FEDERAL REGISTER

Vol. 90 Tuesday,

No. 225 November 25, 2025

Pages 53195–54224

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 90 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 90, No. 225
Tuesday, November 25, 2025

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2025–0624; Project Identifier MCAI–2024–00628–T; Amendment 39–23148; AD 2025–19–08]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Airbus SAS Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes; Model A320–211, –212, –214, –216, –231, –232, and –233 airplanes; and Model A321–211, –212, –213, –231, and –232 airplanes. This AD was prompted by a report that cracks were found following fatigue tests for the new lower wing cover material on airplanes equipped with sharklets. This AD requires repetitive inspections for discrepancies and corrective action. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 30, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 30, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–0624; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- For European Union Aviation Safety Agency (EASA) material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2025–0624.

FOR FURTHER INFORMATION CONTACT: Tim Dowling, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3667; email: *timothy.p.dowling@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Airbus SAS Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes; Model A320–211, –212, –214, –216, –231, –232, and –233 airplanes; and Model A321–211, –212, –213, –231, and –232 airplanes. The NPRM was published in the **Federal Register** on April 16, 2025 (90 FR 15942). The NPRM was prompted by AD 2024–0201R1, dated December 2, 2024 (EASA AD 2024–0201R1) (also referred to as the MCAI), issued by EASA, which is the Technical Agent for the Member States of the European Union. The MCAI states that cracks were found following fatigue tests for the new lower wing cover material on airplanes equipped with sharklets. This condition, if not detected and corrected, could reduce the structural integrity of the outer wing.

In the NPRM, the FAA proposed to require repetitive inspections for discrepancies and corrective action, as specified in EASA AD 2024–0201R1. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2025–0624.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from an individual who supported the NPRM and had an additional comment.

The FAA received additional comments from Delta Air Lines (Delta). The following presents the comments received on the NPRM and the FAA's response.

Request To Require Inspectors From Different Institutions

An individual suggested that the people doing the inspections specified in the proposed AD be from different institutions, *e.g.,* Boeing, the FAA, the Civil Aviation Authority (CAA), and the aviation company using the airplane. The commenter suggested the team would have to work together to make sure the airplane was safe and agree on the safety issue before the airplane would be allowed to fly.

The FAA agrees to clarify. FAA regulations (14 CFR 43.3) stipulate who can perform maintenance on or alter an airplane on the U.S. registry, including inspections required by an AD. AD actions must be performed by people holding certain certificates or having specialized training that provides them the knowledge necessary to properly inspect and repair airplanes. In addition, FAA regulations (14 CFR 43.7) stipulate who is authorized to approve an airplane for return to service after maintenance, preventive maintenance, rebuilding, or alteration, including inspections required by an AD. No change to this AD is necessary.

Request To Revise the Reporting Requirement

Delta requested that the FAA revise paragraph (h)(4) of the proposed AD to not require an inspection report if no discrepancy is found, or if any discrepancy is found and Airbus SAS's EASA Design Organization Approval (DOA) is contacted for repair instructions. Delta noted that the service information referenced in EASA AD 2024–0201R1 specifies to contact Airbus if there are any findings. Delta also noted that the provisions of paragraph (h)(5) of the proposed AD would allow for approval of repair instructions for any discrepancies (*i.e.,* approved repair instructions) by the FAA, EASA, or Airbus SAS's EASA DOA, and that this

option allows operators to seek the FAA's approval of repair instructions in lieu of only Airbus. Delta stated there is no need to report damage to Airbus on a specific report form if Airbus is contacted for repair instructions because the data is required to be provided to Airbus for approval of the repair instructions. Delta also stated that Airbus should know that if no repair is requested, then either no damage was found or the operator obtained approval from the FAA and should report the inspection findings to Airbus.

The FAA agrees it is unnecessary to submit an inspection report if no discrepancies are found, and that reporting inspection results to Airbus would also be unnecessary regardless of whether Airbus SAS's EASA DOA, the FAA, or EASA was contacted for repair instructions. The FAA has re-evaluated the proposed reporting requirement and determined this AD does not need to require submitting a report for all inspection results, which would include reporting any and no findings. The FAA has revised the AD to remove the proposed paragraph (h)(4) and references to the reporting requirement in the preamble and cost estimate.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, and any other changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2024–0201R1, which specifies procedures for repetitive special detailed inspections (SDIs) for discrepancies (cracking) of the bottom wing surface area between rib 19 and rib 21, forward of stringer 8, both left-hand (LH) and right-hand (RH) sides, and, depending on findings, accomplishment of applicable corrective action (contacting Airbus for repair instructions). This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 1,924 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
6 work-hours × $85 per hour = $510	None	$510	$981,240

The FAA has received no definitive data on which to base the cost estimates for the on-condition repairs specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2025–19–08 Airbus SAS: Amendment 39–23148; Docket No. FAA–2025–0624; Project Identifier MCAI–2024–00628–T.

(a) Effective Date

This airworthiness directive (AD) is effective December 30, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Airbus SAS Model airplanes, certificated in any category, as identified in paragraphs (c)(1) through (3) of this AD.

(1) Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes.

(2) Model A320–211, –212, –214, –216, –231, –232, and –233 airplanes.

(3) Model A321–211, –212, –213, –231, and –232 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Unsafe Condition

This AD was prompted by a report that cracks were found following fatigue tests for the new lower wing cover material on

airplanes equipped with sharklets. The FAA is issuing this AD to address cracking in the lower wing cover material. The unsafe condition, if not addressed, could reduce the structural integrity of the outer wing.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2024–0201R1, dated December 2, 2024 (EASA AD 2024–0201R1).

(h) Exceptions to EASA AD 2024–0201R1

(1) Where EASA AD 2024–0201R1 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where EASA AD 2024–0201R1 refers to ''04 November 2024 [the effective date of the original issue of this AD],'' this AD requires using the effective date of this AD.

(3) This AD does not adopt the ''Remarks'' section of EASA AD 2024–0201R1.

(4) Where paragraph (3) of EASA AD 2024–0201R1 specifies if ''discrepancies are detected, as identified in the AOT, before next flight, contact Airbus for approved repair instructions and, within the compliance time(s) specified therein, accomplish those instructions accordingly'', this AD requires replacing that text with ''any discrepancy is detected, as identified in the AOT, the discrepancy must be repaired before further flight using a method approved by the Manager, AIR–520, Continued Operational Safety Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature''.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (j) of this AD and email to: *AMOC@faa.gov*. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, AIR–520, Continued Operational Safety Branch, FAA; or EASA; or Airbus SAS's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (i)(2) of this AD, if any material referenced in EASA AD 2024–0201R1 contains paragraphs that are labeled as RC, the instructions in RC paragraphs, including subparagraphs under an RC paragraph, must be done to comply with this AD; any paragraphs, including subparagraphs under those paragraphs, that are not identified as RC are recommended. The instructions in paragraphs, including subparagraphs under those paragraphs, not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the instructions identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to instructions identified as RC require approval of an AMOC.

(j) Additional Information

For more information about this AD, contact Tim Dowling, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3667; email: *timothy.p.dowling@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2024–0201R1, dated December 2, 2024.

(ii) [Reserved]

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on September 24, 2025.

Lona C. Saccomando,

Acting Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2025–0215; Project Identifier MCAI–2024–00347–T; Amendment 39–23161; AD 2025–20–08]

RIN 2120–AA64

Airworthiness Directives; Airbus Canada Limited Partnership (Type Certificate Previously Held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Airbus Canada Limited Partnership Model BD–500–1A10 and BD–500–1A11 airplanes. This AD was prompted by events where the cargo bottle fail caution message was displayed. This AD requires replacing affected low rate discharge (LRD) bottles, inspecting extinguishing discharge lines and tubes, and replacing extinguishing discharge lines and tubes, as applicable, and also prohibits the installation of affected LRD bottles. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 30, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publications listed in this AD as of December 30, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–0215; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

• For Transport Canada material identified in this AD, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca.* You may find this material on the

Transport Canada website at *tc.canada.ca/en/aviation.*

FOR FURTHER INFORMATION CONTACT: Fatin Saumik, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Airbus Canada Limited Partnership Model BD–500–1A10 and BD–500–1A11 airplanes. The NPRM was published in the **Federal Register** on March 3, 2025 (90 FR 11033). The NPRM was prompted by AD CF–2024–23, dated June 18, 2024 (Transport Canada AD CF–2024–23) (also referred to as the MCAI), issued by Transport Canada, which is the aviation authority for Canada. The MCAI states there were events where the cargo bottle fail caution message was displayed during flight resulting in diversions. Investigations found the LRD bottle was depleted of extinguishing agent. Further investigation revealed the LRD bottle metering device could be loose allowing extinguishing agent to escape resulting in loss or degraded capability of the cargo extinguishing system.

In the NPRM, the FAA proposed to require replacing affected LRD bottles, inspecting extinguishing discharge lines and tubes, and replacing extinguishing discharge lines and tubes, as applicable, and to prohibit the installation of affected LRD bottles, as specified in Transport Canada AD CF–2024–23. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2025–0215.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from Air Line Pilots Association, International (ALPA) who supported the NPRM without change.

The FAA received one additional comment from Delta Air Lines. The following presents the comment received on the NPRM and the FAA's response to each comment.

Request for Exception

Delta Air Lines requested an additional exception be added to the proposed AD to correct a typographical error from ''LDR'' to ''LRD'' in Transport Canada AD CF–2024–23, Part I, paragraph B.

The FAA agrees with this request and added paragraph (h)(4) of this AD accordingly.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, and any other changes described previously, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed Transport Canada AD CF–2024–23 which specifies procedures for verifying aircraft technical records to determine if an affected part (any LRD bottle having part number 475086–1, 475124–1 or 475087–1 with certain serial numbers, unless the LRD bottle is marked with an encircled 'C' on the LRD bottle label) is installed on the airplane, replacing affected LRD bottles, and replacing extinguishing discharge lines and tubes, as applicable. Transport Canada AD CF–2024–23 also prohibits the installation of affected parts. The detailed visual inspections of the discharge lines and tubes, in multiple compartments, include checking discharge heads and distribution tubes for signs of residue and corrosion. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates this AD affects 74 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
16 work-hours × $85 per hour = $1,360	$0	$1,360	$100,640

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
10 work-hours × $85 per hour = $850	Up to $17,368	Up to $18,218.

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA

with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2025–20–08 Airbus Canada Limited Partnership (Type Certificate Previously Held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.): Amendment 39–23161; Docket No. FAA–2025–0215; Project Identifier MCAI–2024–00347–T.

(a) Effective Date

This airworthiness directive (AD) is effective December 30, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Airbus Canada Limited Partnership (Type Certificate previously held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.) Model BD–500–1A10 and BD–500–1A11 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 26, Fire protection.

(e) Unsafe Condition

This AD was prompted by events where the cargo bottle fail caution message was displayed due to the depletion of extinguishing agent from the low rate discharge bottle. The FAA is issuing this AD to address the unsafe condition, which if not addressed, could result in loss or degraded capability of the cargo extinguishing system.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraphs (h), (i) and (j) of this AD: Comply with all required actions and compliance times specified in, and in accordance with Transport Canada AD CF–2024–23, dated June 18, 2024 (Transport Canada AD CF–2024–23).

(h) Exception to Transport Canada AD CF–2024–23

(1) Where Transport Canada AD CF–2024–23 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where the definition of ''Affected Part'' in Transport Canada AD CF–2024–23 specifies ''a serial number listed in the Applicability Section of the ACLP SB,'' this AD requires replacing that text with ''a serial number listed in the Applicability Section of SB BD500–262010, Issue 001, dated 30 April 2024.''

(3) Where the paragraph B. of Part 1 in Transport Canada AD CF–2024–23 specifies ''in accordance with the procedure in Section 2 of the Accomplishment Instructions of the ACLP SB,'' this AD requires replacing that text with ''in accordance with the ''Procedure'' section of the Accomplishment Instructions of the ACLP SB.''

(4) Where paragraph B. of Part 1 in Transport Canada AD CF–2024–23 specifies ''the LDR bottles,'' this AD requires replacing that text with ''the LRD bottles.''

(i) No Reporting Requirement

Although the material referenced in Transport Canada AD CF–2024–23 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of AIR–520, Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (k) of this AD and email to: *AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, AIR–520, Continued Operational Safety Branch, FAA; or Transport Canada; or Airbus Canada Limited Partnership's Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraphs (i) and (j)(2) of this AD, if any material contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(k) Additional Information

For more information about this AD, contact Fatin Saumik, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Transport Canada AD CF–2024–23, dated June 18, 2024.

(ii) [Reserved]

(3) For Transport Canada material identified in this AD, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca;* website *tc.canada.ca/en/aviation.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on

the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on September 26, 2025.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2025–0340; Project Identifier MCAI–2024–00462–T; Amendment 39–23158; AD 2025–20–05]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2023–14–09, which applied to certain Airbus SAS Model A350–941 and –1041 airplanes. AD 2023–14–09 required an inspection for missing or incorrectly applied sealant in the wing tanks, applicable corrective actions, and a modification to restore two independent layers of lightning strike protection. Since the FAA issued AD 2023–14–09, Airbus provided inspection instructions for a new inspection area of the upper and lower, front and rear spar corner fittings for certain airplanes. This AD continues to require the actions in AD 2023–14–09, and requires a one-time detailed inspection (DET) for missing or incorrectly applied sealant of the front and rear spars for certain airplanes and applicable corrective actions. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 30, 2025.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of December 30, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–0340; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2023–14–09, Amendment 39–22509 (88 FR 51227, August 3, 2023) (AD 2023–14–09). AD 2023–14–09 applied to certain Airbus SAS Model A350–941 and –1041 airplanes. AD 2023–14–09 required an inspection for missing or incorrectly applied sealant in the wing tanks, applicable corrective actions, and a modification to restore the two independent layers of lightning strike protection. AD 2023–14–09 corresponds to EASA AD 2022–0250, dated December 14, 2022 (EASA AD 2022–0250). The FAA issued AD 2023–14–09 to address missing or incorrect application of the lightning strike edge glow sealant protection at specific locations on the wing tanks. This sealant provides the second layer or protection to prevent stringer edge glow in case of lightning strike.

The NPRM was published in the **Federal Register** on March 11, 2025 (90 FR 11683). The NPRM was prompted by AD 2024–0155, dated August 13, 2024, issued by EASA, which is the Technical Agent for the Member States of the European Union (EASA AD 2024–0155) (also referred to as the MCAI). The MCAI states that since EASA AD 2022–0250 was issued, Airbus published inspection instructions for a new one-time DET for missing or incorrect application of the lightning strike edge glow sealant protection of the affected upper and lower front and rear spar corner fittings between Rib 1 and Rib 2 for certain airplanes (*i.e.,* an additional affected area not identified in EASA AD 2022–0250), and depending on findings, accomplishment of applicable corrective actions. Missing or incorrectly applied sealant, combined with a pre-existing undetected incorrect installation of an adjacent fastener, if not detected and corrected, could create an ignition source for the fuel vapor inside the tanks, which, in case of a lightning strike of high intensity in the immediate area, could possibly result in ignition of the fuel-air mixture in the affected fuel tank and consequent loss of the airplane.

In the NPRM, the FAA proposed to continue to require the actions in AD 2023–14–09 and proposed to require a one-time DET for missing or incorrectly applied sealant of the front and rear spars for certain airplanes and applicable corrective actions, as specified in EASA AD 2024–0155. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2025–0340.

Discussion of Final Airworthiness Directive

Comments

The FAA received comments from the Air Line Pilots Association, International, (ALPA) and ProTech Aero Services Limited (ProTech) who supported the NPRM without change.

The FAA received an additional comment from Delta Air Lines (Delta). The following presents the comment received on the NPRM and the FAA's response to the comment.

Request for Continue Use of Previously Approved Alternative Methods of Compliance (AMOCs)

Delta requested the FAA grant approval to continue using the previously approved AMOC AIR–731–23–00454a, dated November 1, 2023. Delta stated that the FAA had approved the stated AMOC, allowing the omission of pipe tests if the pipes were not removed during access, for AD 2023–14–09. Delta noted this proposed AD retains the requirements of AD 2023–14–09.

The FAA disagrees with the commenter's request. This AD adds additional affected areas for inspection; therefore a new AMOC is required or a revision to AMOC AIR–731–23–00454a, dated November 1, 2023, is required that includes those additional inspection areas. The FAA has not changed the AD in this regard.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2024–0155, which specifies procedures for an inspection for discrepancies (missing or incorrect application of the lightning strike edge glow sealant protection) at certain locations in the wing tanks, and corrective actions. EASA AD 2024–0155 also specifies procedures for sealant application to the lower and/or upper rib feet in the wings and an inspection for missing or incorrectly applied sealant on the upper and lower, front and rear spar corner fittings between Rib 1 and Rib 2 for certain airplanes, and corrective actions. Corrective actions include applying sealant in areas where sealant was found to be missing or incorrectly applied.

The FAA also reviewed Airbus Service Bulletin A350–57–P067, dated September 17, 2020; Airbus Service Bulletin A350–57–P070, Revision 01, dated March 14, 2022; Airbus Service Bulletin A350–57–P072, dated June 24, 2022; Airbus Service Bulletin A350–57–P073, dated June 24, 2022; Airbus Service Bulletin A350–57–P074, dated June 24, 2022; and Airbus Service Bulletin A350–57–P091, dated May 30, 2024; which identify affected airplanes. These documents are distinct since they apply to different airplane configurations.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 36 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Retained actions from AD 2023–14–09	Up to 225 work-hours × $85 per hour = $19,125.	Up to $500	Up to $19,625	Up to $706,500.
New actions	Up to 39 work-hours × $85 per hour = $3,315.	$0	Up to $3,315	Up to $119,340.

The FAA estimates the following costs to do any necessary corrective action that would be required based on the results of any required actions. The FAA has no way of determining the number of aircraft that might need the corrective actions:

ESTIMATED COSTS OF CORRECTIVE ACTIONS

Labor cost	Parts cost	Cost per product
10 work-hours × $85 per hour = $850	Minimal	$850

According to the manufacturer, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators. The FAA does not control warranty coverage for affected operators. As a result, the FAA has included all known costs in the cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2023–14–09, Amendment 39–22509 (88 FR 51227, August 3, 2023); and

■ b. Adding the following new AD:

2025–20–05 Airbus SAS: Amendment 39–23158; Docket No. FAA–2025–0340; Project Identifier MCAI–2024–00462–T.

(a) Effective Date

This airworthiness directive (AD) is effective December 30, 2025.

(b) Affected ADs

This AD replaces AD 2023–14–09, Amendment 39–22509 (88 FR 51227, August 3, 2023) (AD 2023–14–09).

(c) Applicability

This AD applies to Airbus SAS Model A350–941 and –1041 airplanes, certificated in any category, with manufacturer serial numbers (MSN) identified in any service bulletin listed in paragraphs (c)(1) through (6) of this AD.

(1) Airbus Service Bulletin A350–57–P067, dated September 17, 2020.

(2) Airbus Service Bulletin A350–57–P070, Revision 01, dated March 14, 2022.

(3) Airbus Service Bulletin A350–57–P072, dated June 24, 2022.

(4) Airbus Service Bulletin A350–57–P073, dated June 24, 2022.

(5) Airbus Service Bulletin A350–57–P074, dated June 24, 2022.

(6) Airbus Service Bulletin A350–57–P091, dated May 30, 2024.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Unsafe Condition

This AD was prompted by reports of missing or incorrect application of the lightning strike edge glow sealant protection at specific locations on the wing tanks. The FAA is issuing this AD to address missing or incorrectly applied sealant. The unsafe condition, if not addressed, could result in ignition of the fuel-air mixture in the affected fuel tank and consequent loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2024–0155, dated August 13, 2024 (EASA AD 2024–0155).

(h) Exceptions to EASA AD 2024–0155

(1) Where EASA AD 2024–0155 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where paragraph (1) of EASA AD 2024–0155 gives a compliance time of ''the next scheduled maintenance tank entry, or before exceeding 78 months since aeroplane date of manufacture, whichever occurs first after 27 October 2020 [the effective date of EASA AD 2020–0220],'' for this AD, the compliance time is the later of the times specified in paragraphs (h)(2)(i) and (ii) of this AD.

(i) The next scheduled maintenance tank entry, or before exceeding 78 months since airplane date of manufacture, whichever occurs first after September 30, 2021 (the effective date of AD 2021–16–03, Amendment 39–21665 (86 FR 47555, August 26, 2021) (AD 2021–16–03)).

(ii) Within 12 months after September 30, 2021 (the effective date of AD 2021–16–03).

(3) Where paragraph (4) of EASA AD 2024–0155 gives a compliance time of ''the next scheduled maintenance tank entry, or before exceeding 78 months since aeroplane date of manufacture, whichever occurs first after 04 February 2022 [the effective date of EASA AD 2022–0011],'' for this AD, the compliance time is the later of the times specified in paragraphs (h)(3)(i) and (ii) of this AD.

(i) The next scheduled maintenance tank entry, or before exceeding 78 months since airplane date of manufacture, whichever occurs first after November 29, 2022 (the effective date of AD 2022–17–09, Amendment 39–22147 (87 FR 64375, October 25, 2022) (AD 2022–17–09)).

(ii) Within 12 months after November 29, 2022 (the effective date of AD 2022–17–09).

(4) Where paragraph (5) of EASA AD 2024–0155 gives a compliance time of ''the next scheduled maintenance tank entry, or before exceeding 78 months since aeroplane date of manufacture, whichever occurs first after 28 December 2022 [the effective date of EASA AD 2022–0250],'' for this AD, the compliance time is the later of the times specified in paragraphs (h)(4)(i) and (ii) of this AD.

(i) The next scheduled maintenance tank entry, or before exceeding 78 months since airplane date of manufacture, whichever occurs first after September 7, 2023 (the effective date of AD 2023–14–09).

(ii) Within 12 months after September 7, 2023 (the effective date of AD 2023–14–09).

(5) Where paragraph (2) of EASA AD 2024–0155 gives a compliance time of ''the next scheduled maintenance tank entry, or before exceeding 78 months after the effective date of this [EASA] AD,'' for this AD, the compliance time is the later of the times specified in paragraphs (h)(5)(i) and (ii) of this AD.

(i) The next scheduled maintenance tank entry, or before exceeding 78 months after the effective date of this AD, whichever occurs first.

(ii) Within 2 months after the effective date of this AD.

(6) Where paragraph (3) of EASA AD 2024–0155 refers to ''discrepancies,'' for this AD, discrepancies include missing or incorrectly applied sealant.

(7) This AD does not adopt the ''Remarks'' section of EASA AD 2024–0155.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (j) of this AD and email to: *AMOC@faa.gov*.

(i) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, AIR–520, Continued Operational Safety Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (i)(2) of this AD, if any material contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(j) Additional Information

For more information about this AD, contact Promita Dey, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone 316–946–4106; email *promita.dey@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Airbus Service Bulletin A350–57–P067, dated September 17, 2020.

(ii) Airbus Service Bulletin A350–57–P070, Revision 01, dated March 14, 2022.

(iii) Airbus Service Bulletin A350–57–P072, dated June 24, 2022.

(iv) Airbus Service Bulletin A350–57–P073, dated June 24, 2022.

(v) Airbus Service Bulletin A350–57–P074, dated June 24, 2022.

(vi) Airbus Service Bulletin A350–57–P091, dated May 30, 2024.

(vii) European Union Aviation Safety Agency (EASA) AD 2024–0155, dated August 13, 2024.

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*

(4) For Airbus material identified in this AD, contact Airbus SAS, Airworthiness Office—EAL, Rond-Point Emile Dewoitine No: 2, 31700 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email *continued-airworthiness.a350@airbus.com;* website *airbus.com.*

(5) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(6) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations,* or email *fr.inspection@nara.gov.*

Issued on September 24, 2025.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

[FR Doc. 2025–20910 Filed 11–24–25; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2025–3423; Project Identifier MCAI–2025–00811–T; Amendment 39–23162; AD 2025–20–09]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2022–22–09, which applied to certain Airbus SAS Model A350–1041 airplanes. AD 2022–22–09 required replacing affected hydro-mechanical units (HMUs) with serviceable HMUs before reaching a reduced life limit and limited the installation of affected parts under certain conditions. Since the FAA issued AD 2022–22–09, an improved HMU was developed and embodied in production. This AD continues to require the actions in AD 2022–22–09. This AD also requires replacing affected HMUs with improved HMUs and prohibits the installation of affected parts under certain conditions and on certain airplanes. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 10, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 10, 2025.

The FAA must receive comments on this AD by January 9, 2026.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail*: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–3423; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2025–3423.

FOR FURTHER INFORMATION CONTACT: Kathryn Hill, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3626; email: *kathryn.a.hill@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written data, views, or arguments about this final rule. Send your comments using a method listed under the **ADDRESSES** section. Include ''Docket No. FAA–2025–3423; Project Identifier MCAI–2025–00811–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the final rule, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this final rule.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Kathryn Hill, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3626; email: *kathryn.a.hill@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2022–22–09, Amendment 39–22224 (87 FR 72377, November 25, 2022) (AD 2022–22–09), for Airbus SAS Model A350–1041 airplanes equipped with Rolls-Royce Trent XWB–97 engines. AD 2022–22–09 was prompted by an MCAI originated by EASA, which is the Technical Agent for the Member States of the European Union. EASA issued AD 2022–0040, dated March 8, 2022 (EASA AD 2022–0040), to correct an unsafe condition. AD 2022–22–09 was prompted by reports of rejected takeoffs after transient engine N1 shaft speed exceedance, which was found to be the result of piston wear, causing the combining spill valve (CSV) piston of the engine HMU to close slowly. EASA AD 2022–0040 stated investigations revealed that the CSV of the engine HMU was slow to close due to piston wear. A worn CSV piston does not move fully and freely over its operating range, and, when it moves to fully closed position, an excess of fuel is sent to the fuel nozzles which eventually results in an N1 transient shaft overspeed.

AD 2022–22–09 required replacing certain HMUs with serviceable HMUs before reaching a reduced life limit. The FAA issued AD 2022–22–09 to address a stuck CSV piston of the engine HMUs, which could significantly reduce engine thrust, and if combined with a loss of the second engine, could possibly result in reduced control of the airplane.

Actions Since AD 2022–22–09 Was Issued

The preamble to AD 2022–22–09 specifies that the FAA considers that AD ''interim action'' and that the FAA might consider further rulemaking if a final action is identified. Since the FAA issued AD 2022–22–09, EASA superseded AD 2022–0040 with EASA AD 2025–0100, dated April 30, 2025 (EASA AD 2025–0100) (also referred to as the MCAI), to correct an unsafe condition for Airbus SAS Model A350–1041 airplanes equipped with Rolls-Royce Trent XWB–97 engines. The MCAI states, since issuance of EASA AD 2022–0040, an improved HMU has been developed and embodied in production through Airbus modification 120423. In addition, Rolls-Royce published Rolls-Royce Modification Service Bulletin TRENT XWB 73–L044 to provide instructions for replacement of an affected HMU with an improved HMU, as a terminating action for replacement of the life-limited affected parts. The FAA has now determined that further rulemaking is necessary, and this AD follows from that determination.

The FAA is issuing this AD to address the unsafe condition on these products. You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2025–3423.

Explanation of Retained Requirements

Although this AD does not explicitly restate the requirements of AD 2022–22–09, this AD retains all of the requirements of AD 2022–22–09. Those requirements are referenced in EASA AD 2025–0100, which, in turn, is referenced in paragraph (g) of this AD.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2025–0100, which specifies procedures for replacing an HMU having part number (P/N) G5020HMU02 with either a serviceable HMU, or an improved HMU having P/N G5020HMU03, or any later approved part number. EASA AD 2025–0100 also prohibits the installation of an affected HMU after it is replaced with an improved HMU.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this AD after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Requirements of This AD

This AD retains all requirements of AD 2022–22–09. This AD requires accomplishing the actions specified in EASA AD 2025–0100 described previously, except for any differences identified as exceptions in the regulatory text of this AD. This AD also prohibits the installation of affected parts under certain conditions.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, EASA AD 2025–0100 is incorporated by reference in this AD. This AD requires compliance with EASA AD 2025–0100 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this AD. Using common terms that are the same as the heading of a particular section in EASA AD 2025–0100 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2025–0100. Material required by EASA AD 2025–0100 for compliance will be available at *regulations.gov* under Docket No. FAA–2025–3423 after this AD is published.

Justification for Immediate Adoption and Determination of the Effective Date

Section 553(b) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for ''good cause,'' finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under this section, an agency, upon finding good cause, may issue a final rule without providing notice and seeking comment prior to issuance. Further, section 553(d) of the APA authorizes agencies to make rules effective in less than thirty days, upon a finding of good cause.

There are currently no domestic operators of these products. Accordingly, notice and opportunity for prior public comment are unnecessary, pursuant to 5 U.S.C. 553(b). In addition, for the foregoing reason(s), the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days.

Regulatory Flexibility Act (RFA)

The requirements of the RFA do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it has good cause to adopt this rule without notice and comment, RFA analysis is not required.

Costs of Compliance

Currently, there are no affected U.S.-registered airplanes. If an affected airplane is imported and placed on the U.S. Register in the future, the FAA

provides the following cost estimates to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product
Retained actions from AD 2022–22–09	Up to 7 work-hours × $85 per hour = $595	*$0	$595
New actions	Up to 2 work-hours × $85 per hour = $170	*0	170

*The FAA has received no definitive data on which to base the cost estimates for the parts specified in this AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–22–09, Amendment 39–22224 (87 FR 72377, November 25, 2022); and

■ b. Adding the following new AD:

2025–20–09 Airbus SAS: Amendment 39–23162; Docket No. FAA–2025–3423; Project Identifier MCAI–2025–00811–T.

(a) Effective Date

This airworthiness directive (AD) is effective December 10, 2025.

(b) Affected ADs

This AD replaces AD 2022–22–09, Amendment 39–22224 (87 FR 72377, November 25, 2022) (AD 2022–22–09).

(c) Applicability

This AD applies to Airbus SAS Model A350–1041 airplanes, certificated in any category, as identified in European Union Aviation Safety Agency (EASA) AD 2025–0100, dated April 30, 2025 (EASA AD 2025–0100).

(d) Subject

Air Transport Association (ATA) of America Code 73, Engine Fuel and Control.

(e) Unsafe Condition

This AD was prompted by reports of rejected takeoffs after transient engine N1 shaft speed exceedance. The FAA is issuing this AD to address a stuck combining spill valve piston of the engine hydro-mechanical units, which could significantly reduce engine thrust, and if combined with a loss of the second engine, could possibly result in reduced control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2025–0100.

(h) Exceptions to EASA AD 2025–0100

(1) Where EASA AD 2025–0100 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where paragraph (3) of EASA AD 2025–0100 refers to March 15, 2022 (the effective date of EASA AD 2022–0040, dated March 8, 2022), this AD requires using December 30, 2022 (the effective date of FAA AD 2022–22–09).

(3) This AD does not adopt the ''Remarks'' section of EASA AD 2025–0100.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (j) of this AD and email to: *AMOC@faa.gov*.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, AIR–520, Continued Operational Safety, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (i)(2) of this AD, if any material referenced in EASA AD 2025–0100 that contains paragraphs that are labeled as RC, the instructions in RC paragraphs, including subparagraphs under an RC paragraph, must be done to comply with this AD; any paragraphs, including subparagraphs under those paragraphs, that are not identified as RC are recommended. The instructions in paragraphs, including subparagraphs under those paragraphs, not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the instructions identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to instructions identified as RC require approval of an AMOC.

(j) Additional Information

For more information about this AD, contact Kathryn Hill, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3626; email: *kathryn.a.hill@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following material was approved for IBR on December 10, 2025.

(i) European Union Aviation Safety Agency (EASA) AD 2025–0100, dated April 30, 2025.

(ii) [Reserved]

(4) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*

(5) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(6) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on September 26, 2025.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2025–0470; Project Identifier MCAI–2024–00579–T; Amendment 39–23165; AD 2025–20–12]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2023–02–18, which applied to certain Airbus SAS Model A350–941 and –1041 airplanes. AD 2023–02–18 required revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. Since the FAA issued AD 2023–02–18, the FAA has determined that new or more restrictive airworthiness limitations are necessary. This AD continues to require certain actions in AD 2023–02–18, and requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 30, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 30, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain other publication listed in this AD as of March 23, 2023 (88 FR 10020, February 16, 2023).

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–0470; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2025–0470.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3225; email: *dan.rodina@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2023–02–18, Amendment 39–22325 (88 FR 10020, February 16, 2023) (AD 2023–02–18). AD 2023–02–18 applied to certain Airbus SAS Model A350–941 and –1041 airplanes. AD 2023–02–18 required revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations. The FAA issued AD 2023–02–18 to address the potential failure of certain life-limited parts, which could result in reduced structural integrity of the airplane.

The NPRM was published in the **Federal Register** on March 21, 2025 (90 FR 13311). The NPRM was prompted by AD 2024–0189, dated October 1, 2024, issued by EASA, which is the Technical Agent for the Member States of the European Union (EASA AD 2024–0189) (also referred to as the MCAI). The MCAI states that new or more restrictive airworthiness limitations have been developed.

In the NPRM, the FAA proposed to continue to require certain actions in AD 2023–02–18 and to require revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in EASA AD 2024–0189. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2025–0470.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from the Air Line Pilots Association, International (ALPA), who supported the NPRM without change.

The FAA also received a comment from ProTech Aero Services Limited. The following presents the comments received on the NPRM and the FAA's response to each comment.

Request To Confirm Intent To Allow Later Approved Revisions

ProTech Aero Services requested confirmation that the FAA intended to allow the use of later approved revisions of service information to comply with the proposed AD. The commenter noted that EASA AD 2024–0189 states that it allows use of later approved revisions in the Ref. Publications section.

The FAA confirms that it intends to allow the use of applicable later Airworthiness Limitations Section (ALS) revisions to comply with the requirements of this AD. This AD refers to EASA AD 2024–0189 as the appropriate source of service information for accomplishing the

required actions. EASA AD 2024–0189 includes the Ref. Publications section which accepts the use of later approved variations or revisions of the referenced ALS document for compliance. Therefore, applicable later approved ALS revisions are acceptable.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2024–0189, which specifies new or more restrictive airworthiness limitations for airplane structures and safe life limits.

This AD also requires EASA AD 2022–0124, dated June 28, 2022, which the Director of the Federal Register approved for incorporation by reference as of March 23, 2023 (88 FR 10020, February 16, 2023).

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 34 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

The FAA estimates the total cost per operator for the retained actions from AD 2023–02–18 to be $7,650 (90 work-hours × $85 per work-hour).

The FAA has determined that revising the existing maintenance or inspection program takes an average of 90 work-hours per operator, although the agency recognizes that this number may vary from operator to operator. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate.

The FAA estimates the total cost per operator for the new actions to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2023–02–18, Amendment 39–22325 (88 FR 10020, February 16, 2023); and

■ b. Adding the following new AD:

2025–20–12 Airbus SAS: Amendment 39–23165; Docket No. FAA–2025–0470; Project Identifier MCAI–2024–00579–T.

(a) Effective Date

This airworthiness directive (AD) is effective December 30, 2025.

(b) Affected ADs

This AD replaces AD 2023–02–18, Amendment 39–22325 (88 FR 10020, February 16, 2023) (AD 2023–02–18).

(c) Applicability

This AD applies to Airbus SAS Model A350–941 and –1041 airplanes, certificated in any category, with an original airworthiness certificate or original export certificate of airworthiness issued on or before August 1, 2024.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Unsafe Condition

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address the potential failure of certain life-limited parts. The unsafe condition, if not addressed, could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Revision of the Existing Maintenance or Inspection Program, With a New Terminating Action

This paragraph restates the requirements of paragraph (j) of AD 2023–02–18, with a new terminating action. For Model A350–941 and –1041 airplanes with an original airworthiness certificate or original export certificate of airworthiness issues on or before May 2, 2022: Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2022–0124, dated June 28, 2022 (EASA AD 2022–0124). Accomplishing the revision of the existing maintenance or inspection program required by paragraph (j) of this AD terminates the requirements of this paragraph.

(h) Retained Exceptions to EASA AD 2022–0124, With No Changes

This paragraph restates the exceptions specified in paragraph (k) of AD 2023–02–18, with no changes.

(1) The requirement specified in paragraph (1) of EASA AD 2022–0124 does not apply to this AD.

(2) Paragraph (2) of EASA AD 2022–0124 specifies revising ''the approved AMP'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after March 23, 2023 (the effective date of AD 2023–02–18).

(3) The initial compliance time for complying with the limitations specified in paragraph (2) of EASA AD 2022–0124 is at the applicable ''limitations'' as incorporated by the requirements of paragraph (2) of EASA AD 2022–0124, or within 90 days after March 23, 2023 (the effective date of AD 2023–02–18), whichever occurs later.

(4) The provisions specified in paragraphs (3) and (4) of EASA AD 2022–0124 do not apply to this AD.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2022–0124.

(i) Retained Provisions for Alternative Actions and Intervals, With a New Exception

This paragraph restates the requirements of paragraph (l) of AD 2023–02–18, with a new exception. Except as required by paragraph (j) of this AD, after the existing maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2022–0124.

(j) New Revision of the Existing Maintenance or Inspection Program

Except as specified in paragraph (k) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, EASA AD 2024–0189, dated October 1, 2024 (EASA AD 2024–0189). Accomplishing the revision of the existing maintenance or inspection program required by this paragraph terminates the requirements of paragraph (g) of this AD.

(k) Exceptions to EASA AD 2024–0189

(1) This AD does not adopt the requirements specified in paragraph (1) of EASA AD 2024–0189.

(2) Paragraph (2) of EASA AD 2024–0189 specifies revising ''the approved AMP,'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(3) The initial compliance time for complying with limitations specified in paragraph (2) of EASA AD 2024–0189 is at the applicable ''limitations'' as incorporated by the requirements of paragraph (2) of EASA AD 2024–0189, or within 90 days after the effective date of this AD, whichever occurs later.

(4) This AD does not adopt the provisions specified in paragraphs (3) and (4) of EASA AD 2024–0189.

(5) This AD does not adopt the ''Remarks'' section of EASA AD 2024–0189.

(l) New Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (j) of this AD, no alternative actions (*e.g.,* inspections) and intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2024–0189.

(m) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of AIR–520, Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (n) of this AD and email to: *AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, AIR–520, Continued Operational Safety Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(n) Additional Information

For more information about this AD, contact Dan Rodina, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3225; email: *dan.rodina@faa.gov.*

(o) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following material was approved for IBR on December 30, 2025.

(i) European Union Aviation Safety Agency (EASA) AD 2024–0189, dated October 1, 2024.

(ii) [Reserved]

(4) The following material was approved for IBR on March 23, 2023 (88 FR 10020, February 16, 2023).

(i) European Union Aviation Safety Agency (EASA) AD 2022–0124, dated June 28, 2022.

(ii) [Reserved]

(5) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*

(6) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(7) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on September 26, 2025.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2025–0917; Project Identifier MCAI–2024–00740–A; Amendment 39–23155; AD 2025–20–02]

RIN 2120–AA64

Airworthiness Directives; Pilatus Aircraft Ltd. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Pilatus Aircraft Ltd. (Pilatus) Model PC–24 airplanes. This AD was prompted by a report of an inaccurate flight director calculation on approach. This AD requires incorporating a temporary revision into the existing airplane flight manual (AFM) for the affected airplanes, which revises the Abnormal Procedures Section. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 30, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 30, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–0917; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

• For European Union Aviation Agency (EASA) material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* website: *easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*

• You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (817) 222–5110.

FOR FURTHER INFORMATION CONTACT: Doug Rudolph, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (816) 329–4059; email: *doug.rudolph@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Pilatus Model PC–24 airplanes. The NPRM was published in the **Federal Register** on June 18, 2025 (90 FR 25909). The NPRM was prompted by AD 2024–0240, dated December 10, 2024, issued by EASA, which is the Technical Agent for the Member States of the European Union (also referred to as the MCAI). The MCAI states there was a report of an inaccurate flight director calculation on approach with APEX Build 5.3 and below software installed. Further investigation revealed that heading splits can cause errors in the flight director calculation, resulting in lateral offsets to the desired approach course. The MCAI also states that the AD is considered an interim action and further AD action may follow.

In the NPRM, the FAA proposed to require incorporating a temporary revision into the existing airplane flight manual (AFM) for the affected airplanes, which revises the Abnormal Procedures Section. The FAA is issuing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2025–0917.

Discussion of Final Airworthiness Directive

Comments

The FAA received no comments on the NPRM or on the determination of the costs.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data, considered any comments received, and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. This AD is adopted as proposed in the NPRM.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2024–0240, which specifies procedures for incorporating Pilatus PC–24 AFM Temporary Revision 02371–075 (also referred to as AFM–TR) into the AFM, which revises the Abnormal Procedures Section. EASA AD 2024–0240 also specifies informing all flight crews of the change, and, thereafter, operating the airplane accordingly, and allows for the incorporation of a later AFM revision that includes the same AFM amendment content. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Differences Between This AD and the MCAI

EASA AD 2024–0240 includes requirements to ''inform all flight crews and, thereafter, operate the [airplane] accordingly'', and this AD does not specifically require those actions because those actions are already required by existing FAA regulations (see 14 CFR 91.9, 91.505, and 135.21).

Interim Action

The FAA considers this AD an interim action. This unsafe condition is still under investigation by the manufacturer and, depending on the results of that investigation, the FAA may consider further rulemaking action.

Costs of Compliance

The FAA estimates that this AD affects 150 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Revise AFM	1 work-hour × $85 per hour = $85	$0	$85	$12,750

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2025–20–02 Pilatus Aircraft Ltd.: Amendment 39–23155; Docket No. FAA–2025–0917; Project Identifier MCAI–2024–00740–A.

(a) Effective Date

This airworthiness directive (AD) is effective December 30, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Pilatus Aircraft Ltd Model PC–24 airplanes, certificated in any category.

(d) Subject

Joint Aircraft System Component (JASC) Code 3400, Navigation System.

(e) Unsafe Condition

This AD was prompted by a report of an inaccurate flight director calculation on approach. The FAA is issuing this AD to prevent heading splits that can cause errors in flight director calculations resulting in lateral offsets to the desired approach course. The unsafe condition, if not addressed, could result in an increased pilot workload, resulting in a reduction of the safety margins.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

(1) Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency AD 2024–0240, dated December 10, 2024 (EASA AD 2024–0240).

(2) The actions required by paragraph (g)(1) of this AD may be performed by the owner/operator (pilot) holding at least a private pilot certificate and must be entered into the aircraft records showing compliance with this AD in accordance with 14 CFR 43.9(a) and 91.417(a)(2)(v). The record must be maintained as required by 14 CFR 91.417, 121.380, or 135.439.

(h) Exceptions to EASA AD 2024–0240

(1) Where EASA AD 2024–0240 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where paragraph (1) of EASA AD 2024–0240 specifies to implement the AFM–TR, this AD requires revising the Abnormal Procedures Section of the existing AFM for your airplane by inserting a copy of the AFM–TR as defined in EASA AD 2024–0240.

(3) Where paragraph (1) of EASA AD 2024–0240 specifies to inform all flight crews and, thereafter, operate the [airplane] accordingly, this AD does not require those actions as those actions are already required by existing FAA regulations (see 14 CFR 91.9, 91.505, and 135.21).

(4) This AD does not adopt the Remarks section of EASA AD 2024–0240.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Validation Branch, send it to the attention of the person identified in paragraph (j) of this AD and email to: *AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office/certificate holding district office.

(j) Additional Information

For more information about this AD, contact Doug Rudolph, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (816) 329–4059; email: *doug.rudolph@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2024–0240, dated December 10, 2024.

(ii) [Reserved]

(3) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* website: *easa.europa.eu.* You may find this EASA AD on the EASA website at *ad.easa.europa.eu.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, MO 64106. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on November 21, 2025.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2025–0922; Project Identifier MCAI–2024–00650–R; Amendment 39–23163; AD 2025–20–10]

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2021–26–07, which applies to all Airbus Helicopters Model EC120B helicopters. AD 2021–26–07 requires performing repetitive inspections of the tail rotor (TR) hub body and, depending on the inspection results, replacing certain parts, and accomplishing further inspections. AD 2021–26–07 also requires for certain helicopters removing from service any bolt, washer, and nut installed on the TR hub body at certain life limits and replacing them with airworthy parts and accomplishing further inspections. Additionally, AD 2021–26–07 prohibits the installation of a certain part-numbered TR hub body unless certain requirements are met. Since the FAA issued AD 2021–26–07, it was determined that modifying the link of the TR hub body and splined flange by adding red paint marks is necessary to enable the detection of any loss of tightening torque. This AD retains the same repetitive inspections and corrective actions as AD 2021–26–07 and requires modification of the link of the TR hub body, which is a terminating action for the repetitive inspections. This AD also requires repetitive inspections of the red paint line added during the modification of the link of the TR hub body for alignment. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 30, 2025.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of December 30, 2025.

ADDRESSES:

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–0922; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

Material Incorporated by Reference:

- For Airbus Helicopters material identified in this AD, contact Airbus Helicopters, 2701 North Forum Drive, Grand Prairie, TX 75052; phone: (972) 641–0000 or: (800) 232–0323; fax: (972) 641–3775; website: *airbus.com/en/products-services/helicopters/hcare-services/airbusworld.*
- You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Parkway, Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110. It is also available at *regulations.gov* under Docket No. FAA–2025–0922.

FOR FURTHER INFORMATION CONTACT:

Camille Seay, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (817) 222–5149; email: *camille.l.seay@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2021–26–07, Amendment 39–21866 (86 FR 72829, December 23, 2021) (AD 2021–26–07), which applied to all Airbus Helicopters Model EC120B helicopters.

The NPRM published in the **Federal Register** on June 25, 2025 (90 FR 26951). The NPRM was prompted by European Union Aviation Safety Agency (EASA) AD 2024–0209, dated October 28, 2024 (EASA AD 2024–0209) (also referred to as the MCAI). EASA, the Technical Agent for the Member States of the European Union, issued EASA AD 2024–0209 to address loss of tightening torque in the interface between the TR hub body and splined flange, which creates the risk of crack initiation from a fretting area located on the TR hub body and splined flange or on the TR hub body and flange bolts. The MCAI states that Airbus Helicopters developed a modification, which consists of adding a line of red paint on each bolt and each nut of the link between the TR hub and the splined flange. The MCAI further states that an Airworthiness Limitations Section task was published for checking alignment of the marks.

The FAA is issuing this AD to detect cracking and fretting of the TR hub body, which, if not addressed, could lead to loss of the TR drive, and consequent loss of yaw control of the helicopter.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2025–0922.

Discussion of Final Airworthiness Directive

Comments

The FAA received no comments on the NPRM or on the determination of the costs.

Conclusion

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA reviewed the relevant data and determined that air safety requires adopting this AD as proposed. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed Airbus Helicopters Emergency Alert Service Bulletin 05A020, Revision 3, dated September 19, 2024 (EASB 05A0020 Rev 3), which specifies procedures for repetitive inspections of the TR hub body for cracks and the TR spline flange for cracks and fretting and the appropriate corrective actions to include replacing the hub body and the splined flange. EASB 05A0020 Rev. 3 also excludes helicopters that have complied with Airbus Helicopters Alert Service Bulletin EC120–64–21–0001, Issue 001, dated September 19, 2024 (ASB EC120–64–21–0001) from its effectivity and limits the effectivity for ''non installed equipment or parts''.

The FAA also reviewed ASB EC120–64–21–0001, which specifies procedures for inspecting the torque applied on the nut of the link between the TR hub and the splined flange, and depending on the inspection results, applying torque and replacing parts. ASB EC120–64–21–0001 also specifies procedures for applying a red paint line on the screw, nut, washer, TR hub, and splined flange.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Differences Between This AD and the MCAI

EASA AD 2024–0209 allows a non-cumulative tolerance of 100 FH [flight hours] to be applied to the compliance times to allow for synchronization of the required inspections with other maintenance tasks, whereas this AD does not allow a non-cumulative tolerance to be applied to the compliance times.

Costs of Compliance

The FAA estimates that this AD affects 70 helicopters of U.S. registry. Labor rates are estimated at $85 per hour. Based on these numbers, the FAA estimates the following costs to comply with this AD.

Visually inspecting a TR hub body for a crack takes 0.25 work-hour for an estimated cost of $22 per helicopter and $1,540 for the U.S. fleet.

Visually inspecting a TR spline flange for corrosion, impacts, fretting, wear, and a crack takes 0.25 work-hour for an estimated cost of $22 per helicopter and $1,540 for the U.S. fleet.

Replacing a T/R hub body bolt, washer, and nut takes 0.5 work-hour and parts cost $25 (per hardware set) for an estimated cost of $68 per helicopter.

Inspecting torque and adding a red paint line on each bolt and each nut takes 4 work-hours for an estimated cost of $340 per helicopter and $23,800 for the U.S. fleet.

If required, replacing a TR hub body takes 2 work-hours, and parts cost $16,485 for an estimated cost of $16,655 per helicopter.

If required, replacing a TR spline flange takes 0.5 work-hour, and parts cost $2,950 for an estimated cost of $2,993 per helicopter.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA

with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2021–26–07, Amendment 39–21866 (86 FR 72829, December 23, 2021); and

■ b. Adding the following new airworthiness directive:

2025–20–10 Airbus Helicopters: Amendment 39–23163; Docket No. FAA–2025–0922; Project Identifier MCAI–2024–00650–R.

(a) Effective Date

This airworthiness directive (AD) is effective December 30, 2025.

(b) Affected ADs

This AD replaces AD 2021–26–07, Amendment 39–21866 (86 FR 72829, December 23, 2021).

(c) Applicability

This AD applies to Airbus Helicopters Model EC120B helicopters, certificated in any category.

(d) Subject

Joint Aircraft System Component (JASC) Code 6422, Tail Rotor System.

(e) Unsafe Condition

This AD was prompted by analysis of recurrent loss of tightening torque on several attachment bolts on the tail rotor (TR) hub body. The FAA is issuing this AD to detect cracking and fretting of the TR hub body. The unsafe condition, if not addressed, could lead to loss of the TR drive, and consequent loss of yaw control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

(1) Within 15 hours time-in-service (TIS) or 7 days, whichever occurs first after the effective date of this AD, and thereafter at intervals not to exceed 15 hours TIS, using a light source and mirror, visually inspect TR hub body part number (P/N) C642A0100103 for a crack in the entire inspection area depicted in Figure 1 of Airbus Helicopters Emergency Alert Service Bulletin 05A020 Revision 3, dated September 19, 2024. If any crack is found, before further flight, perform the actions in paragraphs (g)(1)(i) and (ii) of this AD.

(i) Remove the TR hub body and each bolt, washer, and nut installed on the TR hub body from service and replace with airworthy parts.

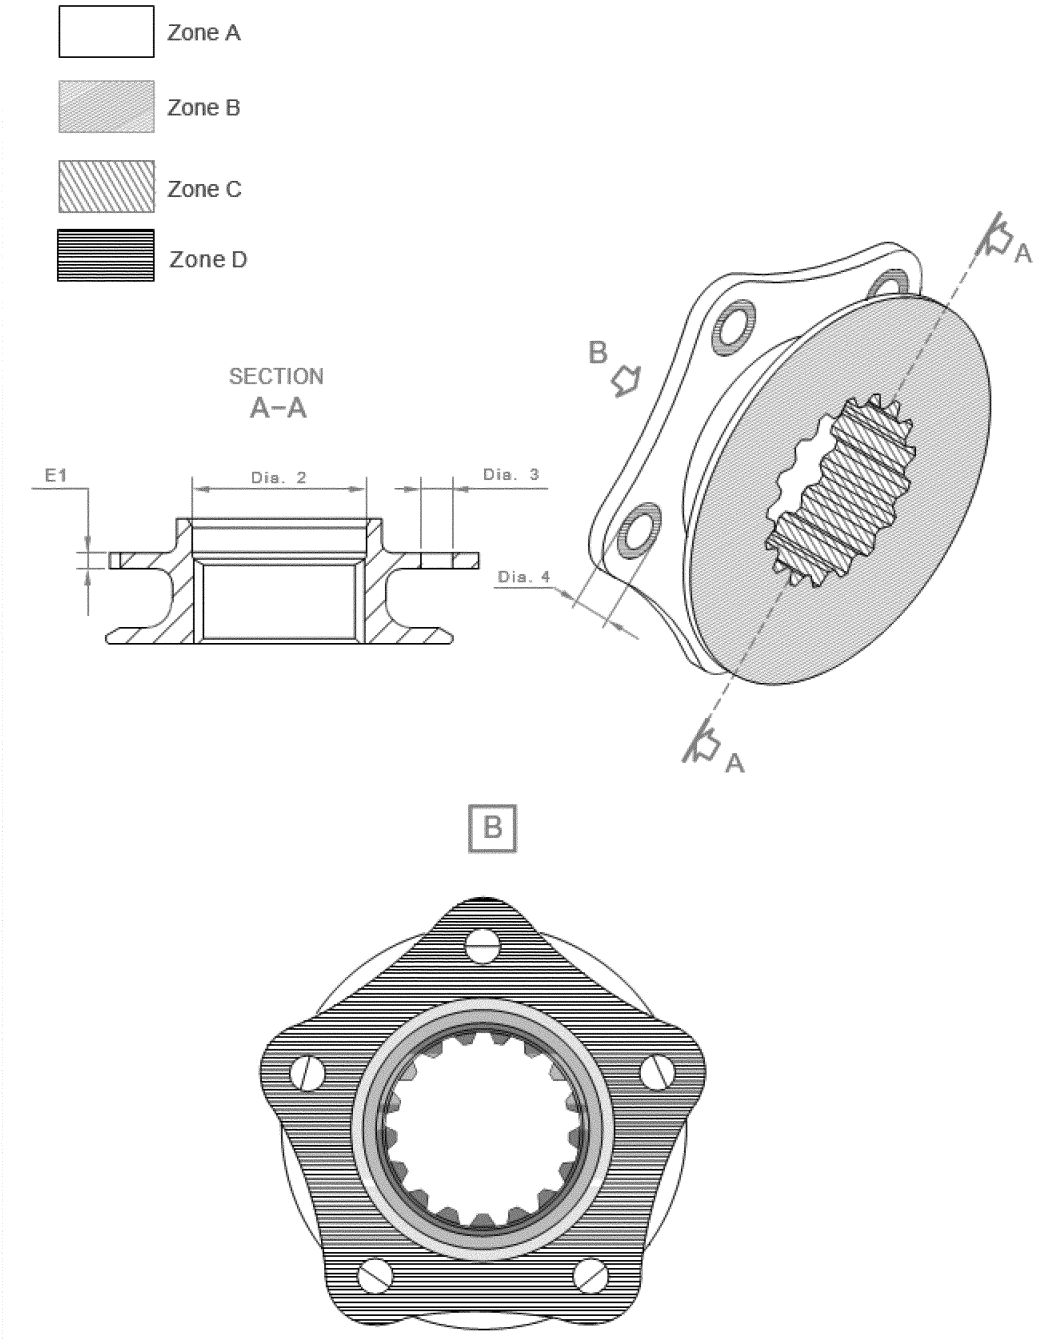
(ii) Inspect the TR splined flange for corrosion, impacts, fretting, wear, and a crack in the areas identified in Figure 2 to paragraph (g)(1)(ii) of this AD. If the condition of the part (including corrosion, impacts, fretting, wear, or cracks) exceeds the criteria as specified in Figure 1 to paragraph (g)(1)(ii) of this AD, before further flight, remove the splined flange from service and replace with an airworthy part.

Note 1 to paragraph (g)(1)(ii): You may refer to ''Detailed Check-Splined Flange,'' Task 64–21–00, 6–5, Airbus Aircraft Maintenance Manual (AMM), dated October 15, 2020, which pertains to the TR splined flange inspection.

Figure 1 to paragraph (g)(1)(ii)—Inspection Criteria for TR Splined Flange

Location as specified in Figure 2 to paragraph (g)(1)(ii) of this AD	Maximum damage, which causes replacement (E1, Dia. 2, Dia. 3, and Dia. 4 are shown in Figure 2 to paragraph (g)(1)(ii) of this AD)
Zone A	Scratch depth > 0.2 mm (0.008 in.). Crack. E1 < 2.75 mm (0.108 in.). Dia. 3 > 6.02 mm (0.2371 in.). Dia. 2 > 33.03 mm (1.3004 in.).
Zone B	Touch-up depth > 0.1 mm (0.004 in.). Crack.
Zone C	Crack. Scratch depth > 0.2 mm (0.008 in.).
Zone D [Dia. 4 = 14 mm +/- 0.1 mm (0.548; 0.555in.)]	Touch-up depth > 0.1 mm (0.004 in.). Crack. E1 < 2.75 mm (0.108 in.).

Figure 2 to paragraph (g)(1)(ii)—Inpsection Area of Tail Rotor Splined Flange



(2) For helicopters with 9,000 or more total hours TIS or with unknown total hours TIS, within 15 hours TIS or 7 days, whichever occurs first after the effective date of this AD, and thereafter at intervals not to exceed 1,000 hours TIS, remove each bolt washer, and nut installed on the TR hub body from service and replace with airworthy parts and perform the actions in paragraph (g)(1)(ii) of this AD.

(3) For helicopters with less than 9,000 total hours TIS, within 1,000 hours TIS or before accumulating 9,000 total hours TIS, whichever occurs first after the effective date of this AD, and thereafter at intervals not to exceed 1,000 hours TIS, remove each bolt, washer, and nut installed on the TR hub body from service and replace with airworthy parts and perform the actions in paragraph (g)(1)(ii) of this AD.

(4) Within 24 months after the effective date of this AD, inspect the torque on the nut of the TR hub body in accordance with paragraph 4.1.2 of Airbus Helicopters Alert Service Bulletin ASB EC120–64–21–0001, Issue 001, dated September 19, 2024.

(i) If the torque is not within allowable limits, before further flight, remove the nut on the TR hub body from service and replace it with an airworthy nut; and accomplish the actions in paragraph (g)(4)(ii) of this AD.

(ii) If the torque is within allowable limits, before further flight, using polyurethane paint, apply a red paint line to the bolt and washer on the TR hub body; and apply a red paint line to the nut and washer on the splined flange. These actions terminate the repetitive inspections and replacements required by paragraphs (g)(1) through (3) of this AD.

(5) Within 100 hours TIS or 12 months, whichever occurs first after the action required in paragraph (g)(4)(ii) of this AD, and thereafter at intervals not to exceed 100 hours TIS or 12 months, whichever occurs first, inspect the red paint line for alignment. If the red paint line is misaligned, before further flight, perform the actions as specified in paragraphs (g)(4)(i) of this AD.

(h) Parts Installation Limitations

As of the effective date of this AD, do not install on any helicopter a TR hub body P/N C642A0100103 or a splined flange unless

the part is new (zero hours TIS) or has passed the inspection requirements required by paragraph (g)(1) of this AD.

(i) Credit for Previous Actions

This paragraph provides credit for the initial instance of the actions required by paragraphs (g)(1) through (3) of this AD, if those actions were performed before the effective date of this AD in accordance with Airbus Helicopters Emergency Alert Service Bulletin 05A020 Revision 0, dated October 29, 2019; Revision 1, dated November 8, 2019; or Revision 2, dated February 8, 2021.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (k)(1) of this AD and email to: *AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office. The following provisions also apply to this AD.

(k) Additional Information

(1) For more information about this AD, contact Camille Seay, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (817) 222–5149; email: *camille.l.seay@faa.gov.*

(2) For Airbus Helicopters material identified in this AD that is not incorporated by reference, can be found at the contact information identified in paragraph (l)(3) of this AD.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Airbus Helicopters Emergency Alert Service Bulletin 05A020, Revision 3, dated September 19, 2024.

(ii) Airbus Helicopters Alert Service Bulletin EC120–64–21–0001, Issue 001, dated September 19, 2024.

(3) For Airbus Helicopters material identified in this AD, contact Airbus Helicopters, 2701 North Forum Drive, Grand Prairie, TX 75052; phone: (972) 641–0000 or: (800) 232–0323; fax: (972) 641–3775; website: *airbus.com/en/products-services/helicopters/hcare-services/airbusworld.*

(4) You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Parkway, Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on November 20, 2025.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

14 CFR Part 39

[Docket No. FAA–2025–5025; Project Identifier AD–2025–01595–T; Amendment 39–23197; AD 2025–24–02]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain The Boeing Company Model 737–700, –800, –900, and –900ER series airplanes. This AD was prompted by a report of a runway excursion caused by loss of braking. An inspection found that the right main landing gear (MLG) hydraulic hoses for the brakes were incorrectly installed at the flow limiters, and the left MLG wheel speed transducer wires were also interchanged. This AD requires a general visual inspection (GVI) of the left and right MLG brake hydraulic hoses for any crossed installation, antiskid valve and transducer operational tests, and applicable on-condition actions. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 10, 2025.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 10, 2025.

The FAA must receive comments on this AD by January 9, 2026.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–5025; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For Boeing material identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2025–5025.

FOR FURTHER INFORMATION CONTACT: Katherine Venegas, Aviation Safety Engineer, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712; phone: 562–627–5353; email: *katherine.venegas@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written data, views, or arguments about this final rule. Send your comments using a method listed under the **ADDRESSES** section. Include Docket No. FAA–2025–5025 and Project Identifier AD–2025–01595–T at the beginning of your comments. The most helpful comments reference a specific portion of the final rule, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each

substantive verbal contact received about this final rule.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Katherine Venegas, Aviation Safety Engineer, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712; phone: 562–627–5353; email: *katherine.venegas@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA has received a report of a runway excursion caused by loss of braking. An inspection found that the right MLG hydraulic hoses for the brakes were incorrectly installed (crossed) at the flow limiters, and the left MLG wheel speed transducer wires were interchanged. This condition could result in incorrect antiskid system operation, which could result in loss of braking and potential for a runway excursion with serious or fatal injuries. The FAA is issuing this AD to address the unsafe condition on these products.

FAA's Determination

The FAA is issuing this AD because the agency has determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025. This material specifies procedures for a GVI of the left and right MLG brake hydraulic hoses for any incorrect (crossed) installation, antiskid valve and transducer operational tests, and applicable on-condition actions.

On-condition actions include installing the brake hydraulic hoses to the correct flow limiter or union, and doing applicable corrective actions until the operational tests are passed. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

AD Requirements

This AD requires accomplishing the actions identified in Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025, already described, except as discussed under ''Differences Between this AD and the Referenced Material.''

Differences Between This AD and the Referenced Material

Although Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025, does not specify reporting inspection and test results, reporting is included in Boeing Alert Service Bulletin 737–32A1599, dated October 14, 2025. The FAA has determined that reporting is necessary. The number of findings in such reports, and the number of flight cycles since accomplishing any service bulletin identified in Appendix A of Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025, will help inform the FAA as to whether additional rulemaking may be necessary.

Justification for Immediate Adoption and Determination of the Effective Date

Section 553(b) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) authorizes agencies to forego notice and comment procedures for rules when the agency, for ''good cause,'' finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under this section, an agency, upon finding good cause, may issue a final rule without providing notice and seeking comment prior to issuance. Further, section 553(d) of the APA authorizes agencies to make rules effective in less than thirty days, upon a finding of good cause.

An unsafe condition exists that requires the immediate adoption of this AD without providing an opportunity for public comments prior to adoption. The FAA has found that the risk to the flying public justifies forgoing notice and comment prior to adoption of this rule, because incorrectly installed (crossed) brake hydraulic hoses for the MLG and interchanged left MLG wheel speed transducer wires could cause incorrect antiskid system operation and result in loss of braking and a runway excursion with serious or fatal injuries. Further, the effects of crossed brake hoses may not be noticed until there is a skidding condition. Additionally, the compliance time in this AD is shorter than the time necessary for the public to comment and for publication of the final rule. Accordingly, notice and opportunity for prior public comment are impracticable.

In addition, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days, for the same reasons the FAA found good cause to forgo notice and comment.

Regulatory Flexibility Act

The requirements of the Regulatory Flexibility Act (RFA) do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it has good cause to adopt this rule without notice and comment, RFA analysis is not required.

Costs of Compliance

While 6,816 airplanes are included in the Effectivity of Boeing Alert Requirements Bulletin 737–32A1599, dated October 14, 2025, and thus the applicability of this AD, the FAA expects that only approximately 100 airplanes of U.S. registry are currently in a configuration that necessitates immediate action and therefore will incur the following estimated costs.

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspection and tests	7 work-hours × $85 per hour = $595	$0	$595	$59,500

The FAA estimates the following costs to do any necessary installations and reporting that would be required based on the results of the inspection. The FAA has no way of determining the number of aircraft that might need reporting:

ON-CONDITION COST

Action	Labor cost	Parts cost	Cost per product
Installation	2 work-hours × $85 per hour = $170	$0	$170
Reporting	1 work-hour × $85 per hour = $85	0	85

The FAA has received no definitive data on which to base the cost estimates for on-condition corrective actions to address failed operational tests specified in this AD.

Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to take approximately 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. All responses to this collection of information are mandatory. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177–1524.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2025–24–02 The Boeing Company: Amendment 39–23197; Docket No. FAA–2025–5025; Project Identifier AD–2025–01595–T.

(a) Effective Date

This airworthiness directive (AD) is effective December 10, 2025.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 737–700, –800, –900, and –900ER series airplanes, certificated in any category, as identified in Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025.

(d) Subject

Air Transport Association (ATA) of America Code 32, Landing gear.

(e) Unsafe Condition

This AD was prompted by a report of a runway excursion caused by loss of braking. An inspection found that the right main landing gear (MLG) hydraulic hoses for the brakes were incorrectly installed (crossed) at the flow limiters, and the left MLG wheel speed transducer wires were also interchanged. The FAA is issuing this AD to address incorrectly installed brake hydraulic hoses for the MLG and wheel speed transducer wires for the MLG, which could cause incorrect antiskid system operation. The unsafe condition could result in loss of braking and a runway excursion with serious or fatal injuries.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified by paragraph (h) of this AD: At the applicable times specified in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletin 737–32A1599, dated October 14, 2025, which is referred to in Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025.

(h) Exception to Requirements Bulletin Specifications

Where the ''Effectivity'' paragraph and Compliance Time columns of the tables in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025, refer to the original issue date of Requirements Bulletin 737–32A1599 RB, this AD requires using the effective date of this AD.

(i) Reporting

For airplanes identified as Group 1, Configuration 3 through 5, in Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025, on which any of the findings specified in paragraphs (i)(4) through (6) of this AD were found during any inspection or test required by paragraph (g) of this AD: Submit a report within 30 days after the inspection or test, or within 30 days after the effective date of this AD, whichever occurs later. The report must include the items specified in paragraphs (i)(1) through (6) of this AD. Submit the report to Boeing Service Engineering by sending a service request using the Boeing Communication System (BCS).

(1) Airplane line number.

(2) Date of most recent accomplishment of any service bulletin listed in Appendix A of Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025.

(3) The number of flight cycles between the most recent accomplishment of any service bulletin listed in Appendix A of Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025, and the date that the inspection or test was completed.

(4) All crossed brake hydraulic hoses found during the general visual inspection for crossed brake hydraulic hoses.

(5) Operational test failures of the antiskid valve operational tests.

(6) Operational test failures of the transducer operational tests.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (k)(1) of this AD. Information may be emailed to: *AMOC@faa.gov*. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR–520, Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(k) Additional Information

(1) For more information about this AD, contact Katherine Venegas, Aviation Safety Engineer, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712; phone: 562–627–5353; email: *katherine.venegas@faa.gov*.

(2) Material identified in this AD that is not incorporated by reference is available at the address specified in paragraph (l)(3) of this AD.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Requirements Bulletin 737–32A1599 RB, dated October 14, 2025.

(ii) [Reserved]

(3) For Boeing material identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com*.

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov*.

Issued on November 19, 2025.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2025–0082]

RIN 1625–AA00

Safety Zones; Recurring Events in Captain of the Port Duluth Zone

AGENCY: Coast Guard, Department of Homeland Security.

ACTION: Final rule.

SUMMARY: The Coast Guard is revising existing regulations for recurring safety zones in the Captain of the Port Duluth Zone. These amendments update the table of annually recurring marine events, add definitions, and clarify how and when the COTP may enforce listed zones. These changes will improve the timeliness and clarity of public notification, enhance mariner situational awareness, and promote the safety of life on the navigable waters of western Lake Superior during recurring near-shore events.

DATES: This rule is effective December 26, 2025.

ADDRESSES: To view available documents go to *https://www.regulations.gov* and search for USCG–2025–0082.

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, contact LT Zachary Fedak, Marine Safety Unit Duluth Waterways Management Division, U.S. Coast Guard; telephone 218–522–0708, or email *Zachary.A.Fedak@uscg.mil*.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background and Authority

Each year, communities throughout the western Lake Superior region sponsor marine events that generate predictable concentrations of spectator vessels in confined harbor and near-shore waters. These activities pose recurring hazards, including the accidental discharge of fireworks, falling embers or debris, and congestion of swimmers or boaters. In such conditions, even routine vessel wakes or sudden wind shifts can increase the risk of collisions and injuries.

To address these risks, the Coast Guard previously codified annually recurring safety zones for these events in 33 CFR 165.943. Under the current regulation, enforcement of each zone must be individually noticed, which can result in fragmented or delayed information reaching mariners. This fragmentation may lead to confusion when multiple events occur in close proximity or on separate dates.

On September 9, 2025, the Coast Guard published a notice of proposed rulemaking (NPRM) titled Safety Zones; Recurring Events in Captain of the Port Duluth Zone (90 FR 43404). In that NPRM, we stated why we issued the NPRM and invited comments on our proposed regulatory action related to regulation revision.

Under the authority in 46 U.S.C. 70034, the COTP has determined that this rule revision is necessary to improve clarity, consistency, and public communication for the purposes of protecting personnel, vessels, and the marine environment from potential hazards associated with these recurring marine events. The revised rule defines key terms to support uniform enforcement; clarifies procedures for

enforcement and early suspension of safety zones; updates the regulation's structure and formatting; and frames the rule to allow flexibility for consolidated Notifications of Enforcement when operationally appropriate. These revisions will enhance the predictability and timeliness of safety communications, thereby improving mariner situational awareness and promoting the safety of life on navigable waters.

III. Discussion of Comments and the Rule

During the comment period that ended on October 9, 2025, we received no comments. Based on further internal review, we made minor technical changes to Table 1 for clarity. There are no substantive changes in the regulatory text of this rule from the proposed rule in the NPRM.

This revision to the existing regulatory text and associated table establishing annually recurring safety zones within the Captain of the Port (COTP) Duluth Zone, as listed in 33 CFR 165.943, updates event listings, clarifies enforcement procedures, adds relevant definitions, and structures the rule in a way that may accommodate a single Notification of Enforcement announcing multiple zones or event dates. These revisions will improve the clarity, consistency, and timeliness of public notification.

The geographic locations and general durations of the safety zones remain unchanged. Each safety zone will continue to be enforced only during specific periods, which will be announced in advance through publication of a Notification of Enforcement in the **Federal Register** and via Broadcast Notices to Mariners over VHF–FM marine channel 16. These measures ensure continued protection of persons, vessels, and the navigable waters of western Lake Superior during recurring safety zone enforcement periods. During periods of enforcement, no vessel or person may enter a designated safety zone without obtaining permission from the COTP Duluth or their designated representative.

IV. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders.

A. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. Section 605 of the RFA allows an agency to certify a rule, in lieu of preparing an analysis, if the rulemaking is not expected to have a significant economic impact on a substantial number of small entities.

The Coast Guard certifies that, although some small entities may intend to transit the safety zone above, this rule will not have a significant economic impact on a substantial number of small entities, as mandated by the Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612 for the following reasons. Vessel traffic will be able to safely transit around these safety zones, which are short in duration, geographically limited, and often occur during off-peak periods when vessel traffic is normally low. In addition, the Coast Guard will issue a Broadcast Notice to Marines via VHF FM marine channel 16, which will allow small entities to adjust their transit plans, and the rule allows vessels to request permission to enter the zone from the COTP.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), if this rule will affect your small business, organization, or governmental jurisdiction and you have questions, contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards by calling 1–888–REG–FAIR (1–888–734–3247).

B. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

C. Federalism and Indian Tribal Governments

We have analyzed this rule under Executive Order 13132, Federalism, and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in that Order.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

D. Unfunded Mandates Reform Act

As required by The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538), the Coast Guard certifies that this rule will not result in an annual expenditure of $100,000,000 or more (adjusted for inflation) by a State, local, or tribal government, in the aggregate, or by the private sector.

E. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment.

This rule is a revision of an existing regulation establishing recurring safety zones in the Captain of the Port Duluth Zone. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.4.

■ 2. Revise § 165.943 to read as follows:

§ 165.943 Safety Zones; Recurring Events in Captain of the Port Duluth Zone.

(a) *Regulations.* (1) In accordance with the general regulations in § 165.23 of this part, entry into, transiting, or anchoring within this safety zone is

prohibited unless authorized by the Captain of the Port (COTP) Duluth or his or her designated on-scene representative.

(2) These safety zones are closed to all vessel traffic, except as may be permitted by the COTP Duluth or his or her designated on-scene representative.

(3) The ''on-scene representative'' of the COTP Duluth is any Coast Guard commissioned, warrant or petty officer who has been designated by the COTP Duluth to act on his behalf.

(4) Vessel operators desiring to enter or operate within the safety zone must contact the COTP Duluth or his or her on-scene representative to obtain permission to do so. The COTP Duluth or his or her on-scene representative may be contacted via VHF Channel 16. Vessel operators given permission to enter or operate in the safety zone must comply with all directions given to them by the COTP Duluth, or his or her on-scene representative.

(5) The enforcement dates and times for each of the safety zones listed in Table 1 are subject to change, but the duration of enforcement would remain the same or nearly the same as stated in Table 1. In the event of a change, the COTP Duluth will provide notice to the public by publishing a Notification of Enforcement in the **Federal Register**, as well as issuing a Broadcast Notice to Mariners.

(b) *Definitions.* As used in this section:

(1) *Designated representative* means any Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the COTP Duluth in the enforcement of each safety zone.

(2) *Public vessel* means a vessel that is owned, chartered, or operated by the United States, or by a State or political subdivision thereof.

(3) *Rain date* refers to an alternate date and/or time in which the safety zone would be enforced in the event of inclement weather.

(c) *Suspension of enforcement.* The COTP Duluth may suspend enforcement of any of these zones earlier than listed in this section. Should the COTP Duluth suspend any of these zones earlier than the listed duration in this section, he or she may make the public aware of this suspension by Broadcast Notice to Mariners and/or on-scene notice by his or her designated representative.

(d) *Exemption.* Public vessels, as defined in paragraph (b) of this section, are exempt from the requirements in this section.

(e) *Waiver.* For any vessel, the COTP Duluth or his or her designated representative may waive any of the requirements of this section upon finding that operational conditions or other circumstances are such that application of this section is unnecessary or impractical for the purposes of safety or security.

(f) *Notification.* The enforcement dates and times for each of the listed safety zones are subject to change. Advance notice to the local maritime community will be made well in advance of the events through Notification(s) of Enforcement in the **Federal Register**, listing exact times and dates of the enforcement periods. A Broadcast Notice to Mariners will also be issued.

TABLE 1 TO § 165.943

[Datum NAD 1983]

Event	Location	Enforcement date and time
(a) January Safety Zones

BILLING CODE 9110–04–P

POSTAL SERVICE

39 CFR Part 20

Discontinuation of International Surface Air Lift

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service is revising *Mailing Standards of the United States Postal Service,* International Mail Manual (IMM®), and Notice 123, *Price List,* to terminate International Surface Air Lift (ISAL) service as established by the Governors of the United States Postal Service.

DATES: Effective January 18, 2026.

FOR FURTHER INFORMATION CONTACT: Dale Kennedy at 202–268–6592 or Michelle Lassiter at 202–268–2914.

SUPPLEMENTARY INFORMATION: On September 5, 2025, the Postal Service filed a request to remove International Surface Air Lift (ISAL) from the competitive product list in PRC Docket No. MC2025–1676, which the PRC favorably reviewed on October 30, 2025, in Order No. 9320. Therefore, the Postal Service is revising *Mailing Standards of the United States Postal Service,* International Mail Manual (IMM) to reflect the discontinuation of International Surface Air Lift as a competitive product, effective January 18, 2026. Notice 123, *Price List,* will be updated accordingly. This order is available on the PRC website at *https://www.prc.gov.*

The Postal Service hereby adopts the following changes to *Mailing Standards of the United States Postal Service,* International Mail Manual (IMM), which is incorporated by reference in the *Code of Federal Regulations.* We will publish an appropriate amendment to 39 CFR part 20 to reflect these changes.

List of Subjects in 39 CFR Part 20

Foreign relations, International postal services.

Accordingly, the Postal Service amends Mailing Standards of the United States Postal Service, International Mail Manual (IMM), incorporated by

reference in the Code of Federal Regulations, as follows (see 39 CFR 20.1):

PART 20—[AMENDED]

■ 1. The authority citation for 39 CFR part 20 continues to read as follows:

Authority: 5 U.S.C. 552(a); 13 U.S.C. 301–307; 18 U.S.C. 1692–1737; 39 U.S.C. 101, 401, 403, 404, 407, 414, 416, 3001–3011, 3201–3219, 3403–3406, 3621, 3622, 3626, 3632, 3633, and 5001.

■ 2. Revise the following sections of the IMM as follows:

* * * * *

Mailing Standards of the United States Postal Service, International Mail Manual (IMM)

* * * * *

1 International Mail Services

* * * * *

120 Preparation for Mailing

* * * * *

122 Addressing

122.1 Destination Address

[Revise the last sentence of item d. to read as follows:]

* * * See 292.41 for an optional addressing procedure that applies only to direct country containers of International Priority Airmail (IPA) mail.

* * * * *

122.2 Return Address

* * * * *

122.23 Required Use of Return Address

[Revise the second sentence to read as follows:]

* * * For the purpose of this section, a ''bulk mailing'' is any IPA mailing or any other mailing paid with an advance deposit account and presented to the U.S. Postal Service for acceptance.* * *

* * * * *

123 Customs Forms and Online Shipping Labels

* * * * *

123.6 Required Usage

123.61 Conditions

* * * * *

[Revise Exhibit 123.61 (removing references to ''International Surface Air Lift'' and ''ISAL'') to read as follows:]

Exhibit 123.61 (p.1)

CUSTOMS DECLARATION FORM USAGE BY MAIL CATEGORY

Type of item	Declared value, weight, or physical characteristic	Required PS form	Comment (if applicable)
*	*	*	* * *
First-Class Mail International Letters and Large Envelopes (Flats), as well as International Priority Airmail (IPA) Letters and Large Envelopes (Flats)			
All First-Class Mail International letter-size and flat-size items, as defined in *241.2,* containing only nondutiable documents.	Under 16 ounces [3]	None [4]	See *123.62* for additional information concerning ''documents.'' Items containing merchandise are prohibited in First-Class Mail International.[5]
All IPA letter-size and flat-size items, as defined in *241.2,* containing only nondutiable documents.	Under 16 ounces [3] ..... 16 ounces to 17.6 ounces.	None [4] ..... 2976 or 2976–A [2]	See *123.62* for additional information concerning ''documents.'' Items containing merchandise are prohibited in IPA letters and large envelopes (flats).[5]
All items containing any goods, regardless of weight.	Prohibited	Prohibited	See *123.62* for additional information concerning ''documents'' and merchandise. Items containing merchandise are prohibited in First-Class Mail International and in IPA letters and large envelopes (flats).[5]
First-Class Package International Service Packages (Small Packets), including IPA Packages (Small Packets)			
All First-Class Package International Service packages (small packets), as defined in *251.2,* regardless of contents, and, for commercial mailers, IPA packages (small packets), regardless of contents.	$400 or less ..... Over $400	2976 or 2976–A [2] ..... Prohibited	Merchandise is permitted unless prohibited by the destination country. Items over $400 must be mailed using Global Express Guaranteed service, Priority Mail Express International service, or Priority Mail International service.
*	*	*	* * *
M-bags (Airmail and IPA Service) * * *			

* * * * *

[Revise footnote 5 to read as follows:]

[5] Items containing merchandise are mailable using Global Express Guaranteed, Priority Mail Express International service, Priority Mail International service, or First-Class Package International Service; commercial mailers may also use IPA packages (small packets).

* * * * *

123.62 Separation of Documents and Merchandise

123.621 Explanation of Separation

[Revise the first sentence to read as follows:]

Letter-post mail (First-Class Mail International, International Priority

Airmail, and First-Class Package International Service) must be separated based on contents into Documents and Merchandise categories.* * *

* * * * *

150 Postage

* * * * *

152 Payment Methods

* * * * *

152.21 Determining Single-Piece Weight

[Revise the second sentence to read as follows:]

* * * To determine single-piece weight in any other bulk or presort price mailing of identical-weight pieces (*e.g.,* IPA), weigh a sample group of at least 10 randomly selected pieces and divide the total sample weight by the number of pieces in the sample.* * *

* * * * *

152.33 Precanceled Stamps

[Revise the first sentence to read as follows:]

Except for the ''Nonprofit Org.'' variant, mailers may use precanceled stamps for only IPA mailings (see 293.333).* * *

* * * * *

152.4 Postage Meters, Postage Validation Imprints (PVI), Forever Print-on-Demand Indicia, and PC Postage

[Revise the second to last sentence to read as follows:]

* * *In addition, postage meters may also be used to pay for the ''per piece price'' portion of IPA (see 292) mailings.* * *

* * * * *

152.6 Permit Imprint

152.61 Conditions of Use

[Delete item g. in its entirety.]

* * * * *

152.63 Usage Criteria

* * * * *

[Revise the title, text, and Note of 152.633 to read as follows:]

152.633 International Priority Airlift

See 292.23 for the minimum quantity requirements that govern the entry of International Priority Airmail (IPA) items.

Note: As discussed in 152.631c, a mailer who meets the minimum requirements for IPA items may combine with that mailing other permit imprint mailings for Global Express Guaranteed, Priority Mail Express International, Priority Mail International, or First-Class Package International Service items. The mailer must physically separate the items by mail class and submit a separate postage statement for each mail class.

* * * * *

152.64 Required Format

[Revise pages 3 and 4 of Exhibit 152.64 to remove the entry for International Surface Air Lift (ISAL) to read as follows:]

* * * * *

Exhibit 152.64 (p. 3)

Indicia Formats

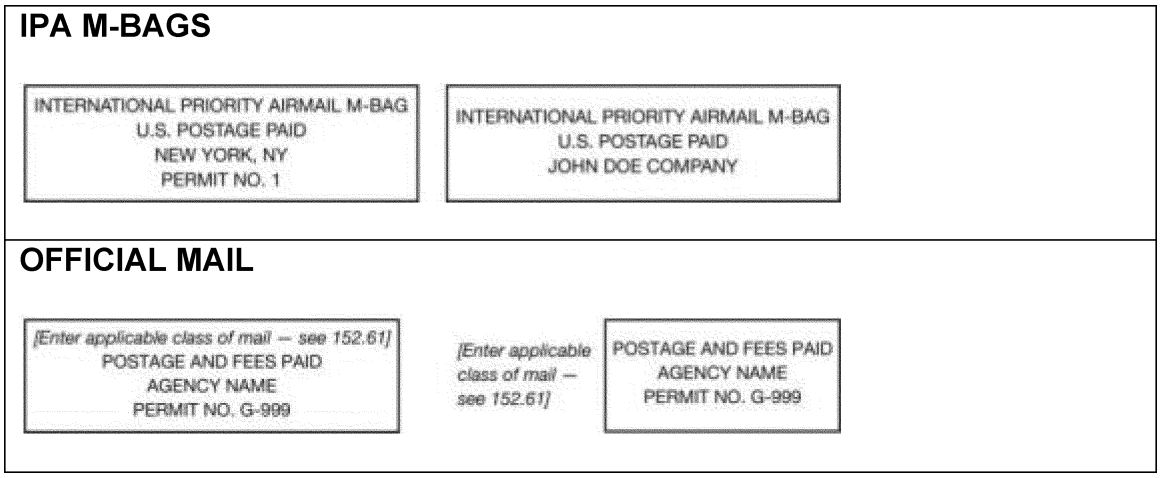

Exhibit 152.64 (p. 4) **Indicia Formats**

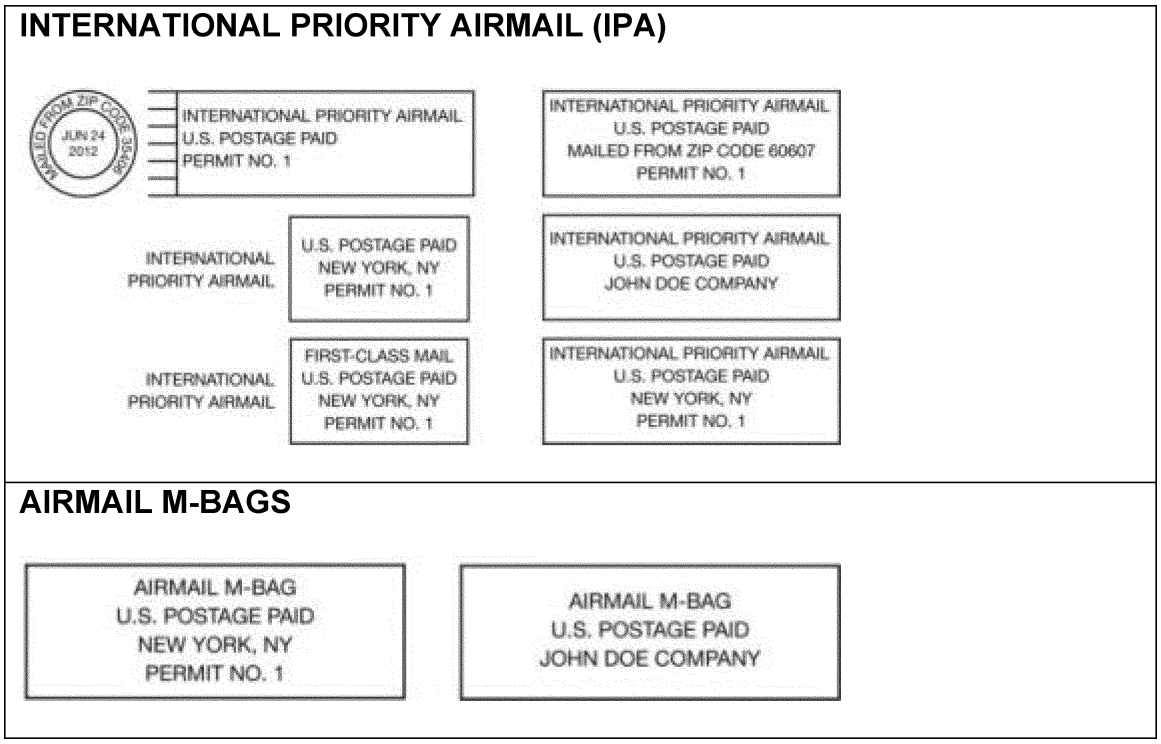

* * * * *

2 Conditions for Mailing

* * * * *

240 First-Class Mail International

* * * * *

242 Eligibility

* * * * *

242.2 Merchandise

[Revise the last sentence to read as follows:]

* * * Items containing merchandise may be sent by Global Express Guaranteed service, Priority Mail Express International service, Priority Mail International service, or First-Class Package International Service; commercial mailers may also use IPA packages (small packets).

* * * * *

260 Direct Sacks of Printed Matter to One Addressee (M-Bags)

261 Description

261.1 General

[Revise the text (removing third bullet reference to ''International Surface Air Lift (ISAL) M-bags'') to read as follows:]

M-bags are defined as direct sacks of printed matter sent to a single foreign addressee at a single address. There are two types of M-bags:

■ Airmail M-bags.

■ International Priority Airmail (IPA) M-bags.

[Revise the itemized list by removing references to ISAL from items b. and e. to read as follows:]

All M-bags are subject to the following conditions of mailing:* * *

b. Availability: All destinations that are referenced in the Individual Country Listings for Airmail M-bags, in *Exhibit 292.45* for IPA M-bags.

* * * * *

e. Postage: The applicable postage for Airmail M-bags and International Priority Airmail (IPA) must be affixed to PS Tag 158.

* * * * *

261.2 Eligibility

* * * * *

261.22 Mail Not Sealed Against Inspection

[Revise the second sentence to read as follows:]

* * *Regardless of physical closure, the mailing of an M-bag, including an airmail or IPA M-bag, constitutes consent by the mailer to inspection of the contents.

* * * * *

262 Postage Prices and Fees

* * * * *

[Remove 262.3 in its entirety (removing any reference to ''International Surface Air Lift (ISAL) M-bags'') and renumber current 262.4 and 262.5 as 262.3 and 262.4, respectively.]

* * * * *

263 Weight and Size Limits

263.1 Weight Limits

[Revise the first sentence to read as follows:]

There is no minimum weight requirement for the entry of Airmail M-bags or IPA M-bags.* * *

* * * * *

264 Mail Preparation

* * * * *

264.22 Tagging

[Delete the last sentence in its entirety (removing any reference to ''ISAL'').]

* * * * *

292 International Priority Airmail (IPA) Service

* * * * *

292.5 Mail Entry and Deposit

* * * * *

292.532 Drop Shipment Locations

* * * * *

[Revise footnote 2 (removing any reference to ''ISAL mail'') to read as follows.]

2. This facility accepts cleared and uncleared IPA mail.

* * * * *

[Revise the title of 293 to read as follows and delete the text in its entirety (removing any reference to ''International Surface Air Lift (ISAL) Service'').]

293 (Reserved)

* * * * *

Individual Country Listings

* * * * *

Indonesia

* * * * *

Observations

[Revise item 8. to read as follows:]

8. To facilitate customs clearance and delivery of items, Pos Indonesia (the designated postal operator of Indonesia) requests that the mailer provide the addressee's mobile telephone number and email address, if possible, on the address label of Registered Mail letters and on the customs declaration form for each item sent with any of the following services: First-Class Package International Service, International Priority Airmail packages (small packets), Priority Mail International, and Priority Mail Express International.

* * * * *

Libya

* * * * *

Observations

[Revise item 3. to read as follows:]

3. In accordance with Executive Order 12543 of January 7, 1986, merchandise is limited to donations of articles of food, clothing, medicines, and medical supplies that are intended strictly for medical purposes. First-Class Package International Service items and International Priority Airmail (IPA) items are subject to the content restriction.

* * * * *

List of Exhibits

[Revise the list by removing the following entries in their entirety:]

- Exhibit 293.45a
  ISAL Foreign Office of Exchange Codes and Price Groups 127
- Exhibit 293.45b
  Canadian Mail Container Labeling Information (Full-service Only) 130
- Exhibit 293.462
  Labeling of ISAL Mail to Postal Service Exchange Offices (Full-service only) 132
- Exhibit 293.483
  Labeling of ISAL Mail to Postal Service Exchange offices (Full-service only) 135,
- Exhibit 293.532
  ISAL Drop Shipment Locations 137

* * * * *

BILLING CODE P

POSTAL SERVICE

39 CFR Part 20

International Registered Mail

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service is revising *Mailing Standards of the United States Postal Service,* International Mail Manual (IMM®), and Notice 123, *Price List,* to reflect changes to international Registered Mail as established by the Governors of the United States Postal Service.

DATES: *Effective:* January 1, 2026.

FOR FURTHER INFORMATION CONTACT: Dale Kennedy at 202–268–6592 or Michelle Lassiter 202–268–2914.

SUPPLEMENTARY INFORMATION: During the October 2023 Universal Postal Union (UPU) Extraordinary Congress, the decision was made to revise the Universal Postal Convention to limit the availability of international Registered Mail to letter-post items containing documents only, effective January 1, 2026.

On October 14, 2025, the Postal Service filed a notice in Postal Regulatory Commission (PRC) Docket No. MC2026–21, which the PRC favorably reviewed on November 5, 2025, in Order No. 9333, regarding the termination of international Registered Mail as an extra service for First-Class Package International Service®, effective January 1, 2026. International Registered Mail service will continue to be available for First-Class Mail International® letters when Registered Mail is purchased as an extra service. This order is available on the PRC website at *https://www.prc.gov.*

These IMM revisions implement changes associated with the termination of outbound international Registered Mail as an extra service for the following:

- First-Class Package International Service.
- Free Matter for the Blind First-Class Package International Service.

The Postal Service hereby adopts the following changes to *Mailing Standards of the United States Postal Service,*

International Mail Manual (IMM), which is incorporated by reference in the *Code of Federal Regulations.* We will publish an appropriate amendment to 39 CFR part 20 to reflect these changes.

List of Subjects in 39 CFR Part 20

Foreign relations, International postal services.

Accordingly, the Postal Service amends *Mailing Standards of the United States Postal Service,* International Mail Manual (IMM), incorporated by reference in the Code of Federal Regulations, as follows (see 39 CFR 20.1):

PART 20—[AMENDED]

■ 1. The authority citation for 39 CFR part 20 continues to read as follows:

Authority: 5 U.S.C. 552(a); 13 U.S.C. 301–307; 18 U.S.C. 1692–1737; 39 U.S.C. 101, 401, 403, 404, 407, 414, 416, 3001–3011, 3201–3219, 3403–3406, 3621, 3622, 3626, 3632, 3633, and 5001.

■ 2. Revise the following sections of the IMM as follows:

* * * * *

Mailing Standards of the United States Postal Service, International Mail Manual (IMM)

* * * * *

1 International Mail Services

* * * * *

130 Mailability

* * * * *

134 Valuable Articles

134.1 Service Options

* * * * *

[Revise item a. to read as follows:]

a. First-Class Mail International with Registered Mail Service may be used only when the destination customs authority treats the item as a document. See Individual Country Listings.

* * * * *

135 Mailable Dangerous Goods

* * * * *

135.12 Type of Mail

[Revise the text to read as follows:]

Category B infectious substances may be sent using Priority Mail Express International, Priority Mail International, or First-Class Package International Service when properly packaged as described in Publication 52, Packaging Instruction 6C.

Nonregulated materials defined in Publication 52, section 346.325, and exempt human or animal specimens defined in Publication 52, item 346.12d, are mailable when properly packaged as described in Publication 52, Packaging Instruction 6G and 6H respectively.

* * * * *

135.3 Packaging, Marking, Labeling

135.31 Category B Infectious Substances

[Revise the first sentence to remove limitation to use First-Class Package International Service using Registered Mail service, to read as follows:]

A material that is classified as a Category B infectious substance and that meets the definition in Publication 52, item 346.12a, must be triple-packaged as described in Publication 52, Packaging Instruction 6C, must meet the packaging requirements in 49 CFR 173.199. * * *

* * * * *

135.5 Radioactive Materials

* * * * *

[Revise item a. to read as follows:]

a. Shipments may be sent using Priority Mail Express International, Priority Mail International, or First-Class Package International Service.

* * * * *

140 International Mail Categories

141 Definitions

* * * * *

141.4 Priority Mail International

* * * * *

[Revise the second paragraph to read as follows:]

Priority Mail International Flat Rate Envelopes and Small Flat Rate Priced Boxes provide customers with an economical means of sending correspondence, documents, printed matter, and lightweight merchandise items to foreign destinations. The maximum weight limit is 4 pounds. At the sender's option, extra services, such as additional merchandise insurance coverage, may be added to Priority Mail International Flat Rate Envelopes and Small Flat Rate Priced Boxes on a country-specific basis.

* * * * *

141.6 First-Class Package International Service

[Revise the last sentence to read as follows:]

* * * At the sender's option, extra services may be added on a country-specific basis.

* * * * *

142 Official Mail

* * * * *

142.4 General Secretariat of the Organization of American States (OAS)

* * * * *

[Revise the first sentence of item a. to read as follows:]

a. Only unregistered or registered First-Class Mail International and unregistered First-Class Package International Service items bearing the return address of the OAS General Secretariat and weighing not more than 4 pounds are accepted without postage when addressed to the OAS member countries listed in 142.4b.* * *

* * * * *

142.5 Pan American Sanitary Bureau Mail

[Revise the second sentence to read as follows:]

* * * Registered First-Class Mail International, as well as items in all other mail classes, must be prepaid by the mailer.

* * * * *

2 Conditions for Mailing

* * * * *

230 Priority Mail International

* * * * *

232 Eligibility

232.1 Priority Mail International Flat Rate Envelopes and Small Flat Rate Priced Boxes—General

[Delete the last sentence that states ''Registered Mail service is not available.''

* * * * *

232.3 Priority Mail International Medium and Large Flat Rate Boxes

[Delete the last sentence that states ''Registered Mail service is not available.''

* * * * *

232.5 Priority Mail International Parcels

[Delete the last sentence that states ''Registered Mail service is not available.''

* * * * *

250 First-Class Package International Service

* * * * *

252 Eligibility

* * * * *

252.5 Extra Services

* * * * *

[Delete 252.52 in its entirety and renumber current 252.53 as 252.52.]

* * * * *

253 Prices and Postage Payment Methods

* * * * *

253.2 Postage Payment Methods

* * * * *

253.23 Online Methods

253.231 Online Prices—Commercial Base or Commercial Plus Prices

[Revise the last sentence of the last paragraph to read as follows:]

* * * It does not apply to any other charges or fees or shipments made under a customized agreement.

* * * * *

254 Mail Preparation

* * * * *

254.3 Sealing

[Revise the text to read as follows:]

First-Class Package International Service items may be sealed at the sender's option. Mailpieces not sealed by conventional means, such as taping the open flaps for small packets, must be closed in such a manner as to prevent the contents from falling out or being damaged during postal handling and transport.

* * * * *

270 Free Matter for the Blind

* * * * *

272 Eligibility

* * * * *

272.6 Extra Services

* * * * *

[Revise item a. to read as follows:]

a. Registered Mail service for First-Class Mail International items.

* * * * *

3 Extra Services

* * * * *

330 Registered Mail

* * * * *

332 Availability

[Revise the text to read as follows:]

Note: Global Express Guaranteed Service Is Suspended as of September 29, 2024

Customers may purchase Registered Mail service for First-Class Mail International items that contain documents only, including Free Matter for the Blind items. Registered Mail service is not available with Global Express Guaranteed, Priority Mail Express International, or Priority Mail International service, First-Class Package International Service items, or any type of M-bag service. See Individual Country Listings for additional country-specific prohibitions and restrictions.

* * * * *

334 Processing Requests

334.1 Mailing Receipt and Registration Number

334.11 General Use

[Revise the text to read as follows:]

The Postal Service issues a receipt when it accepts a Registered Mail item. For individual transactions, use PS Form 3806, *Receipt for Registered Mail.* When presenting three or more items for registration at one time, the mailer may use PS Form 3877, *Firm Mailing Book for Accountable Mail* (see DMM 503). For First-Class Mail International items containing documents that require a customs form, the registered number is determined by the barcode printed on the customs form, and the accepting clerk applies a nonbarcoded Label 200–N, *Registered Mail,* to the mailpiece. For First-Class Mail International items containing documents that do not require a customs form, the accepting clerk applies Label 200, *Registered Mail,* a preprinted self-adhesive label with a 9-digit number series preceded by a Service Type Code of two alpha characters and followed by the two-character County Code ''US.'' Only labels printed by the Postal Service may be used on international Registered Mail items.

* * * * *

9 Inquiries, Indemnities, and Refunds

* * * * *

930 Indemnity Payments

* * * * *

934 Payments for Registered Mail

934.1 General Provisions

* * * * *

[Revise the title and text to read as follows:]

934.12 Items Erroneously Accepted as Registered Mail

For Registered Mail items accepted in error, indemnity may be paid under the conditions in 934.2.

* * * * *

943 Processing Refund Applications

943.1 Items Originating in the United States

* * * * *

[Revise item b. to read as follows:]

b. If there is reason to believe a registered item, insured item, or ordinary parcel originating in the United States was returned in error, or if the parcel was returned with no annotation showing reason for return, call 800–222–1811 to initiate an inquiry.

BILLING CODE 7710–12–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2

[ET Docket No. 21–232; FCC 25–71; FR ID 318540]

Protecting Against National Security Threats to the Communications Supply Chain Through the Equipment Authorization Program

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Federal Communications Commission (Commission or FCC) clarifies that rules prohibiting authorization of covered equipment include modular transmitters and adopts a prohibition on authorization of devices that include modular transmitters that are covered equipment. The Commission also adopts a procedure to limit previously granted authorizations of covered equipment to prohibit the continued importation and marketing of such equipment. It further discusses the broad scope of the prohibition on authorization of equipment identified on the Covered List by clarifying the term ''produced by'' as used in the Commission's rules concerning covered equipment and clarifying the prohibition on modification to previously authorized covered equipment.

DATES: Effective December 26, 2025.

FOR FURTHER INFORMATION CONTACT: Jamie Coleman of the Office of Engineering and Technology, at *Jamie.Coleman@fcc.gov* or 202–418–2705.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Second Report and Order,* in ET Docket No. 21–232, FCC 25–71, adopted on October 28, 2025, and released on October 29, 2025. The full text of this document is available for public inspection and can be downloaded at *https://docs.fcc.gov/public/attachments/FCC-25-71A1.pdf.* Alternative formats are available for people with disabilities (Braille, large

print, electronic files, audio format) by sending an email to *fcc504@fcc.gov* or calling the Commission's Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

Regulatory Flexibility Act. The Regulatory Flexibility Act of 1980, as amended (RFA), requires that an agency prepare a regulatory flexibility analysis for notice-and-comment rulemaking, unless the agency certifies that ''the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.'' Accordingly, the Commission has prepared a Final Regulatory Flexibility Analysis (FRFA) concerning the possible impact of the rule and policy changes contained in the *Second Report and Order* on small entities. The FRFA is set forth in Appendix C of the *Second Report and Order.*

Paperwork Reduction Act. This document contains proposed new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. The Commission, as part of its continuing effort to reduce paperwork burdens, will be inviting the general public and the Office of Management and Budget (OMB) to comment on any information collection requirements contained in this document. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the Commission will seek specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

Congressional Review Act. The Commission has determined, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, concurs, that this rule is ''non-major'' under the Congressional Review Act, 5 U.S.C. 804(2). The Commission will send a copy of the Second Report and Order and Further Notice of Proposed Rulemaking to Congress and the Government Accountability Office pursuant to 5 U.S.C. 801(a)(1)(A).

Synopsis

In November 2022, as part of the Commission's ongoing efforts to protect the security of America's communications networks and equipment supply chains, the Commission adopted the Equipment Authorization Security Report and Order, Order, and Further Notice of Proposed Rulemaking, ET Docket No. 21–232 and EA Docket 21–233 (EA Security R&O and FNPRM). In that item, the Commission adopted rules as part of its equipment authorization program to prohibit authorization of communications equipment that has been determined to ''pose an unacceptable risk to the national security of the United States or the security and safety of United States persons'' (covered equipment), which the Commission publishes in its Covered List. The rules constituted significant changes to the prior equipment authorization program. The Commission recognized that these revisions were only first steps and that further revisions should be considered to better ensure effective implementation of this prohibition. In the FNPRM portion of the item, the Commission sought comment on taking additional steps in the equipment authorization program to protect our nation's communications networks and supply chains. Building on the record received, Commission experience implementing the prohibition, and other recent Commission actions aimed at protecting our nation's communications networks and supply chain, the Commission adopted this *Second Report and Order* to take important next steps in modifying the equipment authorization program.

Background

Enacted in March 2020, the Secure Networks Act requires the Commission to publish a list of equipment and services that pose ''an unacceptable risk to the national security of the United States or the security and safety of United States persons'' based solely on specific determinations made by certain enumerated sources (Covered List). In June 2021, the Commission initiated this proceeding in Protecting Against National Security Threats to the Communications Supply Chain through the Equipment Authorization Program; Protecting Against National Security Threats to the Communications Supply Chain through the Equipment Authorization Program, ET Docket No. 21–232 & EA Docket No. 21–233, Notice of Proposed Rulemaking and Notice of Inquiry (2021) (EA Security NPRM). The Commission noted that this proceeding—which involves revising the Commission's equipment authorization program—is part of the Commission's overall efforts in carrying out its important role in protecting the security of America's equipment supply chains, and also is part of the ongoing efforts of Congress, the Executive Branch, and the Commission to identify and eliminate potential security vulnerabilities in communications networks and supply chains.

In the EA Security R&O and FNPRM, the Commission established several new rules to prohibit authorization of equipment identified on the Commission's Covered List developed pursuant to the Secure Networks Act. In particular, the Commission adopted several revisions to its part 2 rules concerning equipment authorization requirements, processes, and guidance that involve significant changes to the equipment authorization program. These changes include new requirements placed on applicants seeking equipment authorizations as well as ''responsible parties'' associated with equipment authorizations and entities that are identified on the Covered List. These rules also place significant new responsibilities on telecommunication certification bodies (TCBs), private third-party organizations recognized by the Commission and to which the Commission has delegated particular responsibilities pursuant to section 302 of the Communications Act. TCBs are now tasked with reviewing equipment authorization applications and certifying that the subject equipment complies with all applicable Commission requirements, both technical (such as based on information submitted by test labs) and non-technical (such as those prohibiting authorization of covered equipment).

These rules require that, going forward, no communications equipment produced by entities identified on the Covered List can obtain an equipment authorization unless the authorization is pursuant to the certification process, which would require filing an application with supporting data that TCBs review. Commission rules no longer permit authorization of any such equipment through the Supplier's Declaration of Conformity (SDoC) procedures, which does not require an application filing, nor can such equipment now qualify for any exemption from the need for an equipment authorization. To help implement the prohibition on authorization of any covered equipment, applicants seeking such authorization are required to make certain attestations (in the form of certifications) about the equipment for which they seek authorization–these include attesting that the equipment is not covered and indicating whether the applicant is an entity identified on the Covered List. To further help with implementation of the prohibition, the Commission adopted a requirement that each of the entities named on the Covered List file a report with the Commission identifying its

associated but unnamed entities (*e.g.,* its subsidiaries and affiliates). TCBs, pursuant to their responsibilities as part of the Commission's equipment authorization program, review the applications and must ensure that only devices that meet all of the Commission's applicable technical and non-technical requirements are ultimately granted authorization, and that none of these grants are for covered equipment. To help TCBs perform their responsibilities, and to provide guidance to TCBs, applicants, and other interested parties, the Commission provides guidance on what constitutes covered equipment, with delegated authority to the Office of Engineering and Technology (OET) and the Public Safety and Homeland Security Bureau (PSHSB) to update that guidance as appropriate. The Commission has also adopted streamlined revocation procedures for authorizations of equipment in cases in which an applicant submitted false statements or representations in the newly required attestations relating to the equipment for which they had sought authorization.

In adopting the EA Security R&O and FNPRM, the Commission decided not to require, at that time, that the applicant make attestations that address individual component parts contained within the applicant's equipment and it did not revoke previously granted authorizations of covered equipment. The Commission determined that both of these matters, along with several other issues, would receive further consideration.

The Commission sought comment on whether the presence of certain component parts would result in the device being covered equipment prohibited from authorization and, if so, how the prohibition should be implemented in the Commission's equipment authorization program. It also sought comment on the role that applicants and responsible parties would play were the Commission to prohibit authorization of devices that include certain component parts. In addition, it sought comment on the extent to which the Commission should revoke any previous authorizations of covered equipment and, if so, based on which considerations and procedures, and the scope such revocations should take, as well as the extent to which it should take into account supply chain considerations. It also sought comment on whether to require all applicants seeking equipment certification to have a U.S.-based responsible party to help ensure compliance with the Commission's equipment authorization program rules. Finally, the Commission sought comment on various other issues concerning implementation of the prohibition on authorization of covered equipment, such as applicants' provision of additional information on equipment; additional activities that TCBs should conduct in light of the goals of this proceeding; the review of authorizations after grant by TCBs through post-market surveillance; and enforcement of the Commission's newly-adopted rules.

Recent developments concerning the equipment authorization program. In 2023, Hikvision USA, Inc. and Dahua Technology USA, Inc. petitioned the U.S. Court of Appeals for the District of Columbia Circuit to review aspects of the Commission's EA Security R&O and FNPRM that affected them. *Hikvision USA, Inc.* v. *Federal Communications Commission,* 97 F.4th 938 (D.C. Cir. 2024). On April 2, 2024, the court issued a partial remand concerning one part of the Commission's decision. Specifically, the court vacated those portions of the Commission's decision defining ''critical infrastructure'' for purposes of understanding when video surveillance and telecommunications equipment produced by Hytera Communications Corporation (Hytera), Hangzhou Hikvision Digital Technology Company (Hikvision), and Dahua Technology Company (Dahua) (or their respective subsidiaries and affiliates) is used ''for the purpose of . . . physical security surveillance of critical infrastructure,'' statutory language drawn from Congress's proscription regarding such equipment as set forth in section 889(f)(3) of the National Defense Authorization Act of 2019 (NDAA). The court found that the Commission's definition of ''critical infrastructure'' was ''unjustifiably broad,'' and remanded those portions of the Equipment Authorization Security R&O to the Commission to ''comport its definition and justification for it'' with the NDAA statutory provision.

In May 2025, the Commission adopted Promoting the Integrity and Security of Telecommunications Certification Bodies, Measurement Facilities, and the Equipment Authorization Program, ET Docket No. 24–136 (2025) (EA Integrity R&O and FNPRM), in which it took steps, and proposed further steps, to promote the integrity and security of TCBs, measurement facilities (test labs), and laboratory accreditation bodies, which play an integral role in the Commission's equipment authorization program. Specifically, it adopted a prohibition on FCC recognition of any TCB, test lab, or laboratory accreditation body owned by, controlled by, or subject to the direction of a prohibited entity (as defined by the EA Integrity R&O and FNPRM). These entities are barred from participating in the Commission's equipment authorization program, including both the equipment certification process and SDoC process. To help ensure that the Commission has the necessary information to enforce this prohibition, the Commission expanded its reporting and certification requirements for all recognized TCBs, test labs, and laboratory accreditation bodies to certify to the Commission that they are not owned by, controlled by, or subject to the direction of a prohibited entity and to report all equity or voting interests of 5% or greater by any entity. It also adopted amendments to the rules to state that the Commission will not recognize—and will revoke any existing recognition of—any TCB, test lab, or laboratory accreditation body that fails to provide, or that provides a false or inaccurate, certification; or that fails to provide, or provides false or inaccurate, information regarding equity or voting interests of 5% or greater. In addition, it also clarified that Commission rules apply equally to all TCBs, test labs, and laboratory accreditation bodies regardless of the existence of MRAs or the physical location of the relevant facility. In the EA Integrity R&O and FNPRM, the Commission proposed and sought comment on further measures to safeguard the integrity of the equipment authorization program. Namely, it sought comment on whether to extend the prohibitions to also include entities subject to the jurisdiction of a foreign adversary and whether to expand the group of prohibited entities to include several additional lists from federal agencies or statutes. It also sought further comment on ways the Commission can facilitate and encourage more equipment authorization testing to occur at test labs located within the United States or United States allied countries. Finally, it sought further comment on post-market surveillance procedures to ensure compliance relating to prohibitions on authorization of covered equipment.

Report and Order

In the *Second Report and Order,* the Commission clarifies that rules prohibiting authorization of covered equipment include modular transmitters and adopts a prohibition on authorization of devices that include modular transmitters that are covered equipment. The Commission also adopts a procedure to limit previously granted authorizations of covered equipment to prohibit the continued importation and marketing of such

equipment. The Commission further discusses the broad scope of the prohibition on authorization of equipment identified on the Covered List by clarifying the term ''produced by'' as used in the rules concerning covered equipment and clarifying the prohibition on modification to previously authorized covered equipment.

Prohibition on Modular Transmitters on the Covered List

In general, the Commission permits authorization of transmitters as standalone devices that can then be incorporated into a host device that may either rely on the authorization of that modular transmitter or require its own additional authorization. Because modular transmitters are not required to obtain their own authorization as standalone devices, they can also be incorporated as a component in a host device that requires its own authorization. In this *Second Report and Order,* the Commission clarifies that the existing rules prohibiting the authorization of covered equipment include modular transmitters. The Commission also now further prohibits the authorization of any device that includes a modular transmitter when that modular transmitter is itself covered equipment. Under the existing attestation requirement, applicants and responsible parties will be required to attest that the subject equipment for which authorization is sought does not include such modular transmitters. The Commission finds that these rule modifications advance both FCC national security objectives and the congressional directive to prevent the authorization of equipment that poses an unacceptable risk to national security.

Background. In the EA Security NPRM adopted in June 2021, the Commission proposed to require that applicants, when seeking equipment authorization, ''attest that no equipment (including component part) is comprised of any 'covered' equipment,'' as identified on the Covered List. Many commenters opposed including an attestation requirement that considered component parts. In the subsequently adopted EA Security R&O and FNPRM, the Commission required that each applicant attest that the equipment for which it seeks authorization is not covered equipment, but it declined at that time, based on the state of the record and the need for further consideration, to require that the applicant attestation address individual component parts contained within the applicant's equipment. In declining to address component parts at that time, the Commission noted that it was seeking further comment on potentially including certain component parts within the scope of covered equipment.

In seeking comment, the Commission ''endeavor[ed] to ensure that equipment [ ] that include[s] component parts that pose an unacceptable risk to national security also be prohibited from authorization.'' Accordingly, the Commission, noting many of the concerns that commenters raised, sought comment on whether certain component parts, if included in equipment, would result in that equipment being covered equipment prohibited from authorization, and, if so, how the prohibition on the inclusion of any such component parts in equipment could be implemented in the Commission's equipment authorization program. In particular, the Commission sought comment on whether it should attempt to identify components based on a risk assessment (*e.g.,* examining whether the equipment contains components that are produced by entities identified on the Covered List and that process and retain data, or that only process data). The Commission recognized that if it prohibited certain component parts, it would need to provide guidance on which components would be prohibited.

The Commission focused much discussion on seeking comment on prohibiting authorization of equipment that incorporates as component parts certain types of modules produced by entities on the Covered List, whether authorized under the Commission's certification procedures or under the SDoC procedures. As explained, the Commission permits specific types of modules–modular transmitters–to be authorized as ''standalone'' equipment under existing rules (provided the equipment meets all applicable Commission requirements). A modular transmitter is a completely self-contained transmitter that only requires an input signal and power source to make it functional. 47 CFR 15.212. Commission rules provide that when an authorized modular transmitter is incorporated as a component part into another product, host, or device (*e.g.,* composite systems, personal computers), no further equipment authorization is required insofar as the final product, host, or device conforms to the terms of the module's authorization. Considering these existing rules, the Commission further noted that telecommunications or video surveillance equipment could contain, as component parts, one or more such modular transmitters produced by entities identified on the Covered List, or could be assembled as a composite system and contain such equipment.

The Commission specifically asked whether applicants (under certification procedures) and responsible parties (under SDoC procedures) should be required to use the Commission's equipment certification procedures to obtain an equipment authorization if the equipment or composite system includes, as a component part, a modular transmitter produced by an entity identified on the Covered List. Further, the Commission inquired whether it should apply this equipment certification requirement to any equipment that incorporates, as a component part, a previously authorized modular transmitter produced by these entities (*i.e.,* a modular transmitter authorized prior to adoption of the Commission's rules prohibiting authorization of covered equipment). It also asked about potential additional costs in time and money that such approaches would impose on device developers. Similarly, the Commission inquired whether composite systems should be treated in the same general manner as modular transmitters. Relatedly, the Commission asked whether it should deem as covered equipment (and thus prohibited from authorization) any equipment that includes a component part that could be authorized as equipment on a standalone basis but for the fact that the standalone equipment would be prohibited from authorization as covered equipment.

Further, the Commission asked for comment on the potential impact that prohibiting authorization of particular component parts (those that would be deemed covered equipment) would have on both equipment security and the economy. Specifically, it sought comment and data on the effect of prohibiting particular component parts on the U.S. market (including quantity and market share of modules or other component parts that might be prohibited in products intended for sale in the U.S. market), the availability and costs of substitute modules, devices, and component parts from suppliers that are not identified on the Covered List, and the average lifespan/product cycle of affected final products. It also inquired about the different impacts on both equipment security and the economy that would be expected depending on the breadth of the scope of a component part(s) prohibition. In addition, the Commission generally sought comment on supply chain considerations, including whether the Commission should take into account

how any prohibition of modular transmitters, if implemented immediately without advance notice or opportunity for the development of alternative sources of equipment, could have a deleterious effect on the public interest.

The Commission received many comments on potentially including as covered equipment certain component parts produced by entities identified on the Covered List. Commenters include equipment and vendor associations, industry associations, U.S. equipment producers, consultants, producers of covered equipment, small businesses, and think tanks.

Discussion. Consistent with the potential approach on modules discussed in the EA Security R&O and FNPRM, the Commission concludes that any ''modular transmitter'' (as defined in 47 CFR 15.212) that is covered equipment is prohibited from authorization under the rules. Furthermore, it concludes that authorizing equipment that includes such a modular transmitter would effectively be authorizing the transmitter. As such, the Commission prohibits from authorization any modular transmitter that is covered equipment, and any product, host, or device that incorporates a modular transmitter that is covered equipment, regardless of any previous authorization of the modular transmitter. This includes any transmitter identified on the Covered List that otherwise *could* be authorized as a module or on a standalone basis regardless of whether it *is* authorized. The Commission believes this particular approach is necessary to ensure that modular transmitters that pose an unacceptable risk to national security or the safety and security of U.S. persons cannot be imported or marketed in the United States either as standalone devices or as incorporated into another device. And it believes that this approach ensures that it is addressing the national security threats that Congress intended for the Commission to address in the Secure Equipment Act, when Congress directed the Commission to not ''approve any application for equipment authorization for [covered] equipment.''

Section 15.212 provides for a standalone authorization of modular transmitters under the Commission's certification procedures. 47 CFR 15.212. The Commission concludes that modular transmitters, as defined in § 15.212, constitute communications equipment insofar as they are used in fixed or mobile broadband networks and provide high-speed, switched, broadband telecommunications capability that enables users to originate and receive high-quality voice, data, graphics, and video telecommunications using any technology with connection speeds of at least 200 kbps in either direction. To the extent that a modular transmitter falls within the scope of what constitutes covered communications equipment under Commission rules, the modular transmitter is itself covered equipment and thereby prohibited from authorization under the rules. 47 CFR 2.903(a), 1.50001(d).

Many modular transmitters are designed to be incorporated into equipment to enable that equipment to have certain critical or essential functionalities associated with the provision of fixed or mobile services. While such transmitters could be independently authorized, they are not required to be. Given the conclusion that Commission rules prohibit from authorization standalone transmitters that fall within the scope of what constitutes covered equipment, the Commission correspondingly prohibits from authorization equipment that includes, as a component part, a transmitter that meets the requirements for a modular transmitter, even if the transmitter is not independently authorized as a module. The Commission notes that cellular IoT devices would fall within the scope of modular transmitters under Commission rules. This approach is consistent with the Commission's suggested approach in the EA Security R&O and FNPRM to prohibit authorization of any equipment that includes a component part that could be authorized on a standalone basis but for the fact that the standalone equipment would be prohibited from authorization. Because this communications equipment is covered equipment, preventing authorization of equipment that includes this covered equipment is necessary and appropriate, and consistent with the Commission's authority under the Act, the Secure Networks Act, and the Secure Equipment Act to prohibit authorization of equipment that poses an unacceptable risk to national security, and covered equipment more specifically. That is, the Commission concludes that granting an authorization for equipment that includes a modular transmitter that is covered equipment would, in effect, be granting an authorization to equipment that, by inclusion of this covered modular transmitter, would pose an unacceptable risk to national security and would undermine Congress's goals in the Secure Equipment Act when it directed the Commission to cease authorizing covered equipment. The Commission agrees with the Heritage Foundation that such equipment can ''present[ ] risks to national security that are equally severe as risks from finished products.'' Authorizing devices containing one or more covered modular transmitters is tantamount to authorizing the modular transmitter(s). It makes little sense for the Commission to prohibit certain modular transmitters from obtaining independent authorization, but to allow authorization for devices containing exactly those modular transmitters. In this sense, the Commission agrees with the Hudson Institute that continued authorization of devices that contain these modular transmitters ''undermine the intent of'' the Secure Networks Act and the Secure Equipment Act.

The Commission therefore modifies its rules to explicitly prohibit authorization of any modular transmitter that is covered equipment, and any product, host, or device that incorporates a modular transmitter that is covered equipment, regardless of whether the Commission previously authorized that modular transmitter. Modular transmitters, as defined in § 15.212 of the Commission's rules, that can be authorized under the rules as standalone devices (each consisting of a completely self-contained transmitter device) and incorporated into other devices, include ''single-modular transmitters,'' ''split-modular transmitters,'' and ''limited modular transmitters.'' The Commission also includes in its prohibition modular transmitters that operate pursuant to licensed radio services rules. The Commission concludes that this prohibition furthers the objectives of the equipment security rules, as well as the congressional directive to prohibit authorization of equipment that poses an unacceptable risk to national security. In adopting rules to prohibit use of modular transmitters in equipment for which authorization is sought, the Commission is in effect prohibiting composite systems that include modular transmitters that are covered equipment.

The Commission rejects the contention of some commenters either that the Commission may not have the requisite legal authority to prohibit use of any component parts or that only the enumerated sources identified in the Secure Networks Act should make determinations on whether component parts constitute covered equipment. First, the only component parts that the Commission is prohibiting with the rules announced in this item are those

that are themselves covered equipment, which have already been determined to pose ''an unacceptable risk to the national security of the United States or the security and safety of United States persons.'' 47 U.S.C. 1601(b); 47 CFR 1.50002(b)(1). While the Commission lacks independent authority to add new equipment to the Covered List without the specific determination of an enumerated source or direction from Congress, it concludes that the Commission has the requisite RF equipment expertise to reach the conclusion that whatever unacceptable risks are posed by modular transmitters are posed regardless of whether those modular transmitters are initially approved as standalone devices or incorporated within a product, host, or device, as modular transmitters are generally intended to be. In issuing this prohibition, the Commission is not making impermissible national security determinations. The Commission is rather using its decades-long technical expertise concerning RF equipment and familiarity with its equipment authorization process to close a loophole that would undermine both the Secure Equipment Act's directives and Congress's and the Executive Branch's determinations as to national security risks.

Second, the Secure Equipment Act directed the Commission to ''adopt rules in the [EA Security NPRM proceeding].'' Congress thus directed the Commission to adopt final rules in a proceeding which had proposed to require that applicants ''attest that no equipment (including component parts) is comprised of any 'covered' equipment, as identified on the [Covered List].'' Had Congress (incongruously) intended for the Commission to *not* authorize certain covered equipment but *to* authorize devices containing covered equipment, Congress could have prohibited the Commission from addressing components parts, as proposed. Congress chose not to.

Third, even in the absence of the Secure Equipment Act, the Commission concludes that the Commission possesses sufficient legal authority under the Act to implement the prohibitions contained in this section. As explained in the EA Security R&O and FNPRM, section 302 of the Act authorizes the Commission to make regulations ''consistent with the public interest, convenience, and necessity . . . governing the interference potential of [radio frequency] devices.'' This public interest regulatory authority implicates other statutory responsibilities, including the missions for which the Commission was created—promoting national defense and the safety of life and property; interests clearly furthered by prohibiting the importation and marketing of devices that pose ''unacceptable risks to the national security of the United States or the safety and security of United States persons.'' 47 U.S.C. 1601. Other statutory authorities confirm this. *See, e.g.,* 47 U.S.C. 303(g), 303(e), 303(r), 154(i). If there was any doubt that the Commission possessed this pre-existing authority, Congress confirmed it with the Secure Equipment Act. The Secure Equipment Act's direction of Congress to adopt rules in the EA Security NPRM ratified the Commission's tentative legal conclusions and decisively established the Commission's legal authority to enact the proposals in the EA Security NPRM, one of which was to require attestation as to component parts.

Limitation on Existing Authorization of Covered Equipment

The Commission sets forth a process to place limitations on previously granted authorizations of covered equipment to prohibit the continued importation and marketing of such equipment. Through this approach, the Commission aims to effectively address the established national security risks posed by previously authorized covered equipment while minimizing the impact on users. The goal is to mitigate potential national security risks associated with covered equipment that was authorized prior to adoption of the EA Security R&O and FNPRM in November 2022.

Background. In the EA Security R&O and FNPRM, the Commission adopted a prohibition on the authorization, going forward, of covered equipment, and concluded that it has the requisite legal authority under the Act, confirmed by the Secure Equipment Act, to revoke existing authorizations, but it did not at that time revoke any existing authorizations. The Commission also adopted streamlined revocation procedures for equipment authorizations granted after adoption of the prohibition if the applicant included a false statement or representation that the equipment for which it had sought and obtained a grant is not ''covered'' equipment. The Commission sought further comment on the issues raised in the EA Security NPRM concerning revocation of covered equipment authorizations granted prior to the Commission's adoption of a prohibition on authorization of such equipment. It sought to expand the record that developed in response to the EA Security NPRM, particularly in light of the actions taken and guidance provided in the EA Security R&O and FNPRM, and sought comment on several different issues concerning revocation.

Specifically, the Commission sought comment on the scope of revocation of existing authorizations the Commission should consider, whether there might be situations that would warrant revocation in certain circumstances and, if so, how the Commission should identify particular covered equipment for which continued authorization poses an unacceptable risk to national security. Further, considering the potential risk to national security, it asked whether the Commission should consider revoking all existing authorizations of covered equipment and, if so, how such revocations could be implemented. The Commission also asked to what extent revocation of any particular equipment should depend on establishing a reimbursement program. It also inquired how supply chain issues or consumer-related concerns should figure into the Commission's considerations, and what information and data might be useful to such a consideration. The Commission requested comment on an appropriate transition period in the event that the Commission were to decide to revoke any existing authorizations of covered equipment. In addition, the Commission sought comment on what process to use for revocation of existing authorizations, and whether it should adopt different or expedited procedures than provided for under § 2.939 of the Commission's rules. Further, the Commission asked about the best enforcement mechanisms of any revocation, such as an enforcement policy to address violations related to the continued marketing, sale, or operation of covered equipment for which authorization was revoked. The Commission asked what educational and outreach efforts may be needed to inform the public of any revocations of covered equipment authorizations.

The Commission also requested comment on possible alternative approaches to full revocation of existing authorizations. It sought comment on what it termed a ''partial'' revocation by which the continued importation and marketing of previously authorized covered equipment would be prohibited without impacting the continued use of such equipment. The Commission noted that such an approach could eliminate user device replacement costs while also promoting national security concerns related to the continued importation and marketing of this equipment.

Commenters, including CTA, CTIA, TIA, Competitive Carriers Association, and NCTA generally oppose any

widespread revocation of existing authorizations of covered equipment that would require removal and replacement of equipment in use, while other commenters, including ITI, ZTE, Hikvision, and Dahua, contend that any revocation of existing authorizations is precluded by the Secure Equipment Act or otherwise would violate due process. Some commenters are supportive of a broad revocation of covered equipment authorizations. Finally, some commenters state that, apart from retroactive revocation of existing authorizations (including prohibiting continued use of equipment) or revocation of authorizations of specific equipment based on extraordinary circumstances, the Commission could consider some form of prospective approach to revocation of covered equipment that would prohibit the future marketing or sale of currently authorized covered equipment.

Discussion. To promote the goal of mitigating the national security risks associated with previously authorized covered equipment in our nation's infrastructure and communications supply chain, the Commission adopts a procedure whereby the Commission can limit previously granted authorizations of covered equipment to prohibit the continued importation and marketing, without prohibiting the continued use of such devices. This is a simplified, prospective approach along the general lines of the prospective ''partial'' revocation proposal on which the Commission sought comment in the EA Security R&O and FNPRM that would not affect consumers' continued use or operation of devices they already possess. Absent a process by which the Commission can restrict the continued importation and marketing of covered equipment, it is concerned that already-authorized covered equipment devices would continue to flow into our nation and into the infrastructure and communications supply chain, which could contribute to further unacceptable risks. These devices have been determined to pose ''an unacceptable risk to the national security of the United States or the security and safety of United States persons'' alongside all other covered equipment. 47 U.S.C. 1601(b)(1). The Commission further concludes that it is insufficient to rely solely on the obsolescence of particular equipment models to abate the inflow of more covered equipment. Years-old covered devices are still widely sold in the U.S., suggesting obsolescence is not a quick process. Older models of covered equipment poses an unacceptable risk today when imported or marketed in the United States, not only when such equipment is new to the market. Waiting many years for this equipment to become obsolete would not address the present ''unacceptable risks. The Commission agrees with the Heritage Foundation that certain previously authorized devices that are now considered covered equipment ''likely remains marketable in the United States'' and ''may present continuing national security threats.'' Furthermore, as FDD noted, such devices, embedded within American communications networks, ''can still undergo firmware updates, conduct remote communication, and transmit data back to their manufacturers.''

In the EA Security R&O and FNPRM, the Commission concluded that it has the requisite authority under the Act to review any existing authorization for covered equipment, and to determine the necessity for revoking such authorization, and that the Commission can undertake such revocation pursuant to current rules. Under its current rules in § 2.939(a), the Commission has already established procedures to revoke an equipment authorization because of conditions coming to the attention of the Commission which would warrant it in refusing to grant an original application. 47 CFR 2.939(a)(4). In the case of previously authorized covered equipment, the implementation of the Covered List and the resulting prohibition on authorization of equipment identified on the Covered List create conditions that would warrant the Commission in refusing to grant an original application for any covered equipment. 47 CFR 1.50002, 2.903. The Commission does not today alter the existing process to revoke covered equipment, as proposed in the EA Security R&O and FNPRM, which in most cases involve the process generally afforded radio licenses. 47 CFR 2.939(b). Instead, the Commission adopts a new process well-tailored to address unacceptable national security risks without disrupting continued use or operation of devices.

The Commission revises the rules to adopt a procedure to limit the scope of an existing authorization of covered equipment to prohibit continued importation or marketing of such equipment, without revoking the underlying authorization. The Commission has in various proceedings adopted prohibitions on the manufacture and importation of equipment where doing so served the public interest. Section 302 of the Act authorizes the Commission—consistent with the public interest, convenience, and necessity—to promulgate regulations applicable to the manufacture, import, sale, offer for sale, shipment, and use of radiofrequency devices and to prohibit the manufacture, import, sale, offer for sale, shipment, or use of such devices that fail to comply with those regulations. 47 U.S.C. 302a(b). Consistent with existing regulatory procedures to revoke an equipment authorization, the Commission finds, through this rulemaking proceeding, it has the requisite authority to evaluate, craft, and implement this process to limit the scope of an existing authorization of covered equipment to prohibit continued importation and marketing of such equipment, and to establish a procedure to apply this limitation as appropriate. This action is consistent with ''the public interest'' insofar as it protects American communications networks from devices specifically determined to ''pose an unacceptable risk to the national security of the United States or the security and safety of United States persons.'' 47 U.S.C. 1601(b).

While commenters generally oppose widespread revocation of existing authorizations of covered equipment, several commenters recommend that, instead of widespread revocation of existing authorizations, or revoking particular authorizations because of ''extraordinary'' circumstances, the Commission should take a prospective approach to addressing existing authorizations along the lines suggested in the EA Security R&O and FNPRM, under which the Commission would only consider whether to prohibit in some manner the future importation and marketing of previously authorized covered equipment while allowing the continued operation of equipment already in use. This allows the Commission to avoid the ''[e]conomic harms associated with removing and replacing Covered List equipment.'' The Commission agrees, and adopts such an approach in this *Second Report and Order*—limiting equipment authorizations to prohibit importation and marketing, while allowing for continued operation of the relevant devices.

The Commission revises § 2.939 of its rules by adopting a mechanism to limit the continued importation and marketing of such previously authorized covered equipment. The Commission delegates authority to OET and PSHSB to apply such prohibitions pursuant to the framework and process described here. The Commission revises §§ 2.803 and 2.1204 to clarify that equipment that has been subject to such a

limitation cannot be marketed or imported.

For such previously authorized covered equipment, OET and PSHSB shall provide, through public notice, a brief analysis of the relevant factors that would justify limitation on the authorization of previously authorized covered equipment prohibiting the importation and marketing of such. In each such public notice, OET and PSHSB will specify the class, type, or other description sufficient to identify the devices, including reference to all devices included in a specific Covered List entry, targeted for potential limitations on importation and marketing. The Commission directs OET and PSHSB to include in the analysis, and seek comment on, any relevant public interest factors, such as economic and supply chain considerations. This analysis will primarily rely upon the details of the relevant specific determination(s) used to inform a given entry on the Covered List. In the public interest analysis, OET and PSHSB must give particular weight to the fact that the relevant equipment was determined to pose ''an unacceptable risk to the national security of the United States or the safety and security of United States persons.'' 47 U.S.C. 1601(b)(1). After all, as the Supreme Court has noted in another context, ''[i]t is obvious and unarguable that no governmental interest is more compelling than the security of the Nation,'' and the Commission has a long history of relying on national security determinations to inform its public interest analysis. *See Haig* v. *Agee,* 453 U.S. 280, 307 (1981).

Nonetheless, in certain instances, OET and PSHSB could conclude that other factors outweigh the national security risks. The most relevant sources of information for these other public interest factors are the given specific determinations, and accompanying analyses or rules, themselves. For example, OET and PSHSB recently sought public input on updating the Covered List to include certain equipment related to connected vehicles pursuant to a Commerce Department determination. In the same rule in which the Commerce Department made its specific determinations regarding ''unacceptable risks,'' the Commerce Department also delayed the effectiveness of its own restrictions, explaining that ''determining the scope of the prohibitions required a balancing of the need to address the undue or unacceptable risk posed by foreign adversary involvement in the connected vehicles supply chain with the impact on the public and industry.'' Department of Commerce, Bureau of Industry and Security, *Securing the Information and Communications Technology and Services Supply Chain: Connected Vehicles,* 90 FR 5360, 5363 (Jan. 16, 2025). While such balancing cannot, under the Secure Equipment Act, affect the Commission's updates to the Covered List and prohibition on granting new equipment authorizations to covered equipment, the Commission may consider such countervailing economic concerns when implementing the prohibitions for already-authorized devices outlined in this rule.

While the specific determination must be the centerpiece of OET and PSHSB's analysis, they also will fully consider evidence in the Commission's record regarding whether to adopt a limitation on an existing authorization with regard to continued importation or marketing of the equipment. The public notice must provide an opportunity for public comment for a minimum of 30 days and may provide an opportunity for reply comments if OET and PSHSB find it warranted. After the end of the comment period(s), OET and PSHSB will review all relevant information, request additional information if needed, and make their determination as to whether to implement the prohibition on importation and marketing, describing what equipment is subject to the limitation, and providing the reasons for such. So as to promote regulatory certainty and the continued confidence of the public in the Commission's efforts to secure the communications equipment supply chain, OET and PSHSB should take reasonable steps to conclude these proceedings expeditiously after the end of the relevant comment period.

The Commission directs OET and PSHSB to, as soon as practicable, institute proceedings to determine whether to apply these prohibitions to some or all of the equipment currently on the Covered List. The Commission also directs OET and PSHSB to, simultaneous with any future addition of equipment to the Covered List or as soon as practicable thereafter, issue a Public Notice requesting public comment on whether to apply these prohibitions to such equipment.

For any devices for which an existing equipment authorization is limited to prohibit continued importation and marketing (which includes sale), the relevant responsible parties would be obligated to ensure compliance with such prohibition. 47 CFR 2.803(a). For equipment certifications, the responsible party is the party to whom the grant of certification is issued, also referred to as the ''grantee.'' 47 CFR 2.909(a). As for SDoC authorizations of covered equipment, the responsible party could be the manufacturer, the assembler, the importer, retailers, original equipment manufacturers, or the party performing modifications to the equipment. 47 CFR 2.909(b). OET and PSHSB should include in the initial public notice proposed timelines by which the responsible parties must cease all importation and marketing activities and specifically seek comment on such, thereby encouraging dialogue not only with the responsible parties but also with the relevant manufacturers, importers, distributors, retailers, and other interested entities. Such timeline considerations should include, in addition to the underlying national security concerns, factors such as the quantity of devices that have already been imported into the U.S. and are available for or being held for marketing or sale, new or recently updated device models that are *en* route to the U.S. or pending shipment, and devices that are subject to executed distribution, marketing, or sales agreements but have not yet entered the supply chain although they are contemplated for such.

The Commission finds that this process will help to ensure that OET and PSHSB are fully considering the ramifications of the implementation of the proposed prohibition, not only with regard to the relevant grantee or responsible party, but also the public at large. The Commission is confident that this process will thereby effectuate an outcome that remains consistent with the original specific determination regarding the equipment pursuant to the Secure Networks Act and the Secure Equipment Act while balancing the public interest factors regarding the supply chain and consumer interests. Because this limitation on existing authorizations would not result in the revocation of an existing authorization of covered equipment, the continued use of such equipment that is already in the hands of users would remain authorized. The Commission thereby eliminates several complexities and reduces the challenges that commenters suggested would arise if the only manner to prohibit the importation and marketing of already-authorized covered equipment was to engage in revocations that also prohibit the use or operation of such covered equipment.

Broad Scope of the Prohibition on Authorization of Equipment Identified on the Covered List

Interpreting whether equipment is ''produced by'' a specified entity. To help implement the prohibition on

authorization of any covered equipment, applicants seeking equipment certification are required to make certain attestations (in the form of written and signed certifications) about the equipment for which they seek authorization—these include certifying that the equipment is not covered equipment and stating whether the applicant is an entity identified on the Covered List (either a named entity or a subsidiary or affiliate of the named entity). Congress, through the Secure Networks Act, directed the Commission to add to the Covered List equipment defined in 2019 NDAA § 889, all of which is described as ''produced by'' certain entities: Huawei Technology Company, ZTE Corporation, Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, Dahua Technology Company, and their affiliates and subsidiaries. Accordingly, for purposes of their attestations, applicants necessarily must determine whether the equipment is ''produced by'' these entities. Similarly, to ensure that no covered equipment is authorized through the SDoC process, responsible parties that obtain authorizations under SDoC procedures are required to attest that the equipment is not ''produced by'' any entity identified on the Covered List.

FDD notes the potential ''ambiguity surrounding the term 'produced by' in the context of covered equipment.'' FDD expresses concern that the term might not include certain complex forms of foreign adversary control and encourages the Commission to formally adopt a broad definition of the term to ensure that the Commission addresses ''instances in which covered vendors serve as original equipment manufacturers or design contractors for companies not listed on the Covered List.'' The Commission made clear in the EA Security R&O and FNPRM that, considering the national security concerns implicated in this proceeding, it was taking a ''broad and inclusive'' approach to interpreting the scope of what constitutes covered equipment. The Commission also expressed concern regarding authorization of re-branded or re-labeled (''white labeled'') covered equipment produced by entities identified on the Covered List, and it made clear that re-branding or ''white labeling'' of any covered equipment does not change the status of whether the equipment is covered equipment.

Consistent with the approach in the EA Security R&O and FNPRM, when carrying out their responsibilities associated with the prohibition on authorization of covered equipment under § 2.903(a), or any of the required attestations related to covered equipment, applicants, responsible parties, and entities named in their reporting obligations should take a broad view of the term ''produced by.'' This is consistent with Congress's intent to guard against a broad array of equipment through 2019 NDAA § 889 and the Secure Networks Act. Although the Commission declines to adopt a comprehensive definition of ''produced by'' as FDD suggests, it clarifies here that in determining whether a device is ''produced by'' a particular entity, a broad interpretation likely includes substantial responsibility for or control over any major stage of the process by which a device comes into existence. Accordingly, ''produced by'' is not limited to the manufacture or assembly of a device. For example, a device would generally be considered to have been ''produced by'' Huawei if Huawei designed, manufactured, assembled, or developed the device. Furthermore, the Commission ordinarily assumes that any entity submitting an application for certification or serving as the responsible party for SDoC would be considered among those producing the device. It is entirely possible that a device would be understood as ''produced by'' more than one entity. Determining whether a device is produced by a particular entity could be based on multiple factors or the totality of circumstances, particularly when considering the role played by multiple entities to bring a device into existence. The Commission notes that this analysis would not necessarily apply to future listings of equipment on the Covered List. Such listings may use different language that indicates an intent to capture a larger or smaller set of communications equipment.

Modification of equipment, including permissive changes. In the EA Security R&O and FNPRM, the Commission adopted revisions to § 2.932 regarding modifications to equipment (*e.g.,* changes in the design, circuitry, or construction of the device) and § 2.1043 concerning changes to certified equipment, such as ''permissive changes.'' The Commission noted that a modification to authorized equipment could result in the later identification of that equipment as covered and determined that it could not allow the continued authorization of modified equipment if, at the time of such modification, the equipment is covered equipment. The Commission adopted requirements, similar to the revised provisions of § 2.911, that all applications or requests to modify already certified equipment include a written and signed certification that the equipment is not prohibited from receiving an equipment authorization pursuant to § 2.903. 47 CFR 2.1043(b)(2)(i)(B), (b)(3)(i)(B). It also required an affirmative or negative statement as to whether the applicant is identified on the Covered List, as well as the written and signed certifications required under § 2.911(d)(6) regarding an agent for service of process within the United States. 47 CFR 2.1043(b)(2)(i)(C), (b)(3)(i)(C). The Commission adopted the same provisions for requests for Class II and III permissive changes pursuant to § 2.1043. The Commission found these revisions sufficient to prevent modified equipment from maintaining authorization when such modifications occur at a time after which such equipment has been identified as posing a risk and thereby appearing on the Covered List.

The Commission now clarifies that its intent adopting these provisions was to prohibit modification, including permissive changes, to previously authorized covered equipment or equipment that would become covered as a result of such modification or permissive change. This clarification is consistent with Congress's direction to the Commission in the Secure Equipment Act to ''clarify that it will no longer review or approve any application for equipment authorization for'' covered equipment. Any application for authorization of covered equipment is thereby prohibited under § 2.903, including applications for permissive changes. For permissive changes that do not require an application and thereby are not reviewed by the Commission, the prohibition still applies because such changes are approved by the Commission if they meet the requirements of that type of change as provided in the rules (*i.e.,* they are ''approved by rule''). The Commission further modifies the rule revisions of §§ 2.932 and 2.1043 adopted in the EA Security R&O and FNPRM to clarify this prohibition.

Benefits and Costs

The Commission finds the targeted measures of this *Second Report and Order* will advance national security objectives in an efficient manner without incurring substantial costs. The measures on the prohibition of modular transmitters and on the broad scope of the prohibition on authorization of equipment produced by entities identified on the Covered List are clarifications of the measures from the EA Security R&O and FNPRM. As such,

these represent minimal changes that simply ensure realization of the original benefits and costs of the EA Security R&O and FNPRM. The measures on limitation of existing authorization of covered equipment will involve additional work in compliance from affected entities. As previously stated, the Commission finds that these measures are necessary because obsolescence is insufficient to completely address issues with already authorized covered equipment. However, the Commission does believe that obsolescence will mitigate compliance costs due to the relatively short equipment life cycles. By delegating authority to OET and PSHSB to limit the scope of the marketing and importation prohibition, the Commission is ensuring that any costs to affected entities are specific enough to meet critical national security needs but are still narrow. Moreover, the Commission emphasizes that it is currently not requiring manufacturers to replace equipment in the hands of consumers. In doing so, the Commission is tailoring its rules in such a way as to make sure that the public benefits outweigh any costs that the prohibition will impose.

Ordering Clauses

Accordingly, *it is ordered,* pursuant to the authority found in sections 4(i), 301, 302, 303, 403, and 503 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 301, 302a, 303, 403, 503, and the Secure Equipment Act of 2021, Public Law 117–55, 135 Stat. 423, 47 U.S.C. 1601 note, that this *Second Report and Order is hereby adopted.*

It is further ordered that the Commission's Office of the Secretary, *shall send* a copy of this *Second Report and Order,* including the Final Regulatory Flexibility Analyses, to the Chief Counsel of the Small Business Administration Office of Advocacy.

List of Subjects in 47 CFR Part 2

Administrative practice and procedures, Communications, Communications equipment, Reporting and recordkeeping requirements, Telecommunications, and Wiretapping and electronic surveillance.

Federal Communications Commission.

Marlene Dortch,

Secretary.

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 2 as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

■ 1. The authority citation for part 2 continues to read as follows:

Authority: 47 U.S.C. 154, 302a, 303, and 336 unless otherwise noted.

■ 2. Amend § 2.803 by revising the introductory text of paragraph (b) to read as follows:

§ 2.803 Marketing of radio frequency devices prior to equipment authorization.

* * * * *

(b) *General rule.* No person may market a radio frequency device unless the radio frequency device is authorized pursuant to a valid FCC equipment authorization that has not been limited through the procedures described in § 2.939(e) of this chapter, and:

* * * * *

■ 3. Amend § 2.903 by:
■ a. Revising paragraph (a);
■ b. Redesignating paragraphs (b) through (d) as paragraphs (d) through (f); and
■ c. Adding new paragraphs (b) and (c).

The revisions and additions read as follows:

§ 2.903 Prohibition on authorization of equipment on the Covered List.

(a) All equipment on the Covered List, as established pursuant to § 1.50002 of this chapter, is prohibited from obtaining an equipment authorization under this subpart. This includes equipment that:

(1) Has been certified as a modular transmitter; or

(2) Meets the modular transmitter requirements of § 15.212 of this chapter and could be certified as a modular transmitter.

(b) All equipment that incorporates equipment meeting the descriptions in paragraph (a)(1) or (2) of this section is prohibited from obtaining an equipment authorization under this subpart.

(c) The prohibitions in paragraphs (a) and (b) of this section apply to:

(1) Equipment that would otherwise be subject to certification procedures;

(2) Equipment that would otherwise be subject to Supplier's Declaration of Conformity procedures; and

(3) Equipment that would otherwise be exempt from equipment authorization.

* * * * *

■ 4. Amend § 2.932 by revising paragraphs (b) and (c) to read as follows:

§ 2.932 Modification of equipment.

* * * * *

(b) Except for equipment prohibited from authorization pursuant to § 2.903, permissive changes may be made in certificated equipment, and equipment that was authorized under the former type acceptance procedure, pursuant to § 2.1043.

(c) Permissive changes may be made in equipment that was authorized under the former notification procedures unless such equipment meets one of the criteria in paragraphs (c)(1) or (2) of this section. The grantee must submit information documenting continued compliance with the pertinent requirements upon request.

(1) The equipment is currently subject to authorization under the certification procedure; or

(2) The equipment is prohibited from authorization pursuant to § 2.903.

* * * * *

■ 5. Amend § 2.933 by revising paragraph (b)(5) to read as follows:

§ 2.933 Change in identification of equipment.

* * * * *

(b) * * *

(5) The photographs required by § 2.1033(b)(10) or (c)(14) showing the exterior appearance of the equipment, including the operating controls available to the user and the identification label. Photographs of the construction, the component placement on the chassis, and the chassis assembly are not required to be submitted unless specifically requested.

* * * * *

■ 6. Amend § 2.939 by:
■ a. Revising the section heading;
■ b. Revising the introductory text of paragraph (a); and
■ c. Adding paragraph (e).

The revisions and additions read as follows:

§ 2.939 Revocation, withdrawal, or limitation of equipment authorization.

(a) The Commission may revoke, or place limitations pursuant to paragraph (e) of this section on, any equipment authorization:

* * * * *

(e) The Office of Engineering and Technology (OET) and the Public Safety and Homeland Security Bureau (PSHSB) may place limitations on an existing authorization for covered equipment authorizations to prohibit continued importation or marketing, pursuant to the following procedures:

(1) OET and PSHSB will issue a public notice announcing the intent to limit the scope of equipment authorizations to prohibit the further importation or marketing of specified devices identified by class, type, or other description sufficient to identify the devices.

(2) The public notice will include an assessment of the impact of the proposed prohibition with consideration of public interest factors, including: the unacceptable risks the equipment was found to pose, the economic and supply chain impacts, and any other criteria as specified by the Commission. The public notice should give particular weight to the specific determination(s), and any accompanying rules or analyses, through which the relevant equipment was added to the Covered List.

(3) The public notice will provide for a public comment period of no less than 30 days.

(4) OET and PSHSB will review the submissions, may request additional information as may be appropriate, and must make their determination as to whether to place limitations on the existing authorization to prohibit the further importation or marketing of the relevant devices, providing the reasons for such decision.

■ 7. Amend § 2.1043 by revising the introductory text of paragraph (b) to read as follows:

§ 2.1043 Changes in certificated equipment.

* * * * *

(b) Except for equipment prohibited from authorization pursuant to § 2.903, three classes of permissive change may be made in certificated equipment without requiring a new application for and grant of certification. Any of these classes of changes must not result in a change in identification.

* * * * *

■ 8. Amend § 2.1204 by revising paragraph (a)(1) to read as follows:

§ 2.1204 Import conditions.

* * * * *

(a) * * *

(1) The radio frequency device is authorized pursuant to a valid FCC equipment authorization that has not been limited through the procedures described in § 2.939(e).

* * * * *

[FR Doc. 2025–21001 Filed 11–24–25; 8:45 am]

BILLING CODE 6712–01–P

Proposed Rules

Federal Register
Vol. 90, No. 225
Tuesday, November 25, 2025

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

FEDERAL RESERVE SYSTEM

12 CFR Parts 225, 238, and 252

[Regulations Y, LL, and YY; Docket No R–1873]

RIN 7100–AH05

Enhanced Transparency and Public Accountability of the Supervisory Stress Test Models and Scenarios; Modifications to the Capital Planning and Stress Capital Buffer Requirement Rule, Enhanced Prudential Standards Rule, and Regulation LL; Extension of Comment Period

AGENCY: Board of Governors of the Federal Reserve System (Board).

ACTION: Notice of Proposed Rulemaking; extension of comment period.

SUMMARY: On November 18, 2025, the Board published in the **Federal Register** a request for public comment on the models used to conduct the Board's supervisory stress test, changes to those models to be implemented in the 2026 stress test, and proposed changes to enhance the transparency and public accountability of the Board's stress testing framework (the proposal). The Board has determined that an extension of the comment period until February 21, 2026, is appropriate.

DATES: Comments must be received on or before *February 21, 2026.*

ADDRESSES: You may submit comments, identified by Docket No. R–1873 and RIN 7100–ah05, by any of the following methods:

- *Agency website: https://www.federalreserve.gov/apps/proposals/.* Follow the instructions for submitting comments, including attachments. *Preferred Method.*
- *Email: publiccomments@frb.gov.* You must include the docket number and RIN in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail, Courier and Hand Delivery:* Benjamin W. McDonough, Deputy Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

Instructions: All public comments are available from the Board's website at *https://www.federalreserve.gov/apps/proposals/* as submitted, unless modified for technical reasons. Accordingly, comments will not be edits to remove any identifying or contact information. Public comments may also be viewed electronically or in paper form in Room M–4365A, 2001 C Street NW, Washington, DC 20551, between 9:00 a.m. and 5:00 p.m. on federal weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments. For users of TTY–TRS, please call 711 from any telephone, anywhere in the United States.

FOR FURTHER INFORMATION CONTACT: Doriana Ruffino, Assistant Director (202) 452–5235, Hillel Kipnis, Assistant Director, (202) 452–2924, John Simone, Lead Financial Institution Policy Analyst, (202) 245–4256, Ben Ranish, Principal Economist, (202) 973–6964, Nathan Palmer, Senior Economist, (202) 785–6089, and Theo Pistner, Financial Institution and Policy Analyst II, (202) 941–1825, Division of Supervision and Regulation; William Bassett, Senior Associate Director, (202) 736–5644, Bora Durdu, Deputy Associate Director, (202) 452–3755, Elena Afanasyeva, Principal Economist, (202) 736–1971, Levent Altinoglu, Principal Economist, (202) 721–4503, and Sam Jerow, Senior Financial Analyst, (202) 245–4299, Division of Financial Stability; Asad Kudiya, Associate General Counsel, (202) 360–6887, Julie Anthony, Senior Special Counsel, (202) 658–9400, Jonah Kind, Senior Counsel, (202) 452–2045, Brian Kesten, Senior Counsel (202) 843–4079, Katherine Di Lucido, Senior Attorney (202) 253–5994, Legal Division. Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551. For users of TDD–TYY, please call 711 from any telephone, anywhere in the United States.

SUPPLEMENTARY INFORMATION: On November 18, 2025, the Board published in the **Federal Register** a proposal inviting public comment on the models used to conduct the Board's supervisory stress test, changes to those models to be implemented in the 2026 stress test, and proposed changes to enhance the transparency and public accountability of the Board's stress testing framework.[1] The proposal stated that the comment period would close on January 22, 2026. The Board has received requests to extend the comment period. An extension of the comment period will provide additional opportunity for the public to consider the proposal and prepare comments, including to address the questions posed by the Board. Therefore, the Board is extending the end of the comment period for the proposal from January 22, 2026, to February 21, 2026.

By order of the Board of Governors of the Federal Reserve System, acting through the Secretary of the Board under delegated authority.

Benjamin W. McDonough,

Deputy Secretary of the Board.

[FR Doc. 2025–21087 Filed 11–24–25; 8:45 am]

BILLING CODE 6210–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2025–5032; Project Identifier AD–2025–01042–R]

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2025–06–04, which applies to all Airbus Helicopters Model AS350B, AS350B1, AS350B2, AS350B3, AS350BA,

[1] Board, Enhanced Transparency and Public Accountability of the Supervisory Stress Test Models and Scenarios; Modifications to the Capital Planning and Stress Capital Buffer Requirement Rule, Enhanced Prudential Standards Rule, and Regulation LL, 90 FR 51856 (November 18, 2025), *https://www.federalregister.gov/documents/2025/11/18/2025-20211/enhanced-transparency-and-public-accountability-of-the-supervisory-stress-test-models-and-scenarios.*

AS350D, AS355E, AS355F, AS355F1, AS355F2, AS355N, AS355NP, EC130B4, and EC130T2 helicopters. AD 2025–06–04 requires repetitively inspecting the main gearbox (MGB) bevel wheel and the MGB magnetic plug for particles and performing corrective actions if applicable and prohibits installing an affected MGB unless certain requirements are met. Since the FAA issued AD 2025–06–04, the FAA determined that AD 2025–06–04 contains errors in the interval compliance times. This proposed AD would continue to require the actions of AD 2025–06–04 and revise the interval compliance times. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by January 9, 2026.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–5032; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For European Union Aviation Safety Agency (EASA) material identified in this proposed AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* website *easa.europa.eu.* You may find this material on the EASA website at *ad.easa.europa.eu.*
- You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Parkway, Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

FOR FURTHER INFORMATION CONTACT: Dan McCully, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (404) 474–5548; email: *william.mccully@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under the **ADDRESSES** section. Include ''Docket No. FAA–2025–5032; Project Identifier AD–2025–01042–R'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may revise this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Dan McCully, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2025–06–04, Amendment 39–22992 (90 FR 14723, April 4, 2025) (AD 2025–06–04), for all Airbus Helicopters Model AS350B, AS350B1, AS350B2, AS350B3, AS350BA, AS350D, AS355E, AS355F, AS355F1, AS355F2, AS355N, AS355NP, EC130B4, and EC130T2 helicopters. AD 2025–06–04 was prompted by EASA AD 2023–0044, dated February 28, 2023 (EASA AD 2023–0044) (also referred to as the MCAI), issued by EASA, which is the Technical Agent for the Member States of the European Union. The MCAI states that after a fleet design review for detection of particles in the MGB, it was determined that additional maintenance actions are necessary to improve detection of particles in MGB that have certain part-numbered planet gear bearings installed. AD 2025–06–04 requires repetitively inspecting the MGB bevel wheel and the MGB magnetic plug for the presence of particles, close monitoring of the MGB magnetic plug if particles are detected, and replacing the epicyclic module if necessary. The AD also prohibits installing an affected MGB unless certain requirements are met. The agency issued AD 2025–06–04 to detect and correct the presence of particles in the MGB which, if not addressed, could result in reduced or loss of control of the helicopter.

Actions Since AD 2025–06–04 Was Issued

Since the FAA issued AD 2025–06–04, the FAA determined that there are errors in the interval compliance times in Table 1 to paragraph (h)(6)(i) of AD 2025–06–04. Airbus Helicopters Model AS350B, AS350B1, AS350BA, AS350D, AS355E, AS355F, AS355F1, AS355F2, AS355N, and AS355NP helicopters should have an interval compliance time of 100 hours time-in-service (TIS) instead of 30 hours TIS. Also, Airbus Helicopters Model EC130B4 helicopters should have an interval compliance time of 100 hours TIS instead of 150 hours TIS.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed EASA AD 2023–0044, which specifies procedures for repetitive borescope visual inspections of the bevel wheel of the affected MGB for particles, collecting and analyzing any particles detected, and depending on the results, accomplishing further actions, accomplishing corrective action in accordance with the ASB, or contacting AH [Airbus Helicopters] for further corrective action. EASA AD 2023–0044 also specifies procedures for accomplishing a borescope visual

inspection of the bevel wheel of the affected MGB for particles following the detection of any particles at the MGB magnetic plug during accomplishment of certain maintenance tasks and depending on the results, taking corrective action. EASA AD 2023–0044 also prohibits installing an affected MGB on any helicopter unless certain requirements are met.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Proposed AD Requirements in This NPRM

This proposed AD would continue to require the actions of AD 2025–06–04, except that this proposed AD would revise the interval compliance times. The actions proposed in this AD are specified in EASA AD 2023–0044, described previously, as incorporated by reference, except for any differences identified as exceptions in the regulatory text of this proposed AD. See ''Differences Between this Proposed AD and the MCAI'' for a discussion of the general differences included in this proposed AD.

Differences Between This Proposed AD and the MCAI

The MCAI applies to Model AS350BB helicopters, whereas this proposed AD would not because that model does not have an FAA type certificate.

Where Note 1 in the material referenced in the MCAI specifies the option of 1 mechanical technician and 1 crew member, for this proposed AD, the pilot is only permitted to turn the tail rotor (b) because the other actions specified in the note must be accomplished by persons authorized under 14 CFR 43.3. Therefore, for the purposes of this proposed AD, the owner/operator (pilot) may turn the tail rotor (b) and must enter compliance with the applicable paragraph of this proposed AD in the helicopter maintenance records in accordance with 14 CFR 43.9(a) and 91.417(a)(2)(v). The pilot may perform this action because it only involves turning the tail rotor (b). This action can be performed equally well by a pilot or a mechanic. This action is an exception to the FAA's standard maintenance regulations.

This proposed AD would not require complying with paragraph (2) of the MCAI. Instead, this proposed AD would require repetitively inspecting the MGB magnetic plug for particles and, if there is any particle, accomplishing a borescope visual inspection, as specified in paragraphs (h)(6)(i) and (ii) of this proposed AD.

Where the material referenced in the MCAI specifies contacting Airbus Helicopters for a certain action, this proposed AD would require accomplishing action in accordance with a method approved by the FAA, EASA, or Airbus Helicopters' EASA Design Organization Approval.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate EASA AD 2023–0044 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2023–0044 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in EASA AD 2023–0044 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2023–0044. Material required by EASA AD 2023–0044 for compliance will be available at *www.regulations.gov* by searching for and locating Docket No. FAA–2025–5032 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 522 helicopters of U.S. registry.

The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Visually inspect MGB bevel wheel	1 work-hour × $85 per hour = $85	$0	$85	$44,370
Repetitively inspect magnetic plugs of the MGB.	1 work-hour × $85 per hour = $85	0	85	44,370

The new requirements of this proposed AD add no additional economic burden.

The FAA estimates the following costs to do any on-condition actions that would be required based on the results of the proposed inspections. The agency has no way of determining the number of helicopters that might need these on-condition actions:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Collect particles and perform metallurgical analysis.	6 work-hours × $85 per hour = $510.	$0	$510.
Close monitoring	2 work-hours × $85 per hour = $170.	$0	$170 per close monitoring cycle.
Perform visual borescope inspection of MGB bevel wheel.	1 work-hour × $85 per hour = $85	$0	$85.
Replace epicyclic module	56 work-hours × $85 per hour = $4,760.	$50,524 (overhauled)	$55,284 per module.

ON-CONDITION COSTS—Continued

Action	Labor cost	Parts cost	Cost per product
Replace bevel reduction module ...	56 work-hours × $85 per hour = $4,760.	$18,500 (overhauled)	$23,260 per module.

Certain corrective action could vary significantly from helicopter to helicopter. The FAA has no data to determine the costs to accomplish the corrective action.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2025–06–04, Amendment 39–22992 (90 FR 14723, April 4, 2025); and

■ b. Adding the following new airworthiness directive:

Airbus Helicopters: Docket No. FAA–2025–5032; Project Identifier AD–2025–01042–R.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 9, 2026.

(b) Affected ADs

This AD replaces AD 2025–06–04, Amendment 39–22992 (90 FR 14723, April 4, 2025) (AD 2025–06–04).

(c) Applicability

This AD applies to all Airbus Helicopters Model AS350B, AS350B1, AS350B2, AS350B3, AS350BA, AS350D, AS355E, AS355F, AS355F1, AS355F2, AS355N, AS355NP, EC130B4, and EC130T2 helicopters, certificated in any category.

(d) Subject

Joint Aircraft System Component (JASC) Code 6320, Main Rotor Gearbox.

(e) Unsafe Condition

This AD was prompted by an assessment performed by the manufacturer which determined that additional maintenance actions are necessary to improve detection of particles in the main gearbox (MGB) with certain part-numbered planet gear bearings installed. The FAA is issuing this AD to detect and correct particles in the MGB. The unsafe condition, if not addressed, could result in reduced or loss of control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraphs (h) and (i) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency AD 2023–0044, dated February 28, 2023 (EASA AD 2023–0044).

(h) Exceptions to EASA AD 2023–0044

(1) Where EASA AD 2023–0044 defines ''serviceable MGB'' as ''An affected MGB which has accumulated less than 330 flight hours (FH) since new (first installation on a helicopter), or since an overhaul, or since an inspection in accordance with the instructions of the ASB'', this AD requires replacing that text with ''An affected MGB which has accumulated less than 330 total hours time-in-service (TIS) since new (zero total hours TIS), since last overhaul if an overhaul has been accomplished, or since last inspection and any specified corrective action in accordance with the instructions of the ASB if an inspection and any specified corrective action by following the instructions of the ASB have been accomplished''.

(2) Where EASA AD 2023–0044 requires compliance in terms of flight hours, this AD requires using TIS.

(3) Where EASA AD 2023–0044 refers to its effective date, this AD requires using May 9, 2025 (the effective date of AD 2025–06–04).

(4) Where Note 1 in the material referenced in paragraph (1) of EASA AD 2023–0044 specifies the option of 1 mechanical technician and 1 crew member, for this AD, the pilot is only permitted to turn the tail rotor (b). The owner/operator (pilot) holding at least a private pilot certificate may turn the tail rotor (b) and must enter compliance with paragraph (g) of this AD in the helicopter maintenance records in accordance with 14 CFR 43.9(a) and 91.417(a)(2)(v). The record must be maintained as required by 14 CFR 91.417, 121.380, or 135.43. All other actions specified in Note 1 in the material referenced in paragraph (1) of EASA AD 2023–0044 must be accomplished by persons authorized under 14 CFR 43.3.

(5) Where Note 2 in the material referenced in paragraph (1) of EASA AD 2023–0044 specifies contacting Airbus Helicopters [AH] for further instructions if the bottom of the radius (a6) of the bevel wheel (a3) or head screws (a4) (see Figure 2) are not clearly visible, this AD requires, before further flight, accomplishing action in accordance with a method approved by the FAA, EASA, or Airbus Helicopters' EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(6) Instead of complying with paragraph (2) of EASA AD 2023–0044, comply with the actions required by paragraphs (h)(6)(i) and (ii) of this AD.

(i) After May 9, 2025 (the effective date of AD 2025–06–04), and within the compliance time intervals specified in table 1 to paragraph (h)(6)(i) of this AD, visually inspect the MGB magnetic plug for particles.

Note 1 to paragraph (h)(6)(i): Aircraft Maintenance Manual (AMM) task 60–00–00, 6–2A, or AMM task 60–00–00, 6–2, or Work Card 60–00–00–602, as applicable, provides information regarding inspecting the MGB magnetic plug.

TABLE 1 TO PARAGRAPH (h)(6)(i)—MGB MAGNETIC PLUG INSPECTIONS

Helicopter model(s)	Initial compliance times (after May 9, 2025, the effective date of AD 2025–06–04) (hours TIS)	Interval compliance times (thereafter) (hours TIS)
AS350B, AS350B1, AS350BA, and AS350D	5	100
AS355E, AS355F, AS355F1, AS355F2, AS355N, and AS355NP	5	100
AS350B2 and AS350B3	10	100
EC130B4	5	100
EC130T2	5	150

(ii) If there is any particle as a result of any MGB magnetic plug inspection required by paragraph (h)(6)(i) of this AD, before further flight, borescope inspect the bevel wheel of the affected MGB for particles as required by paragraph (1) of EASA AD 2023–0044. If there is any particle as a result of the borescope inspection of the bevel wheel, before further flight, collect and analyze the particles as required by paragraph (3) of EASA AD 2023–0044.

(7) Where paragraph (3) of EASA AD 2023–0044 specifies ''If, during any inspection as required by paragraph (1) or (2) of this AD'', this AD requires replacing that text with ''If, during any inspection as required by paragraph (1) of this AD''.

(8) Where the material referenced in paragraph (3) of EASA AD 2023–0044 specifies performing a metallurgical analysis and contacting Airbus Helicopters if collected particles cannot be characterized with Work Card 20–08–01–601, this AD does not require contacting Airbus Helicopter but does require performing the metallurgical analysis.

(9) Where the material referenced in paragraph (3) of EASA AD 2023–0044 contains a special flight permit provision, this AD does not allow that provision but instead requires the special flight permit limitations in paragraph (j) of this AD.

(10) Where the material referenced in paragraph (3) of EASA AD 2023–0044 specifies contacting Airbus Helicopters if the damaged module cannot be identified, this AD requires, before further flight, accomplishing action in accordance with a method approved by the FAA, EASA, or Airbus Helicopters' EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(11) Where paragraph (5) of EASA AD 2023–0044 states ''to contact AH for corrective action(s) instructions, and within the compliance time specified therein, to accomplish those instructions accordingly'', this AD requires replacing that text with ''accomplishing corrective actions in accordance with a method approved by the FAA, EASA, or Airbus Helicopters' EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature''.

(12) Where paragraph (7) of EASA AD 2023–0044 states ''since new (first installation a helicopter), or since an overhaul, or since an inspection in accordance with the instructions of the ASB, as applicable, and, thereafter, as required by this AD'', this AD requires replacing that text with ''since new (zero total hours time-in-service), or since last overhaul if an overhaul has been accomplished, or since last inspection and any specified corrective action in accordance with the instructions of the ASB if an inspection and any specified corrective action by following the instructions of the ASB have been accomplished, and thereafter as required by this AD''.

(13) This AD does not adopt the ''Remarks'' section of EASA AD 2023–0044.

(i) No Reporting Requirement

Although the material referenced in EASA AD 2023–0044 specifies to submit certain information to the manufacturer, this AD does not require that action.

(j) Special Flight Permit

A special flight permit may be issued in accordance with 14 CFR 21.197 and 21.199 to permit a one-time, non-revenue flight to a location where the actions required by this AD can be accomplished. This flight must be performed with only essential flight crew.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (l) of this AD and email to: *AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(l) Additional Information

For more information about this AD, contact Dan McCully, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: (404) 474–5548; email: *william.mccully@faa.gov.*

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(3) The following material was approved for IBR on May 9, 2025 (90 FR 14723; April 4, 2025).

(i) European Union Aviation Safety Agency (EASA) AD 2023–0044, dated February 28, 2023.

(ii) [Reserved]

(4) For EASA material identified in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; phone: +49 221 8999 000; email: *ADs@easa.europa.eu;* website: *easa.europa.eu.* You may find the EASA material on the EASA website at *ad.easa.europa.eu.*

(5) You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Parkway, Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

(6) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on November 20, 2025.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain The Boeing Company Model 737–8, 737–9, and 737–8200 (737 MAX) airplanes. This proposed AD was prompted by reports indicating cracks in the bear strap and stub frame at the forward galley door cutout. This proposed AD would require inspections for existing repairs; an inspection for any crack of the fuselage skin, bear strap, and stub frame; repetitive inspections for any crack of the bear strap and stub frame; and applicable on-condition actions. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by January 9, 2026.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–3439; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For Boeing material identified in this proposed AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com.*
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2025–3439.

FOR FURTHER INFORMATION CONTACT: Luis Cortez-Muniz, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3958; email: *luis.a.cortez-muniz@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under the **ADDRESSES** section. Include ''Docket No. FAA–2025–3439; Project Identifier AD–2025–00463–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Luis Cortez-Muniz, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3958; email: *luis.a.cortez-muniz@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA has received reports indicating that cracking was found in the bear strap and stub frame at the forward galley door cutout, from station (STA) 290 to STA 296 and between stringer S–8R and stringer S–9R, on certain Model 737–600, –700, –700C, –800, –900, and –900ER series airplanes (737NG airplanes). Boeing investigated and found surface scratches on the bear strap, which were inadvertently created while removing sealant and adhesive during hot bonding process of fuselage skin and bear strap. The presence of these scratches, along with local elevated stresses in the bear strap, cause a reduction in fatigue life and early cracking. Although no cracks have been reported in the same areas on The Boeing Company Model 737 MAX airplanes, The Boeing Company Model 737 MAX airplanes have similar design and build process, making The Boeing Company Model 737 MAX airplanes susceptible to the same crack condition. This condition, if not addressed, may result in the inability of a principal structural element to sustain limit load, which could adversely affect the structural integrity of the airplane.

Boeing issued Requirements Bulletin 737–53A1383 to address the identified unsafe condition for The Boeing Company Model 737NG airplanes. Subsequently, the FAA issued AD 2021–02–13, Amendment 39–21396 (86 FR10776, February 23, 2021) to require inspections of the fuselage skin and bear strap at the forward galley door between certain stations for cracks, and applicable on-condition actions, in accordance with Boeing Alert Requirements Bulletin 737–53A1383 RB, Revision 1, dated February 19, 2020.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin 737–53A1420 RB, dated February 13, 2025. This material specifies procedures for doing

Option 1 or Option 2 actions as specified below, and applicable on-condition actions. On-condition actions include replacing the stub frame, doing alternative inspections, and doing a repair.

- Option 1—Perform initial external general visual inspection (GVI) of the fuselage skin and gap cover for any repair, initial internal GVI of the bear strap and stub frame for any repair, and repetitive internal high frequency eddy current (HFEC) inspections of the bear strap and stub frame for any crack.
- Option 2—Perform initial external GVI of the fuselage skin and gap cover for any repair, initial internal GVI of the stub frame for any repair, initial external HFEC inspection of the fuselage skin for any crack, initial external low frequency eddy current (LFEC) inspection of the bear strap for any crack, initial internal HFEC inspection of the stub frame for any crack, and repetitive internal HFEC inspections of the bear strap and stub frame for any crack.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in the material already described, except for any differences identified as exceptions in the regulatory text of this proposed AD. For information on the procedures and compliance times, see this material at *regulations.gov* under Docket No. FAA–2025–3439.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 476 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Option 1—Initial inspections ..	31 work-hours × $85 per hour = $2,635.	$0	$2,635	$1,254,260.
Option 2—Initial inspections ..	7 work-hours × $85 per hour = $595.	0	$595	$283,220.
Repetitive internal HFEC inspections of the bear strap and stub frame per Option 1 or Option 2.	29 work-hours × $85 per hour = $2,465 per inspection cycle.	0	$2,465 per inspection cycle ...	$1,173,340 per inspection cycle.

The FAA estimates the following costs to do any necessary replacements that would be required based on the results of the proposed inspection. The agency has no way of determining the number of aircraft that might need this replacement:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replace the stub frame	35 work-hours × $85 per hour = $2,975	$1,359	$4,334

The FAA has received no definitive data that would enable the agency to provide cost estimates for the on-condition repairs specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

The Boeing Company: Docket No. FAA–2025–3439; Project Identifier AD–2025–00463–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 9, 2026.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 737–8, 737–9, and 737–8200 airplanes, certificated in any category, as identified in Boeing Alert Requirements Bulletin 737–53A1420 RB, dated February 13, 2025.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by reports indicating cracks in the bear strap and stub frame at the forward galley door cutout, from station (STA) 290 to STA 296 and between stringer S–8R and stringer S–9R. The FAA is issuing this AD to address any crack in the fuselage skin, bear strap, and stub frame at the forward galley door cutout from STA 290 to STA 296 and between stringer S–8R and stringer S–9R, before it reaches critical length. The unsafe condition, if not addressed, may result in the inability of a principal structural element to sustain limit load, which could adversely affect the structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified in paragraph (h) of this AD: At the applicable times specified in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 737–53A1420 RB, dated February 13, 2025, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin 737–53A1420 RB, dated February 13, 2025.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletin 737–53A1420, dated February 13, 2025, which is referred to in Boeing Alert Requirements Bulletin 737–53A1420 RB, dated February 13, 2025.

(h) Exceptions to Requirements Bulletin Specifications

(1) Where the Compliance Time columns of the tables in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 737–53A1420 RB, dated February 13, 2025, refers to the original issue date of Requirements Bulletin 737–53A1420 RB, this AD requires using the effective date of this AD.

(2) Where Boeing Alert Requirements Bulletin 737–53A1420 RB, dated February 13, 2025, specifies contacting Boeing for repair instructions or for alternative inspections: This AD requires doing the repair, or doing the alternative inspections and applicable on-condition actions using a method approved in accordance with the procedures specified in paragraph (i) of this AD.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (j) of this AD. Information may be emailed to: *AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR–520, Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(j) Related Information

For more information about this AD, contact Luis Cortez-Muniz, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3958; email: *luis.a.cortez-muniz@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Requirements Bulletin 737–53A1420 RB, dated February 13, 2025.

(ii) [Reserved]

(3) For Boeing material identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on October 20, 2025.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

[Docket No. FAA–2025–3985; Project Identifier AD–2025–00493–T]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain The Boeing Company Model 737–8, 737–9, and 737–8200 (737 MAX) airplanes. This proposed AD was prompted by reports of cracks in the bear strap at the forward upper corner of the forward galley door cutout. This proposed AD would require an inspection of the fuselage skin for existing repairs and applicable on-condition actions. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by January 9, 2026.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2025–3985; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments

received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

• For Boeing material identified in this proposed AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com.*

• You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available at *regulations.gov* under Docket No. FAA–2025–3985.

FOR FURTHER INFORMATION CONTACT: Luis Cortez-Muniz, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3958; email: *luis.a.cortez-muniz@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under the **ADDRESSES** section. Include ''Docket No. FAA–2025–3985; Project Identifier AD–2025–00493–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Luis Cortez-Muniz, Aviation Safety Engineer, FAA, 2200 South 216th St., Des Moines, WA 98198; phone: 206–231–3958; email: *luis.a.cortez-muniz@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA has received reports of cracks in the bear strap at the forward upper corner of the forward galley door cutout on Model 737–600, –700, –700C, –800, –900, and –900ER series (737NG) airplanes. A Boeing investigation determined that the cracks were caused by high operating stresses in the fuselage skin and bear strap due to stress concentration at the corner of the door cutout. Although no cracks have been reported in the same areas on Boeing 737 MAX airplanes, they have a similar design and build process, making those airplanes susceptible to the same crack condition. This condition, if not addressed may lead to the inability of a principal structural element to sustain limit loads and adversely affect the structural integrity of the airplane.

Boeing issued Alert Requirements Bulletin 737–53A1407 RB, dated December 20, 2022, to address the identified unsafe condition for Model 737NG airplanes. Subsequently, the FAA issued AD 2024–06–01, Amendment 39–22706 (89 FR 27376, April 17, 2024) to require an inspection of the fuselage skin and the bear strap at the forward galley door cutout forward upper corner for existing repairs, and applicable related investigative and corrective actions, as specified in Boeing Alert Requirements Bulletin 737–53A1407 RB, dated December 20, 2022.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Material Incorporated by Reference Under 1 CFR Part 51

The FAA reviewed Boeing Alert Requirements Bulletin 737–53A1408 RB, dated December 20, 2024. This material specifies procedures for an external general visual inspection of the fuselage skin for any repair and applicable on-condition actions. On-condition actions include repetitive detailed inspection for cracking of the fuselage skin; repetitive external surface high frequency eddy current (HFEC) inspections of the fuselage skin at certain fastener locations and the fuselage skin and bear strap along the edge of door corner radius for cracking; repetitive external subsurface low frequency eddy current (LFEC) inspection of the bear strap at certain fastener locations for cracking; and obtaining instructions from Boeing for alternative inspections or for crack repair.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in the material already described except for any differences identified as exceptions in the regulatory text of this proposed AD. For information on the procedures and compliance times, see this material at *regulations.gov* under Docket No. FAA–2025–3985.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 471 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
External general visual inspection for repairs.	1 work-hour × $85 per hour = $85.	$0	$85	$40,035.

ESTIMATED COSTS—Continued

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
External detailed and eddy current inspections for cracks.	Up to 4 work-hours × $85 per hour = $340 per inspection cycle.	0	Up to $340	Up to $160,140 per inspection cycle.

The FAA has received no definitive data on which to base the cost estimates for the on-condition repairs or for the alternative inspections specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

The Boeing Company: Docket No. FAA–2025–3985; Project Identifier AD–2025–00493–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by January 9, 2026.

(b) Affected ADs

None.

(c) Applicability

This AD applies to The Boeing Company Model 737–8, 737–9, and 737–8200 airplanes, certificated in any category, as identified in Boeing Alert Requirements Bulletin 737–53A1408 RB, dated December 20, 2024.

(d) Subject

Air Transport Association (ATA) of America Code53, Fuselage.

(e) Unsafe Condition

This AD was prompted by reports of cracks in the bear strap at the forward upper corner of the forward galley door cutout. The FAA is issuing this AD to address cracks in the fuselage skin and bear strap, which may lead to the inability of the principal structural element to sustain limit loads and adversely affect the structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Except as specified by paragraph (h) of this AD: At the applicable times specified in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 737–53A1408 RB, dated December 20, 2024, do all applicable actions identified in, and in accordance with, the Accomplishment Instructions of Boeing Alert Requirements Bulletin 737–53A1408 RB, dated December 20, 2024.

Note 1 to paragraph (g): Guidance for accomplishing the actions required by this AD can be found in Boeing Alert Service Bulletin 737–53A1408, dated December 20, 2024, which is referred to in Boeing Alert Requirements Bulletin 737–53A1408 RB, dated December 20, 2024.

(h) Exceptions to Requirements Bulletin Specifications

(1) Where Compliance Time columns of the tables in the ''Compliance'' paragraph of Boeing Alert Requirements Bulletin 737–53A1408 RB, dated December 20, 2024, refer to the original issue date of Requirements Bulletin 737–53A1408 RB, this AD requires using the effective date of this AD.

(2) Where Boeing Alert Requirements Bulletin 737–53A1408 RB, dated December 20, 2024, specifies contacting Boeing for repair instructions or for alternative inspections, this AD requires doing the repair, or doing the alternative inspections and applicable on-condition actions, using a method approved in accordance with the procedures specified in paragraph (i) of this AD.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, AIR–520, Continued Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Continued Operational Safety Branch, send it to the attention of the person identified in paragraph (j)(1) of this AD. Information may be emailed to: *AMOC@faa.gov*. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by The Boeing Company Organization Designation Authorization (ODA) that has been authorized by the Manager, AIR–520, Continued Operational Safety Branch, FAA, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(j) Related Information

(1) For more information about this AD, contact Luis Cortez-Muniz, Aviation Safety Engineer, FAA, 2200 South 216th St., Des

Moines, WA 98198; phone: 206–231–3958; email: *luis.a.cortez-muniz@faa.gov.*

(2) Material identified in this AD that is not incorporated by reference is available at the address specified in paragraph (k)(3) this AD.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Boeing Alert Requirements Bulletin 737–53A1408 RB, dated December 20, 2024.

(ii) [Reserved]

(3) For Boeing material identified in this AD, contact Boeing Commercial Airplanes, Attention: Contractual & Data Services (C&DS), 2600 Westminster Blvd., MC 110–SK57, Seal Beach, CA 90740–5600; telephone 562–797–1717; website *myboeingfleet.com.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on October 20, 2025.

Peter A. White,

Deputy Director, Integrated Certificate Management Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2025–4543; Airspace Docket No. 25–ANM–144]

RIN 2120–AA66

Modification of Class E Airspace; Driggs/Reed Memorial Airport, Driggs, ID

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify the Class E airspace extending upward from 700 feet above the surface at Driggs/Reed Memorial Airport, Driggs, ID. Additionally, this action proposes an administrative amendment to update the airport's Class E airspace legal description. These actions would support the safety and management of instrument flight rules (IFR) operations at the airport.

DATES: Comments must be received on or before January 9, 2026.

ADDRESSES: Send comments identified by FAA Docket No. [FAA–2025–4543] and Airspace Docket No. [25–ANM–144] using any of the following methods:

* *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instructions for sending your comments electronically.

* *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation, 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

* *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

* *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Docket: Background documents or comments received may be read at *www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FAA Order JO 7400.11K, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.*

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify Class E airspace to support IFR operations at Driggs/Reed Memorial Airport, ID.

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically, or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this proposed rulemaking. Before acting on this proposal, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The FAA may change this proposal in light of the comments it receives.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

Availability of Rulemaking Documents

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Operations office (see **ADDRESSES** section for address, phone number, and hours of operations). An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal

Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 2200 S 216th Street Des Moines, WA 98198.

Incorporation by Reference

Class E5 airspace designations are published in paragraph 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document proposes to amend the current version of that order, FAA Order JO 7400.11K, dated August 4, 2025, and effective September 15, 2025. These updates would be published in the next update to FAA Order JO 7400.11. FAA Order JO 7400.11K, which lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points, is publicly available as listed in the **ADDRESSES** section of this document.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 that would modify the Class E airspace extending upward from 700 feet above the surface at Driggs/Reed Memorial Airport, ID. The Class E airspace surrounding the airport should be reduced due to modifications made to the airport's instrument flight procedures (IFP) that allow for more condensed containment within regulatory airspace.

The northern extension should be narrowed by 4.3 miles and shortened by 5.5 miles to more appropriately contain the Area Navigation (RNAV) (Global Positioning System [GPS])-A approach procedure. The southwest extension should be narrowed by 1.3 miles, shortened by 1.3 miles, and shifted a half mile west to more appropriately contain the RNAV (GPS) Runway 4 approach procedure. The southeastern third of the existing airspace should be removed, as it is no longer needed for the containment of IFPs. The western portion of the airspace should be removed beyond the airport's 4.8-mile radius, approximately between the airport's 220° and 315° radials, as it's no longer needed for IFP containment.

Finally, the airport's geographic location within its Class E airspace legal description should be updated to match the FAA's database.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1G, ''FAA National Environmental Policy Act Implementing Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11K, Airspace Designations and Reporting Points, dated August 4, 2025 and effective September 15, 2025, would be amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANM ID E5 Driggs, ID [Amended]

Driggs/Reed Memorial Airport, ID
(Lat. 43°44′47″ N, long. 111°05′29″ W)

That airspace extending upward from 700 feet above the surface within an area 1.2 miles northwest and 3.4 miles southeast of the airport's 028° bearing extending to its 5.8-mile radius, within an area 3.4 miles southeast and 2.7 miles northwest of the airport's 208° bearing extending to 11.7 miles southwest, within an area between the airport's 241° bearing clockwise to its 326° bearing extending to the airport's 4.8-mile radius, and within an area 1.7 miles west and 3 miles east of the airport's 345° bearing extending to 8.9 miles north of the airport.

BILLING CODE 4910–13–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 1d

[Docket No. RM22–20–000]

Duty of Candor

AGENCY: Federal Energy Regulatory Commission.

ACTION: Withdrawal of notice of proposed rulemaking and termination of rulemaking proceeding.

SUMMARY: The Federal Energy Regulatory Commission is withdrawing a notice of proposed rulemaking, which proposed adding a new section to 18 CFR part 1 to require that any entity communicating with the Commission or other specified organizations related to a matter subject to the jurisdiction of the Commission submit accurate and factual information and not submit false or misleading information or omit material information. The Commission is also terminating this rulemaking proceeding.

DATES: The notice of proposed rulemaking published in the **Federal Register** at 87 FR 49784 on August 12, 2022, is withdrawn as of November 25, 2025.

FOR FURTHER INFORMATION CONTACT:

Gabe Sterling, Legal Information, Office of Enforcement, Division of Investigations, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, (202) 502–8891, *gabriel.sterling@ferc.gov*

Andrea Cerbin, Legal Information, Office of Enforcement, Division of Investigations, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, (202) 502–8362, *andrea.cerbin@ferc.gov*.

SUPPLEMENTARY INFORMATION:

1. On July 28, 2022, the Federal Energy Regulatory Commission (Commission) issued a notice of proposed rulemaking (NOPR), proposing to add new section 1d.1 to 18 CFR part 1, requiring that any entity communicating with the Commission or other specified organizations related to

a matter subject to the jurisdiction of the Commission submit accurate and factual information and not submit false or misleading information or omit material information.[1] The Commission received 36 comments in response to the NOPR.[2] Based on consideration of the record, we are exercising our discretion to withdraw the NOPR and terminate the rulemaking proceeding. We appreciate the feedback commenters provided on the NOPR, which informed our decision not to proceed with the rulemaking at this time.

2. The Commission stresses that there are numerous existing regulations that prohibit untruthful, inaccurate, or incomplete communications to the Commission and other organizations upon which it relies.[3] The Commission will continue to diligently enforce those regulations. Further, the Commission expects that regulated entities will continue to comply with all applicable existing duties of candor. The withdrawal of the NOPR and termination of this proceeding do not preclude the Commission from ensuring that information upon which it relies in exercising its statutory duties is truthful, accurate, and complete.

The Commission orders: The NOPR is hereby withdrawn and Docket No. RM22–20–000 is hereby terminated.

By direction of the Commission.

Issued: November 20, 2025.

Debbie-Anne A. Reese,

Secretary.

[Docket No. RM20–7–000]

Safe Harbor Policy for Data Providers to Price Index Developers

AGENCY: Federal Energy Regulatory Commission.

ACTION: Withdrawal of notice of proposed rulemaking and termination of rulemaking proceeding.

SUMMARY: The Federal Energy Regulatory Commission is withdrawing a notice of proposed rulemaking, which proposed to amend its regulations to codify the Safe Harbor Policy established in the Commission's Policy Statement on Natural Gas and Electric Price Indices. The Commission is also terminating this rulemaking proceeding.

DATES: The notice of proposed rulemaking published in the **Federal Register** at 86 FR 12132 on March 2, 2021, is withdrawn as of November 25, 2025.

FOR FURTHER INFORMATION CONTACT: Gabe Sterling, Legal Information, Office of Enforcement, Division of Investigations, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, (202) 502–8891 *gabriel.sterling@ferc.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

1. On December 17, 2020, the Federal Energy Regulatory Commission (Commission) issued a notice of proposed rulemaking (NOPR), proposing to amend 18 CFR 35.41(c), 284.288(a), and 284.403(a) of the Commission's regulations by adding language to indicate: (1) that there will be a rebuttable presumption of accuracy, timeliness, and good faith for data providers, *i.e.,* market participants that submit transaction data to price index developers; and (2) that inadvertent reporting errors by data providers will not constitute violations of the Commission's regulations.[1]

2. The Commission received nine comments in response to the NOPR.[2] Eight of the comments generally supported the proposal, reasoning that codification of the Commission's existing policies regarding natural gas data providers could encourage more price reporting to index developers.[3] One commenter objected to the proposal, arguing that there was no evidence that the regulation would result in any meaningful improvement in reporting to index developers.[4] Commenters also included some proposals beyond the scope of the NOPR, including changes to the Commission's audit and investigation processes and creation of natural gas indices directly by the Commission.

3. For the reasons set forth below, we are exercising our discretion to withdraw the NOPR and terminate the rulemaking proceeding.

II. Discussion

4. As discussed in the NOPR, the Commission initially adopted and clarified policies on index development in the wake of the 2000–2001 Western Energy Crisis.[5] In this Price Index Policy Statement, the Commission affirmed the need for robust, reliable indices and accurate reporting of transaction data to price index developers. The Commission issued the Price Index Policy Statement, in part, ''to explain what the Commission expects of natural gas and electric price indices and under what conditions the Commission will give industry participants safe harbor protection for good faith reporting of transaction data to entities that develop price indices.'' [6] Regarding this safe harbor, ''the Commission [created] a rebuttable presumption that companies and individuals that report trade data to price index developers in accordance with the standards adopted here are doing so in good faith, and will not be investigated or subjected to administrative penalties for inadvertent mistakes made in the course of reporting energy transaction information.'' [7]

5. The NOPR proposed to codify the Safe Harbor Policy in the Commission's regulations to eliminate concern that the Commission might choose to depart

[6] Price Index Policy Statement, 104 FERC ¶ 61,121 at P 5.

[7] NOPR, 173 FERC ¶ 61,238 at P 6 (explaining the ''Safe Harbor Policy'' adopted in the Price Index Policy Statement).

from the Safe Harbor Policy in future enforcement proceedings. The NOPR postulated that, by providing reassurance through codification, regulatory risk would be reduced and more participants would elect to report transactions to price index developers.[8]

6. Concurrent with the issuance of the NOPR, the Commission issued a Proposed Revised Policy Statement [9] on price indices to encourage additional market participants to report their transactions to price index developers, provide greater transparency into the natural gas price formation process, and increase confidence in the accuracy and reliability of wholesale natural gas prices. Subsequently, on April 21, 2022, the Commission adopted a Revised Policy Statement addressing these matters.[10] In the Revised Policy Statement, the Commission stated that it did not intend to act on the NOPR at that time but reiterated that the Safe Harbor Policy ''remains in effect.'' [11]

7. Since the issuance of the NOPR, the price reporting burden for data providers has lessened and the number of new data providers has increased, thereby, bolstering price index formation. The Revised Policy Statement, issued in 2022, reduced the price reporting burden by allowing data providers to report their monthly transactions to price index developers without also being required to report their daily transactions. The next year, 2023, twenty-three new companies began reporting to price index developers according to Form No. 552 submissions.[12] Some of these newly-reporting companies report monthly (rather than monthly *and* daily) transactions to price index developers, taking advantage of the data reporting flexibilities announced in the Revised Policy Statement. In addition, some price index developers have increased the robustness of their price indices by including a large number and volume of fixed-priced transactions from the Intercontinental Exchange (ICE).[13] Further, consistent with the Revised Policy Statement, four natural gas price index developers submitted successful reapprovals in Docket No. PL03–3 demonstrating that their processes continue to meet all or substantially all of the Commission's standards for price index developers' indices to be referenced in Commission-jurisdictional tariffs.[14] These events indicate that formal amendment of the Commission's regulations is not necessary to promote reporting of transactions to price index developers at this time.

8. Consistent with the Safe Harbor Policy, for over two decades the Commission has neither investigated nor imposed penalties on any company for inadvertent reporting errors. As noted above, in 2022, the Commission reiterated the Safe Harbor Policy in the Revised Policy Statement.[15] We remain committed to the Safe Harbor Policy, as it promotes robust, voluntary reporting to index developers. Consistent application of the Safe Harbor Policy and the Revised Policy Statement will continue to reduce any lingering concerns by data providers and other market participants about the regulatory risk of reporting to index developers.

The Commission orders: The NOPR is hereby withdrawn and Docket No. RM20–7–000 is hereby terminated.

By direction of the Commission.

Issued: November 20, 2025.

Carlos D. Clay,

Deputy Secretary.

[10] *Actions Regarding the Comm'n's Pol'y on Price Index Formation & Transparency, & Indices Referenced in Nat. Gas & Elec. Tariffs,* 87 FR 25237 (April 28, 2022) 179 FERC ¶ 61,036 (2022) (Revised Policy Statement). The Revised Policy Statement allowed greater flexibility for market participants choosing to provide data to index developers. The Revised Policy Statement permitted market participants that report transaction data to price index developers to report either their non-index based next-day transactions, their non-index based next-month transactions, or both, to price index developers. In addition, the Commission encouraged data providers to report transactions to as many Commission-approved price index developers as possible, and allowed data providers to self-audit on a biennial basis.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 153, 157, and 380

[Docket No. RM26–2–000]

Authorizations for Certain Activities at Liquefied Natural Gas Plants

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of inquiry.

SUMMARY: The Federal Energy Regulatory Commission (Commission) seeks information and stakeholder perspectives to help the Commission explore whether, and if so how, to revise our Part 153, 157, and 380 regulations to establish procedures for authorizing activities at liquefied natural gas plants without case-specific authorization orders under sections 3 and 7 of the Natural Gas Act.

DATES: Comments are due January 26, 2026.

ADDRESSES: Comments, identified by docket number, may be filed in the following ways. Electronic filing through *http://www.ferc.gov,* is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery.

○ *Mail via US Postal Service Only:* Addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

○ *Hand (Including Courier) Delivery:* Deliver to: Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

The Comment Procedures Section of this document contains more detailed filing procedures.

FOR FURTHER INFORMATION CONTACT:

Danielle Elefritz (Legal Information), Office of the General Counsel, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, (202) 502–8767.

Andrew Kohout (Technical Information), Office of Energy Projects, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, (202) 502–8053.

SUPPLEMENTARY INFORMATION:

1. In this notice of inquiry, the Federal Energy Regulatory Commission (Commission) seeks information and stakeholder perspectives to help the Commission explore whether, and if so how, to revise its Part 153, 157, and 380 regulations to establish procedures for authorizing activities at liquefied natural gas (LNG) plants [1] without the need for case-specific authorization

[1] LNG facilities make up the larger LNG plant. LNG plants include LNG terminals authorized under section 3 of the NGA.

applications and orders under sections 3 or 7 of the Natural Gas Act (NGA).

I. Background

A. Statutory Framework

2. The Commission regulates the siting, construction, expansion, and operation of LNG facilities pursuant to sections 3 and 7 of the NGA. Section 3(a) provides for federal jurisdiction over the siting, construction, expansion, and operation of facilities used to export or import natural gas.[2] Section 3(e)(1) states that ''[t]he Commission shall have the exclusive authority to approve or deny an application for the siting, construction, expansion, or operation of an LNG terminal.'' [3] And under section 7(c), the Commission issues certificates of public convenience and necessity for natural gas and LNG facilities used for the transportation of natural gas in interstate commerce.[4] Under both section 3 and section 7, the Commission has the authority to include terms and conditions in any order authorizing an LNG facility.[5]

3. The NGA also includes additional requirements that must be met prior to authorizing the construction of LNG terminals.[6] Pursuant to section 3A(a) of the NGA,[7] the Commission promulgated regulations requiring LNG operators to use a pre-filing process for an application for authorization to construct or modify an LNG terminal.[8] Section 3(f) requires that the Commission obtain the concurrence of the Secretary of War before authorizing the siting, construction, expansion, or operation of LNG facilities affecting the training or activities of an active military installation.[9] Section 3A(e) states that ''[i]n any order authorizing an LNG terminal the Commission shall require the LNG terminal operator to develop an Emergency Response Plan [that] shall be prepared in consultation with the United States Coast Guard and State and local agencies and be approved by the Commission prior to any final approval to begin construction [and] shall include a cost-sharing plan.'' [10] The plan is to describe any direct cost reimbursements that the applicant will provide to state and local agencies responsible for safety and security at the LNG terminal and in proximity to vessels that serve the facility.[11] Additionally, section 3A(c) allows states to provide a report on state and local safety considerations which ''the Commission shall review and respond specifically to the issues raised . . . .'' [12]

4. Modifications to already-approved, operating LNG facilities may need to be undertaken during the life of the facilities.[13] Such modifications may currently necessitate that the operator file a case-specific application, on which the Commission will make a public interest determination.[14]

B. Existing Regulations for Authorizing Routine Activities Under Section 7

5. Under Part 157, Subpart F of the Commission's regulations,[15] interstate pipelines that hold a certificate of public convenience and necessity under NGA section 7 may apply for a one-time blanket certificate to undertake, without a case-specific authorization, certain activities automatically, subject only to annual reporting requirements [16] and certain other activities after prior notice,[17] both subject to cost limits.[18] The blanket certificate program ''provide[s] streamlined procedures which increase flexibility and reduce regulatory burden'' for a generic class of routine activities with particular conditions and procedures for consistency with the Commission's statutory obligations under the NGA and environmental statutes.[19]

6. In 1982, in instituting the blanket certificate program, the Commission explained that:

> [T]he final regulations divide the various actions that the Commission certificates into several categories. The first category applies to certain activities performed by interstate pipelines that either have relatively little impact on ratepayers, or little effect on pipeline operations. This first category also includes minor investments in facilities which are so well understood as an established industry practice that little scrutiny is required to determine their compatibility with the public convenience and necessity. The second category of activities provides for a notice and protest procedure and comprises certain activities in which various interested parties might have a concern. In such cases there is a need to provide an opportunity for a greater degree of review and to provide for possible adjudication of controversial aspects. Activities not authorized under the blanket certificate are those activities which may have a major potential impact on ratepayers, or which propose such important considerations that close scrutiny and case-specific deliberation by the Commission is

[2] 15 U.S.C. 717b(a). The 1977 Department of Energy (DOE) Organization Act (42 U.S.C. 7151(b)) placed all section 3 jurisdiction under DOE. The Secretary of Energy subsequently delegated authority to the Commission to ''[a]pprove or disapprove the construction and operation of particular facilities, the site at which such facilities shall be located, and with respect to natural gas that involves the construction of new domestic facilities, the place of entry for imports or exit for exports.'' DOE Delegation Order S1–DEL–FERC–2006, section 1.21A (May 16, 2006). *See EarthReports, Inc.* v. *FERC,* 828 F.3d 949, 952–53 (D.C. Cir. 2016) (detailing how regulatory oversight for the export of LNG and supporting facilities is divided between the Commission and DOE).

[3] 15 U.S.C. 717b(e)(1). LNG terminal is defined as: ''all natural gas facilities located onshore or in State waters that are used to receive, unload, load, store, transport, gasify, liquefy, or process natural gas that is imported to the United States . . . , exported to a foreign country . . . , or transported in interstate commerce by waterborne vessel, but does not include (A) waterborne vessels used to deliver natural gas to or from any such facility; or (B) any pipeline or storage facility subject to the jurisdiction of the Commission under [section 7].'' *Id.* 717a(11).

[4] *Id.* 717f(c)(1)(A).

[5] *Id.* 717b(a), 717b(e)(3), 717f(e). For a discussion of the Commission's authority to condition its approvals of LNG facilities under section 3 of the NGA, *see, e.g., Distrigas Corp.* v. *FPC,* 495 F.2d 1057, 1063–64 (D.C. Cir. 1974), *cert. denied,* 419 U.S. 834 (1974); *Dynegy LNG Prod. Terminal, L.P.,* 97 FERC ¶ 61,231 (2001).

[6] These requirements do not apply to NGA section 7 LNG facilities, including LNG peak shaving facilities which store gas in interstate commerce.

[7] 15 U.S.C. 717b–1(a).

[8] 18 CFR 157.21. The Commission's regulations allow for the Director of the Office of Energy Projects to waive the mandatory pre-filing procedures when prospective modifications to an existing LNG terminal do not involve significant state and local safety considerations that have not been previously addressed.

[9] 15 U.S.C. 717b(f). Pursuant to a Memorandum of Understanding with the Department of War, the Commission issues a letter to the Department, which then responds indicating whether or not there are no or minimal impacts to military installations and operations.

[19] *Interstate Pipeline Certificates for Routine Transactions,* Order No. 234, 47 FR 24254, at 24256, 24263 (June 4, 1982), FERC Stats. & Regs. ¶ 30,368, at 30,201 (1982) (cross-referenced at 19 FERC ¶ 61,216); *see also Revisions to the Blanket Certificate Reguls. & Clarification Regarding Rates,* Order No. 686, 71 FR 63680 (Oct. 31, 2006), 117 FERC ¶ 61,074, at P 7 (2006) (''The blanket certificate program was designed to provide an administratively efficient means to authorize a generic class of routine activities, without subjecting each minor project to a full, case-specific NGA section 7 certificate proceeding.'').

warranted prior to the issuance of a certificate.[20]

7. The notice and protest procedures for prior notice projects allow anyone, including Commission staff, to protest a prior notice project within 60 days and, if a protest is not withdrawn or dismissed, the project is reviewed as an application for case-specific authorization under NGA section 7(c).[21]

8. Blanket certificate activities are subject to the conditions in the Commission's regulations implementing the National Environmental Policy Act (NEPA),[22] as well as requirements that all blanket certificate activities be consistent with all applicable laws, including the Endangered Species Act, National Historic Preservation Act, Clean Water Act, Clean Air Act, and other applicable statutes relating to environmental concerns.[23]

9. In addition to the blanket program, § 2.55 of the Commission's regulations allows pipeline companies to perform auxiliary installations and facility replacements at section 7(c) facilities without a case-specific authorization.[24] For activities undertaken pursuant to either the blanket certificate program or § 2.55, section 7(c) certificate holders are required to provide advance notice to affected landowners.[25]

10. In two earlier blanket certificate rulemakings decades prior to this, the Commission declined to extend the program to include LNG facilities. In the 1982 rulemaking, the Commission excluded LNG facilities from the program, finding that they ''may have a significant impact on ratepayers'' and therefore ''should not be authorized under a blanket certificate, but should be subjected instead to the scrutiny of a case-specific determination.'' [26] In 2006, the Commission revised its blanket certificate regulations but again declined to extend the program to include LNG facilities.[27] The Commission explained that ''LNG plant facilities are not within the class of minor, well-understood, routine activities that the blanket certificate program is intended to embrace; LNG plant facilities necessarily require a review of engineering, environmental, safety, and security issues that the Commission believes only can be properly considered on a case-by-case basis.'' [28] The Commission summarized on rehearing that ''the blanket certificate program is not well suited to address the complexity inherent in issues raised by LNG . . . facilities.'' [29]

11. The Commission's experience with LNG facilities in the United States has changed considerably since the 1982 and 2006 rulemakings. As mentioned above, the 2006 rulemaking stated that the complexity of issues raised by LNG facilities, and the Commission's limited experience with these issues at the time, precluded including them in the blanket program.[30] Since that time, both the Commission and industry have gained significant experience regarding the engineering, environmental, safety, and security issues at LNG plants. The Commission has evaluated more than 100 LNG project applications since 2006 under NGA section 3 and 7. Staff have also engaged in extensive coordination with the Department of Transportation's (DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA) and the US Coast Guard (USCG), which are also involved in safety for these facilities, to proactively develop established safety standards and best practices with the LNG industry.[31]

12. Changes in the LNG market have also led to an expansion in the number of projects that the Commission regulates. Since 2006, the United States has emerged as the world's largest LNG exporter with seven large-scale LNG export terminals currently in operation, eight new or expanded export projects in construction, and additional terminals and expansions expected over the next several years. Although certain changes and variances are permitted during LNG terminal construction, changes to an operating LNG terminal—in some cases even routine adjustments like equipment replacements—may currently require a case-specific authorization. With more LNG facilities in operation in the United States, the current case-by-case review process for certain replacements, modifications, and expansions may be administratively inefficient, slow down needed projects, and create unnecessary regulatory uncertainty. In addition, many LNG facilities under section 7 have been in operation for 50 years. While many have been able to replace existing facilities under § 2.55 provisions, there is less regulatory certainty whether those provisions can be used to make replacements, modifications, or expansions to accommodate changes in feed gas compositions, changes in technology, or other conditions. Thus, the Commission believes that reconsidering allowing an automatic and/or prior-notice authorization program for certain activities is warranted.

II. Subject of the Notice of Inquiry

13. The Commission is issuing this notice of inquiry to consider whether, and if so how, to revise its Part 153, 157, and 380 regulations to establish procedures for authorizing certain activities at LNG plants without a case-specific authorization order, to provide regulatory certainty and significantly streamline liquefied natural gas

[20] Order No. 234, FERC Stats. & Regs. ¶ 30,368 at 30,200.

[21] 18 CFR 157.205(h).

[22] *Id.* part 380. Certain activities undertaken pursuant to the blanket certificate are categorically excluded from NEPA review. *Id.* 380.4(a)(21).

[23] *Id.* 157.206.

[24] *Id.* 2.55. LNG facilities authorized under section 7 of the NGA may use the procedures outlined in § 2.55.

[25] *Id.* 157.203(d)(1) (requiring affected landowners to be notified of automatic authorization projects at least 45 days prior to commencing construction or at the time it initiates easement negotiations, whichever is earlier); *id.* 157.203(d)(2) (requiring affected landowners to be notified of prior notice projects within three days following the date that a docket number is assigned to the application or at the time it initiates easement negotiations, whichever is earlier); *id.* 2.55(c) (requiring a good faith effort to notify in writing each affected landowner at least five days prior to commencing any activity except for activities for which all ground disturbance will be within an existing above-ground site or those done for safety, DOT compliance, or environmental or unplanned maintenance that are not foreseen and that require immediate attention).

[30] *Id.* PP 22–23.

[31] In individual proceedings, the Commission has issued over 4,500 requirements, including approximately 4,000 requirements that have been coordinated with PHMSA and the USCG regarding the engineering, safety, security, and reliability of those projects in accordance with a 2004 Interagency Agreement. Interagency Agreement Among the FERC, USCG, and [PHMSA] for the Safety and Security Review of Waterfront Import/Export LNG Facilities, February 11, 2004, *https://www.ferc.gov/media/2004-interagency-dot-and-uscg,* Accessed October 2025. Approximately 30 of these orders were issued after a 2018 Memorandum of Understanding with DOT for coordination between the Commission and PHMSA on determining whether proposed LNG facilities comply with PHMSA's siting requirements contained in 49 CFR part 193 Subpart B. Interagency Agreement Among the FERC, USCG, and [PHMSA] for the Safety and Security Review of Waterfront Import/Export LNG Facilities, February 11, 2004, *https://www.ferc.gov/media/2004-interagency-dot-and-uscg,* Accessed October 2025. Commission staff, along with DOT PHMSA and US Coast Guard representatives, have also actively participated in an LNG Technical Committee and Commission staff has made over 300 proposals since 2016 to update subsequent versions of the National Fire Protection Association (NFPA) 59A, *Standard for the Production, Storage, and Handling of LNG,* to improve the safety, security, and reliability of LNG projects consistent with the requirements that the Commission imposes on LNG facilities in its authorization orders.

infrastructure permitting. The Commission seeks comment on the following questions:

A. Process-Related Questions

A1. If the Commission promulgates rules to allow for the construction, expansion, and operation of facilities without a case-specific section 3 authorization, should the Commission require each LNG operator to apply for a blanket section 3 authorization as it does for natural gas pipelines pursuant to Part 157, Subpart F (*see* 18 CFR 157.204(a)) or should all current and new LNG operators be automatically granted a blanket authorization?

A2. How, if at all, should the Commission factor in a current LNG operator's compliance history when determining whether to grant blanket section 3 authorization?

A3. Under the Commission's existing Part 157, Subpart F blanket certificate regulations for activities under NGA section 7, there is a two-tiered process whereby some activities are automatically authorized while others require prior notice (*see* 18 CFR 157.203(a)–(c)). Should the Commission adopt a similar tiered approach for activities at LNG terminals under section 3? If so, should there be additional or different tiers?

A4. If the Commission allows for the construction, expansion, operation, and modification of certain LNG facilities without prior notice under a blanket section 3 authorization, should the Commission:

a. require LNG operators to notify Commission staff of any proposed modifications prior to implementing them, similar to the notification requirements in § 2.55(b)(1)(iii)? And, if so, is 30 days' notice sufficient?; and/or

b. require an LNG operator to file a semi-annual or annual report documenting the activities undertaken during the previous calendar year pursuant to the blanket authorization program? Is including this information in the current semiannual report sufficient? What information should be included in such reports?

A5. If the Commission requires prior notice for some or all activities under a blanket section 3 authorization, should the Commission adopt the same notice requirements as those detailed in the Commission's blanket certificate regulations, including Commission issuance of a notice within 10 days of filing if the filing is not rejected and a 60-day notice period thereafter for filing protests and interventions (*see* 18 CFR 157.205)?

A6. Should the Commission adopt the same process concerning protests to prior notice section 3 LNG projects as is currently in place for prior notice blanket certificate pipeline projects, *i.e.* that if a protest is filed and not withdrawn or dismissed, the application will treated as a request for a section 3 authorization (*see* 18 CFR 157.205), or should a different process be required? If a different process should be required, which types of protests should be dismissed, if any?

A7. What stakeholder (*e.g.,* affected landowner and local, state, and federal agencies) notification requirements should the Commission adopt for projects constructed pursuant to a blanket authorization program?

A8. Should the Commission require LNG facilities under a blanket section 3 or 7 authorization be constructed and placed into service within a specified timeframe? If so, what timeframe?

B. Project Eligibility

B1. LNG projects occurring during operation may include, but are not limited to: (i) replacements of, modifications to, or new facilities, systems, or components that improve efficiency, capacity, reliability, safety, or emissions and lessen adverse impacts to the public; (ii) replacements of, modifications to, or new facilities, systems, or components that increase capacity of pretreatment, liquefaction, storage, transfer, or auxiliary facilities without exceeding previously evaluated resource impacts identified in the NEPA process associated with the plant's underlying authorizations; or (iii) replacements of, modifications to, or new facilities, systems, or components that are identical to those previously evaluated and authorized by the Commission. If the Commission adopts a tiered approach similar to that in the blanket certificate regulations for natural gas pipelines (18 CFR 157.203(b)–(c)), what categories of projects should be eligible for automatic authorization? What categories of projects should be eligible for prior notice authorization? How should the Commission divide these categories, *e.g.,* based on costs, infrastructure types, or anticipated environmental effects, based on one or more of safety, security, operability, or reliability concerns, based on the impact on LNG production or export capacity, or based on other factors?

B2. What activities and modifications at authorized and existing LNG plants would result in no adverse impacts to the environment or safety? Specifically, what types of LNG facility modifications, systems, or components would have no or beneficial impacts to the following resources:

- Water Resources;
- Water Bodies and Wetlands;
- Wildlife, including Threatened and Endangered Species;
- Vegetation;
- Cultural Resources;
- Socioeconomics;
- Geological Resources;
- Soils;
- Land Use;
- Recreation;
- Visual Resources;
- Air Quality;
- Noise;
- Reliability; and
- Safety.

B3. What categories of LNG projects would provide equivalent or greater level of environmental protection and safety as compared to what is authorized at an existing LNG plant? Specifically, what types of LNG facility modifications, systems, or components would result in different impacts but nevertheless provide an equivalent or greater level of protection to the resources listed in question B2?

B4. What categories of LNG projects would result in less than significant impacts to the environment and safety at authorized and existing LNG plants such that the Commission could categorically determine that such projects are not inconsistent with the public interest under NGA section 3, or are or will be required by the present or future public convenience and necessity under NGA section 7? Specifically, what types of LNG facility modifications, systems, or components would result in less than significant impacts to the resources listed in question B2?

B5. Should the Commission allow the construction and operation of additional facilities under a blanket section 3 or 7 LNG authorization program to occur outside the authorized LNG plant limits? If so, what should the restrictions or criteria be for construction outside the authorized plant limits?

B6. Should the Commission revise its Part 157 blanket certificate regulations to include modifications to LNG facilities under section 7? If so, what types of projects should be subject to automatic authorization and prior notice?

B7. Should the Commission require different cost limits for LNG facilities under section 7 than for other interstate natural gas facilities? Are cost-based limits appropriate for these LNG facilities? Should there be any other considerations beyond cost and those listed above?

C. Statutory and Regulatory Compliance

C1. How should applicants demonstrate that: (1) other federal

permitting agencies have been consulted and that all necessary federal authorizations are received prior to construction; (2) the modified LNG facilities would meet the federal siting requirements promulgated by PHMSA; (3) a Letter of Intent and Waterways Safety Assessment has been filed with the USCG and a Letter of Recommendation that determines the waterway to be suitable has been issued by the USCG; (4) the Department of War has concurred that there would be no or minimal impacts to military installations, training, and operations; (5) state and local safety considerations have been addressed prior to construction of facilities per NGA section 3A(b)–(d); and (6) an emergency response plan, including a cost sharing plan, has been developed in consultation with the USCG and state and local agencies prior to construction?

C2. Currently, under § 157.21(e) of the Commission's regulations, the Director of OEP may waive after notice prefiling if there are no significant state and local safety considerations that have not been previously addressed. How should applicants demonstrate that there are no significant state and local safety considerations that have not been previously addressed in order to waive pre-filing requirements under the NGA and § 157.21(e) of the Commission's regulations per NGA section 3A(a)? Should the Commission consider modifying when or how it waives its prefiling requirements?

C3. To comply with NEPA in reviewing proposed LNG facilities, should the Commission consider establishing additional categorical exclusions or adopting existing categorical exclusions from other federal agencies?

D. Conditions of Authorization

D1. What applicable federal laws, permits, and regulations could be relied upon to ensure that no significant engineering, environmental, safety, and security impacts occur from LNG facility modifications, systems, and components authorized under a blanket program throughout construction and operation?

D2. How would a blanket section 3 authorization program comply with the following federal statutes and regulatory schemes:

- Rivers and Harbors Act
- Clean Water Act
- Migratory Bird Treaty Act
- Fish and Wildlife Coordination Act
- Bald and Golden Eagle Protection Act
- Marine Protection, Research, and Sanctuaries Act
- Marine Mammal Protection Act
- Endangered Species Act
- Magnuson-Stevens Fishery Conservation and Management Act
- National Historic Preservation Act
- Farmland Protection Policy Act
- Coastal Zone Management Act
- Clean Air Act
- Natural Gas Pipeline Safety Act
- Ports and Waterways Safety Act
- Marine Transportation Security Act

Are there other federal laws to be considered?

D3. What terms and conditions that have been historically incorporated into orders authorizing LNG projects could be included in a section 3 or section 7 authorization program to ensure no significant adverse environmental or safety impacts occur?

D4. Should the Commission require notice(s) to proceed from the Director of the Office of Energy Projects or their designee prior to the start of construction, introduction of hazardous fluids, or other milestones, to ensure that the activities comply with all necessary safety measures?

E. Cost Impacts

E1. What are the historic and estimated range of costs for preparation of an application for modifications to an NGA section 3 LNG export/import terminal? Modifications could include replacements of, modifications to, or construction, installation, and operation of new facilities or components of those facilities, including those that increase capacity of feed gas, pretreatment, liquefaction, storage, transfer, vaporization, sendout, or auxiliary facilities.

E2. What are the historic and estimated range of costs for preparation of an application for modifications to an NGA section 7 LNG plant?

III. Comment Procedures

14. The Commission invites interested persons to submit comments on the matters and issues identified in this notice. Comments are due January 26, 2026. Comments must refer to Docket No. RM26–2–000, and must include the commenter's name, the organization they represent, if applicable, and their address in their comments. All comments will be placed in the Commission's public files and may be viewed, printed, or downloaded remotely as described in the Document Availability section below. Commenters on this proposal are not required to serve copies of their comments on other commenters.

15. The Commission encourages comments to be filed electronically via the eFiling link on the Commission's website at *http://www.ferc.gov.* The Commission accepts most standard word processing formats. Documents created electronically using word processing software must be filed in native applications or print-to-PDF format and not in a scanned format. Commenters filing electronically do not need to make a paper filing.

16. Commenters that are not able to file comments electronically may file an original of their comment by USPS mail or by courier-or other delivery services. For submission sent via USPS only, filings should be mailed to: Federal Energy Regulatory Commission, Office of the Secretary, 888 First Street NE, Washington, DC 20426. Submission of filings other than by USPS should be delivered to: Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

IV. Document Availability

17. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*).

18. From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

19. User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov.*

By direction of the Commission.

Issued: November 20, 2025.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 342

[Docket No. RM25–2–000]

Supplemental Review of the Oil Pipeline Index Level

AGENCY: Federal Energy Regulatory Commission.

ACTION: Withdrawal of supplemental notice of proposed rulemaking and termination of rulemaking proceeding.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is withdrawing the supplemental notice of proposed rulemaking (Supplemental NOPR) that proposed to amend the index level used to determine annual changes to oil pipeline rate ceilings for the remainder of the five-year period that began July 1, 2021, and concludes June 30, 2026.

DATES: The Supplemental NOPR published on October 23, 2024, at 89 FR 84475 is withdrawn as of November 25, 2025.

FOR FURTHER INFORMATION CONTACT:

Monil Patel (Technical Information), Office of Energy Market Regulation, 888 First Street NE, Washington, DC 20426, (202) 502–8296, *Monil.Patel@ferc.gov*.

Evan Steiner (Legal Information), Office of the General Counsel, 888 First Street NE, Washington, DC 20426, (202) 502–8792, *Evan.Steiner@ferc.gov*.

SUPPLEMENTARY INFORMATION: 1. On October 17, 2024, the Commission issued a supplemental notice of proposed rulemaking proposing to amend the index level used to determine annual changes to oil pipeline rate ceilings.[1] The Supplemental NOPR requested comment regarding (a) changing the current index level of Producer Price Index for Finished Goods plus 0.78% (PPI–FG+0.78% (Initial Index)) to PPI–FG–0.21% (Rehearing Index) and (b) other issues related to the appropriate index level following the decision of the United States Court of Appeals for the District of Columbia Circuit (D.C. Circuit) in *Liquid Energy Pipeline Association* v. *FERC.*[2]

2. For the reasons discussed below, we exercise our discretion to withdraw the Supplemental NOPR and terminate this rulemaking proceeding.

I. Background

A. Indexing and the Kahn Methodology

3. The Energy Policy Act of 1992 (EPAct 1992) required the Commission to establish a ''simplified and generally applicable'' ratemaking methodology [3] that was consistent with the just and reasonable standard of the Interstate Commerce Act (ICA).[4] To implement this mandate, the Commission issued Order No. 561,[5] establishing an indexing methodology that allows oil pipelines to change their rates subject to certain ceiling levels as opposed to making cost-of-service filings.[6] In Order No. 561, the Commission committed to review the index level every five years to ensure that it adequately reflects changes to industry costs.[7] The Commission conducted five-year index reviews in 2000,[8] 2005,[9] 2010,[10] and 2015.[11]

4. In Order No. 561 and each successive five-year review, the Commission has calculated the index level based upon a methodology developed by Dr. Alfred E. Kahn.[12] The Kahn Methodology uses pipeline data from FERC Form No. 6, page 700 from the prior five-year period to determine an appropriate adjustment to be applied to PPI–FG. The calculation is as follows. Each pipeline's cost change on a per-barrel mile basis over the prior five-year period (*e.g.,* the years 2014–2019) is calculated. In order to capture normal industry cost experience, the resulting data set is trimmed by removing an equal number of pipelines from the top and bottom of the data set. The Kahn Methodology then calculates three measures of the trimmed data sample's central tendency: the median, the mean, and a weighted mean.[13] The Kahn Methodology calculates a composite by averaging these measures of central tendency and measures the difference between the composite and the PPI–FG over the prior five-year period. The Commission then sets the index level at PPI–FG plus (or minus) this differential.

B. The 2020 Five-Year Review

5. The 2020 five-year review addressed the index level for the July 1, 2021, to June 30, 2026 period.[14] In December of 2020, the Commission's Initial Order [15] adopted the Initial Index level of PPI–FG+0.78%. As relevant here, the Commission determined the Initial Index, in part, by: (1) adjusting the data for Master Limited Partnership (MLP) pipelines to remove the effects of a 2018 policy change (Income Tax Policy Change), and (2) trimming the data set to the middle 80% of cost changes.

6. First, the Commission considered whether to adjust the data to remove the effects of the Income Tax Policy Change. As noted above, the Commission measures industry-wide cost changes using data from pipelines' Form No. 6, page 700 for the five years prior to the start of the five-year review, here, 2014 to 2019. In 2018, the Commission changed its policy regarding the recovery of income tax costs and required MLP pipelines to eliminate their income tax allowance and Accumulated Deferred Income Taxes (ADIT) balances from their page 700s.[16] As a result, the 2014 page 700 data for MLP pipelines reflected the Commission's old policy while the 2019 page 700 data reflected the new policy. In the Initial Order, the Commission adjusted for this by removing the effects of the Income Tax Policy Change.[17]

7. Second, the Initial Order trimmed the data set to the middle 80% of cost

[4] 49 U.S.C. app. 1 *et seq.*

[5] *Revisions to Oil Pipeline Reguls. Pursuant to Energy Policy Act of 1992,* Order No. 561, 58 FR 58753 (Nov. 4, 1993), FERC Stats. & Regs. ¶ 30,985 (1993) (cross-referenced at 65 FERC ¶ 61,109), *order on reh'g,* Order No. 561–A, 59 FR 40243 (Aug. 8, 1994), FERC Stats. & Regs. ¶ 31,000 (1994) (cross-referenced at 68 FERC ¶ 61,138), *aff'd sub nom. Ass'n of Oil Pipe Lines* v. *FERC,* 83 F.3d 1424 (D.C. Cir. 1996) (*AOPL I*).

[6] Pursuant to the Commission's indexing methodology, oil pipelines change their rate ceiling levels effective every July 1 by ''multiplying the previous index year's ceiling level by the most recent index published by the Commission.'' 18 CFR 342.3(d)(1). Oil pipelines may adjust their rates to the ceiling levels pursuant to Commission's regulations so long as no protest or complaint demonstrates that the index rate change substantially diverges from the pipeline's cost changes. *Id.* 343.2(c)(1).

[10] *Five-Year Review of Oil Pipeline Pricing Index,* 133 FERC ¶ 61,228 (2010) (2010 Index Review), *reh'g denied,* 135 FERC ¶ 61,172 (2011).

[11] *Five-Year Review of the Oil Pipeline Index,* 153 FERC ¶ 61,312 (2015) (2015 Index Review), *aff'd sub nom. Ass'n of Oil Pipe Lines* v. *FERC,* 876 F.3d 336 (D.C. Cir. 2017) (*AOPL III*).

[12] The D.C. Circuit has affirmed the Commission's use of the Kahn Methodology. *AOPL I,* 83 F.3d at 1433–37; *Flying J Inc.* v. *FERC,* 363 F.3d at 497–500.

[13] The weighted mean assigns a different weight to each pipeline's cost change based upon the pipeline's total barrel-miles.

[14] The Commission initiated the 2020 five-year review by issuing a Notice of Inquiry in June of 2020. *Five-Year Rev. of the Oil Pipeline Index,* 171 FERC ¶ 61,239 (2020).

[15] *Five-Year Rev. of the Oil Pipeline Index,* 173 FERC ¶ 61,245 (2020) (Initial Order), *order on reh'g,* 178 FERC ¶ 61,023 (2022) (Rehearing Order), *vacated sub nom. LEPA* v. *FERC,* 109 F.4th 543.

[16] *See Inquiry Regarding the Comm'n Pol'y for Recovery of Income Tax Costs,* 162 FERC ¶ 61,227 (2018 Income Tax Policy Statement), *reh'g denied,* 164 FERC ¶ 61,030 (2018), *requests for clarification dismissed,* 168 FERC ¶ 61,136 (2019), *petitions for review dismissed sub nom. Enable Miss. River Transmission, LLC* v. *FERC,* 820 F. App'x 8 (D.C. Cir. 2020).

[17] For any pipelines that were MLPs in 2014, the Commission set the 2014 page 700 income tax allowance to zero and revised the 2014 return on rate base to reflect the removal of ADIT. Initial Order, 173 FERC ¶ 61,245 at P 16.

changes. As noted above, the Kahn Methodology statistically trims the page 700 data by removing an equal number of pipelines from the top and bottom of the data set to remove outlying and anomalous data that can distort the measure of central tendency. Participants in the 2020 five-year review proceeding disputed whether to trim the data to the middle 80% or the middle 50% of cost changes. The Commission determined that using the middle 80% was appropriate for this index review.[18]

8. In January 2021, shippers filed requests for rehearing of the Initial Order. While those rehearing requests were pending, the Commission published a new annual index on May 14, 2021, consistent with the Initial Order.[19] Pipelines proceeded to make rate filings, which became effective July 1, 2021, reflecting the Initial Order.

9. In January 2022, the Commission issued the Rehearing Order[20] adopting the lower Rehearing Index level of PPI–FG–0.21%.[21] In the Rehearing Order, the Commission reversed course on the two issues described above: the Commission calculated the Rehearing Index (1) using unadjusted page 700 data that reflected the Income Tax Policy Change, and (2) trimming the data set to the middle 50% of cost changes.[22] In addition, the Commission addressed certain relatively minor computational issues identified by pipelines related to the appropriate source for the 2014 data from page 700.[23]

10. The Commission directed pipelines to recompute their ceiling levels and reduce their rates to reflect the lower Rehearing Index, effective March 1, 2022.[24] Certain parties appealed the Rehearing Order.

C. LEPA v. FERC and Reinstatement Order

11. In *LEPA* v. *FERC,* the D.C. Circuit vacated the Rehearing Order.[25] The court held that the Commission's Rehearing Order violated the Administrative Procedure Act (APA) by amending the Initial Index without providing notice and an opportunity for comment. The court explained that once an agency's rule ''carrie[s] legal consequences,'' the APA requires the agency to follow notice-and-comment procedures before amending the rule.[26] The court found that the Initial Index became ''sufficiently final'' by July 1, 2021, when pipelines' rates for the first year of the five-year period became effective, ''to require that any amendment undergo notice-and-comment procedures.'' [27] Because the Commission changed the index to the Rehearing Index level and required pipelines to lower their rates without providing notice-and-comment procedures, the court vacated the Rehearing Order and ordered the Commission to reinstate the Initial Order.

12. On September 17, 2024, the Commission issued an order reinstating the Initial Order in compliance with the court's decision.[28] The Commission directed oil pipelines to recompute their ceiling levels for a second time to reflect the Initial Index and explained that pipelines could file to prospectively increase their indexed rates up to their recomputed ceiling levels.[29] The Commission also stated that it would address other issues following *LEPA* v. *FERC* in a subsequent order.

13. Parties continued to file comments in Docket No. RM20–14 disputing the appropriate index level following *LEPA* v. *FERC.*[30] Among other things, shippers argued that the Commission should reinstitute the Rehearing Order vacated by *LEPA* v. *FERC* and consider their rehearing requests.[31]

II. Supplemental NOPR

A. Supplemental NOPR

14. In order to resolve the ongoing disputes over whether the index should be modified following *LEPA* v. *FERC* and to comply with the court's holding that any change must be accomplished through APA notice-and-comment procedures, the Commission issued the Supplemental NOPR. The Commission proposed to amend the index level to PPI–FG–0.21% (the same level as the Rehearing Index) and sought comments on its proposal. The Commission proposed to amend the index level on a prospective basis for the remainder of the five-year period. More specifically, the Commission proposed the following:

- *Calculating Prospective Ceiling Levels:* The Commission proposed that pipelines recalculate their ceiling levels as though the amended index level of PPI–FG–0.21% was effective throughout the five-year period beginning in 2021.[32] However, the Commission noted that commenters could address, in the alternative, if ceiling levels should only reflect a revised index level as of July 1, 2025, rather than the full five-year period.[33]
- *Income Tax Policy Change:* The Commission proposed to use unadjusted page 700 data that reflects the Income Tax Policy Change, consistent with the Rehearing Order, rather than the adjusted data used in the Initial Order.[34]
- *Statistical Data Trimming:* The Commission proposed to trim the data set to the middle 50% of cost changes, as the Commission did in the Rehearing Order, rather than the middle 80% adopted by the Initial Order.[35]
- *Appropriate Source of 2014 Page 700 Data:* The Commission proposed to use page 700 data for 2014 from more recent filings made in April 2016 rather than the outdated 2014 data filed in April 2015. The Commission explained that the Initial Order inadvertently used outdated page 700 data for 2014.[36]

15. The Commission acknowledged that it had never previously undertaken a rulemaking to consider revisions to the index level outside of the five-year review process. However, the Commission found it appropriate to initiate new notice-and-comment procedures given the D.C. Circuit's holdings in *LEPA* v. *FERC* and ongoing concerns with the Initial Index.[37] The Commission emphasized that commenters could address any issues or concerns associated with the proposal to revise the index level during the five-year period.[38]

B. Comments

16. Initial comments on the Supplemental NOPR were filed on November 26, 2024, and reply comments were filed on December 20, 2024. In general, pipeline commenters (Pipelines) [39] oppose the Commission's proposal to revise the index level. Pipelines assert that amending the index level at this time would disrupt settled expectations, cause regulatory uncertainty, and incentivize litigation over pipeline rates.[40] By contrast, shipper commenters (Shippers) [41] support the Commission's proposal.

17. Regarding the Commission's proposal to calculate ceiling levels as if any revised index was effective for the entire five-year period, Pipelines argue that the Commission's proposal is inconsistent with the vacatur of the Rehearing Order and the D.C. Circuit's directive in *LEPA* v. *FERC* to reinstate the Initial Order.[42] Additionally, Pipelines argue that the Commission's proposal is inconsistent with Commission regulations,[43] and constitutes impermissible retroactive rulemaking [44] and retroactive ratemaking.[45] Shippers dispute Pipelines' claims that the Commission's proposal constitutes retroactive rulemaking or ratemaking.[46] Shippers argue that the Commission's proposal ensures that going-forward rates reflect any revised index level adopted in this proceeding,[47] and conforms to the Commission's practice in the 2000 index review.[48]

18. Pipelines oppose the Commission's proposal to calculate a revised index level using page 700 data that incorporates the Income Tax Policy Change. Pipelines argue that because previous index reviews did not incorporate the Commission's policy allowing MLP pipelines to recover a full income tax allowance, it would be improper to reflect the 2018 policy change removing the MLP income tax allowance in this review.[49] Additionally, Pipelines contend that most pipelines in the data set are not MLPs and the double recovery is not widely reflected in MLP pipelines' rates.[50] In contrast, Shippers argue that the Commission's proposal to reflect the Income Tax Policy Change in the index calculation conforms with indexing's purpose of tracking changes in recoverable costs,[51] regardless of whether individual MLP pipelines' rates incorporate the income tax double recovery.[52] Shippers contend that implementing the Income Tax Policy Change as proposed fulfills EPAct 1992's mandates for simplified and streamlined ratemaking while ensuring just and reasonable rates.[53] Pipelines also oppose the Commission's proposal to trim the data set to the middle 50%, arguing that the record in this proceeding supports using the middle 80%.[54] Shippers, on the other hand, support the Commission's proposal and argue that the middle 50% conforms to past Commission practice and is a better measure of normal cost changes.[55]

III. Discussion

19. Upon consideration of the record in this proceeding and given the late stage of the five-year review period that began July 1, 2021, and concludes June 30, 2026, we are not persuaded to proceed with the proposal considered in the Supplemental NOPR. The Commission initiated the Supplemental NOPR to allow industry-wide comment on ''all issues related to the appropriate index level following *LEPA* v. *FERC,*'' [56] including whether to modify the index level outside the five-year review process based on the issues discussed in the Rehearing Order.[57]

20. We conclude that the best course of action is to allow the current index level to remain effective for the remainder of this five-year period. The question before the Commission in the instant proceeding is not what action the Commission should have taken in 2020 at the beginning of this five-year review. Rather, the question presented here is whether in 2025 the Commission should now change the index level prospectively in the last year of this five year period as proposed in the Supplemental NOPR.[58] Changing the index level for a fourth time in the fifth year of the five-year period [59] would prolong ongoing regulatory uncertainty regarding the index level.[60] As

[56] Supplemental NOPR, 189 FERC ¶ 61,030 at P 2.

[57] *Id.* PP 13–34.

[58] As with any rulemaking, any action the Commission might take to amend the index level through notice-and-comment procedures may be prospective only. *Bowen* v. *Georgetown Univ. Hosp.,* 488 U.S. 204, 208 (1988); *see also LEPA* v. *FERC,* 109 F.4th at 547.

[59] After establishing the Initial Index for this five-year period in 2020 and after 201 pipelines filed rates pursuant to that index effective July 1, 2021, the Commission changed the index level twice. First, the Commission issued the Rehearing Order on January 20, 2022 and pipelines filed rates to comply with the Rehearing Order's lower index made effective March 1, 2022. Then, following *LEPA* v. *FERC,* the Commission issued the Reinstatement Order on September 17, 2024, which restored the Initial Index and pipelines once again refiled rates and ceiling levels.

[60] As noted above, indexing is intended to provide a ''simplified and generally applicable

discussed below, we do not find that the record supports taking such a step. Moreover, at this stage, the benefits of any index change are limited, as pipelines made the last annual indexed rate filing of the five-year period in June 2025.

21. We therefore exercise our discretion to withdraw the Supplemental NOPR and terminate this rulemaking proceeding. We address below the Supplemental NOPR's proposals regarding (1) recalculation of prospective ceiling levels, (2) the Income Tax Policy Change, (3) statistical data trimming, and (4) the appropriate source of 2014 Page 700 data.[61]

A. Calculating Prospective Ceiling Levels

22. We are not persuaded to adopt the Supplemental NOPR's proposal to require pipelines to recalculate ceiling levels effective prospectively from the issuance of this rule as though a revised index resulting from this rulemaking was effective starting July 1, 2021.[62]

23. As explained further below, commenters raised extensive questions and concerns regarding this proposal, including assertions that this proposal departs from the Commission's indexing framework and regulations, and runs afoul of the rules against retroactive rulemaking and retroactive ratemaking. On balance, we are not convinced that the Commission should recalculate pipeline ceiling levels for the preceding four years of the five-year period.

24. First, commenters argue that the proposal to recalculate prior ceiling levels departs from the Commission's indexing framework and regulations.[63] Although the Commission can amend its rules through notice-and-comment rulemakings, we recognize that the proposal to recalculate the ceiling levels for multiple past years would be an unprecedented departure from the Commission's existing indexing policies and regulations, in which the index is ''cumulative from year to year,'' [64] and each annual index is applied to a pipeline's ceiling level from the preceding year.[65] Moreover, each year's index is based upon the prior years' cost changes, not some other adjustment as proposed in the Supplemental NOPR.[66] Pipeline rates are bound by those annual ceiling rate changes.[67]

25. Second, the Commission designed the cumulative ceiling level approach to achieve EPAct 1992's ''criteria of simplicity and general applicability'' [68] and ''reduce[ ] the necessity and likelihood of prolonged litigation.'' [69] Yet another change to the ceiling levels that were in place over the prior four years would directly contravene such mission, adding even more complexity and is thus in tension with the index's simplified design.

26. Third, we acknowledge significant debate in the record regarding whether the remedy proposed in the Supplemental NOPR constitutes impermissible retroactive rulemaking and retroactive ratemaking.[70] While we decline to address the scope of the Commission's remedial authority in this rulemaking context, we are not persuaded that perpetuating and exacerbating uncertainty for the final year of this index cycle is warranted.

27. We are not persuaded by other arguments advanced by Shippers. Although the Shippers argue that the proposal is necessary to ensure that the ''flaws'' of the Initial Index do not result in inflated ceiling levels going forward,[71] as discussed below, we find those flaws to be overstated.

28. We recognize that Shippers cite to the 2000 five-year review as one prior instance in which the Commission directed pipelines to recalculate index increases over multiple years for prospective effect in rates.[72] However, we believe this case is distinguishable. The Commission's decision to recalculate ceiling levels in the 2000 five-year review was made in addressing the legal error identified by the D.C. Circuit on remand,[73] whereas any recalculation of ceiling levels as proposed in the Supplemental NOPR would occur in response to a rulemaking. Thus, we are not persuaded that the Commission's decision in the 2000 five-year review would support adoption of the Supplemental NOPR's proposal on ceiling levels.

29. In sum, we conclude that the benefit of rate certainty at this late stage of the current five-year index cycle generally counsels against the Supplemental NOPR's proposal to revise the index going back more than four years. It would be an unprecedented step for the Commission to take such action, and we are concerned about establishing a practice here that could justify additional disruption of subsequent index periods. On balance, we are not persuaded to adopt the Supplemental NOPR's proposal to recalculate pipeline ceiling levels for the full five-year period.

B. Income Tax Policy Change

30. We are not persuaded to modify the index level to incorporate the Income Tax Policy Change as proposed in the Supplemental NOPR in order to address an income tax double recovery in pipeline rates. As discussed below, there are valid arguments against taking such action, particularly in the fifth year of the five-year index.

31. As an initial matter, it is not clear the extent to which an income tax double recovery exists in oil pipeline rates. The income tax double recovery concern applies only to MLP pipelines, less than half of the pipelines subject to

ratemaking methodology for oil pipelines'' under EPAct 1992. EPAct 1992 1801(a). Consistent with that goal, the Commission established a framework under which the Commission would review the index once every five years. Order No. 561, FERC Stats. & Regs. ¶ 30,985 at 30,946–47.

[61] The Supplemental NOPR also requested comment on any additional remedial steps the Commission should take following *LEPA* v. *FERC.* Because we decline to adjust the index level, we reject Shippers' arguments that they are entitled to remedies for any part of the five-year period based on the application of a lower index level than the Initial Index. We decline to address here whether Pipelines are entitled to remedies for the period between March 1, 2022 and September 17, 2024 when the Rehearing Index was in effect. Instead, we address this issue in a concurrent order in Docket No. RM20–14. *See Revisions to Oil Pipeline Reguls. Pursuant to the Energy Pol'y Act of 1992,* Order Denying Rehearing, Denying Petition and Granting Remedies, 193 FERC ¶ 61,137 (2025).

[62] Supplemental NOPR, 189 FERC ¶ 61,030 at P 37. As explained above, the indexing methodology allows oil pipelines to change their rates, effective every July 1, subject to specific ceiling levels, which pipelines recalculate annually by multiplying their previous year's ceiling level by the annual index published by the Commission.

[63] Designated Carriers Initial Comments at 30.

[64] Order No. 561, FERC Stats. & Regs. ¶ 30,985 at 30,954.

[65] 18 CFR 342.3(d)(1).

[66] In particular, section 342.3(d)(1) of the Commission's regulations requires pipelines to compute the ceiling level for each index year by multiplying *the previous index year's ceiling level* by the most recent index. 18 CFR 342.3(d)(1).

[67] Carriers are permitted to raise their rates to unused ceiling levels at any time after those ceiling levels are established and while they remain in effect. *Id.; id.* 342.3(a). Conversely, the Commission prohibited pipelines from filing rates exceeding their ceiling levels except in very specific circumstances. Order No. 561, FERC Stats. & Regs. ¶ 30,985 at 30,947; 18 CFR 342.4(a)–(b).

[68] Order No. 561, FERC Stats. & Regs. ¶ 30,985 at 30,946; *id.* at 30,940 (indexing provides ''a simplified and generally applicable methodology for regulating oil pipeline rates'').

[69] *Id.* at 30,946.

[70] *Compare* LEPA Initial Comments at 48–50; Designated Carriers Initial Comments at 31–32; Kinder Morgan Initial Comments at 9–12; South Bow Initial Comments at 8 *with* Joint Commenters Reply Comments at 38; Appalachian Basin Shippers Reply Comments at 8–9; Liquids Shippers Group Reply Comments at 16; Shell Reply Comments at 12.

[71] Joint Commenters Initial Comments at 36; Shell Initial Comments at 13–14.

[72] *Five-Year Review of Oil Pipeline Pricing Index,* 102 FERC ¶ 61,195, at PP 1, 31 (2000).

[73] *Id.* The D.C. Circuit remanded the Commission's December 2000 order establishing the index level on the grounds that the Commission had not adequately addressed the concerns raised by certain pipelines. *See AOPL II,* 281 F.3d at 245–46.

the index.[74] Moreover, as the Initial Order explained, it is not clear that the income tax double recovery is widely incorporated in those MLP pipelines' rates. The Commission only permitted MLP pipelines to include a full income tax allowance in their costs of service between 2005 and 2018. During that period, the Commission's index reviews did not actually incorporate the Commission's policies allowing MLP pipelines to recover an income tax allowance.[75] Although the Commission's prior income tax policy influenced MLP pipelines' rates in other ways,[76] MLP pipelines are only a subset of all pipelines and the Supplemental NOPR acknowledged that MLP pipelines' rates only ''imperfectly captured the 2005 income tax policy change'' that allowed MLPs to recover a full income tax allowance.[77]

32. Second, to the extent the income tax double recovery was incorporated into MLP pipelines' rates, the index provides an incomplete mechanism for remedying this issue because it would not fully remove any double recoveries from MLP pipeline rates. The index reflects an average of all pipelines' cost changes on an industry-wide basis,[78] including the cost changes of non-MLP pipelines that were not affected by the Income Tax Policy Change. Accordingly, the reduction to the index level that results from reflecting the Income Tax Policy Change provides an imprecise mechanism for addressing any MLP pipeline double recoveries.

33. Third, the late-stage of this proceeding (the fifth year of the five-year review) significantly reduces the effectiveness of the index as a mechanism for addressing the income tax double recovery. To meaningfully address the income tax double recovery, as proposed in the Supplemental NOPR, the Commission would need to direct pipelines to recompute their ceiling levels and rates as though the revised index level was effective for the full five-year period beginning July 1, 2021. As discussed above, however, this presents considerable concerns, and thus we decline to take such a step.[79]

34. Finally, attempting to address the double recovery via the index reduces the index for pipelines that have no double recovery. For example, it is not clear that index reductions to address the double recovery are necessary for MLP pipelines whose revenues under-recover costs.[80] Whereas shippers may file cost-of-service complaints in those circumstances where pipelines' rates are excessive in light of the Income Tax Policy Change, making an industry-wide adjustment of the index level for the only remaining year of the five-year period would be both overbroad (in capturing pipelines who do not have a double-recovery embedded in rates) and have limited effectiveness (in only capturing a fraction of any double-recovery).

35. In 2020, at the beginning of this five-year review period, the income tax allowance double recovery issue was an issue of first impression that the Commission in 2020 addressed by removing the effects of that change from the calculation of the index.[81] It is now 2025, the fifth year of the five-year index process, and the benefit of rate certainty support leaving the index undisturbed.[82] None of the comments [83] undermine the factual findings above and, as explained above, we decline to modify the index level for a policy change that was only partially incorporated into pipeline rates and where, to the extent any double recovery exists, any modifications we could make at this stage would provide an imprecise and limited resolution to the double-recovery issue.[84]

36. We acknowledge that the Commission stated in the 2018 Income Tax Policy Statement that it would ''incorporate the effects of the post-*United Airlines* policy changes . . . on industry-wide oil pipeline costs in the 2020 five-year review.'' [85] However, these statements were not binding,[86] and the Commission later reconsidered those statements in the Initial Order and decided a different course of action was more appropriate.[87] We find that at this late stage any potential benefits of addressing the Income Tax Policy Change through the index calculation are significantly attenuated, and do not outweigh the disruption and regulatory

[74] Seventy of the 160 pipelines in the data set (or approximately 44%) were organized as MLPs when the Commission adopted the Income Tax Policy Change. *See* Designated Carriers Initial Comments, Aff. of Dr. Michael J. Webb, at P 48 & n.60 (Webb Aff.).

[75] Before the Commission updated its calculation of the index in the 2015 Index Review to use page 700 data, the Kahn Methodology used net carrier property as a proxy for capital costs and income taxes. 2015 Index Review, 153 FERC ¶ 61,312 at P 14 (citing Order No. 561–A, FERC Stats. & Regs. ¶ 31,000 at 31,096, 31,098). This proxy did not reflect changes in the Commission's Opinion No. 154–B cost-of-service methodology, including changes to the Commission's income tax policy. As a result, the Commission's prior policies permitting MLP pipelines to recover a full or partial income tax allowance were never directly incorporated into the index.

[76] *See* Supplemental NOPR, 189 FERC ¶ 61,030 at P 33. For example, as the Supplemental NOPR observed, 164 of the 277 total oil pipelines in the Commission's data set, or 59%, have been added since the 2005 five-year review. Supplemental NOPR, 189 FERC ¶ 61,030 at n.68. Those pipelines either filed cost-of-service rates directly incorporating the income tax allowance or negotiated rates under the circumstances of the Commission's income tax policies for MLP pipelines.

[77] Supplemental NOPR, 189 FERC ¶ 61,030 at P 33; *see also Inquiry Regarding Income Tax Allowances,* 111 FERC ¶ 61,139, at P 32 (2005).

[78] *E.g.,* Order No. 561–A, FERC Stats. & Regs. ¶ 31,000 at 31,103 (explaining that indexing ''relies upon industry-wide average costs . . . to establish rates'').

[79] *Supra* PP 22–29.

[80] Even where an MLP pipeline filed a cost-of-service rate that included a full income tax allowance or negotiated a settlement rate based on the Commission's prior income tax policy, it is not clear that the pipeline is presently over-recovering its cost of service. For instance, when the Commission evaluated whether natural gas pipelines were over-recovering their costs of service as a result of the Income Tax Policy Change, the resulting proceedings did not result in rate reductions for most pipelines. *Interstate & Intrastate Nat. Gas Pipelines,* Order No. 849–A, 84 FR 17739 (April 26, 2019), 167 FERC ¶ 61,051, at P 4 (2019) (stating that of 120 natural gas pipelines that filed FERC Form No. 501–G in response to Order No. 849, 84 pipelines explained why no change to their cost-of-service rates was necessary following the Income Tax Policy Change).

[81] Initial Order, 173 FERC ¶ 61,245 at PP 16–20.

[82] *See Rail Splitter Wind Farm, LLC* v. *Ameren Servs. Co.,* 142 FERC ¶ 61,047, at P 31 (2013) (emphasizing the importance of stability and certainty in the Commission's decision-making process).

[83] Supplemental NOPR, 189 FERC ¶ 61,030 at PP 24–34; Joint Commenters Initial Comments at 32–36; Appalachian Basin Shippers Initial Comments at 8–9; CAPP Initial Comments at 3; PG&M Shippers Initial Comments at 10; Shell Initial Comments at 11–13; River City Petroleum Initial Comments at 1; Joint Commenters Reply Comments at 61–69; Liquids Shippers Group Reply Comments at 12–13; Appalachian Basin Shippers Reply Comments at 12–13; PG&M Shippers Reply Comments at 9–13.

[84] We decline to resolve the differing positions in the Initial Order and the Supplemental NOPR, regarding whether the index should generally reflect policy changes embedded in the Opinion No. 154–B cost of service. *See* Supplemental NOPR, 189 FERC ¶ 61,030 at P 30 (citing Initial Order, 173 FERC ¶ 61,245 at P 17). Similarly, we do not resolve whether reflecting the Income Tax Policy Change would effectuate a true-up for prior-period over-recoveries. *Id.* P 31 (citing Initial Order, 173 FERC ¶ 61,245 at P 18). As necessary, those issues can be addressed in subsequent five-year review proceedings.

[85] 2018 Income Tax Policy Statement, 162 FERC ¶ 61,227 at P 46; *see also id.* P 8 (''[T]he Commission will incorporate the effects of this Revised Policy on industry-wide oil pipeline costs in the 2020 five-year review of the oil pipeline index level.'').

[86] *E.g., Ass'n of Flight Attendants* v. *Huerta,* 785 F.3d 710, 716 (D.C. Cir. 2015) (''Policy statements 'are binding on neither the public nor the agency, and the agency retains the discretion and the authority to change its position . . . in any specific case.'''') (quoting *Syncor Int'l Corp.* v. *Shalala,* 127 F.3d 90 (D.C. Cir. 1997)).

[87] Initial Order, 173 FERC ¶ 61,245 at P 18 (considering the Commission's statement in the 2018 Income Tax Policy Statement but concluding that the index is not an appropriate mechanism for incorporating the Income Tax Policy Change).

uncertainty that revising the index level again would entail.

C. Statistical Data Trimming

37. We likewise decline to adopt the Supplemental NOPR's proposal to modify the index level by using the middle 50% instead of the middle 80% of cost changes.

38. We find that any benefits that may result from using the middle 50% do not justify revising the index level at this late stage in the five-year review period. The record demonstrates that using the middle 50% would reduce the index level by 33 basis points, from PPI–FG+0.78% to PPI–FG+0.45%.[88] Moreover, this change would be only for one year and affect pipeline rates by ⅓ of one percent or 0.33%.[89] It would represent an extremely small percentage of the total pipeline indexed rate changes over the five-year review period, and, when considered over the five-year period, this 0.33% effect is *de minimis.* Indexing necessarily involves some degree of imprecision.[90] Even in a more traditional ratemaking framework, a change of 0.33% above or below a pipeline's cost of service is within expected imprecision in rates over any period of time.[91] Neither ratemaking generally nor the index in particular are so exact.[92]

39. The question before the Commission is not the index that should be in place for the full five-year index period, but whether there is sufficient basis to change the Commission-established index in the fifth year of the five-year review period. As discussed above, this record does not justify such an unprecedented step.

D. Appropriate Source of 2014 Page 700 Data

40. As explained in the Supplemental NOPR,[93] page 700 includes columns for reporting summary cost-of-service data for both the current year and the previous year. The more recently filed data reported in the previous-year column often updates the data that was filed in the prior year. As a result, for the first year of the index review period in the five-year review, the Commission uses updated page 700 data filed in the following year's Form No. 6, where available.[94] However, in the Initial Order, the Commission inadvertently departed from its prior practice by using outdated page 700 data for 2014.[95] Thus, the Supplemental NOPR proposed to calculate a revised index level using updated page 700 data for 2014, where available, as reported in the previous-year column in the Form No. 6 filings submitted in April 2016.[96]

41. After further consideration, we decline to adopt the proposal in the Supplemental NOPR. Consistent with our determination above, we conclude that any benefit of adopting this proposal would not justify the additional disruption that would result from modifying the index level for a fourth time at this late stage of the five-year period.

IV. Conclusion

42. As discussed above, upon review of the record in this proceeding and given the late stage of the five-year review period that began July 1, 2021, we are not persuaded to proceed with the proposals considered in the Supplemental NOPR. Thus, we withdraw the Supplemental NOPR and terminate this rulemaking proceeding.

The Commission orders:

The Supplemental NOPR is hereby withdrawn and Docket No. RM25–2–000 is hereby terminated.

By the Commission.

Issued: November 20, 2025.

Debbie-Anne A. Reese,

Secretary.

[FR Doc. 2025–20900 Filed 11–24–25; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 866

[Docket No. FDA–2025–N–4622]

Immunology and Microbiology Devices; Reclassification of Nucleic Acid-Based Test Systems for Use With a Corresponding Approved Oncology Therapeutic Product; Proposed Amendment; Proposed Order; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed amendment; proposed order; request for comments.

SUMMARY: The Food and Drug Administration (FDA) is proposing to reclassify certain postamendments class III nucleic acid-based test systems indicated for use with a corresponding approved oncology therapeutic product (product codes OWD, PJG, PQP, and SFL) from class III (premarket approval) into class II (special controls), subject to premarket notification. FDA is also proposing a new device classification regulation, along with the special controls that FDA believes are necessary to provide a reasonable assurance of safety and effectiveness for these devices.

DATES: Submit electronic or written comments on the proposed order by January 26, 2026. Please see section X of this document for the proposed effective date when the new requirements apply and for the proposed effective date of a final order based on this proposed order.

[88] LEPA Initial Comments, Declaration of Dr. Ramsey D. Shehadeh, at Ex. A4 (Shehadeh Decl.).

[89] For example, assume that Pipeline A's ceiling level was $10 on June 30, 2021. Thus, Pipeline A's ceiling level would be $12.748 following the reinstatement of the index level of PPI–FG+0.78% pursuant to *LEPA* v. *FERC* (10 * 0.994188 * 1.097007 * 1.143094 * 1.022547 = 12.748). *See* Order Reinstating Index, 189 FERC ¶ 61,173 at P 1 (listing index multipliers reflecting PPI–FG+0.78% index level for July 1, 2021–June 30, 2025). In addition, assume that the annual change in PPI–FG from 2023–2024 is 1.22%, which reflects the most recent data published by the Bureau of Labor Statistics, available at *https://data.bls.gov/toppicks?survey=bls* (accessible by selecting ''PPI Finished Goods 1982 + 100 (Unadjusted) − WPUFD49207'' and clicking ''Retrieve data''). Using the index of PPI–FG+0.78%, Pipeline A's ceiling level would increase from $12.748 to $13.004 effective July 1, 2025 (12.748 * (1 + 0.0122 + 0.0078)) = 13.0036). By contrast, using a revised index of PPI–FG+0.45% that reflects the middle 50% for July 1, 2025–June 30, 2026, Pipeline A's ceiling level would increase from $12.748 to $12.961 (12.748 * (1 + 0.0122 + 0.0045) = 12.9609). As a result, revising the index level using the middle 50% at this stage would only reduce Pipeline A's ceiling level by $0.043 (or 0.33%).

[90] *E.g.,* Order No. 561, FERC Stats. & Regs. ¶ 30,985 at 30,949 (explaining that under the indexing system ''some divergence between actual cost changes experienced by individual pipelines and the rate changes permitted by the index is inevitable''); 2005 Index Review, 114 FERC ¶ 61,293 at P 57 (explaining that in adopting indexing, the Commission ''recognized in adopting a uniform index for all pipelines that inevitably some pipelines would over-earn while others will under-earn''); *see also* Joint Commenters Reply Comments at 69 (stating that ''indexing is necessarily inexact to some degree'').

[91] For example, between 2018 and 2019, 156 of the 160 pipelines in the data set had a change in billing determinants (throughput) exceeding plus or minus 0.33%. Likewise, between 2018 and 2019, 94% of pipelines had page 700 costs of service per barrel-mile changes exceeding plus or minus 0.33%.

[92] *See, e.g., Consol. Edison Co. of N.Y., Inc.* v. *FERC,* 45 F.4th 265, 286 (D.C. Cir. 2022) (stating that ''courts have long recognized that ratemaking is 'much less a science than an art' '') (quoting *Ala. Elec. Coop., Inc.* v. *FERC,* 684 F.2d 20, 27 (D.C. Cir. 1982)); *Farmers Union Cent. Exch., Inc.* v. *FERC,* 734 F.2d 1486, 1502 (D.C. Cir. 1984) (explaining that there is a ''zone of reasonableness'' for just and reasonable rates).

[93] 189 FERC ¶ 61,030 at P 35.

[94] 2005 Index Review, 114 FERC ¶ 61,293 at P 50 (finding that a witness was ''correct to use the data contained in [a] resubmitted FERC Form No. 6'').

[95] Specifically, although 38 pipelines filed updated 2014 data in April 2016, the Initial Order erroneously relied on those pipelines' originally filed 2014 data as reported in April 2015.

[96] Supplemental NOPR, 189 FERC ¶ 61,030 at P 36.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until midnight 11:59 p.m. Eastern Time at the end of January 26, 2026. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal Rulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2025–N–4622 for ''Immunology and Microbiology Devices; Reclassification of Nucleic Acid-Based Test Systems for Use with a Corresponding Approved Oncology Therapeutic Product; Proposed Amendment; Proposed Order; Request for Comments.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday Eastern Time, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents, the plain language summary of the proposed order of not more than 100 words consistent with the ''Providing Accountability Through Transparency Act,'' or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Soma Ghosh, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 3316, Silver Spring, MD 20993, 240–402–5333, *Soma.Ghosh@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background—Regulatory Authorities

The Federal Food, Drug, and Cosmetic Act (FD&C Act), as amended, establishes a comprehensive system for the regulation of medical devices intended for human use. Section 513 of the FD&C Act (21 U.S.C. 360c) establishes three classes of devices reflecting the regulatory controls needed to provide reasonable assurance of their safety and effectiveness. The three classes of devices are class I (general controls), class II (special controls), and class III (premarket approval).

Section 513(a)(1) of the FD&C Act defines the three classes of devices. Class I devices are those devices for which the general controls of the FD&C Act (controls authorized by or under section 501, 502, 510, 516, 518, 519, or 520 (21 U.S.C. 351, 352, 360, 360f, 360h, 360i, or 360j) or any combination of such sections) are sufficient to provide reasonable assurance of safety and effectiveness of the device; or those devices for which insufficient information exists to determine that general controls are sufficient to provide reasonable assurance of safety and effectiveness or to establish special controls to provide such assurance, but because the devices are not purported or represented to be for a use in supporting or sustaining human life or for a use which is of substantial importance in preventing impairment of human health, and do not present a potential unreasonable risk of illness or injury, are to be regulated by general controls (section 513(a)(1)(A) of the FD&C Act). General controls include, but are not limited to, provisions that relate to establishment registration and device listing; premarket notification; prohibitions against adulteration and misbranding (*e.g.,* labeling that fails to bear adequate directions for use); recordkeeping and reporting, including adverse event reporting and reporting of corrections and removals initiated to reduce a risk to health posed by the device or to remedy a violation of the FD&C Act caused by the device which may present a risk to health; and current good manufacturing practice (CGMP) requirements. These controls apply to all devices unless an exemption applies.

Class II devices are those devices for which general controls by themselves are insufficient to provide reasonable assurance of safety and effectiveness, but for which there is sufficient information to establish special controls to provide such assurance, including the issuance of performance standards, postmarket surveillance, patient registries, development and dissemination of guidelines,

recommendations, and other appropriate actions FDA deems necessary to provide such assurance (section 513(a)(1)(B) of the FD&C Act).

Class III devices are those devices for which insufficient information exists to determine that general controls and special controls would provide a reasonable assurance of safety and effectiveness, and are purported or represented to be for a use in supporting or sustaining human life or for a use which is of substantial importance in preventing impairment of human health, or present a potential unreasonable risk of illness or injury (section 513(a)(1)(C) of the FD&C Act).

Devices that were not introduced or delivered for introduction into interstate commerce for commercial distribution before May 28, 1976 (generally referred to as ''postamendments devices'') are classified automatically by section 513(f)(1) of the FD&C Act into class III without any action taken by FDA (Agency or we). Those devices remain in class III and require approval of a premarket approval application (PMA), unless and until: (1) FDA reclassifies the device into class I or II, or (2) FDA issues an order finding the device to be substantially equivalent, in accordance with section 513(i) of the FD&C Act, to a predicate device that does not require premarket approval. The Agency determines whether new devices are substantially equivalent to predicate devices by means of the premarket notification procedures in section 510(k) of the FD&C Act (21 U.S.C. 360(k)) and part 807, subpart E, of the regulations (21 CFR part 807).

A postamendments device that has initially been classified into class III under section 513(f)(1) of the FD&C Act may be reclassified into class I or class II under section 513(f)(3) of the FD&C Act. Section 513(f)(3) of the FD&C Act provides that FDA, acting by administrative order, can reclassify the device into class I or class II on its own initiative, or in response to a petition from the manufacturer or importer of the device. To change the classification of the device, the proposed new class must have sufficient regulatory controls to provide reasonable assurance of the safety and effectiveness of the device for its intended use.[1]

FDA relies upon ''valid scientific evidence'' as defined in section 513(a)(3) of the FD&C Act and 21 CFR 860.7(c)(2) in the classification process to determine the level of regulation for devices.[2] In general, to be considered in the reclassification process, the ''valid scientific evidence'' upon which the Agency relies must be publicly available. Publicly available information excludes trade secret and/or confidential commercial information, *e.g.,* the contents of a pending PMA (see section 520(c) of the FD&C Act (21 U.S.C. 360j(c))). Section 520(h)(4) of the FD&C Act provides that FDA may use, for reclassification of a device, certain information in a PMA 6 years after the application has been approved. This includes information from clinical and preclinical tests or studies that demonstrate the safety and effectiveness of the device, but it does not include the descriptions of methods of manufacture and product composition and other trade secrets.

In accordance with section 513(f)(3) of the FD&C Act, FDA is issuing this proposed order to reclassify postamendments class III nucleic acid-based test systems indicated for use with a corresponding approved oncology therapeutic product (product codes OWD, PJG, PQP, and SFL),[3] hereafter collectively referred to as oncology therapeutic nucleic acid-based test systems, into class II (special controls) subject to premarket notification under a new device classification regulation with the name ''Nucleic Acid-Based Test Systems for Use with a Corresponding Approved Oncology Therapeutic Product.''

The identification in the proposed classification regulation characterizes oncology therapeutic nucleic acid-based test systems as prescription in vitro diagnostic (IVD) devices intended for the detection of specific genetic variant(s) and/or other nucleic acid biomarkers in human clinical specimens using nucleic acid amplification technology (NAAT) and/or sequencing technology, and are indicated for use with a corresponding approved oncology therapeutic product. These test systems include companion diagnostic (CDx) test systems, which are devices that provide information that is essential for the safe and effective use of a corresponding approved therapeutic product and the use of which is stipulated in the instructions for use in the labeling of both the diagnostic device and the approved therapeutic product (Ref. 1). These test systems also include those test systems that provide information about known benefits and/or risks of an approved therapeutic product, where the use of the test system is referenced in the product labeling of the corresponding approved therapeutic product but the test system is not essential for the safe and effective use of the approved therapeutic product.

As discussed further throughout this proposed order, FDA has issued PMAs for various oncology therapeutic nucleic acid-based test systems designated under product codes OWD, PJG, PQP, or SFL. The oncology therapeutic nucleic acid-based test systems within the different product codes have distinct characteristics in certain respects, for example, each product code generally represents devices with a distinct technology used (*e.g.,* NAAT and/or sequencing technology) and/or specific analyte(s) detected by the test system. FDA has considered the distinctions of these test systems across the four product codes and has determined that these test systems, including those devices that provide information that is essential for the safe and effective use of a corresponding approved oncology therapeutic product, as well as test systems that, while not essential to the safe and effective use of the corresponding approved oncology therapeutic product, provide information about known benefits and/or risks related to the use of the approved oncology therapeutic product, have the same or a similar risk profile and sufficiently similar purposes, design considerations, functions, and other features related to safety and effectiveness such that the same or similar regulatory controls are necessary and sufficient to provide reasonable assurance of safety and effectiveness.[4] For these reasons and considering that FDA did not identify any unique risks associated with the distinctions across

[1] See generally section 513 of the FD&C Act.

[2] See generally *id.*

[3] FDA's Center for Devices and Radiological Health (CDRH) uses product codes to help categorize and ensure consistent regulation of medical devices. A product code consists of three characters that are assigned at the time a product code is generated and is unique to a product type. The three characters carry no other significance and are not an abbreviation.

[4] For example, a specific device could be indicated for and approved to provide information that is essential for the safe and effective use of a corresponding approved oncology therapeutic product and to provide information about known benefits and/or risks related to the use of a corresponding approved oncology therapeutic product that is not essential to the safe and effective use of a corresponding approved oncology therapeutic product. The distinction is determined by the data from the clinical development program of the corresponding therapeutic product and how the therapeutic product is labeled (*i.e.,* whether the use of the IVD device is essential for the safe and effective use of the therapeutic product or not essential for the safe and effective use of the therapeutic product but provides information about known benefits and/or risks related to the use of the therapeutic product). The devices have sufficiently similar purposes, design considerations, functions, and other features related to safety and effectiveness such that the same or similar regulatory controls are necessary and sufficient to provide reasonable assurance of safety and effectiveness and the devices can be part of the same device type.

these devices, FDA is proposing a single classification regulation to classify all oncology therapeutic nucleic acid-based test systems into class II. There would generally not be changes to the product codes (*i.e.,* OWD, PJG, PQP, and SFL) for previously approved oncology therapeutic nucleic acid-based test systems, and future oncology therapeutic nucleic acid-based test systems would either be assigned to one of the currently existing product codes or a new product code, as appropriate. The new classification regulation would apply to both current and new devices that are oncology therapeutic nucleic acid-based test systems.

Based upon the extensive PMA data available to FDA in accordance with section 520(h)(4) of the FD&C Act,[5] [6] published peer-reviewed literature studying the longstanding and well-understood technologies, and data available to the Agency demonstrating a lack of significant postmarket safety signals with oncology therapeutic nucleic acid-based test systems, FDA believes there is sufficient information to reclassify these devices from class III (premarket approval) into class II (special controls). FDA believes the standard in section 513(a)(1)(B) of the FD&C Act is met as there is sufficient information to establish special controls, which, in addition to general controls, would provide reasonable assurance of the safety and effectiveness of these devices.[7] Therefore, FDA is proposing to establish a new device classification regulation, ''Nucleic Acid-Based Test Systems for Use with a Corresponding Approved Oncology Therapeutic Product,'' and classify this device type into class II along with the special controls that the Agency believes are necessary to provide a reasonable assurance of the safety and effectiveness for these devices.

Under the FD&C Act, premarket notification (510(k)) submissions are required to provide a reasonable assurance of the safety and effectiveness of class II devices unless FDA determines that the device type should be exempt from 510(k) requirements under section 510(m) of the FD&C Act.[8] FDA has not made this determination for oncology therapeutic nucleic acid-based test systems and, therefore, FDA is not proposing for this class II device type to be exempt from 510(k) requirements.

If this proposed order is finalized, persons who intend to market this type of device must submit to FDA a premarket notification under section 510(k) of the FD&C Act prior to marketing the device.

II. Regulatory History of the Devices

In accordance with section 513(f)(1) of the FD&C Act, oncology therapeutic nucleic acid-based test systems are automatically classified into class III because they were not introduced or delivered for introduction into interstate commerce for commercial distribution before May 28, 1976, have not been reclassified into class I or II, and have not been found substantially equivalent to a device placed in commercial distribution after May 28, 1976, which was subsequently classified or reclassified into class I or class II. Therefore, these devices are subject to the PMA requirements under section 515 of the FD&C Act (21 U.S.C. 360e).

On August 17, 2011, FDA approved an original PMA for the first oncology therapeutic nucleic acid-based test system, the cobas 4800 BRAF V600 Mutation Test (P110020) (product code OWD), a real-time polymerase chain reaction (PCR) IVD device intended for the qualitative detection of the BRAF V600E mutation in DNA extracted from human melanoma tissue and intended to be used as an aid in selecting melanoma patients for treatment with vemurafenib (Ref. 2). In a January 13, 2012, **Federal Register** notice (77 FR 2071), FDA announced the approval order and availability of the Summary of Safety and Effectiveness Data (SSED) for the device.

Subsequently, on December 19, 2014, FDA approved an original PMA for the BRACAnalysis CDx under product code PJG (P140020). The BRACAnalysis CDx is an oncology therapeutic nucleic acid-based test intended for the qualitative detection and classification of variants in the protein coding regions and intron/exon boundaries of the BRCA1 and BRCA2 genes using genomic DNA obtained from whole blood specimens. Single nucleotide variants and small insertions and deletions (indels) are identified by PCR and Sanger sequencing. Large deletions and duplications in BRCA1 and BRCA2 are detected using multiplex PCR. Results of the test are intended to be used as an aid in identifying ovarian cancer patients eligible for treatment with Lynparza (olaparib) (Ref. 3). In an April 22, 2015, **Federal Register** notice (80 FR 22527), FDA announced the approval order and availability of the SSED for the device.

FDA subsequently approved an original PMA for FoundationFocus CDx$_{BRCA}$ Assay under the product code PQP on December 19, 2016 (P160018). FoundationFocus CDx$_{BRCA}$ Assay is an oncology therapeutic nucleic acid-based test system using next generation sequencing (NGS) technology, intended for the qualitative detection of BRCA1 and BRCA2 alterations in formalin-fixed paraffin-embedded (FFPE) ovarian tumor tissues, with results of the test intended to be used as an aid in identifying ovarian cancer patients for whom treatment with Rubraca (rucaparib) is being considered (Ref. 4). In a September 25, 2017 **Federal Register** notice (82 FR 44626), FDA announced the approval order and availability of the SSED for the FoundationFocus CDx$_{BRCA}$ Assay. FDA subsequently approved a panel-track supplement[9] (P160018/S001), on April

[5] In proposing to reclassify oncology therapeutic nucleic acid-based test systems from class III to class II, FDA, on its own initiative, is relying on data from relevant PMAs and a relevant PMA panel-track supplement (under product codes OWD, PJG and PQP) available to FDA in accordance with the six-year rule (see section 520(h)(4) of the FD&C Act (21 U.S.C. 360j(h)(4)) (see also, FDA, ''Guidance on Section 216 of the Food and Drug Administration Modernization Act of 1997—Guidance for Industry and for FDA Reviewers,'' August 9, 2000. Available at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/guidance-section-216-food-and-drug-administration-modernization-act-1997-guidance-industry-and-fda*). This data was from relevant PMAs and a PMA panel-track supplement approved after November 28, 1990 and before January 27, 2019 for devices that would fall under this specific proposed reclassification as noted in section II of this proposed order. See also, FDA's premarket approval database, available at *https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfpma/pma.cfm.*

[6] For the purpose of this proposed order, PMA data considered in accordance with section 520(h)(4) includes only that data which was submitted to and therefore considered by FDA at the time the PMA was reviewed and approval was issued.

[7] FDA notes that the ''ACTION'' caption for this proposed order is styled as ''Proposed amendment; proposed order; request for comments'' rather than ''Proposed order.'' Beginning in December 2019, this editorial change was made to indicate that the document ''amends'' the Code of Federal Regulations. The change was made in accordance with the Office of the Federal Register's (OFR) interpretations of the **Federal Register** Act (44 U.S.C. chapter 15), its implementing regulations (1 CFR 5.9 and parts 21 and 22), and the Document Drafting Handbook.

[8] In considering whether to exempt class II devices from premarket notification, FDA considers whether premarket notification for the type of device is necessary to provide reasonable assurance of safety and effectiveness of the device. FDA generally considers the factors initially identified in the January 21, 1998 **Federal Register** notice (63 FR 3142) and further explained in FDA's guidance issued on February 19, 1998, entitled ''Procedures for Class II Device Exemptions from Premarket Notification, Guidance for Industry and CDRH Staff'' in determining whether premarket notification is necessary for class II devices. FDA also considers that, even when exempting devices from the 510(k) requirements, these devices would still be subject to certain limitations on exemptions, for example, the general limitations set forth in 21 CFR 866.9.

[9] The term ''panel-track supplement'' is defined in section 737(4)(B) of the FD&C Act as, ''a

6, 2018, expanding the indications for use of this test to include the qualitative detection of genomic loss of heterozygosity (LOH) from FFPE ovarian tumor tissue for which positive homologous recombination deficiency (HRD) status (defined as tBRCA-positive or LOH high) in ovarian cancer patients is associated with improved progression-free survival (PFS) from Rubraca (rucaparib) maintenance therapy (Ref. 5).[10] This new indication for use, while not essential to the safe and effective use of the corresponding approved oncology therapeutic product, is to provide information about known benefits related to the use of the approved oncology therapeutic product. With the approval of P160018/S001, FDA has thus far approved four oncology therapeutic nucleic acid-based test systems that provide information about known benefits and/or risks of an approved oncology therapeutic product, where the use of the test system is referenced in the product labeling of the corresponding approved therapeutic product but the test system is not considered to be essential for the safe and effective use of the approved therapeutic product.

Finally, on August 15, 2025, FDA approved an original PMA for the Idylla CDx MSI Test under product code SFL (P250005). The Idylla CDx MSI Test is an oncology therapeutic nucleic acid-based test intended for the qualitative detection of a panel of seven monomorphic biomarkers (ACVR2A, BTBD7, DIDO1, MRE11, RYR3, SEC31A and SULF2) for identification of microsatellite instability (MSI) in colorectal cancer (CRC) tissue. The Idylla CDx MSI Test uses FFPE tissue sections from patients with CRC, from which nucleic acids are extracted and then analyzed using PCR amplification and subsequent melt-curve analysis.[11] The Idylla CDx MSI Test reports MSI status as either Microsatellite Stable (MSS), Microsatellite Instability-High (MSI–H), or invalid. The test is intended as a companion diagnostic to identify CRC patients with MSI–H status, who may benefit from treatment with OPDIVO (nivolumab) as a monotherapy and/or treatment with OPDIVO (nivolumab) in combination with YERVOY (ipilimumab).[12]

Since the first approval order for an oncology therapeutic nucleic acid-based test system, FDA has reviewed and approved an additional 18, 2, 13, and 1 original PMAs under the product codes OWD, PJG, PQP, and SFL, respectively, and approximately 200, 29, 174, and 0 PMA supplements, respectively, for therapeutic nucleic acid-based test systems under product codes OWD, PJG, PQP, and SFL.[13]

In accordance with the ''six-year rule'' described in section 520(h)(4) of the FD&C Act (21 U.S.C. 360j(h)(4)) (Ref. 6), FDA considered data contained in the following 17 original PMAs and one panel-track supplement to an original PMA, representing oncology therapeutic nucleic acid-based test systems from three of the four product codes (*i.e.,* OWD, PJG, and PQP) for oncology therapeutic nucleic acid-based test systems: cobas 4800 BRAF V600 Mutation Test (P110020) (product code OWD) (Ref. 2), therascreen KRAS RGQ PCR Kit (P110027) (product code OWD) (Ref. 7), therascreen KRAS RGQ PCR Kit (P110030) (product code OWD) (Ref. 8), THxID BRAF Kit (P120014) (product code OWD) (Ref. 9), cobas EGFR Mutation Test (P120019) (product code OWD) (Ref. 10), therascreen EGFR RGQ PCR Kit (P120022) (product code OWD) (Ref. 11), BRACAnalysis CDx (P140020) (product code PJG) (Ref. 3), cobas KRAS Mutation Test (P140023) (product code OWD) (Ref. 12), cobas EGFR Mutation Test v2 (P150044) (product code OWD) (Ref. 13), cobas EGFR Mutation Test v2 (P150047) (product code OWD) (Ref. 14), FoundationFocus CDx$_{BRCA}$ Assay (P160018) (product code PQP) (Ref. 4), FoundationFocus CDx$_{BRCA\ LOH}$ (P160018/S001) (product code PQP) (Ref. 5), Praxis Extended RAS Panel (P160038) (product code PQP) (Ref. 15), LeukoStrat CDx FLT3 Mutation Assay (P160040) (product code OWD) (Ref. 16), Oncomine Dx Target Test (P160045) (product code PQP) (Ref. 17), Abbott RealTi*m*e IDH2 (P170005) (product code OWD) (Ref. 18), FoundationOne CDx (P170019) (product code PQP) (Ref. 19), and Abbott RealTi*m*e IDH1 (P170041) (product code OWD) (Ref. 20). No information from PMAs and PMA supplements for which fewer than six years have passed since FDA's approval has been used in support of this proposed order to reclassify oncology therapeutic nucleic acid-based test systems into class II (see section 520(h)(4) of the FD&C Act (21 U.S.C. 360j(h)(4))).[14]

A review of data from FDA's Manufacturer and User Facility Device Experience (MAUDE) database, which contains Medical Device Reports (MDRs) of adverse events, indicates that as of September 8, 2025 there have been 147 reported events for oncology therapeutic nucleic acid-based test systems under product codes OWD (N= 139 MDRs), PJG (N= 1 MDR), PQP (N= 7 MDRs), and SFL (N= 0 MDR) since the approval of the first oncology therapeutic nucleic acid-based test system in 2011.

After review of the data, the Agency has determined that false positive results account for the device problem associated with a significant number (over 80 percent) of the MDR reported events. Other device problems that were less frequently reported include, for example, incorrect, inadequate or imprecise result or readings, non-reproducible results, output problem, and false negative results. Notably, a significant majority (over 95 percent) of the MDRs reported under these product codes listed identified no clinical signs, symptoms, or conditions; no known impact or consequence to the patient; and/or no patient involvement. Other less frequently reported health impacts, include, for example, inadequate/

supplement to an approved premarket application or premarket report under section 515 that requests a significant change in design or performance of the device, or a new indication for use of the device, and for which substantial clinical data are necessary to provide a reasonable assurance of safety and effectiveness.''

[10] The original device was approved under the trade name FoundationFocus CDx$_{BRCA}$ Assay (P160018). The sponsor originally submitted the panel-track PMA supplement application (P160018/S001) for the same test with an expanded indication for use under the trade name FoundationFocus CDx$_{BRCA\ HRD}$. However, through the review process, the sponsor decided to change the name to FoundationFocus CDx$_{BRCA\ LOH}$. Consistent with the authorized device trade name for P160018/S001, the name used throughout this reclassification proposed order is FoundationFocus CDx$_{BRCA\ LOH}$.

[11] As noted above, FDA has determined that the tests assigned to product codes OWD, PJG, PQP, and SFL all utilize NAAT and/or sequencing-based technology for use with a corresponding approved oncology therapeutic product, and have sufficiently similar purposes, design considerations, functions, and other features related to safety and effectiveness such that all oncology therapeutic nucleic acid-based test systems have the same or a similar risk profile. Further, FDA has not identified any unique risks associated with the distinctions across these tests.

[12] As of the date of issuance of this proposed order, fewer than 6 years have transpired since FDA's approval of the Idylla CDx MSI Test (PMA P250005). Therefore, no information from this document has been used in support of this proposed order to reclassify oncology therapeutic nucleic acid-based test systems into class II (see section 520(h)(4) of the FD&C Act (21 U.S.C. 360j(h)(4))).

[13] FDA has determined that the tests assigned to product codes OWD, PJG, PQP, and SFL all utilize NAAT and/or sequencing-based technology for use with a corresponding approved oncology therapeutic product, and have sufficiently similar purposes, design considerations, functions, and other features related to safety and effectiveness such that all oncology therapeutic nucleic acid-based test systems have the same or a similar risk profile. Further, FDA has not identified any unique risks associated with the distinctions across these tests.

[14] In accordance with section 520(h)(4) of the FD&C Act, FDA has not relied on information in PMAs and PMA supplements approved within the last 6 years to develop the proposed special controls or to otherwise inform this proposed reclassification action.

inappropriate treatment or diagnostic exposure; minor injury/illness/impairment; and delay to treatment/therapy.

A search of these product codes in FDA's Medical Device Recalls database indicates that as of September 8, 2025, there have been four class III recalls, 23 class II recalls,[15] and no class I recalls [16] involving oncology therapeutic nucleic acid-based test systems. Of the 23 class II recalls, 12 occurred between 2014 and 2022, have since been terminated, and were determined to be due to non-specific molecular interactions or fluorescence artifacts, nonconforming material/component, and a process control issue, all of which led to or could lead to false positive test results. There is 1 class II recall that was terminated on July 19, 2021, for which the manufacturer's reason for the recall was potential false positive test results, but the root cause is still under investigation by the firm. Other reasons for the class II recalls include erroneous translation of the approved English labeling to Hungarian, an incorrect or lack of expiration date, and erroneous test results caused by off-label use or a manufacturing or design issue of the device.

Of the four class III recalls, three occurred between 2012 and 2015, have since been terminated, and were determined to be due to a device design issue leading to the device generating invalid results and a mix up of materials/components (*i.e.,* incorrect packaging of internal-use only components and released for distribution). The remaining class III recall was terminated on December 11, 2017, for which the manufacturer's reason for the recall was the device generating false positive results, however, the root cause is still under investigation by the firm.

This postmarket data, coupled with the relatively low number of reported events that caused patient harm, indicate a generally good safety record for these device types. The MDR and recall events provide information on the risks to health (identified in section V of this proposed order), which FDA believes can be effectively mitigated through general controls and the special controls proposed herein.

In response to FDA's announcement that the Agency intended to initiate the reclassification process for certain IVDs including companion diagnostic tests (Ref. 21), FDA received a petition on July 25, 2024 from Foundation Medicine Inc., (Docket No. FDA–2024–P–3484) requesting FDA to reclassify next-generation sequencing oncology panel devices used for somatic or germline variant detection that include one or more companion diagnostic indications (under product code PQP) from class III to class II. As discussed in this proposed order, FDA has considered the information available to the Agency and believes that there is sufficient information available to establish special controls, and that the special controls proposed in section VII, together with general controls, would provide a reasonable assurance of the safety and effectiveness of such devices under the PQP product code, as well as other similar devices under product codes OWD, PJG and SFL, and is proposing, on its own initiative, that oncology therapeutic nucleic acid-based test systems, including those under product code PQP, be reclassified from class III to class II.

III. Device Description

Oncology therapeutic nucleic acid-based test systems are postamendments devices classified into class III under section 513(f)(1) of the FD&C Act. These oncology therapeutic nucleic acid-based test systems are prescription IVDs intended for the detection of specific genetic variant(s) and/or other nucleic acid biomarkers in human clinical specimens using NAAT (*e.g.,* PCR) and/or sequencing technology (*e.g.,* NGS), and are indicated for use with a corresponding approved oncology therapeutic product. These oncology therapeutic nucleic acid-based test systems include IVD CDx devices which are devices that provide information that is essential for the safe and effective use of a corresponding approved therapeutic product.[17] The use of an IVD CDx device with a therapeutic product is stipulated in the instructions for use in the labeling of both the diagnostic device and the corresponding approved therapeutic product, including the labeling of any generic equivalents of the therapeutic product.[18] An IVD CDx device could be essential for the safe and effective use of a corresponding approved therapeutic product to:

- Identify patients who are most likely to benefit from the therapeutic product;
- Identify patients likely to be at increased risk for serious adverse reactions as a result of treatment with the therapeutic product;
- Monitor response to treatment with the therapeutic product for the purpose of adjusting treatment (*e.g.,* schedule, dose, discontinuation) to achieve improved safety or effectiveness;
- Identify patients in the population for whom the therapeutic product has been adequately studied, and found safe and effective, *i.e.,* there is insufficient information about the safety and effectiveness of the therapeutic product in any other population.

FDA does not include in this definition of a CDx device IVD devices that are not essential to the safe and effective use of a therapeutic product.[19] For more information on CDx devices, see FDA's guidance titled ''In Vitro Companion Diagnostic Devices—Guidance for Industry and Food and Drug Administration Staff'' (Ref. 1).

Additionally, the oncology therapeutic nucleic acid-based test systems in this proposed order include IVD test systems that provide information about known benefits and/or risks of patient populations related to the use of a corresponding approved therapeutic product and are referenced in the labeling for the corresponding approved therapeutic product but are not essential for the safe and effective use of the therapeutic product. For example, such devices can be used to assess a biomarker-defined population of patients and provide information regarding the overall survival (OS) rate or objective response rate for those patients compared to the broader population of patients for whom the corresponding therapy is indicated. The use of these devices is not a prerequisite for receiving treatment with the corresponding therapeutic product but can aid in the benefit-risk assessment as to the use of the corresponding therapy for those biomarker-defined patients.

FDA proposes to revise 21 CFR part 866 to create a new device classification regulation with the name ''Nucleic Acid-Based Test Systems for Use with a Corresponding Approved Oncology Therapeutic Product.'' Nucleic acid-based test systems indicated for use with a corresponding approved

[15] The database searches initially identified 13 class II recalls reported under the product code OWD. However, after manual review of the data it has been determined that there is one recall that was improperly coded under the product code OWG although the product listed should fall within the product code OWD. As such, for the purpose of this proposed order the data related to this recall has been included in the Agency's postmarket surveillance analysis and discussion surrounding recall data.

[16] Class I, II, and III recalls are defined in 21 CFR 7.3(m).

[17] FDA, ''In Vitro Companion Diagnostic Devices—Guidance for Industry and Food and Drug Administration Staff,'' August 6, 2014. Available at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/in-vitro-companion-diagnostic-devices.*

[19] *Id.*

oncology therapeutic product are identified as prescription IVD devices intended for the detection of specific genetic variant(s) and/or other nucleic acid biomarkers in human clinical specimens using NAAT and/or sequencing technology to provide information related to the use of a corresponding approved oncology therapeutic product. These test systems provide information that is essential for the safe and effective use of a corresponding approved oncology therapeutic product and/or are test systems that, while not essential to the safe and effective use of the corresponding approved oncology therapeutic product, provide information about known benefits and/or risks related to the use of the corresponding approved oncology therapeutic product.

IV. Proposed Reclassification and Summary of Reasons for Reclassification

In accordance with section 513(f)(3) of the FD&C Act and 21 CFR part 860, subpart C, FDA is proposing to reclassify oncology therapeutic nucleic acid-based test systems from class III into class II, subject to 510(k) requirements. FDA believes that there is sufficient information available to establish special controls, and that these special controls, together with general controls, would effectively mitigate the risks to health identified in section V and are necessary to provide a reasonable assurance of the safety and effectiveness of therapeutic nucleic acid-based test systems.

Under this proposed order, if finalized, oncology therapeutic nucleic acid-based test systems will be identified as prescription IVD devices. If the proposed order is finalized, these devices will be subject to the prescription labeling requirements for IVD products (see 21 CFR 809.10(a)(4) and (b)(5)(ii)). Section 510(m) of the FD&C Act provides that FDA may exempt a class II device from the premarket notification requirements under section 510(k) of the FD&C Act, if FDA determines that premarket notification is not necessary to provide reasonable assurance of the safety and effectiveness of the device. For oncology therapeutic nucleic acid-based test systems, FDA has not made this determination and, therefore, the Agency is not proposing to exempt these proposed class II devices from 510(k) requirements.[20] If this proposed order is finalized, persons who intend to market an oncology therapeutic nucleic acid-based test system will need to submit a 510(k) to FDA and receive clearance prior to marketing the device.

This proposed order, if finalized, will decrease regulatory burden on industry, as manufacturers will no longer have to submit a PMA for these types of devices but can instead submit a 510(k) to the Agency for review prior to marketing their device. The 510(k) pathway is less burdensome and generally more cost-effective for industry and FDA than the PMA pathway, the most stringent type of device marketing pathway. A 510(k) typically results in a shorter premarket review timeline compared to a PMA, which ultimately may provide more timely access of these types of devices to patients. FDA expects that the reclassification of these devices would enable more manufacturers to develop these types of devices such that patients would benefit from increased access to appropriately safe and effective tests.

Additionally, manufacturers may wish to use predetermined change control plans (PCCPs) as a way to implement future modifications to their devices without needing to submit a new 510(k) for each significant change or modification [21] while continuing to provide a reasonable assurance of device safety and effectiveness.[22] FDA reviews a PCCP as part of a marketing submission for a device to ensure the continued safety and effectiveness of the device without necessitating additional marketing submissions for implementing each modification described in the PCCP. When used appropriately, PCCPs authorized by FDA are expected to be least burdensome for manufacturers and FDA.[23]

FDA believes that there is sufficient information available to FDA through the 17 original PMAs and 1 panel-track supplement for cobas 4800 BRAF V600 Mutation Test (P110020; product code OWD), therascreen KRAS RGQ PCR Kit (P110027; product code OWD), therascreen KRAS RGQ PCR Kit (P110030; product code OWD), THxID BRAF Kit (P120014; product code OWD), cobas EGFR Mutation Test (P120019; product code OWD), therascreen EGFR RGQ PCR Kit (P120022; product code OWD), BRACAnalysis CDx (P140020; product code PJG), cobas KRAS Mutation Test (P140023; product code OWD), cobas EGFR Mutation Test v2 (P150044; product code OWD), cobas EGFR Mutation Test v2 (P150047; product code OWD), FoundationFocus CDx$_{BRCA}$ Assay (P160018; product code PQP), FoundationFocus CDx$_{BRCA\ LOH}$ (P160018/S001; product code PQP), Praxis Extended RAS Panel (P160038; product code PQP), LeukoStrat CDx FLT3 Mutation Assay (P160040; product code OWD), Oncomine Dx Target Test (P160045; product code PQP), Abbott RealTi*m*e IDH2 (P170005; product code OWD), FoundationOne CDx (P170019; product code PQP), and Abbott RealTi*m*e IDH1 (P170041; product code OWD) [24] (Refs. 2–5, and 7–20), published peer-reviewed literature on nucleic acid-based detection methods, including NAAT and sequencing technologies, and FDA's publicly available MAUDE and Medical Device Recalls databases to establish special controls that effectively mitigate the risks to health identified in section V. More specifically, in evaluating these data sources, FDA has identified the risks to health for inclusion in the overall risk assessment for oncology therapeutic nucleic acid-based test systems. The Agency has considered the risks to health identified by these sources and used certain information from these sources in developing proposed special controls that include mitigation measures for each of the risks to health identified in section V. Accordingly, there would continue to be a reasonable assurance of safety and effectiveness for the devices upon their reclassification from class III to class II when there is conformity with general and special controls. Absent the special controls identified in this proposed order, general controls applicable to these devices are insufficient to provide

[20] See *supra* note 8.

[21] For the purpose of this proposed order reference to ''modification'' means a significant change or modification that would generally require a new premarket notification under 21 CFR 807.81(a)(3).

[22] Section 3308 of the Food and Drug Omnibus Reform Act of 2022, Title III of Division FF of the Consolidated Appropriations Act, 2023, Public Law 117–328 (''FDORA''), enacted on December 29, 2022, added section 515C ''Predetermined Change Control Plans for Devices'' to the FD&C Act. Section 515C has provisions regarding predetermined change control plans (PCCPs) for devices requiring premarket approval or premarket notification. Under section 515C, supplemental applications (section 515C(a)) and new premarket notifications (section 515C(b)) are not required for a change to a device that would otherwise require a premarket approval supplement or new premarket notification if the change is consistent with a PCCP approved or cleared by FDA.

[23] Sections 513 and 515 of the FD&C Act. See also, FDA, ''The Least Burdensome Provisions: Concept and Principles—Guidance for Industry and FDA Staff,'' February 5, 2019. Available at *https://www.fda.gov/regulatory-information/search-fda-guidance-documents/least-burdensome-provisions-concept-and-principles.*

[24] In accordance with section 520(h)(4) of the FD&C Act. FDA has not relied on information in PMAs and PMA supplements approved within the last 6 years to develop the proposed special controls or to otherwise inform this proposed reclassification action.

reasonable assurance of the safety and effectiveness of oncology therapeutic nucleic acid-based test systems.

V. Risks to Health

FDA is providing a substantive summary of the valid scientific evidence concerning the public health benefits of the use of oncology therapeutic nucleic acid-based test systems, and the risks to health of these devices (see further discussion of the special controls being proposed to mitigate these risks in section VII of this proposed order). FDA considered data from 17 PMAs and 1 panel-track supplement available to FDA under section 520(h)(4) of the FD&C Act, published peer-reviewed literature on nucleic acid-based detection methods, including NAAT and sequencing technologies, and postmarket information regarding oncology therapeutic nucleic acid-based test systems.

Cancer continues to be one of the two leading causes of death in the United States (Ref. 22). Biomarker tests for molecularly targeted therapies aim to provide information for health care providers to target and/or tailor cancer treatment based on identifiable molecular differences between patients, with the goal of improving patient outcomes while minimizing risks related to treatment side effects. Oncology therapeutic nucleic acid-based test systems provide a benefit to the public health by aiding in oncology therapeutic product treatment decisions. These test systems may provide information that is essential for the safe and effective use of a corresponding approved therapeutic product and/or provide information about known benefits and/or risks related to the use of a corresponding approved therapeutic product that is not essential for its safe and effective use. For example, health care providers may use a relevant oncology therapeutic nucleic acid-based test system to identify specific patients who are eligible for the safe and effective use of a corresponding oncology therapeutic product, including those patients for which the drug is contraindicated, or monitor a particular patient's response to an approved oncology therapeutic product for the purpose of optimizing a dosing regimen. These devices can be used to enable personalization of oncology care by identifying patients who are most likely to benefit from a specific therapy and yield improved clinical outcomes, or who are at varying degrees of risk for a particular side effect related to the use of a specific therapy. Ultimately, the use of such devices informs treatment decisions and has a significant public health impact for cancer patients.

The Agency has identified the following risks to health associated with the use of oncology therapeutic nucleic acid-based test systems.

- *False negative test results or false positive test results.* False negative test results or false positive test results may negatively influence oncology therapeutic product treatment decisions for patients. For those test systems intended to provide information that is essential for the safe and effective use of a corresponding approved oncology therapeutic product, this risk may result in the withholding of appropriate oncology therapeutic treatment, delayed treatment from an available appropriate alternative therapy, or receiving inappropriate therapy with varying degrees of consequence (*e.g.,* failing to adjust therapy to achieve optimal clinical outcome or exposing a patient to otherwise avoidable serious adverse health risks caused by the therapeutic product). For those test systems that provide information about known benefits and/or risks related to the use of a corresponding approved oncology therapeutic product but are not essential for the safe and effective use of the corresponding approved oncology therapeutic product, this risk may negatively influence patient management based on a misinformed benefit-risk assessment related to the use of a corresponding oncology therapeutic product and could lead to many of the same negative patient outcomes associated with test systems intended to provide information that is essential for the safe and effective use of a corresponding approved oncology therapeutic product as previously described.
- *Failure of the test system to perform as intended or indicated.* For test systems intended to provide information that is essential for the safe and effective use of a corresponding approved oncology therapeutic product, failure of the test system to perform as intended or indicated may result in inappropriate clinical management, due to, among other things, the potential need to rerun the test, leading to a delay in effective treatment or inappropriate treatment for a patient based on delayed results that are essential for the safe and effective use of a corresponding approved oncology therapeutic product. Similarly, for those test systems that provide information about known benefits and/or risks related to the use of a corresponding approved oncology therapeutic product but are not essential for the safe and effective use of the corresponding approved oncology therapeutic product, this risk may result in the potential need to rerun the test, leading to a delay in treatment or inappropriate treatment for a patient based on delayed results that would provide important benefit-risk information for a health care provider to aid in the clinical decision making related to the use of a corresponding oncology therapeutic product.
- *Failure to correctly interpret test results.* Failure to correctly interpret test results, such as incorrect interpretation of the biomarker classification or information provided regarding the therapeutic product, may result in the same negative outcomes associated with false negative or false positive test results as previously discussed. For example, for test systems intended to provide information that is essential for the safe and effective use of a corresponding approved oncology therapeutic product, incorrectly interpreting the test results as positive (*i.e.,* false positive test results) may lead to a patient receiving ineffective or unnecessary treatment that may unnecessarily expose them to treatment toxicities. Similarly, for those test systems that provide information about known benefits and/or risks related to the use of a corresponding approved oncology therapeutic product but are not essential for the safe and effective use of the corresponding approved oncology therapeutic product this risk may, for example, lead to inappropriate patient management decisions made by a health care provider, such as, selecting a suboptimal treatment for a patient, and failure for the patient to realize benefit from a different therapy based on inaccurate benefit-risk information related to the use of a corresponding oncology therapeutic product.

VI. Summary of Data Upon Which the Reclassification Is Based

The safety and effectiveness of this device type has become well established since the initial approval of the first oncology therapeutic nucleic acid-based test system in 2011. FDA believes that oncology therapeutic nucleic acid-based test systems should be reclassified from class III (premarket approval) into class II (special controls) because special controls can be established to mitigate the risks to health identified in section V and are necessary, in addition to general controls, to provide a reasonable assurance of the safety and effectiveness of these devices. The proposed special controls are identified by FDA in section VII of this proposed order.

Taking into account the health benefits of the use of these devices and the nature and known incidence of the

risks to health of the devices, FDA, on its own initiative is proposing to reclassify these postamendments class III devices into class II. FDA believes, that when used as indicated, oncology therapeutic nucleic acid-based test systems can provide significant benefits to health care providers and patients.

In proposing to reclassify and establish special controls for oncology therapeutic nucleic acid-based test systems, FDA has considered and analyzed the following information: (1) data from 17 PMAs and 1 PMA panel-track supplement for oncology therapeutic nucleic acid-based test systems available to FDA in accordance with section 520(h)(4) of the FD&C Act, (2) published peer-reviewed literature on nucleic acid-based detection methods, including NAAT and sequencing technologies, and (3) MDR and recall data from the Agency's publicly available MAUDE and Medical Device Recalls databases. The available evidence demonstrates that there are public health benefits derived from the use of oncology therapeutic nucleic acid-based test systems which provide information related to the use of a corresponding approved oncology therapeutic product. In addition, the nature of the associated risks to health are known, and special controls can be established to sufficiently mitigate these risks.

FDA considered the safety and effectiveness of oncology therapeutic nucleic acid-based test systems through review of PMA data dating back to the initial approval of the first oncology therapeutic nucleic acid-based test system in 2011, under product code OWD (P110020) (Ref. 2). Subsequently, between August 17, 2011 and September 8, 2025, FDA approved 35 PMAs and 403 supplements for oncology therapeutic nucleic acid-based test systems under the product codes OWD, PJG, PQP, and SFL. For the purpose of this reclassification, FDA was able to consider data from the following 17 original PMAs and 1 panel-track supplement to an original PMA in accordance with section 520(h)(4): cobas 4800 BRAF V600 Mutation Test (P110020), therascreen KRAS RGQ PCR Kit (P110027), therascreen KRAS RGQ PCR Kit (P110030), THxID BRAF Kit (P120014), cobas EGFR Mutation Test (P120019), therascreen EGFR RGQ PCR Kit (P120022), BRACAnalysis CDx (P140020), cobas KRAS Mutation Test (P140023), cobas EGFR Mutation Test v2 (P150044), cobas EGFR Mutation Test v2 (P150047), FoundationFocus CDx$_{BRCA}$ Assay (P160018), FoundationFocus CDx$_{BRCA\ LOH}$ (P160018/S001), Praxis Extended RAS Panel (P160038), LeukoStrat CDx FLT3 Mutation Assay (P160040), Oncomine Dx Target Test (P160045), Abbott RealTi*m*e IDH2 (P170005), FoundationOne CDx (P170019), and Abbott RealTi*m*e IDH1 (P170041) (Ref. 2–5, and 7–20).[25]

As part of the Agency's analysis for the proposed reclassification of oncology therapeutic nucleic acid-based test systems, FDA reviewed and considered information provided within each of these applications, including information available in the SSEDs and device labeling for each application, which demonstrated a reasonable assurance of safety and effectiveness of the devices. In developing the proposed special controls, the Agency considered the analytical and clinical studies and device performance data, all of which demonstrated appropriate performance of the device and supported each approval. FDA believes the proposed special controls can effectively mitigate the risks to health identified in section V and, along with general controls, can provide a reasonable assurance of the safety and effectiveness for oncology therapeutic nucleic acid-based test systems. Additionally, FDA identified the probable adverse effects or risks to health of the tests based on information provided within the applications. As diagnostic tests, oncology therapeutic nucleic acid-based test systems generally do not pose additional safety hazards or direct adverse effects to the patients being tested beyond those associated with routine procedures typical for a diagnostic workup of the disease. The risks to health identified within the applications include false test results (*i.e.,* false negative or false positive test results), failure to correctly interpret test results or incorrect test results interpretations, and failure of the device to perform as intended or indicated. Based on data collected in the clinical and non-clinical studies conducted, the safety profile for the devices was generally deemed acceptable in supporting the approvals of these devices.

While the oncology therapeutic nucleic acid-based test systems that are the subject of the 17 PMAs and 1 PMA panel-track supplement have unique test attributes in certain respects (*e.g.,* the use of a specific technology and/or the type of analyte(s) detected by the test system), FDA has determined that these tests have sufficiently similar purposes, design considerations, functions, and other features related to safety and effectiveness such that the information and data reviewed and analysis conducted by FDA was analogous across all 18 applications available to the Agency in accordance with section 520(h)(4) of the FD&C Act. As such, and in order to avoid redundancy, the following three summaries are intended to provide examples that are representative of the PMA information and data that was reviewed and considered by FDA across the 18 applications in proposing to reclassify oncology therapeutic nucleic acid-based test systems from class III (premarket approval) into class II (special controls).

For example, FDA reviewed the original PMA data for the first FDA-approved oncology therapeutic nucleic acid-based test system, which was approved on August 17, 2011, through an original PMA (P110020) (product code OWD) (Ref. 2), for a CDx test, cobas 4800 BRAF V600 Mutation Test, intended for the qualitative detection of the BRAF V600E mutation in DNA extracted from FFPE human melanoma tissues and to be used as an aid in selecting melanoma patients whose tumors carry the BRAF V600E mutation for treatment with vemurafenib. The Agency considered the submitted studies and data provided in the approved submission, which demonstrated reasonable assurance of safety and effectiveness of this test when used in accordance with the indications for use. Such studies and data include the results of the international, randomized, open-label, controlled, multicenter, Phase III clinical study N025026 (BRIM3) for which the cobas 4800 BRAF V600 Mutation Test was used as a CDx test for selecting patients for treatment with vemurafenib (Zelboraf). Results from this clinical study demonstrated that patients who received treatment with vemurafenib (Zelboraf) based on a BRAF V600E positive test result as detected by the cobas 4800 BRAF V600 Mutation Test met the study's two co-primary efficacy endpoints, OS and PFS as compared to dacarbazine. Therefore, the results of this clinical study helped to demonstrate a reasonable assurance of the safety and effectiveness of the cobas 4800 BRAF V600 Mutation Test for its indicated use, as an aid in selecting melanoma patients whose tumors carry the BRAF V600E mutation for treatment with vemurafenib. The performance of the test was also supported by the analytical validation studies. For example, reproducibility studies demonstrated very good agreement to

[25] In accordance with section 520(h)(4) of the FD&C Act. FDA has not relied on information in PMAs and PMA supplements approved within the last 6 years to develop proposed special controls or to otherwise inform this proposed reclassification.

support analytical performance of the test. The adverse effects of the test are based on data collected in the BRIM3 clinical study. As a diagnostic test, the cobas 4800 BRAF V600 Mutation Test involves testing on FFPE human melanoma tissue sections, which are routinely removed as part of the diagnosis of melanoma by pathologists. The test, therefore, presents no additional safety hazard to the patient being tested. Potential adverse effects of the cobas 4800 BRAF V600 Mutation Test include failure of the device to perform as expected, failure to correctly interpret test results, and/or false positive test results or false negative test results which may lead to improper patient management decisions in melanoma treatment.

Additionally, FDA considered the original PMA studies and data from the Oncomine Dx Target Test PMA, which FDA approved on June 22, 2017 (P160045) (product code PQP) (Ref.17). The Oncomine Dx Target Test is a qualitative test that uses targeted high throughput, parallel-sequencing technology to detect single nucleotide variants (SNVs) and deletions in 23 genes from DNA and fusions in ROS1 from RNA isolated from FFPE tumor tissue samples from patients with non-small cell lung cancer (NSCLC) using the Ion PGM Dx System. The test system is indicated to aid in selecting NSCLC patients with V600E and EGFR (Ex. 19del or L858R variant) mutations in DNA, and ROS1 fusions in RNA for the targeted therapies of Tafinlar (dabrafenib) in combination with Mekinist (trametinib), Xalkori (crizotinib), and Iressa (gefitinib), respectively, in accordance with the approved therapeutic product labeling. The Agency considered the submitted studies and data in the approved submission, which demonstrated reasonable assurance of safety and effectiveness of the Oncomine Dx Target Test when used in accordance with the indications for use. Such studies and data include the retrospective analyses of patients enrolled in two clinical studies (BRF113928 for BRAF V600E mutations and A8081001 for ROS1) and safety and efficacy data obtained from these trials. The clinical outcomes, based on objective response rate (ORR), observed for both clinical studies were maintained based on the ORR estimated from the respective bridging studies supporting the effectiveness of the Oncomine Dx Target Test to select NSCLC patients whose tumors are positive for BRAF V600E or ROS1 fusions for treatment with Tafinlar (dabrafenib) in combination with Mekinist (trametinib), Xalkori (crizotinib), respectively. The safety and effectiveness of the Oncomine Dx Target Test for the selection of NSCLC patients with an EGFR (Ex. 19del or L858R variant) mutation was demonstrated in a retrospective analysis of concordance between the Oncomine Dx Target Test and the FDA-approved QIAGEN therascreen EGFR RGQ PCR Kit. Results demonstrating a high concordance between the Oncomine Dx Target Test and the QIAGEN therascreen EGFR RGQ PCR Kit and comparable reproducibility performance observed between the two tests supported the effectiveness of the Oncomine Dx Target Test to identify NSCLC patients whose tumors are positive for the EGFR (Ex. 19del or L858R variant) mutations for treatment with Iressa (gefitinib). Further, analytical performance studies were conducted with the Oncomine Dx Target Test using DNA and RNA extracted from FFPE tissue of NSCLC patients which demonstrated acceptable sensitivity for the tested variants when used in accordance with the directions provided. The risks of the test or potential adverse effects of the test include failure of the device to perform as expected, failure to correctly interpret test results, and/or false positive test results or false negative test results that could lead to improper patient management decisions in NSCLC treatment. Therefore, the clinical and analytical data in this application supported the reasonable assurance of safety and effectiveness of the Oncomine Dx Target Test when used in accordance with the approved indications for use.

As a final example, FDA considered PMA studies and data from the FoundationFocus CDx$_{BRCA\ LOH}$ [26] panel-track PMA supplement, which FDA approved on April 6, 2018 expanding the indications for use of this test (P160018/S001) (product code PQP) (Ref. 5) to include an indication for use to provide information that while not essential to the safe and effective use of a corresponding approved oncology therapeutic product, provides information about known benefits and/or risks related to the use of an approved oncology therapeutic product. FoundationFocus CDx$_{BRCA\ LOH}$ was originally indicated for the qualitative detection of BRCA1 and BRCA2 alterations in FFPE ovarian tumor tissue to aid in identifying ovarian cancer patients with deleterious tumor BRCA variants (tBRCA-positive) who may be eligible for treatment with Rubraca (rucaparib), providing information that is essential for the safe and effective use of Rubraca (rucaparib). The panel-track PMA supplement expanded the indications for use to include the qualitative detection of genomic LOH from FFPE ovarian tumor tissue to determine HRD status (defined as tBRCA-positive and/or LOH high) in ovarian cancer patients, and positive HRD status in such patients is associated with improved PFS from Rubraca (rucaparib) maintenance therapy. This new indication for use is to provide information about known benefits related to the use of the approved oncology therapeutic product, although the information provided is not essential to the safe and effective use of the corresponding approved oncology therapeutic product. In accordance with the six-year rule [27] and to support this proposed reclassification action, the Agency considered the submitted studies and data in the approved submission, which demonstrated reasonable assurance of safety and effectiveness of this test when used in accordance with the indications for use. For example, the clinical performance of the test for its new indication was established based on results from ARIEL3, a Phase 3, global, randomized, double-blind clinical study of Rubraca (rucaparib) maintenance therapy demonstrating an improved PFS in patients selected by the FoundationFocus CDx$_{BRCA\ LOH}$ and a clinical bridging study that included an analysis of the concordance of the LOH results between the FoundationFocus CDx$_{BRCA\ LOH}$ and the clinical trial assay (CTA) used in the therapeutic product trial. The primary objective of the therapeutic product clinical trial was to evaluate PFS by Response Evaluation Criteria in Solid Tumors (RECIST) v1.1. The bridging study, which supports extrapolating the clinical performance characteristics of the CTA to a candidate device (in this case, the FoundationFocus CDx$_{BRCA\ LOH}$)

[26] The original device was approved under the trade name FoundationFocus CDxBRCA (P160018). The sponsor originally submitted the panel-track PMA supplement application (P160018/S001) for the same device with an expanded indication for use under the trade name FoundationFocus CDx$_{BRCA\ HRD}$. However, through the review process, the sponsor decided to change the name to FoundationFocus CDx$_{BRCA\ LOH}$. For the purpose of providing example summaries that are representative of the PMA information and data that was reviewed and considered by FDA to support the proposed reclassification action in accordance with the six-year rule (see section 520(h)(4) of the FD&C Act), the name used throughout this paragraph is FoundationFocus CDx$_{BRCA\ LOH}$.

[27] In accordance with section 520(h)(4) of the FD&C Act, FDA has not relied on information in PMAs and PMA supplements approved within the last 6 years to develop the proposed special controls or to otherwise inform this proposed reclassification action.

to support the clinical validity of the candidate device, includes retrospective testing of clinical trial samples using the FoundationFocus CDx*BRCA* LOH. To support that the FoundationFocus CDx*BRCA* LOH is clinically meaningful and provides information about known benefits and/or risks related to the use of the approved oncology therapeutic product, the clinical trial data were analyzed using a Cox Proportional Hazard model to demonstrate that there is an interaction between the test results (HRD status) and the corresponding therapeutic product in the intent-to-treat (ITT) population. The Proportional Hazard model showed a statistically significant improvement in PFS for patients randomized to Rubraca as compared with placebo in all patients, including the biomarker positive subgroups (*i.e.,* HRD and tBRCA subgroups). Thus, results demonstrate there is overall probable clinical benefit of the FoundationFocus CDx*BRCA* LOH for its approved indication for use. However, the approved oncology therapeutic product drug is intended for all comers, irrespective of biomarker results, therefore, the information provided is not essential to the safe and effective use of the corresponding approved oncology therapeutic product. Further, the performance of the FoundationFocus CDx*BRCA* LOH was also supported by analytical validation studies, such as reproducibility and repeatability studies, which demonstrated acceptable analytical performance of the assay. The risks of the test are based on data collected in the validation studies conducted to support the test approval. The FoundationFocus CDx*BRCA* LOH involves testing on FFPE ovarian cancer tumor tissue. The risks of the test or potential adverse effects of the test include failure of the device to perform as expected, failure to correctly interpret test results, and/or false positive test results or false negative test results which could lead to improper patient management decisions in ovarian cancer treatment. Therefore, the clinical and analytical data in this panel-track PMA supplement supported the reasonable assurance of safety and effectiveness of this test when used in accordance with the indications for use.

In addition to the original PMA data from the 17 available PMAs and one PMA panel-track supplement, FDA further considered that nucleic acid-based detection methods, including NAAT and sequencing, are well-established technologies, for example, with NAAT, such as PCR, first described in the 1980s (Ref. 23). These technologies have been commonly used in both research and clinical settings for decades and their general principles are well understood and widely published in the literature at this time (Ref. 24). There have been significant scientific developments aimed at addressing certain limitations for NAAT and sequencing technologies and expanding the applications of these technologies, such as the introduction of a thermostable DNA polymerase in PCR and the emergence of high throughput or next generation sequencing techniques (Ref. 25–26). These developments further demonstrate the maturity of these technologies, and FDA considered the breadth of knowledge available regarding NAAT and sequencing technologies in proposing to reclassify oncology therapeutic nucleic acid-based test systems from class III (premarket approval) into class II (special controls). This includes, for example, the establishment of special controls that FDA believes can effectively mitigate those identified risks to health (discussed in section V) and, along with general controls, are necessary to provide a reasonable assurance of the safety and effectiveness for these devices.

Finally, a search of FDA's publicly available MAUDE database revealed 147 reported events for oncology therapeutic nucleic acid-based test systems under product codes OWD, PJG, PQP, and SFL, a significant majority of which did not cause patient harm per the reports. A search of FDA's publicly available Medical Device Recalls database revealed that there have been four class III recall, 23 class II recalls, and no class I recalls involving oncology therapeutic nucleic acid-based test systems. The lack of class I recalls, and relatively few numbers of class II and class III recalls,[28] coupled with the relatively low number of reported events that caused patient harm, indicate a generally good safety record for this device type (see further discussion of the MDR and recall data in section II of this proposed order).

Based on the Agency's review of the information described in this proposed order, FDA has determined that special controls, in addition to general controls, are necessary to provide a reasonable assurance of safety and effectiveness for these devices, and that sufficient information exists to establish such special controls. Therefore, FDA, on its own initiative, is proposing to reclassify oncology therapeutic nucleic acid-based test systems from class III (premarket approval) into class II (special controls) subject to 510(k) requirements.

[28] As defined in 21 CFR 7.3(m), the numerical designation, *i.e.,* I, II, or III, assigned by the FDA to a particular product recall indicates the relative degree of health hazard presented by the product being recalled. Class I recalls are those classified as the highest level of risk in which there is a reasonable probability that the use of, or exposure to, a violative product will cause serious adverse health consequences or death.

VII. Proposed Special Controls

FDA believes that the following proposed special controls would mitigate each of the risks to health described in section V and that these special controls, in addition to general controls, would provide a reasonable assurance of safety and effectiveness for oncology therapeutic nucleic acid-based test systems.

Risks of false positive test results or false negative test results, failure of the test system to perform as intended or indicated, and failure to correctly interpret test results can be mitigated by special controls, including certain design verification and validation activities. For example, documentation of clinical performance testing which must include clinical data demonstrating acceptable performance of the device for its intended use based on data generated using a dataset representative of the intended use population. This may include, for example, data from use of the device as the clinical trial enrollment assay in the therapeutic product clinical trial or data from a method comparison study to an appropriate FDA-authorized device. The analytical performance testing must include data demonstrating appropriate analytical performance of the device such as the precision, analytical accuracy, analytical sensitivity, analytical specificity, and sample and reagent stability of the test system. In addition, device design verification and validation information must include the specification for risk mitigation elements intended to mitigate risks associated with testing and results interpretation including, controls, procedures, and user training requirements.

The risks of false test results, failure to correctly interpret test results, and failure of the device to perform as intended or indicated can be further mitigated by special controls that require specific information in the labeling for these test systems. For example, a requirement to provide a device description that includes a description of relevant limitations with regard to target/genomic region(s) that cannot be targeted and/or detected by the test system, as applicable. In addition, these risks can be further mitigated by labeling special controls that require an appropriate, as

determined by FDA, summary of the performance studies performed and the results of those studies, thus informing the user of the expected performance of the device. Table 1 shows how FDA believes such risks to health described in section V would be mitigated by the proposed special controls.

TABLE 1—RISKS TO HEALTH AND MITIGATION MEASURES FOR ONCOLOGY THERAPEUTIC NUCLEIC ACID-BASED TEST SYSTEMS

Identified risks to health	Mitigation measures
False positive test results or false negative test results.	Certain design verification and validation activities, including certain analytical validation and clinical validation data. Certain labeling information, including certain performance information.
Failure of the test system to perform as intended or indicated.	Certain design verification and validation activities, including certain analytical validation and clinical validation data. Certain labeling information, including certain performance information.
Failure to correctly interpret test results	Certain design verification and validation activities, including certain analytical validation and clinical validation data. Certain labeling information, including certain performance information.

If this proposed order is finalized, oncology therapeutic nucleic acid-based test systems will be identified as prescription IVD devices. Therefore, these devices would be subject to the prescription labeling requirements for IVD products (see 21 CFR 809.10(a)(4) and (b)(5)(ii)).

If this proposed order is finalized, oncology therapeutic nucleic acid-based test systems will be reclassified into class II (special controls) and will be subject to premarket notification requirements under section 510(k) of the FD&C Act. As discussed in this proposed order, the intent is for the reclassification to be codified in the new classification regulation 21 CFR 866.6075. If finalized, firms will be required to comply with the particular mitigation measures set forth in the special controls. Adherence to the special controls, in addition to the general controls, is necessary to provide a reasonable assurance of the safety and effectiveness of oncology therapeutic nucleic acid-based test systems.

VIII. Analysis of Environmental Impact

We have determined under 21 CFR 25.34(b) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IX. Paperwork Reduction Act of 1995

While this proposed order contains no new collections of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information in 21 CFR part 820 (Quality System Regulation) have been approved under OMB control number 0910–0073; the collections of information in part 807, subpart E (Premarket Notification Procedures), have been approved under OMB control number 0910–0120; and the collections of information in 21 CFR parts 801 and 809 (Device Labeling) have been approved under OMB control number 0910–0485.

X. Proposed Effective Date

FDA proposes that any final order based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

XI. Codification of Orders

Under section 513(f)(3) of the FD&C Act, FDA may issue final orders to reclassify devices. FDA will continue to codify classifications and reclassifications in the Code of Federal Regulations (CFR). Changes resulting from final orders will appear in the CFR as newly codified orders. Therefore, under section 513(f)(3) of the FD&C Act, in the proposed order, we are proposing to codify Nucleic Acid-Based Test Systems for Use with a Corresponding Approved Oncology Therapeutic Product in the new 21 CFR 866.6075, under which these oncology therapeutic nucleic acid-based test systems would be reclassified from class III into class II.

List of Subjects in 21 CFR Part 866

Biologics, Laboratories, Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act, and under authority delegated to the Commissioner of Food and Drugs, it is proposed that 21 CFR part 866 be amended as follows:

PART 866—IMMUNOLOGY AND MICROBIOLOGY DEVICES

■ 1. The authority citation for 21 CFR part 866 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 360*l,* 371.

■ 2. Add § 866.6075 to subpart G to read as follows:

§ 866.6075 Nucleic Acid-Based Test Systems for Use with a Corresponding Approved Oncology Therapeutic Product.

(a) *Identification.* Nucleic acid-based test systems indicated for use with a corresponding approved oncology therapeutic product are identified as prescription in vitro diagnostic devices intended for the detection of specific genetic variant(s) and/or other nucleic acid biomarkers in human clinical specimens using nucleic acid amplification (*e.g.,* polymerase chain reaction) and/or sequencing technology (*e.g.,* next generation sequencing) to provide information related to the use of a corresponding approved oncology therapeutic product. These test systems include devices that provide information that is essential for the safe and effective use of a corresponding approved oncology therapeutic product and devices that, while not essential to the safe and effective use of the corresponding approved oncology therapeutic product, provide information about known benefits and/or risks related to the use of the corresponding approved oncology therapeutic product.

(b) *Classification:* Class II (special controls). The special controls for this device are:

(1) Design verification and validation must include:

(i) A summary of the empirical evidence that establishes the appropriate analytical quality metrics and thresholds for the test system.

(ii) Device performance data demonstrating appropriate, as determined by FDA, analytical and clinical performance of the device for the intended use. This must include:

(A) Data demonstrating the precision, analytical accuracy, analytical sensitivity, analytical specificity, and sample and reagent stability of the test system. Analytical performance data must be evaluated for each gene/variant, or alternatively, justification for an alternative approach must be provided and determined by FDA to be appropriate, such as the use of a representative set of genes and/or variants.

(B) Data demonstrating all targeted region(s) that can be detected by the test system and disclosure of any region(s) not targeted or detected by the test system and/or with limited detection by the test system, as applicable.

(C) Clinical data generated using clinical specimens representative of the intended use population demonstrating appropriate, as determined by FDA, clinical performance of the device for its intended use.

(D) Data demonstrating appropriate validation of the intended specimen handling protocol and specimen preparation (*e.g.,* nucleic acid extraction and purification) as described in the labeling.

(iii) Specifications and data that appropriately demonstrate the validity of the biomarker classification process, including any bioinformatic pipeline. This information must include a description of the classification process, including protocol(s) and criteria used for classification and reporting, and detailed documentation of the basis for biomarker interpretation with appropriate references.

(iv) Specification for risk mitigation elements intended to mitigate risks associated with testing and results interpretation including controls, procedures, and user training requirements, as appropriate.

(2) Labeling must include the following:

(i) A device description which includes:

(A) The biomarker(s) detected by the test system;

(B) Relevant limitations with regard to target/genomic region(s) that cannot be targeted or detected by the test system and/or with limited detection by the test system, as applicable;

(C) A description of the analysis algorithms used for biomarker detection and annotation, evaluation, and classification;

(D) A description of the quality metrics, thresholds, and filters utilized at each step of the test system, as applicable.

(ii) An appropriate summary, as determined by FDA, of the performance studies conducted and the results of those studies, including those that relate to all design verification and validation special controls.

(iii) For those test systems intended to provide information that is essential for

the safe and effective use of a corresponding approved oncology therapeutic product, language indicating that the test system is indicated for use with a corresponding FDA-approved oncology therapeutic product. Device labeling must be consistent with the information set forth in the corresponding FDA-approved oncology therapeutic product labeling.

(iv) For those test systems intended to provide information about known benefits and/or risks related to the use of a corresponding FDA-approved oncology therapeutic product but are not essential for the safe and effective use of the corresponding approved oncology therapeutic product, language summarizing the benefits and/or risks related to the use of a corresponding FDA-approved oncology therapeutic product that must be consistent with the information set forth in the corresponding FDA-approved oncology therapeutic product labeling.

Lowell M. Zeta,

Acting Deputy Commissioner for Policy, Legislation, and International Affairs.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding: Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 26, 2025 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

National Institute of Food and Agriculture

Title: NIFA Grant Application.

OMB Control Number: 0524–0039.

Summary of Collection: The United States Department of Agriculture (USDA), National Institute of Food and Agriculture (NIFA) sponsors ongoing agricultural research, education, and extension programs under which competitive, formula, and special awards of a high-priority nature are made. These programs are authorized pursuant to the authorities contained in the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended (7 U.S.C. 3101), the Smith-Lever Act, and other legislative authorities.

Before awards can be issued, certain information is required from applicants as part of an overall application. In addition to a project summary, proposal narrative, vitae of key personnel, and other pertinent technical aspects of the proposed project, supporting documentation of an administrative and budgetary nature also must be provided. This information is obtained via applications through the use of federal-wide standard grant application forms and NIFA specific application forms. Because competitive applications are submitted, many of which necessitate review by peer panelists, it is particularly important that applicants provide the information in a standardized fashion to ensure equitable treatment for all.

Need and Use of the Information: The fundamental purpose of the information requested is for provide information that is not obtained in the federal-wide application forms but is necessary for the NIFA proposal and award process. In addition to federal-wide standard grant application forms, NIFA will use the following program and agency specific components as part of its application package: Letter of Intent Form, Supplemental Information Form; Application Type Form; Form NIFA–2008, Assurance Statement(s); and Form NIFA–2010, Fellowships/Scholarships Entry/Annual Update/Exit Form.

Description of Respondents: Individuals or household; Federal Government; State, Local or Tribal Government.

Number of Respondents: 26,550.

Frequency of Responses: Recordkeeping; Reporting: Weekly; Monthly; Annually.

Total Burden Hours: 26,888.

Rachelle Ragland-Greene,

Departmental Information Collection Clearance Officer.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED: The Chemical Safety and Hazard Investigation Board (CSB) will convene public meetings on December 11, 2025; March 19, 2026; June 18, 2026; and, September 17, 2026, at 2:00 p.m. ET. These meetings serve to fulfill the CSB's requirement to hold a minimum of four public meetings for Fiscal Year 2026 pursuant to 40 CFR 1600.5(c). The Board will review the CSB's progress in meeting its mission and as appropriate highlight safety products newly released through investigations and safety recommendations.

CONTACT PERSON FOR FURTHER INFORMATION: Hillary Cohen, Communications Manager, at *public@csb.gov* or (202) 446–8094. Further information about these public meetings can be found on the CSB website at: *www.csb.gov.*

Additional Information

Background

The CSB is an independent federal agency charged with investigating incidents and hazards that result, or may result, in the catastrophic release of extremely hazardous substances. The agency's Board Members are appointed by the President and confirmed by the Senate. CSB investigations look into all aspects of chemical accidents and hazards, including physical causes such as equipment failure as well as inadequacies in regulations, industry standards, and safety management systems.

Public Participation

The meetings are free and open to the public. These meetings will only be available via ZOOM. Close captions (CC) will be provided. At the close of each meeting, there will be an opportunity for public comment. To submit public comments for the record please email the agency at *public@csb.gov.*

Dated: November 21, 2025.

Steven Messer,

Acting General Counsel, Chemical Safety and Hazard Investigation Board.

BILLING CODE 6350–01–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–46–2025]

Foreign-Trade Zone (FTZ) 81, Notification of Proposed Production Activity; SubCom, LLC; (Undersea Fiber-Optic Cables and Repeaters); Newington, New Hampshire

SubCom, LLC submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in Newington, New Hampshire within FTZ 81. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on November 20, 2025.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status material(s)/component(s) and specific finished product(s) described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via *www.trade.gov/ftz.*

The proposed finished products include undersea fiber-optic cables and undersea repeaters (duty rates are duty-free).

The proposed foreign-status materials/components include: fiber optic components (couplers; pigtails with boot adapter; pigtails with boot gimbal; jumper cables; connectors; connectors with boot; optical components (isolators; thin film filters; switches; circulators; filters; amplifier modules); high-reliability continuous pump lasers; plug attenuators; cooling fans; control card printed circuit boards; fiber adapters; subsea high-voltage power supplies; photodiode sensors; steel components (wire armoring; high strength wire); conductive copper tape; aluminum wires; stainless steel components (machined clamps and rings; machined couplings); and, machined beryllium-copper wedges (duty rate ranges from duty-free to 4.5%). The request indicates that certain materials/components are subject to duties under section 1702(a)(1)(B) of the International Emergency Economic Powers Act (section 1702), section 232 of the Trade Expansion Act of 1962 (section 232), or section 301 of the Trade Act of 1974 (section 301), depending on the country of origin. The applicable section 1702, section 232, and section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is January 5, 2026.

A copy of the notification will be available for public inspection in the ''Online FTZ Information System'' section of the Board's website.

For further information, contact Juanita Chen at *juanita.chen@trade.gov.*

Dated: November 20, 2025.

Elizabeth Whiteman,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Inclusions to the Section 232 National Security Adjustments to Imports

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on August 1, 2025, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: Bureau of Industry and Security, Department of Commerce.

Title: Inclusions to the Section 232 National Security Adjustments to Imports.

OMB Control Number: 0694–0146.

Form Number(s): N/A.

Type of Request: Regular submission, revision of a currently approved collection.

Number of Respondents: 3,000.

Average Hours per Response: 16 hours.

Burden Hours: 48,000 hours.

Needs and Uses: Section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862) authorizes the Secretary of Commerce (Secretary) to conduct comprehensive investigations to determine the effects of imports of an article on the national security of the United States. Such investigations can be initiated by an application by an interested party, a request from the head of any department or agency, or self-initiated by the Secretary. Once an investigation is initiated, the Secretary submits a report to the President on whether the importation of the article in question is occurring in such quantities or under such circumstances as to threaten to impair the national security of the United States. The President then determines whether it is necessary to take action to adjust the imports of an article and its derivatives under Section 232 of the Trade Expansion Act.

The President has initiated twelve investigations into the effects of imports of various article on the national security of the United States under Section 232 since March 2025. The President has also issued multiple Presidential Proclamations implementing tariffs or similar actions to adjust imports of these articles based on the findings of these investigations under Section 232, or revising tariffs or other actions previously implemented with respect to certain articles following prior investigations under Section 232.

Several Proclamations have directed the Secretary to create a process for including additional derivative articles within the scope of the new and existing ad valorem tariffs established under Section 232, including Proclamations 10895 and 10896 of February 2025 (for the Section 232 Steel and Aluminum Tariff), Proclamation 10962 of July 2025 (for the Section 232 Copper Tariff), and Proclamation 10976 of September 2025 (for the Section 232 Timber and Lumber Tariff). These Proclamations broadly authorize the Secretary to include additional derivative articles within the scope of the tariffs unilaterally, or at the request of a producer (or an industry association representing one or more such producers) of such articles or derivative articles within the United States after establishing that imports of said derivative article have increased in a manner that threatens to impair the national security of the United States or otherwise undermine the objectives set forth in the investigations under Section 232 or their associated Presidential Proclamations.

BIS established the Section 232 Inclusions Process in an Interim Final Rule entitled 'Adoption and Procedures of the Section 232 Steel and Aluminum Tariff Inclusions Process' (90 FR 18780) in May 2025. The Interim Final Rule established the guidelines and procedures for submitting additional derivative aluminum and steel articles as Section 232 Inclusion Requests. BIS will expand the scope of additional derivative articles encompassed by this Interim Final Rule as needed to incorporate future investigations under Section 232.

Affected Public: Business or other for-profit organizations.

Frequency: On Occasion.

Respondent's Obligation: Voluntary.

Legal Authority: Section 232 of the Trade Expansion Act of 1962, and implementing Presidential Proclamations including but not limited to Presidential Proclamations 10895 and 10896 of February 10, 2025, Presidential Proclamation 10962 of July 30, 2025, and Presidential Proclamation 10976 of September 29, 2025.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0694–0091.

Sheleen Dumas,

Departmental PRA Compliance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510–33–P

CONSUMER PRODUCT SAFETY COMMISSION

Performance Review Board Members

AGENCY: U.S. Consumer Product Safety Commission.

ACTION: Further revised; correction notice.

SUMMARY: The U.S. Consumer Product Safety Commission is hereby giving notice of the names of the members appointed to the Commission's Performance Review Board. The function of the Board is to make recommendations to the appropriate appointing authority relating to the performance of senior executives in the agency.

FOR FURTHER INFORMATION CONTACT: Margaret A. Evans, Chief Human Capital Officer, Office of the Executive Director, U.S. Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; Phone: (301) 504–7204.

SUPPLEMENTARY INFORMATION: Sections 4314(c)(1) through (5) of title 5, U.S.C., requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more performance review boards. The PRB shall review and evaluate the initial appraisal of a senior executive's performance by the supervisor, along with any response by the senior executive, and make recommendations to the final rating authority relative to the performance of the senior executive.

The members of the Performance Review Board are:

1. Brien A. Lorenze, Executive Director
2. Jerry D. Ray, Deputy Executive Director for Safety Operations
3. Margaret A. Evans, Deputy Executive Director for Operations Support
4. Matthew A. Campbell, General Counsel (Alternate)
5. Jennifer S. Blumenthal, Deputy Director for Office of Compliance (Alternate)
6. Bryan C. Burnett, Chief Information Officer (Alternate)

Correction

In the **Federal Register** of November 21, 2025, in FR Doc. 2025–20619, on page 52624, in the first column, correct the list for the members of the Performance Review Board to include ''Bryan C. Burnett, Chief Information Officer'', who was inadvertently excluded from the notice.

Alberta Mills,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Department of the Navy

Certificate of Alternate Compliance for the USS TED STEVENS (DDG 128)

AGENCY: Department of the Navy, Department of Defense.

ACTION: Notice of issuance of Certificate of Alternate Compliance.

SUMMARY: The U.S. Navy hereby announces that a Certificate of Alternate Compliance has been issued for USS TED STEVENS (DDG 128). Due to the special construction and purpose of this vessel, the Admiralty Counsel of the Navy has determined it is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with the navigation lights provisions of the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) without interfering with its special function as a naval ship. The intended effect of this notice is to warn mariners in waters where 72 COLREGS apply.

DATES: This Certificate of Alternate Compliance is effective November 25, 2025 and is applicable beginning June 9, 2025.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Jeffrey M. Larson, JAGC, U.S. Navy, Admiralty Attorney, Office of the Judge Advocate General, Admiralty and Claims Division (Code 15A), 1322 Patterson Ave. SE, Suite 3000, Washington Navy Yard, DC 20374–5066, 202–685–5040, or *ojagcode15admiralty@us.navy.mil.*

SUPPLEMENTARY INFORMATION:

Background and Purpose. Executive Order (E.O.) 11964 (42 FR 4327; January 19, 1977) and 33 U.S.C. 1605 provide that the requirements of the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), as to the number, position, range, or arc of visibility of lights or shapes, as well as to the disposition and characteristics of sound-signaling appliances, shall not apply to a vessel or class of vessels of the Navy where the Secretary of the Navy shall find and certify that, by reason of special construction or purpose, it is not possible for such vessel(s) to comply fully with the provisions without interfering with the special function of the vessel(s). Notice of issuance of a Certificate of Alternate Compliance must be made in the **Federal Register**.

In accordance with 33 U.S.C. 1605, the Admiralty Counsel of the Navy, under authority delegated by the Secretary of the Navy, hereby finds and certifies that USS Ted Stevens (DDG 128) is a vessel of special construction or purpose, and that, with respect to the position of the following navigational lights, it is not possible to comply fully with the requirements of the provisions enumerated in the 72 COLREGS without interfering with the special function of the vessel:

Annex I, paragraph 3(a), pertaining to the position of the forward masthead light; Annex I, paragraph 2(f)(i) pertaining to the vertical position of the aft masthead light; Annex I, paragraph 3(a), pertaining to the horizontal distance between the masthead lights; Annex I, paragraph 3(c), pertaining to the horizontal distance of the ''task lights'' below the masthead lights; Annex I, paragraph 2(f)(ii), pertaining to the horizontal position of the task lights above the aft masthead light(s) and vertical position of the task lights between the forward masthead light(s) and aft masthead light(s).

The Admiralty Counsel of the Navy further finds and certifies that these navigational lights are in closest possible compliance with the applicable provision of the 72 COLREGS.

Authority: 33 U.S.C. 1605(c), E.O. 11964.

Approved: November 21, 2025.

A.R. DeMaio,

Lieutenant Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

[FR Doc. 2025–20968 Filed 11–24–25; 8:45 am]

BILLING CODE 3810–FF–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2025–SCC–0086]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; National Public Education Financial Survey (NPEFS) 2025–2027

AGENCY: Institute of Education Sciences (IES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing an extension without change of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before December 26, 2025.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Chris Greene, Senior Advisor, Institute of Education Sciences, 202–453–5926 or *chris.greene@ed.gov.*

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: National Public Education Financial Survey (NPEFS) 2025–2027.

OMB Control Number: 1850–0067.

Type of Review: Extension without change of a currently approved ICR.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 56.

Total Estimated Number of Annual Burden Hours: 7,327.

Abstract: The National Public Education Financial Survey (NPEFS) is an annual collection of state-level finance data that has been included in the National Center for Education Statistics (NCES) Common Core of Data (CCD) since FY 1982 (school year 1981–82). The U.S. Census Bureau (Census), Economic Reimbursable Surveys Division, administers the NPEFS data collection for NCES under interagency agreement in conjunction with the Local Education Agency (School District) Finance Survey (F–33) (OMB #0607–0700) and the School-Level Finance Survey (SLFS) (OMB #1850–0930). NPEFS is a comprehensive source of state-level finance data for public education collected on a nationwide scale using uniform definitions, concepts, and procedures. The collection includes the revenues,

expenditures, and average daily attendance of all publicly funded schools and elementary-secondary local education agencies (LEAs), state payments on behalf of LEAs, and state support for a free public education for students in prekindergarten through 12th grade. In this notice, NCES is announcing its intention to extend the date of clearance for NPEFS, without change, to the currently approved collection.

Detailed information about the collection, including the currently approved collection, can be found at *https://www.reginfo.gov/public/do/PRAOMBHistory?omb ControlNumber=1850-0067.*

NPEFS data are used to calculate a state's ''average per-pupil expenditure'' (SPPE) for elementary and secondary education, as defined by Title 20 U.S.C., Section 7801, paragraphs 1, 2, 3, 12, 26, and 48. SPPE data are used in calculating allocations for certain formula grant programs, including, but not limited to, Title I, Part A, of the Elementary and Secondary Education Act of 1965 (ESEA), Impact Aid, and Indian Education programs. Other programs, such as the Education for Homeless Children and Youth program under title VII of the McKinney-Vento Homeless Assistance Act, and the Student Support and Academic Enrichment Grants under title IV, part A of the ESEA make use of SPPE data indirectly because their formulas are based, in whole or in part, on State title I, part A, allocations.

Data will be collected from State Education Agencies (SEAs) for all 50 states, the District of Columbia, American Samoa, the Northern Mariana Islands, Guam, Puerto Rico, and the Virgin Islands. SEAs appoint state fiscal coordinators to work with NCES and the U.S. Census Bureau to provide accurate and comparable data across states and jurisdictions. SEAs typically collect finance data from school districts for their own uses. Many states produce a state-specific chart of accounts or accounting manual to assist school districts in classifying and reporting finance data and producing government-wide financial statements. Uniform definitions and concepts of revenues and expenditures are defined by the NCES handbook Financial Accounting for Local and State School Systems.

Comparative data on resources and spending patterns is helpful for states to evaluate the effectiveness of their programs and services. The products of this data collection make it possible for data users to search within a single database to obtain information on such things as instruction and student support services expenditures per pupil; expenditures on salaries and benefits, supplies, and purchased services; and the percent of school system funding from state, local, and federal sources. Education finance statistics provided by this collection allow for state-level comparisons of how public elementary-secondary education systems receive their funding and how they are spending their funds.

Ross Santy,

Chief Data Officer Office of Planning, Evaluation and Policy Development

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number. Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding. eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: November 3, 2025.

Carlos D. Clay,

Deputy Secretary.

Springdale Energy, LLC	EL26–19–000
Troy Energy, LLC	EL26–20–000
University Park Energy, LLC	EL26–21–000

On November 6, 2025, the Commission issued an order in Docket Nos. EL26–8–000, EL26–9–000, EL26–10–000, EL26–11–000, EL26–12–000, EL26–13–000, EL26–14–000, EL26–15–000, EL26–16–000, EL26–17–000, EL26–18–000, EL26–19–000, EL26–20–000 and EL26–21–000 pursuant to section 206 of the Federal Power Act (FPA), 16 U.S.C. 824e, instituting an investigation to determine whether the above-captioned entities' respective Rate Schedules are unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. *Armstrong Power, LLC,* 193 FERC ¶ 61,108 (2025).

As established in *Armstrong Power LLC,* the refund effective date in date in Docket Nos. EL26–8–000, EL26–9–000, EL26–10–000, EL26–11–000, EL26–12–000, EL26–13–000, EL26–14–000, EL26–15–000, EL26–16–000, EL26–17–000, EL26–18–000, EL26–19–000, EL26–20–000 and EL26–21–000, pursuant to section 206(b) of the FPA, is November 6, 2025.

Any interested person desiring to be heard in Docket Nos. EL26–8–000, EL26–9–000, EL26–10–000, EL26–11–000, EL26–12–000, EL26–13–000, EL26–14–000, EL26–15–000, EL26–16–000, EL26–17–000, EL26–18–000, EL26–19–000, EL26–20–000 and EL26–21–000 must file a notice of intervention or motion to intervene, as appropriate, with the Federal Energy Regulatory Commission, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214 (2025), within 21 days of the date of issuance of the order.

The Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link.

Enter the docket number excluding the last three digits in the docket number field to access the document. From FERC's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field. User assistance is available for eLibrary and the FERC's website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202)502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFile'' link at *http://www.ferc.gov.* In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: November 6, 2025.

Debbie-Anne A. Reese,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2210–272]

Appalachian Power Company; Notice of Application for Recreation Management Plan Amendment Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Recreation Management Plan Amendment.

b. *Project No:* 2210–272.

c. *Date Filed:* May 16, 2025, and supplemented August 7, 2025.

d. *Applicant:* Appalachian Power Company.

e. *Name of Project:* Smith Mountain Hydroelectric Project.

f. *Location:* The project is located on the Roanoke River in Bedford, Campbell, Franklin, Pittsylvania, and Roanoke counties, Virginia. The project does not occupy federal lands. The location of the Leesville Tailrace Fishing Platform is in Campbell County, Virginia.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Nicholas C. Sink, Appalachian Power Company, P.O. Box 2021, Roanoke, VA 24022–2121, (540) 985–2506, *ncsink@aep.com.*

i. *FERC Contact:* Mary Karwoski, (678) 245–3027, *mary.karwoski@ferc.gov.*

j. *Cooperating agencies:* With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item l below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. *Deadline for filing comments, motions to intervene, and protests:* December 5, 2025, 5:00 p.m. Eastern Time.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. The first page of any filing should include the docket number P–2210–272. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request:* Appalachian Power Company (licensee) requests Commission approval to remove the requirement for the Leesville Tailrace Fishing Platform from the Commission approved Recreation Management Plan and Article 410 of the license, until such time that the Virginia Department of Wildlife Resources obtains appropriate funding and provides engineering plans for consideration by Appalachian Power Company. The Leesville Fishing Platform is a license required-recreation area which was closed in 2019 due to structural safety issues and portion of the platform was removed due to structural and public safety concerns.

m. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or

email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

o. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

q. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: November 5, 2025.

Debbie-Anne A. Reese,

Secretary.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: November 7, 2025.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM98–1–000]

Records Governing Off-the-Record Communications Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the

decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e) (1) (v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. Each filing may be viewed on the Commission's website at *http://www.ferc.gov* using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 15380–000]

Robertson Power Company, LLC; Notice Extending Comment Period

On October 31, 2024, Robertson Power Company, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Somersworth Mill Hydroelectric Project No. 15380–000 (project), to be located at the Somersworth Mill dam on the Salmon Falls River near the Town of Somersworth in Strafford County, New Hampshire, and Berwick, York County, Maine.

On October 15, 2025, the Commission issued public notice of the application and established December 15, 2025, as the deadline for filing comments, interventions, and competing applications. However, the Commission's October 15, 2025 notice was inadvertently not distributed to all parties required to be notified pursuant to the Commission's regulations [18 CFR 4.32(a)(2)]. Therefore, we are extending the deadline for filing comments, interventions, and competing applications until on or before 5:00 p.m. Eastern Time on January 5, 2026.

More information about this project, including a copy of the application and a copy of the Commission's October 25, 2025 notice, can be viewed on the Commission's website (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits (P–15380) in the docket number field to access the document. For assistance, contact FERC Online Support.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation (OPP) at (202) 502–6595 or *OPP@ferc.gov.*

Dated: November 7, 2025.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL26–3–000]

Moxie Freedom LLC; Notice of Institution of Section 206 Proceeding and Refund Effective Date

On November 7, 2025, the Commission issued an order in Docket No. EL26–3–000 pursuant to section 206 of the Federal Power Act (FPA), 16 U.S.C. 824e, instituting an investigation to determine whether Moxie Freedom LLC's Rate Schedule is unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. *Moxie Freedom LLC,* 193 FERC ¶ 61,101 (2025).

As established in *Moxie Freedom LLC,* the refund effective date in date in Docket No. EL26–3–000, pursuant to section 206(b) of the FPA, is November 7, 2025.

Any interested person desiring to be heard in Docket No. EL26–3–000 must file a notice of intervention or motion to intervene, as appropriate, with the Federal Energy Regulatory Commission, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214 (2025), within 21 days of the date of issuance of the order.

The Commission provides all interested persons an opportunity to view and/or print the contents of this

document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. From FERC's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field. User assistance is available for eLibrary and the FERC's website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFile'' link at *http://www.ferc.gov.* In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: November 10, 2025.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 4900–090]

Forestport Hydro, LLC; Notice of Application Ready for Environmental Analysis and Soliciting Comments, Recommendations, Terms and Conditions, and Prescriptions

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New License.

b. *Project No.:* 4900–090.

c. *Date Filed:* February 27, 2025.

d. *Applicant:* Forestport Hydro, LLC.

e. *Name of Project:* Forestport Hydroelectric Project.

f. *Location:* On the Black River in Oneida County, New York.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. *Applicant Contact:* Antonio Zarella, Chief Operating Officer, Forestport Hydro, LLC, 230 Park Avenue, Suite 447, New York, NY 10169; telephone at (315) 247–0253; email at *TZ@relevatepower.com.*

i. *FERC Contact:* Erin Mocko, Project Coordinator, Great Lakes Branch, Division of Hydropower Licensing; telephone at (202) 502–8107; email at *Erin.Mocko@ferc.gov.*

j. *Deadline for filing comments, recommendations, terms and conditions, and prescriptions:* on or before 5:00 p.m. Eastern Time on January 20, 2026; reply comments are due on or before 5:00 p.m. Eastern Time on March 5, 2026.

The Commission strongly encourages electronic filing. Please file comments, recommendations, terms and conditions, and prescriptions using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 10,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. All filings must clearly identify the project name and docket number on the first page: Forestport Hydroelectric Project (P–4900–090).

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application has been accepted for filing, and is ready for environmental analysis at this time.

l. *Project Description:* The existing project consists of a 27-foot-high dam known as the Forestport Dam, that includes a 315-foot-long ogee spillway. The Forestport Dam creates an impoundment that has a surface area of 118 acres at a normal surface elevation of 1,126.55 feet National Geodetic Vertical Datum 1929 (NGVD29).

From the impoundment, water flows through gates and a canal to a forebay known as Alder Pond. Alder Pond has a surface area of 24 acres at a normal surface elevation of 1,124.6 feet NGVD29 and is formed by a 550-foot-long, 15-foot-high earth embankment known as Alder Pond Dam.

From Alder Pond, water flows through a power canal to an intake structure with trashracks with 1.75-inch clear bar spacing. From the intake structure, water flows through a penstock to a powerhouse that includes a 3.3-megawatt (MW) S-type Kaplan turbine-generator. From the powerhouse, water is released into a tailrace that discharges into the Black River.

The project generators are connected to the regional electric grid by generator lead lines and a 4.16/46-kV transformer.

Project recreation facilities include: (1) Alder Pond parking and access area, adjacent to the east side of the Alder Pond Dam; (2) Forestport impoundment parking and access area, adjacent to the Forestport Dam on the northwest shore of the Forestport impoundment; (3) an approximately 1,200 foot-long portage route from the Forestport access area to the Alder Pond access area; (4) an approximately 150-foot-long power canal portage route; and (5) a powerhouse parking and access area.

Forestport Hydro proposes to: (1) continue operating the project in a run-of-river mode and maintaining the surface elevation of the Forestport impoundment at 1,126.55 feet NGVD29;

(2) continue to maintain the surface elevation of Alder Pond between 1,123.6 and 1,124.6 feet NGVD29; (3) continue to release a minimum flow of 140 cfs or inflow, whichever is less, over the Forestport Dam; (4) implement a Bat and Bald Eagle Management Plan and an Invasive Species Management Plan; (5) develop an operation compliance monitoring plan; (6) continue to maintain existing project recreation facilities and update directional and safety signage; (7) move the power canal portage take-out site upstream of the boat barrier; and (8) to protect cultural resources, consult with the New York State Historic Preservation Officer before beginning any land-clearing or land-disturbing activities.

m. A copy of the application can be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document (P–4900). For assistance, contact FERC Online Support.

All filings must (1) bear in all capital letters the title ''COMMENTS,'' ''REPLY COMMENTS,'' ''RECOMMENDATIONS,'' ''TERMS AND CONDITIONS,'' or ''PRESCRIPTIONS;'' (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

You may also register online at *https://ferconline.ferc.gov/FERCOnline.aspx* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

n. The license applicant must file on or before 5:00 p.m. Eastern Time on January 20, 2026: (1) a copy of the water quality certification; (2) a copy of the request for certification, including proof of the date on which the certifying agency received the request; or (3) evidence of waiver of water quality certification.

o. *Procedural schedule:* The application will be processed according to the following schedule. Revisions to the schedule will be made as appropriate.

Milestone	Target date
Filing of Comments, Recommendations, Terms, Conditions, and Prescriptions.	January 2026.
Filing of Reply Comments	March 2026.

p. Final amendments to the application must be filed with the Commission on or before 5:00 p.m. Eastern Time on December 22, 2025.

Dated: November 20, 2025.

Debbie-Anne A. Reese,

Secretary.

[Docket No. IN17–4–000]

Rover Pipeline, LLC; Energy Transfer Partners, L.P.; Updated Notice of Designation of Commission Staff as Non-Decisional

With respect to an order issued by the Commission on December 16, 2021, in the above-captioned docket, with the exceptions noted below, the staff of the Office of Enforcement and Regulatory Accounting are designated as non-decisional in deliberations by the Commission in this docket.[1] Accordingly, pursuant to 18 CFR 385.2202 (2025), they will not serve as advisors to the Commission or take part in the Commission's review of any offer of settlement. Likewise, as non-decisional staff, pursuant to 18 CFR 385.2201 (2025), they are prohibited from communicating with advisory staff concerning any deliberations in this docket.

Exceptions to this designation as non-decisional are:

Jennifer Gordon
Serrita Hill
Seema K. Jain
Grace Kwon
Gabriel Sterling

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP25–10–000[

Transcontinental Gas Pipe Line Company, LLC; Notice of Availability of the Environmental Assessment for the Proposed Southeast Supply Enhancement Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Southeast Supply Enhancement Project (Project), proposed by Transcontinental Gas Pipe Line Company, LLC (Transco) in the above-referenced docket.[1] Transco requests authorization to construct, modify, and operate facilities along its existing pipeline system in Virginia, North Carolina, South Carolina, Georgia, and Alabama, to provide 1,596,900 dekatherms per day of year-round firm transportation service to the southeastern United States.

FERC is the lead federal agency for authorizing interstate natural gas transmission facilities under the Natural Gas Act of 1938 (NGA) and the lead federal agency for preparation of the EA. The EA assesses the potential environmental effects of the Project in accordance with the requirements of the National Environmental Policy Act (NEPA)[2] and the Commission's implementing regulations.[3] The principal purposes of the EA are to: identify and assess the potential effects on the natural and human environment; describe and evaluate reasonable alternatives; identify and recommend mitigation measures; and facilitate public involvement in the environmental review process. The EA concludes that approval of the Project would not constitute a major federal

[1] For tracking purposes under the National Environmental Policy Act, the unique identification number for documents relating to this environmental review is EAXX–019–20–000–1732530814.

[2] National Environmental Policy Act of 1969, as amended (Public Law [Pub. L.] 91–190. 42 United States Code [U.S.C.] 4321–4347, as amended by Pub. L. 94–52, July 3, 1975; Pub. L. 94–83, August 9, 1975; Pub. L. 97–258, 4(b), September 13, 1982; Pub. L. 118–5, June 3, 2023; Pub. L. 119–21, July 4, 2025).

[3] 18 Code of Federal Regulations (CFR) 380.

action significantly affecting the quality of the human environment.

The U.S. Army Corps of Engineers (USACE) Norfolk District and the U.S. Fish and Wildlife Service (FWS) Virginia Ecological Services Field Office participated as cooperating agencies in the preparation of the EA. Cooperating agencies have jurisdiction by law or special expertise with respect to resources potentially affected by the proposal and participate in the NEPA analysis. The USACE has authority under section 404 of the Clean Water Act (CWA) to regulate the discharge of dredged or fill materials into Waters of the United States, as well as sections 10 and 14 of the Rivers and Harbors Act.[4] The EA addresses environmental effects associated with the subject Project as it relates to these statutes, but it does not serve as a public notice for any USACE permit.

The mission of the FWS is to conserve, protect, and enhance fish, wildlife, and plants and their habitats. Toward that goal, the FWS works to enforce federal wildlife laws, protect endangered species, manage migratory birds, conserve habitats including wetlands, and restore fisheries. FERC is required to consult with the FWS under section 7 of the Endangered Species Act to determine whether any federally listed or proposed endangered or threatened species or their designated critical habitats would be affected by the Project. The EA addresses this required consultation.

The Southeast Supply Enhancement Project would consist of:

- Construction of about 31.2 miles of 42-inch-diameter pipeline loop with four mainline valves in Pittsylvania County, Virginia, and Rockingham County, North Carolina, designated as the Eden Loop.
- Construction of about 24.2 miles of 42-inch-diameter pipeline loop with six mainline valves in Guilford, Forsyth, and Davidson Counties, North Carolina, designated as the Salem Loop.
- Regulator installation in Rockingham County, North Carolina, designated as the Eden Regulator Station.
- Construction of about 294 feet of 30-inch-diameter pipeline and ancillary valves in Rockingham County, North Carolina, designated as the Dan River Inlet Piping.
- Addition of compressor units at Transco's existing Compressor Stations 165 in Pittsylvania County, Virginia; 155 in Davidson County, North Carolina; and 150 in Iredell County, North Carolina.
- Replacement of three existing compressor units with larger compressor units at Transco's existing Compressor Station 145 in Cleveland County, North Carolina.
- Modifications to valve controls at existing mainline valves in Lincoln and Gaston Counties, North Carolina.
- Piping modifications at Transco's existing Compressor Stations 135 in Anderson County, South Carolina; 125 in Walton County, Georgia; and 105 in Coosa County, Alabama.
- Regulator installation and piping modifications at Transco's existing Compressor Station 120 in Henry County, Georgia.

The Commission mailed a copy of the *Notice of Availability of the Environmental Assessment for the Southeast Supply Enhancement Project* to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the Project area. The EA is available only in electronic format. It may be viewed and downloaded from the FERC's website (*www.ferc.gov*) on the natural gas environmental documents page (*https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents*). In addition, the EA may be accessed by using the eLibrary link on FERC's website. Click on the eLibrary link (*https://elibrary.ferc.gov/eLibrary/search*), select ''General Search'' and enter the docket number in the ''Docket Number'' field, excluding the last three digits (*i.e.,* CP25–10). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

The EA is not a decision document. It presents Commission staff's independent analysis of the environmental issues for the Commission to consider when addressing the merits of all issues in this proceeding. Under section 7(c) of the NGA, the Commission determines whether interstate natural gas transportation facilities are in the public convenience and necessity and, if so, grants a Certificate of Public Convenience and Necessity to construct and operate them. Section 7(b) of the NGA specifies that no natural gas company shall abandon any portion of its facilities subject to the Commission's jurisdiction without the Commission first finding that the abandonment will not negatively affect the present or future public convenience and necessity. The Commission bases its decisions on both economic issues, including need, and environmental effects.

Any person wishing to comment on the EA may do so. Your comments should focus on the EA's disclosure and discussion of potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental effects. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to making its decision on this project, it is important that the Commission receives your comments in Washington, DC on or before 5:00 p.m. Eastern Time on December 1, 2025.

The EA also includes site-specific construction plans for residences within 50 feet of Project workspaces (see appendix D); affected landowners are encouraged to review these plans and provide comments within the comment period described above.

For your convenience, there are three methods you can use to file your comments to the Commission. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208–3676 or *FercOnlineSupport@ferc.gov.* Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the eComment feature on the Commission's website (*www.ferc.gov*) under the link to FERC Online. This is an easy method for submitting brief, text-only comments on a project;

(2) You can also file your comments electronically using the eFiling feature on the Commission's website (*www.ferc.gov*) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You must select the type of filing you are making. If you are filing a comment on a particular project, please select ''Comment on a Filing''; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP25–10–000) in your letter. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A,

[4] The USACE's regulations for permits under section 10 of the Rivers and Harbors Act (33 U.S.C. 403) can be found at 33 CFR 322, while regulations for permits under section 404 of the CWA are at 33 CFR 323 and processing of permits is at 33 CFR 325.

Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

Filing environmental comments will not give you intervenor status, but you do not need intervenor status to have your comments considered. Only intervenors have the right to seek rehearing or judicial review of the Commission's decision. At this point in this proceeding, the timeframe for filing timely intervention requests has expired. Any person seeking to become a party to the proceeding must file a motion to intervene out-of-time pursuant to Rule 214(b)(3) and (d) of the Commission's Rules of Practice and Procedures (18 Code of Federal Regulations 385.214(b)(3) and (d)) and show good cause why the time limitation should be waived. Motions to intervene are more fully described at *https://www.ferc.gov/how-intervene.*

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website (*www.ferc.gov*) using the eLibrary link. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

Dated: October 31, 2025.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM01–5–000]

Electronic Tariff Filings; Corrections to Etariff Tables

Take notice that the .CSV files for the eTariff Validation Error Codes, Attachment Reference Code, and Attachment Content Type Code have been reposted on ferc.gov (*https://www.ferc.gov/ferc-online/etariff*) to correct posting errors.

- The eTariff Validation Error Codes table is revised to include error code 190 that had been inadvertently omitted. On March 27, 2025, a notice was posted advising filing parties that Validation Error code 190 was being deployed on April 28, 2025, notifying filers that their filing has been rejected because tariff records contain track change markings in documents submitted as Microsoft Word files.[1] That revision inadvertently was not incorporated into the Validation Error Codes table. The table has now been updated to include code 190. To avoid triggering a rejection for including track changes, make sure to click on the ''Accept All Changes and Stop Tracking'' option to ensure track changes have been removed before submission.
- The Attachment Content Type Code is revised to include two missing file types: GAMS result file, GDX, and Gesture and Motion Signal File, GMS.
- The Attachment Reference Code removes duplicate entries for codes 395 and 405.

For more information, contact *Michael.Goldenberg@ferc.gov, James.Sarikas@ferc.gov,* or the eTariff Advisory Staff at 202–502–6501 or at *etariffresponse@ferc.gov.*

Dated: November 3, 2025.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 9028–012]

Banister Hydro, Inc.; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Halifax Hydroelectric Project

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* 9028–012.

c. *Date filed:* July 26, 2024.

d. *Applicant:* Banister Hydro, Inc. (Banister Hydro).

e. *Name of Project:* Halifax Hydroelectric Project (Halifax Project or project).

f. *Location:* On the Banister River, near the Town of Halifax in Halifax County, Virginia.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Sherri Loon, Coordinator of Operations—USA, Banister Hydro, Inc. c/o KEI (USA) Power Management Inc., 423 Brunswick Ave., Gardiner, ME 04345; (207) 203–3026; *sherri.loon@kruger.com* or Lewis Loon, General Manager, Operations and Maintenance—USA, Banister Hydro, Inc. c/o KEI (USA) Power Management Inc., 423 Brunswick Ave., Gardiner, ME 04345; (207) 203–3027; *lewis.loon@kruger.com.*

i. *FERC Contact:* Chris Millard, Project Coordinator, Mid-Atlantic Branch, Division of Hydropower Licensing; telephone at (202) 502–8256, email at *christopher.millard@ferc.gov.*

j. The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document that will discuss the environmental effects of relicensing the Halifax Project. The Commission will use this environmental document in its decision-making process to determine whether to issue a new license for the project.

k. This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. This notice is intended to advise all participants as to the potential scope of the National Environmental Policy Act (NEPA) document and to seek additional information pertinent to this analysis. Commission staff does not intend to issue a separate scoping document.

As part of the NEPA review process, the Commission takes into account

concerns the public may have about proposals and the environmental effects that could result from its action whenever it considers the issuance of a hydropower license. This gathering of public input is referred to as ''scoping.'' The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues.

l. *Scoping Comments:* By this notice, the Commission requests written public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on December 1, 2025.

Comments should focus on the potential environmental effects and reasonable alternatives. Your input will help Commission staff determine what issues to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 10,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* You must include your name at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All filings must clearly identify the project name and docket number on the first page: Halifax Hydroelectric Project (P–9028–012).

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

m. The application is not ready for environmental analysis at this time.

n. *Project Description:* The Halifax Project consists of a 682-foot-long, 36-foot-high dam, with a 301-foot-long concrete spillway. The dam creates an impoundment (Banister Lake) that has a surface area of 374-acres at a normal surface elevation of 351.3 feet National Geodetic Vertical Datum of 1929 (NGVD29). Water flows from Banister Lake to the project powerhouse, integral with the project dam, through trash racks with 2.0-inch clear bar spacing leading to three intake gates. From the intake gates, water flows through three vertical Francis-type turbines with two 455-kilowatt (kW) generating units and one 875-kW generating unit. Water is released from the powerhouse through draft tubes into the Banister River. Interconnection to the regional electric grid is accomplished through a 4.16/13.2-kilovolt transformer connected to a 512-foot-long transmission line.

Banister Hydro proposes to: (1) continue operating the project in a run-of-river mode and maintaining the surface elevation of the Banister Lake at 351.3 feet NGVD29; (2) continue to provide a year-round continuous minimum flow of 5 cubic feet per second for the protection of downstream fish and wildlife resources.[1]

A copy of the application, with details of the proposed project, can be viewed on the Commission's website at *http://www.ferc.gov,* using the ''eLibrary'' link. Enter the project's docket number, excluding the last three digits in the docket number field, to access the document (P–9028). For assistance, contact FERC at *FERCOnlineSupport@ferc.gov,* or call toll-free, (866) 208–3676 or (202) 502–8659 (TTY).

o. *NEPA Process and the Environmental Document:* Any environmental document issued by the Commission will discuss effects that could occur as a result of the project's relicensing under the relevant general resource areas, such as:

- geology and soils;
- aquatic resources;
- terrestrial resources;
- threatened and endangered species;
- recreation, land use, and aesthetic resources;
- cultural resources; and
- developmental resources.

Commission staff will also evaluate reasonable alternatives to the proposed project or portions of the project and make recommendations on how to lessen or avoid effects on the various resource areas. Your comments will help Commission staff identify and focus on the issues that might have an effect on the human environment and potentially eliminate others from further discussion in the environmental document.

Following this scoping period, Commission staff will determine whether to prepare an Environmental Assessment (EA) or an Environmental Impact Statement (EIS). The EA or EIS will present Commission staff's independent analysis of the issues. If Commission staff prepares an EA, a *Notice of Intent to Prepare an Environmental Assessment* will be issued. The EA may be issued for an allotted public comment period. The Commission will consider timely comments on the EA before making its decision regarding the proposed project. If Commission staff prepares an EIS, a *Notice of Intent to Prepare an Environmental Impact Statement* will be issued. Staff will then prepare a draft EIS which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any EA or draft and final EIS will be available in electronic format in the public record through eLibrary. If eSubscribed, you will receive instant email notification when the environmental document is issued (see paragraph (q) of this notice for instructions on using eSubscription).

p. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

q. This notice is being distributed to the Commission's official mailing list for the project and any additional entities on the applicant's distribution list. You can access the Commission's official mailing list for this project at *https://ferconline.ferc.gov/MailListLOR.aspx?Type=MailList&ListVar=P-9028.* If you want to receive future

[1] When inflow to the project is less than 135 cfs, all flows are released over the project spillway except during short-term operational emergencies or for short periods upon mutual agreement between Banister Hydro and the Virginia Department of Wildlife Resources and the State Water Control Board.

mailings for the project and are not included on the Commission's official mailing list, or if you wish to be removed from the Commission's official mailing list, please send your request by email to *FERCOnlineSupport@ferc.gov.* In lieu of an email request, you may submit a paper request. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All written or emailed requests must specify your wish to be added to or removed from the mailing list, and must clearly identify the following on the first page: Halifax Hydroelectric Project No. 9028–012.

Additionally, the Commission offers a free service called eSubscription, which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest way to receive notification and provide a link to the document files, which can reduce the amount of time you spend researching proceedings. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

In addition to publishing the full text of this notice in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this notice, as well as other documents in the proceeding (*e.g.,* license application) via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document (P–9028). For assistance, contact FERC at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

Dated: October 31, 2025.

Debbie-Anne A. Reese,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP26–13–000]

Florida Gas Transmission Company, LLC; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on October 22, 2025, Florida Gas Transmission Company, LLC (FGT), 1300 Main Street, Houston, Texas 77002, filed in the above referenced docket, a prior notice request pursuant to section 157.208 of the Commission's regulations under the Natural Gas Act (NGA), and FGT's blanket certificate issued in Docket No. CP82–553–000, for authorization to reduce the Maximum Allowable Operating Pressure (MAOP) of its 4-inch-diameter Gainesville West Lateral (FLBLM) delivery facilities. All of the above facilities are located in Alachua County, Florida (Gainesville West MAOP Reduction Project). The project will allow FGT to maintain safe operation of its pipeline system and remain in compliance with Pipeline and Hazardous Materials Safety Administration (PHMSA) regulations, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

Any questions concerning this request should be directed to Iain Russell, Senior Manager of Certificates, 1300 Main Street, Houston, Texas 77002, (713) 989–2615 or by email at *iain.russell@energytransfer.com.*

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5:00 p.m. Eastern Time on January 2, 2026. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,[1] any person [2] or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

Protests must comply with the requirements specified in section 157.205(e) of the Commission's regulations,[3] and must be submitted by the protest deadline, which is 5:00 p.m. Eastern Time on January 2, 2026. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders

[1] 18 CFR 157.205.

[2] Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

[3] 18 CFR 157.205(e).

issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure [4] and the regulations under the NGA [5] by the intervention deadline for the project, which is 5:00 p.m. Eastern Time on January 2, 2026. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at *https://www.ferc.gov/resources/guides/how-to/intervene.asp.*

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the appropriate action to be taken. To ensure that your comments are timely and properly recorded, please submit your comments on or before 5:00 p.m. Eastern Time on January 2, 2026. The filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP26–13–000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the Commission's eFiling feature, which is located on the Commission's website (*www.ferc.gov)* under the link to Documents and Filings. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Protest'', ''Intervention'', or ''Comment on a Filing''; or [6]

(2) You can file a paper copy of your submission by mailing it to the address below. Your submission must reference the Project docket number CP26–13–000.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426

To file via any other method: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of submissions (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Protests and motions to intervene must be served on the applicant either by mail at: Iain Russell, Senior Manager of Certificates, 1300 Main Street, Houston, Texas 77002 or by email at *iain.russell@energytransfer.com.* Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from OPP at (202) 502–6595 or on the FERC website at *www.ferc.gov* using the ''eLibrary'' link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to *www.ferc.gov/docs-filing/esubscription.asp.*

Dated: November 3, 2025.

Debbie-Anne A. Reese,

Secretary.

[6] Additionally, you may file your comments electronically by using the eComment feature, which is located on the Commission's website at *www.ferc.gov* under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC26–26–000.

Applicants: Forgeview Solar, LLC, Forgeview Interconnection, LLC.

Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Forgeview Solar, LLC, et al.

Filed Date: 11/5/25.

Accession Number: 20251105–5179.

Comment Date: 5 p.m. ET 11/26/25.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER10–1950–037; ER10–1970–037; ER10–1972–037; ER12–1660–036; ER13–2461–029; ER13–2458–031; ER10–2078–035; ER16–1872–027; ER16–2506–029; ER17–2270–028; ER18–1771–027; ER18–2224–027; ER18–2246–026; ER19–2382–020; ER19–2398–022; ER20–1220–018; ER20–1879–019; ER20–2690–018; ER21–1953–016; ER21–2048–016; ER21–2100–015; ER22–2536–011; ER22–2601–011; ER25–705–003; ER25–1317–004; ER25–1340–003; ER25–1348–005; ER25–1349–005; ER25–1527–003; ER25–2252–002; ER25–2254–002; ER25–2293–002; ER25–2505–002; ER25–2506–002; ER25–3110–001; ER25–3113–001; ER25–3114–001; ER25–3115–001; ER25–3116–001; ER25–3117–001; ER25–3118–001; ER25–3120–001; ER26–48–001.

Applicants: Wildwood Energy Storage, LLC, Three Waters Wind Farm, LLC, Garden Wind Energy, LLC, Red Butte Wind, LLC, Tupelo Brake Solar, LLC, Manila Solar, LLC, Greenlee Solar, LLC, Green Mallard Solar, LLC, Rock Creek Solar, LLC, Weirs Creek Solar, LLC, St. Landry Solar, LLC, Sebree Solar

II, LLC, Singer Solar, LLC, Greer Solar, LLC, Knox County Wind Farm LLC, Sebree Solar, LLC, New Madrid Solar, LLC, Wildwood Solar, LLC, Salt Creek Wind LLC, Green River Solar, LLC, Walleye Wind, LLC, Kossuth County Wind, LLC, Point Beach Solar, LLC, Sac County Wind, LLC, Heartland Divide Wind II, LLC, Jordan Creek Wind Farm LLC, Oliver Wind I, LLC, Oliver Wind II, LLC, Hancock County Wind, LLC, Story County Wind, LLC, Heartland Divide Wind Project, LLC, Pegasus Wind, LLC, Langdon Renewables, LLC, Stuttgart Solar, LLC, Oliver Wind III, LLC, Marshall Solar, LLC, White Oak Energy LLC, Tuscola Wind II, LLC, Pheasant Run Wind, LLC, Tuscola Bay Wind, LLC, NextEra Energy Point Beach, LLC, NextEra Energy Duane Arnold, LLC, Garden Wind, LLC.

Description: Notice of Change in Status of Amite Energy Storage, LLC, et al. under ER25–3111, et al. Part 2 of 2.

Filed Date: 11/4/25.

Accession Number: 20251104–5169.

Comment Date: 5 p.m. ET 11/25/25.

Docket Numbers: ER12–2498–025; ER11–3987–020; ER11–4055–015; ER12–1566–019; ER14–2691–001; ER14–2687–001; ER14–1775–013; ER14–1927–013; ER16–1325–008; ER16–1326–008; ER16–1327–008; ER17–382–010; ER17–383–010; ER17–384–010; ER17–2141–008; ER17–2142–008; ER17–2385–005; ER18–855–009; ER18–1416–009; ER22–2914–002; ER22–2916–002; ER23–1410–001; ER24–706–003; ER25–85–001; ER25–2767–001.

Applicants: Emily Solar, LLC, Westside Canal 2A, LLC, Northern Orchard Solar PV, LLC, Fifth Standard Solar PV, LLC, Mesquite Solar 5, LLC, Mesquite Solar 4, LLC, CED Wistaria Solar, LLC, Panoche Valley Solar, LLC, Great Valley Solar 3, LLC, Great Valley Solar 2, LLC, Great Valley Solar 1, LLC, CED Ducor Solar 3, LLC, CED Ducor Solar 2, LLC, CED Ducor Solar 1, LLC, Copper Mountain Solar 4, LLC, Mesquite Solar 3, LLC, Mesquite Solar 2, LLC,CED White River Solar 2, LLC, SEP II, LLC, CED White River Solar, LLC, Alpaugh North, LLC, Copper Mountain Solar 2, LLC, Copper Mountain Solar 1, LLC, Mesquite Solar 1, LLC, Alpaugh 50, LLC.

Description: Notice of Non-Material Change in Status of Alpaugh 50, LLC, et al.

Filed Date: 10/30/25.

Accession Number: 20251030–5345.

Comment Date: 5 p.m. ET 11/20/25.

Docket Numbers: ER13–738–014; ER11–3097–018; ER10–1186–017; ER12–421–008; ER11–2731–008; ER23–1279–003; ER10–3169–016.

Applicants: Michigan Power Limited Partnership, DTE Energy Services, Inc., Heritage Stoney Corners Wind Farm I, LLC, Heritage Garden Wind Farm I, LLC, DTE Energy Supply, LLC, DTE Energy Trading, Inc., DTE Electric Company.

Description: Notice of Change in Status of DTE Electric Company, et al.

Filed Date: 10/30/25.

Accession Number: 20251030–5346.

Comment Date: 5 p.m. ET 11/20/25.

Docket Numbers: ER20–1996–009; ER16–1990–009; ER21–1187–008; ER21–1188–008; ER21–1217–008; ER21–1218–008; ER21–1370–009; ER21–1916–007; ER21–1961–007; ER24–482–005; ER24–847–005; ER24–2657–004; ER24–2986–005; ER24–3150–003; ER24–3151–003; ER25–1910–002.

Applicants: White Tail Solar, LLC, Speedway Solar, LLC, Rocking R Solar, LLC, Long Lake Solar, LLC, Blue Bird Solar, LLC, Sunlight Road Solar, L.L.C., River Fork Solar, LLC, Big River Solar, LLC, Assembly Solar III, LLC, Assembly Solar II, LLC, St. James Solar, LLC, Iris Solar, LLC, Prairie State Solar, LLC, Dressor Plains Solar, LLC, North Star Solar PV LLC, Assembly Solar I, LLC.

Description: Notice of Change in Status of Assembly Solar I, LLC, et al.

Filed Date: 10/30/25.

Accession Number: 20251030–5344.

Comment Date: 5 p.m. ET 11/20/25.

Applicants: Clearlight Energy US Funding, LLC.

Description: Initial Rate Filing: Application for Market-Based Rate Authorization, Request for Related Waivers to be effective 1/6/2026.

Filed Date: 11/6/25.

Accession Number: 20251106–5125.

Comment Date: 5 p.m. ET 11/28/25.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf*. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov*.

Dated: November 6, 2025.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 3562–026]

KEI (Maine) Power Management (III) LLC; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Barker Mill Upper Hydroelectric Project

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Subsequent Minor License.

b. *Project No.:* 3562–026.

c. *Date filed:* July 29, 2021.

d. *Applicant:* KEI (Maine) Power Management (III) LLC (KEI Power).

e. *Name of Project:* Barker Mill Upper Hydroelectric Project (Upper Barker Project).

f. *Location:* On the Little Androscoggin River, in the City of Auburn, Androscoggin County, Maine.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Lewis C. Loon, General Manager, KEI (USA) Power Management Inc., 423 Brunswick Avenue, Gardiner, ME 04345; phone at (207) 203–3025; email at *LewisC.Loon@krueger.com*.

i. *FERC Contact:* Jody Callihan at (202) 502–8278, or *jody.callihan@ferc.gov*.

j. The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document that will discuss the environmental effects of relicensing the Upper Barker Project. The Commission will use this environmental document in its decision-making process to determine whether to issue a subsequent license for the project.

k. This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. This notice is intended to advise all participants as to the potential scope of the National Environmental Policy Act (NEPA) document and to seek additional information pertinent to this analysis. Commission staff does not intend to issue a separate scoping document.

As part of the NEPA review process, the Commission takes into account concerns the public may have about proposals and the environmental effects that could result from its action whenever it considers the issuance of a hydropower license. This gathering of public input is referred to as ''scoping.'' The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues.

l. *Scoping Comments:* By this notice, the Commission requests written public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on December 1, 2025.

Comments should focus on the potential environmental effects and reasonable alternatives. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 10,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. All filings must clearly identify the project name and docket number on the first page: Barker Mill Upper Hydroelectric Project (P–3562–026).

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

m. The application has been accepted for filing but is not ready for environmental analysis at this time.

n. The existing Upper Barker Project consists of: (1) a 41-acre impoundment with a maximum storage capacity of 255 acre-feet at a normal maximum water surface elevation of 192 feet; [1] (2) a dam consisting of (starting from the west bank): (a) a 43-foot-long concrete abutment; (b) a 40-foot-long gated spillway structure consisting of two, 18-foot-high, 15-foot-wide steel Tainter gates; (c) an 86-foot-long, 24-foot-high stone masonry with concrete overlay overflow spillway with 3-foot-high wooden flashboards and a crest elevation of 192 feet at the top of the flashboards (189 feet when the flashboards are lowered); (d) a 31-foot-long concrete intake structure; and, (e) a 27-foot-long underground abutment; (3) a powerhouse containing a single 950-kilowatt turbine-generator unit; (4) a tailrace; (5) a 50-foot-long, 12.47-kilovolt transmission line; and (6) appurtenant facilities.

KEI Power filed a Settlement Agreement for the Barker's Mill Project (FERC No. 2808),[2] Upper Barker Project (FERC No. 3562), and Marcal Project (FERC No. 11482) (Settlement) executed by and between the licensee and the U.S. Department of Justice, the U.S. Fish and Wildlife Service, the National Marine Fisheries Service, the Maine Department of Marine Resources (Maine DMR), and the Maine Department of Inland Fisheries and Wildlife (Settlement Parties). The purpose of the Settlement is to resolve the parties' disagreements over the issues related to fish and aquatic resource management, including upstream and downstream passage measures for American eel, river herring, American shad, sea lamprey, and Atlantic salmon; minimum flow releases; and aquatic invasive species. Specifically, for the relicensing of the Upper Barker Project, the Settlement provides for: (1) coordinating the time frame for providing upstream and downstream fish passage at the Upper Barker Project; (2) aligning the minimum and seasonal flows at the Upper Barker and the Lower Barker Projects; (3) aligning the Upper Barker and Lower Barker Projects' license terms by extending the 40-year license term of the Lower Barker Project to 50 years and requesting a license term of 47 years for the Upper Barker Project; (4) establishing an off-license agreement to fund an Androscoggin Basin Stewardship Fund administered by Maine DMR to benefit spawning and rearing habitat in the basin; and (5) assuring, through an off-license agreement, the resources agencies' support for KEI Power's request for Low Impact Hydropower Institute certification for the Upper Barker Project.

The Upper Barker Project is currently operated in run-of-river mode and generates 4,681 megawatt-hours annually.

A copy of the application is available for review on the Commission's website at *http://www.ferc.gov,* using the ''eLibrary'' link. Enter the project's docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll free, (886) 208–3676 or TTY (202) 502–8659.

o. NEPA Process and the Environmental Document: Any environmental document issued by the Commission will discuss effects that could occur as a result of the project's relicensing under the relevant general resource areas, such as:

- geology and soils;
- aquatic resources;
- terrestrial resources;
- threatened and endangered species;
- recreation, land use, and aesthetic resources;
- cultural resources; and
- developmental resources.

Commission staff will also evaluate reasonable alternatives to the proposed project or portions of the project and make recommendations on how to lessen or avoid effects on the various resource areas. Your comments will help Commission staff identify and focus on the issues that might have an effect on the human environment and potentially eliminate others from further discussion in the environmental document.

Following this scoping period, Commission staff will determine whether to prepare an Environmental Assessment (EA) or an Environmental

[1] All elevations are referenced to the North American Vertical Datum of 1988.

[2] The Barker's Mill Project is also known as and referred to herein as the Lower Barker Project.

Impact Statement (EIS). The EA or EIS will present Commission staff's independent analysis of the issues. If Commission staff prepares an EA, a *Notice of Intent to Prepare an Environmental Assessment* will be issued. The EA may be issued for an allotted public comment period. The Commission would consider timely comments on the EA before making its decision regarding the proposed project. If Commission staff prepares an EIS, a *Notice of Intent to Prepare an Environmental Impact Statement* will be issued. Staff will then prepare a draft EIS, which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any EA or draft and final EIS will be available in electronic format in the public record through eLibrary. If eSubscribed, you will receive instant email notification when the environmental document is issued (see paragraph (q) of this notice for instructions on using eSubscription).

p. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

q. This notice is being distributed to the Commission's official mailing list for the project and any additional entities on the applicant's distribution list. You can access the Commission's official mailing list for this project at *https://ferconline.ferc.gov/ServiceListResults.aspx.* If you want to receive future mailings for the project and are not included on the Commission's official mailing list, or if you wish to be removed from the Commission's official mailing list, please send your request by email to *FERCOnlineSupport@ferc.gov.* In lieu of an email request, you may submit a paper request. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All written or emailed requests must specify your wish to be added to or removed from the mailing list and must clearly identify the following on the first page: Barker Mill Upper Hydroelectric Project No. 3562–026.

Additionally, the Commission offers a free service called eSubscription, which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest way to receive notification and provide a link to the document files, which can reduce the amount of time you spend researching proceedings. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

In addition to publishing the full text of this notice in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this notice, as well as other documents in the proceeding (*e.g.,* license application) via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document (P–3562). For assistance, contact FERC at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

Dated: October 30, 2025.

[Project No. 2997–031]

South Sutter Water District; Notice of Revised Procedural Schedule for Environmental Assessment for the Proposed Project Relicense

On December 28, 2023, the South Sutter Water District (SSWD) filed an application for a new license to continue to operate and maintain the 6.8-megawatt Camp Far West Hydroelectric Project No. 2997 (Camp Far West Project). On November 25, 2024, Commission staff issued a notice of intent to prepare an environmental assessment (EA) to evaluate the effects of relicensing the Camp Far West Project. The notice included an anticipated schedule for issuing the EA in November 2025.

Staff are still evaluating the effects of relicensing the Camp Far West Project. In order for staff to fully consider all the information filed by SSWD, the procedural schedule for completing the EA is being revised as follows. Further revisions to the schedule may be made as appropriate.

Milestone	Target date
Commission issues EA	February 27, 2026.
Commission on the EA	March 29, 2026.[1]

[1] The Commission's Rules of Practice and Procedure provide that if a filing deadline falls on a Saturday, Sunday, holiday, or other day when the Commission is closed for business, the filing deadline does not end until the close of business on the next business day [18 CFR 385.2007(a)(2)(2025)]. Because the deadline for the 30-day comment period falls on a Sunday, the filing deadline will be extended until the close of business on Monday, March 30, 2026.

Questions regarding this notice may be directed to Quinn Emmering at (202) 502–6382 or *Quinn.Emmering@ferc.gov.*

Dated: November 20, 2025.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP25–530–000]

Texas Eastern Transmission, LP; Notice of Schedule for the Preparation of an Environmental Assessment for the Danville Compressor Station Replacement Project

On August 1, 2025, Texas Eastern Transmission, LP (Texas Eastern) filed an application in Docket No. CP25–530–000 requesting a Certificate of Public Convenience and Necessity pursuant to Section 7(c) of the Natural Gas Act (NGA) and an Authorization pursuant to Section 7(b) of the NGA to construct, operate, and abandon certain natural gas pipeline facilities. The proposed project is known as the Danville Compressor Station Replacement Project (Project), and would replace 13 aging compressor units with three modern units in Lincoln County, Kentucky.

On August 15, 2025, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization

within 90 days of the date of issuance of the Commission staff's environmental document for the Project.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the Project and the planned schedule for the completion of the environmental review.[1]

Schedule for Environmental Review

Issuance of EA—March 20, 2026
90-day Federal Authorization Decision Deadline[2]—June 18, 2026

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

Texas Eastern proposes to abandon and remove three natural gas-fired turbine compressor units and ten reciprocating compressor units at the existing Danville Compressor Station and replace them with three new gas-fired turbine compressor units. According to Texas Eastern, the new units would replace units installed in the 1950s and 1960s, ensuring continued safe, efficient, and reliable operation of the compressor station while meeting air emissions requirements.

Background

On September 12, 2025, the Commission issued a *Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Danville Compressor Station Replacement Project* (Notice of Scoping). The Notice of Scoping was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers. In response to the Notice of Scoping, the Commission received no comments.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This service provides automatic notification of filings made to subscribed dockets, document summaries, and direct links to the documents. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Additional information about the Project is available from the Commission's Office of External Affairs at (866) 208–FERC or on the FERC website (*www.ferc.gov*). Using the ''eLibrary'' link, select ''General Search'' from the eLibrary menu, enter the selected date range and ''Docket Number'' excluding the last three digits (*i.e.,* CP25–530), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at *FERCOnlineSupport@ferc.gov.* The eLibrary link on the FERC website also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

Dated: October 16, 2025.

Federal Energy Regulatory Commission

[Project No. 5089–027]

Fall River Rural Electric Cooperative, Inc.; Notice of Application Ready for Environmental Analysis and Soliciting Comments, Recommendations, Terms and Conditions, and Prescriptions

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* 5089–027.

c. *Date filed:* August 31, 2021.

d. *Applicant:* Fall River Rural Electric Cooperative, Inc. (Fall River).

e. *Name of Project:* Felt Hydroelectric Project (project).

f. *Location:* The project is located on the Teton River, near the town of Tetonia, in Teton County, Idaho. The project occupies federal land administered by the Bureau of Land Management.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Nicholas Josten, 2742 Saint Charles Ave, Idaho Falls, Idaho 83404; (208) 528–6152.

i. *FERC Contact:* Ingrid Brofman, (202) 502–8347 or *ingrid.brofman@ferc.gov.*

j. Deadline for filing comments, recommendations, terms and conditions, and prescriptions: on or

before 5:00 p.m. Eastern Time on December 1, 2025; [1] reply comments are due on or before 5:00 p.m. Eastern Time on January 14, 2026.

The Commission strongly encourages electronic filing. Please file comments, recommendations, terms and conditions, and prescriptions using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 10,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. All filings must clearly identify the project name and docket number on the first page: Felt Hydroelectric Project (P–5089–027).

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application has been accepted and is ready for environmental analysis at this time.

l. The existing Felt Project consists of: (1) a 122.5-foot-long, 12-foot-high concrete dam that includes the following sections: (a) 25-foot-wide sluiceway section with a 4-foot-wide fish ladder and a 14-foot-wide corrugated steel radial gate and (b) a 96-foot-wide uncontrolled overflow spillway with a crest elevation of 5,530-feet mean sea level (msl); (2) a 7-acre impoundment with a storage capacity of 28 acre-feet at a normal water surface elevation of 5,530-feet msl; (3) a 178-foot-long, 8.5-foot-deep fish screen with 3/8-inch clear bar spacing; (4) three intake openings located behind the fish screen each equipped with 10-foot-wide intake gates and 10-foot-wide trash racks with 3-inch clear bar spacing; (5) three, 8-foot-square unlined rock tunnels connecting the intakes to penstocks and consisting of: (a) a 179-foot-long Tunnel No. 1 connecting to a 280-foot- long, 78-inch-diameter steel penstock that bifurcates into two, 180-foot-long, 60-inch-diameter steel penstocks that connect to Powerhouse No. 1; and (b) a 177-foot-long Tunnel No. 2 and a 196-foot-long Tunnel No. 3 each connecting to a 1,750-foot-long, 96-inch-diameter steel penstock that connects to Powerhouse No. 2; (6) an 83-foot-long, 26- foot-wide, 13-foot-high reinforced concrete Powerhouse No. 1 containing two horizontal Francis turbine-generator units with a combined generating capacity of 1,950 kilowatts (kW); (7) a 36-foot-long, 36-foot-wide, 25-foot-high reinforced concrete Powerhouse No. 2 containing two vertical Francis turbine-generator units with a combined generating capacity of 5,500 kW; (8) two tailrace channels discharging to the Teton River from Powerhouses No. 1 and No. 2; (9) a 1,500-foot-long, 4.16 kilovolt (kV) overhead transmission line connecting Powerhouse No. 1 to a transformer located next to Powerhouse No. 2; (10) a 2,000-foot-long, 24.9 kV overhead transmission line leading from the transformer to the grid interconnection point; and (11) appurtenant facilities. Fall River also maintains a portage trail, parking area, restroom, signage, and boating take-out.

The project has a total authorized capacity of 7,450 kilowatts (kW) and an average annual generation of 33,100 megawatt-hours (MWh). Fall River currently operates the project in a run-of-river mode such that outflow from the project approximates inflow. The project has a maximum hydraulic capacity of 900 cubic feet per second (cfs) when all four turbine generator units in Powerhouse No. 1 (upper powerhouse) and Powerhouse No. 2 (lower powerhouse) are operating. The minimum and maximum hydraulic capacities of Powerhouse No. 1 are 50 and 500 cfs, respectively. The minimum and maximum hydraulic capacities of Powerhouse No. 2 are 62.5 and 500 cfs, respectively. However, Powerhouse No. 1 has been inoperable since 2006 and has recently been repaired.

During normal operation, water discharged from Powerhouse No. 2 bypasses a 1,950-foot reach of the Teton River between the dam and the tailrace of the powerhouse. Water discharged from Powerhouse No. 1, which is located just upstream of Powerhouse No. 2, bypasses a 1,400- foot reach of the Teton River. The project is required to discharge a minimum flow from the dam into the bypassed reach of 20 cfs from July 1 to March 14 and 50 cfs from March 15 to June 30. The minimum bypass flow is manually set by adjusting the radial gate opening until the correct minimum flow is indicated by a staff gauge below the dam. During periods of high flows, the project operates at maximum capacity. Excess flows beyond the required minimum flow into the bypassed reach and the maximum hydraulic capacity of the turbines are passed through the project's radial gate and discharged over the spillway.

Fall River proposes to continue to operate the Felt Project in a run-of-river mode and maintain existing project facilities. Fall River proposes to remove 30.14 acres of land from the current project boundary. Fall River also proposes to implement a Yellowstone cutthroat trout conservation plan, continue to implement weed control measures, improve the portage trail and recreation access trail, and install a warning siren at both powerhouses to warn visitors of sudden flow changes in the event of sudden tripping of the project that causes sudden flow changes from either powerhouse.

m. A copy of the application is available for review via the internet through the Commission's Home Page (*http://www.ferc.gov*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll free, (886) 208–3676 or TTY (202) 502–8659.

All filings must (1) bear in all capital letters the title ''COMMENTS,'' ''REPLY COMMENTS,'' ''RECOMMENDATIONS,'' ''TERMS AND CONDITIONS,'' or ''PRESCRIPTIONS;'' (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Each filing must be accompanied by

[1] The Commission's Rules of Practice and Procedure provide that if a filing deadline falls on a Saturday, Sunday, holiday, or other day when the Commission is closed for business, the filing deadline does not end until the close of business on the next business day. 18 CFR 385.2007(a)(2) (2025). Because the filing deadline falls on a Sunday (*i.e.,* November 30, 2025), the filing deadline is extended until the close of business on Monday, December 1, 2025.

proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members, and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

You may also register online at *https://ferconline.ferc.gov/FERCOnline.aspx* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

n. The applicant must file the following on or before 5:00 p.m. Eastern Time November 30, 2025: (1) copy of the water quality certification; (2) a copy of the request for certification, including proof of the date on which the certifying agency received the request; or (3) evidence of a waiver of water quality certification.

o. Final amendments to the application must be filed with the Commission on or before 5:00 p.m. Eastern Time on October 31, 2025.

Dated: October 1, 2025.

Debbie-Anne A. Reese,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2232–929]

Duke Energy Carolinas, LLC; Notice of Application for Recreation Management Plan Amendment Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Recreation Management Plan Amendment.

b. *Project No:* 2232–929.

c. *Date Filed:* August 4, 2025.

d. *Applicant:* Duke Energy Carolinas, LLC.

e. *Name of Project:* Catawba-Wateree Hydroelectric Project.

f. *Location:* The project is located on the Catawba and Wateree Rivers in Burke, McDowell, Caldwell, Catawba, Alexander, Iredell, Mecklenburg, Lincoln, and Gaston counties, North Carolina, and York, Lancaster, Chester, Fairfield, and Kershaw counties, South Carolina. The project does not occupy federal land. The proposed modifications are in Catawba County (Upper Lookout Shoals Access Area) and Gaston County (Mountain Island Tailrace Fishing).

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Ethan Pardue, Duke Energy Carolinas, LLC, 525 S Tryon Street/DEP 5B, Charlotte, NC 28202, (704) 382–8308, *Ethan.Pardue@duke-energy.com.*

i. *FERC Contact:* Mary Karwoski, (678) 245–3027, *mary.karwoski@ferc.gov.*

j. *Cooperating agencies:* With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item l below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. *Deadline for filing comments, motions to intervene, and protests:* December 22, 2025, 5:00 p.m. Eastern Time.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. The first page of any filing should include the docket number P–2232–929. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request:* The licensee proposes to amend the requirement to provide primitive camping at the Upper Lookout Shoals Access Area and instead provide a walking and picnic trail. The licensee would continue to provide a 1-lane boat ramp with a courtesy dock, parking, and a vault toilet. The licensee also proposes to extend the completion date for the Mountain Island Dam Canoe Portage enhancements from within 10 years of approval of the Recreation Management Plan to within 15 years, and to modify the requirement for two fishing platforms at Mountain Island Tailrace Fishing and Mountain Island River Park to remove one fishing platform and extend the second fishing platform to accommodate necessary seismic stability improvements at the Mountain Island Development.

m. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

o. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the

appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

q. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

Dated: November 20, 2025.

Pacific Gas & Electric Company; Notice of Application for Surrender of License and Non-Project Use of Project Lands, Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Application for surrender of license and non-project use of project lands.

b. *Project No:* 77–332.

c. *Date Filed:* July 25, 2025.

d. *Applicant:* Pacific Gas & Electric Company.

e. *Name of Project:* Potter Valley Hydroelectric Project.

f. *Location:* The project is located on the Eel River and East Fork of the Russian River in Lake and Mendocino counties, California. The project occupies federal lands managed by the U.S. Forest Service.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Janet Walther, Director of Licensing and Compliance, Pacific Gas and Electric Company, 300 Lakeside Drive, Oakland, CA 94612, 530–966–4615, or *janet.walther@pge.com.* Kimberly Ognisty, Attorney, Pacific Gas and Electric Company, 300 Lakeside Drive, Oakland, CA 94612, 540–227–7060, or *kimberly.ognisty@pge.com.*

i. *FERC Contact:* Diana Shannon, 202–502–6136, or *diana.shannon@ferc.gov.*

j. *Cooperating agencies:* With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item k below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. *Water Quality Certification:* The applicant must file no later than 60 days following the date of issuance of this notice: (1) a copy of the water quality certification; (2) a copy of the request for certification, including proof of the date on which the certifying agency received the request; or (3) evidence of waiver of water quality certification.

l. *Deadline for filing comments, motions to intervene, and protests:* December 1, 2025, 5:00 p.m. Eastern Time.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. The first page of any filing should include the docket number P–77–332. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

m. *Description of Request:* On July 25, 2025, Pacific Gas and Electric Company (PG&E) filed a surrender application, in which it proposes to surrender and decommission the Potter Valley Project. As a condition of surrender, PG&E also requests the Commission approve its application for non-project use of project lands, which would allow the Eel-Russian Project Authority (ERPA) to construct a New Eel-Russian Facility (NERF) on project lands. This NERF would allow for the continued diversion of flows from the Eel River watershed to the Russian River watershed via certain project works post-surrender.

Specifically, PG&E proposes to: (1) decommission and remove Scott Dam and its associated facilities; (2) remove licensed recreational facilities (*e.g.,* campgrounds, day-use facilities, kiosk, and boat ramps) and restore associated U.S. Forest Service (Forest Service) and PG&E lands; (3) decommission and remove Cape Horn Dam and its associated facilities and features, except for those necessary for the NERF; (4) remove NERF facilities and lands from the existing license; and (5) restore the remnant inundation zone of Lake Pillsbury reservoir and Van Arsdale Reservoir, including adjacent riparian, wetlands, and upland areas affected by decommissioning the project as proposed.

n. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://*

[Project No. 77–318]

Pacific Gas & Electric Company; Notice of Application for Non-Capacity Amendment of License Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Non-Capacity License Amendment to Article 52.

b. *Project No:* 77–318.

c. *Date Filed:* July 23, 2023; supplemented January 30, 2025, and September 26, 2025.

d. *Applicant:* Pacific Gas & Electric Company.

e. *Name of Project:* Potter Valley Hydroelectric Project.

f. *Location:* The project is located on the Eel River and East Fork of the Russian River in Lake and Mendocino counties, California. The project occupies federal lands managed by the U.S. Forest Service.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Chadwick McCready, Pacific Gas and Electric Company, 300 Lakeside Drive, Oakland, CA 94612, (530) 685–5710.

i. *FERC Contact:* Katherine Schmidt, *katherine.schmidt@ferc.gov,* (415) 369–3348.

j. *Cooperating agencies:* With this notice, the Commission is inviting federal, state, local, and Tribal agencies with jurisdiction and/or special expertise with respect to environmental issues affected by the proposal, that wish to cooperate in the preparation of any environmental document, if applicable, to follow the instructions for filing such requests described in item k below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of any environmental document cannot also intervene. *See* 94 FERC ¶ 61,076 (2001).

k. *Deadline for filing comments, motions to intervene, and protests:* December 1, 2025, 5:00 p.m. Eastern Time.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. The first page of any filing should include the docket number P–77–318. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. *Description of Request:* The licensee requests a non-capacity license amendment regarding its minimum flow requirements under Article 52. The licensee states that this amendment is necessary to appropriately manage the water storage of Lake Pillsbury and remain in compliance with the requirements of Article 52, given current interim risk reduction measures due to seismic concerns, storage limitations, and the various water demands on the system.

First, the proposed changes to East Branch Russian River minimum flows, as measured by compliance gage E–16 in cubic feet per second (cfs), are as follows:

Period		Water year classification		
From	Through	Normal	Dry	Critical
October 1	April 14	35 cfs	35 cfs	5 cfs.
Scott Dam in Spill Condition				
April 15	May 14	35 cfs	25 cfs	5 cfs.
-or- Scott Dam **not** in Spill Condition				
April 15	May 14	5 cfs	5 cfs	5 cfs.
Scott Dam in Spill Condition				
May 15	June 30	75 cfs	25 cfs	5 cfs.
-or- Scott Dam **not** in Spill Condition				
May 15	June 30	5 cfs	5 cfs	5 cfs.
July 1	September 30	5 cfs	5 cfs	5 cfs.

Second, the minimum flow requirement below Scott Dam, as measured by compliance gage E–2, would be modified to 20 cfs at all times, regardless of calendar date or water year classification. In addition, the definition of compliance with minimum flows would be established as the mean daily flow, defined as the 'calculated 24-hour average of the flow'. Further, the block water allocation of 2,500 acre-feet reserved for the release at the discretion of resource agencies would be changed from each 'water' year to each 'calendar' year. The licensee is proposing this modified mode of operation until the Commission acts on the pending surrender application, filed with the Commission on July 25, 2025, or other Commission proceeding.

m. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

n. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

o. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

p. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

q. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members, and others access publicly available information and navigate Commission processes. BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP25–233–000]

Magnum Gas Storage, LLC; Notice of Revised Schedule for Environmental Review of the 2025 Amendment Project

This notice identifies the Federal Energy Regulatory Commission staff's revised schedule for the completion of the environmental assessment (EA) for Magnum Gas Storage, LLC's (Magnum) 2025 Amendment Project.[1] The first notice of schedule, issued on June 26, 2025, identified November 13, 2025, as the EA issuance date. However, following a series of staff data requests, Magnum indicated that it will not file a response regarding the project's construction emissions until November 25, 2025. As this information is needed to determine the level of construction-related air quality effects and for the Commission to understand whether a General Conformity Determination is required for the project, staff has revised the schedule for issuance of the EA. The issuance date is also contingent on the quality of information provided by

[1] For tracking purposes under the National Environmental Policy Act, the unique identification number for documents relating to this environmental review is EAXX–019–20–000–1750685312.

Magnum. The EA will be issued for a 30-day comment period.

Schedule for Environmental Review

Issuance of the EA—December 19, 2025

90-day Federal Authorization Decision Deadline [2]—March 18, 2026

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the project's progress.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of all formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

Additional information about the Project is available from the FERC website (*www.ferc.gov*). Using the ''eLibrary'' link, select ''General Search'' from the eLibrary menu, enter the selected date range and ''Docket Number'' excluding the last three digits (*i.e.,* CP25–233), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at *FERCOnlineSupport@ferc.gov.* The eLibrary link on the FERC website also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

[Docket No. IN24–2–000]

American Efficient, LLC; Modern Energy Group LLC; MIH LLC; Midcontinent Energy LLC; Wylan Energy, L.L.C.; Affirmed Energy LLC; Updated Notice of Designation of Commission Staff as Non-Decisional

With respect to an order issued by the Commission on December 16, 2024, in the above-captioned docket, with the exceptions noted below, the staff of the Office of Enforcement are designated as non-decisional in deliberations by the Commission in this docket.[1] Accordingly, pursuant to 18 CFR 385.2202 (2025), they will not serve as advisors to the Commission or take part in the Commission's review of any offer of settlement. Likewise, as non-decisional staff, pursuant to 18 CFR 385.2201 (2025), they are prohibited from communicating with advisory staff concerning any deliberations in this docket.

Exceptions to this designation as non-decisional are:

Nicholas Stavlas
Michael Raibman
Thomas Olson
Mark Maneche
Yvonne Yegge
Kevin Dinan
Charles Kitcher
Jennifer Gordon
Gareth Jones
Ian McDonald
Erin Miller
Daniel Birkam
Michael P. Lee
Taylor Webster
Serrita Hill
Steven Bundick

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC26–31–000.

Applicants: Landrace Holdings, LLC, PGR 2021 Lessee 18, LLC, PGR 2021 Lessee 13, LLC, PGR 2021 Lessee 9, LLC, PGR 2022 Lessee 1, LLC, PGR 2022 Lessee 4, LLC, PGR 2022 Lessee 5, LLC, PGR 2022 Lessee 9, LLC, PGR 2022 Lessee 2, LLC, PGR 2023 Lessee 1, LLC, Virginia Line Solar, LLC, Sonny Solar, LLC, Bulldog Solar, LLC, Cane Creek Solar, LLC, Moonshot Solar, LLC, Glover Creek Solar, LLC, Catalina Solar, LLC, Old Hayneville Solar, LLC, Fresh Air Energy XXIII, LLC, BII BID Solar II Aggregator LP.

Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Landrace Holdings, LLC, et al.

Filed Date: 11/19/25.

Accession Number: 20251119–5198.

Comment Date: 5 p.m. ET 12/10/25.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG26–62–000.

Applicants: Big Cypress Energy Storage, LLC.

Description: Big Cypress Energy Storage, LLC submits Notice of Self–Certification of Exempt Wholesale Generator Status.

Filed Date: 11/20/25.

Accession Number: 20251120–5039.

Comment Date: 5 p.m. ET 12/11/25.

Docket Numbers: EG26–63–000.

Applicants: Butler Ridge Wind, LLC.

Description: Butler Ridge Wind, LLC submits Notice of Self–Certification of Exempt Wholesale Generator Status.

Filed Date: 11/20/25.

Accession Number: 20251120–5040.

Comment Date: 5 p.m. ET 12/11/25.

Docket Numbers: EG26–64–000.

Applicants: Delta Bobcat Energy Storage, LLC.

Description: Delta Bobcat Energy Storage, LLC submits Notice of Self-Certification of Exempt Wholesale Generator Status.

Filed Date: 11/20/25.

Accession Number: 20251120–5041.

Comment Date: 5 p.m. ET 12/11/25.

Docket Numbers: EG26–65–000.

Applicants: Flat Fork Energy Storage, LLC.

Description: Flat Fork Energy Storage, LLC submits Notice of Self–Certification of Exempt Wholesale Generator Status.

Filed Date: 11/20/25.

Accession Number: 20251120–5042.

Comment Date: 5 p.m. ET 12/11/25.

Docket Numbers: EG26–66–000.

Applicants: Greer Energy Storage, LLC.

Docket Numbers: ER26–558–000.
Applicants: Cordova Energy Company LLC.
Description: Compliance filing: Compliance Filing to be effective 11/3/2025.
Filed Date: 11/20/25.
Accession Number: 20251120–5104.
Comment Date: 5 p.m. ET 12/11/25.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing

requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: November 20, 2025.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP26–15–000]

Columbia Gas Transmission, LLC; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on October 27, 2025, Columbia Gas Transmission, LLC (Columbia), 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700, filed in the above referenced docket, a prior notice request pursuant to sections 157.205, 157.208, and 157.216 of the Commission's regulations under the Natural Gas Act (NGA), and Columbia's blanket certificate issued in Docket No. CP83–76–000, for authorization to abandon and replace portions of its existing Line KA West and Line SM–123. All of the above facilities are located in Mingo County, West Virginia (Line KA West and Line SM–123 Relocation Project).

Specifically, Columbia proposes to: (i) install approximately 4,300 feet of new 20-inch-diameter pipeline to replace a segment of Line KA West; (ii) abandon approximately 1,326 feet of existing 20-inch-diameter Line KA West; (iii) install approximately 4,300 feet of new 24-inch-diameter pipeline to replace a segment of Line SM–123; and (iv) abandon approximately 1,286 feet of existing 24-inch-diameter Line SM–123.

Columbia states that both pipelines share a corridor that traverses a hilltop in a region that is historically impacted by coal mining activities, and underground coal seam fires have been identified beneath the corridor. These fires have led to significant ground subsidence, posing an increasing threat to the integrity of the pipelines. The Line KA West and Line SM–123 Relocation Project will allow Columbia to proactively mitigate this risk and ensure continued safe and reliable operations. The estimated cost for the project is approximately $51 million, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

Any questions concerning this request should be directed to David A. Alonzo, Manager, Project Authorizations, Columbia Gas Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700, by phone at (832) 320–5477, or by email at *david_alonzo@tcenergy.com.*

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5:00 p.m. Eastern Time on January 5, 2026. How to file protests, motions to intervene, and comments is explained below.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,[1] any person [2] or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

Protests must comply with the requirements specified in section 157.205(e) of the Commission's regulations,[3] and must be submitted by the protest deadline, which is 5:00 p.m. Eastern Time on January 5, 2026. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure [4] and the regulations under the NGA [5] by the intervention deadline for the project, which is 5:00 p.m. Eastern Time on January 5, 2026. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual,

[1] 18 CFR 157.205.

[2] Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

[3] 18 CFR 157.205(e).

[4] 18 CFR 385.214.

[5] 18 CFR 157.10.

this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at *https://www.ferc.gov/resources/guides/how-to/intervene.asp.*

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the appropriate action to be taken. To ensure that your comments are timely and properly recorded, please submit your comments on or before 5:00 p.m. Eastern Time on January 5, 2026. The filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP26–15–000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the Commission's eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Protest'', ''Intervention'', or ''Comment on a Filing''; or [6]

(2) You can file a paper copy of your submission by mailing it to the address below. Your submission must reference the Project docket number CP26–15–000.

To file via USPS: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To file via any other method: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of submissions (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Protests and motions to intervene must be served on the applicant either by mail at: David A. Alonzo, Manager of Project Authorizations, Columbia Gas Transmission, LLC, 700 Louisiana Street, Suite 1300, Houston, Texas 77002–2700, or by email (with a link to the document) at *david_alonzo@tcenergy.com.* Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from OPP at (202) 502–6595 or on the FERC website at *www.ferc.gov* using the ''eLibrary'' link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to *www.ferc.gov/docs-filing/esubscription.asp.*

Dated: November 6, 2025.

Debbie-Anne A. Reese,

Secretary.

Description: § 4(d) Rate Filing: Negotiated Rate Agreement Filing—Kiowa Power Partners, LLC to be effective 11/1/2025.
Filed Date: 10/29/25.
Accession Number: 20251029–5000.
Comment Date: 5 p.m. ET 11/10/25.

Docket Numbers: RP26–96–000.
Applicants: Transcontinental Gas Pipe Line Company, LLC.
Description: Compliance filing: Annual Penalty Sharing Report 2025 to be effective N/A.
Filed Date: 10/29/25.

Accession Number: 20251029–5010.
Comment Date: 5 p.m. ET 11/10/25.

Docket Numbers: RP26–97–000.
Applicants: Iroquois Gas Transmission System, L.P.
Description: § 4(d) Rate Filing: 10.29.25 Negotiated Rates—Mercuria Energy America, LLC R–7540–02 to be effective 11/1/2025.
Filed Date: 10/29/25.
Accession Number: 20251029–5062.
Comment Date: 5 p.m. ET 11/10/25.

Docket Numbers: RP26–98–000.
Applicants: Southern LNG Company, L.L.C.
Description: § 4(d) Rate Filing: SLNG Electric Power Cost Adjustment—2025 to be effective 12/1/2025.
Filed Date: 10/29/25.
Accession Number: 20251029–5103.
Comment Date: 5 p.m. ET 11/10/25.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

Filings in Existing Proceedings

Docket Numbers: RP26–75–001.
Applicants: Texas Eastern Transmission, LP.
Description: Tariff Amendment: Amendment Filing—NegRate EQT 911976 to be effective 11/1/2025.
Filed Date: 10/28/25.
Accession Number: 20251028–5156.
Comment Date: 5 p.m. ET 11/10/25.

Any person desiring to protest in any the above proceedings must file in accordance with Rule 211 of the Commission's Regulations (18 CFR 385.211) on or before 5:00 p.m. Eastern time on the specified comment date.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: October 29, 2025.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 6904–043; Project No. 6903–037]

Battenkill Hydro Associates; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Upper and Middle Greenwich Hydroelectric Projects

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection.

a. *Type of Applications:* Subsequent Minor License.

b. *Project Nos.:* 6904–043, 6903–037.

c. *Date filed:* January 31, 2024.

d. *Applicant:* Battenkill Hydro Associates (Battenkill Hydro).

e. *Name of Projects:* Upper and Middle Greenwich Hydroelectric Projects (Upper Greenwich Project and Middle Greenwich Project).

f. *Location:* On the Batten Kill River in the Village of Greenwich, Washington County, New York.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Sherri Loon, Coordinator—Operations USA, Kruger Energy, LP, 423 Brunswick Ave., Gardiner, ME 04345; (207) 203–3026; *sherri.loon@kruger.com* or Lewis Loon, General Manager—Operations and Maintenance USA, Kruger Energy, LP, 423 Brunswick Ave., Gardiner, ME 04345; (207) 203–3027; *lewis.loon@kruger.com.*

i. *FERC Contact:* Chris Millard, Project Coordinator, Mid-Atlantic Branch, Division of Hydropower Licensing; telephone at (202) 502–8256, email at *christopher.millard@ferc.gov.*

j. The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document that will discuss the environmental effects of relicensing the Upper and Middle Greenwich Projects. The Commission will use this environmental document in its decision-making process to determine whether to issue subsequent licenses for the projects.

k. This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the projects. This notice is intended to advise all participants as to the potential scope of the National Environmental Policy Act (NEPA) document and to seek additional information pertinent to this analysis. Commission staff does not intend to issue a separate scoping document.

As part of the NEPA review process, the Commission takes into account concerns the public may have about proposals and the environmental effects that could result from its action whenever it considers the issuance of a hydropower license. This gathering of public input is referred to as ''scoping.'' The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues.

l. *Scoping Comments:* By this notice, the Commission requests written public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on December 1, 2025.

Comments should focus on the potential environmental effects and reasonable alternatives. Your input will help Commission staff determine what issues to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 10,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* You must include your name at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room

1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All filings must clearly identify the project name and docket number on the first page: Upper Greenwich Hydroelectric Project (P–6904–043) or Middle Greenwich Hydroelectric Project (P–6903–037).

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for each project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

m. The applications are not ready for environmental analysis at this time.

n. *Project Descriptions:*

Upper Greenwich Project

The Upper Greenwich Project consists of a 203-foot-long, 11.5-foot-high concrete gravity spillway dam topped with 2-foot-high flashboards. The dam creates an impoundment that has a surface area of 20-acres at a normal surface elevation of 334 feet National Geodetic Vertical Datum of 1929 (NGVD29). Water flows from the project impoundment through a 200-foot-long earthen power canal and trash racks with 1.0-inch clear bar spacing before entering the project powerhouse through two intake gates. Water passes through two vertical turbine-generator units with a rated capacity of 300 kilowatts (kW) and is released from the powerhouse into a tailrace channel leading to the Batten Kill River. Interconnection to the regional electric grid is accomplished through a 0.48/4.8-kilovolt (kV) transformer connected to a 150-foot-long transmission line.

Project recreation facilities include: (1) a canoe portage trail around the project dam with a landing area upstream of the dam and two river entry points, one in the bypassed reach and one just downstream of the bypassed reach; (2) a warning sign 300 feet upstream of the canoe landing area alerting canoeists of a necessary portage; and (3) an off-road parking area to accommodate 8 to 10 cars.

Battenkill Hydro proposes to: (1) continue to operate the project in a run-of-river mode, where outflow from the project approximates inflow; (2) provide a year-round, continuous minimum flow of 80 cubic feet per second (cfs) or inflow, whichever is less, to the bypassed reach; (3) provide a year-round, continuous attraction flow of 20 cfs to the project's fish bypass; (4) maintain trash racks with 1.0-inch clear bar spacing; (5) perform a downstream fishway evaluation within one year of restarting the project; [1] (6) develop a stream flow monitoring plan; (7) develop an invasive species management plan; (8) develop a bald eagle management plan; (9) update the existing recreation plan, and (10) provide recreational improvements, including (a) the installation of three picnic tables on the grassy area on river left, (b) installation of parking signage, (c) installation of canoe portage signage, (d) conduct routine vegetation maintenance of the canoe portage put-in area, (e) conduct routine mowing of grassy areas, (f) provide new decking (or similar) for the trail crossing the project's power canal intake, and (g) conduct routine maintenance of the trail crossing the project's power canal intake and the angler access trail to control vegetation and noxious plants.

Middle Greenwich Project

The Middle Greenwich Project consists of a 235-foot-long, 10-foot-high concrete gravity spillway dam. The dam creates an impoundment that has a surface area of 9 acres at a normal surface elevation of 318 feet NGVD29. Water flows from the project impoundment to the powerhouse through a 150-foot-long concrete power canal with an upstream headgate structure containing two gates and a downstream trash rack with 1.0-inch clear bar spacing. Water then enters a single vertical turbine-generator unit with a rated capacity of 300 kW and is released from the powerhouse into a tailrace channel leading to the Batten Kill River. Interconnection to the regional electric grid is accomplished through a 0.48/4.8-kV transformer connected to a 150-foot-long transmission line.

Project recreation facilities include: (1) angler access to the reservoir and tailrace; (2) a canoe portage area at the project dam; and (3) an off-road parking area to accommodate six to eight cars.

Battenkill Hydro proposes to: (1) continue to operate the project in a run-of-river mode, where outflow from the project approximates inflow; (2) provide a year-round, continuous minimum flow of 20 cfs or inflow, whichever is less, to the bypassed reach; (3) provide a year-round, continuous attraction flow of 20 cfs to the project's fish bypass; (4) maintain trash racks with 1.0-inch clear bar spacing; (5) perform a downstream fishway evaluation within one year of restarting the project; [2] (6) develop a stream flow monitoring plan; (7) develop an invasive species management plan; (8) develop a bald eagle management plan; (9) update the existing recreation plan; and (10) provide recreational improvements, including (a) the installation of two picnic tables on the grassy area on river right, (b) installation of canoe portage trail signage, (c) conduct routine vegetation maintenance of the canoe portage put-in area, and (d) conduct routine mowing of grassy areas.

A copy of the applications, with details of the proposed projects, can be viewed on the Commission's website at *http://www.ferc.gov,* using the ''eLibrary'' link. Enter the project's docket number, excluding the last three digits in the docket number field, to access the document (P–6904 or P–6903). For assistance, contact FERC at *FERCOnlineSupport@ferc.gov,* or call toll-free, (866) 208–3676 or (202) 502–8659 (TTY).

o. *NEPA Process and the Environmental Document:* Any environmental document issued by the Commission will discuss effects that could occur as a result of the projects' relicensing under the relevant general resource areas, such as:

- geology and soils;
- aquatic resources;
- terrestrial resources;
- threatened and endangered species;
- recreation, land use, and aesthetic resources;
- cultural resources; and
- developmental resources.

Commission staff will also evaluate reasonable alternatives to the proposed projects or portions of the projects and make recommendations on how to lessen or avoid effects on the various resource areas. Your comments will help Commission staff identify and focus on the issues that might have an effect on the human environment and potentially eliminate others from further discussion in the environmental document.

Following this scoping period, Commission staff will determine whether to prepare an Environmental Assessment (EA) or an Environmental Impact Statement (EIS). The EA or EIS

[1] Both projects have operated intermittently since 2009 and, more recently, have been offline due to National Grid's planned upgrades to the grid and interconnection points associated with the projects. In its December 17, 2024 response to staff's June 5, 2024 request for additional information, Battenkill Hydro stated that National Grid's upgrades were expected to be completed by June 2025 and that project operation was expected to resume by the end of July 2025.

[2] Ibid.

will present Commission staff's independent analysis of the issues. If Commission staff prepares an EA, a *Notice of Intent to Prepare an Environmental Assessment* will be issued. The EA may be issued for an allotted public comment period. The Commission will consider timely comments on the EA before making its decision regarding the proposed projects. If Commission staff prepares an EIS, a *Notice of Intent to Prepare an Environmental Impact Statement* will be issued. Staff will then prepare a draft EIS which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any EA or draft and final EIS will be available in electronic format in the public record through eLibrary. If eSubscribed, you will receive instant email notification when the environmental document is issued (see paragraph (q) of this notice for instructions on using eSubscription).

p. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

q. This notice is being distributed to the Commission's official mailing list for each project and any additional entities on the applicant's distribution lists. You can access the Commission's official mailing list for the Upper Greenwich Project at *https://ferconline.ferc.gov/MailListLOR.aspx?Type=MailList&ListVar=P-6904* or the Middle Greenwich Project at *https://ferconline.ferc.gov/MailListLOR.aspx?Type=MailList&ListVar=P-6903*. If you want to receive future mailings for either project and are not included on the Commission's official mailing list(s), or if you wish to be removed from the Commission's official mailing list(s), please send your request by email to FERCOnline *Support@ferc.gov.* In lieu of an email request, you may submit a paper request. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All written or emailed requests must specify your wish to be added to or removed from the mailing list, and must clearly identify the following on the first page: Upper Greenwich Hydroelectric Project (P–6904–043) or Middle Greenwich Hydroelectric Project (P–6903–037).

Additionally, the Commission offers a free service called eSubscription, which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest way to receive notification and provide a link to the document files, which can reduce the amount of time you spend researching proceedings. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

In addition to publishing the full text of this notice in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this notice, as well as other documents in the proceeding (*e.g.,* license application) via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document (P–6904 or P–6903). For assistance, contact FERC at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

Dated: October 31, 2025.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM26–3–000]

Authorizations for Certain Post-Licensing Activities at Hydroelectric Projects

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of inquiry.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is inviting comments on whether certain activities can be implemented without case-specific authorization from the Commission under Part I of the Federal Power Act and on what changes, if any, the Commission should make to its processes for reviewing and authorizing post-licensing activities at hydropower facilities, including maintenance, repairs, and upgrades to hydropower project infrastructure.

DATES: Comments are due January 26, 2026.

ADDRESSES: Comments, identified by docket number, may be filed in the following ways. Electronic filing through *http://www.ferc.gov,* is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery.
  - *Mail via U.S. Postal Service Only:* Addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.
  - *Hand (including courier) delivery:* Deliver to: Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

The Comment Procedures Section of this document contains more detailed filing procedures.

FOR FURTHER INFORMATION CONTACT: Rachael Warden (Legal Information), Office of the General Counsel—Energy Projects, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, 202) 502–8717.

CarLisa Linton (Technical Information), Office of Energy Projects, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, (202) 502–8416.

SUPPLEMENTARY INFORMATION:

1. In this Notice of Inquiry, the Federal Energy Regulatory Commission (Commission) is inviting comments on whether certain activities can be implemented without case-specific authorization from the Commission under Part I of the Federal Power Act (FPA) and on what changes, if any, the Commission should make to its processes for reviewing and authorizing post-licensing activities at hydropower facilities, including maintenance, repairs, and upgrades to hydropower project infrastructure.

I. Background

A. Statutory Framework

2. Section 4(e) of the FPA authorizes the Commission to issue licenses ''for the purpose of constructing, operating,

and maintaining dams, water conduits, reservoirs, power houses, transmission lines, or other project works necessary or convenient . . . for the development, transmission, and utilization of power.'' [1] In issuing these hydroelectric licenses, the Commission is required to consider power and development purposes and ''give equal consideration to the purposes of energy conservation, the protection, mitigation of damage to, and enhancement of, fish and wildlife (including related spawning grounds and habitat), the protection of recreational opportunities, and the preservation of other aspects of environmental quality.'' [2] After considering power and environmental considerations, the Commission will include in a license conditions that ensure that the project is best adapted to a comprehensive plan for improving or developing a waterway.[3]

3. After issuance of a license, projects require ongoing maintenance and often require modification during the term of the license. With respect to post-licensing activities, section 10(b) of the FPA states ''except when emergency shall require for the protection of navigation, life, health, or property, *no substantial alteration or addition not in conformity with the approved plans* shall be made to any dam or other project works . . . *without the prior approval of the Commission*'' (emphasis added).[4] Similarly, pursuant to section 23(b)(1) of the FPA, a licensee may not ''commence any *significant* modification of any [licensed] project . . . unless such modification is authorized in accordance with terms and conditions of such license . . . and the applicable requirements of [Part I of the FPA]'' (emphasis added).[5] The Commission understands these provisions to allow licensees to make alterations that are not ''substantial'' or ''significant'' without further authorization. Post-licensing activities that do not fit within these categories, including some maintenance, repairs, and upgrades, require Commission approval before implementation.

4. Applicants for post-licensing activities must also comply with federal laws for the protection of environmental resources, such as the National Environmental Policy Act (NEPA),[6] Endangered Species Act of 1973, the National Historic Preservation Act, and the Clean Water Act.[7]

B. Commission Regulations for Amendment Applications

5. Commission regulations require amendment applications when a licensee seeks to: make a change in the physical features of the project or its boundary, or make an addition, betterment, abandonment, or conversion, of such character as to constitute an alteration of the license; or make a change in the plans for the project under license.[8] Requirements regarding these applications vary depending on whether the application is for a capacity or non-capacity amendment.[9]

6. Commission regulations require specific information to be submitted as part of a capacity-related amendment application.[10] For non-capacity-related amendments, the Commission requires an applicant to submit revised versions of any exhibits (such as project maps) that require revision in light of the proposed amendment.[11] Additionally, to ensure that state and federal agencies and Indian Tribes have the opportunity to discuss the proposal with the applicant, the applicant must complete pre-filing consultation requirements for capacity-related amendments as well as specified non-capacity-related amendments.[12]

7. Ensuring the protection of human life, health, and property is a key aspect of the Commission's regulation of hydropower projects.[13] Accordingly, the Commission's dam safety regulations set forth the authority of Commission staff in inspecting, reviewing, and requiring modifications to licensed projects for the purposes of ensuring the safety, stability, security, and integrity of the project works.

C. Minor Changes Authorized by License Articles

8. The Commission includes in every license two articles, Articles 2 and 3, which give licensees the ability to make minor changes without the need to obtain approval from the Commission. Article 2 provides:

> No substantial change shall be made in the maps, plans, specifications, and statements described and designated as exhibits and approved by the Commission in its order as a part of the license until such change shall have been approved by the Commission: Provided, however, [t]hat if the Licensee or the Commission deems it necessary or desirable that said approved exhibits, or any of them, be changed, there shall be submitted to the Commission for approval a revised, or additional exhibit or exhibits covering the proposed changes which, upon approval by the Commission, shall become a part of the license and shall supersede, in whole or in part, such exhibit or exhibits theretofore made a part of the license as may be specified by the Commission.[14]

Article 3 provides:

> The project works shall be constructed in substantial conformity with the approved exhibits referred to in Article 2 herein or as changed in accordance with the provisions of said article. Except when emergency shall require for the protection of navigation, life, health, or property, there shall not be made without prior approval of the Commission any substantial alteration or addition not in conformity with the approved plans to any dam or other project works under the license or any substantial use of project lands and

[1] 16 U.S.C. 797(e).

[2] *Id.*

[3] 16 U.S.C. 803(a)(1). Section 10(a)(1) of the FPA requires that any project, for which the Commission issues a license be best adapted to a comprehensive plan for improving or developing a waterway or waterways for the use or benefit of interstate or foreign commerce; for the improvement and use of waterpower development; for the adequate protection, mitigation, and enhancement of fish and wildlife; and for other beneficial public uses, including irrigation, flood control, water supply, recreation, and other purposes.

[4] 16 U.S.C. 803(b). For conditions affecting the safety of a project or its works, should emergency modifications be necessary at the project, licensees are required to report the incident and details of the modification according to certain reporting requirements. 18 CFR 12.11 and 18 CFR 12.10(a).

[5] 16 U.S.C. 817(2). In order to ensure dam safety, the Commission's dam safety regulations also require licensees to report modifications of the project or project works to the applicable Commission Regional Engineer in writing. 18 CFR 12.11.

[6] On July 23, 2025, the Commission adopted two categorical exclusions from the United States Bureau of Reclamation, for ''[m]aintenance, rehabilitation, and replacement of existing facilities which may involve a minor change in size, location, and/or operation'' and for ''[m]inor safety of dam construction activities where the work is confined to the dam, abutment areas, or appurtenant features, and where no major change in reservoir or downstream operation is anticipated as a result of the construction activities.'' *See Adopting Categorical Exclusions under the Nat'l Env't Pol'y Act,* 192 FERC ¶ 61,019, at P 2 (2025) (first citing Fiscal Responsibility Act of 2023, Pub. L. 118–5, 137 Stat. 10 (June 3, 2023), and then citing 42 U.S.C. 4336c); *id.* PP 4–5, 10–13, ordering para. (A).

[7] Other federal statutes, such as the Marine Mammal Protection Act, may apply in particular cases.

[8] 18 CFR 4.200.

[9] A ''capacity related amendment'' is one where the applicant seeks ''to amend a license for a hydropower project that involves additional capacity not previously authorized, and that would increase the actual or proposed total installed capacity of the project, would result in an increase in the maximum hydraulic capacity of the project of 15 percent or more, and would result in an increase in the installed name-plate capacity of 2 megawatts or more.'' 18 CFR 4.201(b).

[10] *Id.* (specifying required exhibits depending on the type of project).

[11] 18 CFR 4.201(c).

[12] These include amendments that would involve the construction of a new dam or diversion in a location where there is no existing dam or diversion; any repair, modification, or reconstruction of an existing dam that would result in a significant change in the normal maximum surface area or elevation of an existing impoundment; or the addition of new water power turbines other than to replace existing turbines. 18 CFR 4.38(a)(6)(iv)–(v); *see also* 18 CFR 4.38(a)(7).

[13] *See* 16 U.S.C. 803(c).

[14] *See, e.g.,* Federal Energy Regulatory Commission, Form L–1, Article 2 (October 1975).

waters not authorized herein; and any emergency alteration, addition, or use so made shall thereafter be subject to such modification and change as the Commission may direct. Minor changes in project works, or in uses of project lands and waters, or divergence from such approved exhibits may be made if such changes will not result in a decrease in efficiency, in a material increase in cost, in an adverse environmental impact, or in impairment of the general scheme of development; but any of such minor changes made without the prior approval of the Commission, which in its judgment have produced or will produce any of such results, shall be subject to such alteration as the Commission may direct.[15]

The Commission has explained that, pursuant to Article 3, ''certain minor changes in the specifications approved in the license can be reflected in the as-built exhibit filings without prior Commission approval.'' [16] The Commission has emphasized that ''the determination of whether a particular change is substantial must be made on a case-by-case basis.'' [17]

D. Current Processes for Post-Licensing Activities

9. Some activities do not require an amendment but may require review and authorization to start construction from Commission dam safety staff.[18] Commission approval of an amendment may be needed for more complex activities. Other minor post-licensing activities may require an amendment if they are inconsistent with the project license. For example, if the proposed work would cause a temporary change to an impoundment elevation or minimum flow requirement, an amendment may be required.

10. For substantial changes to the specifications approved in the license, a licensee must file a license amendment. If a licensee is unsure whether an activity is authorized by the license or would require an amendment, the licensee may seek advice from Commission staff.[19]

E. Existing Commission Regulations Under the Natural Gas Act Authorizing Routine Activities by Interstate Natural Gas Pipeline Companies Without Case-Specific Authorization

11. Under Part 157, Subpart F of the Commission's regulations,[20] interstate pipelines that hold a certificate of public convenience and necessity under section 7 of the Natural Gas Act (NGA) may apply for a one-time blanket certificate to undertake, without a case-specific authorization, certain activities automatically, subject only to annual reporting requirements [21] and certain other activities after prior notice.[22] The blanket certificate program ''provide[s] streamlined procedures which increase flexibility and reduce regulatory burden'' for a generic class of routine activities with particular conditions and procedures for consistency with the Commission's statutory obligations under the NGA and environmental statutes.[23]

12. In 1982, in instituting the blanket certificate program, the Commission explained that:

> [T]he final regulations divide the various actions that the Commission certificates into several categories. The first category applies to certain activities performed by interstate pipelines that . . . have relatively . . . little effect on pipeline operations. This first category also includes minor investments in facilities which are so well understood as an established industry practice that little scrutiny is required to determine their compatibility with the public convenience and necessity. The second category of activities provides for a notice and protest procedure and comprises certain activities in which various interested parties might have a concern. In such cases there is a need to provide an opportunity for a greater degree of review and to provide for possible adjudication of controversial aspects. Activities not authorized under the blanket certificate are those activities which . . . propose such important considerations that close scrutiny and case-specific deliberation by the Commission is warranted prior to the issuance of a certificate.[24]

13. The notice and protest procedures for prior notice projects allow anyone, including Commission staff, to protest a prior notice project within 60 days and, if a protest is not withdrawn or dismissed, the project is reviewed as an application for case-specific authorization under NGA section 7(c).[25]

14. Blanket certificate activities are subject to the conditions in the Commission's regulations implementing NEPA,[26] as well as requirements that all blanket certificate activities be consistent with all applicable laws, including the Endangered Species Act, National Historic Preservation Act, Clean Water Act, Clean Air Act, and other applicable statutes relating to environmental concerns.[27]

II. Subject of the Notice of Inquiry

15. The Commission is inviting comments on (A) what opportunities, if any, are there to streamline or improve the process for licensees for using their authority under FPA section 10(a) and standard license Articles 2 and 3 to undertake minor modifications at a hydropower facility and whether the Commission should develop processes to address these opportunities, and (B) what changes, consistent with the requirements of the FPA and other applicable statutes, the Commission could make to its processes for reviewing and authorizing through amendment proceedings post-licensing activities, including whether certain activities can be implemented without case-specific authorization. The Commission seeks comment on the following questions:

A. Minor Post-Licensing Activities

A1. What opportunities, if any, are there to streamline or improve the process for licensees for using their authority under FPA section 10(a) and standard license Articles 2 and 3 to undertake minor modifications at a hydropower facility that do not require an amendment?

A2. Should the Commission create a process for identifying minor post-licensing activities that can be undertaken pursuant to FPA section 10 and Articles 2 and 3?

A3. Are there categories of minor post-licensing activities that should not require prior Commission approval? If so, what specific types of minor activities should qualify under each category?

---

[15] *See, e.g.,* Federal Energy Regulatory Commission, Form L–1, Article 3 (October 1975).

[16] *Int'l Falls Power Co.,* 66 FERC ¶ 61,086, at 61,116 (1994).

[17] *Id.*

[18] Examples include in-kind replacements of racks/rakes/gates, flowlines, or turbines; generator rewinds; electrical equipment upgrades within a powerhouse; substation upgrades or rewiring; transmission line pole replacements; or minor repair of walls, tailraces, or spillways.

[19] *See* 18 CFR 4.201(d)(2).

[20] 18 CFR part 157, subpart F.

[22] *Id.* 157.203(c), 157.208(b).

[23] *Interstate Pipeline Certificates for Routine Transactions,* Order No. 234, 47 FR 24254, at 24256, 24263 (June 4, 1982), FERC Stats. & Regs. ¶ 30,368, at 30,201 (1982) (cross-referenced at 19 FERC ¶ 61,216); *see also Revisions to the Blanket Certificate Reguls. & Clarification Regarding Rates,* Order No. 686, 71 FR 63680 (Oct. 31, 2006), 117 FERC ¶ 61,074, at P 7 (2006) (''The blanket certificate program was designed to provide an administratively efficient means to authorize a generic class of routine activities, without subjecting each minor project to a full, case-specific NGA section 7 certificate proceeding.'').

[24] Order No. 234, FERC Stats. & Regs. ¶ 30,368 at 30,200.

[25] 18 CFR 157.205(h).

[26] 18 CFR part 380. Certain activities undertaken pursuant to the blanket certificate are categorically excluded from NEPA review. 18 CFR 380.4(a)(21).

[27] 18 CFR 157.206.

A4. What documentation should the Commission require to verify and ensure that these activities do not result in potentially adverse environmental or safety impacts?

A5. What activities that do not require amendments should still require consultation or dam safety review? For those activities, what standard information should licensees file to expedite review of the proposed activity?

A6. What applicable federal laws, permits, and regulations could be relied upon to verify minimal or no significant environmental and safety impacts throughout construction and operation of minor post-licensing activities?

A7. Should the Commission allow stakeholder input for activities not requiring an amendment? And if so, how should the comments be addressed?

A8. Should specified maintenance activities be analyzed and approved during the licensing process as part of a life cycle approach to accepting, implementing, and maintaining a license for 30 to 50 years?

B. Post-Licensing Activities Requiring Amendments

Process-Related Questions

B1. If the Commission promulgates rules to allow for post-licensing activities at hydropower facilities, including maintenance, repairs, and upgrades to hydropower project infrastructure, without a case-specific authorization under Part I of the FPA, should the Commission require each licensee to apply for a blanket FPA authorization as it does for natural gas pipelines pursuant to Part 157, Subpart F (*see* 18 CFR 157.204(a)) or should all current and new licensees be automatically granted a blanket authorization?

B2. Under the Commission's existing Part 157, Subpart F blanket certificate regulations for activities under NGA section 7, there is a two-tiered process whereby some activities are automatically authorized while others require prior notice (*see* 18 CFR 157.203(a)–(c)). Should the Commission adopt a similar tiered approach for post-licensing activities at hydropower facilities, including maintenance, repairs, and upgrades to hydropower project infrastructure? If so, should there be additional or different tiers, and what specific types of activities should correspond to each tier?

B3. If the Commission allows for post-licensing activities at hydropower facilities, including maintenance, repairs, and upgrades to hydropower project infrastructure, automatically under a blanket FPA Part I authorization, should the Commission:

a. require licensees to notify Commission staff of certain types of such activities prior to implementing them? And, if so, what amount of time would be sufficient?; and/or

b. require a licensee to file a semi-annual or annual report documenting the post-licensing maintenance, repairs, and/or upgrades to hydropower project infrastructure undertaken during the previous calendar year pursuant to the blanket authorization program? If so, what information should be included in such reports? Should reporting of blanket authorization activities be incorporated into any reporting already required by the Commission in a licensee's license articles?

B4. If the Commission requires prior notice for some post-licensing activities at hydropower facilities, including maintenance, repairs, and upgrades to hydropower project infrastructure, under a blanket FPA Part I authorization, should the Commission adopt the same notice requirements as those detailed in the Commission's blanket certificate regulations, including a 60-day notice period (*see* 18 CFR 157.205)?

B5. Should the Commission adopt the same process concerning protests to prior notice post-licensing activities at hydropower facilities, including maintenance, repairs, and upgrades to hydropower project infrastructure, as is currently in place for prior notice blanket certificate pipeline projects (*see* 18 CFR 157.205) or should another process be required? If another process should be required, what types of protests should be dismissed?

B6. What, if any, affected landowner notification requirements should the Commission adopt for post-licensing activities at hydropower facilities, including maintenance, repairs, and upgrades to hydropower project infrastructure, undertaken pursuant to a blanket authorization program?

B7. Should the Commission require post-licensing maintenance, repairs, and/or upgrades to hydropower project infrastructure under a blanket Part I FPA authorization be constructed and placed into service within a specified timeframe? If so, what timeframe?

B8. Are there processes that other federal or state agencies use to streamline review that the Commission could adapt?

B9. What are the historic and estimated range of costs for preparation of an application for post-licensing amendments for maintenance, repairs, and upgrades at existing hydropower facilities?

Post-Licensing Activities That Could Fit a Blanket Program

B10. If the Commission adopts a tiered approach similar to that in the natural gas blanket certificate regulations (18 CFR 157.203(b)–(c)), what categories of post-licensing activities should be eligible for automatic authorization? What categories of post-licensing activities should be eligible for prior notice authorization? How should the Commission divide these categories, *e.g.,* based on anticipated environmental effects or based on safety or security concerns?

B11. What categories of post-licensing activities would result in no adverse impacts to the environment or safety at authorized and existing licensed hydropower facilities? Specifically, what types of facility modifications, systems, or components would have no adverse environmental or safety impacts, or would provide beneficial impacts, to the following resources:

- Water Quality;
- Water Resources;
- Wetlands;
- Fisheries and Wildlife, including Endangered Species;
- Vegetation;
- Cultural Resources;
- Socioeconomics;
- Geology and Soils;
- Land Use;
- Recreation;
- Visual Resources; and
- Safety.

B12. What categories of post-licensing activities would provide equivalent or greater level of environmental protection and safety compared to the status quo? Specifically, what types of hydropower infrastructure modifications, systems, or components would result in different impacts but nevertheless provide an equivalent or greater level of protection to the resources listed in question B11?

B13. What categories of post-licensing activities would result in less than significant impacts to the environment and safety at licensed hydropower facilities such that the Commission could categorically determine that such activities are in the public interest under the section 10(a)(1) comprehensive development standard of the FPA? Specifically, what types of facility modifications, systems, or components would result in less than significant impacts to the resources listed in question B11?

16. While the Commission will consider all comments filed, the

Commission may not, and is not required to, take further action.

III. Comment Procedures

17. The Commission invites interested persons to submit comments on the matters and issues identified in this notice. Comments are due January 26, 2026. Comments must refer to Docket No. RM26–3–000, and must include the commenter's name, the organization they represent, if applicable, and their address in their comments. All comments will be placed in the Commission's public files and may be viewed, printed, or downloaded remotely as described in the Document Availability section below. Commenters are not required to serve copies of their comments on other commenters.

18. The Commission encourages comments to be filed electronically via the eFiling link on the Commission's website at *http://www.ferc.gov.* The Commission accepts most standard word processing formats. Documents created electronically using word processing software must be filed in native applications or print-to-PDF format and not in a scanned format. Commenters filing electronically do not need to make a paper filing.

19. Commenters that are not able to file comments electronically may file an original of their comment by USPS mail or by courier-or other delivery services. For submission sent via USPS only, filings should be mailed to: Federal Energy Regulatory Commission, Office of the Secretary, 888 First Street NE, Washington, DC 20426. Submission of filings other than by USPS should be delivered to: Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

IV. Document Availability

20. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*).

21. From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

22. User assistance is available for eLibrary and the Commission's website during normal business hours from the Commission's Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov.*

By direction of the Commission.

Issued: November 20, 2025.

Debbie-Anne A. Reese,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC25–151–000.

Applicants: Carroll County Energy LLC, AL Carroll County Holdings, LLC.

Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Carroll County Energy LLC, et al.

Filed Date: 9/30/25.

Accession Number: 20250930–5326.

Comment Date: 5 p.m. ET 12/1/25.

Docket Numbers: EC26–7–000.

Applicants: Leaning Juniper Wind Power II, LLC, Leaning Juniper 2B, LLC.

Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Leaning Juniper Wind Power II, LLC, et al.

Filed Date: 10/14/25.

Accession Number: 20251014–5420.

Comment Date: 5 p.m. ET 11/4/25.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG26–18–000.

Applicants: Medway Grid, LLC.

Description: Medway Grid, LLC submits Notice of Self-Certification of Exempt Wholesale Generator Status.

Filed Date: 10/14/25.

Accession Number: 20251014–5341.

Comment Date: 5 p.m. ET 11/4/25.

Take notice that the Commission received the following Complaints and Compliance filings in EL Dockets:

Docket Numbers: EL26–5–000.

Applicants: BP Energy Retail Company LLC v. *ISO New England Inc., et al.*

Description: Complaint of *BP Energy Retail Company LLC* v. *ISO New England Inc., et al.*

Filed Date: 10/14/25.

Accession Number: 20251014–5331.

Comment Date: 5 p.m. ET 11/13/25.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER10–2757–011; ER10–1342–009; ER18–53–005; ER11–3051–007; ER10–3310–018.

Applicants: New Harquahala Generating Company, LLC, Macho Springs Power I, LLC, CXA La Paloma, LLC, CP Energy Marketing (US) Inc., Arlington Valley, LLC.

Description: Supplement to 06/30/2025, Triennial Market Power Analysis for Southwest Region of Arlington Valley, LLC, et al.

Filed Date: 10/14/25.

Accession Number: 20251014–5372.

Comment Date: 5 p.m. ET 11/4/25.

Docket Numbers: ER12–1725–008; ER19–106–008.

Applicants: Birdsboro Power LLC, Red Oak Power, LLC.

Description: Notice of Change in Status of Red Oak Power, LLC, et al.

Filed Date: 10/14/25.

Accession Number: 20251014–5369.

Comment Date: 5 p.m. ET 11/4/25.

Docket Numbers: ER13–1562–013.

Applicants: Catalina Solar Lessee, LLC.

Description: Notice of Change in Status of Catalina Solar Lessee, LLC.

Filed Date: 10/14/25.

Accession Number: 20251014–5368.

Comment Date: 5 p.m. ET 11/4/25.

Docket Numbers: ER19–2276–007.

Applicants: New York Independent System Operator, Inc.

Description: Compliance filing: NYISO Effective Date Notice: DADRP/DSASP Sunset—2019 DER Proposal to be effective 10/31/2025.

Filed Date: 10/15/25.

Accession Number: 20251015–5079.

Comment Date: 5 p.m. ET 11/5/25.

Docket Numbers: ER23–2040–004.

Applicants: New York Independent System Operator, Inc.

Description: Compliance filing: NYISO Effective Date Notice: DADRP/DSASP Sunset—2023 DER Proposal to be effective 10/31/2025.

Filed Date: 10/15/25.

Accession Number: 20251015–5130.

Comment Date: 5 p.m. ET 11/5/25.

Docket Numbers: ER24–2042–001.

Applicants: California Independent System Operator Corporation.

Description: Report Filing: 2025–10–03 Supplemental Compliance Filing—Order No. 2023 to be effective N/A.

Filed Date: 10/3/25.

Accession Number: 20251003–5061.

Comment Date: 5 p.m. ET 10/24/25.

Docket Numbers: ER24–3127–002.

Applicants: Sun Pond, LLC.

Description: Notice of Non-Material Change in Status of Sun Pond, LLC.

Filed Date: 10/14/25.

Accession Number: 20251014–5373.

Comment Date: 5 p.m. ET 11/4/25.

Docket Numbers: ER25–2833–002.

Applicants: PacifiCorp.

Description: Compliance filing: Compliance Filing to Sept. 29 Order to be effective 9/9/2025.

Filed Date: 10/15/25.

Accession Number: 20251015–5109.

Comment Date: 5 p.m. ET 11/5/25.

Docket Numbers: ER25–3213–000.

Applicants: Olympus Phase 3, LLC.

Description: Supplement to 08/18/2025 Olympus Phase 3, LLC tariff filing.

Filed Date: 10/2/25.

Accession Number: 20251002–5166.

Comment Date: 5 p.m. ET 10/27/25.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: October 23, 2025.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RM98–1–000]

Records Governing Off-the-Record Communications Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. Each filing may be viewed on the Commission's website at *http://www.ferc.gov* using the eLibrary link. Enter the docket number, excluding the last three digits, in the docket number field to access the document. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 15249–002]

Lewis Ridge Pumped Storage, LLC; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Lewis Ridge Pumped Storage Project

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Original Major License.

b. *Project No.:* 15249–002.

c. *Date Filed:* June 13, 2025.

d. *Applicant:* Lewis Ridge Pumped Storage, LLC (LRPS).

e. *Name of Project:* Lewis Ridge Pumped Storage Project.

f. *Location:* Near the towns of Blackmont, Tejay, Balkan, and Callaway, in Bell County, Kentucky.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Sandy Slayton, Rye Development, 1455 SW Broadway Street, Suite 290, Portland Oregon 97201; (503) 341–1425; email: *sandy@ryedevelopment.com.*

i. *FERC Contact:* Sarah Salazar at (202) 502–6863, or *sarah.salazar@ferc.gov.*

j. The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document that will discuss the environmental effects of relicensing the Lewis Ridge Pumped Storage Project. The Commission will use this environmental document in its decision-making process to determine whether to issue a license for the project.

k. This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. This notice is intended to advise all participants as to the potential scope of the National Environmental Policy Act (NEPA) document and to seek additional information pertinent to this analysis. Commission staff does not intend to issue a separate scoping document.

As part of the NEPA review process, the Commission takes into account concerns the public may have about proposals and the environmental effects that could result from its action whenever it considers the issuance of a hydropower license. This gathering of public input is referred to as ''scoping.'' The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues.

l. *Scoping Comments:* By this notice, the Commission requests written public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00 p.m. Eastern Time on December 23, 2025.

Comments should focus on the potential environmental effects and reasonable alternatives. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 10,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All filings must clearly identify the project name and docket number on the first page: Lewis Ridge Pumped Storage Project (P–15249–002).

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

m. The application is not ready for environmental analysis at this time. On October 24, 2025 the Commission issued a request for additional information with a response due from the applicant by December 8, 2025.

n. *Project Description:* The proposed project boundary would enclose about 148 acres of privately owned land, primarily owned by Asher Land and Mineral, LLLP, on which it previously conducted surface and underground coal mining. About 16 additional parcels of privately owned property would be included in the project boundary, primarily along the transmission line and water intake conduit extending from the Cumberland River to the lower reservoir. These lands are identified in Exhibit G of the application (Project Boundary Drawing).

The proposed Lewis Ridge Project would consist of a 48.2-acre upper reservoir created by an 8,241-foot-long, 50-foot-high rocky earth-fill dam with an integrated emergency overflow spillway passing flows to the Pound Mill Branch and into Puckett Creek. The upper reservoir would have an active storage of about 2,602 acre-feet between normal maximum elevation 2,150 feet and normal minimum elevation 2,076 feet. An intake in the upper reservoir would pass flows to a 3,134-foot-long, 16-foot-diameter aboveground penstock. The penstock would connect to a powerhouse located 267 feet below ground, containing two 154-megawatt (MW) reversible pump-turbines with a total rated capacity of 308 MW. Flows from the powerhouse would pass through two 249-foot-long, 12-foot-diameter draft tubes to a 110-foot-long water intake located at the lower reservoir. The 51.6-acre lower reservoir would be created by a 1,120-foot-long, 138-foot-high earth-fill dam and have an integrated emergency overflow spillway passing flows to the Cumberland River. The lower reservoir would have a gross storage of 3,486 acre-feet and active storage of about 2,602 acre-feet between normal maximum elevation 1,134 feet and normal minimum elevation 1,034 feet.

A permanent intake would be located on the Cumberland River to provide initial fill flows and maintenance flows. The intake would consist of 6 screened inlets which connect to a removable/mobile pumping station. Flows from the pumping station would pass through three parallel 4,724-foot-long, 24-inch-diameter buried pipelines which would direct flows to a stilling basin at the lower reservoir.

LRPS would develop about 7.1 miles of permanent roads for project access and maintenance, and 4 miles of temporary roads for construction. LRPS would use two disposal sites to deposit excess spoil material (excavated soil and rocks). After construction is completed, these sites would be seeded and revegetated.

The project would include a 2.5-mile-long, 161-kilovolt overhead transmission line and two switching stations, connecting the project powerhouse to the existing Pineville-Harlan #1 transmission line. Under normal operation, the project would have the capacity to produce about 717,000 megawatt hours (MWh) of peak energy annually.

Project Operation

The Lewis Ridge Pumped Storage Project would use flows from the Cumberland River and Tom Fork River for the initial fill and periodic recharge of the reservoirs. The project would require about 2,808 acre-feet of water for the initial fill and 149 acre-feet annually to replace water that would be lost to evaporation and seepage. All flows in the Tom Fork River above 2.8 cubic feet per second (cfs) would be available for maintenance flows and initial fill. About 10% of the mean monthly flow in the Cumberland River would be used for initial fill and to supplement Tom Fork River flows for maintenance when needed.

The lower reservoir would inundate part of the 1.8-mile-long Tom Fork River. The lower reservoir dam would include a low-level outlet, which would be used for emergency releases, as well as providing approximately 2.8 cfs (the estimated mean annual flow) to the lower section of the Tom Fork River.

The proposed project would pump water from the lower reservoir to the upper reservoir during periods of low electrical demand (*i.e.,* off-peak energy, likely during nights and weekends) and generate energy by passing the water from the upper to the lower reservoir through the generating units during periods of high electrical demand (*i.e.,* peak energy, likely during weekdays). Water surface elevations in the upper reservoir would fluctuate about 74 feet under normal operation. The water surface elevation in the lower reservoir would fluctuate 100 feet. The project would produce 266 MW of energy for an 8-hour generation cycle and take 8.8 hours to return water from the lower reservoir to the upper reservoir. The return cycle would require 340 MW of power. The proposed project would be operated to maximize benefits to the electrical grid while minimizing evaporation from both reservoirs.

Under an original license, in addition to constructing, operating, and maintaining the project as described above, LRPS would implement the following measures: (1) additional geo-technical analyses; (2) an Erosion and Sediment Control Plan; (3) a Water Quality Monitoring Plan; (4) a Stormwater Pollution Prevention Plan; (5) a Hazardous Substances Spill Prevention and Cleanup Plan; (6) a Groundwater Protection Plan; (7) fish exclusion measures; (8) mussel relocation; (9) a Wildlife Management Plan; (10) a Vegetation Management Plan; and (11) a Historic Properties Management Plan.

A copy of the application, with details of the proposed project, can be viewed on the Commission's website at *https://www.ferc.gov* using the ''eLibrary'' link. Enter the project's docket number excluding the last three digits in the docket number field to access the document (P–15249). For assistance, contact FERC at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

o. NEPA Process and the Environmental Document: Any environmental document issued by the Commission will discuss effects that could occur as a result of the project's licensing under the relevant general resource areas, such as:

- geology and soils;
- aquatic resources;
- terrestrial resources;
- threatened and endangered species;
- recreation, land use, and aesthetic resources;
- cultural resources; and
- developmental resources.

Commission staff will also evaluate reasonable alternatives to the proposed project or portions of the project and make recommendations on how to lessen or avoid effects on the various resource areas. Your comments will help Commission staff identify and focus on the issues that might have an effect on the human environment and potentially eliminate others from further discussion in the environmental document.

Following this scoping period, Commission staff will determine whether to prepare an Environmental Assessment (EA) or an Environmental Impact Statement (EIS). The EA or EIS will present Commission staff's independent analysis of the issues. If Commission staff prepares an EA, a *Notice of Intent to Prepare an Environmental Assessment* will be issued. The EA may be issued for an allotted public comment period. The Commission would consider timely comments on the EA before making its decision regarding the proposed project. If Commission staff prepares an EIS, a *Notice of Intent to Prepare an Environmental Impact Statement* will be issued. Staff will then prepare a draft EIS which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any EA or draft and final EIS will be available in electronic format in the public record through eLibrary. If eSubscribed, you will receive instant email notification when the environmental document is issued (see paragraph (q) of this notice for instructions on using eSubscription).

p. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

q. This notice is being distributed to the Commission's official mailing list for the project and any additional entities on the applicant's distribution list. You can access the Commission's official mailing list for this project at *https://ferconline.ferc.gov/MailListLOR.aspx?Type=MailList&ListVar=P-15249.* If you want to receive future mailings for the project and are not included on the Commission's official mailing list, or if you wish to be removed from the Commission's official mailing list, please send your request by email to *FERCOnlineSupport@ferc.gov.* In lieu of an email request, you may submit a paper request. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All written or emailed requests must specify your wish to be added to or removed from the mailing list, and must clearly identify the following on the first page: Lewis Ridge Pumped Storage Project No. 15249–002.

Additionally, the Commission offers a free service called eSubscription, which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest way to receive notification and provide a link to the document files which can reduce the amount of time you spend researching proceedings. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

In addition to publishing the full text of this notice in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this notice, as well as other documents in the proceeding (*e.g.,* license application) via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document (P–15249). For assistance, contact FERC at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

Dated: October 24, 2025.

Federal Energy Regulatory Commission

[Docket No. EL26–2–000]

Idaho Power Company; Notice of Institution of Section 206 Proceeding and Refund Effective Date

On October 16, 2025, the Commission issued an order in Docket No. EL26–2–000, pursuant to section 206 of the Federal Power Act (FPA), 16 U.S.C. 824e, instituting an investigation to determine whether Idaho Power Company's market-based rates are considered unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. *Idaho Power Company,* 193 FERC ¶ 61,024 (2025) (*Idaho Power*).

As established in *Idaho Power,* the refund effective date, pursuant to section 206(b) of the FPA, is October 16, 2025.

Any interested person desiring to be heard in Docket No. EL26–2–000 must file a notice of intervention or motion to intervene, as appropriate, with the Federal Energy Regulatory Commission, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214 (2025), within 30 days of the date of issuance of the order.

The Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. From FERC's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field. User assistance is available for eLibrary and the FERC's website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFile'' link at *http://www.ferc.gov.* In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Comment Date: 5 p.m. ET 12/8/25.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number. Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding. eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659. The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: November 5, 2025.

Carlos D. Clay,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP25–533–000]

Pine Prairie Energy Center, LLC; Notice of Schedule for the Preparation of an Environmental Assessment for the Pine Prairie Energy Center Phase IV Expansion Project

On August 8, 2025, Pine Prairie Energy Center, LLC (Pine Prairie) filed an application in Docket No. CP25–533–000 requesting a Certificate of Public Convenience and Necessity pursuant to Section 7(c) of the Natural Gas Act to construct and operate certain natural gas pipeline facilities. The proposed project is known as the Pine Prairie Energy Center Phase IV Expansion Project (Project) and would amend Pine Prairie's certificated total capacity to 87.2 billion cubic feet (Bcf) of natural gas (61.1 Bcf of working gas and 26.1 Bcf of base gas) and reduce the maximum daily delivery capability from 3.2 Bcf/day to 3.0 Bcf/day.

On August 22, 2025, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff's environmental document for the Project.

This notice identifies Commission staff's intention to prepare an environmental assessment (EA) for the Project and the planned schedule for the completion of the environmental review.[1] The EA will be issued for a 30-day comment period.

Schedule for Environmental Review

Issuance of EA	January 23, 2026
90-day Federal Authorization Decision Deadline[2]	April 23, 2026

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project's progress.

Project Description

The Project is in Evangeline Parish, Louisiana, and would consist of the following facilities:

- a new natural gas storage cavern (Cavern No. 6);
- 0.16 mile of natural gas, fresh water, and brine return pipelines that would interconnect with existing systems;
- new brine filtration, gas heating, and dehydration equipment, and demolition of existing out-of-service brine filtration equipment;
- a new 19,000 horsepower electric motor-driven compressor unit in an extension of the existing compressor building;
- about 2.4 miles of 30-inch-diameter header loop pipeline; and

[1] For tracking purposes under the National Environmental Policy Act, the unique identification number for documents relating to this environmental review is EAXX–019–20–000–1758873996.

[2] The Commission's deadline applies to the decisions of other federal agencies, and state agencies acting under federally delegated authority, that are responsible for federal authorizations, permits, and other approvals necessary for proposed projects under the Natural Gas Act. Per 18 CFR 157.22(a), the Commission's deadline for other agency's decisions applies unless a schedule is otherwise established by federal law.

• modification of the existing ANR-North Meter Station and Highway 10 Valve Site.

Background

On September 17, 2025, the Commission issued a *Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Pine Prairie Energy Center Phase IV Expansion Project* (Notice of Scoping). The Notice of Scoping was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries. In response to the Notice of Scoping, the Commission received comments from Ironworkers Local 623 of Baton Rouge, Louisiana, expressing support for the project, and Our Children's Trust, a legal advocacy group that commented agency actions must be consistent with protecting the rights to life, personal security, other liberties of young people, and children's equal protection of the law. All substantive comments will be addressed in the EA.

Additional Information

In order to receive notification of the issuance of the EA and to keep track of formal issuances and submittals in specific dockets, the Commission offers a free service called eSubscription. This service provides automatic notification of filings made to subscribed dockets, document summaries, and direct links to the documents. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, community organizations, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Additional information about the Project is available from the Commission's Office of External Affairs at (866) 208–FERC or on the FERC website (*www.ferc.gov*). Using the ''eLibrary'' link, select ''General Search'' from the eLibrary menu, enter the selected date range and ''Docket Number'' excluding the last three digits (*i.e.,* CP25–533), and follow the instructions. For assistance with access to eLibrary, the helpline can be reached at (866) 208–3676, TTY (202) 502–8659, or at *FERCOnlineSupport@ferc.gov.* The eLibrary link on the FERC website also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rule makings.

Dated: October 17, 2025.

Debbie-Anne A. Reese,

Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2003–0004; FRL–13042–01–OCSPP]

Access to Confidential Business Information by General Dynamics Information Technology and Its Identified Subcontractors, Comptech Computer Technology, Inc., and Gridiron IT Solutions, Inc.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has authorized its contractor and subcontractors, General Dynamic Information Technology (GDIT) of Falls Church VA, Comptech Technology of Dayton Ohio, and Gridiron IT Solutions Inc. of Reston VA, to access information which has been submitted to EPA under all sections of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be Confidential Business Information (CBI).

DATES: Access to the confidential data will occur no sooner than December 2, 2025.

FOR FURTHER INFORMATION CONTACT: *For technical information contact:* Norman Adkins, OCSPP–OMCO–ITSD–DMB, Environmental Protection Agency, 109 T.W. Alexander Drive RTP, NC 27711; telephone number: (919) 541–0479; email address: *adkins.norman@epa.gov.*

For general information contact: email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general. This action may, however, be of interest to all who manufacture, process, or distribute industrial chemicals. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

II. What action is the Agency taking?

Under EPA contract number 68HERD24A0001, contractor and subcontractors General Dynamics Information Technology Inc. of 3150 Fairview Park Drive, Suite 100, Falls Church, VA 22042, COMPTECH Computer Technologies Inc. of 8534 Yankee Street, Suite 1C, Dayton, OH 45458, and Gridiron IT Solutions Inc. of 11180 Sunrise Valley Dr., Suite 210, Reston, VA 20191, will assist the Office of Pollution Prevention and Toxics (OPPT) in the integration of previously owned Office of Research and Development (ORD) scientific applications, data, models, and systems within the CBI environments to enhance decision making capabilities. This is necessary to improve existing tools and integrate new tools that are only accessible through computer access to the TSCA CBI.

Contractors working on this project will be required to have full access to the entire IT system that houses TSCA CBI data and materials. This level of access is required for data movement and migration. (OCSPP), focusing on enhancing decision making capabilities in support of TSCA. The scope includes integrating the current CBI environment with enhanced ORD tools and models for process improvement and decision making. The initiative aims to streamline TSCA decision making through improvement in existing tools and integrating new capabilities.

In accordance with 40 CFR 2.306(j), EPA has determined that under EPA contract number 68HERD24A0001, GDIT, CompTech Computer Technologies, and Gridiron IT Solutions will require access to CBI submitted to EPA under all section(s) of TSCA to perform successfully the duties specified under the contract. GDIT, CompTech Computer technology, and Gridiron IT Solutions personnel will be given access to information submitted to EPA under all section(s) of TSCA. Some of the information may be claimed or determined to be CBI.

EPA is issuing this notice to inform all submitters of information under all sections of TSCA that EPA may provide GDIT, CompTech Computer Technologies, and Gridiron IT Solutions access to these CBI materials on a need-to-know basis only. All access to TSCA CBI under this contract will take place at EPA Headquarters and GDIT site located at 3150 Fairview Park Dr., Suite 100, Falls Church, VA 22042, in accordance with EPA's *TSCA CBI Protection Manual.*

Access to TSCA data, including CBI, will continue until February 27, 2027. If

the contract is extended, this access will also continue for the duration of the extended contract without further notice.

GDIT, CompTech Computer Technologies, and Gridiron IT Solutions personnel will be required to sign nondisclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

Authority: 15 U.S.C. 2601 *et seq.*

Dated: November 20, 2025.

Nancy B. Beck,

Principal Deputy Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0787; FR ID 318566]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before January 26, 2026. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0787.

Title: Implementation of the Subscriber Carrier Selection Changes Provisions of the Telecommunications Act of 1996, Policies and Rules Concerning Unauthorized Changes of Consumers' Long Distance Carriers, CC Docket No. 94–129, CG Docket 17–169.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Individuals or household; Business or other for-profit; State, Local or Tribal Government.

Number of Respondents and Responses: 1,178 respondents; 3,817 responses.

Estimated Time per Response: 30 minutes (.50 hours) to 10 hours.

Frequency of Response: Recordkeeping requirement; Biennial, on occasion and one-time reporting requirements; Third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for the information collection requirements is found at Sec. 258 [47 U.S.C. 258] Illegal Changes In Subscriber Carrier Selections, Public Law 104–104, 110 Stat. 56.

Total Annual Burden: 8,692 hours.

Total Annual Cost: $2,630,000.

Needs and Uses: Section 258 of the Telecommunications Act of 1996 (1996 Act) directed the Commission to prescribe rules to prevent the unauthorized change by telecommunications carriers of consumers' selections of telecommunications service providers (slamming). On March 17, 2003, the FCC released the *Third Order on Reconsideration and Second Further Notice of Proposed Rulemaking,* CC Docket No. 94–129, FCC 03–42 (*Third Order on Reconsideration*), in which the Commission revised and clarified certain rules to implement section 258 of the 1996 Act. On May 23, 2003, the Commission released an *Order* (CC Docket No. 94–129, FCC 03–116) clarifying certain aspects of the *Third Order on Reconsideration.* On January 9, 2008, the Commission released the *Fourth Report and Order,* CC Docket No. 94–129, FCC 07–223, revising its requirements concerning verification of a consumer's intent to switch carriers.

The *Fourth Report and Order* modified the information collection requirements contained in § 64.1120(c)(3)(iii) of the Commission's rules to provide for verifications to elicit ''confirmation that the person on the call understands that a carrier change, not an upgrade to existing service, bill consolidation, or any other misleading description of the transaction, is being authorized.''

Federal Communications Commission.

Marlene Dortch,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1230; FR ID 319080]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to

any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before January 26, 2026. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1230.

Title: Enterprise Service and Public Safety Interference Complaint Intake Form.

Form Number: FCC–5624.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, Not-for-profit institutions, Federal government, and State, Local, or Tribal government.

Number of Respondents and Responses: 400 respondents; 400 responses.

Estimated Time per Response: 0.5 hours (30 minutes).

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Voluntary. The statutory authority for this information collection is contained in contained in 47 U.S.C. 154(i)–(j), 155, and 303(r).

Total Annual Burden: 200 hours.

Total Annual Cost: No Cost.

Needs and Uses: Commercial spectrum licensees, spectrum licensees with public safety or safety of life missions, and federal agencies will have a single portal through which to submit complaints of RF interference. This online RF interference intake portal will enhance the Commission's ability to efficiently triage and assign RF interference complaints to field agents for further investigation, mitigation, and/or enforcement action, as appropriate.

Federal Communications Commission.

BILLING CODE 6712–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–9163–N]

Notice of Medicaid Information Sharing Between the Centers for Medicare & Medicaid Services and the Department of Homeland Security

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: This notice announces that the Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS), will share certain information with the U.S. Department of Homeland Security (DHS), and its component agency, U.S. Immigration and Customs Enforcement consistent with federal laws requiring the provision of information to DHS.

DATES: This notice is applicable immediately.

FOR FURTHER INFORMATION CONTACT: The Center for Medicaid and CHIP Services at *CMCS@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

This notice provides information regarding the provision of certain information collected by the Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS), with U.S. Department of Homeland Security (DHS) and its component agency U.S. Immigration and Customs Enforcement (ICE). CMS partners with states to administer Medicaid. In doing so, CMS collects information regarding individuals for a variety of purposes related to administration, oversight, and program integrity. This notice applies to data collected by CMS in connection with its role in the Medicaid program.

CMS receives information related to immigration status because it is relevant to the Medicaid program. For example, under Medicaid, states are prohibited from claiming federal financial participation (FFP) for ''medical assistance furnished to an alien who is not lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law.'' Section 1903(v)(1) of the Social Security Act (the Act) (42 U.S.C. 1396b(v)(1)). The exception to this prohibition is that FFP can be paid if the care and services are ''necessary for the treatment of an emergency medical condition of the alien,'' the alien otherwise meets the eligibility requirements for Medicaid, and the care and services are not related to an organ transplant procedure. Section 1903(v)(2) of the Act (42 U.S.C. 1396b(v)(2)).

Federal laws govern the collection, use, and disclosure of CMS information. Depending on the type of information, applicable laws may include the Privacy Act of 1974 (5 U.S.C. 552a), section 1106(a) of the Act (42 U.S.C. 1306(a)(1)) and CMS implementing regulations at 42 CFR part 401, subpart B, and other federal laws. In addition, CMS has established a robust privacy and security program (*https://security.cms.gov/topic/privacy*). CMS has previously stated on its website that the information regarding individuals that it collects will only be used for administration of its programs. *See, e.g.,* CMS, CMS Privacy Home Page, *https://www.cms.gov/about-cms/information-systems/privacy* (''To protect your privacy, we'll tell you before we collect any personal information we need to run our health care programs, and only use it for that purpose.''). CMS also has stated on its website that it will not use immigration status for immigration enforcement purposes. *See* CMS, More information for immigrant households, *https://www.healthcare.gov/immigrants/immigrant-families/* (''We won't use any immigration status you share with us for immigration enforcement purposes.''). This policy statement was made in the context of and in reliance on a 2013 ICE policy that stated that ICE would not use CMS data or information provided by individuals to obtain coverage for certain benefits under CMS programs as the basis for pursuing a civil immigration enforcement action. ICE has rescinded this policy.[1] *See* ICE Policy Memorandum 11066.2, Use of HHS Information and Rescission of ICE Policy Memorandum 11066.1, *Clarification of Existing Practices Related to Certain Health Care Information* (October 25, 2013, 2013 Policy Memorandum), (Oct. 27, 2025, ICE Policy Memorandum 11066.2).

II. Legal Authority

Several federal laws authorize CMS to make certain information available to

[1] ICE notes that it is currently precluded from using this information due to a Preliminary Injunction and it will proceed with this policy when the Preliminary Injunction is lifted. *See* ICE Policy Memorandum 11066.2, *see also California* v. *HHS,* No. 25–05536 (N.D. Cal. filed July 1, 2025). Under that same Preliminary Injunction, CMS is currently precluded from sharing certain Medicaid data with ICE for immigration enforcement purposes. Similarly, CMS will proceed with this policy when the Preliminary Injunction is lifted.

DHS. *See* ICE Policy Memorandum 11066.2.

• Under the Homeland Security Act of 2002, the Secretary of Homeland Security shall have access to information ''relating to matters under the responsibility of the Secretary that may be collected, possessed, or prepared by an agency of the Federal Government as the President may further provide.'' 6 U.S.C. 122(a)(2). Additionally, the Secretary of Homeland Security can obtain this information upon request and can enter into cooperative agreements with other agencies to provide DHS officials with access to the data on a regular or routine basis, including requests or arrangements involving broad categories of material, access to electronic databases, or both. 6 U.S.C. 122(b).

• Under the Immigration and Nationality Act, ''[a]ny information in any records kept by any department or agency of the Government as to the identity and location of aliens in the United States shall be made available to'' immigration authorities. 8 U.S.C. 1360(b). This ''expansive'' language reaches ''broad[ ] swaths of information'' in the possession of the federal government. *United States* v. *California,* 921 F.3d 865, 892 (9th Cir. 2019).

Moreover, under 8 U.S.C. 1373, ''[n]otwithstanding any other provision of Federal, State, or local law, a Federal, State, or local government entity or official may not prohibit, or in any way restrict, any government entity or official from sending to, or receiving from, [DHS] information regarding the citizenship or immigration status, lawful or unlawful, of any individual.'' 8 U.S.C. 1373(a). Additionally, ''[n]otwithstanding any other provisions of Federal, State, or local law, no person or agency may prohibit, or in any way restrict, a Federal, State, or local government entity'' from transmitting, maintaining, or exchanging information regarding immigration status with any other Federal, State, or local government entity. 8 U.S.C. 1373(b).

• The Privacy Act of 1974 does not provide authority for a disclosure. However, with respect to U.S. citizens and lawful permanent residents, an exception in the law would not require an agency to obtain prior written consent of the individual to whom the record pertains to disclose a record contained in a system of records to another federal agency ''for a civil or criminal law enforcement activity if the activity is authorized by law, and if the head of the agency has made a written request to the agency which maintains the record specifying the particular portion desired and the law enforcement activity for which the record is sought,'' *See* 5 U.S.C. 552a(b)(7).[2]

III. Purpose of Information Sharing

This notice announces CMS policy that CMS will provide certain information to ICE upon request from ICE consistent with federal laws to advance administration priorities related to immigration laid out in the following Executive Orders.

• Executive Order 14159, ''Protecting the American People Against Invasion''—The purpose of this Executive Order is to ''ensure[ ] that the Federal Government protects the American people by faithfully executing immigration laws of the United States.'' (90 FR 8443, January 29, 2025).

• Executive Order 14165, ''Securing Our Borders''—This Executive Order establishes a policy of the United States ''to take all appropriate action to secure the borders of our Nation'' through a range of means, including deterring and preventing the entry of illegal aliens into the United States, and removing promptly all aliens who enter or remain in violation of Federal law. (90 FR 8467, January 30, 2025).

• Executive Order 14218, ''Ending Taxpayer Subsidization of Open Borders''—This Executive Order directs federal agencies to faithfully carry out the immigration laws and ''to ensure, to the maximum extent permitted by law, that no taxpayer-funded benefits go to unqualified aliens.'' (90 FR 10581, February 25, 2025).

• Executive Order 14243, ''Stopping Waste, Fraud, and Abuse by Eliminating Information Silo''—One of the purposes of this Executive Order is to promote inter-agency data sharing. It directs agencies to ''take all necessary steps, to the maximum extent consistent with law,'' to ensure access to information ''for purposes of pursuing Administration priorities related to the identification and elimination of waste, fraud, and abuse.'' (90 FR 13681, March 25, 2025).

As noted by ICE in ICE Policy Memorandum 11066.2, certain information held by CMS is useful for immigration enforcement purposes and to support the full and efficient execution of ICE's mission. ICE Policy Memorandum 11066.2 at 4. This CMS information ''represents a particular set of accurate and quality data that can be used to enhance ICE's data and improve its law enforcement actions.'' *Id.* More broadly, using CMS information as detailed in the ICE Policy Memorandum 11066.2 ''allows ICE to more efficiently achieve its mission of preserving national security and public safety.'' *Id.*

IV. Information To Be Shared

ICE announced that, at this time, it contemplates requesting from CMS available biographical, contact, and location information, though ICE reserved the right, in a specific case, to consider requesting other information on a case-by-case basis as permitted by law. *Id.* at 2. This CMS information may include Medicaid information or data shared with CMS by states. CMS will share the minimum required information with ICE, giving due consideration to the information requested by ICE, the federal laws that govern the provision of information to DHS and the CMS information requested, the capabilities of CMS systems, and the CMS resources available to respond to ICE information requests. Examples of information that CMS may share with ICE include the following: citizenship and immigration status, location, and phone numbers, and, in specific cases, other information on a case-by-case basis as permitted by law. CMS will respond to requests made by ICE and will transfer any information to ICE in a secure manner and establish appropriate safeguards for the information provided, including through written agreements or other arrangements with ICE.

CMS intends its provision of various categories of information to be severable from each other. For instance, CMS's provision of biographical information about aliens is severable from its provision of location information about aliens or from its provision of other types of information that ICE does not presently intend to request for immigration enforcement purposes. In the event a court finds that ICE does not have a right to access a specific type of data (or that CMS is not authorized to provide such data), CMS intends that the provision of specific categories of data be severable from each other.

V. Reliance Interests

CMS has considered the fact that states, providers, beneficiaries, health insurance issuers, other regulated entities, and the general public may have relied on past CMS statements that information collected by CMS would only be used for program administration purposes and would not be used for immigration enforcement purposes. The CMS statements were made against the backdrop of federal laws that authorize

[2] The Privacy Act of 1974 only applies to U.S. citizens and lawful permanent residents. *See* 5 U.S.C. 552a(a)(2) (defining individual to include U.S. citizens and lawful permanent residents).

CMS to share information with DHS, upon request, and a policy choice made by ICE not to use certain information as the basis for pursuing a civil immigration enforcement action. These federal laws have long apprised the regulated public that immigration authorities have access to ''broad swaths'' of information possessed by other federal agencies relevant to immigration enforcement. Brief of Appellee State of California in *United States* v. *California,* No. 18–16496, 2018 WL 5880015 (9th Cir. Nov. 5, 2018) (''When Congress has intended to reach broad swaths of information, or specifically a person's address, it has used different words. For example . . . the INA requires federal agencies to communicate to ICE, upon request, '[a]ny information in any records . . . as to the identity and location of aliens,' [8 U.S.C. 1360(b).]'')); *see also* Policy Memorandum 11066.2 at 4. To ensure that the public is aware that CMS intends to disclose certain information to DHS consistent with federal laws, including available information contained in program eligibility information, CMS is publishing this notice and will update relevant websites to reflect that federal laws authorize CMS to share certain information with DHS.

ICE determined, as stated in ICE Policy Memorandum 11066.2, that the ''value of this information to immigration and criminal law enforcement operations outweighs any relevant reliance interests.'' ICE Policy Memorandum 11066.2 at 4. Pursuant to the 6 U.S.C. 122(a)–(b), 8 U.S.C. 1360(b), and 8 U.S.C. 1373, ''ICE has always had authority to request and receive information for immigration enforcement purposes.'' ICE Policy Memorandum 11066.2 at 5.

As ICE stated, ''[t]he statutory provisions that both give ICE the right to request this information, and that require aliens to affirmatively provide that information to ICE upon request, are longstanding, and there is no exception to their application under Medicaid.'' ICE Policy Memorandum 11066.2 at 6.

Given the longstanding legal requirements for aliens to apprise immigration authorities of their whereabouts, whatever reliance states, providers, beneficiaries, health insurance issuers, other regulated entities, and the general public have placed on DHS's exercise of its enforcement discretion and CMS's information not being shared with immigration authorities due to that exercise of discretion is entitled to little to no weight. The biographical and location information that ICE intends to seek from CMS is information that ICE has long had a right to access. Accordingly, any interests in not sharing this information with ICE are greatly diminished and outweighed by ICE's legitimate law enforcement interests.

Moreover, while some states and providers contend that it would be detrimental to public health if aliens do not partake in federal health benefits for which they are eligible (for example, federally funded Medicaid services for emergency medical conditions) because if CMS shares information with ICE, the legal requirements regarding information sharing with ICE long predate restrictions on Medicaid to unqualified aliens. *Compare, e.g.,* 8 U.S.C. 1360(b) (enacted in Immigration and Nationality Act, 66 Stat. 163, 234 (1952)), *with* 42 U.S.C. 1396b(v)(1), 8 U.S.C. 1611(b)(1)(A) (enacted in Personal Responsibility and Work Opportunity Reconciliation Act of 1996, 110 Stat. 2105, 2180). The concerns of states and providers are entitled to little to no weight because they reflect the scheme that Congress created, which provides benefits to aliens under certain limited circumstances and gives immigration authorities the right to access information that arises from the conferral of those benefits.

Finally, to the extent that states provide data to CMS on aliens who receive health benefits or services funded only by the state, states are doing so voluntarily. CMS only requires states to submit data associated with beneficiaries who receive federally-funded Medicaid services. It is incumbent upon the states to separate the data that they collect when submitting it to CMS. Any reliance interests with respect to the population of aliens who receive health benefits or services funded only by states are entitled to no weight since states are not required to submit this information to CMS.

VI. Additional Information

Although notice and comment is unnecessary for this statement, CMS has been explicitly instructed by the district court in *California* v. *HHS,* No. 3:25–cv–05536 (N.D. Cal.), to address its reasons for forgoing notice and comment.

As explained above, CMS's prior policy statement that it would not use CMS data or information for immigration enforcement purposes was made in the context of ICE's prior policy, as described in its 2013 Policy Memorandum, to exercise its enforcement discretion to abstain from requesting information from CMS as the basis for pursuing a civil immigration enforcement action. CMS's prior policy statement did not change legal norms, as described above, created by Congress.

This notice communicates a CMS policy that CMS will share certain information consistent with federal law authorizing such sharing with respect to requests for CMS information from DHS and ICE. CMS is accordingly updating its policy statement in this regard. CMS is publishing this notice solely to inform interested parties of its decision to provide information to ICE consistent with federal law. This is, at the most, a policy statement as defined by 5 U.S.C. 553(b)(A) and (d)(2) and is exempt from notice and comment for that reason alone. *See Perez* v. *Mortgage Bankers Ass'n,* 575 U.S. 92, 95 (2015) (not all rules must be issued through notice and comment, including interpretive rules and general statements of policy under section 4(b)(A) of the Administrative Procedure Act.).

The Administrator of the Centers for Medicare & Medicaid Services (CMS), Mehmet Oz, having reviewed and approved this document, authorizes Evell Barco Holland, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Evell Barco Holland,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[OMB #: 0970–0307]

Submission for Office of Management and Budget Review; State Court Improvement Program

AGENCY: Children's Bureau, Administration for Children and Families, U.S. Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Administration for Children and Families (ACF) is requesting a 3-year extension of the State Court Improvement Program (SCIP) Strategic Plan Template and Annual Self-Assessment (Office of Management and Budget (OMB) #: 0970–0307, expiration February 28, 2026). There are minor updates to the self-assessment to reflect new legislation as well as to support technical

assistance. The collections are necessary to continue operating the program in compliance with congressional reauthorization.

DATES: *Comments due December 26, 2025.*

ADDRESSES: The public may view and comment on this information collection request at: *https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202511-0970-007.* You can also obtain copies of the proposed collection of information by emailing *opreinfocollection@acf.hhs.gov.* Identify all emailed requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: The SCIP provides federal funding to state courts to assess their child welfare and judicial practices and develop and implement improvement plans. States use funds in a variety of ways, including improving legal representation and hearing quality, enhancing the engagement of families in court proceedings, and supporting child welfare and court partnerships. The proposed collection is a continuation of the current collection and comprised of two instruments: A strategic plan and self-assessment. The self-assessment reflects what the state has done in the prior year focusing on its progress and status within the change management cycle. The strategic plan looks forward to those interventions and actions the state plans to undertake to address needs or buttress strengths they have discovered in their assessment activities. These two instruments serve as an application for annual SCIP funding as well as a source for data which are shared back with SCIP grantees to support their community learning and peer connections, to inform technical assistance, and support any reporting to Congress and others. Regarding updates to the self-assessment and strategic plan, a minor change was made early in 2025 to the self-assessment in response to Executive Orders, amounting to one optional topical box and a few drop-down categories being removed. Additionally, the following minor changes are proposed to the currently approved version of the self-assessment. These do not impact estimated time to respond.

- Brief questions were added on IV–E funding, self-assessment point of contact or publishing information, and additional collaborative partners.
- Dropdown categories have been added to reduce burden and improve data where 'other' was too often selected.
- Some questions about technical assistance states participated in were removed because alternative data sources were found that reduced burden.

No changes are proposed to the strategic plan.

The next application will be due June 30, 2026.

Respondents: We anticipate the highest state court of every state, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands to respond. All 53 jurisdictions currently participate in the program. One response from each jurisdiction is anticipated.

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours	Annual burden hours
Annual Self-Assessment	53	1	40	6360	2,120
Strategic Plan	53	*.20	52	1653.6	551.2
Estimated Total Annual Burden Hours					2,671.20

*The full Strategic Plan is completed every 5 years. In years when the Strategic Plan is not completed, respondents may spend minimal time updating relevant sections of the Strategic Plan. This is accounted for in the estimate for the Annual Self-Assessment.

Authority: 42 U.S.C. 629h.

Mary C. Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184–29–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2025–N–1137]

Nicole Shelby Randall: Final Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) is issuing an order under the Federal Food, Drug, and Cosmetic Act (FD&C Act) debarring Nicole Shelby Randall for a period of 5 years from importing or offering for import any drug into the United States. FDA bases this order on a finding that Ms. Randall was convicted of one felony count under Federal law for introduction of an adulterated drug into interstate commerce. The factual basis supporting Ms. Randall's conviction, as described below, is conduct relating to the importation into the United States of a drug or controlled substance. Ms. Randall was given notice of the proposed debarment and was given an opportunity to request a hearing to show why she should not be debarred. As of July 30, 2025 (30 days after receipt of the notice), Ms. Randall had not responded. Ms. Randall's failure to respond and request a hearing constitutes a waiver of her right to a hearing concerning this matter.

DATES: This order is applicable November 25, 2025.

ADDRESSES: Any application by Ms. Randall for termination of debarment under section 306(d)(1) of the FD&C Act (21 U.S.C. 335a(d)(1)) may be submitted at any time as follows:

Electronic Submissions

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. An application submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your application will be made public, you are solely responsible for ensuring that your application does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your application, that information will be posted on *https://www.regulations.gov.*
- If you want to submit an application with confidential

information that you do not wish to be made available to the public, submit the application as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For a written/paper application submitted to the Dockets Management Staff, FDA will post your application, as well as any attachments, except for information submitted, marked, and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All applications must include the Docket No. FDA–2025–N–1137. Received applications will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit an application with confidential information that you do not wish to be made publicly available, submit your application only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of your application. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852 between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500. Publicly available submissions may be seen in the docket.

FOR FURTHER INFORMATION CONTACT: Jaime Espinosa, Division of Field Enforcement, Office of Field Regulatory Operations, Office of Inspections and Investigations, Food and Drug Administration, 240–402–8743, or *debarments@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Section 306(b)(1)(D) of the FD&C Act permits debarment of an individual from importing or offering for import any drug into the United States if FDA finds, as required by section 306(b)(3)(C) of the FD&C Act, that the individual has been convicted of a felony for conduct relating to the importation into the United States of any drug or controlled substance.

On January 22, 2025, Ms. Randall was convicted as defined in section 306(l)(1) of the FD&C Act, in the U.S. District Court for the District of Oregon, when the court accepted her plea of guilty and entered judgment against her for the felony offense of introduction of an adulterated drug into interstate commerce in violation of sections 301(a) and 303(a)(2) of the FD&C Act (21 U.S.C. 331(a) and 333(a)(2)). The underlying facts supporting the conviction are as follows: As contained in the Information and Plea Agreement from her case, beginning on or about February 2020, and continuing through on or about May 2022, Ms. Randall along with co-conspirators operated a scheme to import and distribute GS–441524, a new drug, within the United States. This drug, GS–441524, has not been approved by FDA for human or animal use. To mislead and defraud U.S. Customs and Border Protection (CBP) officers, Ms. Randall imported GS–441524 from China and Hong Kong disguised in boxes marked ''Facial Mask'' and ''Pet Shampoo'' and declared to CBP as ''Beauty Essence Products,'' ''Cosmetics,'' ''Essence Water,'' and ''Beauty Facial Masks.'' Through the private Facebook Group, ''FIP Warriors 5.0,'' Ms. Randall marketed GS–441524. Despite having no veterinary or prescriber licenses, Ms. Randall defrauded and mislead her customers by ''diagnosing'' their cats and kittens with Feline Infectious Peritonitis (FIP) and ''prescribing'' GS–441524 for the animal's consumption. On or about August 12, 2021, and as part of an undercover law enforcement operations, Ms. Randall ''diagnosed'' a healthy cat with FIP and ''prescribed'' GS–441524 for consumption. After receiving payment, Ms. Randall introduced GS–441524 into interstate commerce by mailing it to the undercover agents.

FDA sent Ms. Randall, by certified mail, on June 25, 2025, a notice proposing to debar her for a 5-year period from importing or offering for import any drug into the United States. The proposal was based on a finding under section 306(b)(3)(C) of the FD&C Act that Ms. Randall's felony conviction under Federal law for introduction of an adulterated drug into interstate commerce in violation of sections 301(a) and 303(a)(2) of the FD&C Act was for conduct relating to the importation of any drug or controlled substance into the United States because Ms. Randall illegally imported and introduced misbranded drug products into interstate commerce. In proposing a debarment period, FDA weighed the considerations set forth in section 306(c)(3) of the FD&C Act that the Agency considered applicable to Ms. Randall's offense and concluded that the offense warranted the imposition of a 5-year period of debarment.

The proposal informed Ms. Randall of the proposed debarment and offered her an opportunity to request a hearing, providing her 30 days from the date of receipt of the letter in which to file the request, and advised her that failure to request a hearing constituted a waiver of the opportunity for a hearing and of any contentions concerning this action. Ms. Randall received the proposal and notice of opportunity for a hearing on June 30, 2025. Ms. Randall failed to request a hearing within the timeframe prescribed by regulation and has, therefore, waived her opportunity for a hearing and waived any contentions concerning her debarment (21 CFR part 12).

II. Findings and Order

Therefore, the Division of Field Enforcement, Office of Inspections and Investigations, under section 306(b)(3)(C) of the FD&C Act, under authority delegated to the Director, Division of Enforcement, finds that Ms. Nicole Shelby Randall has been convicted of a felony under Federal law for conduct relating to the importation into the United States of any drug or controlled substance. FDA finds that the offense should be accorded a debarment period of 5 years as provided by section 306(c)(2)(A)(iii) of the FD&C Act.

As a result of the foregoing finding, Ms. Randall is debarred for a period of 5 years from importing or offering for import any drug into the United States, effective (see **DATES**). Pursuant to section 301(cc) of the FD&C Act, the importing or offering for import into the United States of any drug by, with the

assistance of, or at the direction of Ms. Randall is a prohibited act.

Lowell M. Zeta,

Acting Deputy Commissioner for Policy, Legislation, and International Affairs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Oncology 2—Translational Clinical Integrated Review Group; Therapeutic Immune Regulation Study Section.

Date: January 16, 2026.

Time: 8:00 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Yue Wu, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 803C, Bethesda, MD 20892, (301) 867–5309, *wuy25@csr.nih.gov*.

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: November 21, 2025.

Denise M. Santeufemio,

Supervisory Program Analyst, Office of Federal Advisory Committee Policy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; NIA–011_ Digital Technologies as Tools To Screen and Monitor Alzheimer's Disease (AD) and Related Dementias (ADRD).

Date: December 18, 2025.

Time: 12:00 p.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Alicia Mariel Jais, PHMD, Scientific Review Officer, Scientific Review Branch, 5601 Fishers Lane, Suite 8B, Rockville, MD 20892, (301) 594–2614, *mariel.jais@nih.gov*.

This notice is being published less than 15 days from the meeting date due to exceptional circumstances. As a result of the 43-day government shutdown, due to lapsed appropriations, the above meeting was canceled. This meeting was to assess the scientific and technical merit of NIH grant applications, required by statute to disburse NIH funds. The meeting must take place urgently so that evaluations of biomedical research applications addressing multiple major public health priorities can be submitted to the national advisory councils for timely funding recommendations.

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: November 21, 2025.

This notice is being published less than 15 days from the meeting date due to exceptional circumstances. As a result of the 43-day government

shutdown, due to lapsed appropriations, the above meeting was canceled. This meeting was to assess the scientific and technical merit of NIH grant applications, required by statute to disburse NIH funds. The meeting must take place urgently so that evaluations of biomedical research applications addressing multiple major public health priorities can be submitted to the national advisory councils for timely funding recommendations.

National Institutes of Health

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Oncology 2—Translational Clinical Integrated Review Group; Translational Immuno-Oncology Study Section.

Date: December 18, 2025.

Time: 8:00 a.m. to 6:30 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Maria Elena Cardenas-Corona, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, 301–867–5309, *maria.cardenas-corona@nih.gov*.

Date: December 10–11, 2025.

Time: 09:00 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Shan Wang, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, 301–496–4390, *shan.wang@nih.gov.*

This notice is being published less than 15 days from the meeting date due to exceptional circumstances. As a result of the 43-day government shutdown, due to lapsed appropriations, the above meeting was canceled. This meeting was to assess the scientific and technical merit of NIH grant applications, required by statute to disburse NIH funds. The meeting must take place urgently so that evaluations of biomedical research applications addressing multiple major public health priorities can be submitted to the national advisory councils for timely funding recommendations.

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

National Institutes of Health

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections

552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Small Business: Microbial Diagnostics and Detection.

Date: January 29–30, 2026.

Time: 9:30 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Shinako Takada, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, 301–827–5997, *shinako.takada@nih.gov*.

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: November 20, 2025.

Name of Committee: Cardiovascular and Respiratory Sciences Integrated Review Group; Lung Immunology and Infection Study Section.

Date: December 11, 2025.

Time: 9:00 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Rupali Das, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 594–0023, *rupali.das@nih.gov*.

This notice is being published less than 15 days from the meeting date due to exceptional circumstances. As a result of the 43-day government shutdown, due to lapsed appropriations, the above meeting was canceled. This meeting was to assess the scientific and technical merit of NIH grant applications, required by statute to disburse NIH funds. The meeting must take place urgently so that evaluations of biomedical research applications addressing multiple major public health priorities can be submitted to the national advisory councils for timely funding recommendations.

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Cell Biology Integrated Review Group; Maximizing Investigators' Research Award—D Study Section.

Date: January 12–13, 2026.

Time: 10:00 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Anne Marie Strohecker, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (202) 924–4186, *stroheckeram@csr.nih.gov.*

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: November 21, 2025.

Denise M. Santeufemio,

Supervisory Program Analyst, Office of Federal Advisory Committee Policy.

Meeting Format: Virtual Meeting.

Contact Person: Rass M. Shayiq, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 2182, MSC 7818, Bethesda, MD 20892, (301) 435–2359, *shayiqr@csr.nih.gov.*

This notice is being published less than 15 days from the meeting date due to exceptional circumstances. As a result of the 43-day government shutdown, due to lapsed appropriations, the above meeting was canceled. This meeting was to assess the scientific and technical merit of NIH grant applications, required by statute to disburse NIH funds. The meeting must take place urgently so that evaluations of biomedical research applications addressing multiple major public health priorities can be submitted to the national advisory councils for timely funding recommendations.

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; PAR Panel;

Tackling Acquisition of Language in Kids (TALK).

Date: January 14, 2026.

Time: 9:00 a.m. to 11:00 a.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Natalie Dailey, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, 301–827–4451, *natalie.dailey@nih.gov.*

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; PAR–24: Review of S10 instrumentation applications

Date: January 14, 2026.

Time: 10:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Lee Warren Slice, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 1 Democracy Plaza, 6701 Democracy Blvd. Room 1068, Bethesda, MD 20892, *slicelw@mail.nih.gov.*

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Bioengineering Sciences & Technologies Integrated Review Group; Biodata Management and Analysis Study Section.

Date: January 12, 2026.

Time: 9:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: E. Bryan Crenshaw, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, (301) 480–7129, *bryan.crenshaw@nih.gov.*

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; RFA–AI–25–006: Molecular Mechanisms of Combination Adjuvants.

Date: January 8, 2026.

Time: 9:30 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Jennifer Hartt Meyers, Ph.D., Scientific Review Officer, Scientific Review Program, DEA/NIAID/NIH/DHHS, 5601 Fishers Lane, MSC–9823, Rockville, MD 20852, 301–761–6602, *jennifer.meyers@nih.gov*.

(Catalogue of Federal Domestic Assistance Program Nos. 93.306, Comparative Medicine; 93.333, Clinical Research, 93.306, 93.333, 93.337, 93.393–93.396, 93.837–93.844, 93.846–93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: November 20, 2025.

Bruce A. George,

Program Analyst, Office of Federal Advisory Committee Policy.

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Member Conflict Health Services and Systems.

Date: January 16, 2026.

Time: 9:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Address: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892.

Meeting Format: Virtual Meeting.

Contact Person: Shareen Iqbal, Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892, 555–555–5555, *shareen.iqbal@nih.gov.*

National Institute of General Medical Sciences; Notice of Partially Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Advisory Mental Health Council.

The meeting will be held as a virtual meeting and open to the public, as indicated below. Individuals who plan to view the virtual meeting and need special assistance, such as sign language interpretation or other reasonable accommodations, should submit a request using the following link: *https://www.nigms.nih.gov/Pages/ContactUs.aspx* at least 5 days prior to the event. The open session will also be videocast, closed captioned, and can be accessed from the NIH Videocasting and Podcasting website (*http://videocast.nih.gov*).

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory General Medical Sciences Council.

Date: February 5, 2026.

Open: 9:30 a.m. to 12:00 p.m.

Agenda: For the discussion of programs; opening remarks; report of the Director, NIGMS; and other business of the NAGMSC.

Closed: 1:00 p.m. to 4:30 p.m.

Agenda: To review and evaluate grant applications.

Meeting Format: Virtual Meeting.

Address: National Institutes of Health, Natcher Building, 45 Center Drive, Bethesda, MD 20892.

Contact Person: Ariel Zane, Ph.D., Acting Director, Division of Extramural Activities, National Institute of General Medical Sciences, National Institutes of Health, Natcher Building, Room 2AN24C, Bethesda, MD 20892, 301–594–3584, *ariel.zane@nih.gov.*

Registration is not required to attend the open portion of this meeting.

Any interested person may file written comments with the committee by forwarding the statement to *NIGMS_DEA_Mailbox@nigms.nih.gov* at least 3 days in advance of the meeting. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: *https://www.nigms.nih.gov/about/council/Pages/default,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS–2025–0349]

Establishment of the White House Task Force World Cup 2026 Commission

AGENCY: Office of the Secretary, Department of Homeland Security.

ACTION: Notice of the establishment of the White House Task Force World Cup 2026 Commission.

SUMMARY: The Department of Homeland Security, through the Office of Partnership and Engagement, is establishing the White House Task Force World Cup 2026 Commission. The Commission is an advisory body made of representatives from the private sector that provide information, advice, and recommendations to the Executive Director of the White House Task Force on the FIFA World Cup 2026 (''Task Force''). The Commission's advice and recommendations are to be specific, actionable, timely, strategic, and

targeted to the Task Force's role in coordination with executive departments and agencies (agencies), and the private sector, to assist in showcasing the Nation's pride and hospitality while promoting economic growth, safety and security, and tourism through the events surrounding the 2026 FIFA World Cup. The Commission is housed in the Department of Homeland Security, which shall provide funding and administrative support for the Commission. This Notice is not a solicitation for membership.

FOR FURTHER INFORMATION CONTACT: Michelle Nordman, Director of Operations, White House Task Force, FIFA World Cup 2026, U.S. Department of Homeland Security at *WorldCupCommission@hq.dhsgov* (202) 357–1232.

SUPPLEMENTARY INFORMATION: The Secretary is establishing the Board pursuant to section 871(a) of the *Homeland Security Act of 2002.* In recognition of the sensitive nature of the subject matter involved regarding the assessment and mitigation of security and operational risks through whole-of-government coordination, and strong partnership with the private sector that is required to conduct a large-scale international sports event in the United States, the Secretary hereby exempts the Commission from The Federal Advisory Committee Act, 5 U.S.C. Ch. 10, in accordance with 6 U.S.C. 451(a).

The Commission is an advisory body made of Commissioners that provide information, advice, and recommendations to the White House Task Force on the FIFA World Cup 2026 (''Task Force'') through the Executive Director of the Task Force. The Commission's advice and recommendations are to be specific, actionable, timely, strategic, and targeted to the Task Force's role in coordination with executive departments and agencies (agencies), and the private sector, to assist in showcasing the Nation's pride and hospitality while promoting economic growth, safety and security, and tourism through the events surrounding the 2026 FIFA World Cup. The Commission is housed in the Department of Homeland Security, which shall provide funding and administrative support for the Commission.

The duties of the Commission are solely advisory in nature and shall extend only to the submission of advice, recommendations, and reports to the Task Force, through the Executive Director.

Membership: The Commission shall be composed of Commissioners who are appointed by the Executive Director to represent the vital sectors of private industry who are engaged in showcasing the Nation's pride and hospitality while promoting economic growth, safety and security, and tourism through the FIFA World Cup 2026. The Executive Director of the Task Force will appoint a Chair and Vice Chair of the Commission from among the Commissioners.

The Commission Members serve for the duration of the Commission. Vacancies are filled as soon as highly qualified candidates in a needed area of expertise, sector, or perspective are identified and available to serve. In the event the Commission's charter terminates, all appointments to the Commission shall terminate.

Commissioners are appointed to provide the views and perspectives of specific interests and will serve as Representatives. Commissioners shall not serve as Special Government Employees as defined in 18 U.S.C. 202(a).

The Executive Director of the Task Force may appoint, as deemed necessary, non-voting subject matter experts (SMEs) to assist the Commission or its subcommittees on an ad hoc basis. These non-voting SMEs are not members of the Commission or its subcommittees and will not engage or participate in any deliberations by the Commission or its subcommittees. These non-voting SMEs, if not full-time or permanent part-time Federal officers or employees, will be appointed pursuant to 5 U.S.C. 3109 on an intermittent basis to address specific issues under consideration by the Commission.

Commissioners will serve without additional compensation. Travel expenses will be allowed, including per diem in lieu of subsistence, as authorized by law for persons serving intermittently in the Government service (5 U.S.C. 5701–5707), consistent with the availability of funds.

Subcommittees: At the request of the Executive Director of the Task Force, the Designated Federal Officer may establish subcommittees for any purpose consistent with the Charter. Subcommittees may be composed of Commissioners, non-Commissioners, and regular government employees, at the discretion of the Executive Director of the Task Force.

Duration: The Commission shall terminate on December 26, 2026.

Michael J. Miron,

Committee Management Officer, Department of Homeland Security.

[FR Doc. 2025–20961 Filed 11–24–25; 8:45 am]

BILLING CODE 9112–FN–P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

Determination Pursuant to Section 102 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, as Amended

AGENCY: Office of the Secretary, Department of Homeland Security.

ACTION: Notice of determination.

SUMMARY: The Secretary of Homeland Security has determined, pursuant to law, that it is necessary to waive certain laws, regulations, and other legal requirements in order to ensure the expeditious construction of barriers and roads in the vicinity of the international land border in the state of Texas.

DATES: This determination takes effect on November 25, 2025.

SUPPLEMENTARY INFORMATION: Important mission requirements of the Department of Homeland Security (''DHS'') include border security and the detection and prevention of illegal entry into the United States. Border security is critical to the nation's national security. Recognizing the critical importance of border security, Congress has mandated DHS to achieve and maintain operational control of the international land border. Secure Fence Act of 2006, Public Law 109–367, section 2, 120 Stat. 2638 (Oct. 26, 2006) (8 U.S.C. 1701 note). Congress defined ''operational control'' as the prevention of all unlawful entries into the United States, including entries by terrorists, other unlawful aliens, instruments of terrorism, narcotics, and other contraband. *Id.* Consistent with that mandate, the President's Executive Order on Securing Our Borders directs that I take all appropriate action to deploy and construct physical barriers to ensure complete operational control of the southern border of the United States. Executive Order 14165, section 3 (Jan. 20, 2025).

Congress has provided to the Secretary of Homeland Security a number of authorities necessary to carry out DHS's border security mission. One of those authorities is found at section 102 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, as amended (''IIRIRA''). Public Law 104–208, Div. C, 110 Stat. 3009–546, 3009–554 (Sept. 30, 1996) (8 U.S.C 1103 note), as amended by the REAL ID Act of 2005, Public Law 109–13, Div. B, 119 Stat. 231, 302, 306 (May 11, 2005) (8 U.S.C. 1103 note), as amended by the Secure Fence Act of 2006, Public Law 109–367, section 3, 120 Stat. 2638 (Oct.

26, 2006) (8 U.S.C. 1103 note), as amended by the Department of Homeland Security Appropriations Act, 2008, Public Law 110–161, Div. E, Title V, section 564, 121 Stat. 2090 (Dec. 26, 2007). In section 102(a) of IIRIRA, Congress provided that the Secretary of Homeland Security shall take such actions as may be necessary to install additional physical barriers and roads (including the removal of obstacles to detection of illegal entrants) in the vicinity of the United States border to deter illegal crossings in areas of high illegal entry into the United States. In section 102(b) of IIRIRA, Congress mandated that in carrying out the authority of section 102(a), I provide for the installation of additional fencing, barriers, roads, lighting, cameras, and sensors to achieve and maintain operational control of the border. Finally, in section 102(c) of IIRIRA, Congress granted to the Secretary of Homeland Security the authority to waive all legal requirements that I, in my sole discretion, determine necessary to ensure the expeditious construction of barriers and roads authorized by section 102 of IIRIRA.

Determination and Waiver

Section 1

The United States Border Patrol El Paso Sector is an area of high illegal entry. Between fiscal year 2021 and July 2025, Border Patrol apprehended over 1,229,400 illegal aliens attempting to enter the United States between border crossings in the El Paso Sector. In that same time period Border Patrol seized over 14,468 pounds of marijuana, over 1,347 pounds of cocaine, over 42 pounds of heroin, over 3,086 pounds of methamphetamine, and over 254 pounds of fentanyl.

Since the President took office, DHS has delivered the most secure border in history. More can and must be done, however. As the statistics cited above demonstrate, the El Paso Sector is an area of high illegal entry where illegal aliens regularly attempt to enter the United States and smuggle illicit drugs, and given my mandate to achieve and maintain operational control of the border, I must use my authority under section 102 of IIRIRA to install additional barriers and roads in the El Paso Sector. Therefore, DHS will take immediate action to construct additional barriers and roads in a segment of the border in the El Paso Sector. The segment where such construction will occur is referred to herein as the ''project area,'' which is more specifically described in Section 2 below.

Section 2

I determine that the following area in the vicinity of the United States border, located in the State of Texas within the U. S. Border Patrol El Paso Sector, is an area of high illegal entry (the ''project area''): Starting at approximately the Texas-New Mexico State Line and extending south and east along the Rio Grande River to approximately GPS point 31.03, −105.57.

There is presently an acute and immediate need to construct additional physical barriers and roads in the vicinity of the border of the United States in order to prevent unlawful entries into the United States in the project area pursuant to section 102(a) and 102(b) of IIRIRA. In order to ensure the expeditious construction of additional physical barriers and roads in the project area, I have determined that it is necessary that I exercise the authority that is vested in me by section 102(c) of IIRIRA.

Accordingly, pursuant to section 102(c) of IIRIRA, I hereby waive in their entirety, with respect to the construction of physical barriers and roads (including, but not limited to, accessing the project areas, creating and using staging areas, the conduct of earthwork, excavation, fill, and site preparation, and installation and upkeep of physical barriers, roads, supporting elements, drainage, erosion controls, safety features, lighting, cameras, and sensors) in the project area, all of the following statutes, including all federal, state, or other laws, regulations, and legal requirements of, deriving from, or related to the subject of, the following statutes, as amended: The National Environmental Policy Act (Pub. L. 91–190, 83 Stat. 852 (Jan. 1, 1970) (42 U.S.C. 4321 *et seq.*)); the Endangered Species Act (Pub. L. 93–205, 87 Stat. 884 (Dec. 28, 1973) (16 U.S.C. 1531 *et seq.*)); the Federal Water Pollution Control Act (commonly referred to as the Clean Water Act (33 U.S.C. 1251 *et seq.*)); the National Historic Preservation Act (Pub. L. 89–665, 80 Stat. 915 (Oct. 15, 1966), as amended, repealed, or replaced by Pub. L. 113–287 (Dec. 19, 2014) (formerly codified at 16 U.S.C. 470 *et seq.,* now codified at 54 U.S.C. 100101 note and 54 U.S.C. 300101 *et seq.*)); the Migratory Bird Treaty Act (16 U.S.C. 703 *et seq.*); the Migratory Bird Conservation Act (16 U.S.C. 715 *et seq.*); the Clean Air Act (42 U.S.C. 7401 *et seq.*); the Archeological Resources Protection Act (Pub. L. 96–95 (16 U.S.C. 470aa *et seq.*)); the Paleontological Resources Preservation Act (16 U.S.C. 470aaa *et seq.*); the Federal Cave Resources Protection Act of 1988 (16 U.S.C. 4301 *et seq.*); the National Trails System Act (16 U.S.C. 1241 *et seq.*); the Safe Drinking Water Act (42 U.S.C. 300f *et seq.*); the Noise Control Act (42 U.S.C. 4901 *et seq.*); the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act (42 U.S.C. 6901 *et seq.*); the Comprehensive Environmental Response, Compensation, and Liability Act (42 U.S.C. 9601 *et seq.*); the Archaeological and Historic Preservation Act (Pub. L. 86–523, as amended, repealed, or replaced by Pub. L. 113–287 (Dec. 19, 2014) (formerly codified at 16 U.S.C. 469 *et seq.,* now codified at 54 U.S.C. 312502 *et seq.*)); the Antiquities Act (formerly codified at 16 U.S.C. 431 *et seq.* and 16 U.S.C. 431a *et seq.,* now codified 54 U.S.C. 320301 *et seq.*); the Historic Sites, Buildings, and Antiquities Act (formerly codified at 16 U.S.C. 461 *et seq.,* now codified at 54 U.S.C. 320301–320303 & 320101–320106); the Eagle Protection Act (16 U.S.C. 668 *et seq.*); the Native American Graves Protection and Repatriation Act (25 U.S.C. 3001 *et seq.*); the Administrative Procedure Act (5 U.S.C. 551 *et seq.*); Section 438 of the Energy Independence and Security Act (42 U.S.C. 17094); the National Fish and Wildlife Act of 1956 (Pub. L. 84–1024 (16 U.S.C. 742a, *et seq.*)); the Fish and Wildlife Coordination Act (Pub. L. 73–121 (16 U.S.C. 661 *et seq.*)); the Farmland Protection Policy Act (7 U.S.C. 4201 *et seq.*); the Federal Land Policy and Management Act (Pub L. 94–579 (43 U.S.C. 1701 *et seq.*)); the Wild Horse and Burro Act (16 U.S.C. 1331 *et seq.*); 43 U.S.C. 387; and the Wild and Scenic Rivers Act (Pub. L. 90–542 (16 U.S.C. 1281 *et seq.*).

This waiver does not revoke or supersede any other waiver determination made pursuant to section 102(c) of IIRIRA. Such waivers shall remain in full force and effect in accordance with their terms. I reserve the authority to execute further waivers from time to time as I may determine to be necessary under section 102 of IIRIRA.

Kristi Noem,

Secretary of Homeland Security.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Immigration and Customs Enforcement

[OMB Control Number 1653–0037]

Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: Form No. I–515A; Notice to Student or Exchange Visitor

AGENCY: U.S. Immigration and Customs Enforcement, Department of Homeland Security.

ACTION: 30-Day notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995 the Department of Homeland Security (DHS), U.S. Immigration and Customs Enforcement (ICE) will submit the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance. This information collection was previously published in the **Federal Register** on September 3, 2025, allowing for a 60-day comment period. ICE received no comments. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until December 26, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of the publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: If you have questions related to this collection, call or email Sharon Snyder, Student and Exchange Visitor Program (SEVP), 703–603–3400 or 1–800–892–4829, email: *sevp@ice.dhs.gov.*

SUPPLEMENTARY INFORMATION:

Comments

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Notice to Student or Exchange Visitor.

(3) *Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection:* I–515A; U.S. Immigration and Customs Enforcement.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals or Households. When an academic student (F–1), vocational student (M–1), exchange visitor (J–1), or dependent (F–2, M–2 or J–2) is admitted to the United States as a nonimmigrant alien under section 101(a)(15) of the Immigration and Nationality Act, he or she is required to have certain documentation. If the student or exchange visitor or dependent is missing documentation, he or she is provided with the Form I–515A, ''Notice to Student or Exchange Visitor.'' The Form I–515A provides a list of the documentation the student or exchange visitor or dependent will need to provide to the Department of Homeland Security (DHS), Student and Exchange Visitor Program (SEVP) office within 30 days of admission.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 1,200 respondents at 25 minutes (.416 hours) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 500 annual burden hours.

DEPARTMENT OF HOMELAND SECURITY

U.S. Immigration and Customs Enforcement

[OMB Control Number 1653–0038]

Agency Information Collection Activities; Revision of a Currently Approved Collection: Student and Exchange Visitor Information System (SEVIS)

AGENCY: U.S. Immigration and Customs Enforcement, Department of Homeland Security.

ACTION: 30-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Immigration and Customs Enforcement (ICE) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. This information collection was previously published in the **Federal Register** on September 3, 2025, allowing for a 60-day comment period. ICE received 108 substantive comments. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until December 26, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of the publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: If you have questions related to this collection, call or email Sharon Snyder, Student and Exchange Visitor Program, 703–603–3400 or 1–800–892–4829, email: *sevp@ice.dhs.gov.*

SUPPLEMENTARY INFORMATION:

Comments

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the

proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Student and Exchange Visitor Information System (SEVIS).

(3) Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection: I–17 and I–20; U.S. Immigration and Customs Enforcement.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Nonprofit institutions and individuals or households. SEVIS is an internet-based data entry, collection, and reporting system. It collects information on SEVP-certified schools via the Form I–17, ''Petition for Approval of School for Attendance by Nonimmigrant Student,'' and collects information on the F and M nonimmigrant students that the SEVP-certified schools admit into their programs of study via the Form I–20, ''Certificate of Eligibility for Nonimmigrant (F–1) Student Status—For Academic and Language Students'' and ''Certificate of Eligibility for Nonimmigrant (M–1) Student Status—For Vocational Students.''

The Form I–17 will be revised to collect previous school codes associated with the school and/or owner, school website links, emergency contact information for the school, and additional information on school ownership, as well as to remove the fax number field, which is now obsolete. SEVP will be redesigning the ''Program of Study'' page on the Form I–17 to better capture the educational level, degree, program of study, time necessary to complete the program, assigned Classification of Instructional Programs (CIP) code, and mode of instruction. In addition, SEVP will require schools to indicate whether a program of study is conducted predominantly online or in a hybrid or low residency format and whether Curricular Practical Training is a component of a program of study. Other updates to the Form I–17 will allow designated school officials (DSOs) to select ''weeks'' as an academic term length, require DSOs to provide separate numbers for domestic and international students when listing the ''Average Annual Number of Students,'' allow DSOs to list annual costs by program of study or degree level, allow DSOs to provide additional contact information, require DSOs to indicate whether they work full-time or part-time, and change a DSO's ''Title'' to ''Job Title,'' to better collect information on their position at the school.

The Form I–20 will be revised to collect contact and other information on legal guardians of minor F and M students, the date of students' graduation/degree awarded, and clarifying details on the source and type of the financial support for F and M students, as well as information to indicate whether a student is engaging in online education or on-campus employment. Information will also be collected on whether a student's employment or training is being conducted at an on-site location or remotely.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 20,890 responses.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual burden associated with this collection of information in hours is 815,505 hours. There is an additional one-time burden in the first year of this collection of 6,778 hours.

Dated: November 21, 2025.

Termination of the Designation of Burma (Myanmar) for Temporary Protected Status

AGENCY: U.S. Citizenship and Immigration Services (USCIS), Department of Homeland Security (DHS).

ACTION: Notice.

SUMMARY: Through this notice, the Department of Homeland Security (DHS) announces that the Secretary of Homeland Security (Secretary) is terminating the designation of Burma (Myanmar) for Temporary Protected Status. The designation of Burma is set to expire on November 25, 2025. After reviewing country conditions and consulting with appropriate U.S. Government agencies, the Secretary determined that Burma no longer continues to meet the conditions for designation for Temporary Protected Status. The Secretary, therefore, is terminating the Temporary Protected Status designation of Burma as required by statute. This termination is effective January 26, 2026. After January 26, 2026, nationals of Burma (and aliens having no nationality who last habitually resided in Burma) who have been granted Temporary Protected Status under Burma's designation will no longer have Temporary Protected Status.

DATES: The designation of Burma for Temporary Protected Status is terminated, effective at 11:59 p.m., local time, on January 26, 2026.

FOR FURTHER INFORMATION CONTACT: Humanitarian Affairs Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, (240) 721–3000.

What is Temporary Protected Status?

The Immigration and Nationality Act (INA) authorizes the Secretary of Homeland Security, after consultation with appropriate agencies of the U.S. Government, to designate a foreign state (or part thereof) for Temporary Protected Status (TPS) if the Secretary determines that certain country conditions exist. *See* INA sec. 244(b)(1), 8 U.S.C. 1254a(b)(1). The Secretary, in her discretion, may grant Temporary Protected Status to eligible nationals of

that foreign state (or aliens having no nationality who last habitually resided in the designated foreign state). *See* INA sec. 244(a)(1)(A), 8 U.S.C. 1254a(a)(1)(A).

At least 60 days before the expiration of a foreign state's Temporary Protected Status designation or extension, the Secretary—after consultation with appropriate U.S. Government agencies—must review the conditions in the foreign state designated for Temporary Protected Status to determine whether the conditions for the Temporary Protected Status designation continue to be met. *See* INA sec. 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that the conditions in the foreign state continue to meet the specific statutory criteria for Temporary Protected Status designation, Temporary Protected Status will be extended for an additional period of 6 months or, in the Secretary's discretion, 12 or 18 months. *See* INA sec. 244(b)(3)(A), (C), 8 U.S.C. 1254a(b)(3)(A), (C). If the Secretary determines that the foreign state no longer meets the conditions for Temporary Protected Status designation, the Secretary must terminate the designation. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B). There is no judicial review of ''any determination of the [Secretary] with respect to the designation, or termination or extension of a designation of a foreign state'' for Temporary Protected Status. *See* INA sec. 244(b)(5)(A), 8 U.S.C. 1254a(b)(5)(A).

Temporary Protected Status is a temporary immigration benefit granted to eligible nationals of a country designated for Temporary Protected Status under the Immigration and Nationality Act, or to eligible aliens without nationality who last habitually resided in the designated country. During the designation period, Temporary Protected Status beneficiaries are eligible to remain in the United States and may not be removed so long as they continue to meet the requirements of Temporary Protected Status. In addition, Temporary Protected Status beneficiaries are authorized to work and obtain an Employment Authorization Document (EAD), if requested. Temporary Protected Status beneficiaries may also apply for and be granted travel authorization as a matter of discretion. The granting of Temporary Protected Status does not result in or lead to lawful permanent resident status or any other immigration status.

To qualify for Temporary Protected Status, beneficiaries must meet the eligibility standards at INA section 244(c)(2), 8 U.S.C. 1254a(c)(2) in accordance with the implementing regulations at 8 CFR parts 244 and 1244. When the Secretary terminates a country's designation, beneficiaries return to the same immigration status or category that they maintained before Temporary Protected Status, if any (unless that status or category has since expired or been terminated), or any other lawfully obtained immigration status or category they received while registered for Temporary Protected Status, as long as it is still valid on the date Temporary Protected Status terminates.

Designation of Burma for Temporary Protected Status

Burma was initially designated for Temporary Protected Status on May 25, 2021, based on extraordinary and temporary conditions.[1] Following the initial designation, former Secretary Mayorkas extended the existing designation and newly designated Burma for Temporary Protected Status in 2022.[2] Most recently, the former Secretary extended Burma's designation and again newly designated Burma for Temporary Protected Status based on extraordinary and temporary conditions from May 26, 2024 to November 25, 2025.[3]

Secretary's Authority To Terminate the Designation of Burma for Temporary Protected Status

At least 60 days before the expiration of a foreign state's Temporary Protected Status designation or extension, the Secretary—after consultation with appropriate U.S. Government agencies—must review the conditions in the foreign state designated for Temporary Protected Status to determine whether the country continues to meet the conditions for the designation. *See* INA sec. 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A). If the Secretary determines that foreign state no longer meets the conditions for the Temporary Protected Status designation, the Secretary must terminate the designation. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B). The termination may not take effect earlier than 60 days after the date the **Federal Register** notice of termination is published, or if later, the expiration of the most recent previous extension of the country designation. *See id.* The Secretary may determine the appropriate effective date of the termination and expiration of any Temporary Protected Status-related documentation, such as Employment Authorization Documents, issued or renewed after the effective date of termination. *See id.; see also* INA sec. 244(d)(3), 8 U.S.C. 1254a(d)(3) (providing the Secretary the discretionary ''option'' to allow for a certain ''orderly transition'' period if she determines it to be appropriate).

Reasons for the Secretary's Termination of the Temporary Protected Status Designation for Burma

Consistent with INA section 244(b)(3)(A), 8 U.S.C. 1254a(b)(3)(A), after consulting with appropriate U.S. Government agencies, the Secretary reviewed country conditions in Burma and considered whether Burma continues to meet the conditions for the designation under INA section 244(b)(1)(C), 8 U.S.C. 1254a(b)(1)(C). This review included examining: (a) whether extraordinary and temporary conditions in Burma that prevent Burmese nationals from returning to Burma in safety continue to exist, and (b) if permitting Burmese nationals to remain temporarily in the United States is contrary to the national interest of the United States.

Burma continues to face humanitarian challenges due in part to continued military operations against armed resistance and the need for humanitarian assistance.[4] There have, however, been improvements in Burma's governance and stability at the national and local levels. On July 31, 2025, Burma's state of emergency officially ended.[5] In line with constitutional requirements, the military government dissolved the State Administration Council, transferred power to the National Defense and Security Council,[6] and announced that free and fair[7] elections will take place

in four phases in December 2025 and January 2026.[8]

Burma's military government has also engaged with ethnic armed organizations on ceasefire negotiations. In January 2025, China successfully brokered a ceasefire between Burma's military government and the Myanmar National Democratic Alliance Army.[9] In addition to this successful ceasefire, China is currently mediating ceasefire talks between Burma's military government and the Ta'ang National Liberation Army.[10] These ceasefires differ from previous short-term humanitarian pauses (such as the one established after the March 2025 earthquake), because they are intended to *permanently end hostilities,* with clear enforcement mechanisms and obligations for both sides.[11]

In parallel with the national political process, armed ethnic groups have established local and ethnic administrations, which have made tangible gains in governance and public services, signaling broader improvements in Burma's stability. These local administrations offer promising possibilities for the future, especially to fill gaps in the areas of education,[12] healthcare,[13] the judicial system,[14] and law enforcement.[15] The end of the state of emergency, a constitutional timeline for elections, a credible permanent ceasefire agreement, and the increased ability of local authorities to deliver public services mark substantial steps toward political stability and national reconciliation. Based on the Department's review, the Secretary has determined that, while certain extraordinary and temporary conditions may remain, such conditions no longer hinder the safe return of aliens who are nationals of Burma to the country. Of particular significance when evaluating the conditions in Burma and the ability of Burmese nationals to safely return, a number of Burmese nationals have requested advance parole documents for travel back to Burma. This bears directly on the question of whether nationals may safely travel there. From May 25, 2021 to July 14, 2025, 26% of advance parole document requests by Burmese nationals were for intended travel to Burma.[16] Additionally, in Fiscal Year (FY) 2025, U.S. Immigration and Customs Enforcement (ICE) effectuated removals to Burma.[17]

In addition, DHS has determined that the termination of the Burma designation is required because it is contrary to the national interest to permit Burmese nationals (or nationals having no nationality who last habitually resided in Burma) to remain temporarily in the United States. In the Temporary Protected Status statute, Congress expressly prohibits the Secretary from designating a country for Temporary Protected Status based on extraordinary and temporary conditions if she finds that ''permitting the aliens to remain temporarily in the United States is contrary to the national interest of the United States.'' INA sec. 244(b)(1)(C), 8 U.S.C. 1254a(b)(1)(C). Accordingly, as the Department and the Attorney General have long recognized, such a ''national interest'' assessment is an essential element of a determination whether to extend or terminate the Burma designation, which was based on ''extraordinary and temporary conditions.'' [18]

''National interest'' is an expansive standard that may encompass an array of considerations, including foreign policy, public safety (*e.g.,* potential nexus to criminal gang membership), national security, migration factors (*e.g.,* pull factors), immigration policy (*e.g.,* enforcement prerogatives), and economic considerations (*e.g.,* adverse effects on U.S. workers, impact on U.S. communities).[19] Determining whether permitting a class of aliens to remain temporarily in the United States is contrary to the U.S. national interest therefore calls upon the Secretary's expertise and discretionary judgment, informed by her consultations with appropriate U.S. Government agencies.

According to the FY 2024 Department of Homeland Security (DHS) Entry/Exit Overstay Report (''Overstay Report''), Burma had a B–1/B–2 visa (nonimmigrant visitor visas for business or tourism) overstay rate of 38.15% and an F, M, and J visa (nonimmigrant visas for foreign students and exchange visitors) overstay rate of 59.13%.[20] The FY 2024 Burmese overstay rates are over fifteen times higher and over seventeen

[20] U.S. Customs and Border Protection, ''Entry/Exit Overstay Report: Fiscal Year 2024 Report to Congress, U.S. Department of Homeland Security,'' (July 16, 2025), *https://www.dhs.gov/sites/default/files/2025-09/25_0912_cbp_entry-exit-overstay-report-fiscal-year-2024.pdf.*

times higher, respectively, than the average visa overstay rates of all countries (2.33% for B–1/B–2 visas and 3.23% for F, M, and J visas).[21] In FY 2023, the Department of Homeland Security (DHS) Entry/Exit Overstay Report (''Overstay Report''), listed Burma as having a B–1/B–2 visa (nonimmigrant visitor visas for business or tourism) overstay rate of 27.07% and an F, M, and J visa (nonimmigrant visas for foreign students and exchange visitors) overstay rate of 42.17%.[22] In FY23, the Burmese overstay rates were over eight times higher and over eleven times higher, respectively, than the average visa overstay rates of all countries (3.20% for B–1/B–2 visas and 3.67% for F, M, and J visas).[23] Thus, from FY23 to FY24, the rate of Burmese overstays increased. All visa overstays, regardless of the alien's country of citizenship or nationality, are contrary to the national interest. In the Presidential Proclamation ''Restricting the Entry of Foreign Nationals To Protect the United States From Foreign Terrorists and Other National Security and Public Safety Threats,'' President Trump imposed a full suspension on the admission of Burmese nationals along with nationals from 11 other countries, upon country identification by the Secretary of State and after accounting for the United States' foreign policy, national security, and counterterrorism objectives.[24] For Burma, reasons included ''deficien[cy] with regards to screening and vetting'' [25] and their rate of overstays, ''which increases burdens on immigration and law enforcement components of the United States, and often exacerbates other risks related to national security and public safety.'' [26] An extension of Burma's designation for Temporary Protected Status would be in conflict with the President's directive of fully restricting the entry of Burmese nationals, and would be contrary to the national interest as the Secretary of State identified Burma as a country deficient in screening and vetting as well as a country that has taken advantage of the United States in the exploitation of our visa system.

Further exacerbating risks to U.S. national security and public safety, DHS records indicate a share of the Burma Temporary Protected Status population has been under administrative investigation for risk to national security and/or public safety, or for attempting to obtain immigration benefits through fraud or misrepresentation.

While some extraordinary and temporary conditions may exist, the Secretary has determined that, for the foregoing reasons of national security, public safety, foreign policy, and immigration integrity, permitting Burmese nationals to remain temporarily in the United States is contrary to the U.S. national interest.

DHS estimates that there are 3,969 current approved beneficiaries under the designation of Burma for Temporary Protected Status. As of November 10, 2025, there are 236 total pending applications for the designation of Burma for Temporary Protected Status.[27]

Effective Date of Termination of the Designation

The Temporary Protected Status statute provides that the termination of a country's Temporary Protected Status designation may not be effective earlier than 60 days after the notice is published in the **Federal Register** or, if later, the expiration of the most-recent previous extension. *See* INA sec. 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B).

The Temporary Protected Status statute authorizes the Secretary, at her discretion, to allow for an extended ''orderly transition'' period with respect to the termination and the expiration of any Temporary Protected Status-related documentation, such as Employment Authorization Documents. The Secretary has determined in her discretion that a 60-day transition period is sufficient and warranted here given the Secretary's finding that continuing to permit the Burmese nationals to remain temporarily in the United States is contrary to the U.S. national interest. *See* INA sec. 244(d)(3), 8 U.S.C. 1254a(d)(3).[28] Accordingly, the termination of the Burma Temporary Protected Status designation will be effective 60 days from this notice's publication date.[29]

DHS recognizes that Burmese Temporary Protected Status beneficiaries continue to be authorized to work during the 60-day transition period.[30] Accordingly, through this **Federal Register** notice, DHS automatically extends the validity of certain Employment Authorization Documents previously issued under the Temporary Protected Status designation of Burma through January 26, 2026. Therefore, as proof of continued employment authorization through January 26, 2026, Temporary Protected Status beneficiaries can show their Employment Authorization Documents that have the notation A–12 or C–19 under Category and a ''Card Expires'' date of November 25, 2025, May 25, 2024, or November 25, 2022.

The Secretary has considered putative reliance interests in the Burma Temporary Protected Status designation, especially when considering whether to allow for an additional transition period akin to that allowed under certain previous Temporary Protected Status terminations. Temporary Protected Status, as the name itself makes clear, is an inherently temporary status. Temporary Protected Status designations are time-limited and must be periodically reviewed, and Temporary Protected Status notices clearly notify aliens of the designations' expiration dates, and whether to allow for an orderly transition period is left to the Secretary's unfettered discretion. *See* INA sec. 244(b)(3), (d)(3); 8 U.S.C. 1254a(b)(3), (d)(3). The statute inherently contemplates advance notice of a termination by requiring timely publication of the Secretary's

[26] *Id.*

[27] Estimates as of November 10, 2025.

[28] Whether to allow for an additional ''orderly departure'' period following a Temporary Protected Status designation termination (beyond the statutory minimum of 60 days) is an ''option'' left to the Secretary's unfettered discretion. INA 244(d)(3), 8 U.S.C. 1254a(d)(3). Although DHS has allowed such extended periods for certain Temporary Protected Status terminations, *see, e.g., Termination of the Designation of Sudan for Temporary Protected Status,* 82 FR 47228 (Oct. 11, 2017) (12-month orderly transition period); *Termination of the Designation of Sierra Leone Under the Temporary Protected Status Program; Extension of Employment Authorization Documentation,* 68 FR 52407 (Sept. 3, 2003) (6-month orderly transition period), certain other Temporary Protected Status designations were terminated without allowing for an extended transition periods, *see, e.g., Termination of Designation of Angola Under the Temporary Protected Status Program,* 68 FR 3896 (Jan. 27, 2003) (no orderly transition period); *Termination of Designation of Lebanon Under Temporary Protected Status Program,* 58 FR 7582 (Feb. 8, 1993) (same).

[29] *See* 8 CFR 244.19 (''Upon the termination of designation of a foreign state, those nationals afforded temporary Protected Status shall, upon the sixtieth (60th) day after the date notice of termination is published in the **Federal Register**, or on the last day of the most recent extension of designation by the [Secretary of Homeland Security], automatically and without further notice or right of appeal, lose Temporary Protected Status in the United States. Such termination of a foreign state's designation is not subject to appeal.'').

[30] *See* INA 244(a)(1)(B), 8 U.S.C. 1254a(a)(1)(B); *see also* 8 CFR 244.13(b).

determination and delaying the effective date of the termination by at least 60 days after publication of a **Federal Register** notice of the termination or, if later, the existing expiration date. *See* INA sec. 244(b)(3), (d)(3); 8 U.S.C. 1254a(b)(3), (d)(3).

Notice of the Termination of the Temporary Protected Status Designation of Burma

By the authority vested in me as Secretary under INA section 244(b)(3), 8 U.S.C. 1254a(b)(3), in consultation with the appropriate U.S. Government agencies, I have reviewed conditions in Burma and determined whether the conditions for Burma's designation for Temporary Protected Status continue to be met, specifically (a) whether extraordinary and temporary conditions in Burma prevent its nationals from returning in safety; and (b) whether permitting the nationals of Burma (and aliens having no nationality who last habitually resided in Burma) to remain temporarily in the United States is contrary to the national interest of the United States. Based on my review, I have determined that Burma no longer continues to meet the conditions for Temporary Protected Status under INA section 244(b)(1)(C), 8 U.S.C. 1254a(b)(1)(C).

Accordingly, I order as follows:

(1) Pursuant to INA section 244(b)(3)(B), 8 U.S.C. 1254a(b)(3)(B), and considering INA section 244(d)(3), 8 U.S.C. 1254a(d)(3), the designation of Burma for Temporary Protected Status is terminated effective at 11:59 p.m., local time, on January 26, 2026.

(2) Information concerning the termination of Temporary Protected Status for nationals of Burma (and aliens having no nationality who last habitually resided in Burma) will be available at local USCIS offices upon publication of this notice and through the USCIS Contact Center at 1–800–375–5283. This information will be published on the USCIS website at *www.uscis.gov.*

Kristi Noem,

Secretary of Homeland Security.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R8–ES–2024–0184; FXES11140800000–256–FF08ESMF00]

Draft Habitat Conservation Plan and Draft Categorical Exclusion; California Department of Water Resources Sutter and Sacramento Maintenance Yards Habitat Conservation Plan for Eight Elderberry Management Zones

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for public comment.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce receipt of an application from the California Department of Water Resources (applicant) for an incidental take permit (ITP) under the Endangered Species Act (ESA). The applicant requests the ITP to take the federally threatened valley elderberry longhorn beetle (*Desmocerus californicus dimorphus*; beetle) incidental to vegetation maintenance activities along State-maintained levees in portions of seven California counties. We request public comment on the application, which includes the applicant's proposed habitat conservation plan (HCP), and on the Service's preliminary determination that the proposed permitting action may be eligible for a categorical exclusion pursuant to National Environmental Policy Act (NEPA), the Department of the Interior's (DOI) NEPA regulations, and the DOI Departmental Manual (DM). To make this preliminary determination, we prepared a joint draft environmental action statement and low-effect screening form, both of which are available for public review. We invite comment from the public and local, State, Tribal, and Federal agencies.

DATES: We must receive your written comments on or before December 26, 2025.

ADDRESSES:

Obtaining Documents: The documents this notice announces, as well as any comments and other materials that we receive, will be available for public inspection online at *https://www.regulations.gov* in Docket No. FWS–R8–ES–2024–0184.

Submitting Comments: If you wish to submit comments on any of the documents, you may do so in writing by any of the following methods:

- *Online:* Submit comments on Docket No. FWS–R8–ES–2024–0184 at *https://www.regulations.gov*.
- *U.S. Mail:* Public Comments Processing, Attn: Docket No. FWS–R8–ES–2024–0184; U.S. Fish and Wildlife Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike; Falls Church, VA 22041–3803.

FOR FURTHER INFORMATION CONTACT: Wendy Pearson, Senior Wildlife Biologist, Sacramento Fish and Wildlife Office, by email at *wendy_pearson@fws.gov* or by telephone at 916–414–6675. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce receipt of an application from the California Department of Water Resources (applicant) for a 5-year ITP under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). In support of the application, the applicant prepared a draft HCP pursuant to section 10(a)(1)(B) of the ESA. The HCP covers elderberry shrub (*Sambucus* spp.) trimming and removal that will result in the incidental take of the valley elderberry longhorn beetle (*Desmocerus californicus dimorphus*; beetle) and its habitat along portions of State-maintained levees.

The Service prepared a draft categorical exclusion screening form consistent with NEPA (42 U.S.C. 4321 *et seq.*), the DOI's NEPA regulations (43 CFR part 46), and the DOI's Departmental Manual (516 DM 8.5(C)(2)). The purpose of the screening form is to confirm that, pursuant to agency NEPA procedures, the agency action is within a category of actions previously determined not to normally have significant effects on the natural and human environment and thus not requiring further NEPA evaluation. The screening form is also used to verify that there are no extraordinary circumstances that indicate an otherwise excluded action may warrant further NEPA evaluation.

Background Information

Section 9 of the ESA prohibits the taking of fish and wildlife species listed as endangered or threatened under section 4 of the ESA. Under section 10(a)(1)(B) of the ESA (16 U.S.C. 1539(a)(1)(B)), the Service may issue permits to authorize take of listed fish and wildlife species that is incidental to, and not the purpose of, carrying out

an otherwise lawful activity. Regulations governing permits for endangered and threatened species are at 50 CFR 17.22 and 17.32, respectively. For more about the Federal habitat conservation plan program, go to *https://www.fws.gov/service/habitat-conservation-plans*.

Proposed Action

The proposed action is the Service's issuance of an ITP for a period of 5 years for the beetle, the only species covered by the plan. The ITP is requested to cover ongoing routine vegetation management along specific levees maintained by the applicant to support levee structural integrity, visibility, and accessibility for inspections, maintenance, and flood-fighting operations. Vegetation management along these areas often requires the removal or trimming of elderberry shrubs, which are the sole host plant for the beetle. The plan includes three covered activities: trimming or removing select elderberry shrubs, transplanting removed elderberry shrubs, and trimming adjacent riparian vegetation needed to access the elderberry shrubs. The plan also includes a conservation strategy to avoid, minimize, and mitigate effects to the beetle from the proposed activities. Avoidance and minimization measures for the beetle will reduce effects to the species, and the applicant will mitigate for the remaining unavoidable effects. Covered activities will occur in portions of the following seven California counties: Butte, Colusa, Glenn, Sacramento, Solano, Sutter, and Yolo. The total plan area is approximately 3,162 acres of levees in eight areas along the Sacramento River, Butte Creek, Cache Creek, Putah Creek, and the Yolo Bypass.

Public Comments

We request data, comments, new information, or suggestions from the public, other concerned governmental agencies, the scientific community, Tribes, industry, or any other interested party. We particularly seek comments on the following:

1. Biological information concerning the species;
2. Relevant data concerning the species;
3. Additional information concerning the range, distribution, population size, and population trends of the species;
4. Current or planned activities in the subject area and their possible impacts on the species;
5. The presence of archeological sites, buildings and structures, historic events, sacred and traditional areas, and other historic preservation concerns, which are required to be considered in project planning by the National Historic Preservation Act; and
6. Any other environmental issues that should be considered with regard to the proposed development and permit action.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment, including your personal identifying information, may be made available to the public. If you submit a comment at *https://www.regulations.gov,* your entire comment, including any personal identifying information, will be posted on the website. If you submit a hardcopy comment that includes personal identifying information, such as your address, phone number, or email address, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Our Preliminary Determination

The Service has made a preliminary determination that the applicant's proposed project would individually and cumulatively have a minor effect on the covered species and the human environment. Therefore, we have preliminarily determined that the proposed ESA section 10(a)(1)(B) permit would be a low-effect ITP that individually and cumulatively would have a minor effect on the beetle and may qualify for application of a categorical exclusion pursuant to NEPA, the DOI's NEPA regulations, and the DOI DM. A low-effect ITP is one that would result in (1) minor or nonsignificant effects on species covered in the plan; (2) nonsignificant effects on the human environment; and (3) impacts that, when added together with the impacts of other past, present, and reasonably foreseeable actions, would not result in significant cumulative effects to the human environment.

Next Steps

Issuance of an ITP is a Federal proposed action subject to compliance with NEPA and section 7 of the ESA. We will evaluate the application, associated documents, and any public comments we receive as part of our NEPA compliance process to determine whether the application meets the requirements of section 10(a) of the ESA. If we determine that those requirements are met, we will conduct an intra-Service consultation under section 7 of the ESA for the Federal action for the potential issuance of an ITP. If the intra-Service consultation confirms that issuance of the ITP is not likely to jeopardize the continued existence of any endangered or threatened species, or destroy or adversely modify critical habitat, we will issue a permit to the applicant for the incidental take of the covered species.

Authority

The Service provides this notice under section 10(c) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22 and 50 CFR 17.32), NEPA (42 U.S.C. 4321 *et seq.*) and the DOI's implementing regulations (43 CFR part 46).

Kim Turner-Olah,

Acting Field Supervisor, Sacramento Fish and Wildlife Office.

Endangered and Threatened Wildlife and Plants; Initiation of 5-Year Status Reviews for 66 Southeastern Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of initiation of reviews; request for information.

SUMMARY: We, the U.S. Fish and Wildlife Service, are initiating 5-year status reviews under the Endangered Species Act for 66 animal and plant species. A 5-year review is an assessment of the best scientific and commercial data available at the time of the review to ensure the accuracy of the species' classification as endangered or threatened. We are requesting submission of any such information that has become available since the previous status review for each species.

DATES: To ensure consideration of your information in our reviews, we must receive your comments or information

on or before January 26, 2026. However, we will continue to accept new information about any of the species at any time.

ADDRESSES: For instructions on how to submit information for a species, see table 1 in the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: To request information on specific species, contact the appropriate person in the table in the **SUPPLEMENTARY INFORMATION** section or, for general information, contact Bradly Potter, via phone at 517–643–7965, via email at *bradly_potter@fws.gov,* or via U.S. mail at U.S. Fish and Wildlife Service, 1875 Century Boulevard, Atlanta, GA 30345. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, are initiating 5-year status reviews under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), for 34 animal species and 32 plant species. A 5-year status review is based on the best scientific and commercial data available at the time of the review. Therefore, we are requesting submission of any such information that has become available since the last review for the species, particularly information on the status, threats, and recovery of the species.

Why do we conduct a 5-year review?

Under the ESA, we maintain Lists of Endangered and Threatened Wildlife and Plants (which we collectively refer to as the List) in title 50 of the Code of Federal Regulations (CFR) at 50 CFR 17.11 (for wildlife) and 50 CFR 17.12 (for plants). Section 4(c)(2)(A) of the ESA requires us to review each listed species' status at least once every 5 years. Our regulation at 50 CFR 424.21 requires that we publish a notice in the **Federal Register** announcing that a species is under active review; however, we may review the status of the species at any time based upon a petition or other information available to us. For additional information about 5-year reviews, refer to our fact sheet at *https://www.fws.gov/project/five-year-status-reviews.*

What information do we consider in our review?

A 5-year review considers the best scientific and commercial data that have become available since the current listing determination or most recent status review of each species, such as:

(A) Species biology, including but not limited to population trends, distribution, abundance, demographics, habitat requirements, tolerance thresholds, and genetics;

(B) Habitat conditions, including but not limited to amount, distribution, and suitability;

(C) Conservation measures that have been or are planned to be implemented to benefit the species;

(D) Current threats and trends in relation to the five listing factors (as defined in section 4(a)(1) of the ESA (16 U.S.C. 1533(a)(1)); and

(E) Other new information, data, or corrections, including but not limited to taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

New information will be considered in the 5-year review and ongoing recovery programs for the species.

Which species are under review?

This notice announces 5-year status reviews for the species listed in table 1.

Note: E = endangered; T = threatened.

Request for New Information

To ensure that a species' 5-year review is based on the best available scientific and commercial information, we request new information from all sources. Please use the contact information that is associated with the species for which you are submitting information (see table 1). If you submit information, please support it with documentation such as maps; bibliographic references; methods used to gather and analyze the data; and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

How do I ask questions or provide information?

If you wish to provide information for any species in table 1, please submit your comments and materials to the appropriate contact in the table. You may also direct questions to those contacts. For general information, contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your submission, you should be aware that your entire submission—including your personal identifying information—may be made publicly available at any time. Although you can request that personal information be withheld from public review, we cannot guarantee that we will be able to do so.

Completed and Active Reviews

A list of all completed and currently active 5-year status reviews can be found at *https://ecos.fws.gov/ecp/report/species-five-year-review.*

Authority

This document is published under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Michael Oetker,

Regional Director, Southeast Region, U.S. Fish and Wildlife Service.

BILLING CODE 4333–15–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–780–782 and 731–TA–1767–1769 (Preliminary)]

Van-Type Trailers and Subassemblies From Canada, China, and Mexico; Institution of Antidumping and Countervailing Duty Investigations and Scheduling of Preliminary Phase Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping and countervailing duty investigation Nos. 701–TA–780–782 and 731–TA–1767–1769 (Preliminary) pursuant to the Tariff Act of 1930 to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of van-type trailers and subassemblies from Canada, China, and Mexico, provided for in subheadings 8716.39.00, 8716.90.50, 7308.30.50, 7308.90.95, 7326.90.86, 8708.29.15, and 8708.99.81 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value and alleged to be subsidized by the Governments of Canada, China, and Mexico. Unless the Department of Commerce (''Commerce'') extends the time for initiation, the Commission must reach a preliminary determination in antidumping and countervailing duty investigations in 45 days, or in this case by January 5, 2026. The Commission's views must be transmitted to Commerce within five business days thereafter, or by January 12, 2026.

DATES: November 20, 2025.

FOR FURTHER INFORMATION CONTACT: Peter Stebbins (202–205–2039), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), in response to a petition filed on November 20, 2025, by the American

Trailer Manufacturers Coalition, whose members are Great Dane LLC, Chicago, Illinois, Stoughton Trailers LLC, Stoughton, Wisconsin, and Wabash National Corporation, Lafeyette, Indiana.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

Participation in the investigations and public service list.—Persons (other than petitioners) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping duty and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these investigations available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—The Office of Investigations will hold a staff conference in connection with the preliminary phase of these investigations beginning at 9:30 a.m. on December 11, 2025. Requests to appear at the conference should be emailed to *preliminaryconferences@usitc.gov* (DO NOT FILE ON EDIS) on or before noon on December 9, 2025. Please provide an email address for each conference participant in the email. Information on conference procedures, format, and participation, including guidance for requests to appear as a witness via videoconference, will be available on the Commission's Public Calendar (Calendar (USITC) | United States International Trade Commission). A nonparty who has testimony that may aid the Commission's deliberations may request permission to participate by submitting a short statement.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Written submissions.—As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before 5:15 p.m. on December 16, 2025, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than 4:00 p.m. on December 10, 2025. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information that it submits to the Commission during these investigations may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.

Issued: November 21, 2025.

Sharon Bellamy,

Supervisory Hearings and Information Officer.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

[OMB Number 1121–0309]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Revision of a Previously Approved Collection; Title: International Terrorism Victim Expense Reimbursement Program Application

AGENCY: Civil Division, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Office of Justice Programs, Office for Victims of Crime, Department of Justice (DOJ), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until January 26, 2026.

FOR FURTHER INFORMATION CONTACT: If you have additional comments, especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Victoria Jolicoeuir, U.S. Department of Justice, 999 North Capitol Street NE, Washington DC 20531 at (202) 5983612 or *victoria.jolicoeur@usdoj.gov.*

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;
—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Abstract: Information collection form for individuals applying for compensation under the Radiation Exposure Compensation Act.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection.
2. *The Title of the Form/Collection:* International Terrorism Victim Expense Reimbursement Program (ITVERP) Application.
3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* OMB #1121–0309 DOJ Component: Office of Justice Programs.
4. *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals victims, surviving family members of personal representatives. *Other:* Federal Government. This application will be used to apply for the expense reimbursement by U.S. nationals and U.S. Government employees who are victims of acts of international terrorism that occur (red) outside of the United States. The application will be used to collect necessary information on the expenses incurred by the applicant, as associated with his or her victimization, as well as other pertinent information, and will be used by OVC to make an award determination.
5. *Obligation to Respond:* Voluntary but required to obtain a benefit.
6. *Total Estimated Number of Respondents:* Estimated 51 respondents will complete the certification.
7. *Estimated Time per Respondent:* 120 minutes.
8. *Frequency:* Once.
9. *Total Estimated Annual Time Burden:* 75 hours.
10. *Total Estimated Annual Other Costs Burden:* $0.

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Enterprise Portfolio Management, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: November 21, 2025.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

Agency Information Collection Activities; Proposed eCollection eComments Requested; Revision of a Previously Approved Collection; United States Victim of State Sponsored Terrorism Fund Application

AGENCY: Criminal Division, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Criminal Division, Department of Justice (DOJ), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until January 26, 2026.

FOR FURTHER INFORMATION CONTACT: If you have additional comments, especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact the Special Master, United States Victims of State Sponsored Terrorism Fund, or Jennifer Bickford, Chief, Program Management and Training Unit, Money Laundering, Narcotics and Forfeiture Section, Criminal Division, U.S. Department of Justice, 950 Pennsylvania Avenue NW, Washington, DC 20530, telephone (202) 514–1263.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
—Evaluate whether and, if so, how the quality, utility, and clarity of the information to be collected can be enhanced; and
—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection.
2. *The Title of the Form/Collection:* United States Victims of State Sponsored Terrorism Fund Application.
3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* OMB #1123–0013 DOJ Component: Criminal Division.
4. *Affected public who will be asked or required to respond, as well as a brief abstract:* The USVSST Fund was established to provide compensation to certain individuals who were injured as a result of acts of international terrorism by a state sponsor of terrorism. Under the Justice for United States Victims of State Sponsored Terrorism Act (Act), 34 U.S.C. 20144(c), as amended, an eligible claimant is (1) a U.S. person, as defined in 34 U.S.C. 20144(j)(8), with a final judgment issued by a U.S. district court under state or federal law against a state sponsor of terrorism and arising from an act of international terrorism, for which the foreign state was found not immune under provisions of the Foreign Sovereign Immunities Act, codified at 28 U.S.C. 1605A or 1605(a)(7) (as such section was in effect on January 27, 2008); (2) a U.S. person, as defined in 34 U.S.C. 20144(j)(8), who was taken and held hostage from the United States Embassy in Tehran, Iran, during the period beginning November 4, 1979, and ending January 20, 1981; or the spouse and child of that U.S. person at that time, who is also identified as a

member of the proposed class in case number 1:00–CV–03110 (EGS) of the United States District Court for the District of Columbia; or (3) the personal representative of a deceased individual in either of those two categories.

The information collected from the USVSST Fund's Application Form will be used to determine whether applicants are eligible for compensation from the USVSST Fund, and if so, the amount of compensation to be awarded. The Application Form consists of parts related to eligibility and compensation. The eligibility parts seek the information required by the Act to determine whether a claimant is eligible for payment from the USVSST Fund, including information related to participation in federal lawsuits against a state sponsor of terrorism under the Foreign Sovereign Immunities Act. The compensation parts seek the information required by the Act, as amended, to determine the amount of compensation for which the claimant is eligible. Specifically, the compensation parts seek information regarding the amount of compensatory damages awarded the claimant in a final judgment as well as any payments from sources other than the USVSST Fund, as defined in 34 U.S.C. 20144(j)(6), that the claimant received, is entitled to receive, or is scheduled to receive, as a result of the act of international terrorism by a state sponsor of terrorism. The information collected will also help ensure the USVSST Fund does not provide compensation to individuals who are criminally culpable for an act of international terrorism, in accordance with section 20144(h) of the Act.

5. *Obligation to Respond:* Required to obtain a benefit.

6. *Total Estimated Number of Respondents:* Approximately 2,000.

7. *Estimated Time per Respondent:* 1.0 hours.

8. *Frequency:* Once.

9. *Total Estimated Annual Time Burden:* 2,000 hours.

10. *Total Estimated Annual Other Costs Burden:* $0.

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: November 21, 2025.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–14–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Required Elements of an Unemployment Insurance (UI) Reemployment Services and Eligibility Assessment (RESEA) Grant State Plan

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Employment and Training Administration (ETA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before December 26, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Michael Howell by telephone at 202–693–6782, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: The Department of Labor (Department), Employment and Training Administration (ETA) is submitting this Information Collection Request (ICR) to implement and collect an annual Reemployment Services and Eligibility Assessment (RESEA) state plan as described in Section 306(e) of the Social Security Act (SSA). On February 9, 2018, the President signed the Bipartisan Budget Act of 2018, Public Law 115–123 (BBA), which included amendments to the SSA that create a permanent authorization for the RESEA program. Section 306 of the SSA introduced several new program requirements including the requirement that states must submit an annual state plan to be considered eligible for funding. To be considered eligible for RESEA funding for a Fiscal Year, a state must submit a state plan that outlines how the state intends to conduct a program of reemployment services and eligibility assessments by responding to all the required elements identified in Section 306(e) of the SSA and this ICR. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 13, 2025 (90 FR 20316).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–ETA.

Title of Collection: Required Elements of an Unemployment Insurance (UI) Reemployment Services and Eligibility Assessment (RESEA) Grant State Plan.

OMB Control Number: 1205–0538.

Affected Public: State, Local and Tribal Government.

Total Estimated Number of Respondents: 53.

Total Estimated Number of Responses: 53.

Total Estimated Annual Time Burden: 2,120 hours.

Total Estimated Annual Other Costs Burden: $0.

(Authority: 44 U.S.C. 3507(a)(1)(D))

Michael Howell,

Senior Paperwork Reduction Act Analyst.

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; National Medical Support Notice—Part B

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Employee Benefits Security Administration (EBSA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that the agency receives on or before December 26, 2025.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Michael Howell by telephone at 202–693–6782, or by email at *DOL_PRA_PUBLIC@dol.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to section 401(a) of the CSPIA, the Department of Labor (the Department) and HHS jointly promulgated the National Medical Support Notice Final Rule on December 27, 2000 (65 FR 82128) (NMSN Regulation). The NMSN Regulation simplifies the issuance and processing of medical child support orders; standardizes communication between State agencies, employers, and Plan Administrators; and creates a uniform and streamlined process for enforcement of medical child support to ensure that all eligible children receive the health care coverage to which they are entitled.

The NMSN Regulation, codified at 29 CFR 2590.609–2, includes a model National Medical Support Notice (NMSN) that is comprised of two parts: part A is a notice from the State agency to the employer, entitled: ''Notice to Withhold for Health Care Coverage;'' and part B is a notice from the employer to the Plan Administrator, entitled: ''Medical Support Notice to Plan Administrator.'' Both parts have detailed instructions informing the recipient to whom responses are due depending on varying circumstances. This ICR addresses the Plan Administrator's responsibilities under NMSN Regulation to complete part B of the NMSN, the ''Plan Administrator Response,'' pursuant to the CSPIA and section 609(a)(5)(C) of title I of ERISA.

The ''Plan Administrator Response'' in part B of the NMSN requires the Plan Administrator to provide information verifying whether the child is or will be receiving health care coverage from the group health plan. If enrollment has already occurred or can begin immediately, the Plan Administrator's response in part B serves as notice to the State agency, the participant (parent), the child, their non-participant parent or guardian and the employer that the child is or will begin receiving dependent health care coverage pursuant to the group health plan. When the child is eligible for more than one coverage option, the Administrator must first send the part B response to the State agency so that the agency may choose one option. The Plan Administrator must also use the part B response to notify all of the above-affected persons of any waiting period before enrollment of the child can occur. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on January 6, 2025 (90 FR 671).

Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[NASA Document Number: 25–043; NASA Docket Number: NASA–2025–0234]

Name of Information Collection: Flight Analog Projects (FAP) Crew Selection Questionnaire AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Renewal of information collection.

SUMMARY: NASA, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995 (PRA).

DATES: Comments are due by January 26, 2026.

ADDRESSES: Written comments and recommendations for this information collection should be sent within 60 days of publication of this notice at *http://www.regulations.gov* and search for NASA Docket [NASA–2025–0234].

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to NASA PRA Clearance Officer, Stayce Hoult, NASA Headquarters, 300 E Street SW, JC0000, Washington, DC 20546, phone 256–714–8575, or email *stayce.d.hoult@nasa.gov* or *hq-ocio-pra-program@mail.nasa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This site contains a questionnaire to become a crew/experiment subject for Flight Analog Project (FAP) missions such as Pressure Chamber Analog, Mars Exploration Analog and other analog studies. The questionnaire is used to screen potential applicants for initial qualifications. In addition, the website where the questionnaire exists describes the FAP facilities and experiments conducted to inform and promote interest in public participating in different FAP missions.

NASA is committed to effectively performing the Agency's communication function in accordance with the Space Act Section 203(a)(3) to ''provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof,'' and to enhance public understanding of, and participation in, the nation's aeronautical and space program in accordance with the NASA Strategic Plan.

II. Methods of Collection

Public website, Web Form.

III. Data

Title: Flight Analog Projects (FAP) Crew Selection Questionnaire.

OMB Number: 2700–0174.

Type of Review: Renewal of information collection.

Affected Public: Individuals.

Estimated Annual Number of Activities: 1.

Estimated Number of Respondents per Activity: 100.

Annual Responses: 100.

Estimated Time per Response: 15 minutes.

Estimated Total Annual Burden Hours: 25 hours.

IV. Request for Comments

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA's estimate of the burden (including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

Stayce Hoult,

PRA Clearance Officer, National Aeronautics and Space Administration.

BILLING CODE 7510–13–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–255; NRC–2025–1666]

Palisades Energy, LLC; Palisades Nuclear Plant; Exemption

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued an exemption in response to a request dated August 12, 2025, as supplemented by letter dated October 15, 2025, from Palisades Energy, LLC for the Palisades Nuclear Plant. The exemption authorizes the one-time use of the less restrictive work hour limitations described in the NRC's regulations for a 60-day period starting on November 3, 2025.

DATES: The exemption was issued on October 24, 2025.

ADDRESSES: Please refer to Docket ID NRC–2025–1666 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2025–1666. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: *Bridget.Curran@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin ADAMS Public Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The exemption request dated August 12, 2025, is available in ADAMS under Accession No. ML25224A206, as supplemented by letter dated October 15, 2025 (ADAMS Accession No. ML25288A074).
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Marlayna V. Doell, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–3178; email: *Marlayna.Doell@nrc.gov.*

SUPPLEMENTARY INFORMATION: The text of the exemption is attached.

Dated: November 20, 2025.

For the Nuclear Regulatory Commission.

Marlayna Doell,

Project Manager, Plant Licensing Branch III, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

Attachment—Exemption

NUCLEAR REGULATORY COMMISSION

Docket No. 50–255; Palisades Energy, LLC; Palisades Nuclear Plant; Exemption

I. Background

Palisades Energy, LLC (Palisades, the licensee) is the holder of Renewed Facility Operating License No. DPR–20, which authorizes operation of the Palisades Nuclear Plant (Palisades). The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (NRC, the Commission) now or hereafter in effect. The facility consists of one pressurized-water reactor located in Van Buren County in Michigan.

II. Request/Action

By letter dated August 12, 2025 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML25224A206), as supplemented by letter dated October 15, 2025 (ML25288A074), and pursuant to 10 CFR 26.9, ''Specific exemptions,'' the licensee requested a one-time exemption from the work hour requirements in Title 10 of the *Code of Federal Regulations* (10 CFR) part 26, ''Fitness for Duty Programs,'' paragraph 26.205(d), ''Work hour controls'' Specifically, the licensee requested to use the work hour requirements in 10 CFR 26.205(d)(4) and (d)(5) in lieu of the non-outage work hour controls described in 10 CFR 26.205(d)(3) and (d)(7) for a period of no more than 60 days for individuals specified in 10 CFR 26.4(a)(1) through (a)(5), starting on November 3, 2025, following the licensee's planned 60-day outage which started on

August 25, 2025, and ends on October 23, 2025.

Section 26.205(d)(3) of 10 CFR, requires licensees to comply with the requirements for individuals to have a minimum number of days off per week depending on the duration of shift schedules, averaged over the shift cycle, and the duties being performed. Individuals working 8-hour shift schedules shall have at least 1 day off per week, and individuals who are working 10-hour shift schedules shall have at least 2 days off per week. Individuals working 12-hour shift schedules while performing the duties described in 10 CFR 26.4(a)(1) through (a)(3) shall have at least 2.5 days off per week; individuals working 12-hour shift schedules while performing duties described in 10 CFR 26.4(a)(4) shall have at least 2 days off per week; and individuals working 12-hour shift schedules while performing duties described in 10 CFR 26.4(a)(5) shall have at least 3 days off per week. Section 26.205(d)(7) of 10 CFR, requires licensees to comply with the requirements for maximum average work hours wherein individuals may not work more than a weekly average of 54 hours, calculated using an averaging period of up to 6 weeks, which advances by 7 consecutive calendar days at the finish of every averaging period. The licensee seeks a one-time exemption from the requirements of 10 CFR 26.205(d)(3) and (d)(7).

The requirements in 10 CFR 26.205(d)(4) provide that during the first 60 days of a unit outage, licensees need not meet the requirements of 10 CFR 26.205(d)(3) or (d)(7) for individuals specified in 10 CFR 26.4(a)(1) through (a)(4), while those individuals are working on outage activities. However, 10 CFR 26.205(d)(4) does require the licensee to ensure individuals specified in 10 CFR 26.4(a)(1) through (a)(3) have at least 3 days off in each successive (*i.e.,* non-rolling) 15-day period, and that the individuals specified in 10 CFR 26.4(a)(4) have at least 1 day off in any 7-day period. This is collectively known as the outage minimum days off (MDO) requirement. The requirements in 10 CFR 26.205(d)(5) provide that during the first 60 days of a unit outage, licensees need not meet the requirements of 10 CFR 26.205(d)(3) or (d)(7) for individuals specified in 10 CFR 26.4(a)(5). Additionally, licensees shall ensure that individuals specified in 10 CFR 26.4(a)(5) have at least 4 days off in each successive (*i.e.,* non-rolling) 15-day period.

On July 24, 2025, the NRC issued a series of licensing and regulatory actions approving the licensee's request to reauthorize power operations at Palisades and return the plant to an operational status, including the Power Operations Technical Specifications (ML25157A127). In its August 12, 2025, submittal letter, the licensee stated that it planned to implement the power operations license, the final safety analysis report (FSAR), and the Power Operations Technical Specifications on August 25, 2025. Further, the licensee stated that on August 25, 2025, Palisades would transition directly into an outage under the Power Operation Technical Specifications to restore the plant for restart.

The licensee stated that the one-time exemption from the work hour requirements in 10 CFR 26.205(d) is necessary for the flexible management of personnel and work activities to ensure the full restoration of safety-related equipment and completion of outage activities in support of plant restart at Palisades. To support the extended use of outage work hour controls for the initial 60-day outage followed by the initially proposed 49-day exemption period, the licensee proposed additional mitigating actions discussed in Section V of the Enclosure to the August 12, 2025, submittal letter.

In the letter dated October 15, 2025, the licensee submitted a supplement to the proposed request for exemption. In the supplement, the licensee requested to increase the previously requested 49-day exemption period for use of the less restrictive work hour limitations to a 60-day exemption period to support the restart activities for Palisades. The licensee stated that it plans to use the additional time under the less restrictive work hour limitations to allow more flexibility for scheduling of covered work tasks and individual work hours to better manage cumulative fatigue. In addition, the licensee stated that the start date of the proposed exemption period of 60 days is being changed from October 24, 2025, to November 3, 2025.

III. Discussion

Pursuant to 10 CFR 26.9, the Commission may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of 10 CFR part 26 when the exemptions are authorized by law and will not endanger life or property or the common defense and security; and are otherwise in the public interest.

A. The Exemption Is Authorized by Law

The proposed exemption would authorize a one-time exemption from the requirements of 10 CFR 26.205(d)(3) and (d)(7) to allow the use of the less restrictive work hour controls in 10 CFR 26.205(d)(4) and (d)(5) for up to an additional 60 days, starting on November 3, 2025, to allow the completion of the plant restart activities without violating NRC regulations. As stated, 10 CFR 26.9 allows the NRC to grant exemptions from the requirements of 10 CFR part 26. The NRC staff has determined that granting the proposed exemption will not result in a violation of the Atomic Energy Act of 1954, as amended, other laws, or the Commission's regulations. Therefore, the exemption is authorized by law.

B. The Exemption Will Not Endanger Life or Property

The purpose of subpart I, ''Managing Fatigue,'' of 10 CFR part 26 is to ensure that worker fatigue does not compromise the abilities of individuals to perform their duties safely and competently. The purpose of 10 CFR 26.205(d)(4) and (d)(5) is to provide licensees flexibility for a limited period in scheduling required days off while accommodating more intense work schedules associated with a unit outage.

During the proposed exemption period, personnel as described in 10 CFR 26.4(a)(1) through (a)(5) would be permitted to work in accordance with the outage MDO requirements in 10 CFR 26.205(d)(4) and (d)(5) for a 60-day period. In its August 12, 2025, submittal, the licensee proposed two mitigating actions for the exemption period. The first proposed mitigating action is an adequate rest interval; the licensee states that during the exemption period, individuals will have, at a minimum, the rest breaks specified in 10 CFR 26.205(d)(2). The second proposed mitigating action is assessment for fatigue; the licensee states that the cognizant supervisors will assess each assigned supervised employee for fatigue and mental alertness during the period with less restrictive work hour limitations.

The NRC staff evaluated the proposed mitigating actions and concluded that they were not sufficient to prevent or mitigate cumulative fatigue for those individuals specified in 10 CFR 26.4(a)(1) through (a)(5) during the exemption period for extended use of outage work hour controls. By letter dated October 3, 2025 (ML25280A014), the NRC staff issued a request for confirmatory information (RCI) and a request for additional information (RAI) to request that the licensee provide an explanation of how the current actions will mitigate cumulative fatigue and what other actions will be taken to address fatigue during the 60-day outage period and the exemption period combined for a total period exceeding 100 days of less restrictive work hour limitations.

In its October 15, 2025, supplement, the licensee submitted responses to the RCIs and RAIs confirming that the staff's understanding was accurate in response to the RCIs. In response to the RAI, the licensee stated that no waivers for hours in excess of the outage work hour limits have been required for covered workers. The licensee also completed an audit of the work hours for the affected groups from the beginning of the initial 60-day outage to the end of the outage period. The licensee found that personnel completing duties that fall under Operations (a)(1) and Fire Brigade (a)(3) maintained a schedule pursuant to the non-outage work hour controls until the transition to outage work hour controls. Individuals completing duties that fall under Health Physics (a)(2) and Maintenance (a)(4) maintained a schedule pursuant to 10 CFR 26.205(d)(4) and average fewer than the maximum allowable 72 hours per week. Furthermore, the licensee submitted a commitment in the enclosure to the supplement that states that the licensee will ensure individuals performing duties under 10 CFR 26.4(a)(2) and (a)(4) work no more than 50 hours per week averaged over a 2-week period, between October 20, 2025, and November 2, 2025, prior the start date of the proposed exemption to ensure an adequate rest and reset period between the end of the outage period and start of the exemption period for the affected groups.

Palisades has been shutdown and in a decommissioning state since 2022. The NRC staff notes that there are no fatigue management requirements for licensees in decommissioning. However, because the licensee is planning to restart the plant, the NRC staff submitted an RAI asking the licensee to describe the 30-day period prior to the start of the outage in order to understand the state of work hour controls in place for plant personnel before entering the

outage on August 25, 2025. In response to the RAI, the licensee stated that the following work hour controls were applied at Palisades for the 30-day period before August 25, 2025: controls equivalent to 10 CFR 26.205(d)(1) and 10 CFR 26.205(d)(2)(i); and not to exceed 13 consecutive days of work.

The NRC staff evaluated the work schedules in conjunction with the information provided in the supplement and the RAI response. Personnel performing duties identified by 10 CFR 26.4(a)(1) and (a)(3) have complied with the non-outage work hour controls specified in 10 CFR 26.205(d)(7) prior the outage and will continue to comply until the start of the proposed exemption period. Because these personnel have worked a normal schedule, in accordance with 10 CFR 26.205(d)(7), leading up to the proposed exemption period, the NRC staff determined that administering the minimum days off during the 60-day exemption period in conjunction with the rest breaks in 10 CFR 26.205(d)(2) will allow Palisades to adequately manage cumulative fatigue for these personnel.

Personnel performing duties identified in 10 CFR 26.4(a)(5) have worked 12-hour shifts over a 6-week rotational schedule. However, these personnel have received at least 4 days off in each successive (*i.e.,* non-rolling) 15-day period. In addition, for the 30 days prior to the initial 60-day outage, these personnel have worked a schedule equivalent to the work hour requirements in 10 CFR 26.205(d)(1) and 10 CFR 26.205(d)(2)(i). Furthermore, the licensee stated in the RAI response that this group averaged less than 54 hours per week for the 30 days prior the initial outage. Because these personnel have worked a normal schedule prior to the outage and have received 4 days off in each non-rolling period leading up to the end of the outage, the NRC staff determined that administering the minimum days off during the 60-day exemption period in conjunction with the rest breaks in 10 CFR 26.205(d)(2) will allow Palisades to adequately manage cumulative fatigue for these personnel.

Based on the information provided by the licensee, individuals performing duties under 10 CFR 26.4(a)(2) and (a)(4) have worked a higher than average number of weekly work hours compared to other personnel during the initial outage period from August 25, 2025, through October 23, 2025. Under 10 CFR 26.4(a)(2), personnel perform duties related to Chemistry and Health Physics. Personnel performing duties related to Chemistry have worked 8 and 9-hour shifts for 5 days followed by 2 consecutive days off during the initial outage period. Some individuals have worked 12-hour shifts for 4 consecutive days followed by 3 days off. Personnel performing duties related to Health Physics have worked 12-hour shifts for 4 consecutive days followed by 1 day off. Management has also provided additional days off where practicable to support fatigue management for this group.

According to the licensee's RAI response, several different positions perform duties under 10 CFR 26.4(a)(4). Seven of twelve positions in the table, titled ''Fatigue Management—Group 10 CFR 26.4(a)(4)'' in response to RAI 1.d, have worked 10-hour shifts on 5 consecutive days followed by 2 consecutive days off during the initial outage period. Three of the twelve positions have worked 12-hour shifts for 4 consecutive days followed by 3 consecutive days off. Two of the positions have worked 12-hour shifts for 6 consecutive days followed by 1 day off. However, the licensee has provided a commitment to provide additional mitigating actions to personnel performing duties in both 10 CFR 26.4(a)(2) and (a)(4). Per the Enclosure to the RAI response, these individuals will work a maximum of 50 hours for the two weeks prior the proposed exemption period commencing on November 3, 2025. Based on the work schedules provided in the RAI response and the 50-hour limitation over a two week period prior to the proposed exemption period, personnel covered by 10 CFR 26.4(a)(2) and (a)(4) will receive an adequate rest interval of 16.9 hours per day, which is greater than the minimum 10-hour break between successive work periods and which provides an ample opportunity for personnel to receive a 34-hour break in every nine day period.

The NRC staff determined that the proposed mitigating actions, including the MDO requirements and supervisory fatigue assessments, in combination with a two-week rest period for individuals in those groups who have a higher than the maximum average work hours (personnel performing duties in both 10 CFR 26.4(a)(2) and (a)(4)), will allow the licensee to adequately manage cumulative fatigue during the requested 60-day exemption period. Acute fatigue will be managed using the outage MDO requirements combined with fatigue assessments by supervisors, which is consistent with common practice during unit outages. The NRC staff determined that the proposed mitigating actions will adequately manage acute and cumulative fatigue. Therefore, the exemption will not endanger life or property.

C. The Exemption Will Not Endanger the Common Defense and Security

The proposed exemption would authorize a one-time exemption from the requirements of 10 CFR 26.205(d)(3) and (d)(7) to allow the use of the less restrictive work hour controls described in 10 CFR 26.205(d)(4) and (d)(5) for up to an additional 60-days. The proposed exemption is applicable to security personnel who will have, at minimum, 4 days off in each successive (*i.e.,* non-rolling) 15-day period in combination with the minimum rest breaks in 10 CFR 26.205(d)(2) during the exemption period.

One additional factor that the licensee included in the October 15, 2025, supplement and response to the RCIs and RAIs is that security personnel will undergo mandated Force-on-Force exercises as required by 10 CFR part 73, Appendix B, ''General Criteria for Security Personnel'', Section II, ''Training and Qualifications.'' While the exercises are not NRC-evaluated, the licensee stated that these exercises are mandated security training and will require security personnel to work overtime shifts due to staffing limitations. In the licensee's response to the RAI, it was stated that the individuals performing security duties that fall under 10 CFR 26.4(a)(5) maintained a schedule pursuant to 10 CFR 26.205(d)(4) and averaged under 54 hours per week during the 60 days leading up to the proposed exemption period. During the two-week period between the end of the initial outage and the start of the proposed exemption period, the licensee stated that security personnel will maintain an average of 49.26 hours per week. In addition, security personnel will continue to receive the breaks described in 10 CFR 26.205(d)(2)(ii).

The NRC staff observed that meeting the break requirement in 10 CFR 26.205(d)(2)(ii) alone is not sufficient to effectively manage cumulative fatigue, as this provision is meant to be applied in conjunction with the other work hour control measures outlined in 10 CFR 26.205. However, the NRC staff considered the 34-hour break period in conjunction with the fact that, leading up to the 60-day exemption period, security personnel will have worked below the maximum average of 54 hours per week. In addition, prior to the initial 60-day outage period, security personnel will have worked at or below 54 hours per week. Because security personnel will have worked at or below the maximum average prior to the initial outage and will work, on average, 4.74 hours less than the maximum average prior to the proposed exemption period, there is added assurance that the licensee can adequately manage cumulative fatigue by ensuring personnel receive the minimum 34-hour break period prior to the proposed 60-day exemption period. The NRC staff determined that these mitigating actions in conjunction with the reduction in hours worked will prevent cumulative fatigue during the period of the exemption. Therefore, the exemption will not endanger the common defense and security.

D. The Exemption Is Otherwise in the Public Interest

The proposed exemption would authorize a one-time exemption from the requirements of 10 CFR 26.205(d)(3) and (d)(7) to allow the use of the less restrictive work hour controls described in 10 CFR 26.205(d)(4) and (d)(5) for up to an additional 60 days. In considering whether the requested exemptions would be in the public interest, the NRC staff considered several factors, including:

- the nature of the licensee's unique situation transitioning from decommissioning back to a power operations licensing basis, which requires restoration of safety-related equipment, among other plant restart activities; and
- the public health and safety interests of the communities that are impacted by the safe restart of the plant.

The NRC staff considered the fact that Palisades was in decommissioning status, but the licensee has determined to restart the plant. Palisades has been shut down since May 2022, after which, in 2023, the owner at that time, Holtec Decommissioning International, determined that they planned to pursue plans to restart. This unique situation has required restart-related inspections and repair activities during the outage to ensure the plant will be safe prior to restarting. The NRC staff also considered

the licensee's efforts to restart the plant utilizing both the 60-day outage period in combination with the proposed 60-day exemption period to meet their proposed sync to grid date.

The NRC staff considered the balance of public interest considerations, including the potential impacts of not granting the exemption, which could result in the delay of restarting the Palisades Nuclear Plant and could potentially delay the amount of energy available to the surrounding area. The NRC staff also considered the potential impacts resulting from an increase in overall cumulative fatigue due to personnel working longer work hours for an additional 60-day period directly following the expiration of the initial 60-day outage. Furthermore, the licensee has provided adequate mitigating actions through a combination of the MDO requirements, supervisory fatigue assessments, and a two-week rest period for groups of personnel with the highest maximum average work hours. The licensee will have adequately managed fatigue for personnel identified in 10 CFR 26.4(a)(1) through (a)(5) prior to and during the exemption period. Based on these considerations, the NRC staff concluded that there are no expectations for a significant impact on public health and safety as a result of the increase in cumulative fatigue for the 60-day exemption period. Therefore, the NRC staff finds that approval of the requested exemptions is otherwise in the public interest.

E. Environmental Considerations

The Commission has determined that granting the proposed one-time exemption from the requirements of 10 CFR 26.205(d)(3) and (d)(7) involves (1) no significant hazards consideration, (2) no significant change in the types or significant increase in the amounts of any effluents that may be released offsite, (3) no significant increase in individual or cumulative public or occupational radiation exposure, (4) no significant construction impact, and (5) no significant increase in the potential for or consequences from radiological accidents.

(1) Under 10 CFR 50.92(c), there is no significant hazards consideration if the action does not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new of different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed exemption is administrative in nature because it provides an additional period when less restrictive hours can be worked for personnel identified in 10 CFR 26.4(a)(1) through (a)(5). The proposed exemption has no effect on systems, structures, and components (SSCs) and no effect on the capability of the SSCs to perform their design function. The proposed exemption does not make any changes to the facility or operating procedures and does not alter the design, function, or operation of any plant equipment. Therefore, the exemption does not increase the probability or consequences of an accident previously evaluated.

The proposed exemption does not make any changes to the facility or operating procedures and does not alter the design, function, or operation of any plant equipment. Similarly, the proposed exemption does not authorize any physical changes to any SSCs involved in the mitigation of any accidents. Therefore, the exemption does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed exemption does not authorize alteration of the design basis or any safety limits for the plant. The exemption would not impact station operation or any SSC that is relied upon for accident mitigation. Therefore, the exemption does not involve a significant reduction in a margin of safety.

For these reasons, the NRC has determined that approval of the exemption requested involves no significant hazards consideration.

(2) The proposed exemption does not authorize any changes to the design basis requirements for the SSCs at Palisades that function to limit the release of non-radiological effluents, radiological liquid effluents, or radiological gaseous effluents during and following postulated accidents. Additionally, the exemption does not change any requirements with respect to the conduct of radiation surveys and monitoring. Therefore, there is no significant change in the types or significant increase in the amounts of any effluents that may be released offsite.

(3) The proposed exemption does not affect the limits on the release of any radioactive material or the limits provided in 10 CFR part 20, ''Standards for Protection Against Radiation,'' for radiation exposure to workers or members of the public. Additionally, the exemption will not increase or decrease the amount of work activities that must be completed in order to connect the reactor unit to the electrical grid. Therefore, there is no significant increase in individual or cumulative public or occupational radiation exposure.

(4) The proposed exemption does not involve any changes to a construction permit; Therefore, there is no significant construction impact.

(5) The proposed exemption does not alter any of the assumptions or limits in the licensee's accident analyses. Therefore, there is no significant increase in the potential for or consequences from radiological accidents.

In addition, the requirements from which the exemption are sought involve other requirements of an administrative, managerial, or organizational nature. Accordingly, the exemption meets the eligibility criteria for categorical exclusion set forth in 10 CFR 51.22(c)(25)(vi)(I). Therefore, in accordance with 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the NRC's consideration of the exemption request.

IV. Conclusions

Accordingly, the Commission has determined that, pursuant to 10 CFR 26.9, the exemption is authorized by law, will not endanger life or property or the common defense and security, and is otherwise in the public interest. Therefore, the Commission hereby grants Palisades Energy, LLC a one-time exemption from 10 CFR 26.205(d)(3) and (d)(7) for personnel identified in 10 CFR 26.4(a)(1) through (a)(5) to allow the use of the outage MDO requirements described in 10 CFR 26.205(d)(4) and (d)(5) for a 60-day period starting on November 3, 2025. While the exemption is in effect, Palisades Energy, LLC will ensure that individuals specified in 10 CFR 26.4(a)(1) through (a)(3) have at least 3 days off in each successive (*i.e.,* non-rolling) 15-day period; that individuals specified in 10 CFR 26.4(a)(4) have at least 1 day off in any 7-day period; and that individuals specified in 10 CFR 26.4(a)(5) have at least 4 days off in each successive (*i.e.,* non-rolling) 15-day period. Additionally, Palisades Energy, LLC will use the outage MDO requirements, proposed mitigating actions, and the two-week rest period between the end of the initial outage and start of the exemption period to adequately manage acute and cumulative fatigue for covered personnel during the exemption period. If Palisades Nuclear Plant is connected to the electrical grid prior to the end of the approved 60-day exemption period, the supporting bases for this exemption are no longer met. Accordingly, the exemption shall end either at the end of the approved 60-day period or at the time when the Palisades Nuclear Plant is connected to the electrical grid, whichever occurs first.

Dated: October 24, 2025

For the Nuclear Regulatory Commission.

/RA/

Aida Rivera-Varona,

Acting Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 2025–20841 Filed 11–24–25; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2025–1765]

Monthly Notice; Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations

AGENCY: Nuclear Regulatory Commission.

ACTION: Monthly notice.

SUMMARY: Pursuant to section 189a.(2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (NRC) is publishing this regular monthly notice. The Act requires the Commission to publish notice of any amendments issued, or proposed to be issued, and grants the Commission the authority to issue and make immediately effective

any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration (NSHC), notwithstanding the pendency before the Commission of a request for a hearing from any person.

DATES: Comments must be filed by December 26, 2025. A request for a hearing or petitions for leave to intervene must be filed by January 26, 2026. This monthly notice includes all amendments issued, or proposed to be issued, from September 12, 2025, to October 9, 2025. The last monthly notice was published on September 30, 2025.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject); however, the NRC encourages electronic comment submission through the Federal rulemaking website.

- *Federal rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2025–1765. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: *Bridget.Curran@nrc.gov.* For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Angela Baxter, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–8209; email: *Angela.Baxter@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2025–1765, facility name, unit number(s), docket number(s), application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2025–1765.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin ADAMS Public Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the ''Availability of Documents'' section.
- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2025–1765, facility name, unit number(s), docket number(s), application date, and subject, in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Proposed No Significant Hazards Consideration Determination

For the facility-specific amendment requests shown in this notice, the Commission finds that the licensees' analyses provided, consistent with section 50.91 of title 10 of *the Code of Federal Regulations* (10 CFR) ''Notice for public comment; State consultation,'' are sufficient to support the proposed determinations that these amendment requests involve NSHC. Under the Commission's regulations in 10 CFR 50.92, operation of the facilities in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission is seeking public comments on these proposed determinations. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determinations.

Normally, the Commission will not issue the amendments until the expiration of 60 days after the date of publication of this notice. The Commission may issue any of these license amendments before expiration of the 60-day period provided that its final determination is that the amendment involves NSHC. In addition, the Commission may issue any of these amendments prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. If the Commission takes action on any of these amendments prior to the expiration of either the comment period or the notice period, it will publish in the **Federal Register** a notice of issuance. If the Commission makes a final NSHC determination for any of these amendments, any hearing will take place after issuance. The Commission expects that the need to take action on any amendment before 60 days have elapsed will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person (petitioner) whose interest may be

affected by any of these actions may file a request for a hearing and petition for leave to intervene (petition) with respect to that action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

Petitions must be filed no later than 60 days from the date of publication of this notice in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration, which will serve to establish when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h) no later than 60 days from the date of publication of this notice. Alternatively, a State, local governmental body, Federally recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

For information about filing a petition and about participation by a person not a party under 10 CFR 2.315, see ADAMS Accession No. ML20340A053 (*https://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML20340A053*) and on the NRC's public website at *https://www.nrc.gov/about-nrc/regulatory/adjudicatory/hearing.html#participate.*

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including documents filed by an interested State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as further discussed, is granted. Detailed guidance on electronic submissions is located in the ''Guidance for Electronic Submissions to the NRC'' (ADAMS Accession No. ML13031A056), and on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals.html*).

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *Hearing.Docket@nrc.gov,* or by telephone at 301–415–1677, to: (1) request a digital identification (ID) certificate which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals/getting-started.html.* After a digital ID certificate is obtained and a docket is created, the participant must submit adjudicatory documents in the Portable Document Format. Guidance on submissions is available on the NRC's public website at *https://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. ET on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed in order to obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., ET, Monday through Friday, except Federal holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is publicly available at *https://adams.nrc.gov/ehd,* unless otherwise excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as previously described, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing docket where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal

privacy information such as social security numbers, home addresses, or personal phone numbers in their filings unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

The following table provides the nuclear power plant names, docket numbers, dates of application, ADAMS accession numbers, and locations in the application of the licensees' proposed NSHC determination. For further details with respect to these license amendment applications, see the applications for amendment, publicly available portions of which are available for public inspection in ADAMS. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

The following table provides the plant name, docket number, date of application, ADAMS accession number, and location in the application of the licensees' proposed NSHC determinations. For further details with respect to these license amendment applications, see the applications for amendment, which are available for public inspection in ADAMS. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT REQUESTS

Constellation Energy Generation, LLC; Dresden Nuclear Power Station, Units 2 and 3; Grundy County, IL	
Docket Nos	50–237, 50–249.
Application date	August 6, 2025.
ADAMS Accession No	ML25218A256.
Location in Application of NSHC	Pages 3–5 of Attachment 1.
Brief Description of Amendments	The proposed amendments would relocate Dresden Nuclear Power Station, Units 2 and 3, Technical Specification 3.3.7.2, ''Mechanical Vacuum Pump Trip Instrumentation,'' to an appropriate licensee-controlled document.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Jason Zorn, Associate General Counsel, Constellation Energy Generation, LLC, 4300 Winfield Road, Warrenville, IL 60555.
NRC Project Manager, Telephone Number	Surinder Arora, 301–415–1421.
Constellation Energy Generation, LLC; Quad Cities Nuclear Power Station, Units 1 and 2; Rock Island County, IL	
Docket Nos	50–254, 50–265.
Application date	August 6, 2025.
ADAMS Accession No	ML25218A263.
Location in Application of NSHC	Pages 3–5 of Attachment 1.
Brief Description of Amendments	The proposed amendments would relocate Quad Cities Nuclear Power Station, Units 1 and 2, Technical Specification 3.3.7.2, ''Mechanical Vacuum Pump Trip Instrumentation,'' to an appropriate licensee-controlled document.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Jason Zorn, Associate General Counsel, Constellation Energy Generation, LLC, 4300 Winfield Road, Warrenville, IL 60555.
NRC Project Manager, Telephone Number	Surinder Arora, 301–415–1421.
Duke Energy Carolinas, LLC; Oconee Nuclear Station, Units 1, 2, and 3; Oconee County, SC	
Docket Nos	50–269, 50–270, 50–287.
Application date	August 19, 2025.
ADAMS Accession No	ML25232A073.
Location in Application of NSHC	Pages 118–121 of the Enclosure.
Brief Description of Amendments	The proposed amendments would increase the existing Type A integrated leakage rate test program test interval from 10 years to 15 years, adopt an extension of the containment isolation valve leakage rate testing frequency for Type C leakage rate testing of selected components, adopt the use of American National Standards Institute/American Nuclear Society (ANSI/ANS) 56.8–2020, ''Containment System Leakage Testing Requirements,'' and adopt a more conservative allowable test interval extension of 9 months for Type A, Type B and Type C leakage rate tests in accordance with NEI 94–01, Revision 3–A, ''Industry Guideline for Implementing Performance-Based Option of 10 CFR Part 50, Appendix J.''
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Tracey Mitchell LeRoy, Deputy General Counsel, Duke Energy Corporation, 525 S Tryon Street, Charlotte, NC 28202.
NRC Project Manager, Telephone Number	Shawn Williams, 301–415–1009.
Nebraska Public Power District; Cooper Nuclear Station; Nemaha County, NE	
Docket No	50–298.
Application date	July 17, 2025.
ADAMS Accession No	ML25202A106.
Location in Application of NSHC	Pages 19–21 of Attachment 1.

LICENSE AMENDMENT REQUESTS—Continued

Brief Description of Amendment	The proposed amendment would revise Cooper Nuclear Station Technical Specification (TS) 3.8.2, ''AC [Alternating Current] Sources—Shutdown,'' and TS 3.8.3, ''Diesel Fuel Oil, Lube Oil, and Starting Air,'' to allow the fuel oil storage tanks to be out of service for up to 14 days for the purpose of performing the required cleaning and inspection of the tanks. An alternate fuel oil storage system will be utilized during the tank inspection evolution, as necessary, to supply the required diesel generator day tank. These TS changes would be applicable during the 2026 Refuel Outage 34 while in Mode 5.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	John C. McClure, Executive Vice President External Affairs and General Counsel Nebraska Public Power District, P.O. Box 499, Columbus, NE 68601.
NRC Project Manager, Telephone Number	Thomas Byrd, 301–415–3719.

Pacific Gas and Electric Company; Diablo Canyon Nuclear Power Plant, Units 1 and 2; San Luis Obispo County, CA

Docket Nos	50–275, 50–323.
Application date	August 27, 2025.
ADAMS Accession No	ML25239B075.
Location in Application of NSHC	Pages 4–6 of the Enclosure.
Brief Description of Amendments	The proposed amendments would adopt emergency action level scheme pursuant to Nuclear Energy Institute (NEI) 99–01, Revision 7, ''Development of Emergency Action Levels for Non-Passive Reactors.''
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Jennifer Post, Esq., Pacific Gas and Electric Co., 77 Beale Street, Room 3065, Mail Code B30A, San Francisco, CA 94105.
NRC Project Manager, Telephone Number	Samson Lee, 301–415–3168.

Tennessee Valley Authority; Sequoyah Nuclear Plant, Units 1 and 2; Hamilton County, TN; Tennessee Valley Authority; Watts Bar Nuclear Plant, Units 1 and 2; Rhea County, TN

Docket Nos	50–327, 50–328, 50–390, 50–391.
Application date	August 19, 2025.
ADAMS Accession No	ML25231A300.
Location in Application of NSHC	Pages E1–E3 of the Enclosure.
Brief Description of Amendments	The proposed amendments would revise Sequoyah Nuclear Plant, Units 1 and 2, and Watts Bar Nuclear Plant, Units 1 and 2, technical specifications to eliminate the periodic surveillance requirement to verify that all required diesel generators achieve rated frequency and voltage within the specified time period when started simultaneously, consistent with Technical Specifications Task Force (TSTF) Traveler TSTF–599–A, Revision 1, ''Eliminate Periodic Surveillance Test of Simultaneous Start of Redundant Diesel Generators.''
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Rebecca Tolene (Acting), Executive VP and General Counsel Tennessee Valley Authority, 400 West Summit Hill Drive, WT 6A, Knoxville, TN 37902.
NRC Project Manager, Telephone Number	Kimberly Green, 301–415–1627.

Tennessee Valley Authority; Watts Bar Nuclear Plant, Units 1 and 2; Rhea County, TN

Docket Nos	50–390, 50–391.
Application date	August 25, 2025.
ADAMS Accession No	ML25237A197.
Location in Application of NSHC	TSTF–26: pages E6–E7; TSTF–27: pages E10–E11; TSTF–87: pages E14–E15; TSTF–96: pages E1–E18; TSTF–116: pages E21–E22; TSTF–197: pages E26–E27; TSTF–233: pages E31–E32; TSTF–263: pages E35–E36; TSTF–265: page E39; TSTF–272: pages E42–E43; TSTF–280: pages E46–E47; TSTF–284: pages E50–E51; TSTF–286: pages E56–E57; TSTF–349, TSTF–361, and TSTF–438: pages E61–E63; TSTF–352: pages E66–E68; TSTF–20: pages E70–E71; TSTF–247: pages E73–E75; TSTF–309: pages E77–E78.
Brief Description of Amendments	The proposed amendments would revise various technical specifications (TS) within the Watts Bar Nuclear Plant, Units 1 and 2, TS Sections 3.4 and 3.9 by adopting the following Technical Specifications Task Force (TSTF) Travelers: • TSTF–26–A, Revision 0—''Revise the Action for Minimum Temperature for Criticality to match the Applicability.'' • TSTF–27–A, Revision 3—''Revise SR [surveillance requirement] frequency for Minimum Temperature for Criticality.'' • TSTF–87–A, Revision 2—''Revise 'RTBs [reactor trip breakers] open' & 'CRDM [control rod drive mechanism] de-energized' Actions to 'incapable of rod withdrawal.' '' • TSTF–96–A, Revision 1—''Delete the initial performance of the boron concentration measurement with no source range detectors.'' • TSTF–116–A, Revision 2—''RCS [reactor coolant system] Inventory Balance SR: Steady State Clarification.'' • TSTF–197–A, Revision 2—''Require containment closure when shutdown cooling requirements are not met.'' • TSTF–233–A, Revision 0—''Relocate LTOP [low-temperature overpressure protection] Arming Temperature to PTLR [pressure-temperature limits report] (except for Technical Specification [TS] 1.1).''

LICENSE AMENDMENT REQUESTS—Continued

	• TSTF–263–A, Revision 3—''Correct usage of 'required' components and base ACTIONS on inoperable required equipment.'' • TSTF–265–A, Revision 2—''Clarify 3.4 'non-operating loop' SRs.'' • TSTF–272–A, Revision 1—''Refueling Boron Concentration Clarification.'' • TSTF–280–A, Revision 1—''Exempt SRs on LTOP equipment not used to satisfy the LCO [limiting condition for operation].'' • TSTF–284–A, Revision 3—''Add 'Met vs. Perform' to Specification 1.4, Frequency.'' • TSTF–286–A, Revision 2—''Define 'Operations Involving Positive Reactivity Additions' '' (only TS Sections 3.4 and 3.9). • TSTF–349–A, Revision 1—''Add Note to LCO 3.9.5 Allowing Shutdown Cooling Loops Removal from Operation.'' • TSTF–352–A, Revision 1—''Provide Consistent Completion Time to Reach MODE 4.'' • TSTF–361–A, Revision 2—''Allow standby SDC/RHR/DHR [shutdown cooling/residual heat removal/decay heat removal] loop to inoperable to support testing.'' • TSTF–438–A, Revision 0—''Clarify Exception Notes to be Consistent with the Requirement Being Excepted.'' • TSTF–20–A, Revision 0—''Delete extraneous Action from Refueling Cavity Water Level.'' • TSTF–247–A, Revision 0—''Provide separate condition entry for each PORV [power-operated relief valve] and block valve.'' • TSTF–309, Revision 2—''Revise Pressurizer PORV Actions to not require cycling of block valve when closed for isolation''
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Rebecca Tolene (Acting), Executive VP and General Counsel Tennessee Valley Authority, 400 West Summit Hill Drive, WT 6A, Knoxville, TN 37902.
NRC Project Manager, Telephone Number	Kimberly Green, 301–415–1627.

Vistra Operations Company LLC; Davis-Besse Nuclear Power Station, Unit 1; Ottawa County, OH; Vistra Operations Company LLC ; Beaver Valley Power Station, Units 1 and 2; Beaver County, PA; Vistra Operations Company LLC; Comanche Peak Nuclear Power Plant, Unit Nos. 1 and 2; Somervell County, TX; Vistra Operations Company LLC; Perry Nuclear Power Plant, Unit 1; Lake County, OH

Docket Nos	50–334, 50–346, 50–412, 50–440, 50–445, 50–446.
Application date	July 10, 2025.
ADAMS Accession No	ML25191A246.
Location in Application of NSHC	Pages 25–27 of the Enclosure.
Brief Description of Amendments	The proposed amendments would modify technical specification Definitions and add a new ''Online Monitoring Program.'' The amendments propose to use online monitoring (OLM) methodology as the technical basis to switch from time-based surveillance frequency for channel calibrations to a condition-based calibration frequency based on OLM results.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Roland Backhaus, Senior Lead Counsel-Nuclear, Vistra Corp., 325 7th Street NW, Suite 520, Washington, DC 20004.
NRC Project Manager, Telephone Number	Robert Kuntz, 301–415–3733.

III. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses

During the period since publication of the last monthly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed NSHC determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** as indicated in the safety evaluation for each amendment.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.22(b) and has made a determination based on that assessment, it is so indicated in the safety evaluation for the amendment.

For further details with respect to each action, see the amendment and associated documents such as the Commission's letter and safety evaluation, which may be obtained using the ADAMS accession numbers indicated in the following table. The safety evaluation will provide the ADAMS accession numbers for the application for amendment and the **Federal Register** citation for any environmental assessment. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT ISSUANCES

Arizona Public Service Company, et al.; Palo Verde Nuclear Generating Station, Units 1, 2, and 3; Maricopa County, AZ

Docket Nos	50–528, 50–529, 50–530.

LICENSE AMENDMENT ISSUANCES—Continued

Amendment Date	September 22, 2025.
ADAMS Accession No	ML25254A064.
Amendment Nos	226 (Unit 1), 226 (Unit 2), and 226 (Unit 3).
Brief Description of Amendments	The amendments revised Technical Specification 5.6.5.b, ''Core Operating Limits Report (COLR),'' to add Topical Report WCAP–18240–P–A, ''Westinghouse Thermal Design Procedure (WTDP),'' to the list of referenced analytical methods for the determination of reactor core operating limits.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Florida Power & Light Company, et al.; St. Lucie Plant, Unit No. 2; St. Lucie County, FL

Docket No	50–389.
Amendment Date	September 26, 2025.
ADAMS Accession No	ML25241A191.
Amendment No	212.
Brief Description of Amendment	The amendment revised the St. Lucie Plant, Unit No. 2, Technical Specification (TS) 3.7.15, ''Spent Fuel Pool Storage,'' and TS 4.3, ''Fuel Storage,'' to support updated spent fuel pool and new fuel vault criticality analyses, which account for the impact of planned transition to 24-month fuel cycles on fresh and spent fuel storage.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Florida Power & Light Company; Turkey Point Nuclear Generating Unit Nos. 3 and 4; Miami-Dade County, FL

Docket Nos	50–250, 50–251.
Amendment Date	September 25, 2025.
ADAMS Accession No	ML25266A206.
Amendment Nos	303 (Unit 3) and 297 (Unit 4).
Brief Description of Amendments	The amendments revised the technical specifications for Turkey Point Nuclear Generating Unit Nos. 3 and 4 by removing the pressurizer heater group emergency power supply requirements.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Tennessee Valley Authority; Sequoyah Nuclear Plant, Unit 2; Hamilton County, TN

Docket No	50–328.
Amendment Date	September 22, 2025.
ADAMS Accession No	ML25252A202.
Amendment No	367.
Brief Description of Amendment	The amendment revised the Sequoyah Nuclear Plant (SQN), Unit 2, Technical Specification Surveillance Requirement (SR) 3.0.2, on a one-time basis, the surveillance interval for SR 3.6.12.2 (Ice Condenser—Ice Mass Weighing) and SR 3.6.12.3 (Ice Condenser Flow Passage Inspection) that are normally performed on an 18-month frequency in conjunction with a refueling outage. The amendment extended the due date for SRs 3.6.12.2 and 3.6.12.3 from August 14, 2026, and August 12, 2026, respectively, to prior to entering Mode 4 from the SQN, Unit 2, Cycle 27, Refueling Outage but no later than December 1, 2026.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Dated: November 19, 2025.

For the Nuclear Regulatory Commission.

Hipolito Gonzalez,

Acting Deputy Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2025–0089]

Research Information Letter Report: Integrated Human Event Analysis System Dependency Analysis Guidance (IDHEAS–DEP)

AGENCY: Nuclear Regulatory Commission.

ACTION: Request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is seeking public comment on the Research Information Letter (RIL) report, ''Integrated Human Event Analysis System Dependency Analysis Guidance (IDHEAS–DEP),'' which establishes guidance that documents how to perform a dependency analysis using the dependency model included in Integrated Human Event Analysis System for Event and Condition Assessment (IDHEAS–ECA) method for human reliability analysis (HRA).

DATES: Submit comments by January 26, 2026. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

• *Federal rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2025–0089. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: *Bridget.Curran@nrc.gov.*

For technical questions, contact the individual(s) listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Jing Xing, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–2410, email: *Jing.Xing@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2025–0089 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

• *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2025–0089.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin ADAMS Public Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The RIL report, RIL 2021–14, is available in ADAMS under Accession No. ML21316A104.

• *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time, Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2025–0089 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS. All comments should reference the applicable report.

II. Discussion

The NRC Research Information Letter report, RIL 2021–14, discusses the dependency of human failure events in the context of human reliability analysis (HRA) which refers to the impact of failure of a human action on performance of subsequent human actions. HRA assesses the impact of dependency on human error probabilities as inputs to probabilistic risk analysis models. The staff at the NRC developed a HRA method, referred to as the Integrated Human Event Analysis System for Event and Condition Assessment (IDHEAS–ECA), which includes a human action dependency model. The staff further developed detailed guidance for applying the dependency model to quantify the human error probability of a human action due to the dependency, and to gain a systematic understanding of factors contributing to dependency, and how the dependency impact can be mitigated. This RIL report presents the dependency guidance, along with worksheets and templates for using the guidance, and two full examples of performing HRA with the IDHEAS–ECA method and the dependency guidance. This RIL report can be used for HRA dependency analysis in combination with the IDHEAS–ECA method or stand alone for applications involving analyzing human action dependency.

III. Executive Order (E.O.) 12866

The Office of Information and Regulatory Affairs determined that this RIL–2021–14 is not a significant regulatory action under E.O. 12866.

(Authority: 42 U.S.C. 2011 *et seq.*)

Dated: November 20, 2025.

For the Nuclear Regulatory Commission.

Sean Peters,

Chief, Human Factors and Reliability Branch, Division of Risk Analysis, Office of Nuclear Regulatory Research.

BILLING CODE 7590–01–P

OFFICE OF PERSONNEL MANAGEMENT

Chief Human Capital Officers (CHCO) Council; Virtual Public Meeting

AGENCY: Office of Personnel Management.

ACTION: Notice of meeting.

SUMMARY: The Chief Human Capital Officers (CHCO) Council plans to meet on Tuesday, December 9, 2025. The meeting will start at 9:00 a.m. EST and will be held on Microsoft Teams.

FOR FURTHER INFORMATION CONTACT: Bridget Patterson, Administrative Support Specialist, *CHCOCouncil@opm.gov,* 202–936–0003.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is for the CHCO Council to host their annual public meeting per Public Law 107–296.

The CHCO Council is the principal interagency forum to advise and coordinate the activities of the agencies of its members on such matters as modernization of human resources systems, improved quality of human resources information and legislation affecting human resources operations and organizations.

Persons desiring to attend this public meeting of the Chief Human Capital Officers Council should contact OPM at least 5 business days in advance of the meeting date at the email address shown below. Note: If you require an accommodation, please contact *chcocouncil@opm.gov* no later than December 2, 2025.

Office of Personnel Management.

Alexys Stanley,

Federal Register Liaison.

BILLING CODE P

POSTAL REGULATORY COMMISSION

[Docket Nos. K2025–922; MC2026–110 and K2026–110]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 1, 2025.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *https://www.prc.gov*. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). The Public Representative does not represent any individual person, entity or particular point of view, and, when Commission attorneys are appointed, no attorney-client relationship is established. Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests. The comment due date discussed below does not apply to Section III proceedings (Docket Nos. MC2026–110 and K2026–110).

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

II. Public Proceeding(s)

1. Docket No(s).: K2025–922; Filing Title: USPS Request Concerning Amendment One to Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 1138, with Materials Filed Under Seal; Filing Acceptance Date: November 19, 2025; Filing Authority: 39 CFR 3035.105, and 39 CFR 3041.505; Public Representative: Jennaca Upperman; Comments Due: December 1, 2025.

III. Summary Proceeding(s)

1. Docket No(s).: MC2026–110 and K2026–110; Filing Title: USPS Request to Add New Fulfillment Standardized Distinct Product, PM–GA Contract 927, and Notice of Filing Materials Under Seal; Filing Acceptance Date: November 19, 2025; Filing Authority: 39 U.S.C. 3642 and 3633, 39 CFR 3035.105, and 39 CFR 3041.325.

This Notice will be published in the **Federal Register**.

Erica A. Barker,

Secretary.

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–104232; File No. 4–618]

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d–2; Notice of Filing and Order Approving and Declaring Effective an Amendment to the Plan for the Allocation of Regulatory Responsibilities Between Cboe BZX Exchange, Inc., Cboe BYX Exchange, Inc., BOX Exchange LLC, Cboe Exchange, Inc., Cboe C2 Exchange, Inc., NYSE Texas, Inc., Cboe EDGA Exchange, Inc., Cboe EDGX Exchange, Inc., Financial Industry Regulatory Authority, Inc., Long-Term Stock Exchange, Inc., MEMX LLC, Nasdaq ISE, LLC, Nasdaq GEMX, LLC, Nasdaq MRX, LLC, Investors Exchange LLC, Miami International Securities Exchange, LLC, MIAX PEARL, LLC, MIAX Emerald, LLC, MIAX Sapphire, LLC, The Nasdaq Stock Market LLC, Nasdaq BX, Inc., Nasdaq PHLX LLC, NYSE National, Inc., New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., Long-Term Stock Exchange, Inc., 24X National Exchange LLC, and Green Impact Exchange, LLC Concerning Covered Regulation NMS and Consolidated Audit Trail Rules

November 20, 2025.

Notice is hereby given that the Securities and Exchange Commission (''Commission'') has issued an Order, pursuant to Section 17(d) of the Securities Exchange Act of 1934 (''Act''),[1] approving and declaring effective an amendment to the plan for allocating regulatory responsibility (''Plan'') filed on September 23, 2025, pursuant to Rule 17d–2 of the Act,[2] by Cboe BZX Exchange, Inc. (''BZX''), Cboe BYX Exchange, Inc. (''BATS Y''), BOX Exchange LLC (''BOX''), Cboe Exchange, Inc. (''Cboe''), Cboe C2 Exchange, Inc. (''C2''), NYSE Texas, Inc. (''Texas''), Cboe EDGA Exchange, Inc. (''EDGA''), Cboe EDGX Exchange, Inc. (''EDGX''), Financial Industry Regulatory Authority, Inc. (''FINRA''), Long-Term Stock Exchange, Inc. (''LTSE''), MEMX LLC (''MEMX''), Nasdaq ISE, LLC (''ISE''), Nasdaq GEMX, LLC (''GEMX''), Nasdaq MRX, LLC (''MRX''), Investors Exchange LLC (''IEX''), Miami International Securities Exchange, LLC (''MIAX''), MIAX PEARL, LLC (''MIAX PEARL''), MIAX Emerald, LLC (''MIAX Emerald''), MIAX Sapphire, LLC (''MIAX Sapphire''), The Nasdaq Stock Market LLC (''Nasdaq''), Nasdaq BX, Inc. (''BX''), Nasdaq PHLX LLC (''PHLX''), NYSE National, Inc. (''NYSE National''), New York Stock Exchange LLC (''NYSE''), NYSE American LLC (''NYSE American''), NYSE Arca, Inc. (''NYSE Arca''), 24X National Exchange LLC (''24X''), and Green Impact Exchange, LLC (''GIX'') (each, a ''Participating Organization,'' and, together, the ''Participating Organizations'' or the ''Parties''). This Agreement amends and restates the agreement by and among the Participating Organizations approved by the Commission on July 11, 2025.[3]

I. Introduction

Section 19(g)(1) of the Act,[4] among other things, requires every self-regulatory organization (''SRO'') registered as either a national securities exchange or national securities association to examine for, and enforce compliance by, its members and persons associated with its members with the Act, the rules and regulations thereunder, and the SRO's own rules, unless the SRO is relieved of this responsibility pursuant to Section 17(d) or Section 19(g)(2) of the Act.[5] Without this relief, the statutory obligation of each individual SRO could result in a pattern of multiple examinations of broker-dealers that maintain memberships in more than one SRO (''common members''). Such regulatory duplication would add unnecessary expenses for common members and their SROs.

Section 17(d)(1) of the Act[6] was intended, in part, to eliminate unnecessary multiple examinations and regulatory duplication.[7] With respect to a common member, Section 17(d)(1) authorizes the Commission, by rule or order, to relieve an SRO of the responsibility to receive regulatory reports, to examine for and enforce compliance with applicable statutes, rules, and regulations, or to perform other specified regulatory functions.

To implement Section 17(d)(1), the Commission adopted two rules: Rule 17d–1 and Rule 17d–2 under the Act.[8] Rule 17d–1 authorizes the Commission to name a single SRO as the designated examining authority (''DEA'') to examine common members for compliance with the financial responsibility requirements imposed by the Act, or by Commission or SRO rules.[9] When an SRO has been named as a common member's DEA, all other SROs to which the common member belongs are relieved of the responsibility to examine the firm for compliance with the applicable financial responsibility rules. On its face, Rule 17d–1 deals only with an SRO's obligations to enforce member compliance with financial responsibility requirements. Rule 17d–1 does not relieve an SRO from its obligation to examine a common member for compliance with its own rules and provisions of the federal securities laws governing matters other than financial responsibility, including sales practices and trading activities and practices.

To address regulatory duplication in these and other areas, the Commission adopted Rule 17d–2 under the Act.[10] Rule 17d–2 permits SROs to propose joint plans for the allocation of regulatory responsibilities with respect to their common members. Under paragraph (c) of Rule 17d–2, the Commission may declare such a plan effective if, after providing for appropriate notice and comment, it determines that the plan is necessary or appropriate in the public interest and for the protection of investors; to foster cooperation and coordination among the SROs; to remove impediments to, and foster the development of, a national market system and a national clearance and settlement system; and is in conformity with the factors set forth in Section 17(d) of the Act. Commission approval of a plan filed pursuant to Rule 17d–2 relieves an SRO of those regulatory responsibilities allocated by the plan to another SRO.

II. The Plan

On December 3, 2010, the Commission approved the SRO participants' plan for allocating regulatory responsibilities pursuant to Rule 17d–2.[11] On October 29, 2015, the Commission approved an amended plan that added Regulation NMS Rules 606, 607, and 611(c) and (d) and added additional Participating Organizations that are options markets to the Plan.[12] On August 11, 2016, the Commission approved an amended plan that added IEX and ISE Mercury as Participating

Organizations.[13] On February 2, 2017, the Commission approved an amended plan that added MIAX PEARL as a Participating Organization.[14] On February 4, 2019, the Commission approved an amended plan that added MIAX Emerald as a Participating Organization and reflected name changes of certain Participating Organizations.[15] On July 25, 2019, the Commission approved an amended plan that added LTSE as a Participating Organization and reflected name changes of certain Participating Organizations.[16] On March 12, 2020, the Commission approved an amended plan that added Rule 613 under the Act and the rules of each Participating Organization related to Rule 613 listed on Exhibit A to the Plan, and reflected the name change of Nasdaq PHLX, Inc. to Nasdaq PHLX LLC.[17] On June 10, 2020, the Commission approved a proposed amendment to the Plan to add MEMX as a Participant to the Plan.[18] On August 1, 2024, the Commission approved a proposed amendment to the Plan to add MIAX Sapphire as a Participant to the Plan.[19] On July 11, 2025, the Commission approved a proposed amendment to the Plan to add 24X as a Participant to the Plan.[20]

The proposed 17d–2 Plan is intended to reduce regulatory duplication for firms that are members of more than one Participating Organization.[21] The Plan provides for the allocation of regulatory responsibility according to whether the covered rule pertains to NMS stocks or NMS securities. For covered rules that pertain to NMS stocks (*i.e.,* Rules 607, 611, and 612), FINRA serves as the ''Designated Regulation NMS Examining Authority'' (''DREA'') for common members that are members of FINRA and assumes certain examination and enforcement responsibilities for those members with respect to specified Regulation NMS rules. For common members that are not members of FINRA, the member's DEA serves as the DREA and ''Designated CAT Surveillance Authority'' (''DCSA''), provided that the DEA exchange operates a national securities exchange or facility that trades NMS stocks and the common member is a member of such exchange or facility. Section 2(c) of the Plan contains a list of principles that are applicable to the allocation of common members in cases not specifically addressed in the Plan. An exchange that does not trade NMS stocks would have no regulatory authority for covered Regulation NMS rules pertaining to NMS stocks. For covered rules that pertain to NMS securities, and thus include options (*i.e.,* Rule 606, Rule 613 and the SRO Covered CAT Rules), the Plan provides that the DREA will be the same as the DREA for the rules pertaining to NMS stocks and will serve as the DCSA. For common members that are not members of an exchange that trades NMS stocks, the common member would be allocated according to the principles set forth in Section 2(c) of the Plan.

The text of the Plan delineates the proposed regulatory responsibilities with respect to the Parties. Included in the proposed Plan is an exhibit (the ''Covered Rules'') that lists the federal securities laws, rules, and regulations, for which the applicable DREA would bear examination and enforcement responsibility, and for which the applicable DCSA would bear surveillance, investigation, and enforcement responsibility, under the Plan for common members of the Participating Organization and their associated persons.

Specifically, the applicable DREA assumes examination and enforcement responsibility, and the applicable DCSA assumes surveillance, investigation, and enforcement responsibility, relating to compliance by common members with the Covered Rules. Covered Rules do not include the application of any rule of a Participating Organization, or any rule or regulation under the Act, to the extent that it pertains to violations of insider trading activities, because such matters are covered by a separate multiparty agreement under Rule 17d–2.[22] Under the Plan, Participating Organizations retain full responsibility for surveillance and enforcement with respect to trading activities or practices involving their own marketplace.[23]

III. Proposed Amendment to the Plan

On September 23, 2025, the parties submitted a proposed amendment to the Plan. The primary purpose of the amendment is to add GIX as a Participant to the Plan.

The text of the proposed amended 17d–2 Plan is as follows (additions are in *italics;* deletions are in [brackets]):

* * * * *

Agreement for the Allocation of Regulatory Responsibility for the Covered Regulation NMS and Consolidated Audit Trail Rules Pursuant to § 17(d) of the Securities Exchange Act of 1934, 15 U.S.C. 78q(d), and Rule 17d–2 Thereunder

This agreement (the ''Agreement'') by and among Cboe BZX Exchange, Inc. (''Cboe BZX''), Cboe BYX Exchange, Inc. (''Cboe BYX''), BOX Exchange LLC (''BOX''), Cboe Exchange, Inc. (''Cboe Options''), Cboe C2 Exchange, Inc. (''Cboe C2''), NYSE Texas, Inc. (''NYSE Texas''), Cboe EDGA Exchange, Inc. (''Cboe EDGA''), Cboe EDGX Exchange, Inc. (''Cboe EDGX''), Financial Industry Regulatory Authority, Inc. (''FINRA''), MEMX LLC (''MEMX''), Nasdaq ISE, LLC (''ISE''), Nasdaq GEMX, LLC (''GEMX''), Nasdaq MRX, LLC (''MRX''), Investors Exchange LLC (''IEX''), Miami International Securities Exchange, LLC (''MIAX''), MIAX PEARL, LLC (''MIAX PEARL''), MIAX Emerald, LLC (''MIAX Emerald''), MIAX Sapphire, LLC (''MIAX Sapphire''), The Nasdaq Stock Market LLC (''Nasdaq''), Nasdaq BX, Inc. (''BX''), Nasdaq PHLX LLC (''PHLX''), NYSE National, Inc. (''NYSE National''), New York Stock Exchange LLC (''NYSE''), NYSE American LLC (''NYSE American''), NYSE Arca, Inc. (''NYSE Arca''), Long-Term Stock Exchange, Inc. (''LTSE''), [and] 24X National Exchange LLC (''24X'') *and Green Impact Exchange, LLC (''GIX'')* (each, a ''Participating Organization,'' and, together, the ''Participating Organizations''), is made pursuant to § 17(d) of the Securities Exchange Act of 1934 (the ''Act'' or ''SEA''), 15 U.S.C. 78q(d), and Rule 17d–2 thereunder, which allow for plans to allocate regulatory responsibility among self-regulatory organizations (''SROs''). Upon approval by the Securities and Exchange Commission (''Commission'' or ''SEC''), this Agreement shall amend and restate the agreement by and among the Participating Organizations approved by the SEC on [August 1, 2024] *July 11, 2025.*

Whereas, the Participating Organizations desire to: (a) foster cooperation and coordination among the SROs; (b) remove impediments to, and

[23] *See* paragraph 3 of the Plan.

foster the development of, a national market system; (c) strive to protect the interest of investors; (d) eliminate duplication in their examination and enforcement of (i) SEA Rules 606, 607, 611, 612 and 613 (the ''Covered Regulation NMS Rules'') and (ii) rules of each Participating Organization related to SEA Rule 613 listed on Exhibit A hereto (''SRO Covered CAT Rules,'' together with the Covered Regulation NMS Rules, collectively, the ''Covered Rules'') and (e) eliminate duplication in their surveillance, examination, investigation and enforcement of SEA Rule 613 and the SRO Covered CAT Rules;

Whereas, the Participating Organizations are interested in allocating regulatory responsibilities with respect to broker-dealers that are members of more than one Participating Organization (the ''Common Members'') relating to the examination and enforcement of the Covered Rules and the surveillance, examination, investigation and enforcement of SEA Rule 613 and the SRO Covered CAT Rules; and

Whereas, the Participating Organizations will request regulatory allocation of these regulatory responsibilities by executing and filing with the SEC this plan for the above stated purposes pursuant to the provisions of § 17(d) of the Act, and Rule 17d–2 thereunder, as described below.

Now, therefore, in consideration of the mutual covenants contained hereafter, and other valuable consideration to be mutually exchanged, the Participating Organizations hereby agree as follows:

1. Assumption of Surveillance Responsibility. The Designated CAT Surveillance Authority (the ''DCSA'') shall assume surveillance, investigation and enforcement responsibility relating to compliance by Common Members with SEA Rule 613 and the SRO Covered CAT Rules listed on Exhibit A (''Surveillance Responsibility''). Included in the Surveillance Responsibility assumed hereunder the DCSA shall perform investigations and enforcement resulting from reports and metrics concerning potentially non-compliant CAT reporting generated by the Plan Processor for the National Market System Plan Governing the Consolidated Audit Trail and as provided for in the Monitoring CAT Reporter Compliance Policy (dated August 13, 2019 and as amended from time to time) relating to Common Members. FINRA shall serve as DCSA for Common Members that are members of FINRA. The DREA allocated below shall serve as DCSA for Common Members that are not members of FINRA.

2. Assumption of Examination Responsibility. The Designated Regulation NMS Examining Authority (the ''DREA'') shall assume examination and enforcement responsibilities relating to compliance by Common Members with the Covered Rules to which the DREA is allocated responsibility (''Examination Responsibility''). A list of the Covered Rules is attached hereto as Exhibit A.

a. For Covered Regulation NMS Rules Pertaining to ''NMS stocks'' (as defined in Regulation NMS) (*i.e.,* Rules 607, 611 and 612): FINRA shall serve as DREA for Common Members that are members of FINRA. The Designated Examining Authority (''DEA'') pursuant to SEA Rule 17d-1 shall serve as DREA (and accordingly as DCSA as provided in paragraph 1 above) for Common Members that are not members of FINRA, provided that the DEA operates a national securities exchange or facility that trades NMS stocks and the Common Member is a member of such exchange or facility. For all other Common Members, the Participating Organizations shall allocate Common Members among the Participating Organizations (other than FINRA) that operate a national securities exchange that trades NMS stocks based on the principles outlined below and the Participating Organization to which such a Common Member is allocated shall serve as the DREA for that Common Member. (A Participating Organization that operates a national securities exchange that does not trade NMS stocks has no regulatory responsibilities related to Covered Regulation NMS Rules pertaining to NMS stocks and will not serve as DREA for such Covered Regulation NMS Rules.)

b. For Covered Regulation NMS Rules Pertaining to ''NMS securities'' (as defined in Regulation NMS) (*i.e.,* Rule 606 and Rule 613) and the SRO Covered CAT Rules listed on Exhibit A hereto, the DREA shall be the same as the DREA for Covered Regulation NMS Rules pertaining to NMS stocks (and shall serve as the DCSA in paragraph 1 above). For Common Members that are not members of a national securities exchange that trades NMS stocks and thus have not been appointed a DREA under paragraph a., the Participating Organizations shall allocate the Common Members among the Participating Organizations (other than FINRA) that operate a national securities exchange that trades NMS securities based on the principles outlined below and the Participating Organization to which such a Common Member is allocated shall serve as the DREA for that Common Member with respect to Covered Regulation NMS Rules pertaining to NMS securities. The allocation of Common Members to DREAs (including FINRA) and accordingly to serve as DCSA in paragraph 1 above for all Covered Rules is provided in Exhibit B.

c. For purposes of this paragraph 2, any allocation of a Common Member to a Participating Organization other than as specified in paragraphs a. and b. above shall be based on the following principles, except to the extent all affected Participating Organizations consent to one or more different principles and any such agreement to different principles would be deemed an amendment to this Agreement as provided in paragraph 24:

i. The Participating Organizations shall not allocate a Common Member to a Participating Organization unless the Common Member is a member of that Participating Organization.

ii. To the extent practicable, Common Members shall be allocated among the Participating Organizations of which they are members in such a manner as to equalize, as nearly as possible, the allocation among such Participating Organizations.

iii. To the extent practicable, the allocation will take into account the amount of NMS stock activity (or NMS security activity, as applicable) conducted by each Common Member in order to most evenly divide the Common Members with the largest amount of activity among the Participating Organizations of which they are a member. The allocation will also take into account similar allocations pursuant to other plans or agreements to which the Participating Organizations are party to maintain consistency in oversight of the Common Members.[1]

iv. The Participating Organizations may reallocate Common Members from time-to-time and in such manner as they deem appropriate consistent with the terms of this Agreement.

v. Whenever a Common Member ceases to be a member of its DREA (including FINRA), the DREA shall promptly inform the Participating Organizations, who shall review the matter and reallocate the Common

[1] For example, if one Participating Organization was allocated responsibility for a particular Common Member pursuant to a separate Rule 17d–2 Agreement, that Participant Organization would be assigned to be the DREA of that Common Member, unless there is good cause not to make that assignment.

Member to another Participating Organization.

vi. The DEA or DREA (including FINRA) may request that a Common Member be reallocated to another Participating Organization (including the DEA or DREA (including FINRA)) by giving 30 days written notice to the Participating Organizations. The Participating Organizations shall promptly consider such request and, in their discretion, may approve or disapprove such request and if approved, reallocate the Common Member to such Participating Organization.

vii. All determinations by the Participating Organizations with respect to allocations shall be by the affirmative vote of a majority of the Participating Organizations that, at the time of such determination, share the applicable Common Member being allocated; a Participating Organization shall not be entitled to vote on any allocation related to a Common Member unless the Common Member is a member of such Participating Organization.

d. The Participating Organizations agree that they shall conduct meetings among them as needed for the purposes of ensuring proper allocation of Common Members and identifying issues or concerns with respect to the regulation of Common Members. To promote consistency in connection with regulation of Common Members, the Participating Organizations further agree to conduct meetings to discuss the overarching principles as to how Covered Rules, in particular SEA Rule 613 and the SRO Covered CAT Rules, should be surveilled, examined, investigated and enforced. On an ongoing basis, the Participating Organizations agree to consult with and solicit input from the Participating Organizations regarding their surveillance, examination, investigation and enforcement programs regarding SEA Rule 613 and the SRO Covered CAT Rules. In particular, FINRA will consult with Participating Organizations prior to finalizing its disposition and sanctions guidelines with respect to violations of SEA Rule 613 and the SRO Covered CAT Rules. Further, in the period preceding the full implementation of CAT for equities and options securities, FINRA will consult with other Participating Organizations prior to finalizing dispositions other than no further action that involve their Common Members.

e. By signing this Agreement, the Participating Organizations hereby certify that the list of SRO Covered CAT Rules listed on Exhibit A hereto are correct and are identical or substantially similar to each other.

f. Each year following the commencement date of operation of this Agreement, or more frequently if required by changes in any of the SRO Covered CAT Rules, each Participating Organization shall submit an updated list of SRO Covered CAT Rules to FINRA for review which shall (1) add SRO Covered CAT Rules not included in the current list of SRO Covered CAT Rules that are substantially similar to each other; (2) delete SRO Covered CAT Rules included in the current list that are no longer substantially similar; and (3) confirm that the remaining rules on the current list of SRO Covered CAT Rules continue to be substantially similar. FINRA shall review each Participating Organization's annual certification and confirm whether FINRA agrees with the submitted certified and updated list of SRO Covered CAT Rules. The DREA/DCSA shall not have Regulatory Responsibility for any provision in a SRO Covered CAT Rule provision requiring a member of a Participating Organization to provide notice, reports or any other filings directly to a Participating Organization.

3. Scope of Responsibility. Notwithstanding anything herein to the contrary, it is explicitly understood that the terms ''Surveillance Responsibility'' and ''Examination Responsibility'' (collectively referred to herein as the ''Regulatory Responsibility'') do not include any responsibilities beyond those concerning the Covered Rules, and each of the Participating Organizations shall retain full responsibility for, examination, surveillance and enforcement with respect to trading activities or practices involving its own marketplace unless otherwise allocated pursuant to a separate Rule 17d–2 Agreement. The allocation of DCSA Responsibility to a Participating Organization shall not limit another Participating Organization's ability to utilize data from the Consolidated Audit Trail to perform examination, surveillance, investigative, enforcement or other regulatory work concerning potential or identified violations of statutes or rules other than the SRO Covered CAT Rules.

4. No Retention of Regulatory Responsibility. The Participating Organizations do not contemplate the retention of any responsibilities with respect to the regulatory activities being assumed by the DREA/DCSA under the terms of this Agreement. Nothing in this Agreement will be interpreted to prevent a DREA/DCSA from entering into Regulatory Services Agreement(s) to perform its Regulatory Responsibility.

5. No Charge. A DREA/DCSA shall not charge Participating Organizations for performing the Regulatory Responsibility under this Agreement.

6. Applicability of Certain Laws, Rules, Regulations or Orders. Notwithstanding any provision hereof, this Agreement shall be subject to any statute, or any rule or order of the SEC. To the extent such statute, rule, or order is inconsistent with one or more provisions of this Agreement, the statute, rule, or order shall supersede the provision(s) hereof to the extent necessary to be properly effectuated and the provision(s) hereof in that respect shall be null and void.

7. Customer Complaints. If a Participating Organization receives a copy of a customer complaint relating to a DREA's/DCSA's Regulatory Responsibility as set forth in this Agreement, the Participating Organization shall promptly forward to such DREA/DCSA a copy of such customer complaint. It shall be such DREA's/DCSA's responsibility to review and take appropriate action in respect to such complaint.

8. Parties to Make Personnel Available as Witnesses. Each Participating Organization shall make its personnel available to the DREA/DCSA to serve as testimonial or non-testimonial witnesses as necessary to assist the DREA/DCSA in fulfilling the Regulatory Responsibility allocated under this Agreement. The DREA/DCSA shall provide reasonable advance notice when practicable and shall work with a Participating Organization to accommodate reasonable scheduling conflicts within the context and demands as the entity with ultimate regulatory responsibility. The Participating Organization shall pay all reasonable travel and other expenses incurred by its employees to the extent that the DREA/DCSA requires such employees to serve as witnesses, and provide information or other assistance pursuant to this Agreement.

9. Sharing of Work-Papers, Data and Related Information.

a. Sharing. A Participating Organization shall make available to the DREA/DCSA information necessary to assist the DREA/DCSA in fulfilling the Regulatory Responsibility assumed under the terms of this Agreement. Such information shall include *any* information collected by a Participating Organization in the course of performing its regulatory obligations under the Act, including information relating to an on-going disciplinary investigation or action against a member, the amount of a fine imposed on a member, financial information, or

information regarding proprietary trading systems gained in the course of examining a member (''Regulatory Information''). This Regulatory Information shall be used by the DREA/DCSA solely for the purposes of fulfilling the DREA's/DCSA's Regulatory Responsibility.

b. No Waiver of Privilege. The sharing of documents or information between the parties pursuant to this Agreement shall not be deemed a waiver as against third parties of regulatory or other privileges relating to the discovery of documents or information.

10. Special or Cause Examinations and Enforcement Proceedings. Nothing in this Agreement shall restrict or in any way encumber the right of a Participating Organization to conduct special or cause examinations of a Common Member, or take enforcement proceedings against a Common Member as a Participating Organization, in its sole discretion, shall deem appropriate or necessary.

11. Dispute Resolution Under this Agreement.

a. Negotiation. The Participating Organizations will attempt to resolve any disputes through good faith negotiation and discussion, escalating such discussion up through the appropriate management levels until reaching the executive management level. In the event a dispute cannot be settled through these means, the Participating Organizations shall refer the dispute to binding arbitration.

b. Binding Arbitration. All claims, disputes, controversies, and other matters in question between the Participating Organizations to this Agreement arising out of or relating to this Agreement or the breach thereof that cannot be resolved by the Participating Organizations will be resolved through binding arbitration. Unless otherwise agreed by the Participating Organizations, a dispute submitted to binding arbitration pursuant to this paragraph shall be resolved using the following procedures:

(i) The arbitration shall be conducted in a city selected by the DREA/DCSA in which it maintains a principal office or where otherwise agreed to by the Participating Organizations in accordance with the Commercial Arbitration Rules of the American Arbitration Association and judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction thereof; and

(ii) There shall be three arbitrators, and the chairperson of the arbitration panel shall be an attorney. The arbitrators shall be appointed in accordance with the Commercial Arbitration Rules of the American Arbitration Association.

12. Limitation of Liability. As between the Participating Organizations, no Participating Organization, including its respective directors, governors, officers, employees and agents, will be liable to any other Participating Organization, or its directors, governors, officers, employees and agents, for any liability, loss or damage resulting from any delays, inaccuracies, errors or omissions with respect to its performing or failing to perform regulatory responsibilities, obligations, or functions, except: (a) as otherwise provided for under the Act; (b) in instances of a Participating Organization's gross negligence, willful misconduct or reckless disregard with respect to another Participating Organization; or (c) in instances of a breach of confidentiality obligations owed to another Participating Organization. The Participating Organizations understand and agree that the regulatory responsibilities are being performed on a good faith and best effort basis and no warranties, express or implied, are made by any Participating Organization to any other Participating Organization with respect to any of the responsibilities to be performed hereunder. This paragraph is not intended to create liability of any Participating Organization to any third party.

13. SEC Approval.

a. The Participating Organizations agree to file promptly this Agreement with the SEC for its review and approval. FINRA shall file this Agreement on behalf, and with the explicit consent, of all Participating Organizations.

b. If approved by the SEC, the Participating Organizations will notify their members of the general terms of the Agreement and of its impact on their members.

14. Subsequent Parties; Limited Relationship. This Agreement shall inure to the benefit of and shall be binding upon the Participating Organizations hereto and their respective legal representatives, successors, and assigns. Nothing in this Agreement, expressed or implied, is intended or shall: (a) confer on any person other than the Participating Organizations hereto, or their respective legal representatives, successors, and assigns, any rights, remedies, obligations or liabilities under or by reason of this Agreement, (b) constitute the Participating Organizations hereto partners or participants in a joint venture, or (c) appoint one Participating Organization the agent of the other.

15. Assignment. No Participating Organization may assign this Agreement without the prior written consent of the DREAs/DCSAs performing Regulatory Responsibility on behalf of such Participating Organization, which consent shall not be unreasonably withheld, conditioned or delayed; provided, however, that any Participating Organization may assign the Agreement to a corporation controlling, controlled by or under common control with the Participating Organization without the prior written consent of such Participating Organization's DREAs/DCSAs. No assignment shall be effective without Commission approval.

16. Severability. Any term or provision of this Agreement that is invalid or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such invalidity or unenforceability without rendering invalid or unenforceable the remaining terms and provisions of this Agreement or affecting the validity or enforceability of any of the terms or provisions of this Agreement in any other jurisdiction.

17. Termination. Any Participating Organization may cancel its participation in the Agreement at any time upon the approval of the Commission after 180 days written notice to the other Participating Organizations (or in the case of a change of control in ownership of a Participating Organization, such other notice time period as that Participating Organization may choose). The cancellation of its participation in this Agreement by any Participating Organization shall not terminate this Agreement as to the remaining Participating Organizations.

18. General. The Participating Organizations agree to perform all acts and execute all supplementary instruments or documents that may be reasonably necessary or desirable to carry out the provisions of this Agreement.

19. Written Notice. Any written notice required or permitted to be given under this Agreement shall be deemed given if sent by certified mail, return receipt requested, or by a comparable means of electronic communication to each Participating Organization entitled to receipt thereof, to the attention of the Participating Organization's representative at the Participating Organization's then principal office or by email.

20. Confidentiality. The Participating Organizations agree that documents or

information shared shall be held in confidence, and used only for the purposes of carrying out their respective regulatory obligations under this Agreement, provided, however, that each Participating Organization may disclose such documents or information as may be required to comply with applicable regulatory requirements or requests for information from the SEC. Any Participating Organization disclosing confidential documents or information in compliance with applicable regulatory or oversight requirements will request confidential treatment of such information. No Participating Organization shall assert regulatory or other privileges as against the other with respect to Regulatory Information that is required to be shared pursuant to this Agreement.

21. Regulatory Responsibility. Pursuant to Section 17(d)(1)(A) of the Act, and Rule 17d–2 thereunder, the Participating Organizations request the SEC, upon its approval of this Agreement, to relieve the Participating Organizations which are participants in this Agreement that are not the DREA or DCSA as to a Common Member of any and all responsibilities with respect to the matters allocated to the DREA or DCSA pursuant to this Agreement for purposes of §§ 17(d) and 19(g) of the Act.

22. Governing Law. This Agreement shall be deemed to have been made in the State of New York, and shall be construed and enforced in accordance with the law of the State of New York, without reference to principles of conflicts of laws thereof. Each of the Participating Organizations hereby consents to submit to the jurisdiction of the courts of the State of New York in connection with any action or proceeding relating to this Agreement.

23. Survival of Provisions. Provisions intended by their terms or context to survive and continue notwithstanding delivery of the regulatory services by the DREA/DCSA and any expiration of this Agreement shall survive and continue.

24. Amendment.

a. This Agreement may be amended to add a new Participating Organization, provided that such Participating Organization does not assume regulatory responsibility, by an amendment executed by all applicable DREAs/DCSAs and such new Participating Organization. All other Participating Organizations expressly consent to allow such DREAs/DCSAs to jointly add new Participating Organizations to the Agreement as provided above. Such DREAs/DCSAs will promptly notify all Participating Organizations of any such amendments to add a new Participating Organization.

b. All other amendments must be approved by each Participating Organization. All amendments, including adding a new Participating Organization but excluding changes to Exhibit B, must be filed with and approved by the Commission before they become effective.

25. Effective Date. The Effective Date of this Agreement will be the date the SEC declares this Agreement to be effective pursuant to authority conferred by § 17(d) of the Act, and Rule 17d–2 thereunder.

26. Counterparts. This Agreement may be executed in any number of counterparts, including facsimile, each of which will be deemed an original, but all of which taken together shall constitute one single agreement among the Participating Organizations.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/other.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number 4–618 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number 4–618. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/other.shtml*). Copies of the plan also will be available for inspection and copying at the principal offices of the Participating Organizations. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number 4–618 and should be submitted on or before [INSERT DATE 21 DAYS AFTER DATE OF PUBLICATION IN THE **FEDERAL REGISTER**].

V. Discussion

The Commission finds that the Plan, as amended, is consistent with the factors set forth in Section 17(d) of the Act[24] and Rule 17d–2(c) thereunder[25] in that the proposed amended Plan is necessary or appropriate in the public interest and for the protection of investors, fosters cooperation and coordination among SROs, and removes impediments to and fosters the development of the national market system. In particular, the Commission

[24] 15 U.S.C. 78q(d).

[25] 17 CFR 240.17d–2(c).

believes that the proposed amended Plan should reduce unnecessary regulatory duplication by allocating to the applicable DREA certain examination and enforcement responsibilities, and to the applicable DCSA certain surveillance, investigation, and enforcement responsibilities, for Common Members that would otherwise be performed by multiple Parties. Accordingly, the proposed amended Plan promotes efficiency by reducing costs to Common Members. Furthermore, because the Parties will coordinate their regulatory functions in accordance with the proposed amended Plan, the amended Plan should promote investor protection.

The Commission is hereby declaring effective a plan that allocates regulatory responsibility for certain provisions of the federal securities laws, rules, and regulations as set forth in Exhibit A to the Plan. The Commission notes that any amendment to the Plan must be approved by the relevant Parties as set forth in Paragraph 24 of the Plan and must be filed with and approved by the Commission before it may become effective.[26]

Under paragraph (c) of Rule 17d–2, the Commission may, after appropriate notice and comment, declare a plan, or any part of a plan, effective. In this instance, the Commission believes that appropriate notice and comment can take place after the proposed amendment is effective. In particular, the purpose of the amendment is to add GIX as a Participating Organization. The Commission notes that the most recent prior amendment to the Plan was published for comment and the Commission did not receive any comments thereon.[27] The Commission believes that the current amendment to the Plan does not raise any new regulatory issues that the Commission has not previously considered, and therefore believes that the amended Plan should become effective without any undue delay.

VI. Conclusion

This Order gives effect to the Plan filed with the Commission in File No. 4–618. The Parties shall notify all members affected by the Plan of their rights and obligations under the Plan.

It is therefore ordered, pursuant to Section 17(d) of the Act, that the Plan in File No. 4618 is hereby approved and declared effective.

It is further ordered that the Parties who are not the DREA or DCSA as to a particular Common Member are relieved of those regulatory responsibilities allocated to the Common Member's DREA or DCSA under the Plan to the extent of such allocation.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[28]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 35795; File No. 812–15853]

MA Specialty Credit Income Fund, et al.

DATES: November 20, 2025.

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'').

ACTION: Notice.

Notice of application for an order under sections 17(d) and 57(i) of the Investment Company Act of 1940 (the ''Act'') and rule 17d–1 under the Act to permit certain joint transactions otherwise prohibited by sections 17(d) and 57(a)(4) of the Act and rule 17d–1 under the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain business development companies (''BDCs'') and closed-end management investment companies to co-invest in portfolio companies with each other and with certain affiliated investment entities.

APPLICANTS: MA Specialty Credit Income Fund; MA Asset Management, LLC; and certain of their affiliated entities as described in Schedule A to the application.

FILING DATES: The application was filed on July 11, 2025.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the Applicants with a copy of the request by email, if an email address is listed for the relevant Applicant below, or personally or by mail, if a physical address is listed for the relevant Applicant below. Hearing requests should be received by the Commission by 5:30 p.m. on December 15, 2025, and should be accompanied by proof of service on the Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary at *Secretarys-Office@sec.gov.*

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.* Applicants: Paul Grady, MA Specialty Credit Income Fund, *Paul.Grady@mafinancial.com;* and William J. Bielefeld, Esq. and Matthew E. Barsamian, Esq., Dechert LLP, *William.Bielefeld@dechert.com* and *Matthew.Barsamian@dechert.com.*

FOR FURTHER INFORMATION CONTACT: Adam Large, Senior Special Counsel, Steven Amchan, Senior Counsel, or Daniele Marchesani, Assistant Chief Counsel, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: For Applicants' representations, legal analysis, and conditions, please refer to Applicants' application, dated July 11, 2025, which may be obtained via the Commission's website by searching for the file number at the top of this document, or for an Applicant using the Company name search field, on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/edgar/searchedgar/companysearch.html.* You may also call the SEC's Office of Investor Education and Advocacy at (202) 551–8090.

For the Commission, by the Division of Investment Management, under delegated authority.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[OMB Control No. 3235–0764]

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Extension: Rule 6c–11

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Rule 6c–11 under the Investment Company Act of 1940 (the ''Act'') permits exchange-traded funds (''ETFs'') that satisfy certain conditions to operate without first obtaining an exemptive order from the Commission. The rule was designed to create a consistent, transparent, and efficient regulatory framework for ETFs and facilitate greater competition and innovation among ETFs. Rule 6c–11 requires an ETF to disclose certain information on its website, to maintain certain records, and to adopt and implement written policies and procedures governing its constructions of baskets, as well as written policies and procedures that set forth detailed parameters for the construction and acceptance of custom baskets that are in the best interests of the ETF and its shareholders.

We estimate that the total hour burdens and time costs associated with rule 6c–11, including the burden associated with reviewing and updating website disclosures, recordkeeping, and reviewing and updating policies and procedures, will result in an average aggregate annual burden of 74,580.75 hours and an average aggregate time cost of $1,964,817.

The requirements of this collection of information are mandatory. If information collected pursuant to rule 6c–11 is reviewed by the Commission's examination staff, it will be accorded the same level of confidentiality accorded to other responses provided to the Commission in the context of its examination and oversight program.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number.

Written comments are invited on: (a) whether this proposed collection of information is necessary for the proper performance of the functions of the SEC, including whether the information will have practical utility; (b) the accuracy of the SEC's estimate of the burden imposed by the proposed collection of information, including the validity of the methodology and the assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated, electronic collection techniques or other forms of information technology.

The public may view and comment on this information collection request at: *https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202509-3235-001* or email comment to *MBX.OMB.OIRA.SEC_desk_officer@omb.eop.gov* within 30 days of the day after publication of this notice, by December 26, 2025.

Dated: November 21, 2025.

Sherry R. Haywood,

Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #21378 and #21379; NORTH DAKOTA Disaster Number ND–20014]

Presidential Declaration of a Major Disaster for Public Assistance Only for the State of North Dakota

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for Public Assistance Only for the State of North Dakota (FEMA–4895–DR), dated October 22, 2025.

Incident: Severe Storms, Straight-Line Winds, and Tornadoes.

DATES: Issued on October 22, 2025.

Incident Period: August 7, 2025 through August 8, 2025.

Physical Loan Application Deadline Date: December 22, 2025.

Economic Injury (EIDL) Loan Application Deadline Date: July 22, 2026.

ADDRESSES: *Visit the MySBA Loan Portal at https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Sharon Henderson, Office of Disaster Recovery & Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the President's major disaster declaration on October 22, 2025, Private Non-Profit organizations that provide essential services of a governmental nature may file disaster loan applications online using the MySBA Loan Portal *https://lending.sba.gov* or other locally announced locations. Please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955 for further assistance.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties:

Barnes, Grand Forks, Griggs, Kidder, Nelson, Steele, Stutsman.

The Interest Rates are:

	Percent
For Physical Damage:	
Non-Profit Organizations with Credit Available Elsewhere ...	3.625
Non-Profit Organizations without Credit Available Elsewhere	3.625
For Economic Injury:	
Non-Profit Organizations without Credit Available Elsewhere	3.625

The number assigned to this disaster for physical damage is 21378C and for economic injury is 213790.

(Catalog of Federal Domestic Assistance Number 59008)

(Authority: 13 CFR 123.3(b).)

James Stallings,

Associate Administrator, Office of Disaster Recovery & Resilience.

BILLING CODE 8026–09–P

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA–2025–0011]

Privacy Act of 1974; Matching Program

AGENCY: Social Security Administration (SSA).

ACTION: Notice of a new matching program.

SUMMARY: In accordance with the provisions of the Privacy Act, as amended, this notice announces a new matching program with the United States Department of the Treasury,

Internal Revenue Service (IRS). Under this matching program, the IRS will disclose IRS return information to SSA for use in verifying eligibility for, and the correct amount of, benefits to qualified aged, blind, and disabled individuals.

DATES: The deadline to submit comments on the proposed matching program is December 26, 2025.

The matching program will be applicable on January 1, 2026, or once a minimum of 30 days after publication of this notice has elapsed, whichever is later. The matching program will be in effect for a period of 18 months.

ADDRESSES: You may submit comments by any one of three methods—internet, fax, or mail. Do not submit the same comments multiple times or by more than one method. Regardless of which method you choose, please state that your comments refer to Docket No. SSA–2025–0011 so that we may associate your comments with the correct regulation.

Caution: You should be careful to include in your comments only information that you wish to make publicly available. We strongly urge you not to include in your comments any personal information, such as Social Security numbers or medical information.

1. *Internet:* We strongly recommend that you submit your comments via the internet. Please visit the Federal eRulemaking portal at *https://www.regulations.gov.* Use the *Search* function to find docket number SSA–2025–0011 and then submit your comments. The system will issue you a tracking number to confirm your submission. You will not be able to view your comment immediately because we must post each submission manually. It may take up to a week for your comments to be viewable.

2. *Fax:* Fax comments to (833) 410–1631.

3. *Mail:* Matthew Ramsey, Executive Director, Head of Privacy and Disclosure Policy, Law and Policy, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235–6401, or emailing *Matthew.Ramsey@ssa.gov.* Comments are also available for public viewing on the Federal eRulemaking portal at *https://www.regulations.gov* or in person, during regular business hours, by arranging with the contact person identified below.

FOR FURTHER INFORMATION CONTACT: Interested parties may submit general questions about the matching program to Andrea Huseth, Division Director, Privacy and Disclosure Policy, Law and Policy, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235–6401, at telephone: (410) 608–9675, or send an email to *Andrea.Huseth@ssa.gov.*

SUPPLEMENTARY INFORMATION: This is the re-establishment of a matching program that is set to expire between SSA and IRS, which supports SSA's efficient administration of its Title XVI Supplemental Security Income program.

Matthew Ramsey,

Head of Privacy and Disclosure Policy, Law and Policy.

Participating Agencies

SSA and IRS.

Authority for Conducting the Matching Program

The matching agreement between SSA and IRS is executed pursuant to the Privacy Act of 1974 (5 U.S.C. 552a), as amended by the Computer Matching and Privacy Protection Act of 1988, and otherwise; and the Office of Management and Budget (OMB) Final Guidance interpreting those Acts.

Section 6103(l)(7) of the Internal Revenue Code (26 U.S.C. 6103(l)(7)) authorizes IRS to disclose return information with respect to unearned income to Federal, State, or local agencies administering certain federally-assisted benefit programs under the Social Security Act (Act).

Section 1631(e)(1)(B) of the Act (42 U.S.C. 1383(e)(1)(B)) requires verification of Supplemental Security Income eligibility and benefit amounts with independent or collateral sources. This section of the Act provides that the ''Commissioner of Social Security shall, as may be necessary, request and utilize information available pursuant to section 6103(l)(7) of the Internal Revenue Code'' for purposes of Title XVI benefits and for federally-administered supplementary payments of the type described in section 1616(a) of the Act (including payments pursuant to an agreement entered into under section 212(a) of Pub. L. 93–66).

The legal authority for the disclosure of SSA data under the agreement is section 1106 of the Act (42 U.S.C. 1306), section (b)(3) of the Privacy Act (5 U.S.C. 552a(b)(3)), and the regulations and guidance promulgated under these provisions.

Purpose(s)

The agreement sets forth the terms and conditions under which IRS agrees under the authority of 26 U.S.C. 6103(l)(7) to disclose to SSA certain return information for use in verifying eligibility for, and the correct amount of, benefits provided under Title XVI of the Act to qualified aged, blind, and disabled individuals; and for federally-administered supplementary payments as described in section 1616(a) of the Act (42 U.S.C. 1382e(a)) (including payments pursuant to an agreement entered into under section 212(a) of Pub. L. 93–66 (87 Stat. 152)). 42 U.S.C. 1382 note.

Categories of Individuals

The individuals whose information is involved in the matching program are aged, blind, or disabled individuals who are applicants or recipients (and their deemors) of title XVI benefits.

Categories of Records

SSA will provide electronically to IRS the following data elements in the finder file:

- Social Security number, and
- Name control

IRS will disclose to SSA the following:

- Payee Account Number,
- Payee Name and Mailing Address,
- Payee Taxpayer Identification Number (TIN),
- Payer Name and Address,
- Payer TIN, and
- Income Type and Amount.

System(s) of Records

SSA's system of records is the Supplemental Security Income Record and Special Veterans Benefit 60–0103, last fully published at 71 **Federal Register** (FR) 1830 (January 11, 2006), amended at 72 FR 69723 (December 10, 2007), 83 FR 31250–51 (July 3, 2018), 83 FR 54969 (November 1, 2018), 89 FR 825 (January 5, 2024), and 89 FR 14554 (February 27, 2024).

IRS will match SSA's information with its Information Return Master File [Treasury/IRS 22.061], as published at 80 FR 54081–082 (September 8, 2015) and amended at 85 FR 64227 (October 9, 2020), through the *Disclosure of Information to Federal, State and Local Agencies* program.

BILLING CODE 4191–02–P

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA–2025–0387]

Privacy Act of 1974; System of Records

AGENCY: Social Security Administration (SSA).

ACTION: Notice of a modified system of records.

SUMMARY: In accordance with the Privacy Act of 1974, we are issuing

public notice of our intent to modify our existing systems of records listed below under the System Name and Number section. This notice publishes details of the modified systems as set forth below under the caption, **SUPPLEMENTARY INFORMATION**.

DATES: The system of records notice (SORN) is applicable upon its publication in today's **Federal Register**, with the exception of the new routine use, which is effective December 26, 2025.

We invite public comment on the addition of the routine use. In accordance with the Privacy Act of 1974, we are providing the public a 30-day period in which to submit comments. Therefore, please submit any comments by December 26, 2025.

ADDRESSES: The public, Office of Management and Budget (OMB), and Congress may comment on this publication by writing to the Head of Privacy and Disclosure Policy, Privacy and Disclosure Policy, Law and Policy, SSA, Room G–401 West High Rise, 6401 Security Boulevard, Baltimore, Maryland 21235–6401, or through the Federal e-Rulemaking Portal at *https://www.regulations.gov.* Please reference docket number SSA–2025–0387. All comments we receive will be available for public inspection at the above address, and we will post them to *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Tristin Dorsey, Government Information Specialist, Privacy Implementation Division, Privacy and Disclosure Policy, Law and Policy, SSA, Room G–401 West High Rise, 6401 Security Boulevard, Baltimore, Maryland 21235–6401, telephone: (410) 966–5855, email: *OGC.OPD.SORN@ssa.gov.*

SUPPLEMENTARY INFORMATION: Executive Order 14249, *Protecting America's Bank Account Against Fraud, Waste, and Abuse,* requires agencies to take action to defend against financial fraud and prevent improper payments in collaboration with the U.S. Department of the Treasury. To assist SSA in administering the Social Security Act, we are adding the following routine use to the systems of records listed below to permit disclosure to Department of Treasury to review SSA's payment and award eligibility through the Do Not Pay Working System for the purpose of identifying, preventing, or recouping fraud and improper payments when disclosure meets the requirements in 20 CFR 401.150(c):

To the U.S. Department of the Treasury, when disclosure of the information is relevant to review SSA's payment and award eligibility through the Do Not Pay Working System for the purposes of identifying, preventing or recouping improper payments to an applicant for, or recipient of, Federal funds disbursed by a state (meaning a state of the United States, the District of Columbia, a territory or possession of the United States, or a federally-recognized Indian tribe) in a state-administered, federally-funded program. This routine use will be applied when disclosure meets the requirements in 20 CFR 401.150(c).

We are not republishing the system of records notices in their entirety. Instead, we are republishing only the identification number; the system of records name; the number of the new routine use; and the issue of the **Federal Register** in which the system of records notice was last published in full, including the subsequent modification to the system of records notice's publication date and page number.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

SSA provides the address of the component and system manager responsible for each system in the **Federal Register** notices listed above.

SYSTEM MANAGER(S):

SSA provides the title, business address, and contact information of the agency official who is responsible for the system in the **Federal Register** notices listed above.

HISTORY:

SSA provides the citation to the last fully published **Federal Register** notices, as well as last subsequent modification notice to the system of records notices listed above.

In accordance with 5 U.S.C. 552a(r), we have provided a report to OMB and Congress on this modified system of records.

Matthew Ramsey,

Head of Privacy and Disclosure Policy, Law and Policy.

BILLING CODE 4191–02–P

DEPARTMENT OF STATE

[Delegation of Authority No. 601]

Delegation of Authority; Cyberspace and Digital Policy

By virtue of the authority vested in the Secretary of State by the laws of the United States, including section 1(a)(4) of the State Department Basic Authorities Act (22 U.S.C. 2651a(a)(4)) and the authorities hereinafter mentioned, I hereby delegate to the Ambassador at Large for Cyberspace and Digital Policy, to the extent authorized by law, the authorities and functions vested in the Secretary of State by 22 U.S.C. 2707 and the following authorities:

1. Section IV of E.O. 10530 of May 10, 1954, regarding the authority to grant or revoke approval of submarine cables;

2. E.O. 13873 of May 15, 2019, *Securing the Information and Communications Technology and Services Supply Chain;*

3. Section 3 of E.O. 13913 of April 4, 2020, relating to the function of advisor to the Committee for the Assessment of Foreign Participation in the United States Telecommunications Services Sector;

4. E.O. 14117 of February 28, 2024, *Preventing Access to Americans' Bulk Sensitive Personal Data and United States Government-Related Data by Countries of Concern;* and

5. Section 2 of the Memorandum on the Delegation of Authority Under the Protecting Americans from Foreign Adversary Controlled Applications Act, relating to the President's authorities under Division H of Public Law 118–50.

The Secretary, Deputy Secretary, Deputy Secretary for Management and Resources, and the Under Secretary for Economic Growth, Energy, and the Environment may also exercise any

function or authority delegated herein. Any reference in this delegation of authority to a statute shall be deemed to be a reference to such statute as amended from time to time. These authorities may be re-delegated to the extent authorized by law. Delegation of Authority 541, dated May 21, 2023, is hereby rescinded. No other delegation of authority is affected by this action.

This delegation of authority will be published in the **Federal Register**.

Dated: September 21, 2025

Marco Rubio,

Secretary of State.

[FR Doc. 2025–20978 Filed 11–24–25; 8:45 am]

BILLING CODE 4710–10–P

DEPARTMENT OF STATE

[Public Notice: 12870]

Certification Related to Foreign Military Financing for Colombia Under Section 7045(c)(3)(B) of the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2024 (Div. F, Pub. L. 118–47), as Carried Forward by the Full-Year Continuing Appropriations Act, 2025 (Div. A, Pub. L. 119–4)

Pursuant to the authority vested in the Secretary of State, including under section 7045(c)(3)(B) of the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2024 (Div. F, Pub. L. 118–47), as carried forward by the Full-Year Continuing Appropriations Act, 2025 (Div. A, Pub. L. 119–4), and Delegation of Authority 513, I hereby certify that:

i. the Special Jurisdiction for Peace and other judicial authorities, as appropriate, are sentencing perpetrators of gross violations of human rights, including those with command responsibility, to deprivation of liberty;

ii. the Government of Colombia is making consistent progress in reducing threats and attacks against human rights defenders and other civil society activists, and judicial authorities are prosecuting and punishing those responsible for ordering and carrying out such attacks;

iii. the Government of Colombia is making consistent progress in protecting Afro-Colombian and Indigenous communities and is respecting their rights and territories;

iv. senior military officers credibly alleged, or whose units are credibly alleged, to be responsible for ordering, committing, and covering up cases of false positives and other extrajudicial killings, or of committing other gross violations of human rights, or of conducting illegal communications intercepts or other illicit surveillance, are being held accountable, including removal from active duty if found guilty through criminal, administrative, or disciplinary proceedings; and

v. the Colombian Armed Forces are cooperating fully with the requirements described in clauses (i) through (iv) above.

I further note that the Department of State does not believe the criteria established in this act are appropriate or sufficient for accurately assessing the Colombian government's defense of human rights in Colombia.

This Certification shall be published in the **Federal Register** and shall be transmitted, along with the accompanying Memorandum of Justification, to Congress.

Dated: September 25, 2025.

Christopher Landau,

Deputy Secretary of State.

BILLING CODE 4710–29–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket Number USTR–2025–0208]

Applications for Inclusion on the Binational Panels Roster Under the United States-Mexico-Canada Agreement

AGENCY: Office of the United States Trade Representative (USTR).

ACTION: Request for applications.

SUMMARY: The United States-Mexico-Canada Agreement (USMCA) provides for the establishment of a roster of individuals to serve on binational panels convened to review final determinations in antidumping or countervailing duty (AD/CVD) proceedings and amendments to AD/CVD statutes of a USMCA Party. The United States annually renews its selections for the roster. USTR invites applications from eligible individuals wishing to be included on the roster for the period April 1, 2026, through March 31, 2027.

DATES: USTR must receive your application by December 12, 2025.

ADDRESSES: You should submit your application through the Federal eRulemaking Portal: *http://www.regulations.gov,* using docket number USTR–2025–0208. Follow the submission instructions below.

FOR FURTHER INFORMATION CONTACT: Thor Petersen, Assistant General Counsel, *Thorvald.J.Petersen@ustr.eop.gov,* 202.395.9599.

SUPPLEMENTARY INFORMATION:

A. Binational Panel AD/CVD Reviews Under the USMCA

Article 10.12 of the USMCA provides that a party involved in an AD/CVD proceeding may obtain review by a binational panel of a final AD/CVD determination of one USMCA Party with respect to the products of another USMCA Party. Binational panels decide whether AD/CVD determinations are in accordance with the domestic laws of the importing USMCA Party using the standard of review that would have been applied by a domestic court of the importing USMCA Party. A panel may uphold the AD/CVD determination, or may remand it to the national administering authority for action not inconsistent with the panel's decision. Panel decisions may be reviewed in specific circumstances by a 3-member extraordinary challenge committee, selected from a separate roster composed of 15 current or former judges.

Article 10.11 of the USMCA provides that a USMCA Party may refer an amendment to the AD/CVD statutes of another USMCA Party to a binational panel for a declaratory opinion as to whether the amendment is inconsistent with the General Agreement on Tariffs and Trade (GATT), the WTO Antidumping or Subsidies Agreements, successor agreements, or the object and purpose of the USMCA with regard to the establishment of fair and predictable conditions for the progressive liberalization of trade while maintaining effective and fair disciplines on unfair trade practices. If the panel finds that the amendment is inconsistent, the two USMCA Parties must consult and seek to achieve a mutually satisfactory solution.

B. Roster and Composition of Binational Panels

Annex 10–B.1 of the USMCA provides for the maintenance of a roster of at least 75 individuals for service on Chapter 10 binational panels, with each USMCA Party selecting at least 25 individuals. A separate five-person panel is formed for each review of a final AD/CVD determination or statutory amendment. The majority of individuals on each panel must consist of lawyers in good standing, and the chair of the panel must be a lawyer.

When there is a request to establish a panel, roster members from the two involved USMCA Parties will complete a disclosure form that is used to identify possible conflicts of interest or appearances thereof. The disclosure form requests information regarding

financial interests and affiliations, including information regarding the identity of clients of the roster member and, if applicable, clients of the roster member's firm.

C. Criteria for Eligibility for Inclusion on Roster

The United States bases the selection of individuals for inclusion on the Chapter 10 roster on the eligibility criteria set out in Annex 10–B.1 of the USMCA. Annex 10–B.1 provides that Chapter 10 roster members must be citizens of a USMCA Party, must be of good character and of high standing and repute, and are to be chosen strictly on the basis of their objectivity, reliability, sound judgment, and general familiarity with international trade law. Aside from judges, roster members may not be affiliated with the governments of any of the three USMCA Parties. Annex 10–B.1 also provides that, to the fullest extent practicable, the roster must include judges and former judges.

D. Adherence to the USMCA Code of Conduct for Binational Panelists

The Code of Conduct under Chapter 10 and Chapter 31 (Dispute Settlement) (see *https://can-mex-usa-sec.org/secretariat/agreement-accord-acuerdo/usmca-aceum-tmec/code-code-codigo.aspx?lang=eng*), which was established pursuant to Article 10.17 of the USMCA, provides that current and former Chapter 10 roster members ''shall avoid impropriety and the appearance of impropriety and shall observe high standards of conduct so that the integrity and impartiality of the dispute settlement process is preserved.'' The Code of Conduct also provides that candidates who serve on Chapter 10 rosters, as well as those who ultimately are selected to serve as panelists, have an obligation to ''disclose any interest, relationship or matter that is likely to affect [their] impartiality or independence, or that might reasonably create an appearance of impropriety or an apprehension of bias.'' Annex 10–B.1 of the USMCA provides that roster members may engage in other business while serving as panelists, subject to the Code of Conduct and provided that such business does not interfere with the performance of the panelist's duties. In particular, Annex 10–B.1 states that ''[w]hile acting as a panelist, a panelist may not appear as counsel before another panel.''

E. Procedures for Selection of Roster Members

Section 412 of the United States-Mexico-Canada Agreement Implementation Act (Pub. L. 116–113, 19 U.S.C. 4582) establishes procedures for the selection by USTR of the individuals chosen by the United States for inclusion on the Chapter 10 roster. The roster is renewed annually and applies during the one-year period beginning April 1 of each calendar year.

Under Section 412 of the Act, an interagency committee chaired by USTR prepares a preliminary list of candidates eligible for inclusion on the Chapter 10 roster. After consultation with the Senate Committee on Finance and the House Committee on Ways and Means, the U.S. Trade Representative selects the final list of individuals chosen by the United States for inclusion on the Chapter 10 roster.

F. Applications

USTR invites eligible individuals who wish to be included on the Chapter 10 roster for the period April 1, 2026, through March 31, 2027, to submit applications. In order to be assured of consideration, USTR must receive your application by December 12, 2025. Submit applications electronically to *Regulations.gov*, using docket number USTR–2025–0208. For technical questions on submitting comments on *Regulations.gov*, please contact the *Regulations.gov* help desk at *regulationshelpdesk@gsa.gov* or 1.866.498.2945. If you are unable to submit through *Regulations.gov* after seeking assistance from the help desk, please contact Sandy McKinzy at 202.395.9483 before transmitting your application and in advance of the deadline.

In order to ensure the timely receipt and consideration of applications, USTR strongly encourages applicants to make on-line submissions, using *Regulations.gov*. To apply via *Regulations.gov*, enter docket number USTR–2025–0208 on the home page and click 'search.' The site will provide a search-results page listing all documents associated with this docket. Find a reference to this notice by selecting 'notice' under 'document type' on the left side of the search-results page, and click on the 'comment' link. For further information on using the *Regulations.gov* website, please consult the resources provided on the website by clicking on 'How to Use *Regulations.gov*' on the bottom of the page.

Regulations.gov allows users to provide comments by filling in a 'type comment' field, or by attaching a document using an 'upload file' field. USTR prefers that candidates submit applications in an attached document. If a document is attached, please type ''Application for Inclusion on USMCA Chapter 10 Roster'' in the 'upload file' field. USTR prefers submissions in Microsoft Word (.doc) or Adobe Acrobat (.pdf). If the submission is in an application other than those two, please indicate the name of the application in the 'type comment' field.

Applications must be typewritten, and should be headed ''Application for Inclusion on USMCA Chapter 10 Roster.'' Applications should include the following information, and each section of the application should be numbered as indicated:

1. Name of the applicant.
2. Business address, telephone number, fax number, and email address.
3. Citizenship(s).
4. Current employment, including title, description of responsibility, and name and address of employer.
5. Relevant education and professional training.
6. Spanish language fluency, written and spoken.
7. Post-education employment history, including the dates and addresses of each prior position and a summary of responsibilities.
8. Relevant professional affiliations and certifications, including, if any, current bar memberships in good standing.
9. A list and copies of publications, testimony, and speeches, if any, concerning AD/CVD law. Judges or former judges should list relevant judicial decisions. Submit only one copy of publications, testimony, speeches, and decisions.
10. Summary of any current and past employment by, or consulting or other work for, the Governments of the United States, Canada, or Mexico.
11. The names and nationalities of all foreign principals for whom the applicant is currently or has previously been registered pursuant to the Foreign Agents Registration Act, 22 U.S.C. 611 *et seq.,* and the dates of all registration periods.
12. List of proceedings brought under U.S., Canadian, or Mexican AD/CVD law regarding imports of U.S., Canadian, or Mexican products in which the applicant advised or represented (for example, as consultant or attorney) any U.S., Canadian, or Mexican party to such proceeding and, for each such proceeding listed, the name and country of incorporation of such party.
13. A short statement of qualifications and availability for service on Chapter 10 panels, including information relevant to the applicant's familiarity with international trade law and willingness and ability to make time

commitments necessary for service on panels.

14. On a separate page, the names, addresses, telephone and fax numbers of three individuals willing to provide information concerning the applicant's qualifications for service, including the applicant's character, reputation, reliability, judgment, and familiarity with international trade law.

G. Current Roster Members and Prior Applicants

Current members of the Chapter 10 roster do not need to resubmit their full applications. Current members of the Chapter 10 roster who remain interested in inclusion on the roster should submit a statement indicating that they are reapplying and submit any applicable updates to their applications on file. Individuals who previously have applied but have not been selected must submit new applications to reapply. If an applicant, including a current or former roster member, has previously submitted materials referred to in item 9, such materials need not be resubmitted.

H. Public Disclosure

Applications are covered by a Privacy Act System of Records Notice and are not subject to public disclosure and will not be posted publicly on *Regulations.gov*. They may be referred to other federal agencies and Congressional committees in the course of determining eligibility for the roster, and shared with foreign governments and the USMCA Secretariat in the course of panel selection.

I. False Statements

False statements by applicants regarding their personal or professional qualifications, or financial or other relevant interests that bear on the applicants' suitability for placement on the Chapter 10 roster or for appointment to binational panels, are subject to criminal sanctions under 18 U.S.C. 1001.

Juan Millan,

Deputy General Counsel for Monitoring & Enforcement, Office of the United States Trade Representative.

[FR Doc. 2025–21083 Filed 11–24–25; 8:45 am]

BILLING CODE 3390–F4–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Noise Compatibility Program for Hollywood Burbank Airport, Burbank, Los Angeles County, California

AGENCY: Federal Aviation Administration, DOT.

ACTION: Acceptance of Hollywood Burbank airport noise exposure maps.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by Burbank-Glendale-Pasadena Airport Authority (BGPAA) for Hollywood Burbank Airport is compliant with applicable statutory and regulatory requirements.

DATES: The effective date of the FAA's determination on the noise exposure maps is November 20, 2025.

FOR FURTHER INFORMATION CONTACT: Justin S. Kim, Environmental Protection Specialist, Federal Aviation Administration, 777 South Aviation Boulevard, Suite 150, El Segundo, California 90245. Telephone 424–405–7283.

SUPPLEMENTARY INFORMATION: The FAA determined the noise exposure maps submitted by the BGPAA for Hollywood Burbank Airport, is in compliance with applicable statutory and regulatory requirements, effective November 20, 2025. Under title 49, United States Code (U.S.C.) section 47503, an airport operator may submit to the FAA, noise exposure maps depicting non-compatible uses as of the date such map is submitted, a description of estimated aircraft operations during a forecast period that is at least five years in the future and how those operations will affect the map. Noise exposure maps must be prepared in accordance with title 14, Code of Federal Regulations (CFR) part 150, the regulations promulgated pursuant to 49 U.S.C. 47502 and developed in consultation with public agencies and planning authorities in the area surrounding the airport, state and Federal agencies, interested and affected parties in the local community, and aeronautical users of the airport. In addition, an airport operator that submitted noise exposure maps, which the FAA determined is compliant with statutory and regulatory requirements, may submit a noise compatibility program for FAA approval that sets forth measures the operator has taken or proposes to take to reduce existing non-compatible uses and prevent the introduction of additional non-compatible uses.

The FAA completed its review of the noise exposure maps and supporting documentation submitted by BGPAA and determined the noise exposure maps and accompanying documentation are compliant with applicable requirements. The documentation that constitutes the Noise Exposure Maps include: ''Figure 5–1—Existing Conditions (2025) Noise Exposure Map'' and ''Figure 5–2—Future Conditions (2030) Noise Exposure Map'' which addresses the current and forecast NEM graphics. The ''Hollywood Burbank Airport Part 150 Noise Exposure Map Update,'' dated August 2025, complies with all other applicable narrative, graphic, and tabular representations of the data including airport description, flight track data, aircraft operations data, aviation forecast data, on-airport and off-airport land use information as required by 14 CFR A150.101 and 49 U.S.C. 47503. This determination is effective on November 20, 2025. FAA's determination on an airport's noise exposure maps is limited to a finding that the noise exposure maps were developed in accordance with the 49 U.S.C section 47503 and procedures contained in 14 CFR A150.101. FAA's acceptance of an NEM does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program. If questions arise concerning the precise relationship of specific properties within noise exposure contours depicted on the noise exposure maps, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of 49 U.S.C. 47506. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under 14 CFR part 150 or through FAA review and acceptance of the noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the maps depicting properties on the surface rests exclusively with the airport operator that submitted the noise exposure maps or with those public agencies and planning authorities with which consultation is required under 49 U.S.C section 47503. The FAA relied on the certification by the airport operator that

the consultations and opportunity for public review required under 14 CFR 150.21 has been accomplished during the development of the noise exposure maps. Copies of the noise exposure maps and supporting documentation and the FAA's evaluation of the noise exposure maps are available for examination at the following locations:

1. Federal Aviation Administration, Los Angeles Airports District Office, 777 South Aviation Boulevard, Suite 150, El Segundo, California 90245.

2. Hollywood Burbank Airport, 2627 North Hollywood Way, Burbank, California 91505

Questions may be directed to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Issued in El Segundo, California on November 20, 2025.

Brian Q. Armstrong,

Acting Director, Airports Division, AWP–600 Western-Pacific Region.

[FR Doc. 2025–20904 Filed 11–24–25; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Information Collection Renewal; Comment Request; Extensions of Credit to Insiders and Transactions With Affiliates

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995 (PRA). In accordance with the requirements of the PRA, the OCC may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The OCC is soliciting comment concerning the renewal of its information collection titled, ''Extensions of Credit to Insiders and Transactions with Affiliates.''

DATES: Comments must be received by January 26, 2026.

ADDRESSES: Commenters are encouraged to submit comments by email, if possible. You may submit comments by any of the following methods:

- *Email: prainfo@occ.treas.gov.*
- *Mail:* Chief Counsel's Office, Attention: Comment Processing, Office of the Comptroller of the Currency, Attention: 1557–0336, 400 7th Street SW, Suite 3E–218, Washington, DC 20219.
- *Hand Delivery/Courier:* 400 7th Street SW, Suite 3E–218, Washington, DC 20219.
- *Fax:* (571) 293–4835.

Instructions: You must include ''OCC'' as the agency name and ''1557–0336'' in your comment. In general, the OCC will publish comments on *www.reginfo.gov* without change, including any business or personal information provided, such as name and address information, email addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

Following the close of this notice's 60-day comment period, the OCC will publish a second notice with a 30-day comment period. You may review comments and other related materials that pertain to this information collection beginning on the date of publication of the second notice for this collection by the method set forth in the next bullet.

- Viewing Comments Electronically: Go to *www.reginfo.gov.* Hover over the ''Information Collection Review'' tab and click on ''Information Collection Review'' from the drop-down menu. From the ''Currently under Review'' drop-down menu, select ''Department of the Treasury'' and then click ''submit.'' This information collection can be located by searching OMB control number ''1557–0336'' or ''Extensions of Credit to Insiders and Transactions with Affiliates.'' Upon finding the appropriate information collection, click on the related ''ICR Reference Number.'' On the next screen, select ''View Supporting Statement and Other Documents'' and then click on the link to any comment listed at the bottom of the screen.
- For assistance in navigating *www.reginfo.gov,* please contact the Regulatory Information Service Center at (202) 482–7340.

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, Clearance Officer, (202) 649–5490, Chief Counsel's Office, Office of the Comptroller of the Currency, 400 7th Street SW, Washington, DC 20219. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501 *et seq.*), Federal agencies must obtain approval from the OMB for each collection of information that they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements, imposed on ten or more persons, that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of title 44 generally requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the OCC is publishing notice of the renewal of this collection.

Title: Extensions of Credit to Insiders and Transactions with Affiliates.

OMB Control No.: 1557–0336.

Type of Review: Regular.

Affected Public: Businesses or other for-profit.

Description: National banks and Federal savings associations must comply with rules of the Federal Reserve Board (Board) regarding extensions of credit to insiders (Regulation O) [1] and transactions with affiliates (Regulation W),[2] which implement section 22(h) and sections 23A and 23B, respectively, of the Federal Reserve Act (FRA).[3] Twelve CFR part 31.2 requires national banks, Federal savings associations, and their insiders to comply with Regulation O, and 12 CFR 31.3 requires national banks and Federal savings associations to comply with Regulation W. A to part 31 provides interpretive guidance on the application of Regulation W to deposits between affiliated banks.

Section 31.3(c) implements the statutory standards for authorizing an exemption from section 23A of the FRA [4] or section 11 of the Home Owners' Loan Act (HOLA) [5] in accordance with section 608 of the Dodd Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act). Section 608, which became effective on July 21, 2012, amends

[1] 12 CFR part 215.

[2] 12 CFR part 223.

[3] 12 U.S.C. 371c, 371c–1, 375a, and 375b. In addition, section 11 of the Home Owners' Loan Act, 12 U.S.C. 1468, includes certain restrictions on transactions with affiliates that are not included in FRA section 23A.

[4] 12 U.S.C. 371c(f)(2)(B)(i).

[5] 12 U.S.C. 1468(d).

section 23A of the FRA and section 11 of the HOLA to authorize the OCC to exempt, by order, a transaction of a national bank or Federal savings association, respectively, from the affiliate transaction requirements of section 23A and section 11 of the HOLA if: (1) the OCC and the Board jointly find the exemption to be in the public interest and consistent with the purposes of section 23A or section 11, and (2) within 60 days of receiving notice of such finding, the Federal Deposit Insurance Corporation does not object in writing to the finding. Such objection would be based on a determination that the exemption presents an unacceptable risk to the Deposit Insurance Fund.[6]

Section 31.3(d) sets forth procedures that a national bank and Federal savings association must follow to request such exemptions. These procedures are modeled after the Board's procedures in Regulation W. A national bank or Federal savings association may request an exemption from the requirements of section 23A or section 11 of the HOLA, as applicable, and 12 CFR part 223 for a national bank or Federal savings association by submitting a written request to the Deputy Comptroller for Licensing with a copy to the appropriate Federal Reserve Bank. Such a request must:

(1) Describe in detail the transaction or relationship for which the national bank or Federal savings association seeks exemption;

(2) Explain why the OCC should exemption the transaction or relationship;

(3) Explain how the exemption would be in the public interest and consistent with the purposes of section 23A or section 11 of the HOLA, as applicable; and

(4) Explain why the exemption does not present an unacceptable risk to the Deposit Insurance Fund.

Estimated Burden

Estimated Frequency of Response: On occasion.

Estimated Number of Respondents: 1.

Estimated Hours per Response: 10 hours.

Estimated Total Annual Responses: 1.

Estimated Total Annual Burden: 10 hours.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Sarah E. Turney,

Assistant Director, Office of the Comptroller of the Currency.

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons and vessels that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them. The vessels and aircraft placed on the SDN List have been identified as property in which a blocked person has an interest.

DATES: This action was issued on November 20, 2025. See Supplementary Information for relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, 202–622–2420; Assistant Director for Licensing, 202–622–2480; Assistant Director for Sanctions Compliance, 202–622–2490; or *https://ofac.treasury.gov/contact-ofac.*

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: *https://ofac.treasury.gov.*

Notice of OFAC Action

On November 20, 2025, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authorities listed below.

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons and vessels that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them. The vessels placed on the SDN List have been identified as property in which a blocked person has an interest.

DATES: This action was issued on October 9, 2025. See **SUPPLEMENTARY INFORMATION** for relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, 202–622–2420; Assistant Director for Licensing, 202–622–2480; Assistant Director for Sanctions Compliance, 202–622–2490 or *https://ofac.treasury.gov/contact-ofac.*

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: *https://ofac.treasury.gov.*

Notice of OFAC Action

On October 9, 2025, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authority listed below.

BILLING CODE 4810–AL–P

BILLING CODE 4810–AL–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. Additionally, OFAC is providing an updated **Federal Register** notice for one person and one vessel previously designated or identified as blocked property by OFAC. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: This action was issued on November 12, 2025. See Supplementary Information for relevant dates.

FOR FURTHER INFORMATION CONTACT: OFAC: Associate Director for Global Targeting, 202–622–2420; Assistant Director for Licensing, 202–622–2480; Assistant Director for Sanctions Compliance, 202–622–2490 or *https://ofac.treasury.gov/contact-ofac.*

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website: *https://ofac.treasury.gov.*

Notice of OFAC Action

On November 12, 2025, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authority listed below.

BILLING CODE 4810–AL–C

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Publication of the Tier 2 Tax Rates

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice.

SUMMARY: Publication of the tier 2 tax rates for calendar year 2026 as required by section 3241(d) of the Internal Revenue Code. Tier 2 taxes on railroad employees, employers, and employee representatives are one source of funding for benefits under the Railroad Retirement Act.

DATES: The tier 2 tax rates for calendar year 2026 apply to compensation paid in calendar year 2026.

FOR FURTHER INFORMATION CONTACT: Kathleen Edmondson, CC:EEE:EOET:ET1, Internal Revenue Service, 1111 Constitution Avenue NW, Washington, DC 20224, telephone number (202) 317–6798 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Tier 2 Tax Rates: The tier 2 tax rate for 2026 under section 3201(b) on employees is 4.9 percent of compensation. The tier 2 tax rate for 2026 under section 3221(b) on employers is 13.1 percent of compensation. The tier 2 tax rate for 2026 under section 3211(b) on employee representatives is 13.1 percent of compensation.

Authority: 26 U.S.C. 3241.

Philip J. Lindenmuth,

Acting Associate Chief Counsel (Employee Benefits, Exempt Organizations and Employment Taxes).

BILLING CODE 4830–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0876]

Agency Information Collection Activity Under OMB Review: Clearance for A–11 Section 280 Improving Customer Experience Information Collection

AGENCY: Veterans Experience Office, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Experience Office, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Comments and recommendations for the proposed

information collection should be sent by December 26, 2025.

ADDRESSES: To submit comments and recommendations for the proposed information collection, please type the following link into your browser: *www.reginfo.gov/public/do/PRAMain,* select ''Currently under Review—Open for Public Comments'', then search the list for the information collection by Title or ''OMB Control No. 2900–0876.''

FOR FURTHER INFORMATION CONTACT: VA PRA information: Dorothy Glasgow, 202–461–1084, *VAPRA@va.gov.*

SUPPLEMENTARY INFORMATION:

Title: Clearance for A–11 Section 280 Improving Customer Experience Information Collection.

OMB Control Number: 2900–0876 *https://www.reginfo.gov/public/do/PRASearch.*

Type of Review: ICR Revision.

Abstract: This ICR Revision seeks to extend the expiration date that currently expires in February 2026, and increase the burden hours associated with the Department of Veterans Affairs customer experience data collection system from 344,083 to 504,982, and the number of responses from 4,012,000 to 5,942,778. VA, when it last revised Clearance for A–11 Section 280 Improving Customer Experience Information Collection, calculated total the burden needed based on the number of Customer Satisfaction surveys under management (141 in calendar year 2022) and our informed estimate of growth in number of surveys under management. As a result of unexpectedly strong and robust need (and corresponding requests) for new customer experience surveys by VA customers (stakeholders and partners), VA has already reached 176 surveys under management and anticipate reaching 200 by the end of Fiscal Year 2027. This anticipated growth and per our models for growth from now until our current ICR expires in February 2025, directly translates into a corresponding need for an increase in associated burden hours from 344,083 to 504,982, and the number of responses from 4,012,000 to 5,942,778, to accommodate the current and future demand.

General Background on Our Customer Experience Data Collection Listening Tools

Whether seeking a loan, Social Security benefits, Veterans benefits, or other services provided by the Federal Government, individuals and businesses expect Government customer services to be efficient and intuitive, just like services from leading private-sector organizations. Yet according to research, government services continue to lag behind the private sector in customer satisfaction and experience quality. A modern, streamlined and responsive customer experience means: Raising government-wide customer experience to the average of the private sector service industry; developing indicators for high-impact Federal programs to monitor progress towards excellent customer experience and mature digital services; and providing the structure (including increasing transparency) and resources to ensure customer experience is a focal point for agency leadership. To support this, OMB Circular A–11 Section 280 established government-wide standards for mature customer experience organizations in government and measurement. To enable Federal programs to deliver the experience taxpayers deserve, they must undertake three general categories of activities: Conduct ongoing customer research, gather and share customer feedback, and test services and digital products.

These data collection efforts may be either qualitative or quantitative in nature or may consist of mixed methods. Additionally, data may be collected via a variety of means, including but not limited to electronic or social media, direct or indirect observation (*i.e.,* in person, video and audio collections), interviews, questionnaires, surveys, and focus groups. Veterans Experience Office will limit its inquiries to data collections that solicit strictly voluntary opinions or responses. Steps will be taken to ensure anonymity of respondents in each activity covered by this request.

The results of the data collected will be used to improve the delivery of Federal services and programs. It will include the creation of personas, customer journey maps, reports and summaries of customer feedback data and user insights. The Veterans Experience Office will collect this information by electronic means, when possible, as well as by mail, fax, telephone, technical discussions, and in-person interviews. Veterans Experience Office may also utilize observational techniques to collect this information.

Collections will be targeted at the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future. For the purposes of this request, customers are individuals, businesses, and organizations that interact with a Federal Government agency or program, either directly or via a federal contractor. This could include individuals or households; businesses or other for-profit organizations; not-for profit institutions; State, local or tribal governments; Federal government; and Universities.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at: 90 FR 43511, September 9, 2025.

Affected Public: Individuals or Households.

Estimated Annual Burden: 504,982.

Estimated Average Burden per Respondent: Varied, dependent upon the data collection method used. The possible response time to complete a questionnaire or survey may be 2 minutes or up to 2 hours to participate in an interview.

Frequency of Response: Varied, dependent upon the data collection method used.

Estimated Number of Respondents: 5,942,778.

Medicare Program: Hospital Outpatient Prospective Payment and Ambulatory Surgical Center Payment Systems; Quality Reporting Programs; Overall Hospital Quality Star Rating; Hospital Price Transparency; and Notice of Closure of a Teaching Hospital and Opportunity To Apply for Available Slots

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Final rule with comment period.

SUMMARY: This final rule with comment period revises the Medicare Hospital Outpatient Prospective Payment System (OPPS) and the Medicare Ambulatory Surgical Center (ASC) payment system for calendar year 2026 based on our continuing experience with these systems. We also describe the changes to the amounts and factors used to determine the payment rates for Medicare services paid under the OPPS and those paid under the ASC payment systems. In addition, this final rule with comment period announces the closure of a teaching hospital and the opportunity to apply for available slots, and updates and refines the requirements for the Hospital Outpatient Quality Reporting Program, Rural Emergency Hospital Quality Reporting Program, Ambulatory Surgical Center Quality Reporting Program, Overall Hospital Quality Star Rating, and hospitals to make public their standard charge information and enforcement of hospital price transparency, as well as summarizes comments received in response to a request for information on measure concepts regarding Well-Being and Nutrition for consideration in future years for the OQR, REHQR, and ASCQR programs.

DATES:

Effective Date: The provisions of this rule are effective January 1, 2026.

Comment period: To be assured consideration, comments must be received at one of the addresses provided below, by January 20, 2026.

Deadline for hospitals to submit applications for Available Resident Slots: Application submissions for Round 26 are due no later than February 19, 2026 (see section XXII.C. of this final rule with comment period for further details on the application process).

ADDRESSES: In commenting, please refer to file code CMS–1834–FC.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov*. Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1834–FC, P.O. Box 8010, Baltimore, MD 21244–8010.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1834–FC, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *https://www.regulations.gov*. Follow the search instructions on that website to view public comments. CMS will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the individual will take actions to harm the individual. CMS continues to encourage individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

Addenda Available Only Through the Internet on the CMS Website

In the past, a majority of the addenda referred to in our OPPS/ASC proposed and final rules were published in the **Federal Register** as part of the annual rulemakings. However, beginning with the calendar year (CY) 2012 OPPS/ASC proposed rule, the addenda no longer appear in the **Federal Register** as part of the annual OPPS/ASC proposed and final rules to decrease administrative burden and reduce costs associated with publishing lengthy tables. Instead, these addenda are published and available only on the CMS website. The addenda relating to the OPPS are available at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*. The addenda relating to the ASC payment system are available at *https://www.cms.gov/medicare/payment/prospective-payment-systems/ambulatory-surgical-center-asc/asc-regulations-and-notices*.

Current Procedural Terminology (CPT) Copyright Notice

Throughout this final rule with comment period, we use CPT codes and descriptions to refer to a variety of services. We note that CPT codes and descriptions are copyright 2025 American Medical Association (AMA). All Rights Reserved. CPT is a registered trademark of the AMA. Applicable Federal Acquisition Regulations and Defense Federal Acquisition Regulations apply.

I. Summary and Background

A. Executive Summary of This Document

1. Purpose

In this final rule with comment period, we are updating the payment policies and payment rates for services furnished to Medicare beneficiaries in hospital outpatient departments (HOPDs) and ambulatory surgical centers (ASCs), beginning January 1, 2026. Section 1833(t) of the Social Security Act (the Act) requires us to annually review and update the payment rates for services payable under the Hospital Outpatient Prospective Payment System (OPPS). Specifically, section 1833(t)(9)(A) of the Act requires the Secretary of the Department of Health and Human Services (the Secretary) to review certain components of the OPPS not less often than annually, and to revise the groups, the relative payment weights, and the wage and other adjustments to take into account changes in medical practice, changes in technology, and the addition of new services, new cost data, and other relevant information and factors. In addition, under section 1833(i)(D)(v) of the Act, we annually review and update the ASC payment rates. This final rule with comment period also includes additional policy changes made in accordance with our experience with the OPPS and the ASC payment system and recent changes in our statutory authority. We describe these and various other statutory authorities in the relevant sections of this final rule with comment period. In addition, this final rule with comment period announces the closure of a teaching hospital and the opportunity to apply for available slots, and updates the requirements for the Hospital Outpatient Quality Reporting (OQR) Program, the Rural Emergency Hospital Quality Reporting (REHQR) Program, the Ambulatory Surgical Center Quality Reporting (ASCQR) Program, and Overall Hospital Quality Star Rating. Finally, we are updating and refining the requirements for hospitals to make public their standard charges and CMS enforcement of hospital price transparency (HPT) regulations.

2. Summary of the Major Provisions

- *OPPS Update:* For CY 2026, we are increasing the payment rates under the OPPS by an outpatient department (OPD) fee schedule increase factor of 2.6 percent. This increase factor is based on the final inpatient hospital market basket percentage increase of 3.3 percent for inpatient services paid under the hospital inpatient prospective payment system (IPPS), reduced by a final productivity adjustment of 0.7 percentage point. Based on this update, we estimate that total payments to OPPS providers (including beneficiary cost sharing and estimated changes in enrollment, utilization, and case mix) for calendar year (CY) 2026 will be approximately $101.0 billion, an increase of approximately $8.0 billion compared to estimated CY 2025 OPPS payments.

We are continuing to implement the statutory 2.0 percentage point reduction in payments for hospitals that fail to meet the hospital outpatient quality reporting requirements by applying a reporting factor of 0.9805 to the OPPS payments and copayments for all applicable services. We note that under the final 340B remedy offset, payments for services at hospitals subject to the 340B remedy offset will be reduced by 0.5 percentage points.

- *ASC Payment Update:* For CYs 2019 through 2023, we adopted a policy to update the ASC payment system using the hospital market basket update. In light of the impact of the COVID–19 public health emergency (PHE) on healthcare utilization, we extended our policy to update the ASC payment system using the hospital market basket update an additional 2 years—through CYs 2024 and 2025. In this final rule with comment period, we are extending our utilization of the hospital market basket update as the update factor for the ASC payment system for 1 additional year (through CY 2026). Using the hospital market basket update, for CY 2026, we are increasing payment rates under the ASC payment system by 2.6 percent for ASCs that meet the quality reporting requirements under the ASCQR Program. This increase is based on a final hospital market basket percentage increase of 3.3 percent reduced by a final productivity adjustment of 0.7 percentage point. Based on this final update, we estimate that total payments to ASCs (including beneficiary cost sharing and estimated changes in enrollment, utilization, and case-mix) for CY 2026 will be approximately $9.2 billion, an increase of approximately $450 million compared to estimated CY 2025 Medicare payments.
- *Device Pass-Through Payment Applications:* For CY 2026, we received eight complete applications for device pass-through payments. We sought public comment on seven applications and make final determinations on these applications in this final rule with comment period.
- *Changes to the List of ASC Covered Surgical Procedures and Ancillary Services Lists:* For CY 2026, we are expanding the ASC covered procedures list (CPL) by revising the criteria under § 416.166 to modify the general standard criteria and to eliminate five of the general exclusion criteria, moving them into a new section as nonbinding physician considerations for patient safety. We also are adding 276 procedures to the ASC CPL based on these criteria changes and adding an additional 271 codes to the ASC CPL that we are finalizing for removal from the IPO list for CY 2026.
- *Changes to the Inpatient Only (IPO) List:* For CY 2026, we are phasing out the IPO list over 3 years, beginning with the removal of 285 mostly musculoskeletal services for CY 2026.
- *Add-on Payment for Radiopharmaceutical Technetium-99m (Tc-99m) Derived from Domestically Produced Molybdenum-99 (Mo-99):* In the CY 2025 OPPS/ASC final rule with comment period, we finalized that for CY 2026 the add-on payment for radiopharmaceuticals produced without the use of Tc-99m derived from non-Highly Enriched Uranium sources would be replaced with an add-on payment for radiopharmaceuticals that use Tc-99m derived from domestically produced Mo-99. For CY 2026, we are finalizing a $10 per dose amount for this add-on payment, and that at least 50 percent of the Mo-99 used in the Tc-99m generator that produces a dose of Tc-99m must be domestically produced for the dose to qualify for the add-on payment. We are also codifying our definition for domestically produced Mo-99, and to establish new HCPCS C-code C9176 (Tc-99m from domestically produced non-HEU Mo-99, [minimum 50 percent], full cost recovery add-on, per study dose).
- *Cross-Program Updates for the Hospital Outpatient Quality Reporting (OQR), Rural Emergency Hospital Quality Reporting (REHQR), and Ambulatory Surgical Center Quality Reporting (ASCQR) Programs:* We are finalizing the removal of: (1) the COVID–19 Vaccination Coverage Among Healthcare Personnel (HCP) measure from the Hospital OQR and ASCQR Program measure sets beginning with the CY 2024 reporting period/CY 2026 payment determination; (2) the Hospital Commitment to Health Equity (HCHE) measure from the Hospital OQR and REHQR Program measure sets, and the Facility Commitment to Health Equity (FCHE) measure from the ASCQR Program measure set beginning with the CY 2025 reporting period/CY 2027 payment or program determination; and (3) the Screening for Social Drivers of Health (SDOH) measure and the Screen Positive Rate for SDOH measure from the Hospital OQR, REHQR, and ASCQR Program measure sets beginning with the CY 2025 reporting period. Additionally, we received comments regarding measure concepts related to well-being and nutrition for future consideration in the Hospital OQR, REHQR, and ASCQR Programs. We are finalizing our proposal to update and codify the Extraordinary Circumstance Exception (ECE) policy to clarify that CMS has the discretion to grant an extension in response to an ECE request for the Hospital OQR, REHQR, and ASCQR Programs.
- *Hospital Outpatient Quality Reporting (OQR) Program:* In addition to the cross-program measure and policy updates, we are finalizing: (1) adoption of the Emergency Care Access & Timeliness eCQM with 1 year of voluntary reporting for the CY 2027 reporting period followed by mandatory reporting for the CY 2028 reporting period/CY 2030 payment determination and subsequent years; (2) removal of the Median Time from Emergency Department (ED) Arrival to ED Departure for Discharged ED Patients and the Left Without Being Seen measures beginning with the CY 2028 reporting period/2030 payment determination; and (3) modification of the Excessive Radiation Dose or Inadequate Image Quality for Diagnostic Computed Tomography (CT) in Adults (Hospital Level—Outpatient) measure (Excessive Radiation eCQM) from mandatory reporting beginning with the CY 2027 reporting period to continue voluntary reporting in the CY 2027 reporting period and subsequent years.
- *Rural Emergency Hospital Quality Reporting (REHQR) Program:* In addition to the cross-program measure and policy updates, we are finalizing the: (1) adoption of the Emergency Care Access & Timeliness eCQM beginning with the CY 2027 reporting period/CY 2029 program determination; and (2) related eCQM data submission and reporting requirements, including that REHs will be provided the option of reporting either the Emergency Care Access and Timeliness eCQM or the Median Time from Emergency Department (ED) Arrival to ED Departure for Discharged ED Patients measure beginning with the CY 2027 reporting period/CY 2029 program determination.
- *Ambulatory Surgical Center Quality Reporting (ASCQR) Program:* We are not finalizing the adoption of the Patient Understanding of Key Information Related to Recovery After a Facility-Based Outpatient Procedure or Surgery, Patient Reported Outcome-Based Performance Measure (Information Transfer PRO–PM) at this time.
- *Overall Hospital Quality Star Rating Modification to Emphasize the Safety of Care Measure Group:* We proposed to update the methodology that will be used to calculate the Overall Hospital Quality Star Rating through implementation of a 2-stage methodologic update. We are finalizing our proposed updates to the methodology to emphasize the

importance of the Safety of Care measure group, particularly to address the issue of hospitals receiving a high Star Rating despite performing in the lowest quartile of the Safety of Care measure group. The first-stage methodology update is a narrow but focused transitional step that limits hospitals to a maximum of four out of five stars (based on at least three Safety of Care measure scores) if they performed in the lowest quartile of the Safety of Care measure group in the 2026 Overall Hospital Quality Star Rating. The second stage of the methodology update replaces the first stage update and reduces the Star Rating of any hospital in the lowest quartile of Safety of Care (based on at least three Safety of Care measure scores) by one star, to a minimum 1-star rating for the 2027 Overall Hospital Quality Star Rating and later years. These changes will prioritize safety for both patients and healthcare workers and reflect CMS' fundamental commitment to ensuring high-quality, safe care as a central component of health system performance.

• *Partial Hospitalization and Intensive Outpatient Programs:* We finalizing changes to our methodology used to calculate the CY 2026 Community Mental Health Center (CMHC) Partial Hospitalization Program (PHP), and Intensive Outpatient Program (IOP) costs based on 40 percent of the corresponding proposed hospital-based PHP and IOP costs. This change will resolve a cost inversion in CMHC cost data that resulted in higher geometric mean costs for 3-service days than for 4-service days. It also stabilizes rates for CMHCs by basing them on data from a much larger set of providers while preserving the adjustment for the structural differences between CMHC and hospital costs.

• *Notice of Intent to Conduct a Medicare OPPS Drugs Acquisition Cost Survey:* Section 1833(t)(14)(D)(ii) of the Act requires the Secretary to periodically conduct surveys of hospital acquisition costs for each specified covered outpatient drug for use in setting the payment rates for such drugs. Additionally, on April 18, 2025, President Trump signed Executive Order (E.O.) 14273, ''Lowering Drug Prices by Once Again Putting Americans First''. Section 5 of the E.O., ''Appropriately Accounting for Acquisition Costs of Drugs in Medicare'', which directs the Secretary of HHS to publish in the **Federal Register** a plan to conduct a survey under section 1833(t)(14)(D)(ii) of the Act so he can determine the hospital acquisition cost for covered outpatient drugs at hospital outpatient departments. Accordingly, we will be conducting a survey, with the survey submission window opening by early CY 2026, of the acquisition costs for each separately payable drug acquired by all hospitals paid under the OPPS. We intend for the survey to be completed in time for the survey results to be used to inform policymaking beginning with the CY 2027 OPPS/ASC proposed rule.

• *Two-Midnight Rule Medical Review Activities Exemptions:* For CY 2026, we are continuing our existing policy exempting procedures that are removed from the IPO list under the OPPS from certain medical review activities related to the two-midnight policy. Under this policy, procedures removed from the IPO list are exempted from site-of-service claim denials, Medicare review contractor referrals to the Recovery Audit Contractor (RAC) for persistent noncompliance with the 2-midnight rule, and RAC reviews for ''patient status'' (that is, site-of-service) until claims data demonstrates that the procedures are more commonly billed in the outpatient setting than the inpatient setting. We are also revising 42 CFR 412.3(d)(2) for clarity.

• *Virtual Direct Supervision of Pulmonary Rehabilitation (PR), Coronary Rehabilitation (CR), Intensive Coronary Rehabilitation and Diagnostic Services.* For CY 2026, we are revising § 410.27(a)(1)(iv)(B)(*1*) and § 410.28(e)(2)(iii) to make the availability of the direct supervision of CR, ICR, PR services and diagnostic services via audio-video real-time communications technology (excluding audio-only) permanent, except for diagnostic services that have a global period indicator of 010 or 090.

• *Prospective Adjustment to Payments for Non-Drug Items and Services to Offset the Increased Payments for Non-Drug Items and Services Made in CY 2018 Through CY 2022 as a Result of the 340B Payment Policy.* For CY 2026, we are applying the previously finalized reduction to the OPPS conversion factor under § 419.32(b)(1)(iv)(B)(12) used to determine the payment amounts for non-drug items and services for hospitals for whom this adjustment applies of 0.5 percent. The Remedy for the 340B-Acquired Drug Payment Policy for Calendar Years 2018–2022 (88 FR 77150) codified a 0.5 percent reduction in the OPPS conversion factor applicable to non-drug items and services, excluding hospitals that enrolled in Medicare after January 1, 2018.

• *Payment for Skin Substitute Products under the OPPS.* For CY 2026, we are finalizing a policy for CMS to separately pay for the provision of certain groups of skin substitute products as supplies when they are used during a covered application procedure paid under the PFS in the non-facility setting or under the OPPS. We are finalizing a policy to group skin substitutes that are not drugs or biologicals using three FDA regulatory categories (PMAs, 510(k)s, and 361 HCT/Ps) to set payment rates. To effectuate this categorization into a payment policy under the OPPS, we are creating three new APCs for HCPCS codes that describe skin substitute products organized by clinical and resource similarity. These three APCs will divide skin substitutes by their FDA regulatory pathway. Specifically, we are creating: APC 6000 (PMA Skin Substitute Products); APC 6001 (510(k) Skin Substitute Products); and APC 6002 (361 HCT/P Skin Substitute Products). This will result in an initial payment rate of $127.14 for each of the new APCs. We are implementing this policy in both the non-facility, ambulatory surgical center setting, and outpatient hospital settings.

• *Method to Control Unnecessary Increases in the Volume of Outpatient Services Furnished in Excepted Off-Campus Provider-Based Departments (PBDs):* For CY 2026, we are finalizing a policy to use our authority under section 1833(t)(2)(F) of the Act to apply the Physician Fee Schedule equivalent rate for any HPCPCs codes assigned to the drug administration services APCs, when provided at an off-campus PBD excepted from section 1833(t)(21) of the Act. We are finalizing a policy to exempt rural Sole Community Hospitals from this method to control the unnecessary volume of drug administration services.

• *Final Market-Based MS–DRG Relative Weight Data Collection and Change in Methodology for Calculating MS–DRG Relative Weights Under the Inpatient Prospective Payment System:* As discussed in section XX. of this final rule with comment period, in order to reduce the Medicare program's reliance on the hospital chargemaster, and to support the development of a market-based approach to payment under the Medicare FFS system, we are finalizing a policy that hospitals will be required to report certain market-based payment rate information on their Medicare cost report for cost reporting periods ending on or after January 1, 2026, to be used in a finalized change to the methodology for calculating the IPPS MS–DRG relative weights to reflect

relative market-based pricing. Specifically, we are finalizing a requirement for facilities to report market-based rate information on the Medicare cost report; the hospital will be required to report the median of the payer-specific negotiated charges by MS–DRG that the hospital has disclosed for all of its MAOs on the most recent version of the machine-readable file (MRF) that the hospital is required to disclose under the hospital price transparency regulations at 45 CFR part 180. We also are finalizing a change to the methodology for calculating the IPPS MS–DRG relative weights to incorporate this market-based rate information, beginning in FY 2029. This finalized MS–DRG relative weight methodology will utilize the finalized median payer-specific negotiated charge information, collected on the cost report, for calculating the MS–DRG relative weights.

- *Graduate Medical Education (GME) Accreditation:* In order to ensure that accreditation for approved medical residency programs is in compliance with applicable laws prohibiting race-based and other unlawful discrimination and to improve the accreditation process, we are finalizing that accrediting organizations may not use accreditation criteria that promote or encourage discrimination on the basis of race, color, national origin, sex, age, disability, or religion, including the use of those characteristics or intentional proxies for those characteristics as a selection criterion for employment, program participation, resource allocation, or similar activities, opportunities, or benefits. The effective date of this policy will be January 1, 2026.
- *Final Updates to Requirements for Hospitals to Make Public a List of Their Standard Charges:* We are finalizing our proposals with modifications to the HPT regulations to enhance clarity and standardization in hospital disclosure of standard charges. Specifically, we are finalizing with modification revisions to 45 CFR 180.20 to add definitions for ''tenth (10th) percentile allowed amount'', ''median allowed amount'', and ''ninetieth (90th) percentile allowed amount'', which are values a hospital will encode when a payer-specific negotiated charge is based on a percentage or algorithm, to more accurately reflect the distribution of actual amounts that a hospital has received for an item or service. In tandem with that, we are finalizing revisions to § 180.50 to remove the requirement for hospitals to disclose the estimated allowed amount, and, instead, require hospitals to disclose the 10th percentile, median, and 90th percentile allowed amounts, as well as the count of allowed amounts, in MRFs when payer-specific negotiated charges are based on percentages or algorithms. We are also finalizing with modification our proposal to require that hospitals use electronic data interchange (EDI) 835 electronic remittance advice (ERA) transaction data or an alternative, equivalent source of remittance data to calculate and encode the allowed amounts. We are finalizing our proposals to require that hospitals comply with specific instructions regarding the methodology that must be used to calculate such allowed amounts (including a lookback period), with some modifications. Additionally, we are finalizing, with modifications, our proposals to require hospitals to encode the attestation statement and the name of the hospital chief executive officer, president, or senior official designated to oversee the encoding of true, accurate, and complete data in the MRF. To advance the comparability of HPT data with other healthcare data, we are finalizing our proposal to require that hospitals encode their organizational, or Type 2, National Provider Identifier(s) (NPIs) in the MRFs. These policies are effective as of January 1, 2026, but we will delay enforcement of the requirements until April 1, 2026.

Finally, to encourage faster resolution and payment of CMPs, and in exchange for a hospital's admission of having violated HPT requirements, we are finalizing with clarifying edits our proposal to update § 180.90 to reduce the amount of a CMP by 35 percent, under certain conditions, when a hospital waives its right to an ALJ hearing, beginning January 1, 2026. These changes aim to improve transparency in hospital pricing, facilitate efficient enforcement of the HPT requirements, and empower consumers with actionable pricing information.

3. Summary of Costs and Benefits

In section XXVI. of this final rule with comment period, we set forth a detailed analysis of the regulatory and Federalism impacts that the final changes will have on affected entities and beneficiaries. Key estimated impacts are described below.

a. Impacts of all OPPS Changes

Table 167 in section XXVI.C. of this final rule with comment period displays the distributional impact of all the OPPS changes on various groups of hospitals and CMHCs for CY 2026 compared to all estimated OPPS payments in CY 2025. We estimate that the final policies in this final rule with comment period will result in a 2.4 percent increase in OPPS payments to providers for services. We estimate that total OPPS payments for CY 2026, including beneficiary cost-sharing, to the approximately 3,600 facilities paid under the OPPS (including general acute care hospitals, children's hospitals, cancer hospitals, and CMHCs) will increase by approximately $1.77 billion compared to CY 2025 payments due to the OPD update, excluding changes in enrollment, utilization, and case-mix. However, for providers subject to the 340B remedy offset, the 340B remedy offset is estimated to reduce payments by $275 million in CY 2026.

We estimated the isolated impact of our OPPS policies on CMHCs because CMHCs have historically only been paid for partial hospitalization services under the OPPS. Beginning CY 2024, they are also paid for IOP services under the OPPS. Based on our policy to calculate CMHC PHP and IOP costs based on 40 percent of the corresponding proposed hospital-based PHP and IOP costs, we estimate a 2.2 percent increase in CY 2026 payments to CMHCs relative to their CY 2025 payments.

b. Impacts of the Updated Wage Indexes

We estimate that our update of the wage indexes based on the fiscal year (FY) 2026 IPPS final rule wage indexes will result in a 0.1 percent increase for urban hospitals under the OPPS and a 0.2 percent increase for rural hospitals. These wage indexes include continued implementation of the Office of Management and Budget (OMB) labor market area delineations based on 2020 Decennial Census data, with updates, as discussed in section II.C. of this final rule with comment period.

c. Impacts of the Rural Adjustment and the Cancer Hospital Payment Adjustment

For CY 2026, we are continuing to provide additional payments to cancer hospitals so that a cancer hospital's payment-to-cost ratio (PCR) after the additional payments is equal to the weighted average PCR for the other OPPS hospitals using the most recently submitted or settled cost report data. Section 16002(b) of the 21st Century Cures Act requires that this weighted average PCR be reduced by 1.0 percentage point. In light of the COVID–19 PHE impact on claims and cost data used to calculate the target PCR, we maintained the CY 2021 target PCR of 0.89 through CYs 2022 and 2023. However, in CY 2024, we finalized a policy to reduce the target PCR by 1.0 percentage point each calendar year

until the target PCR equals the PCR of non-cancer hospitals using the most recently submitted or settled cost report data. For CY 2025, we finalized a target PCR of 0.87. For CY 2026, we are finalizing a target PCR of 0.87, the same PCR of non-cancer hospitals using the most recently submitted or settled cost report data, to determine the CY 2026 cancer hospital payment adjustment to be paid at cost report settlement. That is, the payment adjustments would be the additional payments needed to result in a PCR equal to 0.87 for each cancer hospital.

d. Impacts of the OPD Fee Schedule Increase Factor

For the CY 2026 OPPS/ASC, we are establishing an OPD fee schedule increase factor of 2.6 percent and applying that increase factor to the conversion factor for CY 2025. As a result of the OPD fee schedule increase factor and other budget neutrality adjustments, we estimate that urban hospitals will experience an increase in payments of approximately 2.8 percent and that rural hospitals will experience an increase in payments of 2.4 percent. Classifying hospitals by teaching status, we estimate non-teaching hospitals will experience an increase in payments of 2.7 percent, minor teaching hospitals will experience an increase in payments of 2.9 percent, and major teaching hospitals will experience an increase in payments of 2.6 percent. We also classified hospitals by the type of ownership. We estimate that hospitals with voluntary ownership will experience an increase of 2.8 percent in payments, while hospitals with government ownership will experience an increase of 2.3 percent in payments. We estimate that hospitals with proprietary ownership will experience an increase of 3.4 percent in payments.

e. Impacts of the ASC Payment Update

For impact purposes, the surgical procedures on the ASC covered surgical procedure list are aggregated into surgical specialty groups using CPT and HCPCS code range definitions. The percentage change in estimated total payments by specialty groups under the final CY 2026 payment rates, compared to estimated CY 2025 payment rates, ranges between an increase of 2 percent and an increase of 12 percent.

f. Impacts of the Market-Based MS–DRG Relative Weight Data Collection and Change in Methodology for Calculating MS–DRG Relative Weights Under the Inpatient Prospective Payment System

In section XX. of this final rule, we are finalizing a methodology for estimating the MS–DRG relative weights beginning in FY 2029 based on the median payer-specific negotiated charge information we are finalizing to collect on the cost report. We note that the estimated total annual burden hours for this data collection are as follows: 3,038 hospitals times 20 hours per hospital equals 60,760 annual burden hours and $4,857,458.20. We refer readers to section XXIII.E. of this final rule with comment period for further analysis of this assessment.

g. Impacts of Hospital Price Transparency

We finalizing a policy to require hospitals to report four new data elements when the payer-specific negotiated charge is based on a percentage or algorithm—the median allowed amount (which would replace the estimated allowed amount data element), the 10th percentile allowed amount, the 90th percentile allowed amount, and the count of allowed amounts. We are also finalizing new attestation language that hospitals must include in the machine-readable file (MRF) and requiring hospitals to encode the name of the chief executive officer, president or senior official designated to oversee the encoding of true, accurate and complete data in the MRF. Additionally, we are finalizing our proposal to require hospitals to add their National Provider Identifiers (NPIs) to the MRF. The policy will advance the comparability of standard charge information across hospitals and of the hospital price transparency (HPT) data with other healthcare data, including health plan transparency data from the Transparency in Coverage (TiC) MRFs. These new policies include a one-time burden of $1,461.80 per hospital, and a total national cost of $10,840,708.80 ($1,461.80 × 7,416 hospitals). As discussed in detail in sections XIX. and XXIII. of this final rule with comment period, we believe that the benefits to the public (and to hospitals themselves) outweigh the burden imposed on hospitals.

B. Legislative and Regulatory Authority for the Hospital OPPS

When Title XVIII of the Act was enacted, Medicare payment for hospital outpatient services was based on hospital-specific costs. In an effort to ensure that Medicare and its beneficiaries pay appropriately for services and to encourage more efficient delivery of care, the Congress mandated replacement of the reasonable cost-based payment methodology with a prospective payment system (PPS). The Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33) added section 1833(t) to the Act, authorizing implementation of a PPS for hospital outpatient services. The OPPS was first implemented for services furnished on or after August 1, 2000. Implementing regulations for the OPPS are located at 42 CFR parts 410 and 419.

The Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (BBRA) (Pub. L. 106–113) made major changes in the hospital OPPS. The following Acts made additional changes to the OPPS: the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA) (Pub. L. 106–554); the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173); the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171), enacted on February 8, 2006; the Medicare Improvements and Extension Act under Division B of Title I of the Tax Relief and Health Care Act of 2006 (MIEA–TRHCA) (Pub. L. 109–432), enacted on December 20, 2006; the Medicare, Medicaid, and SCHIP Extension Act of 2007 (MMSEA) (Pub. L. 110–173), enacted on December 29, 2007; the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (Pub. L. 110–275), enacted on July 15, 2008; the Patient Protection and Affordable Care Act (Pub. L. 111–148), enacted on March 23, 2010, as amended by the Health Care and Education Reconciliation Act of 2010 (HCERA, Pub. L. 111–152), enacted on March 30, 2010 (these two public laws are collectively known as the Affordable Care Act); the Medicare and Medicaid Extenders Act of 2010 (MMEA, Pub. L. 111–309); the Temporary Payroll Tax Cut Continuation Act of 2011 (TPTCCA, Pub. L. 112–78), enacted on December 23, 2011; the Middle Class Tax Relief and Job Creation Act of 2012 (MCTRJCA, Pub. L. 112–96), enacted on February 22, 2012; the American Taxpayer Relief Act of 2012 (Pub. L. 112–240), enacted January 2, 2013; the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) enacted on December 26, 2013; the Protecting Access to Medicare Act of 2014 (PAMA, Pub. L. 113–93), enacted on March 27, 2014; the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015 (Pub. L. 114–10), enacted April 16, 2015; the Bipartisan Budget Act of 2015 (Pub. L. 114–74), enacted November 2, 2015; the Consolidated Appropriations Act, 2016 (Pub. L. 114–113), enacted on December 18, 2015, the 21st Century Cures Act (Pub. L. 114–255), enacted on December 13, 2016; the Consolidated Appropriations Act, 2018 (Pub. L. 115–

141), enacted on March 23, 2018; the Substance Use Disorder- Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities Act (Pub. L. 115–271), enacted on October 24, 2018; the Further Consolidated Appropriations Act, 2020 (Pub. L. 116–94), enacted on December 20, 2019; the Coronavirus Aid, Relief, and Economic Security Act (Pub. L. 116–136), enacted on March 27, 2020; the Consolidated Appropriations Act, 2021 (Pub. L. 116–260), enacted on December 27, 2020; the Inflation Reduction Act, 2022 (Pub. L. 117–169), enacted on August 16, 2022; and the Consolidated Appropriations Act (CAA), 2023 (Pub. L. 117–238), enacted December 29, 2022.

Under the OPPS, we generally pay for hospital Part B services on a rate-per-service basis that varies according to the APC group to which the service is assigned. We use the Healthcare Common Procedure Coding System (HCPCS) (which includes certain Current Procedural Terminology (CPT) codes) to identify and group the services within each APC. The OPPS includes payment for most hospital outpatient services, except those identified in section I.C of this final rule. Section 1833(t)(1)(B) of the Act provides for payment under the OPPS for hospital outpatient services designated by the Secretary (which includes partial hospitalization services furnished by CMHCs), and certain inpatient hospital services that are paid under Medicare Part B.

The OPPS rate is an unadjusted national payment amount that includes the Medicare payment and the beneficiary copayment. This rate is divided into a labor-related amount and a nonlabor-related amount. The labor-related amount is adjusted for area wage differences using the hospital inpatient wage index value for the locality in which the hospital or CMHC is located.

All services and items within an APC group are comparable clinically and with respect to resource use, as required by section 1833(t)(2)(B) of the Act. In accordance with section 1833(t)(2)(B) of the Act, subject to certain exceptions, items and services within an APC group cannot be considered comparable with respect to the use of resources if the highest median cost (or mean cost, if elected by the Secretary) for an item or service in the APC group is more than 2 times greater than the lowest median cost (or mean cost, if elected by the Secretary) for an item or service within the same APC group (referred to as the ''2 times rule''). In implementing this provision, we generally use the cost of the item or service assigned to an APC group.

For new technology items and services, special payments under the OPPS may be made in one of two ways. section 1833(t)(6) of the Act provides for temporary additional payments, which we refer to as ''transitional pass-through payments'', for at least 2 but not more than 3 years for certain drugs, biological agents, brachytherapy devices used for the treatment of cancer, and categories of other medical devices. For new technology services that are not eligible for transitional pass-through payments, and for which we lack sufficient clinical information and cost data to appropriately assign them to a clinical APC group, we have established special APC groups based on costs, which we refer to as New Technology APCs. These New Technology APCs are designated by cost bands which allow us to provide appropriate and consistent payment for designated new procedures that are not yet reflected in our claims data. Similar to pass-through payments, an assignment to a New Technology APC is temporary; that is, we retain a service within a New Technology APC until we acquire sufficient data to assign it to a clinically appropriate APC group.

C. Excluded OPPS Services and Hospitals

Section 1833(t)(1)(B)(i) of the Act authorizes the Secretary to designate the hospital outpatient services that are paid under the OPPS. While most hospital outpatient services are payable under the OPPS, section 1833(t)(1)(B)(iv) of the Act excludes payment for ambulance, physical and occupational therapy, and speech-language pathology services, for which payment is made under a fee schedule. It also excludes screening mammography, diagnostic mammography, and effective January 1, 2011, an annual wellness visit providing personalized prevention plan services. The Secretary exercises the authority granted under the statute to also exclude from the OPPS certain services that are paid under fee schedules or other payment systems. Such excluded services include, for example, the professional services of physicians and nonphysician practitioners paid under the Medicare Physician Fee Schedule (MPFS); certain laboratory services paid under the Clinical Laboratory Fee Schedule (CLFS); services for beneficiaries with end-stage renal disease (ESRD) that are paid under the ESRD prospective payment system; and services and procedures that require an inpatient stay that are paid under the hospital IPPS. In addition, section 1833(t)(1)(B)(v) of the Act does not include applicable items and services (as defined in subparagraph (A) of paragraph (21)) that are furnished on or after January 1, 2017, by an off-campus outpatient department of a provider (as defined in subparagraph (B) of paragraph (21)). We set forth the services that are excluded from payment under the OPPS in regulations at 42 CFR 419.22.

Under § 419.20(b) of the regulations, we specify the types of hospitals that are excluded from payment under the OPPS. These excluded hospitals are:

- Critical access hospitals (CAHs);
- Hospitals located in Maryland and paid under Maryland's All-Payer or Total Cost of Care Model;
- Hospitals located outside of the 50 States, the District of Columbia, and Puerto Rico;
- Indian Health Service (IHS) hospitals; and
- Rural emergency hospitals (REHs).

D. Prior Rulemaking

On April 7, 2000, we published in the **Federal Register** a final rule with comment period (65 FR 18434) to implement a prospective payment system for hospital outpatient services. The hospital OPPS was first implemented for services furnished on or after August 1, 2000. Section 1833(t)(9)(A) of the Act requires the Secretary to review certain components of the OPPS, not less often than annually, and to revise the groups, the relative payment weights, and the wage and other adjustments to take into account changes in medical practices, changes in technology, the addition of new services, new cost data, and other relevant information and factors.

Since initially implementing the OPPS, we have published final rules in the **Federal Register** annually to implement statutory requirements and changes arising from our continuing experience with this system. These rules can be viewed on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices.*

E. Advisory Panel on Hospital Outpatient Payment (the HOP Panel or the Panel)

1. Authority of the Panel

Section 1833(t)(9)(A) of the Act, as amended by section 201(h) of Public Law 106–113, and redesignated by section 202(a)(2) of Public Law 106–113, requires that we consult with an expert outside advisory panel composed of an appropriate selection of representatives of providers to annually review (and

advise the Secretary concerning) the clinical integrity of the payment groups and their weights under the OPPS. In CY 2000, based on section 1833(t)(9)(A) of the Act, the Secretary established the Advisory Panel on Ambulatory Payment Classification Groups (APC Panel) to fulfill this requirement. In CY 2011, based on section 222 of the Public Health Service Act (the PHS Act), which gives discretionary authority to the Secretary to convene advisory councils and committees, the Secretary expanded the panel's scope to include the supervision of hospital outpatient therapeutic services in addition to the APC groups and weights. To reflect this new role of the panel, the Secretary changed the panel's name to the Advisory Panel on Hospital Outpatient Payment (the HOP Panel). The HOP Panel is not restricted to using data compiled by CMS, and in conducting its review, it may use data collected or developed by organizations outside the Department.

2. Establishment of the Panel

On November 21, 2000, the Secretary signed the initial charter establishing the Panel, and, at that time, named the APC Panel. This expert panel is composed of appropriate representatives of providers (currently employed full-time, not as consultants, in their respective areas of expertise) who review clinical data and advise CMS about the clinical integrity of the APC groups and their payment weights. Since CY 2012, the Panel also is charged with advising the Secretary on the appropriate level of supervision for individual hospital outpatient therapeutic services. The Panel is technical in nature, and it is governed by the provisions of the Federal Advisory Committee Act (FACA). The current charter specifies, among other requirements, that the Panel—

- May advise on the clinical integrity of Ambulatory Payment Classification (APC) groups and their associated weights;
- May advise on the appropriate supervision level for hospital outpatient services;
- May advise on OPPS APC rates for ASC covered surgical procedures;
- Continues to be technical in nature;
- Is governed by the provisions of the FACA;
- Has a Designated Federal Official (DFO); and
- Is chaired by a Federal Official designated by the Secretary.

The Panel's charter was amended on November 15, 2011, renaming the Panel and expanding the Panel's authority to include supervision of hospital outpatient therapeutic services and to add critical access hospital (CAH) representation to its membership. The Panel's charter was also amended on November 6, 2014 (80 FR 23009), and the number of members was revised from up to 19 to up to 15 members. The Panel's current charter was approved on November 21, 2024, for a 2-year period.

The current Panel membership and other information pertaining to the Panel, including its charter, **Federal Register** notices, membership, meeting dates, agenda topics, and meeting reports, can be viewed on the CMS website at *https://www.cms.gov/Regulations-and-Guidance/Guidance/FACA/AdvisoryPanelonAmbulatoryPaymentClassificationGroups.html*.

3. Panel Meetings and Organizational Structure

The Panel has held many meetings, with the last meeting taking place on August 25, 2025. The recommendations of the Panel for the most recent meeting are available on the CMS website at *https://www.cms.gov/medicare/regulations-guidance/advisory-committees/hospital-outpatient-payment*. Prior to each meeting, we publish a notice in the **Federal Register** to announce the meeting, new members, and any other changes of which the public should be aware. Beginning in CY 2017, we have transitioned to one meeting per year (81 FR 31941). In CY 2022, we published a **Federal Register** notice requesting nominations to fill vacancies on the Panel (87 FR 68499). We are currently accepting nominations at: *https://mearis.cms.gov*.

In addition, the Panel has established an administrative structure that, in part, currently includes the use of two subcommittee workgroups to provide preparatory meeting and subject support to the larger panel. The two current subcommittees include the following:

- APC Groups and Status Indicator Assignments Subcommittee, which advises and provides recommendations to the Panel on the appropriate status indicators to be assigned to HCPCS codes, including but not limited to whether a HCPCS code or a category of codes should be packaged or separately paid, as well as the appropriate APC assignment of HCPCS codes regarding services for which separate payment is made; and
- Data Subcommittee, which is responsible for studying the data issues confronting the Panel and for recommending options for resolving them.

Each of these workgroup subcommittees was established by a majority vote from the full Panel during a scheduled Panel meeting, and the Panel recommended at the August 25, 2025, meeting that these subcommittees continue. We accepted this recommendation.

For discussions of earlier Panel meetings and recommendations, we refer readers to previously published OPPS/ASC proposed and final rules, the CMS website mentioned earlier in this section, and the FACA database at *https://facadatabase.gov*.

F. Public Comments Received on the CY 2026 OPPS/ASC Proposed

We received approximately 3,039 timely pieces of correspondence on the CY 2026 OPPS/ASC proposed rule that appeared in the **Federal Register** on July 17, 2025 (90 FR 33476). We received comments from elected officials, providers and suppliers, practitioners, and advocacy groups. We provide summaries of the public comments, and our responses are set forth in the various sections of this final rule with comment period under the appropriate headings. We note that we received some public comments that were outside the scope of the CY 2026 OPPS/ASC proposed rule. Out-of-scope-public comments are not addressed in this CY 2026 OPPS/ASC final rule with comment period.

G. Public Comments Received on the CY 2025 OPPS/ASC Final Rule With Comment Period

We received approximately 29 timely pieces of correspondence on the CY 2025 OPPS/ASC final rule with comment period that appeared in the **Federal Register** on November 27, 2024 (89 FR 93912).

II. Updates Affecting OPPS Payments

A. Recalibration of APC Relative Payment Weights

1. Database Construction

a. Database Source and Methodology

Section 1833(t)(9)(A) of the Act requires that the Secretary review not less often than annually and revise the relative payment weights for Ambulatory Payment Classifications (APCs). In the April 7, 2000 OPPS final rule with comment period (65 FR 18482), we explained in detail how we calculated the relative payment weights that were implemented on August 1, 2000, for each APC group.

For the CY 2026 OPPS, we proposed to recalibrate the APC relative payment weights for services furnished on or after January 1, 2026, and before January 1, 2027 (CY 2026), using the same basic methodology that we described in the CY 2025 OPPS/ASC final rule with comment period (89 FR 93921 through

93922), using CY 2024 claims data. That is, we proposed to recalibrate the relative payment weights for each APC based on claims and cost report data for hospital outpatient department (HOPD) services to construct a database for calculating APC group weights.

For the purpose of recalibrating the proposed APC relative payment weights for CY 2026, we began with approximately 143 million final action claims (claims for which all disputes and adjustments have been resolved and payment has been made) for HOPD services furnished on or after January 1, 2024, and before January 1, 2025, before applying our exclusionary criteria and other methodological adjustments. After the application of those data processing changes, we used approximately 76 million final action claims to develop the proposed CY 2026 OPPS payment weights. For exact numbers of claims used and additional details on the claims accounting process, we refer readers to the claims accounting narrative under supporting documentation for the CY 2026 OPPS/ASC proposed rule on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient.*

Addendum N to the CY 2026 OPPS/ASC proposed rule (which is available via the internet on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*) includes the proposed list of bypass codes for CY 2026. The proposed list of bypass codes contains codes that are reported on claims for services in CY 2024 and, therefore, includes codes that were in effect in CY 2024 and used for billing. We proposed to retain these deleted bypass codes on the proposed CY 2026 bypass list because these codes existed in CY 2024 and were covered HOPD services in that period, and CY 2024 claims data were used to calculate proposed CY 2026 payment rates. Keeping these deleted bypass codes on the bypass list potentially allows us to create more ''pseudo'' single procedure claims for ratesetting purposes. ''Overlap bypass codes'' that are members of the proposed multiple imaging composite APCs are identified by asterisks (*) in the third column of Addendum N to the CY 2026 OPPS/ASC proposed rule. HCPCS codes that we proposed to add for CY 2026 are identified by asterisks (*) in the fourth column of Addendum N.

We did not receive any public comments on our general proposal to recalibrate the relative payment weights for each APC based on claims and cost report data for HOPD services or on our proposed bypass code process. We are finalizing as proposed the ''pseudo'' single claims process and the CY 2026 proposed list of bypass codes, finalized in Addendum N to this final rule with comment period (which is available via the internet on the CMS website). For this final rule with comment period, for the purpose of recalibrating the final APC relative payment weights for CY 2026, we used approximately 81 million final action claims (claims for which all disputes and adjustments have been resolved and payment has been made) for HOPD services furnished on or after January 1, 2024, and before January 1, 2025. For the exact numbers of claims used and additional details on the claims accounting process, we refer readers to the claims accounting narrative under supporting documentation for this final rule with comment period on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient.*

b. Calculation and Use of Cost-to-Charge Ratios (CCRs)

For CY 2026, we proposed to continue to use the hospital-specific overall ancillary and departmental cost-to-charge ratios (CCRs) to convert charges to estimated costs through application of a revenue code-to-cost center crosswalk. To calculate the APC costs on which the proposed CY 2026 APC payment rates are based, we calculated hospital-specific departmental CCRs for each hospital for which we had CY 2024 claims data by comparing these claims data to the most recently available hospital cost reports, which, in most cases, are from CY 2023. For the proposed CY 2026 OPPS payment rates, we used the set of claims processed during CY 2024. We applied the hospital-specific CCR to the hospital's charges at the most detailed level possible, based on a revenue code-to-cost center crosswalk that contains a hierarchy of CCRs used to estimate costs from charges for each revenue code. To ensure the completeness of the revenue code-to-cost center crosswalk, we reviewed changes to the list of revenue codes for CY 2024 (the year of claims data we used to calculate the proposed CY 2026 OPPS payment rates) and updates to the National Uniform Billing Committee (NUBC) 2024 Data specifications Manual. That crosswalk is available for review and continuous comment on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient.*

In accordance with our longstanding policy, similar to our finalized policy for CY 2025 OPPS ratesetting, we proposed to calculate CCRs for the standard cost centers—cost centers with a predefined label—and nonstandard cost centers—cost centers defined by a hospital—accepted by the electronic cost report database. In general, the most detailed level at which we calculate CCRs is the hospital-specific departmental level.

While we generally view the use of additional cost data as improving our OPPS ratesetting process, we have historically not included cost report lines for certain nonstandard cost centers in the OPPS ratesetting database construction when hospitals have reported these nonstandard cost centers on cost report lines that do not correspond to the cost center number. We believe it is important to further investigate the accuracy of these cost report data before including such data in the ratesetting process. Further, we believe it is appropriate to gather additional information from the public as well before including the data in OPPS ratesetting. For CY 2026, we proposed not to include the nonstandard cost centers reported in this way in the OPPS ratesetting database construction.

We did not receive any public comments on the general CCR process and therefore, we are finalizing our proposal for CY 2026 to continue to use the hospital-specific overall ancillary and departmental CCRs to convert charges to estimated costs through application of a revenue code-to-cost center crosswalk and we are also finalizing the proposed methodology.

2. Final Data Development and Calculation of Costs Used for Ratesetting

In this section of this final rule with comment period, we discuss the use of claims to calculate the OPPS payment rates for CY 2026. The Hospital OPPS page on the CMS website on which this final rule is posted (*https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient*) provides an accounting of claims used in the development of the final payment rates. That accounting provides additional detail regarding the number of claims derived at each stage of the process. In addition, later in this section we discuss the file of claims that comprises the data set that is available upon payment of an administrative fee under a CMS data use agreement. The CMS website *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient*, includes information about obtaining the ''OPPS Limited Data Set,'' which now includes the additional variables

previously available only in the OPPS Identifiable Data Set, including International Classification of Diseases, Tenth Revision, Clinical Modification (ICD–10–CM) diagnosis codes and revenue code payment amounts. This file is derived from the CY 2024 claims that are used to calculate the final payment rates for the CY 2026 OPPS/ASC final rule with comment period.

Previously, the OPPS established the scaled relative weights on which payments are based using APC median costs, a process described in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74188). However, as discussed in more detail in section II.A.2.f. of the CY 2013 OPPS/ASC final rule with comment period (77 FR 68259 through 68271), we finalized the use of geometric mean costs to calculate the relative weights on which the CY 2013 OPPS payment rates were based. While this policy changed the cost metric on which the relative payments are based, the data process in general remained the same under the methodologies that we used to obtain appropriate claims data and accurate cost information in determining estimated service cost.

We used the methodology described in sections II.A.2.a. through II.A.2.c. of this final rule with comment period to calculate the costs we used to establish the final relative payment weights used in calculating the OPPS payment rates for CY 2026 shown in Addenda A and B to this final rule with comment period (which are available via the internet on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*). We refer readers to section II.A.4. of this final rule with comment period for a discussion of the conversion of APC costs to scaled payment weights.

We note that under the OPPS, CY 2019 was the first year in which the claims data used for setting payment rates (CY 2017 data) contained lines with the modifier ''PN,'' which indicates nonexcepted items and services furnished and billed by off-campus provider-based departments (PBDs) of hospitals. Because nonexcepted items and services are not paid under the OPPS, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58832), we finalized a policy to remove those claim lines reported with modifier ''PN'' from the claims data used in ratesetting for the CY 2019 OPPS and subsequent years. For the CY 2026 OPPS, we proposed to continue to remove claim lines with modifier ''PN'' from the ratesetting process.

We did not receive any public comments on our proposal to continue to remove claim lines reported with modifier ''PN'' from the ratesetting process and are finalizing as proposed.

For details of the claims accounting process used in this CY 2026 OPPS/ASC final rule with comment period, we refer readers to the claims accounting narrative under supporting documentation for this final rule with comment period on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient.*

a. Calculation of Single Procedure APC Criteria-Based Costs

(1) Blood and Blood Products

Since the implementation of the OPPS in August 2000, we have made separate payments for blood and blood products through APCs rather than packaging payment for them into payments for the procedures with which they are administered. Hospital payments for the costs of blood and blood products, as well as for the costs of collecting, processing, and storing blood and blood products, are made through the OPPS payments for specific blood product APCs.

We proposed to continue to establish payment rates for blood and blood products using our blood-specific CCR methodology (88 FR 49562), which utilizes actual or simulated CCRs from the most recently available hospital cost reports to convert hospital charges for blood and blood products to costs. This methodology has been our standard ratesetting methodology for blood and blood products since CY 2005. It was developed in response to data analysis indicating that there was a significant difference in CCRs for those hospitals with and without blood-specific cost centers and past public comments indicating that the former OPPS policy of defaulting to the overall hospital CCR for hospitals not reporting a blood-specific cost center often resulted in an underestimation of the true hospital costs for blood and blood products. To address the differences in CCRs and to better reflect hospitals' costs, our methodology simulates blood CCRs for each hospital that does not report a blood cost center by calculating the ratio of the blood-specific CCRs to hospitals' overall CCRs for those hospitals that do report costs and charges for blood cost centers and applies this mean ratio to the overall CCRs of hospitals not reporting costs and charges for blood cost centers on their cost reports. We proposed to calculate the costs upon which the proposed payment rates for blood and blood products are based using the actual blood-specific CCR for hospitals that reported costs and charges for a blood cost center and a hospital-specific, simulated, blood-specific CCR for hospitals that did not report costs and charges for a blood cost center.

We stated in the CY 2026 OPPS/ASC proposed rule (90 FR 33487) that we continue to believe that the hospital-specific, simulated, blood-specific CCR methodology takes into account the unique charging and cost accounting structure of each hospital, as it better responds to the absence of a blood-specific CCR for a hospital than alternative methodologies, such as defaulting to the overall hospital CCR or applying an average blood-specific CCR across hospitals. This methodology also yields more accurate estimated costs for these products and results in payment rates for blood and blood products that appropriately reflect the relative estimated costs of these products for hospitals without blood cost centers and for these blood products in general.

For a more detailed discussion of payments for blood and blood products through APCs, we refer readers to:

- The CY 2005 OPPS proposed rule (69 FR 50524 and 50525) for a more comprehensive discussion of the blood-specific CCR methodology;
- The CY 2008 OPPS/ASC final rule with comment period (72 FR 66807 through 66810) for a detailed history of the OPPS payment for blood and blood products; and
- The CY 2015 OPPS/ASC final rule with comment period (79 FR 66795 and 66796) for additional discussion of our policy not to make separate payments for blood and blood products when they appear on the same claims as services assigned to a C–APC.

We did not receive public comments on this provision, and therefore, we are finalizing without modification our proposal to calculate the costs upon which the payment rates for blood and blood products are based using the actual blood-specific CCR for hospitals that reported costs and charges for a blood cost center and a hospital specific, simulated, blood-specific CCR for hospitals that did not report costs and charges for a blood cost center. We are also finalizing without modification our proposal to continue to establish payment rates for blood and blood products using our blood-specific CCR methodology, which utilizes actual or simulated CCRs from the most recently available hospital cost reports to convert hospital charges for blood and blood products to costs. Please refer to Addendum B to this final rule with comment period (which is available via

the internet on the CMS website) for the final CY 2026 payment rates for blood and blood products.

(2) Brachytherapy Sources

Section 1833(t)(2)(H) of the Act mandates the creation of additional groups of covered OPD services that classify devices of brachytherapy—cancer treatment through solid source radioactive implants—consisting of a seed or seeds (or radioactive source) (''brachytherapy sources'') separately from other services or groups of services. The statute provides certain criteria for the additional groups. For the history of OPPS payment for brachytherapy sources, we refer readers to prior OPPS final rules, such as the CY 2012 OPPS/ASC final rule with comment period (77 FR 68240 and 68241). As we have stated in prior OPPS updates, we believe that adopting the general OPPS prospective payment methodology for brachytherapy sources is appropriate for several reasons (77 FR 68240). The general OPPS methodology uses costs based on claims data to set the relative payment weights for hospital outpatient services. This payment methodology results in more consistent, predictable, and equitable payment amounts per source across hospitals by averaging the extremely high and low values, in contrast to payment based on hospitals' charges adjusted to costs. We believe that the OPPS methodology, as opposed to payment based on hospitals' charges adjusted to cost, also would provide hospitals with incentives for efficiency in the provision of brachytherapy services to Medicare beneficiaries. Moreover, this approach is consistent with our payment methodology for most items and services paid under the OPPS. We refer readers to the CY 2016 OPPS/ASC final rule with comment period (80 FR 70323 through 70325) for further discussion of the history of OPPS payment for brachytherapy sources.

For CY 2026, except where otherwise indicated, we proposed to continue our policy and use the costs derived from CY 2024 claims data to set the proposed CY 2026 payment rates for brachytherapy sources because we proposed to use CY 2024 data to set the proposed payment rates for most other items and services that would be paid under the CY 2026 OPPS. With the exception of the proposed payment rate for brachytherapy source C2645 (Brachytherapy planar source, palladium-103, per square millimeter) and the proposed payment rates for low-volume brachytherapy APCs discussed in section III.D. of the CY 2026 OPPS/ASC proposed rule, we proposed to base the payment rates for brachytherapy sources on the geometric mean unit costs for each source, consistent with the methodology that we proposed for other items and services paid under the OPPS, as discussed in section II.A.2. of the CY 2026 OPPS/ASC proposed rule. We also proposed for CY 2026 and subsequent years to continue the other payment policies for brachytherapy sources that we finalized and first implemented in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60537). For CY 2026 and subsequent years, we proposed to pay for the stranded and nonstranded not otherwise specified (NOS) codes, HCPCS codes C2698 (Brachytherapy source, stranded, not otherwise specified, per source) and C2699 (Brachytherapy source, non-stranded, not otherwise specified, per source), at a rate equal to the lowest stranded or nonstranded prospective payment rate for such sources, respectively, on a per-source basis (as opposed to, for example, per mCi), which is based on the policy we established in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66785). For CY 2026 and subsequent years, we also proposed to continue the policy we implemented in the CY 2010 OPPS/ASC final rule with comment period (74 FR 60537) regarding payment for new brachytherapy sources for which we have no claims data, for the same reasons we discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66786; which was delayed until January 1, 2010, by section 142 of Pub. L. 110–275). Specifically, this policy is intended to enable us to assign new HCPCS codes for new brachytherapy sources to their own APCs, with prospective payment rates set based on our consideration of external data and other relevant information regarding the expected costs of the sources to hospitals. The proposed CY 2026 payment rates for brachytherapy sources are included in Addendum B to the OPPS/ASC proposed rule (which is available via the internet on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*) and identified with status indicator ''U (Brachytherapy Sources, Paid under OPPS; separate APC payment).''

For CY 2018, we assigned status indicator ''U'' to HCPCS code C2645 (Brachytherapy planar source, palladium-103, per square millimeter) in the absence of claims data and established a payment rate using external data (invoice price) at $4.69 per mm^2 for the brachytherapy source's APC—APC 2648 (Brachytx planar, p-103) (82 FR 49233 through 49244). For CY 2019, in the absence of sufficient claims data, we continued to establish a payment rate for C2645 at $4.69 per mm^2 for APC 2648 (Brachytx planar, p-103) (83 FR 58834 through 58836). Our CY 2018 claims data available for the CY 2020 OPPS/ASC final rule with comment period (84 FR 61142) included two claims with a geometric mean cost for HCPCS code C2645 of $1.02 per mm^2. In response to comments from interested parties, we agreed that, given the limited claims data available and a new outpatient indication for C2645, a payment rate for HCPCS code C2645 based on the geometric mean cost of $1.02 per mm^2 may not adequately reflect the cost of HCPCS code C2645. In the CY 2020 OPPS/ASC final rule with comment period, we finalized our policy to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act, which states that the Secretary shall establish, in a budget neutral manner, other adjustments as determined to be necessary to ensure equitable payments, to maintain the CY 2019 payment rate of $4.69 per mm^2 for HCPCS code C2645 for CY 2020. Similarly, in the absence of sufficient claims data to establish an APC payment rate, in the CY 2021, CY 2022, CY 2023, CY 2024, and CY 2025 OPPS/ASC final rules with comment period (85 FR 85879 through 85880, 86 FR 63469, 87 FR 71760–71761, 88 FR 81553, and 89 FR 93925), we finalized our policy to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2019 payment rate of $4.69 per mm^2 for HCPCS code C2645 for CYs 2021 through 2025.

There were no CY 2024 claims available that reported HCPCS code C2645 for the CY 2026 OPPS/ASC proposed rule. Therefore, in the absence of claims data, we proposed to continue to use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2025 payment rate of $4.69 per mm^2 for HCPCS code C2645, which we proposed to be assigned to APC 2648 (Brachytx planar, p-103), for CY 2026.

Additionally, for CY 2022 and subsequent calendar years, we adopted a Universal Low Volume APC policy for clinical and brachytherapy APCs. As discussed in further detail in section X.C. of the CY 2022 OPPS/ASC final rule with comment period (86 FR 63743 through 63747), we adopted this policy to mitigate wide variation in payment rates that occur from year to year for APCs with low utilization. Such volatility in payment rates from year to

year can result in even lower utilization and potential barriers to access. Brachytherapy APCs that have fewer than 100 single claims used for ratesetting purposes are designated as Low Volume APCs unless an alternative payment rate is applied, such as the use of our equitable adjustment authority under section 1833(t)(2)(E) of the Act in the case of APC 2648 (Brachytx planar, p–103), for which HCPCS code C2645 (Brachytherapy planar source, palladium-103, per square millimeter) is the only code assigned as discussed previously in this section.

For CY 2026, we proposed to designate six brachytherapy APCs as Low Volume APCs as these APCs met our criteria to be designated as Low Volume APCs.

We did not receive public comments on this provision, and therefore, we are finalizing as proposed. Except for brachytherapy APCs designated as Low Volume APCs and APC 2648, we will continue our policy and use the costs derived from CY 2024 claims data to set the final CY 2026 payment rates for brachytherapy sources. We will continue to pay for the stranded and nonstranded not otherwise specified (NOS) codes, HCPCS codes C2698 (Brachytherapy source, stranded, not otherwise specified, per source) and C2699 (Brachytherapy source, non-stranded, not otherwise specified, per source), at a rate equal to the lowest stranded or nonstranded prospective payment rate for such sources, respectively, on a per-source basis. Further, we will use our equitable adjustment authority under section 1833(t)(2)(E) of the Act to maintain the CY 2025 payment rate of $4.69 per mm2 for HCPCS code C2645, which we are assigning to APC 2648 (Brachytx planar, p1–103), for CY 2026. We refer readers to section III.D. of this final rule with comment period for information on the brachytherapy APCs we are finalizing to designate as Low Volume APCs.

The final CY 2026 payment rates for brachytherapy sources are included in Addendum B to this final rule with comment period (which is available via the internet on the CMS website) and are identified with status indicator ''U.'' We continue to invite interested parties to submit recommendations for new codes to describe new brachytherapy sources. Such recommendations should be directed via email to *outpatientpps@cms.hhs.gov.*

b. Comprehensive APCs (C–APCs) for CY 2026

(1) Background

In the CY 2014 OPPS/ASC final rule with comment period (78 FR 74861 through 74910), we finalized a comprehensive payment policy that packages payment for adjunctive and secondary items, services, and procedures into the most costly primary procedure under the OPPS at the claim level. The policy was finalized in CY 2014, but the effective date was delayed until January 1, 2015, to allow additional time for further analysis, opportunity for public comment, and systems preparation. The comprehensive APC (C–APC) policy was implemented effective January 1, 2015, with modifications and clarifications in response to public comments received regarding specific provisions of the C–APC policy (79 FR 66798 through 66810).

A C–APC is defined as a classification for the provision of a primary service and all adjunctive services provided to support the delivery of the primary service. We established C–APCs as a category broadly for OPPS payment and implemented 25 C–APCs beginning in CY 2015 (79 FR 66809 and 66810). We have gradually added new C–APCs since the policy was implemented beginning in CY 2015, with the number of C–APCs now totaling 72 (80 FR 70332; 81 FR 79584 and 79585; 83 FR 58844 through 58846; 84 FR 61158 through 61166; 85 FR 85885; 86 FR 63474; 87 FR 71769; 88 FR 81562; and 89 FR 93926).

Under our C–APC policy, we designate a service described by a HCPCS code assigned to a C–APC as the primary service when the service is identified by OPPS status indicator ''J1''. When such a primary service is reported on a hospital outpatient claim, taking into consideration the few exceptions that are discussed below, we make payment for all other items and services reported on the hospital outpatient claim as being integral, ancillary, supportive, dependent, and adjunctive to the primary service (hereinafter collectively referred to as ''adjunctive services'') and representing components of a complete comprehensive service (78 FR 74865 and 79 FR 66799). Payments for adjunctive services are packaged into the payments for the primary services. This results in a single prospective payment for each of the primary, comprehensive services based on the costs of all reported services at the claim level. One example of a primary service would be a partial mastectomy, and an example of a secondary service packaged into that primary service would be a radiation therapy procedure.

Services excluded from the C–APC policy under the OPPS include services that are not covered OPD services, services that cannot, by statute, be paid for under the OPPS, and services that are required by statute to be separately paid. This includes certain mammography and ambulance services that are not covered OPD services in accordance with section 1833(t)(1)(B)(iv) of the Act; brachytherapy seeds, which also are required by statute to receive separate payment under section 1833(t)(2)(H) of the Act; pass-through payment drugs and devices, which also require separate payment under section 1833(t)(6) of the Act; self-administered drugs (SADs) that are not otherwise packaged as supplies because they are not covered under Medicare Part B under section 1861(s)(2)(B) of the Act; and certain preventive services (78 FR 74865 and 79 FR 66800 and 66801). A list of services excluded from the C–APC policy is included in Addendum J to this final rule with comment period (which is available via the internet on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*). If a service does not appear on this list of excluded services, payment for it will be packaged into the payment for the primary C–APC service when it appears on an outpatient claim with a primary C–APC service.

The C–APC policy payment methodology set forth in the CY 2014 OPPS/ASC final rule with comment period and modified and implemented beginning in CY 2015 is summarized as follows (78 FR 74887 and 79 FR 66800):

Basic Methodology. As stated in the CY 2015 OPPS/ASC final rule with comment period, we define the C–APC payment policy as including all covered OPD services on a hospital outpatient claim reporting a primary service that is assigned to status indicator ''J1,'' [1] excluding services that are not covered OPD services or that cannot by statute be paid for under the OPPS. Services and procedures described by HCPCS codes assigned to status indicator ''J1'' are assigned to C–APCs based on our usual APC assignment methodology by evaluating the geometric mean costs of the primary service claims to establish resource similarity and the clinical

[1] Status indicator ''J1'' denotes Hospital Part B Services Paid Through a Comprehensive APC. Further information can be found in CY 2026 Addendum D1.

characteristics of each procedure to establish clinical similarity within each APC.

In the CY 2016 OPPS/ASC final rule with comment period, we expanded the C–APC payment methodology to qualifying extended assessment and management encounters through the ''Comprehensive Observation Services'' C–APC (C–APC 8011). Services within this APC are assigned status indicator ''J2.'' [2] Specifically, we make a payment through C–APC 8011 for a claim that:

- Does not contain a procedure described by a HCPCS code to which we have assigned status indicator ''T;'' [3]
- Contains 8 or more units of services described by HCPCS code G0378 (Hospital observation services, per hour);
- Contains services provided on the same date of service or 1 day before the date of service for HCPCS code G0378 that are described by one of the following codes: HCPCS code G0379 (Direct admission of patient for hospital observation care) on the same date of service as HCPCS code G0378; CPT code 99281 (Emergency department visit for the evaluation and management of a patient (Level 1)); CPT code 99282 (Emergency department visit for the evaluation and management of a patient (Level 2)); CPT code 99283 (Emergency department visit for the evaluation and management of a patient (Level 3)); CPT code 99284 (Emergency department visit for the evaluation and management of a patient (Level 4)); CPT code 99285 (Emergency department visit for the evaluation and management of a patient (Level 5)) or HCPCS code G0380 (Type B emergency department visit (Level 1)); HCPCS code G0381 (Type B emergency department visit (Level 2)); HCPCS code G0382 (Type B emergency department visit (Level 3)); HCPCS code G0383 (Type B emergency department visit (Level 4)); HCPCS code G0384 (Type B emergency department visit (Level 5)); CPT code 99291 (Critical care, evaluation and management of the critically ill or critically injured patient; first 30–74 minutes); or HCPCS code G0463 (Hospital outpatient clinic visit for assessment and management of a patient); and
- Does not contain services described by a HCPCS code to which we have assigned status indicator ''J1.''

The assignment of status indicator ''J2'' to a specific set of services performed in combination with each other allows for all other OPPS payable services and items reported on the claim (excluding services that are not covered OPD services or that cannot by statute be paid for under the OPPS) to be deemed adjunctive services representing components of a comprehensive service and resulting in a single prospective payment for the comprehensive service based on the costs of all reported services on the claim (80 FR 70333 through 70336).

Services included under the C–APC payment packaging policy, that is, services that are typically adjunctive to the primary service and provided during the delivery of the comprehensive service, include diagnostic procedures, laboratory tests, and other diagnostic tests and treatments that assist in the delivery of the primary procedure; visits and evaluations performed in association with the procedure; uncoded services and supplies used during the service; durable medical equipment as well as prosthetic and orthotic items and supplies when provided as part of the outpatient service; and any other components reported by HCPCS codes that represent services that are provided during the complete comprehensive service (78 FR 74865 and 79 FR 66800).

In addition, payment for hospital outpatient department services that are similar to therapy services, such as speech language pathology, and delivered either by therapists or nontherapists is included as part of the payment for the packaged complete comprehensive service. These services that are provided during the perioperative period are adjunctive services and are deemed not to be therapy services as described in section 1834(k) of the Act, regardless of whether the services are delivered by therapists or other nontherapist health care workers. We have previously noted that therapy services are those provided by therapists under a plan of care in accordance with section 1835(a)(2)(C) and section 1835(a)(2)(D) of the Act and are paid for under section 1834(k) of the Act, subject to annual therapy caps as applicable (78 FR 74867 and 79 FR 66800). However, certain other services similar to therapy services are considered and paid for as hospital outpatient department services. Payment for these nontherapy outpatient department services that are reported with therapy codes and provided with a comprehensive service is included in the payment for the packaged complete comprehensive service. We note that these services, even though they are reported with therapy codes, are hospital outpatient department services and not therapy services. We refer readers to the July 2016 OPPS Change Request 9658 (Transmittal 3523)[4] for further instructions on reporting these services in the context of a C–APC service.

Items included in the packaged payment provided in conjunction with the primary service also include all drugs, biologicals, and radiopharmaceuticals, regardless of cost, except those drugs with pass-through payment status and SADs, unless they function as packaged supplies (78 FR 74868, 74869, and 74909 and 79 FR 66800). We refer readers to Section 50.2M, Chapter 15 of the Medicare Benefit Policy Manual for a description of our policy on SADs treated as hospital outpatient supplies, including lists of SADs that function as supplies and those that do not function as supplies.[5]

We define each hospital outpatient claim reporting a single unit of a single primary service assigned to status indicator ''J1'' as a single ''J1'' unit procedure claim (78 FR 74871 and 79 FR 66801). Line-item charges for services included on the C–APC claim are converted to line-item costs, which are then summed to develop the estimated APC costs. These claims are then assigned one unit of the service with status indicator ''J1'' and later used to develop the geometric mean costs for the C–APC relative payment weights. (We note that we use the term ''comprehensive'' to describe the geometric mean cost of a claim reporting ''J1'' service(s) or the geometric mean cost of a C–APC, inclusive of all the items and services included in the C–APC service payment bundle.) Charges for services that would otherwise be separately payable are added to the charges for the primary service. This process differs from our traditional cost accounting methodology only in that all such services on the claim are packaged (except certain services as described above). We apply our standard data trims, which exclude claims with extremely high primary units or extreme costs.

The comprehensive geometric mean costs are used to establish resource similarity and, along with clinical similarity, dictate the assignment of the primary services to the C–APCs. We

[2] Status indicator ''J2'' denotes Hospital Part B Services That May Be Paid Through a Comprehensive APC. Further information can be found in CY 2026 Addendum D1.

[3] Status Indicator ''T'' is defined as a ''Procedure or Service, Multiple Procedure Reduction Applies'' the OPPS payment status is ''Paid under OPPS; separate APC payment.'' Definitions to all OPPS payment status indicators are available in Addenda D1 to this final rule with comment period.

[4] *https://www.cms.gov/regulations-and-guidance/guidance/transmittals/downloads/r3523cp.pdf.*

[5] *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/bp102c15.pdf.*

establish a ranking of each primary service (single unit only) to be assigned to status indicator ''J1'' according to its comprehensive geometric mean costs. For the minority of claims reporting more than one primary service assigned to status indicator ''J1'' or units thereof, we identify one ''J1'' service as the primary service for the claim based on our cost-based ranking of primary services. We then assign these multiple ''J1'' procedure claims to the C–APC to which the service designated as the primary service is assigned. If the reported ''J1'' services on a claim map to different C–APCs, we designate the ''J1'' service assigned to the C–APC with the highest comprehensive geometric mean cost as the primary service for that claim. If the reported multiple ''J1'' services on a claim map to the same C–APC, we designate the most costly service (at the HCPCS code level) as the primary service for that claim. This process results in initial assignments of claims for the primary services assigned to status indicator ''J1'' to the most appropriate C–APCs based on both single and multiple procedure claims reporting these services and clinical and resource homogeneity.

Complexity Adjustments. We use complexity adjustments to provide increased payment for certain comprehensive services. We apply a complexity adjustment by promoting qualifying paired ''J1'' service code combinations or paired code combinations of ''J1'' services and certain add-on codes (as described further below) from the originating C–APC (the C–APC to which the designated primary service is first assigned) to the next higher paying C–APC in the same clinical family of C–APCs. We apply this type of complexity adjustment when the paired code combination represents a complex, costly form or version of the primary service according to the following criteria:

- Frequency of 25 or more claims reporting the code combination (frequency threshold); and
- Violation of the 2 times rule, as stated in section 1833(t)(2) of the Act and section III.B.2. of this final rule with comment period, in the originating C–APC (cost threshold).

These criteria identify paired code combinations that occur commonly and exhibit materially greater resource requirements than the primary service. The CY 2017 OPPS/ASC final rule with comment period (81 FR 79582) included a revision to the complexity adjustment eligibility criteria. Specifically, we finalized a policy to discontinue the requirement that a code combination (that qualifies for a complexity adjustment by satisfying the frequency and cost criteria thresholds described above) also not create a 2 times rule violation in the higher level or receiving APC.

After designating a single primary service for a claim, we evaluate that service in combination with each of the other procedure codes reported on the claim assigned to status indicator ''J1'' (or certain add-on codes) to determine if there are paired code combinations that meet the complexity adjustment criteria. For a new HCPCS code, we determine initial C–APC assignment and qualification for a complexity adjustment using the best available information, crosswalking the new HCPCS code to a predecessor code(s) when appropriate.

Once we have determined that a particular code combination of ''J1'' services (or combinations of ''J1'' services reported in conjunction with certain add-on codes) represents a complex version of the primary service because it is sufficiently costly, frequent, and a subset of the primary comprehensive service overall according to the criteria described above, we promote the claim including the complex version of the primary service as described by the code combination to the next higher cost C–APC within the clinical family, unless the primary service is already assigned to the highest cost APC within the C–APC clinical family or assigned to the only C–APC in a clinical family. We do not create new APCs with a comprehensive geometric mean cost that is higher than the highest geometric mean cost (or only) C–APC in a clinical family just to accommodate potential complexity adjustments. Therefore, the highest payment for any claim including a code combination for services assigned to a C–APC would be the highest paying C–APC in the clinical family (79 FR 66802).

We package payment for all add-on codes into the payment for the C–APC. However, certain primary service add-on combinations may qualify for a complexity adjustment. As noted in the CY 2016 OPPS/ASC final rule with comment period (80 FR 70331), all add-on codes that can be appropriately reported in combination with a base code that describes a primary ''J1'' service are evaluated for a complexity adjustment.

To determine which combinations of primary service codes reported in conjunction with an add-on code may qualify for a complexity adjustment for CY 2026, we apply the frequency and cost criteria thresholds discussed above, testing claims reporting one unit of a single primary service assigned to status indicator ''J1'' and any number of units of a single add-on code for the primary ''J1'' service. If the frequency and cost criteria thresholds for a complexity adjustment are met and reassignment to the next higher cost APC in the clinical family is appropriate (based on meeting the criteria outlined above), we make a complexity adjustment for the code combination; that is, we reassign the primary service code reported in conjunction with the add-on code to the next higher cost C–APC within the same clinical family of C–APCs. As previously stated, we package payment for add-on codes into the C–APC payment rate. If any add-on code reported in conjunction with the ''J1'' primary service code does not qualify for a complexity adjustment, payment for the add-on service continues to be packaged into the payment for the primary service and is not reassigned to the next higher cost C–APC. We list the final complexity adjustments for ''J1'' and add-on code combinations for CY 2026, along with all the other final complexity adjustments, in Addendum J to this final rule with comment period (which is available via the internet on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*).

Addendum J to this final rule with comment period includes the cost statistics for each code combination that would qualify for a complexity adjustment (including primary code and add-on code combinations). Addendum J to this final rule with comment period also contains summary cost statistics for each of the paired code combinations that describe a complex code combination that would qualify for a complexity adjustment and be reassigned to the next higher cost C–APC within the clinical family. The combined statistics for all final reassigned complex code combinations are represented by an alphanumeric code with the first four digits of the designated primary service followed by a letter. For example, the final geometric mean cost listed in Addendum J for the code combination described by complexity adjustment assignment 3320R, which is assigned to C–APC 5224 (Level 4 Pacemaker and Similar Procedures), includes all paired code combinations that will be reassigned to C–APC 5224 when CPT code 33208 is the primary code. Providing the information contained in Addendum J to this final rule with comment period allows interested parties the

opportunity to better assess the impact associated with the assignment of claims with each of the paired code combinations eligible for a complexity adjustment.

We received public comments on these proposals. The following is a summary of the comments received and our responses.

Comment: We received support from commenters for a variety of existing and proposed complexity adjustments.

Response: We thank the commenters for their support.

Comment: Multiple commenters requested that CMS apply a complexity adjustment to additional code combinations. The specific C–APC complexity adjustment code combinations requested by the commenters for CY 2026 are listed in Table 1.

37187 (Percutaneous transluminal mechanical thrombectomy, vein(s), including intraprocedural pharmacological thrombolytic injections and fluoroscopic guidance)	**37248** (Transluminal balloon angioplasty (except dialysis circuit), open or percutaneous, including all imaging and radiological supervision and interpretation necessary to perform the angioplasty within the same vein; initial vein)	5193	5194
43238 (Esophagogastroduodenoscopy, flexible, transoral; with transendoscopic ultrasound-guided intramural or transmural fine needle aspiration/biopsy(s), (includes endoscopic ultrasound examination limited to the esophagus, stomach or duodenum, and adjacent structures))	**43255** (Esophagogastroduodenoscopy, flexible, transoral; with control of bleeding, any method)	5302	5303
43270 (Esophagogastroduodenoscopy, flexible, transoral; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed))	**43255** (Esophagogastroduodenoscopy, flexible, transoral; with control of bleeding, any method)	5302	5303
43237 (Esophagogastroduodenoscopy, flexible, transoral; with endoscopic ultrasound examination limited to the esophagus, stomach or duodenum, and adjacent structures)	**C9768** (Endoscopic ultrasound-guided direct measurement of hepatic portosystemic pressure gradient by any method (list separately in addition to code for primary procedure))	5302	5303
43238 (Esophagogastroduodenoscopy, flexible, transoral; with transendoscopic ultrasound-guided intramural or transmural fine needle aspiration/biopsy(s), (includes endoscopic ultrasound examination limited to the esophagus, stomach or duodenum, and adjacent structures))		5302	5303

BILLING CODE 4120–01–C

Response: We reviewed each of the requested code combinations suggested by commenters, listed in Table 1, against our complexity adjustment criteria. The following code combinations met our cost and frequency criteria, qualifying for a complexity adjustment for CY 2026:

- Primary HCPCS code 93454 with secondary HCPCS code 0523T.
- Primary HCPCS code 93460 with secondary HCPCS code 0523T.
- Primary HCPCS code 28740 with secondary HCPCS code 20902.
- Primary HCPCS 28750 code with secondary HCPCS code 20900.
- Primary HCPCS code 28750 with secondary HCPCS code 28308.
- Primary HCPCS 22513 code with secondary HCPCS code 22515.
- Primary HCPCS 22514 code with secondary HCPCS code 22515.
- Primary HCPCS 43255 code with secondary HCPCS code 43245.
- Primary HCPCS 37187 code with secondary HCPCS code 37248.

All the remaining code combinations listed failed to meet our cost or frequency criteria and do not qualify for complexity adjustments for CY 2026. Addendum J to this final rule with comment period includes the cost statistics for each code combination that was evaluated for a complexity adjustment.

Comment: Several commenters brought to our attention that some qualifying complexity adjustments pairings were promoted up two APC levels. Commenters requested that we clarify that code pairings that qualify for a complexity adjustment are only promoted to an APC one level higher. Other commenters flagged code pairings that qualified for complexity adjustments but were not mapped to the next highest APC in their clinical family. Other commenters found that some code pairings in Addendum J which qualified for complexity adjustments in the ''Complexity Adjustment Evaluation'' tab were not listed in the ''Complexity Adjustments'' tab.

Response: We thank the commenters for bringing this to our attention. It has been our longstanding policy to promote coding pairings that qualify for complexity adjustments to the next highest APC in their clinical family. In Addendum J to this final rule with comment period, all code pairings that qualify for complexity adjustments are mapped to the next highest APC in their clinical family. All code pairings that qualify for complexity adjustments can be found in both ''Complexity Adjustment Evaluation'' tab and the ''Complexity Adjustments'' tab of Addendum J.

Comment: We received requests to evaluate HCPCS code pairings for complexity adjustments that were not any combination of ''J1'' or add-on codes. Commenters requested that CMS evaluate codes with status indicators ''S'', which indicates a code is paid separately and is not subject to multiple procedure discounting. Commenters specifically requested that CMS consider G0390 (trauma activation with critical care) and G0257 (emergency/unscheduled dialysis) because the commenters believe that complexity adjustments do not currently recognize the cost of trauma cases.

Response: As stated in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66770 through 67034), under our C–APC policy, we designate a service described by a HCPCS code assigned to a C–APC as the primary service when the service is identified by OPPS status indicator ''J1.'' We use complexity adjustments to provide increased payment for certain

comprehensive services. We apply a complexity adjustment by promoting qualifying paired ''J1'' service code combinations or paired code combinations of ''J1'' services and certain add-on codes from the originating C–APC (the C–APC to which the designated primary service is first assigned) to the next higher paying C–APC in the same clinical family of C–APCs. If a code pairing is not ''J1'' plus ''J1'' or ''J1'' plus an add-on code, it would not be evaluated for a complexity adjustment. In the CY 2026 OPPS/ASC proposed rule, we did solicit comments on revising our complexity adjustment methodology, which is summarized below in section II.B.2. of this final rule with comment period. Additionally, the assigned status indicators for HCPCS codes are open for public comment through our annual rulemaking process if commenters feel that any code may need to be reevaluated.

Comment: Commenters requested that CMS provide additional information so that other interested parties are able to replicate Addendum J in its entirety. Commenters specifically requested additional clarity around the treatment of add-on codes.

Response: We refer commenters to the claims accounting narrative under supporting documentation for this CY 2026 OPPS/ASC final rule with comment period on the CMS website. The claims accounting narrative provides a detailed overview of how we processed the CY 2024 claims data to produce the proposed prospective CY 2026 OPPS payment rates.

After consideration of public comments, we are finalizing the C–APC complexity adjustment policy for CY 2026 as proposed. We are also finalizing the proposed complexity adjustments, with the addition of nine new code combinations suggested by commenters that meet our complexity adjustment criteria. We have made additional updates to the claims accounting narrative, specifically the section on Comprehensive APCs, in order to provide additional clarity on the claims accounting process used for determining complexity adjustments. We have also updated Addendum J to provide additional transparency on this issue.

(2) Comment Solicitation on C–APC Complexity Adjustment Criteria

In response to a variety of requests from interested parties, as well as public comments in past rulemaking, related to our C–APC complexity adjustment criteria, in the CY 2026 OPPS/ASC proposed rule (90 FR 33491) we included a comment solicitation on C–APC adjustment criteria. Interested parties and commenters have requested that CMS modify the established C–APC complexity adjustment eligibility criteria of 25 or more claims reporting the code combination (frequency threshold) and a violation of the 2 times rule in the originating C–APC (cost threshold) to allow additional code combinations to qualify for complexity adjustments. Interested parties and commenters have also requested expanding the qualifying code combinations for complexity adjustments to allow clusters of procedures, consisting of a ''J1'' code pair and multiple other associated add-on codes, to be used in combination with that ''J1'' code pair to qualify. These interested parties and commenters have noted these expanded combinations may allow for a more accurate reflection of medical practice when multiple procedures are performed together or there are certain complex procedures that include numerous add-on codes.

For CY 2026, we solicited comments on potential refinements to our C–APC complexity adjustment criteria. Under this solicitation, we sought comment on expanding code combinations that qualify for complexity adjustments, including any specifications related to determining specific combination types and how they represent a complex, costly subset of the primary service. We sought comment on how CMS could identify service pairings or clusters of services for complexity adjustments that are clinically appropriate but are currently not evaluated for complexity adjustments. Additionally, if we were to expand our complexity adjustment criteria to allow for clusters of codes, we sought comment on what the appropriate cost and frequency thresholds could be used to identify which code clusters truly reflect complex and resource-intensive code combinations that are commonly performed in the hospital outpatient department setting.

We sought comment on which services are clinically integral to the provision of ''J1'' services that would qualify for a complexity adjustment under an expanded evaluation framework. Specifically, we sought comment on what criteria we could add, reflecting clinical practice, that would determine the costly additional components that are often associated with other high-cost packaged items and services. Finally, we sought comment on how we might address the unintended consequences of granular coding on the mechanics of the complexity adjustment criteria and if highly specific coding truly reflects clinical practice in hospital outpatient departments.

We received public comments on this comment solicitation. The following is a summary of the comments we received and our responses.

Comment: We received a number of comments on C–APC complexity adjustment criteria. Commenters shared their ideas on how to refine the complexity adjustment criteria and methodology, on the mechanics of how complexity adjustments are evaluated, and how the data is presented to the public.

Many commenters expressed their need for additional information so that interested parties would be able to accurately replicate Addendum J. To that end, commenters requested that CMS provide sufficient detail in the CY 2026 OPPS final rule with comment period Claims Accounting Narrative such that Addendum J could be fully replicated in its entirety. Other commenters suggested that CMS detail the step-by-step claims accounting process used to count claims for the purpose of evaluating complexity adjustment eligibility.

Some commenters requested that CMS include the full list of add-on codes eligible for evaluation for the complexity adjustment, along with the method CMS used to determine whether or not a code was eligible for complexity adjustment evaluation. Commenters also requested that CMS provide additional information and greater transparency on the methodology used to evaluate the complexity adjustment frequency criteria for ''J1'' and add-on codes. Specifically, commenters suggested that CMS should evaluate the total costs of ''J1 + N'' code combinations in the same manner as single J1 procedures and ''J1 + J1'' code combinations. Commenters indicated that this would be consistent with how CMS evaluates the cost of single frequency ''J1'' procedures and ''J1 + J1'' procedure code combinations.

Many comments suggested CMS could modify the methodology used when determining the cost threshold for a code combination to qualify for a complexity adjustment. Commenters recommended that CMS use the ''lower of'' methodology to determine the eligibility cost threshold:

- Current methodology using the two times rule, OR
- The lowest GMC of significant procedures in the APC to which the code combination would be eligible for complexity adjustment.

Commenters contended that the current methodology may be appropriate for lower cost APCs where the differences between the APC levels

and procedures are less significant. However, for higher-cost APCs, they say that using the two-times rule becomes problematic, and in some instances, the threshold is higher than the cost of any single procedure in the higher paying APC. By adopting the recommended methodology, commenters explained that more code combinations would be eligible for complexity adjustments. Commenters went on to say that the purpose of complexity adjustments is to ensure appropriate payment under the C–APC methodology, and therefore it is critical that CMS employ a methodology that reflects a more appropriate eligibility cost threshold consistent with the single ''J1'' procedures included in each APC.

Nearly all commenters on this issue agreed that CMS should expand its review of procedure combinations to include clusters of ''J1'' primary service and add-on codes, rather than only code pairs. Commenters asserted that this would better reflect medical practice when multiple procedures are performed together. Some commenters even suggested that CMS consider procedure combinations that include clusters of ''J1'' and add-on codes, and certain select HCPCS device codes. Commenters had specific suggestions on how using code clusters could work. One commenter suggested using clusters but maintaining cost and frequency thresholds, further suggesting using eligibility for Transitional Pass-Through payment as one criterion by which to identify instances where a code cluster would be appropriate for an expanded complexity adjustment. Other commenters suggested that CMS could limit the evaluation of code clusters to those nominated by the public on an annual basis.

Multiple commenters requested that CMS revise the complexity adjustment policy by allowing promotion of qualifying code combinations, even when the primary code is already assigned to the highest level of APCs within a clinical family (for example, creating a new APC level to accommodate these higher cost cases). Other commenters asserted that in order to maintain stability and predictability of payments associated with complex procedures, CMS should allow established qualifying codes to maintain the complexity adjusted payment for three calendar years before they are required to go through the eligibility review. Further, commenters said that APC reassignment for codes that qualify for 3 consecutive years should be made permanent.

In response to our request for comments on whether highly specific coding truly reflects clinical practice in hospital outpatient departments, commenters asserted that CMS' broad C–APC packaging policy, including the current eligibility criteria for complexity adjustments, has discouraged complete and accurate hospital reporting of packaged costs. Commenters explained that since hospitals receive the same C–APC payment for furnishing multiple packaged services, there is no incentive to report costs that do not drive reimbursement. Commenters asserted that this underreporting of packaged costs, coupled with CMS' claims edits for device-intensive procedures, leads to underpayment for APCs that rely heavily on packaged items, especially those with expensive routine supplies.

We also received a variety of other comments on ways to expand the scope of the complexity adjustment methodology, including establishing a provisional complexity adjustment process for code combinations involving newly removed IPO list procedures, reviewing bilateral procedure claims with high-cost implantable supplies, evaluating non-J1 procedure codes such as status indicators ''S'' and ''T'' for significant cost variation, and waiving the Administrative Procedures Act requirements for public comment to adopt suggested changes in the CY 2026 OPPS/ASC final rule for January 1, 2026.

Response: We sincerely thank commenters for their interest and engagement on this important issue. Given the wide array of information presented through this public comment process, we will take the technical recommendations, alternate methodological approaches, and other detailed feedback provided into consideration for future notice and comment rulemaking. We welcome ongoing dialogue and engagement from interested parties regarding suggestions for potential future C–APC complexity adjustment criteria revisions.

(3) Exclusion of Procedures Assigned to New Technology APCs From the C–APC Policy

Services that are assigned to New Technology APCs are typically new procedures that do not have sufficient claims history to establish an accurate payment for them. Beginning in CY 2002, we retain services within New Technology APC groups until we gather sufficient claims data to enable us to assign the service to an appropriate clinical APC. This policy allows us to move a service from a New Technology APC in less than 2 years if sufficient data are available. It also allows us to retain a service in a New Technology APC for more than 2 years if sufficient data upon which to base a decision for reassignment have not been collected (82 FR 59277).

The C–APC payment policy packages payment for adjunctive and secondary items, services, and procedures into the most costly primary procedure under the OPPS at the claim level. Prior to CY 2019, when a procedure assigned to a New Technology APC was included on the claim with a primary procedure, identified by OPPS status indicator ''J1,'' payment for the new technology service was typically packaged into the payment for the primary procedure. Because the new technology service was not separately paid in this scenario, the overall number of single claims available to determine an appropriate clinical APC for the new service was reduced. This was contrary to the objective of the New Technology APC payment policy, which is to gather sufficient claims data to enable us to assign the service to an appropriate clinical APC.

To address this issue and ensure that there are sufficient claims data for services assigned to New Technology APCs, in the CY 2019 OPPS/ASC final rule with comment period (83 FR 58847), we finalized excluding payment for any procedure that is assigned to a New Technology APC (APCs 1491 through 1599 and APCs 1901 through 1908) from being packaged when included on a claim with a ''J1'' service assigned to a C–APC. In the CY 2020 OPPS/ASC final rule with comment period, we finalized that beginning in CY 2020, payment for services assigned to a New Technology APC would be excluded from being packaged into the payment for comprehensive observation services assigned status indicator ''J2'' when they are included on a claim with a ''J2'' service (84 FR 61167).

(4) Exclusion of Drugs and Biologicals Described by HCPCS Code C9399 (Unclassified Drugs or Biologicals) From the C–APC Policy

Section 1833(t)(15) of the Act, as added by section 621(a)(1) of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Pub. L. 108–173), provides for payment under the OPPS for new drugs and biologicals until HCPCS codes are assigned. Under this provision, we are required to make payment for a covered outpatient drug or biological that is furnished as part of covered outpatient department services but for which a HCPCS code has not yet been assigned in an amount equal to 95 percent of average wholesale price (AWP) for the drug or biological.

In the CY 2005 OPPS/ASC final rule with comment period (69 FR 65805), we implemented section 1833(t)(15) of the Act by instructing hospitals to bill for a drug or biological that is newly approved by the Food and Drug Administration (FDA) and that does not yet have a HCPCS code by reporting the National Drug Code (NDC) for the product along with the newly created HCPCS code C9399 (Unclassified drugs or biologicals). We explained that when HCPCS code C9399 appears on a claim, the Outpatient Code Editor (OCE) suspends the claim for manual pricing by the Medicare Administrative Contractor (MAC). The MAC prices the claim at 95 percent of the drug or biological's AWP, using Red Book or an equivalent recognized compendium, and processes the claim for payment. We emphasized that this approach enables hospitals to bill and receive payment for a new drug or biological concurrent with its approval by the FDA. The hospital does not have to wait for the next quarterly release or for approval of a product specific HCPCS code to receive payment for a newly approved drug or biological or to resubmit claims for adjustment. We instructed that hospitals would discontinue billing HCPCS code C9399 and the NDC upon implementation of a product specific HCPCS code, status indicator, and appropriate payment amount with the next quarterly update. We also note that HCPCS code C9399 is paid in a similar manner in the ASC setting, as 42 CFR 416.171(b) outlines that certain drugs and biologicals for which separate payment is allowed under the OPPS are considered covered ancillary services for which the OPPS payment rate, which is 95 percent of AWP for HCPCS code C9399, applies.

Since the implementation of the C–APC policy in 2015, payment for drugs and biologicals described by HCPCS code C9399 had been included in the C–APC payment when these products appear on a claim with a primary C–APC service. Packaging payment for these drugs and biologicals that appear on a hospital outpatient claim with a primary C–APC service is consistent with our C–APC packaging policy under which we make payment for all items and services, including all non-pass-through drugs, reported on the hospital outpatient claim as being integral, ancillary, supportive, dependent, and adjunctive to the primary service and representing components of a complete comprehensive service, with certain limited exceptions (78 FR 74869). It was our position that the total payment for the C–APC with which payment for a drug or biological described by HCPCS code C9399 is packaged includes payment for the drug or biological at 95 percent of its AWP.

However, we determined that in certain instances, drugs and biologicals described by HCPCS code C9399 are not being paid at 95 percent of their AWPs when payment for them is packaged with payment for a primary C–APC service. In order to ensure payment for new drugs and biologicals described by HCPCS code C9399 at 95 percent of their AWP, for CY 2023 and subsequent years, we finalized our proposal to exclude any drug or biological described by HCPCS code C9399 from packaging when the drug or biological is included on a claim with a ''J1'' service, which is the status indicator assigned to a C–APC, and a claim with a ''J2'' service, which is the status indicator assigned to comprehensive observation services. See Addendum J for the CY 2026 C–APC payment policy exclusions.

In the CY 2023 OPPS/ASC final rule with comment period, we finalized the proposal in section XI., ''CY 2023 OPPS Payment Status and Comment Indicators'', to add a new definition to status indicator ''A'' to include unclassified drugs and biologicals that are reportable with HCPCS code C9399 (87 FR 72051). The current definition, as finalized in the CY 2023 OPPS/ASC final rule with comment period, can be found in Addendum D1, would ensure the MAC prices claims for drugs or biologicals billed with HCPCS code C9399 at 95 percent of the drug or biological's AWP and pays separately for the drug or biological under the OPPS when it appears on the same claim as a primary C–APC service.

(5) Exclusion of Cell and Gene Therapies From the C–APC Policy

As previously discussed in this section, and in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74865), the C–APC policy packages payment for items and services that are typically integral, ancillary, supportive, dependent, or adjunctive to the primary service and provided during the delivery of the comprehensive service, including diagnostic procedures, laboratory tests and other diagnostic tests and treatments that assist in the delivery of the primary procedure. In the CY 2014 OPPS/ASC final rule with comment period (78 FR 74861), we finalized defining a comprehensive APC as a classification for the provision of a primary service and all adjunctive services provided to support the delivery of the primary service. Because a comprehensive APC treats all individually reported codes as representing components of the comprehensive service, we make a single prospective payment based on the cost of all individually reported codes that represent the provision of a primary service and all adjunctive services provided to support that delivery of the primary service.

As discussed in the CY 2025 OPPS/ASC proposed rule (89 FR 59201 through 59204), we generally treat all items and services reported on a C–APC claim as integral, ancillary, supportive, dependent, and adjunctive to the primary service and representing components of a comprehensive service. Historically, items packaged for payment provided in conjunction with the primary C–APC service also include all drugs, biologicals, and radiopharmaceuticals, regardless of cost, except those drugs with pass-through payment status and those drugs that are usually self-administered (SADs), unless they function as supplies (78 FR 74868 through 74869 and 74909).

However, we recognized in the CY 2025 OPPS/ASC proposed rule (89 FR 59201 through 59204) that there are rare instances in which cell and gene therapies appear on the same claim as a primary C–APC service and therefore, have their payment packaged with payment for the primary C–APC service. As stated in the CY 2025 OPPS/ASC final rule with comment period (89 FR 93932 through 93938), given the unique nature of these therapies, we do not believe they function as integral, ancillary, supportive, dependent, or adjunctive to any of the current primary C–APC services. Additionally, we stated that when these products are administered, they are the primary treatment being administered to a patient and thus, are not integral, ancillary, supportive, dependent, or adjunctive to any primary C–APC services.

Therefore, we finalized a policy for CY 2025 and subsequent years (89 FR 93932 through 93938), to not package payment for cell and gene therapies into C–APCs, when those cell and gene therapies are not functioning as integral, ancillary, supportive, dependent, or adjunctive to the primary C–APC service. For new cell and gene therapy products that are not integral, ancillary, supportive, dependent, or adjunctive to any C–APC primary service, we will continue to add their product specific HCPCS codes, when created, to the C–APC exclusion list. The proposed list of qualifying products can be found in Table 2.

BILLING CODE 4120–01–P

TABLE 2: CELL AND GENE THERAPIES PROPOSED FOR EXCLUSION FROM C-APC PACKAGING FOR CY 2026

Trade Name	HCPCS Code	Long Descriptor
Yescarta	Q2041	Axicabtagene ciloleucel, up to 200 million autologous anti-cd19 car positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose
Kymriah	Q2042	Tisagenlecleucel, up to 600 million car-positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose
Provenge	Q2043	Sipuleucel-t, minimum of 50 million autologous cd54+ cells activated with pap-gm-csf, including leukapheresis and all other preparatory procedures, per infusion
Tecartus	Q2053	Brexucabtagene autoleucel, up to 200 million autologous anti-cd19 car positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose
Breyanzi	Q2054	Lisocabtagene maraleucel, up to 110 million autologous anti-cd19 car-positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose
Abecma	Q2055	Idecabtagene vicleucel, up to 510 million autologous b-cell maturation antigen (bcma) directed car-positive t cells, including leukapheresis and dose preparation procedures, per therapeutic dose
Luxturna	J3398	Injection, voretigene neparvovec-rzyl, 1 billion vector genomes
Zolgensma	J3399	Injection, onasemnogene abeparvovec-xioi, per treatment, up to 5x10^15 vector genomes
CASGEVY	J3392	Injection, exagamglogene autotemcel, per treatment

BILLING CODE 4120–01–C

We list all final C–APC exclusion categories for CY 2026 in Addendum J to this final rule with comment period (which is available via the internet on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*). Comments on our proposed exclusions are below.

Comment: Commenters generally supported and thanked CMS for proposing to continue the exclusion of Cell and Gene Therapies from C–APC packaging in order to support innovation and patient access.

Response: We thank commenters for their support.

Comment: A few commenters had suggestions on potential modifications and expansions for this policy. For example, one commenter suggested excluding drugs that are the primary therapy and exceed a cost threshold that aligns with the drug's cost relative to the total C–APC claim cost from comprehensive packaging. Bladder cancer drugs were one example suggested for exclusion as C–APC packaging of their product would be cost prohibitive.

Response: We thank commenters for their feedback, analysis, and recommendations on potential future approaches for structuring C–APC payment. We are not expanding our C–APC exclusion policy at this time to include additional classes of drugs, but we will take this information into consideration for future rulemaking.

Comment: A few commenters asked for CMS to add HCPCS code Q2056 (Ciltacabtagene autoleucel, up to 100 million autologous b-cell maturation antigen (bcma) directed car-positive t cells, including leukapheresis and dose preparation procedures, per therapeutic dose) to this list of Cell and Gene Therapies excluded from C–APC packaging for CY 2026. Commenters noted that this product's pass-through status expired June 30, 2025, and that it was previously indicated as a cell and gene therapy that would be excluded from C–APC packaging. Several commenters asked CMS to be vigilant with adding new products as they are approved and to introduce a formal process for the public to alert CMS that there is a new cell and gene therapy HCPCS code that should be excluded from payment.

Response: We thank commenters for recommending the addition of HCPCS code Q2056 to the cell and gene therapy C–APC exclusion list. This HCPCS code has been added to the table of cell and gene therapies excluded from C–APC packaging for CY 2026. We want to clarify for commenters, that although HCPCS code Q2056 was omitted from the CY 2026 OPPS/ASC proposed rule table, the code was excluded from C–APC packaging effective July 1, 2025,

after its drug pass-through status expired. Per our finalized policy in the CY 2025 OPPS/ASC final rule with comment period (89 FR 93932 through 93938), for new cell and gene therapy products that are not integral, ancillary, supportive, dependent, or adjunctive to any C–APC primary service, we will continue to add their product specific HCPCS codes, when created, to the C–APC exclusion list. We review products that are updated through the quarterly process to determine if there are qualifying cell and gene therapies that should be excluded from C–APC packaging. We welcome readers to contact us if they have a suggestion of a new qualifying cell and gene therapy that should be excluded from C–APC packaging.

We note that we did not make a proposal to alter the substance of the overall policy excluding cell and gene therapies from the C–APC packaging; consistent with public comments received, we are continuing this policy for CY 2026. In response to comments, the finalized list of qualifying products can be found in Table 3 consistent with our finalized policy in the CY 2025 OPPS/ASC final rule with comment period (89 FR 93932 through 93938).

BILLING CODE 4120–01–C

(6) Exclusion of Non-Opioid Products for Pain Relief Under Section 4135 of the Consolidated Appropriations Act, 2023 From the C–APC Policy

The Consolidated Appropriations Act (CAA), 2023 (Pub. L. 117–328), was signed into law on December 29, 2022. Section 4135(a) and (b) of the CAA, 2023, titled ''Access to Non-Opioid Treatments for Pain Relief,'' amended section 1833(t)(16) and section 1833(i) of the Social Security Act, respectively, to provide for temporary additional payments for non-opioid treatments for pain relief (as that term is defined in section 1833(t)(16)(G)(i) of the Act). In particular, section 1833(t)(16)(G) provides that with respect to a non-opioid treatment for pain relief furnished on or after January 1, 2025,

and before January 1, 2028, the Secretary shall not package payment for the non-opioid treatment for pain relief into payment for a covered OPD service (or group of services) and shall make an additional payment for the non-opioid treatment for pain relief as specified in clause (ii) of that section. Clauses (ii) and (iii) of section 1833(t)(16)(G) of the Act provide for the amount of additional payment and set a limitation on that amount. As stated earlier in this section, our current policy is to exclude from the packaged C–APC payment those items and services that are required by statute to be separately paid.

Accordingly, in the CY 2025 OPPS/ASC final rule with comment period, we finalized a policy to exclude the non-opioid treatments for pain relief identified as satisfying the required criteria for payment under section 4135 of the CAA, 2023 from the C–APC policy to ensure payment is not packaged into any C–APC and that separate payment is made in accordance with the statute (89 FR 93938 through 93939).

(7) C–APCs for CY 2026

For CY 2026 and subsequent years, we proposed to continue to apply the C–APC payment policy methodology. We refer readers to the CY 2017 OPPS/ASC final rule with comment period (81 FR 79583) for a discussion of the C–APC payment policy methodology and revisions.

Each year, in accordance with section 1833(t)(9)(A) of the Act, we review and revise the services within each APC group and the APC assignments under the OPPS. As a result of our annual review of the services and the APC assignments under the OPPS, we did not propose to convert any standard APCs to C–APCs in CY 2026; thus, we proposed that the number of C–APCs for CY 2026 would be the same as the number for CY 2025, which is 72 C–APCs.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: A few commenters requested that CMS reconsider our packaging policies for C–APC 8011 (Comprehensive Observation Services). They requested that CMS remove the rule that the presence of a SI ''T'' [6] procedure on a claim excludes payment of C–APC 8011 and instead package the payment of the SI ''T'' procedure into C–APC 8011, as is already done with SI ''Q'' [7] procedures. Commenters stated that this requirement violates the basic tenet of the packaging concept in that when observation services are ordered and furnished, the observation services become the primary service provided to such patients and the SI ''T'' procedure is provided ancillary to that primary service. Commenters cited scenarios in which hospitals provide significant, resource-intensive services to a patient but are paid significantly less than if a SI ''T'' procedure was not done.

Response: We thank the commenters for bringing this to our attention. In the CY 2016 OPPS/ASC final rule with comment period (80 FR 70334 through70336), in response to commenters' concerns regarding packaging payment for potentially high-cost surgical procedures into the payment for an observation C–APC, we finalized a policy that claims reporting procedures assigned status indicator ''T'' do not qualify for payment through C–APC 8011, regardless of whether the procedure assigned status indicator ''T'' was furnished before or after observation services (described by HCPCS code G0378) were provided. In the CY 2017 OPPS/ASC final rule with comment period (81 FR 79562), we stated that services that would otherwise qualify for C–APC 8011 are not considered to be observation services when they are associated with a surgical procedure (assigned to status indicator ''T''). Instead, they are considered to be perioperative recovery, which is always packaged in with the surgical procedure (81 FR 79583). We will continue to review the impacts of this issue and may revisit it in future rulemaking.

Comment: Some commenters expressed concerns with the C–APC methodology for surgical insertion codes for brachytherapy treatment, stating that these concerns impact beneficiary access to brachytherapy in the HOPD setting. These commenters stated that the C–APC methodology lacks the appropriate charge capture mechanisms to accurately reflect the services associated with the C–APC, that there are significant variations in the clinical practice and billing patterns in the hospital claims data used for ratesetting, and that the C–APC rates do not accurately or fully reflect the services and costs associated with the primary procedure. Commenters urged the agency to explore alternatives, including that CMS discontinue the C–APC policy for all brachytherapy insertion codes. Alternatively, one commenter suggested that CMS could continue to pay for ''J1'' brachytherapy insertion codes under the C–APC payment methodology but exclude and make separate payment for designated preparation and planning services in addition to the C–APC payment. Another commenter called for education on whether services, like brachytherapy, that are assigned to a ''J1'' indicators and delivered over multiple patient encounters may be reported per encounter.

Response: We appreciate the comments on the C–APC methodology. However, we believe that the current C–APC methodology is appropriately applied to surgical insertion for Brachytherapy treatment and is accurately capturing costs, particularly as the brachytherapy sources used for these procedures are excluded from C–APC packaging and are separately payable. We will evaluate if provider education may be appropriate in this circumstance. We will continue to examine these concerns and will determine if any modifications to this policy are warranted in future rulemaking.

After consideration of the public comments we received, we are finalizing the C–APCs as proposed. Table 4 lists the final C–APCs for CY 2026. All C–APCs are displayed in Addendum J to this CY 2026 OPPS/ASC final rule with comment period (which is available via the internet on the CMS website). Addendum J to this final rule with comment period also contains all the data related to the C–APC payment policy methodology, including the list of complexity adjustments and other information for CY 2026.

BILLING CODE 4120–01–P

[6] Status Indicator ''T'' is defined as a ''Procedure or Service, Multiple Procedure Reduction Applies'' the OPPS payment status is ''Paid under OPPS; separate APC payment.'' Definitions to all OPPS payment status indicators are available in Addenda D1 to this final rule with comment period.

[7] Status Indicator ''Q'' is defined as a ''STV-Packaged Codes'' the OPPS payment status is ''Paid under OPPS; Addendum B displays APC assignments when services are separately payable. (1) Packaged APC payment if billed on the same claim as a HCPCS code assigned status indicator ''S,'' ''T,'' or ''V.'' (2) Composite APC payment if billed with specific combinations of services based on OPPS composite-specific payment criteria. Payment is packaged into a single payment for specific combinations of services. (3) In other circumstances, payment is made through a separate APC payment.'' Definitions to all OPPS payment status indicators are available in Addenda D1 to this final rule with comment period.

c. Calculation of Composite APC Criteria-Based Costs

As discussed in the CY 2008 OPPS/ASC final rule with comment period (72 FR 66613), we believe it is important that the OPPS enhance incentives for hospitals to provide necessary, high-quality care as efficiently as possible. For CY 2008, we developed composite APCs to provide a single payment for groups of services that are typically performed together during a single clinical encounter and that result in the provision of a complete service. Combining payment for multiple, independent services into a single OPPS payment in this way enables hospitals

to manage their resources with maximum flexibility by monitoring and adjusting the volume and efficiency of services themselves. An additional advantage to the composite APC model is that we can use data from correctly coded multiple procedure claims to calculate payment rates for the specified combinations of services, rather than relying upon single procedure claims which may be low in volume and/or incorrectly coded. Under the OPPS, we currently have composite policies for mental health services and multiple imaging services. We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66611 through 66614 and 66650 through 66652) for a full discussion of the development of the composite APC methodology, and the CY 2012 OPPS/ASC final rule with comment period (76 FR 74163) and the CY 2018 OPPS/ASC final rule with comment period (82 FR 59241, 59242, and 59246 through 52950) for further background.

(1) Mental Health Services Composite APC

For CY 2026, we proposed to continue our longstanding policy of limiting the aggregate payment for specified less resource-intensive mental health services furnished on the same date to the payment for a day of partial hospitalization services provided by a hospital, which we consider to be the most resource-intensive of all outpatient mental health services (88 FR 49572). We refer readers to the April 7, 2000, OPPS final rule with comment period (65 FR 18452 through 18455) for the initial discussion of this longstanding policy and the CY 2012 OPPS/ASC final rule with comment period (76 FR 74168) for further background.

In the CY 2018 OPPS/ASC proposed rule and final rule with comment period (82 FR 33580 and 33581 and 82 FR 59246 and 59247), we proposed and finalized the policy for CY 2018 and subsequent years that, when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for partial hospitalization services provided by a hospital, those specified mental health services will be paid through composite APC 8010 (Mental Health Services Composite). In addition, we set the payment rate for composite APC 8010 for CY 2018 at the same payment rate for APC 5863, which was the maximum partial hospitalization per diem payment rate for a hospital, and finalized a policy that the hospital would continue to be paid the payment rate for composite APC 8010. This policy applied in CYs 2018 through 2023.

In the CY 2024 OPPS/ASC proposed rule, we stated that APC 5863 was no longer the maximum partial hospitalization per diem payment rate for a hospital due to the creation of APC 5864, which is four or more hospital-based PHP services per day (88 FR 49572). We solicited comment on whether APC 5864 would be appropriate to use as the daily mental health cap, as we have historically set the daily mental health cap for composite APC 8010 at the maximum partial hospitalization per diem payment rate for a hospital (88 FR 49572). Based on public comments received and our longstanding policy, in the CY 2024 OPPS/ASC final rule, we finalized APC 5864, four hospital-based PHP services per day, as the daily mental health cap (88 FR 81566).

In the CY 2026 OPPS/ASC proposed rule, we stated that we continue to believe that the costs associated with administering a partial hospitalization program represent the most resource intensive of all outpatient mental health services. For CY 2026 and subsequent years, we proposed to continue this policy that when the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the per diem payment rate for four partial hospitalization services provided in a day by a hospital (the payment amount for APC 5864), those specified mental health services would be paid through composite APC 8010. In addition, we proposed to continue to set the payment rate for composite APC 8010 at the same payment rate that we proposed for APC 5864, which is a partial hospitalization per diem payment rate for four partial hospitalization services furnished in a day by a hospital.

Under the proposed policy, the Integrated OCE (I/OCE) would continue to determine whether to pay for these specified mental health services individually, or to make a single payment at the same payment rate established for APC 5864 for all the specified mental health services furnished by the hospital on that single date of service by paying for the services through composite APC 5863.

We did not receive public comments on this provision, and therefore, we are finalizing our proposal regarding APC 8010 without modification. When the aggregate payment for specified mental health services provided by one hospital to a single beneficiary on a single date of service, based on the payment rates associated with the APCs for the individual services, exceeds the maximum per diem payment rate for four partial hospitalization services provided in a day by a hospital (the payment amount for APC 5864), those specified mental health services would be paid through composite APC 8010 for CY 2026. In addition, we are finalizing setting the payment rate for composite APC 8010 for CY 2026 at the same payment rate that we set for APC 5864, which is the maximum partial hospitalization per diem payment rate for a hospital.

(2) Multiple Imaging Composite APCs (APCs 8004, 8005, 8006, 8007, and 8008)

Effective January 1, 2009, we provide a single payment each time a hospital submits a claim for more than one imaging procedure within an imaging family on the same date of service, to reflect and promote the efficiencies hospitals can achieve when performing multiple imaging procedures during a single session (73 FR 41448 through 41450). We utilize three imaging families based on imaging modality for purposes of this methodology: (1) ultrasound; (2) computed tomography (CT) and computed tomographic angiography (CTA); and (3) magnetic resonance imaging (MRI) and magnetic resonance angiography (MRA). The HCPCS codes subject to the multiple imaging composite policy and their respective families are listed in Table 5.

While there are three imaging families, there are five multiple imaging composite APCs due to the statutory requirement under section 1833(t)(2)(G) of the Act that we differentiate payment for OPPS imaging services provided with and without contrast. While the ultrasound procedures included under the policy do not involve contrast, both CT/CTA and MRI/MRA scans can be provided either with or without contrast. The five multiple imaging composite APCs established in CY 2009 are:

- APC 8004 (Ultrasound Composite);
- APC 8005 (CT and CTA without Contrast Composite);
- APC 8006 (CT and CTA with Contrast Composite);
- APC 8007 (MRI and MRA without Contrast Composite); and
- APC 8008 (MRI and MRA with Contrast Composite).

We define the single imaging session for the ''with contrast'' composite APCs as having at least one or more imaging

procedures from the same family performed with contrast on the same date of service. For example, if the hospital performs an MRI without contrast during the same session as at least one other MRI with contrast, the hospital will receive payment based on the payment rate for APC 8008, the ''with contrast'' composite APC.

We make a single payment for those imaging procedures that qualify for payment based on the composite APC payment rate, which includes any packaged services furnished on the same date of service. The standard (noncomposite) APC assignments continue to apply for single imaging procedures and multiple imaging procedures performed across families. For a full discussion of the development of the multiple imaging composite APC methodology, we refer readers to the CY 2009 OPPS/ASC final rule with comment period (73 FR 68559 through 68569).

For CY 2026, we proposed to continue to pay for all multiple imaging procedures within an imaging family performed on the same date of service using the multiple imaging composite APC payment methodology. In the CY 2026 OPPS/ASC proposed rule, we stated that we continue to believe that this policy would reflect and promote the efficiencies hospitals can achieve when performing multiple imaging procedures during a single session.

For CY 2026, except where otherwise indicated, we proposed to use the costs derived from CY 2024 claims data to set the proposed CY 2026 payment rates. Therefore, for CY 2026, the proposed payment rates for the five multiple imaging composite APCs (APCs 8004, 8005, 8006, 8007, and 8008) were based on proposed geometric mean costs calculated from CY 2024 claims available for the CY 2026 OPPS/ASC proposed rule that qualify for composite payment under the current policy (that is, those claims reporting more than one procedure within the same family on a single date of service). To calculate the proposed geometric mean costs, we used the same methodology that we used to calculate the geometric mean costs for these composite APCs since CY 2014, as described in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74918). The imaging HCPCS codes referred to as ''overlap bypass codes'' that we removed from the bypass list for purposes of calculating the proposed multiple imaging composite APC geometric mean costs, in accordance with our established methodology as stated in the CY 2014 OPPS/ASC final rule with comment period (78 FR 74918), are identified by asterisks in Addendum N to this final rule with comment period (which is available via the internet on the CMS website *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*) and are discussed in more detail in section II.A.1.a. of this final rule with comment period.

We did not receive any public comments on this policy. We are finalizing without modification our proposal to continue the use of multiple imaging composite APCs to pay for the provision of more than one imaging procedure from the same imaging family on the same date. Table 5 lists the final HCPCS codes that would be subject to the multiple imaging composite APC policy and their respective families and approximate composite APC final geometric mean costs for CY 2026.

C8933	MRA, w/o&w/dye, spinal canal
C8934	MRA, w/dye, upper extremity
C8936	MRA, w/o&w/dye, upper extr

* If a "without contrast" MRI or MRA procedure is performed during the same session as a "with contrast" MRI or MRA procedure, the I/OCE assigns the procedure to APC 8008 rather than APC 8007.

BILLING CODE 4120–01–C

3. Changes to Packaged Items and Services

a. Background and Rationale for Packaging in the OPPS

Like other prospective payment systems, the OPPS relies on the concept of averaging to establish a payment rate for services. The payment may be more or less than the estimated cost of providing a specific service or a bundle of specific services for a particular beneficiary. The OPPS packages payments for multiple interrelated items and services into a single payment to create incentives for hospitals to furnish services most efficiently and to manage their resources with maximum flexibility. Our packaging policies support our strategic goal of using larger payment bundles in the OPPS to maximize hospitals' incentives to provide care in the most efficient manner. For example, where there are a variety of devices, drugs, items, and supplies that could be used to furnish a service, some of which are more costly than others, packaging encourages hospitals to use the most cost-efficient item that meets the patient's needs, rather than to routinely use a more expensive item, which may occur if separate payment is provided for the item.

Packaging also encourages hospitals to effectively negotiate with manufacturers and suppliers to reduce the purchase price of items and services or to explore alternative group purchasing arrangements, thereby encouraging the most economical health care delivery. Similarly, packaging encourages hospitals to establish protocols that ensure that necessary services are furnished, while scrutinizing the services ordered by practitioners to maximize the efficient use of hospital resources. Packaging payments into larger payment bundles promotes the predictability and accuracy of payment for services over time. Finally, packaging may reduce the importance of refining service-specific payments because packaged payments include costs associated with higher cost cases requiring many ancillary items and services and lower cost cases requiring fewer ancillary items and services. Packaging encourages efficiency and is an essential component of a prospective payment system; therefore, packaging payments for items and services that are typically integral, ancillary, supportive, dependent, or adjunctive to a primary service has been a fundamental part of the OPPS since its implementation in August 2000. As we continue to develop larger payment groups that more broadly reflect services provided in an encounter or episode of care, we have expanded the OPPS packaging policies. Most, but not necessarily all, categories of items and services currently packaged in the OPPS are listed in 42 CFR 419.2(b). Our overarching goal is to make payments for all services under the OPPS more consistent with those of a prospective payment system and less like those of a per-service fee schedule, which pays separately for each coded item. As a part of this effort, we have continued to examine the payment for items and services provided under the OPPS to determine which OPPS services can be packaged to further achieve the objective of advancing the OPPS toward a more prospective payment system.

b. Final CY 2026 Policy on Packaged Items and Services

For CY 2026, we examined the items and services currently provided under the OPPS, reviewing categories of integral, ancillary, supportive, dependent, or adjunctive items and services for which we believe payment would be appropriately packaged into payment for the primary service that they support. Specifically, we examined the HCPCS code definitions (including CPT code descriptors) and hospital outpatient department billing patterns to determine whether there were categories of codes for which packaging would be appropriate according to existing OPPS packaging policies or a logical expansion of those existing OPPS packaging policies.

For CY 2026, we did not propose any changes to the overall packaging policy discussed. We proposed to continue to conditionally package the costs of selected newly identified ancillary services into payment for a primary service where we believe that the packaged item or service is integral, ancillary, supportive, dependent, or adjunctive to the provision of care that was reported by the primary service HCPCS code (90 FR 33503).

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters expressed broad support for unpackaging payments. One commenter believed that CMS packaging policies may encourage efficiencies and help lower costs, but they believed that packaging policies could penalize hospitals that provide complex care to sicker patients. Similarly, commenters believed that unpackaging payment could support patient access and innovations, including to certain drugs, biologicals, and services. Specifically, one commenter suggested that CMS consider unpackaging their product, a contrast agent, and believed CMS's reasoning in the CY 2026 OPPS/ASC proposed rule for unpackaging and paying separately for diagnostic radiopharmaceuticals applies equally or even more to their product, since the cost of their product is over 500 times greater than the amount reported for the policy packaged drugs offset associated with the Level II Urology APC. The commenter believed lack of separate payment was a barrier to beneficiary access and recommended CMS pay for products like theirs when the product costs exceeded a certain threshold.

Response: We thank the commenters for their perspectives on packaging within the OPPS, including specific examples of cost exceeding offset amounts. We continue to believe that our packaging policies are a fundamental principle that distinguishes a prospective payment system from a fee schedule. In general, packaging the costs of supportive items and services into the payment for the primary procedure or service with which they are associated encourages hospital efficiencies and enables hospitals to manage their resources with maximum flexibility. We will take the information commenters provided into consideration as appropriate for possible future rulemaking.

Comment: Several commenters recommended CMS reassess its policy packaging principles regarding laboratory testing, with a particular emphasis on screening tests and antimicrobial stewardship, including those tests used in the emergency department setting. These commenters explained the public health threat of antibiotic-resistant infections, including the patient and financial impacts. Specifically, these commenters discussed that current APC assignments do not reflect substantial investments in the reagents, instruments, and analytic software that are required for these tests. Therefore, they requested CMS exclude these products from packaging through a narrowly defined exception, similar to preventative services.

Response: We thank the commenters for their feedback on these issues, including the importance of antimicrobial stewardship. We note that these costs are generally accounted for through packaging under our policies outlined in 42 CFR 419.2(b). As previously discussed in this section, in general, packaging the costs of supportive items and services into the payment for the primary procedure or service with which they are associated encourages hospital efficiencies and

enables hospitals to manage their resources with maximum flexibility. Our overarching goal is to make payments for services under the OPPS more consistent with those of a prospective payment system and less like those of a per-service fee schedule, which pays separately for each coded item. At this time, we do not believe that unpackaging the tests as suggested by commenters helps us to achieve this goal. However, we will take these comments into consideration for any future modifications to our broader packaging policies.

Additionally, we received specific recommendations regarding C–APC packaging of Cell and Gene Therapies and associated products, which are addressed in section II.b.4. of this final rule with comment period, and the packaging of non-opioid treatments for pain relief, which are addressed in section XIII.F. of this final rule with comment period. Commenters also made recommendations on our packaging policies in the context of our diagnostic radiopharmaceutical proposal, which is discussed in the next section.

After consideration of public comments, we are finalizing our proposal to continue to conditionally package the costs of selected newly-identified ancillary services into payment for a primary service where we believe that the packaged item or service is integral, ancillary, supportive, dependent, or adjunctive to the provision of care that was reported by the primary service HCPCS code, as proposed for CY 2026.

c. Payment for Diagnostic Radiopharmaceuticals

(1) Background on OPPS Packaging Policy for Diagnostic Radiopharmaceuticals

Under the OPPS, we package several categories of nonpass-through drugs, biologicals, and radiopharmaceuticals, regardless of the cost of the products. Because the products are packaged according to the policies in § 419.2(b), we refer to them as ''policy-packaged'' drugs, biologicals, and radiopharmaceuticals. In particular, under § 419.2(b)(15), payment for drugs, biologicals, and, prior to CY 2025, all radiopharmaceuticals that function as supplies when used in a diagnostic test or procedure are packaged with the payment for the related procedure or service. Packaging costs into a single aggregate payment for a service, encounter, or episode of care is a fundamental principle that distinguishes a prospective payment system from a fee schedule. In general, packaging the costs of supportive items and services into the payment for the primary procedure or service with which they are associated encourages hospital efficiencies and enables hospitals to manage their resources with maximum flexibility.

In the CY 2008 OPPS/ASC final rule with comment period, we finalized the packaging status of diagnostic radiopharmaceuticals as part of our overall enhanced packaging approach for the CY 2008 OPPS and subsequent years (72 FR 66635 through 66641). Importantly, we noted that we believe diagnostic radiopharmaceuticals are always intended to be used with a diagnostic nuclear medicine procedure and function as supplies when used in a diagnostic test or procedure, making it appropriate to package the payment for the diagnostic radiopharmaceutical into the payment for the related nuclear medicine procedure. Higher cost diagnostic radiopharmaceuticals were one specific type of product that, prior to CY 2025, was policy packaged under the category described by § 419.2(b)(15). Since we implemented this policy in CY 2008, interested parties raised concerns regarding policy packaging of diagnostic radiopharmaceuticals.

In the CY 2025 OPPS/ASC proposed rule (89 FR 59213 through 59222), we stated that we continue to believe diagnostic radiopharmaceuticals are always intended to be used with a diagnostic nuclear medicine procedure and function as supplies when used in a diagnostic test or procedure, generally making it appropriate to package payment for them with payment for the related nuclear medicine procedure. However, we stated there are certain situations in which the packaged payment amount attributed to the diagnostic radiopharmaceutical used in an imaging procedure assigned to a nuclear medicine APC may not adequately account for the cost of a diagnostic radiopharmaceutical that has a significantly higher cost, but lower utilization relative to the other diagnostic radiopharmaceuticals that may be used with the procedure.

In the CY 2025 OPPS/ASC final rule with comment period (89 FR 93948 through 93963) we finalized a policy to pay separately for any diagnostic radiopharmaceutical with a per day cost greater than $630 for CY 2025. We proposed to use the same methodology that was finalized in the CY 2025 OPPS/ASC final rule with comment period in order to calculate the per day costs for diagnostic radiopharmaceuticals for CY 2026 and future years (89 FR 93953 through 93955). We noted that any diagnostic radiopharmaceutical with a per day cost at or below that threshold will continue to be policy packaged under our longstanding policy at § 419.2(b)(15). Additionally, we finalized the policy that starting in CY 2026 and for subsequent years, we will update the threshold amount of $630 by a forecast of the Producer Price Index (PPI) for Pharmaceuticals for Human Use, Prescription (Bureau of Labor Statistics (BLS) series code WPUSI07003) from IHS Global, Inc (IGI) (89 FR 93955).

In the CY 2025 OPPS/ASC final rule with comment period, we also finalized a policy to pay for nonpass-through, separately payable diagnostic radiopharmaceuticals with per day costs above the designated threshold based on our authority under section 1833(t)(14)(A)(iii)(II) of the Act. As we found that the ASP data we had was not usable for the purpose of paying for diagnostic radiopharmaceuticals, we finalized a policy to pay for qualifying nonpass-through diagnostic radiopharmaceuticals with claims data based on mean unit cost data derived from hospital claims. Additionally, we finalized corresponding modifications to the regulation text at § 419.2(b)(15) and § 419.41 to codify our finalized payment policy for diagnostic radiopharmaceuticals and our existing policy for therapeutic radiopharmaceuticals. For additional information regarding the policy finalized for CY 2025, reference 89 FR 93948 through 93963.

(2) Diagnostic Radiopharmaceutical Packaging Threshold

For CY 2026, we proposed to continue the policy finalized in CY 2025 (90 FR 33504). Specifically, we proposed to continue to calculate the per day cost of diagnostic radiopharmaceuticals based on the methodology described in section V.B.1.b. of the CY 2026 OPPS/ASC proposed rule, which relies on the methodology finalized in the CY 2006 OPPS final rule with comment period (70 FR 68636 through 68638).

As finalized in the CY 2025 OPPS/ASC final rule with comment period (89 FR 93955), starting in the OPPS/ASC rulemaking for CY 2026 and for subsequent years, we stated we would update the proposed threshold amount of $630 by a forecast of the PPI for Pharmaceuticals for Human Use, Prescription (BLS series code WPUSI07003) from IHS Global, Inc (IGI) by using most recently available four-quarter moving average PPI levels to trend from the third quarter of the year 2 years prior to the applicable calendar year to the third quarter of the year prior

to the applicable calendar year (for example, from the third quarter of 2024 to the third quarter of 2025 for CY 2026). We proposed a technical refinement to this policy. We proposed to use the most recently available four-quarter moving average PPI levels to trend the CY 2025 final threshold forward from the third quarter of the CY 2025 to the third quarter of the payment year (CY 2026) and round the resulting dollar amount to the nearest $5 increment. We believed using the most recently available four-quarter moving average PPI levels more appropriately updates the packaging threshold from CY 2025 for payment in CY 2026. For CY 2027 and subsequent updates, we proposed to trend the CY 2025 threshold of $630 forward using the four-quarter moving average PPI levels for Pharmaceuticals for Human Use, Prescription for CY 2025 (third quarter) forward using the PPI for Pharmaceuticals for Human Use, Prescription for the applicable payment year (third quarter) (90 FR 3362324). This is the same as the update factor used for the OPPS drug packaging threshold, where we originally used the four-quarter moving average PPI levels for Pharmaceutical Preparations, Prescription (BLS series code WPUSI07003, formerly BLS series code 32541DRX) to trend the $50 threshold forward from the third quarter of CY 2005 (when the Pub. L. 108–173 mandated threshold became effective) to the third quarter of the applicable payment year (71 FR 68085 and 68086).

Therefore, for CY 2026, we proposed to update the CY 2025 $630 threshold amount by the four-quarter moving average PPI levels for Pharmaceuticals for Human Use, Prescription to trend the $630 threshold forward. Specifically, we proposed to use the most recently available forecast of the four-quarter moving average PPI levels for Pharmaceutical for Human Use, Prescription from the third quarter of 2025 to the third-quarter of 2026, and to round the resulting dollar amount to the nearest $5 increment. Based on this methodology, we trended the $630 threshold forward and rounded the resulting dollar amount ($654.23) to the nearest $5 increment, which yields a proposed figure of $655 per day for CY 2026. Consistent with our methodology and practices listed in section V.B.1.b. of the CY 2026 OPPS/ASC proposed rule, we also proposed that if more recent data are subsequently available (for example, a more recent estimate of the PPI for Pharmaceuticals for Human Use, Prescription), we would use such data, if appropriate, to determine the CY 2026 diagnostic radiopharmaceutical packaging threshold in the final rule.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Most commenters were supportive of our proposal to maintain a per day cost threshold in order to determine which diagnostic radiopharmaceuticals should be paid separately under this policy. In general, commenters believed this threshold would help distinguish between older, lower-cost diagnostic radiopharmaceuticals and newer, higher-cost precision diagnostic radiopharmaceuticals. Similarly, most commenters were supportive of the proposed update methodology and the corresponding updated per day cost threshold of $655.

Response: We thank commenters for their support.

Comment: Some commenters offered feedback on the threshold CMS proposed for CY 2026. Specifically, a few commenters requested that CMS maintain the CY 2025 per day cost threshold of $630 and not update the cost threshold according to the proposed methodology for CY 2026. These commenters believed the policy was too new to warrant an increase in the payment threshold, and commenters noted that these products had unique cost structures, utilization patterns, and roles in patient care. Some requested CMS delay any changes in the threshold until the policy has been in place for at least 2 years. Some commenters were not convinced that the proposed update factor is appropriate or representative of diagnostic radiopharmaceuticals, but generally did not provide an alternative update methodology. Some commenters believed that incorporating radiopharmaceutical-specific cost data would be more appropriate. A commenter also recommended CMS ensure no unintended consequences of this policy occur, such as manufacturers purposefully pricing their products just above the payment threshold.

Response: We thank commenters for their feedback. We will monitor the effects of this policy and will consider proposing modifications in future rulemaking if appropriate. We do not believe it is appropriate to maintain the same threshold that was finalized in CY 2025. We continue to believe it is appropriate to subject the diagnostic radiopharmaceutical packaging threshold to the same update factor that is used for the OPPS drug packaging threshold as supported by the majority of commenters. Updating the threshold by the PPI for Pharmaceuticals for Human Use (Prescription) is consistent with our longstanding policy to update the OPPS drug packaging threshold annually. This PPI update factor provides aggregate changes in the selling prices of pharmaceuticals, which makes it an appropriate factor with which to update the diagnostic radiopharmaceutical packaging threshold to ensure that as diagnostic radiopharmaceuticals' costs change over time, the threshold continues to identify products with costs that significantly exceed the otherwise applicable APC payment amounts as determined in this final rule with comment period and that therefore should be eligible for separate payment. We appreciate the recommendation to consider an update factor more specific to diagnostic radiopharmaceuticals, which we will consider for future rulemaking.

Comment: A commenter requested that CMS consider unpackaging all radiopharmaceuticals regardless of their cost to ensure proper payment and avoid perverse incentives. They believed that this action would lead to an overall reduction in industry costs by eliminating the incentive for manufacturers to price products above the threshold.

Response: We thank the commenter for their concern regarding the avoidance of perverse financial incentives. The threshold amount was originally designed to ensure payment only for those products with costs that significantly exceed their packaged payment. We continue to believe a threshold is an appropriate method to ensure targeted payment as it continues the packaging of most diagnostic radiopharmaceuticals. As previously mentioned in this section, packaging is a fundamental principle that distinguishes a prospective payment system from a fee schedule. In general, packaging the costs of supportive items and services into the payment for the primary procedure or service with which they are associated encourages hospital efficiencies and enables hospitals to manage their resources with maximum flexibility. However, we will continue to monitor this policy for any unintended consequences.

After consideration of public comments, we are finalizing our policy as proposed. We are finalizing our proposal to update the CY 2025 $630 threshold amount by the four-quarter moving average PPI levels for Pharmaceuticals for Human Use, Prescription to trend the threshold forward. Specifically, we are using the most recently available forecast of the four-quarter moving average PPI levels for Pharmaceutical for Human Use,

Prescription from the third quarter of 2025 to the third quarter of 2026, and to round the resulting dollar amount to the nearest $5 increment.

We also proposed, and are now finalizing, a policy that if more recent data were to subsequently become available (for example, a more recent estimate of the PPI for Pharmaceuticals for Human Use, Prescription), we would use such data, if appropriate, to determine the CY 2026 diagnostic radiopharmaceutical packaging threshold in the final rule. Based on this methodology, using the most recent data available for this final rule with comment period, we trended the $630 threshold forward and rounded the resulting dollar amount ($656.65) to the nearest $5 increment, which yields a final diagnostic radiopharmaceutical packaging threshold figure of $655 per day for CY 2026.

(3) Amount of Separate Payment for Diagnostic Radiopharmaceuticals Exceeding the Threshold

As discussed in the CY 2025 OPPS/ASC final rule with comment period (89 FR 93955 through 93959), once we determine that the per day cost of a nonpass-through diagnostic radiopharmaceutical exceeds the cost threshold, proposed to be $655 per day for CY 2026, we will then assign that radiopharmaceutical to an APC, making it a specified covered outpatient drug (SCOD) per section 1833(t)(14)(B) of the Act. We proposed to continue our current policy for CY 2026, and proposed to pay for those nonpass-through, separately payable diagnostic radiopharmaceuticals based on our authority under section 1833(t)(14)(A)(iii)(II) of the Act. While, under this authority, we would ordinarily use the ASP methodology under section 1847A of the Act, we continued to find that the ASP data we had was not usable for payment purposes. We continued to believe that arithmetic mean unit cost (MUC) would be an appropriate proxy for the average price for a diagnostic radiopharmaceutical for a given year, as it is calculated based on the average costs for a particular year and is directly reflective of the actual cost data that hospitals submit to CMS. Therefore, we proposed to continue our current policy and proposed for CY 2026 to pay for qualifying diagnostic radiopharmaceuticals with per day costs above the diagnostic radiopharmaceutical packaging threshold based on their arithmetic MUC, which would be derived from calendar year 2024 claims data.

Although we proposed to base payment for qualifying radiopharmaceuticals on their arithmetic MUC for CY 2026, we continued to encourage manufacturers to submit ASP information for diagnostic radiopharmaceuticals, if possible. While we proposed to continue to use MUC to pay for separately payable diagnostic radiopharmaceuticals in CY 2026, we noted that manufacturers can begin, or continue, to report ASP data for potential future use in paying for diagnostic radiopharmaceuticals. For CY 2026, ASP reporting is voluntary for diagnostic radiopharmaceuticals paid under the OPPS. We encouraged interested parties to submit comments regarding potential issues that may arise that prevent appropriate ASP reporting for diagnostic radiopharmaceuticals. We referred readers to the CY 2025 OPPS/ASC final rule with comment period as it discusses some of the known concerns regarding ASP reporting for diagnostic radiopharmaceuticals (89 FR 93948 through 93963). We reiterated our stance from the CY 2025 OPPS/ASC final rule with comment period, that if we were to use average sales price as the basis of calculating a payment, we believed there must be more consistent, validated, and universal reporting in order for ASP to be a viable payment methodology (89 FR 93961).

We also reiterated, as we stated in the CY 2025 OPPS/ASC final rule with comment period (89 FR 93957), that there could be potential value in the use of ASP data for payment purposes for diagnostic radiopharmaceuticals when reported correctly and by all manufacturers who manufacture a product that is described by a given HCPCS code. We continue to believe that the use of ASP information for OPPS payment could provide an opportunity to improve payment accuracy for separately payable diagnostic radiopharmaceuticals by applying an established methodology that has already been successfully implemented under the OPPS for other separately payable drugs and biologicals, as well as for therapeutic radiopharmaceuticals.

To facilitate potential future payment for diagnostic radiopharmaceuticals based on ASP, we sought comment from interested parties on how CMS can ensure more consistent, validated, and universal reporting in order for ASP to be a viable payment methodology utilized in future rulemaking. For example, we sought comment on how CMS may update its past guidance, *Submission of OPPS ASP Data for Nonpass-Through Separately Payable Therapeutic Radiopharmaceuticals and Radiopharmaceuticals with Pass-Through Status,*[8] to reflect current clinical practices and to reflect ASP reporting for diagnostic radiopharmaceuticals.

Additionally, as discussed in section V.B.5. of the CY 2026 OPPS/ASC proposed rule (Proposed Payment for Nonpass-Through Drugs, Biologicals, and Radiopharmaceuticals with HCPCS Codes but Without OPPS Hospital Claims Data), we proposed to set the payment rate for new diagnostic radiopharmaceuticals that exceed the diagnostic radiopharmaceutical packaging threshold and with HCPCS codes, but which do not have pass-through status and are without claims data, at ASP plus 6 percent (90 FR 33624). If ASP data for these diagnostic radiopharmaceuticals were not available, we proposed to pay WAC plus 3 percent during the product's initial sales period, consistent with our policy described in section V.B.2. of the CY 2026 OPPS/ASC proposed rule. If the WAC also is unavailable, we proposed to make payment for new diagnostic radiopharmaceuticals at 95 percent of the products' most recent AWP. Following the initial sales period, a payment rate of WAC plus 6 percent would apply, if ASP data for these diagnostic radiopharmaceuticals remain unavailable. We believed the volume of products in this category would typically be very low; however, in these rare situations, we believed it would continue to be appropriate to use ASP plus six percent, WAC plus 3 or 6 percent, or 95 percent of AWP until a MUC is available. As we stated in the CY 2025 OPPS/ASC final rule with comment period, it is appropriate to use this payment hierarchy until a MUC is available. There is typically only one manufacturer for a diagnostic radiopharmaceutical that is new and described by a HCPCS code, but without claims data, so CMS does not have to ensure all manufacturers are reporting ASP for that particular HCPCS code prior to establishing a separate payment amount based on ASP. Additionally, although reporting of ASP is not a condition of CMS approving a HCPCS application, CMS has the opportunity to actively engage with the manufacturer, or sponsor of a HCPCS application, during the HCPCS application process. This allows for ongoing dialogue and education regarding the unique ASP reporting requirements that may be

[8] *https://www.cms.gov/medicare/medicare-fee-for-service-payment/hospitaloutpatientpps/downloads/opps_asp_radiopharm_guidance10302009.pdf.*

associated with a particular product, including how to ensure the reported ASP aligns with the dose descriptor for the newly assigned HCPCS code (89 FR 93958). We believed the hierarchy previously specified is appropriate to determine the payment for a diagnostic radiopharmaceutical that is new and described by a HCPCS code, but without claims data, as it is consistent with the typical hierarchy associated with payment for drugs and biologicals paid under the OPPS as discussed in section V.A. and V.B. of the CY 2026 OPPS/ASC proposed rule.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Commenters were generally in favor of separate payment for diagnostic radiopharmaceuticals. Specifically, for diagnostic radiopharmaceuticals that have claims data, commenters appreciated that CMS is paying for these products separately, but recommended that CMS eventually transition away from an MUC-based payment methodology, which commenters generally viewed as an interim approach.

Commenters believe MUC is problematic because hospitals may inconsistently report diagnostic radiopharmaceutical units and costs, which ultimately impact the MUC calculation. Commenters provided suggestions to CMS on how to assess hospital claims data for appropriate submissions. Commenters also stated that many factors contribute to the inaccuracy of MUCs, including charge compression, varied revenue code use, cost-to-charge ratios, outdated data, and inconsistent cost center use by hospitals. These commenters provided data detailing that MUC is consistently lower for their products than ASP. Commenters highlighted how MUC may disadvantage their products. For example, one commenter stated that their product is under a competitive disadvantage while being paid at MUC compared to newer products that may be receiving separate ASP-based payment through pass-through payment status.

For these reasons, commenters suggested CMS transition to an average sales price (ASP) based payment, including for purposes of completing the per day cost calculations, for these diagnostic radiopharmaceuticals at the earliest point possible. Commenters stated that ASP is more reflective of the true cost of diagnostic radiopharmaceuticals compared to MUC. Commenters expressed their views on the benefits of ASP, including that ASP is updated quarterly, is more consistent, transparent, and aligned with payment for many other Part B drugs. Commenters stated that a portion of manufacturers are already reporting ASP, and many have recent experience reporting ASP for OPPS drug pass-through status. Some commenters suggested that diagnostic radiopharmaceuticals that currently report ASP, or have been paid based on ASP while on pass-through status, continue to receive ASP-based payment post pass-through status expiration. These commenters believed that an MUC-based payment methodology should only be used in instances where ASP is not reported. Other commenters recommended CMS consider WAC and AWP based payment methodologies.

Some commenters stated that if MUC is going to be used as the basis of payment for separately paid diagnostic radiopharmaceuticals, CMS should consider additional instruction to hospitals on reporting, or consider a low volume MUC policy or minimum claim volume to avoid fluctuations in payment due to low claims volume.

Broadly, commenters requested CMS provide additional clarity regarding why CMS proposed to continue to pay diagnostic radiopharmaceuticals at their arithmetic mean unit cost rather than ASP.

Response: We thank commenters for their support of our proposal to continue to pay diagnostic radiopharmaceuticals separately. We thank commenters for expressing their interest in use of ASP data and appropriate ASP reporting. As we have previously stated, and as commenters have noted, we recognize the complexities associated with reporting ASP for radiopharmaceuticals. We reiterate that we agree that there could be value in the use of ASP for determining separately paid diagnostic radiopharmaceutical payment amounts in the future. However, for CMS to use an ASP-based methodology to set payment rates for separately paid diagnostic radiopharmaceuticals, we believe there must be more consistent, validated, and universal reporting of ASP data for diagnostic radiopharmaceuticals. While commenters have communicated that they are currently, or will, report ASP, we still do not have universal reporting of ASP data to CMS for diagnostic radiopharmaceuticals. While the number of products reporting ASP has slightly increased, we continue to have concerns regarding the accuracy of the reported data. For several diagnostic radiopharmaceuticals that have reported their ASP, their reported ASP exceeds the calculated arithmetic MUCs by several thousand percent. Some of these discrepancies between reported ASP and MUC are so significant, that if we were to accept the ASPs as submitted and base payment for these diagnostic radiopharmaceuticals off the reported ASP, the result would be more than one diagnostic radiopharmaceutical accounting for billions of dollars in projected payment in CY 2026 and these diagnostic radiopharmaceuticals would be estimated to be among the top 10 highest paid HCPCS codes in all of the OPPS. Based on claims data, these extremely high ASP data appear to be erroneously reported. Based on this, coupled with the lack of universal reporting, among other factors, we continue to believe that an ASP-based methodology is not appropriate for setting CY 2026 payment for separately paid diagnostic radiopharmaceuticals.

We appreciate the insight from commenters regarding their concerns with CMS continuing to use arithmetic MUC as the payment methodology for diagnostic radiopharmaceuticals. We are taking these comments into consideration for future rulemaking.

We note that we rely on providers to accurately report the use of HCPCS codes in accordance with code descriptors and CPT and CMS instructions, to report services accurately on claims, and to report charges and costs accurately for the services on their Medicare hospital cost reports.

Regarding the suggestion to develop a low-volume MUC methodology when we calculate payment rates for diagnostic radiopharmaceuticals, we will take this suggestion under advisement for future notice and comment rulemaking. We did not propose to subject low volume diagnostic radiopharmaceutical APCs to the broader OPPS low volume policy, and we note that the low volume APC policy does not apply to APCs to which single drugs, biologicals, or radiopharmaceuticals are assigned, even if there is a low volume of claims for these items. We understand the commenter's concerns; however, we do not believe it would be appropriate to implement this policy modification without further engagement from interested parties.

Finally, in response to comments suggesting we adopt WAC or AWP based payment methodologies, we continue to believe that neither WAC nor AWP is an appropriate proxy to provide OPPS payment for average radiopharmaceutical acquisition costs and associated handling costs when manufacturers are not required to

submit ASP data. This is because payment based on WAC or AWP for separately payable drugs and biologicals is usually temporary for a calendar quarter until a manufacturer is able to submit the required ASP data in accordance with the quarterly ASP submission timeframes for reporting under section 1847A of the Act. WAC and AWP reported to compendia may not be reflective of a patient ready dose. The absence of an ASP reporting requirement and inappropriate or no reporting of ASP could result in payment for a separately payable diagnostic radiopharmaceutical based on WAC or AWP indefinitely, a result which we believe would be inappropriate, as these pricing metrics do not capture all of the pricing discounts that may be reflected in the ASP.

Comment: A few commenters question the legal validity of CMS using MUC as the basis of payment, and some of those commenters believe that radiopharmaceutical manufacturers are required to report ASP by statute. These commenters state that they believe CMS has the authority to require reporting and pay based on ASP.

Response: We proposed to pay for nonpass-through, separately payable diagnostic radiopharmaceuticals based on our authority under section 1833(t)(14)(A)(iii)(II) of the Act, and we continue to find this appropriate, as we find that the ASP data we have are not usable for the purpose of paying for diagnostic radiopharmaceuticals. Instead, we are paying based on mean unit cost data derived from hospital claims. We believe that paying for diagnostic radiopharmaceuticals using mean unit cost would appropriately pay for the average price of nonpass-through separately payable diagnostic radiopharmaceuticals for the applicable year. We believe MUC is an appropriate proxy for the average price for a diagnostic radiopharmaceutical for a given year, as it is calculated based on the average costs for a particular year and is directly reflective of the actual cost data that hospitals submit to CMS. We will continue to explore our authority regarding requiring ASP reporting for diagnostic radiopharmaceuticals under the OPPS.

Comment: Commenters broadly requested that CMS work collaboratively with manufacturers to identify and implement best practices for average sales price (ASP) data submission for radiopharmaceutical therapies. Some commenters stated that they look forward to working with CMS to identify and implement best practices for ASP data submission, and believed that clear guidance and streamlined reporting processes will help ensure that ASP data is complete and accurate, which supports a sustainable payment environment. A few commenters provided detailed recommendations and requests for how CMS may update our ASP reporting guidelines in the future for diagnostic radiopharmaceuticals.

Response: We thank commenters for their helpful feedback regarding future guidance on diagnostic radiopharmaceutical ASP reporting. We will take these comments under advisement for potential updated sub-regulatory guidance CMS intends to explore. We encourage interested parties to continue to engage with CMS on this issue.

After consideration of public comments, we are finalizing our proposal without modification. In summary, for CY 2026 we are paying separately for any diagnostic radiopharmaceutical with a per-day cost greater than $655 using the methodology described. Any diagnostic radiopharmaceutical with a per-day cost at or below that threshold would continue to be policy packaged under our longstanding policy codified at § 419.2(b)(15). We are finalizing our proposal to pay for those nonpass-through, separately payable diagnostic radiopharmaceuticals based on our authority under section 1833(t)(14)(A)(iii)(II) of the Act, and to pay for qualifying nonpass-through diagnostic radiopharmaceuticals with claims data based on mean unit cost data derived from hospital claims. As discussed in section V.B.5. of this final rule with comment period, we proposed and are finalizing a policy to set the payment rate for new diagnostic radiopharmaceuticals with HCPCS codes that exceed the diagnostic radiopharmaceutical packaging threshold, but which do not have pass-through status and are without claims data, at ASP plus 6 percent. If ASP data for these diagnostic radiopharmaceuticals were not available, we finalized a policy to pay WAC plus 3 percent during the product's initial sales period, consistent with our policy described in section V.B.2. of this CY 2026 OPPS/ASC final rule with comment period. If the WAC also is unavailable, we finalized a policy to make payment for new diagnostic radiopharmaceuticals at 95 percent of the products' most recent AWP. Following the initial sales period, a payment rate of WAC plus 6 percent would apply, if ASP data for these diagnostic radiopharmaceuticals remain unavailable.

(4) Qualifying Diagnostic Radiopharmaceuticals Above the Diagnostic Radiopharmaceutical Packaging Threshold

The HCPCS codes that describe diagnostic radiopharmaceuticals with per day costs that exceed the proposed diagnostic radiopharmaceutical packaging threshold were proposed to be assigned to a status indicator of ''K'', indicating separate payment to be paid based on that HCPCS code's arithmetic MUC. A proposed APC and a proposed payment rate would be assigned as shown in Addendum B to the CY 2026 OPPS/ASC proposed rule. HCPCS codes that describe diagnostic radiopharmaceuticals with per day costs that are at or below the proposed diagnostic radiopharmaceutical packaging threshold were proposed to continue to be assigned to a status indicator of ''N'', indicating packaged payment.

The proposed list of diagnostic radiopharmaceuticals that we calculated as having per day costs that exceeded $655 and their proposed status indicators can be found in Table 6 (originally set forth in Table 4 of the CY 2026 OPPS/ASC proposed rule at 90 FR 33506).

BILLING CODE 4120–01–P

TABLE 6: PROPOSED QUALIFYING DIAGNOSTIC RADIOPHARMACEUTICALS WITH PER DAY COSTS EXCEEDING $655

HCPCS Code	Short Descriptor	Proposed CY 2026 Status Indicator Assignment
A9507	In111 capromab	K
A9508	I131 iodobenguate, dx	K

A9800	Gallium locametz 1 millicuri	K
C9067	Gallium ga-68 dotatoc	K
Q9982	Flutemetamol f18 diagnostic	K
Q9983	Florbetaben f18 diagnostic	K

* HCPCS code A9608 will be assigned to status indicator "G" until its pass through expiration on September 30, 2026. For the remainder of CY 2026, we proposed to assign it to status indicator "K" and paid based on its arithmetic MUC calculated.

Proposed definitions of status indicators can be found in Addendum D1 to the CY 2026 OPPS/ASC proposed rule. Addenda to the CY 2026 OPPS/ASC proposed rule can be found on the CMS OPPS web page.

Based on the policy finalized in this section to pay separately at arithmetic MUC for any diagnostic radiopharmaceutical with a HCPCS code and claims data, and with a per-day cost greater than $655 using the methodology previously described, the HCPCS codes that describe diagnostic radiopharmaceuticals with per day costs that exceed the finalized diagnostic radiopharmaceutical packaging threshold are assigned to a status indicator of ''K'', indicating separate payment to be paid based on that HCPCS code's arithmetic MUC. A final APC and payment rate are assigned as shown in Addendum B to this final rule with comment period. HCPCS codes that describe diagnostic radiopharmaceuticals with per day costs that are at or below the proposed diagnostic radiopharmaceutical packaging threshold are assigned to a status indicator of ''N'', indicating packaged payment.

The finalized list of diagnostic radiopharmaceuticals that we calculated as having per day costs that exceed $655 and their proposed status indicators can be found in Table 7.

TABLE 7: FINALIZED QUALIFYING DIAGNOSTIC RADIOPHARMACEUTICALS WITH PER DAY COSTS EXCEEDING $655

HCPCS Code	Short Descriptor	Finalized CY 2026 Status Indicator Assignment
A9507	In111 capromab	K
A9508	I131 iodobenguate, dx	K
A9515	Choline c-11	K
A9521	Tc99m exametazime	K*
A9532	I125 serum albumin, dx	K
A9547	In111 oxyquinoline	K
A9548	In111 pentetate	K
A9551	Tc99m succimer	K
A9553	Cr51 chromate	K
A9554	I125 iothalamate, dx	K
A9557	Tc99m bicisate	K
A9569	Technetium tc-99m auto wbc	K
A9570	Indium in-111 auto wbc	K
A9572	Indium in-111 pentetreotide	K
A9582	Iodine i-123 iobenguane	K
A9584	Iodine i-123 ioflupane	K
A9586	Florbetapir f18	K
A9587	Gallium ga-68	K
A9588	Fluciclovine f-18	K
A9591	Fluoroestradiol f 18	K
A9592	Copper cu 64 dotatate diag	K
A9593	Gallium ga-68 psma-11 ucsf	K
A9594	Gallium ga-68 psma-11, ucla	K
A9595	Piflu f-18, dia 1 millicurie	K
A9596	Gallium illuccix 1 millicure	K
A9602	Fluorodopa f-18 diag per mci	K
A9608	Flotufolastat f18 diag 1 mci	K**
A9800	Gallium locametz 1 millicuri	K
C9067	Gallium ga-68 dotatoc	K
Q9982	Flutemetamol f18 diagnostic	K
Q9983	Florbetaben f18 diagnostic	K

*Status Indicator assignment will be E1 starting April 1, 2026, until compliance with the Medicaid National Drug Rebate Agreement occurs. Once compliance is met, status indicator K would apply. Please see section V.B. of this final rule with comment period for additional details.

** HCPCS code A9608 will be assigned to status indicator "G" until its pass through expiration on September 30, 2026. For the remainder of CY 2026, the HCPCS code will be assigned to status indicator "K" and paid based on its arithmetic MUC calculated in this final rule with comment period.

BILLING CODE 4120–01–C

Finalized definitions of status indicators can be found in Addendum D1 to this final rule with comment period. Addenda to this rule can be found on the CMS OPPS web page.

4. Implementation of Section 4135 of the Consolidated Appropriations Act (CAA), 2023

The Consolidated Appropriations Act (CAA), 2023 (Pub. L. 117–328), was signed into law on December 29, 2022. Section 4135(a) and (b) of the CAA, 2023, titled Access to Non-Opioid Treatments for Pain Relief, amended sections 1833(t)(16) and 1833(i) of the Act, respectively, to provide for temporary additional payments for non-opioid treatments for pain relief (as that term is defined in section 1833(t)(16)(G)(i) of the Act). In particular, section 1833(t)(16)(G) of the Act provides that with respect to a non-opioid treatment for pain relief furnished on or after January 1, 2025, and before January 1, 2028, the Secretary shall not package payment for the non-opioid treatment for pain relief into payment for a covered OPD service (or group of services) and shall make an additional payment for the non-opioid treatment for pain relief as specified in clause (ii) of that section. Clauses (ii) and (iii) of section 1833(t)(16)(G) of the Act provide for the amount of additional payment and set a limitation on that amount, respectively.

The additional payments required under section 1833(t)(16)(G) of the Act began on January 1, 2025, based on the policy finalized in the CY 2025 OPPS/

ASC final rule with comment period (89 FR 94343 through 94361). In section XIII.F. of the CY 2026 OPPS/ASC proposed rule (90 FR 33742 through 33749), we proposed to continue the policy finalized in the CY 2025 OPPS/ASC final rule with comment period for CY 2026. We also proposed non-opioid treatments for pain relief that would qualify under this policy for CY 2026 and sought public comment on those product evaluations.

We refer readers to section XIII.F. of this final rule with comment period for a summary of comments received on this proposal, as well as the finalized policy and qualifying products for CY 2026.

5. Calculation of OPPS Scaled Payment Weights

We established a policy in the CY 2013 OPPS/ASC final rule with comment period (77 FR 68283) of using geometric mean-based APC costs to calculate relative payment weights under the OPPS. In the CY 2025 OPPS/ASC final rule with comment period (89 FR 93964 through 93965), we applied this policy and calculated the relative payment weights for each APC for CY 2025 that were shown in Addenda A and B of the CY 2025 OPPS/ASC final rule with comment period (which were made available via the internet on the CMS website) using the APC costs discussed in sections II.A.1. and II.A.2. of the CY 2025 OPPS/ASC final rule with comment period (89 FR 93921 through 93947). For CY 2026, as we did for CY 2025, we proposed to continue to apply the policy established in CY 2013 and calculate relative payment weights for each APC for CY 2026 using geometric mean-based APC costs.

For CY 2012 and CY 2013, outpatient clinic visits were assigned to one of five levels of clinic visit APCs, with APC 0606 representing a mid-level clinic visit. In the CY 2014 OPPS/ASC final rule with comment period (78 FR 75036 through 75043), we finalized a policy that created alphanumeric HCPCS code G0463 (Hospital outpatient clinic visit for assessment and management of a patient), representing all clinic visits under the OPPS. HCPCS code G0463 was assigned to APC 0634 (Hospital Clinic Visits). We also finalized a policy to use CY 2012 claims data to develop the CY 2014 OPPS payment rates for HCPCS code G0463 based on the total geometric mean cost of the levels one through five CPT Evaluation or Assessment and Management (E/M) codes for clinic visits previously recognized under the OPPS (CPT codes 99201 through 99205 and 99211 through 99215). In addition, we finalized a policy to no longer recognize a distinction between new and established patient clinic visits.

For CY 2016, we deleted APC 0634 and reassigned the outpatient clinic visit HCPCS code G0463 to APC 5012 (Level 2 Examinations and Related Services) (80 FR 70372). For CY 2026, as we did for CY 2025, we proposed to continue to standardize all the relative payment weights to APC 5012. We believe that standardizing relative payment weights to the geometric mean of the APC to which HCPCS code G0463 is assigned maintains consistency in calculating unscaled weights that represent the cost of some of the most frequently provided OPPS services. For CY 2026, as we did for CY 2025, we proposed to assign APC 5012 a relative payment weight of 1.00 and to divide the geometric mean cost of each APC by the geometric mean cost for APC 5012 to derive the unscaled relative payment weight for each APC. The choice of the APC on which to standardize the relative payment weights does not affect payments made under the OPPS because we scale the weights for budget neutrality.

Section 1833(t)(9)(B) of the Act requires that APC reclassification and recalibration changes, wage index changes, and other adjustments be made in a budget neutral manner. Budget neutrality ensures that the estimated aggregate weight under the OPPS for CY 2026 is neither greater than nor less than the estimated aggregate weight that would have been calculated without the changes. To comply with this requirement concerning the APC changes, we proposed to compare the estimated aggregate weight using the CY 2025 scaled relative payment weights to the estimated aggregate weight using the proposed CY 2026 unscaled relative payment weights.

For CY 2025, we multiplied the CY 2025 scaled APC relative payment weight applicable to a service paid under the OPPS by the volume of that service from CY 2024 claims to calculate the total relative payment weight for each service. We then added together the total relative payment weight for each of these services to calculate an estimated aggregate weight for the year. For CY 2026, we proposed to apply the same process using the estimated CY 2026 unscaled relative payment weights rather than scaled relative payment weights. We proposed to calculate the weight scalar by dividing the CY 2025 estimated aggregate weight by the unscaled CY 2026 estimated aggregate weight.

For a detailed discussion of the weight scalar calculation, we refer readers to the OPPS claims accounting document available on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*. Click on the link labeled ''Hospital Outpatient Prospective Payment—Notice of Final Rulemaking'' for 2026, which can be found under the heading ''Hospital Outpatient Regulations and Notices'' and open the claims accounting document link, which is labeled ''2026 Final Rule OPPS Claims Accounting (PDF).''

We proposed to compare the estimated unscaled relative payment weights in CY 2026 to the estimated total relative payment weights in CY 2025 using CY 2024 claims data, holding all other components of the payment system constant to isolate changes in total weight. Based on this comparison, we proposed to adjust the calculated CY 2026 unscaled relative payment weights for purposes of budget neutrality. We proposed to adjust the estimated CY 2026 unscaled relative payment weights by multiplying them by a proposed weight scalar of 1.4624 to ensure that the proposed CY 2026 relative payment weights are scaled to be budget neutral. The proposed CY 2026 relative payment weights listed in Addenda A and B to the CY 2026 OPPS/ASC proposed rule (which are available via the internet on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*) are scaled and incorporate the recalibration adjustments discussed in sections II.A.1. and II.A.2. of the CY 2026 OPPS/ASC proposed rule.

Section 1833(t)(14) of the Act provides the methodology for payment rates for certain specified covered outpatient drugs (SCODs). Section 1833(t)(14)(H) of the Act provides that additional expenditures resulting from this paragraph shall not be taken into account in establishing the conversion factor, weighting, and other adjustment factors for 2004 and 2005 under paragraph (9) but shall be taken into account for subsequent years. Therefore, the cost of those SCODs (as discussed in section V.B.2. of this final rule with comment period) is included in the budget neutrality calculations for the CY 2026 OPPS.

We did not receive any public comments on the proposed weight scalar calculation, and we are finalizing our proposal to use the calculation process described in the CY 2026 OPPS/ASC proposed rule, without modification, for CY 2026. For CY 2026, as we did for CY 2025, we will continue to apply the policy established in CY

2013 and calculate relative payment weights for each APC for CY 2026 using geometric mean-based APC costs. For CY 2026, as we did for CY 2025, we will assign APC 5012 a relative payment weight of 1.00; and we will divide the geometric mean cost of each APC by the geometric mean cost for APC 5012 to derive the unscaled relative payment weight for each APC. To comply with this requirement concerning the APC changes, we will compare the estimated aggregate weight using the CY 2025 scaled relative payment weights to the estimated aggregate weight using the CY 2026 unscaled relative payment weights.

Using updated final rule claims data, we are updating the estimated CY 2026 unscaled relative payment weights by multiplying them by a weight scalar of 1.4879 to ensure that the final CY 2026 relative payment weights are scaled to be budget neutral. The final CY 2026 relative payments weights listed in Addenda A and B of this final rule with comment period (available via the internet on the CMS website) were scaled and incorporate the recalibration adjustments discussed in sections II.A.1 and II.A.2. of this final rule with comment period.

B. Final Conversion Factor Update

1. OPD Fee Schedule Increase Factor

Section 1833(t)(3)(C)(ii) of the Act requires the Secretary to update the conversion factor used to determine the payment rates under the OPPS on an annual basis by applying the OPD fee schedule increase factor. For purposes of section 1833(t)(3)(C)(iv) of the Act, subject to sections 1833(t)(17) and 1833(t)(3)(F) of the Act, the OPD fee schedule increase factor is equal to the hospital inpatient market basket percentage increase applicable to hospital discharges of the Act (or an amount that is computed and applied with respect to covered OPD services). In the FY 2026 IPPS/Long Term Care Hospital (LTCH) proposed rule (90 FR 18266), consistent with current law, based on IHS Global, Inc.'s (IGI's) fourth quarter 2024 forecast, the proposed FY 2026 IPPS market basket percentage increase was 3.2 percent. We noted that under our regular process for the CY 2026 OPPS/ASC final rule with comment period, we would use the market basket update for the FY 2026 IPPS/LTCH PPS final rule. If that forecast is different than the IPPS market basket percentage increase used for the CY 2026 OPPS/ASC proposed rule, the CY 2026 OPPS/ASC final rule with comment period OPD fee schedule increase factor would reflect that updated forecast of the market basket percentage increase.

For CY 2026, we proposed to use the estimate of the hospital inpatient market basket percentage increase of 3.2 percent as one component to calculate the OPD fee schedule increase factor.

Comment: One commenter supported the CY 2026 update factor.

Response: We thank the supporter for the support.

Comment: Several commenters expressed concerns that the proposed CY 2026 market basket update of 2.4 percent, through which the majority of hospitals would only receive a 0.06 percent net increase, does not adequately keep up with the increased costs of delivering care across all settings.

One commenter suggested that CMS expand the data set to ensure the use of accurate, timely data that reflect real labor costs. Specifically, they requested CMS apply its exceptions and adjustments authority to make a one-time retrospective adjustment of 10 to15 percent to the market basket to account for the update hospitals should have received in 2022 when accounting for inflation. The commenter suggested CMS establish a threshold such that if the payment differential between what was provided and actual costs is greater than 1.5 percentage points, there is a retroactive adjustment to payments above the threshold. The commenter also suggested CMS recalibrate the market basket more frequently, at least once every 3 years to ensure the market basket reflects the appropriate mix of services.

Another commenter suggested that the proposed increase is insufficient if the 340B repayment acceleration and volume control policy for medication administration services are finalized. The commenter also stated that CMS should reconsider the data source for workforce costs because the healthcare industry has shifted since the pandemic. The commenter stated that workers have demanded higher salaries to keep up with economic changes and the ECI survey of hospital employment that CMS employs does not account for contracted or contingent workers.

Another commenter expressed concern that the update is insufficient and unsustainable for rural hospitals. The commenter stated 196 hospitals have closed or ceased to provide inpatient services since 2010, and there are 432 rural hospitals vulnerable to closure. The commenter stated the Consumer Price Index (CPI) was 4.2 percent as of June 2025 and that the Medicare reimbursement continues to fall behind the actual cost of providing care to beneficiaries. The commenter stated CMS' projections for updating payment rates are lower than actual inflation due to the use of historical data. The commenter stated CMS must explore how it can accurately pay rural hospitals by accounting for inflation and historical underpayment.

Commenters stated that since the COVID–19 PHE, IGI has shown a consistent trend of under-forecasting the market basket growth and expressed concern this may indicate a more systematic issue with IGI's forecasting. Several commenters, including many associations, urged CMS to use its special exceptions and adjustments authority under section 1886(d)(5)(I)(i) of the Act to implement a retrospective one-time adjustment for CY 2026 to account for the underestimation of the market basket updates over the last several years. Commenters recommended that CMS implement various one-time adjustments of 4.3 percent to account for underpayments in 1 or more years between CY 2021 and CY 2025 as well as for forecasted underpayments for CY 2026. The commenters stated the underestimation is, in large part, because the market basket is a time-lagged estimate that cannot fully account for unexpected changes that occur, such as historic inflation and increased labor and supply costs.

Response: We acknowledge commenters' concerns on the proposed CY 2026 market basket of 2.4 percent, including the challenging financial landscape in which rural hospitals operate. According to section 1833(t)(3)(C)(iv) of the Act, the OPD fee schedule increase factor for a year must be equal to the IPPS market basket percentage increase factor applicable under section 1886(b)(3)(B)(iii) of the Act to hospital discharges in the fiscal year ending in such year. Therefore, we are unable to adopt a final OPD fee schedule increase factor different than the IPPS market basket percentage increase factor finalized in the FY 2026 IPPS/LTCH PPS final rule. We refer commenters to the FY 2026 IPPS/LTCH PPS final rule for responses regarding the market basket issues commenters raised (90 FR 36900 to 36903).

2. Productivity Adjustment

Section 1833(t)(3)(F)(i) of the Act requires that, for 2012 and subsequent years, the OPD fee schedule increase factor under subparagraph (C)(iv) be reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act. Section 1886(b)(3)(B)(xi)(II) of the Act defines the productivity adjustment as equal to the 10-year

moving average of changes in annual economy-wide, private nonfarm business multifactor productivity (MFP) (as projected by the Secretary for the 10-year period ending with the applicable fiscal year, year, cost reporting period, or other annual period) (the ''productivity adjustment''). In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51689 through 51692), we finalized our methodology for calculating and applying the productivity adjustment. The U.S. Department of Labor's Bureau of Labor Statistics (BLS) publishes the official measures of private nonfarm business productivity for the U.S. economy. We note that previously the productivity measure referenced in section 1886(b)(3)(B)(xi)(II) of the Act was published by BLS as private nonfarm business multifactor productivity. Beginning with the November 18, 2021, release of productivity data, BLS replaced the term multifactor productivity (MFP) with total factor productivity (TFP). BLS noted that this is a change in terminology only and will not affect the data or methodology. As a result of the BLS name change, the productivity measure referenced in section 1886(b)(3)(B)(xi)(II) of the Act is now published by BLS as private nonfarm business total factor productivity. However, as mentioned, the data and methods are unchanged. Please see *www.bls.gov* for the BLS historical published TFP data. A complete description of IGI's TFP projection methodology is available on the CMS website at *https://www.cms.gov/data-research/statistics-trends-and-reports/medicare-program-rates-statistics/market-basket-research-and-information*. In addition, we note that beginning with the FY 2022 IPPS/LTCH PPS final rule, we refer to this adjustment as the productivity adjustment rather than the MFP adjustment to more closely track the statutory language in section 1886(b)(3)(B)(xi)(II) of the Act. We note that the adjustment continues to rely on the same underlying data and methodology. In the FY 2026 IPPS/LTCH PPS proposed rule (90 FR 18266), the proposed productivity adjustment for FY 2026 was 0.8 percentage point.

Therefore, we proposed that the productivity adjustment for the CY 2026 OPPS/ASC proposed rule would be 0.8 percentage point. We also proposed that if more recent data subsequently become available after the publication of the CY 2026 OPPS/ASC proposed rule (for example, a more recent estimate of the market basket percentage increase and/or the productivity adjustment), we would use such data, if appropriate, to determine the CY 2026 hospital inpatient market basket update and the productivity adjustment for the final rule with comment period, which are components in calculating the OPD fee schedule increase factor under sections 1833(t)(3)(C)(iv) and 1833(t)(3)(F) of the Act.

We note that section 1833(t)(3)(F) of the Act provides that application of this subparagraph may result in the OPD fee schedule increase factor under section 1833(t)(3)(C)(iv) of the Act being less than 0.0 percent for a year and may result in OPPS payment rates being less than rates for the preceding year. As described in further detail below, we proposed for CY 2026 an OPD fee schedule increase factor of 2.4 percent for the CY 2026 OPPS/ASC proposed rule (which is the proposed estimate of the hospital inpatient market basket percentage increase of 3.2 percent, less the proposed 0.8 percentage point productivity adjustment).

Comment: Commenters requested that CMS eliminate or waive the productivity adjustment for CY 2026 and going forward using CMS' special exceptions and adjustments authority under section 1886(b)(3)(B)(xi) of the Act, which would justify special circumstances. The commenters stated the COVID–19 pandemic years distorted productivity measurements and the application of the full productivity adjustment penalizes hospitals for costs beyond their control. The commenters requested the waiver due to strong concerns about the productivity adjustment cuts given the uncertainty which hospitals and healthcare systems are currently operating.

Commenters expressed concerns that the productivity adjustment, which reflects the private nonfarm business total factor productivity, are not achieved by hospitals and the health care field. Commenters stated the TFP, or productivity adjustment does not account for non-profit or government business which account for 60 percent of hospitals and health systems. The commenter requested we provide transparency into the data on the 10-year moving average periods in calculating the productivity adjustment. The commenter is concerned that the productivity adjustment was artificially and inappropriately increased.

Response: While we understand the commenters' concerns, section 1833(t)(3)(F)(i) of the Act requires that after determining the OPD fee schedule increase factor under subparagraph (C)(iv), the Secretary shall reduce such increase factor by the productivity adjustment described in section 1886(b)(3)(B)(xi) of the Act. As required by statute, the FY 2026 productivity adjustment is derived based on the 10-year moving average growth in economy-wide productivity for the period ending FY 2026.

We thank the commenters for their comments. After consideration of the comments received and consistent with our proposal, we are finalizing an OPD fee schedule increase factor with modification of 2.4 percent for CY 2026, which consists of the IPPS market basket increase factor of 3.2 percent less a 0.8 percentage point productivity adjustment.

3. Other Conversion Factor Adjustments

To set the OPPS conversion factor for 2026, we proposed to increase the CY 2025 conversion factor of $89.169 by 2.4 percent. In accordance with section 1833(t)(9)(B) of the Act, we proposed to further adjust the conversion factor for CY 2026 to ensure that any revisions made to the wage index and rural adjustment are made on a budget neutral basis. We proposed to apply an overall budget neutrality factor of 1.0116 for wage index changes by comparing proposed total estimated payments from our simulation model using the proposed FY 2026 IPPS wage indexes to those payments using the CY 2025 OPPS wage indexes. We further proposed to calculate an additional budget neutrality factor of 0.9955 to account for our proposed policy to cap wage index reductions for hospitals at 5 percent on an annual basis and the CY 2026 proposed transitional exception for low wage index hospitals.

For CY 2026, we proposed to maintain the current rural adjustment policy, as discussed in section II.E. of this final rule with comment period. Therefore, the proposed budget neutrality factor for the rural adjustment was 1.0000.

We proposed to calculate a CY 2026 budget neutrality adjustment factor for the cancer hospital payment adjustment. We previously finalized transitioning from the target PCR of 0.89 for CYs 2020 through 2023 (which included the 1.0 percentage point reduction as required by section 16002(b) of the 21st Century Cures Act) and incrementally reducing the target PCR by an additional 1.0 percentage point for each calendar year, beginning with CY 2024, until the target PCR equals the PCR of non-cancer hospitals calculated using the most recent data minus 1.0 percentage point as required by section 16002(b) of the 21st Century Cures Act. Based on the most recent data available for this final rule with comment period, the target PCR now equals the PCR of non-cancer

hospitals. We proposed a CY 2026 target PCR equal to 0.87 for the cancer hospital payment adjustment, which includes the 1.0 percentage point reduction as required by section 16002(b) of the 21st Century Cures Act. We note that this proposed target PCR is the same as the final target PCR established in the CY 2025 OPPS (89 FR 93979). Therefore, we proposed to apply a budget neutrality adjustment factor of 1.0000 to the conversion factor for the cancer hospital payment adjustment.

For the CY 2026 OPPS/ASC proposed rule, we estimated that proposed pass-through spending for drugs, biologicals, and devices for CY 2026 will equal approximately $587 million, which represents 0.59 percent of total projected CY 2026 OPPS spending. Therefore, we stated that the proposed conversion factor would be adjusted by the difference between the 0.37 percent estimate of pass-through spending for CY 2025 and the 0.59 percent estimate of proposed pass-through spending for CY 2026, resulting in a proposed decrease to the conversion factor for CY 2026 of 0.22 percentage point.

We proposed that estimated payments for outliers would be 1.0 percent of total OPPS payments for CY 2026. We estimate for the CY 2026 OPPS/ASC proposed rule that outlier payments would be approximately 0.92 percent of total OPPS payments in CY 2025; the 1.00 percent for proposed outlier payments in CY 2026 would constitute a 0.08 percentage point increase in payment in CY 2026 relative to CY 2025.

For CY 2026, we proposed to use a conversion factor of $91.747 in the calculation of the national unadjusted payment rates for those items and services for which payment rates are calculated using geometric mean costs; that is, the proposed OPD fee schedule increase factor of 1.024 (2.4 percent for CY 2026), the required proposed wage index budget neutrality adjustment of approximately 1.0116, the proposed 5 percent annual cap for individual hospital wage index reductions adjustment and the proposed transitional exception of approximately 0.9955, the proposed cancer hospital payment adjustment of 1.0000, and the proposed adjustment factor of 0.9978 (a decrease of 0.22 percentage point) for the difference in pass-through spending, and a 0.08 percentage point increase in projected OPPS spending for the projected increase in outlier payments, which resulted in a proposed conversion factor for CY 2026 of $91.747.

For CY 2026, we also proposed that hospitals that fail to meet the reporting requirements of the Hospital OQR Program would continue to be subject to a further reduction of 2.0 percentage points to the OPD fee schedule increase factor. For hospitals that fail to meet the requirements of the Hospital OQR Program, we proposed to make all other adjustments discussed above and apply an adjustment factor of 0.9805 to the proposed CY 2026 conversion factor of $91.747. We proposed that the hospitals that fail to meet the requirements of the Hospital OQR Program will use a reduced OPD fee schedule update factor of 0.4 percent (that is, the proposed OPD fee schedule increase factor of 2.4 percent further reduced by 2.0 percentage points).

For CY 2026, we proposed to reduce payments for non-drug items and services for hospitals for whom the annual reduction to payment amounts under § 419.32(b)(1)(iv)(B)(12) applies with a 2 percentage point reduction to the OPD fee schedule increase factor, explained in more detail in section V.B.7. of this final rule with comment period. This would result in a proposed reduced conversion factor for CY 2026 of approximately $89.958 for this group of hospitals. The calculations we performed to determine the CY 2026 proposed conversion factor are shown in Table 8.

Comment: Commenters expressed concerns with the proposed 340B accelerated offset and its reduction on the CY 2026 proposed rate increase.

Response: We acknowledge commenters' concerns on the proposed 340B accelerated offset. For a discussion of the CY 2026 340B remedy offset, we refer readers to section V.B.7 of this final rule with comment period.

For this CY 2026 OPPS/ASC final rule with comment period, based on more recent data available, the OPD fee schedule increase factor for the CY 2026 OPPS is 2.6 percent (which reflects the 3.3 percent final estimate of the hospital inpatient market basket percentage increase with a—0.7 percentage point productivity adjustment). For CY 2026, we are using a conversion factor of $91.415 in the calculation of the national unadjusted payment rates for those items and services for which payment rates are calculated using geometric mean costs; that is, the OPD fee schedule increase factor of 2.6 percent for CY 2026, the required wage index budget neutrality adjustment of 0.9990, the 5 percent annual cap for individual hospital wage index reductions of 0.9995, the cancer hospital payment adjustment of 1.0000, and the adjustment of 0.07 (or 0.37 less 0.30) percentage point of projected OPPS spending for the difference in pass-through spending that results in a conversion factor for CY 2026 of $91.415. We are also finalizing a reduced conversion factor of $89.632 in the calculation of payments for hospitals that fail to meet the Hospital OQR Program requirements (a difference of −1.783 in the conversion factor relative to hospitals that met the requirements).

BILLING CODE 4120–01–P

TABLE 8: CALCULATION OF CY 2026 FINAL OPPS CONVERSION FACTOR

Start: CY 2025 Final OPPS Conversion Factor = **$89.169**
Step 1a: Adjust the conversion factor to temporarily account for additional drug and device pass-through spending and outlier spending in CY 2025. This action causes an increase in the conversion factor. So, the amount of both drug and device pass-through spending (0.0037) and the percentage of outlier spending (0.01) as a share of total OPPS outpatient hospital spending is subtracted from 1.0000, which represents total OPPS outpatient hospital spending for CY 2025. ➢ 1.0000 – (0.0037 + 0.01) = 0.9863
Step 1b: Divide $89.169 by 0.9863 ➢ $89.169/0.9863 = **$90.408**
Step 2: Adjust the conversion factor by the required wage index budget neutrality adjustment of approximately 0.9990. This adjustment increases the amount of OPPS outpatient hospital spending and is multiplied with $90.408. ➢ $90.408* 0.9990 = **$90.317**
Step 3: Adjust the conversion factor by the 5 percent annual cap for individual hospital wage index reductions adjustment of approximately 0.9955. This adjustment reduces the amount of OPPS outpatient hospital spending and is multiplied with $91.456. ➢ $90.317* 0.9995 = **$90.272**
Step 4: Adjust the conversion factor by the cancer hospital payment adjustment of 1.0000. Because the PCR for cancer hospitals is the same between CY 2025 and CY 2026, there would be no change to the OPPS conversion factor. ➢ $90.272*1.0000 = **$90.272**
Step 5: Adjust the conversion factor by rural SCH adjustment policy of 1.0000. Since we propose to maintain our current policy, there is no impact on the conversion factor by this policy. ➢ $90.272*1.0000 = **$90.272**
Step 6a: Adjust the conversion factor by the OPD fee schedule increase factor of 0.026 for CY 2026. The OPD fee schedule increase factor increases outpatient hospital spending in CY 2026 over CY 2025 and is added to 1.0000 which represents total outpatient hospital OPPS spending in CY 2025. ➢ 1.0000+0.026 = 1.0260
Step 6b: Multiply $90.272 by 1.0260. ➢ $90.272*1.0260 = **$92.619**
Step 7a: Adjust the conversion factor to remove additional drug and device pass-through spending and outlier spending for CY 2026. This action causes a decrease in the conversion factor. So, the amount of both drug and device pass-through spending (0.0030) and the percentage of outlier spending (0.01) as a share of total OPPS outpatient hospital spending is subtracted from 1.0000, which represents total OPPS outpatient hospital spending for CY 2026. ➢ 1.0000 – (0.0030+0.01) = 0.9870
Step 7b: Multiply $92.619 by 0.9870 to get the CY 2026 final OPPS conversion factor.

$92.619*0.9870 = **$91.415**
Finish: **CY 2026 OPPS Conversion Factor = $91.415**
* *Reduction for Providers Subject to the 340B Remedy Offset* *Step 8:* Multiply $91.415 by 0.9951 to get the CY 2026 final OPPS conversion factor for the providers subject to the 340B remedy offset. $91.415*0.9951 = **$90.967**

Please note rounding may affect the numbers in the calculations above.

BILLING CODE 4120–01–C

C. Wage Index Changes

Section 1833(t)(2)(D) of the Act requires the Secretary to determine a wage adjustment factor to adjust the portion of payment and coinsurance attributable to labor-related costs for relative differences in labor and labor-related costs across geographic regions in a budget neutral manner (codified at 42 CFR 419.43(a)). This portion of the OPPS payment rate is called the OPPS labor-related share. The budget neutrality calculation methodology is discussed in section II.A.5. of this final rule with comment period.

The OPPS labor-related share is 60 percent of the national OPPS payment. This labor-related share is based on a regression analysis that determined that, for all hospitals, approximately 60 percent of the costs of services paid under the OPPS were attributable to wage costs. We confirmed that this labor-related share for outpatient services is appropriate during our regression analysis for the payment adjustment for rural hospitals in the CY 2006 OPPS/ASC final rule with comment period (70 FR 68553). We proposed to continue this policy for the CY 2026 OPPS/ASC final rule with comment period. We refer readers to section II.C. of this final rule with comment period for a description and an example of how the wage index for a particular hospital is used to determine payment for the hospital.

We did not receive any public comments on our proposed labor-related share, and we are finalizing our proposal without modification.

As discussed in the claims accounting narrative included with the supporting documentation for this final rule with comment period (which is available via the internet on the CMS website (*https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*)), for estimating APC costs, we would standardize 60 percent of estimated claims costs for geographic area wage variation using the same FY 2026 pre-reclassified wage index that we use under the IPPS to standardize costs. This standardization process removes the effects of differences in area wage levels from the determination of a national unadjusted OPPS payment rate and copayment amount.

Under §§ 419.41(c)(1) and 419.43(c) (published in the OPPS April 7, 2000, final rule with comment period (65 FR 18495 and 18545)), the OPPS adopted the final fiscal year IPPS post-reclassified wage index as the calendar year wage index for adjusting the OPPS standard payment amounts for labor market differences. Therefore, the wage index that applies to a particular acute care, short-stay hospital under the IPPS also applies to that hospital under the OPPS. As initially explained in the September 8, 1998, OPPS/ASC proposed rule (63 FR 47576), we believe that using the IPPS wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall. In accordance with section 1886(d)(3)(E) of the Act, the IPPS wage index is updated annually.

The Affordable Care Act contained several provisions affecting the wage index. These provisions were discussed in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74191). Section 10324 of the Affordable Care Act added section 1886(d)(3)(E)(iii)(II) to the Act, which defines a frontier State and amended section 1833(t) of the Act to add paragraph (19), which requires a frontier State wage index floor of 1.00 in certain cases, and states that the frontier State floor shall not be applied in a budget neutral manner. We codified these requirements at § 419.43(c)(2) and (3) of our regulations. For CY 2026, we proposed to implement this provision in the same manner as we have since CY 2011. Under this policy, the frontier State hospitals would receive a wage index of 1.00 if the otherwise applicable wage index (including reclassification, the rural floor, and rural floor budget neutrality) is less than 1.00. Because the HOPD receives a wage index based on the geographic location of the specific inpatient hospital with which it is associated, the frontier State wage index adjustment applicable for the inpatient hospital also would apply for any associated HOPD. We refer readers to the FY 2011 through FY 2025 IPPS/LTCH PPS final rules for discussions regarding this provision, including our methodology for identifying which areas meet the definition of ''frontier States'' as provided for in section 1886(d)(3)(E)(iii)(II) of the Act: for FY 2011, 75 FR 50160 through 50161; for FY 2012, 76 FR 51793, 51795, and 51825; for FY 2013, 77 FR 53369 and 53370; for FY 2014, 78 FR 50590 and 50591; for FY 2015, 79 FR 49971; for FY 2016, 80 FR 49498; for FY 2017, 81 FR 56922; for FY 2018, 82 FR 38142; for FY 2019, 83 FR 41380; for FY 2020, 84 FR 42312; for FY 2021, 85 FR 58765; for FY 2022, 86 FR 45178; FY 2023, 87 FR 49006; FY 2024, 88 FR 58977; and for FY 2025, 89 FR 69300.

In addition to the changes required by the Affordable Care Act, we note that the proposed FY 2026 IPPS wage indexes continue to reflect a number of adjustments implemented in past years, including, but not limited to, reclassification of hospitals to different geographic areas, the rural floor provisions, the imputed floor wage index adjustment in all-urban States, an adjustment for occupational mix, an adjustment to the wage index based on commuting patterns of employees (the out-migration adjustment), and the permanent 5 percent cap on any decrease to a hospital's wage index from its wage index in a prior FY. Beginning with FY 2024, we include hospitals with § 412.103 reclassification along with geographically rural hospitals in all rural wage index calculations, and to exclude ''dual reclass'' hospitals (hospitals with simultaneous § 412.103 and Medicare Geographic Classification Review Board (MGCRB) reclassifications) implicated by the hold harmless provision at section

1886(d)(8)(C)(ii) of the Act (88 FR 58971 through 58973). We refer readers to the FY 2026 IPPS/LTCH PPS proposed rule (90 FR 18217 through 18236) for a detailed discussion of all proposed changes to the FY 2026 IPPS wage indexes.

Comment: MedPAC expressed support for CMS' annual process to update the OPPS wage index with newer wage data and Office of Management and Budget delineations. However, MedPAC also expressed its concerns with flaws in the wage index system. MedPAC emphasized that, in order to improve the accuracy and fairness of Medicare's wage index systems for IPPS and OPPS hospitals and other providers, Medicare needs wage indexes that are less manipulable, that more accurately and precisely reflect geographic differences in market-wide labor costs, and that limit how much wage index values can differ among providers that are competing for the same pool of labor. To address these concerns, MedPAC stated that in its June 2023 report to Congress, it recommended that the Congress repeal the existing Medicare wage index statutes, including current exceptions, and require the Secretary to phase in new wage index systems for hospitals and other types of providers that (1) use all-employer, occupation-level wage data with different occupation weights for the wage index of each provider type; (2) reflect local area level differences in wages between and within metropolitan statistical areas and statewide rural areas; and (3) smooth wage index differences across adjacent local areas.

Response: We appreciate MedPAC's concerns, but as MedPAC acknowledges in its comment, the Congress would need to change current law to implement MedPAC's suggestions.

Comment: One commenter expressed support for CMS' policy to treat urban hospitals re-designated as rural under § 412.103 the same as geographically rural hospitals for the wage index calculation. The commenter opined that treating urban hospitals re-designated as rural under § 412.103 the same as geographically rural hospitals for the calculation of the rural wage index and rural floor is an appropriate and fair implementation of the statute.

Response: We thank the commenter for their support. We note that in the FY 2023 IPPS/LTCH PPS final rule (87 FR 49018 through 49021), we finalized a permanent approach to smooth year-to-year decreases in hospitals' wage indexes. Specifically, for FY 2023 and subsequent years, we apply a 5 percent cap on any decrease to a hospital's wage index from its wage index in the prior FY, regardless of the circumstances causing the decline. That is, a hospital's wage index for FY 2026 would not be less than 95 percent of its final wage index for FY 2025. Except for newly opened hospitals, we apply the cap for a fiscal year using the final wage index applicable to the hospital on the last day of the prior fiscal year. A newly opened hospital would be paid the wage index for the area in which it is geographically located for its first full or partial fiscal year (subject to any reclassification), and it would not receive a cap for that first year, because it would not have been assigned a wage index in the prior year (in accordance with 42 CFR 419.41(c)(1) and 419.43(c), as noted previously).

Comment: Several commenters, including MedPAC, supported the policy to cap wage index decreases. MedPAC urged CMS to apply a cap to wage index increases as well. Several commenters urged CMS to exclude the wage index cap policy from budget neutrality.

Response: We thank the commenters for their support. We appreciate MedPAC's suggestion that the cap on wage index changes should also be applied to increases in the wage index. However, as we stated in the FY 2023 IPPS/LTCH PPS final rule (87 FR 49021), one purpose of the wage index policy is to help mitigate the significant negative impacts of certain wage index changes. That is, we cap decreases because we believe that a hospital would be able to more effectively budget and plan when there is predictability about its expected minimum level of OPPS payments in the upcoming fiscal year. We do not have a policy to limit wage index increases because we do not believe such a policy is needed to enable hospitals to more effectively budget and plan their operations. Therefore, we believe it is appropriate for hospitals that experience an increase in their wage index value to receive that wage index value. With respect to excluding the wage index cap policy from budget neutrality, under the OPPS, section 1833(t)(2)(D) of the Act requires the Secretary to determine a wage adjustment factor to adjust the portion of payment and coinsurance attributable to labor-related costs for relative differences in labor and labor-related costs across geographic regions in a budget neutral manner. This statutory requirement is inconsistent with the commenters' request to exclude the wage index cap policy from budget neutrality.

Consistent with the FY 2026 IPPS/LTCH PPS proposed rule (90 FR 18233), we proposed to discontinue for CY 2026 and subsequent years the low wage index hospital policy under the OPPS. Under the low wage index hospital policy that we adopted for the OPPS (84 FR 61186 through 61188), we increased the wage index for hospitals with a wage index value below the 25th percentile wage index value for a calendar year by half the difference between the otherwise applicable final wage index value for a year for that hospital and the 25th percentile wage index value for that year across all hospitals. We removed the low wage index hospital policy from the IPPS wage index calculation for FY 2025 after considering the Court of Appeals for the D.C. Circuit's decision in *Bridgeport Hosp.* v. *Becerra,* 108 F.4th 882 (D.C. Cir. 2024). On July 23, 2024, the court held in *Bridgeport Hosp.* v. *Becerra* that the Secretary lacked authority under section 1886(d)(3)(E) of the Act or under the ''adjustments'' language of section 1886(d)(5)(I)(i) of the Act to adopt the low wage index hospital policy for FY 2020 for the IPPS, and that the policy for FY 2020 and related budget neutrality adjustment in the IPPS must be vacated. After considering the court's decision, in the interim final action with comment period (IFC) titled ''Medicare Program; Changes to the Fiscal Year 2025 Hospital Inpatient Prospective Payment System (IPPS) Rates Due to Court Decision'' (referred to herein as the FY 2025 IFC) (89 FR 80405 through 80421), we recalculated the FY 2025 IPPS hospital wage index to remove the low wage index hospital policy for FY 2025 and also removed the low wage index budget neutrality factor from the FY 2025 standardized amounts.

In the FY 2026 IPPS/LTCH PPS proposed rule, after considering the D.C. Circuit's decision in *Bridgeport Hosp.* v. *Becerra,* we proposed to discontinue the low wage index hospital policy for FY 2026 and subsequent fiscal years. We refer the reader to the FY 2025 IFC (89 FR 80405 through 80421) and FY 2026 IPPS/LTCH PPS proposed rule (90 FR 18233 through 18236) for a detailed discussion regarding the removal of the low wage index hospital policy from the IPPS for FYs 2025 and 2026.

As discussed previously, from the establishment of the OPPS in 2000 through 2024, we adopted the IPPS wage index on a calendar year basis in the OPPS. From FY 2020 to FY 2024, the IPPS wage index included the low wage index hospital policy and we correspondingly adopted the low wage index hospital policy under the OPPS for CY 2020 to CY 2024. However, when the *Bridgeport* decision was issued in July 2024, the OPPS did not remove the

low wage index hospital policy from the calculation of the CY 2025 wage index. As discussed in the CY 2025 OPPS/ASC final rule with comment period, this decision to continue the low wage index hospital policy under the OPPS for CY 2025 (and thus to diverge from the IPPS wage index for FY 2025) was due principally to the unique circumstances presented by the timing of the court decision and subsequent IFC and the statutory authority that CMS relied upon to implement the low wage index hospital policy under the OPPS was different than the statutory authority relied upon for the policy under the IPPS. We took this approach for the CY 2025 OPPS given the unusual circumstances wherein an appellate court ruled that CMS lacked authority under the IPPS statute for a policy under the FY 2020 IPPS wage index that the OPPS/ASC proposed rule had already proposed to include in the OPPS wage index. Under these circumstances, we concluded that continuing the low wage index hospital policy for CY 2025 would avoid unexpected and arguably unfair payment consequences for hospitals that were not plaintiffs in *Bridgeport.* Additionally, we believed that the same reasons underlying adoption of the IFC policies for the FY 2025 IPPS wage index weighed against incorporating those policies for purposes of the CY 2025 OPPS wage index. Specifically, we noted in the IFC that the intention of the policies implemented therein was to ''promote certainty regarding . . . payments'' and ''provide for payment stability and promote predictability,'' in light of the court's decision in *Bridgeport* (89 FR 80408) and we determined that those interests would be better served by finalizing the OPPS wage index methodology as proposed, including the low wage index hospital policy. Based on these considerations, we continued the low wage index hospital policy under the OPPS for CY 2025 as proposed but indicated that we would explore options for realigning the IPPS and OPPS wage index values through future rulemaking. We refer readers to the CY 2025 OPPS/ASC final rule with comment period for a detailed discussion regarding our retention of the low wage index hospital policy under the OPPS for CY 2025 (89 FR 93975 through 93976).

Given the proposal to discontinue the low wage index hospital policy under the IPPS in the FY 2026 IPPS/LTCH PPS proposed rule and the absence of the timing issues which compelled us to continue the low wage index hospital policy under the OPPS for CY 2025, we stated in the CY 2026 OPPS/ASC proposed rule that we think it is now appropriate to return to our longstanding policy of using the IPPS wage index as the source of an adjustment factor for the OPPS. Consequently, to effectuate full realignment of the IPPS and OPPS wage index values in CY 2026, we proposed to eliminate the low wage index hospital policy under the OPPS and use the IPPS wage index in CY 2026 and subsequent years.

To effectuate full realignment of the IPPS and OPPS wage index values in CY 2026, we proposed that the 5 percent cap that will apply to the CY 2026 OPPS wage index will be based off the IPPS wage index for FY 2025 rather than the OPPS wage index for CY 2025. We noted that because the CY 2025 OPPS wage index was different than the FY 2025 IPPS wage index (due to the continuation of the low wage index hospital policy under the OPPS), using the FY 2026 IPPS wage index for the CY 2026 OPPS wage index would result in decreases greater than 5 percent to some hospitals' wage indexes under the OPPS. Therefore, under our proposal the 5 percent cap on wage index decreases in the CY 2026 OPPS would apply in a similar manner to years prior to the CY 2025 OPPS, in which IPPS hospitals would receive the same wage index with the cap on wage index decreases as they would under the FY IPPS, and non-IPPS hospitals and CMHCs would receive a similar corresponding wage index with the cap on wage index decreases policy under the broader wage index adoption.

Comment: Most commenters supported our proposal to effectuate full realignment of the IPPS and OPPS wage index values in CY 2026 by eliminating the low wage index hospital policy under the OPPS and using the IPPS wage index in CY 2026 and subsequent years.

Response: We thank commenters for their support.

Comment: One commenter expressed concern about our proposal to eliminate the low wage index hospital policy, stating that eliminating it without a permanent, equitable alternative will disproportionately harm hospitals that serve vulnerable and underserved populations. Another commenter urged CMS to reconsider its approach to the area wage index following the removal of the low wage index policy and to take corrective action to address its inequities, particularly for rural States.

Response: We understand the commenters' concerns that the rationale for implementing the low wage index hospital policy remains. However, we believe it is important to return the IPPS and OPPS wage index values to their historical and longstanding alignment. As initially explained in the September 8, 1998, OPPS/ASC proposed rule (63 FR 47576), we believe that using the IPPS wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall.

After consideration of the public comments we received, we are finalizing our proposal without modification to discontinue the low wage index hospital policy under the OPPS and use the FY 2026 IPPS post-reclassified wage index for urban and rural areas as finalized in the FY 2026 IPPS final rule as the wage index for the OPPS. We are also finalizing our proposal without modification that the 5 percent cap that will apply to the CY 2026 OPPS wage index and will be based off the IPPS wage index for FY 2025 rather than the OPPS wage index for CY 2025.

We note that in the FY 2026 IPPS proposed rule (90 FR 18233 through 18235) we proposed, using our authority under section 1886(d)(5)(I)(i) of the Act, to adopt a narrow transitional exception to the calculation of FY 2026 IPPS payments for low wage index hospitals significantly impacted by the discontinuation of the low wage index hospital policy. As indicated in that rule, we proposed this temporary payment exception ''to mitigate short-term instability and payment fluctuations that can negatively impact hospitals consistent with principles of certainty and predictability under prospective payment systems.'' To address these same concerns under the OPPS, we correspondingly proposed a transitional payment exception for CY 2026 under the OPPS using our equitable adjustment authority under section 1833(t)(2)(E) of the Act. This authority allows the Secretary to establish, in a budget neutral manner, adjustments as determined to be necessary to ensure equitable payments.

The transitional exception policy we proposed would apply to hospitals that benefited from the CY 2024 low wage index hospital policy. For those hospitals, we proposed to compare the hospital's proposed CY 2026 wage index to the hospital's CY 2024 wage index. If the hospital is significantly impacted by the discontinuation of the low wage index hospital policy, meaning the hospital's proposed CY 2026 wage index is decreasing by more than 9.75 percent from the hospital's CY 2024 wage index, then the transitional payment exception for CY 2026 for that

hospital would be equal to the additional CY 2026 amount the hospital would be paid under the OPPS if its CY 2026 wage index were equal to 90.25 percent of its CY 2024 wage index. This proposed transitional payment exception would be applied after the application of the 5-percent cap described at 42 CFR 412.64(h)(7). We proposed to make this policy budget neutral under the OPPS through the second wage index budget neutrality adjustment applied to the OPPS conversion factor (which currently includes the 5 percent hold harmless cap policy).

Comment: Multiple commenters supported CMS' proposal to establish a transitional payment exception for CY 2026. Commenters also requested that the proposed transitional payment exception be applied in a non-budget neutral manner.

Response: We appreciate the commenters' support of our policy to establish a transitional payment exception for CY 2026. For the OPPS, section 1833(t)(2)(D) of the Act requires the Secretary to determine a wage adjustment factor to adjust the portion of payment and coinsurance attributable to labor-related costs for relative differences in labor and labor-related costs across geographic regions in a budget neutral manner. Commenters' request to exclude the proposed transitional payment exception from budget neutrality is inconsistent with the budget neutral requirement under 1833(t)(2)(D) of the Act.

Comment: One commenter stated that as proposed, the transitional payment exception would cause disproportionate harm to rural, safety-net, and OPPS hospitals that cannot be reclassified. To avoid this outcome, the commenter recommended that CMS: (1) anchor the 5 percent cap to the CY 2025 OPPS wage-index baseline, not the FY 2025 IPPS baseline; (2) broaden the transitional exception to >5 percent decline, not >9.75 percent, and set the floor at 95 percent of CY 2024, not 90.25 percent; and (3) retain an OPPS low-wage policy or equivalent hold-harmless policies until alignment can occur without producing greater than 5 percent decreases from baseline.

Response: We appreciate the alternative methods suggested by the commenter to help mitigate the effect on hospitals of eliminating the low wage index hospitals policy. We note, however, that we had described in the CY 2025 OPPS/ASC final rule with comment period our intention to realign the wage index and by adopting into the OPPS transitional payment exception the same percentages and methodologies used by the IPPS transitional payment exception, we can fully align the wage index across both systems in CY 2026 rather than having discrepancies and inconsistencies that continue into future years based on ongoing transition policies.

After consideration of the public comments we received, we are finalizing our proposal without modification to adopt a transitional payment exception for CY 2026 under the OPPS using our equitable adjustment authority under section 1833(t)(2)(E) of the Act.

Core Based Statistical Areas (CBSAs) are made up of one or more constituent counties. Each CBSA and constituent county has its own unique identifying codes. The FY 2018 IPPS/LTCH PPS final rule (82 FR 38130) discussed the two different lists of codes to identify counties: Social Security Administration (SSA) codes and Federal Information Processing Standard (FIPS) codes. Historically, CMS listed and used SSA and FIPS county codes to identify and crosswalk counties to CBSA codes for purposes of the IPPS and OPPS wage indexes. However, the SSA county codes are no longer being maintained and updated, although the FIPS codes continue to be maintained by the U.S. Census Bureau. The Census Bureau's most current statistical area information is derived from ongoing census data received since 2010; the most recent data are from 2015. The Census Bureau maintains a complete list of changes to counties or county equivalent entities on the website at *https://www.census.gov/programs-surveys/geography/technical-documentation/county-changes.html*. In the FY 2018 IPPS/LTCH PPS final rule (82 FR 38130), for purposes of crosswalking counties to CBSAs for the IPPS wage index, we finalized our proposal to discontinue the use of the SSA county codes and begin using only the FIPS county codes. Similarly, for the purposes of crosswalking counties to CBSAs for the OPPS wage index, in the CY 2018 OPPS/ASC final rule with comment period (82 FR 59260), we finalized our proposal to discontinue the use of SSA county codes and begin using only the FIPS county codes. For CY 2026, under the OPPS, we are continuing to use only the FIPS county codes for purposes of crosswalking counties to CBSAs.

We proposed to use the FY 2026 IPPS post-reclassified wage index for urban and rural areas as the wage index for the OPPS to determine the wage adjustments for both the OPPS payment rate and the copayment rate for CY 2026. Therefore, any policies and adjustments that are finalized for the FY 2026 IPPS post-reclassified wage index would be reflected in the final CY 2026 OPPS wage index beginning on January 1, 2026, if appropriate. We refer readers to the FY 2026 IPPS/LTCH PPS proposed rule (90 FR 18217 through 18236) and the proposed FY 2026 hospital wage index files posted on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/acute-inpatient-pps/fy-2026-ipps-proposed-rule-home-page.* Regarding budget neutrality for the CY 2026 OPPS wage index, we refer readers to section II.C. of this final rule with comment period. We continue to believe that using the IPPS post-reclassified wage index as the source of an adjustment factor for the OPPS is reasonable and logical, given the inseparable, subordinate status of the HOPD within the hospital overall.

Hospitals that are paid under the OPPS, but not under the IPPS, do not have an assigned hospital wage index under the IPPS. Therefore, for non-IPPS hospitals paid under the OPPS, it is our longstanding policy to assign the wage index that would be applicable if the hospital was paid under the IPPS, based on its geographic location and any applicable wage index policies and adjustments. We proposed to continue this policy for CY 2026. We refer readers to the FY 2026 IPPS/LTCH PPS proposed rule (90 FR 18217 through 18236) for a detailed discussion of the proposed changes to the FY 2026 IPPS wage indexes.

It has been our longstanding policy to allow non-IPPS hospitals paid under the OPPS to qualify for the out-migration adjustment if they are located in a ''section 505 out-migration county'' (that is, a county identified under section 505 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA)) (Pub. L. 108–173). Applying this adjustment is consistent with our policy of adopting IPPS wage index policies for hospitals paid under the OPPS. We note that, because non-IPPS hospitals cannot reclassify, they are eligible for the out-migration wage index adjustment if they are located in a section 505 out-migration county. This is the same out-migration adjustment policy that would apply if the hospital were paid under the IPPS. For CY 2026, we proposed to continue our policy of allowing non-IPPS hospitals paid under the OPPS to qualify for the outmigration adjustment if they are located in a section 505 out-migration county (section 505 of the MMA) (88 FR 49585 and 49586). Furthermore, we proposed that the wage index that would apply for CY 2026 to non-IPPS hospitals paid

under the OPPS would continue to include the rural floor adjustment and any policies and adjustments applied to the IPPS wage index. In addition, we proposed that the wage index that would apply to non-IPPS hospitals paid under the OPPS would include the 5 percent cap on wage index decreases and the previously described proposed transitional payment exception for hospitals significantly impacted by the discontinuation of the low wage index hospital policy. We did not receive any comments on these proposals and are finalizing as proposed.

For CMHCs, for CY 2026, we proposed to continue to calculate the wage index by using the post-reclassification IPPS wage index based on the CBSA where the CMHC is located. Furthermore, we proposed that the wage index that would apply to a CMHC for CY 2026 would continue to include the rural floor adjustment and any policies and adjustments applied to the IPPS wage index. In addition, the wage index that would apply to CMHCs would include the 5 percent cap on wage index decreases. Also, we proposed that the wage index that would apply to CMHCs would not include the outmigration adjustment because that adjustment only applies to hospitals.

We did not receive any public comments on these proposals, and we are finalizing our proposals regarding CMHC wage index calculations without modification.

Table 4A associated with the FY 2026 IPPS/LTCH PPS final rule (available via the internet on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/acute-inpatient-pps/fy-2026-ipps-final-rule-home-page*) identifies counties that would be eligible for the out-migration adjustment. Table 2 associated with the FY 2026 IPPS/LTCH PPS final rule (available for download via the website noted previously) identifies IPPS hospitals that would receive the out-migration adjustment for FY 2026. We are including the outmigration adjustment information from Table 2 associated with the FY 2026 IPPS/LTCH PPS final rule as Addendum L to this final rule with comment period, with the addition of non-IPPS hospitals that would receive the section 505 outmigration adjustment under this final rule with comment period. Addendum L is available via the internet on the CMS website. We refer readers to the CMS website for the OPPS at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*. At this link, readers will find a link to the final FY 2026 IPPS wage index tables and Addendum L.

D. Final Statewide Average Default Cost-to-Charge Ratios (CCRs)

In addition to using CCRs to estimate costs from charges on claims for ratesetting, we use overall hospital-specific CCRs calculated from the hospital's most recent cost report (OMB control number: 0938–0050 for Form CMS–2552–10) to determine outlier payments, payments for pass-through devices, and monthly interim transitional corridor payments under the OPPS during the PPS year. For certain hospitals, under the regulations at 42 CFR 419.43(d)(5)(iii), we use the statewide average default CCRs to determine the payments mentioned earlier if it is not possible to determine an accurate CCR for a hospital in certain circumstances. This includes hospitals that are new, hospitals that have not accepted assignment of an existing hospital's provider agreement, and hospitals that have not yet submitted a cost report. We also use the statewide average default CCRs to determine payments for hospitals whose CCR falls outside the predetermined ceiling threshold for a valid CCR or for hospitals in which the most recent cost report reflects an all-inclusive rate status (Medicare Claims Processing Manual (Pub. L. 100–04), Chapter 4, Section 10.11).

We discussed our policy for using default CCRs, including setting the ceiling threshold for a valid CCR, in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68594 through 68599) in the context of our adoption of an outlier reconciliation policy for cost reports beginning on or after January 1, 2009. For details on our process for calculating the statewide average CCRs, we refer readers to the Claims Accounting Narrative for this final rule with comment period, which is posted on the CMS website. We proposed to calculate the default ratios for CY 2026 using the most recent cost report data.

We did not receive any public comments on our proposal, and we are finalizing our proposal without modification to calculate the default ratios for CY 2026 using the most recent cost report data, which are from a June 2025 HCRIS cost report extract.

We no longer publish a table in the **Federal Register** containing the statewide average CCRs in the annual OPPS/ASC proposed rule and final rule with comment period. These CCRs and the upper limit CCR value at which we would apply statewide CCRs will be available for download with each CY OPPS/ASC proposed rule and final rule with comment period on the CMS website. We refer readers to our website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/regulations-notices*; click on the link on the left of the page titled ''Annual Policy Files'' and then select the relevant year to download the statewide CCRs and upper limits in the ''Downloads'' section of the web page.

E. Adjustment for Rural Sole Community Hospitals (SCHs) and Essential Access Community Hospitals (EACHs) Under Section 1833(t)(13)(B) of the Act for CY 2026

In the CY 2006 OPPS final rule with comment period (70 FR 68556), we finalized a payment increase for rural sole community hospitals (SCHs) of 7.1 percent for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, brachytherapy sources, items paid at charges reduced to costs, and devices paid under the pass-through payment policy, in accordance with section 1833(t)(13)(B) of the Act, as added by section 411 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108–173). Section 1833(t)(13) of the Act provides the Secretary the authority to make an adjustment to OPPS payments for rural hospitals, effective January 1, 2006, if justified by a study of the difference in costs by APC between hospitals in rural areas and hospitals in urban areas. Our analysis showed a difference in costs for rural SCHs. Therefore, for the CY 2006 OPPS, we finalized a payment adjustment for rural SCHs of 7.1 percent for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, brachytherapy sources, items paid at charges reduced to costs, and devices paid under the pass-through payment policy, in accordance with section 1833(t)(13)(B) of the Act.

In the CY 2007 OPPS/ASC final rule with comment period (71 FR 68010 and 68227), for purposes of receiving this rural adjustment, we revised our regulations at § 419.43(g) to clarify that essential access community hospitals (EACHs) are also eligible to receive the rural SCH adjustment, assuming these entities otherwise meet the rural adjustment criteria. Currently, two hospitals are classified as EACHs, and as of CY 1998, under section 4201(c) of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33), a hospital can no longer become newly classified as an EACH.

This adjustment for rural SCHs is budget neutral and applied before calculating outlier payments and

copayments. We stated in the CY 2006 OPPS final rule with comment period (70 FR 68560) that we would not reestablish the adjustment amount on an annual basis, but we may review the adjustment in the future and, if appropriate, would revise the adjustment. We provided the same 7.1 percent adjustment to rural SCHs, including EACHs, again in CYs 2008 through 2025 (89 FR 93977).

For CY 2026, we proposed to continue the current policy of a 7.1 percent payment adjustment for rural SCHs, including EACHs, for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, brachytherapy sources, items paid at charges reduced to costs, and devices paid under the pass-through payment policy, applied in a budget neutral manner (90 FR 33514).

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Multiple commenters supported our proposal to continue to apply a 7.1 percent payment adjustment for rural SCHs, including EACHs, in CY 2026.

Response: We thank the commenters for their support of our proposal.

Comment: Several commenters stated that the 7.1 percent payment adjustment should be extended to urban SCHs and Medicare dependent hospitals (MDHs). The commenters stated MDHs are rural hospitals and suggested CMS perform another study to look at the costs that MDHs incur, and opined that CMS has the authority to extend the adjustment to MDHs and urban SCHs without legislation.

Response: We note that our authority for an adjustment under section 1833(t)(13)(B) of the Act only applies to rural hospitals, so we would not have authority to extend this adjustment to a hospital classified as urban. We are not performing another study under 1833(t)(13)(A) of the Act for this rule, but we will consider if this is appropriate for future rulemaking.

Comment: One commenter stated the supplemental adjustments for rural SCHs and EACHs are essential for their sustainability but stated recipients of these payments need greater accountability for improving beneficiary access. The commenter suggested that CMS publish annual data on outpatient service availability and closures or reductions of service, to ensure that these supplemental payments are tied to tangible results for patients.

Response: We thank the commenter for their input and will consider the suggestion for future rulemaking.

After consideration of these public comments, we are finalizing our proposal, without modification, to continue our current policy of utilizing a budget neutral 7.1 percent payment adjustment for rural SCHs, including EACHs, for all services and procedures paid under the OPPS, excluding separately payable drugs and biologicals, brachytherapy sources, devices paid under the pass-through payment policy, and items paid at charges reduced to costs.

F. Payment Adjustment for Certain Cancer Hospitals for CY 2026

1. Background

Since the inception of the OPPS, which was authorized by the BBA, Medicare has paid the 11 hospitals that meet the criteria for cancer hospitals identified in section 1886(d)(1)(B)(v) of the Act under the OPPS for covered outpatient department services. These cancer hospitals are exempted from payment under the IPPS. With the Medicare, Medicaid and SCHIP Balanced Budget Refinement Act of 1999 (Pub. L. 106–113), the Congress added section 1833(t)(7) of the Act, ''Transitional Adjustment to Limit Decline in Payment,'' which requires the Secretary to determine OPPS payments to cancer and children's hospitals based on their pre-BBA payment amount (these hospitals are often referred to under this policy as ''held harmless'' and their payments are often referred to as ''hold harmless'' payments).

As required under section 1833(t)(7)(D)(ii) of the Act, a cancer hospital receives the full amount of the difference between payments for covered outpatient department services under the OPPS and a ''pre-BBA amount.'' That is, cancer hospitals are permanently held harmless to their ''pre-BBA amount,'' and they receive transitional outpatient payments (TOPs) or hold harmless payments to ensure that they do not receive a payment that is lower in amount under the OPPS than the payment amount they would have received before implementation of the OPPS, as set forth in section 1833(t)(7)(F) of the Act. The ''pre-BBA amount'' is the product of the hospital's reasonable costs for covered outpatient department services occurring in the current year and the base payment-to-cost ratio (PCR) for the hospital defined in section 1833(t)(7)(F)(ii) of the Act. The ''pre-BBA amount'' and the determination of the base PCR are defined at § 419.70(f). TOPs are calculated on Worksheet E, Part B, of the Hospital Cost Report or the Hospital Health Care Complex Cost Report (Form CMS–2552–96 or Form CMS–2552–10 (OMB No: 0938–0050), respectively), as applicable each year. Section 1833(t)(7)(I) of the Act exempts TOPs from budget neutrality calculations.

Section 3138 of the Affordable Care Act (Pub. L. 111–148) amended section 1833(t) of the Act by adding a new paragraph (18), which instructs the Secretary to conduct a study to determine if, under the OPPS, outpatient costs incurred by cancer hospitals described in section 1886(d)(1)(B)(v) of the Act with respect to APC groups exceed outpatient costs incurred by other hospitals furnishing services under section 1833(t) of the Act, as determined appropriate by the Secretary. Section 1833(t)(18)(A) of the Act requires the Secretary to take into consideration the cost of drugs and biologicals incurred by cancer hospitals and other hospitals. Section 1833(t)(18)(B) of the Act provides that, if the Secretary determines that cancer hospitals' costs are higher than those of other hospitals, the Secretary shall provide an appropriate adjustment under section 1833(t)(2)(E) of the Act to reflect these higher costs. In 2011, after conducting the study required by section 1833(t)(18)(A) of the Act, we determined that outpatient costs incurred by the 11 specified cancer hospitals were greater than the costs incurred by other OPPS hospitals. For a complete discussion regarding the cancer hospital cost study, we refer readers to the CY 2012 OPPS/ASC final rule with comment period (76 FR 74200 and 74201).

Based on these findings, we finalized a policy to provide a payment adjustment to the 11 specified cancer hospitals that reflects their higher outpatient costs, as discussed in the CY 2012 OPPS/ASC final rule with comment period (76 FR 74202 through 74206). Specifically, we adopted a policy to provide additional payments to the cancer hospitals so that each cancer hospital's final PCR for services provided in a given calendar year is equal to the weighted average PCR (which we refer to as the ''target PCR'') for other hospitals paid under the OPPS. The target PCR is set in advance of the calendar year and is calculated using the most recently submitted or settled cost report data that are available at the time of final rulemaking for the calendar year. The amount of the payment adjustment is made on an aggregate basis at cost report settlement. We note that the changes made by section 1833(t)(18) of the Act do not affect the existing statutory provisions that provide for TOPs for cancer hospitals.

The TOPs are assessed, as usual, after all payments, including the cancer hospital payment adjustment, have been made for a cost reporting period. Table 9 displays the target PCR for purposes of the cancer hospital adjustment for CY 2012 through CY 2025.

TABLE 9: CANCER HOSPITAL ADJUSTMENT TARGET PAYMENT-TO-COST RATIOS (PCRS), CY 2012 THROUGH CY 2025

Calendar Year	Target PCR
2012	0.91
2013	0.91
2014	0.90
2015	0.90
2016	0.92
2017	0.91
2018	0.88
2019	0.88
2020	0.89
2021	0.89
2022	0.89
2023	0.89
2024	0.88
2025	0.87

2. Policy for CY 2026

Section 16002(b) of the 21st Century Cures Act (Pub. L. 114–255) amended section 1833(t)(18) of the Act by adding subparagraph (C), which requires that in applying § 419.43(i) (that is, the payment adjustment for certain cancer hospitals) for services furnished on or after January 1, 2018, the Secretary shall use a target PCR that is 1.0 percentage point less than the target PCR that would otherwise apply. Section 16002(b) of the 21st Century Cures Act also provides that, in addition to the percentage reduction, the Secretary may consider making an additional percentage point reduction to the target PCR that takes into account payment rates for applicable items and services described under section 1833(t)(21)(C) of the Act for hospitals that are not cancer hospitals described under section 1886(d)(1)(B)(v) of the Act. Further, in making any budget neutrality adjustment under section 1833(t) of the Act, section 16002(b) of the 21st Century Cures Act provides that the Secretary shall not take into account the reduced expenditures that result from application of section 1833(t)(18)(C) of the Act.

We proposed to provide additional payments to the 11 specified cancer hospitals so that each cancer hospital's proposed PCR is equal to the weighted average PCR (or ''target PCR'') for the other OPPS hospitals, generally using the most recent submitted or settled cost report data that are available, reduced by 1.0 percentage point, to comply with section 16002(b) of the 21st Century Cures Act. As discussed further below, we did not propose an additional reduction beyond the 1.0 percentage point reduction required by section 16002(b) of the 21st Century Cures Act for CY 2026.

To calculate the proposed CY 2026 target PCR, we proposed to use the same extract of cost report data from HCRIS used to estimate costs for the CY 2026 OPPS which, in most cases, would be the most recently available hospital cost reports. Using these cost report data, we included data from Worksheet E, Part B, for each hospital, using data from each hospital's most recent cost report, whether as submitted or settled.

We then limited the dataset to the hospitals with CY 2024 claims data that we used to model the impact of the proposed CY 2026 APC relative payment weights (3,388 hospitals) because we believe it is appropriate to use the same set of hospitals that are being used to calibrate the modeled CY 2026 OPPS. The cost report data for the hospitals in this dataset were from cost report periods with fiscal year ends ranging from 2022 to 2024; however, the cost reporting periods were predominantly from fiscal years ending in 2023 and 2024. We then removed the cost report data of the 49 hospitals located in Puerto Rico from our dataset because we did not believe their cost structure reflected the costs of most hospitals paid under the OPPS, and, therefore, their inclusion may bias the calculation of hospital-weighted statistics. We also removed the cost report data of 12 hospitals because these hospitals had cost report data that were not complete (missing aggregate OPPS payments, missing aggregate cost data, or missing both), so that all cost reports in the study would have both the payment and cost data necessary to calculate a PCR for each hospital, leading to a proposed analytic file of 3,327 hospitals with cost report data.

Using this smaller dataset of cost report data, we estimated that, on average, the OPPS payments to other hospitals furnishing services under the OPPS were approximately 88 percent of reasonable cost (weighted average PCR of 0.88). Therefore, after applying the 1.0 percentage point reduction, as required by section 16002(b) of the 21st Century Cures Act, using our standard process the payment amount associated with the cancer hospital payment adjustment to be determined at cost report settlement would be the additional payment needed to result in a proposed target PCR equal to 0.87 for each cancer hospital.

In the CY 2024 OPPS/ASC final rule with comment period (88 FR 81586 through 81589), we explained that we believe we should begin to take into consideration the PCR of non-cancer hospitals based on the most recently available data for calculating the target PCR. We noted that we do not know if the changes in the data that have yielded lower PCRs for non-cancer hospitals are likely to continue in future years or if, when data from after the PHE

is available, we will see the target PCR increase toward its historical norm. Therefore, in the CY 2024 OPPS/ASC final rule with comment period, we finalized our proposal to transition from the target PCR of 0.89 we finalized for CYs 2020 through 2024 (which included the 1.0 percentage point reduction as required by section 16002(b) of the 21st Century Cures Act) and incrementally reduce the target PCR by an additional 1.0 percentage point for each calendar year, beginning with CY 2024, until the target PCR equals the PCR of non-cancer hospitals calculated using the most recent data minus 1.0 percentage point as required by section 16002(b) of the 21st Century Cures Act. Therefore, utilizing this methodology, we finalized in the CY 2025 OPPS/ASC final rule with comment period (89 FR 93977 through 93980) our policy to reduce the CY 2024 target PCR of 0.88 by 1 percentage point and finalized a cancer hospital target PCR of 0.87 for CY 2025.

Since the target PCR based on the OPPS payments to other hospitals furnishing services under the OPPS would be 0.87 after applying the 1.0 percentage point reduction, as required by the section 16002(b) of the 21st Century Cures Act, and would equal the CY 2025 target PCR, it is no longer necessary to continue our transition policy of gradually reducing the pre-COVID–19 PHE target PCR by 1.0 percentage point in lieu of our target PCR calculation. For CY 2026 and subsequent years, we proposed to calculate the target PCR based on our longstanding target PCR calculation methodology described in the CY 2026 OPPS/ASC proposed rule, and then apply the 1.0 percentage point reduction as required by section 16002(b) of the 21st Century Cures Act.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Some commenters supported the cancer hospital payment adjustment while one commenter recommended the agency conduct a review to determine if the cancer hospital payment adjustment was still appropriate, including reviewing the accuracy of cost report information.

Response: As previously discussed, section 1833(t)(7)(D)(ii) of the Act requires that the cancer hospitals that meet the statutory criteria receive the full amount of the difference between payments for covered outpatient department services under the OPPS and a ''pre-BBA amount.'' Additionally, 1833(t)(18)(B) of the Act requires that if the Secretary determines that cancer hospitals' costs are higher than those of other hospitals, to provide an appropriate adjustment under section 1833(t)(2)(E) to reflect these higher costs. The statute does not provide flexibility to discontinue such cancer hospital payment adjustments. Further, we note that Medicare Administrative Contractors routinely perform audits on hospital cost reports to ensure accuracy and completeness.

Comment: One commenter supported the Agency's discontinuation of the gradual reduction policy but recommended that we reinstate such a policy in the future to avoid dramatic and unexpected negative reductions in the target PCR.

Response: We appreciate the commenter's support and will take their comment regarding reinstating the gradual reduction policy into consideration for future rulemaking.

After consideration of public comments we received, we are finalizing without modification our proposal to calculate the target PCR based on our longstanding target PCR calculation methodology described in this final rule with comment and then apply the 1.0 percentage point reduction as required by section 16002(b) of the 21st Century Cures Act. For this final rule with comment period, we are using the most recent cost report data through June 30, 2025 to update the adjustment. We limited the dataset to hospitals with CY 2024 claims data that we used to model the impact of the CY 2026 APC relative payment weights (3,395 hospitals) because it is appropriate to use the same set of hospitals that we are using to calibrate the modeled CY 2026 OPPS. The cost report data for the hospitals in the dataset were from cost reporting periods with fiscal years ends ranging from 2019 to 2024. We then removed the cost report data of the 48 hospitals located in Puerto Rico from our dataset because we do not believe that their cost structure reflects the costs of most hospitals paid under the OPPS and, therefore, their inclusion may bias the calculation of hospital-weighted statistics. We also removed the cost report data of 6 hospitals because these hospitals had cost report data that were not complete (missing aggregate OPPS payments, missing aggregate cost data, or missing both), so that all cost reports in the study would have both the payment and cost data necessary to calculate a PCR for each hospital, leading to an analytic file of 3,341 hospitals with cost report data.

Using this smaller dataset of updated cost report data, we estimate that, on average, the OPPS payments to other hospitals furnishing services under the OPPS were approximately 88 percent of reasonable cost (weighted average PCR of 0.88). Therefore, after applying the 1.0 percentage point reduction, as required by section 16002(b) of the 21st Century Cures Act, we are finalizing a target PCR of 0.87. Table 10 shows the estimated percentage increase in OPPS payments to each cancer hospital for CY 2026, due to the cancer hospital payment adjustment policy. The actual, final amount of the CY 2026 cancer hospital payment adjustment for each cancer hospital will be determined at cost report settlement and will depend on each hospital's CY 2026 payments and costs from the settled CY 2026 cost report. We note that the requirements contained in section 1833(t)(18) of the Act do not affect the existing statutory provisions that provide for TOPs for cancer hospitals. The TOPs will be assessed, as usual, after all payments, including the cancer hospital payment adjustment, have been made for a cost reporting period.

G. Hospital Outpatient Outlier Payments

1. Background

The OPPS provides outlier payments to hospitals to help mitigate the financial risk associated with high-cost and complex procedures, where a very costly service could present a hospital with significant financial loss. As explained in the CY 2015 OPPS/ASC final rule with comment period (79 FR 66832 through 66834), we set our projected target for aggregate outlier payments at 1.0 percent of the estimated aggregate total payments under the OPPS for the prospective year. Outlier payments are provided on a service-by-service basis when the cost of a service exceeds the APC payment amount multiplier threshold (the APC payment amount multiplied by a certain amount) as well as the APC payment amount plus a fixed-dollar amount threshold (the APC payment plus a certain dollar amount). In CY 2025, the outlier threshold was met when the hospital's cost of furnishing a service exceeded 1.75 times the APC payment amount (the multiplier threshold) and exceeded the APC payment amount plus $7,175 (the fixed-dollar amount threshold) (89 FR 93980 through 93982). If the hospital's cost of furnishing a service exceeds both the multiplier threshold and the fixed-dollar threshold, the outlier payment is calculated as 50 percent of the amount by which the hospital's cost of furnishing the service exceeds 1.75 times the APC payment amount. Beginning with CY 2009 payments, outlier payments are subject to a reconciliation process similar to the IPPS outlier reconciliation process for cost reports, as discussed in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68594 through 68599).

It has been our policy to report the actual amount of outlier payments as a percent of total spending in the claims being used to model the OPPS. Our estimate of total outlier payments as a percent of total CY 2024 OPPS payments, using CY 2024 claims available for this final rule with comment period, is approximately 0.82 percent. Therefore, for CY 2024, we estimate that we did not meet the outlier target by 0.18 percent of total aggregated OPPS payments.

For the CY 2026 OPPS/ASC proposed rule, using CY 2024 claims data and CY 2025 payment rates, we estimated that the aggregate outlier payments for CY 2025 would be approximately 0.92 percent of the total CY 2025 OPPS payments (90 FR 33517). We provided estimated CY 2026 outlier payments for hospitals and CMHCs with claims included in the claims data that we used to model impacts in the Hospital-Specific Impacts—Provider-Specific Data file on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient*.

2. Outlier Calculation for CY 2026

For CY 2026, we proposed to continue our policy of estimating outlier payments to be 1.0 percent of the estimated aggregate total payments under the OPPS. We proposed that a portion of that 1.0 percent, an amount equal to less than 0.01 percent of outlier payments (or 0.0001 percent of total OPPS payments), would be allocated to CMHCs for partial hospitalization program (PHP) and intensive outpatient program (IOP) outlier payments. This is the amount of estimated outlier payments that would result from the proposed CMHC outlier threshold as a proportion of total estimated OPPS outlier payments. We proposed to continue our outlier policy that if a CMHC's cost for PHP and IOP services exceeds 3.40 times the APC payment rate, the outlier payment would be calculated as 50 percent of the amount

by which the cost exceeds 3.40 times the proposed APC payment rate.

For further discussion of CMHC outlier payments, we refer readers to section VIII.C. of this final rule with comment period.

To ensure that the estimated CY 2026 aggregate outlier payments would equal 1.0 percent of estimated aggregate total payments under the OPPS, we proposed that the hospital outlier threshold be set so that outlier payments would be triggered when a hospital's cost of furnishing a service exceeds 1.75 times the APC payment amount and exceeds the APC payment amount plus the fixed-dollar threshold.

We calculated the proposed fixed-dollar threshold using the standard methodology most recently used for CY 2025 (89 FR 93980 through 93982). For purposes of estimating outlier payments for CY 2026, we used the hospital-specific overall ancillary CCRs available in the April 2025 update to the Outpatient Provider-Specific File (OPSF). The OPSF contains provider-specific data, such as the most current CCRs, which are maintained by the MACs and used by the OPPS Pricer to pay claims. The claims that we generally use to model each OPPS update lag by 2 years.

To estimate the CY 2026 proposed hospital outlier payments (90 FR 33841), we inflated the charges on the CY 2024 claims using the same proposed charge inflation factor of 1.1118 that we used to estimate the IPPS fixed-loss cost threshold for the FY 2026 IPPS/LTCH PPS proposed rule (90 FR 18434 through 18436). We used an inflation factor of 1.05440 to estimate CY 2025 charges from the CY 2024 charges reported on CY 2024 claims before applying CY 2025 CCRs to estimate the percent of outliers paid in CY 2025. The proposed methodology for determining these charge inflation factors is discussed in the FY 2026 IPPS/LTCH PPS proposed rule (90 FR 18434). As we stated in the CY 2005 OPPS final rule with comment period (69 FR 65844 through 65846), we believed that the use of the same charge inflation factors is appropriate for the OPPS because, with the exception of the inpatient routine service cost centers, hospitals use the same ancillary and cost centers to capture costs and charges for inpatient and outpatient services.

As noted in the CY 2007 OPPS/ASC final rule with comment period (71 FR 68011), we were concerned that we could systematically overestimate the OPPS hospital outlier threshold if we did not apply a CCR inflation adjustment factor. Therefore, we proposed to apply the same CCR adjustment factor that we proposed to apply for the FY 2026 IPPS outlier calculation to the CCRs used to simulate the proposed CY 2026 OPPS outlier payments to determine the fixed-dollar threshold. Specifically, for CY 2026, we proposed to apply an adjustment factor of 0.970113 to the CCRs that were in the April 2025 OPSF to trend them forward from CY 2025 to CY 2026. The methodology for calculating the proposed CCR adjustment factor is discussed in the FY 2026 IPPS/LTCH PPS proposed rule (90 FR 18434 through 18435).

To model hospital outlier payments for the CY 2026 OPPS/ASC proposed rule, we applied the overall CCRs from the April 2025 OPSF after adjustment (using the proposed CCR inflation adjustment factor of 0.970113 to approximate CY 2026 CCRs) to charges on CY 2024 claims that were adjusted (using the proposed charge inflation factor of 1.1118 to approximate CY 2026 charges). We simulated aggregated CY 2024 hospital outlier payments using these costs for several different fixed-dollar thresholds, holding the 1.75 multiplier threshold constant and assuming that outlier payments would continue to be made at 50 percent of the amount by which the cost of furnishing the service would exceed 1.75 times the APC payment amount, until the total outlier payments equaled 1.0 percent of aggregated estimated total CY 2026 OPPS payments. We estimated that a proposed fixed-dollar threshold of $6,450 combined with the proposed multiplier threshold of 1.75 times the APC payment rate, would allocate 1.0 percent of aggregated total OPPS payments to outlier payments for CY 2026. For CMHCs, we proposed that, if a CMHC's cost for partial hospitalization or intensive outpatient services exceeds 3.40 times the APC payment rate, the outlier payment would be calculated as 50 percent of the amount by which the cost exceeds 3.40 times the APC payment rate.

Section 1833(t)(17)(A) of the Act, which applies to hospitals, as defined under section 1886(d)(1)(B) of the Act, requires that hospitals that fail to report data required for the quality measures selected by the Secretary, in the form and manner required by the Secretary under section 1833(t)(17)(B) of the Act, incur a 2.0 percentage point reduction to their OPD fee schedule increase factor; that is, the annual payment update factor. The application of a reduced OPD fee schedule increase factor results in reduced national unadjusted payment rates that would apply to certain outpatient items and services furnished by hospitals that are required to report outpatient quality data and that fail to meet the Hospital Outpatient Quality Reporting (OQR) Program requirements. For hospitals that fail to meet the Hospital OQR Program requirements, we proposed to continue the policy that we implemented in CY 2010 that the hospitals' costs would be compared to the reduced payments for purposes of outlier eligibility and payment calculation. For more information on the Hospital OQR Program, we refer readers to section XV. of this final rule with comment period.

We received one public comment in support of our proposal. After consideration of the public comment we received, we are finalizing our proposal, without modification, to continue to our policy of estimating outlier payments to be 1.0 percent of the estimated aggregate total payments under the OPPS and to use our established methodology to set the OPPS outlier fixed-dollar loss threshold for CY 2026.

3. Final Outlier Calculation for CY 2026

Consistent with historical practice, we used updated data for this final rule with comment period for outlier calculations. For CY 2026, we are applying the overall ancillary CCRs from the July 2025 OPSF file after adjustment (using the CCR adjustment factor of 0.956081 to approximate CY 2026 CCRs) to charges on CY 2024 claims that were adjusted using a charge inflation factor of 1.11313 to approximate CY 2026 charges. These are the same CCR adjustment and charge inflation factors that were used to set the IPPS fixed-dollar thresholds for the FY 2026 IPPS/LTCH PPS final rule (90 FR 37227). We simulated aggregated CY 2026 hospital outlier payments using these costs for several different fixed-dollar thresholds, holding the 1.75 multiple-threshold constant and assuming that outlier payments will continue to be made at 50 percent of the amount by which the cost of furnishing the service would exceed 1.75 times the APC payment amount, until the total outlier payment equaled 1.0 percent of aggregated estimated total CY 2026 OPPS payments. We estimate that a final fixed-dollar threshold of $6,225 combined with the multiple threshold of 1.75 times the APC payment rate, will allocate 1.0 percent of aggregated total OPPS payments to outlier payments.

For CMHCs, if a CMHC's cost for partial hospitalization or intensive outpatient services exceeds 3.40 times the APC payment rate, the outlier payment will be calculated as 50 percent of the amount by which the cost

exceeds the 3.40 times the APC payment rate.

H. Calculation of an Adjusted Medicare Payment From the National Unadjusted Medicare Payment

The national unadjusted payment rate is the payment rate for most APCs before accounting for the wage index adjustment or any applicable adjustments. The basic methodology for determining prospective payment rates for HOPD services under the OPPS is set forth in existing regulations at 42 CFR part 419, subparts C and D. For this final rule with comment period, the payment rate for most services and procedures for which payment is made under the OPPS is the product of the conversion factor calculated in accordance with section II.B. of this final rule with comment period and the relative payment weight described in section II.A. of this final rule with comment period. The national unadjusted payment rate for most APCs contained in Addendum A to this final rule with comment period (which is available on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient-pps/quarterly-addenda-updates* and for most HCPCS codes to which separate payment under the OPPS has been assigned in Addendum B to this final rule with comment period (which is available on the CMS website, see link above) is calculated by multiplying the final CY 2026 scaled weight for the APC by the CY 2026 conversion factor.

We note that section 1833(t)(17) of the Act, which applies to hospitals, as defined under section 1886(d)(1)(B) of the Act, requires that hospitals that fail to submit data required to be submitted on quality measures selected by the Secretary, in the form and manner and at a time specified by the Secretary, incur a reduction of 2.0 percentage points to their OPD fee schedule increase factor, that is, the annual payment update factor. The application of a reduced OPD fee schedule increase factor results in reduced national unadjusted payment rates that apply to certain outpatient items and services provided by hospitals that are required to report outpatient quality data and that fail to meet the Hospital OQR Program requirements. For further discussion of the payment reduction for hospitals that fail to meet the requirements of the Hospital OQR Program, we refer readers to section XIV. of this final rule with comment period.

Below we demonstrate the steps used to determine the APC payments that will be made in a CY under the OPPS to a hospital that fulfills the Hospital OQR Program requirements and to a hospital that fails to meet the Hospital OQR Program requirements for a service that has any of the following status indicator assignments: ''J1,'' ''J2,'' ''P,'' ''Q1,'' ''Q2,'' ''Q3,'' ''Q4,'' ''R,'' ''S,'' ''T,'' ''U,'' or ''V'' (as defined in Addendum D1 to this final rule with comment period, which is available via the internet on the CMS website), in a circumstance in which the multiple procedure discount does not apply, the procedure is not bilateral, and conditionally packaged services (status indicator of ''Q1'' and ''Q2'') qualify for separate payment. We note that, although blood and blood products with status indicator ''R'' and brachytherapy sources with status indicator ''U'' are not subject to wage adjustment, they are subject to reduced payments when a hospital fails to meet the Hospital OQR Program requirements.

Individual providers interested in calculating the payment amount that they would receive for a specific service from the national unadjusted payment rates presented in Addenda A and B to this final rule with comment period (which are available via the internet on the CMS website) should follow the formulas presented in the following steps. For purposes of the payment calculations below, we refer to the national unadjusted payment rate for hospitals that meet the requirements of the Hospital OQR Program as the ''full'' national unadjusted payment rate. We refer to the national unadjusted payment rate for hospitals that fail to meet the requirements of the Hospital OQR Program as the ''reduced'' national unadjusted payment rate. The reduced national unadjusted payment rate is calculated by multiplying the reporting ratio of 0.9805 times the ''full'' national unadjusted payment rate. The national unadjusted payment rate used in the calculations below is either the full national unadjusted payment rate or the reduced national unadjusted payment rate, depending on whether the hospital met its Hospital OQR Program requirements to receive the full CY 2025 OPPS fee schedule increase factor.

Step 1. Calculate 60 percent (the labor-related portion) of the national unadjusted payment rate. Since the initial implementation of the OPPS, we have used 60 percent to represent our estimate of that portion of costs attributable, on average, to labor. We refer readers to the April 7, 2000 OPPS final rule with comment period (65 FR 18496 through 18497) for a detailed discussion of how we derived this percentage. During our regression analysis for the payment adjustment for rural hospitals in the CY 2006 OPPS final rule with comment period (70 FR 68553), we confirmed that this labor-related share for hospital outpatient services is appropriate.

The formula below is a mathematical representation of Step 1 and identifies the labor-related portion of a specific payment rate for a specific service.

X is the labor-related portion of the national unadjusted payment rate.

$X = .60 *$ (national unadjusted payment rate).

Step 2. Determine the wage index area in which the hospital is located and identify the wage index level that applies to the specific hospital. The wage index values assigned to each area would reflect the geographic statistical areas (which are based upon OMB standards) to which hospitals are assigned for FY 2026 under the IPPS, reclassifications through the Medicare Geographic Classification Review Board (MGCRB), section 1886(d)(8)(B) ''Lugar'' hospitals, and reclassifications under section 1886(d)(8)(E) of the Act, as implemented in § 412.103 of the regulations. For CY 2026, we proposed to apply for the CY 2026 OPPS wage index any adjustments for the FY 2026 IPPS post-reclassified wage index, including, but not limited to, the rural floor adjustment and a wage index floor of 1.00 in frontier states, in accordance with section 10324 of the Affordable Care Act of 2010. For further discussion of the wage index we are applying for the CY 2026 OPPS, including the low wage index hospital policy, we refer readers to section II.C. of this final rule with comment period.

Step 3. Adjust the wage index of hospitals located in certain qualifying counties that have a relatively high percentage of hospital employees who reside in the county, but who work in a different county with a higher wage index, in accordance with section 505 of the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (Pub. L. 108–173). Addendum L to this final rule with comment period (which is available via the internet on the CMS website) contains the qualifying counties and the associated wage index increase developed for the final FY 2026 IPPS wage index, which are listed in Table 3 associated with the FY 2026 IPPS final rule and available via the internet on the CMS website at *https://www.cms.gov/medicare/payment/prospective-payment-systems/acute-inpatient-pps.* (Click on the link on the left side of the screen titled ''FY 2026 IPPS Final Rule Home Page'' and select ''FY 2026 Final Rule Tables.'') This step is to be followed only if the

hospital is not reclassified or redesignated under section 1886(d)(8) or section 1886(d)(10) of the Act.

Step 4. Multiply the applicable wage index determined under Steps 2 and 3 by the amount determined under Step 1 that represents the labor-related portion of the national unadjusted payment rate.

The formula below is a mathematical representation of Step 4 and adjusts the labor-related portion of the national unadjusted payment rate for the specific service by the wage index.

X_a *is the labor-related portion of the national unadjusted payment rate (wage adjusted).*

X_a = labor-portion of the national unadjusted payment rate * applicable wage index.

Step 5. Calculate 40 percent (the nonlabor-related portion) of the national unadjusted payment rate and add that amount to the resulting product of Step 4. The result is the wage index adjusted payment rate for the relevant wage index area.

The formula below is a mathematical representation of Step 5 and calculates the remaining portion of the national payment rate, the amount not attributable to labor, and the adjusted payment for the specific service.

Y is the nonlabor-related portion of the national unadjusted payment rate.

Y = 0.40 * (national unadjusted payment rate).

Step 6. If a provider is an SCH, as set forth in the regulations at § 412.92, or an EACH, which is considered to be an SCH under section 1886(d)(5)(D)(iii)(III) of the Act, and located in a rural area, as defined in § 412.64(b), or is treated as being located in a rural area under § 412.103, multiply the wage index adjusted payment rate by 1.071 to calculate the total payment.

The formula below is a mathematical representation of Step 6 and applies the rural adjustment for rural SCHs.

Adjusted Medicare Payment (SCH or EACH) = Adjusted Medicare Payment * 1.071.

Step 7. The adjusted payment rate is the sum of the wage adjusted labor-related portion of the national unadjusted payment rate and the nonlabor-related portion of the national unadjusted payment rate.

X_a *is the labor-related portion of the national unadjusted payment rate (wage adjusted).*

Y is the nonlabor-related portion of the national unadjusted payment rate.

Adjusted Medicare Payment = $X_a + Y$

We are providing examples below of the calculation of both the full and reduced national unadjusted payment rates that would apply to certain outpatient items and services performed by hospitals that meet and that fail to meet the Hospital OQR Program requirements, using the steps outlined previously. For purposes of this example, we are using a provider that is located in Brooklyn, New York that is assigned to CBSA 35614. This provider bills one service that is assigned to APC 5071 (Level 1 Excision/Biopsy/Incision and Drainage). The final CY 2026 full national unadjusted payment rate for APC 5071 is $723.47. The final reduced national adjusted payment rate for APC 5071 for a hospital that fails to meet the Hospital OQR Program requirements is $709.36. This reduced rate is calculated by multiplying the reporting ratio of 0.9805 by the full unadjusted payment rate for APC 5071.

Step 1. The labor-related portion of the final full national unadjusted payment is approximately $434.08 (0.60 * $723.47). The labor-related portion of the final reduced national adjusted payment is approximately $425.62 (0.60 * $709.36).

Step 2 & 3. The FY 2026 wage index for a provider located in CBSA 35614 in New York, which includes the adoption of the final IPPS 2026 wage index policies, is 1.3697.

Step 4. The wage adjusted labor-related portion of the final full national unadjusted payment is approximately $594.56 ($434.08 * 1.3697). The wage adjusted labor-related portion of the final reduced national adjusted payment is approximately $582.97 ($425.62 * 1.3697).

Step 5. The nonlabor-related portion of the final full national unadjusted payment is approximately $289.39 (0.40 * $723.47). The nonlabor-related portion of the final reduced national adjusted payment is approximately $283.74(0.40 * $709.36).

Step 6. For this example of a provider located in Brooklyn, New York, the rural adjustment for rural SCHs does not apply.

Step 7. The sum of the labor-related and nonlabor-related portions of the final full national unadjusted payment is approximately $883.95 ($594.56 + $289.39). The sum of the portions of the final reduced national adjusted payment is approximately $866.71 ($582.97 + $283.74) as shown in Table 11.

TABLE 11: FINAL FULL NATIONAL UNADJUSTED PAYMENT RATE AND FINAL REDUCED NATIONAL ADJUSTED PAYMENT RATE

Final Full national unadjusted payment rate	Final Reduced national adjusted payment rate
$883.95	$866.71

We did not receive any public comments on these steps under the methodology that we included in the CY 2026 OPPS/ASC proposed rule to determine the APC payments for CY 2026. Therefore, we are using the steps in the methodology specified above to demonstrate the calculation of the final CY 2026 OPPS payments using the same parameters.

I. Beneficiary Copayments

1. Background

Section 1833(t)(3)(B) of the Act requires the Secretary to set rules for determining the unadjusted copayment amounts to be paid by beneficiaries for covered OPD services. Section 1833(t)(8)(C)(ii) of the Act specifies that the Secretary must reduce the national unadjusted copayment amount for a covered OPD service (or group of such services) furnished in a year in a manner so that the effective copayment rate (determined on a national unadjusted basis) for that service in the year does not exceed a specified percentage. As specified in section 1833(t)(8)(C)(ii)(V) of the Act, the effective copayment rate for a covered OPD service paid under the OPPS in CY 2006, and in CYs thereafter, shall not exceed 40 percent of the APC payment rate.

Section 1833(t)(3)(B)(ii) of the Act provides that, for a covered OPD service (or group of such services) furnished in a year, the national unadjusted copayment amount cannot be less than 20 percent of the OPD fee schedule

amount. However, section 1833(t)(8)(C)(i) of the Act limits the amount of beneficiary copayment that may be collected for a procedure (including items such as drugs and biologicals) performed in a year to the amount of the inpatient hospital deductible for that year.

Section 4104 of the Affordable Care Act eliminated the Medicare Part B coinsurance for preventive services furnished on and after January 1, 2011, that meet certain requirements, including flexible sigmoidoscopies and screening colonoscopies, and waived the Part B deductible for screening colonoscopies that become diagnostic during the procedure. For a discussion of the changes made by the Affordable Care Act with regard to copayments for preventive services furnished on and after January 1, 2011, we refer readers to section XII.B. of the CY 2011 OPPS/ASC final rule with comment period (75 FR 72013).

Section 122 of the Consolidated Appropriations Act (CAA), 2021 (Pub. L. 116–260), Waiving Medicare Coinsurance for Certain Colorectal Cancer Screening Tests, amended section 1833(a) of the Act to offer a special coinsurance rule for screening flexible sigmoidoscopies and screening colonoscopies, regardless of the code that is billed for the establishment of a diagnosis as a result of the test, or for the removal of tissue or other matter or other procedure, that is furnished in connection with, as a result of, and in the same clinical encounter as the colorectal cancer screening test. We refer readers to section ''X.B. Changes to Beneficiary Coinsurance for Certain Colorectal Cancer Screening Tests'', of the CY 2022 OPPS/ASC final rule with comment period for the full discussion of this policy (86 FR 63740 through 63743). Under the regulation at 42 CFR 410.152(l)(5)(i)(B), the Medicare Part B payment percentage for colorectal cancer screening tests described in the regulation at § 410.37(j) that are furnished in CY 2023 through CY 2026 is 85 percent, with beneficiary coinsurance equal to 15 percent.

On August 16, 2022, the Inflation Reduction Act of 2022 (IRA) (Pub. L. 117–169) was signed into law. Section 11101(a) of the IRA amended section 1847A of the Act by adding a new subsection (i), which requires the payment of rebates into the Supplementary Medical Insurance Trust Fund for Part B rebatable drugs if the payment limit amount exceeds the inflation-adjusted payment amount, which is calculated as set forth in section 1847A(i)(3)(C) of the Act. The provisions of section 11101 of the IRA were initially implemented through program instruction, as permitted under section 1847A(c)(5)(C) of the Act. On February 9, 2023 and December 14, 2023, we issued initial [9] and revised [10] guidance, respectively, implementing the Medicare Part B Inflation Rebate Program, including the computation of inflation-adjusted beneficiary coinsurance under section 1847A(i)(5) of the Act and amounts paid under section 1833(a)(1)(EE) of the Act.[11] For additional information regarding implementation of section 11101 of the IRA, please see the inflation rebates resources page at *https://www.cms.gov/inflation-reduction-act-and-medicare/inflation-rebates-medicare*.

Section 11101(b) of the IRA amended sections 1833(i) and 1833(t)(8) of the Act by adding a new paragraph (9) and subparagraph (F), respectively. Section 1833(i)(9) of the Act requires under the ASC payment system that, in the case of a Part B rebatable drug for which payment is not packaged into a payment for a service, in lieu of calculation of coinsurance that would otherwise apply under the ASC payment system, the provisions of section 1847A(i)(5) of the Act shall, as determined appropriate by the Secretary, apply for calculation of beneficiary coinsurance in the same manner as the provisions of section 1847A(i)(5) of the Act apply under that section. Similarly, section 1833(t)(8)(F) of the Act requires under the OPPS that in the case of a Part B rebatable drug (except for a drug that has no copayment applied under subparagraph (E) of such section or for which payment is packaged into the payment for a covered OPD service or group of services), in lieu of the calculation of the copayment amount that would otherwise apply under the OPPS, the provisions of section 1847A(i)(5) of the Act shall, as determined appropriate by the Secretary, apply in the same manner as the provisions of section 1847A(i)(5) of the Act apply under that section. Section 1847A(i)(5) of the Act requires that for Part B rebatable drugs, as defined in section 1847A(i)(2)(A) of the Act, furnished on or after April 1, 2023, in quarters in which the payment amount described in section 1847A(i)(3)(A)(ii)(I) of the Act (or, in the case of selected drugs described under section 1192(c) of the Act, the payment amount described in section 1847A(b)(1)(B) of the Act), exceeds the inflation-adjusted payment amount determined in accordance with section 1847A(i)(3)(C) of the Act, the coinsurance will be 20 percent of the inflation-adjusted payment amount for such quarter (hereafter, the inflation-adjusted coinsurance amount). This inflation-adjusted coinsurance amount is applied as a percent, as determined by the Secretary, to the payment amount that would otherwise apply for such calendar quarter in accordance with section 1847A(b)(1)(B) or (C) of the Act, as applicable, including in the case of a selected drug described under section 1192(c) of the Act.

Paragraph (9) of section 1833(i) of the Act and subparagraph (F) of section 1833(t)(8) of the Act, as added by section 11101(b) of the IRA, also provide that in lieu of the amounts of payment otherwise applicable under the ASC payment system and the OPPS, the provisions of paragraph (1)(EE) of subsection (a) of section 1833 of the Act shall apply, as determined appropriate by the Secretary. Section 11101(b) of the IRA amended section 1833(a)(1) of the Act by adding a new subparagraph (EE), which requires that if the payment amount under section 1847A(i)(3)(A)(ii)(I) of the Act or, in the case of a selected drug described under section 1192(c) of the Act, the payment amount described in section 1847A(b)(1)(B) of the Act, for that drug exceeds the inflation-adjusted payment amount for a Part B rebatable drug, the Part B payment amount would, subject to the Part B deductible and sequestration, equal the difference between such payment amount and the inflation-adjusted coinsurance amount. Consistent with the policy adopted in section 40 of the revised Medicare Part B Drug Inflation Rebate Guidance, the calculation to determine the applicable beneficiary coinsurance amount would not be adjusted for sequestration. CMS codified the Medicare payment for Part B rebatable drugs in the CY 2024 PFS final rule by adding new paragraph (m) to § 410.152 (88 FR 79043).

In the CY 2024 OPPS/ASC final rule with comment period (88 FR 81594), we codified the OPPS program payment and cost as required by section 1833(t)(8)(F) of the Act by adding a new paragraph (e) to § 419.41, which cross-references the regulations adopted in the CY 2024 PFS final rule (§§ 410.152(m) and 489.30(b)(6)). We

[9] *https://www.cms.gov/files/document/medicare-part-b-inflation-rebate-program-initial-guidance.pdf*.

[10] *https://www.cms.gov/files/document/medicare-part-b-inflation-rebate-program-revised-guidance.pdf*.

[11] In addition, beginning with the April 2023 ASP Drug Pricing file, the file includes the coinsurance percentage for each drug and specifies ''inflation-adjusted coinsurance'' in the ''Notes'' column if the coinsurance for a drug is less than 20 percent of the Medicare Part B payment amount. Drug pricing files are available at *https://www.cms.gov/medicare/medicare-fee-for-service-part-b-drugs/mcrpartbdrugavgsalesprice*.

also amended the regulation text to reflect our longstanding policies for calculating the Medicare program payment and cost sharing amounts for separately payable drugs and biologicals by adding a new paragraph (d) to § 419.41. Similarly, we codified the ASC cost sharing amounts for Part B rebatable drugs as required by section 1833(i)(9) of the Act by revising § 416.172(d) to include a cross-reference to 42 CFR 489.30(b)(6), which codified the cost sharing amounts for Part B rebatable drugs with prices increasing at a rate faster than inflation.

In the CY 2025 PFS final rule (89 FR 98228 through 98275), we codified regulations implementing section 11101 of the IRA in newly added 42 CFR part 427, chapter IV, including new provisions at §§ 427.200 and 427.201 to codify the policies regarding the computation of the inflation-adjusted beneficiary coinsurance, defined in § 427.200, for Part B rebatable drugs as required by section 1847A(i)(5) of the Act. As finalized, § 427.201(a) establishes that CMS will use the methodology established in such section to calculate the inflation-adjusted beneficiary coinsurance and associated adjusted Medicare payment percentage and incorporates references to the existing provisions at §§ 410.152(m), 419.41(e), and 489.30(b)(6). Section 427.201(c) provides that any category of products that is excluded from the identification of Part B rebatable drugs at § 427.101(b) is not subject to the inflation-adjusted beneficiary coinsurance. Examples of these excluded products include separately payable radiopharmaceuticals, skin substitute products, and qualifying biosimilar biological products.

Section 427.201(b) sets forth the calculation of the inflation-adjusted beneficiary coinsurance. We will compare the payment amount in paragraph (b)(3) of such section to the inflation-adjusted payment amount for an applicable calendar quarter; if the payment amount exceeds the inflation-adjusted payment amount, the inflation-adjusted beneficiary coinsurance is calculated by multiplying the inflation-adjusted payment amount by 0.20. Section 427.201(b)(3) specifies that CMS will use the published payment amount in quarterly pricing files [12] [13] [14] to determine if a Part B rebatable drug should have an adjusted beneficiary coinsurance. If so, such adjusted beneficiary coinsurance shall be equal to 20 percent of the inflation-adjusted payment amount as described in section 1847A(i)(3)(C) of the Act for a calendar quarter. This approach deviates from the rebate calculation approach set forth in § 427.302, which relies on the specified amount defined at § 427.20 even when the specified amount and the published payment amount in quarterly pricing files differ.

We note that the cost sharing amounts of rebatable drugs paid under the OPPS published in the quarterly Addendum A and B updates reflect the inflation-adjusted coinsurance applied as a percent of the payment amount that would otherwise apply in accordance with section 1847A(b)(1)(B) or (C) of the Act, as determined by the Secretary pursuant to 1847A(i)(5) of the Act using the methodology in § 427.201. As we explained in the CY 2025 PFS final rule (89 FR 98237), this policy is intended to hold beneficiaries harmless in situations where the payment amount is calculated differently from the specified amount, and we believe this approach is consistent with the statutory language and appropriately reflects the differences in the statutory text of section 1847A(i)(5) of the Act, which sets forth the payment amount that is used to determine whether coinsurance should be adjusted, and section 1847A(i)(3)(A) of the Act, which sets forth the ''specified amount'' used to determine rebate amounts. We refer readers to the full discussion at 89 FR 98237 and 98238 for additional details.

2. OPPS Copayment Policy

For CY 2026, we proposed to determine copayment amounts for new and revised APCs using the same methodology that we implemented beginning in CY 2004. We refer readers to the November 7, 2003 OPPS final rule with comment period for a discussion of that methodology (68 FR 63458). In addition, we proposed to use the same standard rounding principles that we have historically used in instances where the application of our standard copayment methodology would result in a copayment amount that is less than 20 percent and cannot be rounded, under standard rounding principles, to 20 percent. We refer readers to the CY 2008 OPPS/ASC final rule with comment period (72 FR 66687) in which we discuss our rationale for applying these rounding principles. The final national unadjusted copayment amounts for services payable under the OPPS that would be effective January 1, 2026, are included in Addenda A and B to this final rule with comment period (which are available via the internet on the CMS website).

As discussed in section XIV.E. of this final rule with comment period, for CY 2026, the Medicare beneficiary's minimum unadjusted copayment and national unadjusted copayment for a service to which a reduced national unadjusted payment rate applies will equal the product of the reporting ratio and the national unadjusted copayment, or the product of the reporting ratio and the minimum unadjusted copayment, respectively, for the service.

We note that OPPS copayments may increase or decrease each year based on changes in the calculated APC payment rates, due to updated cost report and claims data, and any changes to the OPPS cost modeling process. However, as described in the CY 2004 OPPS final rule with comment period, the development of the copayment methodology generally moves beneficiary copayments closer to 20 percent of OPPS APC payments (68 FR 63458 through 63459).

In the CY 2004 OPPS final rule with comment period (68 FR 63459), we adopted a new methodology to calculate unadjusted copayment amounts in situations including reorganizing APCs, and we finalized the following rules to determine copayment amounts in CY 2004 and subsequent years.

- When an APC group consists solely of HCPCS codes that were not paid under the OPPS the prior year because they were packaged or excluded or are new codes, the unadjusted copayment amount would be 20 percent of the APC payment rate.
- If a new APC that did not exist during the prior year is created and consists of HCPCS codes previously assigned to other APCs, the copayment amount is calculated as the product of the APC payment rate and the lowest coinsurance percentage of the codes comprising the new APC.
- If no codes are added to or removed from an APC and, after recalibration of its relative payment weight, the new payment rate is equal to or *greater than* the prior year's rate, the copayment amount remains constant (unless the resulting coinsurance percentage is less than 20 percent).
- If no codes are added to or removed from an APC and, after recalibration of its relative payment weight, the new payment rate is *less than* the prior year's rate, the copayment amount is calculated as the product of the new payment rate and the prior year's coinsurance percentage.
- If HCPCS codes are added to or deleted from an APC and, after

[12] See: *https://www.cms.gov/medicare/payment/part-b-drugs/asp-pricing-files.*

[13] See: *https://www.cms.gov/medicare/payment/prospective-payment-systems/hospital-outpatient/addendum-a-b-updates.*

[14] See: *https://www.cms.gov/medicare/payment/prospective-payment-systems/ambulatory-surgical-center-asc/asc-payment-rates-addenda.*

recalibrating its relative payment weight, holding its unadjusted copayment amount constant results in a decrease in the coinsurance percentage for the reconfigured APC, the copayment amount would not change (unless retaining the copayment amount would result in a coinsurance rate less than 20 percent).

- If HCPCS codes are added to an APC and, after recalibrating its relative payment weight, holding its unadjusted copayment amount constant results in an increase in the coinsurance percentage for the reconfigured APC, the copayment amount would be calculated as the product of the payment rate of the reconfigured APC and the lowest coinsurance percentage of the codes being added to the reconfigured APC.

We noted in the CY 2004 OPPS final rule with comment period that we would seek to lower the copayment percentage for a service in an APC from the prior year if the copayment percentage was greater than 20 percent. We noted that this principle was consistent with section 1833(t)(8)(C)(ii) of the Act, which accelerates the reduction in the national unadjusted coinsurance rate so that beneficiary liability will eventually equal 20 percent of the OPPS payment rate for all OPPS services to which a copayment applies, and with section 1833(t)(3)(B) of the Act, which achieves a 20 percent copayment percentage when fully phased in and gives the Secretary the authority to set rules for determining copayment amounts for new services. We further noted that the use of this methodology would, in general, reduce the beneficiary coinsurance rate and copayment amount for APCs for which the payment rate changes as the result of the reconfiguration of APCs and/or recalibration of relative payment weights (68 FR 63459).

We did not receive any public comments on our proposal and we are finalizing our proposal to determine copayment amounts for new and revised APCs using the same methodology that we implemented beginning in CY 2004. The finalized national unadjusted copayment amounts for services payable under the OPPS that will be effective January 1, 2026, are included in Addenda A and B to the CY 2026 OPPS/ASC final rule (which are available on the CMS website).

3. Calculation of an Adjusted Copayment Amount for an APC Group

Individuals interested in calculating the national copayment liability for a Medicare beneficiary for a given service provided by a hospital that met or failed to meet its Hospital OQR Program requirements should follow the formulas presented in the following steps.

Step 1. Calculate the beneficiary payment percentage for the APC by dividing the APC's national unadjusted copayment by its proposed payment rate. For example, using APC 5071, $144.69 is 20 percent of the full national unadjusted payment rate of $723.47. For APCs with only a minimum unadjusted copayment in Addenda A and B to this final rule with comment period (which are available via the internet on the CMS website), the beneficiary payment percentage is 20 percent.

The formula below is a mathematical representation of Step 1 and calculates the national copayment as a percentage of national payment for a given service.

B is the beneficiary payment percentage.

B = National unadjusted copayment for APC/national unadjusted payment rate for APC.

Step 2. Calculate the appropriate wage-adjusted payment rate for the APC for the provider in question, as indicated in Steps 2 through 4 under section II.H. of this final rule with comment period. Calculate the rural adjustment for eligible providers, as indicated in Step 6 under section II.H. of this final rule with comment period.

Step 3. Multiply the percentage calculated in Step 1 by the payment rate calculated in Step 2. The result is the wage-adjusted copayment amount for the APC.

The formula below is a mathematical representation of Step 3 and applies the beneficiary payment percentage to the adjusted payment rate for a service calculated under section II.H. of this final rule with comment period, with and without the rural adjustment, to calculate the adjusted beneficiary copayment for a given service.

Wage-adjusted copayment amount for the APC = Adjusted Medicare Payment * *B.*

Wage-adjusted copayment amount for the APC (SCH or EACH) = (Adjusted Medicare Payment * 1.071) * *B.*

Step 4. For a hospital that failed to meet its Hospital OQR Program requirements, multiply the copayment calculated in Step 3 by the reporting ratio of 0.9805.

The unadjusted copayments for services payable under the OPPS that would be effective January 1, 2026, are shown in Addenda A and B to this final rule with comment period (which are available via the CMS website). We note that the final national unadjusted payment rates and copayment rates shown in Addenda A and B to this final rule with comment period reflect the CY 2026 OPD fee schedule increase factor discussed in section II.B. of this final rule with comment period.

In addition, as noted earlier, section 1833(t)(8)(C)(i) of the Act limits the amount of beneficiary copayment that may be collected for a procedure performed in a year to the amount of the inpatient hospital deductible for that year.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters requested CMS reconsider the coinsurance policy for diagnostic radiopharmaceuticals on pass-through status, that are above the radiopharmaceutical packaging threshold. The commenters disagreed that these radiopharmaceuticals are no longer considered policy-packaged under § 419.2(b)(15) and instead, treated like separately payable drugs assigned to an APC, and subject to a coinsurance. The commenters believe the coinsurance on diagnostic radiopharmaceuticals on pass-through status will be too financially burdensome for beneficiaries and undermines the intent of the statute and the advantages of having pass-through status. The commenters stated if both pass-through and non-pass-through diagnostic radiopharmaceuticals are subject to coinsurance, the commenters believe the distinction between these categories become meaningless. The commenters request CMS to clarify how the current policy and the cost-sharing calculations for diagnostic radiopharmaceuticals meets the intent of the statute.

Response: We disagree with the commenter's interpretation that these diagnostic radiopharmaceuticals would remain policy-packaged under 42 CFR 419.2(b)(15) after we implemented the CY 2025 diagnostic radiopharmaceuticals separate payment policy (89 FR 93948). We consider diagnostic radiopharmaceuticals to be drugs for purposes of pass-through payment (89 FR 94226). We note the copayment for pass-through drugs depends on their OPPS payment status absent pass-through status. For example, if a drug is policy-packaged, the pass-through payment amount is equal to a payment rate calculated using the ASP methodology (89 FR 94226). In accordance with section 1833(t)(8) of the Act, there is no copayment on the pass-through payment amount. Therefore, policy packaged drugs have a zero-dollar copayment amount when granted OPPS drug pass-through status.

However, for those drugs that do not fall into the category of policy packaged drugs, those drugs are separately payable drugs in the OPPS. The pass-through amount is the difference between the amount authorized under section 1842(o) of the Act, which is generally ASP plus 6 percent, and the portion of the otherwise applicable OPD fee schedule, which is also generally ASP plus 6 percent, is $0 (89 FR 94225 through 94226). We reiterate that the copayment for pass-through drugs depends on their OPPS payment status absent pass-through status. Therefore, the copay amount, absent pass-through status, under the OPD fee are still subject to the co-insurance established by section 1833(t)(3)(B) of the Act and § 419.41(d) for separately payable drugs. We refer readers to the CY 2026 OPPS/ASC proposed rule for further discussion on pass-through payment for drugs, biologicals, and radiopharmaceuticals (90 FR 33614).

We also note that the co-insurance for a separately payable drug under the OPPS shall not exceed the amount of inpatient hospital deductible for that year.

Comment: One commenter suggested beneficiaries should not be responsible for drug pricing increases and that CMS should limit or eliminate cost-sharing for beneficiaries, citing the unintended consequences and negative effects on access to health care and health outcomes (such as reduced use of medically necessary services), and increased use of emergency rooms.

Response: We thank the commenter for the input. We note that the beneficiary copayment is established by section 1833(t)(3)(B) of the Act and § 419.41(d). Section 1833(t)(8)(F) of the Act provides for an adjustment to the beneficiary coinsurance for Part B drugs and biologicals that are not packaged into payment for an OPD service with prices that have increased faster than the rate of inflation beginning April 1, 2023. In the CY 2024 OPPS/ASC final rule with comment period and the CY 2024 PFS final rule, we codified this inflation-adjusted coinsurance amount at §§ 419.41(e), 410.152(m), and 489.30(b)(6), respectively. For these drugs and biologicals, the beneficiary coinsurance is 20 percent of the inflation-adjusted payment amount, which is less than what the beneficiary would pay in coinsurance otherwise. Therefore, beneficiaries are insulated from coinsurance amounts calculated based on drug prices that outpace inflation. More information about the beneficiary coinsurance adjustment and the Medicare Part B Inflation Rebate Program is available at *https://www.cms.gov/inflation-reduction-act-and-medicare/inflation-rebates-medicare*.

III. OPPS Ambulatory Payment Classification (APC) Group Policies

A. OPPS Treatment of New and Revised HCPCS Codes

Payments for OPPS procedures, services, and items are generally based on medical billing codes, specifically, Healthcare Common Procedure Coding System (HCPCS) codes, that are reported on hospital outpatient department (HOPD) claims. HCPCS codes are used to report surgical procedures, medical services, items, and supplies under the hospital OPPS. The HCPCS is divided into two principal subsystems, referred to as Level I and Level II of the HCPCS. Level I is comprised of CPT (Current Procedural Terminology) codes, a numeric and alphanumeric coding system that is established and maintained by the American Medical Association (AMA), and consists of Category I, II, III, MAAA, and PLA CPT codes. Level II, which is established and maintained by CMS, is a standardized coding system that is used primarily to identify products, supplies, and services not included in the CPT codes. Together, Level I and II HCPCS codes are used to report procedures, services, items, and supplies under the OPPS payment system. Specifically, we recognize the following codes on OPPS claims:

- Category I CPT codes, which describe surgical procedures, diagnostic and therapeutic services, and vaccine codes;
- Category III CPT codes, which describe new and emerging technologies, services, and procedures;
- MAAA CPT codes, which describe laboratory multianalyte assays with algorithmic analyses (MAA);
- PLA CPT codes, which describe proprietary laboratory analyses (PLA) services; and
- Level II HCPCS codes (also known as alpha-numeric codes), which are used primarily to identify drugs, devices, supplies, temporary procedures, and services not described by CPT codes.

The codes are updated and changed throughout the year. CPT and Level II HCPCS code changes that affect the OPPS are published through the annual rulemaking cycle and through the OPPS quarterly update Change Requests (CRs). Generally, these code changes are effective January 1, April 1, July 1, or October 1. CPT code changes are released by the AMA (via their website) while Level II HCPCS code changes are released to the public via the CMS HCPCS website. CMS recognizes the release of new CPT and Level II HCPCS codes outside of the formal rulemaking process via OPPS quarterly update CRs. Based on our review, we assign the new codes to interim status indicators (SIs) and APCs. These interim assignments are finalized in the OPPS/ASC final rules. This quarterly process offers hospitals access to codes that more accurately describe the items or services furnished and provides payment for these items or services in a timelier manner than if we waited for the annual rulemaking process. We solicit public comments on the new CPT and Level II HCPCS codes, status indicators, and APC assignments through our annual rulemaking process.

We note that, under the OPPS, the APC assignment determines the payment rate for an item, procedure, or service. The items, procedures, or services not exclusively paid separately under the hospital OPPS are assigned to appropriate status indicators. Certain payment status indicators provide separate payment while other payment status indicators do not. In section XI. ''CY 2026 Payment Status and Comment Indicators'' of this final rule with comment period, we discuss the various status indicators and comment indicators used under the OPPS. We also provide a complete list of the status indicators and their definitions in Addendum D1 to this final rule with comment period.

1. April 2025 HCPCS Codes Proposed Rule Comment Solicitation

For the April 2025 update, 104 new HCPCS codes were established and made effective on April 1, 2025. Through the April 2025 OPPS quarterly update CR (Transmittal 13135, Change Request 13993, dated March 20, 2025), we recognized several new HCPCS codes for payment under the OPPS. We solicited public comments on the proposed APC and status indicator assignments for the codes listed in Table 9 (New HCPCS Codes Effective April 1, 2025) of the CY 2026 OPPS/ASC proposed rule (90 FR 33525 through 33528), which are also displayed in Table 12.

We received some public comments on the proposed OPPS APC and SI assignments for the new Level II HCPCS codes that were effective on April 1, 2025. The comments and our responses are addressed in the applicable sections of this final rule with comment period, which include, but are not limited to sections III.C. (New Technology APCs); III.E. (OPPS APC-Specific Policies); and IV. (OPPS Payment for Devices). For

those April 2025 codes for which we received no comments, we are finalizing the proposed APC and status indicator assignments as proposed. In addition, in prior years we included the final OPPS status indicators and APC assignments in the coding preamble tables, however, because the same information can be found in Addendum B, we no longer include them in Table 12. Therefore, readers are advised to refer to the OPPS Addendum B for the final OPPS status indicators, APC assignments, and payment rates for all codes reportable under the hospital OPPS. These new codes that were effective April 1, 2025, were assigned to comment indicator ''NP'' in Addendum B to the CY 2026 OPPS/APC proposed rule to indicate that the codes are assigned to an interim APC assignment and comments would be accepted on their interim APC assignments. The complete list of status indicators and definitions used under the OPPS can be found in Addendum D1 to this final rule with comment period, while the complete list of comment indicators and definitions can be found in Addendum D2 to this final rule with comment period. We note that OPPS Addendum B (OPPS payment file by HCPCS code), Addendum D1 (OPPS Status Indicators), and Addendum D2 (OPPS Comment Indicators) are available via the internet on the CMS website.

BILLING CODE 4120–01–P

TABLE 12: NEW HCPCS CODES EFFECTIVE APRIL 1, 2025

April 2025 HCPCS Code	CY 2026 HCPCS Code	CY 2026 Long Descriptor
A2030	A2030	Miro3d fibers, per milligram
A2031	A2031	Mirodry wound matrix, per square centimeter
A2032	A2032	Myriad matrix, per square centimeter
A2033	A2033	Myriad morcells, 4 milligrams
A2034	A2034	Foundation drs solo, per square centimeter
A2035	A2035	Corplex p or theracor p or allacor p, per milligram
A6515	A6515	Gradient compression wrap with adjustable straps, full leg, each, custom
A6516	A6516	Gradient compression wrap with adjustable straps, foot, each, custom
A6517	A6517	Gradient compression wrap with adjustable straps, below knee, each, custom
A6518	A6518	Gradient compression wrap with adjustable straps, arm, each, custom
A6519	A6519	Gradient compression garment, not otherwise specified, for nighttime use, each
A6611	A6611	Gradient compression wrap with adjustable straps, above knee, each, custom
A9154	A9154	Artificial saliva, 1 ml
A9611	A9611	Flurpiridaz f 18, diagnostic, 1 millicurie
C8004	C8004	Simulation angiogram with use of a pressure-generating catheter (e.g., one-way valve, intermittently occluding), inclusive of all radiological supervision and interpretation, intraprocedural roadmapping, and imaging guidance necessary to complete the angiogram, for subsequent therapeutic radioembolization of tumors
C8005	C8005	Bronchoscopy, rigid or flexible, non-thermal transbronchial ablation of lesion(s) by pulsed electric field (PEF) energy, including fluoroscopic and/or ultrasound guidance, when performed, with computed tomography acquisition(s) and 3D rendering, computer-assisted, image-guided navigation, and endobronchial ultrasound (EBUS) guided transtracheal and/or transbronchial sampling (e.g., aspiration[s]/biopsy[ies]) of all mediastinal and/or hilar lymph node stations or structures, and therapeutic intervention(s)
C9300	C9300	Injection, indigotindisulfonate sodium, 1 mg
C9301	C9301	Obecabtagene autoleucel, up to 400 million cd19 car-positive viable t cells, including leukapheresis and dose preparation procedures, per therapeutic dose
C9302	C9302	Injection, zanidatamab-hrii, 2 mg
C9303	C9303	Injection, zolbetuximab-clzb, 1mg
C9304	C9304	Injection, marstacimab-hncq, subcutaneous, 0.5 mg
E0201	E0201	Penile contracture device, manual, greater than 3 lbs traction force
E1022	E1022	Wheelchair transportation securement system, any type includes all components and accessories
E1023	E1023	Wheelchair transit securement system, includes all components and accessories
E1032	E1032	Wheelchair accessory, manual swingaway, retractable or removable mounting hardware used with joystick or other drive control interface
E1033	E1033	Wheelchair accessory, manual swingaway, retractable or removable mounting hardware for headrest, cushioned, any type
E1034	E1034	Wheelchair accessory, manual swingaway, retractable or removable mounting hardware for lateral trunk or hip support, any type
E1832	E1832	Static progressive stretch finger device, extension and/or flexion, with or without range of motion adjustment, includes all components and accessories
G0183	G0183	Quantitative software measurements of cardiac volume, cardiac chambers volumes and left ventricular wall mass derived from CT scan(s) data of the chest/heart (with or without contrast)
G0566	G0566	3D radiodensity-value bone imaging, algorithm derived, from previous magnetic resonance examination of the same anatomy
G0567	G0567	Infectious agent detection by nucleic acid (DNA or RNA); hepatitis C, screening, amplified probe technique
J0281	J0281	Injection, aminocaproic acid, 1 gram
J1072	J1072	Injection, testosterone cypionate (azmiro), 1 mg
J1271	J1271	Injection, doxycycline hyclate, 1 mg
J1299	J1299	Injection, eculizumab, 2 mg

April 2025 HCPCS Code	CY 2026 HCPCS Code	CY 2026 Long Descriptor
J1308	J1308	Injection, famotidine, 0.25 mg
J1808	J1808	Injection, folic acid, 0.1 mg
J1938	J1938	Injection, furosemide, 1 mg
J2351	J2351	Injection, ocrelizumab, 1 mg and hyaluronidase-ocsq
J2428	J2428	Injection, paliperidone palmitate extended release (erzofri), 1 mg
J2804	J2804	Injection, rifampin, 1 mg
J2865	J2865	Injection, sulfamethoxazole 5 mg and trimethoprim 1 mg
J7521	J7521	Tacrolimus, granules, oral suspension, 0.1 mg
J9024	J9024	Injection, atezolizumab, 5 mg and hyaluronidase-tqjs
J9038	J9038	Injection, axatilimab-csfr, 0.1 mg
J9054	J9054	Injection, bortezomib (boruzu), 0.1 mg
J9161	J9161	Injection, denileukin diftitox-cxdl, 1 mcg
L0720	L0720	Cervical-thoracic-lumbar-sacral-orthoses (ctlso), anterior-posterior-lateral control, prefabricated item that has been trimmed, bent, molded, assembled, or otherwise customized to fit a specific patient by an individual with expertise
L1933	L1933	Ankle foot orthosis, rigid anterior tibial section, total carbon fiber or equal material, prefabricated, off-the-shelf
L1952	L1952	Ankle foot orthosis, spiral, (institute of rehabilitative medicine type), plastic or other material, prefabricated, off-the-shelf
L5827	L5827	Endoskeletal knee-shin system, single axis, electromechanical swing and stance phase control, with or without shock absorption and stance extension damping
L6028	L6028	Partial hand including fingers, flexible or non-flexible interface, endoskeletal system, molded to patient model, for use without external power, not including inserts described by L6692
L6029	L6029	Upper extremity addition, test socket/interface, partial hand including fingers
L6030	L6030	Upper extremity addition, external frame, partial hand including fingers
L6031	L6031	Replacement socket/interface, partial hand including fingers, molded to patient model, for use with or without external power
L6032	L6032	Addition to upper extremity prosthesis, partial hand including fingers, ultralight material (titanium, carbon fiber or equal)
L6033	L6033	Addition to upper extremity prosthesis, partial hand including fingers, acrylic material
L6037	L6037	Immediate post-surgical or early fitting, application of initial rigid dressing, including fitting alignment and suspension of components, and one cast change, partial hand including fingers
L6700	L6700	Upper extremity addition, external powered feature, myoelectronic control module, additional emg inputs, pattern-recognition decoding intent movement
L7406	L7406	Addition to upper extremity, user adjustable, mechanical, residual limb volume management system
Q2057	Q2057	Afamitresgene autoleucel, including leukapheresis and dose preparation procedures, per therapeutic dose
Q4354	Q4354	Palingen dual-layer membrane, per square centimeter
Q4355	Q4355	Abiomend xplus membrane and abiomend xplus hydromembrane, per square centimeter
Q4356	Q4356	Abiomend membrane and abiomend hydromembrane, per square centimeter
Q4357	Q4357	Xwrap plus, per square centimeter
Q4358	Q4358	Xwrap dual, per square centimeter
Q4359	Q4359	Choriply, per square centimeter
Q4360	Q4360	Amchoplast fd, per square centimeter
Q4361	Q4361	Epixpress, per square centimeter
Q4362	Q4362	Cygnus disk, per square centimeter
Q4363	Q4363	Amnio burgeon membrane and hydromembrane, per square centimeter
Q4364	Q4364	Amnio burgeon xplus membrane and xplus hydromembrane, per square centimeter
Q4365	Q4365	Amnio burgeon dual-layer membrane, per square centimeter
Q4366	Q4366	Dual layer amnio burgeon x-membrane, per square centimeter

April 2025 HCPCS Code	CY 2026 HCPCS Code	CY 2026 Long Descriptor
Q4367	Q4367	Amniocore sl, per square centimeter
Q5147	Q5147	Injection, aflibercept-ayyh (pavblu), biosimilar, 1 mg
Q5148	Q5148	Injection, filgrastim-txid (nypozi), biosimilar, 1 microgram
Q5149	Q5149	Injection, aflibercept-abzv (enzeevu), biosimilar, 1 mg
Q5150	Q5150	Injection, aflibercept-mrbb (ahzantive), biosimilar, 1 mg
Q5151	Q5151	Injection, eculizumab-aagh (epysqli), biosimilar, 2 mg
Q5152	Q5152	Injection, eculizumab-aeeb (bkemv), biosimilar, 2 mg
Q9999	Q9999	Injection, ustekinumab-aauz (otulfi), biosimilar, 1 mg
S4024	S4024	Air polymer-type a intrauterine foam, per study dose
0531U	0531U	Infectious disease (acid-fast bacteria and invasive fungi), DNA (673 organisms), next-generation sequencing, plasma
0532U	0532U	Rare diseases (constitutional disease/hereditary disorders), rapid whole genome and mitochondrial DNA sequencing for single-nucleotide variants, insertions/deletions, copy number variations, peripheral blood, buffy coat, saliva, buccal or tissue sample, results reported as positive or negative
0533U	0533U	Drug metabolism (adverse drug reactions and drug response), genotyping of 16 genes (ie, ABCG2, CYP2B6, CYP2C9, CYP2C19, CYP2C, CYP2D6, CYP3A5, CYP4F2, DPYD, G6PD, GGCX, NUDT15, SLCO1B1, TPMT, UGT1A1, VKORC1), reported as metabolizer status and transporter function
0534U	0534U	Oncology (prostate), microRNA, single-nucleotide polymorphisms (SNPs) analysis by RT-PCR of 32 variants, using buccal swab, algorithm reported as a risk score
0535U	0535U	Perfluoroalkyl substances (PFAS) (eg, perfluorooctanoic acid, perfluorooctane sulfonic acid), by liquid chromatography with tandem mass spectrometry (LC-MS/MS), plasma or serum, quantitative
0536U	0536U	Red blood cell antigen (fetal RhD), PCR analysis of exon 4 of RHD gene and housekeeping control gene GAPDH from whole blood in pregnant individuals at 10+ weeks gestation known to be RhD negative, reported as fetal RhD status
0537U	0537U	Oncology (colorectal cancer), analysis of cell-free DNA for epigenomic patterns, next-generation sequencing, >2500 differentially methylated regions (DMRs), plasma, algorithm reported as positive or negative
0538U	0538U	Oncology (solid tumor), next-generation targeted sequencing analysis, formalin-fixed paraffin-embedded (FFPE) tumor tissue, DNA analysis of 600 genes, interrogation for single-nucleotide variants, insertions/deletions, gene rearrangements, and copy number alterations, microsatellite instability, tumor mutation burden, reported as actionable variant
0539U	0539U	Oncology (solid tumor), cell-free circulating tumor DNA (ctDNA), 152 genes, next-generation sequencing, interrogation for single-nucleotide variants, insertions/deletions, gene rearrangements, copy number alterations, and microsatellite instability, using whole-blood samples, mutations with clinical actionability reported as actionable variant
0540U	0540U	Transplantation medicine, quantification of donor-derived cell-free DNA using next-generation sequencing analysis of plasma, reported as percentage of donor-derived cell-free DNA to determine probability of rejection
0541U	0541U	Cardiovascular disease (HDL reverse cholesterol transport), cholesterol efflux capacity, LC-MS/MS, quantitative measurement of 5 distinct HDL-bound apolipoproteins (apolipoproteins A1, C1, C2, C3, and C4), serum, algorithm reported as prediction of coronary artery disease (pCAD) score
0542U	0542U	Nephrology (renal transplant), urine, nuclear magnetic resonance (NMR) spectroscopy measurement of 84 urinary metabolites, combined with patient data, quantification of BK virus (human polyomavirus 1) using real-time PCR and serum creatinine, algorithm reported as a probability score for allograft injury status
0543U	0543U	Oncology (solid tumor), next-generation sequencing of DNA from formalin-fixed paraffin-embedded (FFPE) tissue of 517 genes, interrogation for single-nucleotide variants, multi-nucleotide variants, insertions and deletions from

April 2025 HCPCS Code	CY 2026 HCPCS Code	CY 2026 Long Descriptor
		DNA, fusions in 24 genes and splice variants in 1 gene from RNA, and tumor mutation burden
0544U	0544U	Nephrology (transplant monitoring), 48 variants by digital PCR, using cell-free DNA from plasma, donor-derived cell-free DNA, percentage reported as risk for rejection
0545U	0545U	Acetylcholine receptor (AChR), antibody identification by immunofluorescence, using live cells, reported as positive or negative
0546U	0546U	Low-density lipoprotein receptor-related protein 4 (LRP4), antibody identification by immunofluorescence, using live cells, reported as positive or negative
0547U	0547U	Neurofilament light chain (NfL), chemiluminescent enzyme immunoassay, plasma, quantitative
0548U	0548U	Glial fibrillary acidic protein (GFAP), chemiluminescent enzyme immunoassay, using plasma
0549U	0549U	Oncology (urothelial), DNA, quantitative methylated real-time PCR of TRNA-Cys, SIM2, and NKX1-1, using urine, diagnostic algorithm reported as a probability index for bladder cancer and/or upper tract urothelial carcinoma (UTUC)
0550U	0550U	Oncology (prostate), enzyme-linked immunosorbent assays (ELISA) for total prostate-specific antigen (PSA) and free PSA, serum, combined with age, previous negative prostate biopsy status, digital rectal examination findings, prostate volume, and image and data reporting of the prostate, algorithm reported as a risk score for the presence of high-grade prostate cancer
0551U	*Deleted effective January 1, 2026.	Tau, phosphorylated, pTau217, by single-molecule array (ultrasensitive digital protein detection), using plasma

BILLING CODE 4120–01–C

2. July 2025 HCPCS Codes Proposed Rule Comment Solicitation

For the July 2025 update, 110 new codes were established and made effective July 1, 2025. Through the July 2025 OPPS quarterly update CR (Transmittal 13258, Change Request 14091, dated June 23, 2025) we recognized several new codes for payment and assigned them to appropriate interim OPPS status indicators and APCs. We solicited public comments on the proposed APC and status indicator assignments for the codes listed in Table 10 (New HCPCS Codes Effective July 1, 2025) of the CY 2026 OPPS/ASC proposed rule (90 FR 33529 through 33533), which are also listed in Table 13.

We received some public comments on the proposed OPPS APC and SI assignments for the new Level II HCPCS codes implemented on July 1, 2025. The comments and our responses are addressed in pertinent sections of this final rule with comment period, which include, but are not limited to sections III.C (New Technology APCs); III.E (OPPS APC-Specific Policies); and IV (OPPS Payment for Devices). For those July 1, 2025, codes for which we received no comments, we are finalizing the proposed APC and status indicator assignments. Additionally, we note that in prior years we included the final OPPS status indicators and APC assignments in the coding preamble tables, however, because the same information can be found in Addendum B, we no longer include them in Table 13. Therefore, readers are advised to refer to the OPPS Addendum B for the final OPPS status indicators, APC assignments, and payment rates for all codes reportable under the OPPS. These new codes that were effective July 1, 2025, were assigned to comment indicator ''NP'' in Addendum B to the CY 2026 OPPS/ASC proposed rule to indicate that the codes are assigned to an interim APC assignment and comments would be accepted on their interim APC assignments. The complete list of status indicators and definitions used under the OPPS can be found in Addendum D1 to this final rule with comment period, while the complete list of comment indicators and definitions can be found in Addendum D2 to this final rule with comment period. We note that OPPS Addendum B (OPPS payment file by HCPCS code), Addendum D1 (OPPS Status Indicators), and Addendum D2 (OPPS Comment Indicators) are available via the internet on the CMS website.

BILLING CODE 4120–01–P

TABLE 13: NEW HCPCS CODES EFFECTIVE JULY 1, 2025

July 2025 HCPCS Code	CY 2026 HCPCS Code	CY 2026 Long Descriptor
C9174	C9174	Injection, datopotamab deruxtecan-dlnk, 1 mg
C9175	C9175	Injection, treosulfan, 50 mg
J0165	J0165	Injection, epinephrine, not otherwise specified, 0.1 mg
J0166	J0166	Injection, epinephrine (bpi), not therapeutically equivalent to j0165, 0.1 mg
J0167	J0167	Injection, epinephrine (hospira), not therapeutically equivalent to j0165, 0.1 mg
J0168	J0168	Injection, epinephrine (international medication systems), not therapeutically equivalent to j0165, 0.1 mg
J0169	J0169	Injection, epinephrine (adrenalin), not therapeutically equivalent to j0165, 0.1 mg
J0616	J0616	Injection, metoprolol tartrate, 1 mg
J0618	J0618	Injection, calcium chloride, 2 mg
J1163	J1163	Injection, diltiazem hydrochloride, 0.5 mg
J1326	J1326	Injection, zolbetuximab-clzb, 2 mg
J2312	J2312	Injection, naloxone hydrochloride, not otherwise specified, 0.01 mg
J2313	J2313	Injection, naloxone hydrochloride (zimhi), 0.01 mg
J3373	J3373	Injection, vancomycin hydrochloride, 10 mg
J3374	J3374	Injection, vancomycin hydrochloride (mylan) not therapeutically equivalent to j3373, 10 mg
J3375	J3375	Injection, vancomycin hydrochloride (xellia), not therapeutically equivalent to j3373, 10 mg
J3391	J3391	Injection, atidarsagene autotemcel, per treatment
J7172	J7172	Injection, marstacimab-hncq, 0.5 mg
J7356	J7356	Injection, foscarbidopa 0.25 mg/foslevodopa 5 mg
J9038	J9038	Injection, axatilimab-csfr, 0.1 mg
J9174	J9174	Injection, docetaxel (beizray), 1 mg
J9220	J9220	Injection, indigotindisulfonate sodium, 1 mg
J9275	J9275	Injection, cosibelimab-ipdl, 2 mg
J9276	J9276	Injection, zanidatamab-hrii, 2 mg
J9289	J9289	Injection, nivolumab, 2 mg and hyaluronidase-nvhy
J9341	J9341	Injection, thiotepa (tepylute), 1 mg
J9342	J9342	Injection, thiotepa, not otherwise specified, 1 mg
J9382	J9382	Injection, zenocutuzumab-zbco, 1 mg
Q4368	Q4368	Amchothick, per square centimeter
Q4369	Q4369	Amnioplast 3, per square centimeter
Q4370	Q4370	Aeroguard, per square centimeter
Q4371	Q4371	Neoguard, per square centimeter
Q4372	Q4372	Amchoplast excel, per square centimeter
Q4373	Q7373	Membrane wrap lite, per square centimeter
Q4375	Q4375	Duograft ac, per square centimeter
Q4376	Q4376	Duograft aa, per square centimeter
Q4377	Q4377	Trigraft ft, per square centimeter
Q4378	Q4378	Renew ft matrix, per square centimeter
Q4379	Q4379	Amniodefend ft matrix, per square centimeter
Q4380	Q4380	Advograft one, per square centimeter
Q4381	Q4381	Matrix hd allograft dermis, per square centimeter
Q4382	Q4382	Advograft dual, per square centimeter
Q5098	Q5098	Injection, ustekinumab-srlf (imuldosa), biosimilar, 1 mg
Q5099	Q5099	Injection, ustekinumab-stba (steqeyma), biosimilar, 1 mg
Q5100	Q5100	Injection, ustekinumab-kfce (yesintek), biosimilar, 1 mg

July 2025 HCPCS Code	CY 2026 HCPCS Code	CY 2026 Long Descriptor
Q5153	Q5153	Injection, aflibercept-yszy (opuviz), biosimilar, 1 mg
0948T	0948T	Interrogation device evaluation (remote), up to 90 days, cardiac contractility modulation system with interim analysis, review and report(s) by a physician or other qualified health care professional
0949T	0949T	Interrogation device evaluation (remote), up to 90 days, cardiac contractility modulation system, remote data acquisition(s), receipt of transmissions, technician review, technical support, and distribution of results
0950T	0950T	Ablation of benign prostate tissue, transrectal, with high intensity–focused ultrasound (HIFU), including ultrasound guidance
0951T	0951T	Totally implantable active middle ear hearing implant; initial placement, including mastoidectomy, placement of and attachment to sound processor
0952T	0952T	Totally implantable active middle ear hearing implant; revision or replacement, with mastoidectomy and replacement of sound processor
0953T	0953T	Totally implantable active middle ear hearing implant; revision or replacement, without mastoidectomy and replacement of sound processor
0954T	0954T	Totally implantable active middle ear hearing implant; replacement of sound processor only, with attachment to existing transducers
0955T	0955T	Totally implantable active middle ear hearing implant; removal, including removal of sound processor and all implant components
0956T	0956T	Partial craniectomy, channel creation, and tunneling of electrode for sub-scalp implantation of an electrode array, receiver, and telemetry unit for continuous bilateral electroencephalography monitoring system, including imaging guidance
0957T	0957T	Revision of sub-scalp implanted electrode array, receiver, and telemetry unit for electrode, when required, including imaging guidance
0958T	0958T	Removal of sub-scalp implanted electrode array, receiver, and telemetry unit for continuous bilateral electroencephalography monitoring system, including imaging guidance
0959T	0959T	Removal or replacement of magnet from coil assembly that is connected to continuous bilateral electroencephalography monitoring system, including imaging guidance
0960T	0960T	Replacement of sub-scalp implanted electrode array, receiver, and telemetry unit with tunneling of electrode for continuous bilateral electroencephalography monitoring system, including imaging guidance
0961T	0961T	Shortwave infrared radiation imaging, surgical pathology specimen, to assist gross examination for lymph node localization in fibroadipose tissue, per specimen (List separately in addition to code for primary procedure)
0962T	0962T	Assistive algorithmic analysis of acoustic and electrocardiogram recording for detection of cardiac dysfunction (eg, reduced ejection fraction, cardiac murmurs, atrial fibrillation), with review and interpretation by a physician or other qualified health care professional
0963T	0963T	Anoscopy with directed submucosal injection of bulking agent into anal canal
0964T	0964T	Impression and custom preparation of jaw expansion oral prosthesis for obstructive sleep apnea, including initial adjustment; single arch, without mandibular advancement mechanism
0965T	0965T	Impression and custom preparation of jaw expansion oral prosthesis for obstructive sleep apnea, including initial adjustment; dual arch, with additional mandibular advancement, non-fixed hinge mechanism
0966T	0966T	Impression and custom preparation of jaw expansion oral prosthesis for obstructive sleep apnea, including initial adjustment; dual arch, with additional mandibular advancement, fixed hinge mechanism

July 2025 HCPCS Code	CY 2026 HCPCS Code	CY 2026 Long Descriptor
0967T	0967T	Transanal insertion of endoluminal temporary colorectal anastomosis protection device, including vacuum anchoring component and flexible sheath connected to external vacuum source and monitoring system
0968T	0968T	Insertion or replacement of epicranial neurostimulator system, including electrode array and pulse generator, with connection to electrode array
0969T	0969T	Removal of epicranial neurostimulator system
0970T	0970T	Ablation, benign breast tumor (eg, fibroadenoma), percutaneous, laser, including imaging guidance when performed, each tumor
0971T	0971T	Ablation, malignant breast tumor(s), percutaneous, laser, including imaging guidance when performed, unilateral
0972T	0972T	Assistive algorithmic classification of burn healing (ie, healing or nonhealing) by noninvasive multispectral imaging, including system set-up and acquisition, selection, and transmission of images, with automated generation of report
0973T	0973T	Selective enzymatic debridement, partial-thickness and/or full-thickness burn eschar, requiring anesthesia (ie, general anesthesia, moderate sedation), including patient monitoring, trunk, arms, legs; first 100 sq cm
0974T	0974T	Selective enzymatic debridement, partial-thickness and/or full-thickness burn eschar, requiring anesthesia (ie, general anesthesia, moderate sedation), including patient monitoring, trunk, arms, legs;each additional 100 sq cm (List separately in addition to code for primary procedure)
0975T	0975T	Selective enzymatic debridement, partial-thickness and/or full-thickness burn eschar, requiring anesthesia (ie, general anesthesia, moderate sedation), including patient monitoring, scalp, neck, hands, feet, and/or multiple digits; first 100 sq cm
0976T	0976T	Selective enzymatic debridement, partial-thickness and/or full-thickness burn eschar, requiring anesthesia (ie, general anesthesia, moderate sedation), including patient monitoring, scalp, neck, hands, feet, and/or multiple digits;each additional 100 sq cm (List separately in addition to code for primary procedure)
0977T	0977T	Upper gastrointestinal blood detection, sensor capsule, with interpretation and report
0978T	0978T	Submucosal cryolysis therapy; soft palate, base of tongue, and lingual tonsil
0979T	0979T	Submucosal cryolysis therapy; soft palate only
0980T	0980T	Submucosal cryolysis therapy; base of tongue and lingual tonsil only
0981T	0981T	Transcatheter implantation of wireless inferior vena cava sensor for long-term hemodynamic monitoring, including deployment of the sensor, radiological supervision and interpretation, right heart catheterization, and inferior vena cava venography, when performed
0982T	0982T	Remote monitoring of implantable inferior vena cava pressure sensor, physiologic parameter(s) (eg, weight, blood pressure, pulse oximetry, respiratory flow rate), initial set-up and patient education on use of equipment
0983T	0983T	Remote monitoring of an implanted inferior vena cava sensor for up to 30 days, including at least weekly downloads of inferior vena cava area recordings, interpretation(s), trend analysis, and report(s) by a physician or other qualified health care professional
0984T	0984T	Intravascular imaging of extracranial cerebral vessels using optical coherence tomography (OCT) during diagnostic evaluation and/or therapeutic intervention, including all associated radiological supervision, interpretation, and report; initial vessel (List separately in addition to code for primary procedure)
0985T	0985T	Intravascular imaging of extracranial cerebral vessels using optical coherence tomography (OCT) during diagnostic evaluation and/or therapeutic intervention, including all associated radiological supervision, interpretation, and report; each additional vessel (List separately in addition to code for primary procedure)
0986T	0986T	Intravascular imaging of intracranial cerebral vessels using optical coherence tomography (OCT) during diagnostic evaluation and/or therapeutic intervention,

July 2025 HCPCS Code	CY 2026 HCPCS Code	CY 2026 Long Descriptor
		including all associated radiological supervision, interpretation, and report; initial vessel (List separately in addition to code for primary procedure)
0987T	0987T	Intravascular imaging of intracranial cerebral vessels using optical coherence tomography (OCT) during diagnostic evaluation and/or therapeutic intervention, including all associated radiological supervision, interpretation, and report; each additional vessel (List separately in addition to code for primary procedure)
0552U	0552U	Reproductive medicine (preimplantation genetic assessment), analysis for known genetic disorders from trophectoderm biopsy, linkage analysis of diseasecausing locus, and when possible, targeted mutation analysis for known familial variant, reported as low-risk or high-risk for familial genetic disorder
0553U	0553U	Reproductive medicine (preimplantation genetic assessment), analysis of 24 chromosomes using DNA genomic sequence analysis from embryonic trophectoderm for structural rearrangements, aneuploidy, and a mitochondrial DNA score, results reported as normal/balanced (euploidy/balanced), unbalanced structural rearrangement, monosomy, trisomy, segmental aneuploidy, or mosaic, per embryo tested
0554U	0554U	Reproductive medicine (preimplantation genetic assessment), analysis of 24 chromosomes using DNA genomic sequence analysis from trophectoderm biopsy for aneuploidy, ploidy, a mitochondrial DNA score, and embryo quality control, results reported as normal (euploidy), monosomy, trisomy, segmental aneuploidy, triploid, haploid, or mosaic, with quality control results reported as contamination detected or inconsistent cohort when applicable, per embryo tested
0555U	0555U	Reproductive medicine (preimplantation genetic assessment), analysis of 24 chromosomes using DNA genomic sequence analysis from embryonic trophectoderm for structural rearrangements, aneuploidy, ploidy, a mitochondrial DNA score, and embryo quality control, results reported as normal/balanced (euploidy/balanced), unbalanced structural rearrangement, monosomy, trisomy, segmental aneuploidy, triploid, haploid, or mosaic, with quality control results reported as contamination detected or inconsistent cohort when applicable, per embryo tested
0556U	0556U	Infectious disease (bacterial or viral respiratory tract infection), pathogen-specific DNA and RNA by real-time PCR, 12 targets, nasopharyngeal or oropharyngeal swab, including multiplex reverse transcription for RNA targets, each analyte reported as detected or not detected
0557U	0557U	Infectious disease (bacterial vaginosis and vaginitis), realtime amplification of DNA markers for Atopobium vaginae, Gardnerella vaginalis, Megasphaera types 1 and 2, bacterial vaginosis associated bacteria-2 and -3 (BVAB-2, BVAB-3), Mobiluncus species, Trichomonas vaginalis, Neisseria gonorrhoeae, Candida species (C. albicans, C. tropicalis, C. parapsilosis, C. glabrata, C. krusei), Herpes simplex viruses 1 and 2, vaginal fluid, reported as detected or not detected for each organism
0558U	0558U	Oncology (colorectal), quantitative enzyme-linked immunosorbent assay (ELISA) for secreted colorectal cancer protein marker (BF7 antigen), using serum, result reported as indicative of response/no response to therapy or disease progression/regression
0559U	0559U	Oncology (breast), quantitative enzyme-linked immunosorbent assay (ELISA) for secreted breast cancer protein marker (BF9 antigen), serum, result reported as indicative of response/no response to therapy or disease progression/regression
0560U	0560U	Oncology (minimal residual disease [MRD]), genomic sequence analysis, cell-free DNA, whole blood and tumor tissue, baseline assessment for design and construction of a personalized variant panel to evaluate current MRD and for comparison to subsequent MRD assessments

July 2025 HCPCS Code	CY 2026 HCPCS Code	CY 2026 Long Descriptor
0561U	0561U	Oncology (minimal residual disease [MRD]), genomic sequence analysis, cell-free DNA, whole blood, subsequent assessment with comparison to initial assessment to evaluate for MRD
0562U	0562U	Oncology (solid tumor), targeted genomic sequence analysis, 33 genes, detection of single-nucleotide variants (SNVs), insertions and deletions, copy-number amplifications, and translocations in human genomic circulating cell-free DNA, plasma, reported as presence of actionable variants
0563U	0563U	Infectious disease (bacterial and/or viral respiratory tract infection), pathogen-specific nucleic acid (DNA or RNA), 11 viral targets and 4 bacterial targets, qualitative RT-PCR, upper respiratory specimen, each pathogen
0564U	0564U	Infectious disease (bacterial and/or viral respiratory tract infection), pathogen-specific nucleic acid (DNA or RNA), 10 viral targets and 4 bacterial targets, qualitative RT-PCR, upper respiratory specimen, each pathogen reported as positive or negative
0565U	0565U	Oncology (hepatocellular carcinoma), next-generation sequencing methylation pattern assay to detect 6626 epigenetic alterations, cellfree DNA, plasma, algorithm reported as cancer signal detected or not detected
0566U	0566U	Oncology (lung), qPCRbased analysis of 13 differentially methylated regions (CCDC181, HOXA7, LRRC8A, MARCHF11, MIR129-2, NCOR2, PANTR1, PRKCB, SLC9A3, TBR1_2, TRAP1, VWC2, ZNF781), pleural fluid, algorithm reported as a qualitative result
0567U	0567U	Rare diseases (constitutional/heritable disorders), whole-genome sequence analysis combination of short and long reads, for single-nucleotide variants, insertions/deletions and characterized intronic variants, copy-number variants, duplications/deletions, mobile element insertions, runs of homozygosity, aneuploidy, and inversions, mitochondrial DNA sequence and deletions, short tandem repeat genes, methylation status of selected regions, blood, saliva, amniocentesis, chorionic villus sample or tissue, identification and categorization of genetic variants
0568U	0568U	Neurology (dementia), beta amyloid (Aβ40, Aβ42, Aβ42/40 ratio), tau-protein phosphorylated at residue (eg, pTau217), neurofilament light chain (NfL), and glial fibrillary acidic protein (GFAP), by ultra-high sensitivity molecule array detection, plasma, algorithm reported as positive, intermediate, or negative for Alzheimer pathology
0569U	0569U	Oncology (solid tumor), nextgeneration sequencing analysis of tumor methylation markers (>20000 differentially methylated regions) present in cell-free circulating tumor DNA (ctDNA), whole blood, algorithm reported as presence or absence of ctDNA with tumor fraction, if appropriate
0570U	0570U	Neurology (traumatic brain injury), analysis of glial fibrillary acidic protein (GFAP) and ubiquitin carboxylterminal hydrolase L1 (UCHL1), immunoassay, whole blood or plasma, individual components reported with the overall result of elevated or non-elevated based on threshold comparison
0571U	0571U	Oncology (solid tumor), DNA (80 genes) and RNA (10 genes), by next-generation sequencing, plasma, including single-nucleotide variants, insertions/deletions, copy-number alterations, microsatellite instability, and fusions, reported as clinically actionable variants
0572U	0572U	Oncology (prostate), highthroughput telomere length quantification by FISH, whole blood, diagnostic algorithm reported as risk of prostate cancer
0573U	0573U	Oncology (pancreas), 3 biomarkers (glucose, carcinoembryonic antigen, and gastricsin), pancreatic cyst lesion fluid, algorithm reported as categorical mucinous or non-mucinous
0574U	0574U	Mycobacterium tuberculosis, culture filtrate protein–10-kDa (CFP-10), serum or plasma, liquid chromatography mass spectrometry (LC-MS)

BILLING CODE 4120–01–C

3. October 2025 HCPCS Codes Final Rule Comment Solicitation

For the October 2025 update, 100 codes were established and made effective October 1, 2025. Through the October 2025 OPPS quarterly update CR (Transmittal 13425, Change Request 14223, dated September 22, 2025), we recognized several new codes for separate payment and assigned them to appropriate interim OPPS status indicators and APCs. For CY 2026, consistent with our established policy, we proposed in the CY 2026 OPPS/ASC proposed rule (90 FR 33533) that the HCPCS codes that would be effective October 1, 2025, would be flagged with comment indicator ''N1'' in Addendum B to the CY 2026 OPPS/ASC final rule with comment period to indicate that we have assigned the codes to interim OPPS status indicators for CY 2026. Table 14 lists the codes that were effective October 1, 2025. We note that several of the temporary C-codes have been replaced with permanent J-codes effective January 1, 2026. We are inviting public comments in this final rule with comment period on the interim payment indicators, which will be finalized in the CY 2027 OPPS/ASC final rule with comment period. We note the proposed APC assignments and status indicators for these same codes will be subject to comment in the CY 2027 OPPS/ASC proposed rule with comment period and will be finalized in the CY 2027 OPPS/ASC final rule with comment period.

BILLING CODE 4120–01–P

TABLE 14: NEW HCPCS CODES EFFECTIVE OCTOBER 1, 2025

October 2025 HCPCS Code	CY 2026 HCPCS Code	CY 2026 Long Descriptor
A2036	A2036	Cohealyx collagen dermal matrix, per square centimeter
A2037	A2037	G4derm plus, per milliliter
A2038	A2038	Marigen pacto, per square centimeter
A2039	A2039	Innovamatrix fd, per square centimeter
A4288	A4288	Valve for breast pump, replacement
A9612	A9612	Injection, fluorescein, 1 mg
A9616	A9616	Gallium ga-68 gozetotide (gozellix), diagnostic, 1 millicurie
C1740	C1740	Leadless electrode, transmitter, battery (all implantable), for sequential left ventricular pacing
C1741	C1741	Anchor/screw for bone fixation, absorbable (implantable)
C1742	C1742	Pressure monitoring system, compartmental intramuscular (implantable), continuous, including all components (e.g., introducer, sensor), excludes mobile (wireless) software application
C8006	C8006	Insertion of pleural-peritoneal shunt with intercostal pump chamber, including imaging, injection(s) of contrast with radiological supervision and interpretation, when performed
C9305	C9305	Injection, nipocalimab-aahu, 3 mg
C9306	C9306	Injection, telisotuzumab vedotin-tllv, 1 mg
E0150	E0150	Combination wheeled walker with seat and transport chair, folding, adjustable or fixed height
E0658	E0658	Segmental pneumatic appliance for use with pneumatic compressor, integrated, 2 full arms and chest
E0659	E0659	Segmental pneumatic appliance for use with pneumatic compressor, integrated, head, neck and chest
J0163	J0163	Injection, epinephrine in sodium chloride (endo), 0.1 mg
J0164	J0164	Injection, epinephrine in sodium chloride (baxter), 0.1 mg
J0458	J0458	Injection, aztreonam/avibactam, 7.5 mg/2.5 mg (10 mg)
J0462	J0462	Injection, atropine sulfate, not therapeutically equivalent to j0461, 0.01 mg
J0525	J0525	Injection, cefotetan disodium, 10 mg
J0582	J0582	Injection, bivalirudin (endo), not therapeutically equivalent to j0583, 1 mg
C9175	J0614	Injection, treosulfan, 50 mg
J0668	J0668	Instillation, bupivacaine and meloxicam, 1 mg/0.03 mg
J0675	J0675	Injection, carboprost tromethamine, 0.1 mg
J0681	J0681	Injection, ceftobiprole medocaril sodium, 3 mg
J0738	J0738	Injection, lenacapavir, 1 mg, fda approved prescription, only for use as hiv pre-exposure prophylaxis (not for use as treatment for hiv)
J0752	J0752	Oral, lenacapavir, 300 mg, fda approved prescription, only for use as hiv pre-exposure prophylaxis (not for use as treatment for hiv)
C9248	J0759	Injection, clevidipine butyrate, 1 mg

		pathogens, 18 resistance genes), RT-PCR amplified probe technique, urine, each analyte reported as detected or not detected
0594U	0594U	Infectious disease (sepsis), semiquantitative measurement of pancreatic stone protein concentration, whole blood, reported as risk of sepsis
0595U	0595U	Infectious disease (tropical fever pathogens), vector-borne and zoonotic pathogens, including 2 viruses (Chikungunya virus and Dengue virus serotypes 1, 2, 3, and 4), 1 bacterium (Leptospira species), and 1 parasite with species differentiation (Plasmodium species, Plasmodium falciparum, and Plasmodium vivax/ovale), real-time RT-PCR, whole blood, each pathogen reported as detected or not detected
0596U	0596U	Neurology (Alzheimer disease), plasma, 3 distinct isoform-specific peptides (APOE2, APOE3, and APOE4) by liquid chromatography with tandem mass spectrometry (LC-MS/MS), reported as an APOE prototype
0597U	0597U	Oncology (breast), RNA expression profiling of 329 genes by targeted next-generation sequencing and 20 proteins by multiplex immunofluorescence, formalin-fixed paraffin-embedded (FFPE) tissue, algorithmic analyses to determine tumor-recurrence risk score
0598U	0598U	Gastroenterology (irritable bowel syndrome), IgG antibodies to 18 food items by microarray-based immunoassay, whole blood or serum, report as elevated (positive) or normal (negative) antibody levels
0599U	0599U	Oncology (pancreatic cancer), multiplex immunoassay of ICAM1, TIMP1, CTSD, THBS1, and CA 19-9, serum, diagnostic algorithm reported as positive or negative

BILLING CODE 4120–01–C

4. January 2026 HCPCS Codes

a. New Level II HCPCS Codes Final Rule Comment Solicitation

Consistent with past practice, we are soliciting comments on the new Level II HCPCS codes that will be effective January 1, 2026, in the CY 2026 OPPS/ASC final rule with comment period, thereby allowing us to finalize the status indicators and APC assignments for the codes in the CY 2027 OPPS/ASC final rule with comment period. Unlike the CPT codes that are effective January 1 and are included in the OPPS/ASC proposed rules, and except for the proposed new C-codes and G-codes listed in Addendum O of the CY 2026 OPPS/ASC proposed rule, most Level II HCPCS codes are not released until sometime around November to be effective January 1. Because these codes are not available until November, we were unable to include them in the OPPS/ASC proposed rules. Consequently, for CY 2026, we proposed to include the new Level II HCPCS codes that will be effective January 1, 2026 (that would be incorporated in the January 2026 OPPS quarterly update CR), in Addendum B to the CY 2026 OPPS/ASC final rule with comment period. Specifically, for CY 2026, we proposed to continue our established policy of assigning comment indicator ''N1'' in Addendum B to this final rule with comment period to the new HCPCS codes that will be effective January 1, 2026, to indicate that we are assigning them an interim status indicator, which is subject to public comment. We are inviting public comments in this final rule with comment period on the status indicators and APC assignments, which would then be finalized in the CY 2027 OPPS/ASC final rule with comment period. Similar to the codes effective October 1, 2025, the proposed APC assignments and status indicators for these new Level II HCPCS codes that will be effective January 1, 2026, will also be subject to comment in the CY 2027 OPPS/ASC proposed rule, and will be finalized in the CY 2027 OPPS/ASC final rule with comment period.

b. New CPT Codes Proposed Rule Comment Solicitation

In the CY 2015 OPPS/ASC final rule with comment period (79 FR 66841 through 66844), we finalized a revised process of assigning APC and status indicators for new and revised Category I and III CPT codes that would be effective January 1. Specifically, for the new/revised CPT codes that we receive in a timely manner from the AMA's CPT Editorial Panel, we finalized our proposal to include the codes that would be effective January 1 in the OPPS/ASC proposed rules, along with proposed APC and status indicator assignments for them, and to finalize the APC and status indicator assignments in the OPPS/ASC final rules beginning with the CY 2016 OPPS update. For those new/revised CPT codes that were received too late for inclusion in the OPPS/ASC proposed rule, we finalized our proposal to establish and use HCPCS G-codes that mirror the predecessor CPT codes and retain the current APC and status indicator assignments for a year until we can propose APC and status indicator assignments in the following year's rulemaking cycle. We note that even if we find that we need to create HCPCS G-codes in place of certain CPT codes for the PFS proposed rule, we do not anticipate that these HCPCS G-codes will always be necessary for OPPS purposes. We will make every effort to include proposed APC and status indicator assignments for all new and revised CPT codes that the AMA makes publicly available in time for us to include them in the proposed rule, and to avoid resorting to use of HCPCS G-codes and the resulting delay in utilization of the most current CPT codes. Also, we finalized our proposal to make interim APC and status indicator assignments for CPT codes that are not available in time for the proposed rule and that describe wholly new services (such as new technologies or new surgical procedures), to solicit public comments in the final rule, and

to finalize the specific APC and status indicator assignments for those codes in the following year's rule.

For the CY 2026 OPPS update, we received the CPT codes that will be effective January 1, 2026, from the AMA in time to be included in the CY 2026 OPPS/ASC proposed rule. The new, revised, and deleted CPT codes can be found in Addendum B to the proposed rule (which is available via the internet on the CMS website). We note that the new and revised CPT codes are assigned to comment indicator ''NP'' in Addendum B to the proposed rule to indicate that the code is new for the next calendar year or the code is an existing code with substantial revision to its code descriptor in the next calendar year as compared to the current calendar year with a proposed APC assignment, and that comments would be accepted on the proposed APC assignment and status indicator.

Further, we noted that the CPT code descriptors that appeared in Addendum B were short descriptors and did not accurately describe the complete procedure, service, or item described by the CPT code. Therefore, we included the 5-digit placeholder codes and the long descriptors for the new and revised CY 2026 CPT codes in Addendum O to the CY 2026 OPPS/ASC proposed rule (which is available via the internet on the CMS website) so that the public could adequately comment on the proposed APCs and SI assignments. The 5-digit placeholder codes were included in Addendum O to the CY 2026 OPPS/ASC proposed rule, specifically under the column labeled ''CY 2026 OPPS/ASC Proposed Rule 5-Digit AMA/CMS Placeholder Code.'' We noted that the final CPT code numbers would be included in this CY 2026 OPPS/ASC final rule with comment period. We also noted that not every code listed in Addendum O is subject to public comment. For the new and revised Category I and III CPT codes, we requested public comments on only those codes that are assigned comment indicator ''NP''.

In summary, in the CY 2026 OPPS/ASC proposed rule, we solicited public comments on the proposed CY 2026 status indicators and APC assignments for the new and revised CPT codes that would be effective January 1, 2026. The CPT codes listed in Addendum B to the CY 2026 OPPS/ASC proposed rule appear with short descriptors only. We listed them again, with long descriptors, in Addendum O to the CY 2026 OPPS/ASC proposed rule. We also proposed to finalize the status indicator and APC assignments for these codes (with their final CPT code numbers) in the CY 2026 OPPS/ASC final rule with comment period. The proposed status indicator and APC assignments for these codes were included in Addendum B to the CY 2026 OPPS/ASC proposed rule (which is available via the internet on the CMS website). We received comments on several of the new CPT codes that were assigned to comment indicator ''NP'' in Addendum B to the CY 2026 OPPS/ASC proposed rule. We have responded to those public comments in sections III.C., III.E., and IV. of this final rule with comment period.

The final SIs, APC assignments, and payment rates for the new CPT codes that are effective January 1, 2026, can be found in Addendum B to this final rule with comment period. In addition, the SI definitions can be found in Addendum D1 to this final rule with comment period. Addenda B and D1 are available via the internet on the CMS website.

Finally, Table 15, which is a reprint of Table 11 from the CY 2026 OPPS/ASC proposed rule (90 FR 33535), shows the comment timeframe for new and revised HCPCS codes. The table provides information on our current process for updating codes through our OPPS quarterly update CRs, seeking public comments, and finalizing the treatment of these codes under the OPPS.

TABLE 15: COMMENT AND FINALIZATION TIMEFRAMES FOR NEW AND REVISED OPPS-RELATED HCPCS CODES

OPPS Quarterly Update CR	Type of Code	Effective Date	Comments Sought	When Finalized
April 2025	HCPCS (CPT and Level II Codes)	April 1, 2025	CY 2026 OPPS/ASC proposed rule	CY 2026 OPPS/ASC final rule with comment period

	Level II HCPCS Codes	January 1, 2026	CY 2026 OPPS/ASC final rule with comment period	CY 2027 OPPS/ASC final rule with comment period

B. OPPS Changes—Variations Within APCs

1. Background

Section 1833(t)(2)(A) of the Act requires the Secretary to develop a classification system for covered hospital outpatient department services. In addition, section 1833(t)(2)(B) of the Act provides that the Secretary may establish groups of covered OPD services within this classification system, so that services classified within each group are comparable clinically and with respect to the use of resources. In accordance with these provisions, we developed a grouping classification system, referred to as Ambulatory Payment Classifications (APCs), as set forth in regulations at 42 CFR 419.31. We use Level I (also known as CPT codes) and Level II HCPCS codes (also known as alphanumeric codes) to identify and group the services within each APC. The APCs are organized such that each group is homogeneous both clinically and in terms of resource use. Using this classification system, we have established distinct groups of similar services. We also have developed separate APC groups for certain medical devices, drugs, biologicals, therapeutic radiopharmaceuticals, and brachytherapy devices that are not packaged into the payment for the procedure.

We have packaged into the payment for each procedure or service within an APC group, the costs associated with those items and services that are typically ancillary and supportive to a primary diagnostic or therapeutic modality and, in those cases, are an integral part of the primary service they support. Therefore, we do not make separate payment for these packaged items or services. In general, packaged items and services include, but are not limited to, the items and services listed in regulations at 42 CFR 419.2(b). A further discussion of packaged services is included in section II.A.3. of this final rule with comment period.

Under the OPPS, we generally pay for covered hospital outpatient services on a rate-per-service basis, where the service may be reported with one or more HCPCS codes. Payment varies according to the APC group to which the independent service or combination of services is assigned. For CY 2026, we proposed that each APC relative payment weight represents the hospital cost of the services included in that APC, relative to the hospital cost of the services included in APC 5012 (Clinic Visits and Related Services). The APC relative payment weights are scaled to APC 5012 because it is the hospital clinic visit APC and clinic visits are among the most frequently furnished services in the hospital outpatient setting.

2. Application of the 2 Times Rule
