given the universal deployment of Reach Out and Read and Family

Connects across Jacksonville, traditional randomized trials are impractical. Therefore, a Synthetic Control Method (SCM) will be utilized, facilitating a rigorous comparison against control units drawn from similar demographic

and geographic locales without the intervention.

11. *The metrics that will be used in the evaluation to determine whether the outcomes have been achieved as a result of each intervention and how these metrics will be measured:*

The metric used will be the reduction in costs related to newborn ER visits and postpartum depression.

12. *The estimate of the savings to the Federal, State, and local government, on a program-by-program basis and in the aggregate, if the agreement is entered into and implemented and the outcomes are achieved as a result of each intervention:*

The estimated savings to the federal government is \$11,202,009.

The estimated savings to the State of Florida is \$4,876,774.

The Project Grant Agreement for the City of New York, NY (New York City) Contains the Following Features

1. *The outcome goals of the social impact partnership project:*

The expected outcome for this intervention is a 25-percentage point increase in the rate of stable housing or stable shelter (achieving 50% for the treatment group versus 25% of the comparison group) with stable housing defined as a permanent housing placement (e.g., permanent supportive housing, Long Term Nursing Care, family reunification) and stable shelter defined as a continuous stay in a low-barrier stabilization bed or other emergency housing setting that lasts at least 6 months.

2. *A description of each intervention in the project:*

The Coordinated Behavioral Task Force (CBHT)—3 Initiative by the New York City Department of Homeless Services (DHS) is a project to assist different segments of the unsheltered homeless population in New York City by providing homeless individuals with transitional housing and connecting them to services through intensive outreach, engagement, and care coordination. This project is focused on clients who are resistant to service engagement or entrenched in an unsheltered setting. The CBHT model coordinates representatives from State and local agencies and organizations to provide enhanced clinical and thorough case management services and to create service plans which will move the individual into supportive housing and connections to services through targeted interventions.

3. *The target population that will be served by the project:*

This program targets high acuity (e.g., severity of an illness or medical condition) individuals experiencing unsheltered homelessness. DHS expects to enroll about 400 individuals aged 18 or older experiencing unsheltered homelessness in New York City over 2-years, with services provided for up to a 39-month intervention period.

4. *The expected social benefits to participants who receive the intervention and others who may be impacted:*

New York City anticipates that this intervention will lead to improvements in quality of life associated with improved housing stability, increased access to healthcare, and decreased burden of disease. In addition, New York City expects that the improvements to the individual’s housing stability will lower government spending related to emergency room visits and criminal justice systems interactions. Reducing unsheltered homelessness among this vulnerable population is expected to have a wide range of broader social benefits as well, including improved conditions on public transit (especially increased cleanliness and perceived safety, which could lead to increased ridership), and improved conditions in other public spaces.

5. *The detailed roles, responsibilities, and purposes of each Federal, State, or local government entity, intermediary, service provider, independent evaluator, investor, or other stakeholder:*

Role	Entity	Responsibilities
Government	City of New York, NY—Department of Homeless Services.	Coordinate with the Treasury program team on administration of the program. Also serves as the investor of the program.
Intermediary	NYC Department of Health and Mental Hygiene (DOHMH), NYC Health and Hospitals (H+H).	Actively participate in CBHT meetings. Review eligibility of CBHT participants for key service interventions and facilitate enrollment as applicable (e.g., DOHMH: IMT, AOT, ACT Programs; H+H: CPEP, THU).
Service Provider	Bowery Residents Committee, Manhattan Outreach Consortium, Project Hospitality, Bronxworks, Breaking Ground Queens, and Breaking Ground Brooklyn.	Contracted outreach teams that will provide the services to the target population.
Independent Evaluator ...	TBD	Evaluate the project using a combination of propensity score matching and random assignment.

6. *The payment terms, the methodology used to calculate outcome payments, the payment schedule, and performance thresholds:*

New York City will be eligible for payments from Treasury if there is a statistically significant difference between the treatment and the comparison group at the 80 percent level using the evaluation design strategy defined below.

7. *The project budget:*

	2025	2026	2027	2028	2029	Total
Project costs	\$1,539,209	\$1,539,209	\$1,044,462	\$563,129	\$12,720	\$4,698,729

8. *The project timeline:*

This project has a five-year project timeline from January 1, 2025, through December 31, 2029. The project intervention period, defined as the period in which services will be delivered, will be 39 months, from July 1, 2025, through September 30, 2028.

9. *The project eligibility criteria:*

The CBHT–3 initiative will include 3 task forces serving high needs individuals experiencing unsheltered homelessness: High Needs Individuals—Subway System, High

Needs Individuals—Above Ground, and End of Line (EOL) High Service Utilizers. Eligibility criteria for the first two task forces were determined by DHS in collaboration with operational and social services partners. Based on recommendations from DHS's partners, it was determined that in order to be selected for inclusion in the Subway System or Above Ground CBHT, an individual would have to meet 4 of 10 criteria related to medical vulnerability, older age, long-term street homelessness, a history of hospitalizations, a history of involuntary removals, repeated service refusal, significant behavioral health diagnosis, heightened NYPD/MTA interactions, excessive belongings with them, and propensity for violence.

Eligibility criteria for the EOL High Utilizers Task Force were developed based on early outcomes from the DHS EOL initiative. The EOL initiative focuses on engaging individuals at “End of line” stations—that is, the first and last stations of a given subway line—and bringing individuals into transitional housing beds. A January 2024 study by the DSS Office of Evaluation and Research identified a small group of individuals that repeatedly cycled between transitional housing and EOL stations. While accounting for less than 6% of approximately 5,000 unique clients served by the EOL initiative during a 17-month study period, this group accounted for roughly *one-third* of all transitional housing placements made in that time. This population will serve as the target population for the EOL task force.

10. The evaluation design:

The evaluation will employ a quasi-experimental design to rigorously assess the CBHT–3 Initiative's effectiveness in achieving its goal of stably housing individuals with complex health and mental health needs and long histories of unsheltered homelessness. Specifically, the evaluation will assess whether the initiative meets the outcome target of a 25-percentage point increase in the rate of stable housing or stable shelter. The initiative expects to achieve this impact by transitioning 50% of the treatment group into stable housing as compared to a 25% rate among the comparison group, with stable housing defined as a permanent

housing placement and stable shelter defined a continuous stay in a low-barrier stabilization bed or other emergency housing setting that lasts at least 6 months. The evaluation will also measure any associated reductions in hospitalization (after an expected initial increase to stabilize health and mental health conditions), emergency room visits, transports to emergency housing, and arrests. An implementation evaluation will offer further insight into the initiative's activities and participants' experiences. Comparison groups for the Subway System and Above Ground task force clients will be identified using propensity score matching, drawing on a rich set of longitudinal case management data to ensure matched groups. A comparison group for the EOL task force will be identified using random assignment from among those repeatedly cycling through the EOL initiative.

11. The metrics that will be used in the evaluation to determine whether the outcomes have been achieved as a result of each intervention and how these metrics will be measured:

Whether New York City has successfully transitioned 50% of the treatment group into stable housing or stable shelter as compared to a 25% rate among the comparison group, with stable housing defined as a permanent housing placement and stable shelter defined as a continuous stay in a low-barrier stabilization bed or other emergency housing setting that lasts at least 6 months.

12. The estimate of the savings to the Federal, State, and local government, on a program-by-program basis and in the aggregate, if the agreement is entered into and implemented and the outcomes are achieved as a result of each intervention:

The estimated savings to the federal government are \$19,893,775.

The estimated savings to the State of New York are \$9,912,081.

There are not estimated savings to the City of New York.

The total net savings are \$23,822,017.

The Project Grant Agreement for the School Board of Leon County, FL (Leon County) Contains the Following Features

1. The outcome goals of the social impact partnership project:

Leon County will seek outcomes from two interventions, (1) Family Connects, a universal postpartum nurse home visiting program under which Leon County expects to see a significant reduction in newborn emergency room visits and (2), Reach Out and Read a literacy initiative working through pediatric care providers which seeks to reduce maternal depression.

2. A description of each intervention in the project:

As stated above, Leon County's project has two interventions. The first, Family Connects, is a universal nurse home visit for new parents to reduce infant emergency medical care visits and maternal postpartum depression rates. The second, Reach Out and Read, is a universal early literacy initiative through which health care providers coach parents on reading to their children to improve early literacy, parental engagement, and school readiness among preschool-aged children.

3. The target population that will be served by the project:

The program is designed with an inclusive, universal approach to serve all families with newborns and young children in Leon County, with a specific emphasis on ensuring that low-income families benefit from early interventions that are crucial for the health and development of their children.

4. The expected social benefits to participants who receive the intervention and others who may be impacted:

The primary expected social benefits from the project include:

- Family Connects
 - Lower number of emergency department visits
 - Reduced hospital readmissions for infants
- Reach Out and Read
 - Reduction in maternal depression

5. The detailed roles, responsibilities, and purposes of each Federal, State, or local government entity, intermediary, service provider, independent evaluator, investor, or other stakeholder:

Role	Entity	Responsibilities
Government	Leon County Public Schools, FL	Repay investors with SIPPRAs funds if performance benchmarks are met. Coordinate with the Treasury program team on administration of the program.
Intermediary	Institute for Child Success	Project Manager.

Role	Entity	Responsibilities
Service Provider	Capital Area Healthy Start Coalition	Provide community-based doulas to expecting mothers.
Independent Evaluator ...	Reach Out and Read	Provide pediatric literacy to new families.
Investor	Florida Center for Reading Research, Florida State University.	Evaluate the project using a quasi-experimental design supported by synthetic control methodology.
	Maycomb Capital Partners	Provide the upfront capital.

6. *The payment terms, the methodology used to calculate outcome payments, the payment schedule, and performance thresholds:*

Leon County will be eligible for a payment from Treasury if there is an expected decrease in infant emergency medical care usage rates through the

Family Connects program and a reduction in maternal depression.

7. *The project budget:*

Project budget							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Total project costs
	\$466,666.00	\$706,666.80	\$706,666.80	\$706,666.80	\$706,666.80	\$1,306,666.80	\$4,600,000.00

8. *The project timeline:*

There is a seven-year intervention period. The project will begin the intervention in year two (2025) and end in year seven (2030), allowing for sufficient time for the independent evaluator to compete their assessment.

9. *The project eligibility criteria:*

The project is providing universal access to every family with newborns and young children within Leon County.

10. *The evaluation design:*

The use of quasi-experimental design is particularly suitable given the non-randomizable nature of the interventions being assessed. The use of synthetic control methodology accommodates the study's needs by allowing the integration of multiple data points (encompassing both health and educational metrics) to create a holistic view of each participant group. This methodology not only supports the establishment of a strong causal linkage between the interventions and observed outcomes but also provides a detailed counterfactual analysis.

11. *The metrics that will be used in the evaluation to determine whether the outcomes have been achieved as a result of each intervention and how these metrics will be measured:*

The number of emergency room visits per newborn, the prevalence of depressive symptoms among mothers, assessed at regular intervals, and school readiness indicators such as school

entry assessments and teacher evaluations of readiness.

12. *The estimate of the savings to the Federal, State, and local government, on a program-by-program basis and in the aggregate, if the agreement is entered into and implemented and the outcomes are achieved as a result of each intervention:*

The estimated savings to the federal government is \$11,418,762.

The estimated savings to the State of Florida is \$5,132,751.

The Project Grant Agreement for the County of New Castle, DE (New Castle County) Contains the Following Features

1. *The outcome goals of the social impact partnership project:*

The expected outcomes include a 26.1% increase in permanent housing retention (proportion of families living in own rental home) and 29.7% decrease in avoidance of shelter stays (proportion of families with at least one night in emergency shelter).

2. *A description of each intervention in the project:*

The Family Housing Opportunities for Purposeful Empowerment Project (the Family HOPE Project)—a partnership between New Castle County and the Hope Center, an emergency shelter—will provide up to 90 days of temporary housing at the Hope Center, two years of rental assistance (disbursed as direct cash payments), and two years of case management and supportive services

(such as financial counseling) for 120 families over about four years.

3. *The target population that will be served by the project:*

The target population is homeless families who are not currently receiving a rental subsidy, housing voucher, or other form of public housing and have a household income less than 50% of the Area Median Income (AMI) in New Castle County.

4. *The expected social benefits to participants who receive the intervention and others who may be impacted:*

The program aims to reduce family homelessness by (1) improving permanent housing retention and (2) decreasing emergency shelter stays. Through permanent housing retention, the Recipient expects to reduce state and local expenditures on (a) the judicial and legal system cost of intimate partner violence, (b) police protection costs of intimate partner violence, (c) costs to child welfare agencies of out-of-home placements, and (d) reductions from eviction-related costs. The Recipient also expects that reducing shelter stays will lower federal, state, and local expenditures on emergency shelter stays, transitional housing stays, and public-school transportation.

5. *The detailed roles, responsibilities, and purposes of each Federal, State, or local government entity, intermediary, service provider, independent evaluator, investor, or other stakeholder:*

Role	Entity	Responsibilities
Government	County of New Castle, DE ..	Repay investors with SIPRA funds if performance benchmarks are met.
Intermediary	Social Finance	Coordinate with the Treasury program team on administration of the program.
		Serve as financial intermediary, leading project design and contracting activities.
		Provide performance management services and facilitate governance committees.
Service Provider	New Castle County Hope Center.	Lead service provisions through providing emergency shelter stay to eligible families, coordination of rental assistance, and ongoing case management.

Role	Entity	Responsibilities
Independent Evaluator ...	Tech Impact, Data Innovation Lab.	Lead outreach and enrollment of families. Report data and coordinate with the Evaluator and Intermediary, as needed. Evaluate the project using propensity score matching.
Investors	private and philanthropic investors.	Provide upfront funding to support service provision.

6. *The payment terms, the methodology used to calculate outcome payments, the payment schedule, and performance thresholds:*

New Castle County will be eligible for a payment from Treasury if there is a

statistically significant difference between the treatment and the comparison group at the 80 percent level using the evaluation design strategy defined below. Outcome payments will be generated from 2026

to 2031 for a total of six planned payments.

7. *The project budget:*

Project budget						
	2025	2026	2027	2028	2029	Total
Project costs	\$864,710	\$2,044,595	\$2,248,966	\$1,076,581	\$220,000	\$7,844,268

8. *The project timeline:*

This project has a 7.25-year project timeline from January 1, 2025, through March 31, 2032. The project intervention period, defined as the period in which services will be delivered, will be 66 months, from July 1, 2025, through December 31, 2031.

9. *The project eligibility criteria:*

Participants are eligible if they are a family who (1) have at least one adult, aged 19 and older, and one or more children, aged 15 and younger, upon enrollment (inclusive of pregnant caregivers), (2) have family household income under 50% of the Area Median Income (AMI) in New Castle County, and (3) are not currently receiving a rental subsidy, housing voucher, or other form of public housing. Sex offenders are not eligible for the Family HOPE Project.

10. *Evaluation design:*

The study is a quasi-experimental design that compares the housing security outcomes of two groups: (1) a program group who receives a 2-year 90% fair market rent (FMR) monthly cash assistance following a temporary maximum 90-day stay at the Hope Center (n=120) and (2) a household socio-demographic matched control group sourced from CMIS, which is composed of families on any waitlist for the Delaware State Housing Authority (DSHA)—or local-level housing authorities in New Castle County—Public Housing and Housing Choice Voucher Program as well as with start and exit dates to any housing program (e.g., emergency shelters, temporary housing, rapid re-housing) that match our study inclusion period (n=120). They will randomize controls at the family unit but will observe outcomes at

the individual participant family head of household level, potentially boosting the study's power. There are 2 independent matched groups of 60 in this overall study, totaling 120 controls and 120 families receiving cash rental assistance. Cohort 1 begins in Q3 of 2025, with cohort 2 following a year later, begins in Q3 of 2026. The design incorporates one-to-one propensity score matching.

11. *The metrics that will be used in the evaluation to determine whether the outcomes have been achieved as a result of each intervention and how these metrics will be measured:*

The following metrics will be used:

- *Permanent Housing Retention:* The proportion of families ultimately living in their own rental home
- *Avoidance of the Shelter Stay:* The proportion of families with at least 1 night in emergency shelter

12. *The estimate of the savings to the Federal, State, and local government, on a program-by-program basis and in the aggregate, if the agreement is entered into and implemented and the outcomes are achieved as a result of each intervention:*

The estimated savings to the federal government are \$269,257.

The estimated savings to the State of Delaware are \$12,843,519.

The estimated savings to the County of New Castle are \$361,404.

The Project Grant Agreement the County of Spartanburg, SC (County of Spartanburg) Contains the Following Features

1. *The outcome goals of the social impact partnership project:*

The Hello Family Spartanburg County Expansion seeks to address critical early

childhood and family development needs across Spartanburg County. Building on the Hello Family Initiative launched in the City of Spartanburg in 2021, this county-wide project seeks to enhance access to prenatal care, support healthy birth outcomes, incentivize breastfeeding, and reduce preventable medical interventions and child maltreatment through two different interventions: the BirthMatters Community Doula Program (BirthMatters) and Family Connects.

2. *A description of each intervention in the project:*

The County of Spartanburg will address critical early childhood and family development needs by expanding their *Hello Family* program county-wide. The *Hello Family* program has two different interventions: the BirthMatters Community Doula Program and Family Connects. BirthMatters enhances access to prenatal care through doula services until the infant is 12 months old. Family Connects' nurses are trained to assess newborns and mothers, provide immediate medical care when necessary, and recommend other supportive services as needed.

3. *The target population that will be served by the project:*

Family Connects is open to all mothers, and all young, low-income mothers are eligible for BirthMatters within Spartanburg County.

4. *The expected social benefits to participants who receive the intervention and others who may be impacted:*

The primary expected social benefits from the project include:

- BirthMatters
 - Reduced cesarean deliveries

- Increased breastfeeding rates
 - Improved maternal-infant bonding
 - Family Connects
 - Lower emergency department visits
- Reduced hospital readmissions for infants

5. The detailed roles, responsibilities, and purposes of each Federal, State, or
- local government entity, intermediary, service provider, independent evaluator, investor, or other stakeholder:

Role	Entity	Responsibilities
Government	County of Spartanburg, SC	Repay investors with SIPBRA funds if performance benchmarks are met. Coordinate with the Treasury program team on administration of the program.
Intermediary	Institute for Child Success	Fiscal and project manager.
Service Provider	BirthMatters	Provide community-based doulas to expecting mothers.
	Family Connects	Provide nurse-led home visits.
Independent Evaluator ...	Urban Institute	Evaluate the project using a quasi-experimental design supported by synthetic control methodology.
Independent Validator	Riley Institute	Ensure the integrity and accuracy of project data through validation.
Investor	Maycomb Capital Partners, Spartanburg Academic Movement.	Provide the upfront capital.

6. The payment terms, the methodology used to calculate outcome payments, the payment schedule, and performance thresholds:

County of Spartanburg will be eligible for a payment from Treasury if there is an expected decrease in low birthweight births through the BirthMatters program

and an expected reduction of infant emergency medical care usage rates through the Family Connects program.

7. The project budget:

Project budget							
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Total project costs
\$1,400,000	1,400,000	\$1,400,000	\$1,400,000	\$1,400,000	\$1,400,000	\$1,500,000	\$9,900,000

8. The project timeline:

There is a seven-year intervention period. The project will begin the intervention in year two (2025) and end in year seven (2030), allowing for sufficient time for the independent evaluator to compete their assessment.

9. The project eligibility criteria:

The BirthMatters program is open to all young, low-income mothers residing in Spartanburg County. The Family Connects program is open to all mothers in Spartanburg County.

10. The evaluation design:

The choice of a Quasi-Experimental Design (QED), supported by Synthetic Control Methodology (SCM), is driven by the need for an assessment framework that allows for the control of confounding variables in non-randomized environments, especially given the prospect of bringing to scale models that are offered to all families. This evaluation seeks to quantify the effects of targeted interventions on key parameters such as Kindergarten Readiness and specific health outcomes indicative of infant and maternal health.

11. The metrics that will be used in the evaluation to determine whether the outcomes have been achieved as a result of each intervention and how these metrics will be measured:

The metrics used in the evaluation include costs associated with a reduction in newborn ER visits and a

reduction in costs associated with low birthweight.

12. The estimate of the savings to the Federal, State, and local government, on a program-by-program basis and in the aggregate, if the agreement is entered into and implemented and the outcomes are achieved as a result of each intervention:

The estimated savings to the federal government is \$11,2029.

The estimated savings to the State of South Carolina is \$4,876,774.

Eric Van Nostrand,
P.D.O. Assistant Secretary for Economic Policy Department of the Treasury.

BILLING CODE 4810-AK-P

DEPARTMENT OF THE TREASURY

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Multiple Fiscal Service Information Collection Requests

AGENCY: Departmental Offices, Department of the Treasury.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on these requests.

DATES: Comments should be received on or before January 29, 2025 to be assured of consideration.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained from Spencer W. Clark by emailing PRA@treasury.gov, calling (202) 927–5331, or viewing the entire information collection request at www.reginfo.gov.

SUPPLEMENTARY INFORMATION:

Bureau of the Fiscal Service

1. Title: Claim Against the United States for the Proceeds of a Government Check.

OMB Control Number: 1530–0010.

Type of Request: Extension without change of a currently approved collection.

Description: The information in this collection is needed to process an individual's claim for non-receipt of proceeds from a U.S. Treasury check or electronic benefit payments. Once the information is analyzed, a determination is made, and a recommendation is submitted to the program agency to either settle or deny the claim.

Form: FS 1133.

Affected Public: Individuals and households.

Estimated Number of Respondents: 81,000.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 81,000.

Estimated Time per Response: 10 minutes.

Estimated Total Annual Burden Hours: 13,500.

2. *Title:* Disclaimer and Consent with Respect to United States Savings Bond/Notes.

OMB Control Number: 1530-0059.

Type of Request: Extension without change of a currently approved collection.

Description: Used to obtain a disclaimer and consent as the result of an error in registration or otherwise the payment, refund of the purchase price, or reissue as requested by one person would appear to affect the right, title or interest of some other person.

Form: FS 1849.

Affected Public: Individuals and households.

Estimated Number of Respondents: 450.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 450.

Estimated Time per Response: 6 minutes.

Estimated Total Annual Burden Hours: 45.

3. *Title:* Checklists of Filings for Certified Surety and/or Certified Reinsuring Companies and for Admitted Reinsurer Companies.

OMB Control Number: 1530-0061.

Type of Request: Extension without change of a currently approved collection.

Description: This information is collected from insurance companies to provide Treasury a basis to determine acceptability of companies applying for a Certificate of Authority to write or reinsure Federal surety bonds or as an Admitted Reinsurer (not on excess risks to U.S.).

Form: None.

Affected Public: Businesses or other for-profits.

Estimated Number of Respondents: 30.

Frequency of Response: On occasion.
Estimated Total Number of Annual Responses: 30.

Estimated Time per Response: 5 hours.

Estimated Total Annual Burden Hours: 150.

4. *Title:* Subscription For Purchase and Issue of U.S. Treasury Securities—State and Local Government Series.

OMB Control Number: 1530-0065.

Type of Request: Extension without change of a currently approved collection.

Description: The information is necessary to establish and maintain the accounts for owners of securities of State and Local Government Series.

Form: FS Form 4144, FS Form 4144-1, FS Form 4144-2, FS Form 4144-5, FS Form 4144-6, FS Form 4144-7, FS Form 5237, FS Form 5238, FS Form 5377.

Affected Public: State, Local and Tribal Governments.

Estimated Number of Respondents: 7,105.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 7,105.

Estimated Time per Response: 23 minutes.

Estimated Total Annual Burden Hours: 2,706.

Authority: 44 U.S.C. 3501 *et seq.*

Spencer W. Clark,

Treasury PRA Clearance Officer.

BILLING CODE 4810-AS-P

UNITED STATES SENTENCING COMMISSION

Sentencing Guidelines for United States Courts

AGENCY: United States Sentencing Commission.

ACTION: Request for public comment.

SUMMARY: The United States Sentencing Commission intends to examine the criteria it considers in selecting guideline amendments that may be applied retroactively under the *Guidelines Manual*. As part of its statutory authority and responsibility to analyze sentencing issues, including operation of the federal sentencing guidelines, the Commission is publishing these issues for comment to inform the Commission's consideration of the issues related to this topic. The issues for comment are set forth in the Supplementary Information portion of this notice.

DATES: Public comment regarding the issues for comment set forth in this

notice should be received by the Commission not later than April 18, 2025. Any public comment received after the close of the comment period may not be considered.

ADDRESSES: There are two methods for submitting public comment.

Electronic Submission of Comments. Comments may be submitted electronically via the Commission's Public Comment Submission Portal at <https://comment.ussc.gov>. Follow the online instructions for submitting comments.

Submission of Comments by Mail. Comments may be submitted by mail to the following address: United States Sentencing Commission, One Columbus Circle NE, Suite 2-500, Washington, DC 20002-8002, Attention: Public Affairs—Retroactivity Criteria.

FOR FURTHER INFORMATION CONTACT: Jennifer Dukes, Senior Public Affairs Specialist, (202) 502-4597.

SUPPLEMENTARY INFORMATION: The United States Sentencing Commission is an independent agency in the judicial branch of the United States Government. The Commission promulgates sentencing guidelines and policy statements for federal courts pursuant to 28 U.S.C. 994(a). The Commission also periodically reviews and revises previously promulgated guidelines pursuant to 28 U.S.C. 994(o) and submits guideline amendments to the Congress not later than the first day of May each year pursuant to 28 U.S.C. 994(p).

The Background Commentary to § 1B1.10 (Reduction in Term of Imprisonment as a Result of Amended Guideline Range (Policy Statement)) provides a non-exhaustive list of criteria the Commission typically considers in selecting the amendments to be included in § 1B1.10(d) for retroactive application: “the purpose of the amendment, the magnitude of the change in the guideline range made by the amendment, and the difficulty of applying the amendment retroactively to determine an amended guideline range under subsection (b)(1).” USSG § 1B1.10, comment. (backg’d). This non-exhaustive list of criteria has remained substantively unchanged since the Commission originally promulgated the policy statement at § 1B1.10 in 1989.

Issues for Comment:

1. The Commission seeks comment on whether it should provide further guidance on how the existing criteria for determining whether an amendment should apply retroactively are applied. If so, what should that guidance be? Should it revise or expand the criteria? Are there additional criteria that the

Commission should consider beyond those listed in the existing Background Commentary to § 1B1.10? Are there identifiable sources that the Commission should consult that highlight retroactivity criteria relied upon by other legislative or rulemaking bodies?

If the Commission continues to list criteria relevant to determining whether an amendment should apply retroactively, should it adopt any bright-line rules? Is there a different approach that the Commission should consider for these purposes?

2. The Commission seeks comment on whether any listed criteria are more appropriately addressed in the Commission's Rules of Practice and Procedure rather than the Background Commentary to § 1B1.10.

3. Rule 4.1A (Retroactive Application of Amendments) of the Commission's Rules of Practice and Procedure provides "[g]enerally, promulgated amendments will be given prospective application only." The Commission seeks comment on whether it should retain this provision. If so, how should the Commission ensure that any listed criteria reflect this provision?

Authority: 28 U.S.C. 994(a), (o), (p), (x); USSC Rules of Practice and Procedure 2.2, 4.3, 4.4.

Carlton W. Reeves,
Chair.

BILLING CODE 2210-40-P

DEPARTMENT OF VETERANS AFFAIRS

Enhanced-Use Lease of Department of Veterans Affairs Real Property for the Development of Permanent Supportive Housing at the Charlie Norwood Uptown Veterans Affairs Medical Center, Augusta, Georgia Campus

AGENCY: Department of Veterans Affairs.

ACTION: Notice of intent to enter into an enhanced-use lease.

SUMMARY: The purpose of this **Federal Register** notice is to provide the public with notice that the Secretary of Veterans Affairs (VA) intends to enter into an Enhanced-Use Lease (EUL) of Buildings 19 and 20 on approximately 2.46 acres of underutilized land on the campus of the Charlie Norwood Uptown VA Medical Center.

FOR FURTHER INFORMATION CONTACT: C. Brett Simms, Executive Director, Office of Asset Enterprise Management, Office of Management, 810 Vermont Avenue NW, Washington, DC 20420, (202) 502-0262. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Pursuant to 38 U.S.C. 8161, *et seq.* as amended by Public Law 117-168, the Secretary of Veterans Affairs is authorized to enter into an EUL, for a term of up to 99 years, that (a) provides supportive housing for Veterans and their families, or (b) enhances the use of the leased property by directly or indirectly benefitting Veterans. In addition, the EUL must not be inconsistent with and not adversely affect VA's mission or the operation of VA's facilities, programs, and services in the area of the leased property. Consistent with this authority, the Secretary intends to enter into an EUL for the purpose of outleasing Buildings 19 and 20 on approximately 2.46 acres of underutilized land on the campus of the Charlie Norwood Uptown VA Medical Center, to develop approximately 77 units of permanent supportive housing for Veterans and their families. The competitively selected EUL lessee/developer, Freedom's Path Augusta III, LP will finance, design, develop, renovate, construct, manage, maintain, and operate housing for eligible homeless Veterans or Veterans at risk of homelessness on a priority placement basis. In addition, the lessee/developer will be required to provide supportive services that guide Veteran residents towards long-term independence and self-sufficiency.

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved and signed this document on December 19, 2024, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

Luvenia Potts,

Regulation Development Coordinator, Office of Regulation Policy & Management, Office of General Counsel, Department of Veterans Affairs.

[FR Doc. 2024-30961 Filed 12-27-24; 8:45 am]

BILLING CODE 8320-01-P

DEPARTMENT OF VETERANS AFFAIRS

Notice of Request for Information on the Department of Veterans Affairs Rehabilitation Counselor Standard of Practice

AGENCY: Department of Veterans Affairs.

ACTION: Request for Information.

SUMMARY: The Department of Veterans Affairs is requesting information to assist in developing a national standard

of practice for VA Rehabilitation Counselors. VA seeks comments on various topics to help inform VA's development of this national standard of practice.

DATES: Comments must be received on or before February 28, 2025.

ADDRESSES: Comments must be submitted through <https://www.regulations.gov/> Except as provided below, comments received before the close of the comment period will be available at <https://www.regulations.gov/> for public viewing, inspection, or copying, including any personally identifiable or confidential business information that is included in a comment. We post the comments received before the close of the comment period on the following website as soon as possible after they have been received: <https://www.regulations.gov/>. VA will not post on <https://www.regulations.gov/> public comments that make threats to individuals or institutions or suggest that the commenter will take actions to harm the individual. VA encourages individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments. Any public comment received after the comment period's closing date will not be considered.

FOR FURTHER INFORMATION CONTACT:

Ethan Kalett, Office of Regulations, Appeals and Policy (10BRAP), Veterans Health Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, 202-461-0500. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

Authority

Chapters 73 and 74 of 38 U.S.C. and 38 U.S.C. 303 authorize the Secretary to regulate VA health care professions to make certain that VA's health care system provides safe and effective health care by qualified health care professionals to ensure the well-being of those Veterans who have borne the battle.

On November 12, 2020, VA published an interim final rule confirming that VA health care professionals may practice their health care profession consistent with the scope and requirements of their VA employment, notwithstanding any state license, registration, certification, or other requirements that unduly interfere with their practice. 38 CFR 17.419; 85 FR 71838. Specifically, this rulemaking confirmed VA's current practice of permitting VA health care professionals to deliver health care

services in a state other than the health care professional's state of licensure, registration, certification, or other requirement, thereby enhancing beneficiaries' access to critical VA health care services. The rulemaking also confirmed VA's authority to establish national standards of practice for its health care professionals, which would standardize a health care professional's practice in all VA medical facilities, regardless of conflicting state laws, rules, regulations, or other requirements.

The rulemaking explained that a national standard of practice describes the tasks and duties that a VA health care professional practicing in the health care profession may perform and may be permitted to undertake. Having a national standard of practice means that individuals from the same VA health care profession may perform the same type of tasks and duties regardless of the state where they are located or the state license, registration, certification, or other requirement they hold. We emphasized in the rulemaking and reiterate here that VA will determine, on an individual basis, that a health care professional has the proper education, training, and skills to perform the tasks and duties detailed in the national standard of practice, and that they will only be able to perform such tasks and duties after they have been incorporated into the individual's privileges, scope of practice, or functional statement. The rulemaking explicitly did not create any such national standards and directed that all national standards of practice would be subsequently created via policy.

Preemption of State Requirements

The national standard of practice will preempt any state laws, rules, regulations, or other requirements that both are and are not listed in the national standard as conflicting, but that do conflict with the tasks and duties as authorized in VA's national standard of practice. The term state as applied here means each of the several states, territories, possessions of the United States, and the district of Columbia, and the Commonwealth of Puerto Rico and is consistent with the definition in 38 U.S.C. 101(20). In the event that a state changes their requirements and places new limitations on the tasks and duties it permits in a manner that would be inconsistent with what is authorized under the national standard of practice, the national standard of practice will preempt such limitations and authorize the VA health care professional to continue to practice consistent with the

tasks and duties outlined in the national standard of practice.

In cases where a VA health care professional's license, registration, certification, or other requirement permits a practice that is not included in a national standard of practice, the individual may continue that practice so long as it is permissible under Federal law and VA policy, is not explicitly restricted by the national standard of practice, and is approved by the VA medical facility.

Need for National Standards of Practice

It is critical that VA, the Nation's largest integrated health care system, develops national standards of practice to ensure, first, that beneficiaries receive the same high-quality care regardless of where they enter the system and, second, that VA health care professionals can efficiently meet the needs of beneficiaries when practicing within the scope of their VA employment. National standards are designed to increase beneficiaries' access to safe and effective health care, thereby improving health outcomes. The importance of this initiative has been underscored by the coronavirus disease 2019 (COVID-19) pandemic. The increased need for mobility in VA's workforce, including through VA's Disaster Emergency Medical Personnel System, highlighted the importance of creating uniform national standards of practice to better support VA health care professionals who practice across state lines. Creating national standards of practice also promotes interoperability of medical data between VA and the Department of Defense (DoD), providing a complete picture of a Veteran's health information and improving VA's delivery of health care to the Nation's Veterans. DoD has historically standardized practice for certain health care professionals, and VA has closely partnered with DoD to learn from their experience.

Process To Develop National Standards of Practice

As authorized by 38 CFR 17.419, VA is developing national standards of practice via policy. There is one overarching directive to describe Veterans Health Administration (VHA) policy on national standards of practice, VHA Directive 1900(5), VA National Standards of Practice, August 30, 2023. The directive is accessible on VHA's publications website at <https://www.va.gov/vhapublications/>. As each individual national standard of practice is finalized, it is published as an appendix to the directive and accessible at the same website.

To develop these national standards, VA is using a robust, interactive process that adheres to the requirements of Executive Order (E.O.) 13132 to preempt conflicting state laws, rules, regulations, or other requirements. For each health care occupation, a workgroup comprised of VA health care professionals in the identified occupation conducts research to identify internal best practices that may not be authorized under every state license, certification, or registration, but would enhance the practice and efficiency of the profession throughout VA. If a best practice is identified that is not currently authorized by every state, the workgroup determines what education, training, and skills are required to perform such tasks and duties. The workgroup then drafts a proposed VA national standard of practice using the data gathered and any internal stakeholder feedback received. The workgroup may consult with internal or external stakeholders at any point throughout the process.

The process to develop VA national standards of practice includes listening sessions for members of the public, professional associations, and VA employees to provide comments on the variance between state practice acts for specific occupations and what should be included in the national standard of practice for that occupation. The listening session for Rehabilitation Counselors was held on September 21, 2023. No one provided comments on Rehabilitation Counselors standard of practice.

After the proposed standard is developed, it is first internally reviewed. This includes a review from an interdisciplinary VA workgroup consisting of representatives from Quality Management, VA medical facility Chief of Staff, Academic Affiliates, Veterans Integrated Services Network (VISN) Chief Nursing Officer, Ethics, Workforce Management and Consulting, Surgery, Credentialing and Privileging, VISN Chief Medical Officer, and Electronic Health Record Modernization.

After the internal review, VA provides the proposed national standard of practice to our DoD partners as an opportunity to flag inconsistencies with DoD standards. VA also engages with labor partners informally as part of a pre-decisional collaboration. Consistent with E.O. 13132, VA sends a letter to each state board and certifying organization or registration organization, as appropriate, which includes the proposed national standard and offers the recipient an opportunity to discuss the national standard with

VA. After the state boards, certifying organizations, or registration organizations have received notification, the proposed national standard of practice is posted in the **Federal Register** for 60 days to obtain feedback from the public, professional associations, and any other interested parties. At the same time, the proposed national standard is posted to an internal VA site to obtain feedback from VA employees. Responses received through all vehicles—from state boards, professional associations, unions, VA employees, and any other individual or organization who provides comments via the **Federal Register**—will be reviewed. VA will make appropriate revisions in light of the comments, including those that present evidence-based practice and alternatives that help VA meet our mission and goals. VA will publish a collective response to all comments at <https://www.va.gov/standardsofpractice/>.

The national standard of practice is then finalized, approved, and published in VHA policy. Any tasks or duties included in the national standard will be properly incorporated into individual VA health care professionals' privileges, scope of practice, or functional statement once it has been determined by their VA medical facility that the individual has the proper education, training, and skills to perform the task or duty. Implementation of the national standard of practice may be phased in across all VA medical facilities, with limited exemptions for health care professionals as needed.

Format for the Proposed National Standard for Rehabilitation Counselors

The format for the proposed national standards of practice when there is a national certification body is as follows. The first paragraph provides general information about the profession and what the health care professionals can do. For this national standard, Rehabilitation Counselors help patients with disabilities to achieve their personal career, independent living, social, and psychological goals. We reiterate that the proposed standard of practice does not contain an exhaustive list of every task and duty that each VA health care professional can perform. Rather, it is designed to highlight generally what tasks and duties the health care professionals perform and how they will be able to practice within VA.

The second paragraph references the education and certification needed to practice this profession at VA. Qualification standards for employment of health care professionals by VA are

available at: <https://www.va.gov/OHRM/QualificationStandards/>. VA follows the requirements outlined in the VA qualification standards even if the requirements conflict with or differ from a state requirement. National standards of practice do not affect those requirements. For Rehabilitation Counselors, VA qualification standards require an active, current, full, and unrestricted certification from the Commission on Rehabilitation Counselor Certification (CRCC). For Rehabilitation Counselors, VA qualification standards require an active, current, full, and unrestricted certification from the certification body: complete qualifications standards details for Rehabilitation Counselors are found: <https://www.va.gov/OHRM/QualificationStandards/HT38/0101-RehabilitationCounselor.pdf>.

The second paragraph also notes whether the national standard of practice explicitly excludes individuals who practice under "grandfathering" provisions. Qualification standards may include provisions to permit employees who met all requirements prior to revisions to the qualification standards to maintain employment at VA even if they no longer meet the new qualification standards. This practice is referred to as grandfathering. VA Rehabilitation Counselors have grandfathering provisions included within their qualification standards, and VA proposes to have those individuals not be authorized to follow the Rehabilitation Counselor national standard of practice. Instead, VA proposes its medical facilities will determine the tasks and duties for Rehabilitation Counselors who are grandfathered under the qualification standards. Such determinations are determined at the VA medical facility based on the Rehabilitation Counselor's education, training, and credentialing.

The third paragraph establishes what the national standard of practice will be for the occupation in VA. For this national standard, VA Rehabilitation Counselors follow the standard set by the CRCC, found at: <https://crcccertification.com/>, with the exception of, the listed task or duty VA proposes to restrict even though the certification otherwise permits the profession to perform those tasks or duties.

The final paragraph provides justification for VA's proposal to restrict the specified tasks and duties. It explains why VA is restricting those tasks or duties and the clinical basis for this proposed decision.

This national standard of practice does not address training because it will not authorize VA Rehabilitation

Counselors to perform any tasks and duties not already authorized under their national certification.

Following public and VA employee comments and revisions, each national standard of practice that is published in policy will also include the date for recertification of the standard of practice and a point of contact for questions or concerns.

Proposed National Standard of Practice for Rehabilitation Counselors

Note: All references herein to VA and VHA documents incorporate by reference subsequent VA and VHA documents on the same or similar subject matter.

1. Rehabilitation Counselors are professional counselors educated and trained at the graduate level who possess the specialized knowledge, skills, and attitudes to work collaboratively with patients with disabilities. Through a professional counseling process, Rehabilitation Counselors help patients with disabilities to achieve their personal career, independent living, social, and psychological goals.

2. Rehabilitation Counselors in the Department of Veterans Affairs (VA) possess the education and certification required by VA qualification standards, available at: <https://www.va.gov/OHRM/QualificationStandards/HT38/0101-RehabilitationCounselor.pdf>.

Note: This national standard of practice does not apply to Rehabilitation Counselors who were grandfathered into the position on July 21, 2020, the effective date for the VA qualification standards for Rehabilitation Counselors. Tasks and responsibilities for Rehabilitation Counselors who are grandfathered under the qualification standards are determined at the VA medical facility based on their education, training, and credentialing.

3. VA Rehabilitation Counselors practice in accordance with the Certified Rehabilitation Counselor scope of practice from the Commission on Rehabilitation Counselor Certification (CRCC), available at: <https://crcccertification.com/>, except as noted in paragraph 3.a. VA reviewed certification requirements for this occupation in October 2024 and confirmed that all Rehabilitation Counselors in VA followed this national certification.

a. VA Rehabilitation Counselors, practicing within scope of their VA employment and consistent with this standard, cannot diagnose mental health disorders (F Codes in the International Classification of Diseases 11th Revision) unless they have a license in a mental health discipline, in addition to their CRCC certification and qualify as licensed providers through the Medical

Staff Bylaws of their VA medical facility.

Note: VA Rehabilitation Counselors meet CRCC certification eligibility criteria of a master's degree in rehabilitation counseling or a qualifying related mental health field with additional graduate-level core rehabilitation coursework and supervised experience. All Rehabilitation Counselors with CRCC certification can diagnose "Other Conditions That May Be a Focus of Clinical Attention" as outlined in the *Diagnostic and Statistical Manual of Mental Disorders Fifth Edition (Z codes in the International Classification of Diseases 11th Revision)*.

4. Justification

a. VA Rehabilitation Counselors who only maintain a CRCC certification are restricted from diagnosing mental health disorders because VA has licensed mental health personnel with the specific education, training, and expertise that VA would rely on to diagnose. VA Rehabilitation Counselors who possess a CRCC certification, hold a state license in a mental health field (e.g., Licensed Professional Counselor, Licensed Clinical Professional Counselor, Licensed Clinical Social Worker, Licensed Independent Social Worker, Licensed Psychologist), and qualify as a licensed provider based on the medical facility bylaws will be permitted to diagnose mental health disorders because their education, training, and expertise provides the necessary competency to diagnose.

Request for Information

1. Is VA's assessment of what the state and CRCC certification permits, and prohibits, accurately represented?
2. Are there any other areas of variance of any state license, certification, registration or other requirement that VA should preempt that are not listed?
3. Is there anything else you would like to share with us about this VA national standard of practice?

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved and signed this document on December 6, 2024,

and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0020]

Agency Information Collection Activity Under OMB Review: Designation of Beneficiary—Government Life Insurance and Supplemental Designation of Beneficiary—Government Life Insurance

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed information collection should be sent by January 29, 2025.

ADDRESSES: To submit comments and recommendations for the proposed information collection, please type the following link into your browser: www.reginfo.gov/public/do/PRAMain, select "Currently under Review—Open for Public Comments", then search the

list for the information collection by Title or "OMB Control No. 2900–0020."

FOR FURTHER INFORMATION CONTACT: VA PRA information: Maribel Aponte, (202) 461–8900, vacopaperworkreduact@va.gov.

SUPPLEMENTARY INFORMATION:

Title: Designation of Beneficiary—Government Life Insurance and Supplemental Designation of Beneficiary—Government Life Insurance (VA Forms 29–336 and 29–336a).

OMB Control Number: 2900–0020
<https://www.reginfo.gov/public/do/PRASearch>.

Type of Review: Revision of a currently approved collection.

Abstract: These forms are used by the insured to designate beneficiaries and select an optional settlement to be used when the insurance matures by death. The information is required to determine the claimant's eligibility to receive the proceeds. The information on the form is required by law, 38 U.S.C. 1917, 1949 and 1952.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 89 FR 85009, October 24, 2024.

Affected Public: Individuals or Households.

Estimated Annual Burden: 13,917 hours.

Estimated Average Burden per Respondent: 10 minutes.

Frequency of Response: On occasion.
Estimated Number of Respondents: 83,500.

Authority: 44 U.S.C. 3501 *et seq.*

Dorothy Glasgow,
VA PRA Clearance Officer, (Alt).

Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

Consumer Financial Protection Bureau

12 CFR Parts 1005 and 1026

Overdraft Lending: Very Large Financial Institutions; Final Rule

CONSUMER FINANCIAL PROTECTION BUREAU**12 CFR Parts 1005 and 1026****[Docket No. CFPB–2024–0002]****RIN 3170–AA42****Overdraft Lending: Very Large Financial Institutions****AGENCY:** Consumer Financial Protection Bureau.**ACTION:** Final rule; official interpretation.

SUMMARY: The Consumer Financial Protection Bureau (CFPB) amends Regulations E and Z to update regulatory exceptions for overdraft credit provided by very large financial institutions, thereby ensuring that these extensions of overdraft credit adhere to consumer protections required of similarly situated products, unless the overdraft fee is a small amount that only recovers estimated costs and losses. The rule allows consumers to better comparison shop across credit products and provides substantive protections that apply to other consumer credit.

I. Overview**A. Summary**

The CFPB is updating non-statutory exceptions in Regulations Z and E that have allowed very large financial institutions to avoid statutory consumer credit protection requirements when extending certain overdraft credit.¹

Consumer credit is subject to Regulation Z if the creditor imposes a finance charge, which generally includes any charge payable directly or indirectly by the consumer and imposed directly or indirectly by the creditor as an incident to or a condition of the extension of credit.² However, when the Board of Governors of the Federal Reserve System (Board) first adopted Regulation Z in 1969,³ it excepted from Regulation Z's definition of finance charge any charges for honoring checks that overdraw a checking account unless the payment of the check and imposition of the fee were previously agreed upon in writing. The Board subsequently made "minor editorial changes" to this exception, *e.g.*, to reflect "items that are similar to checks,

such as negotiable orders of withdrawal."⁴ This exception is unique to credit extended to pay account overdrafts; other consumer credit products with similar features, such as short term repayment, are subject to Regulation Z.

This exception was evidently intended to allow banks to continue providing limited overdraft services as a courtesy to consumers who inadvertently overdrew their account, without the banks complying with Regulation Z. In the early years of the regulation, decisions to pay an item that overdraws an account instead of returning it unpaid were made as a relatively infrequent part of administering asset accounts. At the time, consumers typically withdrew funds from their bank accounts through in-person withdrawals or by writing checks. If a consumer mistimed when funds from a check deposit would be available for withdrawal⁵ and inadvertently overdrew their account and the overdrawing check were returned unpaid, the bank would typically charge the consumer a nonsufficient funds (NSF) fee and the consumer could be subject to additional fees imposed by the payee and other negative consequences from bounced checks. If, instead of returning the check, the financial institution paid it notwithstanding the unavailable or insufficient funds in the account, such courtesy payment could provide a benefit to the consumer, who would avoid the negative consequences of a bounced check without being charged any additional fees beyond an amount that did not exceed the amount charged for nonsufficient funds.

Over the last 30 years, in conjunction with widespread financial institution adoption of information technology systems as well as the expansion of debit card transactions that can overdraw an account, overdraft credit products provided under the exception have morphed from an occasional courtesy provided to consumers into frequently used and promoted products that increase costs to consumers (in certain instances) and generate a substantial portion of the direct fee revenue that financial institutions make from checking accounts (and much of the total revenue that financial

¹ When amending commentary, the Office of the Federal Register requires reprinting of certain subsections being amended in their entirety rather than providing more targeted amendatory instructions. The sections of regulatory text and commentary included in this document show the language of those sections. In addition, the CFPB is releasing an unofficial, informal redline to assist industry and other stakeholders in reviewing the changes to the regulatory text and commentary of Regulation E and Regulation Z. This redline may be found on the CFPB's website. If any conflicts exist between the redline and the text of Regulation E or Regulation Z, its commentary, or this rule, the documents published in the **Federal Register** are the controlling documents.

² Consumer credit is also subject to Regulation Z in other circumstances. *See, e.g.*, 12 CFR 1026.1(c).

³ 34 FR 2002 (Feb. 11, 1969).

⁴ 46 FR 20848, 20855 (Apr. 7, 1981).

⁵ In 1987, Congress enacted the Expedited Funds Availability Act (12 U.S.C. 4001 *et seq.*) to provide depositors of checks with prompt funds availability and to foster improvements in the check collection and return processes. *See* 82 FR 27552, 27552 (June 15, 2017). Section 229.2(d) of Regulation CC (12 CFR 229), which implements that act, defines "available for withdrawal."

institutions make from low-balance accounts). The volume of overdrawing transactions and related revenue rose drastically over the years, including on transactions where the consumer may have otherwise suffered no negative consequences if the transaction were declined. Since the CFPB focused substantial enforcement and supervision attention on overdraft fees in 2021, overdraft fee revenue has contracted somewhat. However, it is still a source of billions of dollars in profits every year, and most very large financial institutions continue to charge \$35 per overdraft transaction today. Financial institutions today generally make pay/no-pay decisions in advance—for example, by setting overdraft limits that the consumer may not be aware of and using information technology systems to make automated pay/no-pay decisions. They sometimes calibrate these systems with the goal of generating fee revenue. Because of these market changes, which increase the risk that a consumer will unwittingly incur high overdraft fees, helping consumers make informed decisions about overdraft credit has become a much more serious concern.

Key Changes

Given these changes over the past 30 years and consistent with TILA's purpose of promoting the informed use of credit, the CFPB is updating several non-statutory exceptions in Regulation Z to extend consumer credit protections that generally apply to other forms of consumer credit to certain overdraft credit provided by very large financial institutions. These changes will allow consumers to better compare certain overdraft credit to other types of credit and will provide consumers with several substantive protections that already apply to other consumer credit.

These amendments apply only to very large financial institutions—i.e., insured depository institutions and credit unions with more than \$10 billion in assets. The rule does not change the regulatory framework for overdraft services offered by financial institutions with assets of \$10 billion or less. The CFPB plans to monitor the market's response to this rule before determining whether to alter the regulatory framework for financial institutions with assets less than or equal to \$10 billion.

Under this final rule, Regulation Z will generally apply to overdraft credit provided by very large institutions unless it is provided at or below costs and losses as a true courtesy to consumers. The final rule accomplishes this result by updating two regulatory exceptions from the statutory definition

of finance charge. First, the final rule updates an exception that currently provides that a charge for overdraft is not a finance charge if the financial institution has not previously agreed in writing to pay items that overdraw an account.⁶ The rule narrows this exception to no longer apply to “above breakeven overdraft credit” offered by a very large financial institution, which generally means that profit-generating overdraft fees charged by very large financial institutions would no longer be excepted from TILA. The final rule gives financial institutions the ability to determine whether an overdraft charge is considered above breakeven overdraft credit by either: (1) calculating its own costs and losses using a standard set forth in the rule; or (2) relying on a benchmark fee of \$5. Second, the final rule updates a related exception that provides that a charge imposed on an asset account in connection with an overdraft credit feature is not a finance charge if the charge does not exceed the charge for a similar transaction account without a credit feature.⁷ The updates clarify what is and is not a comparable charge in light of changes finalized in this rule.

In the proposal, the CFPB presented four alternatives for the benchmark fee described above—\$3, \$6, \$7, and \$14—to solicit public comment on what data the CFPB should consider when calculating the fee. In the final rule, the CFPB will apply the same approach used to derive the proposed \$3 benchmark fee. However, the final rule increases the \$3 benchmark fee to \$5 to account for additional costs noted by commenters, such as costs relating to overdraft notices, branch servicing, collection, core providers/vendors, compliance, and technology. As a result of this final rule, above breakeven overdraft credit that is not currently subject to Regulation Z will become subject to Regulation Z, including provisions in subpart B that govern open-end credit (e.g., annual percentage rate disclosures, other account opening disclosures, periodic statements, and advertising rules), on the effective date of this rule. For ease of reference, this final rule generally refers to overdraft credit that is not subject to Regulation Z as non-covered overdraft credit and overdraft credit that is subject to Regulation Z as covered overdraft credit. Above breakeven overdraft credit is currently a type of non-covered overdraft credit, but it will become covered overdraft credit when this final

rule becomes effective on October 1, 2025.

The final rule also requires covered overdraft credit offered by very large financial institutions to be put in a credit account separate from the asset account, and it updates exceptions relating to credit cards. Among other changes, it applies the portions of Regulation Z that implement the Credit Card Accountability Responsibility and Disclosure Act of 2009 (CARD Act)⁸ to covered overdraft credit that can be accessed by a hybrid debit-credit card, such as a debit card or other single credit device (including certain account numbers) that a consumer may use from time to time to obtain covered overdraft credit from a very large financial institution. Provisions of the CARD Act that will apply to such overdraft credit include, but are not limited to, ability to pay underwriting requirements, limitations on penalty fees including certain fees on transactions that are declined due to nonsufficient funds, and various requirements related to rate changes.

The final rule will also prohibit compulsory use of preauthorized electronic fund transfers (EFTs) for repayment of covered overdraft credit provided by very large financial institutions. This change will ensure that consumers using those products have a choice of at least one alternative method of repayment. As a result of this change, covered overdraft credit offered by very large financial institutions cannot be conditioned on consumers agreeing to automatic debits from their checking account. Consumers could still opt into automatic payments on a periodic basis if offered by their financial institution, but they will have the right to repay this overdraft credit manually if they prefer.

The final rule will take effect on October 1, 2025. This effective date is more than six months after the date the rule is published in the **Federal Register**, consistent with 15 U.S.C. 1604(d).

B. Market Background

1. Overview of Overdraft Credit

An overdraft occurs when consumers do not have a sufficient balance in their asset account to pay a transaction, but the financial institution pays the transaction anyway. Typically, the financial institution pays an overdraft transaction by either transferring the consumer's own funds from another asset account held by the financial institution, such as a savings account, or

⁶ 12 CFR 1026.4(c)(3).

⁷ 12 CFR 1026.4(b)(2).

⁸ Public Law 111–24; 123 Stat. 1734 (2009).

by extending overdraft credit (*i.e.*, using the financial institution's own funds and requiring the consumer to repay).

Currently, not all overdraft credit is subject to Regulation Z. For example, when the Board first adopted Regulation Z in 1969,⁹ it excepted from Regulation Z's coverage charges for honoring checks that overdraw a checking account unless the payment of the check and imposition of the fee were previously agreed upon in writing. A Board official interpretation stated that this exception for ad hoc credit decisions applies only to "regular demand deposit accounts which carry no credit features and in which a bank may occasionally, as an accommodation to its customer, honor a check which inadvertently overdraws that account."¹⁰ The Board subsequently adopted commentary excluding debit cards with no credit agreement from Regulation Z's definition of "credit card."¹¹ While the Board did not explain this exception, it appears it was intended to exclude discretionary overdraft services from being subject to Regulation Z when they are accessed by a debit card, consistent with the exclusion for overdraft charges from the definition of finance charge.¹²

Some overdraft credit is previously agreed upon in writing and is currently covered by Regulation Z. Such covered overdraft credit enables consumers to link a checking account to a credit account, like an overdraft line of credit or a credit card, from which funds are transferred automatically to pay transactions when the checking account balance is insufficient to pay them. Some financial institutions charge a fee, often referred to as an overdraft protection transfer fee, for these transfers.¹³ Financial institutions may

assess such a fee once per day that a transfer is made, once to transfer a round dollar value increment (*e.g.*, a fee for \$100 transferred to cover any overdraft(s) less than \$100), or, less commonly, once per overdraft transaction;¹⁴ however, since late 2021, in the wake of substantial CFPB enforcement and supervising attention on overdraft fees, a number of financial institutions have voluntarily eliminated such fees.¹⁵ Credit accounts used to cover overdrafts also carry an interest rate applied to the outstanding balance. Repayment of the overdrawn amount and interest is typically made periodically according to a payment schedule. The ability to obtain and use covered overdraft credit is typically limited to consumers whose credit history allows them to qualify for an overdraft line of credit or who have available credit on a credit card.

Financial institutions may also pay overdrafts through currently non-covered overdraft credit, where the financial institution typically pays overdrafts up to certain limits but does not agree in advance to pay the overdrawn transactions, reserving discretion to decline any given overdraft transaction. This type of overdraft credit is currently non-covered overdraft credit because it is currently not subject to Regulation Z. This final rule may also refer to currently non-covered overdraft credit as an overdraft service, overdraft services, or an overdraft program. With certain exceptions provided for by internal policies, the financial institution typically assesses a flat fee for each overdraft transaction the financial institution pays. In addition, some financial institutions charge an additional fee or fees, known as extended or sustained overdraft fees, if the consumer does not bring the account back to a positive balance within a specified period. To collect repayment of the funds advanced to cover overdraft transactions as well as payment of the fees assessed, the financial institution typically deducts those amounts as a lump sum from the consumer's next incoming deposit(s), usually within three days after the account became overdrawn.¹⁶

¹⁴ *Id.*

¹⁵ Between December 2022 and July 2023, CFPB reviewed publicly available information describing the overdraft-related practices of very large financial institutions (CFPB Market Monitoring of Publicly Available Overdraft Practices, Dec. 2022–July 2023).

¹⁶ Trevor Bakker et al., CFPB, *Data Point: Checking account overdraft*, at 5, 22 (July 2014), https://files.consumerfinance.gov/f/201407_cfpb_report_data-point_overdrafts.pdf (CFPB 2014 Data Point).

Financial institutions typically provide non-covered overdraft credit for certain transaction types—primarily checks, automated clearinghouse (ACH) transactions, and recurring debit card transactions—as a default, up to certain coverage limits. For one-time (non-recurring) debit card and ATM transactions, financial institutions cannot assess overdraft fees for paying such transactions without first obtaining the consumer's opt-in following the process required by Regulation E 12 CFR 1005.17(b).

Financial institutions employ a number of different practices and policies when making pay/return decisions in connection with non-covered overdraft.¹⁷ While, as noted above, overdraft credit must technically be discretionary to be excepted from Regulation Z, in practice, financial institutions typically assign each account an overdraft coverage limit representing the maximum amount of overdraft coverage the financial institution will extend on the account. Once an account reaches its overdraft coverage limit, the financial institution will no longer pay transactions into overdraft and will return those transactions unpaid. Overdraft coverage limits may be static (*i.e.*, the financial institution assigns an unchanging limit to each customer) or dynamic (*i.e.*, the financial institution changes the limit for each account periodically based on account usage patterns, market conditions, or account and accountholder characteristics in an attempt to manage more precisely credit risk, overdraft program revenues, and customer retention).¹⁸ Financial institutions that use static limits sometimes communicate those limits to account holders, while financial institutions that use dynamic limits generally do not communicate those limits to account holders.

Historically, financial institutions have charged an NSF fee when they reject, rather than pay, transactions initiated by check or ACH or other electronic payments; in contrast, financial institutions have rarely if ever charged an NSF fee when declining a one-time debit card purchase or an ATM withdrawal.¹⁹ Financial institutions typically have charged the same amount

¹⁷ CFPB 2013 White Paper at 48–52.

¹⁸ Common account and account holder characteristics include account tenure, average balance, overdraft history, and deposit patterns, as well as other relationships the accountholder may have with the institution.

¹⁹ The CFPB is aware that some prepaid card providers charge NSF fees on one-time purchase transactions, based on fees disclosed in the CFPB's publicly-available prepaid account agreement database.

⁹ 34 FR 2002 (Feb. 11, 1969).

¹⁰ 42 FR 22360, 22362 (May 3, 1977).

¹¹ 46 FR 50288, 50293 (Oct. 9, 1981) (providing that a "credit card" does not include "[a] check-guarantee or debit card with no credit feature or agreement, even if the creditor occasionally honors an inadvertent overdraft"); *see also* Regulation Z comment 2(a)(15)–2.ii.A.

¹² Under Regulation Z, an issuer of a credit card can be a creditor regardless of whether the credit is subject to a finance charge. 12 CFR 1026.2(a)(17)(iii); *see also* 12 CFR 1026.2(a)(7) (defining "card issuer"). Thus, without the 1981 exception, a financial institution that extends overdrafts could be a "creditor" for purposes of subpart B of TILA even with an exemption of overdraft fees from the finance charge.

¹³ Consumer Fin. Prot. Bureau (CFPB), *CFPB Study of Overdraft Programs: A white paper of initial data findings*, at 55 (June 2013), https://files.consumerfinance.gov/f/201306_cfpb_whitepaper_overdraft-practices.pdf (CFPB 2013 White Paper) (noting 28 of a sample of 33 large institutions charged a transfer fee in 2012, ranging from \$3 to \$20 per transfer, with a median of \$10, while smaller institutions charged a median of \$5).

for an NSF fee as for a non-covered overdraft fee.²⁰ As noted in part I.B.3, many financial institutions have eliminated NSF fees over the past three years.

2. Evolution and Growth of Non-Covered Overdraft

Non-covered overdraft credit started as a courtesy that individuals within financial institutions provided when they would decide on an ad hoc basis to pay particular check transactions into overdraft rather than returning those checks unpaid.²¹ This courtesy would help consumers avoid NSF fees, merchant fees, and other negative consequences from bounced checks. Over time, non-covered overdraft credit began to move away from that historical model, as financial institutions shifted to a system involving heavy reliance on automated programs to process transactions and to make overdraft decisions.²² Financial institutions also began to extend overdraft credit to debit card transactions, even though a declined debit card transaction did not pose the same risk to consumers of an NSF fee, a merchant fee, or certain other consequences associated with a bounced check.²³ Over time, debit card

transactions became more numerous than checks, increasing the number of transactions that could generate overdrafts, with typical debit card transactions involving smaller amounts than typical check transactions.²⁴ Even as transaction processing and overdraft decisioning became more automated and overdraft transactions increased in frequency and decreased in size, financial institutions increased the size of overdraft fees. In 1976, when the process was typically manual and included only checks, one survey of banks in Washington, DC, and the New York metro area found that the median fee was \$5, while some banks charged zero.²⁵ By 1994, concern had risen about the increase in the average fee to over \$15 (\$5.77 in 1976 dollars);²⁶ by 2000, the average had surpassed \$20 (\$6.61 in 1976 dollars) and continued to increase thereafter.²⁷

Hearing before the House Subcomm. on Financial Institutions and Consumer Credit, House Comm. on Financial Services, 110th Cong., at 72 (2007)) (“noting that as recently as 2004, 80 percent of banks still declined ATM and debit card transactions without charging a fee when account holders did not have sufficient funds in their account”).

²⁴ Federal Reserve Payments Studies from 2004 to 2013 (exhibit 1 in each study) show that from 2000 to 2012, annual debit card transactions increased from 8.3 billion to 47 billion, while annual check transactions decreased from 41.9 billion to billion to 18.3 billion. By 2008, debit card transactions exceeded the number of checks. See Bd. of Governors of the Fed. Rsr. Sys. (FRS), *Federal Reserve Payments Study (FRPS)—Previous Studies*, https://www.federalreserve.gov/paymentsystems/frps_previous.htm (last updated Nov. 13, 2024); see also FRS, *The 2013 Federal Reserve Payments Study*, at 9 ex.2 (Dec. 2013), <https://www.frb-services.org/binaries/content/assets/crsocms/news/research/2013-fed-res-paymt-study-summary-rpt.pdf> (showing the average debit card transaction ranged from \$37 to \$40 from 2003–2012, while the average check transaction ranged from \$1,103 to \$1,410). The CFPB has found that the median transaction amount that leads to an overdraft fee in the case of debit card transactions is \$24, while the median check and ACH transactions that lead to overdraft fees are \$100 and \$90, respectively. See CFPB 2014 Data Point at 5; see also Fin. Health Network (FHN), *Responding to Reform: Overdraft in 2023* (Oct. 8, 2024), <https://finhealthnetwork.org/research/responding-to-reform-overdraft-in-2023/> (FHN Brief 2024) (finding almost half (45 percent) of overdrafters reported that their most recent overdraft occurred on a transaction of \$50 or less).

²⁵ Senate Staff Report at 10–11.

²⁶ See *Bank Fees Associated with Maintaining Depository, Checking, and Credit Card Accounts*, Hearing Before the Subcomm. on Consumer Credit and Ins., Comm. on Banking, Finance and Urban Affairs, 103rd Cong. 73 tbl.3 (1993) (Testimony by Susan M. Phillips, Member, FRS) (showing average overdraft fee of over \$15 in 1993); see also *id.* at 95–96, 101–102 (Statement of Chris Lewis, Dir. of Banking and Hous. Pol’y, Consumer Fed’n of Am.) (noting concerns about the rise in the size of “bounced check fees”, a term the organization used to describe the fee assessed when funds were insufficient, whether the transaction was returned unpaid or paid into overdraft).

²⁷ Gov’t Accountability Off., *Bank Fees: Federal Banking Regulators Could Better Ensure That*

As a result of these market shifts and operational changes, fee revenue from non-covered overdraft credit began to significantly influence the overall business model for many asset accounts. Financial institutions became less likely to charge consumers upfront monthly checking account fees, which consumers could more easily compare across the market, and instead began to rely heavily on overdraft fees.²⁸ In essence, the provision of non-covered overdraft credit moved away from its original purpose—paying occasional or inadvertent overdrafts as a courtesy—and became the dominant component of a back-end pricing business model. By 2004, marketwide overdraft revenue was estimated at approximately \$10 billion and, by 2009, had increased to an estimated \$25 billion.²⁹

3. Non-Covered Overdraft Credit Today

Marketwide overdraft revenue declined following the 2010 implementation of the Board’s “opt-in” rule under Regulation E to an estimated \$12 billion in 2011, before beginning to increase again.³⁰ In the several years preceding the COVID–19 pandemic, marketwide overdraft revenue was persistent, climbing from an estimated \$11.8 billion in 2015 to \$12.6 billion in 2019.³¹ With the onset of the pandemic

Consumers Have Required Disclosure Documents Prior to Opening Checking or Savings Accounts, at 14 (Jan. 2008), <https://www.gao.gov/assets/gao-08-281.pdf>; see also FDIC 2008 Study (by 2007, among primarily financial institutions with less than \$5 billion in assets, the average fee was \$27); CFPB 2013 White Paper at 52 (by 2012, among the nation’s largest financial institutions, the average fee was \$34).

²⁸ CFPB 2013 White Paper at 16–17.

²⁹ CFPB’s estimates of marketwide overdraft revenue, before banks with over \$1 billion in assets began reporting overdraft/NSF revenue on call reports in 2015, are based on the estimated share of aggregated fee revenue that banks and credit unions reported on call reports that was attributable to overdraft fees. For more details on methodology, see Jacqueline Duby et al., Ctr. for Responsible Lending (CRL), *High Cost & Hidden From View: The \$10 Billion Overdraft Loan Market* (May 26, 2005), <https://www.responsiblelending.org/sites/default/files/nodes/files/research-publication/ip009-High-Cost-Overdraft-0505.pdf>; see also Leslie Parrish, CRL, *Overdraft Explosion: Bank fees for overdrafts increase 35% in two years*, at 4 (Oct. 6, 2009), <https://www.responsiblelending.org/research-publication/overdraft-explosion-bank-fees-overdrafts-increase-35-two-years>.

³⁰ *Id.*

³¹ CFPB’s estimates of marketwide overdraft revenue for 2015 to 2022 extrapolate total overdraft/NSF revenue reported on call reports by banks with over \$1 billion in assets to banks with less than \$1 billion in assets and to credit unions in order to reach a total marketwide estimate of overdraft/NSF revenue, and then estimate the portion of that combined overdraft/NSF revenue that is attributable to overdraft revenue alone. To extrapolate reported overdraft/NSF revenue to banks with less than \$1 billion in assets and to credit unions, the CFPB uses

²⁰ See *Consumers Guide to Banking: Staff Report on Commercial Bank Charges in the New York and Washington, DC Metropolitan Area*, S. Comm. on Banking, Hous. and Urban Affairs, 94th Cong. 10–11 tbl.3 (1976) (Senate Staff Report); see also 70 FR 8428, 8429 (Feb. 18, 2005) (“Regardless of whether the overdraft is paid, institutions typically charge the NSF fee when an overdraft occurs.”); 74 FR 59033, 59035 (Nov. 17, 2009) (“Second, a consumer will generally be charged the same fee by the financial institution whether or not a check is paid; yet, if the institution covers an overdrawn check, the consumer may avoid other adverse consequences, such as the imposition of additional merchant returned item fees.”); Fed. Deposit Ins. Corp. (FDIC), *2008 FDIC Study of Bank Overdraft Programs*, at 16 n.18 (Nov. 2008), https://www.fdic.gov/bank/analytical/overdraft/FDIC138_Report_Final_v508.pdf (FDIC 2008 Study) (“For most of the survey population operating automated programs, the per-item fee charged when items were paid under automated overdraft programs was the same as the fee charged by the bank on NSF items that it did not pay. These two fees were equal to each other for 98.1 percent of 451 institutions reporting the two fee items.”).

²¹ See 42 FR 22360, 22362 (May 3, 1977) (describing the exception from Regulation Z as applying when overdraft is provided “as an accommodation . . . honoring a check which inadvertently overdraws that account.”); see also *Federal Reserve Board Staff Opinion Letter No. 948* (Nov. 17, 1975) (explaining that the exception “relates only to regular demand deposit accounts which carry no credit feature and in which a bank may occasionally, as an accommodation to its customer, honor a check which inadvertently overdraws that account”).

²² See 74 FR 59033, 59033 n.1 (Nov. 17, 2009) (citing *FDIC’s Study of Bank Overdraft Programs* (Nov. 2008), which found that nearly 70 percent of banks surveyed implemented their automated overdraft program after 2001).

²³ See *id.* at 59035; see also *id.* at 59034 n.6 (citing *Overdraft Protection: Fair Practices for Consumers:*

in March 2020, overdraft revenue dropped significantly. The drop was likely primarily due to pandemic-related stimulus payments pushing up average checking account balances, as well as temporarily decreased use of debit cards.³² In addition, Federal regulators encouraged, and some State regulators encouraged or mandated, financial institutions to offer leniency around imposition of overdraft fees in light of the pandemic.³³ Notwithstanding the trend downward during the pandemic, estimated market wide overdraft revenue exceeded \$9 billion in 2020 and 2021.³⁴

Beginning in late 2021, a number of large banks began announcing and implementing changes to their overdraft policies.³⁵ Some banks eliminated overdraft fees altogether or reduced them to \$10 or \$15 per transaction.³⁶

data collected from core processors for the number of accounts by asset size and the overdraft/NSF revenue per account, and from 2014 call report data for distribution of institutions by asset size, and then assumes that overdraft/NSF revenue at small institutions saw the same growth from 2014 to 2019 as at large banks to arrive at the 2019 estimate. These extrapolations result in estimates where banks with over \$1 billion in assets comprise 77.4 percent of marketwide overdraft/NSF revenue, banks with less than \$1 billion in assets comprise 7.3 percent of such revenue, and credit unions comprise 15.3 percent of such revenue. See Éva Nagypál, Ph.D., CFPB, *Data Point: Overdraft/NSF Fee Reliance Since 2015—Evidence from Bank Call Reports*, at 7 (Dec. 2021), https://files.consumerfinance.gov/f/documents/cfpb_overdraft-call_report_2021-12.pdf (CFPB 2021 Data Point). For the 2022 estimate, the CFPB assumes that banks with assets over \$1 billion, banks with assets below \$1 billion, and all credit unions represent the same relative portions of total marketwide overdraft/NSF revenue in 2022 as they did in 2019.

³⁶ *Id.*

Some banks made changes to their policies by expanding their fee waiver policies, including establishing a daily limit of one fee per day even if multiple overdrawing transactions are paid;³⁷ establishing de minimis negative balance thresholds of \$50 or more, within which overdrafts do not result in a fee; and implementing grace periods giving consumers time through the next business day to bring their accounts positive before a fee is assessed.³⁸ Collectively these changes resulted in a sustained reduction in overdraft revenues as compared to pre-pandemic levels.³⁹ Marketwide overdraft revenue in 2022 was an estimated \$9.1 billion (\$7.9 billion in 2019 dollars, a 37 percent drop in real terms).⁴⁰ Of that, an estimated \$6.16 billion, or 68 percent, was earned by financial institutions with above \$10 billion in assets.⁴¹ At the same time, most very large financial institutions eliminated NSF fees.⁴²

Although there was some overall decline in the charging of overdraft fees, a sizeable majority of banks and credit unions with over \$10 billion in assets (i.e., 68 percent) continue to charge between \$30 and \$37 per transaction incurring an overdraft fee, and more than half charge \$35.⁴³ Most financial institutions' policies allow consumers to incur multiple overdraft fees per day. Financial institutions continue charging these high fees even though the fees far exceed institutions' costs and losses associated with providing non-covered overdraft credit. CFPB data collections and outreach have found that the single largest cost or loss to financial

⁴³ CFPB Market Monitoring of Publicly Available Overdraft Practices, Dec. 2022–July 2023.

institutions associated with overdraft programs is charged-off account balances, which most frequently occur when a consumer's subsequent deposits do not cover the negative balance created by the overdraft(s) and associated fee(s).⁴⁴ The CFPB's study of 2011 bank data found that charge-offs were small relative to the fee revenue banks earned through their overdraft programs.⁴⁵ Among those banks, charged-off principal account balances due to overdraft programs represented 14.4 percent of the net overdraft fees (not including NSF fees) at those banks.⁴⁶ During the first half of 2023, the CFPB collected additional data from several banks, which again showed that charge-offs associated with negative account balances were the largest cost or loss associated with providing overdraft. As discussed further in part IV.D.3, charge-offs amounted to an average of \$2 per overdraft transaction, whether or not such transaction incurred an overdraft fee, and an average of \$5 per overdraft transaction that incurred an overdraft fee—representing 6 percent and 15 percent, respectively, of the average fee of \$32.50 charged by those banks during the period studied.

4. Consumer Impact of Overdraft Fees

As cumulative overdraft fee revenue for financial institutions increased before recent reductions, so did the cumulative burden of overdraft fees on consumers, particularly more financially vulnerable consumers. CFPB research found that 79 percent of combined overdraft and NSF fees were paid by 9 percent of consumers who paid more than 10 such fees per year, incurring a median of \$380 in these fees in a year.⁴⁷ Consumers paying more than 20 such fees in a year accounted for about 5 percent of accounts, while paying over 63 percent of the fees.⁴⁸

High overdraft fees can make it more difficult for consumers to return their account to a positive balance, contributing to account charge-offs, involuntary account closures, and consumers blocked out of the banking system. The CFPB found that the banks with the highest share of accounts with frequent overdrafts tended to have the highest rates of involuntary account closure; conversely, those with the

⁴⁷ David Low et al., CFPB, *Data Point: Frequent Overdrafters*, at 5 (Aug. 2017), https://files.consumerfinance.gov/f/documents/201708_cfpb_data-point_frequent-overdrafters.pdf (CFPB 2017 Data Point); CFPB 2014 Data Point at 12 (both analyzing 2011–2012 data).

⁴⁸ CFPB 2017 Data Point at 5.

lowest share of accounts with frequent overdrafts tended to have the lowest rates of involuntary closure.⁴⁹ Account closures, in turn, are often reported to account screening consumer reporting agencies, and a negative report from an account screening company may limit a consumer's ability to open an account at a bank or credit union in the future. Negative experiences with overdraft fees likely also discourage many consumers from wanting a bank account at all. The Federal Deposit Insurance Corporation (FDIC) estimates that there were approximately 5.6 million unbanked households in the U.S. in 2023,⁵⁰ nearly half of which had a bank account in the past.⁵¹ Of those previously banked households, nearly two-thirds have little or no interest in having a bank account again,⁵² with high fees, unpredictable fees, and not enough funds to meet minimum balance requirements among the most cited reasons.⁵³

Consumers can face significant uncertainty about whether they will incur overdraft fees. Though financial institutions may provide disclosures related to their transaction processing, deposit availability, and overdraft assessment policies, these policies can be extraordinarily complex.⁵⁴ Even consumers who closely monitor their account balances may not know with certainty when transactions will post to their accounts, whether a particular transaction will be paid or returned unpaid, or whether a particular paid

transaction will be deemed an overdraft and assessed an overdraft fee.⁵⁵

In response to the CFPB's 2022 request for information regarding fees that are not subject to competitive processes that ensure fair pricing, which received over 80,000 responses,⁵⁶ overdraft-related fees were by far the most common issue raised. Common concerns included that the fees were unclear or confusing, disproportionate compared to the incidents resulting in the fees, and difficult or impossible to avoid. These concerns were generally consistent with those reflected in complaints about overdraft fees consumers have submitted to the CFPB since its inception in 2011.

The CFPB has also studied how consumers who are opted-in to overdraft services on one-time debit card and ATM transactions—and thus subject to overdraft fees on those transactions—fare compared to those who are not opted-in. In total, opted-in accounts incurred more than seven times as many overdraft fees as accounts that were not opted-in.⁵⁷ At the account level, opted-in accounts were three times as likely to have more than 10 overdrafts per year as accounts that were not opted-in.⁵⁸ And among frequent overdrafters, those who were opted-in appeared similar across a number of dimensions to frequent overdrafters who were not opted-in, but incurred significantly more—at the median, 13 more—overdraft/NSF fees per year.⁵⁹ In addition, involuntary account closure was about 2.5 times as likely for consumers who were opted-in than for consumers who were not.⁶⁰

Consumers whose accounts are frequently overdrawn are typically more financially insecure than those who do not overdraw or who do so

infrequently.⁶¹ Compared to non- or infrequent overdrafters, frequent overdrafters tend to have lower incomes and lower end-of-day balances.⁶² They are also less likely to have access to alternative credit options: they have lower credit scores, are less likely to have a general purpose credit card, and, if they do have such a card, they have less credit available on it.⁶³ Black households and Latino households are more likely to incur overdraft fees than white households.⁶⁴

Further, evidence suggests that millions of accounts with outstanding overdrafts are closed every year, and those former accountholders may have less subsequent access to the formal banking system as a result.⁶⁵

⁴⁹ CFPB has previously used “frequent overdrafters” to describe those who incur more than 10 overdraft/NSF fees in one year and “very frequent overdrafters” to describe those who incur more than 20 overdraft/NSF fees in one year. See CFPB 2017 Data Point at 4–5.

⁶² *Id.* at 15–16 (finding that as neighborhood income decreases, overdraft frequency increases); *id.* at 6 (finding that nearly 70 percent of frequent overdrafters had end-of-day balances with medians between \$237 and \$439, while another 20 percent had median end-of-day balances of \$140). See also FHN, *Overdraft Trends Amid Historic Policy Shifts* (June 1, 2023), <https://finhealthnetwork.org/research/overdraft-trends-amid-historic-policy-shifts/> (FHN Brief 2023) (finding that households with incomes under \$30,000 were twice as likely to report at least one overdraft than those with incomes of \$100,000 or more).

⁶³ CFPB 2017 Data Point at 15–16.

⁶⁴ See FHN Brief 2023 (finding that 26 percent of Black, 23 percent of Latinx, and 14 percent of White households reported having overdrafted, making Black and Latinx households 1.9 and 1.6 times as likely as White households, respectively, to have overdrafted); see also FHN Brief 2024 (finding that 31 percent of Black, 24 percent of Latinx, and 14 percent of White households reported having overdrafted in 2023); Meghan Greene et al., FHN, *FinHealth Spend Report 2022: What U.S. Households Spent on Financial Services During COVID-19*, at 14 (Apr. 2022), https://finhealthnetwork.org/wp-content/uploads/2022/05/FinHealth_Spend_Report_2022_Final.pdf (finding in a 2021 survey that Black and Latinx households with a savings or checking account were 1.8 and 1.4 times as likely as White households to report having overdrafted); see also CFPB, *Overdraft and Nonsufficient Fund Fees*, at 25 (Dec. 2023), https://files.consumerfinance.gov/f/documents/cfpb_overdraft-nsf-report_2023-12.pdf (finding that Black and Hispanic consumers are 69 and 60 percent more likely to reside in a household charged at least one overdraft or NSF fee in the past year).

⁶⁵ For example, a 2012 study found that 30 million checking accounts were involuntarily closed from 2001–2005 due to excessive overdrafts, with the former accountholders having limited or no subsequent access to the formal banking system. See Dennis Campbell et al., *Bouncing out of the banking system: An empirical analysis of involuntary bank account closures*, 36 J. Banking & Fin. 1224 (2012). The CFPB's supervisory experience suggests that overdraft-related involuntary closures remain prevalent in today's market.

⁵⁵ *Id.*; see also 87 FR 66935, 66935–40 (Nov. 7, 2022).

⁵⁶ 87 FR 5801 (Feb. 2, 2022).

⁵⁷ CFPB 2014 Data Point at 21.

⁵⁸ *Id.* at 13.

⁵⁹ CFPB 2017 Data Point at 6, 32–33. This dynamic was likely driven primarily by the scenario where a debit card or ATM transaction is authorized against a sufficient balance but then settles against an insufficient balance. A consumer who was not opted-in would have had this transaction approved and assessed no fee. A consumer who was opted-in may have been charged a fee. For discussion of regulatory guidance and CFPB enforcement actions addressing overdraft fees assessed on these “authorize positive, settle negative” transactions, see part I.B.5.

⁶⁰ CFPB, *A Closer Look: Overdraft and the Impact of Opting-In* (Jan. 19, 2017), https://files.consumerfinance.gov/f/documents/201701_cfpb_overdraft-and-impact-of-opting-in.pdf (citing a rate of 6.2 percent in a given year for non-opted-in consumers and 2.5 percent for opted-in consumers, based on calculations using the same large bank data used in CFPB 2014 Data Point).

5. Growing Regulatory Concerns About Non-Covered Overdraft Credit

As financial institutions began to evolve the provision of non-covered overdraft away from the historical model and toward increased automation, greater frequency, and higher revenues, Federal regulators expressed increasing consumer protection concerns. In 2001, in declining to issue a requested “comfort letter” for a financial institution’s overdraft program, the Office of the Comptroller of the Currency (OCC) stated that overdraft services are extensions of credit and that the associated charges may be “just as burdensome as those imposed on borrowers utilizing other types of high interest rate credit.”⁶⁶ In 2002, the Board noted that some non-covered overdraft credit may not be all that different from overdraft lines of credit,⁶⁷ and in 2004 the Board stated that further consideration of the need for Regulation Z coverage of overdraft services would be appropriate if consumer protection concerns were to persist.⁶⁸ In 2005, the Federal banking agencies issued joint guidance on non-covered overdraft credit noting that “the existing regulatory exceptions [*i.e.*, exceptions in Regulation Z such that it does not apply] were created for the occasional payment of overdrafts, and as such could be reevaluated by the Board in the future, if necessary” and “[w]here the Board to address these issues more specifically, it would do so separately under its clear [TILA] authority.”⁶⁹ In 2009, the Board adopted a rule under Regulation E prohibiting institutions from assessing overdraft fees on one-time debit card and ATM transactions unless the institution obtained the consumer’s affirmative consent to such fees (“opt-in rule”).⁷⁰ Following the adoption of the Board’s rule, the FDIC issued additional supervisory guidance,⁷¹ which advises, among other things, that where transactions overdraw an account by a de minimis amount, the overdraft fee should be eliminated or be reasonable and

proportional to the amount of the transaction.⁷²

More recently, in October 2022, the CFPB issued a policy statement stating that the assessment of overdraft fees that consumers would not reasonably anticipate, including overdraft fees on debit card or ATM transactions that are authorized when the consumer’s available balance is sufficient to cover the transaction but that later settle against a negative balance due to intervening transactions or complex processes (“authorize positive, settle negative” or “APSN” transactions), likely violates the Consumer Financial Protection Act of 2010 (CFPA)’s statutory prohibition against unfair practices.⁷³ In April 2023, the OCC and FDIC issued guidance advising that overdraft fees charged on such transactions raise heightened risk of unfair, deceptive, or abusive acts or practices.⁷⁴ The OCC’s guidance also describes certain practices that it notes may help to manage risks associated with overdraft programs, including assisting consumers in avoiding “unduly high costs” in relation to the face value of the item being presented, the amount of their regular deposits, and their average account balances, and implementing fees and practices that bear a reasonable relationship to the risks and costs of providing overdraft programs.⁷⁵

The CFPB has previously established rules governing overdraft credit on prepaid accounts. In 2016, the CFPB

⁷² *Id.*

⁷⁵ OCC Bulletin 2023–12.

amended Regulation Z to provide that prepaid accounts that offer credit features are generally covered under Regulation Z’s credit card rules.⁷⁶ The CFPB also amended the compulsory use provision under Regulation E to prohibit prepaid card issuers from requiring consumers to set up preauthorized EFTs to repay credit extended through an overdraft credit feature accessible by a hybrid prepaid-credit card.⁷⁷

In applying Regulation Z to overdraft credit features on prepaid accounts, the CFPB noted that the term “credit” in TILA includes “the right to . . . incur debt and defer its payment”⁷⁸ and explained that that definition “covers the situation when a consumer makes a transaction that exceeds the funds in the consumer’s account and a person elects to cover the transaction by advancing funds to the consumer.”⁷⁹ The CFPB further stated that overdraft fees on prepaid accounts “generally constitute finance charges, because they are directly payable by the consumer and imposed directly by the creditor as a condition of the extension of credit.”⁸⁰ The CFPB also stated that overdraft services offered in connection with prepaid accounts “can be regulated by Regulation Z as a ‘plan’ when the consumer is contractually obligated to repay the debt, even if the creditor retains, by contract, the discretion not to extend credit.”⁸¹ At that time, the CFPB stated that it was continuing to study overdraft services on checking accounts and would propose any further regulatory consumer protections in that space through a separate rulemaking.⁸²

II. The Proposal and Other Procedural Background

A. Outreach and Engagement

The CFPB has engaged in outreach and research related to overdraft fees since soon after the CFPB’s inception. In 2012, the CFPB initiated a broad inquiry into overdraft programs for consumer checking accounts.⁸³ This inquiry included a request for information on

⁷⁶ 81 FR 83934, 83934–35 (Nov. 22, 2016). The CFPB amended the 2016 Prepaid Final Rule in 2017 and 2018. See 82 FR 18975 (Apr. 25, 2017); 83 FR 6364 (Feb. 13, 2018). The 2016 Prepaid Final Rule and subsequent amendments to that rule are referred to collectively herein as the Prepaid Accounts Rule.

the impacts of overdraft fees on consumers,⁸⁴ and collection and analysis of overdraft-related data from several large banks with over \$10 billion in assets that provided a significant portion of all U.S. consumer checking accounts.⁸⁵ The CFPB published analyses of these data in a series of reports from 2013–2017, which examined institution-level policies and data, as well as account- and transaction-level data.⁸⁶ These studies assessed, among other things, overdraft fee size, prevalence, and related account closure; overdraft policies and practices across institutions; the distribution of overdraft fee incurrence across accounts; how overdraft transactions and fees vary across opt-in status; the size of transactions that lead to overdrafts; how long account balances stay negative after overdrafts; and the characteristics of account holders (including end-of-day balance, deposits, credit score, and available credit on a credit card) across distributions of overdraft frequency. The CFPB also collected anonymized institution-level information from several core processors, which provide operations and accounting systems to financial institutions. This data collection informed the CFPB's 2021 report assessing policies and practices among a large sample of financial institutions using core processors.⁸⁷

In 2021, the CFPB examined financial institutions' reliance on overdraft/NSF fees from 2015 to 2019, finding that it was persistent.⁸⁸ Since then, the CFPB has continued tracking trends in the marketplace⁸⁹ and evaluating some banks' key overdraft-related metrics through the CFPB's supervision work.⁹⁰ From December 2022 to July 2023, the CFPB reviewed the publicly available overdraft practices of financial institutions with assets over \$10

billion.⁹¹ In addition, the CFPB has recently collected information from several financial institutions under the CFPB's supervision, including data regarding financial institutions' costs associated with offering overdraft credit, which is discussed further in part IV.D as well as in a separate report issued in January 2024 titled "Overdraft and NSF Practices at Very Large Financial Institutions."⁹²

Consistent with section 1022(b)(2)(B) of the CFPB, the CFPB has consulted with the appropriate prudential regulators and other Federal agencies, including regarding consistency with any prudential, market, or systemic objectives administered by these agencies. Consistent with the CARD Act, the CFPB consulted with the following agencies regarding rules that implement TILA section 149: (1) the Office of the Comptroller of the Currency; (2) the Board of Directors of the Federal Deposit Insurance Corporation; and (3) the National Credit Union Administration Board. The CFPB also consulted with the Board and several other Federal agencies, as discussed in part II.A.

B. Summary of the Proposed Rule

On January 17, 2024, the CFPB issued a notice of proposed rulemaking containing several proposed amendments to Regulations Z and E to extend consumer credit protections that generally apply to other forms of consumer credit to certain overdraft credit provided by very large financial institutions. This notice of proposed rulemaking was published in the **Federal Register** on February 23, 2024.⁹³ The CFPB proposed that the final rule, if adopted, would take effect on the October 1 which follows by at least six months the date it is published in the **Federal Register**, consistent with 15 U.S.C. 1604(d). The CFPB expected that would likely fall on October 1, 2025.

As described more fully below, the CFPB proposed to amend Regulations Z and E, and accompanying commentary as they relate to overdraft credit. The amendments would have applied only to very large financial institutions—i.e., insured depository institutions and credit unions with more than \$10 billion in assets. The proposal would

not change the regulatory framework for overdraft services offered by financial institutions with assets of \$10 billion or less.

The CFPB proposed to update two regulatory exceptions from the definition of finance charge so that Regulation Z would apply to overdraft credit provided by very large institutions unless it is provided at or below costs and losses as a true courtesy to consumers, as follows. First, the proposal would have updated an exception that currently provides that a charge for overdraft is not a finance charge if the financial institution has not previously agreed in writing to pay items that overdraw an account⁹⁴ so that the exception would not apply to "above breakeven overdraft credit" offered by a very large financial institution. The proposal would have given financial institutions the ability to determine whether an overdraft charge is considered above breakeven overdraft credit by either: (1) calculating its own costs and losses using a standard set forth in the proposal; or (2) relying on a benchmark fee set by the CFPB in the proposal. The CFPB asked for comment on four potential benchmark fees: \$3, \$6, \$7, or \$14. Second, the proposal would have updated a related exception that provides that a charge imposed on an asset account in connection with an overdraft credit feature is not a finance charge if the charge does not exceed the charge for a similar transaction account without a credit feature.⁹⁵

As a result of these proposed changes, above breakeven overdraft credit that is not currently subject to Regulation Z would have become subject to Regulation Z, including provisions in subpart B that govern open-end credit (e.g., the account opening disclosures, periodic statements, and advertising rules).

The proposal would also have required covered overdraft credit offered by very large financial institutions to be put in a credit account separate from the asset account, and it would have updated exceptions relating to credit cards. Among other changes, it would have applied the portions of Regulation Z that implement the Credit Card Accountability Responsibility and Disclosure Act of 2009 (CARD Act)⁹⁶ to covered overdraft credit that can be accessed by a hybrid debit-credit card, such as a debit card or other single credit device (including certain account numbers) that a consumer may use from time to time to obtain covered overdraft

credit from a very large financial institution. Provisions of the CARD Act that would have applied to such overdraft credit include, but are not limited to, ability to pay underwriting requirements, limitations on penalty fees including certain fees on transactions that are declined due to nonsufficient funds, and various requirements related to rate changes.

The proposal would also have prohibited compulsory use of preauthorized electronic fund transfers (EFTs) for repayment of covered overdraft credit provided by very large financial institutions, which would have ensured that consumers using those products have a choice of at least one alternative method of repayment. As a result of this change, covered overdraft credit offered by very large financial institutions could not be conditioned on consumers agreeing to automatic debits from their checking account. Consumers could still opt into automatic payments on a periodic basis if offered by their financial institution, but they would have the right to repay this overdraft credit manually if they prefer.

Comments

The CFPB received over 48,000 comments on the proposal.⁹⁷ Over 47,000 of those comments were from individual consumers and over 1,000 were from or about institutions with fewer than \$10 billion in assets. The CFPB also received many comments from consumer advocate commenters, academic commenters, industry commenters, State regulators, State Attorneys General, and members of Congress. This also includes comments received after the comment period closed via ex parte submissions and meetings.⁹⁸ All comments, including ex parte submissions and summaries of ex parte meetings, will be available on the public docket for this rulemaking.⁹⁹

Relevant information received via comment letters, as well as ex parte submissions, is discussed below in subsequent parts of this document, as applicable. The CFPB considered all the comments it received regarding the proposal, made certain modifications, and is adopting the final rule as described in part IV below.

III. Legal Authority

A. Truth in Lending Act

TILA section 105(a). TILA section 105(a) directs the CFPB to prescribe regulations to carry out the purposes of TILA and provides that such regulations may contain additional requirements, classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for all or any class of transactions, that the CFPB judges are necessary or proper to effectuate the purposes of TILA, to prevent circumvention or evasion thereof, or to facilitate compliance therewith.¹⁰⁰ A purpose of TILA is to assure a meaningful disclosure of credit terms so that the consumer will be able to compare more readily the various available credit terms and avoid the uninformed use of credit.¹⁰¹ This stated purpose is tied to Congress's finding that economic stabilization would be enhanced and competition among the various financial institutions and other firms engaged in the extension of consumer credit would be strengthened by the informed use of credit.¹⁰² Thus, strengthened competition among financial institutions is a goal of TILA, achieved through the effectuation of TILA's purposes. A purpose of TILA is also to protect the consumer against inaccurate and unfair credit billing and credit card practices.¹⁰³

CARD Act section 2. Section 2 of the CARD Act, which amended TILA to establish fair and transparent practices relating to the extension of credit under an open-end consumer plan, and for other purposes, also specifically grants the CFPB authority to issue rules and model forms it considers necessary to carry out the CARD Act and amendments made by the CARD Act.¹⁰⁴

For the reasons discussed in this notice, the CFPB is amending Regulation Z with respect to overdraft credit to carry out TILA's purposes. The CFPB is retaining additional requirements, adjustments, and exceptions as, in the CFPB's judgment, are necessary and proper to carry out the purposes of TILA, prevent circumvention or evasion thereof, or to facilitate compliance. In developing these amendments pursuant to its authority under TILA section 105(a), the CFPB has considered the purposes of TILA, including ensuring meaningful disclosures, facilitating consumers'

ability to compare credit terms, helping consumers avoid the uninformed use of credit, and protecting consumers against inaccurate and unfair credit billing and credit card practices, and the findings of TILA, including strengthening competition among financial institutions and promoting economic stabilization.

B. Electronic Fund Transfer Act

EFTA section 902 establishes that the purpose of the statute is to provide a basic framework establishing the rights, liabilities, and responsibilities of participants in EFT and remittance transfer systems but that its primary objective is the provision of individual consumer rights.¹⁰⁵ Among other things, EFTA contains provisions regarding compulsory use of EFTs.¹⁰⁶

EFTA section 904(a) authorizes the CFPB to prescribe regulations to carry out the purposes of EFTA.¹⁰⁷ EFTA section 904(c) provides that regulations prescribed by the CFPB may contain such classifications, differentiations, or other provisions, and may provide for such adjustments or exceptions for any class of EFTs or remittance transfers, that the CFPB deems necessary or proper to effectuate the purposes of EFTA, to prevent circumvention or evasion, or to facilitate compliance.¹⁰⁸ The Senate Report accompanying EFTA noted that regulations are "essential to the act's effectiveness" and "will add flexibility to the act by permitting the [CFPB] to modify the act's requirements to suit the characteristics of individual EFT services. Moreover, since no one can foresee EFT developments in the future, regulations would keep pace with new services and assure that the act's basic protections continue to apply."¹⁰⁹

EFTA section 904(c) also provides that the "CFPB shall by regulation modify the requirements imposed by this subchapter on small financial institutions if the CFPB determines that such modifications are necessary to alleviate any undue compliance burden on small financial institutions and such modifications are consistent with the purpose and objective of this subchapter."

As discussed in part IV below, the CFPB is adopting amendments to Regulation E, including with respect to compulsory use of preauthorized repayment and the definition of overdraft services, pursuant to the

CFPB's authority under, as applicable, EFTA section 904(a) and (c).

C. Consumer Financial Protection Act

CFPA section 1022(b)(1). Section 1022(b)(1) of the CFPA authorizes the CFPB to prescribe rules "as may be necessary or appropriate to enable the [CFPB] to administer and carry out the purposes and objectives of the Federal consumer financial laws, and to prevent evasions thereof."¹¹⁰

Among other statutes, TILA, EFTA, and the CFPA are Federal consumer financial laws.¹¹¹ Accordingly, in issuing this rule, the CFPB is exercising its authority under CFPA section 1022(b) to prescribe rules that carry out the purposes and objectives of TILA, EFTA, and the CFPA and prevent evasion of those laws.

IV. Discussion of the Final Rule

A. Overview of the CFPB's Approach

As discussed above, the CFPB proposed to amend Regulations E and Z to update regulatory exceptions for overdraft credit provided by very large financial institutions, thereby ensuring that extensions of overdraft credit adhere to consumer protections required of similarly situated products, unless the overdraft fee is a small amount that only recovers estimated costs and losses. These consumer protections allow consumers to better comparison shop across credit products and provide substantive protections that apply to other consumer credit.

As a result of the evolution of the overdraft market over the last few decades, the regulatory exceptions for overdraft credit provided by very large financial institutions no longer serve their original purpose. The CFPB proposed preserving a limited exception to encourage the availability of overdraft coverage, which can benefit consumers, especially given that much overdraft credit is incidental in nature, as consumers often do not know with certainty whether a transaction will be presented against sufficient funds. But the proposal stated that a blanket exception for all of today's non-covered overdraft credit—which poses serious risks to consumers as reflected in the discussion of consumer impacts noted above, and resembles other mass-marketed high-cost consumer credit products—cannot be justified as an exception for a courtesy to consumers,

nor as consistent with TILA's purposes of promoting the informed use of credit and comparison shopping across credit products, and protecting consumers against inaccurate and unfair credit billing and credit card practices.

The CFPB is adopting the same general approach in the final rule, with some modifications, as discussed herein.

Comments Received on the CFPB's Proposed Approach Generally

Comments received by the CFPB on the proposal, and responses thereto, are discussed in more detail throughout this part IV. The following is a synopsis of comments received on the CFPB's proposed approach generally.

Many of the commenters supported the CFPB's proposal, stating among other things that the rule would reduce fee burdens and associated consequences and support the informed use of credit. These commenters generally focused on negative consumer experiences with overdraft fees, stating that what began as a narrow exception to provide for occasional accommodation now generates billions of dollars in fees from vulnerable populations. A State agency commenter noted that overdraft fees can discourage many consumers from wanting a bank account at all and noted that overdraft fees can deduct funds from a consumer's public benefits, thereby frustrating the purpose of those benefit programs. A consumer advocate commenter noted that some financial institutions are already lowering fees or offering alternative products to meet consumer needs and posited that the CFPB's proposal would continue this progress by supporting market shifts that benefit consumers. Another commenter noted that the proposal continues to offer flexibility to covered entities such that they may offer overdraft as courtesy non-covered overdraft or as a covered overdraft line of credit.

Other commenters, including banks, credit unions, and industry groups, did not support the proposed rule, arguing, for example, that it is unnecessary because overdraft fees are already effectively disclosed consistent with Regulations DD and E, and that consumers find value in overdraft programs and expressly opt into them. Therefore, some argued that the CFPB should further study why consumers sometimes use higher-cost credit options and, in the case of overdraft programs, expressly opt into them, before proposing new regulations to ensure that any changes will achieve their goals. Commenters also

emphasized a number of changes to overdraft programs that have already reduced fees in recent years and noted that if the proposal is finalized, financial institutions might pass along costs to consumers by increasing other fees or limiting credit or other services, including the possibility that transactions would not be paid through overdraft credit but would instead be declined or that consumers might migrate to less regulated credit alternatives. Some commenters objected to the CFPB's focus on whether overdraft fees recover more than applicable costs and losses.

B. Entity Coverage

Proposed Rule

The CFPB proposed to expand protections to consumers of overdraft credit at financial institutions with more than \$10 billion in assets. Under the proposal, the regulatory framework would not change for overdraft credit offered by financial institutions with \$10 billion or less in assets.

To limit the proposed rule to overdraft credit offered by financial institutions with assets of more than \$10 billion, the proposed rule would have defined in proposed § 1026.62(b)(8) the term "very large financial institution" as an insured depository institution or an insured credit union with total assets of more than \$10 billion and any affiliate thereof. The proposed rule then used the term "very large financial institution" to limit the scope of overdraft credit that would be subject to the proposed rule.

The CFPB preliminarily determined in the proposal that overdraft services offered by financial institutions with more than \$10 billion in assets should be subject to this rule. The proposal noted that, in the supervisory context, Congress adopted in 12 U.S.C. 5515(a) a \$10 billion threshold to define the "very large banks, savings associations, and credit unions" that would be subject to the CFPB's primary supervision authority. The CFPB preliminarily determined that a \$10 billion threshold similarly should be used to define "very large financial institution" for limiting the scope of overdraft credit that would be covered by the proposed rule.

The CFPB preliminarily determined in the proposal that consumers would benefit from a rule that would apply to very large financial institutions—i.e., those with assets of \$10 billion or more. The proposal noted that such a rule would increase protections for the overwhelming majority of consumers of overdraft credit. The CFPB noted that the proposed rule would have covered

¹¹⁰ 12 U.S.C. 5512(b)(1).

¹¹¹ CFPA section 1002(14), 12 U.S.C. 5481(14) (defining "Federal consumer financial law" to include the provisions of the CFPA and enumerated consumer laws; "enumerated consumer laws" is defined in CFPA section 1002(12), 12 U.S.C. 5481(12)).

financial institutions holding approximately 80 percent of consumer deposits as of December 2022¹¹² and responsible for approximately 68 percent of overdraft charges as of December 2022.¹¹³ The CFPB preliminarily determined that consumers at very large financial institutions would benefit from the expanded protections that would be provided by the proposed rule.

The CFPB noted that in light of the different circumstances smaller financial institutions may face in adapting to the proposed regulatory framework, the CFPB did not propose to extend the proposed rule to those institutions with \$10 billion or less in assets. The CFPB noted that while it did not propose any changes to the regulatory requirements for smaller financial institutions, the CFPB will continue to monitor the market in coordination with State and Federal supervisors.

The CFPB requested comment on its preliminary determination to apply the proposed rule only to very large financial institutions and on whether \$10 billion is an appropriate threshold for defining very large financial institutions.

For the reasons discussed below, the CFPB is adopting the very large financial institution definition as proposed.

Comments Received

Several commenters, including several consumer advocates, supported the proposal's approach to apply the rule to very large financial institutions. They stated that the rule would benefit a majority of consumers, that very large financial institutions have greater resources to adapt to regulatory changes, and that the CFPB may need additional time to gather relevant cost data for smaller financial institutions. These commenters recommended that the CFPB take steps to conduct a rulemaking as soon as possible to consider expanding the scope of the rule to entities that are not very large financial institutions (non-VLFIs).

A number of industry commenters maintained that the CFPB did not provide a sufficient justification for applying the rule only to very large financial institutions. The industry commenters criticized on several different grounds the proposed rule's approach to apply the revised regulatory framework only to very large financial institutions.

Some industry commenters stated that the CFPB lacks authority to apply the rule only to very large financial institutions. Several industry commenters maintained that the differential treatment of very large financial institutions would be inconsistent with TILA, stating that the proposed rule did not explain why subjecting smaller financial institutions to the rule would not provide a meaningful benefit to consumers while subjecting very large financial institutions to the rule would provide a meaningful benefit. Other industry commenters stated that the proposal did not consider the five factors for an exemption under section 105(f)(2) of TILA and that the CFPB did not explain why it would be appropriate to define overdraft as credit and an overdraft fee as a finance charge only for very large financial institutions.

Several industry commenters stated that the proposal failed to provide a sufficient explanation for covering only very large financial institutions. The commenters stated that the proposal noted the \$10 billion supervisory threshold but did not sufficiently explain why that threshold was relevant for exempting very large financial institutions from the proposed overdraft rule. While these commenters acknowledged that the proposal noted that smaller financial institutions may face "different circumstances," they maintained that the proposal did not sufficiently explain what those circumstances are and why they are relevant.

Several industry commenters stated that the proposal provided insufficient data to support applying the rule only to very large financial institutions. The commenters stated that data cited in the proposed rule indicated that smaller financial institutions hold only 20 percent of deposits but receive 32 percent of overdraft fees. Commenters stated the CFPB's own data indicate that smaller financial institutions appear to receive similar or greater overdraft fees per account compared to larger financial institutions.

Several industry commenters also maintained that applying the rule only to very large financial institutions would cause consumer confusion and market disruption. The commenters stated that consumers would receive different disclosures based upon the asset size of their financial institution and may not understand the differences among the overdraft programs at different financial institutions.

Several industry commenters expressed concern that the CFPB's proposal to apply the rule only to very

large financial institutions avoided the CFPB's SBREFA obligations. Moreover, some commenters argued that the CFPB did not fulfill its obligations with respect to the SBREFA process.

In addition, many non-VLFI industry commenters stated that, even if the rule would not apply to non-VLFIs, they would nevertheless face competitive pressure to alter their overdraft programs and reduce their overdraft fees. They maintained that, because they lack the resources of larger financial institutions, they would have difficulty altering their overdraft programs and reducing their fees to compete with larger financial institutions and may be forced to decrease availability of or discontinue overdraft programs.

Several commenters, including consumer advocates, academic commenters, and State Attorneys General, recommended that the CFPB apply the rule's framework to all financial institutions. They stated that non-VLFIs engage in the same problematic overdraft practices that harm consumers and that all consumers should receive the protections from the rule's overdraft framework. Some commenters stated that many large institutions already have eliminated or reduced their overdraft and NSF fees, whereas most small institutions have not and that the proposed rule therefore would not apply to many of the institutions that are causing significant harm to their consumers through their overdraft programs.

A couple of commenters recommended adjusting the threshold. One consumer advocate supported reducing the threshold to the SBREFA threshold of \$850 million, noting that the rule provides multiple pathways for financial institutions to determine breakeven overdraft fees. A few other commenters recommended raising the threshold to \$100 billion or more, arguing that the largest financial institutions have the resources to adapt to regulatory changes.

Some commenters, including a consumer advocate and a bank, raised concerns that nonbanks that partner with banks to offer bank accounts could evade coverage under the rule. They stated that large nonbanks could evade the rule by partnering with multiple smaller banks with assets under \$10 billion. The consumer advocate stated that some nonbanks offer accounts that they claim are checking accounts exempt from the prepaid rule and its protections applicable to overdraft fees on prepaid cards. The consumer advocate recommended that the CFPB clarify that any such account, even if tied to a bank account, is a prepaid

¹¹² Computed from 2022 FFIEC and National Credit Union Administration call report data.

¹¹³ Estimated using data from 2022 FFIEC Call Reports and methodology discussed at FN 29.

account. Alternatively, the consumer advocate recommended that the CFPB expand the rule's definition of "very large financial institution" by using the Regulation E definition of "financial institution," which is broader than depository institutions, and including within the scope of the rule nonbanks that offer accounts in partnership with depository institutions. Otherwise, the consumer advocate stated, nonbanks will partner with one or more smaller financial institutions with less than \$10 billion in assets to ensure that their accounts would not be subject to this rule. The consumer advocate stated that nonbanks already are using these partnerships to avoid having to comply with the Durbin Amendment's interchange fee limits.

Final Rule

For the reasons stated in the proposal and below, the CFPB is adopting the very large financial institution definition as proposed to expand protections for consumers of overdraft credit at financial institutions with more than \$10 billion in assets. The rule does not change the regulatory framework for overdraft credit offered at financial institutions with \$10 billion or less in assets. The CFPB plans to monitor market responses to the protections adopted in this rule, analyze additional information, and consider whether to apply expanded protections to overdraft credit offered by financial institutions with \$10 billion or less in assets. As in the proposed rule, the final rule defines the term "very large financial institution" in § 1026.62(b)(6) as an insured depository institution or an insured credit union with total assets of more than \$10 billion and any affiliate thereof. A financial institution may determine whether it has total assets of more than \$10 billion using the same determination that is used to determine whether such institutions are subject to the CFPB's supervisory authority under 12 U.S.C. 5515(a). The CFPB currently publishes a list of such institutions at <https://www.consumerfinance.gov/compliance/supervision-examinations/institutions/>. The final rule uses the term very large financial institution to limit the scope of overdraft credit that is subject to the final rule.

The CFPB has determined that it is appropriate to move forward with a rule that expands protections for consumers of overdraft credit at very large financial institutions. The majority of consumers will benefit from such a rule. As noted above, approximately 80 percent of consumer deposits are at very large financial institutions, and more than two-thirds of overdraft fees were

imposed by very large financial institutions. Using its supervision and market monitoring capabilities, the CFPB has observed recent market changes for overdraft programs, especially at very large financial institutions. Many very large financial institutions have altered their overdraft programs and reduced or eliminated overdraft fees without imposing additional fees, indicating that very large financial institutions have the capacity to adapt their overdraft programs without impairing their provisions of other products and services.

By contrast, smaller financial institutions may have less flexibility in adapting to changes in the regulatory framework for overdraft credit. To the extent that changes to the regulatory framework would result in a reduction in overdraft revenue, smaller financial institutions may have greater difficulty in absorbing a reduction in overdraft revenue without it having some impact on their operations, and this impact could negatively affect consumers at smaller financial institutions. Although the CFPB has less information about smaller financial institutions, information from the bank call reports and comments on the proposal indicate that smaller financial institutions currently are more reliant on overdraft revenue under the existing regulatory framework than very large financial institutions. For example, based on 2023 call report data, combined revenue from overdraft and NSF charges was 44 percent of deposit service charges and 4.7 percent of noninterest income for banks with assets between \$1 billion and \$10 billion, as compared to 19 percent and 1.8 percent, respectively, for banks with assets greater than \$10 billion. These data suggest that smaller financial institutions are more reliant on overdraft revenue and may be less able to adapt to a regulatory framework that results in reductions in overdraft revenue. A number of non-VLFI industry commenters claimed that if they were subject to the rule, they would face significant challenges that would cause them to alter or eliminate their overdraft programs and impair their ability to offer other products and services. Moreover, as a consumer advocate commenter noted, smaller institutions may have less flexibility to adjust their product offerings.

As noted above, many very large financial institutions have recently adjusted their overdraft credit programs by, among other things, reducing or eliminating fees. This suggests that very large financial institutions, with their diverse product offerings and multiple

sources of revenue, would have flexibility to respond to changes in the regulatory framework for overdraft credit and would be able to adapt to a reduction in fee revenue from non-covered overdraft credit. This also suggests that, if very large financial institutions want to continue offering non-covered overdraft credit that is not subject to Regulation Z after the rule goes into effect, they should be able to reduce their fees to continue providing non-covered overdraft credit. The CFPB has not observed a significant number of smaller financial institutions modifying their overdraft credit offerings to reduce or eliminate overdraft fees. On the contrary, the CFPB received feedback from smaller financial institutions stating that they were not capable of making such changes. Given the CFPB's limited information about the potential impact that revising the regulatory framework for overdraft credit could have on smaller financial institutions, and the consumers that rely on those smaller financial institutions, the CFPB has determined that it should proceed at this time with a rulemaking that narrows the exceptions only for very large financial institutions, *i.e.*, those with assets of \$10 billion or more.

As noted above, several industry commenters stated that the CFPB lacks authority under TILA to revise the regulatory framework only for very large financial institutions, maintaining that the proposed rule did not consider the standards for TILA exemptions under section 1604(f). As discussed in more detail elsewhere, including in the section discussing changes to the definition of finance charge, the CFPB is partially removing the existing regulatory exceptions created by the Board, not creating new exemptions from TILA or Regulation Z, and therefore need not invoke its statutory exception or exemption authority. Section 1604(f)(2) starts with the phrase "[i]n determining which classes of transactions to exempt," and then provides a list of factors that the CFPB would need to consider to justify creating an exemption under that authority. It is not a list of factors the CFPB must consider to justify partially removing an existing exception, which is what this rule does.¹¹⁴ And the CFPB

¹¹⁴ Section 1604(a) provides that the CFPB may prescribe regulations that contain such adjustments and exceptions for all or any class of transactions that the CFPB judges are necessary or proper to effectuate the purposes of TILA, to prevent circumvention or evasion thereof, or to facilitate compliance therewith. The CFPB likewise does not have to invoke this statutory adjustment or exception authority to narrow the scope of an existing exception.

is not obligated to justify the portion of the Board's exception that the CFPB is not reversing (the portion applicable to non-VLFIs) using those factors) just because the CFPB is declining at this time to remove that portion of the existing exception due to the policy and prudential reasons described herein. As noted above, the CFPB plans to monitor market responses to the protections adopted in this rule and consider whether to remove the exception as to smaller financial institutions.

Nevertheless, these changes are also consistent with TILA § 105(a), which grants the CFPB authority to establish "additional requirements, classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for all or any class of transactions, as in the judgment of the [CFPB] are necessary or proper to effectuate the purposes of this subchapter, to prevent circumvention or evasion thereof, or to facilitate compliance therewith." Consistent with the discussion above, the CFPB has determined that covering overdraft credit only from VLFIs in this rule at this time will facilitate compliance with TILA and its purposes by providing the protections of TILA and Regulation Z to the vast majority of consumers of overdraft credit, while the CFPB monitors the market impact of the rule, but not disturbing the status quo for smaller financial institutions that may be less equipped to adapt to such changes without impacting their operations in a manner that could negatively affect their consumers. The CFPB notes that consumers of overdraft credit at smaller institutions will remain covered by the existing regulatory regime.

For similar reasons, the CFPB has determined that the elimination of the regulatory exception to EFTA's compulsory use prohibition only for overdraft credit provided by a VLFI is consistent with EFTA § 904(c), which empowers the CFPB to "provide for such adjustments and exceptions for any class of electronic fund transfers or remittance transfers as in the judgment of the [CFPB] are necessary or proper to effectuate the purposes of this subchapter, to prevent circumvention or evasion thereof, or to facilitate compliance therewith," and also to "modify the requirements imposed by [EFTA] on small financial institutions if the Bureau determines that such modifications are necessary to alleviate any undue compliance burden on small financial institutions and such modifications are consistent with the purpose and objective of [EFTA]." The CFPB has determined that, because

smaller financial institutions may face difficulty in adapting to these regulatory changes without negatively impacting their consumer base, applying the amendment to the compulsory use exception only to VLFIs in this rule at this time will prevent undue compliance burden on those institutions, facilitate compliance with EFTA, and be consistent with the purpose and objective of EFTA by continuing, for now, the existing regulatory framework establishing the rights, liabilities, and responsibilities of participants in those electronic fund transfer systems while the CFPB monitors the market impact of the rule.

Several industry commenters maintained that the CFPB lacks data for its approach of limiting the applicability of the rule to very large financial institutions, noting that non-VLFIs hold only 20 percent of deposits but receive 32 percent of overdraft fees. As noted above, the CFPB has concluded that it is appropriate to adopt a rule now that covers very large financial institutions because the CFPB has more information about overdraft programs at very large financial institutions and about the capacity for them to adapt to a revised regulatory framework and because such a rule would provide protections to a significant majority of consumers. The CFPB has limited information about the costs for overdraft programs at smaller financial institutions and the cost data that the CFPB relied upon in developing the benchmark fee in § 1026.62(d)(1)(ii) may not be representative of the costs for non-VLFIs. The CFPB is concerned that non-VLFIs would face more significant challenges in adapting to a revised regulatory framework. The CFPB is not basing its decision to apply this rule to VLFIs on material differences in the overdraft programs at very large financial institutions and non-VLFIs.

Several industry commenters also stated that applying the rule only to very large financial institutions would cause consumer confusion and market disruption. They noted that the rule would result in a marketplace in which consumers would receive different disclosures for otherwise similar services based upon the size of the financial institution. The CFPB appreciates that the rule would create some differences in regulatory treatment of overdraft programs in the marketplace. However, the CFPB concludes that the benefits of providing additional protections to most consumers while proceeding cautiously with respect to smaller financial institutions outweighs those concerns. The CFPB plans to monitor market

responses to the protections adopted in this rule.

As noted above, a number of industry commenters maintained that the CFPB did not comply with its obligations under the SBREFA process. Several non-VLFI industry commenters maintained that the rule will have a negative impact on their financial condition and their ability to offer overdraft products and other products and services because market pressures will force non-VLFIs to lower their overdraft fees and adjust their overdraft programs even if the rule itself does not require them to do so. Other commenters maintained that the CFPB's decision to remove the existing exception for larger financial institutions but not for smaller financial institutions was designed to circumvent SBREFA. But leaving in place an existing exception for smaller financial institutions is not inconsistent with SBREFA. The CFPB has complied with its obligations under SBREFA. The rule does not require non-VLFIs to comply with the revised regulatory framework, and any competitive pressures to adjust their overdraft programs are indirect and uncertain. It is far from clear that market forces will force non-VLFIs to adjust their overdraft programs. As noted above, many very large financial institutions already have adjusted their overdraft programs, including by reducing or eliminating overdraft fees, but these changes have not forced other non-VLFIs to alter their overdraft programs similarly.

The CFPB has concluded that \$10 billion is an appropriate asset threshold for this rulemaking. The CFPB reached the decision to use \$10 billion as the threshold by borrowing from Congress's policy judgment to use that threshold to separate very large financial institutions from smaller entities in other contexts in the CFPA. The CFPB also considered the lower threshold of \$850 million used by the SBA to define small financial institutions, but decided to take the more prudent and cautious approach of initially finalizing a higher threshold that applies only to "very large" entities and not just "large" entities. Congress used a relatively high \$10 billion threshold to define "very large banks, credit unions, and savings associations" for purposes of limiting the CFPB's primary supervision and enforcement authority to very large depository institutions. The CFPB will be able to use its primary supervisory authority to closely monitor the implementation of the rule with respect to these entities, which will aid its understanding of the effects of the rule as the CFPB studies the market to

determine whether and what regulations are appropriate for the rest of the market.

The CFPB has concluded that updating the regulatory framework is appropriate for very large financial institutions for several reasons, including that the CFPB has more information about overdraft credit offered by financial institutions with more than \$10 billion in assets and about their ability to adapt to changes in the regulatory framework for their overdraft programs. As noted above, financial institutions with more than \$10 billion in assets have greater diversity in product offerings and likely would have greater flexibility in adapting quickly to a revised regulatory framework for overdraft credit. Indeed, as also noted above, many financial institutions with more than \$10 billion in assets already have modified their overdraft credit offerings to reduce or eliminate overdraft fees and available evidence indicates that these financial institutions are less reliant on overdraft revenue, indicating that they have the ability to adapt to any reductions in overdraft revenue that may result from these changes to the regulatory framework for overdraft credit.

As noted above, a bank and a consumer advocate raised concerns about nonbanks evading the rule by partnering with smaller banks to offer accounts with overdraft credit. The consumer advocate recommended clarifying that such accounts offered by nonbanks are prepaid accounts subject to the protections of the prepaid rule or, alternatively, revising the definition of “very large financial institution” in this rule to cover nonbanks with more than \$10 billion in assets. The CFPB declines to address in this rule whether such accounts would be considered prepaid accounts. The CFPB also declines to revise the definition of “very large financial institution” to include nonbanks. Nevertheless, the CFPB will continue to monitor the market and will analyze whether any market participants are taking steps to evade coverage under the rule.

C. Transaction and Account Coverage

The CFPB proposed to add § 1026.62(a) and (b) to define the scope of transactions and accounts that would be covered under the proposed rule. As discussed below, to update non-statutory exceptions in Regulation Z, the proposed updates included defined terms (e.g., “above breakeven overdraft credit,” “covered asset account,” and “hybrid debit-credit card”) that specifically reference a “very large financial institution,” as defined in

proposed § 1026.62(b)(8). The proposal would not change the regulatory framework for overdraft services offered by financial institutions with assets of \$10 billion or less.

The proposal defined overdraft credit in proposed § 1026.62(a)(2), and also provided an example of overdraft credit in proposed comment 2(a)(14)–4. The CFPB’s proposed rule would have added commentary to the definition of open-end credit in § 1026.2(a)(20) to confirm that overdraft credit that is subject to a finance charge is generally open-end credit and is therefore subject to the Regulation Z provisions that apply to open-end credit. The CFPB proposed definitions of covered overdraft credit and non-covered overdraft credit by adding § 1026.62(b) to assist with ease of reference. The proposal provided that covered overdraft credit would be overdraft credit that is subject to a finance charge or is payable by written agreement in more than four installments, and would be subject to Regulation Z. The proposal provided that non-covered overdraft credit would be overdraft credit that is neither subject to a finance charge nor payable by written agreement in more than four installments, and would not be subject to Regulation Z. Additionally, the CFPB proposed to add a definition for covered overdraft credit account to facilitate ease of reference to credit accounts through which the financial institutions extend or can extend covered overdraft credit. Each of these proposed amendments is discussed below.

1. Overdraft Credit (§§ 1026.2(a)(14) and 1026.62(a))

TILA defines “credit” to mean the right granted by a creditor to a debtor to defer payment of debt or to incur debt and defer its payment.¹¹⁵ Regulation Z similarly defines “credit” in existing § 1026.2(a)(14) to mean the right to defer payment of debt or to incur debt and defer its payment.

The CFPB’s Proposal

To facilitate compliance, proposed comment 2(a)(14)–4 provided an example of overdraft credit: funds extended by a financial institution to a consumer to pay transactions that overdraw a checking or other transaction account held at the financial institution whenever the consumer has a contractual obligation to repay the funds. The proposal noted, as stated in the 2016 Prepaid Final Rule, that a “person, in extending overdraft funds, has provided the consumer with ‘the

right . . . to incur debt and defer its payment.’”¹¹⁶

As part of defining the scope of credit transactions that would be covered under the proposed rule, proposed § 1026.62(a)(2) provided a definition of “overdraft credit”: any consumer credit extended by a financial institution to pay a transaction from a checking or other transaction account (other than a prepaid account as defined in § 1026.61) held at the financial institution when the consumer has insufficient or unavailable funds in that account. Proposed § 1026.62(a)(2) provided non-exhaustive examples, such as consumer credit extended through a transfer from a credit card account or overdraft line of credit. The definition of “overdraft credit” in proposed § 1026.62(a)(2) did not include credit exempt from Regulation Z pursuant to existing § 1026.3.

For the reasons discussed below, the CFPB is adopting comment 2(a)(14)–4 substantially as proposed and is adopting § 1026.62(a) as proposed. The CFPB is also adopting a proposed cross reference to the definition of “overdraft credit” at § 1026.62(b)(7) as proposed but with technical changes to conform to Code of Federal Regulations style requirements.

Comments Received

Several commenters, including State Attorneys General, consumer advocates, and nonprofits, agreed that when a financial institution extends funds to pay transactions that overdraw a checking account held at the financial institution, the financial institution is providing credit. A consumer advocate commenter stated that it is common sense that overdraft is credit and that regulators, including the Board, have long acknowledged that overdraft is credit. For example, the commenter noted that in 2005 the Board—along with the OCC, FDIC, and National Credit Union Administration—issued Joint Guidance on Overdraft Protection Programs, which stated that “[w]hen overdrafts are paid, credit is extended.”¹¹⁷ Among other examples, the commenter also pointed to a 2001 OCC interpretive letter stating that an “overdraft would be ‘credit,’ as defined by the Truth in Lending Act and Regulation Z.”¹¹⁸

A nonprofit commenter stated that the TILA statute defines “credit” broadly and does not exclude overdraft. The commenter further stated that when the Board excepted certain overdraft

¹¹⁷ 70 FR 9127, 9129 (Feb. 24, 2005).

¹¹⁸ OCC Interpretive Letter No. 914 (Aug. 3, 2001).

¹¹⁵ 15 U.S.C. 1602(f).

charges from Regulation Z's definition of "finance charge," the Board did not rely on an interpretation of the terms "finance charge" or "credit" in the statute (rather, the Board used its authority to create a regulatory exception). A consumer advocate commenter stated that it is immaterial to the definition of "credit" whether the financial institution has previously committed to pay overdrafts or has an absolute right to use every means to collect repayment; rather, "credit" simply means the right to defer payment of debt or to incur debt and defer its payment.

Several industry commenters asserted that overdraft is not credit under TILA and that TILA does not confer authority upon the CFPB to regulate overdraft. A commenter stated that the term "overdraft" does not appear in TILA's text and that the legislative history is similarly silent on the issue. Some commenters stated that, if the intent of Congress was for overdraft to be subject to TILA, then Congress would have amended TILA to supersede the Board's regulatory exception for overdraft.

Several commenters asserted that in 1969 when the Board excepted discretionary overdraft charges from Regulation Z's definition of "finance charge," it did so because the Board determined that discretionary overdraft is not "credit." A commenter asserted that the history of Regulation Z and various Board statements show that discretionary overdraft was never considered to be "credit." For example, the commenter pointed to a 1977 interpretive letter where Board staff stated that the regulatory exception for overdraft charges "relates only to regular demand deposit accounts which carry no credit features and in which a bank may occasionally, as an accommodation to its customer, honor a check which inadvertently overdraws that account."¹¹⁹

Several commenters stated that overdraft is not credit because the financial institution retains the right to decline transactions that would overdraw the account. Some commenters stated that overdraft is not credit because the consumer is obligated to pay the debt within a very short timeframe; for example, commenters pointed to a State court opinion interpreting the Iowa Consumer Credit Code definition of "credit" as not covering overdraft because the consumer "must pay the bank back immediately upon their next

deposit."¹²⁰ Some commenters also asserted that overdraft does not involve a written obligation, an interest rate, an application, or an underwriting process and otherwise lacks the hallmarks of credit.

The CFPB received few comments regarding the specific language of proposed comment 2(a)(14)–4 and proposed § 1026.62(a). A consumer advocate commenter generally supported the language of these proposed provisions and made some suggestions. First, in addition to the proposed language referencing a contractual "obligation," the commenter suggested referencing a contractual agreement regardless of whether the financial institution has agreed to limit its means of recourse if the consumer does not repay. Second, the commenter suggested revisions to reflect the possibility that overdraft credit could be extended by a different entity than the financial institution that holds the account. Third, the commenter suggested referencing an "asset account" rather than a "checking or other transaction account." Fourth, among other non-exhaustive examples of overdraft credit, the commenter suggested adding a reference to "overdraft services" as defined in Regulation E § 1005.17(a).

Final Rule

For the reasons discussed below, the CFPB is adopting comment 2(a)(14)–4 substantially as proposed and is adopting § 1026.62(a) as proposed. As proposed, § 1026.62(a)(2) provided the definition of "overdraft credit" and the CFPB is finalizing it without change. The definition of "overdraft credit" does not include credit exempt from Regulation Z pursuant to existing § 1026.3 (e.g., transactions in securities or commodities accounts in which credit is extended by a broker-dealer registered with the Securities and Exchange Commission or the Commodity Futures Trading Commission). Nor does the definition of "overdraft credit" cover prepaid accounts, as the CFPB's Prepaid Accounts Rule already provides comprehensive consumer protections tailored to prepaid accounts.

Arguments that overdraft is not credit under TILA or that TILA does not confer authority upon the CFPB to regulate overdraft are not supported by the statute itself. The final rule is consistent with TILA's definition of "credit"¹²¹

and with the CFPB's statutory authority under TILA section 105(a).¹²²

TILA defines "credit" broadly and does not exclude overdraft. As stated in the 2016 Prepaid Final Rule, "[b]y authorizing or paying a transaction where the consumer does not have sufficient or available funds . . . to cover the amount of the transaction when the transaction is authorized or paid, the [institution] is allowing the consumer to incur a debt with the [institution] where payment of that debt is not immediate."¹²³ Thus, when a transaction exceeds the funds in the consumer's account and a financial institution elects to cover the transaction by extending overdraft funds, then the financial institution has provided the consumer with the right to defer payment of debt or to incur debt and defer its payment, and therefore has extended "credit" under the plain language of TILA's definition.¹²⁴

The fact that Congress did not legislatively supersede the Board's regulatory exception for overdraft does not demonstrate that overdraft is outside the scope of TILA. Rather, Congress provided a broad definition of "credit" under the statute and then delegated to the Board (and, later, the CFPB) the authority to prescribe regulations "to carry out the purposes of" TILA and which "may provide for such adjustments and exceptions . . . as in the judgment of the [agency] are necessary or proper to effectuate the purposes of [TILA], to prevent circumvention or evasion thereof, or to facilitate compliance therewith."¹²⁵ The Board used its delegated authority to create a regulatory exception from the definition of finance charge for certain overdraft fees and the CFPB is using its authority to narrow that exception.¹²⁶

¹²² 15 U.S.C. 1604(a).

¹²³ 81 FR 83934, 84167–68 (Nov. 22, 2016).

¹²⁴ 15 U.S.C. 1602(f).

¹²⁵ 15 U.S.C. 1604(a).

¹²⁶ Commenters disagreed about whether the Board, in issuing the original regulatory exception for certain overdraft fees from TILA's definition of finance charge, was relying on its delegated authority to create adjustments and exceptions or was using its delegated rule-writing authority to implement an interpretation of a statutory provision of TILA. The Board's original 1969 issuance over 50 years ago was not explicit about what authority it used for the overdraft charge exception. 34 FR 2002, 2004 (Feb. 11, 1969). And it neither discussed policy rationales nor interpretation of statutory text. The proposal did, however, invoke the Board's exception authority generally. 33 FR 15506 (Oct. 18, 1968). The inclusion of a specific "exception" for overdraft charges that would have met the general definition of finance charge but for the exception, in a rule that did not state it was an interpretation or engage in textual interpretation, suggests the exception was not created as an interpretive exercise. Regardless, the CFPB has put forward its interpretation of the relevant provisions of TILA in

¹²⁰ *Legg v. W. Bank*, 873 NW 2d 763, 770 (Iowa 2016).

¹²¹ 15 U.S.C. 1602(f).

¹¹⁹ 42 FR 22360, 22362 (May 3, 1977).

Commenters' assertion that the Board determined that discretionary overdraft is not "credit" conflates the definition of "credit" with the definition of "finance charge." The history of Regulation Z and the Board's statements show that the Board excepted certain overdraft charges from Regulation Z's definition of "finance charge," which would have been unnecessary if overdraft was not credit. The Board did not except overdraft from the definition of "credit." Existing Regulation Z's definition of "finance charge" excepts overdraft charges "unless the payment of such items and the imposition of the charge were previously agreed upon in writing."¹²⁷ But the fact that these charges were not considered "finance charges" under the regulation does not mean that the underlying overdrafts were not considered credit. For example, existing Regulation Z commentary acknowledges the existence of "incidental *credit* that is not extended under an agreement between the consumer and the financial institution."¹²⁸ One example of such incidental "credit" in the overdraft context is "*credit* inadvertently extended incident to an electronic fund transfer using a debit card, . . . if the bank and the consumer do not have an agreement to extend credit when the consumer's account is overdrawn."¹²⁹ Incidental overdraft credit remains "credit," notwithstanding that the Board excepted the overdraft charges from Regulation Z's definition of "finance charge."

Regarding the 1977 interpretive letter cited by a commenter, the CFPB notes that the letter addresses whether certain overdraft charges are finance charges, not whether overdraft is credit.¹³⁰ Board staff did not exclude overdraft from the definition of "credit." Rather, the letter states that the Board's regulatory exception for overdraft charges (*i.e.*, excepting them from Regulation Z's definition of "finance charge") "relates only to regular demand deposit accounts which carry no *credit features* and in which a bank may occasionally . . . honor a check which inadvertently overdraws that account."¹³¹ Existing Regulation Z commentary similarly distinguishes between an account with incidental overdraft credit and an account with an overdraft "credit

feature."¹³² On a deposit account with no "credit feature," as explained above, charges for incidental overdraft credit are excepted from existing Regulation Z's definition of "finance charge"—but nonetheless the incidental overdraft credit remains "credit."

Commenters' argument that overdraft is not credit because the financial institution retains the right to decline overdraft transactions is not consistent with the text of TILA and likewise appears to conflate the definition of "credit" with the definition of "finance charge." The Board excepted overdraft charges from Regulation Z's definition of "finance charge" depending on whether the payment and charge were "previously agreed upon" in writing.¹³³ The TILA definition of "credit" requires a "right" (*i.e.*, the right to defer payment of debt or to incur debt and defer its payment)—but does not require that such right be previously agreed upon.¹³⁴ Notwithstanding that a financial institution had retained discretion and could have declined an overdraft transaction, when the financial institution nonetheless elects to cover the transaction by extending overdraft funds, then the financial institution has provided the consumer with the "right" to defer payment of debt or to incur debt and defer its payment, and has therefore extended "credit" under the plain language of TILA's definition.¹³⁵ Moreover, it is well established that a financial institution's right to decline transactions does not prevent those transactions from constituting credit under TILA: as the CFPB noted in its proposal and previously in the 2016 Prepaid Final Rule, credit card issuers reserve the right to reject individual transactions in their contractual agreements, yet credit card programs are regulated as credit under TILA and Regulation Z.¹³⁶

Regarding commenters' statements that overdraft is not credit because the consumer is obligated to pay the debt within a very short timeframe, such assertion is not supported by TILA. When a financial institution extends overdraft funds that the consumer must

pay back upon their next deposit, the institution "is allowing the consumer to incur a debt with the [institution] where payment of that debt is not immediate."¹³⁷ And even though the consumer's next deposit to repay the institution is typically soon (*e.g.*, on the consumer's next payday), TILA's definition of "credit" does not have an exclusion for short-term repayment periods. TILA similarly does not support commenters' assertions that overdraft is not credit because it lacks certain so-called hallmarks of credit (*e.g.*, a written obligation, an interest rate, an application), or an underwriting process. TILA broadly defines "credit" to simply mean the right granted by a creditor to a debtor to defer payment of debt or to incur debt and defer its payment.¹³⁸ TILA does not require a transaction to have any of the so-called hallmarks to be considered credit. Moreover, to the extent that commenters' factual assertions accurately describe current market practices, some such practices might not align with Regulation Z because they pertain to currently non-covered overdraft credit (*e.g.*, overdraft credit with charges excepted from existing Regulation Z's definition of "finance charge"). Creditors may need to change their practices as a result of the final rule to come into compliance, but that does not mean that such overdraft practices today are not credit under TILA.

In response to a commenter's suggestion that proposed comment 2(a)(14)–4 reference not only a contractual "obligation" but also a contractual agreement regardless of the recourse, the CFPB is not adopting this specific suggestion but comment 2(a)(14)–4, as finalized, highlights that it provides but one "example" of overdraft credit. Comment 2(a)(14)–4 is not an exhaustive list of examples. As proposed, § 1026.62(a)(2) provided the definition of overdraft credit and the CFPB is finalizing it without change.

Regarding the commenter's suggested revisions to reflect the possibility that overdraft credit could be extended by a different entity than the financial institution that holds the account, the CFPB notes that such revisions are unnecessary because such credit does not fall within the Board's regulatory exception for overdraft and thus such credit is generally covered under existing Regulation Z. Similarly, it is also unnecessary to adopt the commenter's suggestion to reference an "asset account," rather than a "checking

this rule and explained why the statute covers overdraft fees.

or other transaction account,” given that the Board referenced a “checking or other transaction account” when it excepted certain overdraft charges from Regulation Z’s definition of “finance charge.”¹³⁹

In response to the commenter’s suggestion to revise proposed § 1026.62(a)(2) by adding a reference to “overdraft service” as defined in Regulation E § 1005.17(a), the CFPB is not doing so because, consistent with TILA’s broad definition of “credit,” § 1026.62(a)(2) “includes, but is not limited to, any . . . overdraft line of credit.” The commenter’s suggested revision is unnecessary and could introduce confusion because the term “overdraft service” as defined in Regulation E § 1005.17(a) “does not include any payment of overdrafts pursuant to . . . [a] line of credit subject to Regulation Z (12 CFR part 1026), including transfers from . . . [an] overdraft line of credit.”¹⁴⁰

2. Clarifications to Definition of Open-End Credit (§ 1026.2(a)(20))

The term “open-end credit” is defined in § 1026.2(a)(20) as (1) consumer “credit,” (2) that is extended under a “plan,” (3) where the person extending the credit may impose a “finance charge” from time to time on an outstanding unpaid balance, (4) the person extending the credit is a “creditor,” (5) the person extending the credit reasonably contemplates repeated transactions, and (6) the amount of credit that may be extended to the consumer during the term of the plan (up to any limit set by the creditor) is generally made available to the extent that any outstanding balance is repaid. This definition is consistent with TILA’s definitions of “open end credit plan” and “open end consumer credit plan,” which mean a plan under which the creditor reasonably contemplates repeated transactions, which prescribes the terms of such transactions, and which provides for a finance charge which may be computed from time to time on the outstanding unpaid balance.¹⁴¹

The CFPB’s Proposal

The CFPB proposed to clarify that virtually all overdraft credit that financial institutions provide today, such as through negative balances on checking accounts, would meet the Regulation Z definition of open-end credit, but for Regulation Z excepting overdraft fees from the definition of

finance charge. For clarity and to facilitate compliance, the CFPB proposed to add commentary regarding two terms used in the definition of open-end credit: “plan” and “finance charge.”

The CFPB proposed to add comment 2(a)(20)–2.iv to clarify that with respect to covered overdraft credit, a “plan” means a program where the consumer is obligated contractually to repay any credit extended by the creditor, even if the creditor retains discretion not to extend credit in individual transactions.

The CFPB also proposed to add comment 2(a)(20)–4.iii to explain that charges for paying a transaction that overdraws a consumer’s account generally would be “finance charges” unless they are expressly excluded from the definition of finance charge. Proposed comment 2(a)(20)–4.iii also states that these are finance charges “imposed from time to time on an outstanding unpaid balance” as long as there is no specific amount financed for the plan for which the finance charge, total of payments, and payment schedule can be calculated.

As discussed below, the CFPB is finalizing these changes substantially as proposed with only minor technical revisions for clarity, including to ensure that the changes to the commentary apply only to very large financial institutions.

Comments Received

Interpretation That Covered Overdraft Credit is Generally Open-End Credit

Consumer advocate commenters supported the proposed rule’s analysis concluding that overdraft credit is open-end credit. Specifically, the commenters agreed with the CFPB’s analysis of some of the specific elements of “open-end credit.” First, one commenter stated that overdraft fees are payable by the consumer and are imposed directly by banks as an incident to and as a condition of the extension of credit, and therefore, meet the definition of a “finance charge.” Second, that commenter agreed that a financial institution that imposes an overdraft fee on an unpaid overdraft is imposing a finance charge from time to time on an unpaid balance, regardless of whether the charge is on the deposit account or a separate credit account. Third, the commenter agreed that a very large financial institution that extends covered overdraft credit would be a “creditor” under TILA because that financial institution would regularly extend consumer credit subject to a finance charge, and the obligation is payable to that institution by agreement.

Finally, the commenter agreed that financial institutions that extend overdraft credit reasonably contemplate that consumers may engage in repeat overdrafts.

Some commenters disagreed with the proposal’s determination that overdraft credit is open-end credit. One commenter questioned the CFPB’s authority to categorize overdraft fees as “open-end credit,” explaining that they believe the Board appropriately excepted from the definition of “finance charge” overdraft fees that are not expressly agreed upon in writing because this exception aligned with the statutory intent of TILA to regulate finance charges on “open end consumer credit” plans. The commenter did not provide further explanation as to why the exception aligned with TILA’s statutory authority. This commenter appears to take issue with the revised exceptions to the definition of “finance charge” and not with the definition of “open-end credit.” The CFPB addresses the revisions to these exceptions in part IV.D below.

“Plan” (Comment 2(a)(20)–2.iv)

A consumer advocate commenter generally supported proposed comment 2(a)(20)–2.iv. Specifically, the commenter agreed that a creditor extends credit even if (1) it does not agree in writing to extend the overdraft credit or (2) it retains the discretion to refuse to extend that credit in the future.

However, the commenter recommended that the language regarding what constitutes a “plan” under the definition of “open-end credit” be changed from “obligated contractually to pay” to “obligated or contractually agrees to pay” because, the commenter stated, that financial institutions may be able to manipulate whether a consumer is considered “obligated contractually to pay” by giving the consumer the right to cancel authorization for repayment or limiting the financial institution’s recourse for repayment.

The commenter also suggested that the comment clarify that a program will be considered a “plan” when the creditor does not extend credit for transactions once the consumer has exceeded a certain amount, whether or not the limit is disclosed.

Finance Charge Imposed From Time to Time on an Outstanding Balance (Comment 1026.2(a)(20)–4.iii)

A consumer advocate commenter supported comment 1026.2(a)(20)–4.iii, which clarifies that overdraft fees are finance charges imposed from time to time on an outstanding balance if there

¹³⁹ 12 CFR 1026.4(b)(2).

¹⁴⁰ 12 CFR 1005.17(a)(1).

¹⁴¹ 15 U.S.C. 1602(j).

is no specific amount financed for the plan and regardless of whether the fees are imposed on the deposit account or the credit account. The commenter specifically supported two aspects of the statement: (1) that there is a finance charge from time to time on the outstanding balance of a plan regardless of whether the charge is on the deposit account or separate credit account; and (2) there is a finance charge from time to time on the outstanding balance of a plan if there is no specific amount financed for the plan because the amount of any overdraft is never precalculated from inception of the plan.

The commenter suggested that the term “deposit account” in the comment be replaced with “asset account” because deposit account is undefined and could present problems because there is no established regulatory or caselaw definition for deposit account.

Industry commenters stated that the proposed comment 2(a)(20)–4.iii would introduce ambiguity around finance charges. The commenters stated that the proposed comment would make it difficult for financial institutions to determine their obligations when establishing overdraft credit products. The commenters stated that the uncertain financed amount for a plan would challenge a financial institution’s compliance efforts and their ability to transparently disclose terms to consumers.

An individual commenter questioned the CFPB’s conclusion that an overdraft fee is “imposed from time to time on an outstanding unpaid balance. . . .” The commenter stated that an overdraft fee is imposed because a transaction exceeded the dollar amount in the account, and it is imposed regardless of whether the transaction is paid by the financial institution or the amount of the overdraft credit extended.

Final Rule

For the reasons stated below, the CFPB is finalizing comments 2(a)(20)–2.iv and 2(a)(20)–4.iii substantially as proposed with technical revisions for clarity, including to ensure that the comments address only the subject of the rule, *i.e.*, when a very large financial institution covers a transaction that would otherwise overdraft a consumer’s account.

Like the proposal, the final rule does not revise the definition of “open-end credit.” Rather, the final rule adds commentary to clarify how overdraft products meet the elements of the definition of “open-end credit.” Specifically, and as discussed herein, the final rule adds two comments to

clarify (1) the definition of a “plan” and (2) that overdraft fees are charges “imposed from time to time on an outstanding unpaid balance” as long as there is no specific amount financed for the plan for which the finance charge, total of payments, and payment schedule can be calculated.

The commentary does not change the term “open-end credit” in Regulation Z, which implements the statutory term “open end credit plan” under TILA. Rather, the commentary provides clarification in light of the revisions made to the regulatory exceptions to the definition of “finance charge.” Moreover, the commentary facilitates compliance with TILA by helping participants understand how overdraft products may be subject to TILA’s requirements as open-end credit.

In addition, consistent with the proposal and as discussed below, the CFPB concludes that virtually all overdraft credit that financial institutions provide today, such as through negative balances on checking accounts, would meet the Regulation Z definition of open-end credit, but for Regulation Z excepting overdraft fees from the definition of finance charge. Thus, when above breakeven overdraft credit becomes covered overdraft credit on the effective date of this rule, such credit will also likely be considered open-end credit.

(1) *Credit*. As discussed above, a person extending overdraft funds has provided credit under TILA and Regulation Z.¹⁴²

(2) *Plan*. An account agreement offered in connection with overdraft credit would—but for the Regulation Z exceptions of overdraft fees from the definition of finance charge—constitute a “plan” consistent with the definition of “open end credit plan” in TILA.¹⁴³ Specifically, but for the Regulation Z exceptions, the account agreement, consistent with the language of comment 2(a)(20)–2.i, would be “a contractual arrangement between the creditor [the institution offering checking account overdraft credit] and the consumer.”

The CFPB is finalizing proposed comment 2(a)(20)–2.iv generally as proposed (but with technical revisions for clarity) to clarify that the reservation of discretion in connection with covered overdraft does not mean the absence of an open-end credit plan. The CFPB understands that financial institutions offering automated overdraft services include in their agreements’ provisions governing how the overdraft service will

operate and information about overdraft fees. These terms-and-conditions documents typically stipulate that consumers using overdraft programs must and do agree to repay the debt created by an overdraft and the related fee, indicating that a contractual arrangement between the creditor and the consumer exists. Although these agreements typically state that the financial institution retains discretion to authorize or decline any particular overdraft, as a practical matter, financial institutions operating automated overdraft programs exercise limited, if any, discretion in authorizing particular transactions as long as the overdraft transaction is within the overdraft coverage limit that the institution has internally established. The CFPB notes that credit card issuers similarly reserve the right to reject individual transactions in their contractual agreements, yet credit card programs are open-end credit plans under TILA and Regulation Z. Treating the provision of automated overdraft credit in a comparable way promotes consistency and follows from the text of TILA and Regulation Z. Therefore, the CFPB has determined that an account agreement offered in connection with overdraft credit is a plan notwithstanding that the person offering the agreement reserves the right to not extend credit on individual transactions.

Regarding the commenter’s suggestion that comment 2(a)(20)–2.iv be revised to state that a “plan” under the definition of open-end credit means a program where the consumer is “obligated to or contractually agrees to repay any credit extended by the creditor” instead of stating that the consumer is “obligated contractually to repay . . .”, the CFPB is not adopting this specific suggestion. However, the CFPB has determined that certain minor changes would help make clear that the comment is an illustrative example. In particular, comment 2(a)(20)–2.iv, as finalized, replaces “means” with “includes” to state “a plan includes a program where the consumer is obligated contractually to repay any credit extended by the creditor.” The comment also highlights that it is providing one “example” of overdraft credit and not an exhaustive list of all overdraft credit.

In response to the same commenter’s suggestion that comment 2(a)(20)–2.iv be revised to note that a plan under the definition of open-end credit will be a plan regardless of whether the consumer receives disclosure of the overdraft credit limit, the CFPB finds this clarification unnecessary since existing comment 2(a)(20)–5.ii already clarifies

¹⁴² 15 U.S.C. 1602(f); 12 CFR 1026.2(a)(14).

¹⁴³ 15 U.S.C. 1602(j).

that a creditor does not need to establish a specific credit limit for a line of credit.

The final rule also replaces “covered overdraft credit” with “covered asset account” to ensure that changes to the commentary apply only to very large financial institutions.

(3) *Imposing a “finance charge” from time to time.* Overdraft credit is generally subject to fees that would meet the definition of “finance charges” but for the exceptions created by Regulation Z to that statutory definition. As discussed elsewhere, this final rule modifies those Regulation Z exceptions so that above breakeven overdraft credit fees will be finance charges when this rule becomes effective. Thus, as explained below, the CFPB has determined that an institution offering covered overdraft credit, including above-breakeven overdraft credit, is generally imposing a finance charge from time to time because there is no specific amount financed for the plan for which the finance charge, total of payments, and payment schedule can be calculated.

The CFPB is finalizing comment 2(a)(20)–4.iii generally as proposed (but with technical revisions for clarity) to clarify that (1) charges imposed by a very large financial institution for paying a transaction that overdraws a consumer’s account generally are finance charges unless they are excluded from the definition of finance charge; and (2) these are charges “imposed from time to time on an outstanding unpaid balance” as long as there is no specific amount financed for the plan for which the finance charge, total of payments, and payment schedule can be calculated. The CFPB does not anticipate that there will be a specific amount financed for overdraft credit at the time any such credit plan is established because the CFPB anticipates that the credit lines on these credit plans generally will be replenishing (discussed under (6) *Amount of credit replenishes when outstanding balance is repaid*, below). In such cases, an amount financed for the plan cannot be calculated because the creditor will not know at the time the plan is established the amount of credit that will be extended under the plan. Therefore, to the extent that any finance charge may be imposed in connection with such a credit plan, the credit plan will meet this criterion.

Regarding the comment that an overdraft fee is not “imposed from time to time on an outstanding unpaid balance” because the fee is charged on the occurrence of there being nonsufficient funds in the consumer’s account and not based on the extension

of credit, the CFPB disagrees for the reasons explained in more detail in part IV.D addressing the definitions of “credit” and “finance charge.”

With respect to the commenter stating that comment 2(a)(20)–4.iii would introduce ambiguity around finance charges, the commenter explained that this is because a plan with no specific finance amount makes it harder for financial institutions to determine their financial risks and challenges an institution’s ability to disclose terms to consumers. The CFPB notes that this characteristic in overdraft credit is no different from any other open-end credit product that similarly does not have a specific amount financed, and which generally must also comply with Regulation Z disclosure and other regulatory requirements.

Regarding the commenter’s suggestion that comment 2(a)(20)–4.iii reference an “asset account,” rather than a “deposit account,” the CFPB is not adopting this specific suggestion. For the same reasons provided in relation to “overdraft credit” in part IV.C.1, the CFPB finds it unnecessary to change the term to “asset account.” However, the final rule replaces “deposit account” with “covered asset account” to ensure that regulatory changes are limited to the subject of this rule, *i.e.*, overdraft credit provided by very large financial institutions. The final rule also includes other clarifying edits, including to ensure that comment 2(a)(20)–4.iii properly cross-references § 1026.4.

(4) *Person extending credit is a creditor.* Assuming that overdraft fees are finance charges, an institution providing covered overdraft credit is a “creditor” for purposes of the definition of “open-end credit.” A “creditor” is generally defined under Regulation Z to mean a person who regularly extends consumer credit that is subject to a finance charge or is payable by written agreement in more than four installments (not including a down payment), and to whom the obligation is initially payable, either on the face of the note or contract, or by agreement when there is no contract.¹⁴⁴ Thus, to the extent that overdraft credit is subject to a finance charge and is accordingly covered overdraft credit, it is also extended by a creditor if the creditor “regularly extends” overdraft credit.

The CFPB anticipates that most persons offering covered overdraft credit regularly extend overdraft credit and therefore would meet the definition of “creditor.” Further, if an institution providing open-end covered overdraft credit is considered a “card issuer,”

then it is also considered a creditor under existing § 1026.2(a)(17)(iii) for purposes of Regulation Z, subpart B.

(5) *Reasonably contemplates repeated transactions.* Institutions providing overdraft credit typically contemplate repeated overdraft transactions. As noted above, the CFPB understands that financial institutions offering automated overdraft services include in their agreements’ provisions governing how the overdraft service will operate and including information about overdraft fees. These agreements contemplate that consumers may overdraw repeatedly. Further, the CFPB found that 93.2 percent of overdraft and NSF fees were assessed on consumers with four or more overdraft or NSF transactions per year.¹⁴⁵

(6) *Amount of credit replenishes when outstanding balance is repaid.* Institutions providing overdraft credit generally replenish the amount of overdraft credit available to consumers up to any overdraft coverage limit (*i.e.*, consumers’ “shadow lines”) to the extent that any outstanding overdraft balance is repaid. This replenishable credit distinguishes open-end credit from a series of advances made pursuant to a closed-end credit loan commitment, but it does not mean that the credit plan must always be replenished to the original amount. The creditor may refuse to extend new credit in a particular case due to changes in the creditor’s financial condition or the consumer’s creditworthiness, if permitted by Regulation Z. While consumers should have a reasonable expectation of obtaining credit as long as they remain current, further extensions of credit need not be an absolute right for the plan to meet the self-replenishing criterion. Because the CFPB anticipates that financial institutions will generally replenish overdraft credit to the extent that any outstanding overdraft balance is repaid, the CFPB concludes that covered overdraft credit plans are generally replenishing.

3. Covered Overdraft Credit (§ 1026.62(b)(3)), Non-Covered Overdraft Credit (§ 1026.62(b)(6)), and Card Issuer (§ 1026.2(a)(7))

The CFPB’s Proposal

The CFPB proposed to define “covered overdraft credit” as overdraft credit that is subject to a finance charge or is payable by written agreement in more than four installments and “non-covered overdraft credit” as overdraft credit that is not subject to a finance

¹⁴⁴ See § 1026.2(a)(17)(i).

¹⁴⁵ CFPB 2017 Data Point at 13.

charge and is not payable by written agreement in more than four installments. The purpose of the proposed definitions is to assist with ease of reference to overdraft credit that is subject to, or covered by, Regulation Z. As discussed in more detail in part IV.D, some charges imposed in connection with overdraft credit are not considered finance charges.

The proposed definition of “overdraft credit” was limited to consumer credit, but, even with that qualification, not all overdraft credit would be subject to Regulation Z under the proposed rule. Many provisions of Regulation Z apply to a “creditor,” which generally is defined at § 1026.2(a)(17)(i) as “[a] person who regularly extends consumer credit that is subject to a finance charge or is payable by written agreement in more than four installments.” Thus, under the proposed rule, a financial institution must offer overdraft credit that is subject to a finance charge or is payable by written agreement in more than four installments (*i.e.*, covered overdraft credit) to be considered a creditor under Regulation Z. (Any financial institution offering overdraft credit will generally satisfy the definition of “regularly” under § 1026.2(a)(17)(v)). Because some charges imposed in connection with overdraft credit are not considered finance charges, a financial institution may charge for overdraft credit without being considered a creditor under Regulation Z if certain requirements are met.

Section 1026.2(a)(7) currently defines “card issuer” as a person that issues a credit card or that person’s agent with respect to the card. Unlike other creditors, card issuers are subject to Regulation Z even if they extend credit that is not subject to a finance charge and is not payable by written agreement in more than four installments. However, this does not apply to overdraft credit that is not subject to a finance charge or repayable by written agreement in more than four installments, even if the financial institution extending such credit would otherwise be considered a card issuer.¹⁴⁶

Under the proposal, extensions of overdraft credit that are not subject to a finance charge and are not payable by written agreement in more than four

installments (non-covered overdraft credit) would continue to not be covered by Regulation Z. Further, under the proposal, institutions providing debit cards that access only non-covered overdraft credit would continue not to be card issuers and would therefore not be creditors under § 1026.2(a)(17)(iii).

Comments Received and Final Rule

A commenter questioned the CFPB’s authority to define covered and non-covered overdraft credit because the commenter stated that Congress has not directed the CFPB to differentiate between these two terms. The commenter questioned the CFPB’s justification for departing from its prior approach to treating overdraft under Regulation Z because the delineation between covered and non-covered overdraft credit introduces unnecessary complexity.

The CFPB is finalizing the definition of “covered overdraft credit” and “non-covered overdraft credit” as proposed. With the addition of these two definitions, the CFPB does not create any substantive changes to TILA or Regulation Z. Instead, the additional definitions carry out the purposes of TILA by helping participants understand which forms of overdraft are subject to TILA’s requirements. The CFPB did not receive any comments on the definition of “card issuer” and is finalizing this definition as proposed because the CFPB has determined that allowing financial institutions to offer debit cards that access only below breakeven overdraft credit without being subject to Regulation Z would further the goals of the final rule.

4. Covered Overdraft Credit Account (§ 1026.62(b)(4))

The CFPB’s Proposal

The proposed rule defined “covered overdraft credit account” as a credit account through which a financial institution extends or can extend covered overdraft credit. The term would include any line of credit, credit card account, credit feature, credit line, credit plan, or credit subaccount through which the financial institution extends or can extend covered overdraft credit. Proposed § 1026.62(c) would require very large financial institutions to structure covered overdraft credit as a separate credit account. Therefore, the term “covered overdraft credit account” would assist in ease of reference to these separate credit accounts and in distinguishing them from linked checking or other transaction accounts.

Comments Received and Final Rule

The comments received on this proposed definition agreed with the CFPB’s position, and the CFPB is finalizing the definition of “covered overdraft credit account” without change. One consumer advocate commenter supported the definition of “covered overdraft credit account” because it believes that any account that can be used to access overdraft credit should be covered by the rule, regardless of the technicalities through which the credit is extended. The commenter stated that a narrower, more specific definition may encourage evasions of the rule.

For the reasons stated above, the CFPB is finalizing the definition of “covered overdraft credit account” as proposed.

D. Changes to Definition of “Finance Charge”

In explaining the meaning of “finance charge,” TILA section 106(a) (15 U.S.C. 1605(a)) provides that “the amount of the finance charge in connection with any consumer credit transaction shall be determined as the sum of all charges, payable directly or indirectly by the person to whom the credit is extended, and imposed directly or indirectly by the creditor as an incident to the extension of credit.”¹⁴⁷ The finance charge does not include charges of a type payable in a comparable cash transaction.¹⁴⁸

Similarly, under Regulation Z, the term “finance charge” generally is defined in § 1026.4(a) to mean “the cost of consumer credit as a dollar amount.” It includes any charge payable directly or indirectly by the consumer and imposed directly or indirectly by the creditor as an incident to or a condition of the extension of credit. It does not include any charge of a type payable in a comparable cash transaction.

Regulation Z currently excludes certain fees or charges imposed by a financial institution for paying items that overdraw an account from the definition of “finance charge” unless “the payment of such items and the imposition of the charge were previously agreed upon in writing.”¹⁴⁹ Additionally, where the payment of such items and imposition of the charge were previously agreed upon in writing, when a creditor imposes a service, transaction, activity, or carrying charge for each item that results in an overdraft

¹⁴⁶ Comment 2(a)(15)–2.ii.A. This comment provides that a debit card is not a credit card if there is no credit agreement, even if the creditor occasionally honors an inadvertent overdraft. Because the debit card is not considered a “credit card” under Regulation Z, a financial institution offering a debit card that can access non-covered overdraft credit is not considered a card issuer.

¹⁴⁷ 15 U.S.C. 1605(a).

¹⁴⁸ *Id.* The term finance charge also excludes certain fees and amounts imposed by third party closing agents.

¹⁴⁹ 12 CFR 1026.4(c)(3).

on an account, such fees are excluded from the definition of finance charge if they do not exceed the charges imposed for paying or returning overdrafts on a similar transaction account that does not have such a written agreement.¹⁵⁰ Neither of these exclusions appear within the statutory text of TILA.

The CFPB proposed to amend the definition of “finance charge” in § 1026.4 in three ways. First, it proposed to modify the partial exception provided in § 1026.4(b)(2) for certain charges imposed on checking and other transaction accounts so that the partial exception would no longer apply to “covered asset accounts” as defined in proposed § 1026.62. Second, it proposed to add § 1026.4(b)(12) to provide examples of charges imposed in connection with overdraft credit that are finance charges. Third, it proposed to amend the exception provided in § 1026.4(c)(3) so that the exception would no longer apply to “above breakeven overdraft credit” as defined in proposed § 1026.62. These proposed amendments are intended to specify which overdraft transactions include a finance charge and, therefore, may be subject to the requirements of TILA and Regulation Z. Each of these proposed changes are discussed below.

1. Examples of Finance Charges (§ 1026.4(b)(2))

Section 1026.4(b) provides examples of types of charges that are finance charges, except if those charges are specifically excluded under existing § 1026.4(c) through (e). In particular, existing § 1026.4(b)(2) provides that examples of finance charges generally include service, transaction, activity, and carrying charges imposed on a checking or other transaction account (except a prepaid account as defined in § 1026.61). However, the Board added a partial exception to this example such that if a charge for an account with a credit feature does not exceed the charge for a similar account without a credit feature, then the charge is not a finance charge under existing § 1026.4(b)(2) and its commentary.¹⁵¹ As discussed in the proposal, the Board and the CFPB have amended § 1026.4(b)(2) and its commentary over time.¹⁵²

The CFPB proposed to amend this current example of a finance charge as described in § 1026.4(b)(2) and comment 4(b)(2)–1 to set forth a different rule for when charges imposed on a covered asset account, as that term

is defined in § 1026.62(b)(2), would be finance charges. The CFPB also proposed to add § 1026.4(b)(12) to provide examples of finance charges with regard to a covered asset account, as defined in proposed § 1026.62(b)(2). These proposed changes specified which overdraft transactions include a finance charge and, therefore, may be subject to the requirements of TILA and Regulation Z.

Proposed § 1026.4(b)(12)(i) described as an example of a finance charge any service, transaction, activity, or carrying charges imposed on the separate credit account required by § 1026.62(c), which is also a covered overdraft credit account. Proposed § 1026.4(b)(12)(ii) described as an example of a finance charge any service, transaction, activity, or carrying charges imposed on the covered asset account to the extent the charge exceeds a comparable charge imposed on a checking or other transaction account that does not have overdraft credit. Proposed § 1026.4(b)(12)(iii) then described certain charges imposed on a checking or other transaction account that does not have overdraft credit that are not comparable to charges imposed on a covered asset account, which, by definition (see § 1026.62(b)(2)), does have overdraft credit tied to it and is provided by a very large financial institution. As discussed in the proposal, the proposed limitations in § 1026.4(b)(12)(iii)(A) through (E) would prohibit a very large financial institution from comparing charges that are not comparable cash transactions or from using comparisons in a way that may lead to evasion of the requirements of Regulation Z. These proposed changes would broaden the example of a “finance charge” for covered asset accounts to apply the applicable rules to such accounts so that the full cost of credit is more accurately disclosed. For the reasons discussed below, the CFPB is finalizing these proposed revisions with certain clarifying changes.

Finance Charges Generally

Several commenters, including industry trade groups, objected to the CFPB’s proposed changes to § 1026.4(b)(2) and (b)(12), while other commenters, including consumer advocate and academic commenters, supported the changes. Most commenters did not address the specific language of the proposed changes to § 1026.4(b)(2) and (b)(12), focusing instead on broader concerns. One consumer advocate commenter supported the language of the proposed changes and suggested certain changes, including adding additional

commentary, an additional example, and an additional comment related to eliminating the participation fee exception for covered asset accounts.

Commenters opposing the proposed changes argued that the CFPB’s proposal misclassifies overdraft as “credit” and, because overdraft is not credit, overdraft charges are not a “finance charge” under TILA. As discussed above, arguments that overdraft is not credit under TILA are not supported by the statute itself; TILA defines “credit” broadly and does not exclude overdraft.

Industry commenters opposing the proposed changes also argued that, even if overdraft is “credit,” overdraft charges are not incident to or a condition of the extension of credit and therefore do not meet the definition of a “finance charge.” These commenters argued that overdraft charges are service charges applied, for example, for keeping an overdrawn account open or compensating for the failure to timely remedy the overdraft. Commenters pointed to case law that they believe supports this characterization of overdraft charges. At least one industry commenter further argued that the CFPB lacks the authority under TILA to redefine covered overdraft fees as finance charges.

Commenters supporting the proposal argued that the term “finance charge” is broadly defined and contains no limitation for overdraft charges in its definition. Members of Congress commented that the proposed rule is consistent with and helps fulfill TILA’s purpose by ensuring that consumers have critical protections when offered credit. A consumer advocate commenter stated that overdraft charges imposed on a credit account are clearly incident to credit, and that charges for credit imposed on other asset accounts are part of the cost of the credit and incidental to that credit, even if there are comparable charges in another non-credit context. A consumer advocate commenter provided specific suggestions for amending existing comments 4(b)(2)–1 and 4(b)(2)–1.ii.

With respect to commenters stating that an overdraft charge is not a “finance charge” under TILA and that TILA does not confer authority upon the CFPB to regulate overdraft, such assertions are inconsistent with TILA.¹⁵³ The definition of “finance charge” under TILA section 106(a) and in Regulation Z under § 1026.4(a) is very broad and, unless specifically excluded by the regulation, includes amounts imposed directly or indirectly by the

¹⁵⁰ 12 CFR 1026.4(b)(2).

¹⁵¹ Regulation Z comment 4(b)(2)–1.

¹⁵² 89 FR 13852, 13864 (Feb. 23, 2024).

¹⁵³ See part III.A for a discussion of the CFPB’s authority under TILA section 105(a).

creditor as an incident to or condition of the extension of credit.

Moreover, the CFPB discussed the regulatory history of the overdraft exception extensively in the prepaid rule proposal.¹⁵⁴ As summarized in that proposal, although Congress did not exempt overdraft services or similar programs offered in connection with deposit accounts from TILA, the Board in issuing Regulation Z in 1969 carved financial institutions' "bounce-protection" programs out of the new regulation.¹⁵⁵ The Board revisited the exception of bounce protection programs from Regulation Z over the years, including signaling concern with overdraft services in a number of rulemaking actions.¹⁵⁶ In particular, the Board revisited the exception of bounce protection programs from Regulation Z in 1981, in a rulemaking in which the Board implemented the Truth in Lending Simplification and Reform Act.¹⁵⁷ In the related proposal, the Board considered adjusting its overdraft exception to apply only to "inadvertent" overdrafts because, as the Board stated, "a charge imposed for honoring an instrument under any agreement between the institution and the consumer is a charge imposed for a credit extension and thus fits the general definition of a finance charge, whether or not the charge and the honoring of the check are reflected in a written agreement. The characterization of the charge will thus depend on whether 'credit' has been extended, within the meaning of the regulation."¹⁵⁸ Further, in a 2002 proposal to amend Regulation Z with regard to the status of certain credit card-related fees and other issues, the Board noted that some overdraft services may not be all that different from overdraft lines of credit, which typically include a written agreement, and requested comment on whether and how Regulation Z should be applied to banks' bounce-protection services.¹⁵⁹ That proposal cited to Regulation Z's exclusion of a charge for overdraft unless the payment of such items and the imposition of the charge are previously agreed upon in writing and noted that "[f]ees imposed in

connection with 'bounce protection' services may or may not meet the definition of a finance charge."¹⁶⁰ This regulatory history indicates that, but for the exception established under Regulation Z, a charge for overdraft would fall within the definition of a "finance charge."

Some comments stated that an overdraft charge is not a finance charge because it is a fee for providing a service related to the account and is imposed regardless of whether credit is extended such that it is not a fee incident to or a condition of the extension of credit. The CFPB notes, however, that this argument appears inconsistent with current market practices, which do often distinguish between overdraft fees and other fees. Financial institutions subject to this rule generally make clear in their account agreements that overdraft coverage is a separate feature with fees that often differ from those charged when an overdrawing transaction is declined. Such financial institutions also often do not assess NSF fees on declined card transactions, and many such financial institutions are no longer charging NSF fees on any types of transactions. These considerations highlight the fact that the overdraft fee is incident to or a condition of the extension of credit, even if the financial institution charges an NSF fee, characterizes the fee as a bank account service fee, or charges the fee for keeping an overdraft account open or because an overdraft is not repaid within a certain period of time.

For these reasons, CFPB is finalizing the proposed change to § 1026.4(b)(2) and corresponding changes to comment 4(b)(2)–1 to set forth a different rule for when charges imposed on a covered asset account, as that term is defined in § 1026.62, are finance charges. As discussed below, the CFPB is also finalizing § 1026.4(b)(12) to provide an example of a finance charge with regard to a covered asset account.

The CFPB declines to incorporate the commenter's suggestions on commentary 4(b)(2)–1 because it believes that finalizing commentary 4(b)(2)–1 as proposed makes clear that charges applied to covered asset accounts are evaluated under § 1026.4(b)(12). The CFPB declines to incorporate the commenter's suggested revisions on commentary 4(b)(2)–1.ii. While the CFPB recognizes that retaining the existing language regarding

"paying or returning" an item on a similar account without a credit feature could be read to imply that a comparable account with overdraft is nevertheless an account without a credit feature, the discussion of "overdraft credit" above in part IV.C.1 notes the distinction between incidental credit and a credit feature.

Example of a Finance Charge for the Separate Credit Account

With regard to a covered asset account, proposed § 1026.4(b)(12)(i) described as an example of a finance charge any service, transaction, activity, or carrying charge imposed on the separate credit account required by § 1026.62(c). Proposed section 1026.62(c) stated that a very large financial institution shall structure covered overdraft credit as a separate credit account and stated that the separate credit account is a covered overdraft credit account.

An industry commenter objected to the lack of language in proposed § 1026.4(b)(12)(i) to account for a comparable cash transaction or to provide for a comparison to a charge imposed on a checking or other transaction account that does not have overdraft credit. This commenter argued that the lack of such language contravenes the specific exclusion in TILA section 1605(a) for charges of a type payable in a comparable cash transaction, and stated that these exclusions from the finance charge definition are mandated by TILA's provisions and tied to TILA's purpose.

A consumer advocate commenter supported § 1026.4(b)(12)(i) because the service, transaction, activity or carrying charges identified in that section are imposed on a credit account and thus are clearly incident to credit. This commenter noted that this is true under the law today and would remain true if banks restructure their overdraft services as lines of credit to comply with the CFPB's rule. This commenter also agreed with the proposal's rationale that it would not make sense to compare fees on a credit account to those on a noncredit account.

Regarding the commenter's argument that the CFPB erred by not providing for a comparison to a charge imposed on a checking or other transaction account that does not have overdraft credit, final § 1026.4(b)(12)(i) does not change existing law. Existing § 1026.4(b)(2) provides that examples of finance charges include service, transaction, activity, and carrying charges imposed on a credit account. Onto this example, the Board added a partial exception in § 1026.4(b)(2) stating that any charge

¹⁵⁸ 45 FR 80648, 80657 (Dec. 5, 1980). The Board ultimately made only a few minor editorial changes to the exclusion, thus preserving the exemption unless there is an agreement in writing to pay items and impose a charge. 46 FR 20848, 20855 (Apr. 7, 1981).

¹⁵⁹ 67 FR 72618, 72620 (Dec. 6, 2002).

¹⁶⁰ *Id.* The Board did not modify the Regulation Z exemptions when it issued final rules in 2003, instead stating in preamble that "[t]he Board's staff is continuing to gather information on these services, which are not addressed in the final rule." 68 FR 16185 (Apr. 3, 2003).

imposed on a checking or other transaction account (emphasis added), such as a service or transaction account charge, is only a finance charge to the extent that the charge exceeds the charge for a similar asset account without a credit feature.¹⁶¹ Under existing § 1026.4(b)(2), service, transaction, activity, and carrying charges imposed on an overdraft line of credit account (as opposed to the checking or other transaction account to which the credit line is tied) are generally finance charges. This is true whether or not the charge exceeds the charge for a similar asset account without a credit feature. The CFPB's rule does not change this treatment of fees assessed on overdraft lines of credit or credit card accounts, which many financial institutions currently provide, and which are, in general, currently covered by Regulation Z. Similarly, the separate credit account required by § 1026.62(c) is not a checking or other transaction account that would qualify for the partial exception. The CFPB is also, as described in the proposal, concerned that adding such a comparison might lead to potential evasion of the rule. For these reasons, proposed § 1026.4(b)(12)(i) is consistent with existing § 1026.4(b)(2) and the CFPB is finalizing § 1026.4(b)(12)(i) as proposed.

Example of a Finance Charge for the Covered Asset Account

Proposed § 1026.4(b)(12)(ii) largely echoed existing § 1026.4(b)(2) by providing that any service, transaction, activity, or carrying charge imposed on a covered asset account is a finance charge to the extent that the charge exceeds a comparable charge imposed on a checking or other transaction account that does not have overdraft credit. Commenters, in general, did not focus specifically on proposed § 1026.4(b)(12)(ii), instead focusing their criticism or support on § 1026.4(b)(12)(iii) (discussed below). The CFPB is finalizing § 1026.4(b)(12)(ii) largely as proposed with minor stylistic changes to match existing § 1026.4(b)(2).

Proposed § 1026.4(b)(12)(iii) described five specific types of charges imposed on a checking or other transaction account without overdraft credit that are not comparable to charges imposed on a covered asset account. Industry commenters objected to

§ 1026.4(b)(12)(iii), focusing most heavily on the inability to use a nonsufficient funds (NSF) fee as a comparable charge to reduce the extent to which an overdraft fee is a finance charge. These commenters argued that eliminating this exception would reduce the availability of covered overdraft credit, and such reduction would disadvantage consumers, who would face the same or higher fees without the benefit of a paid transaction. At least one industry commenter also argued that precluding this comparison contradicts TILA's goal of requiring disclosure of fees that are payable by credit customers but not by cash customers. This same commenter argued that both an overdraft charge and an NSF fee are imposed upon an overdrawn account and serve many of the same functions, citing to court cases and agency publications grouping overdraft and NSF fees in the same category. This commenter argued that nothing in TILA section 1605(a) precludes the "cash transaction" description from applying to a payment for services and that the concept of a "cash transaction" relates to the method of payment, rather than what is provided in return.

A consumer advocate commenter supported this proposed provision, arguing that the comparable cash transaction exception has been used to hide or exclude amounts even where no comparable transaction actually exists; therefore, the proposed restrictions in § 1026.4(b)(12)(iii) would help to prevent evasions. This commenter also argued that returning an item unpaid is not a comparable cash transaction to paying it as an overdraft as one transaction is credit, with the fee being the cost of that credit, and the other transaction is not credit, with the fee serving a different purpose. This commenter supported the limitations proposed in § 1026.4(b)(12)(iii), arguing that the charges listed in (A) through (D) are not associated with cash transactions. This commenter also supported the limitation on using a charge for transferring funds into the checking or other transaction account from any other asset account (such as a savings account), arguing that a charge for overdraft credit reflects the cost of that credit and that the full amount of that fee should be viewed as a finance charge, noting that this policy is already reflected in existing comment 4(a)–4 and would reflect the reality that the consumers who incur the most overdraft fees are unlikely to have significant linked savings or other asset accounts that can be used to cover overdrafts.

This commenter also recommended adding commentary interpreting § 1026.4(b)(12) for clarity, including a comment stating that transfer fees imposed on any credit account, whether an overdraft line of credit or traditional credit card, are a finance charge and a comment comparing the monthly account fees of two asset accounts that differ in whether they have a tied credit feature or not, such that the difference in the asset accounts' monthly fees is a finance charge.

As to the commenter's request for additional commentary, the purpose of § 1026.4(b)(12)(iii) is to clarify which types of transactions are not comparable to an overdraft charge for purposes of the comparison calculation described in § 1026.4(b)(12)(ii). As discussed further below, specific charges are identified in § 1026.4(b)(12)(iii) for the purpose of prohibiting comparison for purposes of § 1026.4(b)(12)(ii); § 1026.4(b)(12)(iii) does not address whether or not such fees are themselves "finance charges." Thus, the CFPB declines to add additional commentary.

After considering the comments, the CFPB is finalizing § 1026.4(b)(12)(iii) largely as proposed in order to prohibit very large financial institutions from comparing overdraft charges to charges that are not comparable cash transactions, to prevent using such comparisons in a way that may lead to evasion of the requirements of Regulation Z, and to ensure that the full cost of credit is more accurately disclosed. Accordingly, § 1026.4(b)(12)(iii) includes the limitation in proposed § 1026.4(b)(12)(iii)(B) and (C) because fees for declining to authorize or pay a transaction or for returning a transaction unpaid—often referred to as NSF fees—are not comparable to overdraft charges. As discussed in the proposal, an NSF fee is assessed when a transaction is declined while an overdraft charge is assessed when a transaction is paid and the institution lends the consumer money to pay that transaction. As to commenters' concerns that proposed § 1026.4(b)(12)(iii) would have designated NSF fees themselves as examples of "finance charges," final § 1026.4(b)(12)(iii) does not do so. The proposed regulatory text was intended to prohibit the use of an NSF fee to offset an overdraft charge. Final § 1026.4(b)(12)(iii) prohibits that same comparison but adds stylistic changes to clarify that the types of transactions identified in § 1026.4(b)(12)(iii)(A) through (E) are itemized solely for the purpose of clarifying that they cannot be compared to charges imposed when overdraft credit is extended. Nothing in

¹⁶¹ Existing comment 4(b)(2)–1 similarly provides that a checking or transaction account charge imposed in connection with a credit feature is a finance charge under existing § 1026.4(b)(2) to the extent the charge exceeds the charge for a similar account without a credit feature.

final § 1026.4(b)(12)(iii)(A) through (E) changes or modifies whether or not these five types of transactions are examples of finance charges.

Specifically, final § 1026.4(b)(12)(iii) does not comment on whether or not an NSF fee would be a finance charge.

For the reasons discussed above, the CFPB is finalizing § 1026.4(b)(12)(ii) and (iii) largely as proposed. The CFPB makes two additional clarifying changes to the regulatory text of § 1026.4(b)(12)(iii). First, the final rule strikes “covered” from “covered overdraft credit” in § 1026.4(b)(12)(iii). Proposed § 1026.4(b)(12)(ii) referred to a checking or other transaction account that does not have overdraft credit; proposed § 1026.4(b)(12)(iii) referred to a checking or other transaction account that does not have covered overdraft credit. Thus, changing “covered overdraft credit” to “overdraft credit” in final § 1026.4(b)(12)(iii) resolves what could have been read as a conflict between the regulatory text of final § 1026.4(b)(12)(ii) and final § 1026.4(b)(12)(iii) to which this section applies. Second, the final regulatory text of § 1026.4(b)(12)(iii) adds descriptive language to make clear that the comparison at issue is between the charge or combination of charges, including a per transaction fee, imposed on a covered asset account when overdraft credit is extended and the five types of charges itemized in final § 1026.4(b)(12)(iii)(A) through (E). Accordingly, the CFPB finalizes § 1026.4(b)(12)(iii) with these clarifying changes.

2. The § 1026.4(c)(3) Finance Charge Exception

The CFPB’s Proposal

Existing § 1026.4(c)(3) provides that charges imposed by a financial institution for paying items that overdraw an account are not finance charges unless the payment of such items and the imposition of the charge were previously agreed upon in writing. The CFPB proposed to change this exception to the finance charge definition by adding a new sentence to the end of § 1026.4(c)(3) that provided that the paragraph does not apply to above breakeven overdraft credit as defined in proposed § 1026.62. In addition to amending § 1026.4(c)(3), the CFPB also proposed to add comment 4(c)(3)–3 to direct readers to see proposed § 1026.4(b)(12) for guidance on when fees imposed on a covered asset account as defined in § 1026.62 are finance charges. For the reasons discussed below, the CFPB is finalizing these changes as proposed and is

revising comment 4(c)(3)–1 to clarify that it does not apply to above breakeven overdraft credit as defined in § 1026.62(b)(1).

Comments Received

Many commenters criticized the existing § 1026.4(c)(3) exception, stating that it does not adequately protect consumers. Several of these commenters noted that financial institutions frequently offer overdraft services under the existing § 1026.4(c)(3) exception at a high cost relative to other credit options. Among these commenters, several observed that, in the aggregate, low-income and minority consumers typically pay higher fees for non-covered overdraft credit offered through the existing § 1026.4(c)(3) exception. At least one of these commenters also explained that the existing § 1026.4(c)(3) exception helps financial institutions disguise the true cost of deposit accounts by allowing them to generate substantial fee revenue, which they use to drive profits and to offer free or low-cost banking services to consumers who are relatively more advantaged.

Commenters who criticized the existing § 1026.4(c)(3) exception generally expressed support for the proposed changes to the § 1026.4(c)(3) exception. Many of these commenters indicated that the proposed changes would advance one of TILA’s fundamental purposes—promoting the informed use of credit. Specifically, these commenters agreed with the proposal’s preliminary determination that the proposed changes would ensure that, when consumers utilized above breakeven overdraft credit, they would receive important Regulation Z protections, such as account-opening disclosures, credit card protections, and ability to repay assessments. These commenters further noted that, by providing consumers with these Regulation Z protections, the proposed changes to the § 1026.4(c)(3) exception not only would help consumers recognize that they are entering into a credit transaction when utilizing above breakeven overdraft credit, but also would help consumers compare the cost of above breakeven overdraft credit with other credit options more effectively. One academic commenter supported requiring TILA disclosures for overdraft products but also emphasized the importance of simplicity and clarity in such disclosures.

Many of the proponents of the proposed changes to the § 1026.4(c)(3) exception also stated that it made sense for the proposed rule to allow very large financial institutions to continue to provide non-covered overdraft credit at

or below a very large financial institution’s breakeven price. These commenters noted that limiting the application of the § 1026.4(c)(3) exception to non-covered overdraft credit offered at or below a very large financial institution’s breakeven price, as proposed, would return the § 1026.4(c)(3) exception to its original courtesy purpose and would reduce fee burdens on consumers, especially low-income and minority consumers. They also explained that returning the § 1026.4(c)(3) exception to its original courtesy purpose would realign the incentives of very large financial institutions so that they would be deterred from adopting practices that push consumers into overdrafting and incurring high fees. Further, they stated that it was unnecessary to eliminate the § 1026.4(c)(3) exception completely because consumers typically would benefit from receiving non-covered overdraft credit provided at or below cost, making TILA protections less critical.

The same commenters also noted that the proposed changes to the § 1026.4(c)(3) exception would require very large financial institutions to better disclose the terms of above breakeven overdraft credit. As a result of these proposed changes, they anticipated that the proposal would help many consumers avoid surprise overdrafts.

Other commenters opposed the proposed changes to the § 1026.4(c)(3) exception. Many of these commenters stated that very large financial institutions should be allowed to earn a profit on non-covered overdraft without abiding by the requirements of TILA and Regulation Z. These commenters also expressed concern that financial institutions could not sustainably offer overdraft credit at or below their breakeven price and would not incur the operational costs or take the compliance and litigation risks necessary to offer above breakeven overdraft in compliance with Regulation Z.

Commenters opposed to the proposed changes to the § 1026.4(c)(3) exception also questioned the need for the proposed changes. Specifically, these commenters contended that existing disclosures and opt-in requirements adequately inform consumers of the terms for non-covered overdraft services. At least one of these commenters further stated that the CFPB inadequately explained why consumers are currently unable to compare the cost and terms of overdraft credit with other kinds of credit. Another commenter questioned why the CFPB would not consider the existing disclosures for

overdraft services provided under Regulations DD and E effective in helping consumers understand above breakeven overdraft credit. This commenter further questioned why the CFPB finds that Regulation Z disclosures would provide consumers a better understanding of these services and would help them make more informed decisions when using such services.

Commenters opposed to the proposed changes to the § 1026.4(c)(3) exception also stated that the CFPB's proposal to change the § 1026.4(c)(3) exception was arbitrary and capricious. At least one of these commenters stated that the CFPB's proposal to change the § 1026.4(c)(3) exception was arbitrary and capricious because the changes it proposed would apply only to above breakeven overdraft credit even though the proposal's stated consumer protection goals would apply equally to non-covered overdraft credit. At least one other commenter argued that the CFPB arbitrarily and capriciously relied upon the promotion of the informed use of credit to apply TILA and Regulation Z to overdraft fees. This commenter stated that the CFPB provided inadequate evidence to support its statement that applying consumer credit protections to above breakeven overdraft credit would help consumers make informed decisions about such credit. In particular, the commenter questioned the volume of evidence marshalled by CFPB. The commenter also stated that the CFPB should consider other reasons consumers may utilize non-covered overdraft credit rather than alternative credit products, including timeliness, ease of use, lack of access to alternatives, or cost.

A few commenters asked the CFPB to amend its proposal to change the § 1026.4(c)(3) exception. One commenter recommended that the CFPB amend comment 4(c)(3)–1 to specify that the comment does not apply to above breakeven overdraft credit offered in connection with a covered asset account as defined in § 1026.62(b)(2). Another commenter stated that the CFPB should eliminate the § 1026.4(c)(3) exception rather than attempt to amend it. This commenter provided several justifications for this viewpoint, including that the exception originally applied to checks, but that checks are used less frequently today, and that overdraft fees put a significant strain on low-income households while providing outsized profits to financial institutions.

Final Rule

For the reasons stated in the proposal and below, the CFPB finalizes § 1026.4(c)(3) and comment 4(c)(3)–3 as proposed. Additionally, as discussed below, the CFPB revises comment 4(c)(3)–1 to clarify that it does not apply to above breakeven overdraft credit as defined in § 1026.62(b)(1).

As further discussed below, the CFPB is finalizing § 1026.4(c)(3) for several independent reasons, consistent with the proposal. First, amending the § 1026.4(c)(3) exception so that it no longer applies to above breakeven overdraft credit (the § 1026.4(c)(3) amendment) returns the exception to its original conception—excepting overdraft services from Regulation Z when offered as a courtesy or accommodation to customers—while adapting it to fit within the modern payments system. Additionally, the § 1026.4(c)(3) amendment furthers TILA's purpose of promoting the informed use of credit by ensuring that above breakeven overdraft credit is disclosed as a credit product and facilitating comparison shopping across credit products. Moreover, applying the Regulation Z regulatory framework to above breakeven overdraft credit products will benefit consumers by applying the regulation's existing substantive protections to such credit products, consistent with TILA's purpose of protecting consumers against inaccurate and unfair credit billing and credit card practices. The § 1026.4(c)(3) amendment also reflects, in part, an effort to balance the reliance interests of very large financial institutions and consumers against these other considerations.

Adapting the Courtesy Exception To Fit Within the Modern Payments System

Commenters opposed to the revision to the § 1026.4(c)(3) exception stated that the rationales for the amendment provided in the proposed rule—protecting consumers against inaccurate and unfair credit practices and promoting the informed use of credit—were arbitrary and capricious. They stated that this was because the consumer protection goals justifying the amendment apply equally to both above breakeven overdraft credit and non-covered overdraft credit provided at or below breakeven pricing, and the amendment applies only to at or below breakeven overdraft credit. The CFPB acknowledges that Regulation Z disclosures and protections would be helpful to consumers both in circumstances where overdraft fees are profit-generating and in circumstances

where they are not. However, consistent with the Board's original reasoning, the CFPB's revision to the exception is based on the countervailing considerations discussed herein, including that consumers receive a benefit from the availability of this service if it is offered as a courtesy and that very large financial institutions are more likely to offer courtesy overdraft when they are able to recover the costs of providing that service. In light of these considerations, the revision to the § 1026.4(c)(3) exception allows very large financial institutions to provide non-covered overdraft without being subject to Regulation Z requirements.

As explained in the proposal, the existing § 1026.4(c)(3) exception no longer reflects its original courtesy purpose. Historically, whenever a consumer bounced a check written against a deposit account that lacked a credit feature, the consumer's financial institution typically returned the check unpaid and assessed the consumer an NSF fee. In addition, the payee on the check might have taken various actions against the consumer, such as assessing the consumer a late fee or returned item fee, reporting the consumer's payment as late to a credit bureau, or bringing legal action against the consumer for writing a bad check.¹⁶² However, instead of returning the check unpaid, a financial institution, in its discretion, might have paid the check into overdraft as a courtesy.¹⁶³

When it issued Regulation Z in 1969, the Board created a limited exception for this longstanding practice.¹⁶⁴ Specifically, the Board added § 226.4(d), which provided that “[a] charge imposed by a bank for paying checks which overdraw or increase an overdraft in a checking account is not a finance charge unless the payment of such checks and the imposition of such finance charge were previously agreed

J. 791, at 795 (2004) (“Banks have been paying NSF items as a service to customers on a case-by-case basis for decades.”); see also Cocheo 2003 at 34 (“Our overdraft program formalizes the traditional courtesy of paying insufficient checks. . . .”) (quoting Gaynell Lawson, Executive Vice President and Chief Financial Officer of Citizens Bank of Blount County).

¹⁶⁴ 34 FR 2002, 2004 (Feb. 11, 1969); 73 FR 28904, 28927 (May 19, 2008) (“Historically, if a consumer engaged in a transaction that overdrawed his or her account, depository institutions used their discretion on an ad hoc basis to pay the overdraft, usually imposing a fee. The Board recognized this longstanding practice when it initially adopted Regulation Z in 1969 to implement TILA.”).

upon in writing.”¹⁶⁵ A bank providing discretionary, check-centric overdraft (also known as “bounce-check protection” or “courtesy overdraft protection” services, as noted in later **Federal Register** publications)¹⁶⁶ was not a creditor subject to Regulation Z because, pursuant to this exception, it did not impose a finance charge (and otherwise did not structure the repayment of credit by written agreement in more than four installments).¹⁶⁷ As Board commentary on Regulation Z noted, this exception enabled a bank to “occasionally, as an accommodation to its customer, honor a check which inadvertently overdraws that account” without having to comply with the requirements of Regulation Z.¹⁶⁸

In 1981, the Board amended Regulation Z to, among other things, make “a few minor editorial changes” to the § 226.4(d) exception.¹⁶⁹ Specifically, the Board changed the term “bank” to “financial institution” and the term “checks” to “items.”¹⁷⁰ The Board made these changes “to reflect the ability of financial institutions other than banks, such as savings and loan associations, to pay items that are similar to checks, such as negotiable orders of withdrawal, into overdraft.”¹⁷¹ Additionally, the Board renumbered § 226.4(d) to § 226.4(c)(3).¹⁷² By making these “minor editorial changes,” the Board stated that “[n]o substantive change is intended”¹⁷³ In other words, the Board did not change the purpose of the § 226.4(d) exception, which was to allow financial institutions to provide consumers with ad hoc, fee-based, check-centric, courtesy overdraft services without having to comply with the requirements of TILA and Regulation Z.¹⁷⁴

Despite the fact that neither the Board nor the CFPB has changed the purpose of the § 1026.4(c)(3) exception, the market for non-covered overdraft credit has changed in important ways—many

financial institutions have automated their non-covered overdraft programs and expanded them to cover non-check transactions, while also adjusting their account pricing structure to more heavily emphasize overdraft fees.¹⁷⁵ These changes have caused the market for non-covered overdraft credit to move away from the historical courtesy model to the point that, for a significant number of consumers, non-covered overdraft credit is no longer an occasional accommodation for inadvertent overdrafts.

Unlike in 1969, when checks made up the lion’s share of overdraft transactions,¹⁷⁶ recent CFPB analysis of account data from a number of large banks showed that on average overall only 10.36 percent of monthly debit transactions occurred by check, while 62.14 percent occurred by debit card (both one-time and recurring), 12.14 percent occurred by ACH, 6.43 percent occurred by ATM, 0.71 percent occurred by bank teller, and the remainder occurred by other means.¹⁷⁷ This shift away from check transactions is significant because, as financial institutions have automated their non-covered overdraft programs and expanded them to cover non-check transactions, the sheer volume of overdraft transactions and associated fees has increased.¹⁷⁸ This trend especially is pronounced with respect to debit cards, where CFPB research shows that incidence of overdraft increases for consumers who use debit cards. For example, CFPB research shows that 92.3 percent of accounts that do not use debit cards have no overdrafts in a year of account use and only 0.6 percent of such accounts incur more than 10 overdrafts per year.¹⁷⁹ In contrast, accounts that use their debit cards more than 30 times per month have the lowest percentage of accounts with no overdraft (51.2 percent) and the highest percentage of accounts that overdraft more than 10 times per year (18.0 percent).¹⁸⁰ In other words, for many consumers who use debit cards frequently, non-covered overdraft credit services are no longer provided as an occasional accommodation.¹⁸¹

Moreover, financial institutions today routinely extend overdraft credit in circumstances where they stand to generate more direct revenue from extending overdraft credit to cover a transaction than they would from declining it (because, for example, consumers are rarely charged NSF fees for declined debit card transactions,¹⁸² and nearly two-thirds of banks with over \$10 billion in assets have eliminated NSF fees¹⁸³).¹⁸⁴ As a result of these changes, non-covered overdraft programs now generate a substantial portion of the direct fee revenue that many financial institutions make from checking accounts (and much of the total revenue that financial institutions make from low-balance accounts), which has encouraged some financial institutions to promote consumers’ use of non-covered overdraft credit and/or to calibrate their systems to increase overdraft fee revenue.¹⁸⁵ This shift represents a significant departure from the historical courtesy model, which provided an accommodation to consumers for the occasional, inadvertent overdraft.

The CFPB’s amendment to the § 1026.4(c)(3) exception reestablishes the original courtesy purpose of the § 1026.4(c)(3) exception by providing the exception only for overdraft credit priced at or below a very large financial institution’s breakeven point.

Promoting the Informed Use of Credit

Commenters opposed to the CFPB’s amendment to the § 1026.4(c)(3) exception contended that existing disclosures and opt-in requirements adequately inform consumers of the terms for non-covered overdraft services.

As an initial matter, the CFPB is amending the § 1026.4(c)(3) exception to return the regulatory requirements closer to TILA’s original effect. The CFPB is following Congress’s judgment that standardized disclosures across

occasionally, as an accommodation to its customer, honor a check which inadvertently overdraws that account.”)

¹⁸² 74 FR 5212, 5217 (Jan. 29, 2009).

¹⁸³ See CFPB October 2023 Data Spotlight.

¹⁸⁴ This was not always the case. Historically, financial institutions charged no more for honoring an overdrawing check through non-covered overdraft credit than they did for returning the check unpaid. For example, a 1976 report on bank fees presented the results of a survey of banks in New York and Washington, DC. Of the 41 banks surveyed, 39 charged overdraft fees that were equal to or less than the amount of their NSF fees. See Senate Staff Report at 10–11.

¹⁷⁴ The language from the Board’s 1981 version of § 226.4(c)(3) remains in effect unchanged at § 1026.4(c)(3) in the CFPB’s existing version of Regulation Z. In 2016, the CFPB added an additional sentence to the end of § 1026.4(c)(3) to clarify that the paragraph does not apply to credit offered in connection with a prepaid account as defined in § 1026.61. See 81 FR 83934, 84179 (Nov. 22, 2016). However, this amendment did not impact the text of the portion of § 1026.4(c)(3) adopted in 1981.

¹⁸¹ 42 FR 22360, 22362 (May 3, 1977) (“[Section 226.4(d) (now section 1026.4(c)(3))] relates only to regular demand deposit accounts which carry no credit features and in which a bank may

different types of credit help consumers better comparison shop.

As the CFPB explained in the proposed rule, most non-covered overdraft credit is subject to Regulations DD and E. Although Regulations DD and E require certain disclosures for non-covered overdraft credit, neither regulation requires that such non-covered overdraft credit be disclosed as a credit product. Instead, both regulations use terms like overdraft fees, overdraft practices or overdraft services that tend to obscure the fact that financial institutions are providing consumers a credit product. Unlike the disclosures required under Regulations DD and E, the disclosures required by Regulation Z are designed to set forth contractual terms for credit products clearly. Regulation Z would also apply additional requirements under subparts B and G, including periodic statement requirements and advertising rules meant to help consumers better understand credit terms, monitor their use of the product, and trace how their funds are being used.

Applying the Regulation Z regulatory framework to above breakeven overdraft credit benefits consumers by ensuring that above breakeven overdraft credit is disclosed as a credit product and treated like other credit products. Treating above breakeven overdraft credit like other credit benefits consumers by helping them understand that they are entering into a contract for a credit product provided by a creditor.

Additionally, disclosing above breakeven overdraft credit services under the Regulation Z regulatory framework also promotes the informed use of credit because requiring very large financial institutions to present the credit terms for above breakeven overdraft credit in the same form that creditors present the credit terms of other credit products will allow consumers to compare the cost of such credit with the cost of alternative credit products. For example, the cost of non-covered overdraft credit is typically disclosed as a fee, and no annual percentage rate disclosure is required. In contrast, Regulation Z requires disclosure of periodic rates as annual percentage rates, which will aid consumers in comparing the cost of covered overdraft credit to other credit products.

At least one commenter also contended that the CFPB did not adequately explain how its proposed amendment would allow consumers to compare the cost and terms of overdraft credit with other kinds of credit better than existing requirements. In particular, this commenter stated that

the CFPB did not cite sufficient evidence to support its finding that consumers have difficulty comparing non-covered overdraft credit services with available alternatives. The commenter also asserted that the CFPB failed to consider other reasons why consumers may utilize non-covered overdraft credit over alternative sources of liquidity, such as timeliness, ease of use, lack of access to alternatives, and cost.

As an initial matter, the reports cited in the proposed rule to support the finding that many consumers have difficulty comparing non-covered overdraft credit services with available alternatives are bolstered by other research.¹⁸⁶ For example, a survey conducted by the Pew Charitable Trust found that 42 percent of the overdrafters they polled had sufficient credit available on a credit card to cover an emergency expense of \$400.¹⁸⁷ This finding is significant because, according to a CFPB 2014 report, the median amount of overdraft credit extended per non-covered overdraft transaction was \$50 across all transaction types¹⁸⁸ and was only \$25.50 for debit card transactions,¹⁸⁹ well within the amount of credit card credit available to many overdrafters polled by Pew. Therefore, as explained in the proposal, a significant number of consumers continue to use non-covered overdraft credit services despite the availability of alternative credit that is generally much cheaper than overdraft credit.¹⁹⁰

As the commenter noted, consumers who have access to cheaper, alternative sources of liquidity still may opt to use non-covered overdraft credit services despite the higher cost if, for example, they believe these services are more timely and easier to use. (The commenter's other two theories for why consumers might use non-covered overdraft—lack of access to alternatives and cost—do not apply to consumers who have access to lower cost liquidity.) However, other evidence cited in the proposal indicates that many consumers often do not understand the cost and terms of non-covered overdraft. For

example, the proposed rule noted that a significant number of commenters responding to the CFPB's 2022 request for information (2022 RFI) stated that overdraft fees were unclear or confusing. The proposed rule further noted that the concerns raised by commenters responding to the 2022 RFI were generally consistent with the concerns reflected in consumer complaints about overdraft fees submitted to the CFPB.

Applying Substantive Protections

Applying the Regulation Z regulatory framework to above breakeven overdraft credit services also benefits consumers by applying the regulation's existing substantive protections to such credit services. For example, the rule applies the due date requirement in § 1026.7(b)(11)(i)(A), the offset prohibitions in § 1026.12(d)(1), and the ability to pay provisions in § 1026.51 to covered overdraft credit accounts (including credit that currently is non-covered above breakeven overdraft credit) that can be accessed by a hybrid debit-credit card. Therefore, applying Regulation Z to above breakeven overdraft credit accessible via a hybrid debit-credit card prohibits very large financial institutions from immediately taking funds from any incoming deposit in repayment of the consumer's overdraft balance, requires very large financial institutions to establish due dates on the same day of each billing cycle, and requires very large financial institutions to assess the consumer's ability to pay for such credit—all protections that the current Regulations DD and E regulatory frameworks do not provide.

Balancing Reliance Interests Against Other Considerations

The rule does not entirely eliminate the § 1026.4(c)(3) exception in part because both very large financial institutions and consumers have reliance interests in the existence of non-covered overdraft. Very large financial institutions have undertaken efforts to ensure that their non-covered overdraft credit programs comply with Regulations DD and E, and some consumers have come to rely on the availability of non-covered overdraft credit.

The rule's amendment to the § 1026.4(c)(3) exception addresses the CFPB's consumer protection concerns while recognizing these reliance interests. Under the rule's approach, consumers who use above breakeven overdraft credit will receive Regulation Z's credit disclosures as well as Regulation Z's substantive protections.

Consumers who use non-covered overdraft credit will receive courtesy overdraft credit priced at or below a very large financial institution's breakeven point. In addition, very large financial institutions that have invested in compliance with Regulations DD and E can maintain their current processes for providing consumers with non-covered overdraft credit so long as they price such credit at or below breakeven pricing.

Commenters opposed to the CFPB's amendment to the § 1026.4(c)(3) exception objected to the amendment's impact on the pricing of non-covered overdraft credit. These commenters stated that, as a matter of principle, very large financial institutions should be allowed to earn a profit on non-covered overdraft without abiding by the requirements of TILA and Regulation Z. The CFPB takes a different view. When Congress created TILA, it did not exempt any category of overdraft credit from TILA. Rather, the Board created a limited exception for the longstanding practice of courtesy overdraft. The concept of a courtesy or an accommodation is the provision of a service primarily for the convenience of a customer. A credit product that produces large amounts of revenue and profit is inconsistent with the concept of providing an additional service as a courtesy because it encourages financial institutions to promote consumers' use of non-covered overdraft credit and/or to calibrate their systems to increase overdraft fee revenue.¹⁹¹ In contrast, providing overdraft credit at or below its breakeven point incentivizes a very large financial institution to provide overdraft credit simply for the convenience of the customer so as to foster customer goodwill and to improve customer retention.

These commenters also expressed concern that financial institutions could not sustainably offer overdraft credit at or below their breakeven price and would not incur the operational costs or take the compliance and litigation risks necessary to offer above breakeven overdraft in compliance with Regulation Z. However, even before the CFPB issued the proposed rule, several very large financial institutions had reduced or eliminated their overdraft fees,¹⁹² and most financial institutions currently waive overdraft fees for at least some overdrafts. Since some very large financial institutions can provide

consumers with overdraft credit without assessing any overdraft fees, it stands to reason that other very large financial institutions could continue to provide non-covered overdraft credit for a fee that is at or near their breakeven price. Similarly, many very large financial institutions currently offer overdraft lines of credit that comply with Regulation Z. Commenters have not explained why they think that applying Regulation Z to above breakeven overdraft credit would create compliance and litigation risks that are materially different from the compliance and litigation risks that very large financial institutions already face when offering overdraft lines of credit. The CFPB acknowledges that certain above breakeven overdraft credit also must comply with certain CARD Act provisions and the compulsory use prohibition; but again, commenters have not explained how these provisions create materially different compliance and litigation risks from the risks faced by very large financial institutions with respect to their existing credit card offerings. And lastly, the breakeven standard is designed to allow very large financial institutions to break even regardless of the financial institution's cost level. If a financial institution has unique circumstances that cause it to have higher compliance or other costs or losses, those can be incorporated into the financial institution's fee amount to ensure that the courtesy overdraft product is offered without overall losses to the financial institution. The CFPB does not find it credible that a financial institution would choose to incur the reputational and competitive harms associated with eliminating overdraft altogether if the financial institution does not lose money on the service; however, if a financial institution chose to do so, consumers who want non-covered overdraft could avoid any ensuing harms by switching to a financial institution that does offer non-covered overdraft credit.

Requested Changes to the CFPB's Amendment to the § 1026.4(c)(3) Exception

One commenter recommended that the CFPB amend comment 4(c)(3)–1 to specify that the comment does not apply to above breakeven overdraft credit offered in connection with a covered asset account as defined in § 1026.62(b)(2).

Comment 4(c)(3)–1 currently provides that, except with respect to credit offered in connection with a prepaid account as defined in § 1026.61, a charge on an overdraft balance computed by applying a rate of interest

to the amount of the overdraft is not a finance charge, even though the consumer agrees to the charge in the account agreement, unless the financial institution agrees in writing that it will pay such items. The purpose of the comment is to clarify whether interest charged on overdraft credit is exempt from the Regulation Z definition of a finance charge. In the proposed rule, the CFPB proposed to amend the regulatory text of § 1026.4(c)(3) to establish that the paragraph does not apply to above breakeven overdraft credit. Accordingly, the paragraph's commentary also would not have applied to above breakeven overdraft credit. Therefore, interest charges imposed on above breakeven overdraft credit would have been finance charges under the proposed rule regardless of whether a very large financial institution agreed in writing to pay an item into overdraft. Nonetheless, for clarity, the final rule amends comment 4(c)(3)–1 to provide that the comment, like the regulatory text in § 1026.4(c)(3), does not apply to above breakeven overdraft credit as defined in § 1026.62(b)(1).

Another commenter stated that the CFPB should eliminate the § 1026.4(c)(3) exception rather than attempt to amend it. They noted that the exception originally applied to checks, but that checks are used less frequently today, and contended that overdraft fees put a significant strain on low-income households while providing outsized profits to financial institutions.

The CFPB has determined that amending the § 1026.4(c)(3) exception better serves the market and consumers than eliminating the exception completely because the amendment addresses the CFPB's consumer protection concerns while acknowledging the long-standing reliance interests of both very large financial institutions and consumers and ensuring availability of courtesy overdraft credit. As explained above, the rule's amendment to the § 1026.4(c)(3) exception adequately addresses the CFPB's consumer protection concerns because consumers who use above breakeven overdraft credit will receive Regulation Z's credit disclosures as well as Regulation Z's substantive protections while consumers who use non-covered overdraft credit will receive courtesy overdraft credit priced at or below a very large financial institution's breakeven point. This approach mitigates certain risks associated with current non-covered overdraft credit, like high cumulative fee burdens, account charge-offs, involuntary account closures, and loss of access to the banking system, while

¹⁹¹ See 81 FR 83934, 83950–51 (Nov. 22, 2016); 70 FR 29582, 29583 (May 24, 2005); CFPB 2013 White Paper at 16–17; CFPB Winter 2015 Highlight at 8–9; FDIC 2018 Highlight at 12; FDIC 2019 Highlight at 2–3.

¹⁹² See CFPB May 2023 Data Spotlight.

allowing very large financial institutions to continue offering and consumers to continue accessing non-covered below breakeven overdraft credit as a courtesy.

Comment 4(c)(3)–3

Proposed comment 4(c)(3)–3 would have directed readers to see § 1026.4(b)(12) for guidance on when fees imposed on a covered asset account as defined in § 1026.62 are finance charges. The CFPB received no comments specifically addressing this proposed comment. Accordingly, the CFPB finalizes comment 4(c)(3)–3 as proposed.

3. Defining and Determining “Above Breakeven Overdraft Credit”

The CFPB’s Proposal

The proposed rule added “above breakeven overdraft credit” as a new defined term at proposed § 1026.62(b)(1). Proposed § 1026.62(b)(1) defined above breakeven overdraft credit to mean overdraft credit extended by a very large financial institution to pay a transaction on which, as an incident to or a condition of the overdraft credit, the very large financial institution imposed a charge or combination of charges exceeding the average of its costs and charge-off losses for providing non-covered overdraft credit as described in proposed § 1026.62(d).

Proposed § 1026.62(d)(1) clarified that overdraft credit offered by a very large financial institution was “above breakeven overdraft credit” for purposes of proposed § 1026.62(b)(1) if the charge or combination of charges for such credit exceeded the greater of (1) the pro rata share of the very large financial institution’s annual total direct costs and charge-off losses for providing non-covered overdraft credit calculated in accordance with § 1026.62(d)(2); or (2) an estimate published by the CFPB.

For purposes of proposed § 1026.62(d)(1), a “combination of charges” included all revenue received in connection with an overdraft transaction, including any extended or sustained overdraft fees, any interest charges on outstanding overdraft balances, and any other payments the very large financial institution received in connection with an overdraft transaction or transactions.

Proposed § 1026.62(d)(1) provided two methods for determining whether an overdraft charge exceeded the average of a very large financial institution’s costs and charge-off losses for providing non-covered overdraft credit—the breakeven standard and the benchmark fee. To the extent that a very

large financial institution preferred not to calculate its average costs and charge-off losses for providing non-covered overdraft credit using the breakeven standard, the proposal permitted the very large financial institution to determine whether it was offering above breakeven overdraft credit based solely on the benchmark fee.

Proposed Breakeven Standard

Under the proposed breakeven standard, a very large financial institution used a two-step process to determine whether an overdraft charge exceeded the average of the institution’s costs and charge-off losses for providing non-covered overdraft credit. First, the very large financial institution determined its total direct costs and charge-off losses for providing non-covered overdraft credit to all accounts open at any point in the previous year (Step 1). For Step 1, proposed § 1026.62(d)(2) clarified that only costs and charge-off losses that were specifically traceable to a very large financial institution’s provision of non-covered overdraft credit in the previous year could be considered total direct costs and charge-off losses for purposes of the breakeven standard. The proposed rule instructed a very large financial institution to exclude general overhead costs and charge-off losses resulting from unauthorized use, EFT errors, billing errors, returned deposit items, and rescinded provisional credit from the breakeven calculation because those costs and charge-off losses were not specifically traceable to a very large financial institution’s provision of non-covered overdraft credit.

Next, the very large financial institution divided the total direct costs and charge-off losses figure from Step 1 by the total number of non-covered overdraft transactions attributable to those accounts occurring in the previous year (Step 2). For purposes of calculating Step 2, the proposed rule allowed the very large financial institution to exclude non-covered overdraft transactions that did not incur fees from the total number of non-covered overdraft transactions. Additionally, the proposed rule clarified that, when a very large financial institution applied the breakeven standard either for the first time or after transitioning from the benchmark fee described at proposed § 1026.62(d)(1)(ii), the very large financial institution could include direct costs and charge-off losses from any non-covered overdraft transaction occurring in the previous year regardless of whether the transaction

would be considered above breakeven overdraft credit during that period.

Proposed Benchmark Fee

Under the benchmark fee approach outlined at proposed § 1026.62(d)(1)(ii), a very large financial institution could presume that any charge or combination of charges it imposed for paying a transaction that overdraws an account did not exceed its costs and charge-off losses for providing non-covered overdraft credit if the charge or combination of charges was less than or equal to any benchmark fee established by the CFPB. The CFPB proposal suggested four potential options for this benchmark fee—\$3, \$6, \$7, and \$14—and sought comment on whether to finalize one of these numbers or some other number.

The CFPB used the same general formula to calculate all four of the proposed alternative benchmark fees—charge-off losses divided by non-covered overdraft transactions, plus costs of \$1 per non-covered overdraft transaction—but referred to different datapoints from data collected from five very large financial institutions (the sample) to derive each fee amount. The CFPB proposed four benchmark fee amounts in order to get feedback on two issues: (1) whether the CFPB should calculate charge-off losses based on the average across all institutions in its sample or across just the outlier in its sample with the highest costs (the outlier); and (2) whether the CFPB should include all non-covered overdraft transactions in its calculation or only non-covered overdraft transactions for which the institutions in its sample assessed a fee (fee-assessed transactions).

The proposed \$3 benchmark fee is the fee that results from calculating the benchmark fee using all non-covered overdraft transactions from all institutions in the CFPB’s sample; the proposed \$6 benchmark fee is the fee that results from calculating the benchmark fee using only fee-assessed non-covered overdraft transactions from all institutions in the CFPB’s sample; the proposed \$7 benchmark fee is the fee that results from calculating the benchmark fee using all non-covered overdraft transactions from the outlier in the CFPB’s sample; and the proposed \$14 benchmark fee is the fee that results from calculating the benchmark fee using only fee-assessed non-covered overdraft transactions from the outlier in the CFPB’s sample.

Comments Received

Comments Relating to Above Breakeven Overdraft Credit

Several commenters responded to the proposed rule's requests for comment soliciting alternative approaches for determining whether credit is above breakeven overdraft credit. Some of these commenters recommended that the final rule allow the threshold for above breakeven overdraft credit to vary based on a range of factors, such as the amount of the overdraft, the amount of overdraft fees, the duration of the overdraft, the cost to the very large financial institution of providing the overdraft, the size of the very large financial institution, and the frequency with which the consumer overdraws their account. At least one of these commenters recommended that the charge to the consumer for non-covered overdraft should decline with each successive overdraft so that the consumer would not fall into a debt trap. Another of these commenters recommended that the charge to the consumer for the first overdraft should be lower than the charge for subsequent overdrafts in order to deter the consumer from frequently overdrawing their account. Other commenters recommended that the final rule define the threshold for above breakeven overdraft credit as an annual percentage rate rather than a flat fee.

At least one commenter recommended that the final rule allow above breakeven overdraft credit to continue to qualify as non-covered overdraft credit if such credit included consumer-friendly features, such as cure periods, de minimis limits, transaction limits, and real-time notifications.

Comments Relating to the Breakeven Standard

Specifically Traceable Costs and Charge-Offs

Various commenters asked the CFPB to provide greater clarity regarding the breakeven standard. Most of these commenters asked the CFPB to provide additional guidance regarding the types of costs and charge-off losses that would have been considered specifically traceable costs and charge-off losses under the breakeven standard. One of these commenters asked the CFPB to amend the Official Interpretations of Regulation Z to clarify whether the final rule would permit a very large financial institution to allocate a portion of its call center expenses to overdraft transactions if it did not have a method to track the calls it received relating to non-covered overdraft credit.

A significant number of commenters requesting additional guidance regarding the breakeven standard also expressed concern that, as proposed, it was unclear whether the breakeven standard allowed very large financial institutions to recover certain costs, such as communication costs, branch servicing costs, collection costs, core provider/vendor costs, compliance costs, and technology costs. These commenters stated that a lack of clarity regarding these costs would create too much compliance and litigation risk for very large financial institutions to adopt the breakeven standard. Industry commenters stated that the formula for calculating costs and charge-off losses under the breakeven standard should include general overhead costs and charge-off losses resulting from unauthorized use, EFT errors, billing errors, returned deposit items, or rescinded provisional credit. These commenters also stated that the CFPB did not sufficiently explain its rationale for excluding such costs and losses from the breakeven standard's cost and loss calculation formula. In contrast, consumer advocate commenters stated that it was appropriate to exclude general overhead costs and charge-off losses resulting from unauthorized use, EFT errors, billing errors, returned deposit items, and rescinded provisional credit from the breakeven standard's cost and loss calculation formula because those costs and charge-off losses did not have a direct relationship to the provision of non-covered overdraft services. These commenters further explained that including such costs in the breakeven standard's cost and loss calculation formula would allow very large financial institutions to earn profits from their non-covered overdraft programs.

Using Less Than 12 Months of Cost and Charge-Off Loss Data

At least one commenter asked the CFPB to clarify how a very large financial institution would implement the breakeven standard if the institution lacked 12 months of cost and charge-off loss data. This commenter suggested that the CFPB should amend the breakeven standard so that it provides very large financial institutions with the flexibility to use less than 12 months of cost and charge-off loss data to calculate the breakeven fee.

Accounting for Fee Waiver Policies

Various commenters addressed whether the final rule's breakeven standard should allow very large financial institutions to adjust their non-

covered overdraft transaction totals to account for non-covered overdraft transactions that do not incur fees. Many commenters opposed allowing such adjustments because they believed that very large financial institutions would be less likely to grant discretionary waivers to frequent overdrafters than to infrequent overdrafters. These commenters also expressed concern that frequent overdrafters, who are disproportionately made up of lower-income and minority consumers, would pay higher fees than they would if very large financial institutions could not adjust their non-covered overdraft transaction totals to account for their fee waiver policies. Other commenters supported a rule that would allow very large financial institutions to adjust their non-covered overdraft transaction totals to account for non-covered overdraft transactions that do not incur fees. These commenters noted that, if transaction totals included waived and refunded transactions, it would discourage very large financial institutions from continuing consumer friendly policies, such as offering grace periods before assessing overdraft fees, capping the number of overdraft fees per day, and establishing de minimis thresholds for assessing overdraft fees. Additionally, these commenters noted that very large financial institutions legally cannot charge overdraft fees for certain transactions, such as certain APSN transactions, and, therefore, those institutions likely would reduce access to overdraft credit if the rule required them to include such transactions in their transaction totals. One of these commenters further stated that the final rule should only allow very large financial institutions to adjust their non-covered overdraft transaction totals to account for their fee waiver policies if the rule also mandated additional consumer protections, such as grace periods, caps on the number of overdraft fees per day, and de minimis thresholds.

Extended or Sustained Overdraft Fees, Interest Charges on Outstanding Overdraft Balances, and Other Fees

At least one commenter asked the CFPB to amend the Official Interpretations of Regulation Z to clarify whether extended or sustained overdraft fees, interest on outstanding overdraft balances, and transfer fees assessed to move funds from a credit account to the consumer's depository account would count as overdraft charges for purposes of determining whether overdraft credit was above breakeven overdraft credit.

Calculating Average Costs and Charge-Off Losses Within Subsets of Account Portfolios When Applying the Breakeven Standard

At least one commenter provided their views on whether the final rule should allow very large financial institutions applying the breakeven standard to make separate calculations of their average costs and charge-off losses for non-covered overdraft within subsets of their depository account portfolios, such as account relationship tiers or average account balance ranges. This commenter stated that the final rule should not allow this practice because it would allow very large financial institutions to charge vulnerable consumers higher fees for non-covered overdraft credit while also raising the bar for such consumers to receive Regulation Z protections.

Comments Relating to the Benchmark Fee

The Benchmark Fee Formula

At least one commenter stated that the formula used to calculate the benchmark fee should match the formula used to calculate the breakeven standard.

Support for a Specific Benchmark Amount

Numerous commenters responded to the proposed rule's requests for comment soliciting feedback on the proposed benchmark fee figures. Commenters consisting of consumer advocates, government organizations, plaintiffs' attorneys, and members of the public generally supported adoption of a \$3 benchmark fee while financial institution and industry trade group commenters generally supported adoption of a high benchmark fee (\$14 or more). Some commenters supported benchmark fees falling between \$3 and \$14.

Proponents of the \$3 benchmark fee noted that it would provide greater benefits to consumers. These benefits included access to cheaper credit, decreased risk of falling into debt cycles, and decreased risk of becoming unbanked. Proponents of the \$3 benchmark were generally skeptical that adopting a low benchmark fee would limit consumers' access to overdraft credit. They presented three points in support of this view. First, they noted that many very large financial institutions either currently do not charge a fee for overdraft services or have significantly reduced their fees. Second, they noted that very large financial institutions with costs exceeding the \$3 benchmark fee could

calculate their own costs under the breakeven standard and charge a higher fee, or offer overdraft credit that complies with Regulation Z. Third, they noted that very large financial institutions could make changes to their overdraft programs to lower their costs in response to the rule.

Proponents of a \$3 benchmark fee further stated that the proposed rule's cost and loss estimates were generous. Specifically, they explained that, when estimating the cost of funds for financial institutions, the proposed rule assumed that financial institutions would lend an average of \$120 to consumers per transaction for a period of one month. However, they noted that the median overdraft is only \$50 and is repaid in three days. Similarly, they explained that, when estimating financial institutions' operational costs for providing overdraft credit, the proposed rule assumed that 10 percent of non-covered overdraft transactions would require 10 minutes of a customer service representative's time and that 20 percent of these customer service contacts also would require 10 minutes of a supervisor's time. They believed that those estimates overstated the amount of call center expense associated with operational costs.

Proponents of a \$3 benchmark fee further stated that the CFPB should not base the final rule's benchmark fee on the charge-off costs of the one very large financial institution in its data with the highest costs because that institution appeared to be an outlier and, as a policy matter, the CFPB should incentivize very large financial institutions to reduce charge-offs because they often lead to consumers becoming unbanked.

Proponents of a higher benchmark fee generally indicated that the CFPB should adopt a benchmark of \$14 or more or stated only that \$14 was too low. Several industry commenters stated that the proposed ranges for the benchmark fee would not allow them to recoup their costs. Some of these commenters stated that the \$1 per transaction estimate for costs of funds and operational costs in the proposed rule was too low. Other industry commenters offered thoughts on what benchmark fee might be more appropriate for them. Two of these commenters, representing the interests of credit unions, including credit unions with assets exceeding the very large financial institution threshold, stated that average costs for the credit unions they represent ranged from \$20–22 per overdraft transaction. Another commenter representing a state-chartered bank with \$1.6 billion in

assets stated that the known operational costs (including charge-off losses) for non-covered overdraft at their institution were roughly 39 percent of overdraft fees, but that the institution incurs other costs, and that its total costs exceed \$14 per overdraft transaction. Several other industry commenters stated that the CFPB should adopt the proposed \$14 benchmark fee. Two of these commenters representing credit unions with assets below the very large financial institution threshold indicated that the institutions they represent recently lowered their overdraft fees from the \$25–\$35 range to the \$10–\$15 range (implying that their costs fall within or below the \$10–\$15 range). Another commenter expressed concern that the sample used to calculate the benchmark fee was too small and that the CFPB should set the benchmark at \$14 until the agency had an opportunity to review a larger sample. They further noted that a \$14 fee benchmark fee would represent a significant fee reduction from the current average fee of \$34 and would save low-balance account holders, on average, just over \$90 per year and frequent overdrafters at least \$220 per year. They also noted that several very large financial institutions recently reduced their fees to between \$10 and \$15, so setting the benchmark fee at \$14 would make it easier for those institutions to comply with the rule. At least one industry commenter stated that the CFPB should set the benchmark fee at the current average fee in the market and adjust it for inflation going forward.

At least one industry commenter representing a credit union with assets of approximately \$4.8 billion supported a \$5 fee per overdraft, limited to one fee per day. This commenter further explained that their institution conducted a review of costs for overdraft credit and determined that a \$5 fee would be sustainable. A consumer advocate commenter stated that the CFPB should set the benchmark fee at \$6 (*i.e.*, the proposed benchmark fee that results from calculating the benchmark fee using only fee-assessed non-covered overdraft transactions from all institutions in the CFPB's sample), but only if the rule also mandated additional consumer protections, such as grace periods, caps on the number of overdraft fees per day, and de minimis thresholds.

Data Used for the Benchmark Fee

Industry commenters criticized the analysis used to establish the proposed benchmark fee amounts. First, they stated that the sample used for the

analysis was inadequate. Specifically, they noted that the sample consisted of only five very large financial institutions (or approximately three percent of the very large financial institutions that the proposed rule would have covered). They further observed that, by attempting to incorporate a diverse set of geographic footprints, asset sizes, and business models into the sample, entire categories of financial institution types were represented by only a single institution's data. They expressed concern that estimating the breakeven cost of overdraft credit based on five institutions would not be representative of the breakeven cost of overdraft credit for most very large financial institutions. They further criticized the sample because it did not include data from financial institutions that fell under the threshold for very large financial institutions. They explained that, even though the proposed rule would not have covered such institutions, it would have impacted such institutions indirectly because they would have had to adjust their overdraft fees to remain competitive with very large financial institutions. As a result, they believed that the analysis should have considered the impact of the proposed rule on those institutions.

Consideration of Effects to Consumer Behavior

Industry commenters stated that the analysis used to establish the proposed benchmark fee amounts failed to consider changes in consumer behavior. Specifically, these commenters explained that in the current market fees for non-covered overdraft credit have a deterrent effect. These commenters anticipated that, if the CFPB finalized any of the proposed benchmark fees, consumers would increase their use of overdraft credit. These commenters expressed concern that, as consumers increased their use of overdraft credit, more consumers would default on such credit, increasing charge-off costs as well as increasing the frequency of involuntary account closures and negative credit reporting. The commenters further anticipated that, as more consumers defaulted on non-covered overdraft credit, very large financial institutions would increase restrictions on such credit. In contrast, consumer advocate commenters expressed skepticism that overdraft fees were an effective way to deter consumers from overdrawing their deposit accounts.

Consideration of Market Conditions

Various commenters stated that the analysis used to establish the proposed benchmark fee amounts failed to consider changes in market conditions, in particular how charge-off costs would increase during an economic downturn. At least one of these commenters also expressed concern that neither the benchmark fee nor the breakeven fee would be sufficient for very large financial institutions to recover losses incurred during an economic downturn. Additionally, several industry commenters noted that the proposed benchmark fee amounts failed to adjust for inflation.

Final Rule

For the reasons stated in the proposal and below, the CFPB:

- Finalizes as proposed (but with technical edits to conform to Code of Federal Regulations style requirements) the definition of above breakeven overdraft credit at § 1026.62(b)(1), the methodology described at § 1026.62(d)(1) for determining whether credit is above breakeven overdraft credit, the description of the breakeven standard at § 1026.62(d)(1)(i), and the formula at § 1026.62(d)(2) for calculating the breakeven standard;
- Amends § 1026.62(d)(1)(ii) to set the benchmark fee at \$5;
- Adds § 1026.62(d)(3) to provide additional guidance regarding the circumstances under which a cost or charge-off loss is specifically traceable;
- Adds § 1026.62(d)(4) to provide additional guidance regarding the meaning of the phrase “charge or combination of charges” for purposes of § 1026.62(d)(1);
- Adds § 1026.62(d)(5) to provide additional guidance on how a very large financial institution determines the pro rata share of its total direct costs and charge-off losses under § 1026.62(d)(1)(i); and
- Adds § 1026.62(d)(6) to define “previous year” for purposes of § 1026.62(d)(1)(i).

These sections are discussed more fully below.

Definition of Above Breakeven Overdraft Credit (§ 1026.62(b)(1))

Section 1026.62(b)(1) defines above breakeven overdraft credit as overdraft credit extended by a very large financial institution to pay a transaction on which, as an incident to or a condition of the overdraft credit, the very large financial institution imposes a charge or combination of charges exceeding the average of its costs and charge-off losses for providing non-covered overdraft credit as described in § 1026.62(d).

As discussed above, several commenters asked the CFPB to consider a threshold for above breakeven overdraft credit that varies based on a range of factors, such as the amount of the overdraft, the amount of overdraft fees, the duration of the overdraft, the cost to the very large financial institution of providing the overdraft, the size of the very large financial institution, the frequency with which the consumer overdraws their account, or a periodic rate. Other commenters asked the CFPB to allow above breakeven overdraft credit to continue to qualify as non-covered overdraft credit if such credit included consumer-friendly features, such as cure periods, de minimis limits, transaction limits, and real-time notifications.

The CFPB adopts the approach outlined in the proposed rule over the approaches proposed by commenters because it is easier for financial institutions to implement, easier for regulators to enforce, and more protective of consumers. Under the approach adopted in this rule, overdraft credit is above breakeven overdraft if the charge exceeds the higher of the fee calculated using the breakeven standard or the benchmark fee. As a result, both very large financial institutions and regulators can readily determine whether an overdraft transaction is above breakeven overdraft credit by reviewing the fee charged to verify whether it exceeds either the benchmark fee or the fee permitted under the breakeven standard. If the threshold for above breakeven overdraft varied by factors such as the amount, duration, and cost of each overdraft, both very large financial institutions and regulators would need to make case-by-case determinations regarding whether individual transactions fell above or below the relevant threshold for above breakeven overdraft credit.

As noted, the approach adopted in the rule is also more protective of consumers. For example, many non-covered overdraft programs operating under the existing 1026.4(c)(3) exception already include consumer-friendly features, such as cure periods, de minimis limits, and transaction limits. Unfortunately, despite having these consumer-friendly features, many non-covered overdraft programs still operate as high-cost consumer credit products that put consumers at risk of harms such as high cumulative fee burdens, account charge-offs, involuntary account closures, and loss of access to the banking system. Allowing above breakeven overdraft credit to continue to qualify as non-covered overdraft credit when it

includes consumer-friendly features would allow those potential harms to persist in their present form. In contrast, the approach adopted in the rule significantly mitigates these risks by ensuring that very large financial institutions provide the non-covered overdraft credit as a courtesy. Therefore, the CFPB adopts § 1026.62(b)(1) as proposed.

General Calculations for Above Breakeven Overdraft Credit (§ 1026.62(d)(1))

Proposed § 1026.62(d)(1) clarified that overdraft credit offered by a very large financial institution is above breakeven overdraft credit for purposes of proposed § 1026.62(b)(1) if the charge or combination of charges for such credit exceeds the greater of (1) the pro rata share of the very large financial institution's annual total direct costs and charge-off losses for providing non-covered overdraft credit calculated in accordance with the breakeven standard outlined in § 1026.62(d)(2); or (2) the benchmark fee published by the CFPB.

The CFPB adopts § 1026.62(d)(1) as proposed. As explained in the proposed rule, the § 1026.62(d)(1) provides very large financial institutions with two methods for determining whether its current charge for an overdraft transaction exceeds the average of its costs and charge-off losses for providing non-covered overdraft credit—the breakeven standard and the benchmark fee. This approach decreases compliance costs for some very large financial institutions by providing them with a simple bright-line method for determining whether the overdraft credit they extend is above breakeven overdraft credit, while providing other very large financial institutions the flexibility to make the above breakeven calculation on their own.

In response to commenters' request for guidance clarifying whether extended or sustained overdraft fees, interest on outstanding overdraft balances, and transfer fees would count as overdraft charges for purposes of determining whether overdraft credit was above breakeven overdraft credit, the CFPB amends its proposal by adding § 1026.62(d)(4), which incorporates guidance that appeared in the preamble of the proposed rule into the final regulation text.¹⁹³ Specifically, § 1026.62(d)(4) provides that, for purposes of § 1026.62(d)(1), a charge or combination of charges includes all revenue received in connection with an overdraft transaction, including, but not limited to, any extended or sustained

overdraft fees, any interest charges on outstanding overdraft balances, and any other payments the very large financial institution receives in connection with an overdraft transaction.

Breakeven Standard (§§ 1026.62(d)(1)(i), 1026.62(d)(5), and 1026.62(d)(6))

Proposed § 1026.62(d)(1)(i) outlined the breakeven standard used to determine whether overdraft credit was above breakeven overdraft credit for purposes of proposed § 1026.62(b)(1). To employ the breakeven standard described at proposed § 1026.62(d)(1)(i), a very large financial institution determines its total direct costs and charge-off losses for providing non-covered overdraft credit to all accounts open at any point during the prior year and then divides that figure by the total number of non-covered overdraft transactions attributable to those accounts occurring in the prior year. The CFPB adopts § 1026.62(d)(1)(i) as proposed.

The CFPB sought comment regarding whether the breakeven standard should allow very large financial institutions to make separate calculations of their average costs and charge-off losses for non-covered overdraft within subsets of their depository account portfolio, such as account relationship tiers or average account balance ranges. At least one commenter stated that the final rule should not allow very large financial institutions to make separate calculations of their average costs and charge-off losses for non-covered overdraft within subsets of their depository account portfolios. As explained above, the CFPB favors an approach for determining whether a transaction is above breakeven overdraft that is straightforward for very large financial institutions to implement and simple for regulators to validate. Requiring very large financial institutions to calculate their average costs and charge-off losses for non-covered overdraft across their entire depository account portfolio advances these goals in at least two ways. First, it simplifies the breakeven calculation because financial institutions would not need to determine how they would apportion costs within subsets of their depository account portfolios. Second, it allows regulators to confirm a very large financial institution's compliance with the above breakeven overdraft requirement more easily because they would only need to review a single calculation. Therefore, the final rule requires very large financial institutions to calculate their average costs and charge-off losses for non-covered

overdraft across their entire depository account portfolio.

The CFPB also sought comment regarding whether the rule should allow a very large financial institution to exclude non-covered overdraft transactions from the transaction totals used to calculate the threshold for the breakeven standard in instances where the very large financial institution waived, refunded, or otherwise did not assess fees for those transactions ("uncharged transactions"). As discussed above, several commenters addressed this issue. The CFPB has considered these comments and determined that a very large financial institution should include all non-covered overdraft transactions, including uncharged transactions, in the transaction totals used to calculate the breakeven threshold.

The CFPB takes this position because including all non-covered overdraft transactions in the transaction totals used to calculate the breakeven threshold will keep the breakeven standard tailored to ensuring financial institutions can break even on just the non-covered overdraft transaction products and is not used to cross-subsidize other deposit account-related expenses like losses associated with uncharged transactions. The rule is not designed to allow a financial institution to turn a profit on non-covered overdraft transactions in order to cover other expenses related to the depository account. And the CFPB concludes that it would not need to provide an incentive to ensure uncharged transactions continue because the fact that financial institutions are providing them now at a loss suggests there is already sufficient logistical, competitive, or reputational incentive for them to exist.

This approach will also result in fairer treatment of consumers who pay fees for non-covered overdraft. As explained above, a very large financial institution employs the breakeven standard by dividing its total direct costs and charge-off losses for providing non-covered overdraft credit to all accounts open at any point during the prior year (the numerator) by the total number of non-covered overdraft transactions attributable to those accounts occurring in the prior year (the denominator). If the final rule permitted very large financial institutions to exclude transactions that do not incur fees from the denominator, the share of costs and losses attributable to the transactions remaining in the denominator increases. As a result, consumers who paid fees for non-covered overdraft transactions would pay higher fees for those

¹⁹³ 89 FR 13852, 13869 (Feb. 23, 2024).

transactions than they otherwise would under a rule requiring very large financial institutions to include all non-covered overdraft transactions in the transaction totals used to calculate the breakeven threshold. To avoid such cost shifting, the CFPB has determined that a very large financial institution should include all non-covered overdraft transactions, including uncharged transactions, in the transaction totals used to calculate the breakeven threshold.

The CFPB notes that another method for ensuring that the breakeven fees only covered losses on non-covered overdraft transactions would be to take out losses associated with uncharged transactions. The CFPB has determined that it would be practically difficult for financial institutions to isolate losses from charge-offs that resulted from overdrafts that incurred fees from losses from charge-offs resulting from uncharged transactions. Therefore, the CFPB has determined the best approach is to allow financial institutions to include all losses in the breakeven calculation, and account for that by including all overdraft transactions, whether they involved a fee or not. The result is to reach a fee amount that more accurately reflects a financial institution's marginal costs and losses per transaction.

To clarify that very large financial institutions must include uncharged transactions in the transaction totals used to calculate the threshold for the breakeven standard, the CFPB amends its proposal by adding § 1026.62(d)(5). Section 1026.62(d)(5) will provide that, when calculating the pro rata share of its total direct costs and charge-off losses for providing non-covered overdraft credit in the previous year, a very large financial institution must include all non-covered overdraft transactions from the previous year in its calculation.

At least one other commenter asked the CFPB to clarify how a very large financial institution can implement the breakeven standard if the institution lacks cost and charge-off loss data from the previous year. This commenter suggested that the CFPB amend the breakeven standard so that it provides very large financial institutions with the flexibility to use less than 12 months of cost and charge-off loss data to calculate the breakeven fee.

As explained in the proposed rule, very large financial institutions must use annualized cost and charge-off loss figures because those figures even out seasonal variations that could occur with a shorter review period.¹⁹⁴ As a

result, if a very large financial institution lacks cost and charge-off loss data covering a full year, it cannot implement the breakeven standard. Instead, a very large financial institution wishing to offer non-covered overdraft credit should utilize the benchmark fee until it has sufficient data to implement the breakeven standard.

The proposal did not define the term “previous year” for purposes of § 1026.62(d)(1)(i), but the CFPB intended to provide very large financial institutions with flexibility to use cost and charge-off loss data from a recent 12-month period, such as the prior calendar year, any 365-day period that begins within the prior calendar year, the prior four financial quarters, or the prior accounting year. To provide additional guidance regarding the meaning of “previous year,” the CFPB amends its proposal by adding § 1026.62(d)(6). Section 1026.62(d)(6) provides that, for purposes of § 1026.62(d)(1)(i), the term “previous year” means a period that encompasses, at the very large financial institution's option, any of the following periods—the prior calendar year, any 365-day period that begins within the prior calendar year, the prior four financial quarters, or the very large financial institution's prior accounting year.

When implementing the breakeven standard either for the first time or after transitioning from the benchmark fee, a very large financial institution can include direct costs and charge-off losses from any transaction that was a non-covered overdraft transaction during the previous year. For example, to comply with the final rule's effective date of October 1, 2025, a very large financial institution using the breakeven standard could calculate direct costs and charge-off losses based on all non-covered overdraft transactions occurring from January 1, 2024 through December 31, 2024 (the previous calendar year).

Cost and Loss Calculation for the Breakeven Standard (§§ 1026.62(d)(2) and 1026.62(d)(3))

To provide additional guidance regarding the types of costs and charge-off losses a very large financial institution could consider when calculating the breakeven standard, the CFPB proposed to add § 1026.62(d)(2). Proposed § 1026.62(d)(2) provided that, when calculating the breakeven standard, a very large financial institution could consider costs and charge-off losses that are specifically traceable to its provision of non-covered overdraft credit in the previous year.

As discussed above, various commenters asked the CFPB to provide

greater clarity regarding the breakeven standard. Most of these commenters asked the CFPB to provide additional guidance regarding the types of costs and charge-off losses that are considered specifically traceable costs and charge-off losses under the breakeven standard.

As the CFPB explained in its proposal, when calculating its costs and charge-off losses under the breakeven standard, a very large financial institution can consider costs and charge-off losses that are specifically traceable to its provision of non-covered overdraft credit. The CFPB proposed this specifically traceable standard in order to prevent very large financial institutions from employing the breakeven standard in a manner that would have circumvented § 1026.62(b)(1). Without such a restriction, very large financial institutions might have included costs and charge-off losses in their average cost and loss calculations that are more appropriately attributable either to other segments of their deposits business or to their deposits business overhead.

The proposed rule also provided an example of how the specifically traceable test would work in practice. In that example, if a very large financial institution had used issue tagging in its call center to reasonably and accurately gauge the number of customer service calls it received relating to non-covered overdraft credit, direct costs relating to those customer service calls would be specifically traceable and the very large financial institution could include the direct costs relating to those calls in its calculation of costs under the breakeven standard. This example demonstrates that the specifically traceable test consists of two questions. First, does the cost or charge-off loss have a direct relationship to the provision of non-covered overdraft services? Second, can the very large financial institution provide evidence to demonstrate that direct relationship? If a very large financial institution can answer both questions in the affirmative, then the cost or charge-off loss is specifically traceable, and the very large financial institution may consider the cost or charge-off loss for purposes of the breakeven standard.

As discussed above, some commenters stated that the formula for calculating costs and charge-off losses under the breakeven standard should include general overhead costs and charge-off losses resulting from unauthorized use, EFT errors, billing errors, returned deposit items, or rescinded provisional credit. However, as other commenters noted, such costs and losses do not have a direct

¹⁹⁴ 89 FR 13852, 13870 (Feb. 23, 2024).

relationship to the provision of non-covered overdraft services. This is true because very large financial institutions incur those costs and losses even if they do not extend non-covered overdraft credit to the consumer. As a result, such costs and charge-off losses fail the first part of the specifically traceable test and cannot be included in the breakeven standard's cost and charge-off calculation formula.

Very large financial institutions should employ a similar analysis when considering whether costs such as communication costs, branch servicing costs, collection costs, core provider/vendor costs, compliance costs, and technology costs are specifically traceable to the provision of non-covered overdraft credit. For example, a commenter asked whether the final rule would permit a very large financial institution to allocate a portion of its call center expenses to overdraft transactions if it did not have a method to track the calls it received relating to non-covered overdraft credit. As demonstrated by the example above, because the institution could not satisfy the second part of the specifically traceable test by producing evidence to substantiate the cost, the cost would not be specifically traceable and the very large financial institution could not include the cost under the breakeven standard.

After considering the comments received, and for the reasons stated above, the CFPB adopts § 1026.62(d)(2) as proposed. For clarity, the CFPB is amending its proposal by adding § 1026.62(d)(3) to describe the two-part test discussed above. Specifically, § 1026.62(d)(3) provides that, for purposes of § 1026.62(d)(2), a cost or charge-off loss is specifically traceable if it has a direct relationship to the provision of non-covered overdraft services and the very large financial institution can provide evidence to demonstrate that direct relationship.

Benchmark Fee (§ 1026.62(d)(1)(ii))

Section 1026.62(d)(1)(ii) establishes the benchmark fee. In its proposal, the CFPB suggested four potential benchmark fee amounts—\$3, \$6, \$7, and \$14—based on data collected from five very large financial institutions (the sample) and sought comment on whether to finalize one of these or some other fee amount. The CFPB used the same formula (the benchmark formula) to calculate all four of these proposed alternative benchmark fees but relied on different datapoints from the sample to derive each fee amount.

The proposed benchmark formula used a methodology that was similar to

the methodology that a very large financial institution would use to calculate its costs and losses under the breakeven standard provided in § 1026.62(d)(2) (the breakeven formula). The CFPB sought comment on this approach. At least one commenter stated that the methodology used to calculate the benchmark fee should track the breakeven formula. The commenter further underscored that both methodologies should treat the issue of uncharged transactions consistently.

Consistent with its proposal, the CFPB uses a calculation methodology for the benchmark fee that is similar to the calculation methodology that a very large financial institution uses to calculate its cost and losses under the final rule's breakeven standard. The CFPB considers this approach appropriate because the benchmark fee is meant to serve as a proxy for a financial institution's own breakeven calculation. The CFPB finds that providing such a proxy will facilitate compliance by decreasing compliance costs for very large financial institutions and by accommodating those institutions that lack the ability to determine their average costs and charge-off losses for providing non-covered overdraft credit under the breakeven standard. To advance these goals, the CFPB conducted its own calculation under the breakeven standard using cost and loss data from a sample of very large financial institutions. The results of this calculation reflect the average costs and charge-off losses for providing non-covered overdraft credit under the breakeven standard for the financial institutions in its sample. The CFPB anticipates that many very large financial institutions will be able to rely on the benchmark fee in lieu of performing their own calculation under the breakeven standard. Furthermore, as discussed above, the final rule requires a very large financial institution to include all non-covered overdraft transactions in the transaction totals used to calculate the breakeven threshold. For the same reasons, the CFPB uses the same approach to calculate the benchmark fee.

In the proposal, the CFPB also considered whether it should calculate the benchmark fee based on data from all five institutions in its sample or just the financial institution in its sample with the highest charge-off losses. Commenters in favor of using data from all five institutions generally stated that the CFPB should not calculate the benchmark fee using the data of a single outlier financial institution and that the

average from the entire sample provides a more accurate benchmark fee estimate. These commenters also expressed concern that relying on data from the outlier institution might discourage very large financial institutions from adopting practices that reduce charge-offs, which could result in greater consumer harm in the form of account closures and negative reporting than otherwise would occur if the CFPB calculated the benchmark fee based on the average charge-off losses from all five institutions in its sample.

Commenters in favor of using data from the outlier institution stated that the CFPB's sample was small and that the average may not be probative of the appropriate benchmark fee amount. They further noted that, even if the CFPB adopted its highest proposed benchmark fee of \$14, the benchmark fee would reflect a significant reduction in the average market price for non-covered overdraft. As a result, these commenters thought that basing the benchmark fee on data from the outlier institution was the sounder approach.

The CFPB has considered these comments and determined that it should calculate the benchmark fee based on data from all five institutions in its sample. The CFPB shares the concerns expressed by commenters who noted that relying on data from the outlier institution might result in greater consumer harm than otherwise would occur if the CFPB calculated the benchmark fee based on the average charge-off losses from all five institutions in its sample. In addition, the outlier institution's losses were significantly higher than losses for other institutions in the sample and for institutions that provided loss information in their comments, which suggests that using the outlier institution's losses to set the benchmark would overestimate the losses incurred by many institutions. Moreover, to the extent the benchmark fee amount is insufficient for a given institution to recoup its costs and losses, it may calculate its own costs and losses using the breakeven standard.

By applying a calculation methodology similar to the breakeven formula to all transaction data taken from all five of the very large financial institutions, the CFPB is using the same approach it used to derive the proposed \$3 benchmark fee. As discussed above, the CFPB received numerous comments regarding the amount of the benchmark fee. These comments fell into three general categories—support for the \$3 benchmark fee, support for a benchmark fee falling in between the \$3 and \$14 range, and support for a benchmark fee

of \$14 or more. Proponents of the \$3 benchmark fee stated that a \$3 benchmark fee would benefit consumers. They also viewed a \$3 benchmark fee as generous because they believed that the CFPB overestimated the cost of funds and operational costs faced by very large financial institutions. At least two commenters supported a benchmark fee falling between the \$3 and \$14 range. One of these commenters explained that their financial institution conducted a review of its costs for overdraft credit and determined that a \$5 fee would be sustainable for their institution. The other commenter stated that the CFPB should set the benchmark fee at \$6, but only if the rule also mandated additional consumer protections, such as grace periods, caps on the number of overdraft fees per day, and de minimis thresholds. This commenter explained that it wanted the CFPB to adopt the approach it used to derive the proposed \$6 benchmark fee, but with additional consumer protections in order to prevent very large financial institutions from changing waiver policies in order to increase revenues. Proponents of a benchmark fee of \$14 or more stated either that their costs were closer to \$14 or that the CFPB's estimates of very large financial institutions' costs were too low. These commenters also criticized the analysis used to establish the proposed benchmark fee amounts. First, they stated that the sample used for the analysis was too small and was unrepresentative of the broader market. Additionally, they criticized the sample because it did not include data from financial institutions that fell under the threshold for very large financial institutions.

No commenters representing very large financial institutions provided the CFPB with additional data that would impact the findings of its original analysis establishing the proposed benchmark fee amounts. One commenter representing a bank with \$1.6 billion in assets provided a breakdown of known costs and losses associated with the operation of their bank's overdraft program. This commenter determined that the known costs and losses associated with their bank's overdraft program represented roughly 39 percent of its overdraft fee of \$25, which equates to \$9.75. However, this estimate likely overstates the costs and losses attributable to a very large financial institution's overdraft program for several reasons. First, the commenter's cost estimates included costs for manual review of overdraft payment decisions by bank employees.

These review costs represented \$1 of the \$9.75, or approximately ten percent of its costs. The CFPB expects that many very large financial institutions have automated such reviews, making them significantly less costly. Second, the commenter's cost estimates included costs associated with mailing overdraft notices. These mail-related costs represented \$1.75 of the \$9.75, or approximately 18 percent of its costs. The CFPB expects that many very large financial institutions provide such notices electronically, significantly lowering the cost of providing such notices. Accounting for these and other efficiencies gained by scale at very large financial institutions, the CFPB expects the costs and losses of many very large financial institutions to be lower than this bank's estimated costs and losses. An additional commenter representing a credit union with \$4.8 billion in assets stated that based on a recent review of costs conducted by the credit union, a \$5 fee would be sustainable for their institution.

Both commenters referenced in the preceding paragraph represented financial institutions with less than \$10 billion in assets. It stands to reason that many very large financial institutions, which have the advantage of scale, could continue to operate overdraft programs at the proposed \$3 benchmark fee. As noted above, the benchmark fee is not a regulatory obligation; it is a proxy for a financial institution's own breakeven calculation and is being adopted to ease the compliance burden of implementing the breakeven standard. To the extent the benchmark fee amount is insufficient for a given institution to recoup its costs and losses, that institution may calculate its own costs and losses using the breakeven standard. However, to help ensure that the benchmark fee covers additional costs noted by commenters, such as costs relating to branch servicing, collections, core provider/vendor services, compliance, technology, and the provision of overdraft notices, the CFPB will increase its cost estimates for its proposed \$3 benchmark fee by \$2 per transaction. Therefore, the CFPB finalizes § 1026.62(d)(1)(ii) to set the benchmark fee at \$5.

Industry commenters also expressed concern that, if the CFPB finalized any of the proposed benchmark fees, consumers would increase their use of overdraft credit. These commenters contended that, as consumers increased their use of overdraft credit, more consumers would default on such credit, increasing charge-off costs as well as increasing the frequency of involuntary account closures and

negative credit reporting. The commenters further anticipated that, as more consumers defaulted on non-covered overdraft credit, very large financial institutions would increase restrictions on such credit.

Both the proposed rule's 1022(b) analysis and the final rule's 1022(b) analysis have considered how lower prices might impact consumer behavior.¹⁹⁵ For consumers who overdraft by mistake, both 1022(b) analyses determined that a lower price for non-covered overdraft credit would be unlikely to change consumer behavior because those consumers did not intend to overdraft in the first place. This view is consistent with the views expressed by consumer advocates who commented that overdraft fees are not an effective deterrent and that lowering the amount of overdraft fees likely will not significantly impact whether or not a consumer overdraws their account. For consumers who use non-covered overdraft credit deliberately, both 1022(b) analyses determined that a lower price for non-covered overdraft credit would lead some consumers to use such credit more frequently on the margin. Nonetheless, very large financial institutions could take proactive measures to reduce such use, should they prefer that—such as by managing overdraft credit limits.

Commenters also stated that the analysis used to establish the proposed benchmark fee amounts failed to consider changes in market conditions. Specifically, these commenters noted that the analysis failed to consider how charge-off costs could increase during an economic downturn. At least one of these commenters also expressed concern that neither the benchmark fee nor the breakeven fee would be sufficient for very large financial institutions to recover losses incurred during an economic downturn. Additionally, several commenters noted that the proposed benchmark fee amounts failed to adjust for inflation.

To the extent that a very large financial institution determines that changes in market conditions, such as an economic downturn or inflation, make the benchmark fee too low, the final rule provides very large financial institutions with the flexibility to calculate their own breakeven pricing or to offer covered overdraft credit in compliance with the requirements of Regulation Z. The CFPB expects that very large financial institutions employing the breakeven standard during an economic downturn should

¹⁹⁵ See 89 FR 13852, 13893 (Feb. 22, 2024); part VII.E.1.iii of this rule.

be able to effectively manage their credit risk through traditional credit risk management practices, such as adjusting underwriting standards. Nevertheless, the CFPB will continue to monitor the market to determine whether adjustments to the benchmark fee or the breakeven standard are warranted.

E. Changes To Covered Overdraft Credit Offered by Very Large Financial Institutions

As discussed below, the CFPB is updating requirements that apply to covered overdraft credit offered by a very large financial institution by: (1) requiring covered overdraft credit to be structured as a separate account; (2) applying additional credit card provisions to covered overdraft credit that can be accessed by a hybrid debit-credit card; and (3) applying Regulation E's compulsory use prohibition to covered overdraft credit. For existing open-end covered overdraft credit products, the proposed new designation as covered overdraft credit accounts would not impose duplicative or additional account opening requirements.

1. Structure of Covered Overdraft Credit (§ 1026.62(c))

The CFPB proposed in § 1026.62(c) to prohibit a very large financial institution from structuring covered overdraft credit as a negative balance on a checking or other transaction account and to require the institution to structure covered overdraft credit as a separate credit account. The CFPB preliminarily determined that this structural requirement would make it easier for creditors and consumers to implement and understand, respectively, covered overdraft credit. For the reasons discussed below, the CFPB is finalizing § 1026.62(c) as proposed.

Comments Received

Several industry commenters opposed the CFPB's proposal. They argued that the requirement to structure overdraft as a separate account would substantially increase the cost of providing overdraft credit relative to the current cost of providing non-covered overdraft as a negative balance on the asset account. Some argued that the requirement was unreasonable or impractical in connection with most overdrafts, which are of small duration and amount.

Several consumer advocate commenters supported the CFPB's proposal. They argued that important TILA consumer protections, including the offset prohibition and the periodic statement disclosure and billing error

resolution requirements, would be difficult or impossible for creditors to implement without separating a consumer's asset account from the consumer's linked covered overdraft credit. They also argued that the separate account structure would improve consumers' ability to know when they are accessing, and to decide whether they want to access, covered overdraft credit, as well as their ability to know when they are repaying, and to decide whether they want to repay, the overdraft credit. They argued that the current high cost of overdraft credit makes such consumer understanding and control particularly important. One nonprofit commenter observed that structuring covered overdraft as a credit account separate from the asset account is the way that overdraft lines of credit have worked since TILA's enactment in 1968 and is the way that checking accounts with linked credit card accounts work. This commenter agreed with the CFPB's proposal because, this commenter stated, the separation of the credit account from the asset account is a core element of TILA.

Final Rule

For the reasons discussed below, the CFPB is finalizing § 1026.62(c) as proposed. Final § 1026.62(c) prohibits a very large financial institution from structuring covered overdraft credit as a negative balance on a checking or other transaction account and requires the institution to structure covered overdraft credit as a separate credit account. The CFPB has determined that requiring the separation of a consumer's asset balance, such as a checking or other transaction account that is a "covered asset account" as defined in proposed § 1026.62(b)(2), from the consumer's credit balance, such as a credit account that is a "covered overdraft credit account" as defined in proposed § 1026.62(b)(4), is an appropriate addition to Regulation Z under its TILA section 105(a) authority, as it is necessary or proper to facilitate creditor compliance and to effectuate the purposes of TILA by helping to avoid the uninformed use of credit and protecting consumers against inaccurate and unfair credit billing and credit card practices.

The separate account structure requirement will enable institutions to comply with the requirements of TILA and Regulation Z, including, for example, the offset prohibition. It is not possible for an institution to maintain both a credit balance and an asset balance at the same time for a consumer within a single asset account that has no tied credit account or subaccount. It is

therefore also not possible for the institution to provide overdraft credit to the consumer in a manner that complies with the Regulation Z offset prohibition without providing the consumer with a credit account or subaccount that is separate from the tied asset account.

Further, Regulation Z's open-end rules are generally drafted with the assumption that the product in question is a pure credit product, without substantial positive funds. For example, existing § 1026.11(a) generally provides that creditors must refund any positive balances on the credit account to the consumer within six months. As another example, the rules for defining finance charges in the credit card context generally treat all transaction charges as finance charges, which makes sense when all transactions are generally assumed to involve use of credit.

The separate account structure requirement will also avoid the uninformed use of credit by enabling consumers to better understand and monitor their asset and credit balances and trace how their funds are being used through more informative periodic statement disclosures, both for the asset account as required by Regulations E and DD and for the linked separate covered overdraft credit account as required by Regulation Z. The separate account structure will protect consumers from unfair credit billing and credit card practices by enabling them to control their funds. Specifically, the requirement will empower consumers to use funds from incoming deposits to their accounts for purposes other than immediately repaying an overdraft balance, as the offset prohibition requires institutions to permit consumers to do.

The CFPB has determined that the separate credit account structure by itself will not materially increase the cost of providing non-covered overdraft credit that will become covered overdraft credit under this final rule. This structure is demonstrably feasible today because very large financial institutions already have it in place for their overdraft lines of credit and for their credit cards linked to checking accounts. Indeed, creditors have structured their overdraft lines of credit in this manner since TILA's enactment. If a very large financial institution that today does not offer such lines of credit or linked credit cards seeks to provide above breakeven overdraft credit, the institution will be required to implement the separate account structure as part of doing so, when they will already be incurring costs for implementing other operational changes

to offer covered overdraft credit. The expected costs and benefits of these changes are discussed in part VII below. The CFPB has also determined that it will not be impractical for institutions to comply with the separate account requirement in connection with overdrafts of small duration and amount because these characteristics have nothing to do with the cost of the separate account structure requirement. For example, many credit card purchases are of small dollar amounts. These small purchases simply get incremented to the credit card account balance at virtually zero marginal cost. At some later time, funds are transferred from the consumer's asset account to repay the credit balance, again at virtually zero marginal cost.

2. Credit Card Changes

Credit cards and card issuers are generally subject to additional requirements in Regulation Z. The requirements that apply generally depend on whether the credit account (1) is a "credit card account under an open-end (not home-secured) consumer credit plan" under Regulation Z; or (2) can be accessed by a "credit card" or "charge card," as those terms are defined under Regulation Z. Currently, a covered overdraft credit account that can be accessed by a debit card or other device that qualifies as a credit card (including certain account numbers) is subject to some Regulation Z requirements that apply to "credit cards." Such covered overdraft credit, however, is not subject to requirements that apply to a "credit card account under an open-end (not home-secured) consumer credit plan." It is also specifically excepted from some of the requirements that apply to "credit cards." The CFPB proposed applying all credit card provisions generally to covered overdraft credit accounts if the credit account can be accessed by a hybrid debit-credit card, as defined in the proposal, namely a debit card offered by a very large financial institution. As discussed further below, the CFPB is finalizing these changes as proposed, such that the final rule applies all the credit card provisions to covered overdraft credit accounts if the credit account can be accessed by a hybrid debit-credit card.

i. Applying CARD Act Provisions of Regulation Z To Covered Overdraft Credit

The CFPB proposed subjecting all covered overdraft credit to the CARD Act provisions of Regulation Z in subparts B and G (the CARD Act provisions) if that credit is (1) open-end

credit; (2) accessible by a credit card; and (3) offered by a very large financial institution. Currently, a debit card that can access covered overdraft credit is considered a credit card under Regulation Z and generally is subject to the Regulation Z provisions that apply to credit cards, but, because of two non-statutory exceptions, the overdraft credit is not subject to the CARD Act provisions.¹⁹⁶ The final rule subjects such credit to the CARD Act provisions when it is offered by very large financial institutions. To implement these changes, the rule adds a new definition of "hybrid debit-credit card," amends the definitions of "credit card" and "credit card account under an open-end (not home-secured) consumer credit plan," and makes other clarifying changes to the rule text and associated commentary.

Background on the CARD Act and Overdraft

As discussed in the proposed rule, the CARD Act amended TILA to institute new substantive and disclosure requirements to establish fair and transparent practices for open-end consumer credit card plans.¹⁹⁷ The statutory language of the CARD Act applies the protections broadly to credit card products that can access open-end consumer credit. The CARD Act generally applies to any "credit card

account under an open-end consumer credit plan." Absent two non-statutory exceptions, this broad language generally applies to open-end covered overdraft credit that is accessed by a credit card, including a debit card.

The Board implemented this statutory language in Regulation Z in 2010 through the term "credit card account under an open-end (not home-secured) consumer credit plan."¹⁹⁸ That term is defined in existing § 1026.2(a)(15)(ii) to generally mean an open-end credit account that is accessed by a credit card. The Board then used the term "credit card account under an open-end (not home-secured) consumer credit plan" in provisions of Regulation Z in subpart B and subpart G that were promulgated or amended to implement the CARD Act. Like the statutory definition, this regulatory definition would be broad enough so that the CARD Act provisions generally would apply to covered overdraft credit that is accessed by a credit card, including a debit card.

However, overdraft lines of credit are not subject to the CARD Act provisions in subpart B and subpart G that apply to a "credit card account under an open-end (not home-secured) consumer credit plan" because the Board adopted two non-statutory exceptions that exclude overdraft lines of credit from that definition. The exceptions in existing § 1026.2(a)(15)(ii)(B) and (C), respectively, are (1) an overdraft line of credit that is accessed by a debit card; and (2) an overdraft line of credit that is accessed by an account number other than an account number that is a hybrid prepaid-credit card that can access a covered separate credit feature as defined in § 1026.61. Although Regulation Z does not explicitly define "overdraft line of credit," the term is generally understood to refer to an open-end credit product tied to an asset account. Funds are advanced from the credit product to pay for a withdrawal when the consumer withdraws more money than they have available in the asset account.

Aside from the CARD Act provisions in subpart B and subpart G, currently these overdraft line of credit products are generally subject to Regulation Z's open-end credit rules when the fees and other charges imposed on this product are finance charges. The existing

¹⁹⁶ 12 CFR 1026.2(a)(15)(i), (iv) and comment 2(a)(15)–2.i.B. Non-covered overdraft credit is not subject to Regulation Z, which includes the provisions applicable generally to credit cards and the provisions implementing the CARD Act, because (1) it is not subject to a finance charge or repayable by a written agreement in more than four installments and (2) a debit card that can access non-covered overdraft credit is not considered a credit card because, as existing comment 2(a)(15)–2.ii.A explains, a debit card with no credit feature or agreement is not a credit card even if the creditor occasionally honors an inadvertent overdraft. As discussed in the changes to the definition of finance charge section above, the final rule amends the definition of "finance charge" to expand the scope of covered overdraft credit, such that certain overdraft credit that is currently non-covered overdraft credit will be considered covered overdraft credit when this rule becomes effective. Like other covered overdraft credit, this newly covered overdraft credit will be generally subject to the Regulation Z provisions applicable to credit cards if the covered overdraft credit can be accessed by a credit card. However, without further changes, the non-statutory exceptions that exclude covered overdraft from being subject to the CARD Act provisions would prevent covered overdraft credit, including newly covered overdraft credit, from being subject to the CARD Act provisions. As discussed in this section, the final rule updates these non-statutory exceptions, which subjects certain covered overdraft credit, including certain newly covered overdraft credit, to the CARD Act provisions.

¹⁹⁷ Section 2 of the CARD Act expressly granted authority to the Federal Reserve Board to issue such rules as it considers necessary to carry out the Act, and the CFPB now has that authority pursuant to the CFPA.

¹⁹⁸ See 75 FR 7658, 7663–65 (Feb. 22, 2010). The Board first implemented the statutory term "credit card account under an open-end consumer credit plan" in its July 2009 interim final rule, which, in relevant part, exempted home equity lines of credit from certain requirements of the CARD Act. 74 FR 36077, 36083 (July 22, 2009). The Board added the term "credit card account under an open-end (not home-secured) consumer credit plan" in its 2010 final rule.

overdraft-related exclusion in 12 CFR 1026.4(c)(3), which the CFPB is narrowing in this rulemaking, does *not* exclude overdraft products where “the payment of [overdrawing] items and the imposition of the charge were previously agreed upon in writing.” To the extent these overdraft line of credit products can be accessed by a debit card or other single credit device, the debit card or other single credit device is a “credit card” and is generally subject to provisions in Regulation Z that apply to a “credit card.”¹⁹⁹

The Board acknowledged in its February 2010 rule that it believed that, as a general matter, Congress intended the CARD Act to apply broadly to products that meet the definition of a credit card.²⁰⁰ The Board also acknowledged that a debit card that accesses an overdraft line of credit is a “credit card.”²⁰¹

Nevertheless, the Board relied on its authority under TILA section 105(a) and section 2 of the CARD Act to create two exceptions for overdraft lines of credit, including one for debit cards that can access an overdraft line of credit. As a result of the exceptions, such accounts are not subject to the various CARD Act provisions in subpart B and subpart G that apply to a “credit card account under an open-end (not home-secured) consumer credit plan.” In creating the exceptions, the Board stated that, at the time, Regulation Z-covered overdraft lines of credit were not in wide use and that, as a general matter, creditors who offered overdraft lines of credit did not engage in some of the practices regulated by the CARD Act provisions with respect to those products.²⁰² The Board cited three examples of practices regulated by the CARD Act that were not currently present in the market: (1) increasing annual percentage rates, (2) applying different rates to different balances, and (3) allowing grace periods before charging interest. The Board did not specifically address other provisions, such as limitations on penalty fees, over-the-limit fees, and the requirement to assess ability to pay, which may have had an impact on practices involving overdraft lines of credit. Because of its assessment that the small market for overdraft lines of credit did not present substantial consumer protection concerns similar to those addressed by the CARD Act, the Board concluded that “alternative forms of regulation” such as Regulation E were “better suited” to protect consumers

from harm with respect to those products.²⁰³

Hybrid Debit-Credit Card (§ 1026.62(b)(5)), Credit Card (§ 1026.2(a)(15)(i)), and Credit Card Account Under an Open-End (Not Home-Secured) Consumer Credit Plan (§ 1026.2(a)(15)(ii))

In § 1026.62(b)(5), the CFPB proposed defining the new term “hybrid debit-credit card” for clarity and ease of reference. It also proposed amending the definition of “credit card” in § 1026.2(a)(15)(i) and related commentary in 2(a)(15) to clarify what is and is not a credit card when certain credit devices can access covered overdraft credit. Under current Regulation Z, a debit card that can access an overdraft line of credit is a credit card.²⁰⁴ The CFPB also proposed amending the definition of “credit card account under an open-end (not home-secured) consumer credit plan” in § 1026.2(a)(15)(ii) by narrowing the two overdraft-related exceptions so that open-end covered overdraft credit offered by a very large financial institution would no longer be excepted from the definition of a “credit card account under an open-end (not home-secured) consumer credit plan.” Such credit offered by a very large financial institution would be subject to the CARD Act provisions in subpart B and subpart G. This would include existing covered overdraft credit (currently commonly referred to as “overdraft lines of credit”) and overdraft credit that would become covered overdraft credit because it is above breakeven overdraft credit.

Comments Received

Various commenters provided general feedback on the application of the credit card provisions. With regard to adding a new definition of “hybrid debit-credit card,” and amending the definitions of “credit card,” and “credit card account under an open-end (not home-secured) consumer credit plan,” several commenters, including consumer advocates as well as a trade group, wrote in support of these changes, with the consumer advocate commenters noting that the CFPB has authority under TILA and the CARD Act to make these changes, these changes are consistent with Regulation Z, and finance charges or four installments are not necessary for there to be a credit card. Some commenters, including a

consumer advocate, a think tank, and a member of Congress, noted that debit cards that can access overdraft credit are credit cards under TILA and the CARD Act. At least one consumer advocate commenter also noted that the CFPB has the authority to bring all overdraft credit accessed through a device within the definition of credit card, regardless of the size of the fee or even the presence of any fee at all. These and other consumer advocate commenters support the CFPB eliminating the regulatory exceptions to bring the regulatory scheme closer to the plain meaning of the CARD Act, and to fulfill the consumer protection purposes of the CARD Act.

Many industry commenters opposed the application of the credit card rules to overdrafts, stating that there would be additional costs, complexity, and risk involved for very large financial institutions offering above breakeven overdraft credit. Industry commenters said consumers would also be harmed because they would be denied overdraft credit because of the CARD Act requirements, would see the cost of their asset accounts go up due to the cost of the credit card provisions, and would be confused by receiving periodic disclosures under both Regulation Z and Regulation E. One noted that while stronger regulations for overdraft lines of credit are needed, regulatory flexibility in the application of the credit card rules also was needed so as not to stifle innovation. This commenter and consumer advocate commenters questioned whether certain credit card provisions should not apply to or should be more flexible for overdrafts.

With regard to comments about using CFPB’s statutory authority to expand Regulation Z credit card coverage to overdrafts that would be non-covered overdrafts under the final rule, for the reasons discussed further above, the CFPB declines to do so. The CFPB recognizes that the credit card provisions may result in additional costs, complexity and risk to very large financial institutions depending on how a very large financial institution chooses to price and structure its overdraft credit in response to this rule. However, the CFPB has determined that the regulatory exceptions from the statutory credit card provisions are no longer appropriate. While the Board created those exceptions based on the understanding that overdraft lines of credit were not in “wide use” at the time and did not include features common to other credit cards, the CFPB has determined that the prevalence or nature of a particular type of credit card should not render it

¹⁹⁹ See Regulation Z comment 2(a)(15)–2.i.B.

beyond the scope of the CARD Act. By its plain terms, the CARD Act applies to all “credit card account[s] under an open-end consumer credit plan,” which, as noted above, includes open-end overdraft credit accessible by a credit card. In any event, the CFPB anticipates that the market for covered overdraft credit could react to the changes in this rule in several ways, including by offering covered overdraft lines of credit to many consumers who currently receive non-covered overdraft credit, including subprime consumers.

Very large financial institutions could also react to this rule by offering covered overdraft credit on different terms than those that have historically been offered. Similarly, other protections, such as the requirement to assess ability to pay, the fee limitations provision, and the limits on penalty fees, may become even more important if covered overdraft credit is offered to more subprime consumers.

The CFPB also has determined that the CARD Act provisions would provide important consumer protections to those consumers most likely to use covered overdraft credit accounts. Today, a small subset of consumers, whom the CFPB has in the past referred to as “frequent overdrafters,” incur most overdraft fees. In light of the final rule’s treatment of the overdraft fee that a very large financial institution may charge for non-covered overdraft, the CFPB expects that some very large financial institutions may have reduced incentive to provide non-covered overdraft credit to the frequent overdraft consumers who typically have lower credit scores²⁰⁵ and today incur the preponderance of overdraft fees. Instead of providing these consumers with non-covered overdraft credit, some very large financial institutions may provide these consumers with covered overdraft credit accounts—the accounts to which the rule would apply the CARD Act provisions—which would allow them the flexibility to charge more than the threshold that cannot be exceeded to remain non-covered overdraft credit.

The CFPB also has determined that applying the CARD Act provisions could provide important benefits to economically vulnerable consumers such as “subprime” consumers. Many of the provisions of the CARD Act target credit card practices affecting these

consumers.²⁰⁶ To the extent that some financial institutions would offer covered overdraft credit to more economically vulnerable consumers in response to the final rule, these CARD Act provisions would offer additional protections to consumers with a debit card that accesses overdraft credit. This will result in a consumer who uses a debit card to access overdraft credit—who often is a vulnerable consumer—receiving the same protections that a subprime credit card consumer receives today, consistent with the broad statutory language in the CARD Act.

With respect to comments about possible consumer confusion due to consumers receiving both monthly credit account disclosures and monthly asset account disclosures, Regulations Z, E and DD permit the required disclosures to be combined in one communication as long as the disclosures comply with the regulatory requirements.²⁰⁷ As discussed further above, the addition of credit disclosures will further facilitate consumers’ understanding of the cost of overdraft credit.

Final Rule

To prevent the market for Regulation Z-covered overdraft from posing consumer risks after the rule goes into effect, carry out the purposes of TILA by promoting the informed use of credit and protecting consumers against unfair credit card practices pursuant to TILA section 105(a), and carry out the CARD Act pursuant to section 2 of the CARD Act, the final rule subjects all covered overdraft credit to the CARD Act provisions in subpart B and subpart G if that credit is (1) open-end credit; (2) accessible by a credit card; and (3) offered by a very large financial institution.

The final rule defines “hybrid debit-credit card” in § 1026.62 to mean any card, plate, or other single credit device that a consumer may use from time to time to obtain covered overdraft credit from a very large financial institution. This definition describes a type of credit card that has two defining characteristics: (1) the credit card must be able to access covered overdraft credit; and (2) the covered overdraft credit must be offered by a very large financial institution. This definition would include, for example, a debit card that a consumer can use to complete transactions using funds drawn from an

asset account held at a very large financial institution when that device can also be used to access covered overdraft credit.

TILA defines “credit card” as “any card, plate, coupon book or other credit device existing for the purpose of obtaining money, property, labor, or services on credit.”²⁰⁸ Section 1026.2(a)(15)(i) defines credit card as “any card, plate, or other single credit device that may be used from time to time to obtain credit,” which includes “a hybrid prepaid-credit card as defined in § 1026.61.” The final rule revises § 1026.2(a)(15)(i) to clarify that a debit card that can access a covered overdraft credit account is a credit card. Thus, under the rule, a debit card that can access a covered overdraft credit account is a hybrid debit-credit card, a hybrid debit-credit card is a credit card, and a debit card that can access a covered overdraft credit account is a credit card. As noted, under the extant regulation a debit card that can access an overdraft line of credit is a credit card. Consistent with these changes and to clarify what is not a credit card, the final rule amends comments 2(a)(15)–2.i.B, 2(a)(15)–2.i.A, 2(a)(15)–2.ii.C, and 2(a)(15)–2.ii.A and adds comment 2(a)(15)–2.ii.E. As proposed, and under current law, the final rule clarifies in comment 2(a)(15)–2.ii.C that an account number is a credit card when it can access covered overdraft credit if the account number can use the credit accessed to purchase goods and services. For example, if an institution permits a consumer to use the account number to initiate ACH transactions that can access credit to purchase goods and services, the account number is a credit card. This is so even if the institution declines the consumer’s debit card transactions that would access credit if authorized.

The final rule also amends the definition of a “card account under an open-end (not home-secured) consumer credit plan” in § 1026.2(a)(15)(ii) by narrowing the two overdraft-related exceptions so that card-accessible open-end covered overdraft credit offered by a very large financial institution would no longer be excepted from the definition of a “credit card account under an open-end (not home-secured) consumer credit plan.” Such credit offered by a very large financial institution would be subject to the CARD Act provisions in subpart B and subpart G.

²⁰⁵ See CFPB 2017 Data Point at 16 tbl.2; see also CFPB 2014 Data Point at 12 (showing non-overdrafters had a median credit score of 747, infrequent overdrafters had a median credit score of 654, occasional overdrafters had a median credit score of 610, moderately frequent overdrafters had a median credit score of 585, and very frequent overdrafters had a median credit score of 563.)

Discussion of the Effect of Applying Regulation Z's CARD Act Provisions To Covered Overdraft Credit Accounts Accessed by a Hybrid Debit-Credit Card

The changes discussed above subject covered overdraft credit to the CARD Act provisions in subpart B and subpart G if that credit is accessible by a debit card and offered by a very large financial institution. In addition to the changes discussed above, the CFPB also proposed conforming and clarifying changes to the commentary for §§ 1026.55 and 1026.57 to reflect the changes discussed in this section. In particular, the CFPB proposed to add comment 55(a)–5 to clarify that the limitations on increasing annual percentage rates, fees, and charges apply to fees imposed in connection with covered overdraft credit whether those fees are imposed on the covered overdraft credit account or the associated covered asset account. Finally, the CFPB proposed to amend comment 57(a)(1)–1 so that it would continue to accurately reflect the exceptions from the definition of credit card issued under a credit card account under an open-end (not home-secured) consumer credit plan if changes to that definition are finalized as proposed. The CFPB is finalizing those changes as proposed.

As mentioned, various commenters provided general feedback on the application of the credit card provisions. A consumer advocate commenter noted its support and reasoning for applying each of the credit card provisions to hybrid debit-credit cards, including (but not limited to) provisions related to limitations on penalty fees (§ 1026.52(b)(1) and (b)(2)), the prohibition on increases in any APR, fee, or finance charge applicable to any outstanding balance on a credit card account (§ 1026.55), the requirement that card issuers reevaluate rate increases (§ 1026.59), and the requirement that institutions of higher education publicly disclose agreements with card issuers and limit the marketing of credit cards on or near college campuses (§ 1026.57). This commenter noted that other credit card provisions may not be applicable to debit cards that access overdraft credit as they are currently structured but that the provisions should apply as these cards or overdraft practices change. The commenter mentioned provisions including those regarding how a card issuer must allocate payments in excess of the minimum periodic payment (§ 1026.53), the limitation on card issuers imposing a finance charge as a result of the loss of a grace period

(§ 1026.54), and the restriction on fees for over-the-limit transactions to one per billing cycle and the requirement that the consumer opt-in to payment of such transactions in order for the fee to be charged (§ 1026.56).

To the extent that commenters provided substantive comments on specific credit card provisions, they are discussed below.

Ability To Pay (§ 1026.51)

The ability to pay requirement in § 1026.51 requires assessment of the consumer's ability to pay the credit extended, such as covered overdraft credit, based on the consumer's income or assets and the consumer's current obligations.²⁰⁹ It requires reasonable written policies and procedures to consider the consumer's ability to make the required minimum payments under the terms of the account based on a consumer's income or assets and a consumer's current obligations.²¹⁰ Reasonable policies and procedures also include consideration of at least one of the following: The ratio of debt obligations to income; the ratio of debt obligations to assets; or the income the consumer will have after paying debt obligations.²¹¹ It would be unreasonable for a card issuer not to review any information about a consumer's income or assets and current obligations.²¹² With regards to sources of information about a consumer's income or assets, the commentary states that the financial institution may consider information provided by the consumer in connection with the account, provided by the consumer in connection with any other financial relationship the card issuer or its affiliates have with the consumer, obtained through third parties, or obtained through any empirically derived, demonstrably and statistically sound model that reasonably estimates a consumer's income or assets.²¹³ The commentary also states that current or reasonably expected income also includes income that is deposited regularly into an account on which the consumer is an accountholder (e.g., an individual deposit account or joint account).²¹⁴ With regard to sources of information about a consumer's obligations, the commentary states that the financial institution may consider the consumer's current obligations

based on information provided by the consumer or in a consumer report.²¹⁵

Some industry commenters, and an academic commenter, argued that applying the ability to pay provision to hybrid debit-credit cards would result in a pullback of overdraft credit for those consumers who need it the most. On the other hand, a consumer advocate commenter noted that the ability to pay requirement may be too weak and this minimal requirement would not result in consumers being denied overdraft credit.

While the ability to pay requirement provides important protections, this requirement is flexible. It requires the ability to repay the required minimum periodic payments, and does not set mandatory minimum ratios, such as a minimum debt to income ratio.²¹⁶ Furthermore, application of this provision will provide an incentive for financial institutions to structure and price covered overdraft credit such that consumers are better able to repay it, relative to current non-covered overdraft credit. To the extent that a consumer does not have the ability to repay covered overdraft credit, not extending overdraft credit to such a consumer is an important consumer protection because a consumer defaulting on the overdraft credit may mean losing their asset account.

One industry commenter noted that it was impractical to comply with the ability to pay provision for an overdraft credit extension of short duration and small amount. Another industry commenter stated that conducting the ability to pay analysis before each pay/no pay decision is unworkable. These comments appear to misunderstand the ability to pay requirement. This provision does not require an ability to pay analysis at the time of each transaction that may result in an extension of overdraft funds, just as it does not require an ability to pay analysis with each credit card transaction. Nor is the analysis based on the amount of time it actually takes the consumer to repay the transaction. In the credit card context, the ability to pay provision requires the ability to pay analysis to be conducted before the credit card account is opened, and the analysis be based on whether the consumer can make required minimum periodic payments.²¹⁷ As such, the same

²¹⁷ See 12 CFR 1026.51(a)(i) (stating that “[a] card issuer must not open a credit card account for a consumer under an open-end (not home-secured) consumer credit plan . . . unless the card issuer considers the consumer's ability to make the

ability to pay analysis is conducted in the context of the opening of a hybrid debit-credit card, which is in advance of any transaction requiring an extension of overdraft funds.²¹⁸

Several industry commenters noted that it would cost time and money to perform an ability to pay analysis, which may include obtaining a credit report, asking a consumer for information about their income/assets and obligations, and obtaining other information on income and expenses for each customer account. Commenters also stated that there would be a reduction in the consumer's credit score resulting from pulling the consumer's credit report, and that consumers would be confused about being asked for debt and income information by an institution seeking to provide a consumer with covered overdraft credit when the consumer is opening a deposit account. An industry commenter and a consumer advocate commenter stated that a source of income/asset or obligation information may include transaction data from asset or others accounts that a financial institution may already have for the particular consumer. In addition, a nonprofit commenter asked that the CFPB clarify that underwriting based on transactions in asset accounts connected to overdraft lines of credit would satisfy the ability to pay requirement even if the creditor does not specifically identify obligations from the account.

The ability to pay analysis is currently conducted for traditional credit cards. As such, consumers have familiarity with, and very large financial institutions that issue credit cards have policies and procedures to handle, the ability to pay process. The fact that asset account consumers may now go through the ability to pay process may underline for consumers that covered overdraft credit is a credit product and encourage comparison with other credit products and an intentional upfront decision whether to obtain overdraft credit. While there are costs associated with conducting an ability to pay analysis where a very large financial institution has not had to conduct such analysis, as some commenters noted, the ability to pay provision does not require the use of a credit report or the consumer as sources of information regarding income, assets, or obligations. The commentary lists sources of information that the financial institution may use

but does not indicate that permissible sources are limited to those listed.²¹⁹ For example, for income or asset information, comment 51(a)(1)(i)–4(ii) contemplates consideration of income that is being deposited regularly into an account on which the consumer is an account holder (e.g., an individual deposit account or joint account). However, with any source of income, asset, or obligation information, Regulation Z requires that the financial institution have reasonable written policies and procedures in place to consider the consumer's ability to pay.²²⁰ As such, the source of information must be reasonable.

If the consumer's asset account reflects the consumer's income and expenses, such an asset account, alone, may be a reasonable source of information about the consumer's income, assets, and obligations for the purpose of analyzing the consumer's ability to make the required minimum payments under the terms of the hybrid debit-credit card. In this circumstance, a financial institution would not have to obtain a credit report or ask the consumer for this information. To comply with the ability to pay requirements, a financial institution could use this kind of transaction data from the accounts it maintains on behalf of the consumer, and/or it could use transaction data provided by a different financial institution if the consumer authorized its transmittal using the rights recently finalized in the Personal Financial Data Rights Rule.²²¹ The ability to pay provision requires that the financial institution use this transaction data to consider the ratio of debt obligations to income, the ratio of debt obligations to assets, or the income the consumer will have after paying debt obligations.²²²

Limitation on Fees During First Year After Account Opening (§ 1026.52(a))

Section 1026.52(a) limits the amount of certain fees, such as overdraft fees, that an issuer can charge during the first year after opening of a credit account, such as a covered overdraft credit account, to 25 percent of the credit limit. This restriction does not apply to charges assessed as periodic rates. An account is considered open no earlier than the date on which the account may first be used by the consumer to engage in transactions.

One industry commenter opposed application of this provision, stating that this provision was meant for low-limit high-fee credit cards and not for overdraft credit. This commenter along with an academic commenter stated that application to overdraft credit would make it difficult for financial institutions to offer overdraft credit to consumers who would not qualify for a high credit limit. A consumer advocate commenter wrote in support of applying this provision, noting that application of this provision would prevent high fees from consuming a large portion of the credit line and would likely result in financial institutions moving costs into the interest rate and hence the disclosed APR. This commenter asked for clarification that this provision applies to asset accounts that are more than one year old at the time of the effective date. It also asked that the CFPB extend the limitation to beyond one year for hybrid debit-credit cards.

Regulation Z applies the first-year-fee limitation to all credit cards out of a concern that the practice of charging fees that are more than 25 percent of the credit limit would spread beyond subprime cards.²²³ To be consistent with other credit cards, the final rule also applies this limitation to hybrid debit-credit cards.

With respect to concerns about credit availability for consumers who do not qualify for a high credit limit, the first-year-fee limitation may provide an incentive for financial institutions to reduce or eliminate flat fees for overdraft and to instead apply periodic rates that must be disclosed as APRs. Doing so may improve consumers' ability to understand the price of the overdraft credit, and to compare it to the pricing of other forms of credit that the consumers might wish to consider.

With regard to when to start measuring the one year, the fee limitation applies starting no earlier than the date on which a *credit* card

required minimum periodic payments" (emphasis added)).

²¹⁸ The ability to pay analysis is also required prior to a credit line increase. See 12 CFR 1026.51(a)(i).

²¹⁹ See Regulation Z comments 51(a)(1)(i)–5 and –7.

²²⁰ See 12 CFR 1026.51(a)(1)(ii).

²²¹ See 89 FR 90838 (Nov. 18, 2024).

²²² *Id.*

²²³ See Board's Regulation Z final rule implementing the CARD Act, 75 FR 7658, 7724–25 (Feb. 22, 2010) discussing this particular provision, stating "However, while new TILA Section 127(n) is titled 'Standards Applicable to Initial Issuance of Subprime or 'Fee Harvester' Cards,' nothing in the statutory text limits its application to a particular type of credit card. Instead . . . it appears that Congress intended Section 127(n) to apply to a broad range of fees regardless of the type of credit card account. Although the practice of charging fees that represent a high percentage of the credit limit is generally limited to subprime cards at present, it appears that Congress intended Section 127(n) to prevent this practice from spreading to other types of credit card products. Accordingly, although the Board understands that complying with Section 127(n) may impose a significant burden on card issuers, the Board does not believe that this burden warrants a different interpretation of Section 127(n)."

account may first be used by a consumer to engage in transactions.²²⁴ The date on which an *asset* account is opened is not relevant to the determination of when a tied credit account may first be used by the consumer to engage in transactions. For asset accounts with debit cards in existence prior to the effective date of this final rule that include non-covered overdraft credit (but not covered overdraft credit), the one year period starts no earlier than when that debit card becomes a hybrid debit-credit card for the consumer. The debit card becomes a hybrid debit-credit card when the consumer may first engage in a transaction that accesses a tied covered overdraft credit account.

For example, assume that prior to the effective date of the CFPB's rule, a very large financial institution provides non-covered overdraft credit that is considered above breakeven debit card overdraft credit. Assume further that the institution seeks to continue to provide the consumer above breakeven overdraft credit via the card subsequent to the effective date. Because such debit card will legally be a hybrid debit-credit card on the effective date of this rule, to charge above breakeven overdraft fees beyond that date, the institution must comply with the Regulation Z credit card requirements, including the fee limitation requirement for one year from the date of credit card account opening. However, if prior to the effective date of the CFPB's rule a very large financial institution is providing a covered overdraft credit account—*i.e.*, an overdraft line of credit—accessible by a credit card, such institution would not be required to comply with the credit account opening requirements (*e.g.*, account opening disclosures, the ability to pay requirement, and the limitation on fees during the first year after account opening) solely because this rule goes into effect, as discussed in the Effective Date section below. Nonetheless, the institution must comply with ongoing credit account requirements (*e.g.*, the requirements that the ability to pay analysis be conducted prior to a credit line increase, that the payment due date be the same each month, that disclosures be delivered 21 days before due date, and that card agreements be submitted to the CFPB on a quarterly basis).

The CFPB does not currently see a reason to introduce inconsistency into the credit card provisions by applying this limitation on fees beyond one year from credit card account opening for hybrid debit-credit cards.

Limitations on Penalty Fees (§ 1026.52(b))

Section 1026.52(b) regulates the imposition of penalty fees on a credit card account under an open-end (not home-secured) consumer credit plan. TILA refers to a “penalty fee” as a fee imposed “in connection with any omission with respect to, or violation of, the cardholder agreement,” and it permits only a penalty fee that is “reasonable and proportional to the amount of such omission or violation.”²²⁵ Consistent with this statutory language, Regulation Z defines a “penalty fee” as “any charge imposed by a card issuer based on an act or omission that violates the terms of the account or any other requirements imposed by the card issuer with respect to the account, other than charges attributable to periodic interest rates.”²²⁶ Section 1026.52(b)(1) permits a card issuer to impose a penalty fee as long as that fee represents a “reasonable proportion of the total costs incurred by the card issuer as a result of that type of violation” or complies with dollar amounts specified in a safe harbor provision.²²⁷ Section 1026.52(b)(2), meanwhile, prohibits a penalty fee that exceeds the dollar amount associated with the violation or where there is no dollar amount associated with the violation.²²⁸ In particular, § 1026.52(b)(2)(i)(B)(1) prohibits any fee charged in connection with a credit card account for a “transaction that a card issuer declines to authorize.” As a result of this overdraft rule, the CARD Act's penalty fee provision will prohibit fees for declined transactions when a very large financial institution provides a covered overdraft credit account that is accessible by a hybrid debit-credit card or other credit card—*i.e.*, a credit card account.

When applied to a covered overdraft credit account accessed by a hybrid debit-credit card, § 1026.52(b)(2)(B)(1) would prohibit most declined transaction fees imposed with respect to a declined transaction that, if paid, would have overdrawn a particular consumer's asset account. When covered overdraft credit is accessible by a hybrid debit-credit card, the CFPB has determined that a fee imposed when a potentially overdrafting transaction is declined, such as a nonsufficient funds (NSF) fee, is a penalty fee.

Thus, for a covered overdraft account accessed by a hybrid debit-credit card, 15 U.S.C. 1665d(a) and § 1026.52(b) would prohibit any fee for a potentially overdrawing transaction that the card issuer declines to authorize. This would include declined debit card transactions as well as declined ACH or other transactions. However, as explained in comment 52(b)(2)(i)–4, the prohibition on fees for transactions that a card issuer declines to authorize does not extend to fees imposed for declining a “check that can access a credit card account.”²²⁹ The CFPB has determined that applying § 1026.52(b) to a covered overdraft account accessed by a hybrid debit-credit card similarly would permit fees imposed when a card issuer declines a check on an asset account with an attached covered overdraft credit account as long as those fees satisfy the restrictions in § 1026.52(b)(1).

With respect to declined transactions other than declined check transactions, the CFPB has determined that the Board's rationale in adopting § 1026.52(b)(2) continues to apply. That is, it appears that there is no dollar amount associated with a declined transaction and the imposition of the fee does not appear to be related to costs incurred by the card issuer. The CFPB recognizes that it may be possible that such fees could have a deterrent effect or could affect that consumer's conduct in certain limited situations. However, there does not appear to be any need for the financial institution to attempt to deter or influence the consumer's conduct in this situation, particularly in light of minimal costs and risks to the card issuer. With respect to costs, because the mechanism for authorizing or declining a transaction is generally automated, the CFPB understands that declining transactions imposes very minimal or no costs, which would not support imposing a penalty fee. The CFPB understands this to be the case across several payment channels, including for payments initiated via debit card, payments occurring on an ACH network, and other online payments. To the extent there are certain minimal costs associated with automated authorization and declination of transactions generally, card issuers can consider whether other sources of revenue might allow them to recoup those costs.

The CFPB notes that these considerations may apply equally to declined checks. Nonetheless, the CFPB is not at this time reconsidering the Board's prior decision to permit some amount of a fee in connection with

²²⁴ See 12 CFR 1026.52(a)(1).

²²⁷ 12 CFR 1026.52(b)(1)(i)–(ii).

²²⁸ Section 1026.52(b)(2) also bans the imposition of multiple fees for the same violation. 12 CFR 1026.52(b)(2)(ii).

²²⁹ Regulation Z comment 52(b)(2)(i)–4.

declining to pay a check that accesses a credit card account. This rule applies the same approach to checks issued in connection with a covered asset account tied to a covered overdraft credit account accessible by a hybrid debit-credit card.

Only one commenter provided comment on this provision, and did so in support of its application to a covered overdraft credit account accessed by a hybrid debit-credit card. After considering the comments and the factors in 15 U.S.C. 1665d(c), the CFPB is not amending § 1026.52(b) and is finalizing the rule to apply § 1026.52(b) to covered overdraft credit accounts accessed by hybrid debit-credit cards.

Submission of Card Agreements (§ 1026.58)

Section 1026.58 requires financial institutions to submit credit card agreements to the CFPB on a quarterly basis. An industry commenter questioned whether including covered overdraft credit account agreements in a credit card account agreement database would create more confusion than value. On the other hand, a consumer advocate commenter stated that collecting the agreements and making them public would promote transparency and a better understanding of the hybrid debit-credit card market. For consistency with other credit cards and for transparency to the benefit of consumers, the CFPB has determined to apply this provision to covered overdraft credit accounts accessible by hybrid debit-credit cards.

Disclosure-Related Requirements

The CARD Act also applies special rules to disclosure-related requirements in subpart B and subpart G with respect to covered overdraft credit accounts accessed by a hybrid debit-credit card. These provisions include disclosure requirements for account opening disclosures (§ 1026.6(b)), periodic statements (§ 1026.7(b)), and timing for disclosures (§ 1026.5(b)).

One industry commenter suggested that the CFPB consider whether all credit card-specific disclosure requirements are appropriate for overdraft lines of credit or whether exceptions or modifications are appropriate. Another industry commenter said that calculating the APR for each overdraft fee would be impractical for an overdraft fee of short duration and small amount, apparently inaccurately assuming that, under Regulation Z, the APR for open-end credit includes charges other than the periodic rate. A consumer advocate commenter supported application of the

solicitation and application disclosure requirements to hybrid debit-credit cards to promote meaningful and uniform disclosure of credit terms.

The CFPB has determined that Regulation Z and its commentary provide sufficient flexibility and instructions for a financial institution to meet the disclosure requirements in a manner appropriate for the particular credit card product the institution is offering. Regulation Z subpart B and subpart G, the related commentary, and the appendix G model and sample disclosures provide extensive instructions and guidance on the disclosure requirements. As such, modifications or exceptions to the disclosure requirements for hybrid debit-credit cards and additional guidance for complying with the requirements are not necessary. Consistency in the credit card disclosure requirements, including the APR and fee disclosures, will assist consumers in comparing the cost of various credit cards and various credit products.

Section 1026.7(b)(11) requires that the payment due date be the same day of the month for each billing cycle. As such the interval between due dates can be no shorter than monthly. In addition, § 1026.5(b)(2)(ii) requires that periodic statements be mailed or delivered at least 21 days prior to the payment due date disclosed on the periodic statement. One industry commenter noted that application of these requirements and the offset prohibition increase the credit risk to financial institutions of offering overdraft credit. Another industry commenter suggested that payments for small dollar lines of credit be permitted to be scheduled bi-weekly or semi-monthly and for the repayment period to be less than 21 days after a statement is delivered or mailed. On the other hand, a consumer advocate commenter supported application of the existing repayment requirement at 21 days and same-day due date each month (as well as the offset prohibition) because it would give consumers a reasonable time period to pay their hybrid debit-credit card and give the consumers certainty on their payment due date for budgeting purposes.

The CFPB has determined that a special exception to the credit card timing requirements for billing cycles, periodic statements, and due dates is not warranted for covered overdraft credit accounts accessed by hybrid debit-credit cards. Hybrid debit-credit card consumers should have these same consumer protections as other credit card consumers.

ii. Special Credit Card Provisions (§ 1026.12)

Existing § 1026.12 contains special rules applicable to credit cards and credit card accounts, including rules regarding the conditions under which a credit card may be issued, the liability of cardholders for unauthorized use, cardholder rights to assert against the card issuer claims and defenses that the cardholder has against the merchant, and the prohibition on offsets by issuers. Existing § 1026.12(a) and (b) are exceptions to the general rule that Regulation Z applies only to consumer credit. The CFPB did not propose to change the regulatory text of existing § 1026.12.

However, the CFPB proposed to revise comment 12–1 on the scope of § 1026.12 to clarify that the provisions of § 1026.12 relating to card issuance and liability apply to hybrid debit-credit cards. Specifically, the CFPB proposed to add a sentence to comment 12–1 clarifying that paragraphs (a) through (f) of § 1026.12 apply to hybrid debit-credit cards notwithstanding paragraph (g) of § 1026.12. Paragraph (g) addresses whether Regulation Z or Regulation E controls in instances where a transaction involves both credit and electronic fund transfer aspects.

The CFPB received few comments on the proposed changes to § 1026.12 and its commentary and no comments indicating a need to adjust the proposed language in comment 12–1. A consumer advocate commenter supported the revised comment, stating that the attendant protections are equally important for consumers who use overdraft credit on hybrid debit-credit cards. Therefore, for the reasons discussed in the proposal and above, the CFPB is finalizing comment 12–1 as proposed but with the addition of a cite to the definition of hybrid debit-credit cards, for convenience. Proposed changes to additional guidance on unsolicited issuance in § 1026.12(a) and the right of a cardholder to assert claims or defenses against a card issuer in § 1026.12(c) are discussed below.

iii. Clarification to Issuance of Credit Cards (§ 1026.12(a))

TILA section 132 generally prohibits creditors from issuing credit cards except in response to a request or an application. TILA section 132 explicitly exempts credit cards issued as renewals of or substitutes for previously accepted credit cards from this prohibition.²³⁰ Section 1026.12(a) of Regulation Z implements TILA section 132 and

²³⁰ 15 U.S.C. 1642.
