[a] This cost number for capitalized developed technology costs is calculated by adding together the capitalized developed technology costs and the software license fee for each budget.
[b] The variance for capitalized developed technology costs is the result of costs related to the software license fee in accordance with the Plan Processor Agreement with FCAT.
[c] This variance is attributable to lower than forecasted market volumes and the impact of lower processing costs due to shutting down certain functionalities.
[d] The variance in legal costs is attributable to unanticipated issues that required additional legal efforts on behalf of CAT LLC that developed after the budget was created.

*12.22.25_CAT-LLC-2025-Finacial_and_Operating-Budget.pdf*).

(i) Technology Costs—Cloud Hosting Services

(a) Description of Cloud Hosting Services Costs

Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the cloud hosting services costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $49,866,667 in technology costs for cloud hosting services for the CAT Fee 2026–1 Period. The technology costs for cloud hosting services represent costs reasonably budgeted to be incurred for services provided by the cloud services provider for the CAT, Amazon Web Services, Inc. (''AWS'') during the CAT Fee 2026–1 Period.

In the agreement between CAT LLC and the Plan Processor for the CAT (''Plan Processor Agreement''), FINRA CAT, LLC (''FCAT''), AWS was named as the subcontractor to provide cloud hosting services. Under the Plan Processor Agreement, CAT LLC is required to pay FCAT the fees incurred by the Plan Processor for cloud hosting services provided by AWS as FCAT's subcontractor on a monthly basis for the cloud hosting services, and FCAT, in turn, pays such fees to AWS. The fees for cloud hosting services were negotiated by FCAT on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the expected volume of data, the breadth of services provided and market rates for similar services. Services provided by AWS include storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments. FCAT utilizes such cloud hosting services for a broad array of services for the CAT, such as data ingestion, data management, and analytic tools for the CAT. AWS performs cloud hosting services for both the CAT transaction database as well as the Reference Database (previously referred to as the Customer and Account Information System, or ''CAIS'').[37] It is anticipated that such cloud hosting services will continue during the CAT Fee 2026–1 Period.

The cost for AWS cloud services for the CAT is a function of the volume of CAT Data, largely as a result of the processing and storage of the CAT Data.[38] The greater the amount of CAT Data, the greater the cost of AWS services to CAT LLC. During the CAT Fee 2026–1 Period, it is expected that AWS would provide cloud hosting services for volumes of CAT Data far in excess of the volume predictions set forth in the CAT NMS Plan. The CAT NMS Plan states, when all CAT Reporters are submitting their data to the CAT, it ''must be sized to receive[,] process and load more than 58 billion records per day,'' [39] and that ''[i]t is expected that the Central Repository will grow to more than 29 petabytes of raw, uncompressed data.'' [40] In contrast with those estimates, the Q3 2025 data volumes averaged 792 billion events per day. The highest peak data volume to date of 1.45 trillion events was recorded on April 7, 2025. The top five peak days were recorded in April 2025.

CAT LLC estimates that the budget for cloud hosting services costs during the CAT Fee 2026–1 Period will be approximately $49,866,667.[41] The budget for cloud hosting services costs during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding two-thirds of the cloud hosting services costs for the second quarter and the cloud hosting services for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget.[42]

CAT LLC estimated the budget for the cost for cloud hosting services for the CAT Fee 2026–1 Period based on an assumption of 35% annual year-over-year volume growth for the transaction database and an assumption of 5% annual year-over-year volume growth for the Reference Database. CAT LLC determined these growth assumptions in coordination with FCAT.[43]

This process for estimating the budget for cloud hosting services costs for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the cloud hosting services costs for the Original 2026 CAT Budget.

The Original 2026 CAT Budget estimated a budget for cloud hosting services of $17,200,000 for January and February 2026. The actual costs for cloud hosting services for January and February 2026, which are set forth in the Updated 2026 CAT Budget, were $12,829,362. Therefore, the variance between budgeted and actual cloud hosting services costs for January and February 2026 was an approximate decrease of $4,370,638 as a result of lower volumes and a change in functionality.[44] Accordingly, CAT LLC believes that the process for estimating the budgeted cloud hosting services costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for cloud hosting services costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the cloud hosting services costs from the Original 2026 Budget.[45] Specifically, the following describes the differences in the costs for cloud hosting services included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted costs for cloud hosting services included in the

[37] On January 13, 2026, the SEC approved an amendment to the CAT NMS Plan relating to the Customer and Account Information System (referred to as ''CAIS''). Effective with this amendment, CAIS has been renamed as the ''Reference Database.'' Securities Exchange Act Rel. No. 104586 (Jan. 13, 2026), 91 FR 2164 (Jan. 16, 2026) (''CAIS Amendment''). The SEC subsequently approved another amendment to the CAT NMS Plan to implement various cost savings measures that made further changes to the Reference Database. Securities Exchange Act Rel. No. 105107 (Mar. 27, 2026), 91 FR 16284 (Mar. 27, 2026) (''Cost Savings Amendment'').

[38] In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. For further discussion of the effect of processing timelines on cloud hosting costs, *see* Section 3(b)(2)(A)(i) below.

[39] Section 1.3 of Appendix D of the CAT NMS Plan, n.262.

[40] Section 1.3 of Appendix D of the CAT NMS Plan.

[41] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[42] This calculation is (⅔ × $18,700,000) + $18,700,000 + $18,700,000 = $49,866,667.

[43] Note that these growth rates are based on events processed and stored in the CAT. Executed transactions are a small subset of such events. As a result, the number of transactions in the CAT, and, hence, the number of executed equivalent shares, is not directly correlated with the number of events processed in the CAT or the costs of cloud hosting services for the CAT. Accordingly, the number of executed equivalent shares may stay relatively constant from year to year while the number of events processed and stored in the CAT may grow significantly.

[44] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[45] The last Prospective CAT Fee, CAT Fee 2025–2, was implemented pursuant to the prior CAT funding model. Moreover, the final invoice for CAT Fee 2025–2 was sent in December 2025, and, therefore, there is a six-month gap between the final invoice for CAT Fee 2025–2 and the first invoice for CAT Fee 2026–1, which would be in June 2026. Accordingly, this filing describes the changes in the cloud hosting services costs from the Original 2026 Budget.

Original 2026 CAT Budget were $81,900,006, and the annual 2026 budgeted costs for cloud hosting services included in the Updated 2026 CAT Budget are $77,529,362. Accordingly, budgeted annual costs for cloud hosting services decreased by $4,370,644 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget, which is an approximate 5% reduction in cloud hosting services costs for the full year of 2026.[46] The budgeted decrease in costs for cloud hosting services reflects lower costs for January and February 2026 due to lower than forecasted market volumes in January and the impact of lower processing costs due to shutting down certain functionalities.

(ii) Technology Costs—Operating Fees

(a) Description of Operating Fees

Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the operating fees set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $19,691,953 in technology costs for operating fees for the CAT Fee 2026–1 Period. Operating fees are those fees paid by CAT LLC to FCAT as the Plan Processor to operate and maintain the CAT and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management as required by the CAT NMS Plan. Operating fees also include market data provider costs, as discussed below.

*Plan Processor: FCAT.* Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT a negotiated monthly fixed price for the operation of the CAT. This fixed price contract was negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity. It is anticipated that FCAT will provide a variety of services to the CAT during the CAT Fee 2026–1 Period, including the following:

- Provide the CAT-related functions and services as the Plan Processor as required by SEC Rule 613 and the CAT NMS Plan in connection with the operation and maintenance of the CAT;
- Address compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provide support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assist with interpretive efforts, exemptive requests and amendments regarding the CAT NMS Plan;
- Oversee the security of the CAT;
- Monitor the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provide support to subcontractors under the Plan Processor Agreement;
- Provide support in discussions with the Participants and the SEC and its staff;
- Operate the FINRA CAT Helpdesk;
- Facilitate communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administer the CAT website and all of its content;
- Maintain cyber security insurance related to the CAT;
- Assist with billing, collection and other CAT fee-related activity; and
- Provide technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

CAT LLC calculated the budget for the FCAT technology costs for operating fees for the CAT Fee 2026–1 Period based on the recurring monthly operating fees under the Plan Processor Agreement.

*Market Data Provider: Algoseek.* It is anticipated that the operating fees costs for the CAT Fee 2026–1 Period will include costs related to the receipt of certain market data for the CAT pursuant to an agreement between FCAT and Algoseek, LLC (''Algoseek''). CAT LLC determined that Algoseek would provide market data that included data elements set forth in Section 6.5(a)(ii) of the CAT NMS Plan, and that the fees were reasonable and in line with market rates for the market data received. All costs under the contract would be treated as a direct pass through cost to CAT LLC. CAT LLC estimated the budget for the costs for Algoseek for the CAT Fee 2026–1 Period based on the monthly rate set forth in the agreement between Algoseek and FCAT.

*Operating Fee Estimates.* CAT LLC estimates that the budget for operating fees during the CAT Fee 2026–1 Period will be approximately $19,691,953.[47] The budget for operating fees during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding (1) two-thirds of the Non-CAIS fixed operating fees for the second quarter and the Non-CAIS fixed operating fees for the third and fourth quarters of 2026 included in the Updated 2026 CAT Budget and (2) two-thirds of the market data vendor fees for the second quarter and the market data vendor fees for the third and fourth quarter of 2026 included in the Updated 2026 CAT Budget.[48]

As discussed above, CAT LLC estimated the budget for the operating fees during the CAT Fee 2026–1 Period based on monthly rates set forth in the Plan Processor Agreement and the agreement with Algoseek. CAT LLC also recognized that the operating fees are generally consistent throughout the year. This process for estimating the budget for the operating fees for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the operating fees for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget for operating fees of $5,149,236 for January and February 2026, and the actual costs for operating fees for January and February 2026 were $5,127,057. Therefore, the variance between budgeted and actual operating fees for this period was small—$22,179.[49] Accordingly, CAT LLC believes that the process for estimating the budgeted operating fees for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for operating fees from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the operating fees from the Original 2026 Budget. Specifically, the following describes the differences in the costs for operating fees included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted costs for operating fees included in the Original

[46] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[47] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[48] This calculation is ((⅔ × $7,191,853) + $7,191,853 + $7,191,853) + ((⅔ × $192,630) + $192,630 + $192,630) = $19,691,953.

[49] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

2026 CAT Budget were $34,345,413, and the annual 2026 budgeted costs for operating fees included in the Updated 2026 CAT Budget are $29,845,524. Accordingly, budgeted annual costs for operating fees decreased by $4,499,889 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget, which is an approximate 13% reduction in operating fees for the full year of 2026.[50] The budgeted decrease in costs for operating fees reflects the proposed amendments to the Plan Processor Agreement related to the recent cost savings amendments to the CAT NMS Plan.[51]

(iii) Technology Costs—CAIS Operating Fees

(a) Description of CAIS Operating Fees

Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the CAIS operating fees set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $14,179,060 in technology costs for CAIS operating fees for the CAT Fee 2026–1 Period. CAIS operating fees represent the fees paid to FCAT for services provided with regard to the operation and maintenance of the Reference Database (previously referred to as CAIS), and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. The CAT is required under the CAT NMS Plan to capture and store Reference Data in the Reference Database and to create a CAT-Customer-ID for each Customer.[52]

During the CAT Fee 2026–1 Period, it is anticipated that FCAT will provide services related to the Reference Database. Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT for services related to the Reference Database provided by FCAT on a monthly basis. CAT LLC negotiated the fees for FCAT's services related to the Reference Database on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity. During the CAT Fee 2026–1 Period, it is anticipated that FCAT will continue to provide services relating to the ongoing operation, maintenance and support of the Reference Database.

CAT LLC estimates that the budget for CAIS operating fees during the CAT Fee 2026–1 Period will be approximately $14,179,060.[53] The budget for CAIS operating fees during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding two-thirds of the CAIS fixed operating fees for the second quarter and the CAIS fixed operating fees for the third and fourth quarters of 2026 included in the Updated 2026 CAT Budget.[54]

CAT LLC calculated the budget for FCAT's services related to the Reference Database for the CAT Fee 2026–1 Period based on the recurring monthly CAIS operating fees under the Plan Processor Agreement. This process for estimating the budget for the CAIS operating fees for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the CAIS operating fees for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget of $3,544,764 for CAIS operating fees for January and February of 2026. The actual costs for CAIS operating fees for January and February of 2026, which are included in the Updated 2026 CAT Budget, were $3,544,764. There was no variance between budgeted and actual CAIS operating fees for the first two months of 2026.[55] Accordingly, CAT LLC believes that the process for estimating the budgeted CAIS operating fees for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for CAIS operating fees from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the CAIS operating fees from the Original 2026 Budget. Specifically, the following describes the differences in the costs for CAIS operating fees included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

CAIS operating fees are based on a recurring monthly rate payable to FCAT and are unchanged from the Original 2026 CAT Budget to the Updated 2026 CAT Budget. The annual 2026 budgeted costs for CAIS operating fees included in the Original 2026 CAT Budget were $21,268,584, and the annual 2026 budgeted costs for CAIS operating fees included in the Updated 2026 CAT Budget are $21,268,590.[56] Accordingly, the budgeted annual costs for CAIS operating fees are the same for both the Original 2026 CAT Budget and the Updated 2026 CAT Budget.

(iv) Technology Costs—Change Request Fees

(a) Description of Change Request Fees

Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the change request fees set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $0 in technology costs for change request fees for the CAT Fee 2026–1 Period. The technology costs related to change request fees include costs related to certain modifications, upgrades or other changes to the CAT.

Change requests are standard practice and necessary to reflect operational changes, including changes related to new market developments, such as new market participants. In general, if CAT LLC determines that a modification, upgrade or other changes to the functionality or service is necessary and appropriate, CAT LLC will submit a request for such a change to the Plan Processor. The Plan Processor will then respond to the request with a proposal for implementing the change, including the cost (if any) of such a change. CAT LLC then determines whether to approve the proposed change.

The change request budget line is established to include expected costs to be incurred in which the nature of the costs (*i.e.,* capitalization versus expensing) have not yet been determined. Upon the incurrence of such costs, the final determination of capitalization versus expensing is determined and then such costs are reclassified from the change request line to the appropriate technology cost line item.

CAT LLC estimates that the budget for change requests during the CAT Fee 2026–1 Period will be approximately

[50] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[51] *See* CAIS Amendment and Cost Savings Amendment.

[52] *See* Section 9 of Appendix D of the CAT NMS Plan.

[53] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[54] This calculation is (⅔ × $5,317,147) + $5,317,147 + $5,317,147 = $14,179,060.

[55] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[56] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

$0.[57] The budget for change requests during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. This $0 cost number for change request fees reflects the fact that there were no change request fees set forth in the Updated 2026 CAT Budget.

CAT LLC estimated the budget for the potential change requests for the CAT Fee 2026–1 Period based on, among other things, a review of past change requests and potential future change request needs, as well as discussions with FCAT. This process for estimating the budget for the change requests for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the change requests cost for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a change request budget of $0 for January and February of 2026. The actual costs for change requests for January and February of 2026, which are set forth in the Updated 2026 CAT Budget, were $0. There was no variance between budgeted and actual change request costs for January and February of 2026.[58] Accordingly, CAT LLC believes that the process for estimating the budgeted change request costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for change request fees from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the change request fees from the Original 2026 Budget. Specifically, the following describes the differences (if any) in the costs for change request fees included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted costs for change requests included in the Original 2026 CAT Budget were $0, and the annual 2026 budgeted costs for change requests included in the Updated 2026 CAT Budget are $0.[59] Accordingly, budgeted annual costs for change requests are the same for both the Original 2026 CAT Budget and the Updated 2026 CAT Budget.

(v) Technology Costs—Capitalized Developed Technology Costs

(a) Description of Capitalized Developed Technology Costs

Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the capitalized developed technology costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that includes $3,450,000 in technology costs for capitalized developed technology costs for the CAT Fee 2026–1 Period. This category of costs includes the budget for capitalizable application development costs incurred in the development of the CAT. It is anticipated that such costs will include certain costs related to the software license fee for the Reference Database in accordance with the Plan Processor Agreement with FCAT, as well as costs related to a set of technology changes to be implemented by FCAT related to the cost savings amendments[60] and the move to 23x5 trading.

CAT LLC estimates that the budget for capitalized developed technology costs during the CAT Fee 2026–1 Period will be approximately $3,450,000.[61] The budget for capitalized developed technology costs during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding (1) capitalized developed technology costs of $3,450,000 for May, $0 for June and $0 for the third and fourth quarters of 2026 included in the Updated 2026 CAT Budget; and (2) $0 for the Software License Fee 2026 for the second, third, and fourth quarters of 2026 included in the Updated 2026 CAT Budget.[62]

CAT LLC estimated the budget for capitalized developed technology costs for the CAT Fee 2026–1 Period based on an analysis of a variety of factors, including information related to potential technology costs and related contractual and Plan requirements, and discussions with FCAT regarding such potential technology costs. This process for estimating the budget for capitalized developed technology costs for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the capitalized developed technology costs for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget for capitalized developed technology costs of $671,472 for January and February 2026, and the actual costs for capitalized developed technology costs for January and February 2026 were $4,145,430.[63] The variance of $3,473,958 for January and February 2026 is the result of costs related to the software license fee for the Reference Database in accordance with the Plan Processor Agreement with FCAT. Accordingly, CAT LLC believes that the process for estimating the budgeted capitalized developed technology costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for capitalized developed technology costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the capitalized developed technology costs from the Original 2026 Budget. Specifically, the following describes the differences in the costs for capitalized developed technology costs as included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budget for capitalized developed technology costs included in the Original 2026 CAT Budget was $8,228,827, and the annual 2026 budget for capitalized developed technology costs included in the Updated 2026 CAT Budget are $8,378,964.[64] Accordingly, the annual budget for capitalized developed technology costs increased by $150,137 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget, which is an approximate 2% increase in the capitalized developed technology costs for the full year of 2026. This budgeted increase in the annual budget for capitalized developed technology costs was the result of costs related to the software license fee for the Reference Database in accordance with the Plan Processor Agreement with FCAT.

(vi) Legal Costs

(a) Description of Legal Costs

Section 11.3(a)(iii)(B)(B)(2) of the CAT NMS Plan requires the fee filing for a

[57] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[58] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[59] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[60] *See* CAIS Amendment and Cost Savings Amendment.

[61] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[62] This calculation is ($3,450,000 + $0 + $0 + $0) + ($0 + $0 + $0) = $3,450,000. Note that the $4,178,964 cost for the software license fee was not included in the CAT Fee 2026–1 Period.

[63] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[64] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

Prospective CAT Fee to provide a brief description of the legal costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that includes $5,670,452 in legal costs for the CAT Fee 2026–1 Period. This category of costs represents budgeted costs for legal services for this period. CAT LLC anticipates that it will receive legal services from two law firms, Wilmer Cutler Pickering Hale and Dorr LLP (''WilmerHale'') and Jenner & Block LLP (''Jenner''), during the CAT Fee 2026–1 Period.

*Law Firm: WilmerHale.* It is anticipated that legal costs during the CAT Fee 2026–1 Period will include costs related to the legal services performed by WilmerHale. CAT LLC anticipates that it will continue to employ WilmerHale during the CAT Fee 2026–1 Period based on, among other things, their expertise, long history with the project and recognition that the hourly fee rates for this law firm are anticipated to be in line with market rates for specialized legal expertise. WilmerHale's billing rates are negotiated on an annual basis and are determined with reference to the rates charged by other leading law firms for similar work. The Participants assess WilmerHale's performance and review prospective budgets and staffing plans submitted by WilmerHale on an annual basis. The legal fees will be paid by CAT LLC to WilmerHale.

During the CAT Fee 2026–1 Period, it is anticipated that WilmerHale will provide legal services related to the following:

- Assist with CAT fee filings and related funding issues;
- Draft exemptive requests from CAT NMS Plan requirements and/or proposed amendments to the CAT NMS Plan;
- Provide legal guidance with respect to interpretations of CAT NMS Plan requirements;
- Provide legal support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team;
- Draft SRO rule filings related to the CAT Compliance Rule;
- Manage corporate governance matters, including supporting Operating Committee meetings and preparing resolutions and consents;
- Assist with communications with the industry, including CAT Alerts and presentations;
- Provide guidance regarding the confidentiality of CAT Data;
- Assist with cost management analyses and proposals;
- Assist with commercial contract-related matters, including change orders and amendments, Plan Processor Agreement items, and subcontract matters;
- Provide support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues;
- Provide legal guidance with respect to the CAT budgets;
- Provide background assistance to other counsel for CAT matters;
- Assist with legal responses related to third-party data requests; and
- Provide legal support regarding CAT policies and procedures.

CAT LLC estimated the budget for the legal costs for WilmerHale for the CAT Fee 2026–1 Period through an analysis of a variety of factors, including WilmerHale fee rates, historical legal fees, and information related to pending legal issues and potential future legal issues.

*Law Firm: Jenner.* It is anticipated that legal costs during the CAT Fee 2026–1 Period will include costs related to the legal services performed by Jenner. CAT LLC anticipates that it will continue to employ Jenner during the CAT Fee 2026–1 Period based on, among other things, their expertise, history with the project and recognition that their hourly fee rates are in line with market rates for specialized legal expertise. The legal fees will be paid by CAT LLC to Jenner.

During the CAT Fee 2026–1 Period, it is anticipated that Jenner will continue to provide legal assistance to CAT LLC regarding certain litigation matters, including: (1) CAT LLC's defense against a lawsuit filed in the Western District of Texas against the SEC Chair, the SEC and CAT LLC challenging the validity of Rule 613 and the CAT and alleging various constitutional, statutory, and common law claims;[65] (2) CAT LLC's intervention in a lawsuit in the Eleventh Circuit filed by various parties against the SEC challenging the SEC's approval of the CAT Funding Model;[66] and (3) a lawsuit in the Eleventh Circuit filed by Citadel Securities LLC seeking review of the SEC's May 20, 2024 order[67] granting the Participants temporary conditional exemptive relief related to the reporting of bids and/or offers made in response to a request for quote or other form of solicitation response provided in standard electronic format that is not immediately actionable.[68] Litigation involving CAT LLC is an expense of operating the CAT, and, therefore, is appropriately an obligation of both Participants and Industry Members under the CAT Funding Model. Jenner also will continue to provide legal counseling to CAT LLC related to the above-listed litigation and other litigation risk.

CAT LLC estimated the budget for the legal costs for Jenner for the CAT Fee 2026–1 Period through an analysis of a variety of factors, including Jenner's fee rates, historical legal fees, and information related to pending legal issues and potential future legal issues.

*Legal Cost Estimates.* CAT LLC estimates that the budget for legal services during the CAT Fee 2026–1 Period will be approximately $5,670,452.[69] The budget for legal services during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding budgeted costs for two-thirds of the legal costs for the second quarter and the legal costs for the third and fourth quarters of 2026 included in the Updated 2026 CAT Budget.[70]

CAT LLC estimated the budget for the legal services for the CAT Fee 2026–1 Period based on an analysis of a variety of factors, including law firm fee rates, historical legal fees, and information related to pending legal issues and potential future legal issues. This process for estimating the budget for the legal services for CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the legal cost for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget for legal costs of $1,424,166 for January and February of 2026. The actual costs for legal services for January and February 2026, which are included in the Updated 2026 Budget, were $1,838,617.[71] The increase of $414,451 was due to unanticipated issues that required additional legal efforts on behalf of CAT LLC that developed after the budget was created. Such additional costs were primarily due to additional legal work related to litigation matters as well as regulatory and corporate legal matters. Accordingly, CAT LLC believes that the process for estimating the

[65] *Davidson et al.* v. *Atkins et al.,* Case No. 6:24–cv–197 (W.D. Tex.).

[68] *Citadel Securities* v. *SEC,* Case No. 24–12300 (11th Cir.).

[69] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[70] This calculation is (⅔ × $2,145,170) + $2,125,170 + $2,115,170 = $5,670,452.

[71] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

budgeted legal costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for legal costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the legal costs from the Original 2026 Budget. Specifically, the following describes the differences in the legal costs included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted legal costs included in the Original 2026 CAT Budget were $8,485,000, and the annual 2026 budgeted legal costs included in the Updated 2026 CAT Budget are $8,939,184.[72] Accordingly, the annual budget for legal costs increased by $454,184 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget for the full year of 2026, which is an approximate 5% increase in the legal costs for the full year of 2026. This budgeted increase in the legal costs in the Updated 2026 CAT Budget from the Original 2026 Budget was primarily due to an anticipated increase in legal costs related to litigation matters as well as regulatory and corporate legal matters.

(vii) Consulting Costs

(a) Description of Consulting Costs

Section 11.3(a)(iii)(B)(B)(3) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the consulting costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $1,025,957 in consulting costs for the CAT Fee 2026–1 Period. The consulting costs represent the fees estimated to be paid to the consulting firm Deloitte & Touche LLP (''Deloitte'') as project manager during the CAT Fee 2026–1 Period. The services provided by Deloitte to the CAT include advisory services related to the operation of the CAT, and meeting facilitation and communications coordination, vendor support and financial analyses. In addition, the consulting costs include the compensation for the Chair of the CAT Operating Committee.

It is anticipated that the costs for CAT during the CAT Fee 2026–1 Period will include costs related to consulting services performed by Deloitte. CAT LLC anticipates that it will continue to employ Deloitte during the CAT Fee 2026–1 Period based on, among other things, their expertise, long history with the project, and the recognition that it is anticipated that the consulting fees will remain in line with market rates for this type of specialized consulting work. Deloitte's fee rates are negotiated on an annual basis. CAT LLC assesses Deloitte's performance and reviews prospective budgets and staffing plans submitted by Deloitte on an annual basis. The consulting fees will be paid by CAT LLC to Deloitte.

It is anticipated that Deloitte will provide a variety of consulting services to the CAT during the CAT Fee 2026–1 Period, including the following:

- Implement program operations for the CAT project;
- Provide support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assist with cost and funding matters for the CAT, including assistance with loans and the CAT bank account for CAT funding;
- Provide support for updating the SEC on the progress of the development of the CAT; and
- Provide support for third party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

In addition, the consulting costs include the compensation for the Chair of the CAT Operating Committee, which is paid by CAT LLC.

CAT LLC estimates that the budget for consulting costs during the CAT Fee 2026–1 Period will be approximately $1,025,957.[73] The budget for consulting costs during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding two-thirds of the consulting costs for the second quarter and the consulting costs for the third and fourth quarters of 2026 included in the Updated 2026 CAT Budget.[74]

CAT LLC estimates the budget for the consulting costs for Deloitte for the CAT Fee 2026–1 Period based on the current statement of work with Deloitte, which took into consideration past consulting costs, potential future consulting needs, the proposed rates and other contractual issues, and discussions with Deloitte, as well as the compensation arrangement for the Chair. This process for estimating the budget for consulting costs for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the consulting costs for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget for consulting services of $258,334 for January and February 2026, and the actual costs for consulting services for January and February 2026, which are included in the Updated 2026 CAT Budget, were $267,554.[75] Therefore, the variance between budgeted and actual consulting costs for January and February was approximately 4%. Accordingly, CAT LLC believes that the process for estimating the budgeted consulting costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for consulting costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the consulting costs from the Original 2026 Budget. Specifically, the following describes the differences (if any) in the consulting costs included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budget for consulting costs included in the Original 2026 CAT Budget was $1,550,000, and the annual 2026 budget for consulting costs included in the Updated 2026 CAT Budget is $1,550,000.[76] Accordingly, the annual budget for consulting costs has not changed from the Original 2026 CAT Budget to the Updated 2026 CAT Budget for the full year of 2026.

(viii) Insurance Costs

(a) Description of Insurance Costs

Section 11.3(a)(iii)(B)(B)(4) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the insurance costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $852,768 in insurance costs for the CAT Fee 2026–1 Period.[77] The

[72] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[73] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[74] This calculation is (⅔ × $2,145,170) + $2,125,170 + $2,115,170 = $5,670,452.

[75] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[76] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[77] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

insurance costs represent the costs to be incurred for insurance for the CAT during the CAT Fee 2026–1 Period.

It is anticipated that the insurance costs for CAT during the CAT Fee 2026–1 Period will include costs related to cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance brokered by USI Insurance Services LLC (''USI''). Such policies are standard for corporate entities, and cyber security liability insurance is important for the CAT System. CAT LLC anticipates that it will continue to maintain this insurance during the CAT Fee 2026–1 Period, and notes that the annual premiums for these policies were competitive for the coverage provided. CAT LLC estimated the budget for the insurance costs for the CAT Fee 2026–1 Period based on the insurance estimate from USI for 2026. The annual premiums would be paid by CAT LLC to USI.

The budgeted insurance costs for the CAT Fee 2026–1 Period are based on an insurance cost estimate from USI for 2026. Accordingly, CAT LLC believes that the process for estimating the budgeted insurance costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for insurance costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the insurance costs from the Original 2026 Budget. Specifically, the following describes the differences in the insurance costs included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted insurance costs included in the Original 2026 CAT Budget were $1,505,625, and the annual 2026 budgeted insurance costs included in the Updated 2026 CAT Budget are $1,254,070.[78] Accordingly, the annual budget for insurance costs decreased by $251,555 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget for the full year of 2026, which is an approximate 16% decrease in the insurance costs for the full year of 2026. This budgeted decrease in the insurance costs in the Updated 2026 CAT Budget from the Original 2026 Budget was primarily due to an anticipated decrease in insurance premiums.

(ix) Professional and Administration Costs

(a) Description of Professional and Administration Costs

Section 11.3(a)(iii)(B)(B)(5) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the professional and administration costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $749,151 in professional and administration costs for the CAT Fee 2026–1 Period. In adopting the CAT NMS Plan, the Commission amended the Plan to add a requirement that CAT LLC's financial statements be prepared in compliance with GAAP, audited by an independent public accounting firm, and made publicly available.[79] The professional and administration costs would include costs related to accounting and accounting advisory services to support the operating and financial functions of CAT, financial statement audit services by an independent accounting firm, preparation of tax returns, and various cash management and treasury functions. The professional and administration costs represent the fees to be paid to Anchin, Block & Anchin (''Anchin'') and Grant Thornton LLP (''Grant Thornton'') for financial services during the CAT Fee 2026–1 Period.

*Financial Advisory Firm: Anchin.* It is anticipated that the professional and administration costs for the CAT Fee 2026–1 Period will include costs related to financial advisory services performed by Anchin. CAT LLC anticipates that it will continue to employ Anchin during the CAT Fee 2026–1 Period based on, among other things, the firm's relevant expertise and fees, which are anticipated to remain in line with market rates for these financial advisory services. The fees for these services will be paid by CAT LLC to Anchin.

It is anticipated that Anchin will provide a variety of services to the CAT during the CAT Fee 2026–1 Period, including the following:

- Update and maintain internal controls;
- Provide cash management and treasury functions;
- Facilitate bill payments to vendors;
- Facilitate repayments of promissory notes to Participants;
- Provide monthly bookkeeping;
- Review vendor invoices and documentation in support of cash disbursements;
- Review documentation to ensure that repayments of promissory notes to Participants are in accordance with established policies and procedures;
- Provide accounting research and consultations on various accounting, financial reporting and tax matters;
- Address not-for-profit tax and accounting considerations;
- Prepare tax returns;
- Address various accounting, financial reporting and operating inquiries from Participants;
- Develop and maintain annual and interim operating and financial budgets, including budget to actual and budget to budget fluctuation analyses;
- Support compliance with the CAT NMS Plan;
- Work with and provide support to the Operating Committee, Leadership Team and various CAT working groups;
- Prepare monthly, quarterly and annual financial statements;
- Review and reconcile the monthly FINRA CAT reports/analyses related to billings, collections, outstanding accounts receivable and cash account;
- Perform certain verification, completeness, and validation testing related to the monthly FINRA CAT reports/analyses related to billings;
- Support the annual financial statement audits by an independent auditor;
- Review historical costs from inception;
- Provide accounting and financial information in support of SEC filings; and
- Perform additional ad hoc accounting and financial advisory services, as requested by CAT LLC.

CAT LLC estimated the annual budget for the costs for Anchin based on historical costs adjusted for cost of living rate increases, and projected incremental advisory and support services.

*Accounting Firm: Grant Thornton.* It is anticipated that the professional and administration costs for the CAT Fee 2026–1 Period will include costs related to accounting services performed by Grant Thornton. CAT LLC anticipates that it will continue to employ Grant Thornton during the CAT Fee 2026–1 Period based on, among other things, the firm's relevant expertise and fees, which are anticipated to remain in line with market rates for these financial advisory services. It is anticipated that Grant Thornton will continue to be engaged as an independent accounting firm to complete the audit of CAT LLC's financial statements, in accordance with

[78] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[79] Section 9.2 of the CAT NMS Plan.

the requirements of the CAT NMS Plan. The fees for these services will be paid by CAT LLC to Grant Thornton. CAT LLC estimated the budget for the accounting costs for Grant Thornton for the CAT Fee 2026–1 Period based on the anticipated hourly rates and the anticipated services plus an administrative fee.

*Professional and Administration Cost Estimates.* CAT LLC estimates that the budget for professional and administration services during the CAT Fee 2026–1 Period will be approximately $749,151.[80] The budget for professional and administration services during the CAT Fee 2026–1 Period is based on the Updated 2026 CAT Budget. CAT LLC estimated the budget for the professional and administration costs for the CAT Fee 2026–1 Period based on a review of past professional and administration costs, potential future professional and administration needs, the proposed rates and other contractual issues, as well as discussions with Anchin and Grant Thornton. This process for estimating the budget for the professional and administration costs for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the professional and administration costs for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget for professional and administration costs of $190,916 for January and February 2026, and the actual costs for professional and administration services for January and February 2026, which are set forth in the Updated 2026 Budget, were $149,061.[81] The decrease of $41,855 was due to a lower than expected profressional and administration services costs and to the movement of bank fees from the professional and administration category to the interest income category. Accordingly, CAT LLC believes that the process for estimating the budgeted professional and administration costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for professional and administration costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the professional and administration costs from the Original 2026 Budget. Specifically, the following describes the differences in the professional and administration costs included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted professional and administration costs as included in the Original 2026 CAT Budget were $1,145,500, and the annual 2026 budgeted professional and administration costs included in the Updated 2026 CAT Budget are $1,085,500.[82] Accordingly, the budgeted annual costs for professional and administration services decreased by $60,000 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget for the full year of 2026. This budgeted decrease in the professional and administration costs in the Updated 2026 CAT Budget from the Original 2026 Budget was due to the movement of bank fees from the professional and administration category to the interest income category, and not a change in costs related to Anchin and Grant Thornton services.

(x) Public Relations Costs

(a) Description of Public Relations Costs

Section 11.3(a)(iii)(B)(B)(6) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the public relations costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $0 in public relations costs for the CAT Fee 2026–1 Period. The public relations costs would represent the fees paid to a public relations firm for professional communications services to CAT, including media relations consulting, strategy and execution. Because CAT LLC anticipates that it will not engage a public relations firm for the CAT Fee Period 2026–1, the budget for public relations costs for this period is $0.[83]

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for public relations costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the public relations costs from the Original 2026 Budget. Specifically, the following describes the differences (if any) in public relations costs included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual budgeted public relations costs for 2026 included in the Original 2026 CAT Budget were $0, and the annual budgeted public relations costs for 2026 included in the Updated 2026 CAT Budget are $0.[84] Accordingly, the annual budgeted public relations costs for 2026 are the same for both the Original 2026 CAT Budget and the Updated 2026 CAT Budget.

(xi) Interest Income

(a) Description of Interest Income

Section 11.1(a) of the CAT NMS Plan requires the CAT budget to include ''the sources of all revenues to cover costs.'' Accordingly, the Updated 2026 CAT Budget includes a line item for interest income. Specifically, the Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $1,453,382 in interest income for the CAT Fee 2026–1 Period.[85] Interest income represents the interest earned on the surplus reserve and other funds held by CAT LLC. Such income would be used to reduce the amount to be collected to fund the CAT.

CAT LLC estimates the budget for the interest income for the CAT Fee 2026–1 Period based on the estimate of the funds held by CAT LLC and the expected interest rates on such funds. The Original 2026 CAT Budget estimated interest income of $758,343 for January and February 2026, and the actual interest income for January and February 2026, which are included in the Updated 2026 CAT Budget, were $757,527.[86] As mentioned above, bank fees were moved from the professional and administration category in the Original 2026 CAT Budget to the interest income category in the Updated 2026 CAT Budget. Accordingly, the interest income amount for the Updated 2026 CAT Budget was net of $10,000 in bank fees. Therefore, the variance between budgeted and actual interest income (aside from bank fees) for January and February 2026 was approximately $10,000. Accordingly, CAT LLC believes that the process for

[80] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[81] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[82] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[83] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[84] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[85] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[86] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

estimating the budgeted interest income for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in each line item from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in interest income from the Original 2026 CAT Budget. Specifically, the following describes the differences in the interest income included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted interest income as included in the Original 2026 CAT Budget was $1,995,958, and the annual 2026 budgeted interest income included in the Updated 2026 CAT Budget is $2,806,325.[87] Accordingly, the budgeted interest income (not including bank fees) increased by $810,367 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget for the full year of 2026, which is an approximate 40% increase in the interest income for the full year of 2026. This budgeted increase in the interest income in the Updated 2026 CAT Budget from the Original 2026 Budget was primarily due to higher than expected cash balances being maintained after the approval of the Original 2026 Budget.

(xii) Reserve

(a) Description of Reserve

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the reserve costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that includes a reserve amount for 2026. Section 11.1(a)(i) of the CAT NMS Plan states that the budget shall include a reserve. Section 11.1(a)(ii) of the CAT NMS Plan further describes the reserve as follows:

For the reserve referenced in paragraph (a)(i) of this Section, the budget will include an amount reasonably necessary to allow the Company to maintain a reserve of not more than 25% of the annual budget. To the extent collected CAT fees exceed CAT costs, including the reserve of 25% of the annual budget, such surplus shall be used to offset future fees. For the avoidance of doubt, the Company will only include an amount for the reserve in the annual budget if the Company does not have a sufficient reserve (which shall be up to but not more than 25% of the annual budget). For the avoidance of doubt, the calculation of the amount of the reserve would exclude the amount of the reserve from the budget.

CAT LLC determined to maintain a reserve in the amount of 25% of the total expenses set forth in the Updated 2026 CAT Budget (which does not include the reserve amount). Accordingly, the total 25% reserve of $23,508,157 was calculated by multiplying the total expenses set forth in the Updated 2026 CAT Budget (other than the reserve) by 25%.[88]

The Updated 2026 CAT Budget estimates that CAT LLC will have $102,391,135 in reserve as of the beginning of the CAT Fee Period 2026–1. Such reserve is related, in part, to (i) the collection of CAT fees in excess of the budgeted CAT costs in light of the greater actual executed equivalent share volume than the projected executed equivalent share volume for prior CAT Fees, and (ii) a reduction in anticipated budgeted costs associated with the implementation of certain cost savings measures. This reserve balance of $102,391,135 would be used to offset a portion of CAT costs for CAT Fee Period 2026–1, thereby reducing the fee rate to be paid for CAT Fee 2026–1. Specifically, the total costs (including the 25% reserve) for CAT Fee 2026–1 of $117,540,783 would be reduced by the $102,391,135 in reserve. Therefore, the Total Budgeted CAT Costs 2026–1 would be $15,149,648.

Accordingly, the fee rate for CAT Fee 2026–1 is calculated based on this reduced amount of $15,149,648, resulting in a fee rate of $0.000001 per executed equivalent share. If the fee rate for CAT Fee 2026–1 were calculated solely based on the reasonably budgeted costs for CAT for May–December 2026, excluding the reduction in that amount due to the surplus reserve offset, the fee rate would be the higher rate of $0.000010.[89]

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for a reserve from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in reserve from the Original 2026 CAT Budget. Specifically, the following describes the differences in the reserve included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The accrued liquidity reserve balance at the beginning of the year included in the Original 2026 CAT Budget was $119,128,336. The Original 2026 CAT Budget contemplated using the reserve to pay CAT bills throughout the year as no CAT fee was in effect. The accrued liquidity reserve balance at the beginning of the year included in the Updated 2026 CAT Budget was $155,403,378. The increase in the accrued liquidity reserve balance at the beginning of the year from the Original 2026 CAT Budget to the Updated 2026 CAT Budget reflected the additional CAT Fees that had been received after the approval of the Original 2026 CAT Budget. In addition, the Updated 2026 CAT Budget not only reflected the use of the surplus reserve to pay CAT bills but also the accrual of additional reserve to establish a 25% reserve through CAT Fee 2026–1. Accordingly, the estimated liquidity reserve balance increased from a deficit of $37,304,661 included in the Original 2026 CAT Budget to a reserve balance of $23,508,157 included in the Updated 2026 CAT Budget for the full year of 2026.

(D) Projected Total Executed Equivalent Share Volume

The calculation of Fee Rate 2026–1 also requires the determination of the projected total executed equivalent share volume of transactions in Eligible Securities for the CAT Fee 2026–1 Period. Under the CAT NMS Plan, the Operating Committee is required to ''reasonably determine the projected total executed equivalent share volume of all transactions in Eligible Securities for each relevant period based on the executed equivalent share volume of all transactions in Eligible Securities for the prior twelve months.'' [90] The Operating Committee is required to base its projection on the prior twelve months, but it may use its discretion to analyze the likely volume for the upcoming year. Such discretion would allow the Operating Committee to use its judgment when estimating projected total executed equivalent share volume if the volume over the prior twelve months was unusual or otherwise unfit to serve as the basis of a future volume estimate.[91]

[87] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[88] The reserve was calculated by multiplying $94,032,626 by 25%, which equals approximately $23,508,157.

[89] *See* CAT Fee Alert 2026–1 (Apr. 1, 2026).

[90] Section 11.3(a)(i)(D) of the CAT NMS Plan.

[91] CAT Funding Model Approval Order at 13452.

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from March 2025 through February 2026 was 5,980,937,549,360.49 executed equivalent shares. The Operating Committee has determined to calculate the projected total executed equivalent share volume for the eight-month recovery period for CAT Fee 2026–1 by multiplying by 8/12ths the executed equivalent share volume for the 12-month period from March 2025 through February 2026. The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has increased from prior years (*e.g.,* the executed equivalent share volume for 2024 was 4,295,884,600,069.41), and the Operating Committee believes that it is reasonable to conclude that the annual executed equivalent share volume will remain at the higher level. Accordingly, the projected total executed equivalent share volume for the eight-month period for CAT Fee 2026–1 is projected to be 3,987,291,699,573.66 executed equivalent shares.[92]

The projected total executed equivalent share volume of all transactions in Eligible Securities for the eight-month recovery period for CAT Fee 2026–1 and a description of the calculation of the projection is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a CAT Fee.[93]

(E) Fee Rate 2026–1

Fee Rate 2026–1 would be calculated by dividing the Budgeted CAT Costs 2026–1 by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for the eight-month recovery period for CAT Fee 2026–1, as described in detail above.[94] Specifically, Fee Rate 2026–1 would be calculated by dividing $15,149,648 by 3,987,291,699,573.66 executed equivalent shares. As a result, Fee Rate 2026–1 would be $0.000003799483243631228 per executed equivalent share. Fee Rate 2026–1 is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide the Fee Rate in a fee filing for a CAT Fee.[95]

Fee Rate 2026–1 would be used to calculate the fee rate to be paid by CEBSs and CEBBs for CAT Fee 2026–1. Such fee rate is calculated by multiplying Fee Rate 2026–1 of $0.000003799483243631228 by one-third, and rounding the result to six decimal places.[96] Accordingly, the fee rate to be paid by CEBSs and CEBBs for CAT Fee 2026–1 would be $0.000001 per executed equivalent share.

(3) Monthly Fees

CEBBs and CEBSs would be required to pay fees for CAT Fee 2026–1 on a monthly basis for eight months, from July 2026 until January 2027. A CEBB's or CEBS's fee for each month would be calculated based on the transactions in Eligible Securities executed by the CEBB or CEBS from the prior month.[97] Proposed paragraph (a)(6)(A) of the fee schedule would state that each CAT Executing Broker would receive its first invoice for CAT Fee 2026–1 in June 2026, and would receive an invoice for CAT Fee 2026–1 each month thereafter until January 2027. Proposed paragraph (a)(6)(B) of the fee schedule would state that ''Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for CAT Fee 2026–1 on a monthly basis.'' In addition, paragraph (b)(1) of the fee schedule states that each CEBB and CEBS is required to pay its CAT fees ''each month.''

(4) Consolidated Audit Trail Funding Fees

To implement CAT Fee 2026–1, the Exchange proposes to add a new paragraph to the ''Consolidated Audit Trail Funding Fees'' section of the Exchange's fee schedule, to include the proposed paragraphs described below.

(A) Fee Schedule for CAT Fee 2026–1

The CAT NMS Plan states that:

Each Industry Member that is the CAT Executing Broker for the buyer in a transaction in Eligible Securities (''CAT Executing Broker for the Buyer'' or ''CEBB'') and each Industry Member that is the CAT Executing Broker for the seller in a transaction in Eligible Securities (''CAT Executing Broker for the Seller'' or ''CEBS'') will be required to pay a CAT Fee for each such transaction in Eligible Securities in the prior month based on CAT Data. The CEBB's CAT Fee or CEBS's CAT Fee (as applicable) for each transaction in Eligible Securities will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Fee Rate reasonably determined pursuant to paragraph (a)(i) of this Section 11.3.[98]

Accordingly, based on the factors discussed above, the Exchange proposes to add paragraph (a)(6) to the Consolidated Audit Trail Funding Fees section of its fee schedule. Proposed paragraph (a)(6) would state the following:

(A) Each CAT Executing Broker shall receive its first invoice for CAT Fee 2026–1 in June 2026, which shall set forth the CAT Fee 2026–1 fees calculated based on transactions in May 2026, and shall receive an invoice for CAT Fee 2026–1 for each month thereafter until January 2027.

(B) Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for CAT Fee 2026–1 on a monthly basis. Each month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (''CEBB'') and/or the CAT Executing Broker for the Seller (''CEBS'') (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of $0.000001 per executed equivalent share.

(C) Notwithstanding the last invoice date of January 2027 for CAT Fee 2026–1 in paragraph 6(A), CAT Fee 2026–1 shall continue in effect after January 2027, with each CAT Executing Broker receiving an invoice for CAT Fee 2026–1 each month, until a new subsequent CAT Fee is in effect with regard to Industry Members in accordance with Section 19(b) of the Exchange Act. Consolidated Audit Trail, LLC will provide notice when CAT Fee 2026–1 will no longer be in effect.

(D) Each CAT Executing Broker shall be required to pay each invoice for CAT Fee 2026–1 in accordance with paragraph (b).

As noted in the Plan amendment for the CAT Funding Model, ''[a]s a practical matter, the fee filing would provide the exact fee per executed equivalent share to be paid for the CAT Fees, by multiplying the Fee Rate by

[92] This projection was calculated by multiplying 5,980,937,549,360.49 executed equivalent shares by 8/12ths.

[93] Section 11.3(a)(iii)(B) of the CAT NMS Plan.

[94] In approving the CAT Funding Model, the Commission stated that ''[t]he manner in which the Fee Rate for Prospective CAT Costs will be calculated (*i.e.,* by dividing the CAT costs reasonably budgeted for the upcoming year by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for the year) is appropriate.'' CAT Funding Model Approval Order at 13435.

[95] *See* Section 11.3(a)(iii)(B)(A) of the CAT NMS Plan.

[96] This fee rate of $0.000001 is calculated by multiplying the Fee Rate of $0.000003799483243631228 by one-third and rounding this result (which equals $0.000001266494414543743) to 6 decimal places.

[97] *See* proposed paragraph (a)(6)(B) of the fee schedule.

[98] Section 11.3(a)(iii)(A) of the CAT NMS Plan.

one-third and describing the relevant number of decimal places for the fee.'' [99] Accordingly, proposed paragraph (a)(6)(B) of the fee schedule would set forth a fee rate of $0.000001 per executed equivalent share. This fee rate is calculated by multiplying Fee Rate 2026–1 of $0.000003799483243631228 by one-third, and rounding the result to six decimal places.[100] The Operating Committee determined to use six decimal places to balance the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

The proposed language in paragraph (a)(6)(A) of the fee schedule would describe when CAT Executing Brokers would receive their first monthly invoice for CAT Fee 2026–1. Specifically, CAT Executing Brokers would receive their first monthly invoice for CAT Fee 2026–1 in June 2026 and the fees set forth in that invoice would be calculated based on transactions executed in May 2026. The payment for the first invoice would be required within 30 days after the receipt of the first invoice (unless a longer period is indicated), as described in paragraph (b)(2) of the fee schedule.

Proposed paragraph (a)(6)(A) of the fee schedule also would describe the monthly cadence of the invoices for CAT Fee 2026–1. Specifically, after the first invoices are provided to CAT Executing Brokers in June 2026, invoices will be sent to CAT Executing Brokers each month thereafter until January 2027.

Proposed paragraph (a)(6)(B) of the fee schedule would describe the invoices for CAT Fee 2026–1. Proposed paragraph (a)(6)(B) of the fee schedule would state that ''Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for CAT Fee 2026–1 on a monthly basis.'' Proposed paragraph (a)(6)(B) of the fee schedule also would describe the fees to be set forth in the invoices for CAT Fee 2026–1. Specifically, it would state that ''[e]ach month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer ('CEBB') and/or the CAT Executing Broker for the Seller ('CEBS') (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of $0.000001 per executed equivalent share.''

Since CAT Fee 2026–1 is a monthly fee based on actual transaction volume from the prior month, CAT Fee 2026–1 may collect more or less than two-thirds of the Budgeted CAT Costs 2026–1. To the extent that CAT Fee 2026–1 collects more than two-thirds of the Budgeted CAT Costs 2026–1, any excess money collected will be used to offset future fees and/or to fund the reserve for the CAT. To the extent that CAT Fee 2026–1 collects less than two-thirds of the Budgeted CAT Costs 2026–1, the budget for the CAT in the ensuing months will reflect such shortfall.

Furthermore, proposed paragraph (a)(6)(C) of the fee schedule would describe how long CAT Fee 2026–1 would remain in effect. It would state that ''[n]otwithstanding the last invoice date of January 2027 for CAT Fee 2026–1 in paragraph 6(A), CAT Fee 2026–1 shall continue in effect after January 2027, with each CAT Executing Broker receiving an invoice for CAT Fee 2026–1 each month, until a new subsequent CAT Fee is in effect with regard to Industry Members in accordance with Section 19(b) of the Exchange Act. Consolidated Audit Trail, LLC will provide notice when CAT Fee 2026–1 will no longer be in effect.''

Finally, proposed paragraph (a)(6)(D) of the fee schedule would set forth the requirement for the CAT Executing Brokers to pay the invoices for CAT Fee 2026–1. It would state that ''[e]ach CAT Executing Broker shall be required to pay each invoice for CAT Fee 2026–1 in accordance with paragraph (b).''

(B) Manner of Payment

Paragraph (b)(1) of the ''Consolidated Audit Trail Funding Fees'' section of the fee schedule describes the manner of payment of Industry Member CAT fees. It states that ''[e]ach CAT Executing Broker shall pay its CAT fees as required pursuant to paragraph (a) each month to the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.'' The CAT NMS Plan requires the Operating Committee to establish a system for the collection of CAT fees.[101] The Plan Processor has established a billing system for CAT fees.[102] Accordingly, CAT Executing Brokers would be required to pay CAT Fee 2026–1 in accordance with such system.

(C) Failure To Pay CAT Fees

The CAT NMS Plan further states that:

Participants shall require each Industry Member to pay all applicable fees authorized under this Article XI within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due (as determined in accordance with the preceding sentence), such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of: (a) the Prime Rate plus 300 basis points; or (b) the maximum rate permitted by applicable law.[103]

Paragraph (b)(2) of the fee schedule states that:

Each CAT Executing Broker shall pay the CAT fees required pursuant to paragraph (a) within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If a CAT Executing Broker fails to pay any such CAT fee when due, such CAT Executing Broker shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300 basis points, or (ii) the maximum rate permitted by applicable law.

The requirements of paragraph (b)(2) would apply to CAT Fee 2026–1.

(5) CAT Fee Details

The CAT NMS Plan states that:

Details regarding the calculation of a Participant or CAT Executing Broker's CAT Fees will be provided upon request to such Participant or CAT Executing Broker. At a minimum, such details would include each Participant or CAT Executing Broker's executed equivalent share volume and corresponding fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.[104]

Such information would provide CEBBs and CEBSs with the ability to understand the details regarding the

[99] CAT Funding Model Approval Order at 13445, n.677.

[100] This fee rate of $0.000001 is calculated by multiplying the Fee Rate of $0.000003799483243631228 by one-third, and rounding this result (which equals $0.000001266494414543743) to 6 decimal places.

[101] Section 11.4 of the CAT NMS Plan.

[102] The billing process and system are described in CAT Alert 2023–02 as well as in the CAT FAQs related to the billing of CAT fees, the Industry Member CAT Reporter Portal User Guide, the FCAT Industry Member Onboarding Guide, the FCAT Connectivity Supplement for Industry Members and the CAT Billing Webinars (dated Sept. 28, 2023 and Nov. 7, 2023), each available on the CAT website.

[103] Section 11.4 of the CAT NMS Plan.

[104] Section 11.3(a)(iv)(A) of the CAT NMS Plan.

calculation of their CAT Fee.[105] CAT LLC will provide CAT Executing Brokers with these details regarding the calculation of their CAT Fees on their monthly invoice for the CAT Fees.

In addition, CAT LLC will make certain aggregate statistics regarding CAT Fees publicly available. Specifically, the CAT NMS Plan states that, ''[f]or each CAT Fee, at a minimum, CAT LLC will make publicly available the aggregate executed equivalent share volume and corresponding aggregate fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.'' [106] Such aggregate statistics will be available on the CAT website.

Furthermore, CAT LLC will make publicly available on the CAT website the total amount invoiced each month that CAT Fee 2026–1 is in effect as well as the total amount invoiced for CAT Fee 2026–1 for all months since its commencement. CAT LLC also will make publicly available on the CAT website the total costs to be collected from Industry Members for CAT Fee 2026–1.

(6) Financial Accountability Milestones

The CAT NMS Plan states that ''[n]o Participant will make a filing with the SEC pursuant to Section 19(b) of the Exchange Act regarding any CAT Fee related to Prospective CAT Costs until the Financial Accountability Milestone related to Period 4 described in Section 11.6 has been satisfied.'' [107] Under Section 1.1 of the CAT NMS Plan, a Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the second and third quarter of 2024,[108] the Financial Accountability Milestone related to Period 4 was satisfied on July 15, 2024. In addition, the satisfaction of the Financial Accountability Milestone related to Period 4 was described in detail in the fee filing for the first Prospective CAT Fee, CAT Fee 2024–1.[109]

(7) Participant Invoices

While CAT Fees charged to Industry Members become effective in accordance with the requirements of Section 19(b) of the Exchange Act,[110] CAT fees charged to Participants are implemented via an approval of the CAT fees by the Operating Committee in accordance with the requirements of the CAT NMS Plan.[111] On March 31, 2026, the Operating Committee approved the Participant fee related to CAT Fee 2026–1. Specifically, pursuant to the requirements of CAT NMS Plan,[112] each Participant would be required to pay a CAT fee calculated using the fee rate of $0.000001 per executed equivalent share, which is the same fee rate that applies to CEBBs and CEBSs. Like CEBBs and CEBSs, each Participant would be invoiced such CAT fees on a monthly basis for eight months, from June 2026 until January 2027, and each Participant's fee for each month would be calculated based on the transactions in Eligible Securities executed on the applicable exchange (for the Participant exchanges) or otherwise than on an exchange (for FINRA) in the prior month. Accordingly, each Participant will receive its first invoice in June 2026, and would receive an invoice each month thereafter until January 2027. Like with the CAT Fee 2026–1 applicable to CEBBs and CEBSs as described in proposed paragraph (a)(6)(C) of the fee schedule, notwithstanding the last invoice date of January 2027, Participants will continue to receive invoices for this fee each month until a new subsequent CAT Fee is in effect with regard to Industry Members. Furthermore, Section 11.4 of the CAT NMS Plan states that each Participant is required to pay such invoices as required by Section 3.7(b) of the CAT NMS Plan. Section 3.7(b) states, in part, that

[e]ach Participant shall pay all fees or other amounts required to be paid under this Agreement within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated) (the ''Payment Date''). The Participant shall pay interest on the outstanding balance from the Payment Date until such fee or amount is paid at a per annum rate equal to the lesser of: (i) Prime Rate plus 300 basis points; or (ii) the maximum rate permitted by applicable law.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act [113], which requires, among other things, that the Exchange's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,[114] because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act,[115] which requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. These provisions also require that the Exchange be ''so organized and [have] the capacity to be able to carry out the purposes'' of the Act and ''to comply, and . . . to enforce compliance by its members and persons associated with its members,'' with the provisions of the Exchange Act.[116] Accordingly, a reasonable reading of the Act indicates that it intended that regulatory funding be sufficient to permit an exchange to fulfill its statutory responsibility under the Act, and contemplated that such funding would be achieved through equitable assessments on the members, issuers, and other users of an exchange's facilities.

The Exchange believes that this proposal is consistent with the Act because it implements provisions of the Plan and is designed to assist the

[105] In approving the CAT Funding Model, the Commission stated that, ''[i]n the Commission's view, providing CAT Execut[ing] Brokers information regarding the calculation of their CAT Fees will aid in transparency and permit CAT Execut[ing] Brokers to confirm the accuracy of their invoices for CAT Fees.'' CAT Funding Model Approval Order at 13454.

[106] Section 11.3(a)(iv)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission stated that ''[t]he publication of the aggregate executed equivalent share volume and aggregate fee is appropriate because it would allow Participants and CAT Executing Brokers a high-level validation of executed volume and fees.'' CAT Funding Model Approval Order at 13454.

[107] Section 11.3(a)(iii)(C) of the CAT NMS Plan.

[108] Q2 & Q3 2024 Quarterly Progress Report (July 29, 2024).

Exchange in meeting regulatory obligations pursuant to the Plan. In approving the Plan, the SEC noted that the Plan ''is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.'' [117] To the extent that this proposal implements the Plan and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Act.

The Exchange believes that the proposed fees to be paid by the CEBBs and CEBSs are reasonable, equitably allocated and not unfairly discriminatory. First, the CAT Fee 2026–1 fees to be collected are directly associated with the budgeted costs of establishing and maintaining the CAT, where such costs include Plan Processor costs and costs related to technology, legal, consulting, insurance, and professional and administration costs.

The proposed CAT Fee 2026–1 fees would be charged to Industry Members in support of the maintenance of a consolidated audit trail for regulatory purposes. The proposed fees, therefore, are consistent with the Commission's view that regulatory fees be used for regulatory purposes and not to support the Exchange's business operations. The proposed fees would not cover Exchange services unrelated to the CAT. In addition, any surplus would be used as a reserve to offset future fees. Given the direct relationship between CAT fees and CAT costs, the Exchange believes that the proposed fees are reasonable, equitable and not unfairly discriminatory.

As further discussed below, the SEC approved the CAT Funding Model, finding it was reasonable and that it equitably allocates fees among Participants and Industry Members. The Exchange believes that the proposed fees adopted pursuant to the CAT Funding Model approved by the SEC are reasonable, equitably allocated and not unfairly discriminatory.

(1) Implementation of CAT Funding Model in CAT NMS Plan

Section 11.1(b) of the CAT NMS Plan states that ''[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.'' Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this fee filing to implement the Industry Member CAT fees included in the CAT Funding Model. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model in the CAT NMS Plan, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan ''is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.'' [118] Similarly, in approving the CAT Funding Model, the SEC concluded that the CAT Funding Model met this standard.[119] As this proposal implements the Plan and the CAT Funding Model described therein, and applies specific requirements to Industry Members in compliance with the Plan, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

(2) Calculation of Fee Rate for CAT Fee 2026–1 Is Reasonable

The SEC has determined that the CAT Funding Model satisfies the requirements of the Exchange Act. Specifically, the SEC has concluded that the method for determining CAT Fees as set forth in Section 11.3 of the CAT NMS Plan, including the formula for calculating the Fee Rate, the identification of the parties responsible for payment and the transactions subject to the fee rate for CAT Fees, satisfies the Exchange Act.[120] In each respect, as discussed above, CAT Fee 2026–1 is calculated, and would be applied, in accordance with the requirements applicable to CAT Fees as set forth in the CAT NMS Plan. Furthermore, as discussed below, the Exchange believes that each of the figures for the variables in the SEC-approved formula for calculating the fee rate for CAT Fee 2026–1 is reasonable and consistent with the Exchange Act. The calculation of Fee Rate 2026–1 for CAT Fee 2026–1 requires the figures for Budgeted CAT Costs 2026–1, the executed equivalent share volume for the prior twelve months, the determination of the CAT Fee 2026–1 Period, and the projection of the executed equivalent share volume for the CAT Fee 2026–1 Period. Each of these variables is reasonable and satisfies the Exchange Act, as discussed throughout this filing.

(A) Budgeted CAT Costs 2026–1

The formula for calculating a Fee Rate requires the amount of Budgeted CAT Costs to be recovered. Specifically, Section 11.3(a)(iii)(B) of the CAT NMS Plan requires a fee filing to provide:

the budget for the upcoming year (or remainder of the year, as applicable), including a brief description of each line item in the budget, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration, and (6) public relations costs, a reserve and/or such other categories as reasonably determined by the Operating Committee to be included in the budget, and the reason for changes in each such line item from the prior CAT fee filing.

In accordance with this requirement, the Exchange has set forth the amount and type of Budgeted CAT Costs 2026–1 for each of these categories above.

Section 11.3(a)(iii)(B) of the CAT NMS Plan also requires that the fee filing provide ''sufficient detail to demonstrate that the budget for the upcoming year, or part of year, as applicable, is reasonable and appropriate.'' As discussed below, the Exchange believes that the budget for the CAT Fee 2026–1 Period is ''reasonable and appropriate.'' Each of the costs included in CAT Fee 2026–1 is reasonable and appropriate because the costs are consistent with standard industry practice, based on the need to comply with the requirements of the CAT NMS Plan, incurred subject to negotiations performed on an arm's length basis, and/or is consistent with the needs of any legal entity, particularly one with no employees.

(i) Technology: Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover budgeted costs related to cloud hosting services as a part of CAT Fees.[121] CAT LLC determined that the budgeted costs related to cloud hosting services described in this filing are reasonable and should be included as a part of Budgeted CAT Costs 2026–1. As described above, the cloud hosting services costs reflect, among other

[117] CAT NMS Plan Approval Order at 84697.

[118] *Id.*

[119] CAT Funding Model Approval Order at 13481.

[120] *Id.*

[121] Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan.

things, the breadth of the CAT cloud activities, data volumes far in excess of the original volume estimates, the need for specialized cloud services given the volume and unique nature of the CAT, the processing time requirements of the Plan, and regular efforts to seek to minimize costs where permissible under the Plan. CAT LLC determined that use of cloud hosting services is necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT, and that the fees for cloud hosting services negotiated by FCAT were reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.[122] Indeed, the actual costs of the CAT are far in excess of the original estimated costs of the CAT due to various factors, including the higher volumes and greater complexity of the CAT than anticipated when Rule 613 was originally adopted.

To comply with the requirements of the Plan, the breadth of the cloud activities related to the CAT is substantial. The cloud services not only include the production environment for the CAT, but they also include two industry testing environments, support environments for quality assurance and stress testing and disaster recovery capabilities. Moreover, the cloud storage costs are driven by the requirements of the Plan, which requires the storage of multiple versions of the data, from the original submitted version of the data through various processing steps, to the final version of the data.

Data volume is a significant driver of costs for cloud hosting services. When the Commission adopted the CAT NMS Plan in 2016, it estimated that the CAT would need to receive 58 billion records per day [123] and that annual operating costs for the CAT would range from $36.5 million to $55 million.[124] In contrast to the 2016 projections, the actual daily Q3 2025 data volumes averaged 792 billion events per day.

In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. Although CAT LLC has proactively sought to manage cloud hosting costs while complying with the Plan, including through requests to the Commission for exemptive relief and amendments to the CAT NMS Plan to reduce costs, stringent CAT NMS Plan requirements do not allow for any material flexibility in cloud architecture design choices, processing timelines (*e.g.,* the use of non-peak processing windows), or lower-cost storage tiers. As a result, the required CAT processing timelines contribute to the cloud hosting costs of the CAT.

The costs for cloud hosting services also reflect the need for specialized cloud hosting services given the data volume and unique processing needs of the CAT. The data volume as well as the data processing needs of the CAT necessitate the use of cloud hosting services. The equipment, power and services required for an on-premises data model, the alternative to cloud hosting services, would be cost prohibitive. Moreover, as CAT was being developed, there were limited cloud hosting providers that could satisfy all the necessary CAT requirements, including the operational and security criteria. Over time, more providers offering cloud hosting services that would satisfy these criteria have entered the market. CAT LLC will continue to evaluate alternative cloud hosting services, recognizing that the time and cost to move to an alternative cloud provider would be substantial.

The reasonableness of the cloud hosting services costs is further supported by key cost discipline mechanisms for the CAT—a cost-based funding structure, cost transparency, cost management efforts (including regular efforts to lower compute and storage costs where permitted by the Plan) and oversight. Together, these mechanisms help ensure the ongoing reasonableness of the CAT's costs and the level of fees assessed to support those costs.[125]

(ii) Technology: Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted costs related to operating fees as a part of CAT Fees.[126] CAT LLC determined that the budgeted costs related to operating fees described in this filing are reasonable and should be included as a part of Budgeted CAT Costs 2026–1.

The operating fees would include the negotiated fees paid by CAT LLC to the Plan Processor to operate and maintain the system for order-related information and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the selection of FCAT as the Plan Processor was reasonable and appropriate given its expertise with securities regulatory reporting, after a process of considering other potential candidates.[127] CAT LLC also determined that the fixed price contract, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, was reasonable and appropriate, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity.[128] The services to be performed by FCAT for CAT Fee 2026–1 Period and the budgeted costs related to such services are described above.[129]

The operating costs also include costs related to the receipt of market data. CAT LLC anticipates receiving certain market data from Algoseek during the CAT Fee 2026–1 Period. CAT LLC anticipates that Algoseek will provide data as set forth in the SIP Data requirements of the CAT NMS Plan and that the fees are reasonable and in line with market rates for market data received.[130]

(iii) Technology: CAIS Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted costs related to CAIS operating fees as a part of CAT Fees.[131] CAT LLC determined that the budgeted costs related to CAIS operating fees described in this filing are reasonable and should be included as a part of the Budgeted CAT Costs 2026–1. The CAIS operating fees would include the fees paid to the Plan Processor to operate and maintain the Reference Database and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the fees for FCAT's services related to the Reference Database, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS

[122] For a discussion of the amount and type of cloud hosting services fees, *see* Section 3(a)(2)(C)(i) above.

Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity, are reasonable and appropriate.[132] The services to be performed by FCAT for the CAT Fee 2026–1 Period and the budgeted costs for such services are described above.[133]

(iv) Technology: Change Request Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted costs related to change request fees as a part of CAT Fees.[134] CAT LLC determined that the budgeted costs related to change request fees described in this filing are reasonable and should be included as a part of the Budgeted CAT Costs 2026–1. It is common practice to utilize a change request process to address evolving needs in technology projects. This is particularly true for a project like CAT that is the first of its kind, both in substance and in scale. The substance and costs of each of the change requests are evaluated by the Operating Committee and approved in accordance with the requirements for Operating Committee meetings. In each case, CAT LLC forecasts that the change requests will be necessary to implement the CAT. As described above,[135] CAT LLC determined that it was reasonable not to include any change request fees in the Budgeted CAT Costs 2026–1.

(v) Capitalized Developed Technology Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted costs related to capitalized developed technology costs as a part of CAT Fees.[136] In general, capitalized developed technology costs would include costs related to, for example, certain development costs, costs related to certain modifications, upgrades and other changes to the CAT and license fees. The amount and type of budgeted capitalized developed technology costs for the CAT Fee 2026–1 Period, which relate to the software license fee and technology changes to be implemented by FCAT, are described in more detail above.[137]

(vi) Legal

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted costs related to legal fees as a part of CAT Fees.[138] CAT LLC determined that the budgeted legal costs described in this filing are reasonable and should be included as a part of the Budgeted CAT Costs 2026–1. Given the unique nature of the CAT, the number of parties involved with the CAT (including, for example, the SEC, Participants, Industry Members, and vendors) and the many regulatory, contractual and other issues associated with the CAT, the scope of the necessary legal services is substantial. CAT LLC determined that the scope of the proposed legal services is necessary to implement and maintain the CAT and that the legal rates reflect the specialized services necessary for such a project. CAT LLC determined to hire and continue to use each law firm based on a variety of factors, including their relevant expertise and fees. In each case, CAT LLC determined that the fee rates were in line with market rates for specialized legal expertise. In addition, CAT LLC determined that the budgeted costs for the legal projects were appropriate given the breadth of the services provided. The services to be performed by each law firm for the CAT Fee 2026–1 Period and the budgeted costs related to such services are described above.[139]

(vii) Consulting

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted consulting costs as a part of CAT Fees.[140] CAT LLC determined that the budgeted consulting costs described in this filing are reasonable and should be included as a part of Budgeted CAT Costs 2026–1. Because there are no CAT employees [141] and because of the significant number of issues associated with the CAT, the consultants are budgeted to provide assistance in the management of various CAT matters and the processes related to such matters.[142] CAT LLC determined the budgeted consulting costs were appropriate, as the consulting services were to be provided at reasonable market rates that were comparable to the rates charged by other consulting firms for similar work. Moreover, the total budgeted costs for such consulting services were appropriate in light of the breadth of services provided by Deloitte. The services budgeted to be performed by Deloitte and the budgeted costs related to such services are described above.[143]

(viii) Insurance

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted insurance costs as a part of CAT Fees.[144] CAT LLC determined that the budgeted insurance costs described in this filing are reasonable and should be included as a part of the Budgeted CAT Costs 2026–1. CAT LLC determined that it is common practice to have directors' and officers' liability insurance, and errors and omissions liability insurance. CAT LLC further determined that it was important to have cyber security insurance given the nature of the CAT, and such a decision is consistent with the CAT NMS Plan, which states that the cyber incident response plan may include ''[i]nsurance against security breaches.'' [145] As discussed above,[146] CAT LLC determined that the budgeted insurance costs were appropriate given its prior experience with this market and an analysis of the alternative insurance offerings. Based on this analysis, CAT LLC determined that the selected insurance policies provided appropriate coverage at reasonable market rates.[147]

(ix) Professional and Administration

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted professional and administration costs as a part of CAT Fees.[148] CAT LLC determined that the budgeted professional and administration costs described in this filing are reasonable and should be included as a part of Budgeted CAT Costs 2026–1. Because there are no CAT employees, all required accounting, financial, tax, cash management and treasury functions for CAT LLC have been outsourced at market rates. In addition, the required annual financial statement audit of CAT LLC is included in professional and administration costs, which costs are also at market rates. The services performed by Anchin and Grant Thornton and the costs

[147] *Id.*

[148] Section 11.3(a)(iii)(B)(B)(5) of the CAT NMS Plan.

related to such services are described above.[149]

CAT LLC anticipates continuing to make use of Anchin, a financial advisory firm, to assist with financial matters for the CAT. CAT LLC determined that the budgeted costs for Anchin were appropriate, as the financial advisory services were to be provided at reasonable market rates that were comparable to the rates charged by other such firms for similar work. Moreover, the total budgeted costs for such financial advisory services were appropriate in light of the breadth of services provided by Anchin. The services budgeted to be performed by Anchin and the budgeted costs related to such services are described above.[150]

CAT LLC anticipates continuing to make use of Grant Thornton, an independent accounting firm, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC determined that the budgeted costs for Grant Thornton were appropriate, as the accounting services were to be provided at reasonable market rates that were comparable to the rates charged by other such firms for similar work. Moreover, the total budgeted costs for such accounting services were appropriate in light of the breadth of services provided by Grant Thornton. The services budgeted to be performed by Grant Thornton and the budgeted costs related to such services are described above.[151]

(x) Public Relations Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted public relations costs as a part of CAT Fees.[152] However, as described above,[153] CAT LLC determined not to include any public relations costs in Budgeted CAT Costs 2026–1. CAT LLC determined that it was reasonable not to include any public relations costs in the Budgeted CAT Costs 2026–1.

(xi) Interest Income

Section 11.1(a) of the CAT NMS Plan requires the CAT budget to include ''the sources of all revenues to cover costs.'' Accordingly, the Updated 2026 CAT Budget includes a line item for interest income. Specifically, the Updated 2026 CAT Budget includes $1,453,382 in interest income for the CAT Fee 2026–1 Period.[154] CAT LLC determined that using interest income to reduce the amount to be collected via CAT Fees is reasonable and should be included as a part of the Budgeted CAT Costs 2026–1.

(xii) Reserve

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted reserve costs as a part of CAT Fees.[155] CAT LLC determined that the reserve in the amount of 25% of the Updated 2026 CAT Budget (other than the reserve) complies with the requirements of the CAT NMS Plan related to a reserve, is a reasonable amount, and, therefore, should be included as a part of the Updated 2026 CAT Budget.

In its approval order for the CAT Funding Model, the Commission stated that it would be appropriate for the annual operating budget for the CAT to ''include a reserve of not more than 25% of the annual budget.'' [156] In making this statement, the Commission noted the following:

Because the CAT is a critical regulatory tool/system, the CAT needs to have a stable funding source to build financial stability to support the Company as a going concern. Funding for the CAT, as noted in Section 11.1(b), is the responsibility of the Participants and the industry. Because CAT fees are charged based on the budget, which is based on anticipated volume, it is appropriate to have a reserve on hand to prevent a shortfall in the event there is an unexpectedly high volume in a given year. A reserve would help to assure that the CAT has sufficient resources to cover costs should there be unanticipated costs or costs that are higher than expected.[157]

The SEC also recognized that a reserve would help address the difficulty in predicting certain variable CAT costs, like trading volume.[158] The SEC also recognized that CAT fees will be collected approximately three months after trading activity on which a CAT fee is based, or 25% of the year, and that the reserve would be available to address funding needs related to this three-month delay.[159] The inclusion of the proposed reserve in the Updated 2026 CAT Budget would provide each of these benefits to the CAT. The reserve is discussed further above.[160]

As discussed further below,[161] however, a surplus reserve balance in excess of the budgeted 25% reserve has been collected as of the beginning of the year of 2026. Accordingly, the Updated 2026 CAT Budget indicates that this surplus would be used to offset a portion of CAT costs for the CAT Fee 2026–1 Period, thereby reducing the fee rate for CAT Fee 2026–1 ($0.000001 per executed equivalent share). If the fee rate for CAT Fee 2026–1 were calculated solely based on the reasonably budgeted costs for CAT for May–December 2026, excluding the reduction in that amount due to the surplus reserve offset, the fee rate would be $0.000010 per executed equivalent share.

(B) Reconciliation of Budget to the Collected Fees

The CAT NMS Plan also requires fee filings for Prospective CAT Fees to include ''a discussion of how the budget is reconciled to the collected fees.'' [162] As discussed above,[163] this reserve balance of $102,391,135 collected via prior CAT Fees would be used to offset a portion of CAT costs for CAT Fee Period 2026–1, thereby reducing the fee rate to be paid for CAT Fee 2026–1. Specifically, the total costs (including the 25% reserve) for CAT Fee 2026–1 of $117,540,783 would be reduced by the $102,391,135 in reserve. Therefore, the Total Budgeted CAT Costs 2026–1 would be $15,149,648. Such surplus reserve balance would be used to reduce the fee rate for CAT Fee 2026–1 ($0.000001 per executed equivalent share).

(C) Total Executed Equivalent Share Volume for the Prior 12 Months

The total executed equivalent share volume of transactions in Eligible Securities for the period from March 2025 through February 2026 was 5,980,937,549,360.49 executed equivalent shares. CAT LLC determined the total executed equivalent share volume for the prior twelve months by counting executed equivalent shares in the same manner as it counts executed equivalent shares for CAT billing purposes.[164]

(D) Projected Executed Equivalent Share Volume for the CAT Fee 2026–1 Period

CAT LLC has determined that the projected total executed equivalent

[149] *See* Section 3(a)(2)(C)(ix) above.

[164] *See* Section 3(a)(2)(D) above.

share volume for the eight months of the CAT Fee 2026–1 Period by multiplying by 8/12ths the executed equivalent share volume for the prior twelve months: 8/12 times 5,980,937,549,360.49 executed equivalent shares.[165] The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has increased from prior years (*e.g.,* the executed equivalent share volume for 2024 was 4,295,884,600,069.41), and the Operating Committee believes that it is reasonable to conclude that the annual executed equivalent share volume will remain at the higher level.

(E) Actual Fee Rate for CAT Fee 2026–1

(i) Decimal Places

As noted in the approval order for the CAT Funding Model, as a practical matter, the fee filing for a CAT Fee would provide the exact fee per executed equivalent share to be paid for each CAT Fee, by multiplying the Fee Rate by one-third and describing the relevant number of decimal places for the fee rate.[166] Accordingly, proposed paragraph (a)(6)(B) of the fee schedule would set forth a fee rate of $0.000001 per executed equivalent share. This fee rate is calculated by multiplying Fee Rate 2026–1 by one-third and rounding the result to six decimal places. CAT LLC determined that the use of six decimal places is reasonable as it balances the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.[167]

(ii) Reasonable Fee Level

The Exchange believes that charging CAT Fee 2026–1 with a fee rate of $0.000001 per executed equivalent share is reasonable because it provides for a revenue stream for the Company that is aligned with the Budgeted CAT Costs 2026–1. Moreover, the Exchange believes that the level of the fee rate is reasonable, as it is less than CAT Fee 2025–2 and is comparable to other transaction-based fees, including fees assessed pursuant to Section 31.[168] As a result, the magnitude of CAT Fee 2026–1 is small, and therefore will mitigate any potential adverse economic effects or inefficiencies.[169]

(3) CAT Fee 2026–1 Provides for an Equitable Allocation of Fees

CAT Fee 2026–1 provides for an equitable allocation of fees, as it equitably allocates CAT costs between and among the Participants and Industry Members. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act, including the formula for calculating CAT Fees as well as the Industry Members to be charged the CAT Fees.[170] In approving the CAT Funding Model, the SEC stated that ''[t]he Participants have sufficiently demonstrated that the proposed allocation of fees is appropriate and meets the Rule 608(b) approval standard.'' [171] Accordingly, the CAT Funding Model sets forth the requirements for allocating fees related to Budgeted CAT Costs among Participants and Industry Members, and the fee filings for CAT Fees must comply with those requirements.

CAT Fee 2026–1 provides for an equitable allocation of fees as it complies with the requirements regarding the calculation of CAT Fees as set forth in the CAT NMS Plan. For example, as described above, the calculation of CAT Fee 2026–1 complies with the formula set forth in Section 11.3(a) of the CAT NMS Plan. In addition, CAT Fee 2026–1 would be charged to CEBBs and CEBSs in accordance with Section 11.3(a) of the CAT NMS Plan. Furthermore, the Participants would be charged for their designated share of the Budgeted CAT Costs 2026–1 through a fee implemented via the CAT NMS Plan, which would have the same fee rate as CAT Fee 2026–1.

In addition, as discussed above, each of the inputs into the calculation of CAT Fee 2026–1—the Budgeted CAT Costs 2026–1, the count for the executed equivalent share volume for the prior 12 months, and the projected executed equivalent share volume for the CAT Fee 2026–1 Period—is reasonable. Moreover, these inputs lead to a reasonable fee rate for CAT Fee 2026–1 that is lower than other fee rates for transaction-based fees. A reasonable fee rate allocated in accordance with the requirements of the CAT Funding Model provides for an equitable allocation of fees.

(4) CAT Fee 2026–1 Is Not Unfairly Discriminatory

CAT Fee 2026–1 is not an unfairly discriminatory fee. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfies the requirements of the Exchange Act. In reaching this conclusion, the SEC analyzed the potential effect of CAT Fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. CAT Fee 2026–1 complies with the requirements regarding the calculation of CAT Fees as set forth in the CAT NMS Plan. In addition, as discussed above, each of the inputs into the calculation of CAT Fee 2026–1 and the resulting fee rate for CAT Fee 2026–1 is reasonable. Therefore, CAT Fee 2026–1 does not impose an unfairly discriminatory fee on Industry Members.

The Exchange believes the proposed fees established pursuant to the CAT Funding Model promote just and equitable principles of trade, and, in general, protect investors and the public interest, and are provided in a transparent manner and with specificity in the fee schedule. The Exchange also believes that the proposed fees are reasonable because they would provide ease of calculation, ease of billing and other administrative functions, and predictability of a fee based on fixed rate per executed equivalent share. Such factors are crucial to estimating a reliable revenue stream for CAT LLC and for permitting Exchange members to reasonably predict their payment obligations for budgeting purposes.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

Section 6(b)(8) of the Act [172] requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that CAT Fee 2026–1 implements provisions of the CAT NMS Plan that were approved by the

[165] *Id.*

[166] CAT Funding Model Approval Order at 13445, n.677.

[167] *See* Section 3(a)(5)(A) above.

[168] For example, as the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from $0.00007 per share to $0.00072 per share. CAT Funding Model Approval Order at 13469.

[169] *Id.*

[170] *See* Section 11.3(a) of the CAT NMS Plan.

[171] CAT Funding Model Approval Order at 13412.

[172] 15 U.S.C. 78f(b)(8).

Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan.

In addition, all Participants (including exchanges and FINRA) are proposing to introduce CAT Fee 2026–1 on behalf of CAT LLC to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the Participants.

Furthermore, in approving the CAT Funding Model, the SEC analyzed the potential competitive impact of the CAT Funding Model, including competitive issues related to market services, trading services and regulatory services, efficiency concerns, and capital formation.[173] The SEC also analyzed the potential effect of CAT fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Based on this analysis, the SEC approved the CAT Funding Model as compliant with the Exchange Act. CAT Fee 2026–1 is calculated and implemented in accordance with the CAT Funding Model as approved by the SEC.

As discussed above, each of the inputs into the calculation of CAT Fee 2026–1 is reasonable and the resulting fee rate for CAT Fee 2026–1 calculated in accordance with the CAT Funding Model is reasonable. Therefore, CAT Fee 2026–1 would not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were either solicited or received.

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[174]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

## IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

*Electronic Comments*

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–ISE–2026–24 on the subject line.

*Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–ISE–2026–24. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–ISE–2026–24 and should be submitted on or before June 8, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[175]

## SECURITIES AND EXCHANGE COMMISSION

**[Release No. 34–105474; File No. SR–LTSE–2026–12]**

## Self-Regulatory Organizations; Long-Term Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Establish Fees for Industry Members Related To Reasonably Budgeted CAT Costs of the National Market System Plan Governing the Consolidated Audit Trail for May 1, 2026 Through December 31, 2026

May 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 29, 2026, Long-Term Stock Exchange, Inc. (''LTSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

## I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Securities and Exchange Commission (''Commission'') a proposed rule change to establish fees for Industry Members [3] related to reasonably budgeted CAT costs of the National Market System Plan Governing the Consolidated Audit Trail (the ''CAT NMS Plan'' or ''Plan'') for the period from May 1, 2026 through December 31, 2026.

The text of the proposed rule change is available at the Exchange's website at *https://longtermstockexchange.com/* and at the principal office of the Exchange.

## II. Self-Regulatory Organization's Statement on the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] An ''Industry Member'' is defined as ''a member of a national securities exchange or a member of a national securities association.'' LTSE Rule 11.610(u). *See also* Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. LTSE Rule Series 11.600.

the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

1. Purpose

On July 11, 2012, the Commission adopted Rule 613 of Regulation NMS, which required the self-regulatory organizations (''SROs'') to submit a national market system (''NMS'') plan to create, implement and maintain a consolidated audit trail that would capture customer and order event information for orders in NMS securities across all markets, from the time of order inception through routing, cancellation, modification or execution.[4] On November 15, 2016, the Commission approved the CAT NMS Plan.[5] Under the CAT NMS Plan, the Operating Committee has the discretion to establish funding for CAT LLC to operate the CAT, including establishing fees for Industry Members to be assessed by CAT LLC that would be implemented on behalf of CAT LLC by the Participants.[6] The Operating Committee adopted a revised funding model to fund the CAT (''CAT Funding Model''). On March 16, 2026, the Commission approved the CAT Funding Model after concluding that the model satisfied the requirements of Section 11A of the Exchange Act and Rule 608 thereunder.[7]

The CAT Funding Model provides a framework for the recovery of the costs to create, develop and maintain the CAT, including providing a method for allocating costs to fund the CAT among Participants and Industry Members. The CAT Funding Model establishes two categories of fees: (1) CAT fees assessed by CAT LLC and payable by certain Industry Members to recover a portion of historical CAT costs previously paid by the Participants (''Historical CAT Assessment'' fees); and (2) CAT fees assessed by CAT LLC and payable by Participants and Industry Members to fund prospective CAT costs (''CAT Fees'').[8]

Under the CAT Funding Model, Participants, CEBBs and CEBSs are subject to fees designed to cover the ongoing budgeted costs of the CAT, as determined by the Operating Committee. ''The Operating Committee will establish fees ('CAT Fees') to be payable by Participants and Industry Members with regard to CAT costs not previously paid by the Participants ('Prospective CAT Costs').'' [9] In establishing a CAT Fee, the Operating Committee will calculate a ''Fee Rate'' for the relevant period. Then, for each month in which a CAT Fee is in effect, each CEBB and CEBS would be required to pay the fee for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the fee for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Fee Rate.

The CAT Fees to be paid by CEBBs and CEBSs are designed to contribute toward the recovery of two-thirds of the budgeted CAT costs for the relevant period.[10] The CAT Funding Model is designed to require that the Participants contribute to the recovery of the remaining one-third of the budgeted CAT costs.[11] Participants would be subject to the same Fee Rate as CEBBs and CEBSs.[12] While CAT Fees charged to Industry Members become effective in accordance with the requirements of Section 19(b) of the Exchange Act,[13] CAT fees charged to Participants are implemented via an approval of the CAT fees by the Operating Committee in accordance with the requirements of the CAT NMS Plan.[14] Accordingly, this filing does not address Participant CAT fees as they are described in the CAT NMS Plan.[15]

CAT LLC proposes to charge CEBBs and CEBSs (as described in more detail below) CAT Fee 2026–1 to recover the reasonably budgeted CAT costs for the period from May 1, 2026 through December 31, 2026 in accordance with the CAT Funding Model. To implement this fee on behalf of CAT LLC, the CAT NMS Plan requires the Participants to ''file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves, and such fees shall be labeled as 'Consolidated Audit Trail Funding Fees.' '' [16] The Plan further states that ''[o]nce the Operating Committee has approved such Fee Rate, the Participants shall be required to file with the SEC pursuant to Section 19(b) of the Exchange Act CAT Fees to be charged to Industry Members calculated using such Fee Rate.'' [17] Accordingly, the purpose of this filing is to implement a CAT Fee on behalf of CAT LLC for Industry Members, referred to as CAT Fee 2026–1, in accordance with the CAT NMS Plan.

(1) CAT Executing Brokers

CAT Fee 2026–1 will be charged to each CEBB and CEBS for each applicable transaction in Eligible Securities.[18] The CAT NMS Plan defines a ''CAT Executing Broker'' to mean:

(a) with respect to a transaction in an Eligible Security that is executed on an exchange, the Industry Member identified as the Industry Member responsible for the order on the buy-side of the transaction and the Industry Member responsible for the sell-side of the transaction in the equity order trade event and option trade event in the CAT Data submitted to the CAT by the relevant exchange pursuant to the Participant Technical Specifications; and (b) with respect to a transaction in an Eligible Security that is executed otherwise than on an exchange and

[4] Securities Exchange Act Rel. No. 67457 (July 18, 2012), 77 FR 45722 (Aug. 1, 2012).

[5] Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696 (Nov. 23, 2016) (''CAT NMS Plan Approval Order'').

[6] Section 11.1(b) of the CAT NMS Plan.

[7] Securities Exchange Act Rel. No. 105003 (Mar. 16, 2026), 91 FR 13410 (Mar. 19, 2026) (''CAT Funding Model Approval Order''). This CAT Funding Model replaced the prior funding model that was approved by the Commission on September 6, 2023. Securities Exchange Act Rel. No. 98290 (Sept. 6, 2023), 88 FR 62628 (Sept. 12, 2023).

[8] Under the CAT Funding Model, the Operating Committee may establish CAT Fees related to CAT costs going forward. Section 11.3(a) of the CAT NMS Plan. This filing only establishes CAT Fee 2026–1 related to reasonably budgeted CAT costs for the period from May 1, 2026 through December 31, 2026 as described herein; it does not address any other potential CAT Fees related to CAT costs. Any such other CAT Fee will be subject to a separate fee filing. In addition, under the CAT Funding Model, the Operating Committee may establish one or more Historical CAT Assessments. Section 11.3(b) of the CAT NMS Plan. This filing does not address any Historical CAT Assessments.

[9] Section 11.3(a) of the CAT NMS Plan.

[10] Section 11.3(a)(iii)(A) of the CAT NMS Plan.

[11] Section 11.3(a)(ii)(A) of the CAT NMS Plan.

[12] Section 11.3(a)(ii) of the CAT NMS Plan.

[13] Section 11.3(a)(i)(A)(I) of the CAT NMS Plan.

[14] CAT Funding Model Approval Order at 13448.

[15] *See* Section 11.3(a)(ii) and Appendix B of the CAT NMS Plan.

[16] Section 11.1(b) of the CAT NMS Plan.

[17] Section 11.3(a)(i)(A)(I) of the CAT NMS Plan.

[18] In its approval of the CAT Funding Model, the Commission determined that charging CAT fees to CAT Executing Brokers was appropriate. In reaching this conclusion, the Commission noted that the use of CAT Executing Brokers is appropriate because the CAT Funding Model is based upon the calculation of *executed* equivalent shares, and, therefore, charging CAT Executing Brokers would reflect their executing role in each transaction. Furthermore, the Commission noted that, because CAT Executing Brokers are already identified in transaction reports from the exchanges and FINRA's equity trade reporting facilities recorded in CAT Data, charging CAT Executing Brokers could streamline the billing process. CAT Funding Model Approval Order at 13413.

required to be reported to an equity trade reporting facility of a registered national securities association, the Industry Member identified as the executing broker and the Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event in the CAT Data submitted to the CAT by FINRA pursuant to the Participant Technical Specifications; provided, however, in those circumstances where there is a non-Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event or no contra-side executing broker is identified in the TRF/ORF/ADF transaction data event, then the Industry Member identified as the executing broker in the TRF/ORF/ADF transaction data event would be treated as CAT Executing Broker for the Buyer and for the Seller.[19]

The following fields of the Participant Technical Specifications indicate the CAT Executing Brokers for the transactions executed on an exchange:

EQUITY ORDER TRADE (EOT)[20]

| No. | Field name | Data type | Description | Include key |
|---|---|---|---|---|
| 12.*n*.8/13.*n*.8 | member | Member Alias | The identifier for the member firm that is responsible for the order on this side of the trade.<br>Not required if there is no order for the side as indicated by the NOBUYID/NOSELLID instruction.<br>This must be provided if orderID is provided. | C |

OPTION TRADE (OT)[21]

| No. | Field name | Data type | Description | Include key |
|---|---|---|---|---|
| 16.*n*.13/17.*n*.13 | member | Member Alias | The identifier for the member firm that is responsible for the order. | R |

In addition, the following fields of the Participant Technical Specifications would indicate the CAT Executing Brokers for the transactions executed otherwise than on an exchange:

TRF/ORF/ADF TRANSACTION DATA EVENT (TRF)[22]

| No. | Field vame | Data type | Description | Include key |
|---|---|---|---|---|
| 26 | reportingExecutingMpid | Member Alias | MPID of the executing party | R |
| 28 | contraExecutingMpid | Member Alias | MPID of the contra-side executing party | C |

(2) Calculation of Fee Rate 2026–1

The Operating Committee determined the Fee Rate to be used in calculating CAT Fee 2026–1 (''Fee Rate 2026–1'') by dividing the reasonably budgeted CAT costs (''Budgeted CAT Costs 2026–1'') for the period from May 1, 2026 through December 31, 2026 (''CAT Fee 2026–1 Period'') by the reasonably projected total executed share volume of all transactions in Eligible Securities for the eight-month recovery period, as discussed in detail below.[23] Based on this calculation, the Operating Committee has determined that Fee Rate 2026–1 would be $0.000003799483243631228 per executed equivalent share. This rate is then divided by three and rounded to determine the fee rate of $0.000001 per executed equivalent share that will be assessed to CEBBs and CEBSs, as also discussed in detail below.

(A) CAT Fee 2026–1 Period

CAT LLC proposes to implement CAT Fee 2026–1. CAT LLC proposes to commence CAT Fee 2026–1 during the year, rather than at the beginning of the year. Accordingly, CAT Fee 2026–1 ''would be calculated as described in paragraph (II)'' of Section 11.3(a)(i)(A) of the CAT NMS Plan,[24] which states that ''[d]uring each year, the Operating Committee will calculate a new Fee Rate by dividing the reasonably budgeted CAT costs for the remainder of the year by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for the remainder of the year.'' [25] For CAT Fee 2026–1, the reasonably budgeted CAT costs for ''the remainder of the year'' are the reasonably budgeted CAT costs from May 1, 2026 through December 31, 2026 as set forth in the updated annual budget for 2026 for CAT LLC approved by the Operating Committee on March

[19] Section 1.1 of the CAT NMS Plan. In its approval order for the CAT Funding Model, the Commission ''recognize[d] that Industry Members may pass-through CAT fees for customer executed volume.'' *See* CAT Funding Model Approval Order at 13424.

[20] *See* Table 23, Section 4.7 (Order Trade Event) of the CAT Reporting Technical Specifications for Plan Participants, Version 4.2.0–r2 (Feb. 24, 2026), *https://www.catnmsplan.com/sites/default/files/2026-02/02.24.2026-CAT_Reporting_Technical_Specifications_for_Participants_4.2.0-r2.pdf* (''CAT Reporting Technical Specifications for Plan Participants'').

[21] *See* Table 52, Section 5.2.5.1 (Simple Option Trade Event) of the CAT Reporting Technical Specifications for Plan Participants.

[22] *See* Table 62, Section 6.1 (TRF/ORF/ADF Transaction Data Event) of the CAT Reporting Technical Specifications for Plan Participants.

[23] Section 11.3(a)(i) of the CAT NMS Plan.

[24] Section 11.3(a)(i)(A)(IV) of the CAT NMS Plan.

[25] Section 11.3(a)(i)(A)(II) of the CAT NMS Plan.

31, 2026 (''Updated 2026 CAT Budget'').[26]

(B) Executed Equivalent Shares for Transactions in Eligible Securities

Under the CAT NMS Plan, for purposes of calculating CAT Fees, executed equivalent shares in a transaction in Eligible Securities will be reasonably counted as follows: (1) each executed share for a transaction in NMS Stocks will be counted as one executed equivalent share; (2) each executed contract for a transaction in Listed Options will be counted based on the multiplier applicable to the specific Listed Options (*i.e.,* 100 executed equivalent shares or such other applicable multiplier); and (3) each executed share for a transaction in OTC Equity Securities will be counted as 0.01 executed equivalent share.[27]

(C) Budgeted CAT Costs 2026–1

The CAT NMS Plan states that ''[t]he budgeted CAT costs for the year shall be comprised of all reasonable fees, costs and expenses reasonably budgeted to be incurred by or for the Company in connection with the development, implementation and operation of the CAT as set forth in the annual operating budget approved by the Operating Committee pursuant to Section 11.1(a) of the CAT NMS Plan, or as adjusted during the year by the Operating Committee.'' [28] Section 11.1(a) of the CAT NMS Plan describes the requirement for the

Operating Committee to approve an operating budget for CAT LLC on an annual basis. It requires the budget to ''include the projected costs of the Company, including the costs of developing and operating the CAT for the upcoming year, and the sources of all revenues to cover such costs, as well as the funding of any reserve that the Operating Committee reasonably deems appropriate for the prudent operation of the Company.'' Section 11.1(a)(i) of the CAT NMS Plan further states that:

[w]ithout limiting the foregoing, the reasonably budgeted CAT costs shall include technology (including cloud hosting services, operating fees, CAIS operating fees, change request fees and capitalized developed technology costs), legal, consulting, insurance, professional and administration, and public relations costs, a reserve and such other cost categories as reasonably determined by the Operating Committee to be included in the budget.

In accordance with the requirements under the CAT NMS Plan, the Operating Committee approved an annual budget for 2026 for CAT LLC (''Original 2026 CAT Budget'') on December 11, 2025.[29] On March 31, 2026, the Operating Committee approved an updated budget for 2026, referred to as the Updated 2026 CAT Budget. The Updated 2026 CAT Budget includes actual costs for each category for January and February 2026, with updated estimated costs for the remainder of the year. The updated costs for May through December as included in the Updated 2026 CAT Budget (*i.e.,* Budgeted CAT Costs 2026–1) are the costs used in calculating CAT Fee 2026–1.[30] The 2026 CAT budgets, both the Original 2026 CAT Budget and the Updated 2026 CAT Budget, were prepared on the accrual basis of accounting.[31]

As described in detail below, the Budgeted CAT Costs 2026–1 would be $15,149,648. CEBBs collectively will be responsible for one-third of the Budgeted CAT Costs 2026–1 (which is $5,049,882.67), and CEBSs collectively will be responsible for one-third of the Budgeted CAT Costs 2026–1 (which is $5,049,882.67).

The following describes in detail the Budgeted CAT Costs 2026–1 for CAT Fee 2026–1. The following cost details are provided in accordance with the requirement in the CAT NMS Plan to provide in the fee filing the following:

the budget for the upcoming year (or remainder of the year, as applicable), including a brief description of each line item in the budget, including (1) technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration, and (6) public relations costs, a reserve and/or such other categories as reasonably determined by the Operating Committee to be included in the budget, and the reason for changes in each such line item from the prior CAT fee filing.[32]

Each of the costs described below is reasonable, appropriate and necessary for the creation, implementation and maintenance of CAT.

The following table breaks down the Budgeted CAT Costs 2026–1 into the categories set forth in Section 11.3(a)(iii)(B) of the CAT NMS Plan.[33] The Budgeted CAT Costs 2026–1 reflect the costs for May through December as included in the Updated 2026 CAT Budget. The Budgeted CAT Costs 2026–1 are the costs used in calculating CAT Fee 2026–1.

BUDGETED CAT COSTS 2026–1

| Budget category | Budgeted CAT costs 2026–1 [b] (*i.e.,* costs for May–December 2026) |
|---|---|
| Capitalized Developed Technology Costs [a] | [c] $3,450,000 |
| Technology Costs | 83,737,680 |
| Cloud Hosting Services | [d] 49,866,667 |
| Operating Fees | [e] 19,691,953 |
| CAIS Operating Fees | [f] 14,179,060 |
| Change Request Fees | [g] 0 |

[26] The Updated 2026 CAT Budget is available on the CAT website (*https://www.catnmsplan.com/sites/default/files/2026-04/03.31.26-CAT-2026-Budget.pdf*).

[27] Section 11.3(a)(i)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission concluded that ''the use of executed equivalent share volume provides an appropriate basis for the calculation of CAT fees.'' CAT Funding Model Approval Order at 13413.

[28] Section 11.3(a)(i)(C) of the CAT NMS Plan.

[29] The Original 2026 CAT Budget is available on the CAT website (*https://www.catnmsplan.com/sites/default/files/2025-12/12.08.25-CAT-LLC-2026-Financial_and_Operating_Budget.pdf*).

[30] The version of the Updated 2026 CAT Budget set forth on the CAT website is presented on a quarterly basis, but is prepared based on more granular detail. The costs for May and June are estimated based on two-thirds of costs for Q2 where the budgeted monthly amounts are consistent. For those cases in which the costs for a category vary from month to month in Q2, the specific budgeted amounts for May and June are noted.

[31] CAT budgets for periods prior to 2025 were prepared on the cash basis of accounting, as such budgets were primarily used to determine the dollar amount of promissory notes from the Participants that were required to fund the ongoing operations of the CAT. Commencing in 2025, with the contemplated recovery of costs from Industry Members and the Participants via CAT Fees, the Original 2025 CAT Budget was prepared on the accrual basis of accounting to properly match projected revenues with estimated expenses incurred. A cash basis budget reflects expenditures when paid, while an accrual basis budget reflects expenditures when incurred. In moving from a cash basis budget to an accrual basis budget, there is no double counting of expenses.

[32] Section 11.3(a)(iii)(B) of the CAT NMS Plan.

[33] Note that costs and related cost calculations provided in this filing may reflect minor variations from the budgeted costs due to rounding.

BUDGETED CAT COSTS 2026–1—Continued

| Budget category | Budgeted CAT costs 2026–1 [b] (*i.e.,* costs for May–December 2026) |
|---|---|
| Legal | [h] 5,670,452 |
| Consulting | [i] 1,025,957 |
| Insurance | [j] 852,768 |
| Professional and administration | [k] 749,151 |
| Public relations | [l] 0 |
| Interest Income | [m] (1,453,382) |
| Total Costs | 94,032,626 |
| Reserve (25% of Total Costs) | 23,508,157 |
| Total Costs and Reserve | 117,540,783 |
| Use of Existing Reserve | [n] (102,391,135) |
| Total Budgeted CAT Costs 2026–1 | 15,149,648 |

[a] The non-cash amortization of these capitalized developed technology costs to be incurred during the CAT Fee 2026–1 Period have been appropriately excluded from the above table.[34]

[b] Budgeted CAT Costs 2026–1 described in this table of costs were determined based on an analysis of a variety of factors, including historical costs/invoices, estimated costs from respective vendors/service providers, contractual terms with vendors/service providers, anticipated service levels and needs, and discussions with vendors and Participants.

[c] This cost number for capitalized developed technology costs reflects (1) capitalized developed technology costs of $3,450,000 for May, $0 for June and $0 for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget; and (2) $0 for the Software License Fee 2026 for the second, third, and fourth quarters of 2026 as included in the Updated 2026 CAT Budget: ($3,450,000 + $0 + $0 + $0) + ($0 + $0 + $0) = $3,450,000.

[d] This cost number for cloud hosting services reflects two-thirds of the cloud hosting services costs for the second quarter and the cloud hosting services for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget: (⅔ × $18,700,000) + $18,700,000 + $18,700,000 = $49,866,667.

[e] This cost number for operating fees reflects (1) two-thirds of the Non-CAIS fixed operating fees for the second quarter and the Non-CAIS fixed operating fees for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget and (2) two-thirds of the market data vendor fees for the second quarter and the market data vendor fees for the third and fourth quarter of 2026 as included in the Updated 2026 CAT Budget: ((⅔ × $7,191,853) + $7,191,853 + $7,191,853) + ((⅔ × $192,630) + $192,630 + $192,630) = $19,691,953.

[f] This cost number for CAIS operating fees reflects two-thirds of the CAIS fixed operating fees for the second quarter and the CAIS fixed operating fees for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget: (⅔ × $5,317,147) + $5,317,147 + $5,317,147 = $14,179,060.

[g] This $0 cost number for change requests reflects the fact that there were no change request fees set forth in the Updated 2026 CAT Budget.

[h] This cost number for legal services reflects two-thirds of the legal costs for the second quarter and the legal costs for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget: (⅔ × $2,145,170) + $2,125,170 + $2,115,170 = $5,670,452.

[i] This cost number for consulting services reflects two-thirds of the consulting costs for the second quarter and the consulting costs for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget: (⅔ × $384,734) + $384,734 + $384,734 = $1,025,957.

[j] This cost number for insurance reflects two-thirds of the insurance costs for the second quarter and the insurance costs for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget: (⅔ × $300,977) + $321,042 + $331,074 = $852,768.

[k] This cost number for professional and administration services reflects two-thirds of the professional and administration costs for the second quarter and the professional and administration costs for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget: (⅔ × $280,932) + $280,932 + $280,932 = $749,151.

[l] This $0 cost number of change requests reflects the fact that there were no change request fees set forth in the Updated 2026 CAT Budget.

[m] This interest income reflects interest income (net of bank fees) of $517,208 for May and June and interest income (net of bank fees) for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget: $517,208 + $571,010 + $365,164 = $1,453,382. Note that interest income for May and June 2026 of $517,208 is slightly less than two-thirds of $809,598 (which is $539,732) for the second quarter as the amount of interest income varies from month to month.

[n] This amount for the use of the existing reserve is calculated by subtracting from the Accrued Liquidity Reserve Balance as of the Beginning of the Year in the Updated 2026 CAT Budget the 25% Incremental Liquidity Reserve Accrued during 2026 for the first quarter and for April of 2026 as included in the Updated 2026 CAT Budget: $155,403,378 − ($41,800,153 + $11,212,091) = $102,391,135. Note that the 25% Incremental Liquidity Reserved Accrued during 2026 for April 2026 of $11,212,091 is slightly more than one-third of $33,366,432 (which is $11,122,144) for the second quarter as the amount of the 25% Incremental Liquidity Reserved Accrued during 2026 varies from month to month.

To the extent that CAT LLC enters into notes with Participants or others to pay costs incurred during the period in which CAT Fee 2026–1 is in effect, CAT LLC will use the proceeds from CAT Fee 2026–1 and the related Participant CAT fees to repay such notes.

The following table compares the annual budgeted CAT costs as set forth in the updated annual CAT budget for 2025 approved by the Operating Committee in May 2025 (''May Updated 2025 CAT Budget''),[35] the updated annual CAT budget for 2025 approved by the Operating Committee in November 2025 (''November Updated 2025 CAT Budget''),[36] the Original 2026 CAT Budget and the Updated 2026 CAT Budget, and is provided for informational purposes. In each case, the costs provided reflect the costs for the entire year for each of the budgets; this differs from the above chart which focuses on budgeted costs for the period from May 1, 2026 through December 31, 2026, which, as noted, are the costs that are used in the calculation of the fee rate in this fee filing.

[34] With respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

[35] The May Updated 2025 CAT Budget is available on the CAT website (*https://www.catnmsplan.com/sites/default/files/2025-05/05.19.25-CAT-LLC-2025-Financial_and_Operating-Budget.pdf*).

[36] The November Updated 2025 CAT Budget is available on the CAT website (*https://www.catnmsplan.com/sites/default/files/2025-12/12.22.25_CAT-LLC-2025-Finacial_and_Operating-Budget.pdf*).

COMPARISON OF FULL YEAR BUDGETED COSTS

| Budget category | Full year of 2025 budgeted CAT costs from updated 2025 CAT budget (May 2025) | Full year of 2025 budgeted CAT costs from updated 2025 budget (Nov. 2025) | Full year of 2026 budgeted CAT costs from original 2026 CAT budget | Full year of 2026 budgeted CAT costs from updated 2026 CAT budget |
|---|---|---|---|---|
| Capitalized Developed Technology Costs [a] | $4,871,962 | $5,163,991 | $8,228,827 | $8,378,964 |
| Technology Costs | 211,548,472 | 173,091,660 | 137,514,003 | 128,643,476 |
| Cloud Hosting Services | 159,230,937 | 122,084,811 | 81,900,006 | 77,529,362 |
| Operating Fees [b] | 30,817,686 | 29,932,001 | 34,345,413 | 29,845,524 |
| CAIS Operating Fees | 20,749,848 | 20,749,848 | 21,268,584 | 21,268,590 |
| Change Request Fees | 750,000 | 325,000 | 0 | 0 |
| Legal | 7,370,002 | 7,312,547 | 8,485,000 | 8,939,184 |
| Consulting | 1,749,998 | 1,750,000 | 1,550,000 | 1,550,000 |
| Insurance | 1,594,452 | 1,368,750 | 1,505,625 | 1,254,070 |
| Professional and administration | 1,193,090 | 1,392,679 | 1,145,500 | 1,085,500 |
| Public relations | 6,575 | 6,575 | 0 | 0 |
| Interest Income | 0 | (2,510,223) | (1,995,958) | (2,806,325) |
| Total Annual CAT Costs [c] | 228,334,551 | 187,575,979 | 156,432,998 | 147,044,869 |

[a] This cost number is calculated by adding together the Capitalized Developed Technology Costs and the Software License Fee for each budget.
[b] This cost number is calculated by adding together the Operating fees, the Cyber Insurance Premium Adjustment (if any) and market data vendor fees (if any separate fees) for each budget.
[c] This total cost number does not include an amount for a reserve.

In addition, the following table compares the budgeted costs for January and February 2026 that were used in drafting the Original 2026 CAT Budget with the actual costs for January and February 2026 that were used in drafting the Updated 2026 CAT Budget. The Original 2026 CAT Budget includes budgeted costs for January and February 2026, whereas the Updated 2026 CAT Budget includes actual costs for January and February 2026. The variance from the budgeted costs for January and February 2026 to the actual costs for January and February 2026 are used in this filing in supporting the reasonableness of the estimates for each category of costs.

COMPARISON OF BUDGETED AND ACTUAL COSTS FOR JANUARY & FEBRUARY 2026

| Budget category | Budgeted costs for January & February 2026 (as used in drafting the original 2026 CAT budget) | Actual costs for January & February 2026 (as used in drafting the updated 2026 CAT budget) | Variance from budgeted costs for January & February 2026 to actual costs for January & February of 2026 |
|---|---|---|---|
| Capitalized Developed Technology Costs [a] | $671,472 | $4,145,430 | Increase by $3,473,958.[b] |
| Technology Costs | 25,894,000 | 21,501,183 | |
| Cloud Hosting Services | 17,200,000 | 12,829,362 | Decrease by 4,370,638.[c] |
| Operating Fees | 5,149,236 | 5,127,057 | Decrease by 22,179. |
| CAIS Operating Fees | 3,544,764 | 3,544,764 | No change. |
| Change Request Fees | 0 | 0 | No change. |
| Legal | 1,424,166 | 1,838,617 | Increase by 414,451.[d] |
| Consulting | 258,334 | 267,554 | Increase by 9,220. |
| Insurance | 250,938 | 200,652 | Decrease by 50,286. |
| Professional and administration | 190,916 | 149,061 | Decrease by 41,855. |
| Public relations | 0 | 0 | No change. |
| Interest Income | (758,343) | (757,527) | Decrease by 816. |
| Total | 27,931,483 | 27,344,970 | Decrease by 586,513. |

[a] This cost number for capitalized developed technology costs is calculated by adding together the capitalized developed technology costs and the software license fee for each budget.
[b] The variance for capitalized developed technology costs is the result of costs related to the software license fee in accordance with the Plan Processor Agreement with FCAT.
[c] This variance is attributable to lower than forecasted market volumes and the impact of lower processing costs due to shutting down certain functionalities.
[d] The variance in legal costs is attributable to unanticipated issues that required additional legal efforts on behalf of CAT LLC that developed after the budget was created.

(i) Technology Costs—Cloud Hosting Services

(a) Description of Cloud Hosting Services Costs

Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the cloud hosting services costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $49,866,667 in technology costs for cloud hosting services for the CAT Fee 2026–1 Period. The technology costs for cloud hosting services represent costs reasonably budgeted to be incurred for services provided by the cloud services provider for the CAT, Amazon Web Services, Inc. (''AWS'') during the CAT Fee 2026–1 Period.

In the agreement between CAT LLC and the Plan Processor for the CAT (''Plan Processor Agreement''), FINRA CAT, LLC (''FCAT''), AWS was named as the subcontractor to provide cloud hosting services. Under the Plan Processor Agreement, CAT LLC is required to pay FCAT the fees incurred by the Plan Processor for cloud hosting services provided by AWS as FCAT's subcontractor on a monthly basis for the cloud hosting services, and FCAT, in turn, pays such fees to AWS. The fees for cloud hosting services were negotiated by FCAT on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the expected volume of data, the breadth of services provided and market rates for similar services. Services provided by AWS include storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments. FCAT utilizes such cloud hosting services for a broad array of services for the CAT, such as data ingestion, data management, and analytic tools for the CAT. AWS performs cloud hosting services for both the CAT transaction database as well as the Reference Database (previously referred to as the Customer and Account Information System, or ''CAIS'').[37] It is anticipated that such cloud hosting services will continue during the CAT Fee 2026–1 Period.

The cost for AWS cloud services for the CAT is a function of the volume of CAT Data, largely as a result of the processing and storage of the CAT Data.[38] The greater the amount of CAT Data, the greater the cost of AWS services to CAT LLC. During the CAT Fee 2026–1 Period, it is expected that AWS would provide cloud hosting services for volumes of CAT Data far in excess of the volume predictions set forth in the CAT NMS Plan. The CAT NMS Plan states, when all CAT Reporters are submitting their data to the CAT, it ''must be sized to receive[,] process and load more than 58 billion records per day,'' [39] and that ''[i]t is expected that the Central Repository will grow to more than 29 petabytes of raw, uncompressed data.'' [40] In contrast with those estimates, the Q3 2025 data volumes averaged 792 billion events per day. The highest peak data volume to date of 1.45 trillion events was recorded on April 7, 2025. The top five peak days were recorded in April 2025.

CAT LLC estimates that the budget for cloud hosting services costs during the CAT Fee 2026–1 Period will be approximately $49,866,667.[41] The budget for cloud hosting services costs during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding two-thirds of the cloud hosting services costs for the second quarter and the cloud hosting services for the third and fourth quarters of 2026 as included in the Updated 2026 CAT Budget.[42]

CAT LLC estimated the budget for the cost for cloud hosting services for the CAT Fee 2026–1 Period based on an assumption of 35% annual year-over-year volume growth for the transaction database and an assumption of 5% annual year-over-year volume growth for the Reference Database. CAT LLC determined these growth assumptions in coordination with FCAT.[43]

This process for estimating the budget for cloud hosting services costs for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the cloud hosting services costs for the Original 2026 CAT Budget.

The Original 2026 CAT Budget estimated a budget for cloud hosting services of $17,200,000 for January and February 2026. The actual costs for cloud hosting services for January and February 2026, which are set forth in the Updated 2026 CAT Budget, were $12,829,362. Therefore, the variance between budgeted and actual cloud hosting services costs for January and February 2026 was an approximate decrease of $4,370,638 as a result of lower volumes and a change in functionality.[44] Accordingly, CAT LLC believes that the process for estimating the budgeted cloud hosting services costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for cloud hosting services costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the cloud hosting services costs from the Original 2026 Budget.[45] Specifically, the following describes the differences in the costs for cloud hosting services included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted costs for cloud hosting services included in the

[37] On January 13, 2026, the SEC approved an amendment to the CAT NMS Plan relating to the Customer and Account Information System (referred to as ''CAIS''). Effective with this amendment, CAIS has been renamed as the ''Reference Database.'' Securities Exchange Act Rel. No. 104586 (Jan. 13, 2026), 91 FR 2164 (Jan. 16, 2026) (''CAIS Amendment''). The SEC subsequently approved another amendment to the CAT NMS Plan to implement various cost savings measures that made further changes to the Reference Database. Securities Exchange Act Rel. No. 105107 (Mar. 27, 2026), 91 FR 16284 (Mar. 27, 2026) (''Cost Savings Amendment'').

[38] In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. For further discussion of the effect of processing timelines on cloud hosting costs, *see* Section 3(b)(2)(A)(i) below.

[39] Section 1.3 of Appendix D of the CAT NMS Plan, n.262.

[40] Section 1.3 of Appendix D of the CAT NMS Plan.

[41] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[42] This calculation is (⅔ × $18,700,000) + $18,700,000 + $18,700,000 = $49,866,667.

[43] Note that these growth rates are based on events processed and stored in the CAT. Executed transactions are a small subset of such events. As a result, the number of transactions in the CAT, and, hence, the number of executed equivalent shares, is not directly correlated with the number of events processed in the CAT or the costs of cloud hosting services for the CAT. Accordingly, the number of executed equivalent shares may stay relatively constant from year to year while the number of events processed and stored in the CAT may grow significantly.

[44] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[45] The last Prospective CAT Fee, CAT Fee 2025–2, was implemented pursuant to the prior CAT funding model. Moreover, the final invoice for CAT Fee 2025–2 was sent in December 2025, and, therefore, there is a six-month gap between the final invoice for CAT Fee 2025–2 and the first invoice for CAT Fee 2026–1, which would be in June 2026. Accordingly, this filing describes the changes in the cloud hosting services costs from the Original 2026 Budget.

Original 2026 CAT Budget were $81,900,006, and the annual 2026 budgeted costs for cloud hosting services included in the Updated 2026 CAT Budget are $77,529,362. Accordingly, budgeted annual costs for cloud hosting services decreased by $4,370,644 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget, which is an approximate 5% reduction in cloud hosting services costs for the full year of 2026.[46] The budgeted decrease in costs for cloud hosting services reflects lower costs for January and February 2026 due to lower than forecasted market volumes in January and the impact of lower processing costs due to shutting down certain functionalities.

(ii) Technology Costs—Operating Fees

(a) Description of Operating Fees

Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the operating fees set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $19,691,953 in technology costs for operating fees for the CAT Fee 2026–1 Period. Operating fees are those fees paid by CAT LLC to FCAT as the Plan Processor to operate and maintain the CAT and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management as required by the CAT NMS Plan. Operating fees also include market data provider costs, as discussed below.

*Plan Processor: FCAT.* Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT a negotiated monthly fixed price for the operation of the CAT. This fixed price contract was negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity. It is anticipated that FCAT will provide a variety of services to the CAT during the CAT Fee 2026–1 Period, including the following:

- Provide the CAT-related functions and services as the Plan Processor as required by SEC Rule 613 and the CAT NMS Plan in connection with the operation and maintenance of the CAT;
- Address compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provide support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assist with interpretive efforts, exemptive requests and amendments regarding the CAT NMS Plan;
- Oversee the security of the CAT;
- Monitor the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provide support to subcontractors under the Plan Processor Agreement;
- Provide support in discussions with the Participants and the SEC and its staff;
- Operate the FINRA CAT Helpdesk;
- Facilitate communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administer the CAT website and all of its content;
- Maintain cyber security insurance related to the CAT;
- Assist with billing, collection and other CAT fee-related activity; and
- Provide technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

CAT LLC calculated the budget for the FCAT technology costs for operating fees for the CAT Fee 2026–1 Period based on the recurring monthly operating fees under the Plan Processor Agreement.

*Market Data Provider: Algoseek.* It is anticipated that the operating fees costs for the CAT Fee 2026–1 Period will include costs related to the receipt of certain market data for the CAT pursuant to an agreement between FCAT and Algoseek, LLC (''Algoseek''). CAT LLC determined that Algoseek would provide market data that included data elements set forth in Section 6.5(a)(ii) of the CAT NMS Plan, and that the fees were reasonable and in line with market rates for the market data received. All costs under the contract would be treated as a direct pass through cost to CAT LLC. CAT LLC estimated the budget for the costs for Algoseek for the CAT Fee 2026–1 Period based on the monthly rate set forth in the agreement between Algoseek and FCAT.

*Operating Fee Estimates.* CAT LLC estimates that the budget for operating fees during the CAT Fee 2026–1 Period will be approximately $19,691,953.[47] The budget for operating fees during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding (1) two-thirds of the Non-CAIS fixed operating fees for the second quarter and the Non-CAIS fixed operating fees for the third and fourth quarters of 2026 included in the Updated 2026 CAT Budget and (2) two-thirds of the market data vendor fees for the second quarter and the market data vendor fees for the third and fourth quarter of 2026 included in the Updated 2026 CAT Budget.[48]

As discussed above, CAT LLC estimated the budget for the operating fees during the CAT Fee 2026–1 Period based on monthly rates set forth in the Plan Processor Agreement and the agreement with Algoseek. CAT LLC also recognized that the operating fees are generally consistent throughout the year. This process for estimating the budget for the operating fees for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the operating fees for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget for operating fees of $5,149,236 for January and February 2026, and the actual costs for operating fees for January and February 2026 were $5,127,057. Therefore, the variance between budgeted and actual operating fees for this period was small—$22,179.[49] Accordingly, CAT LLC believes that the process for estimating the budgeted operating fees for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for operating fees from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the operating fees from the Original 2026 Budget. Specifically, the following describes the differences in the costs for operating fees included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted costs for operating fees included in the Original

[46] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[47] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[48] This calculation is ((⅔ × $7,191,853) + $7,191,853 + $7,191,853) + ((⅔ × $192,630) + $192,630 + $192,630) = $19,691,953.

[49] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

2026 CAT Budget were $34,345,413, and the annual 2026 budgeted costs for operating fees included in the Updated 2026 CAT Budget are $29,845,524. Accordingly, budgeted annual costs for operating fees decreased by $4,499,889 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget, which is an approximate 13% reduction in operating fees for the full year of 2026.[50] The budgeted decrease in costs for operating fees reflects the proposed amendments to the Plan Processor Agreement related to the recent cost savings amendments to the CAT NMS Plan.[51]

(iii) Technology Costs—CAIS Operating Fees

(a) Description of CAIS Operating Fees

Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the CAIS operating fees set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $14,179,060 in technology costs for CAIS operating fees for the CAT Fee 2026–1 Period. CAIS operating fees represent the fees paid to FCAT for services provided with regard to the operation and maintenance of the Reference Database (previously referred to as CAIS), and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. The CAT is required under the CAT NMS Plan to capture and store Reference Data in the Reference Database and to create a CAT-Customer-ID for each Customer.[52]

During the CAT Fee 2026–1 Period, it is anticipated that FCAT will provide services related to the Reference Database. Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT for services related to the Reference Database provided by FCAT on a monthly basis. CAT LLC negotiated the fees for FCAT's services related to the Reference Database on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity. During the CAT Fee 2026–1 Period, it is anticipated that FCAT will continue to provide services relating to the ongoing operation, maintenance and support of the Reference Database.

CAT LLC estimates that the budget for CAIS operating fees during the CAT Fee 2026–1 Period will be approximately $14,179,060.[53] The budget for CAIS operating fees during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding two-thirds of the CAIS fixed operating fees for the second quarter and the CAIS fixed operating fees for the third and fourth quarters of 2026 included in the Updated 2026 CAT Budget.[54]

CAT LLC calculated the budget for FCAT's services related to the Reference Database for the CAT Fee 2026–1 Period based on the recurring monthly CAIS operating fees under the Plan Processor Agreement. This process for estimating the budget for the CAIS operating fees for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the CAIS operating fees for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget of $3,544,764 for CAIS operating fees for January and February of 2026. The actual costs for CAIS operating fees for January and February of 2026, which are included in the Updated 2026 CAT Budget, were $3,544,764. There was no variance between budgeted and actual CAIS operating fees for the first two months of 2026.[55] Accordingly, CAT LLC believes that the process for estimating the budgeted CAIS operating fees for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for CAIS operating fees from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the CAIS operating fees from the Original 2026 Budget. Specifically, the following describes the differences in the costs for CAIS operating fees included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

CAIS operating fees are based on a recurring monthly rate payable to FCAT and are unchanged from the Original 2026 CAT Budget to the Updated 2026 CAT Budget. The annual 2026 budgeted costs for CAIS operating fees included in the Original 2026 CAT Budget were $21,268,584, and the annual 2026 budgeted costs for CAIS operating fees included in the Updated 2026 CAT Budget are $21,268,590.[56] Accordingly, the budgeted annual costs for CAIS operating fees are the same for both the Original 2026 CAT Budget and the Updated 2026 CAT Budget.

(iv) Technology Costs—Change Request Fees

(a) Description of Change Request Fees

Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the change request fees set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $0 in technology costs for change request fees for the CAT Fee 2026–1 Period. The technology costs related to change request fees include costs related to certain modifications, upgrades or other changes to the CAT.

Change requests are standard practice and necessary to reflect operational changes, including changes related to new market developments, such as new market participants. In general, if CAT LLC determines that a modification, upgrade or other changes to the functionality or service is necessary and appropriate, CAT LLC will submit a request for such a change to the Plan Processor. The Plan Processor will then respond to the request with a proposal for implementing the change, including the cost (if any) of such a change. CAT LLC then determines whether to approve the proposed change.

The change request budget line is established to include expected costs to be incurred in which the nature of the costs (*i.e.,* capitalization versus expensing) have not yet been determined. Upon the incurrence of such costs, the final determination of capitalization versus expensing is determined and then such costs are reclassified from the change request line to the appropriate technology cost line item.

CAT LLC estimates that the budget for change requests during the CAT Fee 2026–1 Period will be approximately

[50] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[51] *See* CAIS Amendment and Cost Savings Amendment.

[52] *See* Section 9 of Appendix D of the CAT NMS Plan.

[53] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[54] This calculation is (⅔ × $5,317,147) + $5,317,147 + $5,317,147 = $14,179,060.

[55] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[56] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

$0.[57] The budget for change requests during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. This $0 cost number for change request fees reflects the fact that there were no change request fees set forth in the Updated 2026 CAT Budget.

CAT LLC estimated the budget for the potential change requests for the CAT Fee 2026–1 Period based on, among other things, a review of past change requests and potential future change request needs, as well as discussions with FCAT. This process for estimating the budget for the change requests for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the change requests cost for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a change request budget of $0 for January and February of 2026. The actual costs for change requests for January and February of 2026, which are set forth in the Updated 2026 CAT Budget, were $0. There was no variance between budgeted and actual change request costs for January and February of 2026.[58] Accordingly, CAT LLC believes that the process for estimating the budgeted change request costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for change request fees from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the change request fees from the Original 2026 Budget. Specifically, the following describes the differences (if any) in the costs for change request fees included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted costs for change requests included in the Original 2026 CAT Budget were $0, and the annual 2026 budgeted costs for change requests included in the Updated 2026 CAT Budget are $0.[59] Accordingly, budgeted annual costs for change requests are the same for both the Original 2026 CAT Budget and the Updated 2026 CAT Budget.

(v) Technology Costs—Capitalized Developed Technology Costs

(a) Description of Capitalized Developed Technology Costs

Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the capitalized developed technology costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that includes $3,450,000 in technology costs for capitalized developed technology costs for the CAT Fee 2026–1 Period. This category of costs includes the budget for capitalizable application development costs incurred in the development of the CAT. It is anticipated that such costs will include certain costs related to the software license fee for the Reference Database in accordance with the Plan Processor Agreement with FCAT, as well as costs related to a set of technology changes to be implemented by FCAT related to the cost savings amendments[60] and the move to 23x5 trading.

CAT LLC estimates that the budget for capitalized developed technology costs during the CAT Fee 2026–1 Period will be approximately $3,450,000.[61] The budget for capitalized developed technology costs during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding (1) capitalized developed technology costs of $3,450,000 for May, $0 for June and $0 for the third and fourth quarters of 2026 included in the Updated 2026 CAT Budget; and (2) $0 for the Software License Fee 2026 for the second, third, and fourth quarters of 2026 included in the Updated 2026 CAT Budget.[62]

CAT LLC estimated the budget for capitalized developed technology costs for the CAT Fee 2026–1 Period based on an analysis of a variety of factors, including information related to potential technology costs and related contractual and Plan requirements, and discussions with FCAT regarding such potential technology costs. This process for estimating the budget for capitalized developed technology costs for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the capitalized developed technology costs for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget for capitalized developed technology costs of $671,472 for January and February 2026, and the actual costs for capitalized developed technology costs for January and February 2026 were $4,145,430.[63] The variance of $3,473,958 for January and February 2026 is the result of costs related to the software license fee for the Reference Database in accordance with the Plan Processor Agreement with FCAT. Accordingly, CAT LLC believes that the process for estimating the budgeted capitalized developed technology costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for capitalized developed technology costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the capitalized developed technology costs from the Original 2026 Budget. Specifically, the following describes the differences in the costs for capitalized developed technology costs as included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budget for capitalized developed technology costs included in the Original 2026 CAT Budget was $8,228,827, and the annual 2026 budget for capitalized developed technology costs included in the Updated 2026 CAT Budget are $8,378,964.[64] Accordingly, the annual budget for capitalized developed technology costs increased by $150,137 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget, which is an approximate 2% increase in the capitalized developed technology costs for the full year of 2026. This budgeted increase in the annual budget for capitalized developed technology costs was the result of costs related to the software license fee for the Reference Database in accordance with the Plan Processor Agreement with FCAT.

(vi) Legal Costs

(a) Description of Legal Costs

Section 11.3(a)(iii)(B)(B)(2) of the CAT NMS Plan requires the fee filing for a

[57] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[58] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[59] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[60] *See* CAIS Amendment and Cost Savings Amendment.

[61] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[62] This calculation is ($3,450,000 +$0 + $0 + $0) + ($0 + $0 + $0) = $3,450,000. Note that the $4,178,964 cost for the software license fee was not included in the CAT Fee 2026–1 Period.

[63] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[64] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

Prospective CAT Fee to provide a brief description of the legal costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that includes $5,670,452 in legal costs for the CAT Fee 2026–1 Period. This category of costs represents budgeted costs for legal services for this period. CAT LLC anticipates that it will receive legal services from two law firms, Wilmer Cutler Pickering Hale and Dorr LLP (''WilmerHale'') and Jenner & Block LLP (''Jenner''), during the CAT Fee 2026–1 Period.

*Law Firm: WilmerHale.* It is anticipated that legal costs during the CAT Fee 2026–1 Period will include costs related to the legal services performed by WilmerHale. CAT LLC anticipates that it will continue to employ WilmerHale during the CAT Fee 2026–1 Period based on, among other things, their expertise, long history with the project and recognition that the hourly fee rates for this law firm are anticipated to be in line with market rates for specialized legal expertise. WilmerHale's billing rates are negotiated on an annual basis and are determined with reference to the rates charged by other leading law firms for similar work. The Participants assess WilmerHale's performance and review prospective budgets and staffing plans submitted by WilmerHale on an annual basis. The legal fees will be paid by CAT LLC to WilmerHale.

During the CAT Fee 2026–1 Period, it is anticipated that WilmerHale will provide legal services related to the following:

- Assist with CAT fee filings and related funding issues;
- Draft exemptive requests from CAT NMS Plan requirements and/or proposed amendments to the CAT NMS Plan;
- Provide legal guidance with respect to interpretations of CAT NMS Plan requirements;
- Provide legal support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team;
- Draft SRO rule filings related to the CAT Compliance Rule;
- Manage corporate governance matters, including supporting Operating Committee meetings and preparing resolutions and consents;
- Assist with communications with the industry, including CAT Alerts and presentations;
- Provide guidance regarding the confidentiality of CAT Data;
- Assist with cost management analyses and proposals;
- Assist with commercial contract-related matters, including change orders and amendments, Plan Processor Agreement items, and subcontract matters;
- Provide support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues;
- Provide legal guidance with respect to the CAT budgets;
- Provide background assistance to other counsel for CAT matters;
- Assist with legal responses related to third-party data requests; and
- Provide legal support regarding CAT policies and procedures.

CAT LLC estimated the budget for the legal costs for WilmerHale for the CAT Fee 2026–1 Period through an analysis of a variety of factors, including WilmerHale fee rates, historical legal fees, and information related to pending legal issues and potential future legal issues.

*Law Firm: Jenner.* It is anticipated that legal costs during the CAT Fee 2026–1 Period will include costs related to the legal services performed by Jenner. CAT LLC anticipates that it will continue to employ Jenner during the CAT Fee 2026–1 Period based on, among other things, their expertise, history with the project and recognition that their hourly fee rates are in line with market rates for specialized legal expertise. The legal fees will be paid by CAT LLC to Jenner.

During the CAT Fee 2026–1 Period, it is anticipated that Jenner will continue to provide legal assistance to CAT LLC regarding certain litigation matters, including: (1) CAT LLC's defense against a lawsuit filed in the Western District of Texas against the SEC Chair, the SEC and CAT LLC challenging the validity of Rule 613 and the CAT and alleging various constitutional, statutory, and common law claims;[65] (2) CAT LLC's intervention in a lawsuit in the Eleventh Circuit filed by various parties against the SEC challenging the SEC's approval of the CAT Funding Model;[66] and (3) a lawsuit in the Eleventh Circuit filed by Citadel Securities LLC seeking review of the SEC's May 20, 2024 order[67] granting the Participants temporary conditional exemptive relief related to the reporting of bids and/or offers made in response to a request for quote or other form of solicitation response provided in standard electronic format that is not immediately actionable.[68] Litigation involving CAT LLC is an expense of operating the CAT, and, therefore, is appropriately an obligation of both Participants and Industry Members under the CAT Funding Model. Jenner also will continue to provide legal counseling to CAT LLC related to the above-listed litigation and other litigation risk.

CAT LLC estimated the budget for the legal costs for Jenner for the CAT Fee 2026–1 Period through an analysis of a variety of factors, including Jenner's fee rates, historical legal fees, and information related to pending legal issues and potential future legal issues.

*Legal Cost Estimates.* CAT LLC estimates that the budget for legal services during the CAT Fee 2026–1 Period will be approximately $5,670,452.[69] The budget for legal services during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding budgeted costs for two-thirds of the legal costs for the second quarter and the legal costs for the third and fourth quarters of 2026 included in the Updated 2026 CAT Budget.[70]

CAT LLC estimated the budget for the legal services for the CAT Fee 2026–1 Period based on an analysis of a variety of factors, including law firm fee rates, historical legal fees, and information related to pending legal issues and potential future legal issues. This process for estimating the budget for the legal services for CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the legal cost for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget for legal costs of $1,424,166 for January and February of 2026. The actual costs for legal services for January and February 2026, which are included in the Updated 2026 Budget, were $1,838,617.[71] The increase of $414,451 was due to unanticipated issues that required additional legal efforts on behalf of CAT LLC that developed after the budget was created. Such additional costs were primarily due to additional legal work related to litigation matters as well as regulatory and corporate legal matters. Accordingly, CAT LLC believes that the process for estimating the

[70] This calculation is (⅔ x $2,145,170) + $2,125,170 + $2,115,170 = $5,670,452.

[71] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

budgeted legal costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for legal costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the legal costs from the Original 2026 Budget. Specifically, the following describes the differences in the legal costs included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted legal costs included in the Original 2026 CAT Budget were $8,485,000, and the annual 2026 budgeted legal costs included in the Updated 2026 CAT Budget are $8,939,184.[72] Accordingly, the annual budget for legal costs increased by $454,184 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget for the full year of 2026, which is an approximate 5% increase in the legal costs for the full year of 2026. This budgeted increase in the legal costs in the Updated 2026 CAT Budget from the Original 2026 Budget was primarily due to an anticipated increase in legal costs related to litigation matters as well as regulatory and corporate legal matters.

(vii) Consulting Costs

(a) Description of Consulting Costs

Section 11.3(a)(iii)(B)(B)(3) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the consulting costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $1,025,957 in consulting costs for the CAT Fee 2026–1 Period. The consulting costs represent the fees estimated to be paid to the consulting firm Deloitte & Touche LLP (''Deloitte'') as project manager during the CAT Fee 2026–1 Period. The services provided by Deloitte to the CAT include advisory services related to the operation of the CAT, and meeting facilitation and communications coordination, vendor support and financial analyses. In addition, the consulting costs include the compensation for the Chair of the CAT Operating Committee.

It is anticipated that the costs for CAT during the CAT Fee 2026–1 Period will include costs related to consulting services performed by Deloitte. CAT LLC anticipates that it will continue to employ Deloitte during the CAT Fee 2026–1 Period based on, among other things, their expertise, long history with the project, and the recognition that it is anticipated that the consulting fees will remain in line with market rates for this type of specialized consulting work. Deloitte's fee rates are negotiated on an annual basis. CAT LLC assesses Deloitte's performance and reviews prospective budgets and staffing plans submitted by Deloitte on an annual basis. The consulting fees will be paid by CAT LLC to Deloitte.

It is anticipated that Deloitte will provide a variety of consulting services to the CAT during the CAT Fee 2026–1 Period, including the following:

- Implement program operations for the CAT project;
- Provide support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assist with cost and funding matters for the CAT, including assistance with loans and the CAT bank account for CAT funding;
- Provide support for updating the SEC on the progress of the development of the CAT; and
- Provide support for third party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

In addition, the consulting costs include the compensation for the Chair of the CAT Operating Committee, which is paid by CAT LLC.

CAT LLC estimates that the budget for consulting costs during the CAT Fee 2026–1 Period will be approximately $1,025,957.[73] The budget for consulting costs during the CAT Fee 2026–1 Period is calculated based on the Updated 2026 CAT Budget. Specifically, this estimate was calculated by adding two-thirds of the consulting costs for the second quarter and the consulting costs for the third and fourth quarters of 2026 included in the Updated 2026 CAT Budget.[74]

CAT LLC estimates the budget for the consulting costs for Deloitte for the CAT Fee 2026–1 Period based on the current statement of work with Deloitte, which took into consideration past consulting costs, potential future consulting needs, the proposed rates and other contractual issues, and discussions with Deloitte, as well as the compensation arrangement for the Chair. This process for estimating the budget for consulting costs for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the consulting costs for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget for consulting services of $258,334 for January and February 2026, and the actual costs for consulting services for January and February 2026, which are included in the Updated 2026 CAT Budget, were $267,554.[75] Therefore, the variance between budgeted and actual consulting costs for January and February was approximately 4%. Accordingly, CAT LLC believes that the process for estimating the budgeted consulting costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for consulting costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the consulting costs from the Original 2026 Budget. Specifically, the following describes the differences (if any) in the consulting costs included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budget for consulting costs included in the Original 2026 CAT Budget was $1,550,000, and the annual 2026 budget for consulting costs included in the Updated 2026 CAT Budget is $1,550,000.[76] Accordingly, the annual budget for consulting costs has not changed from the Original 2026 CAT Budget to the Updated 2026 CAT Budget for the full year of 2026.

(viii) Insurance Costs

(a) Description of Insurance Costs

Section 11.3(a)(iii)(B)(B)(4) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the insurance costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $852,768 in insurance costs for

[72] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[73] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[74] This calculation is (⅔ x $2,145,170) + $2,125,170 + $2,115,170 = $5,670,452.

[75] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[76] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

the CAT Fee 2026–1 Period.[77] The insurance costs represent the costs to be incurred for insurance for the CAT during the CAT Fee 2026–1 Period.

It is anticipated that the insurance costs for CAT during the CAT Fee 2026–1 Period will include costs related to cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance brokered by USI Insurance Services LLC (''USI''). Such policies are standard for corporate entities, and cyber security liability insurance is important for the CAT System. CAT LLC anticipates that it will continue to maintain this insurance during the CAT Fee 2026–1 Period, and notes that the annual premiums for these policies were competitive for the coverage provided. CAT LLC estimated the budget for the insurance costs for the CAT Fee 2026–1 Period based on the insurance estimate from USI for 2026. The annual premiums would be paid by CAT LLC to USI.

The budgeted insurance costs for the CAT Fee 2026–1 Period are based on an insurance cost estimate from USI for 2026. Accordingly, CAT LLC believes that the process for estimating the budgeted insurance costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for insurance costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the insurance costs from the Original 2026 Budget. Specifically, the following describes the differences in the insurance costs included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted insurance costs included in the Original 2026 CAT Budget were $1,505,625, and the annual 2026 budgeted insurance costs included in the Updated 2026 CAT Budget are $1,254,070.[78] Accordingly, the annual budget for insurance costs decreased by $251,555 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget for the full year of 2026, which is an approximate 16% decrease in the insurance costs for the full year of 2026. This budgeted decrease in the insurance costs in the Updated 2026 CAT Budget from the Original 2026 Budget was primarily due to an anticipated decrease in insurance premiums.

(ix) Professional and Administration Costs

(a) Description of Professional and Administration Costs

Section 11.3(a)(iii)(B)(B)(5) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the professional and administration costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $749,151 in professional and administration costs for the CAT Fee 2026–1 Period. In adopting the CAT NMS Plan, the Commission amended the Plan to add a requirement that CAT LLC's financial statements be prepared in compliance with GAAP, audited by an independent public accounting firm, and made publicly available.[79] The professional and administration costs would include costs related to accounting and accounting advisory services to support the operating and financial functions of CAT, financial statement audit services by an independent accounting firm, preparation of tax returns, and various cash management and treasury functions. The professional and administration costs represent the fees to be paid to Anchin, Block & Anchin (''Anchin'') and Grant Thornton LLP (''Grant Thornton'') for financial services during the CAT Fee 2026–1 Period.

*Financial Advisory Firm: Anchin.* It is anticipated that the professional and administration costs for the CAT Fee 2026–1 Period will include costs related to financial advisory services performed by Anchin. CAT LLC anticipates that it will continue to employ Anchin during the CAT Fee 2026–1 Period based on, among other things, the firm's relevant expertise and fees, which are anticipated to remain in line with market rates for these financial advisory services. The fees for these services will be paid by CAT LLC to Anchin.

It is anticipated that Anchin will provide a variety of services to the CAT during the CAT Fee 2026–1 Period, including the following:

- Update and maintain internal controls;
- Provide cash management and treasury functions;
- Facilitate bill payments to vendors;
- Facilitate repayments of promissory notes to Participants;
- Provide monthly bookkeeping;
- Review vendor invoices and documentation in support of cash disbursements;
- Review documentation to ensure that repayments of promissory notes to Participants are in accordance with established policies and procedures;
- Provide accounting research and consultations on various accounting, financial reporting and tax matters;
- Address not-for-profit tax and accounting considerations;
- Prepare tax returns;
- Address various accounting, financial reporting and operating inquiries from Participants;
- Develop and maintain annual and interim operating and financial budgets, including budget to actual and budget to budget fluctuation analyses;
- Support compliance with the CAT NMS Plan;
- Work with and provide support to the Operating Committee, Leadership Team and various CAT working groups;
- Prepare monthly, quarterly and annual financial statements;
- Review and reconcile the monthly FINRA CAT reports/analyses related to billings, collections, outstanding accounts receivable and cash account;
- Perform certain verification, completeness, and validation testing related to the monthly FINRA CAT reports/analyses related to billings;
- Support the annual financial statement audits by an independent auditor;
- Review historical costs from inception;
- Provide accounting and financial information in support of SEC filings; and
- Perform additional ad hoc accounting and financial advisory services, as requested by CAT LLC.

CAT LLC estimated the annual budget for the costs for Anchin based on historical costs adjusted for cost of living rate increases, and projected incremental advisory and support services.

*Accounting Firm: Grant Thornton.* It is anticipated that the professional and administration costs for the CAT Fee 2026–1 Period will include costs related to accounting services performed by Grant Thornton. CAT LLC anticipates that it will continue to employ Grant Thornton during the CAT Fee 2026–1 Period based on, among other things, the firm's relevant expertise and fees, which are anticipated to remain in line with market rates for these financial advisory services. It is anticipated that Grant Thornton will continue to be engaged as an independent accounting firm to complete the audit of CAT LLC's

[77] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[78] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[79] Section 9.2 of the CAT NMS Plan.

financial statements, in accordance with the requirements of the CAT NMS Plan. The fees for these services will be paid by CAT LLC to Grant Thornton. CAT LLC estimated the budget for the accounting costs for Grant Thornton for the CAT Fee 2026–1 Period based on the anticipated hourly rates and the anticipated services plus an administrative fee.

*Professional and Administration Cost Estimates.* CAT LLC estimates that the budget for professional and administration services during the CAT Fee 2026–1 Period will be approximately $749,151.[80] The budget for professional and administration services during the CAT Fee 2026–1 Period is based on the Updated 2026 CAT Budget. CAT LLC estimated the budget for the professional and administration costs for the CAT Fee 2026–1 Period based on a review of past professional and administration costs, potential future professional and administration needs, the proposed rates and other contractual issues, as well as discussions with Anchin and Grant Thornton. This process for estimating the budget for the professional and administration costs for the CAT Fee 2026–1 Period is the same process by which CAT LLC estimated the professional and administration costs for the Original 2026 CAT Budget. The Original 2026 CAT Budget estimated a budget for professional and administration costs of $190,916 for January and February 2026, and the actual costs for professional and administration services for January and February 2026, which are set forth in the Updated 2026 Budget, were $149,061.[81] The decrease of $41,855 was due to a lower than expected profressional and administration services costs and to the movement of bank fees from the professional and administration category to the interest income category. Accordingly, CAT LLC believes that the process for estimating the budgeted professional and administration costs for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for professional and administration costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the professional and administration costs from the Original 2026 Budget. Specifically, the following describes the differences in the professional and administration costs included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted professional and administration costs as included in the Original 2026 CAT Budget were $1,145,500, and the annual 2026 budgeted professional and administration costs included in the Updated 2026 CAT Budget are $1,085,500.[82] Accordingly, the budgeted annual costs for professional and administration services decreased by $60,000 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget for the full year of 2026. This budgeted decrease in the professional and administration costs in the Updated 2026 CAT Budget from the Original 2026 Budget was due to the movement of bank fees from the professional and administration category to the interest income category, and not a change in costs related to Anchin and Grant Thornton services.

(x) Public Relations Costs

(a) Description of Public Relations Costs

Section 11.3(a)(iii)(B)(B)(6) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the public relations costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $0 in public relations costs for the CAT Fee 2026–1 Period. The public relations costs would represent the fees paid to a public relations firm for professional communications services to CAT, including media relations consulting, strategy and execution. Because CAT LLC anticipates that it will not engage a public relations firm for the CAT Fee Period 2026–1, the budget for public relations costs for this period is $0.[83]

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for public relations costs from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in the public relations costs from the Original 2026 Budget. Specifically, the following describes the differences (if any) in public relations costs included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual budgeted public relations costs for 2026 included in the Original 2026 CAT Budget were $0, and the annual budgeted public relations costs for 2026 included in the Updated 2026 CAT Budget are $0.[84] Accordingly, the annual budgeted public relations costs for 2026 are the same for both the Original 2026 CAT Budget and the Updated 2026 CAT Budget.

(xi) Interest Income

(a) Description of Interest Income

Section 11.1(a) of the CAT NMS Plan requires the CAT budget to include ''the sources of all revenues to cover costs.'' Accordingly, the Updated 2026 CAT Budget includes a line item for interest income. Specifically, the Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that included $1,453,382 in interest income for the CAT Fee 2026–1 Period.[85] Interest income represents the interest earned on the surplus reserve and other funds held by CAT LLC. Such income would be used to reduce the amount to be collected to fund the CAT.

CAT LLC estimates the budget for the interest income for the CAT Fee 2026–1 Period based on the estimate of the funds held by CAT LLC and the expected interest rates on such funds. The Original 2026 CAT Budget estimated interest income of $758,343 for January and February 2026, and the actual interest income for January and February 2026, which are included in the Updated 2026 CAT Budget, were $757,527.[86] As mentioned above, bank fees were moved from the professional and administration category in the Original 2026 CAT Budget to the interest income category in the Updated 2026 CAT Budget. Accordingly, the interest income amount for the Updated 2026 CAT Budget was net of $10,000 in bank fees. Therefore, the variance between budgeted and actual interest income (aside from bank fees) for January and February 2026 was approximately $10,000. Accordingly,

[80] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[81] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

[82] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[83] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[84] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[85] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[86] *See* chart entitled ''Comparison of Budgeted and Actual Costs for January & February 2026'' in Section 3(a)(2)(C) above.

CAT LLC believes that the process for estimating the budgeted interest income for the CAT Fee 2026–1 Period is reasonable.

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in each line item from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in interest income from the Original 2026 CAT Budget. Specifically, the following describes the differences in the interest income included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The annual 2026 budgeted interest income as included in the Original 2026 CAT Budget was $1,995,958, and the annual 2026 budgeted interest income included in the Updated 2026 CAT Budget is $2,806,325.[87] Accordingly, the budgeted interest income (not including bank fees) increased by $810,367 from the Original 2026 CAT Budget to the Updated 2026 CAT Budget for the full year of 2026, which is an approximate 40% increase in the interest income for the full year of 2026. This budgeted increase in the interest income in the Updated 2026 CAT Budget from the Original 2026 Budget was primarily due to higher than expected cash balances being maintained after the approval of the Original 2026 Budget.

(xii) Reserve

(a) Description of Reserve

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to provide a brief description of the reserve costs set forth in the budget. The Operating Committee approved an operating budget for the CAT pursuant to Section 11.1(a) of the CAT NMS Plan that includes a reserve amount for 2026. Section 11.1(a)(i) of the CAT NMS Plan states that the budget shall include a reserve. Section 11.1(a)(ii) of the CAT NMS Plan further describes the reserve as follows:

For the reserve referenced in paragraph (a)(i) of this Section, the budget will include an amount reasonably necessary to allow the Company to maintain a reserve of not more than 25% of the annual budget. To the extent collected CAT fees exceed CAT costs, including the reserve of 25% of the annual budget, such surplus shall be used to offset future fees. For the avoidance of doubt, the Company will only include an amount for the reserve in the annual budget if the Company does not have a sufficient reserve (which shall be up to but not more than 25% of the annual budget). For the avoidance of doubt, the calculation of the amount of the reserve would exclude the amount of the reserve from the budget.

CAT LLC determined to maintain a reserve in the amount of 25% of the total expenses set forth in the Updated 2026 CAT Budget (which does not include the reserve amount). Accordingly, the total 25% reserve of $23,508,157 was calculated by multiplying the total expenses set forth in the Updated 2026 CAT Budget (other than the reserve) by 25%.[88]

The Updated 2026 CAT Budget estimates that CAT LLC will have $102,391,135 in reserve as of the beginning of the CAT Fee Period 2026–1. Such reserve is related, in part, to (i) the collection of CAT fees in excess of the budgeted CAT costs in light of the greater actual executed equivalent share volume than the projected executed equivalent share volume for prior CAT Fees, and (ii) a reduction in anticipated budgeted costs associated with the implementation of certain cost savings measures. This reserve balance of $102,391,135 would be used to offset a portion of CAT costs for CAT Fee Period 2026–1, thereby reducing the fee rate to be paid for CAT Fee 2026–1. Specifically, the total costs (including the 25% reserve) for CAT Fee 2026–1 of $117,540,783 would be reduced by the $102,391,135 in reserve. Therefore, the Total Budgeted CAT Costs 2026–1 would be $15,149,648.

Accordingly, the fee rate for CAT Fee 2026–1 is calculated based on this reduced amount of $15,149,648, resulting in a fee rate of $0.000001 per executed equivalent share. If the fee rate for CAT Fee 2026–1 were calculated solely based on the reasonably budgeted costs for CAT for May—December 2026, excluding the reduction in that amount due to the surplus reserve offset, the fee rate would be the higher rate of $0.000010.[89]

(b) Changes From Prior Fee Filing

Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan requires the fee filing for a Prospective CAT Fee to describe the reason for changes in the line item for a reserve from the prior CAT Fee filing. As this is the first Prospective CAT Fee filing under this CAT Funding Model, this filing describes the changes in reserve from the Original 2026 CAT Budget. Specifically, the following describes the differences in the reserve included in the Original 2026 CAT Budget versus the Updated 2026 CAT Budget, and the reasons for any changes.

The accrued liquidity reserve balance at the beginning of the year included in the Original 2026 CAT Budget was $119,128,336. The Original 2026 CAT Budget contemplated using the reserve to pay CAT bills throughout the year as no CAT fee was in effect. The accrued liquidity reserve balance at the beginning of the year included in the Updated 2026 CAT Budget was $155,403,378. The increase in the accrued liquidity reserve balance at the beginning of the year from the Original 2026 CAT Budget to the Updated 2026 CAT Budget reflected the additional CAT Fees that had been received after the approval of the Original 2026 CAT Budget. In addition, the Updated 2026 CAT Budget not only reflected the use of the surplus reserve to pay CAT bills but also the accrual of additional reserve to establish a 25% reserve through CAT Fee 2026–1. Accordingly, the estimated liquidity reserve balance increased from a deficit of $37,304,661 included in the Original 2026 CAT Budget to a reserve balance of $23,508,157 included in the Updated 2026 CAT Budget for the full year of 2026.

(D) Projected Total Executed Equivalent Share Volume

The calculation of Fee Rate 2026–1 also requires the determination of the projected total executed equivalent share volume of transactions in Eligible Securities for the CAT Fee 2026–1 Period. Under the CAT NMS Plan, the Operating Committee is required to ''reasonably determine the projected total executed equivalent share volume of all transactions in Eligible Securities for each relevant period based on the executed equivalent share volume of all transactions in Eligible Securities for the prior twelve months.'' [90] The Operating Committee is required to base its projection on the prior twelve months, but it may use its discretion to analyze the likely volume for the upcoming year. Such discretion would allow the Operating Committee to use its judgment when estimating projected total executed equivalent share volume if the volume over the prior twelve months was unusual or otherwise unfit to serve as the basis of a future volume estimate.[91]

[87] *See* chart entitled ''Comparison of Full Year Budgeted Costs'' in Section 3(a)(2)(C) above.

[88] The reserve was calculated by multiplying $94,032,626 by 25%, which equals approximately $23,508,157.

[89] *See* CAT Fee Alert 2026–1 (Apr. 1, 2026).

[90] Section 11.3(a)(i)(D) of the CAT NMS Plan.

[91] CAT Funding Model Approval Order at 13452.

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from March 2025 through February 2026 was 5,980,937,549,360.49 executed equivalent shares. The Operating Committee has determined to calculate the projected total executed equivalent share volume for the eight-month recovery period for CAT Fee 2026–1 by multiplying by 8/12ths the executed equivalent share volume for the 12-month period from March 2025 through February 2026. The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has increased from prior years (*e.g.,* the executed equivalent share volume for 2024 was 4,295,884,600,069.41), and the Operating Committee believes that it is reasonable to conclude that the annual executed equivalent share volume will remain at the higher level. Accordingly, the projected total executed equivalent share volume for the eight-month period for CAT Fee 2026–1 is projected to be 3,987,291,699,573.66 executed equivalent shares.[92]

The projected total executed equivalent share volume of all transactions in Eligible Securities for the eight-month recovery period for CAT Fee 2026–1 and a description of the calculation of the projection is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a CAT Fee.[93]

(E) Fee Rate 2026–1

Fee Rate 2026–1 would be calculated by dividing the Budgeted CAT Costs 2026–1 by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for the eight-month recovery period for CAT Fee 2026–1, as described in detail above.[94] Specifically, Fee Rate 2026–1 would be calculated by dividing $15,149,648 by 3,987,291,699,573.66 executed equivalent shares. As a result, Fee Rate 2026–1 would be $0.000003799483243631228 per executed equivalent share. Fee Rate 2026–1 is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide the Fee Rate in a fee filing for a CAT Fee.[95]

Fee Rate 2026–1 would be used to calculate the fee rate to be paid by CEBSs and CEBBs for CAT Fee 2026–1. Such fee rate is calculated by multiplying Fee Rate 2026–1 of $0.000003799483243631228 by one-third, and rounding the result to six decimal places.[96] Accordingly, the fee rate to be paid by CEBSs and CEBBs for CAT Fee 2026–1 would be $0.000001 per executed equivalent share.

(3) Monthly Fees

CEBBs and CEBSs would be required to pay fees for CAT Fee 2026–1 on a monthly basis for eight months, from July 2026 until January 2027. A CEBB's or CEBS's fee for each month would be calculated based on the transactions in Eligible Securities executed by the CEBB or CEBS from the prior month.[97] Proposed paragraph (a)(6)(A) of the fee schedule would state that each CAT Executing Broker would receive its first invoice for CAT Fee 2026–1 in June 2026, and would receive an invoice for CAT Fee 2026–1 each month thereafter until January 2027. Proposed paragraph (a)(6)(B) of the fee schedule would state that ''Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for CAT Fee 2026–1 on a monthly basis.'' In addition, paragraph (b)(1) of the fee schedule states that each CEBB and CEBS is required to pay its CAT fees ''each month.''

(4) Consolidated Audit Trail Funding Fees

To implement CAT Fee 2026–1, the Exchange proposes to add a new paragraph to the ''Consolidated Audit Trail Funding Fees'' section of the Exchange's fee schedule, to include the proposed paragraphs described below.

(A) Fee Schedule for CAT Fee 2026–1

The CAT NMS Plan states that:

Each Industry Member that is the CAT Executing Broker for the buyer in a transaction in Eligible Securities (''CAT Executing Broker for the Buyer'' or ''CEBB'') and each Industry Member that is the CAT Executing Broker for the seller in a transaction in Eligible Securities (''CAT Executing Broker for the Seller'' or ''CEBS'') will be required to pay a CAT Fee for each such transaction in Eligible Securities in the prior month based on CAT Data. The CEBB's CAT Fee or CEBS's CAT Fee (as applicable) for each transaction in Eligible Securities will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Fee Rate reasonably determined pursuant to paragraph (a)(i) of this Section 11.3.[98]

Accordingly, based on the factors discussed above, the Exchange proposes to add paragraph (a)(6) to the Consolidated Audit Trail Funding Fees section of its fee schedule. Proposed paragraph (a)(6) would state the following:

(A) Each CAT Executing Broker shall receive its first invoice for CAT Fee 2026–1 in June 2026, which shall set forth the CAT Fee 2026–1 fees calculated based on transactions in May 2026, and shall receive an invoice for CAT Fee 2026–1 for each month thereafter until January 2027.

(B) Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for CAT Fee 2026–1 on a monthly basis. Each month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (''CEBB'') and/or the CAT Executing Broker for the Seller (''CEBS'') (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of $0.000001 per executed equivalent share.

(C) Notwithstanding the last invoice date of January 2027 for CAT Fee 2026–1 in paragraph 6(A), CAT Fee 2026–1 shall continue in effect after January 2027, with each CAT Executing Broker receiving an invoice for CAT Fee 2026–1 each month, until a new subsequent CAT Fee is in effect with regard to Industry Members in accordance with Section 19(b) of the Exchange Act. Consolidated Audit Trail, LLC will provide notice when CAT Fee 2026–1 will no longer be in effect.

(D) Each CAT Executing Broker shall be required to pay each invoice for CAT Fee 2026–1 in accordance with paragraph (b).

As noted in the Plan amendment for the CAT Funding Model, ''[a]s a practical matter, the fee filing would provide the exact fee per executed equivalent share to be paid for the CAT Fees, by multiplying the Fee Rate by

[92] This projection was calculated by multiplying 5,980,937,549,360.49 executed equivalent shares by 8/12ths.

[93] Section 11.3(a)(iii)(B) of the CAT NMS Plan.

[94] In approving the CAT Funding Model, the Commission stated that ''[t]he manner in which the Fee Rate for Prospective CAT Costs will be calculated (*i.e.,* by dividing the CAT costs reasonably budgeted for the upcoming year by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for the year) is appropriate.'' CAT Funding Model Approval Order at 13435.

[95] *See* Section 11.3(a)(iii)(B)(A) of the CAT NMS Plan.

[96] This fee rate of $0.000001 is calculated by multiplying the Fee Rate of $0.000003799483243631228 by one-third and rounding this result (which equals $0.000001266494414543743) to 6 decimal places.

[97] *See* proposed paragraph (a)(6)(B) of the fee schedule.

[98] Section 11.3(a)(iii)(A) of the CAT NMS Plan.

one-third and describing the relevant number of decimal places for the fee.'' [99] Accordingly, proposed paragraph (a)(6)(B) of the fee schedule would set forth a fee rate of $0.000001 per executed equivalent share. This fee rate is calculated by multiplying Fee Rate 2026–1 of $0.000003799483243631228 by one-third, and rounding the result to six decimal places.[100] The Operating Committee determined to use six decimal places to balance the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

The proposed language in paragraph (a)(6)(A) of the fee schedule would describe when CAT Executing Brokers would receive their first monthly invoice for CAT Fee 2026–1. Specifically, CAT Executing Brokers would receive their first monthly invoice for CAT Fee 2026–1 in June 2026 and the fees set forth in that invoice would be calculated based on transactions executed in May 2026. The payment for the first invoice would be required within 30 days after the receipt of the first invoice (unless a longer period is indicated), as described in paragraph (b)(2) of the fee schedule.

Proposed paragraph (a)(6)(A) of the fee schedule also would describe the monthly cadence of the invoices for CAT Fee 2026–1. Specifically, after the first invoices are provided to CAT Executing Brokers in June 2026, invoices will be sent to CAT Executing Brokers each month thereafter until January 2027.

Proposed paragraph (a)(6)(B) of the fee schedule would describe the invoices for CAT Fee 2026–1. Proposed paragraph (a)(6)(B) of the fee schedule would state that ''Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for CAT Fee 2026–1 on a monthly basis.'' Proposed paragraph (a)(6)(B) of the fee schedule also would describe the fees to be set forth in the invoices for CAT Fee 2026–1. Specifically, it would state that ''[e]ach month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer ('CEBB') and/or the CAT Executing Broker for the Seller ('CEBS') (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of $0.000001 per executed equivalent share.''

Since CAT Fee 2026–1 is a monthly fee based on actual transaction volume from the prior month, CAT Fee 2026–1 may collect more or less than two-thirds of the Budgeted CAT Costs 2026–1. To the extent that CAT Fee 2026–1 collects more than two-thirds of the Budgeted CAT Costs 2026–1, any excess money collected will be used to offset future fees and/or to fund the reserve for the CAT. To the extent that CAT Fee 2026–1 collects less than two-thirds of the Budgeted CAT Costs 2026–1, the budget for the CAT in the ensuing months will reflect such shortfall.

Furthermore, proposed paragraph (a)(6)(C) of the fee schedule would describe how long CAT Fee 2026–1 would remain in effect. It would state that ''[n]otwithstanding the last invoice date of January 2027 for CAT Fee 2026–1 in paragraph 6(A), CAT Fee 2026–1 shall continue in effect after January 2027, with each CAT Executing Broker receiving an invoice for CAT Fee 2026–1 each month, until a new subsequent CAT Fee is in effect with regard to Industry Members in accordance with Section 19(b) of the Exchange Act. Consolidated Audit Trail, LLC will provide notice when CAT Fee 2026–1 will no longer be in effect.''

Finally, proposed paragraph (a)(6)(D) of the fee schedule would set forth the requirement for the CAT Executing Brokers to pay the invoices for CAT Fee 2026–1. It would state that ''[e]ach CAT Executing Broker shall be required to pay each invoice for CAT Fee 2026–1 in accordance with paragraph (b).''

(B) Manner of Payment

Paragraph (b)(1) of the ''Consolidated Audit Trail Funding Fees'' section of the fee schedule describes the manner of payment of Industry Member CAT fees. It states that ''[e]ach CAT Executing Broker shall pay its CAT fees as required pursuant to paragraph (a) each month to the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.'' The CAT NMS Plan requires the Operating Committee to establish a system for the collection of CAT fees.[101] The Plan Processor has established a billing system for CAT fees.[102] Accordingly, CAT Executing Brokers would be required to pay CAT Fee 2026–1 in accordance with such system.

(C) Failure to Pay CAT Fees

The CAT NMS Plan further states that:

Participants shall require each Industry Member to pay all applicable fees authorized under this Article XI within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due (as determined in accordance with the preceding sentence), such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of: (a) the Prime Rate plus 300 basis points; or (b) the maximum rate permitted by applicable law.[103]

Paragraph (b)(2) of the fee schedule states that:

Each CAT Executing Broker shall pay the CAT fees required pursuant to paragraph (a) within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If a CAT Executing Broker fails to pay any such CAT fee when due, such CAT Executing Broker shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300 basis points, or (ii) the maximum rate permitted by applicable law.

The requirements of paragraph (b)(2) would apply to CAT Fee 2026–1.

(5) CAT Fee Details

The CAT NMS Plan states that:

Details regarding the calculation of a Participant or CAT Executing Broker's CAT Fees will be provided upon request to such Participant or CAT Executing Broker. At a minimum, such details would include each Participant or CAT Executing Broker's executed equivalent share volume and corresponding fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.[104]

Such information would provide CEBBs and CEBSs with the ability to understand the details regarding the

[99] CAT Funding Model Approval Order at 13445, n.677.

[100] This fee rate of $0.000001 is calculated by multiplying the Fee Rate of $0.000003799483243631228 by one-third, and rounding this result (which equals $0.000001266494414543743) to 6 decimal places.

[101] Section 11.4 of the CAT NMS Plan.

[102] The billing process and system are described in CAT Alert 2023–02 as well as in the CAT FAQs related to the billing of CAT fees, the Industry Member CAT Reporter Portal User Guide, the FCAT Industry Member Onboarding Guide, the FCAT Connectivity Supplement for Industry Members and the CAT Billing Webinars (dated Sept. 28, 2023 and Nov. 7, 2023), each available on the CAT website.

[103] Section 11.4 of the CAT NMS Plan.

[104] Section 11.3(a)(iv)(A) of the CAT NMS Plan.

calculation of their CAT Fee.[105] CAT LLC will provide CAT Executing Brokers with these details regarding the calculation of their CAT Fees on their monthly invoice for the CAT Fees.

In addition, CAT LLC will make certain aggregate statistics regarding CAT Fees publicly available. Specifically, the CAT NMS Plan states that, ''[f]or each CAT Fee, at a minimum, CAT LLC will make publicly available the aggregate executed equivalent share volume and corresponding aggregate fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.'' [106] Such aggregate statistics will be available on the CAT website.

Furthermore, CAT LLC will make publicly available on the CAT website the total amount invoiced each month that CAT Fee 2026–1 is in effect as well as the total amount invoiced for CAT Fee 2026–1 for all months since its commencement. CAT LLC also will make publicly available on the CAT website the total costs to be collected from Industry Members for CAT Fee 2026–1.

(6) Financial Accountability Milestones

The CAT NMS Plan states that ''[n]o Participant will make a filing with the SEC pursuant to Section 19(b) of the Exchange Act regarding any CAT Fee related to Prospective CAT Costs until the Financial Accountability Milestone related to Period 4 described in Section 11.6 has been satisfied.'' [107] Under Section 1.1 of the CAT NMS Plan, a Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the second and third quarter of 2024,[108] the Financial Accountability Milestone related to Period 4 was satisfied on July 15, 2024. In addition, the satisfaction of the Financial Accountability Milestone related to Period 4 was described in detail in the fee filing for the first Prospective CAT Fee, CAT Fee 2024–1.[109]

(7) Participant Invoices

While CAT Fees charged to Industry Members become effective in accordance with the requirements of Section 19(b) of the Exchange Act,[110] CAT fees charged to Participants are implemented via an approval of the CAT fees by the Operating Committee in accordance with the requirements of the CAT NMS Plan.[111] On March 31, 2026, the Operating Committee approved the Participant fee related to CAT Fee 2026–1. Specifically, pursuant to the requirements of CAT NMS Plan,[112] each Participant would be required to pay a CAT fee calculated using the fee rate of $0.000001 per executed equivalent share, which is the same fee rate that applies to CEBBs and CEBSs. Like CEBBs and CEBSs, each Participant would be invoiced such CAT fees on a monthly basis for eight months, from June 2026 until January 2027, and each Participant's fee for each month would be calculated based on the transactions in Eligible Securities executed on the applicable exchange (for the Participant exchanges) or otherwise than on an exchange (for FINRA) in the prior month. Accordingly, each Participant will receive its first invoice in June 2026, and would receive an invoice each month thereafter until January 2027. Like with the CAT Fee 2026–1 applicable to CEBBs and CEBSs as described in proposed paragraph (a)(6)(C) of the fee schedule, notwithstanding the last invoice date of January 2027, Participants will continue to receive invoices for this fee each month until a new subsequent CAT Fee is in effect with regard to Industry Members. Furthermore, Section 11.4 of the CAT NMS Plan states that each Participant is required to pay such invoices as required by Section 3.7(b) of the CAT NMS Plan. Section 3.7(b) states, in part, that

[e]ach Participant shall pay all fees or other amounts required to be paid under this Agreement within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated) (the ''Payment Date''). The Participant shall pay interest on the outstanding balance from the Payment Date until such fee or amount is paid at a per annum rate equal to the lesser of: (i) Prime Rate plus 300 basis points; or (ii) the maximum rate permitted by applicable law.

(b) Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,[113] which requires, among other things, that the Exchange's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,[114] because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act,[115] which requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. These provisions also require that the Exchange be ''so organized and [have] the capacity to be able to carry out the purposes'' of the Act and ''to comply, and . . . to enforce compliance by its members and persons associated with its members,'' with the provisions of the Exchange Act.[116] Accordingly, a reasonable reading of the Act indicates that it intended that regulatory funding be sufficient to permit an exchange to fulfill its statutory responsibility under the Act, and contemplated that such funding would be achieved through equitable assessments on the members, issuers, and other users of an exchange's facilities.

The Exchange believes that this proposal is consistent with the Act because it implements provisions of the

[105] In approving the CAT Funding Model, the Commission stated that, ''[i]n the Commission's view, providing CAT Execut[ing] Brokers information regarding the calculation of their CAT Fees will aid in transparency and permit CAT Execut[ing] Brokers to confirm the accuracy of their invoices for CAT Fees.'' CAT Funding Model Approval Order at 13454.

[106] Section 11.3(a)(iv)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission stated that ''[t]he publication of the aggregate executed equivalent share volume and aggregate fee is appropriate because it would allow Participants and CAT Executing Brokers a high-level validation of executed volume and fees.'' CAT Funding Model Approval Order at 13454.

Plan and is designed to assist the Exchange in meeting regulatory obligations pursuant to the Plan. In approving the Plan, the SEC noted that the Plan ''is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.'' [117] To the extent that this proposal implements the Plan and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Act.

The Exchange believes that the proposed fees to be paid by the CEBBs and CEBSs are reasonable, equitably allocated and not unfairly discriminatory. First, the CAT Fee 2026–1 fees to be collected are directly associated with the budgeted costs of establishing and maintaining the CAT, where such costs include Plan Processor costs and costs related to technology, legal, consulting, insurance, and professional and administration costs.

The proposed CAT Fee 2026–1 fees would be charged to Industry Members in support of the maintenance of a consolidated audit trail for regulatory purposes. The proposed fees, therefore, are consistent with the Commission's view that regulatory fees be used for regulatory purposes and not to support the Exchange's business operations. The proposed fees would not cover Exchange services unrelated to the CAT. In addition, any surplus would be used as a reserve to offset future fees. Given the direct relationship between CAT fees and CAT costs, the Exchange believes that the proposed fees are reasonable, equitable and not unfairly discriminatory.

As further discussed below, the SEC approved the CAT Funding Model, finding it was reasonable and that it equitably allocates fees among Participants and Industry Members. The Exchange believes that the proposed fees adopted pursuant to the CAT Funding Model approved by the SEC are reasonable, equitably allocated and not unfairly discriminatory.

(1) Implementation of CAT Funding Model in CAT NMS Plan

Section 11.1(b) of the CAT NMS Plan states that ''[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.'' Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this fee filing to implement the Industry Member CAT fees included in the CAT Funding Model. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model in the CAT NMS Plan, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan ''is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.'' [118] Similarly, in approving the CAT Funding Model, the SEC concluded that the CAT Funding Model met this standard.[119] As this proposal implements the Plan and the CAT Funding Model described therein, and applies specific requirements to Industry Members in compliance with the Plan, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

(2) Calculation of Fee Rate for CAT Fee 2026–1 Is Reasonable

The SEC has determined that the CAT Funding Model satisfies the requirements of the Exchange Act. Specifically, the SEC has concluded that the method for determining CAT Fees as set forth in Section 11.3 of the CAT NMS Plan, including the formula for calculating the Fee Rate, the identification of the parties responsible for payment and the transactions subject to the fee rate for CAT Fees, satisfies the Exchange Act.[120] In each respect, as discussed above, CAT Fee 2026–1 is calculated, and would be applied, in accordance with the requirements applicable to CAT Fees as set forth in the CAT NMS Plan. Furthermore, as discussed below, the Exchange believes that each of the figures for the variables in the SEC-approved formula for calculating the fee rate for CAT Fee 2026–1 is reasonable and consistent with the Exchange Act. The calculation of Fee Rate 2026–1 for CAT Fee 2026–1 requires the figures for Budgeted CAT Costs 2026–1, the executed equivalent share volume for the prior twelve months, the determination of the CAT Fee 2026–1 Period, and the projection of the executed equivalent share volume for the CAT Fee 2026–1 Period. Each of these variables is reasonable and satisfies the Exchange Act, as discussed throughout this filing.

(A) Budgeted CAT Costs 2026–1

The formula for calculating a Fee Rate requires the amount of Budgeted CAT Costs to be recovered. Specifically, Section 11.3(a)(iii)(B) of the CAT NMS Plan requires a fee filing to provide: the budget for the upcoming year (or remainder of the year, as applicable), including a brief description of each line item in the budget, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration, and (6) public relations costs, a reserve and/or such other categories as reasonably determined by the Operating Committee to be included in the budget, and the reason for changes in each such line item from the prior CAT fee filing.

In accordance with this requirement, the Exchange has set forth the amount and type of Budgeted CAT Costs 2026–1 for each of these categories above.

Section 11.3(a)(iii)(B) of the CAT NMS Plan also requires that the fee filing provide ''sufficient detail to demonstrate that the budget for the upcoming year, or part of year, as applicable, is reasonable and appropriate.'' As discussed below, the Exchange believes that the budget for the CAT Fee 2026–1 Period is ''reasonable and appropriate.'' Each of the costs included in CAT Fee 2026–1 is reasonable and appropriate because the costs are consistent with standard industry practice, based on the need to comply with the requirements of the CAT NMS Plan, incurred subject to negotiations performed on an arm's length basis, and/or is consistent with the needs of any legal entity, particularly one with no employees.

(i) Technology: Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover budgeted costs related to cloud hosting services as a part of CAT Fees.[121] CAT LLC determined that the budgeted costs related to cloud hosting services described in this filing are reasonable and should be included as a part of Budgeted CAT Costs 2026–1. As

[117] CAT NMS Plan Approval Order at 84697.

[118] *Id.*

[119] CAT Funding Model Approval Order at 13481.

[120] *Id.*

[121] Section 11.3(a)(iii)(B)(B)(1) of the CAT NMS Plan.

described above, the cloud hosting services costs reflect, among other things, the breadth of the CAT cloud activities, data volumes far in excess of the original volume estimates, the need for specialized cloud services given the volume and unique nature of the CAT, the processing time requirements of the Plan, and regular efforts to seek to minimize costs where permissible under the Plan. CAT LLC determined that use of cloud hosting services is necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT, and that the fees for cloud hosting services negotiated by FCAT were reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.[122] Indeed, the actual costs of the CAT are far in excess of the original estimated costs of the CAT due to various factors, including the higher volumes and greater complexity of the CAT than anticipated when Rule 613 was originally adopted.

To comply with the requirements of the Plan, the breadth of the cloud activities related to the CAT is substantial. The cloud services not only include the production environment for the CAT, but they also include two industry testing environments, support environments for quality assurance and stress testing and disaster recovery capabilities. Moreover, the cloud storage costs are driven by the requirements of the Plan, which requires the storage of multiple versions of the data, from the original submitted version of the data through various processing steps, to the final version of the data.

Data volume is a significant driver of costs for cloud hosting services. When the Commission adopted the CAT NMS Plan in 2016, it estimated that the CAT would need to receive 58 billion records per day [123] and that annual operating costs for the CAT would range from $36.5 million to $55 million.[124] In contrast to the 2016 projections, the actual daily Q3 2025 data volumes averaged 792 billion events per day.

In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. Although CAT LLC has proactively sought to manage cloud hosting costs while complying with the Plan, including through requests to the Commission for exemptive relief and amendments to the CAT NMS Plan to reduce costs, stringent CAT NMS Plan requirements do not allow for any material flexibility in cloud architecture design choices, processing timelines (*e.g.,* the use of non-peak processing windows), or lower-cost storage tiers. As a result, the required CAT processing timelines contribute to the cloud hosting costs of the CAT.

The costs for cloud hosting services also reflect the need for specialized cloud hosting services given the data volume and unique processing needs of the CAT. The data volume as well as the data processing needs of the CAT necessitate the use of cloud hosting services. The equipment, power and services required for an on-premises data model, the alternative to cloud hosting services, would be cost prohibitive. Moreover, as CAT was being developed, there were limited cloud hosting providers that could satisfy all the necessary CAT requirements, including the operational and security criteria. Over time, more providers offering cloud hosting services that would satisfy these criteria have entered the market. CAT LLC will continue to evaluate alternative cloud hosting services, recognizing that the time and cost to move to an alternative cloud provider would be substantial.

The reasonableness of the cloud hosting services costs is further supported by key cost discipline mechanisms for the CAT—a cost-based funding structure, cost transparency, cost management efforts (including regular efforts to lower compute and storage costs where permitted by the Plan) and oversight. Together, these mechanisms help ensure the ongoing reasonableness of the CAT's costs and the level of fees assessed to support those costs.[125]

(ii) Technology: Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted costs related to operating fees as a part of CAT Fees.[126] CAT LLC determined that the budgeted costs related to operating fees described in this filing are reasonable and should be included as a part of Budgeted CAT Costs 2026–1.

The operating fees would include the negotiated fees paid by CAT LLC to the Plan Processor to operate and maintain the system for order-related information and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the selection of FCAT as the Plan Processor was reasonable and appropriate given its expertise with securities regulatory reporting, after a process of considering other potential candidates.[127] CAT LLC also determined that the fixed price contract, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, was reasonable and appropriate, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity.[128] The services to be performed by FCAT for CAT Fee 2026–1 Period and the budgeted costs related to such services are described above.[129]

The operating costs also include costs related to the receipt of market data. CAT LLC anticipates receiving certain market data from Algoseek during the CAT Fee 2026–1 Period. CAT LLC anticipates that Algoseek will provide data as set forth in the SIP Data requirements of the CAT NMS Plan and that the fees are reasonable and in line with market rates for market data received.[130]

(iii) Technology: CAIS Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted costs related to CAIS operating fees as a part of CAT Fees.[131] CAT LLC determined that the budgeted costs related to CAIS operating fees described in this filing are reasonable and should be included as a part of the Budgeted CAT Costs 2026–1. The CAIS operating fees would include the fees paid to the Plan Processor to operate and maintain the Reference Database and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the fees for FCAT's services related to the Reference Database, negotiated on an arm's length basis with the goals of

managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity, are reasonable and appropriate.[132] The services to be performed by FCAT for the CAT Fee 2026–1 Period and the budgeted costs for such services are described above.[133]

(iv) Technology: Change Request Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted costs related to change request fees as a part of CAT Fees.[134] CAT LLC determined that the budgeted costs related to change request fees described in this filing are reasonable and should be included as a part of the Budgeted CAT Costs 2026–1. It is common practice to utilize a change request process to address evolving needs in technology projects. This is particularly true for a project like CAT that is the first of its kind, both in substance and in scale. The substance and costs of each of the change requests are evaluated by the Operating Committee and approved in accordance with the requirements for Operating Committee meetings. In each case, CAT LLC forecasts that the change requests will be necessary to implement the CAT. As described above,[135] CAT LLC determined that it was reasonable not to include any change request fees in the Budgeted CAT Costs 2026–1.

(v) Capitalized Developed Technology Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted costs related to capitalized developed technology costs as a part of CAT Fees.[136] In general, capitalized developed technology costs would include costs related to, for example, certain development costs, costs related to certain modifications, upgrades and other changes to the CAT and license fees. The amount and type of budgeted capitalized developed technology costs for the CAT Fee 2026–1 Period, which relate to the software license fee and technology changes to be implemented by FCAT, are described in more detail above.[137]

(vi) Legal

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted costs related to legal fees as a part of CAT Fees.[138] CAT LLC determined that the budgeted legal costs described in this filing are reasonable and should be included as a part of the Budgeted CAT Costs 2026–1. Given the unique nature of the CAT, the number of parties involved with the CAT (including, for example, the SEC, Participants, Industry Members, and vendors) and the many regulatory, contractual and other issues associated with the CAT, the scope of the necessary legal services is substantial. CAT LLC determined that the scope of the proposed legal services is necessary to implement and maintain the CAT and that the legal rates reflect the specialized services necessary for such a project. CAT LLC determined to hire and continue to use each law firm based on a variety of factors, including their relevant expertise and fees. In each case, CAT LLC determined that the fee rates were in line with market rates for specialized legal expertise. In addition, CAT LLC determined that the budgeted costs for the legal projects were appropriate given the breadth of the services provided. The services to be performed by each law firm for the CAT Fee 2026–1 Period and the budgeted costs related to such services are described above.[139]

(vii) Consulting

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted consulting costs as a part of CAT Fees.[140] CAT LLC determined that the budgeted consulting costs described in this filing are reasonable and should be included as a part of Budgeted CAT Costs 2026–1. Because there are no CAT employees [141] and because of the significant number of issues associated with the CAT, the consultants are budgeted to provide assistance in the management of various CAT matters and the processes related to such matters.[142] CAT LLC determined the budgeted consulting costs were appropriate, as the consulting services were to be provided at reasonable market rates that were comparable to the rates charged by other consulting firms for similar work. Moreover, the total budgeted costs for such consulting services were appropriate in light of the breadth of services provided by Deloitte. The services budgeted to be performed by Deloitte and the budgeted costs related to such services are described above.[143]

(viii) Insurance

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted insurance costs as a part of CAT Fees.[144] CAT LLC determined that the budgeted insurance costs described in this filing are reasonable and should be included as a part of the Budgeted CAT Costs 2026–1. CAT LLC determined that it is common practice to have directors' and officers' liability insurance, and errors and omissions liability insurance. CAT LLC further determined that it was important to have cyber security insurance given the nature of the CAT, and such a decision is consistent with the CAT NMS Plan, which states that the cyber incident response plan may include ''[i]nsurance against security breaches.'' [145] As discussed above,[146] CAT LLC determined that the budgeted insurance costs were appropriate given its prior experience with this market and an analysis of the alternative insurance offerings. Based on this analysis, CAT LLC determined that the selected insurance policies provided appropriate coverage at reasonable market rates.[147]

(ix) Professional and Administration

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted professional and administration costs as a part of CAT Fees.[148] CAT LLC determined that the budgeted professional and administration costs described in this filing are reasonable and should be included as a part of Budgeted CAT Costs 2026–1. Because there are no CAT employees, all required accounting, financial, tax, cash management and treasury functions for CAT LLC have been outsourced at market rates. In addition, the required annual financial statement audit of CAT LLC is included

[142] CAT LLC uses certain third parties to perform tasks that may be performed by administrators for other NMS Plans. *See, e.g.,* CTA Plan and CQ Plan.

[143] Section 3(a)(2)(C)(vii) above.

[144] Section 11.3(a)(iii)(B)(B)(4) of the CAT NMS Plan.

[145] Section 4.1.5 of Appendix D of the CAT NMS Plan.

[146] *See* Section 3(a)(2)(C)(viii) above.

[147] *Id.*

[148] Section 11.3(a)(iii)(B)(B)(5) of the CAT NMS Plan.

in professional and administration costs, which costs are also at market rates. The services performed by Anchin and Grant Thornton and the costs related to such services are described above.[149]

CAT LLC anticipates continuing to make use of Anchin, a financial advisory firm, to assist with financial matters for the CAT. CAT LLC determined that the budgeted costs for Anchin were appropriate, as the financial advisory services were to be provided at reasonable market rates that were comparable to the rates charged by other such firms for similar work. Moreover, the total budgeted costs for such financial advisory services were appropriate in light of the breadth of services provided by Anchin. The services budgeted to be performed by Anchin and the budgeted costs related to such services are described above.[150]

CAT LLC anticipates continuing to make use of Grant Thornton, an independent accounting firm, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC determined that the budgeted costs for Grant Thornton were appropriate, as the accounting services were to be provided at reasonable market rates that were comparable to the rates charged by other such firms for similar work. Moreover, the total budgeted costs for such accounting services were appropriate in light of the breadth of services provided by Grant Thornton. The services budgeted to be performed by Grant Thornton and the budgeted costs related to such services are described above.[151]

(x) Public Relations Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted public relations costs as a part of CAT Fees.[152] However, as described above,[153] CAT LLC determined not to include any public relations costs in Budgeted CAT Costs 2026–1. CAT LLC determined that it was reasonable not to include any public relations costs in the Budgeted CAT Costs 2026–1.

(xi) Interest Income

Section 11.1(a) of the CAT NMS Plan requires the CAT budget to include ''the sources of all revenues to cover costs.'' Accordingly, the Updated 2026 CAT Budget includes a line item for interest income. Specifically, the Updated 2026 CAT Budget includes $1,453,382 in interest income for the CAT Fee 2026–1 Period.[154] CAT LLC determined that using interest income to reduce the amount to be collected via CAT Fees is reasonable and should be included as a part of the Budgeted CAT Costs 2026–1.

(xii) Reserve

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover budgeted reserve costs as a part of CAT Fees.[155] CAT LLC determined that the reserve in the amount of 25% of the Updated 2026 CAT Budget (other than the reserve) complies with the requirements of the CAT NMS Plan related to a reserve, is a reasonable amount, and, therefore, should be included as a part of the Updated 2026 CAT Budget.

In its approval order for the CAT Funding Model, the Commission stated that it would be appropriate for the annual operating budget for the CAT to ''include a reserve of not more than 25% of the annual budget.'' [156] In making this statement, the Commission noted the following:

Because the CAT is a critical regulatory tool/system, the CAT needs to have a stable funding source to build financial stability to support the Company as a going concern. Funding for the CAT, as noted in Section 11.1(b), is the responsibility of the Participants and the industry. Because CAT fees are charged based on the budget, which is based on anticipated volume, it is appropriate to have a reserve on hand to prevent a shortfall in the event there is an unexpectedly high volume in a given year. A reserve would help to assure that the CAT has sufficient resources to cover costs should there be unanticipated costs or costs that are higher than expected.[157]

The SEC also recognized that a reserve would help address the difficulty in predicting certain variable CAT costs, like trading volume.[158] The SEC also recognized that CAT fees will be collected approximately three months after trading activity on which a CAT fee is based, or 25% of the year, and that the reserve would be available to address funding needs related to this three-month delay.[159] The inclusion of the proposed reserve in the Updated 2026 CAT Budget would provide each of these benefits to the CAT. The reserve is discussed further above.[160]

As discussed further below,[161] however, a surplus reserve balance in excess of the budgeted 25% reserve has been collected as of the beginning of the year of 2026. Accordingly, the Updated 2026 CAT Budget indicates that this surplus would be used to offset a portion of CAT costs for the CAT Fee 2026–1 Period, thereby reducing the fee rate for CAT Fee 2026–1 ($0.000001 per executed equivalent share). If the fee rate for CAT Fee 2026–1 were calculated solely based on the reasonably budgeted costs for CAT for May–December 2026, excluding the reduction in that amount due to the surplus reserve offset, the fee rate would be $0.000010 per executed equivalent share.

(B) Reconciliation of Budget to the Collected Fees

The CAT NMS Plan also requires fee filings for Prospective CAT Fees to include ''a discussion of how the budget is reconciled to the collected fees.'' [162] As discussed above,[163] this reserve balance of $102,391,135 collected via prior CAT Fees would be used to offset a portion of CAT costs for CAT Fee Period 2026–1, thereby reducing the fee rate to be paid for CAT Fee 2026–1. Specifically, the total costs (including the 25% reserve) for CAT Fee 2026–1 of $117,540,783 would be reduced by the $102,391,135 in reserve. Therefore, the Total Budgeted CAT Costs 2026–1 would be $15,149,648. Such surplus reserve balance would be used to reduce the fee rate for CAT Fee 2026–1 ($0.000001 per executed equivalent share).

(C) Total Executed Equivalent Share Volume for the Prior 12 Months

The total executed equivalent share volume of transactions in Eligible Securities for the period from March 2025 through February 2026 was 5,980,937,549,360.49 executed equivalent shares. CAT LLC determined the total executed equivalent share volume for the prior twelve months by counting executed equivalent shares in the same manner as it counts executed equivalent shares for CAT billing purposes.[164]

[149] *See* Section 3(a)(2)(C)(ix) above.

[154] *See* chart entitled ''Budgeted CAT Costs 2026–1'' in Section 3(a)(2)(C) above.

[155] Section 11.3(a)(iii)(B)(B) of the CAT NMS Plan.

[156] CAT Funding Model Approval Order at 13444.

[157] *Id.*

[158] *Id.*

[159] *Id.*

[160] *See* Section 3(a)(2)(C)(xii) above.

[161] *See* Section 3(b)(2)(B) below.

[162] Section 11.3(a)(iii)(B)(C) of the CAT NMS Plan.

[163] *See* Section 3(a)(2)(C)(xii) above.

[164] *See* Section 3(a)(2)(D) above.

(D) Projected Executed Equivalent Share Volume for the CAT Fee 2026–1 Period

CAT LLC has determined that the projected total executed equivalent share volume for the eight months of the CAT Fee 2026–1 Period by multiplying by 8/12ths the executed equivalent share volume for the prior twelve months: 8/12 times 5,980,937,549,360.49 executed equivalent shares.[165] The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has increased from prior years (*e.g.,* the executed equivalent share volume for 2024 was 4,295,884,600,069.41), and the Operating Committee believes that it is reasonable to conclude that the annual executed equivalent share volume will remain at the higher level.

(E) Actual Fee Rate for CAT Fee 2026–1

(i) Decimal Places

As noted in the approval order for the CAT Funding Model, as a practical matter, the fee filing for a CAT Fee would provide the exact fee per executed equivalent share to be paid for each CAT Fee, by multiplying the Fee Rate by one-third and describing the relevant number of decimal places for the fee rate.[166] Accordingly, proposed paragraph (a)(6)(B) of the fee schedule would set forth a fee rate of $0.000001 per executed equivalent share. This fee rate is calculated by multiplying Fee Rate 2026–1 by one-third and rounding the result to six decimal places. CAT LLC determined that the use of six decimal places is reasonable as it balances the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.[167]

(ii) Reasonable Fee Level

The Exchange believes that charging CAT Fee 2026–1 with a fee rate of $0.000001 per executed equivalent share is reasonable because it provides for a revenue stream for the Company that is aligned with the Budgeted CAT Costs 2026–1. Moreover, the Exchange believes that the level of the fee rate is reasonable, as it is less than CAT Fee 2025–2 and is comparable to other transaction-based fees, including fees assessed pursuant to Section 31.[168] As a result, the magnitude of CAT Fee 2026–1 is small, and therefore will mitigate any potential adverse economic effects or inefficiencies.[169]

(3) CAT Fee 2026–1 Provides for an Equitable Allocation of Fees

CAT Fee 2026–1 provides for an equitable allocation of fees, as it equitably allocates CAT costs between and among the Participants and Industry Members. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act, including the formula for calculating CAT Fees as well as the Industry Members to be charged the CAT Fees.[170] In approving the CAT Funding Model, the SEC stated that ''[t]he Participants have sufficiently demonstrated that the proposed allocation of fees is appropriate and meets the Rule 608(b) approval standard.'' [171] Accordingly, the CAT Funding Model sets forth the requirements for allocating fees related to Budgeted CAT Costs among Participants and Industry Members, and the fee filings for CAT Fees must comply with those requirements.

CAT Fee 2026–1 provides for an equitable allocation of fees as it complies with the requirements regarding the calculation of CAT Fees as set forth in the CAT NMS Plan. For example, as described above, the calculation of CAT Fee 2026–1 complies with the formula set forth in Section 11.3(a) of the CAT NMS Plan. In addition, CAT Fee 2026–1 would be charged to CEBBs and CEBSs in accordance with Section 11.3(a) of the CAT NMS Plan. Furthermore, the Participants would be charged for their designated share of the Budgeted CAT Costs 2026–1 through a fee implemented via the CAT NMS Plan, which would have the same fee rate as CAT Fee 2026–1.

In addition, as discussed above, each of the inputs into the calculation of CAT Fee 2026–1—the Budgeted CAT Costs 2026–1, the count for the executed equivalent share volume for the prior 12 months, and the projected executed equivalent share volume for the CAT Fee 2026–1 Period—is reasonable. Moreover, these inputs lead to a reasonable fee rate for CAT Fee 2026–1 that is lower than other fee rates for transaction-based fees. A reasonable fee rate allocated in accordance with the requirements of the CAT Funding Model provides for an equitable allocation of fees.

(4) CAT Fee 2026–1 Is Not Unfairly Discriminatory

CAT Fee 2026–1 is not an unfairly discriminatory fee. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfies the requirements of the Exchange Act. In reaching this conclusion, the SEC analyzed the potential effect of CAT Fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. CAT Fee 2026–1 complies with the requirements regarding the calculation of CAT Fees as set forth in the CAT NMS Plan. In addition, as discussed above, each of the inputs into the calculation of CAT Fee 2026–1 and the resulting fee rate for CAT Fee 2026–1 is reasonable. Therefore, CAT Fee 2026–1 does not impose an unfairly discriminatory fee on Industry Members.

The Exchange believes the proposed fees established pursuant to the CAT Funding Model promote just and equitable principles of trade, and, in general, protect investors and the public interest, and are provided in a transparent manner and with specificity in the fee schedule. The Exchange also believes that the proposed fees are reasonable because they would provide ease of calculation, ease of billing and other administrative functions, and predictability of a fee based on fixed rate per executed equivalent share. Such factors are crucial to estimating a reliable revenue stream for CAT LLC and for permitting Exchange members to reasonably predict their payment obligations for budgeting purposes.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

Section 6(b)(8) of the Act [172] requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The

[165] *Id.*

[166] CAT Funding Model Approval Order at 13445, n.677.

[167] *See* Section 3(a)(5)(A) above.

[168] For example, as the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from $0.00007 per share to $0.00072 per share. CAT Funding Model Approval Order at 13469.

[169] *Id.*

[170] *See* Section 11.3(a) of the CAT NMS Plan.

[171] CAT Funding Model Approval Order at 13412.

[172] 15 U.S.C. 78f(b)(8).

Exchange notes that CAT Fee 2026–1 implements provisions of the CAT NMS Plan that were approved by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan.

In addition, all Participants (including exchanges and FINRA) are proposing to introduce CAT Fee 2026–1 on behalf of CAT LLC to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the Participants.

Furthermore, in approving the CAT Funding Model, the SEC analyzed the potential competitive impact of the CAT Funding Model, including competitive issues related to market services, trading services and regulatory services, efficiency concerns, and capital formation.[173] The SEC also analyzed the potential effect of CAT fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Based on this analysis, the SEC approved the CAT Funding Model as compliant with the Exchange Act. CAT Fee 2026–1 is calculated and implemented in accordance with the CAT Funding Model as approved by the SEC.

As discussed above, each of the inputs into the calculation of CAT Fee 2026–1 is reasonable and the resulting fee rate for CAT Fee 2026–1 calculated in accordance with the CAT Funding Model is reasonable. Therefore, CAT Fee 2026–1 would not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

The Exchange neither solicited nor received comments on the proposed rule change.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

This proposed rule change establishes dues, fees or other charges among its members and, as such, may take effect upon filing with the Commission pursuant to Section 19(b)(3)(A)(ii) of the Act[174] and paragraph (f)(2) of Rule 19b–4 thereunder.[175] Accordingly, the proposed rule change would take effect upon filing with the Commission.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend the rule change if it appears to the Commission that the action is necessary or appropriate in the public interest, for the protection of investors, or would otherwise further the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

*Electronic Comments*

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–LTSE–2026–12 on the subject line.

*Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–LTSE–2026–12. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of LTSE and on its internet website at *https://longtermstockexchange.com/.* Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–LTSE–2026–12 and should be submitted on or before June 8, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[176]

## DEPARTMENT OF STATE

**[Public Notice: 13019]**

### Notice of Public Meeting To Prepare for International Maritime Organization TC 76 Session

The Department of State will conduct a public meeting at 10:00 a.m. on Friday, June 5, 2026, by teleconference. The primary purpose of the meeting is to prepare for the 76th session of the International Maritime Organization's (IMO) Technical Cooperation Committee (TC 76) to be held at IMO Headquarters in London, United Kingdom from Monday, June 8, 2026 to Friday, June 12, 2026.

The agenda items to be considered include:

—Adoption of the agenda
—Decisions of other bodies and organizations
—Technical cooperation planning and reporting
—The 2030 Agenda for Sustainable Development
—The Capacity-Development Strategy
—Review and implementation of the regional presence and coordination scheme
—Integration of IMSAS audit outcomes into technical cooperation activities and projects
—Capacity-Development: Empowering all women and the promotion of diversity, equality, equity, and inclusion (DEEI) in the maritime sector
—Advancing maritime education and training for the global maritime sector
—Technical Cooperation evaluation and reporting on the implementation of the recommendations
—Application of the Committee's method of work
—Work programme
—Election of Chair and Vice-Chair for 2027
—Any other business

*Please note:* The IMO may, on short notice, adjust the TC 76 agenda to accommodate any constraints associated with the meeting. Although no changes to the agenda are anticipated, if any are necessary, they will be provided to those who RSVP.

Those who plan to participate may contact the meeting coordinator, LT Justus Martin, by email at *Justus.D.Martin@uscg.mil,* by phone at (571) 610–0444, or in writing at United States Coast Guard (CG–5PS), ATTN: LT Justus Martin, 2703 Martin Luther King Jr. Ave. SE Stop 7509, Washington DC 20593–7509, by May 29, 2026. Members of the public needing reasonable accommodation should advise LT Justus Martin no later than May 29, 2026. Requests made after that date will be considered but might not be possible to fulfill.

Additional information regarding this and other IMO public meetings may be found at: *https://www.dco.uscg.mil/IMO.*

## DEPARTMENT OF TRANSPORTATION

### National Highway Traffic Safety Administration

### Motorcyclist Advisory Council Notice of Public Meeting

**AGENCY:** National Highway Traffic Safety Administration, U.S. Department of Transportation (DOT).

**ACTION:** Notice of public meeting.

**SUMMARY:** This notice announces a meeting of the Motorcyclist Advisory Council (MAC).

**DATES:** This meeting will be transmitted via virtual interface. It will be held on July 15, 2026, from 1:00 p.m. to 5:00 p.m. ET. Pre-registration is required to attend this meeting. Once registered, a link permitting access to the meeting will be distributed to registrants by email. If you wish to speak during the meeting, you must submit a written copy of your remarks to DOT for consideration by July 3, 2026.

**ADDRESSES:** General information about the Council is available on the MAC internet website at *https://www.nhtsa.gov/motorcyclist-advisory-council.* The registration portal and meeting agenda will be available on the MAC internet website at *https://www.nhtsa.gov/motorcyclist-advisory-council* at least one week in advance of the meeting.

**FOR FURTHER INFORMATION CONTACT:** Michelle Atwell, Designated Federal Officer, National Highway Traffic Safety Administration, U.S. Department of Transportation is available by phone at (202) 222–5799 or by email at *Michelle.Atwell@dot.gov.* Any committee-related requests should be sent to the person listed in this section.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

MAC has been re-established under the Infrastructure Investment and Jobs Act (IIJA), (Pub. L. 117–58) (codified at 49 U.S.C. 355). In accordance with Section 24111 of IIJA, the Secretary of Transportation is required to establish a MAC comprised of 13 members to advise on transportation safety issues of concern to motorcyclists, including:

1. Motorcycle and motorcyclist safety;

2. Barrier and road design, construction, and maintenance practices; and

3. The architecture and implementation of intelligent transportation system technologies.

The purposes of the MAC are: (a) to provide advice on transportation safety issues of concern to motorcyclists consistent with the Council's statutorily specified advising duties; (b) to provide a forum for the development, consideration, and communication of information from a knowledgeable and independent perspective; and (c) not later than October 31 of the calendar year following the calendar year in which the Council is established, and not less than once every 2 years thereafter, to submit to the Secretary a report containing recommendations of the Council regarding (1) motorcycle and motorcyclist safety; (2) barrier and road design, construction, and maintenance practices; and (3) the architecture and implementation of intelligent transportation system technologies.

The last appointments of a previous version of the MAC were in 2017, in accordance with the provisions of the Fixing America's Surface Transportation (FAST) Act, Section 1426. The 2017 MAC was established to advise the Federal Highway Administration (FHWA) on infrastructure recommendations. The Council accomplished this purpose by conducting five committee meetings focused on infrastructure issues that directly affected motorcyclists. On March 11, 2020, the 2017 MAC issued a final report to FHWA that included infrastructure recommendations. After receiving the MAC's recommendations, FHWA initiated a motorcyclist safety project to identify implementation and research needs, appropriate strategies, and corresponding projects. In October 2020, the 2017 MAC was terminated.

#### II. Agenda

At the meeting, the agenda will cover the following topics:

- Representative Introductions
- Informational sessions
- Updates from NHTSA and FHWA
- Strategic Planning
- Public Comment

## III. Public Participation

This meeting will be open to the public. We are committed to providing equal access to this meeting for all participants. Persons with disabilities in need of an accommodation should send a request to the individual in the **FOR FURTHER INFORMATION CONTACT** section of this notice no later than July 1, 2026.

A period of time will be allotted for comments from members of the public joining the meeting. Members of the public may present questions and comments to the Council using the live chat feature available during the meeting. Members of the public may also submit materials, questions, and comments in advance for consideration to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Members of the public wishing to reserve time to speak directly to the Council during the meeting must submit a request. The request must include the name, contact information (address, phone number, and email address), and organizational affiliation of the individual wishing to address MAC; it must also include a written copy of prepared remarks and must be forwarded to the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice no later than July 3, 2026 for consideration.

All advance submissions will be reviewed by the Council Chairperson and Designated Federal Officer. If approved, advance submissions shall be circulated to MAC representatives for review prior to the meeting. All advance submissions will become part of the official record of the meeting.

*Authority:* 49 U.S.C. 355(b)(1); 49 CFR part 1.95(i)(4).

Issued in Washington, DC.

**Jane Terry,**

*Acting Associate Administrator, Research and Program Development.*

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

### Superfund Tax on Chemical Substances; Request To Modify List of Taxable Substances; Notice of Filing for Methyl Methacrylate-ethyl Methacrylate-methacrylic Acid Copolymer in a Styrene Solution (x=75.76, y=8.46, z=1, s=168.4); Hearing

**AGENCY:** Internal Revenue Service (IRS), Treasury.

**ACTION:** Notice of filing and request for comments; notice of hearing.

**SUMMARY:** This document provides a notice of public hearing on the notice of filing published in the **Federal Register** on Wednesday, January 14, 2026. This notice of filing announced that a petition has been filed requesting that methyl methacrylate-ethyl methacrylate-methacrylic acid copolymer in a styrene solution ($(C_5H_8O_2)_x$-$(C_6H_{10}O_2)_y$-$(C_4H_6O_2)_z$-$(C_8H_8)_s$; x=75.76, y=8.46, z=1, s=168.4) be added to the list of taxable substances.

**DATES:** The hearing is scheduled to be held on Thursday, June 18, 2026, at 10:00 a.m. Eastern Time (ET). The IRS must receive speakers' outlines of the topics to be discussed by Thursday, June 4, 2026. If no outlines are received by Thursday, June 4, 2026, the hearing will be cancelled.

**ADDRESSES:** The hearing will be conducted by telephone only. Send an outline of topic submission electronically via the Federal eRulemaking Portal at *www.regulations.gov* (indicate IRS and IRS–2025–0599). Send paper submissions to CC:PA:01:PR, (IRS–2025–0599), Room 5503, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

**FOR FURTHER INFORMATION CONTACT:** Concerning the notice of filing, Jacob W. Peeples or Andrew J. Clark at (202) 317–6855 (not a toll-free number); concerning submissions of requests to testify or attend the hearing, the Publications and Regulations Section at (202) 317–6901 (not toll-free number) or by email at *publichearings@irs.gov* (preferred).

**SUPPLEMENTARY INFORMATION:** The subject of the hearing is the notice (Public docket number: IRS–2025–0599) published in the **Federal Register** on Wednesday, January 14, 2026 (91 FR 1599). This hearing is limited to testimony about the notice of filing for methyl methacrylate-ethyl methacrylate-methacrylic acid copolymer in a styrene solution ($(C_5H_8O_2)_x$-$(C_6H_{10}O_2)_y$-$(C_4H_6O_2)_z$-$(C_8H_8)_s$; x=75.76, y=8.46, z=1, s=168.4). Testimony regarding the operation of the Superfund excise taxes, the related proposed regulations, and the petition process are outside the scope of this hearing.

The rules of 26 CFR 601.601(a)(3) apply to the hearing. Individuals who wish to testify at the hearing must submit an outline of the topics to be discussed and the time to be devoted to each topic by Thursday, June 4, 2026. A period of 10 minutes will be allotted to each testimony.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available via *www.regulations.gov* under the title of Supporting & Related Material. If no outline of the topics to be discussed is received Thursday, June 4, 2026, the hearing will be cancelled and a notice of cancellation of the hearing will be published in the **Federal Register**.

Individuals who want to testify by telephone must send an email to *publichearings@irs.gov* to receive the telephone number and access code for the hearing. The subject line of the email must contain the regulation number (IRS–2025–0599) and the language ''TESTIFY Telephonically.'' For example, the subject line may say: Request to TESTIFY Telephonically at Hearing for IRS–2025–0599.

Individuals who want to attend the hearing by telephone without testifying must also send an email to *publichearings@irs.gov* to receive the telephone number and access code for the hearing. The subject line of the email must contain the regulation number (IRS–2025–0599) and the language ''ATTEND Hearing Telephonically.'' For example, the subject line may say: Request to ATTEND Hearing Telephonically for IRS–2025–0599. Requests to attend the hearing must be received by Tuesday, June 16, 2026, 5:00 p.m. ET.

Hearings will be made accessible to people with disabilities. To request special assistance during a hearing please contact the Publications and Regulations Section by sending an email to *publichearings@irs.gov* (preferred) or by telephone at (202) 317–6901 (not a toll-free number) by Thursday, June 11, 2026.

Any additional questions regarding speaking at or attending the hearing may also be emailed to *publichearings@irs.gov.*

**Oluwafunmilayo A. Taylor,**

*Section Chief, Publications and Regulations Section, Associate Chief Counsel, (Procedure and Administration).*

**BILLING CODE 4831–GV–P**

## DEPARTMENT OF THE TREASURY

### Privacy Act of 1974; Matching Program

**AGENCY:** Department of the Treasury.

**ACTION:** Notice of a new matching program.

**SUMMARY:** In accordance with the Privacy Act of 1974, as amended, and Office of Management and Budget (OMB) guidance on computer matching, the Department of the Treasury (Treasury) is providing notice of the establishment of a new matching program. Pursuant to the Payment Integrity Information Act of 2019, Treasury, including its component bureaus and program offices, is establishing a new matching program consisting of the computerized comparison of systems of records for benefits programs at Treasury with the Do Not Pay (DNP) Working System, which is administered by Treasury's Bureau of the Fiscal Service. This matching program will enable the Treasury programs listed in the appendix of this notice to compare records maintained in their respective systems of records with records maintained in the DNP Working System for the purposes of identifying and preventing improper payments and conducting any related recovery activities by verifying through DNP prepayment or pre-award eligibility.

**DATES:** Submit comments on or before June 17, 2026. These new matching programs will be effective 30 days after publication of this notice through September 10, 2029.

**ADDRESSES:** Written comments on this notice may be submitted electronically through the Federal government eRulemaking portal at *http://www.regulations.gov;* docket number TREAS–DO–2026–0364. Electronic submission of comments allows the commenter maximum time to prepare and submit a comment, ensures timely receipt, and enables Treasury to make the comments available to the public. Please note that comments submitted through *https://www.regulations.gov* will be made available for viewing by the public.

Comments on this proposed matching program may also be addressed to U.S. Department of the Treasury, Attention: Ryan Law, Deputy Assistant Secretary for Privacy, Transparency, and Records, 1500 Suite #8100, JBAB, 250 Murray Lane SW, Bldg. 410/Door 123, Washington, DC 20222, or by email: *Privacy@treasury.gov.*

**FOR FURTHER INFORMATION CONTACT:** Ryan Law, Deputy Assistant Secretary for Privacy, Transparency, and Records, U.S. Department of the Treasury, 1500 Suite #8100, JBAB, 250 Murray Lane SW, Bldg. 410/Door 123, Washington, DC 20222, or by email: *Privacy@treasury.gov.*

**SUPPLEMENTARY INFORMATION:** The Computer Matching and Privacy Protection Act of 1988 (Pub. L. 100–503) amended the Privacy Act of 1974 (5 U.S.C. 552a) by establishing procedural safeguards related to agencies' use of records when performing certain types of computerized matching. Section 7201 of the Omnibus Budget Reconciliation Act of 1990 (Pub. L. 101– 508) further amended the Privacy Act regarding protections for individuals when agencies perform these functions. Additionally, the Payment Integrity Information Act of 2019 (31 U.S.C. 3351 *et seq.*) provides the head of the agency operating the DNP Working System with the authority, in consultation with OMB, to waive the requirements in 5 U.S.C. 552a(o) in any case or class of cases for matching activities conducted under the DNP Initiative (31 U.S.C. 3354). Pursuant to this authority, the Secretary of the Treasury, after consulting with the OMB Director, authorized the issuance of a four-year waiver of the requirement for entering into a matching agreement under 5 U.S.C. 552a(o) for the class of matching programs that meet all of the criteria defined in OMB Memorandum M–25–32, *Preventing Improper Payments and Protecting Privacy through Do Not Pay.*

Treasury has determined that the DNP matching program described in this notice is eligible for the waiver described in OMB Memorandum M–25–32, which is effective from September 10, 2025 through September 10, 2029. For purposes of this notice, matching activities conducted between the Federal benefit programs listed in the appendix to this document and the DNP Working System constitute a single agency-wide matching program implementing DNP for Treasury's listed programs.[1]

*Participating Agencies:* The Treasury programs listed in the appendix of this notice will match against the DNP Working System, which is maintained by the Bureau of the Fiscal Service at the U.S. Department of the Treasury.

*Authority for Conducting the Matching Program:* The Payment Integrity Information Act of 2019 (31 U.S.C. 3351 *et seq.*) establishes the DNP Initiative and requires, for the purposes of identifying and preventing improper payments, each executive agency to have access to, and use of, the relevant databases in DNP to verify payment or award eligibility. Additional applicable authorities for this matching program include Executive Order 13520, *Reducing Improper Payments* (74 FR 62201); Executive Order 14249, *Protecting America's Bank Account Against Fraud, Waste, and Abuse* (90 FR 14011); and OMB Memorandum M–25–32, *Preventing Improper Payments and Protecting Privacy Through Do Not Pay.* Additional information regarding the statutory authorities for the collection and maintenance of information for each of the Treasury programs that will conduct matches with the DNP Working System are contained within the systems of records notices listed in the appendix below.

*Purpose(s):* The purposes of the matching program are identifying and preventing improper payments and conducting any related recovery activities by verifying through Do Not Pay prepayment or pre-award eligibility. Data elements that are necessary for eligibility determinations for a relevant Treasury program that are contained in records from Treasury systems of records will be compared with records in the DNP Working System. When there is a match between a record provided by the Treasury program and a record in the DNP Working System, the DNP Working System will provide to the submitting Treasury program notice of a potentially matching record and will identify the database(s) that contain the potentially matching record(s). The Treasury program will then review the information to determine whether additional action is needed. If no matches are identified, the DNP Working System will provide a no match response to the submitting Treasury program.

*Categories of Individuals:* Applicants for, or recipients of, Federal funds from those Treasury programs listed in the appendix below.

*Categories of Records:* Data elements that will be matched include: applicant's name (which may include individual name and/or business/trading names, if applicable); Social Security Number (SSN); State and federal Taxpayer Identification Number (TIN); Individual Taxpayer Identification Number (ITIN); Taxpayer Identification Number for pending U.S. adoptions (ATIN); Preparer Taxpayer Identification Number (PTIN); Unique Entity Identifier (UEI); National Provider Identifier (NPI); home and work address(es); date of birth; sex;

[1] The statutory definition of the term ''matching program'' means ''any computerized comparison of—(i) two *or more* automated systems of records or a system of records with non-Federal records'' for certain enumerated purposes. 5 U.S.C. 552a(a)(8) (emphasis added). There is a separate statutory definition for ''Federal benefit program.'' *See* OMB Memorandum M–25–32 at Appendix II, page 2, sec. a.3.iii.1 (recognizing that a single agency matching program may consist of multiple systems of records). Thus, this notice applies to the DNP matching program for multiple Federal benefits programs and associated systems of records within Treasury.

home, work, and mobile telephone numbers; email address(es); bank account information, including account number and financial institution routing and transit number; and tracking numbers used to locate payment information.

*System(s) of Records:* The records contained within the DNP Working System are maintained in the system of records known as Department of the Treasury, Bureau of the Fiscal Service .017—Do Not Pay Payment Verification Records (85 FR 11776). This system of records includes those databases designated to be included in the DNP Working System by the Payment Integrity Information Act of 2019 as well as other databases designated for inclusion by the Director of the Office of Management and Budget, or the designee of the Director, in consultation with executive agencies. The other Treasury records involved in the matching program are maintained in Treasury systems of records listed in the appendix below.

*Appendix:* Below is a list of the Treasury programs that will match records with the DNP Working System, and the applicable system of records notice(s) for each Treasury program. For purposes of this notice, matching activities conducted between the Federal benefit programs listed in the following appendix and the DNP Working System constitute a single agency-wide matching program implementing DNP for the agency.

## Securities and Exchange Commission

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend FINRA Rule 6897 (Consolidated Audit Trail Funding Fees) To Establish Fees for Industry Members Related to Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail; Notice

## SECURITIES AND EXCHANGE COMMISSION

**[Release No. 34–105470; File No. SR–FINRA–2026–011]**

## Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend FINRA Rule 6897 (Consolidated Audit Trail Funding Fees) To Establish Fees for Industry Members Related to Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail

May 13, 2026.

Pursuant to Section 19(b)(1) under the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 28, 2026, the Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

### I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

FINRA is proposing to amend FINRA Rule 6897 (Consolidated Audit Trail Funding Fees) to establish fees for Industry Members [3] related to certain historical costs of the National Market System Plan Governing the Consolidated Audit Trail (the ''CAT NMS Plan'' or ''Plan'') incurred prior to January 1, 2022 that were not previously invoiced via Historical CAT Assessment 1. Industry Members were previously invoiced for $173,075,024 of the $212,039,879.34 of Historical CAT Costs 1 via Historical CAT Assessment 1. Historical CAT Assessment 1 is no longer in effect. Historical CAT Assessment 1A is being established to collect the remaining $38,964,855.34 of Historical CAT Costs 1. These fees would be payable to Consolidated Audit Trail, LLC (''CAT LLC'' or ''the Company'') [4] and referred to as Historical CAT Assessment 1A, and would be described in paragraph (a)(1)(B) of FINRA Rule 6897 (Consolidated Audit Trail Funding Fees). The fee rate for Historical CAT Assessment 1A will be $0.000002 per executed equivalent share. CAT Executing Brokers will receive their first monthly invoice for Historical CAT Assessment 1A in June 2026 calculated based on their transactions as CAT Executing Brokers for the Buyer (''CEBB'') and/or CAT Executing Brokers for the Seller (''CEBS'') in May 2026.

The text of the proposed rule change is available on FINRA's website at *http://www.finra.org* and at the principal office of FINRA.

### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

#### *A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

1. Purpose

On July 11, 2012, the Commission adopted Rule 613 of Regulation NMS, which required the self-regulatory organizations (''SROs'') to submit a national market system (''NMS'') plan to create, implement and maintain a consolidated audit trail that would capture customer and order event information for orders in NMS securities across all markets, from the time of order inception through routing, cancellation, modification or execution.[5] On November 15, 2016, the Commission approved the CAT NMS Plan.[6] Under the CAT NMS Plan, the Operating Committee has the discretion to establish funding for CAT LLC to operate the CAT, including establishing fees for Industry Members to be assessed by CAT LLC that would be implemented on behalf of CAT LLC by the Participants.[7] On September 5, 2025, CAT LLC proposed a revised funding model to fund the CAT (''CAT Funding Model'').[8] On March 16, 2026, the Commission approved the CAT Funding Model, after concluding that the model satisfied the requirements of Section 11A of the Exchange Act and Rule 608 thereunder.[9]

The CAT Funding Model provides a framework for the recovery of the costs to create, develop and maintain the CAT, including providing a method for allocating costs to fund the CAT among Participants and Industry Members. The CAT Funding Model establishes two categories of fees: (1) CAT fees assessed by CAT LLC and payable by certain Industry Members to recover a portion of historical CAT costs previously paid by the Participants (''Historical CAT Assessment'' fees); and (2) CAT fees assessed by CAT LLC and payable by Participants and Industry Members to fund prospective CAT costs (''Prospective CAT Costs'' fees).[10]

Under the CAT Funding Model, ''[t]he Operating Committee will establish one or more fees (each a 'Historical CAT Assessment') to be payable by Industry Members with regard to CAT costs previously paid by the Participants ('Past CAT Costs').'' [11] In establishing a Historical CAT Assessment, the Operating Committee will determine a ''Historical Recovery Period'' and calculate a ''Historical Fee Rate'' for that Historical Recovery Period. Then, for each month in which a Historical CAT Assessment is in effect, each CEBB and CEBS would be required to pay the

[3] An ''Industry Member'' is defined as ''a member of a national securities exchange or a member of a national securities association.'' *See* FINRA Rule 6810(u). *See also* Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. *See* FINRA Rule 6800 Series (Consolidated Audit Trail Compliance Rule).

[4] The term ''CAT LLC'' may be used to refer to Consolidated Audit Trail, LLC or CAT NMS, LLC, depending on the context.

[5] *See* Securities Exchange Act Release No. 67457 (July 18, 2012), 77 FR 45721 (August 1, 2012) (''Rule 613 Adopting Release'').

[6] *See* Securities Exchange Act Release No. 79318 (November 15, 2016), 81 FR 84696 (November 23, 2016) (''CAT NMS Plan Approval Order'').

[7] *See* Section 11.1(b) of the CAT NMS Plan.

[8] *See* Securities Exchange Act Release No. 103960 (September 12, 2025), 90 FR 44910 (September 17, 2025).

[9] *See* Securities Exchange Act Release No. 105003 (March 16, 2026), 91 FR 13410 (March 19, 2026) (''CAT Funding Model Approval Order''). This CAT Funding Model replaced the prior funding model that was approved by the Commission on September 6, 2023. *See* Securities Exchange Act Release No. 98290 (September 6, 2023), 88 FR 62628 (September 12, 2023).

[10] Under the CAT Funding Model, the Operating Committee may establish one or more Historical CAT Assessments. *See* Section 11.3(b) of the CAT NMS Plan. This filing only establishes Historical CAT Assessment 1A related to certain Historical CAT Costs as described herein; it does not address any other potential Historical CAT Assessment related to other Historical CAT Costs. In addition, under the CAT Funding Model, the Operating Committee also may establish CAT Fees related to CAT costs going forward. *See* Section 11.3(a) of the CAT NMS Plan. This filing does not address any potential CAT Fees related to CAT costs going forward. Any such other fee for any other Historical CAT Assessment or CAT Fee for Prospective CAT Costs will be subject to a separate fee filing.

[11] *See* Section 11.3(b) of the CAT NMS Plan.

fee—the Historical CAT Assessment—for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate.[12]

Each Historical CAT Assessment to be paid by CEBBs and CEBSs is designed to contribute toward the recovery of two-thirds of the Historical CAT Costs. Because the Participants previously have paid Past CAT Costs via loans to the Company, the Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made by the Participants to the Company on a pro rata basis based on the outstanding loan amounts due under the loans, instead of through the payment of a CAT fee.[13] In addition, the Participants also will be 100% responsible for certain Excluded Costs (as discussed below).

CAT LLC proposes to charge CEBBs and CEBSs (as described in more detail below) Historical CAT Assessment 1A to recover certain historical CAT costs incurred prior to January 1, 2022, in accordance with the CAT Funding Model.[14] To implement this fee on behalf of CAT LLC, the CAT NMS Plan requires the Participants to ''file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves, and such fees shall be labeled as 'Consolidated Audit Trail Funding Fees.' ''[15] The Plan further states that ''Participants will be required to file with the SEC pursuant to Section 19(b) of the Exchange Act a filing for each Historical CAT Assessment.''[16] Accordingly, the purpose of this filing is to implement a Historical CAT Assessment on behalf of CAT LLC for Industry Members, referred to as Historical CAT Assessment 1A, in accordance with the CAT NMS Plan.[17]

FINRA, along with the other Participants in the CAT, previously filed a fee filing to implement Historical CAT Assessment 1.[18] Based on the fee filing for Historical CAT Assessment 1, Historical CAT Assessment 1 was expected to be in effect from the first invoice in November 2024 until $212,039,879.34 (two-thirds of Historical CAT Costs 1) was invoiced to CAT Executing Brokers collectively.[19] However, Historical CAT Assessment 1 ceased before the entire amount was invoiced.[20] The last invoice for Historical CAT Assessment 1 was provided on December 2025, after only $173,075,024 of the total $212,039,879.34 had been invoiced to Industry Members.[21] Accordingly, $38,964,855.34 of Historical CAT Costs 1 has not been invoiced. Historical CAT Assessment 1A would seek to recover this outstanding amount of Historical CAT Costs 1 that has not been invoiced.

(1) CAT Executing Brokers

Historical CAT Assessment 1A will be charged to each CEBB and CEBS for each applicable transaction in Eligible Securities.[22] The CAT NMS Plan defines a ''CAT Executing Broker'' to mean:

(a) with respect to a transaction in an Eligible Security that is executed on an exchange, the Industry Member identified as the Industry Member responsible for the order on the buy-side of the transaction and the Industry Member responsible for the sell-side of the transaction in the equity order trade event and option trade event in the CAT Data submitted to the CAT by the relevant exchange pursuant to the Participant Technical Specifications; and

(b) with respect to a transaction in an Eligible Security that is executed otherwise than on an exchange and required to be reported to an equity trade reporting facility of a registered national securities association, the Industry Member identified as the executing broker and the Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event in the CAT Data submitted to the CAT by FINRA pursuant to the Participant Technical Specifications; provided, however, in those circumstances where there is a non-Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event or no contra-side executing broker is identified in the TRF/ORF/ADF transaction data event, then the Industry Member identified as the executing broker in the TRF/ORF/ADF transaction data event would be treated as CAT Executing Broker for the Buyer and for the Seller.[23]

Fields Nos. 26 and 28 of the Participant Technical Specifications, listed below, indicate the CAT Executing Brokers for transactions executed otherwise than on an exchange.

TRF/ORF/ADF Transaction Data Event (TRF)[24]

| No. | Field name | Data type | Description | Include key |
|---|---|---|---|---|
| 26 | reportingExecutingMpid | Member Alias | MPID of the executing party | R |
| 28 | contraExecutingMpid | Member Alias | MPID of the contra-side executing party | C |

[12] In approving the CAT Funding Model, the Commission stated that, ''[i]n the Commission's view, the proposed recovery of the Past CAT Costs via the Historical CAT Assessment is appropriate.'' CAT Funding Model Approval Order, 91 FR 13410, 13450.

[13] *See* Section 11.3(b)(ii) of the CAT NMS Plan.

[14] *See* CAT Funding Model Approval Order.

[15] *See* Section 11.1(b) of the CAT NMS Plan.

[16] *See* Section 11.3(b)(iii)(B)(I) of the CAT NMS Plan.

[17] Note that there may be one or more Historical CAT Assessments. *See* Section 11.3(b) of the CAT NMS Plan.

[18] *See* Securities Exchange Act Release No. 101012 (September 12, 2024), 89 FR 76626 (September 18, 2024) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2024–013).

[19] *See* FINRA Rule 6897(a)(1)(A)(iii).

[20] In response to the Eleventh Circuit's decision vacating the prior CAT NMS Plan funding model, the last invoices for Historical CAT Assessment 1 were sent in December 2025 based on November 2025 transactions. *See Am. Sec. Ass'n* v. *Securities and Exchange Comm'n,* 147 F.4th 1264 (11th Cir. 2025).

[21] *See* CAT Fee Alert 2025–4 (Nov. 25, 2025), *https://www.catnmsplan.com/sites/default/files/2025-11/11.25.25-CAT-Fee-Alert-2025-4.pdf.*

[22] In its approval order for the CAT Funding Model, the Commission determined that charging CAT fees to CAT Executing Brokers was appropriate. In reaching this conclusion the Commission noted that the use of CAT Executing Brokers is appropriate because the CAT Funding Model is based upon the calculation of *executed* equivalent shares, and, therefore, charging CAT Executing Brokers would reflect their executing role in each transaction. Furthermore, the Commission noted that, because CAT Executing Brokers are already identified in transaction reports from the exchanges and FINRA's equity trade reporting facilities recorded in CAT Data, charging CAT Executing Brokers could streamline the billing process. *See* CAT Funding Model Approval Order, 91 FR 13410, 13413.

[23] *See* Section 1.1 of the CAT NMS Plan. In its approval order for the CAT Funding Model, the Commission ''recognize[d] that Industry Members may pass-through CAT fees for customer executed volume.'' *See* CAT Funding Model Approval Order, 91 FR 13410, 13424.

(2) Calculation of Fee Rate for Historical CAT Assessment 1A

The Operating Committee determined the fee rate to be used in calculating Historical CAT Assessment 1A based on the Historical CAT Costs for Historical CAT Assessment 1A and the projected total executed share volume of all transactions in Eligible Securities for the Historical Recovery Period for Historical CAT Assessment 1A (''Historical Recovery Period 1A''), as discussed in detail below. Based on this calculation, the Operating Committee has determined that the fee rate for Historical CAT Assessment 1A would be $0.000002, as discussed in detail below.

(A) Executed Equivalent Shares for Transactions in Eligible Securities

Under the CAT NMS Plan, for purposes of calculating each Historical CAT Assessment, executed equivalent shares in a transaction in Eligible Securities will be reasonably counted as follows: (1) each executed share for a transaction in NMS Stocks will be counted as one executed equivalent share; (2) each executed contract for a transaction in Listed Options will be counted based on the multiplier applicable to the specific Listed Options (*i.e.,* 100 executed equivalent shares or such other applicable multiplier); and (3) each executed share for a transaction in OTC Equity Securities shall be counted as 0.01 executed equivalent share.[25]

(B) Historical CAT Costs

The CAT NMS Plan states that ''[t]he Operating Committee will reasonably determine the Historical CAT Costs sought to be recovered by each Historical CAT Assessment, where the Historical CAT Costs will be Past CAT Costs minus Past CAT Costs reasonably excluded from Historical CAT Costs by the Operating Committee. Each Historical CAT Assessment will seek to recover from CAT Executing Brokers two-thirds of Historical CAT Costs incurred during the period covered by the Historical CAT Assessment.'' [26] Historical CAT Assessment 1, the original Historical CAT Assessment, was implemented to recover $212,039,879.34 of Historical CAT Costs 1 from CEBBs and CEBSs collectively.[27] As described in the fee filings for Historical CAT Assessment 1, Historical CAT Costs 1 of $212,039,879.34 includes Past CAT Costs of $401,312,909 minus certain Excluded Costs of $83,253,090. As described in the filing for Historical CAT Assessment 1, Participants collectively will remain responsible for one-third of Historical CAT Costs 1 (which is $106,019,939.67), plus the Excluded Costs of $83,253,090. Accordingly, CEBBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is $106,019,939.67), and CEBSs collectively will be responsible for one-third of Historical CAT Costs 1 (which is $106,019,939.67), for a total of $212,039,879.34. CEBBs and CEBSs collectively have been invoiced for $173,075,024 of the $212,039,879.34 of Historical CAT Costs 1 via Historical CAT Assessment 1. Accordingly, Historical CAT Assessment 1A would charge CEBBs and CEBSs collectively for the remaining $38,964,855.34 of Historical CAT Costs 1 that was not invoiced to CEBBs and CEBSs via Historical CAT Assessment 1. Historical CAT Assessment 1A will be designed to recover the remaining $38,964,855.34 of Historical CAT Costs 1 from CEBBs and CEBSs collectively, with CEBBs collectively responsible for $19,482,427.67 and CEBSs collectively responsible for $19,482,427.67.

(i) Historical CAT Costs 1

The following describes in detail Historical CAT Costs 1 with regard to four separate historical time periods as well as Past CAT Costs excluded from Historical CAT Costs 1 (''Excluded Costs''). The following cost details are provided in accordance with the requirement in the CAT NMS Plan to provide in the fee filing ''a brief description of the amount and type of Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.'' [28] Each of the costs described below are reasonable, appropriate and necessary for the creation, implementation and maintenance of CAT. These Historical CAT Costs 1 are the same as described in the fee filing for Historical CAT Assessment 1.[29]

(a) Historical CAT Costs Incurred Prior to June 22, 2020 (Pre-FAM Costs)

Historical CAT Costs 1 would include costs incurred by CAT prior to June 22, 2020 (''Pre-FAM Period'') and already funded by the Participants, excluding Excluded Costs (described further below). Historical CAT Costs 1 would include costs for the Pre-FAM Period of $124,290,730. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($41,430,243.33), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($41,430,243.33) and CEBSs paying one-third ($41,430,243.33). These costs do not include Excluded Costs, as discussed further below. The following table [30] breaks down Historical CAT Costs 1 for the Pre-FAM Period into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Historical CAT Costs 1 for Pre-FAM Period (prior to June 22, 2020) |
|---|---|
| Capitalized Developed Technology Costs * | $51,847,150 |
| Technology Costs | 33,568,579 |
| Cloud Hosting Services | 10,268,840 |
| Operating Fees | 21,085,485 |
| CAIS Operating Fees | 2,072,908 |

[24] *See* Table 62, Section 6.1 (TRF/ORF/ADF Transaction Data Event) of the CAT Reporting Technical Specifications for Plan Participants.

[25] *See* Section 11.3(a)(i)(B) and 11.3(b)(i)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission concluded that ''in the Commission's view, the use of executed equivalent share volume as the basis for determining and allocating CAT costs during the two-year interim period is appropriate and consistent with the funding principles of the CAT NMS Plan.'' CAT Funding Model Approval Order, 91 FR 13410, 13427.

[26] *See* Section 11.3(b)(i)(C) of the CAT NMS Plan.

[27] *See supra,* note 20.

[28] Section 11.3(b)(iii)(B)(II)(B) of the CAT NMS Plan.

[29] *See supra,* note 20.

[30] The costs described in this table of costs for the Pre-FAM Period were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website. In addition, in accordance with Section 6.6(a)(i) of the CAT NMS Plan, in 2018 CAT LLC provided the SEC with ''an independent audit of fees, costs, and expenses incurred by the Participants on behalf of the Company prior to the Effective Date of the Plan that will be publicly available.'' The audit is available on the CAT website.

| Operating expense | Historical CAT Costs 1 for Pre-FAM Period (prior to June 22, 2020) |
|---|---|
| Change Request Fees | 141,346 |
| Legal | 19,674,463 |
| Consulting | 17,013,414 |
| Insurance | 880,419 |
| Professional and administration | 1,082,036 |
| Public relations | 224,669 |
| Total Operating Expenses | 124,290,730 |

* The non-cash amortization of these capitalized developed technology costs of $2,115,545 incurred during the period prior to June 22, 2020 have been appropriately excluded from the above table.[31]

The Pre-FAM Period includes a broad range of CAT-related activity from 2012 through June 22, 2020, including the evaluation of the requirements of SEC Rule 613, the development of the CAT NMS Plan, the evaluation and selection of the initial and successor Plan Processors, the commencement of the creation and implementation of the CAT to comply with Rule 613 and the CAT NMS Plan, including technical specifications for transaction reporting and regulatory access, and related technology and the commencement of reporting to the CAT. The following describes the costs for each of the categories for the Pre-FAM Period.

(I) Technology Costs—Cloud Hosting Services

The $10,268,840 in technology costs for cloud hosting services represent costs incurred for services provided by the cloud services provider for the CAT, Amazon Web Services, Inc. (''AWS''), during the Pre-FAM Period.

As part of its proposal for acting as the successor Plan Processor for the CAT, FINRA CAT, LLC (''FCAT'') selected AWS as a subcontractor to provide cloud hosting services. In 2019, after reviewing the capabilities of other cloud services providers, FCAT determined that AWS was the only cloud services provider at that time sufficiently mature and capable of providing the full suite of necessary cloud services for the CAT, including, for example, the security, resiliency and complexity necessary for the CAT computing requirements. The use of cloud hosting services is standard for this type of high-volume data activity and reasonable and necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT the fees incurred by the Plan Processor for cloud hosting services provided by AWS as FCAT's subcontractor on a monthly basis for the cloud hosting services, and FCAT, in turn, pays such fees to AWS. The fees for cloud hosting services were negotiated by FCAT on an arm's length basis with the goals of managing cost and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the expected volume of data, the breadth of services provided and market rates for similar services. The fees for cloud hosting services during the Pre-FAM Period were paid to FCAT by CAT NMS, LLC [32] and subsequently Consolidated Audit Trail, LLC (as previously noted, both entities are referred to generally as ''CAT LLC''),[33] and FCAT, in turn, paid AWS. CAT LLC was funded via loan contributions by the Participants.[34]

AWS was engaged by FCAT to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS include storage services, databases, compute services and other services (such as networking, management tools and DevOps tools). AWS also was engaged to provide various environments for CAT, such as development, performance testing, test and production environments.

The cost for AWS services for the CAT is a function of the volume of CAT Data. The greater the amount of CAT Data, the greater the cost of AWS services to the CAT. During the Pre-FAM Period from the engagement of AWS in February 2019 through June 2020, AWS provided cloud hosting services for volumes of CAT Data far in excess of the volume predictions set forth in the CAT NMS Plan. The CAT NMS Plan states, when all CAT Reporters are submitting their data to the CAT, it ''must be sized to receive[,] process and load more than 58 billion records per day,'' [35] and that ''[i]t is expected that the Central Repository will grow to more than 29 petabytes of raw, uncompressed data.'' [36] However, the volume of CAT Data for the Pre-FAM Period was far in excess of these predicted levels. By the end of this period, data submitted to the CAT included options and equities Participant Data,[37] Phase 2a and Phase 2b Industry Member Data [38] (including certain linkages), as well as SIP Data,[39] reference data and other types of Other Data.[40] The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during the Pre-FAM Period.[41]

[31] With respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

[32] CAT NMS, LLC was formed by FINRA and the U.S. national securities exchanges to implement the requirements of SEC Rule 613 under the Exchange Act. SEC Rule 613 required the SROs to jointly submit to the SEC the CAT NMS Plan to create, implement and maintain the CAT. The SEC approved the CAT NMS Plan on November 15, 2016. *See* CAT NMS Plan Approval Order, *supra* note 8.

[33] On August 29, 2019, the Participants formed a new Delaware limited liability company named Consolidated Audit Trail, LLC for the purpose of conducting activities related to the CAT from and after the effectiveness of the proposed amendment of the CAT NMS Plan to replace CAT NMS, LLC. *See* Securities Exchange Act Release No. 87149 (September 27, 2019), 84 FR 52905 (October 3, 2019).

[34] For each of the costs paid by CAT NMS, LLC and Consolidated Audit Trail, LLC as discussed throughout this filing, CAT NMS, LLC and Consolidated Audit Trail, LLC paid these costs via loan contributions by the Participants to CAT NMS, LLC and Consolidated Audit Trail, LLC, respectively.

[35] *See* Appendix D–4 of the CAT NMS Plan at n.262.

[36] *See* Appendix D–5 of the CAT NMS Plan.

[37] *See* Section 6.3(d) of the CAT NMS Plan.

[38] *See* Securities Exchange Release No. 88702 (April 20, 2020), 85 FR 23075 (April 24, 2020) (''Phased Reporting Exemptive Relief Order'') for a description of Phase 2a and Phase 2b Industry Member Data.

[39] *See* Section 6.5(a)(ii) of the CAT NMS Plan.

[40] *See* Appendix C–109 of the CAT NMS Plan.

[41] Note that the volume data described in this table does not include CAIS data.

| | Date range: 3/29/19 to 4/12/20 * | Date range: 4/13/20 to 6/21/20 ** |
|---|---|---|
| Average Daily Volume in Billions: | | |
| Participant—Equities | 5 | 5 |
| Participant—Options | 80 | 981 |
| Industry Member—Equities | ..... | 3 |
| Industry Member—Options | ..... | 0.04 |
| SIP—Options & Equities | 64 | 70 |
| Average Total Daily Volume | 149 | 166 |
| Cumulative Total Events for the Period | 3,890 | 4,990 |
| Total Compute Hours for the Period | N/A | 5,663,247 |
| Storage Footprint at End of Period (Petabytes) | 30.57 | 47.96 |

* The Participant Equities in RSA format.
** Start of Industry Member reporting on 4/13/2020.
*** Although there were compute hours during this period, data related to such compute hours are no longer available in current data.

(II) Technology Costs—Operating Fees

The $21,085,485 in technology costs related to operating fees represent costs incurred with regard to activities of FCAT as the Plan Processor. Operating fees are those fees paid by CAT LLC to FCAT as the Plan Processor to operate and maintain the CAT and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management as required by the CAT NMS Plan.

FCAT was selected to assume the role of the successor Plan Processor. Prior to this selection, the Participants engaged in discussions with two prior Bidders [42] for the successor Plan Processor role. The Operating Committee formed a Selection Subcommittee in accordance with Section 4.12 of the CAT NMS Plan to evaluate and review Bids and to make a recommendation to the Operating Committee with respect to the selection of the successor Plan Processor. In an April 9, 2019 letter to the Commission, the Participants described the reasons for its selection of the successor Plan Processor:

The Selection Subcommittee considered factors including, but not limited to, the following, in recommending FINRA to the Operating Committee as the successor Plan Processor:

a. FINRA's specialized technical expertise and capabilities in the area of broker-dealer technology;

b. The need to appoint a successor Plan Processor with specialized expertise to develop, implement, and maintain the CAT System in accordance with the CAT NMS Plan and SEC Rule 613;

c. FINRA's detailed proposal in response to CAT LLC's recent inquiries; and

d. FINRA's data query and analytics systems demonstration to the Participants.

Based on these and other factors, the Selection Subcommittee determined that FINRA was the most appropriate Bidder to become the successor Plan Processor.[43]

On February 26, 2019, the Operating Committee (with FINRA recusing itself) voted to select FINRA as the successor Plan Processor pursuant to Section 6.1(t) of the CAT NMS Plan.[44] On March 29, 2019, CAT LLC and FCAT (a wholly owned subsidiary of FINRA) entered into a Plan Processor Agreement pursuant to which FCAT would perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT a negotiated monthly fixed price for the operation of the CAT. This fixed price contract was negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity. The operating fees during the Pre-FAM Period were paid to FCAT by CAT LLC.

From March 29, 2019 (the commencement of the Plan Processor Agreement with FCAT) through June 22, 2020 (the end of the Pre-FAM Period), the Plan Processor's activities with respect to the CAT included the following:

- Commenced user acceptance testing with market data provided by Exegy Incorporated (''Exegy''), a market data provider; [45]
- Published Technical Specifications and related reporting scenarios documents for Phase 2a, 2b and 2c reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Facilitated testing for Phase 2a and 2b reporting for Industry Members;
- Began developing Technical Specifications and related reporting scenarios documents for Phase 2d reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Published Central Repository Access Technical Specifications, and provided regulator access to test data from Industry Members;
- Facilitated Participant exchanges that support options market makers sending Quote Sent Time to the CAT;
- Facilitated the introduction of OPRA and Options NBBO Other Data to CAT;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing requirements under Regulation SCI;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to

[42] The term ''Bidder'' is defined in Section 1.1 of the CAT NMS Plan.

[43] *See* Letter from Michael J. Simon, Chair, CAT NMS, LLC Operating Committee, to Brent J. Fields, Secretary, SEC, dated April 9, 2019, *https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection-040919.pdf.*

[44] *See supra* note 45.

[45] The use of Exegy to provide market data, including the costs and market data provided, is discussed below in Item II.A.1(2)(B)(a)(IX).

Participant and Industry Member reporting;

- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants, the SEC and its staff;
- Operated the FINRA CAT Helpdesk, which is the primary source for answers to questions about CAT, including questions regarding: clock synchronization, firm reporting responsibilities, interpretive questions, technical specifications for reporting to CAT and more;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content;[46] and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

The $2,072,908 in technology costs related to CAIS operating fees represent the fees paid for FCAT's subcontractor charged with the development and operation of CAT's Customer and Account Information System (''CAIS''). The CAT is required under the CAT NMS Plan to capture and store Customer Identifying Information and Customer Account Information in a database separate from the transactional database and to create a CAT-Customer-ID for each Customer.

During the Pre-FAM Period, the CAIS-related services were provided by the Plan Processor through the Plan Processor's subcontractor, Kingland Systems Incorporation (''Kingland''). Kingland had experience operating in the securities regulatory technology space, and as a part of its proposal for acting as the Plan Processor for the CAT, FCAT selected Kingland as a subcontractor to provide certain CAIS-related services.

Under the Plan Processor Agreement with FCAT, CAT LLC was required to pay to the Plan Processor the fees incurred by FCAT for CAIS-related services provided by FCAT through Kingland on a monthly basis. FCAT negotiated the fees for Kingland's CAIS-related services on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity. The fees for CAIS-related services during the Pre-FAM Period were paid by CAT LLC to FCAT. FCAT, in turn, paid Kingland.

During the Pre-FAM Period, Kingland began development of the CAIS Technical Specifications and the building of CAIS. In addition, Kingland also worked on the build related to the CCID Alternative, an alternative approach to customer information that was not included in the CAT NMS Plan as originally adopted.[47] Furthermore, Kingland also worked on the acceleration of the reporting of large trader identifiers (''LTID'') earlier than originally contemplated during this period, in accordance with exemptive relief granted by the SEC.[48]

(IV) Technology Costs—Change Request Fees

The technology costs related to change request fees include costs related to certain modifications, upgrades or other changes to the CAT. Change requests are standard practice and necessary to reflect operational changes, including changes related to new market developments, such as new market participants. In general, if CAT LLC determines that a modification, upgrade or other change to the functionality or service is necessary and appropriate, CAT LLC will submit a request for such a change to the Plan Processor. The Plan Processor will then respond to the request with a proposal for implementing the change, including the cost (if any) of such a change. CAT LLC then determines whether to approve the proposed change. The change request costs were paid by CAT LLC to FCAT. During the Pre-FAM Period, CAT LLC incurred costs of $141,346 related to change requests implemented by FCAT. Such change requests related to a development fee regarding the OPRA and SIP data feeds, and the reprocessing of certain exchange data.[49]

(V) Technology Costs—Capitalized Developed Technology Costs

This category of costs includes capitalizable application development costs incurred in the development of the CAT. The capitalized developed technology costs for the Pre-FAM Period of $51,847,150 relate to technology provided by the Initial Plan Processor and the successor Plan Processor.

*Initial Plan Processor: Thesys CAT, LLC.* The capitalized developed technology costs related to the Initial Plan Processor include costs incurred with regard to testing for Participant reporting, Participant reporting to the CAT, a security assessment of the CAT, and the development of the billing function for the CAT.

On January 17, 2017, the Selection Committee of the CAT NMS Plan selected the Initial Plan Processor, Thesys Technologies, LLC, for the CAT NMS Plan pursuant to Article V of the CAT NMS Plan.[50] The Participants utilized a request for proposal (''RFP'') to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan, taking into consideration that the Initial Plan Processor had experience operating in the securities regulatory technology space, among other considerations. On April 6, 2017, CAT LLC entered into an agreement with Thesys CAT LLC (''Thesys CAT''), a Thesys affiliate, to perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT. Under the agreement, CAT LLC would pay Thesys CAT a negotiated, fixed price fee for its role as the Initial Plan Processor. Effective January 30, 2019, the Plan Processor Agreement with Thesys CAT was terminated, and FCAT was subsequently selected as the successor Plan Processor.

From January 17, 2017 through January 30, 2019, the time in which Thesys CAT was engaged for the CAT, but excluding the period from November 15, 2017 through January 30, 2019, the Initial Plan Processor engaged in various activities with respect to the CAT, including preparing iterative drafts of Participant Technical Specifications, Industry Member Technical Specifications and the Central Repository Access Technical Specifications. In addition, Thesys CAT also developed CAT technology, addressed compliance items, including drafting CAT policies and procedures, addressing Regulation SCI requirements,

[46] The CAT website is *https://www.catnmsplan.com.*

[47] For a discussion of the CCID Alternative, *see* Securities Exchange Act Release No. 88393 (March 17, 2020), 85 FR 16152 (March 20, 2020).

[48] *See* Phased Reporting Exemptive Relief Order, 85 FR 23075, 23079–80.

[49] Note that CAT LLC also has incurred costs related to specific Industry Members (*e.g.,* reprocessing costs related to Industry Member reporting errors).

[50] *See* Letter from the Participants to Brent J. Fields, Secretary, SEC, dated January 18, 2017, *https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection.pdf.*

establishing a CAT Compliance Officer and a Chief Information Security Officer, addressed security-related matters for the CAT, and worked towards the initiation of Participant reporting per the Participant Technical Specifications.

*Successor Plan Processor: FCAT.* The capitalized developed technology costs related to FCAT include: (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, including the completion of go-live functionality related to options ingestion and validation, equities regulatory services agreement query tool updates and unlinked options data query, options linkages release, Industry Member Phase 2a file submission and data integrity (including error corrections), and Industry Member testing, including reporting relationships, ATS order type management, basic reporting statistics, SFTP data integrity feedback and error correction; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including a one-time development fee for a secure analytics workspace, a one-time development fee for an Industry Member connectivity solution, and a one-time development fee for the acceleration of multi-factor authentication; (3) CAIS implementation fees; and (4) license fees.

(VI) Legal Costs

The legal costs of $19,674,463 represent the fees paid for legal services provided by two law firms, Wilmer Cutler Pickering Hale and Dorr LLP (''WilmerHale'') and Pillsbury Winthrop Shaw Pittman LLP (''Pillsbury''), during the Pre-FAM Period. The legal costs exclude those costs incurred from November 15, 2017 through November 15, 2018.

*Law Firm: WilmerHale.* Following the adoption of Rule 613, the Participants determined it was necessary to engage external legal counsel to advise the Participants with respect to corporate and regulatory legal matters related to the CAT, including drafting and developing the CAT NMS Plan. The Participants considered a variety of factors in their analysis of prospective law firms, including (1) the firm's qualifications, resources and expertise; (2) the firm's relevant experience and understanding of the regulatory matters raised by the CAT and in advising on matters of similar scope; (3) the composition of the legal team; and (4) professional fees. Following a series of interviews, the Participants acting as a consortium determined that WilmerHale was well qualified given the balance of these considerations and engaged WilmerHale in February 2013.

WilmerHale's billing rates are negotiated on an annual basis and are determined with reference to the rates charged by other leading law firms for similar work. The Participants assess WilmerHale's performance and review prospective budgets and staffing plans submitted by WilmerHale on an annual basis. WilmerHale's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading law firms for similar work.

The legal costs for WilmerHale during the Pre-FAM Period included costs incurred from 2013 until June 22, 2020 to address corporate and regulatory legal matters related to the CAT. The legal fees for this law firm during the period from February 2013 until the formation of the CAT NMS, LLC on November 15, 2016 were paid directly by the exchanges and FINRA to WilmerHale. After the formation of CAT NMS LLC, the legal fees were paid by CAT LLC to WilmerHale.

After WilmerHale was engaged in 2013 through the end of the Pre-FAM Period on June 22, 2020 (excluding the legal costs from November 15, 2017 through November 15, 2018), WilmerHale provided legal assistance to the CAT on a variety of matters, including with regard to the following:

- Analyzed various legal matters associated with the Selection Plan, and drafted an amendment to the Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the Development Advisory Group (''DAG'');
- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on CAT NMS Plan;
- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan, and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;
- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan and related filings;
- Negotiated and drafted the plan processor agreements with the Initial Plan Processor and the successor Plan Processor;
- Provided assistance with compliance with Regulation SCI;
- Assisted with clock synchronization study;
- Provided assistance with respect to the establishment of CAT security;
- Drafted exemptive requests from CAT NMS Plan requirements, including with regard to options market maker quotes, Customer IDs, CAT Reporter IDs, linking allocations to executions, CAT reporting timeline, FDIDs, customer and account information, timestamp granularity, small industry members, data facility reporting and linkage, allocation reports, SRO-assigned market participant identifiers and cancelled trade indicators, thereby seeking to implement changes that would be cost effective and benefit Industry Members and Participants;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided advice regarding CAT policies and procedures;
- Analyzed the SEC's amendment of the CAT NMS Plan regarding financial accountability;
- Provided interpretations of and related to the CAT NMS Plan;
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues; and
- Assisted with third-party vendor agreements.

*Law Firm: Pillsbury.* The legal costs for CAT during the Pre-FAM Period include costs related to the legal services performed by Pillsbury. The Participants interviewed this law firm as well as other potential law firms to provide legal assistance regarding certain liability matters. After considering a variety of factors in its analysis, including the relevant expertise and fees of the firm, CAT LLC determined to hire Pillsbury in April 2019. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees were paid by CAT LLC to Pillsbury. The legal costs for Pillsbury during the Pre-FAM Period included costs incurred from April 2019 until June 22, 2020 to

address legal matters regarding the agreements between CAT Reporters and CAT LLC concerning certain terms associated with CAT Reporting (the ''Reporter Agreement''). During that period, Pillsbury advised CAT LLC regarding applicable legal matters, participated in negotiations between the Participants and Industry Members, participated in meetings with senior SEC staff, the Chairman, and Commissioners, represented CAT LLC and the Participants in an SEC administrative proceeding, and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, litigation involving CAT LLC is an expense of operating the CAT, and, therefore, is appropriately an obligation of both Participants and Industry Members under the CAT Funding Model.

(VII) Consulting Costs

The consulting costs of $17,013,414 represent the fees paid to the consulting firm Deloitte & Touche LLP (''Deloitte'') as project manager during the Pre-FAM Period, from October 2012 until June 22, 2020. These consulting costs include costs for advisory services related to the operation of the CAT, and meeting facilitation and communications coordination, vendor support and financial analyses.

To help facilitate project management given the unprecedented complexity and scope of the CAT project, the Participants determined it was necessary to engage a consulting firm to assist with the CAT project in 2012, following the adoption of Rule 613. A variety of factors were considered in the analysis of prospective consulting firms, including (1) the firm's qualifications, resources, and expertise; (2) the firm's relevant experience and understanding of the regulatory issues raised by the CAT and in coordinating matters of similar scope; (3) the composition of the consulting team; and (4) professional fees. Following a series of interviews, the exchanges and FINRA as a consortium determined that Deloitte was well qualified given the balance of these considerations and engaged Deloitte on October 1, 2012.

Deloitte's fee rates are negotiated on an annual basis and are in line with market rates for this type of specialized consulting work. CAT LLC assesses Deloitte's performance and reviews prospective budgets and staffing plans submitted by Deloitte on an annual basis. Deloitte's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading consulting firms for similar work.

The consulting costs for CAT during the period from 2012 until the formation of the CAT NMS, LLC were paid directly by the Participants to Deloitte. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC to Deloitte. CAT LLC reviewed the consulting fees each month and approved the invoices.

After Deloitte was hired in 2012 through the end of the Pre-FAM Period on June 22, 2020 (excluding the consulting costs from November 15, 2017 through November 15, 2018), Deloitte provided a variety of consulting services, including the following:

- Established and implemented program operations for the CAT project, including the program management office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participant's independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, analyzing Order Audit Trail System (''OATS'') and CAT requirements, and drafting appendices to the Plan;
- Assisted with cost and funding-related activities for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with industry outreach and communications regarding the CAT, including assistance with industry outreach events, the development of the CAT website, frequently asked questions, and coordinating with the CAT LLC's public relations firm;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress;
- Coordinated efforts regarding the selection of the successor Plan Processor;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor, including support for the Operating Committee and successor Plan Processor for the new role; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

The insurance costs of $880,419 represent the cost incurred for insurance for CAT during the Pre-FAM Period. Commencing in 2020, CAT LLC performed an evaluation of various potential alternatives for CAT insurance policies, which included engaging in discussions with different insurance companies and conducting cost comparisons of various alternative approaches to insurance. Based on an analysis of a variety of factors, including coverage and premiums, CAT LLC determined to purchase cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance from USI Insurance Services LLC (''USI''). Such policies are standard for corporate entities, and cyber security liability insurance is important for the CAT System. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(IX) Professional and Administration Costs

In adopting the CAT NMS Plan, the Commission amended the Plan to add a requirement that CAT LLC's financial statements be prepared in compliance with GAAP, audited by an independent public accounting firm, and made publicly available.[51] The professional

[51] *See* Section 9.2 of the CAT NMS Plan.

and administration costs include costs related to accounting and accounting advisory services to support the operating and financial functions of CAT, financial statement audit services by an independent accounting firm, preparation of tax returns, and various cash management and treasury functions. In addition, professional and administration costs for the Pre-FAM Period include costs related to the receipt of market data and a security assessment. The costs for these professional and administration services were $1,082,036 for the Pre-FAM Period.

*Financial Advisory Firm: Anchin Accountants & Advisors (''Anchin'').* CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT in April 2018. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services were paid by CAT LLC to Anchin.

After Anchin was hired in April 2018 through the end of the Pre-FAM Period on June 22, 2020 (excluding the period from April 2018 through November 15, 2018), Anchin provided a variety of services, including the following:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial reporting matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

*Accounting Firm: Grant Thornton LLP (''Grant Thornton'').* In February 2020, CAT LLC determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the proposed role given the balance of these considerations. Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services. The fees for these services were paid by CAT LLC to Grant Thornton.

*Market Data Provider: Exegy.* The professional and administrative costs for the Pre-FAM Period included costs related to the receipt of certain market data for the CAT pursuant to an agreement with the CAT LLC, and then with FCAT. Exegy provided SIP Data required by the CAT NMS Plan.

After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy from July 2018 through March 2019. CAT LLC determined that, unlike certain other vendors, Exegy provided market data that included all data elements required by the CAT NMS Plan.[52] In addition, the fees were reasonable and in line with market rates for the market data received. Accordingly, the professional and administrative costs for the Pre-FAM Period include the Exegy costs from November 2018 through March 2019. The cost of the market data was reasonable for the market data received. The fees for the market data were paid directly by CAT LLC to Exegy.

Upon the termination of the contract between CAT LLC and Exegy, FCAT entered into a contract with Exegy to purchase the required market data from Exegy in July 2019. All costs under the contract were treated as a direct pass through cost to CAT LLC. Therefore, the fees for the market data were paid by CAT LLC to FCAT, who, in turn, paid Exegy for the market data.

*Security Assessment: RSM US LLP (''RSM'').* The operating costs for the Pre-FAM Period include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation, and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment. RSM performed the assessment from October 2018 through December 2018. Accordingly, the costs for the Pre-FAM Period include the costs incurred in November and December 2018. The cost for the security assessment were paid directly to RSM by CAT LLC.

(X) Public Relations Costs

The public relations costs of $224,669 represent the fees paid to public relations firms during the Pre-FAM Period for professional communications services to CAT, including media relations consulting, strategy and execution. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants. Specifically, the public relations firms provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). Public relations services were important for various reasons, including monitoring comments made by market

[52] *See* Section 6.5(a)(ii) of the CAT NMS Plan.

participants about CAT and understanding issues related to the CAT discussed on the public record.

The services performed by each of the public relations firms were comparable. The fees for such services were reasonable and in line with market rates. Only one public relations firm was engaged at a time; the three firms were engaged sequentially as the primary public relations contact moved among the three firms during this time period.

*Public Relations Firm: Peppercomm, Inc. (''Peppercomm'').* The national securities exchanges and FINRA, acting as a consortium, determined to hire the public relations firm Peppercomm in October 2014 and continued to engage this firm through September 2017. The exchanges and FINRA made this engagement decision after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fee rates for this public relations firm were negotiated on an arm's length basis and were in line with market rates for these types of services. The public relations costs during the period from October 2014 until the formation of the CAT NMS, LLC were paid directly by the exchanges and FINRA to the public relations firm. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC.

*Public Relations Firm: Sloane & Company (''Sloane'').* CAT LLC determined to hire a new public relations firm, Sloane, in March 2018, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Sloane. CAT LLC continued the engagement with Sloane until February 2020.

*Public Relations Firm: Peak Strategies.* CAT LLC determined to hire a new public relations firm, Peak Strategies, in March 2020, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Peak Strategies.

(b) Historical CAT Costs Incurred in Financial Accountability Milestone Period 1

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 1 of the Financial Accountability Milestones (''FAM Period 1''),[53] which covers the period from June 22, 2020–July 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 1 of $6,377,343. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($2,125,781), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($2,125,781) and CEBSs paying one-third ($2,125,781). The following table breaks down Historical CAT Costs 1 for FAM Period 1 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan. [54]

| Operating expense | Historical CAT costs for FAM Period 1 |
|---|---|
| Capitalized Developed Technology Costs* | $1,684,870 |
| *Technology Costs* | 3,996,800 |
| Cloud Hosting Services | 2,642,122 |
| Operating Fees | 1,099,680 |
| CAIS Operating Fees | 254,998 |
| Change Request Fees | |
| Legal | 481,687 |
| Consulting | 137,209 |
| Insurance | |
| Professional and administration | 69,077 |
| Public relations | 7,700 |
| Total Operating Expenses | 6,377,343 |

* The non-cash amortization of these capitalized developed technology costs of $362,121 incurred during FAM Period 1 have been appropriately excluded from the above table.[55]

By thecompletion of FAM Period 1, CAT LLC was required to implement the reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of equities transaction data and options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.[56] CAT LLC completed the requirements of FAM Period 1 by July 31, 2020. The following describes the costs for each of the categories for FAM Period 1.

(I) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 1 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 1 Period. Accordingly, the $2,642,122 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 1. The fee arrangement for AWS described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. Moreover, CAT LLC continued to believe that AWS's maturity in the cloud services space as well as the significant cost and time necessary to move the CAT to a different

[53] *See* Section 11.6(a)(i)(A) of the CAT NMS Plan.

[54] The costs described in this table of costs for FAM Period 1 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

[55] As discussed above, with respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

[56] *See* definition of ''Initial Industry Member Core Equity and Options Reporting'' in Section 1.1 of the CAT NMS Plan.

cloud services provider supported the continued engagement of AWS.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 1 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, reference data and other types of Other Data. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 1.[57]

| | Date Range: 6/22/20–7/31/20 |
|---|---|
| Average Daily Volume in Billions: | |
| Participant—Equities | 6 |
| Participant—Options | 103 |
| Industry Member—Equities | 7 |
| Industry Member—Options | 0.31 |
| SIP—Options & Equities | 74 |
| Average Total Daily Volume | 185 |
| Cumulative Total Events for the Period | 5,190 |
| Total Compute Hours for the Period | 2,612,082 |
| Storage Footprint at End of Period (Petabytes) | 57.47 |

(II) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 1. Accordingly, the $1,099,680 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 1. The fee arrangement for FCAT described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, FCAT's activities with respect to the CAT included the following:

- Published iterative drafts of Technical Specifications for Phase 2d, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Published iterative drafts of CAIS Technical Specifications, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Facilitated Industry Member reporting of Quote Sent Time on Options Market Maker quotes;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 1. Accordingly, the $254,998 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 1. The fee arrangement for Kingland described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(IV) Technology Costs—Change Request Fees

CAT LLC did not incur costs related to change requests during FAM Period 1.

(V) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 1 of $1,684,870 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include: (1) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including separate production and industry test entitlements, and reprocessing of exchange event timestamps; (2) implementation fees; and (3) license fees.

(VI) Legal Costs

The legal costs of $481,687 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 1.

*Law Firm: WilmerHale.* CAT LLC continued to employ WilmerHale during FAM Period 1 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to WilmerHale. During FAM Period 1, WilmerHale provided legal assistance to

[57] Note that the volume data described in this table does not include CAIS data.

the CAT including with regard to the following:

- Assisted with the development of the CAT funding model and drafted related amendments and fee filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, verbal activity, options market maker quote sent time, TRF linkages, and allocations;
- Provided interpretations related to CAT NMS Plan requirements, including the Financial Accountability Milestone amendment;
- Assisted with compliance with Regulation SCI;
- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the drafting of the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Assisted with communications and presentations for the industry regarding CAIS;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding CAT technical specifications;
- Assisted with third-party vendor agreements; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

*Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to Pillsbury. During FAM Period 1, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(VII) Consulting Costs

The consulting costs of $137,209 represent the fees paid to Deloitte as project manager during FAM Period 1. CAT LLC continued to employ Deloitte during FAM Period 1 based on, among other things, their expertise and cumulative experience with the CAT. The fee rates for Deloitte during FAM Period 1 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 1 were paid by CAT LLC to the consulting firm. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 1, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

Although insurance was in effect during FAM Period 1, CAT LLC did not incur costs related to insurance during FAM Period 1.

(IX) Professional and Administration Costs

*Financial Advisory Firm: Anchin.* The professional and administration costs of $69,077 represent the fees paid to Anchin during FAM Period 1. CAT LLC continued to employ Anchin during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these type of financial advisory services. The fees for these services during FAM Period 1 were paid by CAT LLC to Anchin. During FAM Period 1, Anchin provided a variety of services, including the following:

- Maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups; and
- Prepared monthly and quarterly financial statements.

(X) Public Relations Costs

The public relations costs of $7,700 represent the fees paid to Peak Strategies during FAM Period 1. CAT LLC continued to employ Peak Strategies during FAM Period 1 based on, among other things, their expertise and history with the project. The fee rates for this firm were reasonable and in line with market rates for these types of services. The fees for these services during FAM Period 1 were paid by CAT LLC to Peak Strategies. During FAM Period 1, Peak Strategies continued to provide professional communications services to CAT LLC, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(c) Historical CAT Costs Incurred in Financial Accountability Milestone Period 2

Historical CAT Costs 1 would include costs incurred by CAT LLC and already

funded by Participants during Period 2 of the Financial Accountability Milestones (''FAM Period 2''),[58] which covers the period from August 1, 2020—December 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 2 of $42,976,478. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($14,325,493), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($14,325,493) and CEBSs paying one-third ($14,325,493). The following table breaks down Historical CAT Costs 1 for FAM Period 2 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.[59]

| Operating expense | Historical CAT costs for FAM Period 2 |
|---|---|
| Capitalized Developed Technology Costs* | $6,761,094 |
| Technology Costs | 31,460,033 |
| Cloud Hosting Services | 20,709,212 |
| Operating Fees | 9,108,700 |
| CAIS Operating Fees | 1,590,298 |
| Change Request Fees | 51,823 |
| Legal | 2,766,644 |
| Consulting | 532,146 |
| Insurance | 976,098 |
| Professional and administration | 438,523 |
| Public relations | 41,940 |
| Total Operating Expenses | 42,976,478 |

*The non-cash amortization of these capitalized developed technology costs of $1,892,505 incurred during FAM Period 2 have been appropriately excluded from the above table.[60]

By the completion of FAM Period 2, CAT LLC was required to implement the following with regard to the CAT:

(a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, CustomerID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission.[61]

CAT LLC completed the requirements of FAM Period 2 by December 31, 2020. The following describes the costs for each of the categories for FAM Period 2.

(I) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 2 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 2 Period. Accordingly, the $20,709,212 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 2. The fee arrangement for AWS described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 2 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, and Other Data, including reference data. In addition, Industry Members began reporting LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 2.[62]

| | Date range: 8/1/20–12/31/20 |
|---|---|
| Average Daily Volume in Billions: | |
| Participant—Equities | 6 |
| Participant—Options | 116 |
| Industry Member—Equities | 11 |
| Industry Member—Options | 0.98 |
| SIP—Options & Equities | 80 |

[58] *See* Section 11.6(a)(i)(B) of the CAT NMS Plan.

[59] The costs described in this table of costs for FAM Period 2 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

[60] As discussed above, with respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

[61] *See* definition of ''Full Implementation of Core Equity Reporting Requirements'' in Section 1.1 of the CAT NMS Plan.

[62] Note that the volume data described in this table does not include CAIS data.

| | Date range: 8/1/20–12/31/20 |
|---|---|
| Average Total Daily Volume | 282 |
| Cumulative Total Events for the Period | 2,170 |
| Total Compute Hours for the Period | 15,660,392 |
| Storage Footprint at End of Period (Petabytes) | 114.59 |

(II) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 2. Accordingly, the $9,108,700 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 2. The fee arrangement for FCAT described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, FCAT's activities with respect to the CAT included publishing the Technical Specifications for Phase 2d and overseeing the reporting of firm to firm and intrafirm linkages by Industry Members. In addition, FCAT also continued to engage in the following activities during FAM Period 2:

- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the development and implementation of the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 2. Accordingly, the $1,590,298 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 2. The fee arrangement for Kingland described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(IV) Technology Costs—Change Request Fees

During FAM Period 2, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 2, CAT incurred costs of $51,823 related to a change request regarding the addition of functionality for exchange Participants to report rejected messages to the CAT.

(V) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 2 of $6,761,094 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to separate production and industry test entitlements, market maker reference data, and back-processing of exchange exception logic; (3) implementation fees; and (4) license fees.

(VI) Legal Costs

The legal costs of $2,766,644 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 2.

*Law Firm: WilmerHale.* CAT LLC continued to employ WilmerHale during FAM Period 2 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to WilmerHale. During FAM Period 2, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, allocations, exchange activity, OTQT, initial data validation, error corrections and recordkeeping;
- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs and technical specifications;
- Provided support for the Operating Committee, Compliance Subcommittees, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6 of the CAT NMS Plan;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for the Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
- Provided guidance regarding SRO rule filings for the retirement of systems;
- Provided legal support for Operating Committee meetings,

including drafting resolutions and other materials and voting advice;

- Assisted with third-party vendor agreements (*e.g.,* with regard to Anchin, Grant Thornton and insurance policies);
- Assisted with change requests; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

*Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to Pillsbury. During FAM Period 2, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted and filed a proposed amendment to the CAT NMS Plan regarding liability matters. As discussed above, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(VII) Consulting Costs

The consulting costs of $532,146 represent the fees paid to Deloitte as project manager during FAM Period 2. CAT LLC continued to employ Deloitte during FAM Period 2 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 2 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 2 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 2, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

The insurance costs of $976,098 represent the fees paid for insurance during FAM Period 2. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(IX) Professional and Administration Costs

The professional and administration costs of $438,523 represent the fees paid to Anchin and Grant Thornton for financial services provided during FAM Period 2.

*Financial Advisory Firm: Anchin.* CAT LLC continued to engage Anchin during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these types of financial advisory services. The fees for these services during FAM Period 2 were paid by CAT LLC to Anchin. During FAM Period 2, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from the Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audit by an independent auditor; and
- Reviewed historical costs from inception.

*Accounting Firm: Grant Thornton.* CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 2 based on, among other things, its expertise and cumulative knowledge of CAT LLC. CAT LLC continued to believe that Grant Thornton was well qualified for its role and its fee rates were in line with market rates for these accounting services. The fees for these services during FAM Period 2 were paid by CAT LLC to Grant Thornton. During FAM Period 2, Grant Thornton performed a financial statement audit for CAT LLC as an independent accounting firm.

(X) Public Relations Costs

The public relations costs of $41,940 represent the fees paid to Peak Strategies during FAM Period 2. CAT LLC continued to employ Peak Strategies during FAM Period 2 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 2 were paid by CAT LLC to Peak Strategies. During FAM Period 2, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(d) Historical CAT Costs Incurred in Financial Accountability Milestone Period 3

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 3 of the Financial Accountability Milestones (''FAM Period 3''),[63] which covers the period from January 1, 2021–December 31, 2021. Historical CAT Costs 1 would include costs for FAM Period 3 of $144,415,268. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($48,138,423), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($48,138,423) and CEBSs paying one-third ($48,138,423). The following table breaks down Historical CAT Costs 1 for FAM Period 3 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan. [64]

| Operating expense | Historical CAT costs for FAM Period 3 |
|---|---|
| Capitalized Developed Technology Costs * | $10,763,372 |
| Technology Costs | 123,639,402 |
| Cloud Hosting Services | 94,574,759 |
| Operating Fees | 23,106,091 |
| CAIS Operating Fees | 5,562,383 |
| Change Request Fees | 396,169 |
| Legal | 6,333,248 |
| Consulting | 1,408,209 |
| Insurance | 1,582,714 |
| Professional and administration | 595,923 |
| Public relations | 92,400 |
| Total Operating Expenses | 144,415,268 |

* The non-cash amortization of these capitalized developed technology costs of $5,108,044 incurred during FAM Period 3 have been appropriately excluded from the above table.[65]

By the completion of FAM Period 3, CAT LLC was required to implement the following requirements with regard to the CAT:
(a) reporting to the Order Audit Trail System (''OATS'') is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met.[66]

CAT LLC completed the requirements of FAM Period 3 by December 31, 2021. The following describes the costs for each of the categories for FAM Period 3.

(I) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 3 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM Period 3. Accordingly, the $94,574,759 in technology costs for cloud hosting services represents costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 3. The fee arrangement for AWS described above for the earlier periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During FAM Period 3, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a, Phase 2b, Phase 2c and Phase 2d Industry Member Data (including certain linkages), SIP Data, Other Data, including reference data, and LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 3.[67]

[63] Section 11.6(a)(i)(C) of the CAT NMS Plan.

[64] The costs described in this table of costs for FAM Period 3 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

[65] As discussed above, with respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

[66] *See* definition of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' in Section 1.1 of the CAT NMS Plan.

[67] Note that the volume data described in this table does not include CAIS data.

| | Date range: 1/1/21 to 4/25/21 | Date range: 4/26/21/to 12/31/21 * |
|---|---|---|
| Average Daily Volume in Billions: | | |
| Participant—Equities | 9 | 9 |
| Participant—Options | 135 | 136 |
| Industry Member—Equities | 20 | 19 |
| Industry Member—Options | 2 | 2 |
| SIP—Options & Equities | 129 | 137 |
| Average Total Daily Volume | 297 | 304 |
| Cumulative Total Events for the Period | 7,480 | 5,310 |
| Total Compute Hours for the Period | 15,860,304 | 33,487,318 |
| Storage Footprint at End of Period (Petabytes) | 180.22 | 284.62 |

* Start of Participant Equities in CAT format and SIP Equities on 4/26/21

(II) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 3. Accordingly, the $23,106,091 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 3. The fee arrangement for FCAT described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, FCAT's activities with respect to the CAT included the following:

- Facilitated Phase 2c and Phase 2d testing for Industry Members;
- Oversaw creation of linkages of the lifecycle of order events based on the received data through Phase 2d;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement with FCAT discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 3. Accordingly, the $5,562,383 in technology costs for CAIS operating fees represents costs incurred for services provided by Kingland during FAM Period 3. The fee arrangement for Kingland described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs. The full CAIS Technical Specifications were published during FAM Period 3.

(IV) Technology Costs—Change Request Fees

During FAM Period 3, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 3, CAT incurred costs of $396,169 related to change requests, including the following: (1) the addition of functionality for exchange Participants to report rejected messages to the CAT; (2) the migration of MIRS query engine to AWS to reduce operational costs and increase resiliency; and (3) updating the Participant Technical Specifications to allow for two-sided Participant option quote reporting.

(V) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 3 of $10,763,372 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor, including the transition from equity data received by FINRA pursuant to various regulatory services agreements between FINRA and Participant exchanges to the equity CAT Data, and the completion of the Industry Member Phase 2d options manual and complex orders go-live requirements; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to off-exchange volume concentration, Participant 24-hour trading and an external metastore; (3) implementation fees; and (4) license fees.

(VI) Legal Costs

The legal costs of $6,333,248 represent the fees paid for legal services provided by three law firms, WilmerHale, Pillsbury and Covington & Burling LLP (''Covington'') during FAM Period 3.

*Law Firm: WilmerHale.* CAT LLC continued to employ WilmerHale during FAM Period 3 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to WilmerHale. During FAM Period 3, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

• Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
• Drafted exemptive requests from CAT NMS Plan requirements, including, for example, verbal activity regarding Phase 2c cutover, error reports, error corrections, Phase 2d Reporting, unique Order-ID on internal route events, reporting addresses, recordkeeping, and unique CCID for foreign customers;
• Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs, CAIS requirements, ADF, and technical specifications;
• Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
• Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6(c) of the CAT NMS Plan;
• Drafted SRO rule filings related to the CAT Compliance Rule;
• Provided support for the Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
• Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
• Provided guidance regarding SRO rule filings for the retirement of systems;
• Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;
• Provided assistance with change requests;
• Provided guidance and regulatory support for litigation regarding the response to the SEC's exemptive orders;
• Assisted with communications with the industry, including CAT Alerts and presentations;
• Provided guidance regarding the confidentiality of CAT Data, including third-party information requests;
• Assisted with cost management analysis and proposals; and
• Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

*Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to Pillsbury. During FAM Period 3, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During this period, Pillsbury advised CAT LLC regarding applicable legal matters, reviewed and responded to comment letters regarding the proposed Plan amendment, participated in meetings with senior SEC staff, responded to comments submitted following the SEC's April 6, 2021 order instituting proceedings,[68] and assessed legal matters regarding the SEC's October 29, 2021 order denying the proposed Plan amendment.[69]

*Law Firm: Covington.* CAT LLC hired Covington for litigation with the SEC regarding certain exemptive orders related to the CAT, including orders issued in December 2020.[70] CAT LLC interviewed this law firm as well as other potential law firms, considering a variety of factors in its analysis for choosing legal assistance, including the relevant expertise and fees of the potential lawyers. CAT LLC approved the engagement of Covington in January 2021. The fee rates for this law firm, which were calculated based on hourly rates, were in line with market rates for specialized services. The legal fees for FAM Period 3 for this firm were paid by CAT LLC to Covington.

After Covington was hired in 2021 through the end of 2021, the firm provided legal assistance regarding the litigation with the SEC regarding the 2020 Orders. These services included researching, drafting, and filing motions to stay the 2020 Orders and related materials in proceedings before the SEC, as well as researching, drafting, and filing petitions for judicial review of the 2020 Orders in proceedings before the U.S. Court of Appeals for the D.C. Circuit. Covington oversaw ongoing litigation proceedings on these matters, and also supported WilmerHale with respect to settlement negotiations with the SEC staff regarding the 2020 Orders.

In addition to these services, CAT LLC engaged Covington in November 2021 to provide assistance with respect to the SEC's disapproval of CAT NMS Plan amendments concerning a proposed limitation on liability in the event of a data breach or similar event. Covington provided advice concerning CAT's response to the SEC's disapproval order. This work accounted for a minority of Covington's fees in 2021.[71]

(VII) Consulting Costs

The consulting costs of $1,408,209 represent the fees paid to Deloitte as project manager during FAM Period 3. CAT LLC continued to employ Deloitte during FAM Period 3 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 3 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 3 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 3, Deloitte's CAT-related activities included the following:

• Implemented program operations for the CAT project;
• Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
• Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
• Provided support for updating the SEC on the progress of the development of the CAT; and
• Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

The insurance costs of $1,582,714 represent the fees paid for insurance during FAM Period 3. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

[68] *See* Securities Exchange Act Release No. 91487 (April 6, 2021), 86 FR 19054 (April 12, 2021).

[69] *See* Securities Exchange Act Release No. 93484 (October 29, 2021), 86 FR 60933 (November 4, 2021).

[70] *See* Securities Exchange Act Release No. 90688 (December 16, 2020), 85 FR 83634 (December 22, 2020); and Securities Exchange Act Release No. 90689 (December 16, 2020), 85 FR 83667 (December 22, 2020) (collectively, the ''2020 Orders'').

[71] As discussed above with regard to Pillsbury's work on liability matters, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, such activity is a necessary part of the operation of the CAT.

(IX) Professional and Administration Costs

The professional and administration costs of $595,923 represent the fees paid to Anchin and Grant Thornton for financial services during FAM Period 3.

*Financial Advisory Firm: Anchin.* CAT LLC continued to employ Anchin during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services during FAM Period 3 were paid by CAT LLC to Anchin. During FAM Period 3, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

*Accounting Firm: Grant Thornton.* CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 3 based on, among other things, their expertise and cumulative knowledge of CAT LLC. CAT LLC determined that Grant Thornton was well qualified for its role and that its fixed fee rates were in line with market rates for these accountant services. The fees for these services during FAM Period 3 were paid by CAT LLC to Grant Thornton. During FAM Period 3, Grant Thornton provided audited financial statements for CAT LLC.

(X) Public Relations Costs

The public relations costs of $92,400 represent the fees paid to Peak Strategies during FAM Period 3. CAT LLC continued to employ Peak Strategies during FAM Period 3 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 3 were paid by CAT LLC to Peak Strategies. During FAM Period 3, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(e) Excluded Costs

Historical CAT Costs 1 would not include three categories of CAT costs (''Excluded Costs''): (1) $14,749,362 of costs related to the termination of the relationship with the Initial Plan Processor; (2) $48,874,937, which are all CAT costs incurred from November 15, 2017 through November 15, 2018; and (3) $19,628,791, which are costs paid to the Initial Plan Processor from November 16, 2018 through February 2019 when the relationship with the Initial Plan Processor was concluded. The Participants would remain responsible for 100% of these costs, which total $83,253,090. CAT LLC determined to exclude these Excluded Costs from Historical CAT Costs 1 because these costs relate to the delay in the start of reporting to the CAT and the conclusion of the relationship with the Initial Plan Processor.[72]

(I) Costs Related to Conclusion of Relationship With Initial Plan Processor

First, Historical CAT Costs 1 would not include $14,749,362 of costs related to the conclusion of the relationship with the Initial Plan Processor. Such costs include costs related to the American Arbitration Association, the legal assistance of Pillsbury with regard to the arbitration with the Initial Plan Processor, and the settlement costs related to the arbitration with the Initial Plan Processor. The Participants would remain responsible for 100% of these $14,749,362 in costs.

(II) Costs Incurred From November 15, 2017 Through November 15, 2018

Second, Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018. CAT LLC determined to exclude all costs during this one-year period of $48,874,937 from fees charged to Industry Members due to the delay in the start of reporting to the CAT. The Participants would remain responsible for 100% of these $48,874,937 in costs. The following table breaks down these costs into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.[73]

| Operatinge expense | Excluded Costs for November 15, 2017–November 15, 2018 |
|---|---|
| Capitalized Developed Technology Costs | $37,852,083 |
| *Technology Costs:* | |

[72] In approving the CAT Funding Model, the Commission states that ''the proposed exclusion of the excluded costs from Past CAT Costs is appropriate in the Commission's view because it would not require all costs incurred by the Participants to be recovered from Industry Members through the Historical CAT Assessment, specifically excluding those costs related to the delay in the start of reporting to the CAT and costs related to the conclusion of the relationship with the Initial Plan Processor.'' *See* CAT Funding Model Approval Order, 91 FR 13410, 13450.

[73] The costs described in this table of Excluded Costs were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

| Operatinge expense | Excluded Costs for November 15, 2017–November 15, 2018 |
|---|---|
| Cloud Hosting Services | |
| Operating Fees | |
| CAIS Operating Fees | |
| Change Request Fees | |
| Legal | 6,143,278 |
| Consulting | 4,452,106 |
| Insurance | |
| Professional and administration | 340,145 |
| Public relations | 87,325 |
| Total Operating Expenses | $48,874,937 |

The following provides additional detail regarding the Excluded Costs.

(a) Technology Costs—Cloud Hosting Services, Operating Fees, CAIS Operating Fees and Change Request Fees

CAT LLC did not incur technology costs related to the categories of cloud hosting services, operating fees, CAIS operating fees or change requests during the period from November 15, 2017 through November 15, 2018.

(b) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for the period from November 15, 2017 through November 15, 2018 include capitalizable application development costs of $37,852,083 incurred in the development of the CAT by the Initial Plan Processor. Such costs include development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Initial Plan Processor. Such costs include costs related to Industry Member technical specifications for orders and transactions, the system security plan, testing and production for Participant CAT reporting, third-party security assessment and response, query portal, onboarding of the Chief Information Security Officer, and ingestion of FINRA TRF data and FINRA data related to halts and corporate actions.

(c) Legal Costs

The legal costs of $6,143,278 represent the fees paid to WilmerHale for legal services from November 15, 2017 through November 15, 2018. During this period, WilmerHale provided legal assistance to the CAT, including with regard to the following:

- Provided legal support for the governance of the CAT, including governance support for the Operating Committee, Advisory Committee, Compliance Subcommittee, and CAT working groups;
- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan;
- Provided assistance related to CAT security;
- Drafted exemptive requests, including requests related to PII;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided interpretations of and related to the CAT NMS Plan;
- Provided advice with regard to regulator access to the CAT;
- Assisted with the Plan Processor transition;
- Provided assistance regarding communications with the industry regarding the CAT;
- Provided advice regarding Customer Account Information and PII;
- Provided support for litigation related to SEC exemptive orders; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretative and implementation issues.

(d) Consulting Costs

The consulting costs of $4,452,106 represent the fees paid to Deloitte for their role as project manager for the CAT from November 15, 2017 through November 15, 2018. During this period, Deloitte engaged in the following activities with respect to the CAT:

- Implemented program operations for the CAT project;
- Provided governance support to the Operating Committee, including support for Subcommittees and working groups of the Operating Committee (*e.g.,* Compliance Subcommittee, Cost and Funding Working Group, Technical Working Group, Industry Outreach Working Group, Security Working Group and Steering Committee);
- Assisted with cost and funding issues for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress.

(e) Insurance

CAT LLC did not incur costs related to insurance during the period from November 15, 2017 through November 15, 2018.

(f) Professional and Administration Costs

The professional and administration costs of $340,145 represent the fees paid to Anchin, Exegy and RSM from November 15, 2017 through November 15, 2018.

*Financial Advisory Firm: Anchin.* From the commencement of its engagement in April 2018 through November 15, 2018, Anchin engaged in the following activities with respect to the CAT:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial matters relating to the transition from

CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;

- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

*Market Data Provider: Exegy.* From July 2018 through November 15, 2018, CAT LLC purchased market data from Exegy (as described in more detail above).

*Security Assessment: RSM.* From October 2018 through November 15, 2018, CAT LLC incurred costs for RSM's performance of a security assessment (as described in more detail above).

(g) Public Relations Costs

The public relations costs of $87,325 represent the fees paid to Sloane from November 15, 2017 through November 15, 2018. From the commencement of its engagement in March 2018 through November 15, 2018, Sloane provided professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, Sloane provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan).

(III) Costs Paid to Initial Plan Processor From November 16, 2018 Through February 2019

Third, Historical CAT Costs 1 would not include the $19,628,791 in costs paid to the Initial Plan Processor from November 16, 2018 through February 2019 when CAT LLC's relationship with the Initial Plan Processor concluded. CAT LLC determined that Historical CAT Costs 1 would not include any fees paid to the Initial Plan Processor after November 15, 2017,[74] which was the date by which Participants were required to begin reporting to the CAT.[75] As discussed above, the Participants determined that Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes $37,852,083 in Initial Plan Processor costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Initial Plan Processor costs incurred after November 15, 2018 are the $19,628,791 in costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these $19,628,791 in costs.

(ii) Previously Invoiced Costs for Historical CAT Costs 1

CEBBs and CEBSs collectively have been invoiced for $173,075,024 of the $212,039,879.34 of Historical CAT Costs 1 via Historical CAT Assessment 1, where $86,537,512 was invoiced collectively to CEBBs and $86,537,512 was invoiced collectively to CEBSs. Accordingly, Historical CAT Assessment 1A would seek to recover the remaining $38,964,855.34 of Historical CAT Costs 1 collectively from CEBBs and CEBSs, where CEBBs collectively will be responsible for $19,482,427.67, and CEBSs collectively will be responsible for $19,482,427.67.

(C) Historical Recovery Period 1A

Under the CAT NMS Plan, the Operating Committee is required to reasonably establish the length of the Historical Recovery Period used in calculating each Historical Fee Rate based upon the amount of the Historical CAT Costs to be recovered by the Historical CAT Assessment, and to describe the reasons for its length.[76] The Historical Recovery Period used in calculating the Historical Fee Rate may not be less than 24 months or more than five years.[77] The Operating Committee has determined to establish a Historical Recovery Period 1A of 24 months for Historical CAT Assessment 1A.

The Operating Committee determined that the length of Historical Recovery Period 1A appropriately weighs the need for a reasonable Historical Fee Rate 1A that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans to the Participants in a timely fashion. The Operating Committee determined that 24 months for Historical Recovery Period 1A would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.[78] In addition, in establishing a Historical Recovery Period of 24 months, the Operating Committee recognized that the total costs for Historical CAT Assessment 1A were less than the total costs for 2022 and 2023,[79] and therefore it would be reasonable and appropriate to recover costs subject to this filing over an approximate two-year period.[80]

The length of the Historical Recovery Period 1A and the reasons for its length are provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.[81]

(D) Projected Total Executed Equivalent Share Volume

The calculation of the fee rate for Historical CAT Assessment 1A also requires the determination of the projected total executed equivalent share volume of transactions in Eligible Securities for Historical Recovery Period 1A. Under the CAT NMS Plan, the Operating Committee is required to ''reasonably determine the projected total executed equivalent share volume of all transactions in Eligible Securities for each Historical Recovery Period based on the executed equivalent share volume of all transactions in Eligible Securities for the prior twelve

[74] As discussed below, CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. *See* Item II.A.1(10)(E) below.

[75] The SEC approved the CAT NMS Plan on November 15, 2016, and Participant reporting was required to begin on the first anniversary of this date, November 15, 2017. *See* Section 6.3 of the CAT NMS Plan and CAT NMS Plan Approval Order.

[76] *See* Section 11.3(b)(i)(D)(I) and Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[77] *See* Section 11.3(b)(i)(D)(I) of the CAT NMS Plan. In the CAT Funding Model Approval Order, the SEC stated that ''[i]n the Commission's view, it is appropriate for the Operating Committee to establish the length of the Historical Recovery Period to be no less than 24 months and no more than five years.'' *See* CAT Funding Model Approval Order, 91 FR 13410, 13451.

[78] For example, as the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from $0.00007 per share to $0.00072 per share. *See* CAT Funding Model Approval Order, 91 FR 13410, 13469.

[79] The total CAT costs for 2022 were approximately $186 million and the total CAT costs for 2023 were approximately $233 million.

[80] Note that the proposed 24-month recovery period also recognizes the prohibition on the collection of Historical CAT Assessments after March 31, 2028 as set forth in Section 11.3(f) of the CAT NMS Plan.

[81] *See* Section 11.3(b)(iii)(B)(II)(C) of the CAT NMS Plan.

months.'' [82] The Operating Committee is required to base its projection on the prior twelve months, but it may use its discretion to analyze the likely volume for the upcoming year. Such discretion would allow the Operating Committee to use its judgment when estimating projected total executed equivalent share volume if the volume over the prior twelve months was unusual or otherwise unfit to serve as the basis of a future volume estimate.[83]

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from March 2025 through February 2026 was 5,980,937,549,360.49 executed equivalent shares. The Operating Committee has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1A by doubling the executed equivalent share volume for the prior 12 months. The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has increased from prior years (*e.g.,* the executed equivalent share volume for 2024 was 4,295,884,600,069.4), and the Operating Committee believes that it is reasonable to conclude that the annual executed equivalent share volume will remain at the higher level. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1A is projected to be 11,961,875,098,720.98 executed equivalent shares.[84]

The projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1A and a description of the calculation of the projection is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.[85]

(E) Fee Rate for Historical CAT Assessment 1A

The fee rate for Historical CAT Assessment 1A would be calculated by dividing the total amount of costs to be recovered by Historical CAT Assessment 1A by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1A, and dividing by 2. Specifically, the fee rate for Historical CAT Assessment 1A would be calculated by dividing $38,964,855.34 by 11,961,875,098,720.98, and then dividing by 2, which equals $0.00000162871017371542 per executed equivalent shares. Rounding this to six decimal places results in a fee rate of $0.000002 per executed equivalent share.[86] This fee rate is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide the Historical Fee Rate in a fee filing for a Historical CAT Assessment.[87]

(3) Past CAT Costs and Participants

Participants would not be required to pay any fees associated with Historical CAT Assessment 1A as the Participants previously have paid all Past CAT Costs. The CAT NMS Plan explains that:

Because Participants previously have paid Past CAT Costs via loans to the Company, Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs and such other additional Past CAT Costs as reasonably determined by the Operating Committee will be paid by the cancellation of loans made to the Company on a pro rata basis based on the outstanding loan amounts due under the loans.[88]

The CAT NMS Plan further states that ''Historical CAT Assessments are designed to recover two-thirds of the Historical CAT Costs.'' [89]

(4) Monthly Fees

CEBBs and CEBSs would be required to pay fees for Historical CAT Assessment 1A on a monthly basis for the period in which Historical CAT Assessment 1A is in effect.[90] A CEBB or CEBS's fee for each month would be calculated based on the transactions in Eligible Securities executed by the CEBB or CEBS from the prior month.[91] Proposed paragraph (a)(1)(B)(i) of Rule 6897 would state that each CAT Executing Broker would receive its first invoice in June 2026, and ''would receive an invoice each month thereafter in which Historical CAT Assessment 1A is in effect.'' Proposed paragraph (a)(1)(B)(ii) of Rule 6897 would state that ''Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1A on a monthly basis.'' In addition, paragraph (a)(2) of Rule 6897 states that each CEBB and CEBS is required to pay its CAT fees ''each month.''

(5) Actual Recovery Period for Historical CAT Assessment 1A

The CAT NMS Plan states that, ''[n]otwithstanding the length of the Historical Recovery Period used in calculating the Historical Fee Rate, each Historical CAT Assessment calculated using the Historical Fee Rate will remain in effect until all Historical CAT Costs for the Historical CAT Assessment are collected.'' [92] Accordingly, Historical CAT Assessment 1A will remain in effect until the remaining $38,964,855.34 of Historical CAT Costs 1 have been collected.[93] The actual recovery period for Historical CAT Assessment 1A may be shorter or longer than Historical Recovery Period 1A depending on the actual executed equivalent share volumes during the time that Historical CAT Assessment 1A is in effect and subject to any time limitation in the CAT NMS Plan.[94]

(6) Consolidated Audit Trail Funding Fees

To implement Historical CAT Assessment 1A, FINRA proposes to adopt FINRA Rule 6897(a)(1)(B) (Historical CAT Assessment 1A), including the proposed paragraphs described below.

(A) Historical CAT Assessment 1A

The CAT NMS Plan states that:

[82] *See* Section 11.3(b)(i)(E) of the CAT NMS Plan.

[83] *See* CAT Funding Model Approval Order, 91 FR 13410, 13452.

[84] This projection was calculated by multiplying 5,980,937,549,360.49 executed equivalent shares by two.

[85] *See* Section 11.3(b)(iii)(B)(II)(D) of the CAT NMS Plan.

[86] As the SEC noted in approving the CAT Funding Model, the fee filing would provide the exact fee per executed equivalent share and describe the relevant number of decimal places for the fee rate. *See* CAT Funding Model Approval Order, 91 FR 13410, 13445 n.677. The Operating Committee determined to use six decimal places to balance the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

[87] *See* Section 11.3(b)(iii)(B)(II)(A) of the CAT NMS Plan.

[88] Section 11.3(b)(ii) of the CAT NMS Plan.

[89] *See supra* note 90. In approving the CAT Funding Model, the Commission stated that the proposed allocation of the Historical CAT Assessment solely to CEBSs and CEBBs is appropriate. The Historical CAT Assessment will still be divided into thirds, as the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made to the Company. *See* CAT Funding Model Approval Order, 91 FR 13410, 13453.

[90] *See* Section 11.3(b)(iii)(A) of the CAT NMS Plan.

[91] *See* proposed paragraph (a)(1)(B)(ii) of Rule 6897.

[92] *See* Section 11.3(b)(i)(D)(II) of the CAT NMS Plan.

[93] In approving the CAT Funding Model, the Commission stated that, ''[i]n the Commission's view, it is appropriate for Industry Members to be charged a Historical CAT Assessment until all Historical CAT Costs for the Historical CAT Assessment are collected.'' *See* CAT Funding Model Approval Order, 91 FR 13410, 13452.

[94] *See* Section 11.3(f) of the CAT NMS Plan would prohibit the billing of Historical CAT Assessments after March 31, 2028.

Each month in which a Historical CAT Assessment is in effect, each CEBB and each CEBS shall pay a fee for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate reasonably determined pursuant to paragraph (b)(i) of this Section 11.3.[95]

Accordingly, based on the factors discussed above, FINRA proposes to adopt paragraph (a)(1)(B) of FINRA Rule 6897, which would state that:

(i) Each CAT Executing Broker shall receive its first invoice for Historical CAT Assessment 1A in June 2026, which shall set forth the Historical CAT Assessment 1A fees calculated based on transactions in May 2026, and shall receive an invoice for Historical CAT Assessment 1A for each month thereafter in which Historical CAT Assessment 1A is in effect.

(ii) Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1A on a monthly basis. Each month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (''CEBB'') and/or the CAT Executing Broker for the Seller (''CEBS'') (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of $0.000002 per executed equivalent share.

(iii) Historical CAT Assessment 1A will remain in effect until $38,964,855.34 is collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time. Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1A will no longer be in effect.

(iv) Each CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1A in accordance with paragraph (a)(2) of this Rule.

Proposed paragraph (a)(1)(B)(ii) of Rule 6897 would set forth the fee rate of $0.000002 per executed equivalent share for Historical CAT Assessment 1A, which is calculated as discussed above.

The proposed language in paragraph (a)(1)(B)(i) would describe when CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1A. Specifically, CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1A in June 2026 and the fees set forth in that invoice would be calculated based on transactions executed in the prior month, that is, transactions executed in May 2026. The payment for the first invoice would be required within 30 days after the receipt of the first invoice (unless a longer period is indicated), as described in paragraph (a)(2)(B) of Rule 6897.

Proposed paragraph (a)(1)(B)(i) also would describe the monthly cadence of the invoices for Historical CAT Assessment 1A. Specifically, after the first invoices are provided to CAT Executing Brokers in June 2026, invoices will be sent to CAT Executing Brokers each month thereafter while Historical CAT Assessment 1A is in effect.

Proposed paragraph (a)(1)(B)(ii) would describe the invoices for Historical CAT Assessment 1A. Proposed paragraph (a)(1)(B)(ii) would state that ''Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1A on a monthly basis.'' Proposed paragraph (a)(1)(B)(ii) also would describe the fees to be set forth in the invoices for Historical CAT Assessment 1A. Specifically, it would state that ''[e]ach month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (''CEBB'') and/or the CAT Executing Broker for the Seller (''CEBS'') (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of $0.000002 per executed equivalent share.''

Furthermore, proposed paragraph (a)(1)(B)(iii) would describe how long Historical CAT Assessment 1A would remain in effect. It would state that ''Historical CAT Assessment 1A will remain in effect until $38,964,855.34 is collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time.'' This proposed paragraph would further state that ''Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1A will no longer be in effect.''

Historical CAT Assessment 1A will be assessed for all transactions executed in each month through the end of the month in which $38,964,855.34 is assessed, and then CAT LLC will provide notice that Historical CAT Assessment 1A is no longer in effect. Since Historical CAT Assessment 1A is a monthly fee based on transaction volume from the prior month, Historical CAT Assessment 1A may collect more than $38,964,855.34. To the extent that occurs, any excess money collected during the final month in which Historical CAT Assessment 1A is in effect will be used to offset future fees and/or to fund the reserve for the CAT.

Finally, proposed paragraph (a)(1)(B)(iv) sets forth the requirement for the CAT Executing Brokers to pay the invoices for Historical CAT Assessment 1A. It would state that ''[e]ach CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1A in accordance with paragraph (a)(2) of this Rule.''

(B) Manner of Payment

Paragraph (a)(2) of Rule 6897 (Consolidated Audit Trail Funding Fees) describes the manner of payment of Industry Member CAT fees. Paragraph (a)(2)(A) states that ''[e]ach CAT Executing Broker shall pay its CAT fees as required pursuant to paragraph (a)(1) of this Rule each month to the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.'' The CAT NMS Plan requires the Operating Committee to establish a system for the collection of CAT fees.[96] The Plan Processor has established a billing system for CAT fees.[97] Therefore, FINRA proposes to require CAT Executing Brokers to pay Historical CAT Assessment 1A in accordance with such system.

(C) Failure To Pay CAT Fees

The CAT NMS Plan further states that:

Participants shall require each Industry Member to pay all applicable fees authorized under this Article XI within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any

[95] *See* Section 11.3(b)(iii)(A) of the CAT NMS Plan.

[96] *See* Section 11.4 of the CAT NMS Plan.

[97] The billing process and system are described in CAT Alert 2023–02 as well as the CAT FAQs related to the billing of CAT fees, the Industry Member CAT Reporter Portal User Guide, the FCAT Industry Member Onboarding Guide, the FCAT Connectivity Supplement for Industry Members and the CAT Billing Webinars (dated Sept. 28, 2023, and Nov. 7, 2023), each available on the CAT website.

such fee when due (as determined in accordance with the preceding sentence), such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of: (a) the Prime Rate plus 300 basis points; or (b) the maximum rate permitted by applicable law.[98]

Accordingly, FINRA previously has added this requirement to Rule 6897. Specifically, paragraph (a)(2)(B) of Rule 6897 states:

Each CAT Executing Broker shall pay the CAT fees required pursuant to paragraph (a)(1) of this Rule within 30 days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If a CAT Executing Broker fails to pay any such CAT fee when due, such CAT Executing Broker shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300 basis points, or (ii) the maximum rate permitted by applicable law.

The requirements of paragraph (a)(2)(B) would apply to Historical CAT Assessment 1A.

(7) Historical CAT Assessment Details

The CAT NMS Plan states that:

Details regarding the calculation of a CAT Executing Broker's Historical CAT Assessment will be provided upon request to such CAT Executing Broker. At a minimum, such details would include each CAT Executing Broker's executed equivalent share volume and corresponding fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.[99]

Such information would provide CEBBs and CEBSs with the ability to understand the details regarding the calculation of their Historical CAT Assessment.[100] CAT LLC will provide CAT Executing Brokers with these details regarding the calculation of their Historical CAT Assessments on their monthly invoice for the Historical CAT Assessment.

In addition, CAT LLC will make certain aggregate statistics regarding Historical CAT Assessments publicly available. Specifically, the CAT NMS Plan states that, ''[f]or each Historical CAT Assessment, at a minimum, CAT LLC will make publicly available the aggregate executed equivalent share volume and corresponding aggregate fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise on an exchange, and (3) by buy-side transactions and sell-side transactions.'' [101] Such aggregate statistics will be available on the CAT website.

Furthermore, CAT LLC will make publicly available on the CAT website the total amount invoiced each month that Historical CAT Assessment 1A is in effect as well as the total amount invoiced for Historical CAT Assessment 1A for all months since its commencement. CAT LLC also will make publicly available on the CAT website the total costs to be collected from Industry Members for Historical CAT Assessment 1A. By reviewing statistics regarding how much has been invoiced and how much remains to be invoiced for Historical CAT Assessment 1A, Industry Members would have sufficient information to reasonably track how much longer Historical CAT Assessment 1A is likely to be in place.

(8) Billing Implementation

To date, CAT LLC, via FCAT, has billed Industry Members for Historical CAT Assessment 1 and certain Prospective CAT Fees. Industry Members will be billed for Historical CAT Assessment 1A via the same processes established for Historical CAT Assessment 1 and the Prospective CAT Fees. Accordingly, Industry Members have substantial experience with the CAT billing processes.

(9) Financial Accountability Milestones

The CAT NMS Plan states that ''[n]o Participant will make a filing with the SEC pursuant to Section 19(b) of the Exchange Act regarding any Historical CAT Assessment until any applicable Financial Accountability Milestone described in Section 11.6 has been satisfied.'' [102] The CAT NMS Plan further states that ''in all filings submitted by the Participants to the Commission under Section 19(b) of the Exchange Act, to establish or implement Post-Amendment Industry Member Fees pursuant to this Article, . . . the Participants shall clearly indicate whether such fees are related to Post-Amendment Expenses incurred during Period 1, Period 2, Period 3, or Period 4.'' [103] As discussed in detail below, all applicable Financial Accountability Milestones for Historical CAT Assessment 1A—that is, Period 1, Period 2 and Period 3 of the Financial Accountability Milestones—have been satisfied. Furthermore, as discussed below, this filing clearly indicates that Historical CAT Assessment 1A relates to Post-Amendment Expenses incurred during Periods 1, 2 and 3 of the Financial Accountability Milestones.

(A) Period 1 of the Financial Accountability Milestones

In accordance with Section 11.6(b) of the CAT NMS Plan, Historical CAT Assessment 1A seeks to recover costs that are related to ''all fees, costs, and expenses (including legal and consulting fees, costs, and expenses) incurred by or for the Company in connection with the development, implementation and operation of the CAT from the effective date of [Section 11.6 of the CAT NMS Plan] until such time as Full Implementation of CAT NMS Plan Requirements has been achieved'' [104] (''Post-Amendment Expenses'') incurred during FAM Period 1. FAM Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. Section 1.1 of the CAT NMS Plan defines ''Initial Industry Member Core Equity and Options Reporting'' as:

The reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of both: (a) equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information; and (b) options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants'

[98] *See* Section 11.4 of the CAT NMS Plan.

[99] *See* Section 11.3(a)(iv)(A) of the CAT NMS Plan.

[100] In approving the CAT Funding Model, the Commission stated that, ''[i]n the Commission's view, providing CAT Execut[ing] Brokers information regarding the calculation of their CAT Fees will aid in transparency and permit CAT Execut[ing] Brokers to confirm the accuracy of their invoices for CAT Fees.'' *See* CAT Funding Model Approval Order, 91 FR 13410, 13454.

[101] *See* Section 11.3(a)(iv)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission stated that ''[t]he publication of the aggregate executed equivalent share volume and aggregate fee is appropriate because it would allow Participants and CAT Executing Brokers a high-level validation of executed volume and fees.'' *See* CAT Funding Model Approval Order, 91 FR 13410, 13454.

[102] *See* Section 11.3(b)(iii)(B)(III) of the CAT NMS Plan.

[103] *See* Section 11.6(b) of the CAT NMS Plan.

[104] *See* Section 11.6 of the CAT NMS Plan.

Quarterly Progress Reports.[105] As indicated by the Participants' Quarterly Progress Report for the third quarter of 2020,[106] Initial Industry Member Core Equity and Option Reporting was completed on schedule on July 22, 2020, which is prior to the July 31, 2020 deadline.

Under the FAM Period 1 requirement of Initial Industry Member Core Equity and Options Reporting, Industry Members—excluding Small Industry Members that are not OATS reporters—were required to report two categories of data to the CAT: equities transaction data and options transaction data (both excluding Customer Account Information, Customer-ID, and Customer Identifying Information) by July 31, 2020. Pursuant to exemptive relief provided by the Commission, the Commission authorized the Participants' Compliance Rules to allow core equity reporting for Industry Members (Phase 2a) to begin on June 22, 2020 and core options reporting for Industry Members (Phase 2b) to begin on July 20, 2020.[107]

In adopting the FAMs, the Commission stated that the equities transaction reporting required for FAM Period 1 ''is consistent with the functionality that the Participants describe on the CAT NMS Plan website as 'Production Go-Live for Equities 2a file submission and data integrity validations.' '' [108] The Phase 2a Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order, and includes the following data related to Eligible Securities that are equities:

- All events and scenarios covered by OATS, which includes information related to the receipt or origination of orders, order transmittal, and order modifications, cancellations and executions;
- Reportable Events for: (1) proprietary orders, including market maker orders, for Eligible Securities that are equities; (2) electronic quotes in listed equity Eligible Securities (*i.e.,* NMS stocks) sent to a national securities exchange or FINRA's Alternative Display Facility (''ADF''); (3) electronic quotes in unlisted Eligible Securities (*i.e.,* OTC Equity Securities) received by an Industry Member operating an interdealer quotation system (''IDQS''); and (4) electronic quotes in unlisted Eligible Securities sent to an IDQS or other quotation system not operated by a Participant or Industry Member;
- Firm Designated IDs (''FDIDs''), which Industry Members must report to the CAT as required by Sections 6.3(d)(i)(A) and 6.4(d)(ii)(C) of the CAT NMS Plan;
- Industry Members would be required to report all street side representative orders, including both agency and proprietary orders and mark such orders as representative orders, except in certain limited exceptions as described in the Industry Member Technical Specifications;
- The link between the street side representative order and the order being represented when: (1) the representative order was originated specifically to represent a single order received either from a customer or another broker-dealer; and (2) there is (a) an existing direct electronic link in the Industry Member's system between the order being represented and the representative order and (b) any resulting executions are immediately and automatically applied to the represented order in the Industry Member's system;
- Manual and Electronic Capture Time for Manual Order Events;
- Special handling instructions for the original receipt or origination of an order during Phase 2a; and
- When routing an order, whether the order was routed as an intermarket sweep order (''ISO'').

In Phase 2a, Industry Members were not required to report modifications of a previously routed order in certain limited instances, nor were they required to report a cancellation of an order received from a Customer after the order has been executed.[109]

The Quarterly Progress Report for the third quarter of 2020 states that ''Interim Step: Production Go-Live for Equities 2a file submission and data integrity validation (Large Industry Members and Small OATS Reporters)'' was completed on June 22, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of ''equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information'' was completed on June 22, 2020.

In adopting the FAMs, the Commission stated that the options transaction reporting required for FAM Period 1 is ''consistent with the functionality that the Participants describe on the CAT NMS Plan website as 'Production Go-Live for Options 2b file submission and data integrity validations.' '' [110] The Phase 2b Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order, and includes the Industry Member Data related to Eligible Securities that are options and related to simple electronic option orders, excluding electronic paired option orders. A simple electronic option order is an order to buy or sell a single option that is not related to or dependent on any other transaction for pricing and timing of execution that is either received or routed electronically by an Industry Member. Electronic receipt of an order is defined as the initial receipt of an order by an Industry Member in electronic form in standard format directly into an order handling or execution system. Electronic routing of an order is the routing of an order via electronic medium in standard format from one Industry Member's order handling or execution system to an exchange or another Industry Member. An electronic paired option order is an electronic option order that contains both the buy and sell side that is routed to another Industry Member or exchange for crossing and/or price improvement as a single transaction on an exchange. Responses to auctions of simple orders and paired simple orders would be reportable in Phase 2b. Furthermore, combined orders in options would be treated in Phase 2b in the same way as equity representative orders are treated in Phase 2a. A combined order would mean, as permitted by SRO rules, a single, simple order in Listed Options created by combining individual, simple orders in Listed Options from a customer with the same exchange origin code before routing to an exchange. During Phase 2b, the single combined

[107] *See* Phased Reporting Exemptive Relief Order, *supra,* note 40. Under the CAT NMS Plan as adopted, the Participants were required, through their Compliance Rules, to require their Large Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2018, and to require their Small Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2019. *See* Sections 6.7(a)(v) and (vi) of the CAT NMS Plan. The SEC granted exemptive relief from these provisions of the CAT NMS Plan to allow for the phased implementation of Industry Member reporting via five phases addressing the reporting requirements for Phase 2a Industry Member Data, Phase 2b Industry Member Data, Phase 2c Industry Member Data, Phase 2d Industry Member Data and Phase 2e Industry Member Data.

[108] *See* Securities Exchange Act Release No. 88890 (May 15, 2020), 85 FR 31322, 31330 n.97 (May 22, 2020) (''FAM Adopting Release'').

[109] *See* Phased Reporting Exemptive Relief Order, 85 FR 23075, 23076–78.

[110] *See* FAM Adopting Release, 85 FR 31322, 31330 n.98.

order sent to an exchange must be reported and marked as a combined order, but the linkage to the underlying orders is not required to be reported until Phase 2d.[111]

The Quarterly Progress Report for the third quarter of 2020 states that ''Interim Step: Production Go-Live for Options 2b file submission and data integrity validations'' was completed on July 20, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of ''options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information'' was completed on July 20, 2020.

As discussed above, the remaining Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1A would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020. The total costs for this period, as discussed above, are $6,377,343. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($2,125,781) and CEBSs paying one-third ($2,125,781) through Historical CAT Assessment 1 and Historical CAT Assessment 1A.

(B) Period 2 of the Financial Accountability Milestones

Historical CAT Assessment 1A seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 2. FAM Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. Section 1.1 of the CAT NMS Plan defines ''Full Implementation of Core Equity Reporting'' as:

the point at which: (a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the fourth quarter of 2020,[112] Full Implementation of Core Equity Reporting was completed on schedule by December 31, 2020.

Specifically, the Full Implementation of Core Equity Reporting requires the satisfaction of two prongs. The first prong requires Participants to have fully implemented the first phase of equities transaction reporting for Industry Members (excluding Small Industry Members that are not OATS reporters) at an Error Rate of less than 5%. In addition, equities transaction data produced by the CAT at this stage must also be sufficiently interlinked so as to permit full analysis of an order's lifecycle across the national market, excluding full linkage of representative orders. As CAT LLC reported on its Quarterly Progress Reports, Phase 2a was fully implemented as of October 26, 2020, including intra-firm, inter-firm, national securities exchange, and trade reporting facilities linkages.[113] In addition to the reporting of Phase 2a Industry Member Data as described above with regard to FAM Period 1, the following linkage data was added to the CAT as described in the Quarterly Progress Reports for the third and fourth quarter of 2020:

- ''Production Go-Live for Equities 2a Intrafirm Linkage validations'' was completed on 7/27/2020; [114]
- ''Production Go-Live for Firm to Firm Linkage validations for Equities 2a (Large Industry Members and Small OATS Reporters)'' was completed on October 26, 2020; and
- ''Production Go-Live for Equities 2a Exchange and TRF Linkage validations (Large Industry Members and Small OATS Reporters)'' was completed on October 26, 2020.

Furthermore, as CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2020, the average overall error rate for Phase 2a Industry Member Data was less than 5% as of December 31, 2020. The average overall error rate was calculated by dividing the compliance errors by processed records.

The second prong of this FAM requires that the equities transaction data collected by the CAT at this stage be made available to regulators through two basic query tools required by the CAT NMS Plan—a targeted query tool that will enable regulators to retrieve data via an online query screen with a variety of predefined selection criteria, and a user-defined direct query tool that will provide regulators with the ability to query data using all available attributes and data sources.[115] As CAT LLC reported on its Quarterly Progress Reports, the query tool functionality incorporating the data from Phase 2a was available to the Participants and the Commission as of December 31, 2020.[116]

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.[117]

As discussed above, the remaining Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1A would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1,

[111] *See* Phased Reporting Exemptive Relief Order, 85 FR 23075, 23078.

[112] *See* CAT Q4 2020 Quarterly Progress Report (January 29, 2021), *https://catnmsplan.com/sites/default/files/2021-02/CAT-Q4-2020-QPR.pdf.*

[113] For a description of the requirements of Phases 2a, *see* Phased Reporting Exemptive Relief Order, *supra* note 40.

[114] *See* CAT Q3 2020 Quarterly Progress Report (October 30, 2020), *https://catnmsplan.com/sites/default/files/2020-10/CAT-Q3-2020-QPR.pdf.*

[115] At the time of this FAM, Section 6.10(c)(i)(A) of the CAT NMS Plan required the Plan Processor to ''provide Participants and the SEC with access to all CAT Data stored in the Central Repository'' via an ''online targeted query tool,'' and Appendix D, Sections 8.1.1–8.1.3 of the CAT NMS Plan described the required functionality associated with this regulatory tool. Appendix D, Section 8.2.1 describes the required functionality associated with a user-defined direct query tool that will ''deliver large sets of data that can then be used in internal surveillance or market analysis applications.''

[116] *See* CAT Q3 2020 Quarterly Progress Report (October 30, 2020); Updated CAT Q3 2020 Quarterly Progress Report (January 29, 2021); and CAT Q4 2020 Quarterly Progress Report (January 29, 2021).

[117] *See* Securities Exchange Act Release No. 98848 (November 2, 2023), 88 FR 77128, 77129 n.13 (November 8, 2023) (''Settlement Exemptive Order'').

2020 through December 31, 2020. The total costs for this period, as discussed above, are $42,976,478. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($14,325,492.70) and CEBSs paying one-third ($14,325,492.70) through Historical CAT Assessment 1 and Historical CAT Assessment 1A.

(C) Period 3 of the Financial Accountability Milestones

Historical CAT Assessment 1A seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 3. FAM Period 3 began on January 1, 2021, and concluded on December 31, 2021, the date of the Full Availability and Regulatory Utilization of Transactional Database Functionality. Section 1.1 of the CAT NMS Plan defines ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' as:

the point at which: (a) reporting to the Order Audit Trail System (''OATS'') is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the fourth quarter of 2021,[118] Full Availability and Regulatory Utilization of Transactional Database Functionality was completed on schedule by December 31, 2021.

Specifically, the ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' requires the satisfaction of five prongs. The first prong requires that reporting to OATS is no longer required for new orders. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021,[119] FINRA retired OATS effective September 1, 2021.[120] Accordingly, after the retirement of OATS, reporting to OATS was no longer required.

In addition to Phase 2a and Phase 2b Industry Member Data, the second and third prongs of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' require Industry Member reporting of Phase 2c Industry Member Data and Phase 2d Industry Member Data. The Phase 2c Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. That Order states that ''Phase 2c Industry Member Data'' is Industry Member Data related to Eligible Securities that are equities other than Phase 2a Industry Member Data, Phase 2d Industry Member Data, or Phase 2e Industry Member Data. Specifically, the Phase 2c Industry Member Data includes Industry Member Data that is related to Eligible Securities that are equities and that is related to: (1) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (2) quotes in unlisted Eligible Securities sent to an IDQS operated by a CAT Reporter (reportable by the Industry Member sending the quotes) (except for quotes reportable in Phase 2d, as discussed below); (3) electronic quotes in listed equity Eligible Securities (*i.e.,* NMS stocks) that are not sent to a national securities exchange or FINRA's Alternative Display Facility; (4) reporting changes to client instructions regarding modifications to algorithms; (5) marking as a representative order any order originated to work a customer order in price guarantee scenarios, such as a guaranteed VWAP; (6) flagging rejected external routes to indicate a route was not accepted by the receiving destination; (7) linkage of duplicate electronic messages related to a Manual Order Event between the electronic event and the original manual route; (8) special handling instructions on order route reports (other than the ISO, which is required to be reported in Phase 2a); (9) quote identifier on trade events; (10) reporting of LTIDs (if applicable) for accounts with Reportable Events that are reportable to CAT as of and including Phase 2c; (11) reporting of date account opened or Account Effective Date (as applicable) for accounts and reporting of a flag indicating the Firm Designated ID type as account or relationship; (12) order effective time for orders that are received by an Industry Member and do not become effective until a later time; (13) the modification or cancellation of an internal route of an order; and (14) linkages to the customer orders(s) being represented for representative order scenarios, including agency average price trades, net trades, aggregated orders, and disconnected Order Management System (''OMS'')—Execution Management System (''EMS'') scenarios, as required in the Industry Member Technical Specifications.[121]

Phase 2c Industry Member Data also includes electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are equities and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: (1) an equity bid or offer is displayed publicly or has been communicated (a) for listed securities to the ADF operated by FINRA; or (b) for unlisted equity securities to an ''interdealer quotation system,'' as defined in FINRA Rule 6420(c); or (2) an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing; *i.e.,* no further manual or electronic action is

[118] *See* CAT Q4 2021 Quarterly Progress Report (January 27, 2022), *https://catnmsplan.com/sites/default/files/2022-01/CAT-Q4-2021-QPR.pdf.*

[119] *See supra* note 120.

[120] *See* Securities Exchange Act Release No. 92239 (June 23, 2021), 86 FR 34293 (June 29, 2021) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2021–017).

[121] *See* Phase Reporting Exemptive Relief Order, 85 FR 23075, 23078–79.

required by the responder providing the quote in order to execute or cause a trade to be executed). With respect to OTC Equity Securities, OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter (other than such an IDQS that does not match and execute orders) are reportable by the Industry Member sending them in Phase 2c. Accordingly, any response to a request for quote or other form of solicitation response provided in a standard electronic format (*e.g.,* FIX) that meets this quote definition (*i.e.,* an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing) would be reportable in Phase 2c.[122]

The Phase 2d Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. ''Phase 2d Industry Member Data'' is Industry Member Data that is related to Eligible Securities that are options other than Phase 2b Industry Member Data, Industry Member Data that is related to Eligible Securities that are equities other than Phase 2a Industry Member Data or Phase 2c Industry Member Data, and Industry Member Data other than Phase 2e Industry Member Data. Phase 2d Industry Member Data includes with respect to the Eligible Securities that are options: (1) simple manual orders; (2) electronic and manual paired orders; (3) all complex orders with linkages to all CAT-reportable legs; (4) LTIDs (if applicable) for accounts with Reportable Events for Phase 2d; (5) date account opened or Account Effective Date (as applicable) for accounts with an LTID and flag indicating the Firm Designated ID type as account or relationship for such accounts; (6) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (7) the modification or cancellation of an internal route of an order; and (8) linkage between a combined order and the original customer orders. Phase 2d Industry Member Data also would include electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are options and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: a listed option bid or offer which is accessible electronically by customers or other market participants and is immediately actionable (*i.e.,* no further action is required by the responder providing the quote in order to execute or cause a trade to be executed). Accordingly, any response to a request for quote or other form of solicitation response provided in standard electronic format *(e.g.,* FIX) that meets this definition is reportable in Phase 2d for options.[123]

Phase 2d Industry Member Data also includes with respect to Eligible Securities that are options or equities (1) receipt time of cancellation and modification instructions through Order Cancel Request and Order Modification Request events; (2) modifications of previously routed orders in certain instances; and (3) OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter that does not match and execute orders. In addition, subject to any exemptive or other relief, Phase 2d Industry Member Data will include verbal or manual quotes on an exchange floor or in the over-the-counter market, where verbal quotes and manual quotes are defined as bids or offers in Eligible Securities provided verbally or that are provided or received other than via a CAT Reporter's order handling and execution system (*e.g.,* quotations provided via email or instant messaging).[124]

The Quarterly Progress Report for the fourth quarter of 2021 states that ''Phase 2a was fully implemented as of October 26, 2020;'' ''Phase 2b was fully implemented as of January 4, 2021;'' ''Phase 2c was implemented as of April 26, 2021;'' and ''Phase 2d was fully implemented as of December 13, 2021.'' [125] The Quarterly Progress Reports for 2021 provide additional detail regarding the implementation of these steps including the following:

- ''Production Go-Live for Equities 2c reporting requirements (Large Industry Members)'' was completed on April 26, 2021;
- ''LTID Account Information Reporting Go-Live for Phases 2a, 2b and 2c (Large Industry Members)'' was completed on April 26, 2021;
- ''FCAT Plan Processor creates linkages of the lifecycle of order events based on the received data through Phase 2d Production Go-Live for Options 2d reporting requirements (Large Industry Members)'' was completed on December 13, 2021;
- ''Production Go-Live for Options 2d reporting requirements (Large Industry Members)'' was completed on December 13, 2021;
- ''Production Go-Live for Options 2b reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)'' was completed on December 13, 2021;
- ''Production Go-Live for Equities 2c reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)'' was completed on December 13, 2021;
- ''Production Go-Live for Options 2d reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)'' was completed on December 13, 2021;
- ''LTID Account Information Reporting Go-Live for Phases 2d (Large Industry Members)'' was completed on December 13, 2021; and
- ''LTID Account Information Reporting Go-Live for Phases 2a, 2b, 2c and 2d (Small Industry Members)'' was completed on December 13, 2021.[126]

The third prong of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' also imposes an Error Rate requirement of 5% or less. The Quarterly Progress Report for the fourth quarter of 2021 states the average overall error rate was less than 5% as of December 31, 2021. The average overall error rate was calculated by dividing the compliance errors by processed records.

The fourth prong of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' requires that the data collected by the CAT at this stage be made available to regulators through an online targeted query tool and a user-defined direct query tool. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021, the query tool functionality incorporating the data from Phases 2a, 2b, 2c and 2d was available to the Participants and to the Commission as of December 31, 2021.[127]

The fifth prong requires the requirements of Section 6.10(a) of the CAT NMS Plan to have been met. Section 6.10(a) of the CAT NMS Plan requires the Participants to use the tools described in Appendix D to ''develop and implement a surveillance system, or enhance existing surveillance systems, reasonably designed to make use of the consolidated information contained in

[122] *See supra* note 123, at 23079.

[123] *See supra* note 124.

[124] *See supra* note 123, at 23079–80.

[127] *See* CAT Q4 2021 Quarterly Progress Report (January 27, 2022), *https://catnmsplan.com/sites/default/files/2022-01/CAT-Q4-2021-QPR.pdf..*

the Central Repository.'' FINRA implemented a surveillance system, or enhanced existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository as of December 31, 2021 in accordance with Section 6.10(a) of the CAT NMS Plan.[128]

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.[129]

As discussed above, the remaining Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1A would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2021 through December 31, 2021. The total costs for this period, as discussed above, are $144,415,268. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($48,138,422.70) and CEBSs paying one-third ($48,138,422.70) through Historical CAT Assessment 1 and Historical CAT Assessment 1A.

(D) Additional Considerations Related to the Financial Accountability Milestones

As discussed above, CAT LLC has satisfied the Financial Accountability Milestones (''FAMs'') for Periods 1 through 3.[130] As discussed below, none of the circumstances related to NIA Electronic RFQ Responses, the 2023 Verbal Quotes Exemption, the November 2023 Order, or Executing Broker reporting, affect the conclusion that the FAMs for Periods 1 through 3 were satisfied in a timely fashion.

(i) NIA Electronic RFQ Responses

CAT LLC does not believe that the exemptive relief relating to the reporting of electronic responses for quotes (''RFQs'') that are not immediately actionable (''NIA Electronic RFQ Responses'') affect the conclusion that FAMs 1 through 3 have been satisfied. The only reason CAT LLC pursued this relief is because certain Industry Members introduced concerns that NIA Electronic RFQ Responses could be considered ''orders'' reportable pursuant to Rule 613(j)(8) and some Industry Members were not prepared to report such orders to CAT. Thus, the relief was requested on behalf of Industry Members. CAT LLC itself has not taken any position on whether NIA Electronic RFQ Responses are ''orders,'' as the definition of ''order'' is an SEC rule and the trading processes for NIA Electronic RFQ Responses are the Industry Members', not those of the Participants or CAT LLC. Accordingly, CAT LLC stated in its letter that ''Industry Members must determine whether trading interest falls within the definition of an 'order' for CAT purposes. To the extent an NIA Electronic RFQ Response is not considered an 'order'' as defined in Rule 613(j)(8) and the CAT NMS Plan, it would not be reportable to CAT.'' [131]

Only ''orders'' as defined in SEC Rule 613(j)(8) are reportable to CAT. There is no agreement across the industry or among regulators as to whether NIA Electronic RFQ Responses are ''orders'' reportable to CAT. Certain Industry Members have raised the question as to whether NIA Electronic RFQ Responses are orders, but others have argued that they are not orders under Rule 613(j)(8).[132] Indeed, members of the Advisory Committee, which CAT LLC relies upon for guidance with regard to Industry Member issues, have not had a definitive view on whether NIA Electronic RFQ Responses are orders. As Rule 613(j)(8) is an SEC rule, CAT LLC believes that only the SEC can provide a definitive determination as to if, and under what circumstances, an NIA Electronic RFQ Response is considered an ''order'' reportable to CAT. The issue has persisted for some time. As a result, CAT LLC filed an exemptive request regarding NIA Electronic RFQ Responses for clarity on the interpretive issue. As recently as April 2024, Industry Members have re-raised this issue stating that the SEC agrees that it must provide additional guidance on this interpretive issue to resolve the CAT reporting issue for NIA Electronic RFQ Responses:

As further discussed in the prior FIF letters, even if the Commission had the legal authority to require the reporting of NIA RFQ responses to CAT without an amendment to Rule 613, the Commission has not provided guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT. In subsequent discussions with industry members, Commission representatives have agreed that, prior to NIA RFQ responses being reportable to CAT, it would be necessary for the Commission to provide further guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT.[133]

On May 20, 2024, the Commission granted CAT LLC's request for exemptive relief from certain CAT reporting requirements pertaining to NIA Electronic RFQ Responses to the extent such responses are considered ''orders'' reportable pursuant to Rule 613(j)(8).[134] The Commission, however, did not provide additional guidance regarding the conditions under which NIA Electronic RFQ Responses would be reportable to CAT. The Commission stated in its exemptive order that ''[t]o the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for the Financial Accountability Milestones, provided that any conditions of the exemption are satisfied.'' [135]

When the Commission proposed the FAMs, the Participants expressed concern that, ''by conditioning the ability of CAT LLC and the Participants to collect Post-Amendment Industry Member Fees on factors dependent on the efforts of Industry Members, the Commission's proposals inadvertently establish a perverse incentive for Industry Members to devote less than maximum efforts to comply with their obligations related to the CAT as they will pay less fees in such instances.'' [136] The Participants further warned that ''Industry Members may request or

[128] *See* CAT Q1 2021 Quarterly Progress Report (April 30, 2021); CAT Q2 2021 Quarterly Progress Report (July 27, 2021); CAT Q3 2021 Quarterly Progress Report (November 1, 2021); and CAT Q4 2021 Quarterly Progress Report (January 27, 2022).

[129] *See* Settlement Exemptive Order, 88 FR 77128, 77129 n.13.

[130] In May 2020, the Commission adopted amendments to the CAT NMS Plan that establish four Financial Accountability Milestones and set target deadlines by which these milestones must be achieved. These amendments also reduce the amount of any fees, costs, and expenses that may be recovered from Industry Members if the Participants fail to meet the target deadlines. *See* FAM Adopting Release, *supra* note 110.

[131] *See* Letter from Brandon Becker, Chair, CAT NMS Plan Operating Committee to Vanessa Countryman, Secretary, SEC, dated February 13, 2024, at 2.

[132] *See, e.g.,* Letter from Howard Meyerson, Managing Director, FIF, to Sai Rao, Counsel for Trading and Markets, Office of the Chair, dated April 25, 2024.

[133] *See supra* note 134.

[134] *See* Securities Exchange Act Release No. 100181 (May 20, 2024), 89 FR 45715 (May 23, 2024).

[135] *See supra* note 136, 89 FR 45715, 45716 n.11.

[136] *See* Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, SEC, dated October 28, 2019, at 9.

require unanticipated reporting delays to address Industry Member implementation issues or concerns,'' but that, ''[f]aced with financial penalties for missed deadlines, the Participants may not be able to fully address legitimate industry concerns or accommodate requests for delays with respect to future deadlines.'' [137] CAT LLC has engaged in good faith to help address NIA Electronic RFQ Responses and other concerns relevant to the ability of Industry Members to meet their CAT reporting obligations. CAT LLC should not be penalized financially for seeking in good faith to resolve a difficult interpretive issue for the benefit of Industry Members.

(ii) 2023 Verbal Quotes Exemption

CAT LLC does not believe that the Commission's May 19, 2023 order granting temporary exemptive relief relating to certain verbal floor activity and unstructured verbal and electronic upstairs activity (the ''2023 Verbal Quotes Exemption'') affects the conclusion that FAMs 1 through 3 have been satisfied. The 2023 Verbal Quotes Exemption, which was issued on May 19, 2023, is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. The relevant exemption for this time period is the Commission's November 12, 2020 order, which granted relief for the same activity through July 31, 2023 (the ''2020 Verbal Quotes Order'').[138] The Commission has stated that, ''to the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for a Financial Accountability Milestone, provided that the conditions of the exemption are satisfied.'' [139] Here, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3.[140]

(iii) November 2023 Order

CAT LLC does not believe that the Commission's November 2, 2023 order granting relief from certain CAT NMS Plan requirements (the ''November 2023 Order'') [141] affects the conclusion that FAMs 1 through 3 have been satisfied. The November 2023 Order is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. As described in the November 2023 Order, the relevant exemptive orders for this time period were issued on December 16, 2020, which also states that ''the Commission has determined that the Participants have sufficiently complied with the conditions set forth in the prior Orders and with the technical requirements for Quarterly Progress Reports set forth in section 6.6(c) of the CAT NMS Plan, including for purposes of determining compliance with any applicable Financial Accountability Milestones.'' [142] The November 2023 Exemption Order is consistent with the Commission's repeated statements in the FAM adopting release that it would have ''authority to grant exemptive relief from any requirement associated with a particular Financial Accountability Milestone,'' citing Section 36 of the Exchange Act and Rule 608.[143] Similarly, the CAT NMS Plan expressly contemplates the Commission's ability to grant exemptive relief from any CAT NMS Plan requirement.[144]

(iv) Executing Broker Reporting

CAT LLC also completed the requirements of FAM Period 2, including the required linkages, by December 31, 2020. Although Participant exchanges may report the Executing Broker to CAT differently in certain situations, these reporting differences are irrelevant for linkage purposes as the fields used for CAT Executing Broker are not used for linkage.

(10) Additional Support for Reasonableness of Historical CAT Costs

The CAT Funding Model approved by the Commission permits the recovery of reasonable costs in each of the categories of CAT costs sought to be recovered via Historical CAT Assessment 1A.[145] As described in detail above and in further detail below, the CAT costs to be recovered for each category are reasonable. The following discusses in further detail how each of the following costs are reasonable: (1) costs incurred prior to the effective date of the CAT NMS Plan; (2) cloud hosting services costs; (3) costs related to funding model filings; (4) costs related to litigation with the SEC regarding the CAT NMS Plan; (5) costs related to the Initial Plan Processor; (6) CAIS implementation costs; (7) public relations costs; (8) legal costs related to the limitation of liability provision in the CAT Reporter agreements; and (9) costs for the Chair of CAT Operating Committee. As discussed in detail below, each of these costs is reasonable and should be recoverable in accordance with the CAT Funding Model.

(A) Costs Incurred Prior to the Effective Date of CAT NMS Plan

CAT LLC believes that it is reasonable to seek recovery of costs incurred prior to when the CAT NMS Plan became effective in November 2016, such as legal and consulting fees incurred to create the CAT NMS Plan. Rule 613 specifically mandates that the CAT be created, implemented and maintained, and further provides that the CAT NMS Plan include a proposed allocation of estimated costs to fund the creation,

[137] *See supra* note 138 at 10.

[138] *See* Securities Exchange Act Release No. 90405 (November 12, 2020), 85 FR 73544 (November 18, 2020) (the ''2020 Verbal Quotes Exemption'').

[139] *See, e.g.,* Securities Exchange Act Release No. 89051 (June 11, 2020), 85 FR 36631, 36633 (June 17, 2020). The straightforward reading of the Commission's statement is that compliance with the conditions of an exemption will be measured as of the deadline for a particular FAM Period.

[140] As a condition to the 2020 Verbal Quotes Exemption, the Commission required that the Participants provide a written status update on the reporting of these quotes and orders by July 31, 2022, including the estimated costs of reporting these quotes and orders and an implementation plan for the reporting of these quotes and orders. As noted, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3. In any event, on June 3, 2022, the Participants provided the required written status update. *See* Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, SEC, dated June 3, 2022.

[141] *See* Securities Exchange Act Release No. 98848 (November 2, 2023), 88 FR 77128 (November 8, 2023) (the ''November 2023 Order'').

[142] *See* November 2023 Order, 88 FR 77128, 77129 n.13.

[143] *See* FAM Adopting Release, 85 FR 31322, 31335. Section 36 of the Exchange Act grants the Commission the authority to ''conditionally or unconditionally exempt any person, security, or transaction . . . from any provision or provisions of [the Exchange Act] or of any rule or regulation thereunder, to the extent that such exemption is necessary or appropriate in the public interest, and is consistent with the protection of investors.'' 15 U.S.C. 78mm(a)(1). Under Rule 608(e) of Regulation NMS, the Commission may ''exempt from [Rule 608], either unconditionally or on specified terms and conditions, any self-regulatory organization, member thereof, or specified security, if the Commission determines that such exemption is consistent with the public interest, the protection of investors, the maintenance of fair and orderly markets and the removal of impediments to, and perfection of the mechanism of, a national market system.'' 17 CFR 242.608(e).

[144] *See* Section 12.3 of the CAT NMS Plan (''[T]o the extent the SEC grants exemptive relief applicable to any provision of this Agreement, Participants and Industry Members shall be entitled to comply with such provision pursuant to the terms of the exemptive relief so granted at the time such relief is granted irrespective of whether this Agreement has been amended.'')

[145] *See* Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

implementation and maintenance of the CAT among the Participants (referred to as ''plan sponsors''), and between the Participants and Industry Members (referred to as ''members of the plan sponsors'').[146] Consistent with Rule 613, the CAT NMS Plan, as approved by the Commission, specifically authorizes charging Industry Members fees for costs reasonably incurred prior to the date of the approval of the CAT NMS Plan by the Commission in November 2016, including legal and consulting costs. Section 11.1(c) of the CAT NMS Plan states that:

[i]n determining fees on Participants and Industry Members the Operating Committee shall take into account fees, costs and expenses (including legal and consulting fees and expenses) reasonably incurred by Participants on behalf of the Company prior to the Effective Date in connection with the creation and implementation of the CAT.

Accordingly, the CAT NMS Plan specifically permits the recovery of costs, including legal and consulting costs, reasonably incurred prior to November 2016 in connection with the creation and implementation of the CAT.

Furthermore, the costs incurred to create and implement the CAT prior to the effective date of the CAT NMS Plan (''Pre-Formation Costs'') were reasonable both in scope and amount, in accordance with the requirements of Section 11.1(c) of the CAT NMS Plan. During the four-year period from 2012 to 2016, a total of $13,842,881 in Pre-Formation Costs were incurred. This is an average of approximately $3.5 million per year over this period. The Pre-Formation Costs fell into three categories: legal costs, consulting costs and public relations costs. This includes legal costs of $3,196,434; consulting costs of $10,589,273; and public relations costs of $57,174. The legal, consulting and public relations services were performed by WilmerHale, Deloitte and Peppercomm, respectively. The selection considerations and fees for these three firms are described in detail above and are described further below. The Pre-Formation Costs are direct costs of CAT, which have been funded entirely by the Participants through non-interest-bearing notes. The Pre-Formation Costs do not include the significant costs incurred by each of the individual Participants in responding to the adoption of Rule 613.

The Pre-Formation Costs are reasonable and appropriate as they reflect the extensive efforts that were necessary to create the CAT NMS Plan as mandated after the SEC's adoption of Rule 613. As described in more detail below, these efforts included, among other things, developing a plan for selecting the Plan Processor, soliciting and evaluating bids, engaging a diverse set of market participants and the SEC in the development of the Plan, interacting with the SEC in their oversight of the development of the Plan, and seeking appropriate exemptive relief to address areas of concern in Rule 613.[147]

(i) Request for Proposal (''RFP'')

The Participants determined to utilize an RFP to ensure that potential alternative solutions for creating the Plan could be presented and considered, and that a detailed and meaningful cost-benefit analysis could be performed. The SEC supported the use of an RFP, and approved its use as it is described in extensive detail in the CAT NMS Plan.[148]

In the context of the SEC's adoption of Rule 613, commenters urged the Commission to utilize an RFP process to assist in the planning and design of the NMS plan.[149] Specifically, the Commission explained:

In this regard, several commenters suggested that the Commission undergo a RFP or request for information (''RFI'') process to create and implement a consolidated audit trail. Specifically, FIF urged the Commission to perform a RFP process ''to determine the best technical solution for developing a consolidated audit trail.'' FIF suggested that the Commission ''should outline a set of goals and guiding principles they are striving to achieve as part of the adopted CAT filing and leave the determination of data elements and other technical requirements to [an] industry working group.'' Similarly, Direct Edge suggested that Commission staff should form and engage in a working group to develop an RFP for publication by the Commission. DirectEdge explained that an RFP process would facilitate the identification of the costs and benefits of the audit trail, as well as the consideration of a wider range of technological solutions. Further, commenters, including Broadridge Financial Solutions, Inc., a technology provider, also requested more specific information about the audit trail system to better assess the Commission's initial cost estimates and to determine the best approach to the consolidated audit trail.[150]

In response to these comments, the Commission modified Rule 613 to require the Participants to address certain important considerations regarding the features and details of the NMS plan and to extend the timeframe for submission of the CAT NMS Plan by the Participants from the 90 days as originally proposed to 270 days, in part, to accommodate a process that would address these considerations.[151] As the SEC noted, ''[i]n light of the numerous specific requirements of Rule 613, the Participants concluded that publication of a request for proposal ('RFP') was necessary to ensure that potential alternative solutions to creating the consolidated audit trail can be presented and considered by the Participants and that a detailed and meaningful cost/benefit analysis can be performed, both of which are required considerations to be addressed in the CAT NMS Plan.'' [152]

The SEC specifically recognized that the Participants planned to use an RFP when it approved the Selection Plan, and stated that the RFP was a reasonable approach.[153] As the SEC described in its approval order for the Selection Plan, ''[t]he Participants filed the [Selection] Plan to govern how the SROs will proceed with formulating and submitting the CAT NMS Plan—and, as part of that process, how to review, evaluate, and narrow down the bids submitted in response to the RFP ('Bids')—and ultimately choosing the plan processor that will build, operate, and maintain the consolidated audit trail ('Plan Processor').'' [154] After evaluating the Selection Plan, including the use of an RFP process, the Commission stated that it ''believes the

[146] *See, e.g.,* Rule 613(a)(1)(vii)(D).

[147] The Participants described in detail the process for drafting the CAT NMS Plan in its original filing of the CAT NMS Plan. *See* Letter from Mike Simon, on behalf of the Participants of the CAT NMS Plan, to Brent J. Fields, Secretary, SEC, dated September 30, 2014. A non-exclusive list of filings and activities associated with CAT, including certain pre-2016 filings, are available on the SEC's website: *https://www.sec.gov/divisions/marketreg/rule613-info.*

[148] *See* detailed discussion of RFP questions in Appendix C of the CAT NMS Plan, and incorporation of RFP requirements in Appendix D at D–2.

[149] For example, in its comments on proposed Rule 613, FIF suggested ''that the SROs should select the processor through a 'request for proposal.'" *See* Rule 613 Adopting Release, 77 FR 45722, 45785.

[150] *See* Rule 613 Adopting Release, 77 FR 45722, 45738–39.

[151] *See* Rule 613 Adopting Release, 77 FR 45722, 45739.

[152] *See* Securities Exchange Act Release No. 71596 (February 21, 2014), 79 FR 11152, 11152 (February 27, 2014) (''Selection Plan Approval Order'').

[153] *See supra* note 154.

[154] *See* Selection Plan Approval Order, 79 FR 11152, 11153.

[Selection] Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail.'' [155]

On February 26, 2013, the Participants published an RFP soliciting bids from parties interested in serving as the plan processor for the CAT. Initially, 31 firms submitted intentions to bid. In the following months, the Participants engaged with potential bidders with respect to, among other things, the selection process, selection criteria, and potential bidders' questions and concerns. On March 21, 2014, the Participants received ten bids in response to the RFP.

(ii) Selection Plan

On September 4, 2013, the Participants filed with the Commission a national market system plan to govern the process for Participant review of the bids submitted in response to the RFP, the procedures for evaluating the bids, and, ultimately, selection of the plan processor (the ''Selection Plan'').[156] The Commission approved the Selection Plan as filed on February 21, 2014.[157] In approving the Selection Plan, the Commission concluded that ''it is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor.'' [158]

The Selection Plan divided the review and evaluation of bids, and the selection of the plan processor, into various stages. Specifically, pursuant to the Selection Plan, a selection committee reviewed all bids and determined which bids contained sufficient information to allow the Participants to meaningfully assess and evaluate the bids. The ten submitted bids were deemed ''Qualified Bids,'' and so passed to the next stage, in which each bidder presented its bids to the Participants on a confidential basis. On July 1, 2014, after conducting careful analysis and comparison of the bids, the Selection Committee voted and selected a shortlist of six eligible bidders. The Selection Committee determined which shortlisted bidders would be provided the opportunity to revise their bids. After the Selection Committee assessed and evaluated the revised bids, the Selection Committee selected the plan processor via two rounds of voting by the Participants, as described in the Selection Plan.

The Selection Plan established an Operating Committee responsible for formulating, drafting, and filing with the Commission the CAT NMS Plan and for ensuring that the Participants' joint obligations under Rule 613 were met in a timely and efficient manner. In formulating the CAT NMS Plan, the Participants also engaged multiple persons across a wide range of roles and expertise, engaged the consulting firm Deloitte as project manager, and engaged the law firm WilmerHale to serve as legal counsel in drafting the Plan. Within this structure, the Participants focused on, among other things, comparative analyses of the proposed technologies and operating models, development of funding models to support the building and operation of the CAT, and detailed review of governance considerations. Given the complexity and scope of developing the CAT NMS Plan, these efforts were extensive.

When it approved the CAT NMS Plan in 2016, the Commission reiterated its belief that the Selection Plan remains a ''reasonable approach,'' that ''the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor,'' and that ''the process set forth in the Selection Plan should be permitted to continue'':

In approving the Selection Plan, the Commission stated that the Selection Plan is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor. The Commission also found that the Selection Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail. The Commission believes that the process set out in the Selection Plan for selecting a Plan Processor remains a reasonable approach, which will facilitate the selection of Plan Processor through a fair, transparent and competitive process and that no modifications to the Selection Plan are required to meet the approval standard. . . . In response to the comment that offered support for a specific Bidder, the Commission agrees with the Participants that the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor and thus believes that the process set forth in the Selection Plan should be permitted to continue.[159]

(iii) Engagement With Market Participants and SEC

During the process of developing the CAT NMS Plan, the Participants engaged in extensive and meaningful dialogue with market participants and the SEC. To this end, the Participants created a website to update the public on the progress of the CAT NMS Plan, published a request for comment on multiple issues related to the Plan, held multiple public events to inform the industry of the progress of the CAT and to address inquiries, and formed, and later expanded, a DAG to solicit more input from a representative industry group.[160]

The DAG included representatives of Participants and Industry Members and conducted meetings to discuss, among other things, technical and operational aspects the Participants were considering for the Plan. The Participants issued press releases soliciting participants for the DAG, and a wide spectrum of firms was deliberately chosen to provide insight from various industry segments affected by CAT. The DAG meetings included discussions of topics such as option market maker quote reporting, requirements for capturing Customer IDs, timestamps and clock synchronization, reporting requirements for order handling scenarios, costs and funding, error handling and corrections, and potential elimination of systems made redundant by the CAT. From the inception of the DAG through September 2014, the DAG participated in 36 meetings, as well as a variety of DAG subcommittee meetings.

(iv) Request for Exemption From Certain Requirements Under Rule 613

Following multiple discussions between the Participants and both the DAG and the bidders, as well as among the Participants themselves, the Participants recognized that some provisions of Rule 613 would not permit certain solutions to be included in the Plan that the Participants, in coordination with the DAG, determined advisable to effectuate the most efficient and cost-effective CAT. Specifically,

[155] *See* Selection Plan Approval Order, 79 FR 11152, 11159.

[156] *See* Securities Exchange Act Release No. 70892 (November 15, 2013), 78 FR 69910 (November 21, 2013).

[157] *See* Selection Plan Approval Order, *supra* note 154.

[158] *See* Selection Plan Approval Order, 79 FR 11152, 11160.

[159] *See* CAT NMS Plan Approval Order, 81 FR 84696, 84737.

[160] *See* Section D(11) of Appendix C of the CAT NMS Plan.

''the SROs reached the conclusion that additional flexibility in certain of the minimum requirements specified in Rule 613 would allow them to propose a more efficient and cost-effective approach without adversely affecting the reliability or accuracy of CAT Data, or its security and confidentiality.'' [161] Consequently, the Participants submitted a request for exemptive relief from certain provisions of Rule 613 regarding: (1) options market maker quotes; (2) Customer-IDs; (3) CAT-Reporter-IDs; (4) CAT-Order-IDs on allocation reports; and (5) timestamp granularity.[162] The Participants filed two supplements to the request for exemptive relief.[163]

After reviewing the exemptive request, the Commission determined that it was appropriate in the public interest and consistent with the protection of investors to grant the requested exemptive relief.[164] In granting the exemptive relief, the Commission stated:

[T]he Commission is persuaded to provide flexibility in the discrete areas discussed in the Exemption Request so that the alternative approaches can be included in the CAT NMS Plan and subject to notice and comment. Doing so could allow for more efficient and cost-effective approaches than otherwise would be permitted. The Commission at this stage is not deciding whether the proposed approaches detailed below are more efficient or effective than those in Rule 613. However, the Commission believes the proposed approaches should be within the permissible range of alternatives available to the SROs.[165]

The Commission further stated that the requested exemptive relief is consistent with the protection of investors. The Commission noted that:

Doing so will provide the public an opportunity to consider and comment on whether these proposed alternative approaches would indeed be more efficient and cost-effective than those otherwise required by Rule 613, and whether such approaches would adversely affect the reliability or accuracy of CAT Data or otherwise undermine the goals of Rule 613. Moreover, if—as the SROs represent—efficiency gains and cost savings would result from including the proposed approaches in the CAT NMS Plan without adverse effects, then the resultant benefits could potentially flow to investors (*e.g.,* lower broker-dealer reporting costs resulting in fewer costs passed on to Customers).[166]

The Participants incorporated the exemptive relief into the proposed CAT NMS Plan, which was noticed for comment, and the Commission ultimately approved the CAT NMS Plan with the more efficient and cost-effective alternative approaches described in the exemptive relief. Accordingly, the Participants believe that the costs incurred in developing the exemptive request were critical to the creation of a better CAT than was originally contemplated by Rule 613, and therefore should be recoverable as part of Historical CAT Assessment 1A.

(v) Request for Extensions for Filing the CAT NMS Plan

Rule 613(a)(1) under Regulation NMS required the Participants to jointly file the CAT NMS Plan on or before April 28, 2013, less than a year after the adoption of Rule 613. In recognition of the complexity of the project to create the CAT NMS Plan as well as industry interest in limiting or eliminating certain requirements of Rule 613 (*e.g.,* addressing the reporting of options market maker quotes), the Participants requested two extensions of the deadline to file the CAT NMS Plan. The Participants described the need for additional time as follows:

The SROs stated in their Request Letter that they do not believe that the 270-day time period provided for in Rule 613(a)(1) provides sufficient time for the development of the RFP, formulation and submission of bids, and review and evaluation of such bids. The SROs also stated that they believe additional time beyond the 270 days provided for in Rule 613(a)(1) is necessary in order to provide sufficient time for effective consultation with and input from the industry and the public on the proposed solution chosen by the SROs for the creation of the consolidated audit trail at the conclusion of the RFP process and the NMS plan itself.[167]

In recognition of the need for additional time to refine the technical description of and requirements for the CAT and to allow for additional evaluation of the proposed cost and funding considerations, the SEC granted two extensions of this deadline.[168] The SEC determined that both extensions were appropriate, in the public interest, and consistent with the protection of investors.[169] In reaching this conclusion, the Commission stated that ''it understands that the creation of a consolidated audit trail is a significant undertaking and that a proposed NMS plan must include detailed information and discussion about many things.'' [170] The SEC also noted the following:

This additional time to complete the RFP process should allow the SROs to engage in a more thoughtful and comprehensive process for the development of an NMS plan. In this regard, the Commission notes that the additional time to solicit comment from the industry and the public at certain key points in the development of the NMS plan could identify issues that can be resolved earlier in the development of the consolidated audit trail and prior to filing the NMS plan with the Commission.[171]

Given the Commission's recognition of the reasonableness and value of the extension of the deadline to file the CAT NMS Plan, the Participants believe that the costs incurred in developing the extension request were important to the process of developing the CAT NMS Plan, and therefore should be recoverable as part of Historical CAT Assessment 1A.

(vi) Submission and Approval of the CAT NMS Plan

After extensive analyses and discussions with the DAG, bidders, market participants and the SEC staff, the Participants finalized the draft of the CAT NMS Plan and filed the CAT NMS Plan with the SEC on September 30, 2014. Following additional discussions, the Participants filed several amendments to the CAT NMS Plan during 2015 and 2016. With these additional changes, the SEC published the CAT NMS Plan for notice and comment in May 2016.[172] Following the comment period, the SEC approved the Plan in November 2016.[173]

[161] *See* Securities Exchange Release No. 77265 (March 1, 2016), 81 FR 11856, 11856 (March 7, 2016) (''2016 Exemptive Order'').

[162] *See* Letter from Robert Colby, FINRA, on behalf of the SROs, to Brent J. Fields, Secretary, SEC, dated January 30, 2015.

(vii) Legal Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include legal costs of $3,196,434. The legal services were performed by WilmerHale. The selection considerations and fees for WilmerHale were described in detail above. Prior to the creation of CAT LLC, WilmerHale was engaged to represent the consortium of SROs, not the individual Participants. For administrative purposes, FINRA agreed to receive such legal bills, although such costs were shared among the Participants. Therefore, the legal costs incurred with respect to WilmerHale do not include legal costs incurred by the individual Participants. These pre-formation legal costs are described in detail above and are further described below:

- Analyzed various legal matters associated with the Selection Plan and drafted an amendment to Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the DAG;
- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on the CAT NMS Plan;
- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG, and governance support during the transition to the new governance structure under the CAT NMS Plan;
- Drafted exemptive requests;
- Provided interpretations related to the CAT NMS Plan;
- Provided support with regard to discussions among the exchanges, FINRA and other third parties, such as Deloitte;
- Provided tax advice with regard to CAT's status as a tax-exempt organization; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

(viii) Consulting Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include consulting costs of $10,589,273. The consulting services were performed by Deloitte. The selection considerations and fees for Deloitte were described in detail above. Prior to the creation of CAT LLC, for administrative purposes, Deloitte was engaged by FINRA to provide consulting services related to CAT, but the costs were shared by the consortium of SROs per agreement. Therefore, the consulting costs incurred with respect to Deloitte do not include consulting costs incurred by the individual Participants. The pre-formation consulting costs include the following:

- Established and implemented program operations for the CAT project, including the program management office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participants' independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, reviewing technical requirements of other NMS plans, analyzing OATS and CAT requirements, and drafting appendices to the Plan;
- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Provided support for industry outreach sessions, including with regard to program design and agenda development, program support and logistics and coordination; and
- Provided support in fact finding, drafting content and meeting coordination for WilmerHale with regard to the CAT and the development of the CAT NMS Plan.

Such Pre-Formation Costs did not include costs related to the Chair of the CAT NMS Plan Operating Committee, as the CAT NMS Plan had not yet been adopted.

(ix) Public Relations Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include public relations costs of $57,174. The public relations services were performed by Peppercomm. The selection considerations and fees for Peppercomm are described in detail above. The costs related to Peppercomm were shared among the SROs. Therefore, the public relations costs do not include public relations costs incurred by the individual Participants. The pre-formation public relations costs include services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT.

(B) Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs related to cloud hosting services as a part of Historical CAT Assessments. CAT LLC believes that the costs related to cloud hosting services described in detail above are reasonable and appropriate given the strict data processing timelines and storage requirements imposed by the Commission-approved CAT NMS Plan and should be recoverable as a part of Historical CAT Assessment 1A.

(i) Reasonableness of AWS Costs Given the Requirements of the CAT NMS Plan

CAT LLC believes that the costs for the cloud hosting services are reasonable, both in terms of the level of the fees paid by CAT LLC for cloud hosting services provided by AWS and the scope of the services performed by AWS for CAT LLC. CAT LLC believes that both the scope and amount of the costs for cloud hosting services are reasonable given the current requirements of the CAT NMS Plan adopted pursuant to Rule 613, including the strict data processing timeline, storage and other technical requirements under the Commission-approved CAT NMS Plan.

CAT LLC believes that the level of fees for the cloud hosting services is reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.

CAT LLC also believes that the scope of services provided by AWS for the CAT are appropriate given the current requirements of the Commission-approved CAT NMS Plan. As described above, the cloud hosting services costs reflect a variety of factors including, among other things:

- *Breadth of Cloud Activities.* AWS was engaged by FCAT, the Plan Processor, to provide a broad range of

services to the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS necessary to the CAT include storage services, databases, compute services, and other services (such as networking, management tools and development operations (''DevOps'') tools). AWS also was engaged to provide the various environments for CAT, such as the development, performance testing, test and production environments, which are required by the CAT NMS Plan.

• *High Data Volume.* The cost for AWS services for the CAT is a function of the volume of CAT Data. While it is not linear, the greater the amount of CAT Data, the greater the cost of AWS services to the CAT. The data volume handled by AWS now far exceeds the original volume estimates for the CAT.

• *Plan Requirements.* The cost for AWS services also reflects the technical requirements necessary to meet the stringent performance and other requirements for processing CAT Data. These Plan-dictated processing timelines, storage, testing, security and other technical requirements are significant drivers of AWS costs.

• *Cost Avoidance Efforts.* CAT LLC and FCAT have engaged in ongoing efforts to seek to avoid and minimize AWS costs where permissible under the Plan. Accordingly, these cost avoidance efforts have limited the extent of AWS costs.

In addition, various requirements of the CAT NMS Plan adopted pursuant to Rule 613 contribute to the significant cloud hosting services costs, and that various Plan requirements could be amended or removed without affecting the regulatory purpose of the CAT. Indeed, CAT LLC has repeatedly sought exemptive relief and filed amendments to the CAT NMS Plan, and has even filed suit against the Commission, to seek to revise or eliminate certain costly requirements related to the CAT. However, despite these efforts, absent the Commission granting exemptive relief or approving cost savings amendments to the CAT NMS Plan, CAT LLC, the Participants and Industry Members are all required to comply with such requirements.

(ii) Effect of CAT Design on CAT Costs

(a) Efficient CAT Design

CAT is reasonably designed to efficiently and effectively utilize cloud computing and storage services, given the requirements of the Commission-approved CAT NMS Plan, including requirements related to security, operational reliance and quality assurance, and maintainability.

The Plan Processor uses state-of-the-art software that meets the strict security standards of the CAT NMS Plan. CAT utilizes a big data processing framework that is extensively used by large data processing companies, such as Apple, Meta, Netflix, IBM and Google. As such, it has substantial commercial support and support in the open-source community. It is also well suited for use with regard to iterative types of algorithms and query functions and analytics that the CAT requires, and it provides the heightened security necessary for the CAT.

The development and implementation of the design of CAT is not and has not been static. CAT LLC and the Plan Processor are always evaluating new innovations and service offerings from AWS and other providers to seek to maximize efficiency and cost avoidance while still satisfying the requirements of the CAT NMS Plan. These efforts have led to substantial savings to date. The cloud hosting costs for 2023 were less than the cloud hosting costs for 2022 by $8 million despite processing seven trillion more events in 2023 due to the efficiency and cost avoidance efforts for cloud hosting services. For example, when AWS introduced new storage options, FCAT adopted the cost-efficient new storage option after establishing that the new offering would satisfy the security and other standards of the CAT NMS Plan. This change led to millions of dollars of savings in storage costs. Similarly, when AWS introduced a new compute processor, FCAT adopted this new compute processor, which lead to millions of dollars in savings in compute costs. However, in other cases, new cloud technology developments could not be implemented in CAT because they would not satisfy the security or other requirements of the CAT NMS Plan.

When evaluating the design of the CAT, it must be kept in mind that the CAT is not a typical commercial technology project. The ability to make use of technology approaches that may lead to cost avoidance is also subject to the restrictive requirements of the CAT NMS Plan, such as processing timeframes, requirements for retention of data versions, query requirements, and security standards. Because such requirements are set forth in the CAT NMS Plan, any modification of such requirements are subject to the time-consuming process of amending the CAT NMS Plan or seeking an exemption from the relevant requirement. For example, CAT LLC recently has filed an amendment to address several of these expensive Plan requirements.[174]

(b) CAT Was Designed To Minimize Industry Member Effort

The CAT System also was designed to minimize the extent to which Industry Members would need to alter their systems to report to CAT. During the design process, Industry Member groups argued that it would make more sense financially for the CAT to accommodate differences in industry systems, than for all Industry Members to change their systems. Moreover, such design choices would facilitate consistency, uniformity and accuracy in reporting. Requiring the CAT to make such accommodations may increase CAT costs while accommodating CAT Reporters.

Based on the requirements in the CAT NMS Plan and/or in response to industry requests for functionality to be embedded with the Plan Processor to streamline or limit Industry Member system changes, the CAT has been designed to limit the effect on Industry Members. The following provides examples of such accommodations:

• *Industry Member Reporting.* In light of the complexity of Industry Member market activity, the CAT's order reporting and linkage scenarios document for Industry Members is over 800 pages in length, addressing nearly 200 scenarios.[175] The Industry Member Technical Specifications allow for dozens of specific event types, which drive complexity for the Plan Processor, but streamline reporting for Industry Members. Furthermore, the Plan Processor greatly expanded Industry Member linkage requirements to support, among other things, child events and supplemental events, allowing for ''stateless as-you-go'' and ''batch end-of-day'' reporting when all data is available. Accordingly, CAT takes on the significant cost and effort of providing the required linkages between CAT events; correspondingly, Industry Members are not required to perform this costly task.

• *File Submission Process.* The CAT was designed to accommodate the varying needs of CAT Reporters with regard to the file submission process. For example, in a 2018 letter, FIF stated

[174] *See, e.g.,* Securities Exchange Act Release No. 99938 (April 10, 2024), 89 FR 26983 (April 16, 2024); Letter from Brandon Becker, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, SEC, dated March 27, 2024) (proposing amendments to the CAT NMS Plan for $23 million in annual savings).

[175] *See* CAT Industry Member Reporting Scenarios v. *4.10 (Oct. 21, 2022), https://www.catnmsplan.com/sites/default/files/2022-10/10.21.22_Industry_Member_Tech_Specs_Reporting_Scenarios_v4.10_CLEAN.pdf.*

that ''[t]he SFTP-based submission process is cumbersome, exposes industry members to unnecessary complexity, and puts the burden of support on the CAT Reporter rather than imbedding more functionality into the Plan Processor.'' [176] Currently, FCAT provides two mechanisms for submitting files: SFTP via a private network, and the Web via Reporter Web Portal.

• *Error Corrections.* The industry also emphasized the need for the CAT to provide error correction tools and functionalities to identify, rectify and re-submit corrections within the required timeframe. For example, FIF stated in a 2018 letter the following:

To be clear, if OATS-like error correction tools are not made available on Day 1, hundreds of firms will be required to create and test their own tools or obtain vendor alternatives prior to the CAT Go-Live Date. Proprietary tools will require additional system builds, access to and ingestion of CAT data to perform system validation, and testing which will further stress the limited number of subject matter experts (''SMEs'') dedicated to the implementation of CAT reporting. Should this occur, inevitably firms (especially small firms who lack the necessary IT staff to write code and develop proprietary systems), may be put in the position of passing onto investors the cost required to build hundreds of redundant systems.[177]

CAT provides various tools to help Industry Members identify and rectify errors.

• *Data Ingestion Format.* The industry also recommended that CAT adopt a flexible input format that provides an option for Industry Members to submit data in formats that are already in use to reduce costs and potential reporting errors. For example, FIF argued the following:

FIF CAT WG is not proposing a specific format; rather, we are proposing flexibility of input formats which includes support of existing formats (*e.g.,* OATS, FIX) as well as a baseline specification where all fields are defined, and normalized. The input formats must be clearly and thoroughly defined in Technical Specifications, including FAQs.

Mandating a uniform format for reporting data to the CAT simplifies the task for the Central Repository of consolidating/storing data, but it puts the burden on each CAT Reporter to accurately translate their current (*e.g.,* OATS) reporting information into a uniform CAT interface. However, that is likely to yield more errors because it is very dependent on accurate, complete and timely information (Technical Specifications, FAQs, meta-data, competent CAT help desk) available to CAT Reporters, availability of sophisticated CAT test tools to validate interface protocols, and the skill levels of the estimated 300+ unique CAT Reporters/Submitters during Phase 1 of CAT. Concentrating the responsibility of data conversions with the Central Repository is a reasonable trade-off that should yield fewer errors, and greater accuracy.[178]

CAT provides such a flexible input format.

(c) Effect of Initial Plan Processor Design

The costs for cloud hosting services are appropriate and have not been adversely affected by the original design and approaches of the Initial Plan Processor. FCAT's design costs are the result of the requirements of the Commission-approved CAT NMS Plan.

When FCAT took over as the Plan Processor from Thesys, it utilized certain aspects of the technical specifications created by Thesys in its design. However, FCAT has not maintained aspects of the original design that would not be appropriate for the CAT. FCAT revised and enhanced the original technical specifications of the CAT System to increase its efficiency and efficacy, and to ensure its compliance with the CAT NMS Plan. For example, the Initial Plan Processor's approach utilized many more fields than FCAT's approach, which relies on additional linkages. With the additional linkages, the CAT System takes on more of the CAT-related burdens than the Industry Members. Such an approach serves to facilitate consistency, uniformity and accuracy in reporting.

Moreover, FCAT did not utilize the system built by the Initial Plan Processor; it rebuilt the CAT System based on revised technical specifications. For example, the Initial Plan Processor used an on-premises processing approach which was not geared toward the huge amounts of data stored in the CAT, while FCAT adopted a cloud-based solution in response to such data demands.

Furthermore, given the very short timeframe to develop the CAT System and the prior optimization of certain query tools (*e.g.,* Diver) for regulatory use with significant amounts of data, FCAT determined to rely upon certain existing FINRA tools and adapt them for use with the CAT.

(iii) Consideration of AWS Alternatives

CAT LLC continues to support the selection of AWS as the cloud hosting services provider for CAT given the compliance, operational, and security requirements of the CAT. Independent analyses confirm these conclusions, noting that ''AWS is an excellent choice for either strategic or tactical use and recommends considering AWS for almost all cloud IaaS or IaaS+PaaS scenarios.'' [179] AWS provides the following benefits to CAT, among others:

• *Broad Suitability.* AWS has a long track record of successfully serving cloud customers with mission-critical projects.

• *Proven Scalability.* AWS has demonstrated that it is capable of building and delivering services on a large scale.

• *Track Record of Innovation.* AWS continues to rapidly innovate, both in terms of new domains of capability and at a fundamental level, thereby facilitating innovation for its customers.

• *Resiliency/Dependability.* Another benefit of AWS is its resiliency; it has a strong track record of stable services. As noted in a review of cloud service providers, ''[c]ustomers like to have a broad set of options for resilience and for their cloud providers to have a strong track record of stable services (continuously available, without operational quirks). Only AWS fulfills both desires.'' [180]

• *Technical and Customer Support.* AWS consistently provides high-quality technical and customer support and engagement. Given the size, scope and regulatory importance of CAT, customer support and engagement that CAT has with the highest levels of AWS are very important to the success of the CAT.

• *Scale.* AWS is capable of supporting large-scale solutions, which is critical given the size and magnitude of the CAT.

• *Security.* AWS provides the security features necessary for the CAT.

In addition, the nature of the CAT, including the amount of data it must process and the size of its data footprint, does not allow for a multi-cloud solution as this would be cost

[176] *See* Letter from Janet Early, FIF, to Thesys CAT, dated March 29, 2018.

[177] *See* Letter from Christopher Bok, FIF, to Jay Clayton, Chair, SEC, dated December 11, 2018, at 4.

[178] *See* Letter from Mary Lou Von Kaenel, Managing Director, FIF, to Brent Fields, Secretary, SEC, dated July 18, 2016, at 92, *https://www.sec.gov/comments/4-698/4698-13.pdf.*

[179] *See, e.g.,* Lydia Leong & Adrian Wong, Solution Comparison for Strategic Cloud Integrated IaaS and PaaS Providers (July 28, 2023) (''Strategic Cloud Assessment Article'').

[180] *See supra* note 181.

prohibitive and greatly increase the security boundary and associated risk profile of the CAT. For example, a multi-cloud hosting option would increase costs, complexity, and risk for operations with regard to, for example, DevOps, production support, and networking. Similarly, with regard to security, a multi-cloud solution would increase risk, including with regard to the need for data transfers between cloud providers and the expansion of the security boundary. With regard to labor, a multi-cloud solution would lose economies of scale due to the need to support unique cloud requirements. Accordingly, the use of a single-cloud solution continues to provide advantages with regard to cost, complexity, and risk. Indeed, ''[t]he best practice is to focus on a single primary strategic provider.'' [181]

Furthermore, if another cloud service provider were determined to be a better match for the CAT at some future date, switching cloud service providers would be a very significant, expensive and time-consuming effort. Such an effort would likely be a 10-to-15-year commitment at a substantial expense. Such a move would require the replication or redesign of the underlying cloud environments (*e.g.,* organizational setup, identify management, accounts, environments, DevOps tooling likes release management/config management/network management), as the new provider likely would not have the same infrastructure and software. Once that process has been completed, an exabyte of CAT data would need to be securely migrated to the new platform.

(C) Funding Model Filings

CAT LLC believes that the recovery of costs related to the development of the funding model is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

Funding the CAT is a critical aspect of Rule 613 and the CAT NMS Plan. Article XI of the CAT NMS Plan describes in detail the requirements for funding the CAT, and the Participants are required to comply with and enforce compliance with the funding requirements of the CAT NMS Plan, just as with other aspects of the Plan. Accordingly, the development and implementation of a funding model for the CAT is as much a part of the requirements of the CAT NMS Plan as the development and operation of the CAT System. CAT LLC sees no reason to distinguish the efforts to develop a funding model from, for example, efforts to develop the CAT System, in seeking to recover reasonable CAT costs.

Moreover, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . legal costs.'' [182] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . legal . . . costs.'' [183] In keeping with these provisions, this filing provides a brief description of reasonably budgeted legal costs above. These legal costs include costs related to the development of the CAT Funding Model.

In addition, the legal costs incurred for the assistance in developing the CAT Funding Model are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. As described above, the specialized services were performed by experienced counsel at negotiated rates for such services that reflect both the extent of the services and market rates. Moreover, the scope of the legal costs associated with the development of the funding model reflect the complexity of the task in satisfying the detailed requirements of the CAT NMS Plan, the standards of the Exchange Act, and the many perspectives of the different market constituents potentially affected by or interested in the funding model, including Industry Members, Participants and investors. The many and varied comments by market participants on CAT funding over the years demonstrate the complexity of the task.

(D) Costs Related to Litigation With the SEC

CAT LLC believes that the recovery of legal costs related to the litigation with the SEC regarding the CAT NMS Plan is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.[184] Moreover, CAT LLC initiated such litigation, and incurred the related legal costs, because it was critical to address the Commission's interpretations of the CAT NMS Plan. Among other things, such interpretations threatened to impose unnecessary costs on the CAT, which would be borne by the Participants and Industry Members. Indeed, in response to the litigation, the Commission provided exemptive relief that allowed alternative, more cost-effective approaches to the implementation of the CAT. Specifically, in the 2023 exemptive order, the Commission stated:

The conditional exemptive relief in this Order allows for the implementation of alternative regulatory solutions that continue to advance the regulatory goals that Rule 613 and the CAT NMS Plan were intended to promote, while reducing the implementation and operational costs, burdens, and/or difficulties that would otherwise be incurred by the Participants and Industry Members that must fund the CAT.[185]

CAT LLC believes it is reasonable and appropriate to incur costs to limit the need to incur even greater costs due to certain interpretations of the Plan.

In addition, the legal costs incurred during the litigation are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. As described above, the specialized services were performed by experienced counsel at market rates for such services. As such, the legal costs related to this litigation incurred during the period covered by Historical CAT Assessment 1A were reasonable.

Finally, Industry Members will directly benefit from the result of the litigation because it has addressed CAT NMS Plan requirements that would have imposed significantly greater costs on the CAT. Accordingly, it is reasonable and appropriate that the costs of such litigation be included in Historical CAT Costs 1.

(E) Costs Related to the Initial Plan Processor

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017, which was the date by which Participants were required to begin reporting to the CAT, due to the delay in the commencement of reporting to the CAT. As discussed above, the Participants determined to exclude all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes $37,852,083 in Thesys

[181] *See supra* note 181.

[182] *See* Section 11.1(a)(i) of the CAT NMS Plan.

[183] *See* Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[184] *See* Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[185] *See* Settlement Exemptive Order, 88 FR 77128, 77129–30.

costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Thesys costs incurred after November 15, 2018 are the $19,628,791 in capitalized developed technology costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these $19,628,791 in costs.

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. CAT LLC notes that the development and implementation of the CAT System, while unprecedented in scope and design, is like any other large and innovative technology project in that, inevitably, there were adjustments and refinements in the technical approach as the project developed, even with substantial planning efforts and oversight prior to the build. This is even more likely when the project faces a very tight implementation schedule, such as the one imposed by the Commission in Rule 613 and the CAT NMS Plan. However, an adjusted approach does not mean that the funds were not valid expenditures and should not be recovered.

The reasonableness of Thesys costs should be evaluated by the Commission as of the time they were incurred, not in hindsight. As detailed above, the Commission concluded in 2016 that ''the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor,'' and that ''the process set forth in the Selection Plan should be permitted to continue.'' [186] Following this process, the Participants notified the Commission of the selection of Thesys as the Initial Plan Processor on January 17, 2017.[187] At the time, neither the Commission nor the industry argued that the selection of the Initial Plan Processor was unreasonable or otherwise inconsistent with the CAT NMS Plan, nor did they predict the selection would result in unanticipated delays in the implementation of the CAT System. On the contrary, on April 4, 2017, the President of SIFMA wrote that ''SIFMA looks forward to commencing work with the SROs and Thesys.'' [188]

As noted in the CAT Funding Model Approval Order, the Commission recognized that ''[t]he CAT NMS Plan contemplates that the costs of the CAT are to be allocated between the Participants and Industry Members.'' [189] If the CAT Funding Model had existed on Day 1, the risk of any unanticipated costs or challenges associated with the Initial Plan Processor would have been fairly and reasonably shared among the Participants and Industry Members on an ongoing basis. Given that the Commission concluded in 2012 that the costs of the CAT would be shared by the Participants and Industry Members, it is not fair or reasonable to determine in hindsight that all of the risk involved in developing the CAT should be allocated entirely to the Participants.

(F) CAIS Implementation Costs

CAT LLC believes that the recovery of CAIS-related costs is appropriate, and that the amount and scope of such costs, as described above, are reasonable, and that the reasonableness of historical costs should be evaluated by the Commission as of the time they were incurred, not in hindsight.

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable CAIS operating costs as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . CAIS operating fees.'' [190] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . CAIS operating fees.'' [191] In keeping with these provisions, this filing provides a brief description of reasonably budgeted CAIS operating fees.

In addition, CAT LLC determined that the CAIS operating fees described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. The ''CAIS Operating Costs'' for Historical CAT Costs 1 total $9,480,587, with Pre-FAM costs of $2,072,908, FAM 1 costs of $254,998, FAM 2 costs of $1,590,298, and FAM 3 costs of $5,562,383. As described above, the CAIS operating fees were incurred with regard to two categories of CAIS-related efforts: (1) the acceleration of the reporting of LTIDs; and (2) the development of the CAIS Technical Specifications and the building of CAIS. These two categories of costs are discussed in more detail below.

(i) LTID Reporting

During the period covered by Historical CAT Assessment 1A, the CAIS operating costs included costs related to the acceleration of the reporting of LTIDs earlier than originally contemplated during this period at the request of the SEC and in accordance with exemptive relief granted by the SEC.[192] As the SEC approved in this exemptive relief, the Participants proposed ''to require the reporting of LTIDs to the CAT in Phases 2c and 2d, instead of with the rest of Customer Account Information in Phase 2e, which potentially could result in an earlier elimination of broker-dealer recordkeeping, reporting and monitoring requirements of the Large Trader Rule.'' [193] To implement the reporting of LTIDs to the CAT, the following steps were taken during the period covered by Historical CAT Assessment 1A:

- After FCAT developed the LTID Technical Specifications, the LTID Technical Specifications were published on January 31, 2020, with additional updates provided to the LTID Technical Specifications through April 2021.[194]
- The LTID account information testing environment opened on August 24, 2020.
- The LTID account information reporting production environment opened on December 14, 2020.
- CAT Reporters were required to request their production readiness certification for account information related to LTIDs by the deadline of April 9, 2021.
- The LTID account information reporting for Phases 2a, 2b and 2c for Large Industry Members went live on April 26, 2021.
- The LTID account information reporting for Phases 2d for Large Industry Members went live on December 13, 2021.

[194] The LTID Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (*https://www.catnmsplan.com/specifications/im*).

• The LTID account information reporting for Phases 2a, 2b, 2c and 2d for Small Industry Members went live on April 26, 2021.

Throughout this project, FCAT and CAT LLC worked closely with the industry on LTID and CAIS reporting. Between December 2019 and December 2021, at least 57 checkpoint calls, webinars, and technical working group meetings with industry representatives were hosted to address issues and to educate CAT Reporters regarding LTID and CAIS reporting.[195]

The LTID reporting project was successfully completed in a timely fashion, and the fees related to the project were reasonable. Accordingly, CAT LLC appropriately seeks to recover such costs via Historical CAT Assessment 1A.

(ii) CAIS Reporting

During the period covered by Historical CAT Assessment 1A, FCAT began the development of the full CAIS Technical Specifications and the building of CAIS. The CAIS Technical Specifications were developed during this period as follows:

• Iterative drafts of the CAIS Technical Specifications were published on June 30, 2020, December 1, 2020, and January 1, 2021.[196]

• The full, final CAIS Technical Specifications were published on January 29, 2021.

• Updated versions of the CAIS Technical Specifications were published throughout 2021.[197]

As discussed above, FCAT and CAT LLC frequently engaged with the industry regarding the development of CAIS, hosting regular checkpoint calls, webinars, and technical working group meetings with industry representatives to address any issues, including addressing the interplay between Industry Members' existing customer systems and CAIS, and to educate CAT Reporters regarding LTID and CAIS reporting. Such engagement was critical to the CAIS development process as the CAIS project was unprecedented in terms of its content, scope and complexity.

During this period, FCAT also commenced the building of the CAIS system in accordance with the CAIS Technical Specifications during the period covered by Historical CAT Assessment 1A. The CAIS system was ready for industry testing shortly after the end of this period in January 2022.

The CAIS Technical Specifications and the CAIS system, as developed during this period, continue to be used. Industry Members have been required to report, and have continuously reported, required data to CAIS on a daily basis since November 7, 2022, consistent with interim reporting obligations. The CAIS system accepts and validates the CAIS data submitted by Industry Members and provides Industry Members with initial feedback on data errors. In light of the unprecedented nature of the CAIS system, certain changes to the system, such as changes related to error corrections and the CAIS regulatory portal, were necessary to finalize CAIS reporting. FCAT worked to address these remaining issues,[198] and, as of May 31, 2024, FCAT indicated that it had achieved the final CAIS reporting milestone. Accordingly, CAT LLC appropriately seeks to recover CAIS operating costs via Historical CAT Assessment 1A.

(G) Public Relations Costs

CAT LLC believes that the recovery of public relations costs is appropriate and that the amount and scope of such costs, as described above, are reasonable.

The Commission has long recognized that external public relations costs are reasonably associated with creating, implementing and maintaining the CAT. In the CAT NMS Plan Approval Order, the Commission estimated that the Participants had collectively spent approximately $2,400,000 in preparation of the CAT NMS Plan on external public relations, legal, and consulting costs, and estimated that the Participants would continue to incur external public relations costs associated with maintaining the CAT upon approval of the CAT NMS Plan.[199]

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for public relations services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . public relations costs.'' [200] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . public relations costs.'' [201] In keeping with these provisions, a brief description of reasonable public relations costs are described above.

In addition, CAT LLC determined that the public relations costs described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. The services performed by the public relations firms through 2021 were limited in scope to assist CAT LLC, which has no employees of its own, to be better positioned to understand and address CAT matters to the benefit of all market participants and to communicate on important CAT topics with the public. In addition, the costs for these services were appropriately limited. During the 10-year period covered by Historical CAT Assessment 1A, the average cost per year for these services was approximately $36,000.

(H) Legal Costs Related to the Limitation of Liability Provision in CAT Reporter Agreements

CAT LLC believes that the recovery of legal costs related to the limitation of liability provision, including costs related to the proceedings before the SEC and costs related to the proposed amendment to the Consolidated Audit Trail Reporter Agreement and the Consolidated Audit Trail Reporting Agent Agreement (the ''Reporting Agreements'') is appropriate and that the amount and scope of such costs as described above are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.[202] In addition, CAT LLC determined that the legal costs incurred for the assistance with regard to the limitation of liability provisions are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A.

Moreover, it is critical that CAT LLC, which has no employees of its own, have the ability to fund a legal defense in litigation and other legal proceedings against it. In response to CAT LLC requiring Industry Members to agree to the limitation of liability provision to submit data to the CAT, SIFMA filed an application for review of actions taken by CAT LLC and the Participants

[195] Such contact points with the industry are described in detail on the Events web page of the CAT website (*https://www.catnmsplan.com/events*).

[196] The CAIS Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (*https://www.catnmsplan.com/specifications/im*).

[197] Six updated versions of the CAIS Technical Specifications were published during 2021, in March, May, June, August, October and December.

[198] *See, e.g.,* CAT Q4 2023 Quarterly Progress Report (January 30, 2024), *https://www.catnmsplan.com/sites/default/files/2024-01/CAT-Q4-2023-QPR.pdf.*

[199] *See* CAT NMS Plan Approval Order, 81 FR 84696, 84917–18.

[200] *See* Section 11.1(a)(i) of the CAT NMS Plan.

[201] *See* Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[202] *See* Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

pursuant to Sections 19(d) and 19(f) of the Exchange Act. Contemporaneously with the filing of this proceeding, SIFMA moved for a stay of the requirement that Industry Members sign a Reporter Agreement, or in the alternative, asked the Commission to further delay the launch of CAT reporting on June 22, 2020. CAT LLC must have the resources to defend itself from litigious actions by others, like these.

Although a limitation of liability provision ultimately was not adopted as proposed, it was a reasonable provision to propose for the CAT Reporter Agreements, given that such provisions are in accordance with industry norms. Limitations of liability are ubiquitous within the securities industry and have long governed the economic relationships between self-regulatory organizations and the entities that they regulate. For example, U.S. securities exchanges have adopted rules to limit their liability for losses that Industry Members incur through their use of exchange facilities.[203] Similarly, FINRA's former order audit trail, OATS, which has functioned as an integrated audit trail of order, quote, and trade data for equity securities, required FINRA members to acknowledge an agreement that includes a limitation of liability provision.[204] In addition, such a provision was intended to ensure the financial stability of the CAT. Accordingly, it was reasonable for CAT LLC to propose the use of such a provision.[205]

Furthermore, as described above, the specialized services were performed by experienced counsel at market rates for such services. Accordingly, the legal costs for the efforts related to the limitation of liability provision were reasonable.

(I) Costs for the Chair of the CAT Operating Committee

CAT LLC believes that the recovery of consulting costs related to the Chair of the CAT Operating Committee is appropriate and that the amount and scope of such costs are reasonable.

As a preliminary matter, the selection of the Chair of the Operating Committee complies with the requirements of Section 4.2 of the CAT NMS Plan. The initial Chair that served during the period covered by Historical CAT Assessment 1A was designated by a Participant as the Participant's alternate voting member. Accordingly, the Chair is a representative of the Participants, as required by the CAT NMS Plan.

In addition, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for consulting as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . consulting . . .'' costs.[206] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . consulting'' [207] costs. In keeping with these provisions, a brief description of reasonable consulting costs is included in this filing, and such reasonable consulting costs include the costs related to the Chair position.

The Participants determined that the position of the Chair was a critical role for the implementation of the CAT, and an independent Chair would appropriately consider and address the views of each of the Participants. The Participants also determined that it was important to have a Chair with a strong background regarding issues related to the regulatory obligations of self-regulatory organizations, including their obligations under national market system plans. The compensation paid to the Chair is appropriate for a person with such background and skills. The average annual amount paid to the Chair from 2017 through the end of FAM 3 was $292,733.30. Separate from the Chair, CAT LLC relies upon a Leadership Team of representatives of the SROs to oversee the day-to-day implementation of the CAT NMS Plan. CAT LLC does not compensate any member of the Leadership Team.

(11) Fee Implementation Assistance for Industry Members

(A) Reconciliation of CAT Invoices

(i) Reconciliation of CAT Invoices to Underlying Trades Provided by CAT

CAT LLC understands that there are three types of reconciliation processes related to the invoices:

- *Reconciliation of CAT Invoices to Underlying Trades:* Reconciling the CAT invoice amount to the underlying trades provided by CAT;
- *Matching Trades to Books and Records:* Providing the means to match the underlying trades provided by CAT with CAT invoices to other books and records independently maintained by individual CAT Reporters (*e.g.,* exchange trade journals/ acknowledgements) and data sources of self-regulatory organizations independent of CAT; and
- *Order Originator Identification:* Providing the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices, which would facilitate firms' ability to pass through CAT Fees to their customers.

As discussed further below, CAT LLC only considers the first type of process to be a ''reconciliation'' and the only type of process that is required under the CAT NMS Plan. CAT LLC provides the means to reconcile the CAT invoice amount to the underlying trades provided by CAT.

The CAT NMS Plan does not require CAT LLC to facilitate the second type of process: matching underlying trades for a CAT invoice with a firm's internal books and records. CAT LLC has access only to the underlying trades provided by CAT; it does not have access to a firm's internal books and records. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

The CAT NMS Plan also does not require CAT LLC to provide the ability to identify the order originator for the underlying trades for the CAT invoices. Accordingly, the billing guidance and processes do not provide CAT Reporters with the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices. CAT LLC has been working closely with CAT Reporters to explain its billing approach and to address any outstanding billing questions. But, it should not be lost that CAT LLC provides information sufficient to allow CAT Reporters to reconcile CAT invoice amounts with the underlying trades provided by CAT LLC.

[203] *See, e.g.,* NASDAQ Equities Rule 4626.

[204] FINRA Rule 1013(a)(1)(R) requires all applicants for FINRA Membership to acknowledge the FINRA Entitlement Program Agreement and Terms of Use, which applies to OATS. Industry Members click to indicate that they agree to its terms—including its limitation of liability provision—every time they access FINRA's OATS system to report trade information (*i.e.,* repeatedly over the course of a trading day for many Industry Members).

[205] *See* Letter from Michael Simon, Chair, CAT Operating Committee, to Vanessa Countryman, Secretary, SEC, dated December 18, 2020.

[206] *See* Section 11.1(a)(i) of the CAT NMS Plan.

[207] *See* Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

(ii) Match the Underlying Trades Provided by CAT With CAT Invoices to Firms' Internal Books and Records Independent of CAT

The CAT NMS Plan does not require CAT LLC to facilitate the matching of underlying trades for a CAT invoice with a firm's internal books and records, which may consist of trading data from various sources external to CAT. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

In this regard, it is important to recognize that CAT LLC has developed a billing approach that greatly improves upon existing billing practices for similar regulatory fees (*e.g.,* fees related to Section 31). Accordingly, with the additional information voluntarily provided by CAT LLC, CAT Reporters generally will have sufficient information to match their underlying trades provided by CAT with their own internal books and records that are independent of CAT or to SRO data that is independent of CAT data. However, CAT LLC emphasizes that providing such additional information is not required by the CAT NMS Plan.

To facilitate the introduction of CAT fees, CAT LLC has worked with FCAT to develop an approach to CAT billing that is consistent with existing billing constructs used with regard to Section 31-related sales values fees, subject to certain enhancements. Under this billing approach, FCAT is providing additional linkage elements, not necessarily provided in the Section 31-sales value fee context, to facilitate CAT Reporters' ability to match the underlying trades provided by CAT with their internal books and records and to reduce the complexity of that process. Specifically, FCAT is providing various key elements of the trade itself, such as the tradeID and branch sequence,[208] to CAT Reporters in the trade billing details provided with their CAT invoices (''Additional Trade Details''). As a result, CAT Reporters now have numerous alternative methods for matching a trade with their internal books and records where they previously did not have such matching methods in other fee contexts.

With the Additional Trade Details, CAT LLC and FCAT believe that the overwhelming majority of underlying trades provided by CAT bills can be matched with a CAT Reporter's internal books and records. CAT LLC recognizes that there may be certain cases in which such matching is more difficult given various firm-specific considerations, but believes that such instances are significantly more limited than with regard to the SRO fees charged in relation to Section 31.[209] By providing Additional Trade Details that are not available in other fee contexts, FCAT enhances the Industry Members' ability to match the underlying trades provided with CAT invoices with books and records and SRO data, both of which are independent of CAT data.

(iii) CAT LLC is Not Required To Facilitate CAT Reporters' Ability To Pass Through Fees to Their Customers

Similar to other regulatory fees, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Accordingly, Historical CAT Assessment 1A does not address the process by which any CAT Reporters may pass through the fee to their customers. Likewise, the CAT billing approach provided by the Plan Processor is designed to address the needs of CAT Reporters with regard to the reconciliation of CAT invoices with the underlying trades provided by CAT LLC with the invoices; they are not designed to address issues related to any pass-through fees. Accordingly, facilitating CAT Reporters' ability to pass through fees to their clients is outside the scope of this fee filing. Nevertheless, as described below, CAT LLC and the Plan Processor have expended significant efforts to provide technical assistance to Industry Members regarding the implementation of Historical CAT Assessment 1A, including providing Additional Trade Details that provide significant details about each underlying trade.

(a) Originating Brokers Versus Executing Brokers

In its approval of the CAT Funding Model, the Commission approved charging CAT fees to the CAT Executing Broker, rather than the originating broker. This fee filing must comply with the requirements of the CAT Funding Model, and, therefore, charges the Historical CAT Assessment 1A to CAT Executing Brokers.

Moreover, charging originating brokers would introduce significant complexity to the billing process from the CAT's perspective, and would increase the costs of implementing CAT fees. Charging the CAT Executing Broker is simple and straightforward, and leverages a one-to-one relationship between billable events (trades) and billable parties, similar to other transaction-based fees. In contrast, for a single trade event, there may be many originating brokers, and each trade must be broken down on a pro-rata basis, to account for one or more layers of aggregation, disaggregation, and representation of the underlying orders. While CAT is indeed designed to capture and unwind complex aggregation scenarios, the data and linkages are structured to facilitate regulatory use, and not a billing mechanism that assesses fees on a distinct set of executed trades; it is not simply a matter of using existing CAT linkages. Furthermore, charging originating brokers would implicate issues related to lifecycle linkage rates, and issues related to corrections, cancellations and allocations, while charging CAT Executing Brokers would avoid such issues.

(b) Identification of Order Originator for Underlying Trades

As noted, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT Fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Nevertheless, the Additional Trade Details provided with regard to the underlying trades on CAT invoices may assist with this process. Like with Section 31-related sales value fees, however, it is not always possible to trace every fee on a transaction back to the originating party. However, with the Additional Trade Details provided under the CAT billing approach, in many cases, CAT Reporters will be able to identify the order originator for the underlying trades provided by CAT with CAT invoices. In some cases, CAT

[208] *See* CAT Technical Specifications for Billing Trade Details; Trade Details Schema, *https://catnmsplan.com/sites/default/files/2024-02/02.05.24-Billing-Trade-Details-Schema.json;* CAT Billing Scenarios, Version 1.0 (November 30, 2023), *https://www.catnmsplan.com/sites/default/files/2024-01/01.12.2024-CAT-Billing-Scenarios-v1.0.pdf.*

[209] For years, broker-dealers have faced similar reconciliation issues with regard to SRO fees related to Section 31. Broker-dealers have responded to this issue in the Section 31 context by exercising their discretion as to whether and the manner and extent to which they pass on those fees (*e.g.,* by rounding up its fees to the nearest cent, or decide to charge for, or not charge for, certain transactions, or assess a specific fee or incorporate the costs into other fee programs). *See, e.g.,* Securities Exchange Act Release No. 49928 (June 28, 2004), 69 FR 41060, 41072 (July 7, 2004) (noting that broker-dealers may ''over-collect'' Section 31-related fees charged to their clients due to rounding practices, and double-counting with regard to certain transactions).

LLC believes that certain issues related to certain types of market activity may implicate CAT Reporters' ability to identify the order originator for a limited set of underlying trades for the CAT invoices. Although CAT LLC does not believe that it is required to address these issues, CAT LLC and FCAT have been carefully researching and analyzing these types of issues as they are identified, and have been working voluntarily to assist CAT Reporters with these issues as necessary and when possible. In addition, CAT LLC intends to continue to provide CAT Reporters with billing guidance through FAQs, CAT Alerts and Helpdesk responses to address outstanding billing questions.

(B) Significant Technical Assistance

CAT LLC has worked with FCAT to provide significant technical assistance to Industry Members to allow the Industry Members to understand how Historical CAT Assessments will be implemented and billed, including webinars, CAT alerts, mock invoices, and responses to questions posed to the FCAT Help Desk.

• *Technical Specifications and Scenarios.* CAT LLC has provided detailed technical documentation for CAT billing, including (1) technical specifications, which describe the CAT Billing Trade Details Files associated with monthly CAT invoices, including detailed information about data elements and file formats as well as access instructions, network and transport options; [210] (2) trade details schemas; [211] and (3) CAT billing scenarios.[212]

• *Industry Webinars.* CAT LLC has hosted two industry webinars specifically dedicated to CAT billing. The first webinar, hosted on September 28, 2023, discussed the operational implementation of the CAT Reporter billing process.[213] The second webinar, hosted on November 7, 2023, provided (1) a demonstration of the CAT Reporter Portal and how to access CAT billing documents, including CAT invoices; and (2) additional information on underlying trade details in relation to the CAT Reporter billing process and an overview of the CAT Contact Management System.[214] 485 participants and 394 participants attended the two webinars, respectively.

• *CAT Alert.* CAT LLC has published a detailed CAT Alert that describes how FCAT, as the Plan Processor acting on behalf of CAT LLC, will calculate applicable fees, issue invoices to and collect payment from CAT Executing Brokers.[215]

• *Frequently Asked Questions (FAQs).* CAT LLC also has continued to engage with the industry on billing issues by making responses to billing FAQs available on the CAT website. The FAQs address a broad range of frequently asked questions, including, for example, which Industry Members will receive invoices, how fees are calculated, when and how fees are required to be paid, how to access invoices, and how to update the billing contact. To date, responses to 31 FAQs are available on the CAT website, and CAT LLC will provide additional responses to FAQs as warranted.[216]

• *Substantial Past Experience with CAT Billing Processes.* To date, CAT LLC, via FCAT, has billed Industry Members for Historical CAT Assessment 1 and certain Prospective CAT Fees. Industry Members will be billed for Historical CAT Assessment 1A via the same processes established for Historical CAT Assessment 1 and the Prospective CAT Fees. Accordingly, Industry Members have substantial experience with the CAT billing processes.

• *Help Desk Assistance.* CAT LLC also provides detailed, individualized assistance to Industry Members regarding CAT fees and the billing process through the FCAT Help Desk.[217] For example, the Help Desk assisted with 406 cases related to the billing of CAT fees from July 2023 through March 2024.

By providing such detailed and sustained assistance to Industry Members regarding CAT fees and billing, CAT LLC has successfully addressed questions raised by Industry Members regarding the CAT fees and billing processes.

(C) Notice to Industry Members

In keeping with past practice, CAT LLC provided notice of the proposed Historical CAT Assessment 1A via CAT Fee Alert on April 1, 2026,[218] one month prior to the effective date of Historical CAT Assessment 1A on May 1, 2026. Such notice provides Industry Members with sufficient time to address any technological or other requirements necessary for implementing Historical CAT Assessment 1A.

FINRA has filed the proposed rule change for immediate effectiveness.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with Section 15A(b)(6) of the Act,[219] which requires, among other things, that FINRA rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. FINRA also believes that the proposed rule change is consistent with the provisions of Section 15A(b)(5) of the Act,[220] which requires, among other things, that FINRA rules provide for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system that FINRA operates or controls. FINRA further believes that the proposed rule change is consistent with Section 15A(b)(9) of the Act,[221] which requires that FINRA rules not impose any burden on competition that is not necessary or appropriate. Section 15A(b)(2) of the Act also require that FINRA be ''so organized and [have] the capacity to be able to carry out the purposes'' of the Act and ''to comply, and . . . to enforce compliance by its members and persons associated with its members,'' with the provisions of the Exchange Act.[222]

FINRA believes that this proposed rule change is consistent with the Act because it implements provisions of the Plan and is designed to assist FINRA in meeting regulatory obligations pursuant to the Plan. In approving the Plan, the SEC noted that the Plan ''is necessary

[210] *See* CAT Technical Specifications for Billing Trade Details, Version 1.0 r1, December 8, 2023, *https://catnmsplan.com/sites/default/files/2023-12/12.07.2023-CAT-Techical-Specifications-for-Billing-Trade-Details-v1.0r1_CLEAN.pdf.*

[217] The CAT NMS Plan requires that the Plan Processor ''staff a CAT help desk, as described in Appendix D, CAT Help Desk, to provide technical expertise.'' Section 6.10(c)(vi) of the CAT NMS Plan. *See also* Section 10.3 of Appendix D of the CAT NMS Plan for a description of the Plan requirements for the CAT Help Desk.

[218] *See* CAT Fee Alert 2026–1 (April 1, 2026), *https://www.catnmsplan.com/sites/default/files/2026-04/04.01.26-CAT-Fee-Alert-2026-1.pdf.*

[219] 15 U.S.C. 78*o*–3(b)(6).

[220] 15 U.S.C. 78*o*–3(b)(5).

[221] 15 U.S.C. 78*o*–3(b)(9).

[222] *See* 15 U.S.C. 78*o*–3(b)(2).

and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.'' [223] To the extent that this proposed rule change implements the Plan and applies specific requirements to Industry Members, FINRA believes that this proposed rule change furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Act.

FINRA also believes that the proposed fees paid by the CEBBs and CEBSs are reasonable, equitably allocated and not unfairly discriminatory. FINRA has already incurred development and implementation costs and the proposed Historical CAT Assessment 1A fees, therefore, would allow FINRA to collect certain of such costs in a fair and reasonable manner from Industry Members, as contemplated by the CAT NMS Plan.

The proposed Historical CAT Assessment 1A fees would be charged to Industry Members in support of the maintenance of a consolidated audit trail for regulatory purposes. The proposed fees, therefore, are consistent with the Commission's view that regulatory fees be used for regulatory purposes. The proposed fees would not cover FINRA services unrelated to the CAT. In addition, any surplus would be used as a reserve to offset future fees.

As further discussed below, the SEC approved the CAT Funding Model, finding it was reasonable and that it equitably allocates fees among Participants and Industry Members. Thus, FINRA believes that the proposed fees adopted pursuant to the CAT Funding Model approved by the SEC are reasonable, equitably allocated and not unfairly discriminatory.

(1) Implementation of CAT Funding Model in CAT NMS Plan

Section 11.1(b) of the CAT NMS Plan states that ''[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.'' Per Section 11.1(b) of the CAT NMS Plan, FINRA has filed this fee filing to implement the Industry Member CAT fees included in the CAT Funding Model. FINRA believes that this proposed rule change is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model in the CAT NMS Plan, and is designed to assist FINRA and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan ''is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.'' [224] Similarly, in approving the CAT Funding Model, the SEC concluded that the CAT Funding Model met this standard.[225] As this proposed rule change implements the Plan and the CAT Funding Model described therein, and applies specific requirements to Industry Members in compliance with the Plan, FINRA believes that this proposed rule change furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

(2) Calculation of Fee Rate for Historical CAT Assessment 1A Is Reasonable

The SEC has determined that the CAT Funding Model is reasonable and satisfies the requirements of the Exchange Act. Specifically, the SEC has concluded that the method for determining Historical CAT Assessments as set forth in Section 11.3 of the CAT NMS Plan, including the formula for calculating the Historical Fee Rate, the identification of the parties responsible for payment and the transactions subject to the fee rate for the Historical CAT Assessment, is reasonable and satisfies the Exchange Act.[226] In each respect, as discussed above, Historical CAT Assessment 1A is calculated, and would be applied, in accordance with the requirements applicable to Historical CAT Assessments as set forth in the CAT NMS Plan and, therefore, is reasonable and consistent with the Exchange Act. Calculation of the fee rate for Historical CAT Assessment 1A requires the figures for the Historical CAT Costs 1, the executed equivalent share volume for the prior twelve months, the determination of Historical Recovery Period 1A, and the projection of the executed equivalent share volume for Historical Recovery Period 1A. Each of these variables is reasonable and satisfies the Exchange Act, as discussed throughout this filing.

(A) Historical CAT Costs 1

The formula for calculating a Historical Fee Rate requires the amount of Historical CAT Costs to be recovered. Specifically, Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan requires a fee filing to provide:

a brief description of the amount and type of the Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.

In accordance with this requirement, FINRA has set forth the amount and type of Historical CAT Costs 1 for each of these categories of costs above.

Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan also requires that the fee filing provide ''sufficient detail to demonstrate that the Historical CAT Costs are reasonable and appropriate.'' As discussed below, FINRA believes that the amounts set forth in this filing for each of these cost categories is ''reasonable and appropriate.'' Each of the costs included in Historical CAT Costs 1 are reasonable and appropriate because the costs are consistent with standard industry practice, based on the need to comply with the requirements of the CAT NMS Plan, incurred subject to negotiations performed on an arm's length basis, and/or are consistent with the needs of any legal entity, particularly one with no employees.

(i) Technology: Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover costs related to cloud hosting services as a part of Historical CAT Assessments.[227] CAT LLC determined that the costs related to cloud hosting services described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. As described above, the cloud hosting services costs reflect, among other things, the breadth of the CAT cloud activities, data volume far in excess of the original volume estimates, the need for specialized cloud services given the volume and unique nature of the CAT, the processing time requirements of the Plan, and regular efforts to seek to minimize costs where permissible under the Plan. CAT LLC determined that use of cloud hosting services is necessary for implementation of the CAT, particularly given the

[223] *See* CAT NMS Plan Approval Order, 81 FR 84696, 84697.

[224] *See supra* note 225.

[225] *See* CAT Funding Model Approval Order, 91 FR 13410, 13481.

[226] *See supra* note 227.

[227] *See* Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

substantial data volumes associated with the CAT, and that the fees for cloud hosting services negotiated by FCAT were reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.[228] Indeed, the actual costs of the CAT are far in excess of the original estimated costs of the CAT due to various factors, including the higher volumes and greater complexity of the CAT than anticipated when Rule 613 was originally adopted.

To comply with the requirements of the Plan, the breadth of the cloud activities related to the CAT is substantial. The cloud services not only include the production environment for the CAT, but they also include two industry testing environments, support environments for quality assurance and stress testing and disaster recovery capabilities. Moreover, the cloud storage costs are driven by the requirements of the Plan, which requires the storage of multiple versions of the data, from the original submitted version of the data through various processing steps, to the final version of the data.

Data volume is a significant driver of costs for cloud hosting services. When the Commission adopted the CAT NMS Plan in 2016, it estimated that the CAT would need to receive 58 billion records per day [229] and that annual operating costs for the CAT would range from $36.5 million to $55 million.[230] Through 2021, the actual data volumes have been five times that original estimate. The data volumes for each period are set forth in detail above.[231]

In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. Although CAT LLC has proactively sought to manage cloud hosting costs while complying with the Plan, including through requests to the Commission for exemptive relief and an amendment to the CAT NMS Plan, stringent CAT NMS Plan requirements do not allow for any material flexibility in cloud architecture design choices, processing timelines (*e.g.,* the use of non-peak processing windows), or lower-cost storage tiers. As a result, the required CAT processing timelines contribute to the cloud hosting costs of the CAT.

The costs for cloud hosting services also reflect the need for specialized cloud hosting services given the data volume and unique processing needs of the CAT. The data volume as well as the data processing needs of the CAT necessitate the use of cloud hosting services. The equipment, power and services required for an on-premises data model, the alternative to cloud hosting services, would be cost prohibitive. Moreover, as CAT was being developed, there were limited cloud hosting providers that could satisfy all the necessary CAT requirements, including the operational and security criteria. Over time more providers offering cloud hosting services that would satisfy these criteria have entered the market. CAT LLC will continue to evaluate alternative cloud hosting services, recognizing that the time and cost to move to an alternative cloud provider would be substantial.

The reasonableness of the cloud hosting services costs is further supported by key cost discipline mechanisms for the CAT—cost transparency, cost management efforts (including regular efforts to lower compute and storage costs where permitted by the Plan) and oversight. Together, these mechanisms help ensure the ongoing reasonableness of the CAT's costs and the level of fees assessed to support those costs.[232]

(ii) Technology: Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to operating fees as a part of Historical CAT Assessments.[233] CAT LLC determined that the costs related to operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The operating fees include the negotiated fees paid by CAT LLC to the Plan Processor to operate and maintain the system for order-related information and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the selection of FCAT as the Plan Processor was reasonable and appropriate given its expertise with securities regulatory reporting, after a process of considering other potential candidates.[234] CAT LLC also determined that the fixed price contract, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, was reasonable and appropriate, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity.[235] The services performed by FCAT for each period and the costs related to such services are described above.[236]

(iii) Technology: CAIS Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to CAIS operating fees as a part of Historical CAT Assessments.[237] CAT LLC determined that the costs related to CAIS operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The CAIS operating fees include the fees paid to the Plan Processor to operate and maintain CAIS and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the FCAT-negotiated fees for Kingland's CAIS-related services, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity, were reasonable and appropriate.[238] The services performed by Kingland for each period and the costs for each period are described above.[239]

(iv) Technology: Change Request Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to change

[228] For a discussion of the amount and type of cloud hosting services fees, *see* Items II.A.1(2)(B)(i)(a)(I), II.A.1(2)(B)(i)(b)(I), II.A.1(2)(B)(i)(c)(I) and II.A.1(2)(B)(i)(d)(I) above.

[229] *See* Appendix D–4 of the CAT NMS Plan at n.262.

[230] *See* CAT NMS Plan Approval Order, 81 FR 84696, 84801.

[231] *See* Items II.A.1(2)(B)(i)(a)(I), II.A.1(2)(B)(i)(b)(I), II.A.1(2)(B)(i)(c)(I) and II.A.1(2)(B)(i)(d)(I) above.

[232] *See* Securities Exchange Act Release. No. 97151 (March 15, 2023), 88 FR 17086, 17117 (March 21, 2023) (describing key cost discipline mechanisms for the CAT).

[233] *See* Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

[234] *See* Item II.A.1(2)(B)(i)(a)(II) above.

[235] *See* Items II.A.1(2)(B)(i)(a)(II), II.A.1(2)(B)(i)(b)(II), II.A.1(2)(B)(i)(c)(II) and II.A.1(2)(B)(i)(d)(II) above.

[236] *See supra* note 237.

[237] *See* Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

[238] *See* Items II.A.1(2)(B)(i)(a)(III), II.A.1(2)(B)(i)(b)(III), II.A.1(2)(B)(i)(c)(III) and II.A.1(2)(B)(i)(d)(III) above.

[239] *See supra* note 240.

request fees as a part of Historical CAT Assessments.[240] CAT LLC determined that the costs related to change request fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. It is common practice to utilize a change request process to address evolving needs in technology projects. This is particularly true for a project like CAT that is the first of its kind, both in substance and in scale. The substance and costs of each of the change requests are evaluated by the Operating Committee, and approved in accordance with the requirements for Operating Committee meetings. In each case, CAT LLC determined that the change requests were necessary to implement the CAT. As described above, the change requests cover various technology changes, including, for example, changes related to CAT reporting, data feeds and exchange functionality. CAT LLC also determined that the costs for each change request were appropriate for the relevant technology change. A description of the change requests for each FAM Period and their total costs is described above.[241] As noted above, the total costs for change requests through FAM Period 3 represent a small percentage of Historical CAT Costs 1—that is, 0.25% of Historical CAT Costs 1.

(v) Capitalized Developed Technology Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to capitalized developed technology costs as a part of Historical CAT Assessments.[242] Capitalized developed technology costs include costs related to certain development costs, costs related to certain modifications, upgrades and other changes to the CAT, CAIS implementation fees and license fees. The amount and type of costs for each period are described in more detail above.[243] CAT LLC determined that these costs are reasonable and should be included as a part of Historical CAT Costs 1.

These costs involve the activity of both the Initial Plan Processor and FCAT, as the successor Plan Processor.[244] With regard to the Initial Plan Processor, the Participants utilized an RFP to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan. CAT LLC entered into an agreement with the Initial Plan Processor in which CAT LLC would pay the Initial Plan Processor a negotiated, fixed price fee.[245] In addition, as described above, CAT LLC determined that it was appropriate to enter into an agreement with FCAT as the successor Plan Processor.[246]

(vi) Legal

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to legal fees as a part of Historical CAT Assessments.[247] CAT LLC determined that the legal costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Given the unique nature of the CAT, the number of parties involved with the CAT (including, for example, the SEC, Participants, Industry Members, and vendors) and the many regulatory issues associated with the CAT, the scope of the necessary legal services is substantial. CAT LLC determined that the scope of the legal services is necessary to implement and maintain the CAT and that the legal rates reflect the specialized services necessary for such a project. When hiring each law firm for a CAT project, CAT LLC interviewed multiple firms, and determined to hire each firm based on a variety of factors, including the relevant expertise and fees. In each case, CAT LLC determined that the hourly fee rates were in line with market rates for the specialized legal expertise. In addition, CAT LLC determined that the total costs incurred for each CAT project were appropriate given the breadth of services provided. The services performed by each law firm for each period and the costs related to such services are described above.[248]

(vii) Consulting

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover consulting costs as a part of Historical CAT Assessments.[249] CAT LLC determined that the consulting costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees [250] and because of the significant number of issues associated with the CAT, the consultants provided assistance in the management of various CAT matters and the processes related to such matters.[251] CAT LLC considered a variety of factors in choosing a consulting firm and determined to select Deloitte after an interview process.[252] CAT LLC also determined that the consulting services were provided at reasonable market rates, as the fees were negotiated annually and comparable to the rates charged by other consulting firms for similar work.[253] Moreover, the total costs for such consulting services were appropriate in light of the breadth of services provided by Deloitte. The services performed by Deloitte and the costs related to such services are described above.[254]

(viii) Insurance

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover insurance costs as a part of Historical CAT Assessments.[255] CAT LLC determined that the insurance costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that it is common practice to have directors' and officers' liability insurance, and errors and omissions liability insurance. CAT LLC further determined that it was important to have cyber security insurance given the nature of the CAT, and such a decision is consistent with the CAT NMS Plan, which states that the cyber incident response plan may include ''[i]nsurance

[240] *See* Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

[241] *See* Items II.A.1(2)(B)(i)(a)(IV), II.A.1(2)(B)(i)(b)(IV), II.A.1(2)(B)(i)(c)(IV) and II.A.1(2)(B)(i)(d)(IV) above.

[242] *See* Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

[243] *See* Items II.A.1(2)(B)(i)(a)(V), II.A.1(2)(B)(i)(b)(V), II.A.1(2)(B)(i)(c)(V) and II.A.1(2)(B)(i)(d)(V) above.

[244] *See supra* note 245.

[245] *See* Item II.A.1(2)(B)(i)(a)(V) above.

[246] *See* Item II.A.1(2)(B)(i)(a)(II) above.

[247] *See* Section 11.3(b)(iii)(B)(II)(B)(2) of the CAT NMS Plan.

[248] *See* Items II.A.1(2)(B)(i)(a)(VI), II.A.1(2)(B)(i)(b)(VI), II.A.1(2)(B)(i)(c)(VI) and II.A.1(2)(B)(i)(d)(VI) above.

[249] *See* Section 11.3(b)(iii)(B)(II)(B)(3) of the CAT NMS Plan.

[250] As stated in the filing of the proposed CAT NMS Plan, ''[i]t is the intent of the Participants that the Company have no employees.'' *See* Securities Exchange Act Release No. 77724 (April 27, 2016), 81 FR 30614, 30621 (May 17, 2016).

[251] CAT LLC uses certain third parties to perform tasks that may be performed by administrators for other NMS Plans. *See, e.g.,* CTA Plan and CQ Plan.

[252] *See* Item II.A.1(2)(B)(i)(a)(VII) above.

[253] *See* Items II.A.1(2)(B)(i)(a)(VII), II.A.1(2)(B)(i)(b)(VII), II.A.1(2)(B)(i)(c)(VII) and II.A.1(2)(B)(i)(d)(VII) above.

[254] *See supra* note 255.

[255] *See* Section 11.3(b)(iii)(B)(II)(B)(4) of the CAT NMS Plan.

against security breaches.'' [256] In selecting the insurance providers for these policies, CAT LLC engaged in an evaluation of alternative insurers, including a comparison of the pricing offered by the alternative insurers.[257] Based on this analysis, CAT LLC determined that the selected insurance policies provided appropriate coverage at reasonable market rates.[258]

(ix) Professional and Administration

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover professional and administration costs as a part of Historical CAT Assessments.[259] CAT LLC determined that the professional and administration costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees, all required accounting, financial, tax, cash management and treasury functions for CAT LLC have been outsourced at market rates. In addition, the required annual financial statement audit of CAT LLC is included in professional and administration costs, which costs are also at market rates.

CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees.[260] The hourly fee rates for this firm were in line with market rates for the financial advisory services provided.[261] Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Anchin. The services performed by Anchin and the costs related to such services are described above.[262]

CAT LLC also determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the role given the balance of these considerations.[263] Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services.[264] Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Grant Thornton. The services performed by Grant Thornton and the costs related to such services are described above.[265]

The professional and administrative costs also include costs related to the receipt of certain market data from Exegy. After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy. Exegy provided the data elements required by the CAT NMS Plan, and the fees were reasonable and in line with market rates for the market data received.[266]

The professional and administrative costs also include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment.[267]

(x) Public Relations Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover public relations costs as a part of Historical CAT Assessments.[268] CAT LLC determined that the public relations costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that the types of public relations services utilized were beneficial to the CAT and market participants more generally. Public relations services were important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.[269] By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT issues to the benefit of all market participants.[270] Moreover, CAT LLC determined that the rates charged for such services were in line with market rates.[271] As noted above, the total public relations costs through FAM Period 3 represent a small percentage of Historical CAT Costs 1—that is, 0.1% of Historical CAT Costs 1.

(B) Total Executed Equivalent Share Volume for the Prior 12 Months

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from March 2025 through February 2026 was 5,980,937,549,360.49 executed equivalent shares. CAT LLC determined the total executed equivalent share volume for the prior twelve months by counting executed equivalent shares in the same manner as it will count executed equivalent shares for CAT billing purposes.

(C) Historical Recovery Period 1A

CAT LLC has determined to establish a Historical Recovery Period of 24 months for Historical CAT Assessment 1A and that such length is reasonable. CAT LLC determined that the length of Historical Recovery Period 1A appropriately weighs the need for a reasonable fee rate for Historical CAT Assessment 1A that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans notes to the Participants in a timely fashion. CAT LLC determined that 24 months for Historical Recovery Period 1A would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.[272]

[256] *See* Section 4.1.5 of Appendix D of the CAT NMS Plan.

[257] *See* Items II.A.1(2)(B)(i)(a)(VIII), II.A.1(2)(B)(i)(b)(VIII), II.A.1(2)(B)(i)(c)(VIII) and II.A.1(2)(B)(i)(d)(VIII) above.

[258] *See supra* note 259.

[259] *See* Section 11.3(b)(iii)(B)(II)(B)(5) of the CAT NMS Plan.

[260] *See* Item II.A.1(2)(B)(i)(a)(IX) above.

[261] *See* Items II.A.1(2)(B)(i)(a)(IX), II.A.1(2)(B)(i)(b)(IX), II.A.1(2)(B)(i)(c)(IX) and II.A.1(2)(B)(i)(d)(IX) above.

[262] *See supra* note 263.

[263] *See* Item II.A.1(2)(B)(i)(a)(IX) above.

[264] *See* Items II.A.1(2)(B)(i)(a)(IX), II.A.1(2)(B)(i)(b)(IX), II.A.1(2)(B)(i)(c)(IX) and II.A.1(2)(B)(i)(d)(IX) above.

[265] *See supra* note 266.

[266] *See* Item II.A.1(2)(B)(i)(a)(IX) above.

[267] *See supra* note 268.

[268] *See* Section 11.3(b)(iii)(B)(II)(B)(6) of the CAT NMS Plan.

[269] *See* Item II.A.1(2)(B)(i)(a)(X) above.

[270] *See* Items II.A.1(2)(B)(i)(a)(X), II.A.1(2)(B)(i)(b)(X), II.A.1(2)(B)(i)(c)(X) and II.A.1(2)(B)(i)(d)(X) above.

[271] *See supra* note 272.

[272] As the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from $0.00007 per share to $0.00072 per share. *See* CAT

Continued

In addition, in establishing a Historical Recovery Period of 24 months, CAT LLC recognized that the total cost for Historical CAT Assessment 1A was less than the total costs for 2022 and 2023, and therefore it would be appropriate to recover those costs in two years.

(D) Projected Executed Equivalent Share Volume for Historical Recovery Period 1A

CAT LLC has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1A by doubling the executed equivalent share volume for the prior 12 months. The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has increased from prior years (*e.g.,* the executed equivalent share volume for 2024 was 4,295,884,600,069.4) and the Operating Committee believes that it is reasonable to conclude that the annual executed equivalent share volume will remain at the higher level. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1A is projected to be 11,961,875,098,720.98 executed equivalent shares.[273]

(E) Actual Fee Rate for Historical CAT Assessment 1A

(i) Decimal Places

As noted in the Plan amendment for the CAT Funding Model, as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, and describe the relevant number of decimal places for the fee rate.[274] Accordingly, proposed paragraph (a)(1)(B)(ii) of Rule 6897 would set forth a fee rate of $0.000002 per executed equivalent share. CAT LLC determined that the use of six decimal places is reasonable as it balances the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

(ii) Reasonable Fee Level

FINRA believes that imposing Historical CAT Assessment 1A with a fee rate of $0.000002 per executed equivalent share is reasonable because it provides for a revenue stream for the Company that is aligned with the remaining Historical CAT Costs 1 and such costs would be spread out over an appropriate recovery period, as discussed above. Moreover, FINRA believes that the level of the fee rate is reasonable in that it is calculated in accordance with the SEC approved CAT Funding Model. Historical CAT Assessment 1A is significantly lower than fees assessed pursuant to Section 31 (*e.g.,* $0.00007 per share to $0.00072 per share),[275] and, as a result, the magnitude of Historical CAT Assessment 1A is small, and therefore will mitigate any potential adverse economic effects or inefficiencies. Furthermore, the reasonable fee rate for Historical CAT Assessment 1A further supports CAT LLC's decision to seek to recover the costs described herein.

(3) Historical CAT Assessment 1A Provides for an Equitable Allocation of Fees

Historical CAT Assessment 1A provides for an equitable allocation of fees, as it equitably allocates CAT costs between and among the Participants and Industry Members, in accordance with the SEC approved CAT Funding Model. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act, including the formula for calculating Historical CAT Assessments as well as the Industry Members to be charged the Historical CAT Assessments.[276] In approving the CAT Funding Model, the SEC stated that ''[t]he Participants have sufficiently demonstrated that the proposed allocation of fees is appropriate.'' [277] Accordingly, the CAT Funding Model sets forth the requirements for allocating fees related to Historical CAT Costs among Participants and Industry Members, and the fee filings for Historical CAT Assessments must comply with those requirements.

Historical CAT Assessment 1A provides for an equitable allocation of fees as it complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. For example, as described above, the calculation of Historical CAT Assessment 1A complies with the formula set forth in Section 11.3(b) of the CAT NMS Plan. In addition, Historical CAT Assessment 1A would be charged to CEBBs and CEBSs in accordance with Section 11.3(b) of the CAT NMS Plan. Furthermore, the Participants would continue to remain responsible for their designated share of Past CAT Costs through the cancellation of loans made by the Participants to CAT LLC.

In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1A—Historical CAT Costs 1 (including Excluded Costs) and the exclusion of costs previously invoiced via Historical CAT Assessment 1, the count for the executed equivalent share volume for the prior 12 months, the length of the Historical Recovery Period, and the projected executed equivalent share volume for the Historical Recovery Period—are reasonable. Moreover, these inputs lead to a reasonable fee rate for Historical CAT Assessment 1A that is reasonable as it is consistent with the SEC approved CAT Funding Model and is lower than other fee rates for transaction-based fees. A reasonable fee rate allocated in accordance with the requirements of the CAT Funding Model provides for an equitable allocation of fees.

(4) Historical CAT Assessment 1A Is Not Unfairly Discriminatory

Historical CAT Assessment 1A is not an unfairly discriminatory fee. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act. In reaching this conclusion, the SEC analyzed the potential effect of Historical CAT Assessments calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Historical CAT Assessment 1A complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1A and the resulting fee rate for Historical CAT Assessment 1A is reasonable, consistent with the SEC approved CAT Funding Model. Therefore, Historical CAT Assessment 1A does not impose an unfairly discriminatory fee on Industry Members.

FINRA believes the proposed fees established pursuant to the CAT

Funding Model Approval Order, 91 FR 13410, 13469.

[273] This projection was calculated by multiplying 5,980,937,549,360.49 executed equivalent shares by two.

[274] *See* CAT Funding Model Approval Order, 91 FR 13410, 13445 n.677.

[275] *See* CAT Funding Model Approval Order, 91 FR 13410, 13469.

[276] *See* Section 11.3(b) of the CAT NMS Plan.

[277] *See* CAT Funding Model Approval Order, 91 FR 13410, 13412.

Funding Model promote just and equitable principles of trade, and, in general, protect investors and the public interest, and are provided in a transparent manner and with specificity in Rule 6897. FINRA also believes that the proposed fees are reasonable because they would provide ease of calculation, ease of billing and other administrative functions, and predictability of a fee based on fixed rate per executed equivalent share and are consistent with the SEC-approved Funding Model. Such factors are crucial to estimating a reliable revenue stream for CAT LLC and for permitting Industry Members to reasonably predict their payment obligations for budgeting purposes.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Section 15A(b)(9) of the Act [278] requires that FINRA's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. FINRA notes that Historical CAT Assessment 1A implements provisions of the CAT NMS Plan that were approved by the Commission and is designed to assist FINRA in meeting its regulatory obligations pursuant to the Plan.

In addition, all Participants (including exchanges and FINRA) are proposing to introduce Historical CAT Assessment 1A on behalf of CAT LLC to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the Participants.

Furthermore, in approving the CAT Funding Model, the SEC analyzed the potential competitive impact of the CAT Funding Model, including competitive issues related to market services, trading services and regulatory services, efficiency concerns, and capital formation.[279] The SEC also analyzed the potential effect of CAT fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Based on this analysis, the SEC approved the CAT Funding Model as compliant with the Exchange Act. Historical CAT Assessment 1A is calculated and implemented in accordance with the CAT Funding Model as approved by the SEC.

As discussed above, each of the inputs into the calculation of Historical CAT Assessment 1A is reasonable and the resulting fee rate for Historical CAT Assessment 1A calculated in accordance with the CAT Funding Model is reasonable. Therefore, Historical CAT Assessment 1A would not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

Written comments were neither solicited nor received.

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [280] and paragraph (f)(2) of Rule 19b–4 thereunder.[281] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

## IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

*Electronic Comments*

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–FINRA–2026–011 on the subject line.

*Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–FINRA–2026–011. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of FINRA. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–FINRA–2026–011 and should be submitted on or before June 8, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[282]

**J. Matthew DeLesDernier,**

*Deputy Secretary.*

## Securities and Exchange Commission

Self-Regulatory Organizations; 24X National Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Establish Fees for Industry Members Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail; Notice

## SECURITIES AND EXCHANGE COMMISSION

**[Release No. 34–105469; File No. SR–24X–2026–14]**

## Self-Regulatory Organizations; 24X National Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Establish Fees for Industry Members Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail

May 13, 2026.

Pursuant to Section 19(b)(1) under the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 30, 2026, 24X National Exchange LLC (''24X'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

### I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to establish fees for Industry Members [3] related to certain historical costs of the National Market System Plan Governing the Consolidated Audit Trail (the ''CAT NMS Plan'' or ''Plan'') incurred prior to January 1, 2022 that were not previously invoiced via Historical CAT Assessment 1. Industry Members were previously invoiced for $173,075,024 of the $212,039,879.34 of Historical CAT Costs 1 via Historical CAT Assessment 1. Historical CAT Assessment 1 is no longer in effect. Historical CAT Assessment 1A is being established to collect the remaining $38,964,855.34 of Historical CAT Costs 1. These fees would be payable to Consolidated Audit Trail, LLC (''CAT LLC'' or ''the Company'') [4] and referred to as Historical CAT Assessment 1A, and would be described in a new Rule 4.18 of the Exchange's rulebook entitled ''Consolidated Audit Trail Funding Fees.'' The fee rate for Historical CAT Assessment 1A will be $0.000002 per executed equivalent share. CAT Executing Brokers will receive their first monthly invoice for Historical CAT Assessment 1A in June 2026 calculated based on their transactions as CAT Executing Brokers for the Buyer (''CEBB'') and/or CAT Executing Brokers for the Seller (''CEBS'') in May 2026. The proposed rule change is available on the Exchange's website at *https://equities.24exchange.com/regulation* and at the principal office of the Exchange.

### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

1. Purpose

On July 11, 2012, the Commission adopted Rule 613 of Regulation NMS, which required the self-regulatory organizations (''SROs'') to submit a national market system (''NMS'') plan to create, implement and maintain a consolidated audit trail that would capture customer and order event information for orders in NMS securities across all markets, from the time of order inception through routing, cancellation, modification or execution.[5] On November 15, 2016, the Commission approved the CAT NMS Plan.[6] Under the CAT NMS Plan, the Operating Committee has the discretion to establish funding for CAT LLC to operate the CAT, including establishing fees for Industry Members to be assessed by CAT LLC that would be implemented on behalf of CAT LLC by the Participants.[7] On September 5, 2025, CAT LLC proposed a revised funding model to fund the CAT (''CAT Funding Model'').[8] On March 16, 2026, the Commission approved the CAT Funding Model, after concluding that the model satisfied the requirements of Section 11A of the Exchange Act and Rule 608 thereunder.[9]

The CAT Funding Model provides a framework for the recovery of the costs to create, develop and maintain the CAT, including providing a method for allocating costs to fund the CAT among Participants and Industry Members. The CAT Funding Model establishes two categories of fees: (1) CAT fees assessed by CAT LLC and payable by certain Industry Members to recover a portion of historical CAT costs previously paid by the Participants (''Historical CAT Assessment'' fees); and (2) CAT fees assessed by CAT LLC and payable by Participants and Industry Members to fund prospective CAT costs (''Prospective CAT Costs'' fees).[10]

Under the CAT Funding Model, ''[t]he Operating Committee will establish one or more fees (each a 'Historical CAT Assessment') to be payable by Industry Members with regard to CAT costs previously paid by the Participants ('Past CAT Costs').'' [11] In establishing a Historical CAT Assessment, the Operating Committee will determine a ''Historical Recovery Period'' and calculate a ''Historical Fee Rate'' for that Historical Recovery Period. Then, for each month in which a Historical CAT Assessment is in effect, each CEBB and CEBS would be required to pay the fee—the Historical CAT Assessment—for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] An ''Industry Member'' is defined as ''a member of a national securities exchange or a member of a national securities association.'' *See* 24X Rule 4.5(u). *See also* Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule. *See* 24X Rule 4.5.

[4] The term ''CAT LLC'' may be used to refer to Consolidated Audit Trail, LLC or CAT NMS, LLC, depending on the context.

[5] Securities Exchange Act Rel. No. 67457 (July 18, 2012), 77 FR 45721 (Aug. 1, 2012) (''Rule 613 Adopting Release'').

[6] Securities Exchange Act Rel. No. 79318 (Nov. 15, 2016), 81 FR 84696 (Nov. 23, 2016) (''CAT NMS Plan Approval Order'').

[7] Section 11.1(b) of the CAT NMS Plan.

[8] Securities Exchange Act Rel. No. 103960 (Sept. 12, 2025), 90 FR 44910 (Sept. 17, 2025).

[9] Securities Exchange Act Rel. No. 105003 (Mar. 16, 2026), 91 FR 13410 (Mar. 29, 2026) (''CAT Funding Model Approval Order''). This CAT Funding Model replaced the prior funding model that was approved by the Commission on September 6, 2023. Securities Exchange Act Rel. No. 98290 (Sept. 6, 2023), 88 FR 62628 (Sept. 12, 2023).

[10] Under the CAT Funding Model, the Operating Committee may establish one or more Historical CAT Assessments. Section 11.3(b) of the CAT NMS Plan. This filing only establishes Historical CAT Assessment 1A related to certain Historical CAT Costs as described herein; it does not address any other potential Historical CAT Assessment related to other Historical CAT Costs. In addition, under the CAT Funding Model, the Operating Committee also may establish CAT Fees related to CAT costs going forward. Section 11.3(a) of the CAT NMS Plan. This filing does not address any potential CAT Fees related to CAT costs going forward. Any such other fee for any other Historical CAT Assessment or CAT Fee for Prospective CAT Costs will be subject to a separate fee filing.

[11] Section 11.3(b) of the CAT NMS Plan.

calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate.[12]

Each Historical CAT Assessment to be paid by CEBBs and CEBSs is designed to contribute toward the recovery of two-thirds of the Historical CAT Costs. Because the Participants previously have paid Past CAT Costs via loans to the Company, the Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made by the Participants to the Company on a pro rata basis based on the outstanding loan amounts due under the loans, instead of through the payment of a CAT fee.[13] In addition, the Participants also will be 100% responsible for certain Excluded Costs (as discussed below).

CAT LLC proposes to charge CEBBs and CEBSs (as described in more detail below) Historical CAT Assessment 1A to recover certain historical CAT costs incurred prior to January 1, 2022, in accordance with the CAT Funding Model. To implement this fee on behalf of CAT LLC, the CAT NMS Plan requires the Participants to ''file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves, and such fees shall be labeled as 'Consolidated Audit Trail Funding Fees.' '' [14] The Plan further states that ''Participants will be required to file with the SEC pursuant to Section 19(b) of the Exchange Act a filing for each Historical CAT Assessment.'' [15] Accordingly, the purpose of this filing is to (i) establish 24X Rule 4.18 entitled ''Consolidated Audit Trail Funding Fees''; and (ii) implement a Historical CAT Assessment on behalf of CAT LLC for Industry Members, referred to as Historical CAT Assessment 1A, in accordance with the CAT NMS Plan.[16]

Other Participants in the CAT previously filed a fee filing to implement Historical CAT Assessment 1.[17] Based on the fee filing for Historical CAT Assessment 1, Historical CAT Assessment 1 was expected to be in effect from the first invoice in November 2024 until $212,039,879.34 (two-thirds of Historical CAT Costs 1) was invoiced to CAT Executing Brokers collectively.[18] However, Historical CAT Assessment 1 ceased before the entire amount was invoiced.[19] The last invoice for Historical CAT Assessment 1 was provided on December 2025, after only $173,075,024 of the total $212,039,879.34 had been invoiced to Industry Members.[20] Accordingly, $38,964,855.34 of Historical CAT Costs 1 has not been invoiced. Historical CAT Assessment 1A would seek to recover this outstanding amount of Historical CAT Costs 1 that has not been invoiced.

(1) CAT Executing Brokers

Historical CAT Assessment 1A will be charged to each CEBB and CEBS for each applicable transaction in Eligible Securities.[21] The CAT NMS Plan defines a ''CAT Executing Broker'' to mean:

(a) with respect to a transaction in an Eligible Security that is executed on an exchange, the Industry Member identified as the Industry Member responsible for the order on the buy-side of the transaction and the Industry Member responsible for the sell-side of the transaction in the equity order trade event and option trade event in the CAT Data submitted to the CAT by the relevant exchange pursuant to the Participant Technical Specifications; and (b) with respect to a transaction in an Eligible Security that is executed otherwise than on an exchange and required to be reported to an equity trade reporting facility of a registered national securities association, the Industry Member identified as the executing broker and the Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event in the CAT Data submitted to the CAT by FINRA pursuant to the Participant Technical Specifications; provided, however, in those circumstances where there is a non-Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event or no contra-side executing broker is identified in the TRF/ORF/ADF transaction data event, then the Industry Member identified as the executing broker in the TRF/ORF/ADF transaction data event would be treated as CAT Executing Broker for the Buyer and for the Seller.[22]

The following fields of the Participant Technical Specifications indicate the CAT Executing Brokers for the transactions executed on an exchange.

EQUITY ORDER TRADE (EOT) [23]

| No. | Field name | Data type | Description | Include key |
|---|---|---|---|---|
| 12.*n*.8/ 13.*n*.8 ..... | member ..... | Member Alias ..... | The identifier for the member firm that is responsible for the order on this side of the trade.<br>Not required if there is no order for the side as indicated by the NOBUYID/NOSELLID instruction.<br>This must be provided if orderID is provided ... | C |

[12] In approving the CAT Funding Model, the Commission stated that, ''[i]n the Commission's view, the proposed recovery of the Past CAT Costs via the Historical CAT Assessment is appropriate.'' CAT Funding Model Approval Order at 13450.

[13] Section 11.3(b)(ii) of the CAT NMS Plan.

[14] Section 11.1(b) of the CAT NMS Plan.

[15] Section 11.3(b)(iii)(B)(I) of the CAT NMS Plan.

[16] Note that there may be one or more Historical CAT Assessments. Section 11.3(b) of the CAT NMS Plan.

[17] *See, e.g.,* Securities Exchange Act Release No. 100947 (Sept. 5, 2024), 89 FR 74580 (Sept, 12, 2024) (SR–MEMX–2024–34).

[18] *See* MEMX LLC Rule 4.17(a)(1)(C).

[19] In response to the Eleventh Circuit's decision vacating the prior CAT NMS Plan funding model, the last invoices for Historical CAT Assessment 1 were sent in December 2025 based on November 2025 transactions. *See American Securities Association* v. *SEC,* No. 23–13396 (11th Cir. July 25, 2025).

[20] CAT Fee Alert 2025–4 (Nov. 25, 2025).

[21] In its approval order for the CAT Funding Model, the Commission determined that charging CAT fees to CAT Executing Brokers was appropriate. In reaching this conclusion the Commission noted that the use of CAT Executing Brokers is appropriate because the CAT Funding Model is based upon the calculation of *executed* equivalent shares, and, therefore, charging CAT Executing Brokers would reflect their executing role in each transaction. Furthermore, the Commission noted that, because CAT Executing Brokers are already identified in transaction reports from the exchanges and FINRA's equity trade reporting facilities recorded in CAT Data, charging CAT Executing Brokers could streamline the billing process. CAT Funding Model Approval Order at 13413.

[22] Section 1.1 of the CAT NMS Plan. In its approval order for the CAT Funding Model, the Commission ''recognize[d] that Industry Members may pass-through CAT fees for customer executed volume.'' *See* CAT Funding Model Approval Order at 13424.

[23] *See* Table 23, Section 4.7 (Order Trade Event) of the CAT Reporting Technical Specifications for Plan Participants, Version 4.2.0–r2 (Feb. 24, 2026), *https://www.catnmsplan.com/sites/default/files/2026-02/02.24.2026-CAT_Reporting_Technical_Specifications_for_Participants_4.2.0-r2.pdf* (''CAT Reporting Technical Specifications for Plan Participants'').

| 28 ..... | contraExecutingMpid ..... | Member Alias ..... | MPID of the contra-side executing party ..... | C |

(2) Calculation of Fee Rate for Historical CAT Assessment 1A

The Operating Committee determined the fee rate to be used in calculating Historical CAT Assessment 1A based on the Historical CAT Costs for Historical CAT Assessment 1A and the projected total executed share volume of all transactions in Eligible Securities for the Historical Recovery Period for Historical CAT Assessment 1A (''Historical Recovery Period 1A''), as discussed in detail below. Based on this calculation, the Operating Committee has determined that the fee rate for Historical CAT Assessment 1A would be $0.000002, as discussed in detail below.

(A) Executed Equivalent Shares for Transactions in Eligible Securities

Under the CAT NMS Plan, for purposes of calculating each Historical CAT Assessment, executed equivalent shares in a transaction in Eligible Securities will be reasonably counted as follows: (1) each executed share for a transaction in NMS Stocks will be counted as one executed equivalent share; (2) each executed contract for a transaction in Listed Options will be counted based on the multiplier applicable to the specific Listed Options (*i.e.,* 100 executed equivalent shares or such other applicable multiplier); and (3) each executed share for a transaction in OTC Equity Securities shall be counted as 0.01 executed equivalent share.[26]

(B) Historical CAT Costs

The CAT NMS Plan states that ''[t]he Operating Committee will reasonably determine the Historical CAT Costs sought to be recovered by each Historical CAT Assessment, where the Historical CAT Costs will be Past CAT Costs minus Past CAT Costs reasonably excluded from Historical CAT Costs by the Operating Committee. Each Historical CAT Assessment will seek to recover from CAT Executing Brokers two-thirds of Historical CAT Costs incurred during the period covered by the Historical CAT Assessment.'' [27] Historical CAT Assessment 1, the original Historical CAT Assessment, was implemented to recover $212,039,879.34 of Historical CAT Costs 1 from CEBBs and CEBSs collectively.[28] As described in other Participants' fee filings for Historical CAT Assessment 1, Historical CAT Costs 1 of $212,039,879.34 includes Past CAT Costs of $401,312,909 minus certain Excluded Costs of $83,253,090. As described in other Participants' filings for Historical CAT Assessment 1, Participants collectively will remain responsible for one-third of Historical CAT Costs 1 (which is $106,019,939.67), plus the Excluded Costs of $83,253,090. Accordingly, CEBBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is $106,019,939.67), and CEBSs collectively will be responsible for one-third of Historical CAT Costs 1 (which is $106,019,939.67), for a total of $212,039,879.34. CEBBs and CEBSs collectively have been invoiced for $173,075,024 of the $212,039,879.34 of Historical CAT Costs 1 via Historical CAT Assessment 1. Accordingly, Historical CAT Assessment 1A would charge CEBBs and CEBSs collectively for the remaining $38,964,855.34 of Historical CAT Costs 1 that was not invoiced to CEBBs and CEBSs via Historical CAT Assessment 1. Historical CAT Assessment 1A will be designed to recover the remaining $38,964,855.34 of Historical CAT Costs 1 from CEBBs and CEBSs collectively, with CEBBs collectively responsible for $19,482,427.67 and CEBSs collectively responsible for $19,482,427.67.

(i) Historical CAT Costs 1

[24] *See* Table 52, Section 5.2.5.1 (Simple Option Trade Event) of the CAT Reporting Technical Specifications for Plan Participants.

[25] *See* Table 62, Section 6.1 (TRF/ORF/ADF Transaction Data Event) of the CAT Reporting Technical Specifications for Plan Participants.

[26] Section 11.3(a)(i)(B) and 11.3(b)(i)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission concluded that ''in the Commission's view, the use of executed equivalent share volume as the basis for determining and allocating CAT costs during the two-year interim period is appropriate and consistent with the funding principles of the CAT NMS Plan.'' CAT Funding Model Approval Order at 13427.

[27] Section 11.3(b)(i)(C) of the CAT NMS Plan.

[28] *See* Securities Exchange Act Release No. 100947 (Sept. 5, 2024), 89 FR 74580 (Sept, 12, 2024) (SR–MEMX–2024–34).

The following describes in detail Historical CAT Costs 1 with regard to four separate historical time periods as well as Past CAT Costs excluded from Historical CAT Costs 1 (''Excluded Costs''). The following cost details are provided in accordance with the requirement in the CAT NMS Plan to provide in the fee filing ''a brief description of the amount and type of Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.'' [29] Each of the costs described below are reasonable, appropriate and necessary for the creation, implementation and maintenance of CAT. These Historical CAT Costs 1 are the same as described in other Participants' fee filings for Historical CAT Assessment 1.[30]

(a) Historical CAT Costs Incurred Prior to June 22, 2020 (Pre-FAM Costs)

Historical CAT Costs 1 would include costs incurred by CAT prior to June 22, 2020 (''Pre-FAM Period'') and already funded by the Participants, excluding Excluded Costs (described further below). Historical CAT Costs 1 would include costs for the Pre-FAM Period of $124,290,730. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($41,430,243.33), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($41,430,243.33) and CEBSs paying one-third ($41,430,243.33). These costs do not include Excluded Costs, as discussed further below. The following table breaks down Historical CAT Costs 1 for the Pre-FAM Period into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Historical CAT costs 1 for Pre-FAM Period (prior to June 22, 2020) ** |
|---|---|
| Capitalized Developed Technology Costs * | $51,847,150 |
| *Technology Costs* | 33,568,579 |
| Cloud Hosting Services | 10,268,840 |
| Operating Fees | 21,085,485 |
| CAIS Operating Fees | 2,072,908 |
| Change Request Fees | 141,346 |
| Legal | 19,674,463 |
| Consulting | 17,013,414 |
| Insurance | 880,419 |
| Professional and administration | 1,082,036 |
| Public relations | 224,669 |
| Total Operating Expenses | 124,290,730 |

* The non-cash amortization of these capitalized developed technology costs of $2,115,545 incurred during the period prior to June 22, 2020 have been appropriately excluded from the above table.[31]

** The costs described in this table of costs for the Pre-FAM Period were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website. In addition, in accordance with Section 6.6(a)(i) of the CAT NMS Plan, in 2018 CAT LLC provided the SEC with ''an independent audit of fees, costs, and expenses incurred by the Participants on behalf of the Company prior to the Effective Date of the Plan that will be publicly available.'' The audit is available on the CAT website.

The Pre-FAM Period includes a broad range of CAT-related activity from 2012 through June 22, 2020, including the evaluation of the requirements of SEC Rule 613, the development of the CAT NMS Plan, the evaluation and selection of the initial and successor Plan Processors, the commencement of the creation and implementation of the CAT to comply with Rule 613 and the CAT NMS Plan, including technical specifications for transaction reporting and regulatory access, and related technology and the commencement of reporting to the CAT. The following describes the costs for each of the categories for the Pre-FAM Period.

(I) Technology Costs—Cloud Hosting Services

The $10,268,840 in technology costs for cloud hosting services represent costs incurred for services provided by the cloud services provider for the CAT, Amazon Web Services, Inc. (''AWS''), during the Pre-FAM Period.

As part of its proposal for acting as the successor Plan Processor for the CAT, FCAT selected AWS as a subcontractor to provide cloud hosting services. In 2019, after reviewing the capabilities of other cloud services providers, FCAT determined that AWS was the only cloud services provider at that time sufficiently mature and capable of providing the full suite of necessary cloud services for the CAT, including, for example, the security, resiliency and complexity necessary for the CAT computing requirements. The use of cloud hosting services is standard for this type of high-volume data activity and reasonable and necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT the fees incurred by the Plan Processor for cloud hosting services provided by AWS as FCAT's subcontractor on a monthly basis for the cloud hosting services, and FCAT, in turn, pays such fees to AWS. The fees for cloud hosting services were negotiated by FCAT on an arm's length basis with the goals of managing cost and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the expected volume of data, the breadth of services provided and market rates for similar services. The fees for cloud hosting services during the Pre-FAM Period were paid to FCAT by CAT NMS,

[29] Section 11.3(b)(iii)(B)(II)(B) of the CAT NMS Plan.

[30] *See, e.g.,* Securities Exchange Act Release No. 100947 (Sept. 5, 2024), 89 FR 74580 (Sept, 12, 2024) (SR–MEMX–2024–34).

[31] With respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

LLC [32] and subsequently Consolidated Audit Trail, LLC (as previously noted, both entities are referred to generally as ''CAT LLC''),[33] and FCAT, in turn, paid AWS. CAT LLC was funded via loan contributions by the Participants.[34]

AWS was engaged by FCAT to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS include storage services, databases, compute services and other services (such as networking, management tools and DevOps tools). AWS also was engaged to provide various environments for CAT, such as development, performance testing, test and production environments.

The cost for AWS services for the CAT is a function of the volume of CAT Data. The greater the amount of CAT Data, the greater the cost of AWS services to the CAT. During the Pre-FAM Period from the engagement of AWS in February 2019 through June 2020, AWS provided cloud hosting services for volumes of CAT Data far in excess of the volume predictions set forth in the CAT NMS Plan. The CAT NMS Plan states, when all CAT Reporters are submitting their data to the CAT, it ''must be sized to receive[,] process and load more than 58 billion records per day,'' [35] and that ''[i]t is expected that the Central Repository will grow to more than 29 petabytes of raw, uncompressed data.'' [36] However, the volume of CAT Data for the Pre-FAM Period was far in excess of these predicted levels. By the end of this period, data submitted to the CAT included options and equities Participant Data,[37] Phase 2a and Phase 2b Industry Member Data [38] (including certain linkages), as well as SIP Data,[39] reference data and other types of Other Data.[40] The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during the Pre-FAM Period.[41]

| | Date range: 3/29/19 to 4/12/20 * | Date range: 4/13/20 to 6/21/20 ** |
|---|---|---|
| Average Daily Volume in Billions: | | |
| Participant—Equities | 5 | 5 |
| Participant—Options | 80 | 981 |
| Industry Member—Equities | ..... | 3 |
| Industry Member—Options | ..... | 0.04 |
| SIP—Options & Equities | 64 | 70 |
| Average Total Daily Volume | 149 | 166 |
| Cumulative Total Events for the Period | 3,890 | 4,990 |
| Total Compute Hours for the Period | *** N/A | 5,663,247 |
| Storage Footprint at End of Period (Petabytes) | 30.57 | 47.96 |

* The Participant Equities in RSA format.
** Start of Industry Member reporting on 4/13/2020.
*** Note that, although there were compute hours during this period, data related to such compute hours are no longer available in current data.

(II) Technology Costs—Operating Fees

The $21,085,485 in technology costs related to operating fees represent costs incurred with regard to activities of FCAT as the Plan Processor. Operating fees are those fees paid by CAT LLC to FCAT as the Plan Processor to operate and maintain the CAT and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management as required by the CAT NMS Plan.

FCAT was selected to assume the role of the successor Plan Processor. Prior to this selection, the Participants engaged in discussions with two prior Bidders [42] for the successor Plan Processor role. The Operating Committee formed a Selection Subcommittee in accordance with Section 4.12 of the CAT NMS Plan to evaluate and review Bids and to make a recommendation to the Operating Committee with respect to the selection of the successor Plan Processor. In an April 9, 2019 letter to the Commission, the Participants described the reasons for its selection of the successor Plan Processor:

The Selection Subcommittee considered factors including, but not limited to, the following, in recommending FINRA to the Operating Committee as the successor Plan Processor:

a. FINRA's specialized technical expertise and capabilities in the area of broker-dealer technology;

b. The need to appoint a successor Plan Processor with specialized expertise to develop, implement, and maintain the CAT System in accordance with the CAT NMS Plan and SEC Rule 613;

c. FINRA's detailed proposal in response to CATLLC's recent inquiries; and

d. FINRA's data query and analytics systems demonstration to the Participants.

[32] CAT NMS, LLC was formed by FINRA and the U.S. national securities exchanges to implement the requirements of SEC Rule 613 under the Exchange Act. SEC Rule 613 required the SROs to jointly submit to the SEC the CAT NMS Plan to create, implement and maintain the CAT. The SEC approved the CAT NMS Plan on November 15, 2016. CAT NMS Plan Approval Order.

[33] On August 29, 2019, the Participants formed a new Delaware limited liability company named Consolidated Audit Trail, LLC for the purpose of conducting activities related to the CAT from and after the effectiveness of the proposed amendment of the CAT NMS Plan to replace CAT NMS, LLC. *See* Securities Exchange Act Rel. No. 87149 (Sept. 27, 2019), 84 FR 52905 (Oct. 3, 2019).

[34] For each of the costs paid by CAT NMS, LLC and Consolidated Audit Trail, LLC as discussed throughout this filing, CAT NMS, LLC and Consolidated Audit Trail, LLC paid these costs via loan contributions by the Participants to CAT NMS, LLC and Consolidated Audit Trail, LLC, respectively.

[35] Appendix D–4 of the CAT NMS Plan at n.262.

[36] Appendix D–5 of the CAT NMS Plan.

[37] *See* Section 6.3(d) of the CAT NMS Plan.

[38] *See* Securities Exchange Rel. No. 88702 (Apr. 20, 2020), 85 FR 23075 (Apr. 24, 2020) (''Phased Reporting Exemptive Relief Order'') for a description of Phase 2a and Phase 2b Industry Member Data.

[39] *See* Section 6.5(a)(ii) of the CAT NMS Plan.

[40] *See* Appendix C–109 of the CAT NMS Plan.

[41] Note that the volume data described in this table does not include CAIS data.

[42] The term ''Bidder'' is defined in Section 1.1 of the CAT NMS Plan.

Based on these and other factors, the Selection Subcommittee determined that FINRA was the most appropriate Bidder to become the successor Plan Processor.[43]

On February 26, 2019, the Operating Committee (with FINRA recusing itself) voted to select FINRA as the successor Plan Processor pursuant to Section 6.1(t) of the CAT NMS Plan.[44] On March 29, 2019, CAT LLC and FCAT (a wholly owned subsidiary of FINRA) entered into a Plan Processor Agreement pursuant to which FCAT would perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT a negotiated monthly fixed price for the operation of the CAT. This fixed price contract was negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity. The operating fees during the Pre-FAM Period were paid to FCAT by CAT LLC.

From March 29, 2019 (the commencement of the Plan Processor Agreement with FCAT) through June 22, 2020 (the end of the Pre-FAM Period), the Plan Processor's activities with respect to the CAT included the following:

- Commenced user acceptance testing with market data provided by Exegy Incorporated (''Exegy''), a market data provider; [45]
- Published Technical Specifications and related reporting scenarios documents for Phase 2a, 2b and 2c reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Facilitated testing for Phase 2a and 2b reporting for Industry Members;
- Began developing Technical Specifications and related reporting scenarios documents for Phase 2d reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Published Central Repository Access Technical Specifications, and provided regulator access to test data from Industry Members;
- Facilitated Participant exchanges that support options market makers sending Quote Sent Time to the CAT;
- Facilitated the introduction of OPRA and Options NBBO Other Data to CAT;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing requirements under Regulation SCI;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants, the SEC and its staff;
- Operated the FINRA CAT Helpdesk, which is the primary source for answers to questions about CAT, including questions regarding: clock synchronization, firm reporting responsibilities, interpretive questions, technical specifications for reporting to CAT and more;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; [46] and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

The $2,072,908 in technology costs related to CAIS operating fees represent the fees paid for FCAT's subcontractor charged with the development and operation of CAT's Customer and Account Information System (''CAIS''). The CAT is required under the CAT NMS Plan to capture and store Customer Identifying Information and Customer Account Information in a database separate from the transactional database and to create a CAT-Customer-ID for each Customer.

During the Pre-FAM Period, the CAIS-related services were provided by the Plan Processor through the Plan Processor's subcontractor, Kingland Systems Incorporation (''Kingland''). Kingland had experience operating in the securities regulatory technology space, and as a part of its proposal for acting as the Plan Processor for the CAT, FCAT selected Kingland as a subcontractor to provide certain CAIS-related services.

Under the Plan Processor Agreement with FCAT, CAT LLC was required to pay to the Plan Processor the fees incurred by FCAT for CAIS-related services provided by FCAT through Kingland on a monthly basis. FCAT negotiated the fees for Kingland's CAIS-related services on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity. The fees for CAIS-related services during the Pre-FAM Period were paid by CAT LLC to FCAT. FCAT, in turn, paid Kingland.

During the Pre-FAM Period, Kingland began development of the CAIS Technical Specifications and the building of CAIS. In addition, Kingland also worked on the build related to the CCID Alternative, an alternative approach to customer information that was not included in the CAT NMS Plan as originally adopted.[47] Furthermore, Kingland also worked on the acceleration of the reporting of large trader identifiers (''LTID'') earlier than originally contemplated during this period, in accordance with exemptive relief granted by the SEC.[48]

(IV) Technology Costs—Change Request Fees

The technology costs related to change request fees include costs related to certain modifications, upgrades or other changes to the CAT. Change requests are standard practice and necessary to reflect operational changes, including changes related to new market developments, such as new market participants. In general, if CAT LLC determines that a modification, upgrade or other change to the functionality or service is necessary and appropriate, CAT LLC will submit a request for such a change to the Plan Processor. The Plan Processor will then respond to the request with a proposal for implementing the change, including the cost (if any) of such a change. CAT LLC then determines whether to approve the

[43] Letter from Michael J. Simon, Chair, CAT NMS, LLC Operating Committee, to Brent J. Fields, Secretary, SEC (Apr. 9, 2019), *https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection-040919.pdf.*

[44] *Id.*

[45] The use of Exegy to provide market data, including the costs and market data provided, is discussed below in Section 3(a)(2)(B)(a)(IX).

[46] The CAT website is *https://www.catnmsplan.com.*

[47] For a discussion of the CCID Alternative, *see* Securities Exchange Act Rel. No. 88393 (Mar. 17, 2020), 85 FR 16152 (Mar. 20, 2020).

[48] Phased Reporting Exemptive Relief Order at 23079–80.

proposed change. The change request costs were paid by CAT LLC to FCAT. During the Pre-FAM Period, CAT LLC incurred costs of $141,346 related to change requests implemented by FCAT. Such change requests related to a development fee regarding the OPRA and SIP data feeds, and the reprocessing of certain exchange data.[49]

(V) Technology Costs—Capitalized Developed Technology Costs

This category of costs includes capitalizable application development costs incurred in the development of the CAT. The capitalized developed technology costs for the Pre-FAM Period of $51,847,150 relate to technology provided by the Initial Plan Processor and the successor Plan Processor.

*Initial Plan Processor: Thesys CAT, LLC.* The capitalized developed technology costs related to the Initial Plan Processor include costs incurred with regard to testing for Participant reporting, Participant reporting to the CAT, a security assessment of the CAT, and the development of the billing function for the CAT.

On January 17, 2017, the Selection Committee of the CAT NMS Plan selected the Initial Plan Processor, Thesys Technologies, LLC, for the CAT NMS Plan pursuant to Article V of the CAT NMS Plan.[50] The Participants utilized a request for proposal (''RFP'') to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan, taking into consideration that the Initial Plan Processor had experience operating in the securities regulatory technology space, among other considerations. On April 6, 2017, CAT LLC entered into an agreement with Thesys CAT LLC (''Thesys CAT''), a Thesys affiliate, to perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT. Under the agreement, CAT LLC would pay Thesys CAT a negotiated, fixed price fee for its role as the Initial Plan Processor. Effective January 30, 2019, the Plan Processor Agreement with Thesys CAT was terminated, and FCAT was subsequently selected as the successor Plan Processor.

From January 17, 2017 through January 30, 2019, the time in which Thesys CAT was engaged for the CAT, but excluding the period from November 15, 2017 through January 30, 2019, the Initial Plan Processor engaged in various activities with respect to the CAT, including preparing iterative drafts of Participant Technical Specifications, Industry Member Technical Specifications and the Central Repository Access Technical Specifications. In addition, Thesys CAT also developed CAT technology, addressed compliance items, including drafting CAT policies and procedures, addressing Regulation SCI requirements, establishing a CAT Compliance Officer and a Chief Information Security Officer, addressed security-related matters for the CAT, and worked towards the initiation of Participant reporting per the Participant Technical Specifications.

*Successor Plan Processor: FCAT.* The capitalized developed technology costs related to FCAT include: (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, including the completion of go-live functionality related to options ingestion and validation, equities regulatory services agreement query tool updates and unlinked options data query, options linkages release, Industry Member Phase 2a file submission and data integrity (including error corrections), and Industry Member testing, including reporting relationships, ATS order type management, basic reporting statistics, SFTP data integrity feedback and error correction; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including a one-time development fee for a secure analytics workspace, a one-time development fee for an Industry Member connectivity solution, and a one-time development fee for the acceleration of multi-factor authentication; (3) CAIS implementation fees; and (4) license fees.

(VI) Legal Costs

The legal costs of $19,674,463 represent the fees paid for legal services provided by two law firms, Wilmer Cutler Pickering Hale and Dorr LLP (''WilmerHale'') and Pillsbury Winthrop Shaw Pittman LLP (''Pillsbury''), during the Pre-FAM Period. The legal costs exclude those costs incurred from November 15, 2017 through November 15, 2018.

*Law Firm: WilmerHale.* Following the adoption of Rule 613, the Participants determined it was necessary to engage external legal counsel to advise the Participants with respect to corporate and regulatory legal matters related to the CAT, including drafting and developing the CAT NMS Plan. The Participants considered a variety of factors in their analysis of prospective law firms, including (1) the firm's qualifications, resources and expertise; (2) the firm's relevant experience and understanding of the regulatory matters raised by the CAT and in advising on matters of similar scope; (3) the composition of the legal team; and (4) professional fees. Following a series of interviews, the Participants acting as a consortium determined that WilmerHale was well qualified given the balance of these considerations and engaged WilmerHale in February 2013.

WilmerHale's billing rates are negotiated on an annual basis and are determined with reference to the rates charged by other leading law firms for similar work. The Participants assess WilmerHale's performance and review prospective budgets and staffing plans submitted by WilmerHale on an annual basis. WilmerHale's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading law firms for similar work.

The legal costs for WilmerHale during the Pre-FAM Period included costs incurred from 2013 until June 22, 2020 to address corporate and regulatory legal matters related to the CAT. The legal fees for this law firm during the period from February 2013 until the formation of the CAT NMS, LLC on November 15, 2016 were paid directly by the exchanges and FINRA to WilmerHale. After the formation of CAT NMS LLC, the legal fees were paid by CAT LLC to WilmerHale.

After WilmerHale was engaged in 2013 through the end of the Pre-FAM Period on June 22, 2020 (excluding the legal costs from November 15, 2017 through November 15, 2018), WilmerHale provided legal assistance to the CAT on a variety of matters, including with regard to the following:

- Analyzed various legal matters associated with the Selection Plan, and drafted an amendment to the Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;

[49] Note that CAT LLC also has incurred costs related to specific Industry Members (*e.g.,* reprocessing costs related to Industry Member reporting errors).

[50] Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), *https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection.pdf.*

• Analyzed legal matters related to the Development Advisory Group (''DAG'');
• Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on CAT NMS Plan;
• Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan, and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;
• Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan and related filings;
• Negotiated and drafted the plan processor agreements with the Initial Plan Processor and the successor Plan Processor;
• Provided assistance with compliance with Regulation SCI;
• Assisted with clock synchronization study;
• Provided assistance with respect to the establishment of CAT security;
• Drafted exemptive requests from CAT NMS Plan requirements, including with regard to options market maker quotes, Customer IDs, CAT Reporter IDs, linking allocations to executions, CAT reporting timeline, FDIDs, customer and account information, timestamp granularity, small industry members, data facility reporting and linkage, allocation reports, SRO-assigned market participant identifiers and cancelled trade indicators, thereby seeking to implement changes that would be cost effective and benefit Industry Members and Participants;
• Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
• Provided advice regarding CAT policies and procedures;
• Analyzed the SEC's amendment of the CAT NMS Plan regarding financial accountability;
• Provided interpretations of and related to the CAT NMS Plan;
• Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues; and
• Assisted with third-party vendor agreements.

*Law Firm: Pillsbury.* The legal costs for CAT during the Pre-FAM Period include costs related to the legal services performed by Pillsbury. The Participants interviewed this law firm as well as other potential law firms to provide legal assistance regarding certain liability matters. After considering a variety of factors in its analysis, including the relevant expertise and fees of the firm, CAT LLC determined to hire Pillsbury in April 2019. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees were paid by CAT LLC to Pillsbury. The legal costs for Pillsbury during the Pre-FAM Period included costs incurred from April 2019 until June 22, 2020 to address legal matters regarding the agreements between CAT Reporters and CAT LLC concerning certain terms associated with CAT Reporting (the ''Reporter Agreement''). During that period, Pillsbury advised CAT LLC regarding applicable legal matters, participated in negotiations between the Participants and Industry Members, participated in meetings with senior SEC staff, the Chairman, and Commissioners, represented CAT LLC and the Participants in an SEC administrative proceeding, and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, litigation involving CAT LLC is an expense of operating the CAT, and, therefore, is appropriately an obligation of both Participants and Industry Members under the CAT Funding Model.

(VII) Consulting Costs

The consulting costs of $17,013,414 represent the fees paid to the consulting firm Deloitte & Touche LLP (''Deloitte'') as project manager during the Pre-FAM Period, from October 2012 until June 22, 2020. These consulting costs include costs for advisory services related to the operation of the CAT, and meeting facilitation and communications coordination, vendor support and financial analyses.

To help facilitate project management given the unprecedented complexity and scope of the CAT project, the Participants determined it was necessary to engage a consulting firm to assist with the CAT project in 2012, following the adoption of Rule 613. A variety of factors were considered in the analysis of prospective consulting firms, including (1) the firm's qualifications, resources, and expertise; (2) the firm's relevant experience and understanding of the regulatory issues raised by the CAT and in coordinating matters of similar scope; (3) the composition of the consulting team; and (4) professional fees. Following a series of interviews, the exchanges and FINRA as a consortium determined that Deloitte was well qualified given the balance of these considerations and engaged Deloitte on October 1, 2012.

Deloitte's fee rates are negotiated on an annual basis and are in line with market rates for this type of specialized consulting work. CAT LLC assesses Deloitte's performance and reviews prospective budgets and staffing plans submitted by Deloitte on an annual basis. Deloitte's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading consulting firms for similar work.

The consulting costs for CAT during the period from 2012 until the formation of the CAT NMS, LLC were paid directly by the Participants to Deloitte. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC to Deloitte. CAT LLC reviewed the consulting fees each month and approved the invoices.

After Deloitte was hired in 2012 through the end of the Pre-FAM Period on June 22, 2020 (excluding the consulting costs from November 15, 2017 through November 15, 2018), Deloitte provided a variety of consulting services, including the following:
• Established and implemented program operations for the CAT project, including the program management office and workstream design;
• Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participant's independent reviews;
• Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, analyzing OATS and CAT requirements, and drafting appendices to the Plan;
• Assisted with cost and funding-related activities for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
• Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS

Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;

- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with industry outreach and communications regarding the CAT, including assistance with industry outreach events, the development of the CAT website, frequently asked questions, and coordinating with the CAT LLC's public relations firm;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress;
- Coordinated efforts regarding the selection of the successor Plan Processor;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor, including support for the Operating Committee and successor Plan Processor for the new role; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

The insurance costs of $880,419 represent the cost incurred for insurance for CAT during the Pre-FAM Period. Commencing in 2020, CAT LLC performed an evaluation of various potential alternatives for CAT insurance policies, which included engaging in discussions with different insurance companies and conducting cost comparisons of various alternative approaches to insurance. Based on an analysis of a variety of factors, including coverage and premiums, CAT LLC determined to purchase cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance from USI Insurance Services LLC (''USI''). Such policies are standard for corporate entities, and cyber security liability insurance is important for the CAT System. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(IX) Professional and Administration Costs

In adopting the CAT NMS Plan, the Commission amended the Plan to add a requirement that CAT LLC's financial statements be prepared in compliance with GAAP, audited by an independent public accounting firm, and made publicly available.[51] The professional and administration costs include costs related to accounting and accounting advisory services to support the operating and financial functions of CAT, financial statement audit services by an independent accounting firm, preparation of tax returns, and various cash management and treasury functions. In addition, professional and administration costs for the Pre-FAM Period include costs related to the receipt of market data and a security assessment. The costs for these professional and administration services were $1,082,036 for the Pre-FAM Period.

*Financial Advisory Firm: Anchin Accountants & Advisors (''Anchin'').* CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT in April 2018. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services were paid by CAT LLC to Anchin.

After Anchin was hired in April 2018 through the end of the Pre-FAM Period on June 22, 2020 (excluding the period from April 2018 through November 15, 2018), Anchin provided a variety of services, including the following:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial reporting matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

*Accounting Firm: Grant Thornton LLP (''Grant Thornton'').* In February 2020, CAT LLC determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the proposed role given the balance of these considerations. Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services. The fees for these services were paid by CAT LLC to Grant Thornton.

*Market Data Provider: Exegy.* The professional and administrative costs for the Pre-FAM Period included costs related to the receipt of certain market data for the CAT pursuant to an agreement with the CAT LLC, and then with FCAT. Exegy provided SIP Data required by the CAT NMS Plan.

After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS

[51] Section 9.2 of the CAT NMS Plan.

Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy from July 2018 through March 2019. CAT LLC determined that, unlike certain other vendors, Exegy provided market data that included all data elements required by the CAT NMS Plan.[52] In addition, the fees were reasonable and in line with market rates for the market data received. Accordingly, the professional and administrative costs for the Pre-FAM Period include the Exegy costs from November 2018 through March 2019. The cost of the market data was reasonable for the market data received. The fees for the market data were paid directly by CAT LLC to Exegy.

Upon the termination of the contract between CAT LLC and Exegy, FCAT entered into a contract with Exegy to purchase the required market data from Exegy in July 2019. All costs under the contract were treated as a direct pass through cost to CAT LLC. Therefore, the fees for the market data were paid by CAT LLC to FCAT, who, in turn, paid Exegy for the market data.

*Security Assessment: RSM US LLP (''RSM'').* The operating costs for the Pre-FAM Period include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation, and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment. RSM performed the assessment from October 2018 through December 2018. Accordingly, the costs for the Pre-FAM Period include the costs incurred in November and December 2018. The cost for the security assessment were paid directly to RSM by CAT LLC.

(X) Public Relations Costs

The public relations costs of $224,669 represent the fees paid to public relations firms during the Pre-FAM Period for professional communications services to CAT, including media relations consulting, strategy and execution. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants. Specifically, the public relations firms provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). Public relations services were important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.

The services performed by each of the public relations firms were comparable. The fees for such services were reasonable and in line with market rates. Only one public relations firm was engaged at a time; the three firms were engaged sequentially as the primary public relations contact moved among the three firms during this time period.

*Public Relations Firm: Peppercomm, Inc. (''Peppercomm'').* The national securities exchanges and FINRA, acting as a consortium, determined to hire the public relations firm Peppercomm in October 2014 and continued to engage this firm through September 2017. The exchanges and FINRA made this engagement decision after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fee rates for this public relations firm were negotiated on an arm's length basis and were in line with market rates for these types of services. The public relations costs during the period from October 2014 until the formation of the CAT NMS, LLC were paid directly by the exchanges and FINRA to the public relations firm. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC.

*Public Relations Firm: Sloane & Company (''Sloane'').* CAT LLC determined to hire a new public relations firm, Sloane, in March 2018, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Sloane. CAT LLC continued the engagement with Sloane until February 2020.

*Public Relations Firm: Peak Strategies.* CAT LLC determined to hire a new public relations firm, Peak Strategies, in March 2020, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Peak Strategies.

(b) Historical CAT Costs Incurred in Financial Accountability Milestone Period 1

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 1 of the Financial Accountability Milestones (''FAM Period 1''),[53] which covers the period from June 22, 2020—July 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 1 of $6,377,343. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($2,125,781), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($2,125,781) and CEBSs paying one-third ($2,125,781). The following table breaks down Historical CAT Costs 1 for FAM Period 1 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Historical CAT costs for FAM Period 1 ** |
|---|---|
| Capitalized Developed Technology Costs * | $1,684,870 |
| *Technology Costs:* | 3,996,800 |
| Cloud Hosting Services | 2,642,122 |
| Operating Fees | 1,099,680 |
| CAIS Operating Fees | 254,998 |
| Change Request Fees | - |
| Legal | 481,687 |
| Consulting | 137,209 |

[52] *See* Section 6.5(a)(ii) of the CAT NMS Plan.

[53] Section 11.6(a)(i)(A) of the CAT NMS Plan.

| Operating expense | Historical CAT costs for FAM Period 1 ** |
|---|---|
| Insurance | |
| Professional and administration | 69,077 |
| Public relations | 7,700 |
| Total Operating Expenses | 6,377,343 |

* The non-cash amortization of these capitalized developed technology costs of $362,121 incurred during FAM Period 1 have been appropriately excluded from the above table.[54]

** The costs described in this table of costs for FAM Period 1 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

By the completion of FAM Period 1, CAT LLC was required to implement the reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of equities transaction data and options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.[55] CAT LLC completed the requirements of FAM Period 1 by July 31, 2020. The following describes the costs for each of the categories for FAM Period 1.

(I) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 1 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 1 Period. Accordingly, the $2,642,122 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 1. The fee arrangement for AWS described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. Moreover, CAT LLC continued to believe that AWS's maturity in the cloud services space as well as the significant cost and time necessary to move the CAT to a different cloud services provider supported the continued engagement of AWS.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 1 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, reference data and other types of Other Data. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 1.[56]

| | Date range: 6/22/20–7/31/20 |
|---|---|
| Average Daily Volume in Billions: | |
| Participant—Equities | 6 |
| Participant—Options | 103 |
| Industry Member—Equities | 7 |
| Industry Member—Options | 0.31 |
| SIP—Options & Equities | 74 |
| Average Total Daily Volume | 185 |
| Cumulative Total Events for the Period | 5,190 |
| Total Compute Hours for the Period | 2,612,082 |
| Storage Footprint at End of Period (Petabytes) | 57.47 |

(II) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 1. Accordingly, the $1,099,680 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 1. The fee arrangement for FCAT described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, FCAT's activities with respect to the CAT included the following:

- Published iterative drafts of draft Technical Specifications for Phase 2d, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Published iterative drafts of CAIS Technical Specifications, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Facilitated Industry Member reporting of Quote Sent Time on Options Market Maker quotes;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;

[54] As discussed above, with respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

[55] *See* definition of ''Initial Industry Member Core Equity and Options Reporting'' in Section 1.1 of the CAT NMS Plan.

[56] Note that the volume data described in this table does not include CAIS data.

- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 1. Accordingly, the $254,998 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 1. The fee arrangement for Kingland described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(IV) Technology Costs—Change Request Fees

CAT LLC did not incur costs related to change requests during FAM Period 1.

(V) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 1 of $1,684,870 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include: (1) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including separate production and industry test entitlements, and reprocessing of exchange event timestamps; (2) implementation fees; and (3) license fees.

(VI) Legal Costs

The legal costs of $481,687 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 1.

*Law Firm: WilmerHale.* CAT LLC continued to employ WilmerHale during FAM Period 1 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to WilmerHale. During FAM Period 1, WilmerHale provided legal assistance to the CAT including with regard to the following:

- Assisted with the development of the CAT funding model and drafted related amendments and fee filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, verbal activity, options market maker quote sent time, TRF linkages, and allocations;
- Provided interpretations related to CAT NMS Plan requirements, including the Financial Accountability Milestone amendment;
- Assisted with compliance with Regulation SCI;
- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the drafting of the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Assisted with communications and presentations for the industry regarding CAIS;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding CAT technical specifications;
- Assisted with third-party vendor agreements; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

*Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to Pillsbury. During FAM Period 1, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(VII) Consulting Costs

The consulting costs of $137,209 represent the fees paid to Deloitte as project manager during FAM Period 1. CAT LLC continued to employ Deloitte during FAM Period 1 based on, among other things, their expertise and cumulative experience with the CAT. The fee rates for Deloitte during FAM Period 1 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 1 were paid by CAT LLC to the consulting firm. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 1, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

Although insurance was in effect during FAM Period 1, CAT LLC did not incur costs related to insurance during FAM Period 1.

(IX) Professional and Administration Costs

*Financial Advisory Firm: Anchin.* The professional and administration costs of $69,077 represent the fees paid to Anchin during FAM Period 1. CAT LLC continued to employ Anchin during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these type of financial advisory services. The fees for these services during FAM Period 1 were paid by CAT LLC to Anchin. During FAM Period 1, Anchin provided a variety of services, including the following:

- Maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups; and
- Prepared monthly and quarterly financial statements.

(X) Public Relations Costs

The public relations costs of $7,700 represent the fees paid to Peak Strategies during FAM Period 1. CAT LLC continued to employ Peak Strategies during FAM Period 1 based on, among other things, their expertise and history with the project. The fee rates for this firm were reasonable and in line with market rates for these types of services. The fees for these services during FAM Period 1 were paid by CAT LLC to Peak Strategies. During FAM Period 1, Peak Strategies continued to provide professional communications services to CAT LLC, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(c) Historical CAT Costs Incurred in Financial Accountability Milestone Period 2

Historical CAT Costs 1 would include costs incurred by CAT LLC and already funded by Participants during Period 2 of the Financial Accountability Milestones (''FAM Period 2''),[57] which covers the period from August 1, 2020–December 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 2 of $42,976,478. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($14,325,493), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($14,325,493) and CEBSs paying one-third ($14,325,493). The following table breaks down Historical CAT Costs 1 for FAM Period 2 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Historical CAT costs for FAM Period 2** |
|---|---|
| Capitalized Developed Technology Costs* | $6,761,094 |
| *Technology Costs* | 31,460,033 |
| Cloud Hosting Services | 20,709,212 |
| Operating Fees | 9,108,700 |
| CAIS Operating Fees | 1,590,298 |
| Change Request Fees | 51,823 |
| Legal | 2,766,644 |
| Consulting | 532,146 |
| Insurance | 976,098 |
| Professional and administration | 438,523 |
| Public relations | 41,940 |
| Total Operating Expenses | 42,976,478 |

*The non-cash amortization of these capitalized developed technology costs of $1,892,505 incurred during FAM Period 2 have been appropriately excluded from the above table.[58]

**The costs described in this table of costs for FAM Period 2 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

By the completion of FAM Period 2, CAT LLC was required to implement the following with regard to the CAT:

(a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, CustomerID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section

[57] Section 11.6(a)(i)(B) of the CAT NMS Plan.

[58] As discussed above, with respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission.[59]

CAT LLC completed the requirements of FAM Period 2 by December 31, 2020. The following describes the costs for each of the categories for FAM Period 2.

(I) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 2 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 2 Period. Accordingly, the $20,709,212 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 2. The fee arrangement for AWS described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 2 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, and Other Data, including reference data. In addition, Industry Members began reporting LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 2.[60]

| | Date range: 8/1/20–12/31/20 |
|---|---|
| Average Daily Volume in Billions: | |
| Participant—Equities | 6 |
| Participant—Options | 116 |
| Industry Member—Equities | 11 |
| Industry Member—Options | 0.98 |
| SIP—Options & Equities | 80 |
| Average Total Daily Volume | 282 |
| Cumulative Total Events for the Period | 2,170 |
| Total Compute Hours for the Period | 15,660,392 |
| Storage Footprint at End of Period (Petabytes) | 114.59 |

(II) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 2. Accordingly, the $9,108,700 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 2. The fee arrangement for FCAT described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, FCAT's activities with respect to the CAT included publishing the Technical Specifications for Phase 2d and overseeing the reporting of firm to firm and intrafirm linkages by Industry Members. In addition, FCAT also continued to engage in the following activities during FAM Period 2:

- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the development and implementation of the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 2. Accordingly, the $1,590,298 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 2. The fee arrangement for Kingland described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs.

[59] *See* definition of ''Full Implementation of Core Equity Reporting Requirements'' in Section 1.1 of the CAT NMS Plan.

[60] Note that the volume data described in this table does not include CAIS data.

(IV) Technology Costs—Change Request Fees

During FAM Period 2, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 2, CAT incurred costs of $51,823 related to a change request regarding the addition of functionality for exchange Participants to report rejected messages to the CAT.

(V) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 2 of $6,761,094 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to separate production and industry test entitlements, market maker reference data, and back-processing of exchange exception logic; (3) implementation fees; and (4) license fees.

(VI) Legal Costs

The legal costs of $2,766,644 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 2.

*Law Firm: WilmerHale.* CAT LLC continued to employ WilmerHale during FAM Period 2 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to WilmerHale. During FAM Period 2, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, allocations, exchange activity, OTQT, initial data validation, error corrections and recordkeeping;
- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs and technical specifications;
- Provided support for the Operating Committee, Compliance Subcommittees, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6 of the CAT NMS Plan;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for the Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
- Provided guidance regarding SRO rule filings for the retirement of systems;
- Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;
- Assisted with third-party vendor agreements (*e.g.,* with regard to Anchin, Grant Thornton and insurance policies);
- Assisted with change requests; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

*Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to Pillsbury. During FAM Period 2, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted and filed a proposed amendment to the CAT NMS Plan regarding liability matters. As discussed above, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(VII) Consulting Costs

The consulting costs of $532,146 represent the fees paid to Deloitte as project manager during FAM Period 2. CAT LLC continued to employ Deloitte during FAM Period 2 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 2 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 2 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 2, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

The insurance costs of $976,098 represent the fees paid for insurance during FAM Period 2. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(IX) Professional and Administration Costs

The professional and administration costs of $438,523 represent the fees paid to Anchin and Grant Thornton for financial services provided during FAM Period 2.

*Financial Advisory Firm: Anchin.* CAT LLC continued to engage Anchin during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these types of financial advisory services. The fees for these services during FAM Period 2 were paid by CAT LLC to Anchin. During FAM Period 2, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;

• Provided cash management and treasury functions;
• Facilitated bill payments;
• Provided monthly bookkeeping;
• Reviewed vendor invoices and documentation in support of cash disbursements;
• Provided accounting research and consultations on various accounting, financial reporting and tax matters;
• Addressed not-for-profit tax and accounting considerations;
• Prepared tax returns;
• Addressed various accounting, financial reporting and operating inquiries from the Participants;
• Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
• Supported compliance with the CAT NMS Plan;
• Worked with and provided support to the Operating Committee and various CAT working groups;
• Prepared monthly, quarterly and annual financial statements;
• Supported the annual financial statement audit by an independent auditor; and
• Reviewed historical costs from inception.

*Accounting Firm: Grant Thornton.* CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 2 based on, among other things, its expertise and cumulative knowledge of CAT LLC. CAT LLC continued to believe that Grant Thornton was well qualified for its role and its fee rates were in line with market rates for these accounting services. The fees for these services during FAM Period 2 were paid by CAT LLC to Grant Thornton. During FAM Period 2, Grant Thornton performed a financial statement audit for CAT LLC as an independent accounting firm.

(X) Public Relations Costs

The public relations costs of $41,940 represent the fees paid to Peak Strategies during FAM Period 2. CAT LLC continued to employ Peak Strategies during FAM Period 2 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 2 were paid by CAT LLC to Peak Strategies. During FAM Period 2, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(d) Historical CAT Costs Incurred in Financial Accountability Milestone Period 3

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 3 of the Financial Accountability Milestones (''FAM Period 3''),[61] which covers the period from January 1, 2021–December 31, 2021. Historical CAT Costs 1 would include costs for FAM Period 3 of $144,415,268. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($48,138,423), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($48,138,423) and CEBSs paying one-third ($48,138,423). The following table breaks down Historical CAT Costs 1 for FAM Period 3 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Historical CAT costs for FAM Period 3 ** |
|---|---|
| Capitalized Developed Technology Costs * | $10,763,372 |
| *Technology Costs* | 123,639,402 |
| Cloud Hosting Services | 94,574,759 |
| Operating Fees | 23,106,091 |
| CAIS Operating Fees | 5,562,383 |
| Change Request Fees | 396,169 |
| Legal | 6,333,248 |
| Consulting | 1,408,209 |
| Insurance | 1,582,714 |
| Professional and administration | 595,923 |
| Public relations | 92,400 |
| Total Operating Expenses | 144,415,268 |

* The non-cash amortization of these capitalized developed technology costs of $5,108,044 incurred during FAM Period 3 have been appropriately excluded from the above table.[62]
** The costs described in this table of costs for FAM Period 3 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

By the completion of FAM Period 3, CAT LLC was required to implement the following requirements with regard to the CAT: (a) reporting to the Order Audit Trail System (''OATS'') is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and

[61] Section 11.6(a)(i)(C) of the CAT NMS Plan.

[62] As discussed above, with respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met.[63]

CAT LLC completed the requirements of FAM Period 3 by December 31, 2021. The following describes the costs for each of the categories for FAM Period 3.

(I) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 3 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 3 Period. Accordingly, the $94,574,759 in technology costs for cloud hosting services represents costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 3. The fee arrangement for AWS described above for the earlier periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During FAM Period 3, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a, Phase 2b, Phase 2c and Phase 2d Industry Member Data (including certain linkages), SIP Data, Other Data, including reference data, and LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 3.[64]

| | Date range: 1/1/21 to 4/25/21 | Date range: 4/26/21 to 12/31/21 * |
|---|---|---|
| Average Daily Volume in Billions: | | |
| Participant—Equities | 9 | 9 |
| Participant—Options | 135 | 136 |
| Industry Member—Equities | 20 | 19 |
| Industry Member—Options | 2 | 2 |
| SIP—Options & Equities | 129 | 137 |
| Average Total Daily Volume | 297 | 304 |
| Cumulative Total Events for the Period | 7,480 | 5,310 |
| Total Compute Hours for the Period | 15,860,304 | 33,487,318 |
| Storage Footprint at End of Period (Petabytes) | 180.22 | 284.62 |

* Start of Participant Equities in CAT format and SIP Equities on 4/26/21.

(II) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 3. Accordingly, the $23,106,091 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 3. The fee arrangement for FCAT described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, FCAT's activities with respect to the CAT included the following:

- Facilitated Phase 2c and Phase 2d testing for Industry Members;
- Oversaw creation of linkages of the lifecycle of order events based on the received data through Phase 2d;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement with FCAT discussed above, Kingland continued in its role as a subcontractor for the development and

[63] *See* definition of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' in Section 1.1 of the CAT NMS Plan.

[64] Note that the volume data described in this table does not include CAIS data.

implementation of CAIS during FAM Period 3. Accordingly, the $5,562,383 in technology costs for CAIS operating fees represents costs incurred for services provided by Kingland during FAM Period 3. The fee arrangement for Kingland described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs. The full CAIS Technical Specifications were published during FAM Period 3.

(IV) Technology Costs—Change Request Fees

During FAM Period 3, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 3, CAT incurred costs of $396,169 related to change requests, including the following: (1) the addition of functionality for exchange Participants to report rejected messages to the CAT; (2) the migration of MIRS query engine to AWS to reduce operational costs and increase resiliency; and (3) updating the Participant Technical Specifications to allow for two-sided Participant option quote reporting.

(V) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 3 of $10,763,372 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor, including the transition from equity data received by FINRA pursuant to various regulatory services agreements between FINRA and Participant exchanges to the equity CAT Data, and the completion of the Industry Member Phase 2d options manual and complex orders go-live requirements; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to off-exchange volume concentration, Participant 24-hour trading and an external metastore; (3) implementation fees; and (4) license fees.

(VI) Legal Costs

The legal costs of $6,333,248 represent the fees paid for legal services provided by three law firms, WilmerHale, Pillsbury and Covington & Burling LLP (''Covington'') during FAM Period 3.

*Law Firm: WilmerHale.* CAT LLC continued to employ WilmerHale during FAM Period 3 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to WilmerHale. During FAM Period 3, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements, including, for example, verbal activity regarding Phase 2c cutover, error reports, error corrections, Phase 2d Reporting, unique Order-ID on internal route events, reporting addresses, recordkeeping, and unique CCID for foreign customers;
- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs, CAIS requirements, ADF, and technical specifications;
- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6(c) of the CAT NMS Plan;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for the Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
- Provided guidance regarding SRO rule filings for the retirement of systems;
- Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;
- Provided assistance with change requests;
- Provided guidance and regulatory support for litigation regarding the response to the SEC's exemptive orders;
- Assisted with communications with the industry, including CAT Alerts and presentations;
- Provided guidance regarding the confidentiality of CAT Data, including third-party information requests;
- Assisted with cost management analysis and proposals; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

*Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to Pillsbury. During FAM Period 3, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During this period, Pillsbury advised CAT LLC regarding applicable legal matters, reviewed and responded to comment letters regarding the proposed Plan amendment, participated in meetings with senior SEC staff, responded to comments submitted following the SEC's April 6, 2021 order instituting proceedings,[65] and assessed legal matters regarding the SEC's October 29, 2021 order denying the proposed Plan amendment.[66]

*Law Firm: Covington.* CAT LLC hired Covington for litigation with the SEC regarding certain exemptive orders related to the CAT, including orders issued in December 2020.[67] CAT LLC interviewed this law firm as well as other potential law firms, considering a variety of factors in its analysis for choosing legal assistance, including the relevant expertise and fees of the potential lawyers. CAT LLC approved the engagement of Covington in January 2021. The fee rates for this law firm, which were calculated based on hourly rates, were in line with market rates for specialized services. The legal fees for FAM Period 3 for this firm were paid by CAT LLC to Covington.

After Covington was hired in 2021 through the end of 2021, the firm provided legal assistance regarding the litigation with the SEC regarding the

[65] Securities Exchange Act Rel. No. 91487 (Apr. 6, 2021), 86 FR 19054 (Apr. 12, 2021).

[66] Securities Exchange Act Rel. No. 93484 (Oct. 29, 2021), 86 FR 60933 (Nov. 4, 2021).

[67] *See* Securities Exchange Act Rel. No. 90688 (Dec. 16, 2020), 85 FR 83634 (Dec. 22, 2020); and Securities Exchange Act Rel. No. 90689 (Dec. 16, 2020), 85 FR 83667 (Dec. 22, 2020) (collectively, the ''2020 Orders'').

2020 Orders. These services included researching, drafting, and filing motions to stay the 2020 orders and related materials in proceedings before the SEC, as well as researching, drafting, and filing petitions for judicial review of the 2020 Orders in proceedings before the U.S. Court of Appeals for the D.C. Circuit. Covington oversaw ongoing litigation proceedings on these matters, and also supported WilmerHale with respect to settlement negotiations with the SEC staff regarding the 2020 Orders.

In addition to these services, CAT LLC engaged Covington in November 2021 to provide assistance with respect to the SEC's disapproval of CAT NMS Plan amendments concerning a proposed limitation on liability in the event of a data breach or similar event. Covington provided advice concerning CAT's response to the SEC's disapproval order. This work accounted for a minority of Covington's fees in 2021.[68]

(VII) Consulting Costs

The consulting costs of $1,408,209 represent the fees paid to Deloitte as project manager during FAM Period 3. CAT LLC continued to employ Deloitte during FAM Period 3 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 3 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 3 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 3, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

The insurance costs of $1,582,714 represent the fees paid for insurance during FAM Period 3. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(IX) Professional and Administration Costs

The professional and administration costs of $595,923 represent the fees paid to Anchin and Grant Thornton for financial services during FAM Period 3.

*Financial Advisory Firm: Anchin.* CAT LLC continued to employ Anchin during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services during FAM Period 3 were paid by CAT LLC to Anchin. During FAM Period 3, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Faciliated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

*Accounting Firm: Grant Thornton.* CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 3 based on, among other things, their expertise and cumulative knowledge of CAT LLC. CAT LLC determined that Grant Thornton was well qualified for its role and that its fixed fee rates were in line with market rates for these accountant services. The fees for these services during FAM Period 3 were paid by CAT LLC to Grant Thornton. During FAM Period 3, Grant Thornton provided audited financial statements for CAT LLC.

(X) Public Relations Costs

The public relations costs of $92,400 represent the fees paid to Peak Strategies during FAM Period 3. CAT LLC continued to employ Peak Strategies during FAM Period 3 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 3 were paid by CAT LLC to Peak Strategies. During FAM Period 3, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(e) Excluded Costs

Historical CAT Costs 1 would not include three categories of CAT costs (''Excluded Costs''): (1) $14,749,362 of costs related to the termination of the relationship with the Initial Plan

[68] As discussed above with regard to Pillsbury's work on liability matters, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, such activity is a necessary part of the operation of the CAT.

Processor; (2) $48,874,937, which are all CAT costs incurred from November 15, 2017 through November 15, 2018; and (3) $19,628,791, which are costs paid to the Initial Plan Processor from November 16, 2018 through February 2019 when the relationship with the Initial Plan Processor was concluded. The Participants would remain responsible for 100% of these costs, which total $83,253,090. CAT LLC determined to exclude these Excluded Costs from Historical CAT Costs 1 because these costs relate to the delay in the start of reporting to the CAT and the conclusion of the relationship with the Initial Plan Processor.[69]

(I) Costs Related to Conclusion of Relationship With Initial Plan Processor

First, Historical CAT Costs 1 would not include $14,749,362 of costs related to the conclusion of the relationship with the Initial Plan Processor. Such costs include costs related to the American Arbitration Association, the legal assistance of Pillsbury with regard to the arbitration with the Initial Plan Processor, and the settlement costs related to the arbitration with the Initial Plan Processor. The Participants would remain responsible for 100% of these $14,749,362 in costs.

(II) Costs Incurred From November 15, 2017 Through November 15, 2018

Second, Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018. CAT LLC determined to exclude all costs during this one-year period of $48,874,937 from fees charged to Industry Members due to the delay in the start of reporting to the CAT. The Participants would remain responsible for 100% of these $48,874,937 in costs. The following table breaks down these costs into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Excluded costs for November 15, 2017–November 15, 2018 * |
|---|---|
| Capitalized Developed Technology Costs | $37,852,083 |
| *Technology Costs:* | |
| Cloud Hosting Services | |
| Operating Fees | |
| CAIS Operating Fees | |
| Change Request Fees | |
| Legal | 6,143,278 |
| Consulting | 4,452,106 |
| Insurance | |
| Professional and administration | 340,145 |
| Public relations | 87,325 |
| Total Operating Expenses | 48,874,937 |

* The costs described in this table of Excluded Costs were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

The following provides additional detail regarding the Excluded Costs.

(a) Technology Costs—Cloud Hosting Services, Operating Fees, CAIS Operating Fees and Change Request Fees

CAT LLC did not incur technology costs related to the categories of cloud hosting services, operating fees, CAIS operating fees or change requests during the period from November 15, 2017 through November 15, 2018.

(b) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for the period from November 15, 2017 through November 15, 2018 include capitalizable application development costs of $37,852,083 incurred in the development of the CAT by the Initial Plan Processor. Such costs include development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Initial Plan Processor. Such costs include costs related to Industry Member technical specifications for orders and transactions, the system security plan, testing and production for Participant CAT reporting, third-party security assessment and response, query portal, onboarding of the Chief Information Security Officer, and ingestion of FINRA TRF data and FINRA data related to halts and corporate actions.

(c) Legal Costs

The legal costs of $6,143,278 represent the fees paid to WilmerHale for legal services from November 15, 2017 through November 15, 2018. During this period, WilmerHale provided legal assistance to the CAT, including with regard to the following:

- Provided legal support for the governance of the CAT, including governance support for the Operating Committee, Advisory Committee, Compliance Subcommittee, and CAT working groups;
- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan;
- Provided assistance related to CAT security;
- Drafted exemptive requests, including requests related to PII;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided interpretations of and related to the CAT NMS Plan;
- Provided advice with regard to regulator access to the CAT;
- Assisted with the Plan Processor transition;
- Provided assistance regarding communications with the industry regarding the CAT;
- Provided advice regarding Customer Account Information and PII;
- Provided support for litigation related to SEC exemptive orders; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing

[69] In approving the CAT Funding Model, the Commission states that ''the proposed exclusion of the excluded costs from Past CAT Costs is appropriate in the Commission's view because it would not require all costs incurred by the Participants to be recovered from Industry Members through the Historical CAT Assessment, specifically excluding those costs related to the delay in the start of reporting to the CAT and costs related to the conclusion of the relationship with the Initial Plan Processor.'' CAT Funding Model Approval Order at 13450.

interpretative and implementation issues.

(d) Consulting Costs

The consulting costs of $4,452,106 represent the fees paid to Deloitte for their role as project manager for the CAT from November 15, 2017 through November 15, 2018. During this period, Deloitte engaged in the following activities with respect to the CAT:

- Implemented program operations for the CAT project;
- Provided governance support to the Operating Committee, including support for Subcommittees and working groups of the Operating Committee (*e.g.,* Compliance Subcommittee, Cost and Funding Working Group, Technical Working Group, Industry Outreach Working Group, Security Working Group and Steering Committee);
- Assisted with cost and funding issues for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress.

(e) Insurance

CAT LLC did not incur costs related to insurance during the period from November 15, 2017 through November 15, 2018.

(f) Professional and Administration Costs

The professional and administration costs of $340,145 represent the fees paid to Anchin, Exegy and RSM from November 15, 2017 through November 15, 2018.

*Financial Advisory Firm: Anchin.* From the commencement of its engagement in April 2018 through November 15, 2018, Anchin engaged in the following activities with respect to the CAT:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

*Market Data Provider: Exegy.* From July 2018 through November 15, 2018, CAT LLC purchased market data from Exegy (as described in more detail above).

*Security Assessment: RSM.* From October 2018 through November 15, 2018, CAT LLC incurred costs for RSM's performance of a security assessment (as described in more detail above).

(g) Public Relations Costs

The public relations costs of $87,325 represent the fees paid to Sloane from November 15, 2017 through November 15, 2018. From the commencement of its engagment in March 2018 through November 15, 2018, Sloane provided professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, Sloane provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan).

(III) Costs Paid to Initial Plan Processor From November 16, 2018 Through February 2019

Third, Historical CAT Costs 1 would not include the $19,628,791 in costs paid to the Initial Plan Processor from November 16, 2018 through February 2019 when CAT LLC's relationship with the Initial Plan Processor concluded. CAT LLC determined that Historical CAT Costs 1 would not include any fees paid to the Initial Plan Processor after November 15, 2017,[70] which was the date by which Participants were required to begin reporting to the CAT.[71] As discussed above, the Participants determined that Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes $37,852,083 in Initial Plan Processor costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Initial Plan Processor costs incurred after November 15, 2018 are the $19,628,791 in costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these $19,628,791 in costs.

(ii) Previously Invoiced Costs for Historical CAT Costs 1

CEBBs and CEBSs collectively have been invoiced for $173,075,024 of the $212,039,879.34 of Historical CAT Costs 1 via Historical CAT Assessment 1, where $86,537,512 was invoiced collectively to CEBBs and $86,537,512 was invoiced collectively to CEBSs. Accordingly, Historical CAT Assessment 1A would seek to recover the remaining $38,964,855.34 of Historical CAT Costs 1 collectively from CEBBs and CEBSs, where CEBBs collectively will be responsible for $19,482,427.67, and CEBSs collectively will be responsible for $19,482,427.67.

(C) Historical Recovery Period 1A

Under the CAT NMS Plan, the Operating Committee is required to reasonably establish the length of the Historical Recovery Period used in calculating each Historical Fee Rate based upon the amount of the Historical CAT Costs to be recovered by the Historical CAT Assessment, and to

[70] As discussed below, CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. *See* Section 3(a)(10)(E) below.

[71] The SEC approved the CAT NMS Plan on November 15, 2016, and Participant reporting was required to begin on the first anniversary of this date, November 15, 2017. *See* Section 6.3 of the CAT NMS Plan and CAT NMS Plan Approval Order.

describe the reasons for its length.[72] The Historical Recovery Period used in calculating the Historical Fee Rate may not be less than 24 months or more than five years.[73] The Operating Committee has determined to establish a Historical Recovery Period 1A of 24 months for Historical CAT Assessment 1A.

The Operating Committee determined that the length of Historical Recovery Period 1A appropriately weighs the need for a reasonable Historical Fee Rate 1A that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans to the Participants in a timely fashion. The Operating Committee determined that 24 months for Historical Recovery Period 1A would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.[74] In addition, in establishing a Historical Recovery Period of 24 months, the Operating Committee recognized that the total costs for Historical CAT Assessment 1A were less than the total costs for 2022 and 2023,[75] and therefore it would be reasonable and appropriate to recover costs subject to this filing over an approximate two-year period.[76]

The length of the Historical Recovery Period 1A and the reasons for its length are provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.[77]

(D) Projected Total Executed Equivalent Share Volume

The calculation of the fee rate for Historical CAT Assessment 1A also requires the determination of the projected total executed equivalent share volume of transactions in Eligible Securities for Historical Recovery Period 1A. Under the CAT NMS Plan, the Operating Committee is required to ''reasonably determine the projected total executed equivalent share volume of all transactions in Eligible Securities for each Historical Recovery Period based on the executed equivalent share volume of all transactions in Eligible Securities for the prior twelve months.'' [78] The Operating Committee is required to base its projection on the prior twelve months, but it may use its discretion to analyze the likely volume for the upcoming year. Such discretion would allow the Operating Committee to use its judgment when estimating projected total executed equivalent share volume if the volume over the prior twelve months was unusual or otherwise unfit to serve as the basis of a future volume estimate.[79]

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from March 2025 through February 2026 was 5,980,937,549,360.49 executed equivalent shares. The Operating Committee has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1A by doubling the executed equivalent share volume for the prior 12 months. The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has increased from prior years (*e.g.,* the executed equivalent share volume for 2024 was 4,295,884,600,069.4), and the Operating Committee believes that it is reasonable to conclude that the annual executed equivalent share volume will remain at the higher level. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1A is projected to be 11,961,875,098,720.98 executed equivalent shares.[80]

The projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1A and a description of the calculation of the projection is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.[81]

(E) Fee Rate for Historical CAT Assessment 1A

The fee rate for Historical CAT Assessment 1A would be calculated by dividing the total amount of costs to be recovered by Historical CAT Assessment 1A by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1A, and dividing by 2. Specifically, the fee rate for Historical CAT Assessment 1A would be calculated by dividing $38,964,855.34 by 11,961,875,098,720.98, and then dividing by 2, which equals $0.00000162871017371542 per executed equivalent shares. Rounding this to six decimal places results in a fee rate of $0.000002 per executed equivalent share.[82] This fee rate is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide the Historical Fee Rate in a fee filing for a Historical CAT Assessment.[83]

(3) Past CAT Costs and Participants

Participants would not be required to pay any fees associated with Historical CAT Assessment 1A as the Participants previously have paid all Past CAT Costs. The CAT NMS Plan explains that:

> Because Participants previously have paid Past CAT Costs via loans to the Company, Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs and such other additional Past CAT Costs as reasonably determined by the Operating Committee will be paid by the cancellation of loans made to the Company on a pro rata basis based on the outstanding loan amounts due under the loans.[84]

The CAT NMS Plan further states that ''Historical CAT Assessments are designed to recover two-thirds of the Historical CAT Costs.'' [85]

[72] Section 11.3(b)(i)(D)(I) and Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[73] Section 11.3(b)(i)(D)(I) of the CAT NMS Plan. In the CAT Funding Model Approval Order, the SEC stated that ''[i]n the Commission's view, it is appropriate for the Operating Committee to establish the length of the Historical Recovery Period to be no less than 24 months and no more than five years.'' CAT Funding Model Approval Order at 13451.

[74] For example, as the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from $0.00007 per share to $0.00072 per share. CAT Funding Model at 13469.

[75] The total CAT costs for 2022 were approximately $186 million and the total CAT costs for 2023 were approximately $233 million.

[76] Note that the proposed 24-month recovery period also recognizes the prohibition on the collection of Historical CAT Assessments after March 31, 2028 as set forth in Section 11.3(f) of the CAT NMS Plan.

[77] Section 11.3(b)(iii)(B)(II)(C) of the CAT NMS Plan.

[78] Section 11.3(b)(i)(E) of the CAT NMS Plan.

[79] CAT Funding Model Approval Order at 13452.

[80] This projection was calculated by multiplying 5,980,937,549,360.49 executed equivalent shares by two.

[81] Section 11.3(b)(iii)(B)(II)(D) of the CAT NMS Plan.

[82] As the SEC noted in approving the CAT Funding Model, the fee filing would provide the exact fee per executed equivalent share and describe the relevant number of decimal places for the fee rate. CAT Funding Model Approval Order at 13445, n.677. The Operating Committee determined to use six decimal places to balance the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

[83] Section 11.3(b)(iii)(B)(II)(A) of the CAT NMS Plan.

[84] Section 11.3(b)(ii) of the CAT NMS Plan.

[85] *Id.* In approving the CAT Funding Model, the Commission stated that the proposed allocation of the Historical CAT Assessment solely to CEBSs and CEBBs is appropriate. The Historical CAT Assessment will still be divided into thirds, as the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made to the Company. CAT Funding Model Approval Order at 13453.

(4) Monthly Fees

CEBBs and CEBSs would be required to pay fees for Historical CAT Assessment 1A on a monthly basis for the period in which Historical CAT Assessment 1A is in effect.[86] A CEBB or CEBS's fee for each month would be calculated based on the transactions in Eligible Securities executed by the CEBB or CEBS from the prior month.[87] Proposed paragraph (a)(2)(A) of 24X Rule 4.18 would state that each CAT Executing Broker would receive its first invoice in June 2026, and ''would receive an invoice each month thereafter in which Historical CAT Assessment 1A is in effect.'' Proposed paragraph (a)(2)(B) of 24X Rule 4.18 would state that ''Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1A on a monthly basis.'' In addition, proposed paragraph (b)(1) of 24X Rule 4.18 would state that each CEBB and CEBS is required to pay its CAT fees ''each month.''

(5) Actual Recovery Period for Historical CAT Assessment 1A

The CAT NMS Plan states that, ''[n]otwithstanding the length of the Historical Recovery Period used in calculating the Historical Fee Rate, each Historical CAT Assessment calculated using the Historical Fee Rate will remain in effect until all Historical CAT Costs for the Historical CAT Assessment are collected.'' [88] Accordingly, Historical CAT Assessment 1A will remain in effect until the remaining $38,964,855.34 of Historical CAT Costs 1 have been collected.[89] The actual recovery period for Historical CAT Assessment 1A may be shorter or longer than Historical Recovery Period 1A depending on the actual executed equivalent share volumes during the time that Historical CAT Assessment 1A is in effect and subject to any time limitation in the CAT NMS Plan.[90]

(6) Consolidated Audit Trail Funding Fees

To implement Historical CAT Assessment 1A, a new Rule 4.18 would be added to the Exchange's rulebook, called ''Consolidated Audit Trail Funding Fees,'' and it would include the proposed paragraphs described below.

(A) Fee Schedule for Historical CAT Assessment 1A

The CAT NMS Plan states that:

Each month in which a Historical CAT Assessment is in effect, each CEBB and each CEBS shall pay a fee for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate reasonably determined pursuant to paragraph (b)(i) of this Section 11.3.[91]

Accordingly, based on the factors discussed above, the Exchange proposes to add paragraph (a)(2) to 24X Rule 4.18. Proposed paragraph (a)(2) would state the following:

(A) Each CAT Executing Broker shall receive its first invoice for Historical CAT Assessment 1A in June 2026, which shall set forth the Historical CAT Assessment 1A fees calculated based on transactions in May 2026, and shall receive an invoice for Historical CAT Assessment 1A for each month thereafter in which Historical CAT Assessment 1A is in effect.

(B) Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1A on a monthly basis. Each month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (''CEBB'') and/or the CAT Executing Broker for the Seller (''CEBS'') (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of $0.000002 per executed equivalent share.

(C) Historical CAT Assessment 1A will remain in effect until $38,964,855.34 is collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time. Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1A will no longer be in effect.

(D) Each CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1A in accordance with paragraph (b).

Proposed paragraph (a)(2)(B) of 24X Rule 4.18 would set forth the fee rate of $0.000002 per executed equivalent share for Historical CAT Assessment 1A, which is calculated as discussed above.

The proposed language in paragraph (a)(2)(B) of 24X Rule 4.18 would describe when CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1A. Specifically, CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1A in June 2026 and the fees set forth in that invoice would be calculated based on transactions executed in the prior month, that is, transactions executed in May 2026. The payment for the first invoice would be required within 30 days after the receipt of the first invoice (unless a longer period is indicated), as described in proposed paragraph (b)(2) of 24X Rule 4.18.

Proposed paragraph (a)(2)(A) of 24X Rule 4.18 also would describe the monthly cadence of the invoices for Historical CAT Assessment 1A. Specifically, after the first invoices are provided to CAT Executing Brokers in June 2026, invoices will be sent to CAT Executing Brokers each month thereafter while Historical CAT Assessment 1A is in effect.

Proposed paragraph (a)(2)(B) of 24X Rule 4.18 would describe the invoices for Historical CAT Assessment 1A. Proposed paragraph (a)(2)(B) of 24X Rule 4.18 would state that ''Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1A on a monthly basis.'' Proposed paragraph (a)(2)(B) of 24X Rule 4.18 also would describe the fees to be set forth in the invoices for Historical CAT Assessment 1A. Specifically, it would state that ''[e]ach month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (''CEBB'') and/or the CAT Executing Broker for the Seller (''CEBS'') (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of $0.000002 per executed equivalent share.''

Furthermore, proposed paragraph (a)(2)(C) of 24X Rule 4.18 would describe how long Historical CAT Assessment 1A would remain in effect. It would state that ''Historical CAT Assessment 1A will remain in effect until $38,964,855.34 is collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time.'' This proposed paragraph would further state that ''Consolidated Audit Trail, LLC will

[86] *See* Section 11.3(b)(iii)(A) of the CAT NMS Plan.

[87] *See* proposed paragraph (a)(2)(B) of 24X Rule 4.18.

[88] Section 11.3(b)(i)(D)(II) of the CAT NMS Plan.

[89] In approving the CAT Funding Model, the Commission stated that, ''[i]n the Commission's view, it is appropriate for Industry Members to be charged a Historical CAT Assessment until all Historical CAT Costs for the Historical CAT Assessment are collected.'' CAT Funding Model Approval Order at 13452.

[90] Section 11.3(f) of the CAT NMS Plan would prohibit the billing of Historical CAT Assessments after March 31, 2028.

[91] Section 11.3(b)(iii)(A) of the CAT NMS Plan.

provide notice when Historical CAT Assessment 1A will no longer be in effect.''

Historical CAT Assessment 1A will be assessed for all transactions executed in each month through the end of the month in which $38,964,855.34 is assessed, and then CAT LLC will provide notice that Historical CAT Assessment 1A is no longer in effect. Since Historical CAT Assessment 1A is a monthly fee based on transaction volume from the prior month, Historical CAT Assessment 1A may collect more than $38,964,855.34. To the extent that occurs, any excess money collected during the final month in which Historical CAT Assessment 1A is in effect will be used to offset future fees and/or to fund the reserve for the CAT.

Finally, proposed paragraph (a)(2)(D) of 24X Rule 4.18 sets forth the requirement for the CAT Executing Brokers to pay the invoices for Historical CAT Assessment 1A. It would state that ''[e]ach CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1A in accordance with paragraph (b).''

(B) Manner of Payment

The Exchange also proposes to add paragraph (b)(1) to 24X Rule 4.18 to describe the manner of payment of Industry Member CAT fees. Proposed paragraph (b)(1) states that ''[e]ach CAT Executing Broker shall pay its CAT fees as required pursuant to paragraph (a) each month to the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.'' The CAT NMS Plan requires the Operating Committee to establish a system for the collection of CAT fees.[92] The Plan Processor has established a billing system for CAT fees.[93] Therefore, the Exchange proposes to require CAT Executing Brokers to pay Historical CAT Assessment 1A in accordance with such system.

(C) Failure to Pay CAT Fees

The CAT NMS Plan further states that:

> Participants shall require each Industry Member to pay all applicable fees authorized under this Article XI within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due (as determined in accordance with the preceding sentence), such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of: (a) the Prime Rate plus 300 basis points; or (b) the maximum rate permitted by applicable law.[94]

Accordingly, the Exchange also proposes to add this requirement to 24X Rule 4.18. Specifically, proposed paragraph (b)(2) of 24X Rule 4.18 states:

> Each CAT Executing Broker shall pay the CAT fees required pursuant to paragraph (a) within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If a CAT Executing Broker fails to pay any such CAT fee when due, such CAT Executing Broker shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300 basis points, or (ii) the maximum rate permitted by applicable law.

The requirements of paragraph (b)(2) would apply to Historical CAT Assessment 1A.

(7) Historical CAT Assessment Details

The CAT NMS Plan states that

> Details regarding the calculation of a CAT Executing Broker's Historical CAT Assessment will be provided upon request to such CAT Executing Broker. At a minimum, such details would include each CAT Executing Broker's executed equivalent share volume and corresponding fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.[95]

Such information would provide CEBBs and CEBSs with the ability to understand the details regarding the calculation of their Historical CAT Assessment.[96] CAT LLC will provide CAT Executing Brokers with these details regarding the calculation of their Historical CAT Assessments on their monthly invoice for the Historical CAT Assessment.

In addition, CAT LLC will make certain aggregate statistics regarding Historical CAT Assessments publicly available. Specifically, the CAT NMS Plan states that, ''[f]or each Historical CAT Assessment, at a minimum, CAT LLC will make publicly available the aggregate executed equivalent share volume and corresponding aggregate fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise on an exchange, and (3) by buy-side transactions and sell-side transactions.'' [97] Such aggregate statistics will be available on the CAT website.

Furthermore, CAT LLC will make publicly available on the CAT website the total amount invoiced each month that Historical CAT Assessment 1A is in effect as well as the total amount invoiced for Historical CAT Assessment 1A for all months since its commencement. CAT LLC also will make publicly available on the CAT website the total costs to be collected from Industry Members for Historical CAT Assessment 1A. By reviewing statistics regarding how much has been invoiced and how much remains to be invoiced for Historical CAT Assessment 1A, Industry Members would have sufficient information to reasonably track how much longer Historical CAT Assessment 1A is likely to be in place.

(8) Billing Implementation

To date, CAT LLC, via FCAT, has billed Industry Members for Historical CAT Assessment 1 and certain Prospective CAT Fees. Industry Members will be billed for Historical CAT Assessment 1A via the same processes established for Historical CAT Assessment 1 and the Prospective CAT Fees. Accordingly, Industry Members have substantial experience with the CAT billing processes.

(9) Financial Accountability Milestones

The CAT NMS Plan states that ''[n]o Participant will make a filing with the SEC pursuant to Section 19(b) of the Exchange Act regarding any Historical CAT Assessment until any applicable Financial Accountability Milestone described in Section 11.6 has been satisfied.'' [98] The CAT NMS Plan further states that ''in all filings submitted by the Participants to the Commission under Section 19(b) of the Exchange Act, to establish or implement Post-Amendment Industry Member Fees pursuant to this Article, . . . the

[92] Section 11.4 of the CAT NMS Plan.

[93] The billing process and system are described in CAT Alert 2023–02 as well as the CAT FAQs related to the billing of CAT fees, the Industry Member CAT Reporter Portal User Guide, the FCAT Industry Member Onboarding Guide, the FCAT Connectivity Supplement for Industry Members and the CAT Billing Webinars (dated Sept. 28, 2023, and Nov. 7, 2023), each available on the CAT website.

[94] Section 11.4 of the CAT NMS Plan.

[95] Section 11.3(a)(iv)(A) of the CAT NMS Plan.

[96] In approving the CAT Funding Model, the Commission stated that, ''[i]n the Commission's view, providing CAT Execut[ing] Brokers information regarding the calculation of their CAT Fees will aid in transparency and permit CAT Execut[ing] Brokers to confirm the accuracy of their invoices for CAT Fees.'' CAT Funding Model Approval Order at 13454.

[97] Section 11.3(a)(iv)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission stated that ''[t]he publication of the aggregate executed equivalent share volume and aggregate fee is appropriate because it would allow Participants and CAT Executing Brokers a high-level validation of executed volume and fees.'' CAT Funding Model Approval Order at 13454.

[98] Section 11.3(b)(iii)(B)(III) of the CAT NMS Plan.

Participants shall clearly indicate whether such fees are related to Post-Amendment Expenses incurred during Period 1, Period 2, Period 3, or Period 4.'' [99] As discussed in detail below, all applicable Financial Accountability Milestones for Historical CAT Assessment 1A—that is, Period 1, Period 2 and Period 3 of the Financial Accountability Milestones—have been satisfied. Furthermore, as discussed below, this filing clearly indicates that Historical CAT Assessment 1A relates to Post-Amendment Expenses incurred during Periods 1, 2 and 3 of the Financial Accountability Milestones.

(A) Period 1 of the Financial Accountability Milestones

In accordance with Section 11.6(b) of the CAT NMS Plan, Historical CAT Assessment 1A seeks to recover costs that are related to ''all fees, costs, and expenses (including legal and consulting fees, costs, and expenses) incurred by or for the Company in connection with the development, implementation and operation of the CAT from the effective date of [Section 11.6 of the CAT NMS Plan] until such time as Full Implementation of CAT NMS Plan Requirements has been achieved'' [100] (''Post-Amendment Expenses'') incurred during FAM Period 1. FAM Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and Options Reporting. Section 1.1 of the CAT NMS Plan defines ''Initial Industry Member Core Equity and Options Reporting'' as:

> The reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of both: (a) equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information; and (b) options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports.[101] As indicated by the Participants' Quarterly Progress Report for the third quarter of 2020,[102] Initial Industry Member Core Equity and Option Reporting was completed on schedule on July 22, 2020, which is prior to the July 31, 2020 deadline.

Under the FAM Period 1 requirement of Initial Industry Member Core Equity and Options Reporting, Industry Members—excluding Small Industry Members that are not OATS reporters—were required to report two categories of data to the CAT: equites transaction data and options transaction data (both excluding Customer Account Information, Customer-ID, and Customer Identifying Information) by July 31, 2020. Pursuant to exemptive relief provided by the Commission, the Commission authorized the Participants' Compliance Rules to allow core equity reporting for Industry Members (Phase 2a) to begin on June 22, 2020 and core options reporting for Industry Members (Phase 2b) to begin on July 20, 2020.[103]

In adopting the FAMs, the Commission stated that the equities transaction reporting required for FAM Period 1 ''is consistent with the functionality that the Participants describe on the CAT NMS Plan website as 'Production Go-Live for Equities 2a file submission and data integrity validations.' '' [104] The Phase 2a Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order, and includes the following data related to Eligible Securities that are equities:

- All events and scenarios covered by OATS, which includes information related to the receipt or origination of orders, order transmittal, and order modifications, cancellations and executions;
- Reportable Events for: (1) proprietary orders, including market maker orders, for Eligible Securities that are equities; (2) electronic quotes in listed equity Eligible Securities (*i.e.,* NMS stocks) sent to a national securities exchange or FINRA's Alternative Display Facility (''ADF''); (3) electronic quotes in unlisted Eligible Securities (*i.e.,* OTC Equity Securities) received by an Industry Member operating an interdealer quotation system (''IDQS''); and (4) electronic quotes in unlisted Eligible Securities sent to an IDQS or other quotation system not operated by a Participant or Industry Member;
- Firm Designated IDs (''FDIDs''), which Industry Members must report to the CAT as required by Sections 6.3(d)(i)(A) and 6.4(d)(ii)(C) of the CAT NMS Plan;
- Industry Members would be required to report all street side representative orders, including both agency and proprietary orders and mark such orders as representative orders, except in certain limited exceptions as described in the Industry Member Technical Specifications;
- The link between the street side representative order and the order being represented when: (1) the representative order was originated specifically to represent a single order received either from a customer or another broker-dealer; and (2) there is (a) an existing direct electronic link in the Industry Member's system between the order being represented and the representative order and (b) any resulting executions are immediately and automatically applied to the represented order in the Industry Member's system;
- Manual and Electronic Capture Time for Manual Order Events;
- Special handling instructions for the original receipt or origination of an order during Phase 2a; and
- When routing an order, whether the order was routed as an intermarket sweep order (''ISO'').

In Phase 2a, Industry Members were not required to report modifications of a previously routed order in certain limited instances, nor were they required to report a cancellation of an order received from a Customer after the order has been executed.[105]

The Quarterly Progress Report for the third quarter of 2020 states that ''Interim Step: Production Go-Live for Equities 2a file submission and data integrity validation (Large Industry Members and Small OATS Reporters)'' was completed on June 22, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of ''equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information'' was completed on June 22, 2020.

[99] Section 11.6(b) of the CAT NMS Plan.

[100] Section 11.6 of the CAT NMS Plan.

[101] The Quarterly Progress Reports are available at *https://www.catnmsplan.com/implementation-plan*.

[102] *See* Q3 2020 Quarterly Progress Report (Oct. 30, 2020) and Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021).

[103] *See* Phased Reporting Exemptive Relief Order. Under the CAT NMS Plan as adopted, the Participants were required, through their Compliance Rules, to require their Large Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2018, and to require their Small Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2019. Sections 6.7(a)(v) and (vi) of the CAT NMS Plan. The SEC granted exemptive relief from these provisions of the CAT NMS Plan to allow for the phased implementation of Industry Member reporting via five phases addressing the reporting requirements for Phase 2a Industry Member Data, Phase 2b Industry Member Data, Phase 2c Industry Member Data, Phase 2d Industry Member Data and Phase 2e Industry Member Data.

[104] Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31330 n.97 (May 22, 2020) (''FAM Adopting Release'').

[105] Phased Reporting Exemptive Relief Order at 23076–78.

In adopting the FAMs, the Commission stated that the options transaction reporting required for FAM Period 1 is ''consistent with the functionality that the Participants describe on the CAT NMS Plan website as 'Production Go-Live for Options 2b file submission and data integrity validations.' '' [106] The Phase 2b Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order, and includes the Industry Member Data related to Eligible Securities that are options and related to simple electronic option orders, excluding electronic paired option orders. A simple electronic option order is an order to buy or sell a single option that is not related to or dependent on any other transaction for pricing and timing of execution that is either received or routed electronically by an Industry Member. Electronic receipt of an order is defined as the initial receipt of an order by an Industry Member in electronic form in standard format directly into an order handling or execution system. Electronic routing of an order is the routing of an order via electronic medium in standard format from one Industry Member's order handling or execution system to an exchange or another Industry Member. An electronic paired option order is an electronic option order that contains both the buy and sell side that is routed to another Industry Member or exchange for crossing and/or price improvement as a single transaction on an exchange. Responses to auctions of simple orders and paired simple orders would be reportable in Phase 2b. Furthermore, combined orders in options would be treated in Phase 2b in the same way as equity representative orders are treated in Phase 2a. A combined order would mean, as permitted by SRO rules, a single, simple order in Listed Options created by combining individual, simple orders in Listed Options from a customer with the same exchange origin code before routing to an exchange. During Phase 2b, the single combined order sent to an exchange must be reported and marked as a combined order, but the linkage to the underlying orders is not required to be reported until Phase 2d.[107]

The Quarterly Progress Report for the third quarter of 2020 states that ''Interim Step: Production Go-Live for Options 2b file submission and data integrity validations'' was completed on July 20, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of ''options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information'' was completed on July 20, 2020.

As discussed above, the remaining Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1A would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020. The total costs for this period, as discussed above, are $6,377,343. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($2,125,781) and CEBSs paying one-third ($2,125,781) through Historical CAT Assessment 1 and Historical CAT Assessment 1A.

(B) Period 2 of the Financial Accountability Milestones

Historical CAT Assessment 1A seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 2. FAM Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. Section 1.1 of the CAT NMS Plan defines ''Full Implementation of Core Equity Reporting'' as:

> the point at which: (a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the fourth quarter of 2020,[108] Full Implementation of Core Equity Reporting was completed on schedule by December 31, 2020.

Specifically, the Full Implementation of Core Equity Reporting requires the satisfaction of two prongs. The first prong requires Participants to have fully implemented the first phase of equities transaction reporting for Industry Members (excluding Small Industry Members that are not OATS reporters) at an Error Rate of less than 5%. In addition, equities transaction data produced by the CAT at this stage must also be sufficiently interlinked so as to permit full analysis of an order's lifecycle across the national market, excluding full linkage of representative orders. As CAT LLC reported on its Quarterly Progress Reports, Phase 2a was fully implemented as of October 26, 2020, including intra-firm, inter-firm, national securities exchange, and trade reporting facilities linkages.[109] In addition to the reporting of Phase 2a Industry Member Data as described above with regard to FAM Period 1, the following linkage data was added to the CAT as described in the Quarterly Progress Reports for the third and fourth quarter of 2020:

- ''Production Go-Live for Equities 2a Intrafirm Linkage validations'' was completed on 7/27/2020; [110]
- ''Production Go-Live for Firm to Firm Linkage validations for Equities 2a (Large Industry Members and Small OATS Reporters)'' was completed on October 26, 2020; and
- ''Production Go-Live for Equities 2a Exchange and TRF Linkage validations (Large Industry Members and Small OATS Reporters)'' was completed on October 26, 2020.

Furthermore, as CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2020, the average overall error rate for Phase 2a Industry Member Data was less than 5% as of December 31, 2020. The average overall error rate was calculated by dividing the compliance errors by processed records.

The second prong of this FAM requires that the equities transaction data collected by the CAT at this stage be made available to regulators through two basic query tools required by the CAT NMS Plan—a targeted query tool that will enable regulators to retrieve

[106] FAM Adopting Release at 31330, n.98.

[107] Phased Reporting Exemptive Relief Order at 23078.

[108] Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

[109] For a description of the requirements of Phases 2a, *see* Phased Reporting Exemptive Relief Order.

[110] Q3 2020 Quarterly Progress Report (Oct. 20, 2021).

data via an online query screen with a variety of predefined selection criteria, and a user-defined direct query tool that will provide regulators with the ability to query data using all available attributes and data sources.[111] As CAT LLC reported on its Quarterly Progress Reports, the query tool functionality incorporating the data from Phase 2a was available to the Participants and the Commission as of December 31, 2020.[112]

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.[113]

As discussed above, the remaining Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1A would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. The total costs for this period, as discussed above, are $42,976,478. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($14,325,492.70) and CEBSs paying one-third ($14,325,492.70) through Historical CAT Assessment 1 and Historical CAT Assessment 1A.

(C) Period 3 of the Financial Accountability Milestones

Historical CAT Assessment 1A seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 3. FAM Period 3 began on January 1, 2021, and concluded on December 31, 2021, the date of the Full Availability and Regulatory Utilization of Transactional Database Functionality. Section 1.1 of the CAT NMS Plan defines ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' as:

> the point at which: (a) reporting to the Order Audit Trail System (''OATS'') is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the fourth quarter of 2021,[114] Full Availability and Regulatory Utilization of Transactional Database Functionality was completed on schedule by December 31, 2021.

Specifically, the ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' requires the satisfaction of five prongs. The first prong requires that reporting to the Order Audit Trail System (''OATS'') is no longer required for new orders. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021,[115] FINRA retired OATS effective September 1, 2021.[116] Accordingly, after the retirement of OATS, reporting to OATS was no longer required.

In addition to Phase 2a and Phase 2b Industry Member Data, the second and third prongs of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' require Industry Member reporting of Phase 2c Industry Member Data and Phase 2d Industry Member Data. The Phase 2c Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. That Order states that ''Phase 2c Industry Member Data'' is Industry Member Data related to Eligible Securities that are equities other than Phase 2a Industry Member Data, Phase 2d Industry Member Data, or Phase 2e Industry Member Data. Specifically, the Phase 2c Industry Member Data includes Industry Member Data that is related to Eligible Securities that are equities and that is related to: (1) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (2) quotes in unlisted Eligible Securities sent to an IDQS operated by a CAT Reporter (reportable by the Industry Member sending the quotes) (except for quotes reportable in Phase 2d, as discussed below); (3) electronic quotes in listed equity Eligible Securities (*i.e.,* NMS stocks) that are not sent to a national securities exchange or FINRA's Alternative Display Facility; (4) reporting changes to client instructions regarding modifications to algorithms; (5) marking as a representative order any order originated to work a customer order in price guarantee scenarios, such as a guaranteed VWAP; (6) flagging rejected external routes to indicate a route was not accepted by the receiving destination; (7) linkage of duplicate electronic messages related to a Manual Order Event between the electronic event and the original manual route; (8) special handling instructions on order route reports (other than the ISO, which is required to be reported in Phase 2a); (9) quote identifier on trade events; (10) reporting of LTIDs (if applicable) for accounts with Reportable Events that are reportable to CAT as of and including Phase 2c; (11) reporting of date account opened or Account Effective Date (as applicable) for accounts and reporting of a flag indicating the Firm Designated ID type as account or relationship; (12) order effective time for orders that are received by an Industry Member and do not become effective until a later time;

[111] At the time of this FAM, Section 6.10(c)(i)(A) of the CAT NMS Plan required the Plan Processor to ''provide Participants and the SEC with access to all CAT Data stored in the Central Repository'' via an ''online targeted query tool,'' and Appendix D, Sections 8.1.1–8.1.3 of the CAT NMS Plan described the required functionality associated with this regulatory tool. Appendix D, Section 8.2.1 describes the required functionality associated with a user-defined direct query tool that will ''deliver large sets of data that can then be used in internal surveillance or market analysis applications.''

[112] *See* Q3 2020 Quarterly Progress Report (Oct. 30, 2020); Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021); and Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

[113] Securities Exchange Act Rel. No. 98848 (Nov. 2, 2023), 88 FR 77128, 77129 n.13 (Nov. 8, 2023) (''Settlement Exemptive Order'').

[114] Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

[115] *Id.*

[116] Securities Exchange Act Rel. No. 92239 (June 23, 2021), 86 FR 34293 (June 29, 2021).

(13) the modification or cancellation of an internal route of an order; and (14) linkages to the customer orders(s) being represented for representative order scenarios, including agency average price trades, net trades, aggregated orders, and disconnected Order Management System (''OMS'')—Execution Management System (''EMS'') scenarios, as required in the Industry Member Technical Specifications.[117]

Phase 2c Industry Member Data also includes electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are equities and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: (1) an equity bid or offer is displayed publicly or has been communicated (a) for listed securities to the ADF operated by FINRA; or (b) for unlisted equity securities to an ''interdealer quotation system,'' as defined in FINRA Rule 6420(c); or (2) an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing; *i.e.,* no further manual or electronic action is required by the responder providing the quote in order to execute or cause a trade to be executed). With respect to OTC Equity Securities, OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter (other than such an IDQS that does not match and execute orders) are reportable by the Industry Member sending them in Phase 2c. Accordingly, any response to a request for quote or other form of solicitation response provided in a standard electronic format (*e.g.,* FIX) that meets this quote definition (*i.e.,* an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing) would be reportable in Phase 2c.[118]

The Phase 2d Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. ''Phase 2d Industry Member Data'' is Industry Member Data that is related to Eligible Securities that are options other than Phase 2b Industry Member Data, Industry Member Data that is related to Eligible Securities that are equities other than Phase 2a Industry Member Data or Phase 2c Industry Member Data, and Industry Member Data other than Phase 2e Industry Member Data. Phase 2d Industry Member Data includes with respect to the Eligible Securities that are options: (1) simple manual orders; (2) electronic and manual paired orders; (3) all complex orders with linkages to all CAT-reportable legs; (4) LTIDs (if applicable) for accounts with Reportable Events for Phase 2d; (5) date account opened or Account Effective Date (as applicable) for accounts with an LTID and flag indicating the Firm Designated ID type as account or relationship for such accounts; (6) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (7) the modification or cancellation of an internal route of an order; and (8) linkage between a combined order and the original customer orders. Phase 2d Industry Member Data also would include electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are options and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: a listed option bid or offer which is accessible electronically by customers or other market participants and is immediately actionable (*i.e.,* no further action is required by the responder providing the quote in order to execute or cause a trade to be executed). Accordingly, any response to a request for quote or other form of solicitation response provided in standard electronic format (*e.g.,* FIX) that meets this definition is reportable in Phase 2d for options.[119]

Phase 2d Industry Member Data also includes with respect to Eligible Securities that are options or equities (1) receipt time of cancellation and modification instructions through Order Cancel Request and Order Modification Request events; (2) modifications of previously routed orders in certain instances; and (3) OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter that does not match and execute orders. In addition, subject to any exemptive or other relief, Phase 2d Industry Member Data will include verbal or manual quotes on an exchange floor or in the over-the-counter market, where verbal quotes and manual quotes are defined as bids or offers in Eligible Securities provided verbally or that are provided or received other than via a CAT Reporter's order handling and execution system (*e.g.,* quotations provided via email or instant messaging).[120]

The Quarterly Progress Report for the fourth quarter of 2021 states that ''Phase 2a was fully implemented as of October 26, 2020;'' ''Phase 2b was fully implemented as of January 4, 2021;'' ''Phase 2c was implemented as of April 26, 2021;'' and ''Phase 2d was fully implemented as of December 13, 2021.'' [121] The Quarterly Progress Reports for 2021 provide additional detail regarding the implementation of these steps including the following:

- ''Production Go-Live for Equities 2c reporting requirements (Large Industry Members)'' was completed on April 26, 2021;
- ''LTID Account Information Reporting Go-Live for Phases 2a, 2b and 2c (Large Industry Members)'' was completed on April 26, 2021;
- ''FCAT Plan Processor creates linkages of the lifecycle of order events based on the received data through Phase 2d Production Go-Live for Options 2d reporting requirements (Large Industry Members)'' was completed on December 13, 2021;
- ''Production Go-Live for Options 2d reporting requirements (Large Industry Members)'' was completed on December 13, 2021;
- ''Production Go-Live for Options 2b reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)'' was completed on December 13, 2021;
- ''Production Go-Live for Equities 2c reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)'' was completed on December 13, 2021;
- ''Production Go-Live for Options 2d reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)'' was completed on December 13, 2021;
- ''LTID Account Information Reporting Go-Live for Phases 2d (Large Industry Members)'' was completed on December 13, 2021; and
- ''LTID Account Information Reporting Go-Live for Phases 2a, 2b, 2c and 2d (Small Industry Members)'' was completed on December 13, 2021.[122]

The third prong of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' also imposes an Error Rate requirement of 5% or less. The Quarterly Progress Report for the fourth quarter of 2021 states the average overall error rate was

[117] Phase Reporting Exemptive Relief Order at 23078–79.

[118] *Id.* at 23079.

[119] *Id.*

[120] *Id.* at 23079–80.

[121] *See* Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

[122] *See* Q2 2021 Quarterly Progress Report (July 27, 2021); and Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

less than 5% as of December 31, 2021. The average overall error rate was calculated by dividing the compliance errors by processed records.

The fourth prong of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' requires that the data collected by the CAT at this stage be made available to regulators through an online targeted query tool and a user-defined direct query tool. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021, the query tool functionality incorporating the data from Phases 2a, 2b, 2c and 2d was available to the Participants and to the Commission as of December 31, 2021.[123]

The fifth prong requires the requirements of Section 6.10(a) of the CAT NMS Plan to have been met. Section 6.10(a) of the CAT NMS Plan requires the Participants to use the tools described in Appendix D to ''develop and implement a surveillance system, or enhance existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository.'' The Exchange implemented a surveillance system, or enhanced existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository as of December 31, 2021 in accordance with Section 6.10(a) of the CAT NMS Plan.[124]

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.[125]

As discussed above, the remaining Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1A would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2021 through December 31, 2021. The total costs for this period, as discussed above, are $144,415,268. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remain two-thirds, with CEBBs paying one-third ($48,138,422.70) and CEBSs paying one-third ($48,138,422.70) through Historical CAT Assessment 1 and Historical CAT Assessment 1A.

(D) Additional Considerations Related to the Financial Accountability Milestones

As discussed above, CAT LLC has satisfied the Financial Accountability Milestones (''FAMs'') for Periods 1 through 3.[126] As discussed below, none of the circumstances related to NIA Electronic RFQ Responses, the 2023 Verbal Quotes Exemption, the November 2023 Order, or Executing Broker reporting, affect the conclusion that the FAMs for Periods 1 through 3 were satisfied in a timely fashion.

(i) NIA Electronic RFQ Responses

CAT LLC does not believe that the exemptive relief relating to the reporting of electronic responses for quotes (''RFQs'') that are not immediately actionable (''NIA Electronic RFQ Responses'') affect the conclusion that FAMs 1 through 3 have been satisfied. The only reason CAT LLC pursued this relief is because certain Industry Members introduced concerns that NIA Electronic RFQ Responses could be considered ''orders'' reportable pursuant to Rule 613(j)(8) and some Industry Members were not prepared to report such orders to CAT. Thus, the relief was requested on behalf of Industry Members. CAT LLC itself has not taken any position on whether NIA Electronic RFQ Responses are ''orders,'' as the definition of ''order'' is an SEC rule and the trading processes for NIA Electronic RFQ Responses are the Industry Members', not those of the Participants or CAT LLC. Accordingly, CAT LLC stated in its letter that ''Industry Members must determine whether trading interest falls within the definition of an 'order' for CAT purposes. To the extent an NIA Electronic RFQ Response is not considered an 'order'' as defined in Rule 613(j)(8) and the CAT NMS Plan, it would not be reportable to CAT.'' [127]

Only ''orders'' as defined in SEC Rule 613(j)(8) are reportable to CAT. There is no agreement across the industry or among regulators as to whether NIA Electronic RFQ Responses are ''orders'' reportable to CAT. Certain Industry Members have raised the question as to whether NIA Electronic RFQ Responses are orders, but others have argued that they are not orders under Rule 613(j)(8).[128] Indeed, members of the Advisory Committee, which CAT LLC relies upon for guidance with regard to Industry Member issues, have not had a definitive view on whether NIA Electronic RFQ Responses are orders. As Rule 613(j)(8) is an SEC rule, CAT LLC believes that only the SEC can provide a definitive determination as to if, and under what circumstances, an NIA Electronic RFQ Response is considered an ''order'' reportable to CAT. The issue has persisted for some time. As a result, CAT LLC filed an exemptive request regarding NIA Electronic RFQ Responses for clarity on the interpretive issue. As recently as April 2024, Industry Members have re-raised this issue stating that the SEC agrees that it must provide additional guidance on this interpretive issue to resolve the CAT reporting issue for NIA Electronic RFQ Responses:

> As further discussed in the prior FIF letters, even if the Commission had the legal authority to require the reporting of NIA RFQ responses to CAT without an amendment to Rule 613, the Commission has not provided guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT. In subsequent discussions with industry members, Commission representatives have agreed that, prior to NIA RFQ responses being reportable to CAT, it would be necessary for the Commission to provide further guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT.[129]

On May 20, 2024, the Commission granted CAT LLC's request for exemptive relief from certain CAT reporting requirements pertaining to NIA Electronic RFQ Responses to the extent such responses are considered ''orders'' reportable pursuant to Rule 613(j)(8).[130] The Commission, however, did not provide additional guidance regarding the conditions under which NIA Electronic RFQ Responses would be reportable to CAT. The Commission stated in its exemptive order that ''[t]o the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included

[123] *See* Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

[124] *See* Q1 2021 Quarterly Progress Report (Apr. 30, 2021); Q2 2021 Quarterly Progress Report (July 27, 2021); Q3 2021 Quarterly Progress Report (Nov. 1, 2021); and Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

[125] Settlement Exemptive Order at 77129 n.13.

[126] In May 2020, the Commission adopted amendments to the CAT NMS Plan that establish four Financial Accountability Milestones and set target deadlines by which these milestones must be achieved. These amendments also reduce the amount of any fees, costs, and expenses that may be recovered from Industry Members if the Participants fail to meet the target deadlines. FAM Adopting Release.

[127] *See* Letter from Brandon Becker, Chair, CAT NMS Plan Operating Committee to Vanessa Countryman, Secretary, Commission (Feb. 13, 2024) at 2.

[128] *See, e.g.,* Letter from Howard Meyerson, Managing Director, FIF, to Sai Rao, Counsel for Trading and Markets, Office of the Chair (Apr. 25, 2024).

[129] *Id.*

[130] Securities Exchange Act Rel. No. 100181 (May 20, 2024), 89 FR 45715 (May 23, 2024).

in the requirements for the Financial Accountability Milestones, provided that any conditions of the exemption are satisfied.'' [131]

When the Commission proposed the FAMs, the Participants expressed concern that, ''by conditioning the ability of CAT LLC and the Participants to collect Post-Amendment Industry Member Fees on factors dependent on the efforts of Industry Members, the Commission's proposals inadvertently establish a perverse incentive for Industry Members to devote less than maximum efforts to comply with their obligations related to the CAT as they will pay less fees in such instances.'' [132] The Participants further warned that ''Industry Members may request or require unanticipated reporting delays to address Industry Member implementation issues or concerns,'' but that, ''[f]aced with financial penalties for missed deadlines, the Participants may not be able to fully address legitimate industry concerns or accommodate requests for delays with respect to future deadlines.'' [133] CAT LLC has engaged in good faith to help address NIA Electronic RFQ Responses and other concerns relevant to the ability of Industry Members to meet their CAT reporting obligations. CAT LLC should not be penalized financially for seeking in good faith to resolve a difficult interpretive issue for the benefit of Industry Members.

(ii) 2023 Verbal Quotes Exemption

CAT LLC does not believe that the Commission's May 19, 2023 order granting temporary exemptive relief relating to certain verbal floor activity and unstructured verbal and electronic upstairs activity (the ''2023 Verbal Quotes Exemption'') affects the conclusion that FAMs 1 through 3 have been satisfied. The 2023 Verbal Quotes Exemption, which was issued on May 19, 2023, is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. The relevant exemption for this time period is the Commission's November 12, 2020 order, which granted relief for the same activity through July 31, 2023 (the ''2020 Verbal Quotes Order'').[134] The Commission has stated that, ''to the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for a Financial Accountability Milestone, provided that the conditions of the exemption are satisfied.'' [135] Here, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3.[136]

(iii) November 2023 Order

CAT LLC does not believe that the Commission's November 2, 2023 order granting relief from certain CAT NMS Plan requirements (the ''November 2023 Order'') affects the conclusion that FAMs 1 through 3 have been satisfied. The November 2023 Order is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. As described in the November 2023 Order, the relevant exemptive orders for this time period were issued on December 16, 2020, which also states that ''the Commission has determined that the Participants have sufficiently complied with the conditions set forth in the prior Orders and with the technical requirements for Quarterly Progress Reports set forth in section 6.6(c) of the CAT NMS Plan, including for purposes of determining compliance with any applicable Financial Accountability Milestones.'' [137] The November 2023 Exemption Order is consistent with the Commission's repeated statements in the FAM adopting release that it would have ''authority to grant exemptive relief from any requirement associated with a particular Financial Accountability Milestone,'' citing Section 36 of the Exchange Act and Rule 608.[138] Similarly, the CAT NMS Plan expressly contemplates the Commission's ability to grant exemptive relief from any CAT NMS Plan requirement.[139]

(iv) Executing Broker Reporting

CAT LLC also completed the requirements of FAM Period 2, including the required linkages, by December 31, 2020. Although Participant exchanges may report the Executing Broker to CAT differently in certain situations, these reporting differences are irrelevant for linkage purposes as the fields used for CAT Executing Broker are not used for linkage.

(10) Additional Support for Reasonableness of Historical CAT Costs

The CAT Funding Model approved by the Commission permits the recovery of reasonable costs in each of the categories of CAT costs sought to be recovered via Historical CAT Assessment 1A.[140] As described in detail above and in further detail below, the CAT costs to be recovered for each category are reasonable. The following discusses in further detail how each of the following costs are reasonable: (1) costs incurred prior to the effective date of the CAT NMS Plan; (2) cloud hosting services costs; (3) costs related to funding model filings; (4) costs related to litigation with the SEC regarding the CAT NMS Plan; (5) costs related to the Initial Plan Processor; (6) CAIS implementation costs; (7) public relations costs; (8) legal costs related to the limitation of liability provision in the CAT Reporter agreements; and (9) costs for the Chair of CAT Operating Committee. As discussed in detail below, each of these costs is reasonable

[131] *Id.* at n.11.

[132] *See* Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission at 9 (Oct. 28, 2019).

[133] *Id.* at 10.

[134] Securities Exchange Act Rel. No. 90405, 85 FR 73544 (Nov. 18, 2020) (the ''2020 Verbal Quotes Exemption'').

[135] *See, e.g.,* Securities Exchange Act Rel. No. 89051 (June 11, 2020), 85 FR 36631, 36633 (June 17, 2020). The straightforward reading of the Commission's statement is that compliance with the conditions of an exemption will be measured as of the deadline for a particular FAM Period.

[136] As a condition to the 2020 Verbal Quotes Exemption, the Commission required that the Participants provide a written status update on the reporting of these quotes and orders by July 31, 2022, including the estimated costs of reporting these quotes and orders and an implementation plan for the reporting of these quotes and orders. As noted, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3. In any event, on June 3, 2022, the Participants provided the required written status update. *See* Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (June 3, 2022).

[137] *Id.* at 77129 n.12.

[138] FAM Adopting Release at 31335 (May 22, 2020). Section 36 of the Exchange Act grants the Commission the authority to ''conditionally or unconditionally exempt any person, security, or transaction . . . from any provision or provisions of [the Exchange Act] or of any rule or regulation thereunder, to the extent that such exemption is necessary or appropriate in the public interest, and is consistent with the protection of investors.'' 15 U.S.C. 78mm(a)(1). Under Rule 608(e) of Regulation NMS, the Commission may ''exempt from [Rule 608], either unconditionally or on specified terms and conditions, any self-regulatory organization, member thereof, or specified security, if the Commission determines that such exemption is consistent with the public interest, the protection of investors, the maintenance of fair and orderly markets and the removal of impediments to, and perfection of the mechanism of, a national market system.'' 17 CFR 242.608(e).

[139] Section 12.3 of the CAT NMS Plan (''[T]o the extent the SEC grants exemptive relief applicable to any provision of this Agreement, Participants and Industry Members shall be entitled to comply with such provision pursuant to the terms of the exemptive relief so granted at the time such relief is granted irrespective of whether this Agreement has been amended.'')

[140] *See* Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

and should be recoverable in accordance with the CAT Funding Model.

(A) Costs Incurred Prior to the Effective Date of CAT NMS Plan

CAT LLC believes that it is reasonable to seek recovery of costs incurred prior to when the CAT NMS Plan became effective in November 2016, such as legal and consulting fees incurred to create the CAT NMS Plan. Rule 613 specifically mandates that the CAT be created, implemented and maintained, and further provides that the CAT NMS Plan include a proposed allocation of estimated costs to fund the creation, implementation and maintenance of the CAT among the Participants (referred to as ''plan sponsors''), and between the Participants and Industry Members (referred to as ''members of the plan sponsors'').[141] Consistent with Rule 613, the CAT NMS Plan, as approved by the Commission, specifically authorizes charging Industry Members fees for costs reasonably incurred prior to the date of the approval of the CAT NMS Plan by the Commission in November 2016, including legal and consulting costs. Section 11.1(c) of the CAT NMS Plan states that:

> [i]n determining fees on Participants and Industry Members the Operating Committee shall take into account fees, costs and expenses (including legal and consulting fees and expenses) reasonably incurred by Participants on behalf of the Company prior to the Effective Date in connection with the creation and implementation of the CAT.

Accordingly, the CAT NMS Plan specifically permits the recovery of costs, including legal and consulting costs, reasonably incurred prior to November 2016 in connection with the creation and implementation of the CAT.

Furthermore, the costs incurred to create and implement the CAT prior to the effective date of the CAT NMS Plan (''Pre-Formation Costs'') were reasonable both in scope and amount, in accordance with the requirements of Section 11.1(c) of the CAT NMS Plan. During the four-year period from 2012 to 2016, a total of $13,842,881 in Pre-Formation Costs were incurred. This is an average of approximately $3.5 million per year over this period. The Pre-Formation Costs fell into three categories: legal costs, consulting costs and public relations costs. This includes legal costs of $3,196,434; consulting costs of $10,589,273; and public relations costs of $57,174. The legal, consulting and public relations services were performed by WilmerHale, Deloitte and Peppercomm, respectively. The selection considerations and fees for these three firms are described in detail above and are described further below. The Pre-Formation Costs are direct costs of CAT, which have been funded entirely by the Participants through non-interest-bearing notes. The Pre-Formation Costs do not include the significant costs incurred by each of the individual Participants in responding to the adoption of Rule 613.

The Pre-Formation Costs are reasonable and appropriate as they reflect the extensive efforts that were necessary to create the CAT NMS Plan as mandated after the SEC's adoption of Rule 613. As described in more detail below, these efforts included, among other things, developing a plan for selecting the Plan Processor, soliciting and evaluating bids, engaging a diverse set of market participants and the SEC in the development of the Plan, interacting with the SEC in their oversight of the development of the Plan, and seeking appropriate exemptive relief to address areas of concern in Rule 613.[142]

(i) Request for Proposal (''RFP'')

The Participants determined to utilize an RFP to ensure that potential alternative solutions for creating the Plan could be presented and considered, and that a detailed and meaningful cost-benefit analysis could be performed. The SEC supported the use of an RFP, and approved its use as it is described in extensive detail in the CAT NMS Plan.[143]

In the context of the SEC's adoption of Rule 613, commenters urged the Commission to utilize an RFP process to assist in the planning and design of the NMS plan.[144] Specifically, the Commission explained:

> In this regard, several commenters suggested that the Commission undergo a RFP or request for information (''RFI'') process to create and implement a consolidated audit trail. Specifically, FIF urged the Commission to perform a RFP process ''to determine the best technical solution for developing a consolidated audit trail.'' FIF suggested that the Commission ''should outline a set of goals and guiding principles they are striving to achieve as part of the adopted CAT filing and leave the determination of data elements and other technical requirements to [an] industry working group.'' Similarly, Direct Edge suggested that Commission staff should form and engage in a working group to develop an RFP for publication by the Commission. DirectEdge explained that an RFP process would facilitate the identification of the costs and benefits of the audit trail, as well as the consideration of a wider range of technological solutions. Further, commenters, including Broadridge Financial Solutions, Inc., a technology provider, also requested more specific information about the audit trail system to better assess the Commission's initial cost estimates and to determine the best approach to the consolidated audit trail.[145]

In response to these comments, the Commission modified Rule 613 to require the Participants to address certain important considerations regarding the features and details of the NMS plan and to extend the timeframe for submission of the CAT NMS Plan by the Participants from the 90 days as originally proposed to 270 days, in part, to accommodate a process that would address these considerations.[146] As the SEC noted, ''[i]n light of the numerous specific requirements of Rule 613, the Participants concluded that publication of a request for proposal ('RFP') was necessary to ensure that potential alternative solutions to creating the consolidated audit trail can be presented and considered by the Participants and that a detailed and meaningful cost/benefit analysis can be performed, both of which are required considerations to be addressed in the CAT NMS Plan.'' [147]

The SEC specifically recognized that the Participants planned to use an RFP when it approved the Selection Plan, and stated that the RFP was a reasonable approach.[148] As the SEC described in its approval order for the Selection Plan, ''[t]he Participants filed the [Selection] Plan to govern how the SROs will proceed with formulating and submitting the CAT NMS Plan—and, as part of that process, how to review, evaluate, and narrow down the bids submitted in response to the RFP ('Bids')—and ultimately choosing the plan processor that will build, operate, and maintain the consolidated audit

[141] *See, e.g.,* Rule 613(a)(1)(vii)(D) of the CAT NMS Plan.

[142] The Participants described in detail the process for drafting the CAT NMS Plan in its original filing of the CAT NMS Plan. *See* Letter from Mike Simon, on behalf of the Participants of the CAT NMS Plan, to Brent J. Fields, Secretary, Commission (Sept. 30, 2014). A non-exclusive list of filings and activities associated with CAT, including certain pre-2016 filings, are available on the SEC's website: *https://www.sec.gov/divisions/marketreg/rule613-info.*

[143] *See* detailed discussion of RFP questions in Appendix C of the CAT NMS Plan, and incorporation of RFP requirements in Appendix D at D–2.

[144] For example, in its comments on proposed Rule 613, FIF suggested ''that the SROs should select the processor through a 'request for proposal.'" Rule 613 Adopting Release at 45785.

[145] Rule 613 Adopting Release at 45738–39.

[146] Rule 613 Adopting Release at 45739.

[147] Securities Exchange Act Rel. No. 71596 (Feb. 21, 2014), 79 FR 11152, 11152 (Feb. 27, 2014) (''Selection Plan Approval Order'').

[148] *Id.*

trail ('Plan Processor').'' [149] After evaluating the Selection Plan, including the use of an RFP process, the Commission stated that it ''believes the [Selection] Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail.'' [150]

On February 26, 2013, the Participants published an RFP soliciting bids from parties interested in serving as the plan processor for the CAT. Initially, 31 firms submitted intentions to bid. In the following months, the Participants engaged with potential bidders with respect to, among other things, the selection process, selection criteria, and potential bidders' questions and concerns. On March 21, 2014, the Participants received ten bids in response to the RFP.

(ii) Selection Plan

On September 4, 2013, the Participants filed with the Commission a national market system plan to govern the process for Participant review of the bids submitted in response to the RFP, the procedures for evaluating the bids, and, ultimately, selection of the plan processor (the ''Selection Plan'').[151] The Commission approved the Selection Plan as filed on February 21, 2014.[152] In approving the Selection Plan, the Commission concluded that ''it is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor.'' [153]

The Selection Plan divided the review and evaluation of bids, and the selection of the plan processor, into various stages. Specifically, pursuant to the Selection Plan, a selection committee reviewed all bids and determined which bids contained sufficient information to allow the Participants to meaningfully assess and evaluate the bids. The ten submitted bids were deemed ''Qualified Bids,'' and so passed to the next stage, in which each bidder presented its bids to the Participants on a confidential basis. On July 1, 2014, after conducting careful analysis and comparison of the bids, the Selection Committee voted and selected a shortlist of six eligible bidders. The Selection Committee determined which shortlisted bidders would be provided the opportunity to revise their bids. After the Selection Committee assessed and evaluated the revised bids, the Selection Committee selected the plan processor via two rounds of voting by the Participants, as described in the Selection Plan.

The Selection Plan established an Operating Committee responsible for formulating, drafting, and filing with the Commission the CAT NMS Plan and for ensuring that the Participants' joint obligations under Rule 613 were met in a timely and efficient manner. In formulating the CAT NMS Plan, the Participants also engaged multiple persons across a wide range of roles and expertise, engaged the consulting firm Deloitte as project manager, and engaged the law firm WilmerHale to serve as legal counsel in drafting the Plan. Within this structure, the Participants focused on, among other things, comparative analyses of the proposed technologies and operating models, development of funding models to support the building and operation of the CAT, and detailed review of governance considerations. Given the complexity and scope of developing the CAT NMS Plan, these efforts were extensive.

When it approved the CAT NMS Plan in 2016, the Commission reiterated its belief that the Selection Plan remains a ''reasonable approach,'' that ''the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor,'' and that ''the process set forth in the Selection Plan should be permitted to continue'':

> In approving the Selection Plan, the Commission stated that the Selection Plan is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor. The Commission also found that the Selection Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail. The Commission believes that the process set out in the Selection Plan for selecting a Plan Processor remains a reasonable approach, which will facilitate the selection of Plan Processor through a fair, transparent and competitive process and that no modifications to the Selection Plan are required to meet the approval standard. . . . In response to the comment that offered support for a specific Bidder, the Commission agrees with the Participants that the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor and thus believes that the process set forth in the Selection Plan should be permitted to continue.[154]

(iii) Engagement with Market Participants and SEC

During the process of developing the CAT NMS Plan, the Participants engaged in extensive and meaningful dialogue with market participants and the SEC. To this end, the Participants created a website to update the public on the progress of the CAT NMS Plan, published a request for comment on multiple issues related to the Plan, held multiple public events to inform the industry of the progress of the CAT and to address inquiries, and formed, and later expanded, a DAG to solicit more input from a representative industry group.[155]

The DAG included representatives of Participants and Industry Members and conducted meetings to discuss, among other things, technical and operational aspects the Participants were considering for the Plan. The Participants issued press releases soliciting participants for the DAG, and a wide spectrum of firms was deliberately chosen to provide insight from various industry segments affected by CAT. The DAG meetings included discussions of topics such as option market maker quote reporting, requirements for capturing Customer IDs, timestamps and clock synchronization, reporting requirements for order handling scenarios, costs and funding, error handling and corrections, and potential elimination of systems made redundant by the CAT. From the inception of the DAG through September 2014, the DAG participated in 36 meetings, as well as a variety of DAG subcommittee meetings.

(iv) Request for Exemption From Certain Requirements Under Rule 613

Following multiple discussions between the Participants and both the DAG and the bidders, as well as among the Participants themselves, the Participants recognized that some provisions of Rule 613 would not permit certain solutions to be included in the Plan that the Participants, in coordination with the DAG, determined advisable to effectuate the most efficient and cost-effective CAT. Specifically, ''the SROs reached the conclusion that additional flexibility in certain of the minimum requirements specified in Rule 613 would allow them to propose a more efficient and cost-effective

[149] *Id.* at 11153

[150] *Id.* at 11159.

[151] *See* Securities Exchange Act Rel. No. 70892 (Nov. 15, 2013), 78 FR 69910 (Nov. 21, 2013).

[152] *See* Selection Plan Approval Order.

[153] Selection Plan Approval Order at 11160.

[154] *See* CAT NMS Plan Approval Order at 84737.

[155] *See* Section D(11) of Appendix C of the CAT NMS Plan.

approach without adversely affecting the reliability or accuracy of CAT Data, or its security and confidentiality.'' [156] Consequently, the Participants submitted a request for exemptive relief from certain provisions of Rule 613 regarding: (1) options market maker quotes; (2) Customer-IDs; (3) CAT-Reporter-IDs; (4) CAT-Order-IDs on allocation reports; and (5) timestamp granularity.[157] The Participants filed two supplements to the request for exemptive relief.[158]

After reviewing the exemptive request, the Commission determined that it was appropriate in the public interest and consistent with the protection of investors to grant the requested exemptive relief.[159] In granting the exemptive relief, the Commission stated:

> [T]he Commission is persuaded to provide flexibility in the discrete areas discussed in the Exemption Request so that the alternative approaches can be included in the CAT NMS Plan and subject to notice and comment. Doing so could allow for more efficient and cost-effective approaches than otherwise would be permitted. The Commission at this stage is not deciding whether the proposed approaches detailed below are more efficient or effective than those in Rule 613. However, the Commission believes the proposed approaches should be within the permissible range of alternatives available to the SROs.[160]

The Commission further stated that the requested exemptive relief is consistent with the protection of investors. The Commission noted that:

> Doing so will provide the public an opportunity to consider and comment on whether these proposed alternative approaches would indeed be more efficient and cost-effective than those otherwise required by Rule 613, and whether such approaches would adversely affect the reliability or accuracy of CAT Data or otherwise undermine the goals of Rule 613. Moreover, if—as the SROs represent—efficiency gains and cost savings would result from including the proposed approaches in the CAT NMS Plan without adverse effects, then the resultant benefits could potentially flow to investors (*e.g.,* lower broker-dealer reporting costs resulting in fewer costs passed on to Customers).[161]

The Participants incorporated the exemptive relief into the proposed CAT NMS Plan, which was noticed for comment, and the Commission ultimately approved the CAT NMS Plan with the more efficient and cost-effective alternative approaches described in the exemptive relief. Accordingly, the Participants believe that the costs incurred in developing the exemptive request were critical to the creation of a better CAT than was originally contemplated by Rule 613, and therefore should be recoverable as part of Historical CAT Assessment 1A.

(v) Request for Extensions for Filing the CAT NMS Plan

Rule 613(a)(1) under Regulation NMS required the Participants to jointly file the CAT NMS Plan on or before April 28, 2013, less than a year after the adoption of Rule 613. In recognition of the complexity of the project to create the CAT NMS Plan as well as industry interest in limiting or eliminating certain requirements of Rule 613 (*e.g.,* addressing the reporting of options market maker quotes), the Participants requested two extensions of the deadline to file the CAT NMS Plan. The Participants described the need for additional time as follows:

> The SROs stated in their Request Letter that they do not believe that the 270-day time period provided for in Rule 613(a)(1) provides sufficient time for the development of the RFP, formulation and submission of bids, and review and evaluation of such bids. The SROs also stated that they believe additional time beyond the 270 days provided for in Rule 613(a)(1) is necessary in order to provide sufficient time for effective consultation with and input from the industry and the public on the proposed solution chosen by the SROs for the creation of the consolidated audit trail at the conclusion of the RFP process and the NMS plan itself.[162]

In recognition of the need for additional time to refine the technical description of and requirements for the CAT and to allow for additional evaluation of the proposed cost and funding considerations, the SEC granted two extensions of this deadline.[163] The SEC determined that both extensions were appropriate, in the public interest, and consistent with the protection of investors.[164] In reaching this conclusion, the Commission stated that ''it understands that the creation of a consolidated audit trail is a significant undertaking and that a proposed NMS plan must include detailed information and discussion about many things.'' [165] The SEC also noted the following:

> This additional time to complete the RFP process should allow the SROs to engage in a more thoughtful and comprehensive process for the development of an NMS plan. In this regard, the Commission notes that the additional time to solicit comment from the industry and the public at certain key points in the development of the NMS plan could identify issues that can be resolved earlier in the development of the consolidated audit trail and prior to filing the NMS plan with the Commission.[166]

Given the Commission's recognition of the reasonableness and value of the extension of the deadline to file the CAT NMS Plan, the Participants believe that the costs incurred in developing the extension request were important to the process of developing the CAT NMS Plan, and therefore should be recoverable as part of Historical CAT Assessment 1A.

(vi) Submission and Approval of the CAT NMS Plan

After extensive analyses and discussions with the DAG, bidders, market participants and the SEC staff, the Participants finalized the draft of the CAT NMS Plan and filed the CAT NMS Plan with the SEC on September 30, 2014. Following additional discussions, the Participants filed several amendments to the CAT NMS Plan during 2015 and 2016. With these additional changes, the SEC published the CAT NMS Plan for notice and comment in May 2016.[167] Following the comment period, the SEC approved the Plan in November 2016.[168]

(vii) Legal Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include legal costs of $3,196,434. The legal services were performed by WilmerHale. The selection considerations and fees for WilmerHale were described in detail above. Prior to the creation of CAT LLC, WilmerHale was engaged to represent the consortium of SROs, not the individual Participants. For administrative purposes, FINRA agreed to receive such legal bills, although such costs were shared among the Participants. Therefore, the legal costs incurred with respect to WilmerHale do not include legal costs incurred by the individual Participants. These pre-formation legal costs are described in

[156] Securities Exchange Rel. No. 77265 (Mar. 1, 2016), 81 FR 11856 (Mar. 7, 2016) (''2016 Exemptive Order'').

detail above and are further described below:

- Analyzed various legal matters associated with the Selection Plan and drafted an amendment to Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the DAG;
- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on the CAT NMS Plan;
- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG, and governance support during the transition to the new governance structure under the CAT NMS Plan;
- Drafted exemptive requests;
- Provided interpretations related to the CAT NMS Plan;
- Provided support with regard to discussions among the exchanges, FINRA and other third parties, such as Deloitte;
- Provided tax advice with regard to CAT's status as a tax-exempt organization; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

(viii) Consulting Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include consulting costs of $10,589,273. The consulting services were performed by Deloitte. The selection considerations and fees for Deloitte were described in detail above. Prior to the creation of CAT LLC, for administrative purposes, Deloitte was engaged by FINRA to provide consulting services related to CAT, but the costs were shared by the consortium of SROs per agreement. Therefore, the consulting costs incurred with respect to Deloitte do not include consulting costs incurred by the individual Participants. The pre-formation consulting costs include the following:

- Established and implemented program operations for the CAT project, including the program management office and workstream design;
- Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participants' independent reviews;
- Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, reviewing technical requirements of other NMS plans, analyzing OATS and CAT requirements, and drafting appendices to the Plan;
- Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Provided support for industry outreach sessions, including with regard to program design and agenda development, program support and logistics and coordination; and
- Provided support in fact finding, drafting content and meeting coordination for WilmerHale with regard to the CAT and the development of the CAT NMS Plan.

Such Pre-Formation Costs did not include costs related to the Chair of the CAT NMS Plan Operating Committee, as the CAT NMS Plan had not yet been adopted.

(ix) Public Relations Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include public relations costs of $57,174. The public relations services were performed by Peppercomm. The selection considerations and fees for Peppercomm are described in detail above. The costs related to Peppercomm were shared among the SROs. Therefore, the public relations costs do not include public relations costs incurred by the individual Participants. The pre-formation public relations costs include services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT.

(B) Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs related to cloud hosting services as a part of Historical CAT Assessments. CAT LLC believes that the costs related to cloud hosting services described in detail above are reasonable and appropriate given the strict data processing timelines and storage requirements imposed by the Commission-approved CAT NMS Plan and should be recoverable as a part of Historical CAT Assessment 1A.

(i) Reasonableness of AWS Costs Given the Requirements of the CAT NMS Plan

CAT LLC believes that the costs for the cloud hosting services are reasonable, both in terms of the level of the fees paid by CAT LLC for cloud hosting services provided by AWS and the scope of the services performed by AWS for CAT LLC. CAT LLC believes that both the scope and amount of the costs for cloud hosting services are reasonable given the current requirements of the CAT NMS Plan adopted pursuant to Rule 613, including the strict data processing timeline, storage and other technical requirements under the Commission-approved CAT NMS Plan.

CAT LLC believes that the level of fees for the cloud hosting services is reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.

CAT LLC also believes that the scope of services provided by AWS for the CAT are appropriate given the current requirements of the Commission-approved CAT NMS Plan. As described above, the cloud hosting services costs reflect a variety of factors including, among other things:

- *Breadth of Cloud Activities.* AWS was engaged by FCAT, the Plan Processor, to provide a broad range of services to the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS necessary to the CAT include storage services, databases, compute services, and other services (such as networking, management tools and development operations (''DevOps'') tools). AWS also was engaged to provide the various environments for CAT, such as the development, performance testing, test and production environments, which are required by the CAT NMS Plan.
- *High Data Volume.* The cost for AWS services for the CAT is a function of the volume of CAT Data. While it is not linear, the greater the amount of CAT Data, the greater the cost of AWS services to the CAT. The data volume

handled by AWS now far exceeds the original volume estimates for the CAT.

• *Plan Requirements.* The cost for AWS services also reflects the technical requirements necessary to meet the stringent performance and other requirements for processing CAT Data. These Plan-dictated processing timelines, storage, testing, security and other technical requirements are significant drivers of AWS costs.

• *Cost Avoidance Efforts.* CAT LLC and FCAT have engaged in ongoing efforts to seek to avoid and minimize AWS costs where permissible under the Plan. Accordingly, these cost avoidance efforts have limited the extent of AWS costs.

In addition, various requirements of the CAT NMS Plan adopted pursuant to Rule 613 contribute to the significant cloud hosting services costs, and that various Plan requirements could be amended or removed without affecting the regulatory purpose of the CAT. Indeed, CAT LLC has repeatedly sought exemptive relief and filed amendments to the CAT NMS Plan, and has even filed suit against the Commission, to seek to revise or eliminate certain costly requirements related to the CAT. However, despite these efforts, absent the Commission granting exemptive relief or approving cost savings amendments to the CAT NMS Plan, CAT LLC, the Participants and Industry Members are all required to comply with such requirements.

(ii) Effect of CAT Design on CAT Costs

(a) Efficient CAT Design

CAT is reasonably designed to efficiently and effectively utilize cloud computing and storage services, given the requirements of the Commission-approved CAT NMS Plan, including requirements related to security, operational reliance and quality assurance, and maintainability.

The Plan Processor uses state-of-the-art software that meets the strict security standards of the CAT NMS Plan. CAT utilizes a big data processing framework that is extensively used by large data processing companies, such as Apple, Meta, Netflix, IBM and Google. As such, it has substantial commercial support and support in the open-source community. It is also well suited for use with regard to iterative types of algorithms and query functions and analytics that the CAT requires, and it provides the heightened security necessary for the CAT.

The development and implementation of the design of CAT is not and has not been static. CAT LLC and the Plan Processor are always evaluating new innovations and service offerings from AWS and other providers to seek to maximize efficiency and cost avoidance while still satisfying the requirements of the CAT NMS Plan. These efforts have led to substantial savings to date. The cloud hosting costs for 2023 were less than the cloud hosting costs for 2022 by $8 million despite processing seven trillion more events in 2023 due to the efficiency and cost avoidance efforts for cloud hosting services. For example, when AWS introduced new storage options, FCAT adopted the cost-efficient new storage option after establishing that the new offering would satisfy the security and other standards of the CAT NMS Plan. This change led to millions of dollars of savings in storage costs. Similarly, when AWS introduced a new compute processor, FCAT adopted this new compute processor, which lead to millions of dollars in savings in compute costs. However, in other cases, new cloud technology developments could not be implemented in CAT because they would not satisfy the security or other requirements of the CAT NMS Plan.

When evaluating the design of the CAT, it must be kept in mind that the CAT is not a typical commercial technology project. The ability to make use of technology approaches that may lead to cost avoidance is also subject to the restrictive requirements of the CAT NMS Plan, such as processing timeframes, requirements for retention of data versions, query requirements, and security standards. Because such requirements are set forth in the CAT NMS Plan, any modification of such requirements are subject to the time-consuming process of amending the CAT NMS Plan or seeking an exemption from the relevant requirement. For example, CAT LLC recently has filed an amendment to address several of these expensive Plan requirements.[169]

(b) CAT Was Designed To Minimize Industry Member Effort

The CAT System also was designed to minimize the extent to which Industry Members would need to alter their systems to report to CAT. During the design process, Industry Member groups argued that it would make more sense financially for the CAT to accommodate differences in industry systems, than for all Industry Members to change their systems. Moreover, such design choices would facilitate consistency, uniformity and accuracy in reporting. Requiring the CAT to make such accommodations may increase CAT costs while accommodating CAT Reporters.

Based on the requirements in the CAT NMS Plan and/or in response to industry requests for functionality to be embedded with the Plan Processor to streamline or limit Industry Member system changes, the CAT has been designed to limit the effect on Industry Members. The following provides examples of such accommodations:

• *Industry Member Reporting.* In light of the complexity of Industry Member market activity, the CAT's order reporting and linkage scenarios document for Industry Members is over 800 pages in length, addressing nearly 200 scenarios.[170] The Industry Member Technical Specifications allow for dozens of specific event types, which drive complexity for the Plan Processor, but streamline reporting for Industry Members. Furthermore, the Plan Processor greatly expanded Industry Member linkage requirements to support, among other things, child events and supplemental events, allowing for ''stateless as-you-go'' and ''batch end-of-day'' reporting when all data is available. Accordingly, CAT takes on the significant cost and effort of providing the required linkages between CAT events; correspondingly, Industry Members are not required to perform this costly task.

• *File Submission Process.* The CAT was designed to accommodate the varying needs of CAT Reporters with regard to the file submission process. For example, in a 2018 letter, FIF stated that ''[t]he SFTP-based submission process is cumbersome, exposes industry members to unnecessary complexity, and puts the burden of support on the CAT Reporter rather than imbedding more functionality into the Plan Processor.'' [171] Currently, FCAT provides two mechanisms for submitting files: SFTP via a private network, and the Web via Reporter Web Portal.

• *Error Corrections.* The industry also emphasized the need for the CAT to provide error correction tools and functionalities to identify, rectify and re-submit corrections within the required timeframe. For example, FIF stated in a 2018 letter the following:

> To be clear, if OATS-like error correction tools are not made available on Day 1, hundreds of firms will be required to create

[169] *See, e.g.,* Securities Exchange Act Rel. No. 99938 (Apr.10, 2024), 89 FR 26983 (Apr. 16, 2024); Letter from Brandon Becker, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (Mar. 27, 2024) (proposing amendments to the CAT NMS Plan for $23 million in annual savings).

[170] *See* CAT Industry Member Reporting Scenarios v.4.10 (Oct. 21, 2022).

[171] Letter from Janet Early, FIF, to Thesys CAT (Mar. 29, 2018).

and test their own tools or obtain vendor alternatives prior to the CAT Go-Live Date. Proprietary tools will require additional system builds, access to and ingestion of CAT data to perform system validation, and testing which will further stress the limited number of subject matter experts (''SMEs'') dedicated to the implementation of CAT reporting. Should this occur, inevitably firms (especially small firms who lack the necessary IT staff to write code and develop proprietary systems), may be put in the position of passing onto investors the cost required to build hundreds of redundant systems.[172]

CAT provides various tools to help Industry Members identify and rectify errors.

• *Data Ingestion Format.* The industry also recommended that CAT adopt a flexible input format that provides an option for Industry Members to submit data in formats that are already in use to reduce costs and potential reporting errors. For example, FIF argued the following:

FIF CAT WG is not proposing a specific format; rather, we are proposing flexibility of input formats which includes support of existing formats (*e.g.,* OATS, FIX) as well as a baseline specification where all fields are defined, and normalized. The input formats must be clearly and thoroughly defined in Technical Specifications, including FAQs. Mandating a uniform format for reporting data to the CAT simplifies the task for the Central Repository of consolidating/storing data, but it puts the burden on each CAT Reporter to accurately translate their current (*e.g.,* OATS) reporting information into a uniform CAT interface. However, that is likely to yield more errors because it is very dependent on accurate, complete and timely information (Technical Specifications, FAQs, meta-data, competent CAT help desk) available to CAT Reporters, availability of sophisticated CAT test tools to validate interface protocols, and the skill levels of the estimated 300+ unique CAT Reporters/Submitters during Phase 1 of CAT. Concentrating the responsibility of data conversions with the Central Repository is a reasonable trade-off that should yield fewer errors, and greater accuracy.[173]

CAT provides such a flexible input format.

(c) Effect of Initial Plan Processor Design

The costs for cloud hosting services are appropriate and have not been adversely affected by the original design and approaches of the Initial Plan Processor. FCAT's design costs are the result of the requirements of the Commission-approved CAT NMS Plan.

When FCAT took over as the Plan Processor from Thesys, it utilized certain aspects of the technical specifications created by Thesys in its design. However, FCAT has not maintained aspects of the original design that would not be appropriate for the CAT. FCAT revised and enhanced the original technical specifications of the CAT System to increase its efficiency and efficacy, and to ensure its compliance with the CAT NMS Plan. For example, the Initial Plan Processor's approach utilized many more fields than FCAT's approach, which relies on additional linkages. With the additional linkages, the CAT System takes on more of the CAT-related burdens than the Industry Members. Such an approach serves to facilitate consistency, uniformity and accuracy in reporting.

Moreover, FCAT did not utilize the system built by the Initial Plan Processor; it rebuilt the CAT System based on revised technical specifications. For example, the Initial Plan Processor used an on-premises processing approach which was not geared toward the huge amounts of data stored in the CAT, while FCAT adopted a cloud-based solution in response to such data demands.

Furthermore, given the very short timeframe to develop the CAT System and the prior optimization of certain query tools (*e.g.,* Diver) for regulatory use with significant amounts of data, FCAT determined to rely upon certain existing FINRA tools and adapt them for use with the CAT.

(iii) Consideration of AWS Alternatives

CAT LLC continues to support the selection of AWS as the cloud hosting services provider for CAT given the compliance, operational, and security requirements of the CAT. Independent analyses confirm these conclusions, noting that ''AWS is an excellent choice for either strategic or tactical use and recommends considering AWS for almost all cloud IaaS or IaaS+PaaS scenarios.'' [174] AWS provides the following benefits to CAT, among others:

• *Broad Suitability.* AWS has a long track record of successfully serving cloud customers with mission-critical projects.

• *Proven Scalability.* AWS has demonstrated that it is capable of building and delivering services on a large scale.

• *Track Record of Innovation.* AWS continues to rapidly innovate, both in terms of new domains of capability and at a fundamental level, thereby facilitating innovation for its customers.

• *Resiliency/Dependability.* Another benefit of AWS is its resiliency; it has a strong track record of stable services. As noted in a review of cloud service providers, ''[c]ustomers like to have a broad set of options for resilience and for their cloud providers to have a strong track record of stable services (continuously available, without operational quirks). Only AWS fulfills both desires.'' [175]

• *Technical and Customer Support.* AWS consistently provides high-quality technical and customer support and engagement. Given the size, scope and regulatory importance of CAT, customer support and engagement that CAT has with the highest levels of AWS are very important to the success of the CAT.

• *Scale.* AWS is capable of supporting large-scale solutions, which is critical given the size and magnitude of the CAT.

• *Security.* AWS provides the security features necessary for the CAT.

In addition, the nature of the CAT, including the amount of data it must process and the size of its data footprint, does not allow for a multi-cloud solution as this would be cost prohibitive and greatly increase the security boundary and associated risk profile of the CAT. For example, a multi-cloud hosting option would increase costs, complexity, and risk for operations with regard to, for example, DevOps, production support, and networking. Similarly, with regard to security, a multi-cloud solution would increase risk, including with regard to the need for data transfers between cloud providers and the expansion of the security boundary. With regard to labor, a multi-cloud solution would lose economies of scale due to the need to support unique cloud requirements. Accordingly, the use of a single-cloud solution continues to provide advantages with regard to cost, complexity, and risk. Indeed, ''[t]he best practice is to focus on a single primary strategic provider.'' [176]

Furthermore, if another cloud service provider were determined to be a better match for the CAT at some future date, switching cloud service providers would be a very significant, expensive and time-consuming effort. Such an effort would likely be a 10-to-15-year commitment at a substantial expense. Such a move would require the replication or redesign of the underlying cloud environments (*e.g.,* organizational

[176] *Id.*

setup, identify management, accounts, environments, DevOps tooling likes release management/config management/network management), as the new provider likely would not have the same infrastructure and software. Once that process has been completed, an exabyte of CAT data would need to be securely migrated to the new platform.

(C) Funding Model Filings

CAT LLC believes that the recovery of costs related to the development of the funding model is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

Funding the CAT is a critical aspect of Rule 613 and the CAT NMS Plan. Article XI of the CAT NMS Plan describes in detail the requirements for funding the CAT, and the Participants are required to comply with and enforce compliance with the funding requirements of the CAT NMS Plan, just as with other aspects of the Plan. Accordingly, the development and implementation of a funding model for the CAT is as much a part of the requirements of the CAT NMS Plan as the development and operation of the CAT System. CAT LLC sees no reason to distinguish the efforts to develop a funding model from, for example, efforts to develop the CAT System, in seeking to recover reasonable CAT costs.

Moreover, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . legal costs.'' [177] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . legal . . . costs.'' [178] In keeping with these provisions, this filing provides a brief description of reasonably budgeted legal costs above. These legal costs include costs related to the development of the CAT Funding Model.

In addition, the legal costs incurred for the assistance in developing the CAT Funding Model are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. As described above, the specialized services were performed by experienced counsel at negotiated rates for such services that reflect both the extent of the services and market rates. Moreover, the scope of the legal costs associated with the development of the funding model reflect the complexity of the task in satisfying the detailed requirements of the CAT NMS Plan, the standards of the Exchange Act, and the many perspectives of the different market constituents potentially affected by or interested in the funding model, including Industry Members, Participants and investors. The many and varied comments by market participants on CAT funding over the years demonstrate the complexity of the task.

(D) Costs Related to Litigation With the SEC

CAT LLC believes that the recovery of legal costs related to the litigation with the SEC regarding the CAT NMS Plan is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.[179] Moreover, CAT LLC initiated such litigation, and incurred the related legal costs, because it was critical to address the Commission's interpretations of the CAT NMS Plan. Among other things, such interpretations threatened to impose unnecessary costs on the CAT, which would be borne by the Participants and Industry Members. Indeed, in response to the litigation, the Commission provided exemptive relief that allowed alternative, more cost-effective approaches to the implementation of the CAT. Specifically, in the 2023 exemptive order, the Commission stated:

> The conditional exemptive relief in this Order allows for the implementation of alternative regulatory solutions that continue to advance the regulatory goals that Rule 613 and the CAT NMS Plan were intended to promote, while reducing the implementation and operational costs, burdens, and/or difficulties that would otherwise be incurred by the Participants and Industry Members that must fund the CAT.[180]

CAT LLC believes it is reasonable and appropriate to incur costs to limit the need to incur even greater costs due to certain interpretations of the Plan.

In addition, the legal costs incurred during the litigation are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. As described above, the specialized services were performed by experienced counsel at market rates for such services. As such, the legal costs related to this litigation incurred during the period covered by Historical CAT Assessment 1A were reasonable.

Finally, Industry Members will directly benefit from the result of the litigation because it has addressed CAT NMS Plan requirements that would have imposed significantly greater costs on the CAT. Accordingly, it is reasonable and appropriate that the costs of such litigation be included in Historical CAT Costs 1.

(E) Costs Related to the Initial Plan Processor

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017, which was the date by which Participants were required to begin reporting to the CAT, due to the delay in the commencement of reporting to the CAT. As discussed above, the Participants determined to exclude all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes $37,852,083 in Thesys costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Thesys costs incurred after November 15, 2018 are the $19,628,791 in capitalized developed technology costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these $19,628,791 in costs.

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. CAT LLC notes that the development and implementation of the CAT System, while unprecedented in scope and design, is like any other large and innovative technology project in that, inevitably, there were adjustments and refinements in the technical approach as the project developed, even with substantial planning efforts and oversight prior to the build. This is even more likely when the project faces a very tight implementation schedule, such as the one imposed by the Commission in Rule 613 and the CAT NMS Plan. However, an adjusted approach does not mean that the funds were not valid expenditures and should not be recovered.

[177] Section 11.1(a)(i) of the CAT NMS Plan.

[178] Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[179] *See* Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[180] Settlement Exemptive Order at 77129–30.

The reasonableness of Thesys costs should be evaluated by the Commission as of the time they were incurred, not in hindsight. As detailed above, the Commission concluded in 2016 that ''the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor,'' and that ''the process set forth in the Selection Plan should be permitted to continue.'' [181] Following this process, the Participants notified the Commission of the selection of Thesys as the Initial Plan Processor on January 17, 2017.[182] At the time, neither the Commission nor the industry argued that the selection of the Initial Plan Processor was unreasonable or otherwise inconsistent with the CAT NMS Plan, nor did they predict the selection would result in unanticipated delays in the implementation of the CAT System. On the contrary, on April 4, 2017, the President of SIFMA wrote that ''SIFMA looks forward to commencing work with the SROs and Thesys.'' [183]

As noted in the CAT Funding Model Approval Order, the Commission recognized that ''[t]he CAT NMS Plan contemplates that the costs of the CAT are to be allocated between the Participants and Industry Members.'' [184] If the CAT Funding Model had existed on Day 1, the risk of any unanticipated costs or challenges associated with the Initial Plan Processor would have been fairly and reasonably shared among the Participants and Industry Members on an ongoing basis. Given that the Commission concluded in 2012 that the costs of the CAT would be shared by the Participants and Industry Members, it is not fair or reasonable to determine in hindsight that all of the risk involved in developing the CAT should be allocated entirely to the Participants.

(F) CAIS Implementation Costs

CAT LLC believes that the recovery of CAIS-related costs is appropriate, and that the amount and scope of such costs, as described above, are reasonable, and that the reasonableness of historical costs should be evaluated by the Commission as of the time they were incurred, not in hindsight.

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable CAIS operating costs as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . CAIS operating fees.'' [185] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . CAIS operating fees.'' [186] In keeping with these provisions, this filing provides a brief description of reasonably budgeted CAIS operating fees.

In addition, CAT LLC determined that the CAIS operating fees described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. The ''CAIS Operating Costs'' for Historical CAT Costs 1 total $9,480,587, with Pre-FAM costs of $2,072,908, FAM 1 costs of $254,998, FAM 2 costs of $1,590,298, and FAM 3 costs of $5,562,383. As described above, the CAIS operating fees were incurred with regard to two categories of CAIS-related efforts: (1) the acceleration of the reporting of LTIDs; and (2) the development of the CAIS Technical Specifications and the building of CAIS. These two categories of costs are discussed in more detail below.

(i) LTID Reporting

During the period covered by Historical CAT Assessment 1A, the CAIS operating costs included costs related to the acceleration of the reporting of LTIDs earlier than originally contemplated during this period at the request of the SEC and in accordance with exemptive relief granted by the SEC.[187] As the SEC approved in this exemptive relief, the Participants proposed ''to require the reporting of LTIDs to the CAT in Phases 2c and 2d, instead of with the rest of Customer Account Information in Phase 2e, which potentially could result in an earlier elimination of broker-dealer recordkeeping, reporting and monitoring requirements of the Large Trader Rule.'' [188] To implement the reporting of LTIDs to the CAT, the following steps were taken during the period covered by Historical CAT Assessment 1A:

- After FCAT developed the LTID Technical Specifications, the LTID Technical Specifications were published on January 31, 2020, with additional updates provided to the LTID Technical Specifications through April 2021.[189]
- The LTID account information testing environment opened on August 24, 2020.
- The LTID account information reporting production environment opened on December 14, 2020.
- CAT Reporters were required to request their production readiness certification for account information related to LTIDs by the deadline of April 9, 2021.
- The LTID account information reporting for Phases 2a, 2b and 2c for Large Industry Members went live on April 26, 2021.
- The LTID account information reporting for Phases 2d for Large Industry Members went live on December 13, 2021.
- The LTID account information reporting for Phases 2a, 2b, 2c and 2d for Small Industry Members went live on April 26, 2021.

Throughout this project, FCAT and CAT LLC worked closely with the industry on LTID and CAIS reporting. Between December 2019 and December 2021, at least 57 checkpoint calls, webinars, and technical working group meetings with industry representatives were hosted to address issues and to educate CAT Reporters regarding LTID and CAIS reporting.[190]

The LTID reporting project was successfully completed in a timely fashion, and the fees related to the project were reasonable. Accordingly, CAT LLC appropriately seeks to recover such costs via Historical CAT Assessment 1A.

(ii) CAIS Reporting

During the period covered by Historical CAT Assessment 1A, FCAT began the development of the full CAIS Technical Specifications and the building of CAIS. The CAIS Technical Specifications were developed during this period as follows:

- Iterative drafts of the CAIS Technical Specifications were published on June 30, 2020, December 1, 2020, and January 1, 2021.[191]

[181] CAT NMS Plan Approval Order at 84737.

[190] Such contact points with the industry are described in detail on the Events web page of the CAT website (*https://www.catnmsplan.com/events*).

[191] The CAIS Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the

Continued

• The full, final CAIS Technical Specifications were published on January 29, 2021.

• Updated versions of the CAIS Technical Specifications were published throughout 2021.[192]

As discussed above, FCAT and CAT LLC frequently engaged with the industry regarding the development of CAIS, hosting regular checkpoint calls, webinars, and technical working group meetings with industry representatives to address any issues, including addressing the interplay between Industry Members' existing customer systems and CAIS, and to educate CAT Reporters regarding LTID and CAIS reporting. Such engagement was critical to the CAIS development process as the CAIS project was unprecedented in terms of its content, scope and complexity.

During this period, FCAT also commenced the building of the CAIS system in accordance with the CAIS Technical Specifications during the period covered by Historical CAT Assessment 1A. The CAIS system was ready for industry testing shortly after the end of this period in January 2022.

The CAIS Technical Specifications and the CAIS system, as developed during this period, continue to be used. Industry Members have been required to report, and have continuously reported, required data to CAIS on a daily basis since November 7, 2022, consistent with interim reporting obligations. The CAIS system accepts and validates the CAIS data submitted by Industry Members and provides Industry Members with initial feedback on data errors. In light of the unprecedented nature of the CAIS system, certain changes to the system, such as changes related to error corrections and the CAIS regulatory portal, were necessary to finalize CAIS reporting. FCAT worked to address these remaining issues,[193] and, as of May 31, 2024, FCAT indicated that it had achieved the final CAIS reporting milestone. Accordingly, CAT LLC appropriately seeks to recover CAIS operating costs via Historical CAT Assessment 1A.

(G) Public Relations Costs

CAT LLC believes that the recovery of public relations costs is appropriate and that the amount and scope of such costs, as described above, are reasonable.

The Commission has long recognized that external public relations costs are reasonably associated with creating, implementing and maintaining the CAT. In the CAT NMS Plan Approval Order, the Commission estimated that the Participants had collectively spent approximately $2,400,000 in preparation of the CAT NMS Plan on external public relations, legal, and consulting costs, and estimated that the Participants would continue to incur external public relations costs associated with maintaining the CAT upon approval of the CAT NMS Plan.[194]

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for public relations services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . public relations costs.'' [195] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . public relations costs.'' [196] In keeping with these provisions, a brief description of reasonable public relations costs are described above.

In addition, CAT LLC determined that the public relations costs described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. The services performed by the public relations firms through 2021 were limited in scope to assist CAT LLC, which has no employees of its own, to be better positioned to understand and address CAT matters to the benefit of all market participants and to communicate on important CAT topics with the public. In addition, the costs for these services were appropriately limited. During the 10-year period covered by Historical CAT Assessment 1A, the average cost per year for these services was approximately $36,000.

(H) Legal Costs Related to the Limitation of Liability Provision in CAT Reporter Agreements

CAT LLC believes that the recovery of legal costs related to the limitation of liability provision, including costs related to the proceedings before the SEC and costs related to the proposed amendment to the Consolidated Audit Trail Reporter Agreement and the Consolidated Audit Trail Reporting Agent Agreement (the ''Reporting Agreements'') is appropriate and that the amount and scope of such costs as described above are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.[197] In addition, CAT LLC determined that the legal costs incurred for the assistance with regard to the limitation of liability provisions are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A.

Moreover, it is critical that CAT LLC, which has no employees of its own, have the ability to fund a legal defense in litigation and other legal proceedings against it. In response to CAT LLC requiring Industry Members to agree to the limitation of liability provision to submit data to the CAT, SIFMA filed an application for review of actions taken by CAT LLC and the Participants pursuant to Sections 19(d) and 19(f) of the Exchange Act. Contemporaneously with the filing of this proceeding, SIFMA moved for a stay of the requirement that Industry Members sign a Reporter Agreement, or in the alternative, asked the Commission to further delay the launch of CAT reporting on June 22, 2020. CAT LLC must have the resources to defend itself from litigious actions by others, like these.

Although a limitation of liability provision ultimately was not adopted as proposed, it was a reasonable provision to propose for the CAT Reporter Agreements, given that such provisions are in accordance with industry norms. Limitations of liability are ubiquitous within the securities industry and have long governed the economic relationships between self-regulatory organizations and the entities that they regulate. For example, U.S. securities exchanges have adopted rules to limit their liability for losses that Industry Members incur through their use of exchange facilities.[198] Similarly, FINRA's former order audit trail, OATS, which has functioned as an integrated audit trail of order, quote, and trade data for equity securities, required FINRA members to acknowledge an agreement that includes a limitation of liability provision.[199] In addition, such a

[196] Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[197] *See* Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[198] *See, e.g.,* NASDAQ Equities Rule 4626.

[199] FINRA Rule 1013(a)(1)(R) requires all applicants for FINRA Membership to acknowledge

provision was intended to ensure the financial stability of the CAT. Accordingly, it was reasonable for CAT LLC to propose the use of such a provision.[200]

Furthermore, as described above, the specialized services were performed by experienced counsel at market rates for such services. Accordingly, the legal costs for the efforts related to the limitation of liability provision were reasonable.

(I) Costs for the Chair of the CAT Operating Committee

CAT LLC believes that the recovery of consulting costs related to the Chair of the CAT Operating Committee is appropriate and that the amount and scope of such costs are reasonable.

As a preliminary matter, the selection of the Chair of the Operating Committee complies with the requirements of Section 4.2 of the CAT NMS Plan. The initial Chair that served during the period covered by Historical CAT Assessment 1A was designated by a Participant as the Participant's alternate voting member. Accordingly, the Chair is a representative of the Participants, as required by the CAT NMS Plan.

In addition, in approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for consulting as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . consulting . . . '' costs.[201] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . consulting'' [202] costs. In keeping with these provisions, a brief description of reasonable consulting costs is included in this filing, and such reasonable consulting costs include the costs related to the Chair position.

The Participants determined that the position of the Chair was a critical role for the implementation of the CAT, and an independent Chair would appropriately consider and address the views of each of the Participants. The Participants also determined that it was important to have a Chair with a strong background regarding issues related to the regulatory obligations of self-regulatory organizations, including their obligations under national market system plans. The compensation paid to the Chair is appropriate for a person with such background and skills. The average annual amount paid to the Chair from 2017 through the end of FAM 3 was $292,733.30. Separate from the Chair, CAT LLC relies upon a Leadership Team of representatives of the SROs to oversee the day-to-day implementation of the CAT NMS Plan. CAT LLC does not compensate any member of the Leadership Team.

(11) Fee Implementation Assistance for Industry Members

(A) Reconciliation of CAT Invoices

(i) Reconciliation of CAT Invoices to Underlying Trades Provided by CAT

CAT LLC understands that there are three types of reconciliation processes related to the invoices:

- *Reconciliation of CAT Invoices to Underlying Trades:* Reconciling the CAT invoice amount to the underlying trades provided by CAT;
- *Matching Trades to Books and Records:* Providing the means to match the underlying trades provided by CAT with CAT invoices to other books and records independently maintained by individual CAT Reporters (*e.g.,* exchange trade journals/ acknowledgements) and data sources of self-regulatory organizations independent of CAT; and
- *Order Originator Identification:* Providing the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices, which would facilitate firms' ability to pass through CAT Fees to their customers.

As discussed further below, CAT LLC only considers the first type of process to be a ''reconciliation'' and the only type of process that is required under the CAT NMS Plan. CAT LLC provides the means to reconcile the CAT invoice amount to the underlying trades provided by CAT.

The CAT NMS Plan does not require CAT LLC to facilitate the second type of process: matching underlying trades for a CAT invoice with a firm's internal books and records. CAT LLC has access only to the underlying trades provided by CAT; it does not have access to a firm's internal books and records. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

The CAT NMS Plan also does not require CAT LLC to provide the ability to identify the order originator for the underlying trades for the CAT invoices. Accordingly, the billing guidance and processes do not provide CAT Reporters with the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices. CAT LLC has been working closely with CAT Reporters to explain its billing approach and to address any outstanding billing questions. But, it should not be lost that CAT LLC provides information sufficient to allow CAT Reporters to reconcile CAT invoice amounts with the underlying trades provided by CAT LLC.

(ii) Match the Underlying Trades Provided by CAT With CAT Invoices to Firms' Internal Books and Records Independent of CAT

The CAT NMS Plan does not require CAT LLC to facilitate the matching of underlying trades for a CAT invoice with a firm's internal books and records, which may consist of trading data from various sources external to CAT. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

In this regard, it is important to recognize that CAT LLC has developed a billing approach that greatly improves upon existing billing practices for similar regulatory fees (*e.g.,* fees related to Section 31). Accordingly, with the additional information voluntarily provided by CAT LLC, CAT Reporters generally will have sufficient information to match their underlying trades provided by CAT with their own internal books and records that are independent of CAT or to SRO data that is independent of CAT data. However, CAT LLC emphasizes that providing such additional information is not required by the CAT NMS Plan.

To facilitate the introduction of CAT fees, CAT LLC has worked with FCAT to develop an approach to CAT billing that is consistent with existing billing constructs used with regard to Section 31-related sales values fees, subject to certain enhancements. Under this billing approach, FCAT is providing additional linkage elements, not necessarily provided in the Section 31-

---

the FINRA Entitlement Program Agreement and Terms of Use, which applies to OATS. Industry Members click to indicate that they agree to its terms—including its limitation of liability provision—every time they access FINRA's OATS system to report trade information (*i.e.,* repeatedly over the course of a trading day for many Industry Members).

[200] *See* Letter from Michael Simon, Chair, CAT Operating Committee, to Vanessa Countryman, Secretary, Commission (Dec. 18, 2020).

[201] Section 11.1(a)(i) of the CAT NMS Plan.

[202] Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

sales value fee context, to facilitate CAT Reporters' ability to match the underlying trades provided by CAT with their internal books and records and to reduce the complexity of that process. Specifically, FCAT is providing various key elements of the trade itself, such as the tradeID and branch sequence,[203] to CAT Reporters in the trade billing details provided with their CAT invoices (''Additional Trade Details''). As a result, CAT Reporters now have numerous alternative methods for matching a trade with their internal books and records where they previously did not have such matching methods in other fee contexts.

With the Additional Trade Details, CAT LLC and FCAT believe that the overwhelming majority of underlying trades provided by CAT bills can be matched with a CAT Reporter's internal books and records. CAT LLC recognizes that there may be certain cases in which such matching is more difficult given various firm-specific considerations, but believes that such instances are significantly more limited than with regard to the SRO fees charged in relation to Section 31.[204] By providing Additional Trade Details that are not available in other fee contexts, FCAT enhances the Industry Members' ability to match the underlying trades provided with CAT invoices with books and records and SRO data, both of which are independent of CAT data.

(iii) CAT LLC Is Not Required To Facilitate CAT Reporters' Ability To Pass Through Fees to Their Customers

Similar to other regulatory fees, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Accordingly, Historical CAT Assessment 1A does not address the process by which any CAT Reporters may pass through the fee to their customers. Likewise, the CAT billing approach provided by the Plan Processor is designed to address the needs of CAT Reporters with regard to the reconciliation of CAT invoices with the underlying trades provided by CAT LLC with the invoices; they are not designed to address issues related to any pass-through fees. Accordingly, facilitating CAT Reporters' ability to pass through fees to their clients is outside the scope of this fee filing. Nevertheless, as described below, CAT LLC and the Plan Processor have expended significant efforts to provide technical assistance to Industry Members regarding the implementation of Historical CAT Assessment 1A, including providing Additional Trade Details that provide significant details about each underlying trade.

(a) Originating Brokers Versus Executing Brokers

In its approval of the CAT Funding Model, the Commission approved charging CAT fees to the CAT Executing Broker, rather than the originating broker. This fee filing must comply with the requirements of the CAT Funding Model, and, therefore, charges the Historical CAT Assessment 1A to CAT Executing Brokers.

Moreover, charging originating brokers would introduce significant complexity to the billing process from the CAT's perspective, and would increase the costs of implementing CAT fees. Charging the CAT Executing Broker is simple and straightforward, and leverages a one-to-one relationship between billable events (trades) and billable parties, similar to other transaction-based fees. In contrast, for a single trade event, there may be many originating brokers, and each trade must be broken down on a pro-rata basis, to account for one or more layers of aggregation, disaggregation, and representation of the underlying orders. While CAT is indeed designed to capture and unwind complex aggregation scenarios, the data and linkages are structured to facilitate regulatory use, and not a billing mechanism that assesses fees on a distinct set of executed trades; it is not simply a matter of using existing CAT linkages. Furthermore, charging originating brokers would implicate issues related to lifecycle linkage rates, and issues related to corrections, cancellations and allocations, while charging CAT Executing Brokers would avoid such issues.

(b) Identification of Order Originator for Underlying Trades

As noted, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT Fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Nevertheless, the Additional Trade Details provided with regard to the underlying trades on CAT invoices may assist with this process. Like with Section 31-related sales value fees, however, it is not always possible to trace every fee on a transaction back to the originating party. Industry Members have faced these issues under Section 31-related sales values fees for many years.[205] However, with the Additional Trade Details provided under the CAT billing approach, in many cases, CAT Reporters will be able to identify the order originator for the underlying trades provided by CAT with CAT invoices. In some cases, CAT LLC believes that certain issues related to certain types of market activity may implicate CAT Reporters' ability to identify the order originator for a limited set of underlying trades for the CAT invoices. Although CAT LLC does not believe that it is required to address these issues, CAT LLC and FCAT have been carefully researching and analyzing these types of issues as they are identified, and have been working voluntarily to assist CAT Reporters with these issues as necessary and when possible. In addition, CAT LLC intends to continue to provide CAT Reporters with billing guidance through FAQs, CAT Alerts and Helpdesk responses to address outstanding billing questions.

(B) Significant Technical Assistance

CAT LLC has worked with FCAT to provide significant technical assistance to Industry Members to allow the Industry Members to understand how Historical CAT Assessments will be implemented and billed, including webinars, CAT alerts, mock invoices, and responses to questions posed to the FCAT Help Desk.

• *Technical Specifications and Scenarios.* CAT LLC has provided

[203] *See* CAT Technical Specifications for Billing Trade Details; Trade Details Schema (*https://catnmsplan.com/sites/default/files/2024-02/02.05.24-Billing-Trade-Details-Schema.json*); CAT Billing Scenarios, Version 1.0 (Nov. 30, 2023) (*https://www.catnmsplan.com/sites/default/files/2024-01/01.12.2024-CAT-Billing-Scenarios-v1.0.pdf*).

[204] For years, broker-dealers have faced similar reconciliation issues with regard to SRO fees related to Section 31. Broker-dealers have responded to this issue in the Section 31 context by exercising their discretion as to whether and the manner and extent to which they pass on those fees (*e.g.,* by rounding up its fees to the nearest cent, or decide to charge for, or not charge for, certain transactions, or assess a specific fee or incorporate the costs into other fee programs). *See, e.g.,* Securities Exchange Act Rel. No. 49928 (June 28, 2004), 69 FR 41060, 41072 (July 7, 2004) (noting that broker-dealers may ''over-collect'' Section 31-related fees charged to their clients due to rounding practices, and double-counting with regard to certain transactions).

[205] ''FINRA charges a Regulatory Transaction Fee ('RTF') to industry members to reimburse FINRA for the Section 31 fees that FINRA pays to the Commission. FINRA does not currently provide industry members with the data that industry members require for proper reconciliation of RTF fees. This has been a major problem for the industry for many years.'' Letter from Howard Meyerson, Managing Director, FIF, to Robert Cook, Chief Executive Officer, FINRA at 2 (Dec. 15. 2023) (*https://fif.com/index.php/working-groups/category/271-comment-letters?download=2820:fif-letter-to-finra-on-pass-through-of-finra-cat-fees&view=category*).

detailed technical documentation for CAT billing, including (1) technical specifications, which describe the CAT Billing Trade Details Files associated with monthly CAT invoices, including detailed information about data elements and file formats as well as access instructions, network and transport options; [206] (2) trade details schemas; [207] and (3) CAT billing scenarios.[208]

• *Industry Webinars.* CAT LLC has hosted two industry webinars specifically dedicated to CAT billing. The first webinar, hosted on September 28, 2023, discussed the operational implementation of the CAT Reporter billing process.[209] The second webinar, hosted on November 7, 2023, provided (1) a demonstration of the CAT Reporter Portal and how to access CAT billing documents, including CAT invoices; and (2) additional information on underlying trade details in relation to the CAT Reporter billing process and an overview of the CAT Contact Management System.[210] 485 participants and 394 participants attended the two webinars, respectively.

• *CAT Alert.* CAT LLC has published a detailed CAT Alert that describes how FCAT, as the Plan Processor acting on behalf of CAT LLC, will calculate applicable fees, issue invoices to and collect payment from CAT Executing Brokers.[211]

• *Frequently Asked Questions (FAQs).* CAT LLC also has continued to engage with the industry on billing issues by making responses to billing FAQs available on the CAT website. The FAQs address a broad range of frequently asked questions, including, for example, which Industry Members will receive invoices, how fees are calculated, when and how fees are required to be paid, how to access invoices, and how to update the billing contact. To date, responses to 31 FAQs are available on the CAT website, and CAT LLC will provide additional responses to FAQs as warranted.[212]

• *Substantial Past Experience with CAT Billing Processes.* To date, CAT LLC, via FCAT, has billed Industry Members for Historical CAT Assessment 1 and certain Prospective CAT Fees. Industry Members will be billed for Historical CAT Assessment 1A via the same processes established for Historical CAT Assessment 1 and the Prospective CAT Fees. Accordingly, Industry Members have substantial experience with the CAT billing processes.

• *Help Desk Assistance.* CAT LLC also provides detailed, individualized assistance to Industry Members regarding CAT fees and the billing process through the FCAT Help Desk.[213] For example, the Help Desk assisted with 406 cases related to the billing of CAT fees from July 2023 through March 2024.

By providing such detailed and sustained assistance to Industry Members regarding CAT fees and billing, CAT LLC has successfully addressed questions raised by Industry Members regarding the CAT fees and billing processes.

(C) Notice to Industry Members

In keeping with past practice, CAT LLC provided notice of the proposed Historical CAT Assessment 1A via CAT Fee Alert on April 1, 2026,[214] one month prior to the effective date of Historical CAT Assessment 1A on May 1, 2026. Such notice provides Industry Members with sufficient time to address any technological or other requirements necessary for implementing Historical CAT Assessment 1A.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act,[215] which requires, among other things, that the Exchange's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,[216] because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act,[217] which requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. These provisions also require that the Exchange be ''so organized and [have] the capacity to be able to carry out the purposes'' of the Act and ''to comply, and . . . to enforce compliance by its members and persons associated with its members,'' with the provisions of the Exchange Act.[218] Accordingly, a reasonable reading of the Act indicates that it intended that regulatory funding be sufficient to permit an exchange to fulfill its statutory responsibility under the Act, and contemplated that such funding would be achieved through equitable assessments on the members, issuers, and other users of an exchange's facilities.

The Exchange believes that this proposal is consistent with the Act because it implements provisions of the Plan and is designed to assist the Exchange in meeting regulatory obligations pursuant to the Plan. In approving the Plan, the SEC noted that the Plan ''is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.'' [219] To the extent that this proposal implements the Plan and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Act.

[206] CAT Technical Specifications for Billing Trade Details, Version 1.0 r1 (Dec. 8. 2023) (*https://catnmsplan.com/sites/default/files/2023-12/12.07.2023-CAT-Techical-Specifications-for-Billing-Trade-Details-v1.0r1_CLEAN.pdf*).

[218] *See* Section 6(b)(1) of the Exchange Act.

[219] CAT NMS Plan Approval Order at 84697.

The Exchange believes that the proposed fees paid by the CEBBs and CEBSs are reasonable, equitably allocated and not unfairly discriminatory. First, the Historical CAT Assessment 1A fees to be collected are directly associated with the costs of establishing and maintaining the CAT, where such costs include Plan Processor costs and costs related to technology, legal, consulting, insurance, professional and administration, and public relations costs. The Exchange has already incurred such development and implementation costs and the proposed Historical CAT Assessment 1A fees, therefore, would allow the Exchange to collect certain of such costs in a fair and reasonable manner from Industry Members, as contemplated by the CAT NMS Plan.

The proposed Historical CAT Assessment 1A fees would be charged to Industry Members in support of the maintenance of a consolidated audit trail for regulatory purposes. The proposed fees, therefore, are consistent with the Commission's view that regulatory fees be used for regulatory purposes and not to support the Exchange's business operations. The proposed fees would not cover Exchange services unrelated to the CAT. In addition, any surplus would be used as a reserve to offset future fees. Given the direct relationship between CAT fees and CAT costs, the Exchange believes that the proposed fees are reasonable, equitable and not unfairly discriminatory.

As further discussed below, the SEC approved the CAT Funding Model, finding it was reasonable and that it equitably allocates fees among Participants and Industry Members. The Exchange believes that the proposed fees adopted pursuant to the CAT Funding Model approved by the SEC are reasonable, equitably allocated and not unfairly discriminatory.

(1) Implementation of CAT Funding Model in CAT NMS Plan

Section 11.1(b) of the CAT NMS Plan states that ''[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.'' Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this fee filing to implement the Industry Member CAT fees included in the CAT Funding Model. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model in the CAT NMS Plan, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan ''is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.'' [220] Similarly, in approving the CAT Funding Model, the SEC concluded that the CAT Funding Model met this standard.[221] As this proposal implements the Plan and the CAT Funding Model described therein, and applies specific requirements to Industry Members in compliance with the Plan, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

(2) Calculation of Fee Rate for Historical CAT Assessment 1A Is Reasonable

The SEC has determined that the CAT Funding Model is reasonable and satisfies the requirements of the Exchange Act. Specifically, the SEC has concluded that the method for determining Historical CAT Assessments as set forth in Section 11.3 of the CAT NMS Plan, including the formula for calculating the Historical Fee Rate, the identification of the parties responsible for payment and the transactions subject to the fee rate for the Historical CAT Assessment, is reasonable and satisfies the Exchange Act.[222] In each respect, as discussed above, Historical CAT Assessment 1A is calculated, and would be applied, in accordance with the requirements applicable to Historical CAT Assessments as set forth in the CAT NMS Plan. Furthermore, as discussed below, the Exchange believes that each of the figures for the variables in the SEC-approved formula for calculating the fee rate for Historical CAT Assessment 1A is reasonable and consistent with the Exchange Act. Calculation of the fee rate for Historical CAT Assessment 1A requires the figures for the Historical CAT Costs 1, the executed equivalent share volume for the prior twelve months, the determination of Historical Recovery Period 1A, and the projection of the executed equivalent share volume for Historical Recovery Period 1A. Each of these variables is reasonable and satisfies the Exchange Act, as discussed throughout this filing.

(A) Historical CAT Costs 1

The formula for calculating a Historical Fee Rate requires the amount of Historical CAT Costs to be recovered. Specifically, Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan requires a fee filing to provide:

> a brief description of the amount and type of the Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.

In accordance with this requirement, the Exchange has set forth the amount and type of Historical CAT Costs 1 for each of these categories of costs above.

Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan also requires that the fee filing provide ''sufficient detail to demonstrate that the Historical CAT Costs are reasonable and appropriate.'' As discussed below, the Exchange believes that the amounts set forth in this filing for each of these cost categories is ''reasonable and appropriate.'' Each of the costs included in Historical CAT Costs 1 are reasonable and appropriate because the costs are consistent with standard industry practice, based on the need to comply with the requirements of the CAT NMS Plan, incurred subject to negotiations performed on an arm's length basis, and/or are consistent with the needs of any legal entity, particularly one with no employees.

(i) Technology: Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover costs related to cloud hosting services as a part of Historical CAT Assessments.[223] CAT LLC determined that the costs related to cloud hosting services described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. As described above, the cloud hosting services costs reflect, among other things, the breadth of the CAT cloud activities, data volume far in excess of the original volume estimates, the need for specialized cloud services given the volume and unique nature of the CAT, the processing time requirements of the Plan, and regular efforts to seek to minimize costs where permissible under the Plan. CAT LLC determined that use of cloud hosting

[220] CAT NMS Plan Approval Order at 84696.

[221] CAT Funding Model Approval Order at 13481.

[222] *Id.*

[223] Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

services is necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT, and that the fees for cloud hosting services negotiated by FCAT were reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.[224] Indeed, the actual costs of the CAT are far in excess of the original estimated costs of the CAT due to various factors, including the higher volumes and greater complexity of the CAT than anticipated when Rule 613 was originally adopted.

To comply with the requirements of the Plan, the breadth of the cloud activities related to the CAT is substantial. The cloud services not only include the production environment for the CAT, but they also include two industry testing environments, support environments for quality assurance and stress testing and disaster recovery capabilities. Moreover, the cloud storage costs are driven by the requirements of the Plan, which requires the storage of multiple versions of the data, from the original submitted version of the data through various processing steps, to the final version of the data.

Data volume is a significant driver of costs for cloud hosting services. When the Commission adopted the CAT NMS Plan in 2016, it estimated that the CAT would need to receive 58 billion records per day [225] and that annual operating costs for the CAT would range from $36.5 million to $55 million.[226] Through 2021, the actual data volumes have been five times that original estimate. The data volumes for each period are set forth in detail above.[227]

In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. Although CAT LLC has proactively sought to manage cloud hosting costs while complying with the Plan, including through requests to the Commission for exemptive relief and an amendment to the CAT NMS Plan, stringent CAT NMS Plan requirements do not allow for any material flexibility in cloud architecture design choices, processing timelines (*e.g.,* the use of non-peak processing windows), or lower-cost storage tiers. As a result, the required CAT processing timelines contribute to the cloud hosting costs of the CAT.

The costs for cloud hosting services also reflect the need for specialized cloud hosting services given the data volume and unique processing needs of the CAT. The data volume as well as the data processing needs of the CAT necessitate the use of cloud hosting services. The equipment, power and services required for an on-premises data model, the alternative to cloud hosting services, would be cost prohibitive. Moreover, as CAT was being developed, there were limited cloud hosting providers that could satisfy all the necessary CAT requirements, including the operational and security criteria. Over time more providers offering cloud hosting services that would satisfy these criteria have entered the market. CAT LLC will continue to evaluate alternative cloud hosting services, recognizing that the time and cost to move to an alternative cloud provider would be substantial.

The reasonableness of the cloud hosting services costs is further supported by key cost discipline mechanisms for the CAT—a cost-based funding structure, cost transparency, cost management efforts (including regular efforts to lower compute and storage costs where permitted by the Plan) and oversight. Together, these mechanisms help ensure the ongoing reasonableness of the CAT's costs and the level of fees assessed to support those costs.[228]

(ii) Technology: Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to operating fees as a part of Historical CAT Assessments.[229] CAT LLC determined that the costs related to operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The operating fees include the negotiated fees paid by CAT LLC to the Plan Processor to operate and maintain the system for order-related information and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the selection of FCAT as the Plan Processor was reasonable and appropriate given its expertise with securities regulatory reporting, after a process of considering other potential candidates.[230] CAT LLC also determined that the fixed price contract, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, was reasonable and appropriate, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity.[231] The services performed by FCAT for each period and the costs related to such services are described above.[232]

(iii) Technology: CAIS Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to CAIS operating fees as a part of Historical CAT Assessments. [233] CAT LLC determined that the costs related to CAIS operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The CAIS operating fees include the fees paid to the Plan Processor to operate and maintain CAIS and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the FCAT-negotiated fees for Kingland's CAIS-related services, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity, were reasonable and appropriate.[234] The services performed by Kingland for each period and the costs for each period are described above.[235]

(iv) Technology: Change Request Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate

[224] For a discussion of the amount and type of cloud hosting services fees, *see* Sections 3(a)(2)(B)(i)(a)(I), 3(a)(2)(B)(i)(b)(I), 3(a)(2)(B)(i)(c)(I) and 3(a)(2)(B)(i)(d)(I) above.

[225] Appendix D–4 of the CAT NMS Plan at n.262.

[226] CAT NMS Plan Approval Order at 84801.

[227] *See* Sections 3(a)(2)(B)(i)(a)(I), 3(a)(2)(B)(i)(b)(I), 3(a)(2)(B)(i)(c)(I) and 3(a)(2)(B)(i)(d)(I) above.

[228] *See* Securities Exchange Act Rel. No. 97151 (Mar. 15, 2023), 88 FR 17086, 17117 (Mar. 21, 2023) (describing key cost discipline mechanisms for the CAT).

[229] Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

[230] *See* Section 3(a)(2)(B)(i)(a)(II) above.

[231] *See* Sections 3(a)(2)(B)(i)(a)(II), 3(a)(2)(B)(i)(b)(II), 3(a)(2)(B)(i)(c)(II) and 3(a)(2)(B)(i)(d)(II) above.

[233] Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

[234] *See* Sections 3(a)(2)(B)(i)(a)(III), 3(a)(2)(B)(i)(b)(III), 3(a)(2)(B)(i)(c)(III) and 3(a)(2)(B)(i)(d)(III) above.

[235] *Id.*

to recover costs related to change request fees as a part of Historical CAT Assessments.[236] CAT LLC determined that the costs related to change request fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. It is common practice to utilize a change request process to address evolving needs in technology projects. This is particularly true for a project like CAT that is the first of its kind, both in substance and in scale. The substance and costs of each of the change requests are evaluated by the Operating Committee, and approved in accordance with the requirements for Operating Committee meetings. In each case, CAT LLC determined that the change requests were necessary to implement the CAT. As described above, the change requests cover various technology changes, including, for example, changes related to CAT reporting, data feeds and exchange functionality. CAT LLC also determined that the costs for each change request were appropriate for the relevant technology change. A description of the change requests for each FAM Period and their total costs is described above.[237] As noted above, the total costs for change requests through FAM Period 3 represent a small percentage of Historical CAT Costs 1—that is, 0.25% of Historical CAT Costs 1.

(v) Capitalized Developed Technology Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to capitalized developed technology costs as a part of Historical CAT Assessments.[238] Capitalized developed technology costs include costs related to certain development costs, costs related to certain modifications, upgrades and other changes to the CAT, CAIS implementation fees and license fees. The amount and type of costs for each period are described in more detail above.[239] CAT LLC determined that these costs are reasonable and should be included as a part of Historical CAT Costs 1.

These costs involve the activity of both the Initial Plan Processor and FCAT, as the successor Plan Processor.[240] With regard to the Initial Plan Processor, the Participants utilized an RFP to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan. CAT LLC entered into an agreement with the Initial Plan Processor in which CAT LLC would pay the Initial Plan Processor a negotiated, fixed price fee.[241] In addition, as described above, CAT LLC determined that is was appropriate to enter into an agreement with FCAT as the successor Plan Processor.[242]

(vi) Legal

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to legal fees as a part of Historical CAT Assessments.[243] CAT LLC determined that the legal costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Given the unique nature of the CAT, the number of parties involved with the CAT (including, for example, the SEC, Participants, Industry Members, and vendors) and the many regulatory issues associated with the CAT, the scope of the necessary legal services is substantial. CAT LLC determined that the scope of the legal services is necessary to implement and maintain the CAT and that the legal rates reflect the specialized services necessary for such a project. When hiring each law firm for a CAT project, CAT LLC interviewed multiple firms, and determined to hire each firm based on a variety of factors, including the relevant expertise and fees. In each case, CAT LLC determined that the hourly fee rates were in line with market rates for the specialized legal expertise. In addition, CAT LLC determined that the total costs incurred for each CAT project were appropriate given the breadth of services provided. The services performed by each law firm for each period and the costs related to such services are described above.[244]

(vii) Consulting

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover consulting costs as a part of Historical CAT Assessments.[245] CAT LLC determined that the consulting costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees [246] and because of the significant number of issues associated with the CAT, the consultants provided assistance in the management of various CAT matters and the processes related to such matters.[247] CAT LLC considered a variety of factors in choosing a consulting firm and determined to select Deloitte after an interview process.[248] CAT LLC also determined that the consulting services were provided at reasonable market rates, as the fees were negotiated annually and comparable to the rates charged by other consulting firms for similar work.[249] Moreover, the total costs for such consulting services were appropriate in light of the breadth of services provided by Deloitte. The services performed by Deloitte and the costs related to such services are described above.[250]

(viii) Insurance

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover insurance costs as a part of Historical CAT Assessments.[251] CAT LLC determined that the insurance costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that it is common practice to have directors' and officers' liability insurance, and errors and omissions liability insurance. CAT LLC further determined that it was important to have cyber security insurance given the nature of the CAT, and such a decision is consistent with the CAT NMS Plan, which states that the cyber incident response plan may include ''[i]nsurance

[236] Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

[237] *See* Sections 3(a)(2)(B)(i)(a)(IV), 3(a)(2)(B)(i)(b)(IV), 3(a)(2)(B)(i)(c)(IV) and 3(a)(2)(B)(i)(d)(IV) above.

[244] *See* Sections 3(a)(2)(B)(i)(a)(VI), 3(a)(2)(B)(i)(b)(VI), 3(a)(2)(B)(i)(c)(VI) and 3(a)(2)(B)(i)(d)(VI) above.

[245] Section 11.3(b)(iii)(B)(II)(B)(3) of the CAT NMS Plan.

[246] As stated in the filing of the proposed CAT NMS Plan, ''[i]t is the intent of the Participants that the Company have no employees.'' Securities Exchange Act Rel. No. 77724 (Apr. 27, 2016), 81 FR 30614, 30621 (May 17, 2016).

[247] CAT LLC uses certain third parties to perform tasks that may be performed by administrators for other NMS Plans. *See, e.g.,* CTA Plan and CQ Plan.

[248] *See* Section 3(a)(2)(B)(i)(a)(VII) above.

[249] *See* Sections 3(a)(2)(B)(i)(a)(VII), 3(a)(2)(B)(i)(b)(VII), 3(a)(2)(B)(i)(c)(VII) and 3(a)(2)(B)(i)(d)(VII) above.

[250] *Id.*

[251] Section 11.3(b)(iii)(B)(II)(B)(4) of the CAT NMS Plan.

against security breaches.'' [252] In selecting the insurance providers for these policies, CAT LLC engaged in an evaluation of alternative insurers, including a comparison of the pricing offered by the alternative insurers.[253] Based on this analysis, CAT LLC determined that the selected insurance policies provided appropriate coverage at reasonable market rates.[254]

(ix) Professional and Administration

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover professional and administration costs as a part of Historical CAT Assessments.[255] CAT LLC determined that the professional and administration costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees, all required accounting, financial, tax, cash management and treasury functions for CAT LLC have been outsourced at market rates. In addition, the required annual financial statement audit of CAT LLC is included in professional and administration costs, which costs are also at market rates.

CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees.[256] The hourly fee rates for this firm were in line with market rates for the financial advisory services provided.[257] Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Anchin. The services performed by Anchin and the costs related to such services are described above.[258]

CAT LLC also determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the role given the balance of these considerations.[259] Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services.[260] Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Grant Thornton. The services performed by Grant Thornton and the costs related to such services are described above.[261]

The professional and administrative costs also include costs related to the receipt of certain market data from Exegy. After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy. Exegy provided the data elements required by the CAT NMS Plan, and the fees were reasonable and in line with market rates for the market data received.[262]

The professional and administrative costs also include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment.[263]

(x) Public Relations Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover public relations costs as a part of Historical CAT Assessments.[264] CAT LLC determined that the public relations costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that the types of public relations services utilized were beneficial to the CAT and market participants more generally. Public relations services were important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.[265] By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT issues to the benefit of all market participants.[266] Moreover, CAT LLC determined that the rates charged for such services were in line with market rates.[267] As noted above, the total public relations costs through FAM Period 3 represent a small percentage of Historical CAT Costs 1—that is, 0.1% of Historical CAT Costs 1.

(B) Total Executed Equivalent Share Volume for the Prior 12 Months

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from March 2025 through February 2026 was 5,980,937,549,360.49 executed equivalent shares. CAT LLC determined the total executed equivalent share volume for the prior twelve months by counting executed equivalent shares in the same manner as it will count executed equivalent shares for CAT billing purposes.

(C) Historical Recovery Period 1A

CAT LLC has determined to establish a Historical Recovery Period of 24 months for Historical CAT Assessment 1A and that such length is reasonable. CAT LLC determined that the length of Historical Recovery Period 1A appropriately weighs the need for a reasonable fee rate for Historical CAT Assessment 1A that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans notes to the Participants in a timely fashion. CAT LLC determined that 24 months for Historical Recovery Period 1A would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.[268]

[252] Section 4.1.5 of Appendix D of the CAT NMS Plan.

[267] *Id.*

[268] As the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from

Continued

In addition, in establishing a Historical Recovery Period of 24 months, CAT LLC recognized that the total cost for Historical CAT Assessment 1A was less than the total costs for 2022 and 2023, and therefore it would be appropriate to recover those costs in two years.

(D) Projected Executed Equivalent Share Volume for Historical Recovery Period 1A

CAT LLC has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1A by doubling the executed equivalent share volume for the prior 12 months. The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has increased from prior years (*e.g.,* the executed equivalent share volume for 2024 was 4,295,884,600,069.4) and the Operating Committee believes that it is reasonable to conclude that the annual executed equivalent share volume will remain at the higher level. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1A is projected to be 11,961,875,098,720.98 executed equivalent shares.[269]

(E) Actual Fee Rate for Historical CAT Assessment 1A

(i) Decimal Places

As noted in the Plan amendment for the CAT Funding Model, as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, and describe the relevant number of decimal places for the fee rate.[270] Accordingly, proposed paragraph (a)(2)(B) of 24X Rule 4.18 would set forth a fee rate of $0.000002 per executed equivalent share. CAT LLC determined that the use of six decimal places is reasonable as it balances the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

(ii) Reasonable Fee Level

The Exchange believes that imposing Historical CAT Assessment 1A with a fee rate of $0.000002 per executed equivalent share is reasonable because it provides for a revenue stream for the Company that is aligned with the remaining Historical CAT Costs 1 and such costs would be spread out over an appropriate recovery period, as discussed above. Moreover, the Exchange believes that the level of the fee rate is reasonable, as it is comparable to other transaction-based fees. Indeed, Historical CAT Assessment 1A is significantly lower than fees assessed pursuant to Section 31 (*e.g.,* $0.00007 per share to $0.00072 per share),[271] and, as a result, the magnitude of Historical CAT Assessment 1A is small, and therefore will mitigate any potential adverse economic effects or inefficiencies. Furthermore, the reasonable fee rate for Historical CAT Assessment 1A further supports CAT LLC's decision to seek to recover the costs described herein.

(3) Historical CAT Assessment 1A Provides for an Equitable Allocation of Fees

Historical CAT Assessment 1A provides for an equitable allocation of fees, as it equitably allocates CAT costs between and among the Participants and Industry Members. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act, including the formula for calculating Historical CAT Assessments as well as the Industry Members to be charged the Historical CAT Assessments.[272] In approving the CAT Funding Model, the SEC stated that ''[t]he Participants have sufficiently demonstrated that the proposed allocation of fees is appropriate.'' [273] Accordingly, the CAT Funding Model sets forth the requirements for allocating fees related to Historical CAT Costs among Participants and Industry Members, and the fee filings for Historical CAT Assessments must comply with those requirements.

Historical CAT Assessment 1A provides for an equitable allocation of fees as it complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. For example, as described above, the calculation of Historical CAT Assessment 1A complies with the formula set forth in Section 11.3(b) of the CAT NMS Plan. In addition, Historical CAT Assessment 1A would be charged to CEBBs and CEBSs in accordance with Section 11.3(b) of the CAT NMS Plan. Furthermore, the Participants would continue to remain responsible for their designated share of Past CAT Costs through the cancellation of loans made by the Participants to CAT LLC.

In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1A—Historical CAT Costs 1 (including Excluded Costs) and the exclusion of costs previously invoiced via Historical CAT Assessment 1, the count for the executed equivalent share volume for the prior 12 months, the length of the Historical Recovery Period, and the projected executed equivalent share volume for the Historical Recovery Period—are reasonable. Moreover, these inputs lead to a reasonable fee rate for Historical CAT Assessment 1A that is lower than other fee rates for transaction-based fees. A reasonable fee rate allocated in accordance with the requirements of the CAT Funding Model provides for an equitable allocation of fees.

(4) Historical CAT Assessment 1A Is Not Unfairly Discriminatory

Historical CAT Assessment 1A is not an unfairly discriminatory fee. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act. In reaching this conclusion, the SEC analyzed the potential effect of Historical CAT Assessments calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Historical CAT Assessment 1A complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1A and the resulting fee rate for Historical CAT Assessment 1A is reasonable. Therefore, Historical CAT Assessment 1A does not impose an unfairly discriminatory fee on Industry Members.

Finally, the Exchange believes the proposed fees established pursuant to the CAT Funding Model promote just and equitable principles of trade, and, in general, protect investors and the public interest, and are provided in a transparent manner and specificity in the Exchange's rules. The Exchange also believes that the proposed fees are reasonable because they would provide

$0.00007 per share to $0.00072 per share. CAT Funding Model Approval Order at 13469.

[269] This projection was calculated by multiplying 5,980,937,549,360.49 executed equivalent shares by two.

[270] CAT Funding Model Approval Order at 13445, n.677.

[271] *Id.* at 13469.

[272] *See* Section 11.3(b) of the CAT NMS Plan.

[273] CAT Funding Model Approval Order at 13412.

ease of calculation, ease of billing and other administrative functions, and predictability of a fee based on fixed rate per executed equivalent share. Such factors are crucial to estimating a reliable revenue stream for CAT LLC and for permitting Exchange members to reasonably predict their payment obligations for budgeting purposes.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

Section 6(b)(8) of the Act [274] requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that Historical CAT Assessment 1A implements provisions of the CAT NMS Plan that were approved by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan.

In addition, all Participants (including exchanges and FINRA) are proposing to introduce Historical CAT Assessment 1A on behalf of CAT LLC to implement the requirements of the CAT NMS Plan. Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the Participants.

Furthermore, in approving the CAT Funding Model, the SEC analyzed the potential competitive impact of the CAT Funding Model, including competitive issues related to market services, trading services and regulatory services, efficiency concerns, and capital formation.[275] The SEC also analyzed the potential effect of CAT fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Based on this analysis, the SEC approved the CAT Funding Model as compliant with the Exchange Act. Historical CAT Assessment 1A is calculated and implemented in accordance with the CAT Funding Model as approved by the SEC.

As discussed above, each of the inputs into the calculation of Historical CAT Assessment 1A is reasonable and the resulting fee rate for Historical CAT Assessment 1A calculated in accordance with the CAT Funding Model is reasonable. Therefore, Historical CAT Assessment 1A would not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were solicited or received with respect to the proposed rule change.

**III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) [276] of the Act and subparagraph (f)(2) of Rule 19b–4 thereunder,[277] because it establishes a due, fee, or other charge imposed by the Exchange. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [278] of the Act to determine whether the proposed rule change should be approved or disapproved.

**IV. Solicitation of Comments**

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

*Electronic Comments*

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–24X–2026–14 on the subject line.

*Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–24X–2026–14. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–24X–2026–14 and should be submitted on or before June 8, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[279]

**J. Matthew DeLesDernier,**

*Deputy Secretary.*

Part IV

## Securities and Exchange Commission

Self-Regulatory Organizations; Nasdaq MRX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Establish Fees Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail; Notice

## SECURITIES AND EXCHANGE COMMISSION

**[Release No. 34–105472; File No. SR–MRX–2026–19]**

## Self-Regulatory Organizations; Nasdaq MRX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Establish Fees Related to Certain Historical Costs of the National Market System Plan Governing the Consolidated Audit Trail

May 13, 2026.

Pursuant to Section 19(b)(1) under the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 28, 2026, Nasdaq MRX, LLC (''MRX'' or ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

### I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to establish fees for Industry Members [3] related to certain historical costs of the National Market System Plan Governing the Consolidated Audit Trail (the ''CAT NMS Plan'' or ''Plan'') incurred prior to January 1, 2022 that were not previously invoiced via Historical CAT Assessment 1. Industry Members were previously invoiced for $173,075,024 of the $212,039,879.34 of Historical CAT Costs 1 via Historical CAT Assessment 1. Historical CAT Assessment 1 is no longer in effect. Historical CAT Assessment 1A is being established to collect the remaining $38,964,855.34 of Historical CAT Costs 1. These fees would be payable to Consolidated Audit Trail, LLC (''CAT LLC'' or ''the Company'') [4] and referred to as Historical CAT Assessment 1A, and would be described in a section of the Exchange's fee schedule entitled ''Consolidated Audit Trail Funding Fees.'' The fee rate for Historical CAT Assessment 1A will be $0.000002 per executed equivalent share. CAT Executing Brokers will receive their first monthly invoice for Historical CAT Assessment 1A in June 2026 calculated based on their transactions as CAT Executing Brokers for the Buyer (''CEBB'') and/or CAT Executing Brokers for the Seller (''CEBS'') in May 2026.[5]

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/mrx/rulefilings,* and at the principal office of the Exchange.

### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

1. Purpose

On July 11, 2012, the Commission adopted Rule 613 of Regulation NMS, which required the self-regulatory organizations (''SROs'') to submit a national market system (''NMS'') plan to create, implement and maintain a consolidated audit trail that would capture customer and order event information for orders in NMS securities across all markets, from the time of order inception through routing, cancellation, modification or execution.[6] On November 15, 2016, the Commission approved the CAT NMS Plan.[7] Under the CAT NMS Plan, the Operating Committee has the discretion to establish funding for CAT LLC to operate the CAT, including establishing fees for Industry Members to be assessed by CAT LLC that would be implemented on behalf of CAT LLC by the Participants.[8] On September 5, 2025, CAT LLC proposed a revised funding model to fund the CAT (''CAT Funding Model'').[9] On March 16, 2026, the Commission approved the CAT Funding Model, after concluding that the model satisfied the requirements of Section 11A of the Exchange Act and Rule 608 thereunder.[10]

The CAT Funding Model provides a framework for the recovery of the costs to create, develop and maintain the CAT, including providing a method for allocating costs to fund the CAT among Participants and Industry Members. The CAT Funding Model establishes two categories of fees: (1) CAT fees assessed by CAT LLC and payable by certain Industry Members to recover a portion of historical CAT costs previously paid by the Participants (''Historical CAT Assessment'' fees); and (2) CAT fees assessed by CAT LLC and payable by Participants and Industry Members to fund prospective CAT costs (''Prospective CAT Costs'' fees).[11]

Under the CAT Funding Model, ''[t]he Operating Committee will establish one or more fees (each a 'Historical CAT Assessment') to be payable by Industry Members with regard to CAT costs previously paid by the Participants ('Past CAT Costs').'' [12] In establishing a Historical CAT Assessment, the Operating Committee will determine a ''Historical Recovery Period'' and calculate a ''Historical Fee Rate'' for that Historical Recovery Period. Then, for each month in which a Historical CAT Assessment is in effect, each CEBB and CEBS would be required to pay the fee—the Historical CAT Assessment—for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] An ''Industry Member'' is defined as ''a member of a national securities exchange or a member of a national securities association.'' *See* Rule General 7, Section 1. *See also* Section 1.1 of the CAT NMS Plan. Unless otherwise specified, capitalized terms used in this rule filing are defined as set forth in the CAT NMS Plan and/or the CAT Compliance Rule.

[4] The term ''CAT LLC'' may be used to refer to Consolidated Audit Trail, LLC or CAT NMS, LLC, depending on the context.

[5] On April 27, 2026, SR–MRX–2026–17 was filed. On April 28, 2026, SR–MRX–2026–17 was withdrawn and this rule change was filed.

[8] Section 11.1(b) of the CAT NMS Plan.

[9] Securities Exchange Act Rel. No. 103960 (Sept. 12, 2025), 90 FR 44910 (Sept. 17, 2025).

[10] Securities Exchange Act Rel. No. 105003 (Mar. 16, 2026), 91 FR 13410 (Mar. 29, 2026) (''CAT Funding Model Approval Order''). This CAT Funding Model replaced the prior funding model that was approved by the Commission on September 6, 2023. Securities Exchange Act Rel. No. 98290 (Sept. 6, 2023), 88 FR 62628 (Sept. 12, 2023).

[11] Under the CAT Funding Model, the Operating Committee may establish one or more Historical CAT Assessments. Section 11.3(b) of the CAT NMS Plan. This filing only establishes Historical CAT Assessment 1A related to certain Historical CAT Costs as described herein; it does not address any other potential Historical CAT Assessment related to other Historical CAT Costs. In addition, under the CAT Funding Model, the Operating Committee also may establish CAT Fees related to CAT costs going forward. Section 11.3(a) of the CAT NMS Plan. This filing does not address any potential CAT Fees related to CAT costs going forward. Any such other fee for any other Historical CAT Assessment or CAT Fee for Prospective CAT Costs will be subject to a separate fee filing.

[12] Section 11.3(b) of the CAT NMS Plan.

in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate.[13]

Each Historical CAT Assessment to be paid by CEBBs and CEBSs is designed to contribute toward the recovery of two-thirds of the Historical CAT Costs. Because the Participants previously have paid Past CAT Costs via loans to the Company, the Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made by the Participants to the Company on a pro rata basis based on the outstanding loan amounts due under the loans, instead of through the payment of a CAT fee.[14] In addition, the Participants also will be 100% responsible for certain Excluded Costs (as discussed below).

CAT LLC proposes to charge CEBBs and CEBSs (as described in more detail below) Historical CAT Assessment 1A to recover certain historical CAT costs incurred prior to January 1, 2022, in accordance with the CAT Funding Model. To implement this fee on behalf of CAT LLC, the CAT NMS Plan requires the Participants to ''file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves, and such fees shall be labeled as 'Consolidated Audit Trail Funding Fees.' '' [15] The Plan further states that ''Participants will be required to file with the SEC pursuant to Section 19(b) of the Exchange Act a filing for each Historical CAT Assessment.'' [16] Accordingly, the purpose of this filing is to implement a Historical CAT Assessment on behalf of CAT LLC for Industry Members, referred to as Historical CAT Assessment 1A, in accordance with the CAT NMS Plan.[17]

The Exchange, along with the other Participants in the CAT, previously filed a fee filing to implement Historical CAT Assessment 1.[18] Based on the fee filing for Historical CAT Assessment 1, Historical CAT Assessment 1 was expected to be in effect from the first invoice in November 2024 until $212,039,879.34 (two-thirds of Historical CAT Costs 1) was invoiced to CAT Executing Brokers collectively.[19] However, Historical CAT Assessment 1 ceased before the entire amount was invoiced.[20] The last invoice for Historical CAT Assessment 1 was provided on December 2025, after only $173,075,024 of the total $212,039,879.34 had been invoiced to Industry Members.[21] Accordingly, $38,964,855.34 of Historical CAT Costs 1 has not been invoiced. Historical CAT Assessment 1A would seek to recover this outstanding amount of Historical CAT Costs 1 that has not been invoiced.

(1) CAT Executing Brokers

Historical CAT Assessment 1A will be charged to each CEBB and CEBS for each applicable transaction in Eligible Securities.[22] The CAT NMS Plan defines a ''CAT Executing Broker'' to mean:

(a) with respect to a transaction in an Eligible Security that is executed on an exchange, the Industry Member identified as the Industry Member responsible for the order on the buy-side of the transaction and the Industry Member responsible for the sell-side of the transaction in the equity order trade event and option trade event in the CAT Data submitted to the CAT by the relevant exchange pursuant to the Participant Technical Specifications; and (b) with respect to a transaction in an Eligible Security that is executed otherwise than on an exchange and required to be reported to an equity trade reporting facility of a registered national securities association, the Industry Member identified as the executing broker and the Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event in the CAT Data submitted to the CAT by FINRA pursuant to the Participant Technical Specifications; provided, however, in those circumstances where there is a non-Industry Member identified as the contra-side executing broker in the TRF/ORF/ADF transaction data event or no contra-side executing broker is identified in the TRF/ORF/ADF transaction data event, then the Industry Member identified as the executing broker in the TRF/ORF/ADF transaction data event would be treated as CAT Executing Broker for the Buyer and for the Seller.[23]

The following fields of the Participant Technical Specifications indicate the CAT Executing Brokers for the transactions executed on an exchange.

EQUITY ORDER TRADE (EOT) [24]

[15] Section 11.1(b) of the CAT NMS Plan.

[16] Section 11.3(b)(iii)(B)(I) of the CAT NMS Plan.

[17] Note that there may be one or more Historical CAT Assessments. Section 11.3(b) of the CAT NMS Plan.

[18] *See* Securities Exchange Act Rel. No. 100949 (Sep. 5, 2024), 89 FR 74380 (Sep. 12, 2024) (''Historical CAT Assessment 1 Filing'').

[19] *See* Rule General 7A(a)(1).

[20] In response to the Eleventh Circuit's decision vacating the prior CAT NMS Plan funding model, the last invoices for Historical CAT Assessment 1 were sent in December 2025 based on November 2025 transactions. *See American Securities Association* v. *SEC,* No. 23–13396 (11th Cir. July 25, 2025).

[21] CAT Fee Alert 2025–4 (Nov. 25, 2025).

[22] In its approval order for the CAT Funding Model, the Commission determined that charging CAT fees to CAT Executing Brokers was appropriate. In reaching this conclusion the Commission noted that the use of CAT Executing Brokers is appropriate because the CAT Funding Model is based upon the calculation of *executed* equivalent shares, and, therefore, charging CAT Executing Brokers would reflect their executing role in each transaction. Furthermore, the Commission noted that, because CAT Executing Brokers are already identified in transaction reports from the exchanges and FINRA's equity trade reporting facilities recorded in CAT Data, charging CAT Executing Brokers could streamline the billing process. CAT Funding Model Approval Order at 13413.

[23] Section 1.1 of the CAT NMS Plan. In its approval order for the CAT Funding Model, the Commission ''recognize[d] that Industry Members may pass-through CAT fees for customer executed volume.'' *See* CAT Funding Model Approval Order at 13424.

| 28 ..... | contraExecutingMpid ..... | Member Alias ..... | MPID of the contra-side executing party ..... | C |

(2) Calculation of Fee Rate for Historical CAT Assessment 1A

The Operating Committee determined the fee rate to be used in calculating Historical CAT Assessment 1A based on the Historical CAT Costs for Historical CAT Assessment 1A and the projected total executed share volume of all transactions in Eligible Securities for the Historical Recovery Period for Historical CAT Assessment 1A (''Historical Recovery Period 1A''), as discussed in detail below. Based on this calculation, the Operating Committee has determined that the fee rate for Historical CAT Assessment 1A would be $0.000002, as discussed in detail below.

(A) Executed Equivalent Shares for Transactions in Eligible Securities

Under the CAT NMS Plan, for purposes of calculating each Historical CAT Assessment, executed equivalent shares in a transaction in Eligible Securities will be reasonably counted as follows: (1) each executed share for a transaction in NMS Stocks will be counted as one executed equivalent share; (2) each executed contract for a transaction in Listed Options will be counted based on the multiplier applicable to the specific Listed Options (*i.e.,* 100 executed equivalent shares or such other applicable multiplier); and (3) each executed share for a transaction in OTC Equity Securities shall be counted as 0.01 executed equivalent share.[27]

(B) Historical CAT Costs

The CAT NMS Plan states that ''[t]he Operating Committee will reasonably determine the Historical CAT Costs sought to be recovered by each Historical CAT Assessment, where the Historical CAT Costs will be Past CAT Costs minus Past CAT Costs reasonably excluded from Historical CAT Costs by the Operating Committee. Each Historical CAT Assessment will seek to recover from CAT Executing Brokers two-thirds of Historical CAT Costs incurred during the period covered by the Historical CAT Assessment.'' [28] Historical CAT Assessment 1, the original Historical CAT Assessment, was implemented to recover $212,039,879.34 of Historical CAT Costs 1 from CEBBs and CEBSs collectively.[29] As described in the fee filings for Historical CAT Assessment 1, Historical CAT Costs 1 of $212,039,879.34 includes Past CAT Costs of $401,312,909 minus certain Excluded Costs of $83,253,090. As described in the filing for Historical CAT Assessment 1, Participants collectively will remain responsible for one-third of Historical CAT Costs 1 (which is $106,019,939.67), plus the Excluded Costs of $83,253,090. Accordingly, CEBBs collectively will be responsible for one-third of Historical CAT Costs 1 (which is $106,019,939.67), and CEBSs collectively will be responsible for one-third of Historical CAT Costs 1 (which is $106,019,939.67), for a total of $212,039,879.34. CEBBs and CEBSs collectively have been invoiced for $173,075,024 of the $212,039,879.34 of Historical CAT Costs 1 via Historical CAT Assessment 1. Accordingly, Historical CAT Assessment 1A would charge CEBBs and CEBSs collectively for the remaining $38,964,855.34 of Historical CAT Costs 1 that was not invoiced to CEBBs and CEBSs via Historical CAT Assessment 1. Historical CAT Assessment 1A will be designed to recover the remaining $38,964,855.34 of Historical CAT Costs 1 from CEBBs and CEBSs collectively, with CEBBs collectively responsible for $19,482,427.67 and CEBSs collectively responsible for $19,482,427.67.

(i) Historical CAT Costs 1

The following describes in detail Historical CAT Costs 1 with regard to four separate historical time periods as well as Past CAT Costs excluded from Historical CAT Costs 1 (''Excluded Costs''). The following cost details are provided in accordance with the requirement in the CAT NMS Plan to provide in the fee filing ''a brief description of the amount and type of Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.'' [30] Each of the costs described below are reasonable, appropriate and necessary for the creation, implementation and maintenance of CAT. These Historical

[25] *See* Table 52, Section 5.2.5.1 (Simple Option Trade Event) of the CAT Reporting Technical Specifications for Plan Participants.

[26] *See* Table 62, Section 6.1 (TRF/ORF/ADF Transaction Data Event) of the CAT Reporting Technical Specifications for Plan Participants.

[27] Section 11.3(a)(i)(B) and 11.3(b)(i)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission concluded that ''in the Commission's view, the use of executed equivalent share volume as the basis for determining and allocating CAT costs during the two-year interim period is appropriate and consistent with the funding principles of the CAT NMS Plan.'' CAT Funding Model Approval Order at 13427.

[28] Section 11.3(b)(i)(C) of the CAT NMS Plan.

[29] *See* Historical CAT Assessment 1 Filing, *supra* note 17.

[30] Section 11.3(b)(iii)(B)(II)(B) of the CAT NMS Plan.

CAT Costs 1 are the same as described in the fee filing for Historical CAT Assessment 1.[31]

(a) Historical CAT Costs Incurred Prior to June 22, 2020 (Pre-FAM Costs)

Historical CAT Costs 1 would include costs incurred by CAT prior to June 22, 2020 (''Pre-FAM Period'') and already funded by the Participants, excluding Excluded Costs (described further below). Historical CAT Costs 1 would include costs for the Pre-FAM Period of $124,290,730. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($41,430,243.33), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($41,430,243.33) and CEBSs paying one-third ($41,430,243.33). These costs do not include Excluded Costs, as discussed further below. The following table breaks down Historical CAT Costs 1 for the Pre-FAM Period into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Historical CAT costs 1 for Pre-FAM Period (prior to June 22, 2020) ** |
|---|---|
| Capitalized Developed Technology Costs * | $51,847,150 |
| *Technology Costs* | 33,568,579 |
| Cloud Hosting Services | 10,268,840 |
| Operating Fees | 21,085,485 |
| CAIS Operating Fees | 2,072,908 |
| Change Request Fees | 141,346 |
| Legal | 19,674,463 |
| Consulting | 17,013,414 |
| Insurance | 880,419 |
| Professional and administration | 1,082,036 |
| Public relations | 224,669 |
| Total Operating Expenses | 124,290,730 |

* The non-cash amortization of these capitalized developed technology costs of $2,115,545 incurred during the period prior to June 22, 2020 have been appropriately excluded from the above table.[32]

** The costs described in this table of costs for the Pre-FAM Period were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website. In addition, in accordance with Section 6.6(a)(i) of the CAT NMS Plan, in 2018 CAT LLC provided the SEC with ''an independent audit of fees, costs, and expenses incurred by the Participants on behalf of the Company prior to the Effective Date of the Plan that will be publicly available.'' The audit is available on the CAT website.

The Pre-FAM Period includes a broad range of CAT-related activity from 2012 through June 22, 2020, including the evaluation of the requirements of SEC Rule 613, the development of the CAT NMS Plan, the evaluation and selection of the initial and successor Plan Processors, the commencement of the creation and implementation of the CAT to comply with Rule 613 and the CAT NMS Plan, including technical specifications for transaction reporting and regulatory access, and related technology and the commencement of reporting to the CAT. The following describes the costs for each of the categories for the Pre-FAM Period.

(I) Technology Costs—Cloud Hosting Services

The $10,268,840 in technology costs for cloud hosting services represent costs incurred for services provided by the cloud services provider for the CAT, Amazon Web Services, Inc. (''AWS''), during the Pre-FAM Period.

As part of its proposal for acting as the successor Plan Processor for the CAT, FCAT selected AWS as a subcontractor to provide cloud hosting services. In 2019, after reviewing the capabilities of other cloud services providers, FCAT determined that AWS was the only cloud services provider at that time sufficiently mature and capable of providing the full suite of necessary cloud services for the CAT, including, for example, the security, resiliency and complexity necessary for the CAT computing requirements. The use of cloud hosting services is standard for this type of high-volume data activity and reasonable and necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT the fees incurred by the Plan Processor for cloud hosting services provided by AWS as FCAT's subcontractor on a monthly basis for the cloud hosting services, and FCAT, in turn, pays such fees to AWS. The fees for cloud hosting services were negotiated by FCAT on an arm's length basis with the goals of managing cost and receiving services required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the expected volume of data, the breadth of services provided and market rates for similar services. The fees for cloud hosting services during the Pre-FAM Period were paid to FCAT by CAT NMS, LLC[33] and subsequently Consolidated Audit Trail, LLC (as previously noted, both entities are referred to generally as ''CAT LLC''),[34] and FCAT, in turn, paid AWS. CAT LLC was funded via loan contributions by the Participants.[35]

[31] *See* Historical CAT Assessment 1 Filing, *supra* note 17.

[32] With respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

[33] CAT NMS, LLC was formed by FINRA and the U.S. national securities exchanges to implement the requirements of SEC Rule 613 under the Exchange Act. SEC Rule 613 required the SROs to jointly submit to the SEC the CAT NMS Plan to create, implement and maintain the CAT. The SEC approved the CAT NMS Plan on November 15, 2016. CAT NMS Plan Approval Order.

[34] On August 29, 2019, the Participants formed a new Delaware limited liability company named Consolidated Audit Trail, LLC for the purpose of conducting activities related to the CAT from and after the effectiveness of the proposed amendment of the CAT NMS Plan to replace CAT NMS, LLC. *See* Securities Exchange Act Rel. No. 87149 (Sept. 27, 2019), 84 FR 52905 (Oct. 3, 2019).

[35] For each of the costs paid by CAT NMS, LLC and Consolidated Audit Trail, LLC as discussed throughout this filing, CAT NMS, LLC and Consolidated Audit Trail, LLC paid these costs via loan contributions by the Participants to CAT NMS, LLC and Consolidated Audit Trail, LLC, respectively.

AWS was engaged by FCAT to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS include storage services, databases, compute services and other services (such as networking, management tools and DevOps tools). AWS also was engaged to provide various environments for CAT, such as development, performance testing, test and production environments.

The cost for AWS services for the CAT is a function of the volume of CAT Data. The greater the amount of CAT Data, the greater the cost of AWS services to the CAT. During the Pre-FAM Period from the engagement of AWS in February 2019 through June 2020, AWS provided cloud hosting services for volumes of CAT Data far in excess of the volume predictions set forth in the CAT NMS Plan. The CAT NMS Plan states, when all CAT Reporters are submitting their data to the CAT, it ''must be sized to receive[,] process and load more than 58 billion records per day,'' [36] and that ''[i]t is expected that the Central Repository will grow to more than 29 petabytes of raw, uncompressed data.'' [37] However, the volume of CAT Data for the Pre-FAM Period was far in excess of these predicted levels. By the end of this period, data submitted to the CAT included options and equities Participant Data,[38] Phase 2a and Phase 2b Industry Member Data [39] (including certain linkages), as well as SIP Data,[40] reference data and other types of Other Data.[41] The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during the Pre-FAM Period.[42]

| | Date range: 3/29/19 to 4/12/20 * | Date range: 4/13/20 to 6/21/20 ** |
|---|---|---|
| Average Daily Volume in Billions: | | |
| Participant—Equities | 5 | 5 |
| Participant—Options | 80 | 981 |
| Industry Member—Equities | | 3 |
| Industry Member—Options | | 0.04 |
| SIP—Options & Equities | 64 | 70 |
| Average Total Daily Volume | 149 | 166 |
| Cumulative Total Events for the Period | 3,890 | 4,990 |
| Total Compute Hours for the Period | N/A [43] | 5,663,247 |
| Storage Footprint at End of Period (Petabytes) | 30.57 | 47.96 |

* The Participant Equities in RSA format.
** Start of Industry Member reporting on 4/13/2020.

(II) Technology Costs—Operating Fees

The $21,085,485 in technology costs related to operating fees represent costs incurred with regard to activities of FCAT as the Plan Processor. Operating fees are those fees paid by CAT LLC to FCAT as the Plan Processor to operate and maintain the CAT and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management as required by the CAT NMS Plan.

FCAT was selected to assume the role of the successor Plan Processor. Prior to this selection, the Participants engaged in discussions with two prior Bidders [44] for the successor Plan Processor role. The Operating Committee formed a Selection Subcommittee in accordance with Section 4.12 of the CAT NMS Plan to evaluate and review Bids and to make a recommendation to the Operating Committee with respect to the selection of the successor Plan Processor. In an April 9, 2019 letter to the Commission, the Participants described the reasons for its selection of the successor Plan Processor:

The Selection Subcommittee considered factors including, but not limited to, the following, in recommending FINRA to the Operating Committee as the successor Plan Processor:

a. FINRA's specialized technical expertise and capabilities in the area of broker-dealer technology;

b. The need to appoint a successor Plan Processor with specialized expertise to develop, implement, and maintain the CAT System in accordance with the CAT NMS Plan and SEC Rule 613;

c. FINRA's detailed proposal in response to CATLLC's recent inquiries; and

d. FINRA's data query and analytics systems demonstration to the Participants.

Based on these and other factors, the Selection Subcommittee determined that FINRA was the most appropriate Bidder to become the successor Plan Processor.[45]

On February 26, 2019, the Operating Committee (with FINRA recusing itself) voted to select FINRA as the successor Plan Processor pursuant to Section 6.1(t) of the CAT NMS Plan.[46] On March 29, 2019, CAT LLC and FCAT (a wholly owned subsidiary of FINRA) entered into a Plan Processor Agreement pursuant to which FCAT would perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT.

Under the Plan Processor Agreement with FCAT, CAT LLC is required to pay FCAT a negotiated monthly fixed price for the operation of the CAT. This fixed price contract was negotiated on an arm's length basis with the goals of managing costs and receiving services

[36] Appendix D–4 of the CAT NMS Plan at n.262.

[40] *See* Section 6.5(a)(ii) of the CAT NMS Plan.

[41] *See* Appendix C–109 of the CAT NMS Plan.

[42] Note that the volume data described in this table does not include CAIS data.

[43] Note that, although there were compute hours during this period, data related to such compute hours are no longer available in current data.

[44] The term ''Bidder'' is defined in Section 1.1 of the CAT NMS Plan.

[45] Letter from Michael J. Simon, Chair, CAT NMS, LLC Operating Committee, to Brent J. Fields, Secretary, SEC (Apr. 9, 2019), *https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection-040919.pdf.*

[46] *Id.*

required to comply with the CAT NMS Plan and Rule 613, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity. The operating fees during the Pre-FAM Period were paid to FCAT by CAT LLC.

From March 29, 2019 (the commencement of the Plan Processor Agreement with FCAT) through June 22, 2020 (the end of the Pre-FAM Period), the Plan Processor's activities with respect to the CAT included the following:

- Commenced user acceptance testing with market data provided by Exegy Incorporated (''Exegy''), a market data provider; [47]
- Published Technical Specifications and related reporting scenarios documents for Phase 2a, 2b and 2c reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Facilitated testing for Phase 2a and 2b reporting for Industry Members;
- Began developing Technical Specifications and related reporting scenarios documents for Phase 2d reporting for Industry Members, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Published Central Repository Access Technical Specifications, and provided regulator access to test data from Industry Members;
- Facilitated Participant exchanges that support options market makers sending Quote Sent Time to the CAT;
- Facilitated the introduction of OPRA and Options NBBO Other Data to CAT;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing requirements under Regulation SCI;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants, the SEC and its staff;
- Operated the FINRA CAT Helpdesk, which is the primary source for answers to questions about CAT, including questions regarding: clock synchronization, firm reporting responsibilities, interpretive questions, technical specifications for reporting to CAT and more;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; [48] and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

The $2,072,908 in technology costs related to CAIS operating fees represent the fees paid for FCAT's subcontractor charged with the development and operation of CAT's Customer and Account Information System (''CAIS''). The CAT is required under the CAT NMS Plan to capture and store Customer Identifying Information and Customer Account Information in a database separate from the transactional database and to create a CAT-Customer-ID for each Customer.

During the Pre-FAM Period, the CAIS-related services were provided by the Plan Processor through the Plan Processor's subcontractor, Kingland Systems Incorporation (''Kingland''). Kingland had experience operating in the securities regulatory technology space, and as a part of its proposal for acting as the Plan Processor for the CAT, FCAT selected Kingland as a subcontractor to provide certain CAIS-related services.

Under the Plan Processor Agreement with FCAT, CAT LLC was required to pay to the Plan Processor the fees incurred by FCAT for CAIS-related services provided by FCAT through Kingland on a monthly basis. FCAT negotiated the fees for Kingland's CAIS-related services on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity. The fees for CAIS-related services during the Pre-FAM Period were paid by CAT LLC to FCAT. FCAT, in turn, paid Kingland.

During the Pre-FAM Period, Kingland began development of the CAIS Technical Specifications and the building of CAIS. In addition, Kingland also worked on the build related to the CCID Alternative, an alternative approach to customer information that was not included in the CAT NMS Plan as originally adopted.[49] Furthermore, Kingland also worked on the acceleration of the reporting of large trader identifiers (''LTID'') earlier than originally contemplated during this period, in accordance with exemptive relief granted by the SEC.[50]

(IV) Technology Costs—Change Request Fees

The technology costs related to change request fees include costs related to certain modifications, upgrades or other changes to the CAT. Change requests are standard practice and necessary to reflect operational changes, including changes related to new market developments, such as new market participants. In general, if CAT LLC determines that a modification, upgrade or other change to the functionality or service is necessary and appropriate, CAT LLC will submit a request for such a change to the Plan Processor. The Plan Processor will then respond to the request with a proposal for implementing the change, including the cost (if any) of such a change. CAT LLC then determines whether to approve the proposed change. The change request costs were paid by CAT LLC to FCAT. During the Pre-FAM Period, CAT LLC incurred costs of $141,346 related to change requests implemented by FCAT. Such change requests related to a development fee regarding the OPRA and SIP data feeds, and the reprocessing of certain exchange data.[51]

(V) Technology Costs—Capitalized Developed Technology Costs

This category of costs includes capitalizable application development costs incurred in the development of the CAT. The capitalized developed technology costs for the Pre-FAM Period of $51,847,150 relate to technology provided by the Initial Plan Processor and the successor Plan Processor.

*Initial Plan Processor: Thesys CAT, LLC.* The capitalized developed technology costs related to the Initial

[47] The use of Exegy to provide market data, including the costs and market data provided, is discussed below in Section 3(a)(2)(B)(a)(IX).

[48] The CAT website is *https://www.catnmsplan.com.*

[49] For a discussion of the CCID Alternative, *see* Securities Exchange Act Rel. No. 88393 (Mar. 17, 2020), 85 FR 16152 (Mar. 20, 2020).

[50] Phased Reporting Exemptive Relief Order at 23079–80.

[51] Note that CAT LLC also has incurred costs related to specific Industry Members (*e.g.,* reprocessing costs related to Industry Member reporting errors).

Plan Processor include costs incurred with regard to testing for Participant reporting, Participant reporting to the CAT, a security assessment of the CAT, and the development of the billing function for the CAT.

On January 17, 2017, the Selection Committee of the CAT NMS Plan selected the Initial Plan Processor, Thesys Technologies, LLC, for the CAT NMS Plan pursuant to Article V of the CAT NMS Plan.[52] The Participants utilized a request for proposal (''RFP'') to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan, taking into consideration that the Initial Plan Processor had experience operating in the securities regulatory technology space, among other considerations. On April 6, 2017, CAT LLC entered into an agreement with Thesys CAT LLC (''Thesys CAT''), a Thesys affiliate, to perform the functions and duties of the Plan Processor contemplated by the CAT NMS Plan, including the management and operation of the CAT. Under the agreement, CAT LLC would pay Thesys CAT a negotiated, fixed price fee for its role as the Initial Plan Processor. Effective January 30, 2019, the Plan Processor Agreement with Thesys CAT was terminated, and FCAT was subsequently selected as the successor Plan Processor.

From January 17, 2017 through January 30, 2019, the time in which Thesys CAT was engaged for the CAT, but excluding the period from November 15, 2017 through January 30, 2019, the Initial Plan Processor engaged in various activities with respect to the CAT, including preparing iterative drafts of Participant Technical Specifications, Industry Member Technical Specifications and the Central Repository Access Technical Specifications. In addition, Thesys CAT also developed CAT technology, addressed compliance items, including drafting CAT policies and procedures, addressing Regulation SCI requirements, establishing a CAT Compliance Officer and a Chief Information Security Officer, addressed security-related matters for the CAT, and worked towards the initiation of Participant reporting per the Participant Technical Specifications.

*Successor Plan Processor: FCAT.* The capitalized developed technology costs related to FCAT include: (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, including the completion of go-live functionality related to options ingestion and validation, equities regulatory services agreement query tool updates and unlinked options data query, options linkages release, Industry Member Phase 2a file submission and data integrity (including error corrections), and Industry Member testing, including reporting relationships, ATS order type management, basic reporting statistics, SFTP data integrity feedback and error correction; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including a one-time development fee for a secure analytics workspace, a one-time development fee for an Industry Member connectivity solution, and a one-time development fee for the acceleration of multi-factor authentication; (3) CAIS implementation fees; and (4) license fees.

(VI) Legal Costs

The legal costs of $19,674,463 represent the fees paid for legal services provided by two law firms, Wilmer Cutler Pickering Hale and Dorr LLP (''WilmerHale'') and Pillsbury Winthrop Shaw Pittman LLP (''Pillsbury''), during the Pre-FAM Period. The legal costs exclude those costs incurred from November 15, 2017 through November 15, 2018.

*Law Firm: WilmerHale.* Following the adoption of Rule 613, the Participants determined it was necessary to engage external legal counsel to advise the Participants with respect to corporate and regulatory legal matters related to the CAT, including drafting and developing the CAT NMS Plan. The Participants considered a variety of factors in their analysis of prospective law firms, including (1) the firm's qualifications, resources and expertise; (2) the firm's relevant experience and understanding of the regulatory matters raised by the CAT and in advising on matters of similar scope; (3) the composition of the legal team; and (4) professional fees. Following a series of interviews, the Participants acting as a consortium determined that WilmerHale was well qualified given the balance of these considerations and engaged WilmerHale in February 2013.

WilmerHale's billing rates are negotiated on an annual basis and are determined with reference to the rates charged by other leading law firms for similar work. The Participants assess WilmerHale's performance and review prospective budgets and staffing plans submitted by WilmerHale on an annual basis. WilmerHale's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading law firms for similar work.

The legal costs for WilmerHale during the Pre-FAM Period included costs incurred from 2013 until June 22, 2020 to address corporate and regulatory legal matters related to the CAT. The legal fees for this law firm during the period from February 2013 until the formation of the CAT NMS, LLC on November 15, 2016 were paid directly by the exchanges and FINRA to WilmerHale. After the formation of CAT NMS LLC, the legal fees were paid by CAT LLC to WilmerHale.

After WilmerHale was engaged in 2013 through the end of the Pre-FAM Period on June 22, 2020 (excluding the legal costs from November 15, 2017 through November 15, 2018), WilmerHale provided legal assistance to the CAT on a variety of matters, including with regard to the following:

- Analyzed various legal matters associated with the Selection Plan, and drafted an amendment to the Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the Development Advisory Group (''DAG'');
- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on CAT NMS Plan;
- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan, and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;

[52] Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), *https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection.pdf.*

• Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan and related filings;
• Negotiated and drafted the plan processor agreements with the Initial Plan Processor and the successor Plan Processor;
• Provided assistance with compliance with Regulation SCI;
• Assisted with clock synchronization study;
• Provided assistance with respect to the establishment of CAT security;
• Drafted exemptive requests from CAT NMS Plan requirements, including with regard to options market maker quotes, Customer IDs, CAT Reporter IDs, linking allocations to executions, CAT reporting timeline, FDIDs, customer and account information, timestamp granularity, small industry members, data facility reporting and linkage, allocation reports, SRO-assigned market participant identifiers and cancelled trade indicators, thereby seeking to implement changes that would be cost effective and benefit Industry Members and Participants;
• Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
• Provided advice regarding CAT policies and procedures;
• Analyzed the SEC's amendment of the CAT NMS Plan regarding financial accountability;
• Provided interpretations of and related to the CAT NMS Plan;
• Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues; and
• Assisted with third-party vendor agreements.

*Law Firm: Pillsbury.* The legal costs for CAT during the Pre-FAM Period include costs related to the legal services performed by Pillsbury. The Participants interviewed this law firm as well as other potential law firms to provide legal assistance regarding certain liability matters. After considering a variety of factors in its analysis, including the relevant expertise and fees of the firm, CAT LLC determined to hire Pillsbury in April 2019. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees were paid by CAT LLC to Pillsbury. The legal costs for Pillsbury during the Pre-FAM Period included costs incurred from April 2019 until June 22, 2020 to address legal matters regarding the agreements between CAT Reporters and CAT LLC concerning certain terms associated with CAT Reporting (the ''Reporter Agreement''). During that period, Pillsbury advised CAT LLC regarding applicable legal matters, participated in negotiations between the Participants and Industry Members, participated in meetings with senior SEC staff, the Chairman, and Commissioners, represented CAT LLC and the Participants in an SEC administrative proceeding, and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, litigation involving CAT LLC is an expense of operating the CAT, and, therefore, is appropriately an obligation of both Participants and Industry Members under the CAT Funding Model.

(VII) Consulting Costs

The consulting costs of $17,013,414 represent the fees paid to the consulting firm Deloitte & Touche LLP (''Deloitte'') as project manager during the Pre-FAM Period, from October 2012 until June 22, 2020. These consulting costs include costs for advisory services related to the operation of the CAT, and meeting facilitation and communications coordination, vendor support and financial analyses.

To help facilitate project management given the unprecedented complexity and scope of the CAT project, the Participants determined it was necessary to engage a consulting firm to assist with the CAT project in 2012, following the adoption of Rule 613. A variety of factors were considered in the analysis of prospective consulting firms, including (1) the firm's qualifications, resources, and expertise; (2) the firm's relevant experience and understanding of the regulatory issues raised by the CAT and in coordinating matters of similar scope; (3) the composition of the consulting team; and (4) professional fees. Following a series of interviews, the exchanges and FINRA as a consortium determined that Deloitte was well qualified given the balance of these considerations and engaged Deloitte on October 1, 2012.

Deloitte's fee rates are negotiated on an annual basis and are in line with market rates for this type of specialized consulting work. CAT LLC assesses Deloitte's performance and reviews prospective budgets and staffing plans submitted by Deloitte on an annual basis. Deloitte's compensation arrangements are reasonable and appropriate, and in line with the rates charged by other leading consulting firms for similar work.

The consulting costs for CAT during the period from 2012 until the formation of the CAT NMS, LLC were paid directly by the Participants to Deloitte. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC to Deloitte. CAT LLC reviewed the consulting fees each month and approved the invoices.

After Deloitte was hired in 2012 through the end of the Pre-FAM Period on June 22, 2020 (excluding the consulting costs from November 15, 2017 through November 15, 2018), Deloitte provided a variety of consulting services, including the following:

• Established and implemented program operations for the CAT project, including the program management office and workstream design;
• Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participant's independent reviews;
• Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, analyzing OATS and CAT requirements, and drafting appendices to the Plan;
• Assisted with cost and funding-related activities for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
• Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding and Other Products) and the DAG, governance support during the transition to the new governance structure under the CAT NMS Plan and governance support after the adoption of the CAT NMS Plan, which involved support for the Operating Committee, Advisory Committee, Compliance Subcommittee and CAT working groups;
• Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
• Assisted with industry outreach and communications regarding the CAT, including assistance with industry outreach events, the development of the CAT website, frequently asked

questions, and coordinating with the CAT LLC's public relations firm;

- Provided support for updating the SEC on the progress of the development of the CAT;
- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress;
- Coordinated efforts regarding the selection of the successor Plan Processor;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor, including support for the Operating Committee and successor Plan Processor for the new role; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

The insurance costs of $880,419 represent the cost incurred for insurance for CAT during the Pre-FAM Period. Commencing in 2020, CAT LLC performed an evaluation of various potential alternatives for CAT insurance policies, which included engaging in discussions with different insurance companies and conducting cost comparisons of various alternative approaches to insurance. Based on an analysis of a variety of factors, including coverage and premiums, CAT LLC determined to purchase cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance from USI Insurance Services LLC (''USI''). Such policies are standard for corporate entities, and cyber security liability insurance is important for the CAT System. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(IX) Professional and Administration Costs

In adopting the CAT NMS Plan, the Commission amended the Plan to add a requirement that CAT LLC's financial statements be prepared in compliance with GAAP, audited by an independent public accounting firm, and made publicly available.[53] The professional and administration costs include costs related to accounting and accounting advisory services to support the operating and financial functions of CAT, financial statement audit services by an independent accounting firm, preparation of tax returns, and various cash management and treasury functions. In addition, professional and administration costs for the Pre-FAM Period include costs related to the receipt of market data and a security assessment. The costs for these professional and administration services were $1,082,036 for the Pre-FAM Period.

*Financial Advisory Firm: Anchin Accountants & Advisors (''Anchin'').* CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT in April 2018. CAT LLC interviewed Anchin as well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services were paid by CAT LLC to Anchin.

After Anchin was hired in April 2018 through the end of the Pre-FAM Period on June 22, 2020 (excluding the period from April 2018 through November 15, 2018), Anchin provided a variety of services, including the following:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial reporting matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

*Accounting Firm: Grant Thornton LLP (''Grant Thornton'').* In February 2020, CAT LLC determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the proposed role given the balance of these considerations. Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services. The fees for these services were paid by CAT LLC to Grant Thornton.

*Market Data Provider: Exegy.* The professional and administrative costs for the Pre-FAM Period included costs related to the receipt of certain market data for the CAT pursuant to an agreement with the CAT LLC, and then with FCAT. Exegy provided SIP Data required by the CAT NMS Plan.

After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy from July 2018 through March 2019. CAT LLC determined that, unlike certain other vendors, Exegy provided market data that included all data elements required by the CAT NMS Plan.[54] In addition, the fees were reasonable and in line with market rates for the market data received. Accordingly, the professional and administrative costs for the Pre-FAM Period include the Exegy costs from November 2018 through March 2019. The cost of the market data was reasonable for the market data received. The fees for the market data were paid directly by CAT LLC to Exegy.

Upon the termination of the contract between CAT LLC and Exegy, FCAT entered into a contract with Exegy to purchase the required market data from Exegy in July 2019. All costs under the contract were treated as a direct pass through cost to CAT LLC. Therefore, the fees for the market data were paid by

[53] Section 9.2 of the CAT NMS Plan.

[54] *See* Section 6.5(a)(ii) of the CAT NMS Plan.

CAT LLC to FCAT, who, in turn, paid Exegy for the market data.

*Security Assessment: RSM US LLP (''RSM'').* The operating costs for the Pre-FAM Period include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation, and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment. RSM performed the assessment from October 2018 through December 2018. Accordingly, the costs for the Pre-FAM Period include the costs incurred in November and December 2018. The cost for the security assessment were paid directly to RSM by CAT LLC.

(X) Public Relations Costs

The public relations costs of $224,669 represent the fees paid to public relations firms during the Pre-FAM Period for professional communications services to CAT, including media relations consulting, strategy and execution. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants. Specifically, the public relations firms provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). Public relations services were important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.

The services performed by each of the public relations firms were comparable. The fees for such services were reasonable and in line with market rates. Only one public relations firm was engaged at a time; the three firms were engaged sequentially as the primary public relations contact moved among the three firms during this time period.

*Public Relations Firm: Peppercomm, Inc. (''Peppercomm'').* The national securities exchanges and FINRA, acting as a consortium, determined to hire the public relations firm Peppercomm in October 2014 and continued to engage this firm through September 2017. The exchanges and FINRA made this engagement decision after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fee rates for this public relations firm were negotiated on an arm's length basis and were in line with market rates for these types of services. The public relations costs during the period from October 2014 until the formation of the CAT NMS, LLC were paid directly by the exchanges and FINRA to the public relations firm. After the formation of CAT NMS, LLC, the consulting fees were paid by CAT LLC.

*Public Relations Firm: Sloane & Company (''Sloane'').* CAT LLC determined to hire a new public relations firm, Sloane, in March 2018, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Sloane. CAT LLC continued the engagement with Sloane until February 2020.

*Public Relations Firm: Peak Strategies.* CAT LLC determined to hire a new public relations firm, Peak Strategies, in March 2020, based on, among other things, their expertise and the primary contact's history with the project. The fee rates for this public relations firm were in line with market rates for these types of services. The fees during the Pre-FAM Period were paid by CAT LLC to Peak Strategies.

(b) Historical CAT Costs Incurred in Financial Accountability Milestone Period 1

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 1 of the Financial Accountability Milestones (''FAM Period 1''),[55] which covers the period from June 22, 2020—July 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 1 of $6,377,343. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($2,125,781), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($2,125,781) and CEBSs paying one-third ($2,125,781). The following table breaks down Historical CAT Costs 1 for FAM Period 1 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Historical CAT Costs for FAM Period 1 ** |
|---|---|
| Capitalized Developed Technology Costs * | $1,684,870 |
| *Technology Costs* | 3,996,800 |
| Cloud Hosting Services | 2,642,122 |
| Operating Fees | 1,099,680 |
| CAIS Operating Fees | 254,998 |
| Change Request Fees | |
| Legal | 481,687 |
| Consulting | 137,209 |
| Insurance | |
| Professional and administration | 69,077 |
| Public relations | 7,700 |
| Total Operating Expenses | 6,377,343 |

* The non-cash amortization of these capitalized developed technology costs of $362,121 incurred during FAM Period 1 have been appropriately excluded from the above table.[56]

** The costs described in this table of costs for FAM Period 1 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

[55] Section 11.6(a)(i)(A) of the CAT NMS Plan.

By the completion of FAM Period 1, CAT LLC was required to implement the reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of equities transaction data and options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.[57] CAT LLC completed the requirements of FAM Period 1 by July 31, 2020. The following describes the costs for each of the categories for FAM Period 1.

(I) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 1 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 1 Period. Accordingly, the $2,642,122 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 1. The fee arrangement for AWS described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. Moreover, CAT LLC continued to believe that AWS's maturity in the cloud services space as well as the significant cost and time necessary to move the CAT to a different cloud services provider supported the continued engagement of AWS.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 1 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, reference data and other types of Other Data. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 1.[58]

| | Date range: 6/22/20–7/31/20 |
|---|---|
| Average Daily Volume in Billions: | |
| Participant—Equities | 6 |
| Participant—Options | 103 |
| Industry Member—Equities | 7 |
| Industry Member—Options | 0.31 |
| SIP—Options & Equities | 74 |
| Average Total Daily Volume | 185 |
| Cumulative Total Events for the Period | 5,190 |
| Total Compute Hours for the Period | 2,612,082 |
| Storage Footprint at End of Period (Petabytes) | 57.47 |

(II) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 1. Accordingly, the $1,099,680 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 1. The fee arrangement for FCAT described above with regard to the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, FCAT's activities with respect to the CAT included the following:

- Published iterative drafts of draft Technical Specifications for Phase 2d, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Published iterative drafts of CAIS Technical Specifications, after substantial engagement with SEC staff, Industry Members and Participants on the Technical Specifications;
- Facilitated Industry Member reporting of Quote Sent Time on Options Market Maker quotes;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 1. Accordingly, the $254,998 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 1. The fee arrangement for Kingland described above with regard to

[56] As discussed above, with respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

[57] *See* definition of ''Initial Industry Member Core Equity and Options Reporting'' in Section 1.1 of the CAT NMS Plan.

[58] Note that the volume data described in this table does not include CAIS data.

the Pre-FAM Period continued in place during FAM Period 1 pursuant to the Plan Processor Agreement. During FAM Period 1, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(IV) Technology Costs—Change Request Fees

CAT LLC did not incur costs related to change requests during FAM Period 1.

(V) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 1 of $1,684,870 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include: (1) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including separate production and industry test entitlements, and reprocessing of exchange event timestamps; (2) implementation fees; and (3) license fees.

(VI) Legal Costs

The legal costs of $481,687 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 1.

*Law Firm: WilmerHale.* CAT LLC continued to employ WilmerHale during FAM Period 1 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to WilmerHale. During FAM Period 1, WilmerHale provided legal assistance to the CAT including with regard to the following:

- Assisted with the development of the CAT funding model and drafted related amendments and fee filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, verbal activity, options market maker quote sent time, TRF linkages, and allocations;
- Provided interpretations related to CAT NMS Plan requirements, including the Financial Accountability Milestone amendment;
- Assisted with compliance with Regulation SCI;
- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the drafting of the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Assisted with communications and presentations for the industry regarding CAIS;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding CAT technical specifications;
- Assisted with third-party vendor agreements; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

*Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 1 were paid by CAT LLC to Pillsbury. During FAM Period 1, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted a proposed amendment to the CAT NMS Plan regarding liability matters. Liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(VII) Consulting Costs

The consulting costs of $137,209 represent the fees paid to Deloitte as project manager during FAM Period 1. CAT LLC continued to employ Deloitte during FAM Period 1 based on, among other things, their expertise and cumulative experience with the CAT. The fee rates for Deloitte during FAM Period 1 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 1 were paid by CAT LLC to the consulting firm. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 1, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT;
- Assisted with the transition from the Initial Plan Processor to the successor Plan Processor; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

Although insurance was in effect during FAM Period 1, CAT LLC did not incur costs related to insurance during FAM Period 1.

(IX) Professional and Administration Costs

*Financial Advisory Firm: Anchin.* The professional and administration costs of $69,077 represent the fees paid to Anchin during FAM Period 1. CAT LLC continued to employ Anchin during FAM Period 1 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these type of financial advisory services. The fees for these services during FAM Period 1 were paid by CAT LLC to Anchin. During FAM Period 1, Anchin provided a variety of services, including the following:

- Maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;

• Worked with and provided support to the Operating Committee and various CAT working groups; and

• Prepared monthly and quarterly financial statements.

(X) Public Relations Costs

The public relations costs of $7,700 represent the fees paid to Peak Strategies during FAM Period 1. CAT LLC continued to employ Peak Strategies during FAM Period 1 based on, among other things, their expertise and history with the project. The fee rates for this firm were reasonable and in line with market rates for these types of services. The fees for these services during FAM Period 1 were paid by CAT LLC to Peak Strategies. During FAM Period 1, Peak Strategies continued to provide professional communications services to CAT LLC, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(c) Historical CAT Costs Incurred in Financial Accountability Milestone Period 2

Historical CAT Costs 1 would include costs incurred by CAT LLC and already funded by Participants during Period 2 of the Financial Accountability Milestones (''FAM Period 2''),[59] which covers the period from August 1, 2020—December 31, 2020. Historical CAT Costs 1 would include costs for FAM Period 2 of $42,976,478. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($14,325,493), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($14,325,493) and CEBSs paying one-third ($14,325,493). The following table breaks down Historical CAT Costs 1 for FAM Period 2 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Historical CAT costs for FAM Period 2 ** |
|---|---|
| Capitalized Developed Technology Costs * | $6,761,094 |
| *Technology Costs* | 31,460,033 |
| Cloud Hosting Services | 20,709,212 |
| Operating Fees | 9,108,700 |
| CAIS Operating Fees | 1,590,298 |
| Change Request Fees | 51,823 |
| Legal | 2,766,644 |
| Consulting | 532,146 |
| Insurance | 976,098 |
| Professional and administration | 438,523 |
| Public relations | 41,940 |
| Total Operating Expenses | 42,976,478 |

* The non-cash amortization of these capitalized developed technology costs of $1,892,505 incurred during FAM Period 2 have been appropriately excluded from the above table.[60]

** The costs described in this table of costs for FAM Period 2 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

By the completion of FAM Period 2, CAT LLC was required to implement the following with regard to the CAT:

(a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, CustomerID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission.[61]

CAT LLC completed the requirements of FAM Period 2 by December 31, 2020. The following describes the costs for each of the categories for FAM Period 2.

(I) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 2 to provide a broad array of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 2 Period. Accordingly, the $20,709,212 in technology costs for cloud hosting services represent costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 2. The fee arrangement for AWS described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement.

[59] Section 11.6(a)(i)(B) of the CAT NMS Plan.

[60] As discussed above, with respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

[61] *See* definition of ''Full Implementation of Core Equity Reporting Requirements'' in Section 1.1 of the CAT NMS Plan.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During the FAM 2 Period, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a and Phase 2b Industry Member Data (including certain linkages) as well as SIP Data, and Other Data, including reference data. In addition, Industry Members began reporting LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 2.[62]

| | Date range: 8/1/20–12/31/20 |
|---|---|
| Average Daily Volume in Billions: | |
| Participant—Equities | 6 |
| Participant—Options | 116 |
| Industry Member—Equities | 11 |
| Industry Member—Options | 0.98 |
| SIP—Options & Equities | 80 |
| Average Total Daily Volume | 282 |
| Cumulative Total Events for the Period | 2,170 |
| Total Compute Hours for the Period | 15,660,392 |
| Storage Footprint at End of Period (Petabytes) | 114.59 |

(II) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 2. Accordingly, the $9,108,700 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 2. The fee arrangement for FCAT described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, FCAT's activities with respect to the CAT included publishing the Technical Specifications for Phase 2d and overseeing the reporting of firm to firm and intrafirm linkages by Industry Members. In addition, FCAT also continued to engage in the following activities during FAM Period 2:

- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the development and implementation of the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 2. Accordingly, the $1,590,298 in technology costs for CAIS operating fees represent costs incurred for services provided by Kingland during FAM Period 2. The fee arrangement for Kingland described above with regard to the Pre-FAM Period and FAM Period 1 continued in place during FAM Period 2 pursuant to the Plan Processor Agreement. During FAM Period 2, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs.

(IV) Technology Costs—Change Request Fees

During FAM Period 2, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 2, CAT incurred costs of $51,823 related to a change request regarding the addition of functionality for exchange Participants to report rejected messages to the CAT.

(V) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 2 of $6,761,094 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to separate production and industry test entitlements, market maker reference data, and back-processing of exchange exception logic; (3) implementation fees; and (4) license fees.

[62] Note that the volume data described in this table does not include CAIS data.

(VI) Legal Costs

The legal costs of $2,766,644 represent the fees paid for legal services provided by two law firms, WilmerHale and Pillsbury during FAM Period 2.

*Law Firm: WilmerHale.* CAT LLC continued to employ WilmerHale during FAM Period 2 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to WilmerHale. During FAM Period 2, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements regarding, for example, allocations, exchange activity, OTQT, initial data validation, error corrections and recordkeeping;
- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs and technical specifications;
- Provided support for the Operating Committee, Compliance Subcommittees, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6 of the CAT NMS Plan;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for the Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
- Provided guidance regarding SRO rule filings for the retirement of systems;
- Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;
- Assisted with third-party vendor agreements (*e.g.,* with regard to Anchin, Grant Thornton and insurance policies);
- Assisted with change requests; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

*Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 2 were paid by CAT LLC to Pillsbury. During FAM Period 2, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During that period, Pillsbury advised CAT LLC regarding applicable legal matters and drafted and filed a proposed amendment to the CAT NMS Plan regarding liability matters. As discussed above, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants.

(VII) Consulting Costs

The consulting costs of $532,146 represent the fees paid to Deloitte as project manager during FAM Period 2. CAT LLC continued to employ Deloitte during FAM Period 2 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 2 were negotiated and in line with market rates for this type of specialized consulting work. The consulting fees during FAM Period 2 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 2, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

The insurance costs of $976,098 represent the fees paid for insurance during FAM Period 2. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(IX) Professional and Administration Costs

The professional and administration costs of $438,523 represent the fees paid to Anchin and Grant Thornton for financial services provided during FAM Period 2.

*Financial Advisory Firm: Anchin.* CAT LLC continued to engage Anchin during FAM Period 2 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these types of financial advisory services. The fees for these services during FAM Period 2 were paid by CAT LLC to Anchin. During FAM Period 2, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from the Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audit by an independent auditor; and
- Reviewed historical costs from inception.

*Accounting Firm: Grant Thornton.* CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 2 based on, among other things, its expertise and cumulative knowledge of CAT LLC. CAT LLC continued to believe that Grant Thornton was well qualified for its role

and its fee rates were in line with market rates for these accounting services. The fees for these services during FAM Period 2 were paid by CAT LLC to Grant Thornton. During FAM Period 2, Grant Thornton performed a financial statement audit for CAT LLC as an independent accounting firm.

(X) Public Relations Costs

The public relations costs of $41,940 represent the fees paid to Peak Strategies during FAM Period 2. CAT LLC continued to employ Peak Strategies during FAM Period 2 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 2 were paid by CAT LLC to Peak Strategies. During FAM Period 2, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(d) Historical CAT Costs Incurred in Financial Accountability Milestone Period 3

Historical CAT Costs 1 would include costs incurred by CAT and already funded by the Participants during Period 3 of the Financial Accountability Milestones (''FAM Period 3''),[63] which covers the period from January 1, 2021–December 31, 2021. Historical CAT Costs 1 would include costs for FAM Period 3 of $144,415,268. The Participants would remain responsible for one-third of this cost (which they have previously paid) ($48,138,423), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($48,138,423) and CEBSs paying one-third ($48,138,423). The following table breaks down Historical CAT Costs 1 for FAM Period 3 into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Historical CAT costs for FAM Period 3* |
|---|---|
| Capitalized Developed Technology Costs* | $10,763,372 |
| *Technology Costs* | 123,639,402 |
| Cloud Hosting Services | 94,574,759 |
| Operating Fees | 23,106,091 |
| CAIS Operating Fees | 5,562,383 |
| Change Request Fees | 396,169 |
| Legal | 6,333,248 |
| Consulting | 1,408,209 |
| Insurance | 1,582,714 |
| Professional and administration | 595,923 |
| Public relations | 92,400 |
| Total Operating Expenses | 144,415,268 |

*The non-cash amortization of these capitalized developed technology costs of $5,108,044 incurred during FAM Period 3 have been appropriately excluded from the above table.[64]

**The costs described in this table of costs for FAM Period 3 were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

By the completion of FAM Period 3, CAT LLC was required to implement the following requirements with regard to the CAT:

(a) reporting to the Order Audit Trail System (''OATS'') is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)–(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met.[65]

CAT LLC completed the requirements of FAM Period 3 by December 31, 2021. The following describes the costs for each of the categories for FAM Period 3.

(I) Technology Costs—Cloud Hosting Services

CAT LLC continued to utilize AWS in FAM Period 3 to provide a broad array

[63] Section 11.6(a)(i)(C) of the CAT NMS Plan.

[64] As discussed above, with respect to certain costs that were ''appropriately excluded,'' such excluded costs relate to the amortization of capitalized technology costs, which are amortized over the life of the Plan Processor Agreement. As such costs have already been otherwise reflected in the filing, their inclusion would double count the capitalized technology costs. In addition, amortization is a non-cash expense.

[65] *See* definition of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' in Section 1.1 of the CAT NMS Plan.

of cloud hosting services for the CAT, including data ingestion, data management, and analytic tools. AWS continued to provide storage services, databases, compute services and other services (such as networking, management tools and DevOps tools), as well as various environments for CAT, such as development, performance testing, test, and production environments, during the FAM 3 Period. Accordingly, the $94,574,759 in technology costs for cloud hosting services represents costs incurred for services provided by AWS, as the cloud services provider, during FAM Period 3. The fee arrangement for AWS described above for the earlier periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement.

The cost for AWS cloud services for the CAT continued to be a function of the volume of CAT Data. During FAM Period 3, the volume of CAT Data continued to far exceed the original predictions for the CAT as set forth in the CAT NMS Plan. During this period, data submitted to the CAT included options and equities Participant Data, Phase 2a, Phase 2b, Phase 2c and Phase 2d Industry Member Data (including certain linkages), SIP Data, Other Data, including reference data, and LTID account information. The following chart provides data regarding the average daily volume, cumulative total events, total compute hours and storage footprint of the CAT during FAM Period 3.[66]

| | Date range: 1/1/21 to 4/25/21 | Date range: 4/26/21 to 12/31/21 * |
|---|---|---|
| Average Daily Volume in Billions: | | |
| Participant—Equities | 9 | 9 |
| Participant—Options | 135 | 136 |
| Industry Member—Equities | 20 | 19 |
| Industry Member—Options | 2 | 2 |
| SIP—Options & Equities | 129 | 137 |
| Average Total Daily Volume | 297 | 304 |
| Cumulative Total Events for the Period | 7,480 | 5,310 |
| Total Compute Hours for the Period | 15,860,304 | 33,487,318 |
| Storage Footprint at End of Period (Petabytes) | 180.22 | 284.62 |

* Start of Participant Equities in CAT format and SIP Equities on 4/26/21.

(II) Technology Costs—Operating Fees

Pursuant to the Plan Processor Agreement discussed above, FCAT continued in its role as the Plan Processor for the CAT during FAM Period 3. Accordingly, the $23,106,091 in technology costs for operating fees represent costs incurred for the services provided by FCAT under the Plan Processor Agreement during FAM Period 3. The fee arrangement for FCAT described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, FCAT's activities with respect to the CAT included the following:

- Facilitated Phase 2c and Phase 2d testing for Industry Members;
- Oversaw creation of linkages of the lifecycle of order events based on the received data through Phase 2d;
- Addressed compliance items, including drafting CAT policies and procedures, and addressing Regulation SCI requirements;
- Provided support to the Operating Committee, the Compliance Subcommittee and CAT working groups;
- Assisted with interpretive efforts and exemptive requests regarding the CAT NMS Plan;
- Oversaw the security of the CAT;
- Monitored the operation of the CAT, including with regard to Participant and Industry Member reporting;
- Provided support to subcontractors under the Plan Processor Agreement;
- Provided support in discussions with the Participants and the SEC and its staff;
- Operated the FINRA CAT Helpdesk;
- Facilitated communications with the industry, including via FAQs, CAT Alerts, meetings, presentations and webinars;
- Administered the CAT website and all of its content; and
- Provided technical support and assistance with connectivity, data access, and user support, including the use of CAT Data and query tools, for Participants and the SEC staff.

(III) Technology Costs—CAIS Operating Fees

Pursuant to the Plan Processor Agreement with FCAT discussed above, Kingland continued in its role as a subcontractor for the development and implementation of CAIS during FAM Period 3. Accordingly, the $5,562,383 in technology costs for CAIS operating fees represents costs incurred for services provided by Kingland during FAM Period 3. The fee arrangement for Kingland described above with regard to the prior Periods continued in place during FAM Period 3 pursuant to the Plan Processor Agreement. During FAM Period 3, Kingland continued the development of the CAIS Technical Specifications and building of CAIS. In addition, Kingland continued to work on the CAIS Technical Specifications and build related to the CCID Alternative, as well as the acceleration of the reporting of LTIDs. The full CAIS Technical Specifications were published during FAM Period 3.

(IV) Technology Costs—Change Request Fees

During FAM Period 3, CAT LLC engaged FCAT to pursue certain change requests in accordance with the Plan Processor Agreement. The change request costs were paid by CAT LLC to FCAT. Specifically, during FAM Period 3, CAT incurred costs of $396,169 related to change requests, including the following: (1) the addition of functionality for exchange Participants to report rejected messages to the CAT; (2) the migration of MIRS query engine to AWS to reduce operational costs and increase resiliency; and (3) updating the Participant Technical Specifications to allow for two-sided Participant option quote reporting.

[66] Note that the volume data described in this table does not include CAIS data.

(V) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for FAM Period 3 of $10,763,372 include capitalizable application development costs incurred in the development of the CAT by FCAT. Such costs include (1) development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Plan Processor, including the transition from equity data received by FINRA pursuant to various regulatory services agreements between FINRA and Participant exchanges to the equity CAT Data, and the completion of the Industry Member Phase 2d options manual and complex orders go-live requirements; (2) costs related to certain modifications, upgrades, or other changes to the CAT that were not contemplated by the agreement between CAT LLC and the Plan Processor, including costs related to off-exchange volume concentration, Participant 24-hour trading and an external metastore; (3) implementation fees; and (4) license fees.

(VI) Legal Costs

The legal costs of $6,333,248 represent the fees paid for legal services provided by three law firms, WilmerHale, Pillsbury and Covington & Burling LLP (''Covington'') during FAM Period 3.

*Law Firm: WilmerHale.* CAT LLC continued to employ WilmerHale during FAM Period 3 based on, among other things, their expertise and long history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to WilmerHale. During FAM Period 3, the legal assistance provided by WilmerHale included providing legal advice regarding the following:

- Assisted with the development of the CAT funding model and drafting related amendments and rule filings;
- Drafted exemptive requests from CAT NMS Plan requirements, including, for example, verbal activity regarding Phase 2c cutover, error reports, error corrections, Phase 2d Reporting, unique Order-ID on internal route events, reporting addresses, recordkeeping, and unique CCID for foreign customers;
- Provided interpretations related to CAT NMS Plan requirements, including with regard to the Financial Accountability Milestone amendment, FAQs, CAIS requirements, ADF, and technical specifications;
- Provided support for the Operating Committee, Compliance Subcommittee, working groups and Leadership Team, including with regard to meetings with the SEC staff;
- Assisted with the Implementation Plan and Quarterly Progress Reports required pursuant to Section 6.6(c) of the CAT NMS Plan;
- Drafted SRO rule filings related to the CAT Compliance Rule;
- Provided support for the Compliance Subcommittee, including with regard to responses to OCIE examinations and the annual assessment;
- Provided guidance regarding the SEC's proposed security amendments to the CAT NMS Plan;
- Provided guidance regarding SRO rule filings for the retirement of systems;
- Provided legal support for Operating Committee meetings, including drafting resolutions and other materials and voting advice;
- Provided assistance with change requests;
- Provided guidance and regulatory support for litigation regarding the response to the SEC's exemptive orders;
- Assisted with communications with the industry, including CAT Alerts and presentations;
- Provided guidance regarding the confidentiality of CAT Data, including third-party information requests;
- Assisted with cost management analysis and proposals; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

*Law Firm: Pillsbury.* CAT LLC continued to employ Pillsbury during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this law firm were in line with market rates for specialized legal expertise. The legal fees during FAM Period 3 were paid by CAT LLC to Pillsbury. During FAM Period 3, Pillsbury provided legal assistance to the CAT regarding the CAT Reporter Agreement. During this period, Pillsbury advised CAT LLC regarding applicable legal matters, reviewed and responded to comment letters regarding the proposed Plan amendment, participated in meetings with senior SEC staff, responded to comments submitted following the SEC's April 6, 2021 order instituting proceedings,[67] and assessed legal matters regarding the SEC's October 29, 2021 order denying the proposed Plan amendment.[68]

*Law Firm: Covington.* CAT LLC hired Covington for litigation with the SEC regarding certain exemptive orders related to the CAT, including orders issued in December 2020.[69] CAT LLC interviewed this law firm as well as other potential law firms, considering a variety of factors in its analysis for choosing legal assistance, including the relevant expertise and fees of the potential lawyers. CAT LLC approved the engagement of Covington in January 2021. The fee rates for this law firm, which were calculated based on hourly rates, were in line with market rates for specialized services. The legal fees for FAM Period 3 for this firm were paid by CAT LLC to Covington.

After Covington was hired in 2021 through the end of 2021, the firm provided legal assistance regarding the litigation with the SEC regarding the 2020 Orders. These services included researching, drafting, and filing motions to stay the 2020 orders and related materials in proceedings before the SEC, as well as researching, drafting, and filing petitions for judicial review of the 2020 Orders in proceedings before the U.S. Court of Appeals for the D.C. Circuit. Covington oversaw ongoing litigation proceedings on these matters, and also supported WilmerHale with respect to settlement negotiations with the SEC staff regarding the 2020 Orders.

In addition to these services, CAT LLC engaged Covington in November 2021 to provide assistance with respect to the SEC's disapproval of CAT NMS Plan amendments concerning a proposed limitation on liability in the event of a data breach or similar event. Covington provided advice concerning CAT's response to the SEC's disapproval order. This work accounted for a minority of Covington's fees in 2021.[70]

(VII) Consulting Costs

The consulting costs of $1,408,209 represent the fees paid to Deloitte as project manager during FAM Period 3. CAT LLC continued to employ Deloitte during FAM Period 3 based on, among other things, their expertise and long history with the project. The fee rates for Deloitte during FAM Period 3 were negotiated and in line with market rates

[67] Securities Exchange Act Rel. No. 91487 (Apr. 6, 2021), 86 FR 19054 (Apr. 12, 2021).

[68] Securities Exchange Act Rel. No. 93484 (Oct. 29, 2021), 86 FR 60933 (Nov. 4, 2021).

[69] *See* Securities Exchange Act Rel. No. 90688 (Dec. 16, 2020), 85 FR 83634 (Dec. 22, 2020); and Securities Exchange Act Rel. No. 90689 (Dec. 16, 2020), 85 FR 83667 (Dec. 22, 2020) (collectively, the ''2020 Orders'').

[70] As discussed above with regard to Pillsbury's work on liability matters, liability issues related to the CAT are important matters that needed to be resolved and clarified. CAT LLC's efforts to seek such resolution and clarity work to the benefit of Participants, Industry Members and other market participants. Moreover, such activity is a necessary part of the operation of the CAT.

for this type of specialized consulting work. The consulting fees during FAM Period 3 were paid to Deloitte by CAT LLC. CAT LLC reviewed the consulting fees each month and approved the invoices. During FAM Period 3, Deloitte's CAT-related activities included the following:

- Implemented program operations for the CAT project;
- Provided support to the Operating Committee, the Chair of the Operating Committee and the Leadership Team, including project management support, coordination and planning for meetings and communications, and interfacing with law firms and the SEC;
- Assisted with cost and funding matters for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided support for third-party vendors for the CAT, including FCAT, Anchin and the law firms engaged by CAT LLC.

(VIII) Insurance

The insurance costs of $1,582,714 represent the fees paid for insurance during FAM Period 3. CAT LLC continued to maintain cyber security liability insurance, directors' and officers' liability insurance, and errors and omissions liability insurance offered by USI. After engaging in a process for renewing the coverage, CAT LLC determined to purchase these insurance policies from USI. The annual premiums for these policies were competitive for the coverage provided. The annual premiums were paid by CAT LLC to USI.

(IX) Professional and Administration Costs

The professional and administration costs of $595,923 represent the fees paid to Anchin and Grant Thornton for financial services during FAM Period 3.

*Financial Advisory Firm: Anchin.* CAT LLC continued to employ Anchin during FAM Period 3 based on, among other things, their expertise and history with the project. The hourly fee rates for this firm were in line with market rates for these financial advisory services. The fees for these services during FAM Period 3 were paid by CAT LLC to Anchin. During FAM Period 3, Anchin provided a variety of services, including the following:

- Updated and maintained internal controls;
- Provided cash management and treasury functions;
- Faciliated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

*Accounting Firm: Grant Thornton.* CAT LLC continued to employ the accounting firm Grant Thornton during FAM Period 3 based on, among other things, their expertise and cumulative knowledge of CAT LLC. CAT LLC determined that Grant Thornton was well qualified for its role and that its fixed fee rates were in line with market rates for these accountant services. The fees for these services during FAM Period 3 were paid by CAT LLC to Grant Thornton. During FAM Period 3, Grant Thornton provided audited financial statements for CAT LLC.

(X) Public Relations Costs

The public relations costs of $92,400 represent the fees paid to Peak Strategies during FAM Period 3. CAT LLC continued to employ Peak Strategies during FAM Period 3 based on, among other things, their expertise and history with the project. The fee rates for this firm were in line with market rates for these types of services. The fees for these services during FAM Period 3 were paid by CAT LLC to Peak Strategies. During FAM Period 3, Peak Strategies continued to provide professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, the public relations firm provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan). As discussed above, such public relations services were important for various reasons, including monitoring comments made by market participants about the CAT and understanding issues related to the CAT discussed on the public record. By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT matters to the benefit of all market participants.

(e) Excluded Costs

Historical CAT Costs 1 would not include three categories of CAT costs (''Excluded Costs''): (1) $14,749,362 of costs related to the termination of the relationship with the Initial Plan Processor; (2) $48,874,937, which are all CAT costs incurred from November 15, 2017 through November 15, 2018; and (3) $19,628,791, which are costs paid to the Initial Plan Processor from November 16, 2018 through February 2019 when the relationship with the Initial Plan Processor was concluded. The Participants would remain responsible for 100% of these costs, which total $83,253,090. CAT LLC determined to exclude these Excluded Costs from Historical CAT Costs 1 because these costs relate to the delay in the start of reporting to the CAT and the conclusion of the relationship with the Initial Plan Processor.[71]

(I) Costs related to Conclusion of Relationship With Initial Plan Processor

First, Historical CAT Costs 1 would not include $14,749,362 of costs related to the conclusion of the relationship with the Initial Plan Processor. Such costs include costs related to the American Arbitration Association, the legal assistance of Pillsbury with regard to the arbitration with the Initial Plan Processor, and the settlement costs related to the arbitration with the Initial

[71] In approving the CAT Funding Model, the Commission states that ''the proposed exclusion of the excluded costs from Past CAT Costs is appropriate in the Commission's view because it would not require all costs incurred by the Participants to be recovered from Industry Members through the Historical CAT Assessment, specifically excluding those costs related to the delay in the start of reporting to the CAT and costs related to the conclusion of the relationship with the Initial Plan Processor.'' CAT Funding Model Approval Order at 13450.

Plan Processor. The Participants would remain responsible for 100% of these $14,749,362 in costs.

(II) Costs Incurred Drom November 15, 2017 Through November 15, 2018

Second, Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018. CAT LLC determined to exclude all costs during this one-year period of $48,874,937 from fees charged to Industry Members due to the delay in the start of reporting to the CAT. The Participants would remain responsible for 100% of these $48,874,937 in costs. The following table breaks down these costs into the categories set forth in Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

| Operating expense | Excluded costs for November 15, 2017–November 15, 2018 * |
|---|---|
| Capitalized Developed Technology Costs | $37,852,083 |
| *Technology Costs:*. | |
| Cloud Hosting Services | ..... |
| Operating Fees | ..... |
| CAIS Operating Fees | ..... |
| Change Request Fees | ..... |
| Legal | 6,143,278 |
| Consulting | 4,452,106 |
| Insurance | ..... |
| Professional and administration | 340,145 |
| Public relations | 87,325 |
| Total Operating Expenses | 48,874,937 |

* The costs described in this table of Excluded Costs were calculated based upon CAT LLC's review of applicable bills and invoices and related financial statements. CAT LLC financial statements are available on the CAT website.

The following provides additional detail regarding the Excluded Costs.

(a) Technology Costs—Cloud Hosting Services, Operating Fees, CAIS Operating Fees and Change Request Fees

CAT LLC did not incur technology costs related to the categories of cloud hosting services, operating fees, CAIS operating fees or change requests during the period from November 15, 2017 through November 15, 2018.

(b) Technology Costs—Capitalized Developed Technology Costs

Capitalized developed technology costs for the period from November 15, 2017 through November 15, 2018 include capitalizable application development costs of $37,852,083 incurred in the development of the CAT by the Initial Plan Processor. Such costs include development costs incurred during the application development stage to meet various agreed-upon milestones regarding the CAT, as defined in the agreement between CAT LLC and the Initial Plan Processor. Such costs include costs related to Industry Member technical specifications for orders and transactions, the system security plan, testing and production for Participant CAT reporting, third-party security assessment and response, query portal, onboarding of the Chief Information Security Officer, and ingestion of FINRA TRF data and FINRA data related to halts and corporate actions.

(c) Legal Costs

The legal costs of $6,143,278 represent the fees paid to WilmerHale for legal services from November 15, 2017 through November 15, 2018. During this period, WilmerHale provided legal assistance to the CAT, including with regard to the following:

- Provided legal support for the governance of the CAT, including governance support for the Operating Committee, Advisory Committee, Compliance Subcommittee, and CAT working groups;
- Assisted with the development of the CAT funding model and drafted related amendments of the CAT NMS Plan;
- Provided assistance related to CAT security;
- Drafted exemptive requests, including requests related to PII;
- Assisted with the Implementation Plan required pursuant to Section 6.6(c)(i) of the CAT NMS Plan;
- Provided interpretations of and related to the CAT NMS Plan;
- Provided advice with regard to regulator access to the CAT;
- Assisted with the Plan Processor transition;
- Provided assistance regarding communications with the industry regarding the CAT;
- Provided advice regarding Customer Account Information and PII;
- Provided support for litigation related to SEC exemptive orders; and
- Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretative and implementation issues.

(d) Consulting Costs

The consulting costs of $4,452,106 represent the fees paid to Deloitte for their role as project manager for the CAT from November 15, 2017 through November 15, 2018. During this period, Deloitte engaged in the following activities with respect to the CAT:

- Implemented program operations for the CAT project;
- Provided governance support to the Operating Committee, including support for Subcommittees and working groups of the Operating Committee (*e.g.,* Compliance Subcommittee, Cost and Funding Working Group, Technical Working Group, Industry Outreach Working Group, Security Working Group and Steering Committee);
- Assisted with cost and funding issues for the CAT, including the development of the CAT funding model and assistance with loans and the CAT bank account for CAT funding;
- Provided support for updating the SEC on the progress of the development of the CAT; and
- Provided active planning and coordination with and support for the Initial Plan Processor with regard to the development of the CAT, and reported to the Participants on the progress.

(e) Insurance

CAT LLC did not incur costs related to insurance during the period from November 15, 2017 through November 15, 2018.

(f) Professional and Administration Costs

The professional and administration costs of $340,145 represent the fees paid to Anchin, Exegy and RSM from November 15, 2017 through November 15, 2018.

*Financial Advisory Firm: Anchin.* From the commencement of its engagement in April 2018 through November 15, 2018, Anchin engaged in the following activities with respect to the CAT:

- Developed, updated and maintained internal controls;
- Provided cash management and treasury functions;
- Facilitated bill payments;
- Provided monthly bookkeeping;
- Reviewed vendor invoices and documentation in support of cash disbursements;
- Provided accounting research and consultations on various accounting, financial reporting and tax matters;
- Addressed not-for-profit tax and accounting considerations;
- Prepared tax returns;
- Addressed various accounting, financial reporting and operating inquiries from Participants;
- Developed and maintained quarterly and annual operating and financial budgets, including budget to actual fluctuation analyses;
- Addressed accounting and financial matters relating to the transition from CAT NMS, LLC to Consolidated Audit Trail, LLC, including supporting the dissolution of CAT NMS, LLC;
- Supported compliance with the CAT NMS Plan;
- Worked with and provided support to the Operating Committee and various CAT working groups;
- Prepared monthly, quarterly and annual financial statements;
- Supported the annual financial statement audits by an independent auditor;
- Reviewed historical costs from inception; and
- Provided accounting and financial information in support of SEC filings.

*Market Data Provider: Exegy.* From July 2018 through November 15, 2018, CAT LLC purchased market data from Exegy (as described in more detail above).

*Security Assessment: RSM.* From October 2018 through November 15, 2018, CAT LLC incurred costs for RSM's performance of a security assessment (as described in more detail above).

(g) Public Relations Costs

The public relations costs of $87,325 represent the fees paid to Sloane from November 15, 2017 through November 15, 2018. From the commencement of its engagment in March 2018 through November 15, 2018, Sloane provided professional communications services to CAT, including media relations consulting, strategy and execution. Specifically, Sloane provided services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT (*e.g.,* amendments to the CAT NMS Plan).

(III) Costs Paid to Initial Plan Processor From November 16, 2018 Through February 2019

Third, Historical CAT Costs 1 would not include the $19,628,791 in costs paid to the Initial Plan Processor from November 16, 2018 through February 2019 when CAT LLC's relationship with the Initial Plan Processor concluded. CAT LLC determined that Historical CAT Costs 1 would not include any fees paid to the Initial Plan Processor after November 15, 2017,[72] which was the date by which Participants were required to begin reporting to the CAT.[73] As discussed above, the Participants determined that Historical CAT Costs 1 would not include all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes $37,852,083 in Initial Plan Processor costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Initial Plan Processor costs incurred after November 15, 2018 are the $19,628,791 in costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these $19,628,791 in costs.

[72] As discussed below, CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. *See* Section 3(a)(10)(E) below.

[73] The SEC approved the CAT NMS Plan on November 15, 2016, and Participant reporting was required to begin on the first anniversary of this date, November 15, 2017. *See* Section 6.3 of the CAT NMS Plan and CAT NMS Plan Approval Order.

(ii) Previously Invoiced Costs for Historical CAT Costs 1

CEBBs and CEBSs collectively have been invoiced for $173,075,024 of the $212,039,879.34 of Historical CAT Costs 1 via Historical CAT Assessment 1, where $86,537,512 was invoiced collectively to CEBBs and $86,537,512 was invoiced collectively to CEBSs. Accordingly, Historical CAT Assessment 1A would seek to recover the remaining $38,964,855.34 of Historical CAT Costs 1 collectively from CEBBs and CEBSs, where CEBBs collectively will be responsible for $19,482,427.67, and CEBSs collectively will be responsible for $19,482,427.67.

(C) Historical Recovery Period 1A

Under the CAT NMS Plan, the Operating Committee is required to reasonably establish the length of the Historical Recovery Period used in calculating each Historical Fee Rate based upon the amount of the Historical CAT Costs to be recovered by the Historical CAT Assessment, and to describe the reasons for its length.[74] The Historical Recovery Period used in calculating the Historical Fee Rate may not be less than 24 months or more than five years.[75] The Operating Committee has determined to establish a Historical Recovery Period 1A of 24 months for Historical CAT Assessment 1A.

The Operating Committee determined that the length of Historical Recovery Period 1A appropriately weighs the need for a reasonable Historical Fee Rate 1A that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans to the Participants in a timely fashion. The Operating Committee determined that 24 months for Historical Recovery Period 1A would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.[76] In addition, in establishing a Historical Recovery Period of 24 months, the Operating Committee recognized that the total costs for Historical CAT Assessment 1A were less than the total costs for 2022 and 2023,[77]

[74] Section 11.3(b)(i)(D)(I) and Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[75] Section 11.3(b)(i)(D)(I) of the CAT NMS Plan. In the CAT Funding Model Approval Order, the SEC stated that ''[i]n the Commission's view, it is appropriate for the Operating Committee to establish the length of the Historical Recovery Period to be no less than 24 months and no more than five years.'' CAT Funding Model Approval Order at 13451.

[76] For example, as the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from $0.00007 per share to $0.00072 per share. CAT Funding Model at 13469.

[77] The total CAT costs for 2022 were approximately $186 million and the total CAT costs for 2023 were approximately $233 million.

and therefore it would be reasonable and appropriate to recover costs subject to this filing over an approximate two-year period.[78]

The length of the Historical Recovery Period 1A and the reasons for its length are provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.[79]

(D) Projected Total Executed Equivalent Share Volume

The calculation of the fee rate for Historical CAT Assessment 1A also requires the determination of the projected total executed equivalent share volume of transactions in Eligible Securities for Historical Recovery Period 1A. Under the CAT NMS Plan, the Operating Committee is required to ''reasonably determine the projected total executed equivalent share volume of all transactions in Eligible Securities for each Historical Recovery Period based on the executed equivalent share volume of all transactions in Eligible Securities for the prior twelve months.'' [80] The Operating Committee is required to base its projection on the prior twelve months, but it may use its discretion to analyze the likely volume for the upcoming year. Such discretion would allow the Operating Committee to use its judgment when estimating projected total executed equivalent share volume if the volume over the prior twelve months was unusual or otherwise unfit to serve as the basis of a future volume estimate.[81]

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from March 2025 through February 2026 was 5,980,937,549,360.49 executed equivalent shares. The Operating Committee has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1A by doubling the executed equivalent share volume for the prior 12 months. The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has increased from prior years (*e.g.,* the executed equivalent share volume for 2024 was 4,295,884,600,069.4), and the Operating Committee believes that it is reasonable to conclude that the annual executed equivalent share volume will remain at the higher level. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1A is projected to be 11,961,875,098,720.98 executed equivalent shares.[82]

The projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1A and a description of the calculation of the projection is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide such information in a fee filing for a Historical CAT Assessment.[83]

(E) Fee Rate for Historical CAT Assessment 1A

The fee rate for Historical CAT Assessment 1A would be calculated by dividing the total amount of costs to be recovered by Historical CAT Assessment 1A by the reasonably projected total executed equivalent share volume of all transactions in Eligible Securities for Historical Recovery Period 1A, and dividing by 2. Specifically, the fee rate for Historical CAT Assessment 1A would be calculated by dividing $38,964,855.34 by 11,961,875,098,720.98, and then dividing by 2, which equals $0.00000162871017371542 per executed equivalent shares. Rounding this to six decimal places results in a fee rate of $0.000002 per executed equivalent share.[84] This fee rate is provided in this filing in accordance with the requirement in the CAT NMS Plan to provide the Historical Fee Rate in a fee filing for a Historical CAT Assessment.[85]

(3) Past CAT Costs and Participants

Participants would not be required to pay any fees associated with Historical CAT Assessment 1A as the Participants previously have paid all Past CAT Costs. The CAT NMS Plan explains that:

Because Participants previously have paid Past CAT Costs via loans to the Company, Participants would not be required to pay any Historical CAT Assessment. In lieu of a Historical CAT Assessment, the Participants' one-third share of Historical CAT Costs and such other additional Past CAT Costs as reasonably determined by the Operating Committee will be paid by the cancellation of loans made to the Company on a pro rata basis based on the outstanding loan amounts due under the loans.[86]

The CAT NMS Plan further states that ''Historical CAT Assessments are designed to recover two-thirds of the Historical CAT Costs.'' [87]

(4) Monthly Fees

CEBBs and CEBSs would be required to pay fees for Historical CAT Assessment 1A on a monthly basis for the period in which Historical CAT Assessment 1A is in effect.[88] A CEBB or CEBS's fee for each month would be calculated based on the transactions in Eligible Securities executed by the CEBB or CEBS from the prior month.[89] Proposed paragraph (a)(2)(A) of the fee schedule would state that each CAT Executing Broker would receive its first invoice in June 2026, and ''would receive an invoice each month thereafter in which Historical CAT Assessment 1A is in effect.'' Proposed paragraph (a)(2)(B) of the fee schedule would state that ''Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1A on a monthly basis.'' In addition, paragraph (b)(1) of the fee schedule states that each CEBB and CEBS is required to pay its CAT fees ''each month.''

(5) Actual Recovery Period for Historical CAT Assessment 1A

The CAT NMS Plan states that, ''[n]otwithstanding the length of the Historical Recovery Period used in calculating the Historical Fee Rate, each Historical CAT Assessment calculated using the Historical Fee Rate will remain in effect until all Historical CAT Costs for the Historical CAT Assessment are collected.'' [90] Accordingly,

[78] Note that the proposed 24-month recovery period also recognizes the prohibition on the collection of Historical CAT Assessments after March 31, 2028 as set forth in Section 11.3(f) of the CAT NMS Plan.

[79] Section 11.3(b)(iii)(B)(II)(C) of the CAT NMS Plan.

[80] Section 11.3(b)(i)(E) of the CAT NMS Plan.

[81] CAT Funding Model Approval Order at 13452.

[82] This projection was calculated by multiplying 5,980,937,549,360.49 executed equivalent shares by two.

[83] Section 11.3(b)(iii)(B)(II)(D) of the CAT NMS Plan.

[84] As the SEC noted in approving the CAT Funding Model, the fee filing would provide the exact fee per executed equivalent share and describe the relevant number of decimal places for the fee rate. CAT Funding Model Approval Order at 13445, n.677. The Operating Committee determined to use six decimal places to balance the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

[85] Section 11.3(b)(iii)(B)(II)(A) of the CAT NMS Plan.

[86] Section 11.3(b)(ii) of the CAT NMS Plan.

[87] *Id.* In approving the CAT Funding Model, the Commission stated that the proposed allocation of the Historical CAT Assessment solely to CEBSs and CEBBs is appropriate. The Historical CAT Assessment will still be divided into thirds, as the Participants' one-third share of Historical CAT Costs will be paid by the cancellation of loans made to the Company. CAT Funding Model Approval Order at 13453.

[88] *See* Section 11.3(b)(iii)(A) of the CAT NMS Plan.

[89] *See* proposed paragraph (a)(2)(B) of the fee schedule.

[90] Section 11.3(b)(i)(D)(II) of the CAT NMS Plan.

Historical CAT Assessment 1A will remain in effect until the remaining $38,964,855.34 of Historical CAT Costs 1 have been collected.[91] The actual recovery period for Historical CAT Assessment 1A may be shorter or longer than Historical Recovery Period 1A depending on the actual executed equivalent share volumes during the time that Historical CAT Assessment 1A is in effect and subject to any time limitation in the CAT NMS Plan.[92]

(6) Consolidated Audit Trail Funding Fees

To implement Historical CAT Assessment 1A, a new section would be added to the Exchange's fee schedule for ''Consolidated Audit Trail Funding Fees'', and it would include the proposed paragraphs described below.

(A) Fee Schedule for Historical CAT Assessment 1A

The CAT NMS Plan states that:

Each month in which a Historical CAT Assessment is in effect, each CEBB and each CEBS shall pay a fee for each transaction in Eligible Securities executed by the CEBB or CEBS from the prior month as set forth in CAT Data, where the Historical CAT Assessment for each transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by one-third and by the Historical Fee Rate reasonably determined pursuant to paragraph (b)(i) of this Section 11.3.[93]

Accordingly, based on the factors discussed above, the Exchange proposes to add paragraph (a)(2) to the Consolidated Audit Trail Funding Fees section of its fee schedule. Proposed paragraph (a)(2) would state the following:

(A) Each CAT Executing Broker shall receive its first invoice for Historical CAT Assessment 1A in June 2026, which shall set forth the Historical CAT Assessment 1A fees calculated based on transactions in May 2026, and shall receive an invoice for Historical CAT Assessment 1A for each month thereafter in which Historical CAT Assessment 1A is in effect.

(B) Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1A on a monthly basis. Each month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (''CEBB'') and/or the CAT Executing Broker for the Seller (''CEBS'') (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of $0.000002 per executed equivalent share.

(C) Historical CAT Assessment 1A will remain in effect until $38,964,855.34 is collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time. Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1A will no longer be in effect.

(D) Each CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1A in accordance with paragraph (b).

Proposed paragraph (a)(2)(B) of the fee schedule would set forth the fee rate of $0.000002 per executed equivalent share for Historical CAT Assessment 1A, which is calculated as discussed above.

The proposed language in paragraph (a)(2)(B) of the fee schedule would describe when CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1A. Specifically, CAT Executing Brokers would receive their first monthly invoice for Historical CAT Assessment 1A in June 2026 and the fees set forth in that invoice would be calculated based on transactions executed in the prior month, that is, transactions executed in May 2026. The payment for the first invoice would be required within 30 days after the receipt of the first invoice (unless a longer period is indicated), as described in paragraph (b)(2) of the fee schedule.

Proposed paragraph (a)(2)(A) of the fee schedule also would describe the monthly cadence of the invoices for Historical CAT Assessment 1A. Specifically, after the first invoices are provided to CAT Executing Brokers in June 2026, invoices will be sent to CAT Executing Brokers each month thereafter while Historical CAT Assessment 1A is in effect.

Proposed paragraph (a)(2)(B) of the fee schedule would describe the invoices for Historical CAT Assessment 1A. Proposed paragraph (a)(2)(B) of the fee schedule would state that ''Consolidated Audit Trail, LLC shall provide each CAT Executing Broker with an invoice for Historical CAT Assessment 1A on a monthly basis.'' Proposed paragraph (a)(2)(B) of the fee schedule also would describe the fees to be set forth in the invoices for Historical CAT Assessment 1A. Specifically, it would state that ''[e]ach month, such invoices shall set forth a fee for each transaction in Eligible Securities executed by the CAT Executing Broker in its capacity as a CAT Executing Broker for the Buyer (''CEBB'') and/or the CAT Executing Broker for the Seller (''CEBS'') (as applicable) from the prior month as set forth in CAT Data. The fee for each such transaction will be calculated by multiplying the number of executed equivalent shares in the transaction by the fee rate of $0.000002 per executed equivalent share.''

Furthermore, proposed paragraph (a)(2)(C) of the fee schedule would describe how long Historical CAT Assessment 1A would remain in effect. It would state that ''Historical CAT Assessment 1A will remain in effect until $38,964,855.34 is collected from CAT Executing Brokers collectively, which is estimated to be approximately two years, but could be for a longer or shorter period of time.'' This proposed paragraph would further state that ''Consolidated Audit Trail, LLC will provide notice when Historical CAT Assessment 1A will no longer be in effect.''

Historical CAT Assessment 1A will be assessed for all transactions executed in each month through the end of the month in which $38,964,855.34 is assessed, and then CAT LLC will provide notice that Historical CAT Assessment 1A is no longer in effect. Since Historical CAT Assessment 1A is a monthly fee based on transaction volume from the prior month, Historical CAT Assessment 1A may collect more than $38,964,855.34. To the extent that occurs, any excess money collected during the final month in which Historical CAT Assessment 1A is in effect will be used to offset future fees and/or to fund the reserve for the CAT.

Finally, proposed paragraph (a)(2)(D) of the fee schedule sets forth the requirement for the CAT Executing Brokers to pay the invoices for Historical CAT Assessment 1A. It would state that ''[e]ach CAT Executing Broker shall be required to pay each invoice for Historical CAT Assessment 1A in accordance with paragraph (b).''

(B) Manner of Payment

Paragraph (b)(1) of the ''Consolidated Audit Trail Funding Fees'' section of its fee schedule describes the manner of payment of Industry Member CAT fees. Paragraph (b)(1) states that ''[e]ach CAT Executing Broker shall pay its CAT fees as required pursuant to paragraph (a) each month to the Consolidated Audit Trail, LLC in the manner prescribed by the Consolidated Audit Trail, LLC.'' The CAT NMS Plan requires the Operating Committee to establish a system for the collection of CAT fees.[94] The Plan

[91] In approving the CAT Funding Model, the Commission stated that, ''[i]n the Commission's view, it is appropriate for Industry Members to be charged a Historical CAT Assessment until all Historical CAT Costs for the Historical CAT Assessment are collected.'' CAT Funding Model Approval Order at 13452.

[92] Section 11.3(f) of the CAT NMS Plan would prohibit the billing of Historical CAT Assessments after March 31, 2028.

[93] Section 11.3(b)(iii)(A) of the CAT NMS Plan.

[94] Section 11.4 of the CAT NMS Plan.

Processor has established a billing system for CAT fees.[95] Therefore, the Exchange proposes to require CAT Executing Brokers to pay Historical CAT Assessment 1A in accordance with such system.

(C) Failure to Pay CAT Fees

The CAT NMS Plan further states that:

Participants shall require each Industry Member to pay all applicable fees authorized under this Article XI within thirty (30) days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If an Industry Member fails to pay any such fee when due (as determined in accordance with the preceding sentence), such Industry Member shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of: (a) the Prime Rate plus 300 basis points; or (b) the maximum rate permitted by applicable law.[96]

Accordingly, the Exchange previously has added this requirement to the Exchange's fee schedule. Specifically, paragraph (b)(2) of the fee schedule states:

Each CAT Executing Broker shall pay the CAT fees required pursuant to paragraph (a) within thirty days after receipt of an invoice or other notice indicating payment is due (unless a longer payment period is otherwise indicated). If a CAT Executing Broker fails to pay any such CAT fee when due, such CAT Executing Broker shall pay interest on the outstanding balance from such due date until such fee is paid at a per annum rate equal to the lesser of (i) the Prime Rate plus 300 basis points, or (ii) the maximum rate permitted by applicable law.

The requirements of paragraph (b)(2) would apply to Historical CAT Assessment 1A.

(7) Historical CAT Assessment Details

The CAT NMS Plan states that:

Details regarding the calculation of a CAT Executing Broker's Historical CAT Assessment will be provided upon request to such CAT Executing Broker. At a minimum, such details would include each CAT Executing Broker's executed equivalent share volume and corresponding fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise than on an exchange, and (3) by buy-side transactions and sell-side transactions.[97]

Such information would provide CEBBs and CEBSs with the ability to understand the details regarding the calculation of their Historical CAT Assessment.[98] CAT LLC will provide CAT Executing Brokers with these details regarding the calculation of their Historical CAT Assessments on their monthly invoice for the Historical CAT Assessment.

In addition, CAT LLC will make certain aggregate statistics regarding Historical CAT Assessments publicly available. Specifically, the CAT NMS Plan states that, ''[f]or each Historical CAT Assessment, at a minimum, CAT LLC will make publicly available the aggregate executed equivalent share volume and corresponding aggregate fee by (1) Listed Options, NMS Stocks and OTC Equity Securities, (2) by transactions executed on each exchange and transactions executed otherwise on an exchange, and (3) by buy-side transactions and sell-side transactions.'' [99] Such aggregate statistics will be available on the CAT website.

Furthermore, CAT LLC will make publicly available on the CAT website the total amount invoiced each month that Historical CAT Assessment 1A is in effect as well as the total amount invoiced for Historical CAT Assessment 1A for all months since its commencement. CAT LLC also will make publicly available on the CAT website the total costs to be collected from Industry Members for Historical CAT Assessment 1A. By reviewing statistics regarding how much has been invoiced and how much remains to be invoiced for Historical CAT Assessment 1A, Industry Members would have sufficient information to reasonably track how much longer Historical CAT Assessment 1A is likely to be in place.

(8) Billing Implementation

To date, CAT LLC, via FCAT, has billed Industry Members for Historical CAT Assessment 1 and certain Prospective CAT Fees. Industry Members will be billed for Historical CAT Assessment 1A via the same processes established for Historical CAT Assessment 1 and the Prospective CAT Fees. Accordingly, Industry Members have substantial experience with the CAT billing processes.

(9) Financial Accountability Milestones

The CAT NMS Plan states that ''[n]o Participant will make a filing with the SEC pursuant to Section 19(b) of the Exchange Act regarding any Historical CAT Assessment until any applicable Financial Accountability Milestone described in Section 11.6 has been satisfied.'' [100] The CAT NMS Plan further states that ''in all filings submitted by the Participants to the Commission under Section 19(b) of the Exchange Act, to establish or implement Post-Amendment Industry Member Fees pursuant to this Article, . . . the Participants shall clearly indicate whether such fees are related to Post-Amendment Expenses incurred during Period 1, Period 2, Period 3, or Period 4.'' [101] As discussed in detail below, all applicable Financial Accountability Milestones for Historical CAT Assessment 1A—that is, Period 1, Period 2 and Period 3 of the Financial Accountability Milestones—have been satisfied. Furthermore, as discussed below, this filing clearly indicates that Historical CAT Assessment 1A relates to Post-Amendment Expenses incurred during Periods 1, 2 and 3 of the Financial Accountability Milestones.

(A) Period 1 of the Financial Accountability Milestones

In accordance with Section 11.6(b) of the CAT NMS Plan, Historical CAT Assessment 1A seeks to recover costs that are related to ''all fees, costs, and expenses (including legal and consulting fees, costs, and expenses) incurred by or for the Company in connection with the development, implementation and operation of the CAT from the effective date of [Section 11.6 of the CAT NMS Plan] until such time as Full Implementation of CAT NMS Plan Requirements has been achieved'' [102] (''Post-Amendment Expenses'') incurred during FAM Period 1. FAM Period 1 began on June 22, 2020, the effective date of Section 11.6 of the CAT NMS Plan, and concluded on July 31, 2020, the date of Initial Industry Member Core Equity and

[95] The billing process and system are described in CAT Alert 2023–02 as well as the CAT FAQs related to the billing of CAT fees, the Industry Member CAT Reporter Portal User Guide, the FCAT Industry Member Onboarding Guide, the FCAT Connectivity Supplement for Industry Members and the CAT Billing Webinars (dated Sept. 28, 2023, and Nov. 7, 2023), each available on the CAT website.

[96] Section 11.4 of the CAT NMS Plan.

[97] Section 11.3(a)(iv)(A) of the CAT NMS Plan.

[98] In approving the CAT Funding Model, the Commission stated that, ''[i]n the Commission's view, providing CAT Execut[ing] Brokers information regarding the calculation of their CAT Fees will aid in transparency and permit CAT Execut[ing] Brokers to confirm the accuracy of their invoices for CAT Fees.'' CAT Funding Model Approval Order at 13454.

[99] Section 11.3(a)(iv)(B) of the CAT NMS Plan. In approving the CAT Funding Model, the Commission stated that ''[t]he publication of the aggregate executed equivalent share volume and aggregate fee is appropriate because it would allow Participants and CAT Executing Brokers a high-level validation of executed volume and fees.'' CAT Funding Model Approval Order at 13454.

[100] Section 11.3(b)(iii)(B)(III) of the CAT NMS Plan.

[101] Section 11.6(b) of the CAT NMS Plan.

[102] Section 11.6 of the CAT NMS Plan.

Options Reporting. Section 1.1 of the CAT NMS Plan defines ''Initial Industry Member Core Equity and Options Reporting'' as:

> The reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of both: (a) equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information; and (b) options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information.

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports.[103] As indicated by the Participants' Quarterly Progress Report for the third quarter of 2020,[104] Initial Industry Member Core Equity and Option Reporting was completed on schedule on July 22, 2020, which is prior to the July 31, 2020 deadline.

Under the FAM Period 1 requirement of Initial Industry Member Core Equity and Options Reporting, Industry Members—excluding Small Industry Members that are not OATS reporters—were required to report two categories of data to the CAT: equites transaction data and options transaction data (both excluding Customer Account Information, Customer-ID, and Customer Identifying Information) by July 31, 2020. Pursuant to exemptive relief provided by the Commission, the Commission authorized the Participants' Compliance Rules to allow core equity reporting for Industry Members (Phase 2a) to begin on June 22, 2020 and core options reporting for Industry Members (Phase 2b) to begin on July 20, 2020.[105]

In adopting the FAMs, the Commission stated that the equities transaction reporting required for FAM Period 1 ''is consistent with the functionality that the Participants describe on the CAT NMS Plan website as 'Production Go-Live for Equities 2a file submission and data integrity validations.' '' [106] The Phase 2a Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order, and includes the following data related to Eligible Securities that are equities:

- All events and scenarios covered by OATS, which includes information related to the receipt or origination of orders, order transmittal, and order modifications, cancellations and executions;
- Reportable Events for: (1) proprietary orders, including market maker orders, for Eligible Securities that are equities; (2) electronic quotes in listed equity Eligible Securities (*i.e.,* NMS stocks) sent to a national securities exchange or FINRA's Alternative Display Facility (''ADF''); (3) electronic quotes in unlisted Eligible Securities (*i.e.,* OTC Equity Securities) received by an Industry Member operating an interdealer quotation system (''IDQS''); and (4) electronic quotes in unlisted Eligible Securities sent to an IDQS or other quotation system not operated by a Participant or Industry Member;
- Firm Designated IDs (''FDIDs''), which Industry Members must report to the CAT as required by Sections 6.3(d)(i)(A) and 6.4(d)(ii)(C) of the CAT NMS Plan;
- Industry Members would be required to report all street side representative orders, including both agency and proprietary orders and mark such orders as representative orders, except in certain limited exceptions as described in the Industry Member Technical Specifications;
- The link between the street side representative order and the order being represented when: (1) the representative order was originated specifically to represent a single order received either from a customer or another broker-dealer; and (2) there is (a) an existing direct electronic link in the Industry Member's system between the order being represented and the representative order and (b) any resulting executions are immediately and automatically applied to the represented order in the Industry Member's system;
- Manual and Electronic Capture Time for Manual Order Events;
- Special handling instructions for the original receipt or origination of an order during Phase 2a; and
- When routing an order, whether the order was routed as an intermarket sweep order (''ISO'').

In Phase 2a, Industry Members were not required to report modifications of a previously routed order in certain limited instances, nor were they required to report a cancellation of an order received from a Customer after the order has been executed.[107]

The Quarterly Progress Report for the third quarter of 2020 states that ''Interim Step: Production Go-Live for Equities 2a file submission and data integrity validation (Large Industry Members and Small OATS Reporters)'' was completed on June 22, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of ''equities transaction data, excluding Customer Account Information, Customer-ID, and Customer Identifying Information'' was completed on June 22, 2020.

In adopting the FAMs, the Commission stated that the options transaction reporting required for FAM Period 1 is ''consistent with the functionality that the Participants describe on the CAT NMS Plan website as 'Production Go-Live for Options 2b file submission and data integrity validations.' '' [108] The Phase 2b Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order, and includes the Industry Member Data related to Eligible Securities that are options and related to simple electronic option orders, excluding electronic paired option orders. A simple electronic option order is an order to buy or sell a single option that is not related to or dependent on any other transaction for pricing and timing of execution that is either received or routed electronically by an Industry Member. Electronic receipt of an order is defined as the initial receipt of an order by an Industry Member in electronic form in standard format directly into an order handling or execution system. Electronic routing of an order is the routing of an order via electronic medium in standard format from one Industry Member's order handling or execution system to an exchange or another Industry Member. An electronic paired option order is an electronic option order that contains both the buy and sell side that is routed to another Industry Member or exchange for crossing and/or price improvement as a single transaction on an exchange. Responses to auctions of simple orders

[103] The Quarterly Progress Reports are available at *https://www.catnmsplan.com/implementation-plan.*

[104] *See* Q3 2020 Quarterly Progress Report (Oct. 30, 2020) and Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021).

[105] *See* Phased Reporting Exemptive Relief Order. Under the CAT NMS Plan as adopted, the Participants were required, through their Compliance Rules, to require their Large Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2018, and to require their Small Industry Members to commence reporting Industry Member Data to the Central Repository by November 15, 2019. Sections 6.7(a)(v) and (vi) of the CAT NMS Plan. The SEC granted exemptive relief from these provisions of the CAT NMS Plan to allow for the phased implementation of Industry Member reporting via five phases addressing the reporting requirements for Phase 2a Industry Member Data, Phase 2b Industry Member Data, Phase 2c Industry Member Data, Phase 2d Industry Member Data and Phase 2e Industry Member Data.

[106] Securities Exchange Act Rel. No. 88890 (May 15, 2020), 85 FR 31322, 31330 n.97 (May 22, 2020) (''FAM Adopting Release'').

[107] Phased Reporting Exemptive Relief Order at 23076–78.

[108] FAM Adopting Release at 31330, n.98.

and paired simple orders would be reportable in Phase 2b. Furthermore, combined orders in options would be treated in Phase 2b in the same way as equity representative orders are treated in Phase 2a. A combined order would mean, as permitted by SRO rules, a single, simple order in Listed Options created by combining individual, simple orders in Listed Options from a customer with the same exchange origin code before routing to an exchange. During Phase 2b, the single combined order sent to an exchange must be reported and marked as a combined order, but the linkage to the underlying orders is not required to be reported until Phase 2d.[109]

The Quarterly Progress Report for the third quarter of 2020 states that ''Interim Step: Production Go-Live for Options 2b file submission and data integrity validations'' was completed on July 20, 2020. Accordingly, the FAM Period 1 requirement of reporting by Industry Members (excluding Small Industry Members that are not OATS reporters) of ''options transaction data, excluding Customer Account Information, Customer-ID and Customer Identifying Information'' was completed on July 20, 2020.

As discussed above, the remaining Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1A would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from June 22, 2020 through July 31, 2020. The total costs for this period, as discussed above, are $6,377,343. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($2,125,781) and CEBSs paying one-third ($2,125,781) through Historical CAT Assessment 1 and Historical CAT Assessment 1A.

(B) Period 2 of the Financial Accountability Milestones

Historical CAT Assessment 1A seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 2. FAM Period 2 began on August 1, 2020, and concluded on December 31, 2020, the date of the Full Implementation of Core Equity Reporting. Section 1.1 of the CAT NMS Plan defines ''Full Implementation of Core Equity Reporting'' as:

> the point at which: (a) Industry Member reporting (excluding reporting by Small Industry Members that are not OATS reporters) for equities transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, is developed, tested, and implemented at a 5% Error Rate or less and with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, and trade reporting facilities linkage to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, excluding linkage of representative orders, from order origination through order execution or order cancellation; and (b) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3 and Section 8.2.1 incorporates the Industry Member equities transaction data described in condition (a) and is available to the Participants and to the Commission. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the fourth quarter of 2020,[110] Full Implementation of Core Equity Reporting was completed on schedule by December 31, 2020.

Specifically, the Full Implementation of Core Equity Reporting requires the satisfaction of two prongs. The first prong requires Participants to have fully implemented the first phase of equities transaction reporting for Industry Members (excluding Small Industry Members that are not OATS reporters) at an Error Rate of less than 5%. In addition, equities transaction data produced by the CAT at this stage must also be sufficiently interlinked so as to permit full analysis of an order's lifecycle across the national market, excluding full linkage of representative orders. As CAT LLC reported on its Quarterly Progress Reports, Phase 2a was fully implemented as of October 26, 2020, including intra-firm, inter-firm, national securities exchange, and trade reporting facilities linkages.[111] In addition to the reporting of Phase 2a Industry Member Data as described above with regard to FAM Period 1, the following linkage data was added to the CAT as described in the Quarterly Progress Reports for the third and fourth quarter of 2020:

- ''Production Go-Live for Equities 2a Intrafirm Linkage validations'' was completed on 7/27/2020;[112]
- ''Production Go-Live for Firm to Firm Linkage validations for Equities 2a (Large Industry Members and Small OATS Reporters)'' was completed on October 26, 2020; and
- ''Production Go-Live for Equities 2a Exchange and TRF Linkage validations (Large Industry Members and Small OATS Reporters)'' was completed on October 26, 2020.

Furthermore, as CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2020, the average overall error rate for Phase 2a Industry Member Data was less than 5% as of December 31, 2020. The average overall error rate was calculated by dividing the compliance errors by processed records.

The second prong of this FAM requires that the equities transaction data collected by the CAT at this stage be made available to regulators through two basic query tools required by the CAT NMS Plan—a targeted query tool that will enable regulators to retrieve data via an online query screen with a variety of predefined selection criteria, and a user-defined direct query tool that will provide regulators with the ability to query data using all available attributes and data sources.[113] As CAT LLC reported on its Quarterly Progress Reports, the query tool functionality incorporating the data from Phase 2a was available to the Participants and the Commission as of December 31, 2020.[114]

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.[115]

As discussed above, the remaining Historical CAT Costs 1 to be recovered

[109] Phased Reporting Exemptive Relief Order at 23078.

[110] Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

[111] For a description of the requirements of Phases 2a, *see* Phased Reporting Exemptive Relief Order.

[112] Q3 2020 Quarterly Progress Report (Oct. 20, 2021).

[113] At the time of this FAM, Section 6.10(c)(i)(A) of the CAT NMS Plan required the Plan Processor to ''provide Participants and the SEC with access to all CAT Data stored in the Central Repository'' via an ''online targeted query tool,'' and Appendix D, Sections 8.1.1–8.1.3 of the CAT NMS Plan described the required functionality associated with this regulatory tool. Appendix D, Section 8.2.1 describes the required functionality associated with a user-defined direct query tool that will ''deliver large sets of data that can then be used in internal surveillance or market analysis applications.''

[114] *See* Q3 2020 Quarterly Progress Report (Oct. 30, 2020); Updated Q3 2020 Quarterly Progress Report (Jan. 29, 2021); and Q4 2020 Quarterly Progress Report (Jan. 29, 2021).

[115] Securities Exchange Act Rel. No. 98848 (Nov. 2, 2023), 88 FR 77128, 77129 n.13 (Nov. 8, 2023) (''Settlement Exemptive Order'').

via Historical CAT Assessment 1A would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from August 1, 2020 through December 31, 2020. The total costs for this period, as discussed above, are $42,976,478. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remaining two-thirds, with CEBBs paying one-third ($14,325,492.70) and CEBSs paying one-third ($14,325,492.70) through Historical CAT Assessment 1 and Historical CAT Assessment 1A.

(C) Period 3 of the Financial Accountability Milestones

Historical CAT Assessment 1A seeks to recover costs that are related to Post-Amendment Expenses incurred during FAM Period 3. FAM Period 3 began on January 1, 2021, and concluded on December 31, 2021, the date of the Full Availability and Regulatory Utilization of Transactional Database Functionality. Section 1.1 of the CAT NMS Plan defines ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' as:

the point at which: (a) reporting to the Order Audit Trail System (''OATS'') is no longer required for new orders; (b) Industry Member reporting for equities transactions and simple electronic options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with sufficient intra-firm linkage, inter-firm linkage, national securities exchange linkage, trade reporting facilities linkage, and representative order linkages (including any equities allocation information provided in an Allocation Report) to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, is developed, tested, and implemented at a 5% Error Rate or less; (c) Industry Member reporting for manual options transactions and complex options transactions, excluding Customer Account Information, Customer-ID, and Customer Identifying Information, with all required linkages to permit the Participants and the Commission to analyze the full lifecycle of an order across the national market system, from order origination through order execution or order cancellation, including any options allocation information provided in an Allocation Report, is developed, tested, and fully implemented; (d) the query tool functionality required by Section 6.10(c)(i)(A) and Appendix D, Sections 8.1.1–8.1.3, Section 8.2.1, and Section 8.5 incorporates the data described in conditions (b)-(c) and is available to the Participants and to the Commission; and (e) the requirements of Section 6.10(a) are met. This Financial Accountability Milestone shall be considered complete as of the date identified in a Quarterly Progress Report meeting the requirements of Section 6.6(c).

Under Section 1.1 of the CAT NMS Plan, this Financial Accountability Milestone is considered complete as of the date identified in the Participants' Quarterly Progress Reports. As indicated by the Participants' Quarterly Progress Report for the fourth quarter of 2021,[116] Full Availability and Regulatory Utilization of Transactional Database Functionality was completed on schedule by December 31, 2021.

Specifically, the ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' requires the satisfaction of five prongs. The first prong requires that reporting to the Order Audit Trail System (''OATS'') is no longer required for new orders. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021,[117] FINRA retired OATS effective September 1, 2021.[118] Accordingly, after the retirement of OATS, reporting to OATS was no longer required.

In addition to Phase 2a and Phase 2b Industry Member Data, the second and third prongs of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' require Industry Member reporting of Phase 2c Industry Member Data and Phase 2d Industry Member Data. The Phase 2c Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. That Order states that ''Phase 2c Industry Member Data'' is Industry Member Data related to Eligible Securities that are equities other than Phase 2a Industry Member Data, Phase 2d Industry Member Data, or Phase 2e Industry Member Data. Specifically, the Phase 2c Industry Member Data includes Industry Member Data that is related to Eligible Securities that are equities and that is related to: (1) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (2) quotes in unlisted Eligible Securities sent to an IDQS operated by a CAT Reporter (reportable by the Industry Member sending the quotes) (except for quotes reportable in Phase 2d, as discussed below); (3) electronic quotes in listed equity Eligible Securities (*i.e.,* NMS stocks) that are not sent to a national securities exchange or FINRA's Alternative Display Facility; (4) reporting changes to client instructions regarding modifications to algorithms; (5) marking as a representative order any order originated to work a customer order in price guarantee scenarios, such as a guaranteed VWAP; (6) flagging rejected external routes to indicate a route was not accepted by the receiving destination; (7) linkage of duplicate electronic messages related to a Manual Order Event between the electronic event and the original manual route; (8) special handling instructions on order route reports (other than the ISO, which is required to be reported in Phase 2a); (9) quote identifier on trade events; (10) reporting of LTIDs (if applicable) for accounts with Reportable Events that are reportable to CAT as of and including Phase 2c; (11) reporting of date account opened or Account Effective Date (as applicable) for accounts and reporting of a flag indicating the Firm Designated ID type as account or relationship; (12) order effective time for orders that are received by an Industry Member and do not become effective until a later time; (13) the modification or cancellation of an internal route of an order; and (14) linkages to the customer orders(s) being represented for representative order scenarios, including agency average price trades, net trades, aggregated orders, and disconnected Order Management System (''OMS'')—Execution Management System (''EMS'') scenarios, as required in the Industry Member Technical Specifications.[119]

Phase 2c Industry Member Data also includes electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are equities and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: (1) an equity bid or offer is displayed publicly or has been communicated (a) for listed securities to the ADF operated by FINRA; or (b) for unlisted equity securities to an ''interdealer quotation system,'' as defined in FINRA Rule 6420(c); or (2) an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing; *i.e.,* no further manual or electronic action is required by the responder providing the quote in order to execute or cause a trade to be executed). With respect to OTC Equity Securities, OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an

[116] Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

[117] *Id.*

[118] Securities Exchange Act Rel. No. 92239 (June 23, 2021), 86 FR 34293 (June 29, 2021).

[119] Phase Reporting Exemptive Relief Order at 23078–79.

Industry Member CAT Reporter (other than such an IDQS that does not match and execute orders) are reportable by the Industry Member sending them in Phase 2c. Accordingly, any response to a request for quote or other form of solicitation response provided in a standard electronic format (*e.g.,* FIX) that meets this quote definition (*i.e.,* an equity bid or offer which is accessible electronically by customers or other market participants and is immediately actionable for execution or routing) would be reportable in Phase 2c.[120]

The Phase 2d Industry Member Data is described in detail in the SEC's Phased Reporting Exemptive Relief Order. ''Phase 2d Industry Member Data'' is Industry Member Data that is related to Eligible Securities that are options other than Phase 2b Industry Member Data, Industry Member Data that is related to Eligible Securities that are equities other than Phase 2a Industry Member Data or Phase 2c Industry Member Data, and Industry Member Data other than Phase 2e Industry Member Data. Phase 2d Industry Member Data includes with respect to the Eligible Securities that are options: (1) simple manual orders; (2) electronic and manual paired orders; (3) all complex orders with linkages to all CAT-reportable legs; (4) LTIDs (if applicable) for accounts with Reportable Events for Phase 2d; (5) date account opened or Account Effective Date (as applicable) for accounts with an LTID and flag indicating the Firm Designated ID type as account or relationship for such accounts; (6) Allocation Reports as required to be recorded and reported to the Central Repository pursuant to Section 6.4(d)(ii)(A)(1) of the CAT NMS Plan; (7) the modification or cancellation of an internal route of an order; and (8) linkage between a combined order and the original customer orders. Phase 2d Industry Member Data also would include electronic quotes that are provided by or received in a CAT Reporter's order/quote handling or execution systems in Eligible Securities that are options and are provided by an Industry Member to other market participants off a national securities exchange under the following conditions: a listed option bid or offer which is accessible electronically by customers or other market participants and is immediately actionable (*i.e.,* no further action is required by the responder providing the quote in order to execute or cause a trade to be executed). Accordingly, any response to a request for quote or other form of solicitation response provided in standard electronic format (*e.g.,* FIX) that meets this definition is reportable in Phase 2d for options.[121]

Phase 2d Industry Member Data also includes with respect to Eligible Securities that are options or equities (1) receipt time of cancellation and modification instructions through Order Cancel Request and Order Modification Request events; (2) modifications of previously routed orders in certain instances; and (3) OTC Equity Securities quotes sent by an Industry Member to an IDQS operated by an Industry Member CAT Reporter that does not match and execute orders. In addition, subject to any exemptive or other relief, Phase 2d Industry Member Data will include verbal or manual quotes on an exchange floor or in the over-the-counter market, where verbal quotes and manual quotes are defined as bids or offers in Eligible Securities provided verbally or that are provided or received other than via a CAT Reporter's order handling and execution system (*e.g.,* quotations provided via email or instant messaging).[122]

The Quarterly Progress Report for the fourth quarter of 2021 states that ''Phase 2a was fully implemented as of October 26, 2020;'' ''Phase 2b was fully implemented as of January 4, 2021;'' ''Phase 2c was implemented as of April 26, 2021;'' and ''Phase 2d was fully implemented as of December 13, 2021.'' [123] The Quarterly Progress Reports for 2021 provide additional detail regarding the implementation of these steps including the following:

- ''Production Go-Live for Equities 2c reporting requirements (Large Industry Members)'' was completed on April 26, 2021;
- ''LTID Account Information Reporting Go-Live for Phases 2a, 2b and 2c (Large Industry Members)'' was completed on April 26, 2021;
- ''FCAT Plan Processor creates linkages of the lifecycle of order events based on the received data through Phase 2d Production Go-Live for Options 2d reporting requirements (Large Industry Members)'' was completed on December 13, 2021;
- ''Production Go-Live for Options 2d reporting requirements (Large Industry Members)'' was completed on December 13, 2021;
- ''Production Go-Live for Options 2b reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)'' was completed on December 13, 2021;
- ''Production Go-Live for Equities 2c reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)'' was completed on December 13, 2021;
- ''Production Go-Live for Options 2d reporting requirements (Small OATS Reporters and Small Non-OATS Reporters)'' was completed on December 13, 2021;
- ''LTID Account Information Reporting Go-Live for Phases 2d (Large Industry Members)'' was completed on December 13, 2021; and
- ''LTID Account Information Reporting Go-Live for Phases 2a, 2b, 2c and 2d (Small Industry Members)'' was completed on December 13, 2021.[124]

The third prong of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' also imposes an Error Rate requirement of 5% or less. The Quarterly Progress Report for the fourth quarter of 2021 states the average overall error rate was less than 5% as of December 31, 2021. The average overall error rate was calculated by dividing the compliance errors by processed records.

The fourth prong of ''Full Availability and Regulatory Utilization of Transactional Database Functionality'' requires that the data collected by the CAT at this stage be made available to regulators through an online targeted query tool and a user-defined direct query tool. As CAT LLC reported on its Quarterly Progress Report for the fourth quarter of 2021, the query tool functionality incorporating the data from Phases 2a, 2b, 2c and 2d was available to the Participants and to the Commission as of December 31, 2021.[125]

The fifth prong requires the requirements of Section 6.10(a) of the CAT NMS Plan to have been met. Section 6.10(a) of the CAT NMS Plan requires the Participants to use the tools described in Appendix D to ''develop and implement a surveillance system, or enhance existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository.'' The Exchange implemented a surveillance system, or enhanced existing surveillance systems, reasonably designed to make use of the consolidated information contained in the Central Repository as of December 31, 2021 in accordance with Section 6.10(a) of the CAT NMS Plan.[126]

Continued

The Commission has determined that the Participants have sufficiently complied with the conditions set forth in the 2020 Orders and with the technical requirements for Quarterly Progress Reports set forth in Section 6.6(c) of the CAT NMS Plan for purposes of determining compliance with this FAM.[127]

As discussed above, the remaining Historical CAT Costs 1 to be recovered via Historical CAT Assessment 1A would include fees, costs and expenses incurred by or for the Company in connection with the development, implementation and operation of the CAT during the period from January 1, 2021 through December 31, 2021. The total costs for this period, as discussed above, are $144,415,268. Participants would remain responsible for one-third of this cost (which they have previously paid), and Industry Members would be responsible for the remain two-thirds, with CEBBs paying one-third ($48,138,422.70) and CEBSs paying one-third ($48,138,422.70) through Historical CAT Assessment 1 and Historical CAT Assessment 1A.

(D) Additional Considerations related to the Financial Accountability Milestones

As discussed above, CAT LLC has satisfied the Financial Accountability Milestones (''FAMs'') for Periods 1 through 3.[128] As discussed below, none of the circumstances related to NIA Electronic RFQ Responses, the 2023 Verbal Quotes Exemption, the November 2023 Order, or Executing Broker reporting, affect the conclusion that the FAMs for Periods 1 through 3 were satisfied in a timely fashion.

(i) NIA Electronic RFQ Responses

CAT LLC does not believe that the exemptive relief relating to the reporting of electronic responses for quotes (''RFQs'') that are not immediately actionable (''NIA Electronic RFQ Responses'') affect the conclusion that FAMs 1 through 3 have been satisfied. The only reason CAT LLC pursued this relief is because certain Industry Members introduced concerns that NIA Electronic RFQ Responses could be considered ''orders'' reportable pursuant to Rule 613(j)(8) and some Industry Members were not prepared to report such orders to CAT. Thus, the relief was requested on behalf of Industry Members. CAT LLC itself has not taken any position on whether NIA Electronic RFQ Responses are ''orders,'' as the definition of ''order'' is an SEC rule and the trading processes for NIA Electronic RFQ Responses are the Industry Members', not those of the Participants or CAT LLC. Accordingly, CAT LLC stated in its letter that ''Industry Members must determine whether trading interest falls within the definition of an 'order' for CAT purposes. To the extent an NIA Electronic RFQ Response is not considered an 'order'' as defined in Rule 613(j)(8) and the CAT NMS Plan, it would not be reportable to CAT.'' [129]

Only ''orders'' as defined in SEC Rule 613(j)(8) are reportable to CAT. There is no agreement across the industry or among regulators as to whether NIA Electronic RFQ Responses are ''orders'' reportable to CAT. Certain Industry Members have raised the question as to whether NIA Electronic RFQ Responses are orders, but others have argued that they are not orders under Rule 613(j)(8).[130] Indeed, members of the Advisory Committee, which CAT LLC relies upon for guidance with regard to Industry Member issues, have not had a definitive view on whether NIA Electronic RFQ Responses are orders. As Rule 613(j)(8) is an SEC rule, CAT LLC believes that only the SEC can provide a definitive determination as to if, and under what circumstances, an NIA Electronic RFQ Response is considered an ''order'' reportable to CAT. The issue has persisted for some time. As a result, CAT LLC filed an exemptive request regarding NIA Electronic RFQ Responses for clarity on the interpretive issue. As recently as April 2024, Industry Members have re-raised this issue stating that the SEC agrees that it must provide additional guidance on this interpretive issue to resolve the CAT reporting issue for NIA Electronic RFQ Responses:

> As further discussed in the prior FIF letters, even if the Commission had the legal authority to require the reporting of NIA RFQ responses to CAT without an amendment to Rule 613, the Commission has not provided guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT. In subsequent discussions with industry members, Commission representatives have agreed that, prior to NIA RFQ responses being reportable to CAT, it would be necessary for the Commission to provide further guidance to industry members as to the conditions under which NIA RFQ responses would be reportable to CAT.[131]

On May 20, 2024, the Commission granted CAT LLC's request for exemptive relief from certain CAT reporting requirements pertaining to NIA Electronic RFQ Responses to the extent such responses are considered ''orders'' reportable pursuant to Rule 613(j)(8).[132] The Commission, however, did not provide additional guidance regarding the conditions under which NIA Electronic RFQ Responses would be reportable to CAT. The Commission stated in its exemptive order that ''[t]o the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for the Financial Accountability Milestones, provided that any conditions of the exemption are satisfied.'' [133]

When the Commission proposed the FAMs, the Participants expressed concern that, ''by conditioning the ability of CAT LLC and the Participants to collect Post-Amendment Industry Member Fees on factors dependent on the efforts of Industry Members, the Commission's proposals inadvertently establish a perverse incentive for Industry Members to devote less than maximum efforts to comply with their obligations related to the CAT as they will pay less fees in such instances.'' [134] The Participants further warned that ''Industry Members may request or require unanticipated reporting delays to address Industry Member implementation issues or concerns,'' but that, ''[f]aced with financial penalties for missed deadlines, the Participants may not be able to fully address legitimate industry concerns or accommodate requests for delays with respect to future deadlines.'' [135] CAT LLC has engaged in good faith to help address NIA Electronic RFQ Responses and other concerns relevant to the ability of Industry Members to meet their CAT reporting obligations. CAT LLC should not be penalized financially

27, 2021); Q3 2021 Quarterly Progress Report (Nov. 1, 2021); and Q4 2021 Quarterly Progress Report (Jan. 17, 2022).

[127] Settlement Exemptive Order at 77129 n.13.

[128] In May 2020, the Commission adopted amendments to the CAT NMS Plan that establish four Financial Accountability Milestones and set target deadlines by which these milestones must be achieved. These amendments also reduce the amount of any fees, costs, and expenses that may be recovered from Industry Members if the Participants fail to meet the target deadlines. FAM Adopting Release.

for seeking in good faith to resolve a difficult interpretive issue for the benefit of Industry Members.

(ii) 2023 Verbal Quotes Exemption

CAT LLC does not believe that the Commission's May 19, 2023 order granting temporary exemptive relief relating to certain verbal floor activity and unstructured verbal and electronic upstairs activity (the ''2023 Verbal Quotes Exemption'') affects the conclusion that FAMs 1 through 3 have been satisfied. The 2023 Verbal Quotes Exemption, which was issued on May 19, 2023, is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. The relevant exemption for this time period is the Commission's November 12, 2020 order, which granted relief for the same activity through July 31, 2023 (the ''2020 Verbal Quotes Order'').[136] The Commission has stated that, ''to the extent that the Participants are availing themselves of exemptive relief from a CAT NMS Plan requirement, such requirement shall not be included in the requirements for a Financial Accountability Milestone, provided that the conditions of the exemption are satisfied.'' [137] Here, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3.[138]

(iii) November 2023 Order

CAT LLC does not believe that the Commission's November 2, 2023 order granting relief from certain CAT NMS Plan requirements (the ''November 2023 Order'') affects the conclusion that FAMs 1 through 3 have been satisfied. The November 2023 Order is not relevant for purposes of FAM Periods 1 through 3, which only cover the period through December 31, 2021. As described in the November 2023 Order, the relevant exemptive orders for this time period were issued on December 16, 2020, which also states that ''the Commission has determined that the Participants have sufficiently complied with the conditions set forth in the prior Orders and with the technical requirements for Quarterly Progress Reports set forth in section 6.6(c) of the CAT NMS Plan, including for purposes of determining compliance with any applicable Financial Accountability Milestones.'' [139] The November 2023 Exemption Order is consistent with the Commission's repeated statements in the FAM adopting release that it would have ''authority to grant exemptive relief from any requirement associated with a particular Financial Accountability Milestone,'' citing Section 36 of the Exchange Act and Rule 608.[140] Similarly, the CAT NMS Plan expressly contemplates the Commission's ability to grant exemptive relief from any CAT NMS Plan requirement.[141]

(iv) Executing Broker Reporting

CAT LLC also completed the requirements of FAM Period 2, including the required linkages, by December 31, 2020. Although Participant exchanges may report the Executing Broker to CAT differently in certain situations, these reporting differences are irrelevant for linkage purposes as the fields used for CAT Executing Broker are not used for linkage.

(10) Additional Support for Reasonableness of Historical CAT Costs

The CAT Funding Model approved by the Commission permits the recovery of reasonable costs in each of the categories of CAT costs sought to be recovered via Historical CAT Assessment 1A.[142] As described in detail above and in further detail below, the CAT costs to be recovered for each category are reasonable. The following discusses in further detail how each of the following costs are reasonable: (1) costs incurred prior to the effective date of the CAT NMS Plan; (2) cloud hosting services costs; (3) costs related to funding model filings; (4) costs related to litigation with the SEC regarding the CAT NMS Plan; (5) costs related to the Initial Plan Processor; (6) CAIS implementation costs; (7) public relations costs; (8) legal costs related to the limitation of liability provision in the CAT Reporter agreements; and (9) costs for the Chair of CAT Operating Committee. As discussed in detail below, each of these costs is reasonable and should be recoverable in accordance with the CAT Funding Model.

(A) Costs Incurred Prior to the Effective Date of CAT NMS Plan

CAT LLC believes that it is reasonable to seek recovery of costs incurred prior to when the CAT NMS Plan became effective in November 2016, such as legal and consulting fees incurred to create the CAT NMS Plan. Rule 613 specifically mandates that the CAT be created, implemented and maintained, and further provides that the CAT NMS Plan include a proposed allocation of estimated costs to fund the creation, implementation and maintenance of the CAT among the Participants (referred to as ''plan sponsors''), and between the Participants and Industry Members (referred to as ''members of the plan sponsors'').[143] Consistent with Rule 613, the CAT NMS Plan, as approved by the Commission, specifically authorizes charging Industry Members fees for costs reasonably incurred prior to the date of the approval of the CAT NMS Plan by the Commission in November 2016, including legal and consulting costs. Section 11.1(c) of the CAT NMS Plan states that:

[i]n determining fees on Participants and Industry Members the Operating Committee shall take into account fees, costs and expenses (including legal and consulting fees and expenses) reasonably incurred by

[136] Securities Exchange Act Rel. No. 90405, 85 FR 73544 (Nov. 18, 2020) (the ''2020 Verbal Quotes Exemption'').

[137] *See, e.g.,* Securities Exchange Act Rel. No. 89051 (June 11, 2020), 85 FR 36631, 36633 (June 17, 2020). The straightforward reading of the Commission's statement is that compliance with the conditions of an exemption will be measured as of the deadline for a particular FAM Period.

[138] As a condition to the 2020 Verbal Quotes Exemption, the Commission required that the Participants provide a written status update on the reporting of these quotes and orders by July 31, 2022, including the estimated costs of reporting these quotes and orders and an implementation plan for the reporting of these quotes and orders. As noted, the 2020 Verbal Quotes Order was in effect and the conditions of the exemption were satisfied as of December 31, 2021, and therefore may be relied upon for purposes of determining compliance with FAM Periods 1 through 3. In any event, on June 3, 2022, the Participants provided the required written status update. *See* Letter from Michael Simon, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (June 3, 2022).

[139] *Id.* at 77129 n.12.

[140] FAM Adopting Release at 31335 (May 22, 2020). Section 36 of the Exchange Act grants the Commission the authority to ''conditionally or unconditionally exempt any person, security, or transaction . . . from any provision or provisions of [the Exchange Act] or of any rule or regulation thereunder, to the extent that such exemption is necessary or appropriate in the public interest, and is consistent with the protection of investors.'' 15 U.S.C. 78mm(a)(1). Under Rule 608(e) of Regulation NMS, the Commission may ''exempt from [Rule 608], either unconditionally or on specified terms and conditions, any self-regulatory organization, member thereof, or specified security, if the Commission determines that such exemption is consistent with the public interest, the protection of investors, the maintenance of fair and orderly markets and the removal of impediments to, and perfection of the mechanism of, a national market system.'' 17 CFR 242.608(e).

[141] Section 12.3 of the CAT NMS Plan (''[T]o the extent the SEC grants exemptive relief applicable to any provision of this Agreement, Participants and Industry Members shall be entitled to comply with such provision pursuant to the terms of the exemptive relief so granted at the time such relief is granted irrespective of whether this Agreement has been amended.'')

[142] *See* Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[143] *See, e.g.,* Rule 613(a)(1)(vii)(D) of the CAT NMS Plan.

Participants on behalf of the Company prior to the Effective Date in connection with the creation and implementation of the CAT.

Accordingly, the CAT NMS Plan specifically permits the recovery of costs, including legal and consulting costs, reasonably incurred prior to November 2016 in connection with the creation and implementation of the CAT.

Furthermore, the costs incurred to create and implement the CAT prior to the effective date of the CAT NMS Plan (''Pre-Formation Costs'') were reasonable both in scope and amount, in accordance with the requirements of Section 11.1(c) of the CAT NMS Plan. During the four-year period from 2012 to 2016, a total of $13,842,881 in Pre-Formation Costs were incurred. This is an average of approximately $3.5 million per year over this period. The Pre-Formation Costs fell into three categories: legal costs, consulting costs and public relations costs. This includes legal costs of $3,196,434; consulting costs of $10,589,273; and public relations costs of $57,174. The legal, consulting and public relations services were performed by WilmerHale, Deloitte and Peppercomm, respectively. The selection considerations and fees for these three firms are described in detail above and are described further below. The Pre-Formation Costs are direct costs of CAT, which have been funded entirely by the Participants through non-interest-bearing notes. The Pre-Formation Costs do not include the significant costs incurred by each of the individual Participants in responding to the adoption of Rule 613.

The Pre-Formation Costs are reasonable and appropriate as they reflect the extensive efforts that were necessary to create the CAT NMS Plan as mandated after the SEC's adoption of Rule 613. As described in more detail below, these efforts included, among other things, developing a plan for selecting the Plan Processor, soliciting and evaluating bids, engaging a diverse set of market participants and the SEC in the development of the Plan, interacting with the SEC in their oversight of the development of the Plan, and seeking appropriate exemptive relief to address areas of concern in Rule 613.[144]

(i) Request for Proposal (''RFP'')

The Participants determined to utilize an RFP to ensure that potential alternative solutions for creating the Plan could be presented and considered, and that a detailed and meaningful cost-benefit analysis could be performed. The SEC supported the use of an RFP, and approved its use as it is described in extensive detail in the CAT NMS Plan.[145]

In the context of the SEC's adoption of Rule 613, commenters urged the Commission to utilize an RFP process to assist in the planning and design of the NMS plan.[146] Specifically, the Commission explained:

> In this regard, several commenters suggested that the Commission undergo a RFP or request for information (''RFI'') process to create and implement a consolidated audit trail. Specifically, FIF urged the Commission to perform a RFP process ''to determine the best technical solution for developing a consolidated audit trail.'' FIF suggested that the Commission ''should outline a set of goals and guiding principles they are striving to achieve as part of the adopted CAT filing and leave the determination of data elements and other technical requirements to [an] industry working group.'' Similarly, Direct Edge suggested that Commission staff should form and engage in a working group to develop an RFP for publication by the Commission. DirectEdge explained that an RFP process would facilitate the identification of the costs and benefits of the audit trail, as well as the consideration of a wider range of technological solutions. Further, commenters, including Broadridge Financial Solutions, Inc., a technology provider, also requested more specific information about the audit trail system to better assess the Commission's initial cost estimates and to determine the best approach to the consolidated audit trail.[147]

In response to these comments, the Commission modified Rule 613 to require the Participants to address certain important considerations regarding the features and details of the NMS plan and to extend the timeframe for submission of the CAT NMS Plan by the Participants from the 90 days as originally proposed to 270 days, in part, to accommodate a process that would address these considerations.[148] As the SEC noted, ''[i]n light of the numerous specific requirements of Rule 613, the Participants concluded that publication of a request for proposal ('RFP') was necessary to ensure that potential alternative solutions to creating the consolidated audit trail can be presented and considered by the Participants and that a detailed and meaningful cost/benefit analysis can be performed, both of which are required considerations to be addressed in the CAT NMS Plan.'' [149]

The SEC specifically recognized that the Participants planned to use an RFP when it approved the Selection Plan, and stated that the RFP was a reasonable approach.[150] As the SEC described in its approval order for the Selection Plan, ''[t]he Participants filed the [Selection] Plan to govern how the SROs will proceed with formulating and submitting the CAT NMS Plan—and, as part of that process, how to review, evaluate, and narrow down the bids submitted in response to the RFP ('Bids')—and ultimately choosing the plan processor that will build, operate, and maintain the consolidated audit trail ('Plan Processor').'' [151] After evaluating the Selection Plan, including the use of an RFP process, the Commission stated that it ''believes the [Selection] Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail.'' [152]

On February 26, 2013, the Participants published an RFP soliciting bids from parties interested in serving as the plan processor for the CAT. Initially, 31 firms submitted intentions to bid. In the following months, the Participants engaged with potential bidders with respect to, among other things, the selection process, selection criteria, and potential bidders' questions and concerns. On March 21, 2014, the Participants received ten bids in response to the RFP.

(ii) Selection Plan

On September 4, 2013, the Participants filed with the Commission a national market system plan to govern the process for Participant review of the bids submitted in response to the RFP, the procedures for evaluating the bids, and, ultimately, selection of the plan

[144] The Participants described in detail the process for drafting the CAT NMS Plan in its original filing of the CAT NMS Plan. *See* Letter from Mike Simon, on behalf of the Participants of the CAT NMS Plan, to Brent J. Fields, Secretary, Commission (Sept. 30, 2014). A non-exclusive list of filings and activities associated with CAT, including certain pre-2016 filings, are available on the SEC's website: *https://www.sec.gov/divisions/marketreg/rule613-info.*

[145] *See* detailed discussion of RFP questions in Appendix C of the CAT NMS Plan, and incorporation of RFP requirements in Appendix D at D–2.

[146] For example, in its comments on proposed Rule 613, FIF suggested ''that the SROs should select the processor through a 'request for proposal.'" Rule 613 Adopting Release at 45785.

[147] Rule 613 Adopting Release at 45738–39.

[148] Rule 613 Adopting Release at 45739.

[149] Securities Exchange Act Rel. No. 71596 (Feb. 21, 2014), 79 FR 11152, 11152 (Feb. 27, 2014) (''Selection Plan Approval Order'').

[150] *Id.*

[151] *Id.* at 11153

[152] *Id.* at 11159.

processor (the ''Selection Plan'').[153] The Commission approved the Selection Plan as filed on February 21, 2014.[154] In approving the Selection Plan, the Commission concluded that ''it is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor.'' [155]

The Selection Plan divided the review and evaluation of bids, and the selection of the plan processor, into various stages. Specifically, pursuant to the Selection Plan, a selection committee reviewed all bids and determined which bids contained sufficient information to allow the Participants to meaningfully assess and evaluate the bids. The ten submitted bids were deemed ''Qualified Bids,'' and so passed to the next stage, in which each bidder presented its bids to the Participants on a confidential basis. On July 1, 2014, after conducting careful analysis and comparison of the bids, the Selection Committee voted and selected a shortlist of six eligible bidders. The Selection Committee determined which shortlisted bidders would be provided the opportunity to revise their bids. After the Selection Committee assessed and evaluated the revised bids, the Selection Committee selected the plan processor via two rounds of voting by the Participants, as described in the Selection Plan.

The Selection Plan established an Operating Committee responsible for formulating, drafting, and filing with the Commission the CAT NMS Plan and for ensuring that the Participants' joint obligations under Rule 613 were met in a timely and efficient manner. In formulating the CAT NMS Plan, the Participants also engaged multiple persons across a wide range of roles and expertise, engaged the consulting firm Deloitte as project manager, and engaged the law firm WilmerHale to serve as legal counsel in drafting the Plan. Within this structure, the Participants focused on, among other things, comparative analyses of the proposed technologies and operating models, development of funding models to support the building and operation of the CAT, and detailed review of governance considerations. Given the complexity and scope of developing the CAT NMS Plan, these efforts were extensive.

When it approved the CAT NMS Plan in 2016, the Commission reiterated its belief that the Selection Plan remains a ''reasonable approach,'' that ''the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor,'' and that ''the process set forth in the Selection Plan should be permitted to continue'':

> In approving the Selection Plan, the Commission stated that the Selection Plan is reasonably designed to achieve its objective of facilitating the development of the CAT NMS Plan and the selection of the Plan Processor. The Commission also found that the Selection Plan is reasonably designed to govern the process by which the SROs will formulate and submit the CAT NMS Plan, including the review, evaluation, and narrowing down of Bids in response to the RFP, and ultimately choosing the Plan Processor that will build, operate, and maintain the consolidated audit trail. The Commission believes that the process set out in the Selection Plan for selecting a Plan Processor remains a reasonable approach, which will facilitate the selection of Plan Processor through a fair, transparent and competitive process and that no modifications to the Selection Plan are required to meet the approval standard. . . . In response to the comment that offered support for a specific Bidder, the Commission agrees with the Participants that the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor and thus believes that the process set forth in the Selection Plan should be permitted to continue.[156]

(iii) Engagement With Market Participants and SEC

During the process of developing the CAT NMS Plan, the Participants engaged in extensive and meaningful dialogue with market participants and the SEC. To this end, the Participants created a website to update the public on the progress of the CAT NMS Plan, published a request for comment on multiple issues related to the Plan, held multiple public events to inform the industry of the progress of the CAT and to address inquiries, and formed, and later expanded, a DAG to solicit more input from a representative industry group.[157]

The DAG included representatives of Participants and Industry Members and conducted meetings to discuss, among other things, technical and operational aspects the Participants were considering for the Plan. The Participants issued press releases soliciting participants for the DAG, and a wide spectrum of firms was deliberately chosen to provide insight from various industry segments affected by CAT. The DAG meetings included discussions of topics such as option market maker quote reporting, requirements for capturing Customer IDs, timestamps and clock synchronization, reporting requirements for order handling scenarios, costs and funding, error handling and corrections, and potential elimination of systems made redundant by the CAT. From the inception of the DAG through September 2014, the DAG participated in 36 meetings, as well as a variety of DAG subcommittee meetings.

(iv) Request for Exemption From Certain Requirements Under Rule 613

Following multiple discussions between the Participants and both the DAG and the bidders, as well as among the Participants themselves, the Participants recognized that some provisions of Rule 613 would not permit certain solutions to be included in the Plan that the Participants, in coordination with the DAG, determined advisable to effectuate the most efficient and cost-effective CAT. Specifically, ''the SROs reached the conclusion that additional flexibility in certain of the minimum requirements specified in Rule 613 would allow them to propose a more efficient and cost-effective approach without adversely affecting the reliability or accuracy of CAT Data, or its security and confidentiality.'' [158] Consequently, the Participants submitted a request for exemptive relief from certain provisions of Rule 613 regarding: (1) options market maker quotes; (2) Customer-IDs; (3) CAT-Reporter-IDs; (4) CAT-Order-IDs on allocation reports; and (5) timestamp granularity.[159] The Participants filed two supplements to the request for exemptive relief.[160]

After reviewing the exemptive request, the Commission determined that it was appropriate in the public interest and consistent with the protection of investors to grant the requested exemptive relief.[161] In granting the exemptive relief, the Commission stated:

> [T]he Commission is persuaded to provide flexibility in the discrete areas discussed in the Exemption Request so that the alternative approaches can be included in the CAT NMS Plan and subject to notice and comment. Doing so could allow for more efficient and

[153] *See* Securities Exchange Act Rel. No. 70892 (Nov. 15, 2013), 78 FR 69910 (Nov. 21, 2013).

[154] *See* Selection Plan Approval Order.

[155] Selection Plan Approval Order at 11160.

[156] *See* CAT NMS Plan Approval Order at 84737.

[157] *See* Section D(11) of Appendix C of the CAT NMS Plan.

[158] Securities Exchange Rel. No. 77265 (Mar. 1, 2016), 81 FR 11856 (Mar. 7, 2016) (''2016 Exemptive Order'').

[159] Letter from Robert Colby, FINRA, on behalf of the SROs, to Brent J. Fields, Secretary, Commission (Jan. 30, 2015).

[160] *See* Letter from Robert Colby, FINRA, on behalf of the SROs, to Brent J. Fields, Secretary, Commission (Apr. 3, 2015); Letter from the SROs to Brent J. Fields, Secretary, Commission (Sept. 2, 2015).

[161] *See* 2016 Exemptive Order.

cost-effective approaches than otherwise would be permitted. The Commission at this stage is not deciding whether the proposed approaches detailed below are more efficient or effective than those in Rule 613. However, the Commission believes the proposed approaches should be within the permissible range of alternatives available to the SROs.[162]

The Commission further stated that the requested exemptive relief is consistent with the protection of investors. The Commission noted that:

> Doing so will provide the public an opportunity to consider and comment on whether these proposed alternative approaches would indeed be more efficient and cost-effective than those otherwise required by Rule 613, and whether such approaches would adversely affect the reliability or accuracy of CAT Data or otherwise undermine the goals of Rule 613. Moreover, if—as the SROs represent—efficiency gains and cost savings would result from including the proposed approaches in the CAT NMS Plan without adverse effects, then the resultant benefits could potentially flow to investors (*e.g.,* lower broker-dealer reporting costs resulting in fewer costs passed on to Customers).[163]

The Participants incorporated the exemptive relief into the proposed CAT NMS Plan, which was noticed for comment, and the Commission ultimately approved the CAT NMS Plan with the more efficient and cost-effective alternative approaches described in the exemptive relief. Accordingly, the Participants believe that the costs incurred in developing the exemptive request were critical to the creation of a better CAT than was originally contemplated by Rule 613, and therefore should be recoverable as part of Historical CAT Assessment 1A.

(v) Request for Extensions for Filing the CAT NMS Plan

Rule 613(a)(1) under Regulation NMS required the Participants to jointly file the CAT NMS Plan on or before April 28, 2013, less than a year after the adoption of Rule 613. In recognition of the complexity of the project to create the CAT NMS Plan as well as industry interest in limiting or eliminating certain requirements of Rule 613 (*e.g.,* addressing the reporting of options market maker quotes), the Participants requested two extensions of the deadline to file the CAT NMS Plan. The Participants described the need for additional time as follows:

> The SROs stated in their Request Letter that they do not believe that the 270-day time period provided for in Rule 613(a)(1) provides sufficient time for the development of the RFP, formulation and submission of bids, and review and evaluation of such bids. The SROs also stated that they believe additional time beyond the 270 days provided for in Rule 613(a)(1) is necessary in order to provide sufficient time for effective consultation with and input from the industry and the public on the proposed solution chosen by the SROs for the creation of the consolidated audit trail at the conclusion of the RFP process and the NMS plan itself.[164]

In recognition of the need for additional time to refine the technical description of and requirements for the CAT and to allow for additional evaluation of the proposed cost and funding considerations, the SEC granted two extensions of this deadline.[165] The SEC determined that both extensions were appropriate, in the public interest, and consistent with the protection of investors.[166] In reaching this conclusion, the Commission stated that ''it understands that the creation of a consolidated audit trail is a significant undertaking and that a proposed NMS plan must include detailed information and discussion about many things.'' [167] The SEC also noted the following:

> This additional time to complete the RFP process should allow the SROs to engage in a more thoughtful and comprehensive process for the development of an NMS plan. In this regard, the Commission notes that the additional time to solicit comment from the industry and the public at certain key points in the development of the NMS plan could identify issues that can be resolved earlier in the development of the consolidated audit trail and prior to filing the NMS plan with the Commission.[168]

Given the Commission's recognition of the reasonableness and value of the extension of the deadline to file the CAT NMS Plan, the Participants believe that the costs incurred in developing the extension request were important to the process of developing the CAT NMS Plan, and therefore should be recoverable as part of Historical CAT Assessment 1A.

(vi) Submission and Approval of the CAT NMS Plan

After extensive analyses and discussions with the DAG, bidders, market participants and the SEC staff, the Participants finalized the draft of the CAT NMS Plan and filed the CAT NMS Plan with the SEC on September 30, 2014. Following additional discussions, the Participants filed several amendments to the CAT NMS Plan during 2015 and 2016. With these additional changes, the SEC published the CAT NMS Plan for notice and comment in May 2016.[169] Following the comment period, the SEC approved the Plan in November 2016.[170]

(vii) Legal Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include legal costs of $3,196,434. The legal services were performed by WilmerHale. The selection considerations and fees for WilmerHale were described in detail above. Prior to the creation of CAT LLC, WilmerHale was engaged to represent the consortium of SROs, not the individual Participants. For administrative purposes, FINRA agreed to receive such legal bills, although such costs were shared among the Participants. Therefore, the legal costs incurred with respect to WilmerHale do not include legal costs incurred by the individual Participants. These pre-formation legal costs are described in detail above and are further described below:

- Analyzed various legal matters associated with the Selection Plan and drafted an amendment to Selection Plan;
- Assisted with the RFP and bidding process for the CAT Plan Processor;
- Analyzed legal matters related to the DAG;
- Drafted the CAT NMS Plan, analyzed various items related to the CAT NMS Plan, and responded to comment letters on the CAT NMS Plan;
- Provided legal support for the formation of the legal entity, the governance of the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG, and governance support during the transition to the new governance structure under the CAT NMS Plan;
- Drafted exemptive requests;
- Provided interpretations related to the CAT NMS Plan;
- Provided support with regard to discussions among the exchanges, FINRA and other third parties, such as Deloitte;
- Provided tax advice with regard to CAT's status as a tax-exempt organization; and

[162] *Id.* at 11857.

[163] *Id.*

[164] Securities Exchange Act Rel. No. 69060 (Mar. 7, 2013),78 FR 15771, 15772 (Mar. 12, 2013) (''March 2013 Exemptive Order'').

[165] *See* March 2013 Exemptive Order; Securities Exchange Act Rel. No. 71018 (Dec. 6, 2013), 78 FR 75669 (Dec. 12, 2013) (''December 2013 Exemptive Order'').

[166] March 2013 Exemptive Order at 15772; December 2013 Exemptive Order at 75670.

[167] March 2013 Exemptive Order at 15772.

[168] *Id.* at 15773.

[169] *See* Securities Exchange Act Rel. No. 77724 (Apr. 27, 2016), 81 FR 30614 (May 17, 2016).

[170] *See* CAT NMS Plan Approval Order.

• Provided support with regard to discussions with the SEC and its staff, including with respect to addressing interpretive and implementation issues.

(viii) Consulting Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include consulting costs of $10,589,273. The consulting services were performed by Deloitte. The selection considerations and fees for Deloitte were described in detail above. Prior to the creation of CAT LLC, for administrative purposes, Deloitte was engaged by FINRA to provide consulting services related to CAT, but the costs were shared by the consortium of SROs per agreement. Therefore, the consulting costs incurred with respect to Deloitte do not include consulting costs incurred by the individual Participants. The pre-formation consulting costs include the following:

• Established and implemented program operations for the CAT project, including the program management office and workstream design;

• Assisted with the Plan Processor selection process, including but not limited to, the development of the RFP and the bidder evaluation process, and facilitation and consolidation of the Participants' independent reviews;

• Assisted with the development and drafting of the CAT NMS Plan, including conducting cost-benefit studies, reviewing technical requirements of other NMS plans, analyzing OATS and CAT requirements, and drafting appendices to the Plan;

• Provided governance support to the CAT, including governance support prior to the adoption of the CAT NMS Plan, which involved support for the full committee of exchanges and FINRA as well as subcommittees of this group (*e.g.,* Joint Subcommittee Group, Technical, Industry Outreach, Cost and Funding, and Other Products) and the DAG;

• Provided support for updating the SEC on the progress of the development of the CAT;

• Provided support for industry outreach sessions, including with regard to program design and agenda development, program support and logistics and coordination; and

• Provided support in fact finding, drafting content and meeting coordination for WilmerHale with regard to the CAT and the development of the CAT NMS Plan.

Such Pre-Formation Costs did not include costs related to the Chair of the CAT NMS Plan Operating Committee, as the CAT NMS Plan had not yet been adopted.

(ix) Public Relations Costs Incurred Prior to the Effective Date of the CAT NMS Plan

The Pre-Formation Costs include public relations costs of $57,174. The public relations services were performed by Peppercomm. The selection considerations and fees for Peppercomm are described in detail above. The costs related to Peppercomm were shared among the SROs. Therefore, the public relations costs do not include public relations costs incurred by the individual Participants. The pre-formation public relations costs include services related to communications with the public regarding the CAT, including monitoring developments related to the CAT (*e.g.,* congressional efforts, public comments and reaction to proposals, press coverage of the CAT), reporting such developments to CAT LLC, and drafting and disseminating communications to the public regarding such developments as well as reporting on developments related to the CAT.

(B) Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs related to cloud hosting services as a part of Historical CAT Assessments. CAT LLC believes that the costs related to cloud hosting services described in detail above are reasonable and appropriate given the strict data processing timelines and storage requirements imposed by the Commission-approved CAT NMS Plan and should be recoverable as a part of Historical CAT Assessment 1A.

(i) Reasonableness of AWS Costs Given the Requirements of the CAT NMS Plan

CAT LLC believes that the costs for the cloud hosting services are reasonable, both in terms of the level of the fees paid by CAT LLC for cloud hosting services provided by AWS and the scope of the services performed by AWS for CAT LLC. CAT LLC believes that both the scope and amount of the costs for cloud hosting services are reasonable given the current requirements of the CAT NMS Plan adopted pursuant to Rule 613, including the strict data processing timeline, storage and other technical requirements under the Commission-approved CAT NMS Plan.

CAT LLC believes that the level of fees for the cloud hosting services is reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.

CAT LLC also believes that the scope of services provided by AWS for the CAT are appropriate given the current requirements of the Commission-approved CAT NMS Plan. As described above, the cloud hosting services costs reflect a variety of factors including, among other things:

• *Breadth of Cloud Activities.* AWS was engaged by FCAT, the Plan Processor, to provide a broad range of services to the CAT, including data ingestion, data management, and analytic tools. Services provided by AWS necessary to the CAT include storage services, databases, compute services, and other services (such as networking, management tools and development operations (''DevOps'') tools). AWS also was engaged to provide the various environments for CAT, such as the development, performance testing, test and production environments, which are required by the CAT NMS Plan.

• *High Data Volume.* The cost for AWS services for the CAT is a function of the volume of CAT Data. While it is not linear, the greater the amount of CAT Data, the greater the cost of AWS services to the CAT. The data volume handled by AWS now far exceeds the original volume estimates for the CAT.

• *Plan Requirements.* The cost for AWS services also reflects the technical requirements necessary to meet the stringent performance and other requirements for processing CAT Data. These Plan-dictated processing timelines, storage, testing, security and other technical requirements are significant drivers of AWS costs.

• *Cost Avoidance Efforts.* CAT LLC and FCAT have engaged in ongoing efforts to seek to avoid and minimize AWS costs where permissible under the Plan. Accordingly, these cost avoidance efforts have limited the extent of AWS costs.

In addition, various requirements of the CAT NMS Plan adopted pursuant to Rule 613 contribute to the significant cloud hosting services costs, and that various Plan requirements could be amended or removed without affecting the regulatory purpose of the CAT. Indeed, CAT LLC has repeatedly sought exemptive relief and filed amendments to the CAT NMS Plan, and has even filed suit against the Commission, to seek to revise or eliminate certain costly requirements related to the CAT. However, despite these efforts, absent the Commission granting exemptive relief or approving cost savings amendments to the CAT NMS Plan, CAT LLC, the Participants and Industry Members are all required to comply with such requirements.

(ii) Effect of CAT Design on CAT Costs

(a) Efficient CAT Design

CAT is reasonably designed to efficiently and effectively utilize cloud computing and storage services, given the requirements of the Commission-approved CAT NMS Plan, including requirements related to security, operational reliance and quality assurance, and maintainability.

The Plan Processor uses state-of-the-art software that meets the strict security standards of the CAT NMS Plan. CAT utilizes a big data processing framework that is extensively used by large data processing companies, such as Apple, Meta, Netflix, IBM and Google. As such, it has substantial commercial support and support in the open-source community. It is also well suited for use with regard to iterative types of algorithms and query functions and analytics that the CAT requires, and it provides the heightened security necessary for the CAT.

The development and implementation of the design of CAT is not and has not been static. CAT LLC and the Plan Processor are always evaluating new innovations and service offerings from AWS and other providers to seek to maximize efficiency and cost avoidance while still satisfying the requirements of the CAT NMS Plan. These efforts have led to substantial savings to date. The cloud hosting costs for 2023 were less than the cloud hosting costs for 2022 by $8 million despite processing seven trillion more events in 2023 due to the efficiency and cost avoidance efforts for cloud hosting services. For example, when AWS introduced new storage options, FCAT adopted the cost-efficient new storage option after establishing that the new offering would satisfy the security and other standards of the CAT NMS Plan. This change led to millions of dollars of savings in storage costs. Similarly, when AWS introduced a new compute processor, FCAT adopted this new compute processor, which lead to millions of dollars in savings in compute costs. However, in other cases, new cloud technology developments could not be implemented in CAT because they would not satisfy the security or other requirements of the CAT NMS Plan.

When evaluating the design of the CAT, it must be kept in mind that the CAT is not a typical commercial technology project. The ability to make use of technology approaches that may lead to cost avoidance is also subject to the restrictive requirements of the CAT NMS Plan, such as processing timeframes, requirements for retention of data versions, query requirements, and security standards. Because such requirements are set forth in the CAT NMS Plan, any modification of such requirements are subject to the time-consuming process of amending the CAT NMS Plan or seeking an exemption from the relevant requirement. For example, CAT LLC recently has filed an amendment to address several of these expensive Plan requirements.[171]

(b) CAT Was Designed to Minimize Industry Member Effort

The CAT System also was designed to minimize the extent to which Industry Members would need to alter their systems to report to CAT. During the design process, Industry Member groups argued that it would make more sense financially for the CAT to accommodate differences in industry systems, than for all Industry Members to change their systems. Moreover, such design choices would facilitate consistency, uniformity and accuracy in reporting. Requiring the CAT to make such accommodations may increase CAT costs while accommodating CAT Reporters.

Based on the requirements in the CAT NMS Plan and/or in response to industry requests for functionality to be embedded with the Plan Processor to streamline or limit Industry Member system changes, the CAT has been designed to limit the effect on Industry Members. The following provides examples of such accommodations:

- *Industry Member Reporting.* In light of the complexity of Industry Member market activity, the CAT's order reporting and linkage scenarios document for Industry Members is over 800 pages in length, addressing nearly 200 scenarios.[172] The Industry Member Technical Specifications allow for dozens of specific event types, which drive complexity for the Plan Processor, but streamline reporting for Industry Members. Furthermore, the Plan Processor greatly expanded Industry Member linkage requirements to support, among other things, child events and supplemental events, allowing for ''stateless as-you-go'' and ''batch end-of-day'' reporting when all data is available. Accordingly, CAT takes on the significant cost and effort of providing the required linkages between CAT events; correspondingly, Industry Members are not required to perform this costly task.
- *File Submission Process.* The CAT was designed to accommodate the varying needs of CAT Reporters with regard to the file submission process. For example, in a 2018 letter, FIF stated that ''[t]he SFTP-based submission process is cumbersome, exposes industry members to unnecessary complexity, and puts the burden of support on the CAT Reporter rather than imbedding more functionality into the Plan Processor.'' [173] Currently, FCAT provides two mechanisms for submitting files: SFTP via a private network, and the Web via Reporter Web Portal.
- *Error Corrections.* The industry also emphasized the need for the CAT to provide error correction tools and functionalities to identify, rectify and re-submit corrections within the required timeframe. For example, FIF stated in a 2018 letter the following:

> To be clear, if OATS-like error correction tools are not made available on Day 1, hundreds of firms will be required to create and test their own tools or obtain vendor alternatives prior to the CAT Go-Live Date. Proprietary tools will require additional system builds, access to and ingestion of CAT data to perform system validation, and testing which will further stress the limited number of subject matter experts (''SMEs'') dedicated to the implementation of CAT reporting. Should this occur, inevitably firms (especially small firms who lack the necessary IT staff to write code and develop proprietary systems), may be put in the position of passing onto investors the cost required to build hundreds of redundant systems.[174]

CAT provides various tools to help Industry Members identify and rectify errors.

- *Data Ingestion Format.* The industry also recommended that CAT adopt a flexible input format that provides an option for Industry Members to submit data in formats that are already in use to reduce costs and potential reporting errors. For example, FIF argued the following:

> FIF CAT WG is not proposing a specific format; rather, we are proposing flexibility of input formats which includes support of existing formats (*e.g.,* OATS, FIX) as well as a baseline specification where all fields are defined, and normalized. The input formats must be clearly and thoroughly defined in Technical Specifications, including FAQs.
>
> Mandating a uniform format for reporting data to the CAT simplifies the task for the Central Repository of consolidating/storing data, but it puts the burden on each CAT

[171] *See, e.g.,* Securities Exchange Act Rel. No. 99938 (Apr.10, 2024), 89 FR 26983 (Apr. 16, 2024); Letter from Brandon Becker, CAT NMS Plan Operating Committee Chair, to Vanessa Countryman, Secretary, Commission (Mar. 27, 2024) (proposing amendments to the CAT NMS Plan for $23 million in annual savings).

[172] *See* CAT Industry Member Reporting Scenarios v.4.10 (Oct. 21, 2022).

[173] Letter from Janet Early, FIF, to Thesys CAT (Mar. 29, 2018).

[174] Letter from Christopher Bok, FIF, to Jay Clayton, Chair, Commission at 4 (Dec. 11, 2018).

Reporter to accurately translate their current (*e.g.,* OATS) reporting information into a uniform CAT interface. However, that is likely to yield more errors because it is very dependent on accurate, complete and timely information (Technical Specifications, FAQs, meta-data, competent CAT help desk) available to CAT Reporters, availability of sophisticated CAT test tools to validate interface protocols, and the skill levels of the estimated 300+ unique CAT Reporters/Submitters during Phase 1 of CAT. Concentrating the responsibility of data conversions with the Central Repository is a reasonable trade-off that should yield fewer errors, and greater accuracy.[175]

CAT provides such a flexible input format.

(c) Effect of Initial Plan Processor Design

The costs for cloud hosting services are appropriate and have not been adversely affected by the original design and approaches of the Initial Plan Processor. FCAT's design costs are the result of the requirements of the Commission-approved CAT NMS Plan.

When FCAT took over as the Plan Processor from Thesys, it utilized certain aspects of the technical specifications created by Thesys in its design. However, FCAT has not maintained aspects of the original design that would not be appropriate for the CAT. FCAT revised and enhanced the original technical specifications of the CAT System to increase its efficiency and efficacy, and to ensure its compliance with the CAT NMS Plan. For example, the Initial Plan Processor's approach utilized many more fields than FCAT's approach, which relies on additional linkages. With the additional linkages, the CAT System takes on more of the CAT-related burdens than the Industry Members. Such an approach serves to facilitate consistency, uniformity and accuracy in reporting.

Moreover, FCAT did not utilize the system built by the Initial Plan Processor; it rebuilt the CAT System based on revised technical specifications. For example, the Initial Plan Processor used an on-premises processing approach which was not geared toward the huge amounts of data stored in the CAT, while FCAT adopted a cloud-based solution in response to such data demands.

Furthermore, given the very short timeframe to develop the CAT System and the prior optimization of certain query tools (*e.g.,* Diver) for regulatory use with significant amounts of data, FCAT determined to rely upon certain existing FINRA tools and adapt them for use with the CAT.

(iii) Consideration of AWS Alternatives

CAT LLC continues to support the selection of AWS as the cloud hosting services provider for CAT given the compliance, operational, and security requirements of the CAT. Independent analyses confirm these conclusions, noting that ''AWS is an excellent choice for either strategic or tactical use and recommends considering AWS for almost all cloud IaaS or IaaS+PaaS scenarios.'' [176] AWS provides the following benefits to CAT, among others:

- *Broad Suitability.* AWS has a long track record of successfully serving cloud customers with mission-critical projects.
- *Proven Scalability.* AWS has demonstrated that it is capable of building and delivering services on a large scale.
- *Track Record of Innovation.* AWS continues to rapidly innovate, both in terms of new domains of capability and at a fundamental level, thereby facilitating innovation for its customers.
- *Resiliency/Dependability.* Another benefit of AWS is its resiliency; it has a strong track record of stable services. As noted in a review of cloud service providers, ''[c]ustomers like to have a broad set of options for resilience and for their cloud providers to have a strong track record of stable services (continuously available, without operational quirks). Only AWS fulfills both desires.'' [177]
- *Technical and Customer Support.* AWS consistently provides high-quality technical and customer support and engagement. Given the size, scope and regulatory importance of CAT, customer support and engagement that CAT has with the highest levels of AWS are very important to the success of the CAT.
- *Scale.* AWS is capable of supporting large-scale solutions, which is critical given the size and magnitude of the CAT.
- *Security.* AWS provides the security features necessary for the CAT.

In addition, the nature of the CAT, including the amount of data it must process and the size of its data footprint, does not allow for a multi-cloud solution as this would be cost prohibitive and greatly increase the security boundary and associated risk profile of the CAT. For example, a multi-cloud hosting option would increase costs, complexity, and risk for operations with regard to, for example, DevOps, production support, and networking. Similarly, with regard to security, a multi-cloud solution would increase risk, including with regard to the need for data transfers between cloud providers and the expansion of the security boundary. With regard to labor, a multi-cloud solution would lose economies of scale due to the need to support unique cloud requirements. Accordingly, the use of a single-cloud solution continues to provide advantages with regard to cost, complexity, and risk. Indeed, ''[t]he best practice is to focus on a single primary strategic provider.'' [178]

Furthermore, if another cloud service provider were determined to be a better match for the CAT at some future date, switching cloud service providers would be a very significant, expensive and time-consuming effort. Such an effort would likely be a 10-to-15-year commitment at a substantial expense. Such a move would require the replication or redesign of the underlying cloud environments (*e.g.,* organizational setup, identify management, accounts, environments, DevOps tooling likes release management/network management), as the new provider likely would not have the same infrastructure and software. Once that process has been completed, an exabyte of CAT data would need to be securely migrated to the new platform.

(C) Funding Model Filings

CAT LLC believes that the recovery of costs related to the development of the funding model is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

Funding the CAT is a critical aspect of Rule 613 and the CAT NMS Plan. Article XI of the CAT NMS Plan describes in detail the requirements for funding the CAT, and the Participants are required to comply with and enforce compliance with the funding requirements of the CAT NMS Plan, just as with other aspects of the Plan. Accordingly, the development and implementation of a funding model for the CAT is as much a part of the requirements of the CAT NMS Plan as the development and operation of the CAT System. CAT LLC sees no reason to distinguish the efforts to develop a funding model from, for example, efforts to develop the CAT System, in seeking to recover reasonable CAT costs.

Moreover, in approving the CAT Funding Model, the Commission

[175] Letter from Mary Lou Von Kaenel, Managing Director, FIF, to Brent Fields, Secretary, Commission at 92 (July 18, 2016), *https://www.sec.gov/comments/4-698/4698-13.pdf.*

[176] *See, e.g.,* Lydia Leong and Adrian Wong, Solution Comparison for Strategic Cloud Integrated IaaS and PaaS Providers (July 28, 2023) (''Strategic Cloud Assessment Article'').

[177] Strategic Cloud Assessment Article.

[178] *Id.*

recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . legal costs.'' [179] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . legal . . . costs.'' [180] In keeping with these provisions, this filing provides a brief description of reasonably budgeted legal costs above. These legal costs include costs related to the development of the CAT Funding Model.

In addition, the legal costs incurred for the assistance in developing the CAT Funding Model are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. As described above, the specialized services were performed by experienced counsel at negotiated rates for such services that reflect both the extent of the services and market rates. Moreover, the scope of the legal costs associated with the development of the funding model reflect the complexity of the task in satisfying the detailed requirements of the CAT NMS Plan, the standards of the Exchange Act, and the many perspectives of the different market constituents potentially affected by or interested in the funding model, including Industry Members, Participants and investors. The many and varied comments by market participants on CAT funding over the years demonstrate the complexity of the task.

(D) Costs Related to Litigation With the SEC

CAT LLC believes that the recovery of legal costs related to the litigation with the SEC regarding the CAT NMS Plan is appropriate, and that the amount and scope of such costs, as described above, are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.[181] Moreover, CAT LLC initiated such litigation, and incurred the related legal costs, because it was critical to address the Commission's interpretations of the CAT NMS Plan. Among other things, such interpretations threatened to impose unnecessary costs on the CAT, which would be borne by the Participants and Industry Members. Indeed, in response to the litigation, the Commission provided exemptive relief that allowed alternative, more cost-effective approaches to the implementation of the CAT. Specifically, in the 2023 exemptive order, the Commission stated:

> The conditional exemptive relief in this Order allows for the implementation of alternative regulatory solutions that continue to advance the regulatory goals that Rule 613 and the CAT NMS Plan were intended to promote, while reducing the implementation and operational costs, burdens, and/or difficulties that would otherwise be incurred by the Participants and Industry Members that must fund the CAT.[182]

CAT LLC believes it is reasonable and appropriate to incur costs to limit the need to incur even greater costs due to certain interpretations of the Plan.

In addition, the legal costs incurred during the litigation are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. As described above, the specialized services were performed by experienced counsel at market rates for such services. As such, the legal costs related to this litigation incurred during the period covered by Historical CAT Assessment 1A were reasonable.

Finally, Industry Members will directly benefit from the result of the litigation because it has addressed CAT NMS Plan requirements that would have imposed significantly greater costs on the CAT. Accordingly, it is reasonable and appropriate that the costs of such litigation be included in Historical CAT Costs 1.

(E) Costs Related to the Initial Plan Processor

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017, which was the date by which Participants were required to begin reporting to the CAT, due to the delay in the commencement of reporting to the CAT. As discussed above, the Participants determined to exclude all CAT costs incurred from November 15, 2017 through November 15, 2018, which includes $37,852,083 in Thesys costs incurred from November 15, 2017 through November 15, 2018 (as well as other CAT costs during this period). The remaining Thesys costs incurred after November 15, 2018 are the $19,628,791 in capitalized developed technology costs for the period from November 16, 2018 through February 2019 incurred in the development of the CAT by the Initial Plan Processor, as well as a transition fee for the transition from the Initial Plan Processor to the successor Plan Processor. The Participants would remain responsible for 100% of these $19,628,791 in costs.

CAT LLC believes that it is appropriate to recover costs related to the services performed by the Initial Plan Processor prior to November 15, 2017. CAT LLC notes that the development and implementation of the CAT System, while unprecedented in scope and design, is like any other large and innovative technology project in that, inevitably, there were adjustments and refinements in the technical approach as the project developed, even with substantial planning efforts and oversight prior to the build. This is even more likely when the project faces a very tight implementation schedule, such as the one imposed by the Commission in Rule 613 and the CAT NMS Plan. However, an adjusted approach does not mean that the funds were not valid expenditures and should not be recovered.

The reasonableness of Thesys costs should be evaluated by the Commission as of the time they were incurred, not in hindsight. As detailed above, the Commission concluded in 2016 that ''the competitive bidding process to select the Plan Processor is a reasonable and effective way to choose a Plan Processor,'' and that ''the process set forth in the Selection Plan should be permitted to continue.'' [183] Following this process, the Participants notified the Commission of the selection of Thesys as the Initial Plan Processor on January 17, 2017.[184] At the time, neither the Commission nor the industry argued that the selection of the Initial Plan Processor was unreasonable or otherwise inconsistent with the CAT NMS Plan, nor did they predict the selection would result in unanticipated delays in the implementation of the CAT System. On the contrary, on April 4, 2017, the President of SIFMA wrote that ''SIFMA looks forward to commencing work with the SROs and Thesys.'' [185]

As noted in the CAT Funding Model Approval Order, the Commission

[183] CAT NMS Plan Approval Order at 84737.

[184] Letter from the Participants to Brent J. Fields, Secretary, SEC (Jan. 18, 2017), *https://www.sec.gov/divisions/marketreg/rule613-info-notice-of-plan-processor-selection.pdf.*

[185] Letter from Kenneth E. Bentsen, Jr., SIFMA, to Participants re: Selection of Thesys as CAT Processor (Apr. 4, 2017), *https://www.sifma.org/wp-content/uploads/2017/05/SIFMA-Submits-Comment-Letter-to-SRO-on-the-selection-of-Thesys-as-the-CAT-Processor.pdf.*

recognized that ''[t]he CAT NMS Plan contemplates that the costs of the CAT are to be allocated between the Participants and Industry Members.'' [186] If the CAT Funding Model had existed on Day 1, the risk of any unanticipated costs or challenges associated with the Initial Plan Processor would have been fairly and reasonably shared among the Participants and Industry Members on an ongoing basis. Given that the Commission concluded in 2012 that the costs of the CAT would be shared by the Participants and Industry Members, it is not fair or reasonable to determine in hindsight that all of the risk involved in developing the CAT should be allocated entirely to the Participants.

(F) CAIS Implementation Costs

CAT LLC believes that the recovery of CAIS-related costs is appropriate, and that the amount and scope of such costs, as described above, are reasonable, and that the reasonableness of historical costs should be evaluated by the Commission as of the time they were incurred, not in hindsight.

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable CAIS operating costs as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . CAIS operating fees.'' [187] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . CAIS operating fees.'' [188] In keeping with these provisions, this filing provides a brief description of reasonably budgeted CAIS operating fees.

In addition, CAT LLC determined that the CAIS operating fees described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. The ''CAIS Operating Costs'' for Historical CAT Costs 1 total $9,480,587, with Pre-FAM costs of $2,072,908, FAM 1 costs of $254,998, FAM 2 costs of $1,590,298, and FAM 3 costs of $5,562,383. As described above, the CAIS operating fees were incurred with regard to two categories of CAIS-related efforts: (1) the acceleration of the reporting of LTIDs; and (2) the development of the CAIS Technical Specifications and the building of CAIS. These two categories of costs are discussed in more detail below.

(i) LTID Reporting

During the period covered by Historical CAT Assessment 1A, the CAIS operating costs included costs related to the acceleration of the reporting of LTIDs earlier than originally contemplated during this period at the request of the SEC and in accordance with exemptive relief granted by the SEC.[189] As the SEC approved in this exemptive relief, the Participants proposed ''to require the reporting of LTIDs to the CAT in Phases 2c and 2d, instead of with the rest of Customer Account Information in Phase 2e, which potentially could result in an earlier elimination of broker-dealer recordkeeping, reporting and monitoring requirements of the Large Trader Rule.'' [190] To implement the reporting of LTIDs to the CAT, the following steps were taken during the period covered by Historical CAT Assessment 1A:

- After FCAT developed the LTID Technical Specifications, the LTID Technical Specifications were published on January 31, 2020, with additional updates provided to the LTID Technical Specifications through April 2021.[191]
- The LTID account information testing environment opened on August 24, 2020.
- The LTID account information reporting production environment opened on December 14, 2020.
- CAT Reporters were required to request their production readiness certification for account information related to LTIDs by the deadline of April 9, 2021.
- The LTID account information reporting for Phases 2a, 2b and 2c for Large Industry Members went live on April 26, 2021.
- The LTID account information reporting for Phases 2d for Large Industry Members went live on December 13, 2021.
- The LTID account information reporting for Phases 2a, 2b, 2c and 2d for Small Industry Members went live on April 26, 2021.

Throughout this project, FCAT and CAT LLC worked closely with the industry on LTID and CAIS reporting. Between December 2019 and December 2021, at least 57 checkpoint calls, webinars, and technical working group meetings with industry representatives were hosted to address issues and to educate CAT Reporters regarding LTID and CAIS reporting.[192]

The LTID reporting project was successfully completed in a timely fashion, and the fees related to the project were reasonable. Accordingly, CAT LLC appropriately seeks to recover such costs via Historical CAT Assessment 1A.

(ii) CAIS Reporting

During the period covered by Historical CAT Assessment 1A, FCAT began the development of the full CAIS Technical Specifications and the building of CAIS. The CAIS Technical Specifications were developed during this period as follows:

- Iterative drafts of the CAIS Technical Specifications were published on June 30, 2020, December 1, 2020, and January 1, 2021.[193]
- The full, final CAIS Technical Specifications were published on January 29, 2021.
- Updated versions of the CAIS Technical Specifications were published throughout 2021.[194]

As discussed above, FCAT and CAT LLC frequently engaged with the industry regarding the development of CAIS, hosting regular checkpoint calls, webinars, and technical working group meetings with industry representatives to address any issues, including addressing the interplay between Industry Members' existing customer systems and CAIS, and to educate CAT Reporters regarding LTID and CAIS reporting. Such engagement was critical to the CAIS development process as the CAIS project was unprecedented in terms of its content, scope and complexity.

During this period, FCAT also commenced the building of the CAIS system in accordance with the CAIS Technical Specifications during the period covered by Historical CAT Assessment 1A. The CAIS system was ready for industry testing shortly after the end of this period in January 2022.

The CAIS Technical Specifications and the CAIS system, as developed during this period, continue to be used. Industry Members have been required to report, and have continuously reported, required data to CAIS on a daily basis

[186] CAT Funding Model Approval Order at 13421.

[190] *Id.* at 23078–79, n.70.

[191] The LTID Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (*https://www.catnmsplan.com/specifications/im*).

[192] Such contact points with the industry are described in detail on the Events web page of the CAT website (*https://www.catnmsplan.com/events*).

[193] The CAIS Technical Specifications, including original drafts and updated versions, are available on the Industry Member Specifications page of the CAT website (*https://www.catnmsplan.com/specifications/im*).

[194] Six updated versions of the CAIS Technical Specifications were published during 2021, in March, May, June, August, October and December.

since November 7, 2022, consistent with interim reporting obligations. The CAIS system accepts and validates the CAIS data submitted by Industry Members and provides Industry Members with initial feedback on data errors. In light of the unprecedented nature of the CAIS system, certain changes to the system, such as changes related to error corrections and the CAIS regulatory portal, were necessary to finalize CAIS reporting. FCAT worked to address these remaining issues,[195] and, as of May 31, 2024, FCAT indicated that it had achieved the final CAIS reporting milestone. Accordingly, CAT LLC appropriately seeks to recover CAIS operating costs via Historical CAT Assessment 1A.

(G) Public Relations Costs

CAT LLC believes that the recovery of public relations costs is appropriate and that the amount and scope of such costs, as described above, are reasonable.

The Commission has long recognized that external public relations costs are reasonably associated with creating, implementing and maintaining the CAT. In the CAT NMS Plan Approval Order, the Commission estimated that the Participants had collectively spent approximately $2,400,000 in preparation of the CAT NMS Plan on external public relations, legal, and consulting costs, and estimated that the Participants would continue to incur external public relations costs associated with maintaining the CAT upon approval of the CAT NMS Plan.[196]

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover reasonable costs for public relations services as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . public relations costs.'' [197] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . public relations costs.'' [198] In keeping with these provisions, a brief description of reasonable public relations costs are described above.

In addition, CAT LLC determined that the public relations costs described above are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A. The services performed by the public relations firms through 2021 were limited in scope to assist CAT LLC, which has no employees of its own, to be better positioned to understand and address CAT matters to the benefit of all market participants and to communicate on important CAT topics with the public. In addition, the costs for these services were appropriately limited. During the 10-year period covered by Historical CAT Assessment 1A, the average cost per year for these services was approximately $36,000.

(H) Legal Costs Related to the Limitation of Liability Provision in CAT Reporter Agreements

CAT LLC believes that the recovery of legal costs related to the limitation of liability provision, including costs related to the proceedings before the SEC and costs related to the proposed amendment to the Consolidated Audit Trail Reporter Agreement and the Consolidated Audit Trail Reporting Agent Agreement (the ''Reporting Agreements'') is appropriate and that the amount and scope of such costs as described above are reasonable.

As a preliminary matter, as discussed above, the Commission recognized that it is appropriate to recover reasonable costs for legal services as a part of Historical CAT Assessments.[199] In addition, CAT LLC determined that the legal costs incurred for the assistance with regard to the limitation of liability provisions are reasonable in both amount and scope and should be recoverable as a part of Historical CAT Assessment 1A.

Moreover, it is critical that CAT LLC, which has no employees of its own, have the ability to fund a legal defense in litigation and other legal proceedings against it. In response to CAT LLC requiring Industry Members to agree to the limitation of liability provision to submit data to the CAT, SIFMA filed an application for review of actions taken by CAT LLC and the Participants pursuant to Sections 19(d) and 19(f) of the Exchange Act. Contemporaneously with the filing of this proceeding, SIFMA moved for a stay of the requirement that Industry Members sign a Reporter Agreement, or in the alternative, asked the Commission to further delay the launch of CAT reporting on June 22, 2020. CAT LLC must have the resources to defend itself from litigious actions by others, like these.

Although a limitation of liability provision ultimately was not adopted as proposed, it was a reasonable provision to propose for the CAT Reporter Agreements, given that such provisions are in accordance with industry norms. Limitations of liability are ubiquitous within the securities industry and have long governed the economic relationships between self-regulatory organizations and the entities that they regulate. For example, U.S. securities exchanges have adopted rules to limit their liability for losses that Industry Members incur through their use of exchange facilities.[200] Similarly, FINRA's former order audit trail, OATS, which has functioned as an integrated audit trail of order, quote, and trade data for equity securities, required FINRA members to acknowledge an agreement that includes a limitation of liability provision.[201] In addition, such a provision was intended to ensure the financial stability of the CAT. Accordingly, it was reasonable for CAT LLC to propose the use of such a provision.[202]

Furthermore, as described above, the specialized services were performed by experienced counsel at market rates for such services. Accordingly, the legal costs for the efforts related to the limitation of liability provision were reasonable.

(I) Costs for the Chair of the CAT Operating Committee

CAT LLC believes that the recovery of consulting costs related to the Chair of the CAT Operating Committee is appropriate and that the amount and scope of such costs are reasonable.

As a preliminary matter, the selection of the Chair of the Operating Committee complies with the requirements of Section 4.2 of the CAT NMS Plan. The initial Chair that served during the period covered by Historical CAT Assessment 1A was designated by a Participant as the Participant's alternate voting member. Accordingly, the Chair is a representative of the Participants, as required by the CAT NMS Plan.

In addition, in approving the CAT Funding Model, the Commission

[195] *See, e.g.,* CAT Q4 2023 Quarterly Progress Report (Jan. 30, 2024) (*https://www.catnmsplan.com/sites/default/files/2024-01/CAT-Q4-2023-QPR.pdf*).

[196] CAT NMS Plan Approval Order at 84917–18.

[197] Section 11.1(a)(i) of the CAT NMS Plan.

[198] Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[199] *See* Sections 11.1(a)(i) and 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[200] *See, e.g.,* NASDAQ Equities Rule 4626.

[201] FINRA Rule 1013(a)(1)(R) requires all applicants for FINRA Membership to acknowledge the FINRA Entitlement Program Agreement and Terms of Use, which applies to OATS. Industry Members click to indicate that they agree to its terms—including its limitation of liability provision—every time they access FINRA's OATS system to report trade information (*i.e.,* repeatedly over the course of a trading day for many Industry Members).

[202] *See* Letter from Michael Simon, Chair, CAT Operating Committee, to Vanessa Countryman, Secretary, Commission (Dec. 18, 2020).

recognized that it is appropriate to recover reasonable costs for consulting as a part of Historical CAT Assessments. As approved by the SEC, the CAT NMS Plan states that ''the reasonably budgeted CAT costs shall include . . . consulting . . . '' costs.[203] In addition, the CAT NMS Plan also requires Participants to include in their fee filings ''a brief description of the amount and type of the Historical CAT Costs, including . . . consulting'' [204] costs. In keeping with these provisions, a brief description of reasonable consulting costs is included in this filing, and such reasonable consulting costs include the costs related to the Chair position.

The Participants determined that the position of the Chair was a critical role for the implementation of the CAT, and an independent Chair would appropriately consider and address the views of each of the Participants. The Participants also determined that it was important to have a Chair with a strong background regarding issues related to the regulatory obligations of self-regulatory organizations, including their obligations under national market system plans. The compensation paid to the Chair is appropriate for a person with such background and skills. The average annual amount paid to the Chair from 2017 through the end of FAM 3 was $292,733.30. Separate from the Chair, CAT LLC relies upon a Leadership Team of representatives of the SROs to oversee the day-to-day implementation of the CAT NMS Plan. CAT LLC does not compensate any member of the Leadership Team.

(11) Fee Implementation Assistance for Industry Members

(A) Reconciliation of CAT Invoices

(i) Reconciliation of CAT Invoices to Underlying Trades Provided by CAT

CAT LLC understands that there are three types of reconciliation processes related to the invoices:

- *Reconciliation of CAT Invoices to Underlying Trades:* Reconciling the CAT invoice amount to the underlying trades provided by CAT;
- *Matching Trades to Books and Records:* Providing the means to match the underlying trades provided by CAT with CAT invoices to other books and records independently maintained by individual CAT Reporters (*e.g.,* exchange trade journals/acknowledgements) and data sources of self-regulatory organizations independent of CAT; and
- *Order Originator Identification:* Providing the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices, which would facilitate firms' ability to pass through CAT Fees to their customers. As discussed further below, CAT LLC only considers the first type of process to be a ''reconciliation'' and the only type of process that is required under the CAT NMS Plan. CAT LLC provides the means to reconcile the CAT invoice amount to the underlying trades provided by CAT.

The CAT NMS Plan does not require CAT LLC to facilitate the second type of process: matching underlying trades for a CAT invoice with a firm's internal books and records. CAT LLC has access only to the underlying trades provided by CAT; it does not have access to a firm's internal books and records. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

The CAT NMS Plan also does not require CAT LLC to provide the ability to identify the order originator for the underlying trades for the CAT invoices. Accordingly, the billing guidance and processes do not provide CAT Reporters with the ability to identify the order originator for the underlying trades provided by CAT with CAT invoices. CAT LLC has been working closely with CAT Reporters to explain its billing approach and to address any outstanding billing questions. But, it should not be lost that CAT LLC provides information sufficient to allow CAT Reporters to reconcile CAT invoice amounts with the underlying trades provided by CAT LLC.

(ii) Match the Underlying Trades Provided by CAT With CAT Invoices to Firms' Internal Books and Records Independent of CAT

The CAT NMS Plan does not require CAT LLC to facilitate the matching of underlying trades for a CAT invoice with a firm's internal books and records, which may consist of trading data from various sources external to CAT. Although beyond the requirements of the CAT NMS Plan and involving firm specific considerations, CAT LLC voluntarily has provided guidance and processes to assist CAT Reporters in their efforts to match the underlying trades with their own books and records.

In this regard, it is important to recognize that CAT LLC has developed a billing approach that greatly improves upon existing billing practices for similar regulatory fees (*e.g.,* fees related to Section 31). Accordingly, with the additional information voluntarily provided by CAT LLC, CAT Reporters generally will have sufficient information to match their underlying trades provided by CAT with their own internal books and records that are independent of CAT or to SRO data that is independent of CAT data. However, CAT LLC emphasizes that providing such additional information is not required by the CAT NMS Plan.

To facilitate the introduction of CAT fees, CAT LLC has worked with FCAT to develop an approach to CAT billing that is consistent with existing billing constructs used with regard to Section 31-related sales values fees, subject to certain enhancements. Under this billing approach, FCAT is providing additional linkage elements, not necessarily provided in the Section 31-sales value fee context, to facilitate CAT Reporters' ability to match the underlying trades provided by CAT with their internal books and records and to reduce the complexity of that process. Specifically, FCAT is providing various key elements of the trade itself, such as the tradeID and branch sequence,[205] to CAT Reporters in the trade billing details provided with their CAT invoices (''Additional Trade Details''). As a result, CAT Reporters now have numerous alternative methods for matching a trade with their internal books and records where they previously did not have such matching methods in other fee contexts.

With the Additional Trade Details, CAT LLC and FCAT believe that the overwhelming majority of underlying trades provided by CAT bills can be matched with a CAT Reporter's internal books and records. CAT LLC recognizes that there may be certain cases in which such matching is more difficult given various firm-specific considerations, but believes that such instances are significantly more limited than with regard to the SRO fees charged in relation to Section 31.[206] By providing

[203] Section 11.1(a)(i) of the CAT NMS Plan.

[204] Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan.

[205] *See* CAT Technical Specifications for Billing Trade Details; Trade Details Schema (*https://catnmsplan.com/sites/default/files/2024-02/02.05.24-Billing-Trade-Details-Schema.json*); CAT Billing Scenarios, Version 1.0 (Nov. 30, 2023) (*https://www.catnmsplan.com/sites/default/files/2024-01/01.12.2024-CAT-Billing-Scenarios-v1.0.pdf*).

[206] For years, broker-dealers have faced similar reconciliation issues with regard to SRO fees related to Section 31. Broker-dealers have responded to this issue in the Section 31 context by exercising their

Continued

Additional Trade Details that are not available in other fee contexts, FCAT enhances the Industry Members' ability to match the underlying trades provided with CAT invoices with books and records and SRO data, both of which are independent of CAT data.

(iii) CAT LLC Is Not Required To Facilitate CAT Reporters' Ability To Pass Through Fees to Their Customers

Similar to other regulatory fees, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Accordingly, Historical CAT Assessment 1A does not address the process by which any CAT Reporters may pass through the fee to their customers. Likewise, the CAT billing approach provided by the Plan Processor is designed to address the needs of CAT Reporters with regard to the reconciliation of CAT invoices with the underlying trades provided by CAT LLC with the invoices; they are not designed to address issues related to any pass-through fees. Accordingly, facilitating CAT Reporters' ability to pass through fees to their clients is outside the scope of this fee filing. Nevertheless, as described below, CAT LLC and the Plan Processor have expended significant efforts to provide technical assistance to Industry Members regarding the implementation of Historical CAT Assessment 1A, including providing Additional Trade Details that provide significant details about each underlying trade.

(a) Originating Brokers Versus Executing Brokers

In its approval of the CAT Funding Model, the Commission approved charging CAT fees to the CAT Executing Broker, rather than the originating broker. This fee filing must comply with the requirements of the CAT Funding Model, and, therefore, charges the Historical CAT Assessment 1A to CAT Executing Brokers.

Moreover, charging originating brokers would introduce significant complexity to the billing process from the CAT's perspective, and would increase the costs of implementing CAT fees. Charging the CAT Executing Broker is simple and straightforward, and leverages a one-to-one relationship between billable events (trades) and billable parties, similar to other transaction-based fees. In contrast, for a single trade event, there may be many originating brokers, and each trade must be broken down on a pro-rata basis, to account for one or more layers of aggregation, disaggregation, and representation of the underlying orders. While CAT is indeed designed to capture and unwind complex aggregation scenarios, the data and linkages are structured to facilitate regulatory use, and not a billing mechanism that assesses fees on a distinct set of executed trades; it is not simply a matter of using existing CAT linkages. Furthermore, charging originating brokers would implicate issues related to lifecycle linkage rates, and issues related to corrections, cancellations and allocations, while charging CAT Executing Brokers would avoid such issues.

(b) Identification of Order Originator for Underlying Trades

As noted, the CAT NMS Plan does not address the manner or extent to which CAT Executing Brokers may seek to pass any CAT Fees on to their customers, nor does it impose any obligation on CAT LLC or the Plan Processor to facilitate firms' ability to do so. Nevertheless, the Additional Trade Details provided with regard to the underlying trades on CAT invoices may assist with this process. Like with Section 31-related sales value fees, however, it is not always possible to trace every fee on a transaction back to the originating party. Industry Members have faced these issues under Section 31-related sales values fees for many years.[207] However, with the Additional Trade Details provided under the CAT billing approach, in many cases, CAT Reporters will be able to identify the order originator for the underlying trades provided by CAT with CAT invoices. In some cases, CAT LLC believes that certain issues related to certain types of market activity may implicate CAT Reporters' ability to identify the order originator for a limited set of underlying trades for the CAT invoices. Although CAT LLC does not believe that it is required to address these issues, CAT LLC and FCAT have been carefully researching and analyzing these types of issues as they are identified, and have been working voluntarily to assist CAT Reporters with these issues as necessary and when possible. In addition, CAT LLC intends to continue to provide CAT Reporters with billing guidance through FAQs, CAT Alerts and Helpdesk responses to address outstanding billing questions.

(B) Significant Technical Assistance

CAT LLC has worked with FCAT to provide significant technical assistance to Industry Members to allow the Industry Members to understand how Historical CAT Assessments will be implemented and billed, including webinars, CAT alerts, mock invoices, and responses to questions posed to the FCAT Help Desk.

- *Technical Specifications and Scenarios.* CAT LLC has provided detailed technical documentation for CAT billing, including (1) technical specifications, which describe the CAT Billing Trade Details Files associated with monthly CAT invoices, including detailed information about data elements and file formats as well as access instructions, network and transport options; [208] (2) trade details schemas; [209] and (3) CAT billing scenarios.[210]
- *Industry Webinars.* CAT LLC has hosted two industry webinars specifically dedicated to CAT billing. The first webinar, hosted on September 28, 2023, discussed the operational implementation of the CAT Reporter billing process.[211] The second webinar, hosted on November 7, 2023, provided (1) a demonstration of the CAT Reporter Portal and how to access CAT billing documents, including CAT invoices; and (2) additional information on underlying trade details in relation to the CAT Reporter billing process and an overview of the CAT Contact

discretion as to whether and the manner and extent to which they pass on those fees (*e.g.,* by rounding up its fees to the nearest cent, or decide to charge for, or not charge for, certain transactions, or assess a specific fee or incorporate the costs into other fee programs). *See, e.g.,* Securities Exchange Act Rel. No. 49928 (June 28, 2004), 69 FR 41060, 41072 (July 7, 2004) (noting that broker-dealers may ''over-collect'' Section 31-related fees charged to their clients due to rounding practices, and double-counting with regard to certain transactions).

[207] ''FINRA charges a Regulatory Transaction Fee ('RTF') to industry members to reimburse FINRA for the Section 31 fees that FINRA pays to the Commission. FINRA does not currently provide industry members with the data that industry members require for proper reconciliation of RTF fees. This has been a major problem for the industry for many years.'' Letter from Howard Meyerson, Managing Director, FIF, to Robert Cook, Chief Executive Officer, FINRA at 2 (Dec. 15. 2023) (*https://fif.com/index.php/working-groups/category/271-comment-letters?download=2820:fif-letter-to-finra-on-pass-through-of-finra-cat-fees&view=category*).

[208] CAT Technical Specifications for Billing Trade Details, Version 1.0 r1 (Dec. 8. 2023) (*https://catnmsplan.com/sites/default/files/2023-12/12.07.2023-CAT-Techical-Specifications-for-Billing-Trade-Details-v1.0r1_CLEAN.pdf*).

[210] CAT Billing Scenarios, Version 1.0 (Nov. 30, 2023) (*https://www.catnmsplan.com/sites/default/files/2024-01/01.12.2024-CAT-Billing-Scenarios-v1.0.pdf*).

[211] CAT Billing Webinar, Part 1 (Sept. 28, 2023) (*https://www.catnmsplan.com/events/part-1-cat-billing-webinar*).

Management System.[212] 485 participants and 394 participants attended the two webinars, respectively.

• *CAT Alert.* CAT LLC has published a detailed CAT Alert that describes how FCAT, as the Plan Processor acting on behalf of CAT LLC, will calculate applicable fees, issue invoices to and collect payment from CAT Executing Brokers.[213]

• *Frequently Asked Questions (FAQs).* CAT LLC also has continued to engage with the industry on billing issues by making responses to billing FAQs available on the CAT website. The FAQs address a broad range of frequently asked questions, including, for example, which Industry Members will receive invoices, how fees are calculated, when and how fees are required to be paid, how to access invoices, and how to update the billing contact. To date, responses to 31 FAQs are available on the CAT website, and CAT LLC will provide additional responses to FAQs as warranted.[214]

• *Substantial Past Experience with CAT Billing Processes.* To date, CAT LLC, via FCAT, has billed Industry Members for Historical CAT Assessment 1 and certain Prospective CAT Fees. Industry Members will be billed for Historical CAT Assessment 1A via the same processes established for Historical CAT Assessment 1 and the Prospective CAT Fees. Accordingly, Industry Members have substantial experience with the CAT billing processes.

• *Help Desk Assistance.* CAT LLC also provides detailed, individualized assistance to Industry Members regarding CAT fees and the billing process through the FCAT Help Desk.[215] For example, the Help Desk assisted with 406 cases related to the billing of CAT fees from July 2023 through March 2024.

By providing such detailed and sustained assistance to Industry Members regarding CAT fees and billing, CAT LLC has successfully addressed questions raised by Industry Members regarding the CAT fees and billing processes.

(C) Notice to Industry Members

In keeping with past practice, CAT LLC provided notice of the proposed Historical CAT Assessment 1A via CAT Fee Alert on April 1, 2026,[216] one month prior to the effective date of Historical CAT Assessment 1A on May 1, 2026. Such notice provides Industry Members with sufficient time to address any technological or other requirements necessary for implementing Historical CAT Assessment 1A.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of the Exchange Act. The Exchange believes that the proposed rule change is consistent with Section 6(b)(5) of the Act [217], which requires, among other things, that the Exchange's rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest, and not designed to permit unfair discrimination between customers, issuers, brokers and dealers. The Exchange also believes that the proposed rule change is consistent with the provisions of Section 6(b)(4) of the Act,[218] because it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers. The Exchange further believes that the proposed rule change is consistent with Section 6(b)(8) of the Act ,[219] which requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. These provisions also require that the Exchange be ''so organized and [have] the capacity to be able to carry out the purposes'' of the Act and ''to comply, and . . . to enforce compliance by its members and persons associated with its members,'' with the provisions of the Exchange Act.[220] Accordingly, a reasonable reading of the Act indicates that it intended that regulatory funding be sufficient to permit an exchange to fulfill its statutory responsibility under the Act, and contemplated that such funding would be achieved through equitable assessments on the members, issuers, and other users of an exchange's facilities.

The Exchange believes that this proposal is consistent with the Act because it implements provisions of the Plan and is designed to assist the Exchange in meeting regulatory obligations pursuant to the Plan. In approving the Plan, the SEC noted that the Plan ''is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.'' [221] To the extent that this proposal implements the Plan and applies specific requirements to Industry Members, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Act.

The Exchange believes that the proposed fees paid by the CEBBs and CEBSs are reasonable, equitably allocated and not unfairly discriminatory. First, the Historical CAT Assessment 1A fees to be collected are directly associated with the costs of establishing and maintaining the CAT, where such costs include Plan Processor costs and costs related to technology, legal, consulting, insurance, professional and administration, and public relations costs. The Exchange has already incurred such development and implementation costs and the proposed Historical CAT Assessment 1A fees, therefore, would allow the Exchange to collect certain of such costs in a fair and reasonable manner from Industry Members, as contemplated by the CAT NMS Plan.

The proposed Historical CAT Assessment 1A fees would be charged to Industry Members in support of the maintenance of a consolidated audit trail for regulatory purposes. The proposed fees, therefore, are consistent with the Commission's view that regulatory fees be used for regulatory purposes and not to support the Exchange's business operations. The proposed fees would not cover Exchange services unrelated to the CAT. In addition, any surplus would be used as a reserve to offset future fees. Given the direct relationship between CAT fees and CAT costs, the Exchange believes that the proposed fees are reasonable, equitable and not unfairly discriminatory.

[220] *See* Section 6(b)(1) of the Exchange Act.

[221] CAT NMS Plan Approval Order at 84697.

As further discussed below, the SEC approved the CAT Funding Model, finding it was reasonable and that it equitably allocates fees among Participants and Industry Members. The Exchange believes that the proposed fees adopted pursuant to the CAT Funding Model approved by the SEC are reasonable, equitably allocated and not unfairly discriminatory.

(1) Implementation of CAT Funding Model in CAT NMS Plan

Section 11.1(b) of the CAT NMS Plan states that ''[t]he Participants shall file with the SEC under Section 19(b) of the Exchange Act any such fees on Industry Members that the Operating Committee approves.'' Per Section 11.1(b) of the CAT NMS Plan, the Exchange has filed this fee filing to implement the Industry Member CAT fees included in the CAT Funding Model. The Exchange believes that this proposal is consistent with the Exchange Act because it is consistent with, and implements, the CAT Funding Model in the CAT NMS Plan, and is designed to assist the Exchange and its Industry Members in meeting regulatory obligations pursuant to the CAT NMS Plan. In approving the CAT NMS Plan, the SEC noted that the Plan ''is necessary and appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, to remove impediments to, and perfect the mechanism of a national market system, or is otherwise in furtherance of the purposes of the Act.'' [222] Similarly, in approving the CAT Funding Model, the SEC concluded that the CAT Funding Model met this standard.[223] As this proposal implements the Plan and the CAT Funding Model described therein, and applies specific requirements to Industry Members in compliance with the Plan, the Exchange believes that this proposal furthers the objectives of the Plan, as identified by the SEC, and is therefore consistent with the Exchange Act.

(2) Calculation of Fee Rate for Historical CAT Assessment 1A Is Reasonable

The SEC has determined that the CAT Funding Model is reasonable and satisfies the requirements of the Exchange Act. Specifically, the SEC has concluded that the method for determining Historical CAT Assessments as set forth in Section 11.3 of the CAT NMS Plan, including the formula for calculating the Historical Fee Rate, the identification of the parties responsible for payment and the transactions subject to the fee rate for the Historical CAT Assessment, is reasonable and satisfies the Exchange Act.[224] In each respect, as discussed above, Historical CAT Assessment 1A is calculated, and would be applied, in accordance with the requirements applicable to Historical CAT Assessments as set forth in the CAT NMS Plan. Furthermore, as discussed below, the Exchange believes that each of the figures for the variables in the SEC-approved formula for calculating the fee rate for Historical CAT Assessment 1A is reasonable and consistent with the Exchange Act. Calculation of the fee rate for Historical CAT Assessment 1A requires the figures for the Historical CAT Costs 1, the executed equivalent share volume for the prior twelve months, the determination of Historical Recovery Period 1A, and the projection of the executed equivalent share volume for Historical Recovery Period 1A. Each of these variables is reasonable and satisfies the Exchange Act, as discussed throughout this filing.

(A) Historical CAT Costs 1

The formula for calculating a Historical Fee Rate requires the amount of Historical CAT Costs to be recovered. Specifically, Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan requires a fee filing to provide:

> a brief description of the amount and type of the Historical CAT Costs, including (1) the technology line items of cloud hosting services, operating fees, CAIS operating fees, change request fees, and capitalized developed technology costs, (2) legal, (3) consulting, (4) insurance, (5) professional and administration and (6) public relations costs.

In accordance with this requirement, the Exchange has set forth the amount and type of Historical CAT Costs 1 for each of these categories of costs above.

Section 11.3(b)(iii)(B)(II) of the CAT NMS Plan also requires that the fee filing provide ''sufficient detail to demonstrate that the Historical CAT Costs are reasonable and appropriate.'' As discussed below, the Exchange believes that the amounts set forth in this filing for each of these cost categories is ''reasonable and appropriate.'' Each of the costs included in Historical CAT Costs 1 are reasonable and appropriate because the costs are consistent with standard industry practice, based on the need to comply with the requirements of the CAT NMS Plan, incurred subject to negotiations performed on an arm's length basis, and/or are consistent with the needs of any legal entity, particularly one with no employees.

(i) Technology: Cloud Hosting Services

In approving the CAT Funding Model, the Commission recognized that it is appropriate to recover costs related to cloud hosting services as a part of Historical CAT Assessments.[225] CAT LLC determined that the costs related to cloud hosting services described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. As described above, the cloud hosting services costs reflect, among other things, the breadth of the CAT cloud activities, data volume far in excess of the original volume estimates, the need for specialized cloud services given the volume and unique nature of the CAT, the processing time requirements of the Plan, and regular efforts to seek to minimize costs where permissible under the Plan. CAT LLC determined that use of cloud hosting services is necessary for implementation of the CAT, particularly given the substantial data volumes associated with the CAT, and that the fees for cloud hosting services negotiated by FCAT were reasonable, taking into consideration a variety of factors, including the expected volume of data and the breadth of services provided and market rates for similar services.[226] Indeed, the actual costs of the CAT are far in excess of the original estimated costs of the CAT due to various factors, including the higher volumes and greater complexity of the CAT than anticipated when Rule 613 was originally adopted.

To comply with the requirements of the Plan, the breadth of the cloud activities related to the CAT is substantial. The cloud services not only include the production environment for the CAT, but they also include two industry testing environments, support environments for quality assurance and stress testing and disaster recovery capabilities. Moreover, the cloud storage costs are driven by the requirements of the Plan, which requires the storage of multiple versions of the data, from the original submitted version of the data through various processing steps, to the final version of the data.

Data volume is a significant driver of costs for cloud hosting services. When the Commission adopted the CAT NMS Plan in 2016, it estimated that the CAT would need to receive 58 billion records

[222] CAT NMS Plan Approval Order at 84696.

[223] CAT Funding Model Approval Order at 13481.

[224] *Id.*

[225] Section 11.3(b)(iii)(B)(II)(B)(1) of the CAT NMS Plan.

[226] For a discussion of the amount and type of cloud hosting services fees, *see* Sections 3(a)(2)(B)(i)(a)(I), 3(a)(2)(B)(i)(b)(I), 3(a)(2)(B)(i)(c)(I) and 3(a)(2)(B)(i)(d)(I) above.

per day [227] and that annual operating costs for the CAT would range from $36.5 million to $55 million.[228] Through 2021, the actual data volumes have been five times that original estimate. The data volumes for each period are set forth in detail above.[229]

In addition to the effect of the data volume on the cloud hosting costs, the processing timelines set forth in the Plan contribute to the cloud hosting costs. Although CAT LLC has proactively sought to manage cloud hosting costs while complying with the Plan, including through requests to the Commission for exemptive relief and an amendment to the CAT NMS Plan, stringent CAT NMS Plan requirements do not allow for any material flexibility in cloud architecture design choices, processing timelines (*e.g.,* the use of non-peak processing windows), or lower-cost storage tiers. As a result, the required CAT processing timelines contribute to the cloud hosting costs of the CAT.

The costs for cloud hosting services also reflect the need for specialized cloud hosting services given the data volume and unique processing needs of the CAT. The data volume as well as the data processing needs of the CAT necessitate the use of cloud hosting services. The equipment, power and services required for an on-premises data model, the alternative to cloud hosting services, would be cost prohibitive. Moreover, as CAT was being developed, there were limited cloud hosting providers that could satisfy all the necessary CAT requirements, including the operational and security criteria. Over time more providers offering cloud hosting services that would satisfy these criteria have entered the market. CAT LLC will continue to evaluate alternative cloud hosting services, recognizing that the time and cost to move to an alternative cloud provider would be substantial.

The reasonableness of the cloud hosting services costs is further supported by key cost discipline mechanisms for the CAT—a cost-based funding structure, cost transparency, cost management efforts (including regular efforts to lower compute and storage costs where permitted by the Plan) and oversight. Together, these mechanisms help ensure the ongoing reasonableness of the CAT's costs and the level of fees assessed to support those costs.[230]

(ii) Technology: Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to operating fees as a part of Historical CAT Assessments.[231] CAT LLC determined that the costs related to operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The operating fees include the negotiated fees paid by CAT LLC to the Plan Processor to operate and maintain the system for order-related information and to perform business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the selection of FCAT as the Plan Processor was reasonable and appropriate given its expertise with securities regulatory reporting, after a process of considering other potential candidates.[232] CAT LLC also determined that the fixed price contract, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan and Rule 613, was reasonable and appropriate, taking into consideration a variety of factors, including the breadth of services provided and market rates for similar types of activity.[233] The services performed by FCAT for each period and the costs related to such services are described above.[234]

(iii) Technology: CAIS Operating Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to CAIS operating fees as a part of Historical CAT Assessments.[235] CAT LLC determined that the costs related to CAIS operating fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. The CAIS operating fees include the fees paid to the Plan Processor to operate and maintain CAIS and to perform the business operations related to the system, including compliance, security, testing, training, communications with the industry (*e.g.,* management of the FINRA CAT Helpdesk, FAQs, website and webinars) and program management. CAT LLC determined that the FCAT-negotiated fees for Kingland's CAIS-related services, negotiated on an arm's length basis with the goals of managing costs and receiving services required to comply with the CAT NMS Plan, taking into consideration a variety of factors, including the services to be provided and market rates for similar types of activity, were reasonable and appropriate.[236] The services performed by Kingland for each period and the costs for each period are described above.[237]

(iv) Technology: Change Request Fees

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to change request fees as a part of Historical CAT Assessments.[238] CAT LLC determined that the costs related to change request fees described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. It is common practice to utilize a change request process to address evolving needs in technology projects. This is particularly true for a project like CAT that is the first of its kind, both in substance and in scale. The substance and costs of each of the change requests are evaluated by the Operating Committee, and approved in accordance with the requirements for Operating Committee meetings. In each case, CAT LLC determined that the change requests were necessary to implement the CAT. As described above, the change requests cover various technology changes, including, for example, changes related to CAT reporting, data feeds and exchange functionality. CAT LLC also determined that the costs for each change request were appropriate for the relevant technology change. A description of the change requests for each FAM Period and their total costs is described above.[239] As noted above, the total costs for change requests through FAM Period 3 represent a small percentage of

[239] *See* Sections 3(a)(2)(B)(i)(a)(IV), 3(a)(2)(B)(i)(b)(IV), 3(a)(2)(B)(i)(c)(IV) and 3(a)(2)(B)(i)(d)(IV) above.

Historical CAT Costs 1—that is, 0.25% of Historical CAT Costs 1.

(v) Capitalized Developed Technology Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to capitalized developed technology costs as a part of Historical CAT Assessments.[240] Capitalized developed technology costs include costs related to certain development costs, costs related to certain modifications, upgrades and other changes to the CAT, CAIS implementation fees and license fees. The amount and type of costs for each period are described in more detail above.[241] CAT LLC determined that these costs are reasonable and should be included as a part of Historical CAT Costs 1.

These costs involve the activity of both the Initial Plan Processor and FCAT, as the successor Plan Processor.[242] With regard to the Initial Plan Processor, the Participants utilized an RFP to seek proposals to build and operate the CAT, receiving a number of proposals in response to the RFP. The Participants carefully reviewed and considered each of the proposals, including holding in-person meetings with each of the Bidders. After several rounds of review, the Participants selected the Initial Plan Processor in accordance with the CAT NMS Plan. CAT LLC entered into an agreement with the Initial Plan Processor in which CAT LLC would pay the Initial Plan Processor a negotiated, fixed price fee.[243] In addition, as described above, CAT LLC determined that is was appropriate to enter into an agreement with FCAT as the successor Plan Processor.[244]

(vi) Legal

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover costs related to legal fees as a part of Historical CAT Assessments.[245] CAT LLC determined that the legal costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Given the unique nature of the CAT, the number of parties involved with the CAT (including, for example, the SEC, Participants, Industry Members, and vendors) and the many regulatory issues associated with the CAT, the scope of the necessary legal services is substantial. CAT LLC determined that the scope of the legal services is necessary to implement and maintain the CAT and that the legal rates reflect the specialized services necessary for such a project. When hiring each law firm for a CAT project, CAT LLC interviewed multiple firms, and determined to hire each firm based on a variety of factors, including the relevant expertise and fees. In each case, CAT LLC determined that the hourly fee rates were in line with market rates for the specialized legal expertise. In addition, CAT LLC determined that the total costs incurred for each CAT project were appropriate given the breadth of services provided. The services performed by each law firm for each period and the costs related to such services are described above.[246]

(vii) Consulting

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover consulting costs as a part of Historical CAT Assessments.[247] CAT LLC determined that the consulting costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees [248] and because of the significant number of issues associated with the CAT, the consultants provided assistance in the management of various CAT matters and the processes related to such matters.[249] CAT LLC considered a variety of factors in choosing a consulting firm and determined to select Deloitte after an interview process.[250] CAT LLC also determined that the consulting services were provided at reasonable market rates, as the fees were negotiated annually and comparable to the rates charged by other consulting firms for similar work.[251] Moreover, the total costs for such consulting services were appropriate in light of the breadth of services provided by Deloitte. The services performed by Deloitte and the costs related to such services are described above.[252]

(viii) Insurance

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover insurance costs as a part of Historical CAT Assessments.[253] CAT LLC determined that the insurance costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that it is common practice to have directors' and officers' liability insurance, and errors and omissions liability insurance. CAT LLC further determined that it was important to have cyber security insurance given the nature of the CAT, and such a decision is consistent with the CAT NMS Plan, which states that the cyber incident response plan may include ''[i]nsurance against security breaches.'' [254] In selecting the insurance providers for these policies, CAT LLC engaged in an evaluation of alternative insurers, including a comparison of the pricing offered by the alternative insurers.[255] Based on this analysis, CAT LLC determined that the selected insurance policies provided appropriate coverage at reasonable market rates.[256]

(ix) Professional and Administration

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover professional and administration costs as a part of Historical CAT Assessments.[257] CAT LLC determined that the professional and administration costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. Because there are no CAT employees, all required accounting, financial, tax, cash management and treasury functions for CAT LLC have been outsourced at market rates. In addition, the required annual financial statement audit of CAT LLC is included in professional and administration costs, which costs are also at market rates.

CAT LLC determined to hire a financial advisory firm, Anchin, to assist with financial matters for the CAT. CAT LLC interviewed Anchin as

[256] *Id.*

[257] Section 11.3(b)(iii)(B)(II)(B)(5) of the CAT NMS Plan.

well as other potential financial advisory firms to assist with the CAT project, considering a variety of factors in its analysis, including the firm's relevant expertise and fees.[258] The hourly fee rates for this firm were in line with market rates for the financial advisory services provided.[259] Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Anchin. The services performed by Anchin and the costs related to such services are described above.[260]

CAT LLC also determined to engage an independent accounting firm, Grant Thornton, to complete the audit of CAT LLC's financial statements, in accordance with the requirements of the CAT NMS Plan. CAT LLC interviewed this firm as well as another potential accounting firm to audit CAT LLC's financial statements, considering a variety of factors in its analysis, including the relevant expertise and fees of each of the firms. CAT LLC determined that Grant Thornton was well-qualified for the role given the balance of these considerations.[261] Grant Thornton's fixed fee rate compensation arrangement was reasonable and appropriate, and in line with the market rates charged for these types of accounting services.[262] Moreover, the total costs for such financial advisory services was appropriate in light of the breadth of services provided by Grant Thornton. The services performed by Grant Thornton and the costs related to such services are described above.[263]

The professional and administrative costs also include costs related to the receipt of certain market data from Exegy. After performing an analysis of the available market data vendors to confirm that the data provided met the SIP Data requirements of the CAT NMS Plan and comparing the costs of the vendors providing the required SIP Data, CAT LLC determined to purchase market data from Exegy. Exegy provided the data elements required by the CAT NMS Plan, and the fees were reasonable and in line with market rates for the market data received.[264]

The professional and administrative costs also include costs related to a third party security assessment of the CAT performed by RSM. The assessment was designed to verify and validate the effective design, implementation and operation of the controls specified by NIST Special Publication 800–53, Revision 4 and related standards and guidelines. Such a security assessment is in line with industry practice and important given the data included in the CAT. CAT LLC determined to engage RSM to perform the security assessment, after considering a variety of factors in its analysis, including the firm's relevant expertise and fees. The fees were reasonable and in line with market rates for such an assessment.[265]

(x) Public Relations Costs

In approving the CAT Funding Model, the SEC recognized that it is appropriate to recover public relations costs as a part of Historical CAT Assessments.[266] CAT LLC determined that the public relations costs described in this filing are reasonable and should be included as a part of Historical CAT Costs 1. CAT LLC determined that the types of public relations services utilized were beneficial to the CAT and market participants more generally. Public relations services were important for various reasons, including monitoring comments made by market participants about CAT and understanding issues related to the CAT discussed on the public record.[267] By engaging a public relations firm, CAT LLC was better positioned to understand and address CAT issues to the benefit of all market participants.[268] Moreover, CAT LLC determined that the rates charged for such services were in line with market rates.[269] As noted above, the total public relations costs through FAM Period 3 represent a small percentage of Historical CAT Costs 1—that is, 0.1% of Historical CAT Costs 1.

(B) Total Executed Equivalent Share Volume for the Prior 12 Months

The total executed equivalent share volume of transactions in Eligible Securities for the 12-month period from March 2025 through February 2026 was 5,980,937,549,360.49 executed equivalent shares. CAT LLC determined the total executed equivalent share volume for the prior twelve months by counting executed equivalent shares in the same manner as it will count executed equivalent shares for CAT billing purposes.

(C) Historical Recovery Period 1A

CAT LLC has determined to establish a Historical Recovery Period of 24 months for Historical CAT Assessment 1A and that such length is reasonable. CAT LLC determined that the length of Historical Recovery Period 1A appropriately weighs the need for a reasonable fee rate for Historical CAT Assessment 1A that spreads the Historical CAT Costs over an appropriate amount of time and the need to repay the loans notes to the Participants in a timely fashion. CAT LLC determined that 24 months for Historical Recovery Period 1A would establish a fee rate that is lower than other transaction-based fees, including fees assessed pursuant to Section 31.[270] In addition, in establishing a Historical Recovery Period of 24 months, CAT LLC recognized that the total cost for Historical CAT Assessment 1A was less than the total costs for 2022 and 2023, and therefore it would be appropriate to recover those costs in two years.

(D) Projected Executed Equivalent Share Volume for Historical Recovery Period 1A

CAT LLC has determined to calculate the projected total executed equivalent share volume for the 24 months of Historical Recovery Period 1A by doubling the executed equivalent share volume for the prior 12 months. The Operating Committee determined that such an approach was reasonable as the CAT's annual executed equivalent share volume has increased from prior years (*e.g.,* the executed equivalent share volume for 2024 was 4,295,884,600,069.4) and the Operating Committee believes that it is reasonable to conclude that the annual executed equivalent share volume will remain at the higher level. Accordingly, the projected total executed equivalent share volume for Historical Recovery Period 1A is projected to be 11,961,875,098,720.98 executed equivalent shares.[271]

[258] *See* Section 3(a)(2)(B)(i)(a)(IX) above.

[259] *See* Sections 3(a)(2)(B)(i)(a)(IX), 3(a)(2)(B)(i)(b)(IX), 3(a)(2)(B)(i)(c)(IX) and 3(a)(2)(B)(i)(d)(IX) above.

[270] As the SEC noted in the CAT Funding Model Approval Order, recent Section 31 fees ranged from $0.00007 per share to $0.00072 per share. CAT Funding Model Approval Order at 13469.

[271] This projection was calculated by multiplying 5,980,937,549,360.49 executed equivalent shares by two.

(E) Actual Fee Rate for Historical CAT Assessment 1A

(i) Decimal Places

As noted in the Plan amendment for the CAT Funding Model, as a practical matter, the fee filing for a Historical CAT Assessment would provide the exact fee per executed equivalent share to be paid for each Historical CAT Assessment, and describe the relevant number of decimal places for the fee rate.[272] Accordingly, proposed paragraph (a)(2)(B) of the fee schedule would set forth a fee rate of $0.000002 per executed equivalent share. CAT LLC determined that the use of six decimal places is reasonable as it balances the accuracy of the calculation with the potential systems and other impracticalities of using additional decimal places in the calculation.

(ii) Reasonable Fee Level

The Exchange believes that imposing Historical CAT Assessment 1A with a fee rate of $0.000002 per executed equivalent share is reasonable because it provides for a revenue stream for the Company that is aligned with the remaining Historical CAT Costs 1 and such costs would be spread out over an appropriate recovery period, as discussed above. Moreover, the Exchange believes that the level of the fee rate is reasonable, as it is comparable to other transaction-based fees. Indeed, Historical CAT Assessment 1A is significantly lower than fees assessed pursuant to Section 31 (*e.g.,* $0.00007 per share to $0.00072 per share),[273] and, as a result, the magnitude of Historical CAT Assessment 1A is small, and therefore will mitigate any potential adverse economic effects or inefficiencies. Furthermore, the reasonable fee rate for Historical CAT Assessment 1A further supports CAT LLC's decision to seek to recover the costs described herein.

(3) Historical CAT Assessment 1A Provides for an Equitable Allocation of Fees

Historical CAT Assessment 1A provides for an equitable allocation of fees, as it equitably allocates CAT costs between and among the Participants and Industry Members. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act, including the formula for calculating Historical CAT Assessments as well as the Industry Members to be charged the Historical CAT Assessments.[274] In approving the CAT Funding Model, the SEC stated that ''[t]he Participants have sufficiently demonstrated that the proposed allocation of fees is appropriate.'' [275] Accordingly, the CAT Funding Model sets forth the requirements for allocating fees related to Historical CAT Costs among Participants and Industry Members, and the fee filings for Historical CAT Assessments must comply with those requirements.

Historical CAT Assessment 1A provides for an equitable allocation of fees as it complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. For example, as described above, the calculation of Historical CAT Assessment 1A complies with the formula set forth in Section 11.3(b) of the CAT NMS Plan. In addition, Historical CAT Assessment 1A would be charged to CEBBs and CEBSs in accordance with Section 11.3(b) of the CAT NMS Plan. Furthermore, the Participants would continue to remain responsible for their designated share of Past CAT Costs through the cancellation of loans made by the Participants to CAT LLC.

In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1A—Historical CAT Costs 1 (including Excluded Costs) and the exclusion of costs previously invoiced via Historical CAT Assessment 1, the count for the executed equivalent share volume for the prior 12 months, the length of the Historical Recovery Period, and the projected executed equivalent share volume for the Historical Recovery Period—are reasonable. Moreover, these inputs lead to a reasonable fee rate for Historical CAT Assessment 1A that is lower than other fee rates for transaction-based fees. A reasonable fee rate allocated in accordance with the requirements of the CAT Funding Model provides for an equitable allocation of fees.

(4) Historical CAT Assessment 1A Is Not Unfairly Discriminatory

Historical CAT Assessment 1A is not an unfairly discriminatory fee. The SEC approved the CAT Funding Model, finding that each aspect of the CAT Funding Model satisfied the requirements of the Exchange Act. In reaching this conclusion, the SEC analyzed the potential effect of Historical CAT Assessments calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Historical CAT Assessment 1A complies with the requirements regarding the calculation of Historical CAT Assessments as set forth in the CAT NMS Plan. In addition, as discussed above, each of the inputs into the calculation of Historical CAT Assessment 1A and the resulting fee rate for Historical CAT Assessment 1A is reasonable. Therefore, Historical CAT Assessment 1A does not impose an unfairly discriminatory fee on Industry Members.

Finally, the Exchange believes the proposed fees established pursuant to the CAT Funding Model promote just and equitable principles of trade, and, in general, protect investors and the public interest, and are provided in a transparent manner and specificity in the fee schedule. The Exchange also believes that the proposed fees are reasonable because they would provide ease of calculation, ease of billing and other administrative functions, and predictability of a fee based on fixed rate per executed equivalent share. Such factors are crucial to estimating a reliable revenue stream for CAT LLC and for permitting Exchange members to reasonably predict their payment obligations for budgeting purposes.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

Section 6(b)(8) of the Act [276] requires that the Exchange's rules not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act. The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that Historical CAT Assessment 1A implements provisions of the CAT NMS Plan that were approved by the Commission and is designed to assist the Exchange in meeting its regulatory obligations pursuant to the Plan.

In addition, all Participants (including exchanges and FINRA) are proposing to introduce Historical CAT Assessment 1A on behalf of CAT LLC to implement the requirements of the CAT NMS Plan.

[272] CAT Funding Model Approval Order at 13445, n.677.

[273] *Id.* at 13469.

[274] *See* Section 11.3(b) of the CAT NMS Plan.

[275] CAT Funding Model Approval Order at 13412.

[276] 15 U.S.C. 78f(b)(8).

Therefore, this is not a competitive fee filing, and, therefore, it does not raise competition issues between and among the Participants.

Furthermore, in approving the CAT Funding Model, the SEC analyzed the potential competitive impact of the CAT Funding Model, including competitive issues related to market services, trading services and regulatory services, efficiency concerns, and capital formation.[277] The SEC also analyzed the potential effect of CAT fees calculated pursuant to the CAT Funding Model on affected categories of market participants, including Participants (including exchanges and FINRA), Industry Members (including subcategories of Industry Members, such as alternative trading systems, CAT Executing Brokers and market makers), and investors generally, and considered market effects related to equities and options, among other things. Based on this analysis, the SEC approved the CAT Funding Model as compliant with the Exchange Act. Historical CAT Assessment 1A is calculated and implemented in accordance with the CAT Funding Model as approved by the SEC.

As discussed above, each of the inputs into the calculation of Historical CAT Assessment 1A is reasonable and the resulting fee rate for Historical CAT Assessment 1A calculated in accordance with the CAT Funding Model is reasonable. Therefore, Historical CAT Assessment 1A would not impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Exchange Act.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were either solicited or received.

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[278]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

## IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

*Electronic Comments*

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–MRX–2026–19 on the subject line.

*Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–MRX–2026–19. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection.

All submissions should refer to file number SR–MRX–2026–19 and should be submitted on or before June 8, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[279]

**J. Matthew DeLesDernier,**

*Deputy Secretary.*

## Nuclear Regulatory Commission

10 CFR Parts 30, 31, 32, et al.
Modernizing NRC Regulations for Byproduct Material Use; Proposed Rule

## NUCLEAR REGULATORY COMMISSION

### 10 CFR Parts 30, 31, 32, 34, 39, 40, 70 and 150

**[NRC–2025–1205]**

**RIN 3150–AL49**

## Modernizing NRC Regulations for Byproduct Material Use

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Proposed rule.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is proposing to amend its regulations for the licensing of byproduct material, some source material, and some special nuclear material. The NRC's goal in amending these regulations is to modernize the safe, effective, and efficient use of licensed material. This action would reduce the burden of the NRC's licensing process, eliminate the need for certain exemptions from existing regulations, and eliminate unnecessary requirements. The NRC is seeking public comment on this proposed rule and draft interim guidance.

**DATES:** Comments must be submitted electronically using *https://www.regulations.gov* by 11:59 p.m. eastern time on July 2, 2026.

**ADDRESSES:** Submit your comments, identified by Docket ID NRC–2025–1205, at *https://www.regulations.gov.* If your material cannot be submitted using *https://www.regulations.gov,* call or email the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

Do not include any personally identifiable information (such as name, address, or other contact information) or confidential business information that you do not want publicly disclosed. All comments are public records; they are publicly displayed exactly as received, and will not be deleted, modified, or redacted. Comments may be submitted anonymously.

Follow the search instructions on *https://www.regulations.gov* to view public comments.

You can read a plain language description of this proposed rule at *https://www.regulations.gov/docket/NRC-2025-1205.* For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

**FOR FURTHER INFORMATION CONTACT:** Amy McKenna, U.S. Nuclear Regulatory Commission, Washington DC 20555–0001, Office of Nuclear Material Safety and Safeguards email: *amy.mckenna@nrc.gov.*

**SUPPLEMENTARY INFORMATION:**

### Executive Summary

*A. Need for Regulatory Action*

On May 23, 2025, President Trump signed Executive Order (E.O.) 14300, ''Ordering the Reform of the Nuclear Regulatory Commission.'' E.O. 14300 requires the NRC to undertake a review and wholesale revision of its regulations and guidance documents, after which it must issue notices of proposed rulemaking by February 23, 2026. Final rules and guidance to conclude the revision process must be issued no later than November 23, 2026. In accordance with E.O. 14300 the NRC identified changes across title 10 of the *Code of Federal Regulations* (10 CFR) parts 30, 31, 32, 34, 39, 40, 70, and 150. These changes would yield significant efficiencies and reduce regulatory burden for licensees, NRC, and Agreement States while upholding our shared commitment to public safety.

*B. Major Provisions*

Major provisions of this proposed rule include the following changes:

- Revised the table of radionuclide activity values used for determining decommissioning financial assurance (DFA) for sealed and unsealed radioactive materials.
- Established a new class of general licenses (GLs), called standard general licenses (SGLs), to address anti-competitive barriers.
- Streamlined requirements for the distribution of exempt byproduct material and source material.
- Established distribution pathways for microsources.
- Revised the definition of consortium to address anti-competitive barriers.
- Revised administrative requirements for industrial Radiography to reduce anti-competitive barriers and modernized the radiography regulations.
- Modernized well logging regulations.
- Streamlined requirements for Agreement State Licensees in 10 CFR part 150.

*C. Costs and Benefits*

The NRC prepared a draft regulatory analysis to determine the expected quantitative costs and benefits of this proposed rule, as well as qualitative factors to be considered in the NRC's rulemaking decision. The conclusion of the analysis is that this proposed rule and associated guidance would result in net savings to Industry, Agreement States, and the NRC of $2,987,000 using a 7-percent discount rate.

The draft regulatory analysis also considers, in a qualitative fashion, regulatory efficiency, and public confidence. This rulemaking will reduce the effort that applicants and licensees would need to expend to generate exemption requests and consider alternative means to accomplish the goals of current regulation. This rulemaking demonstrates the NRC's ability to effectively regulate applicants and licensees, including appropriate responses to statutory requirements.

The regulatory analysis is available as indicated in Section XVII, ''Availability of Documents,'' of this document.

## I. Obtaining Information and Submitting Comments

*A. Obtaining Information*

Please refer to Docket ID NRC–2025–1205 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2025–1205.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''ADAMS Public Search.'' For problems

with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the ''Availability of Documents'' section.

- *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time, Monday through Friday, except Federal holidays.
- *Public Meeting:* The NRC may conduct a public meeting to describe the proposed amendments and answer questions from the public on the proposed rule. If the NRC determines it will hold a public meeting, NRC will publish a notice of the location, time, and agenda of the meeting on the NRC's public meeting website within 10 calendar days of the meeting. Stakeholders should monitor the NRC's public meeting website for information about the public meeting at: *https://www.nrc.gov/public-involve/public-meetings/index.cfm.*

*B. Submitting Comments*

Comments must be submitted electronically using *https://www.regulations.gov* no later than 11:59 p.m. eastern time on July 2, 2026. Please include Docket ID NRC–2025–1205 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

## II. Executive Order 14300: Ordering the Reform of the Nuclear Regulatory Commission

On May 23, 2025, President Donald J. Trump signed E.O. 14300, ''Ordering the Reform of the Nuclear Regulatory Commission.'' Section 5, ''Reforming and Modernizing the NRC's Regulations,'' requires the NRC to undertake a review and wholesale revision of its regulations and guidance documents as guided by the policies set forth in section 2 of the E.O. This rulemaking addresses section 5, which requires the NRC to ''undertake a review and wholesale revision of its regulations and guidance documents.''

## III. Background

Within the National Materials Program, the NRC regulates the use of byproduct material, source material, and special nuclear material in quantities not sufficient to form a critical mass for a variety of uses as authorized by Sections 53, 63, and 81 of the Atomic Energy Act of 1954, as amended (AEA) and pursuant to 10 CFR parts 19, 20, 30, 31, 32, 33, 34, 35, 36, 39, 40, 70 and 150. For the purposes of this document, ''byproduct material,'' ''source material,'' and ''special nuclear material'' describe three broad categories of radioactive material regulated under the AEA: (1) radioactive material created, made radioactive, or generated as waste from nuclear processes (byproduct material); (2) naturally occurring uranium and thorium (source material); and (3) processed or enriched nuclear materials used for reactor fuel or other applications (special nuclear material). These categories are defined in NRC regulations, §§§ 30.4, 40.4, 70.4. These materials have many different uses, including use in industrial radiography, moisture-density gauges, medical applications, and well logging. Currently, the NRC has approximately 2,700 active specific licenses for the use and possession of byproduct, source, and certain quantities of special nuclear material. The applicable NRC regulations and specific license conditions establish the requirements for the safe handling, use, and storage of these materials. The NRC inspects facilities to ensure compliance with regulations and takes action when violations occur. The public also uses exempt quantities of byproduct material and source material in consumer products such as smoke detectors, static eliminators and self-luminous products.

Under Section 274b of the AEA, States can enter into Agreements with the NRC that allow States to assume, and the NRC to discontinue, regulatory authority over byproduct, source, and small quantities of special nuclear material. Known as Agreement States, these States can then regulate byproduct, source, and certain quantities of special nuclear materials that are covered in the Agreement, using their own legislation, regulations, or other legally binding provisions. The NRC enters into an Agreement if the Commission finds the State program adequate to protect public health and safety and compatible with the NRC's regulatory program. The NRC ensures that an Agreement State program remains adequate and compatible through periodic review and assessment under the Integrated Materials Performance Evaluation Program (IMPEP). There are currently 40 Agreement States, which regulate approximately 20,000 materials licensees.

In response to several recent E.O.s, including E.O. 14300, the NRC identified requirements within 10 CFR parts 30, 31, 32, 34, 39, 40, and 150 that could be revised, deleted, or modified in order to meet the E.O. objectives. The following sections provide background information on the affected parts. Section IV of this document provides discussion on the specific proposed changes for each of the affected parts.

*A. Part 30 Reducing Anti-Competitive Barriers in Consortium Definition*

The NRC is proposing to revise its definition of consortium to remove the anti-competitive barrier limitation that a positron emission tomography (PET) radionuclide production facility must be in the same geographical area as the medical use licensee to be considered a consortium. The limitation that the PET production facility had to be located in the same geographical area as the medical use licensee severely limited licensees from locating their PET radionuclide production facility in the most cost-effective location and was based primarily on the short half-life of PET radionuclides, making distant transport impracticable.

*B. Part 30 Modernizing Appendix B and Part 70 Quantities of Licensed Material Used To Assess Financial Assurance for Decommissioning*

The NRC is proposing to revise the table of radionuclide activity values used for determining decommissioning financial assurance (DFA) for sealed and unsealed radioactive materials. The proposed rule would revise the current table in appendix B, ''Quantities of Licensed Material Requiring Labeling,'' to 10 CFR part 30, ''Rules of General

Applicability to Domestic Licensing of Byproduct Material,'' by replacing its applicable values from the table in appendix C, ''Quantities of Licensed Material Requiring Labeling,'' to 10 CFR part 20, ''Standards for Protection against Radiation.'' This would add radionuclides not currently listed in appendix B to 10 CFR part 30, including radionuclides associated with industrial technologies and current and emerging medical uses. These changes would generally reduce DFA requirements for most licensees and eliminate the need for certain exemptions. In addition, the NRC would remove all radionuclides with a half-life of 120 days or less from the appendix, since these radionuclides are not considered when developing DFA, and amend the title of the table to ''Quantities of Licensed Material Used to Assess Financial Assurance for Decommissioning,'' to more accurately reflect its current use for DFA. The default values would remain at their current values. The NRC is proposing to revise § 70.25 to match the proposed changes to appendix B to part 30.

*C. Part 31 Creating New Classes of General Licenses and Modernization of Current Classes of General Licenses*

The NRC is proposing to establish a new class of general licenses (GLs), called standard general licenses (SGLs), to address anti-competitive barriers. The proposed framework would permit GLs for portable gauges, additional fixed gauges, a subset of diagnostic medical uses, additional analytical instruments, and additional in vitro testing. The SGLs would be granted by regulation, and requires submission of a registration, fee, and certification of understanding. Proposed rule language, found in §§ 31.13 through 31.18, is based on standard license conditions and essential standard commitments related to programs necessary for radiological safety and security. Conforming changes are proposed in other parts of 10 CFR parts 30 and 32 to ensure radioactive materials can be distributed to and from the standard general licensees. The SGL pathway would create a second option for licensing such that entities could select between a SGL or a specific license for certain activities. The specific license pathway for entities wishing to conduct activities in a non-standard manner or outside of the normal conditions would be preserved so as to not limit flexibility. However, licensees could select the lower regulatory burden standard general licensing pathway if they are able to conduct activities within the framework of the SGL for their specified activity.

Additionally, the NRC is proposing to amend requirements in 10 CFR part 31, ''General Domestic Licenses For Byproduct Material,'' to permit electronic transmission of registrations for § 31.5 registerable devices, harmonize holding periods with decommissioning timelines in § 30.36, align physical inventory frequencies with equivalent physical inventory limits for specific licenses, and harmonize in vitro test vial limits with labeling limits in 10 CFR part 20.

*D. Parts 32 and 40 Reducing Reporting Requirements for Consumer Products Containing Small Quantities of Radioactive Material*

The NRC is proposing to amend several regulations governing the distribution of exempt byproduct material and source material. This proposed rule would eliminate the requirements under 10 CFR part 32, ''Specific Domestic Licenses to Manufacture or Transfer Certain Items Containing Byproduct Material,'' and 10 CFR part 40, ''Domestic Licensing of Source Material,'' that require licensees to submit an annual report of transfers to the NRC. The elimination of these requirements would reduce the licensee's burden of preparing and providing records and would reduce the burden of the NRC to collect, manage, and store the reports while still remaining protective of public health and safety given that the NRC will still maintain access to the information.

*E. Part 32 Expanding Distribution Pathways for Microsources*

The NRC is proposing to amend requirements in § 32.72 to include microsources, such as radioactive microspheres, within its scope, which would allow commercial radiopharmacies to prepare and distribute these materials. The proposed rule would expand eligibility to any applicant legally authorized under applicable Federal or State law to manufacture, compound, prepare, or distribute radioactive drugs or medical devices, providing flexibility for future distribution pathways authorized by the U.S. Food and Drug Administration (FDA) or State regulatory bodies. In addition, the NRC is proposing to revise § 32.74 to clarify that it may also be used to distribute microsources and authorize distribution to any licensee authorized to use the source or device under 10 CFR part 35, ''Medical Use of Byproduct Material,'' without limitation to specific subparts. These changes would allow for smooth distribution of microsources to medical use licensees.

*F. Part 34 Reducing Anti-Competitive Barriers and Administrative Requirements for Industrial Radiography*

The NRC is proposing to amend the requirements associated with industrial radiography operations in 10 CFR part 34, ''Licenses for Industrial Radiography and Radiation Safety Requirements for Industrial Radiographic Operations.'' These revisions to the proposed rule would address anti-competitive barriers due to overly prescriptive performance requirements for industrial radiography equipment, provide clarity regarding ambiguous language in the two-person rule, and reduce or remove administrative and obsolete requirements. These proposed changes would reduce the regulatory burden on licensees and applicants by reducing or eliminating administrative requirements for recordkeeping and notifications. Additionally, revisions to the performance requirements for industrial radiography equipment would remove the need to meet the requirements in American National Standards Institute (ANSI) N432–1980, ''Radiological Safety for the Design and Construction of Apparatus for Gamma Radiography'' and replace them with requirements to register the device in accordance with § 32.320 of this section. These changes will ensure that radiation safety is maintained while reducing anti-competitive regulatory barriers and allowing for innovation in the design of radiography equipment.

*G. Part 39 Modernizing Well Logging Regulations*

The NRC is proposing to amend the rules associated with well logging in 10 CFR part 39, ''Licenses and Radiation Safety Requirements for Well Logging.'' These revisions to the proposed rule would remove or modify redundant and unnecessary regulations regarding the use of nuclear material in well logging operations that support the oil and gas exploration industry. The proposed rule would revise leak testing requirements to allow for the sealed source leak testing frequency in accordance with the Sealed Source and Device Registration (SSDR), extend the survey meter calibration frequency in § 39.33 from 6 months to 12 months, and eliminate unnecessary notifications. These changes would reduce the regulatory burden on licensees by reducing or eliminating administrative requirements and notifications while maintaining safety.

*H. Part 150 Modernizing Requirements for Agreement State Licensees in Part 150*

The NRC is proposing to amend the rules in 10 CFR part 150, ''Exemptions and Continued Regulatory Authority in Agreement States and in Offshore Waters Under Section 274,'' to remove the requirement for Agreement State licensees using special nuclear material of low strategic significance to meet the physical protection requirements in 10 CFR part 73, ''Physical Protection of Plants and Materials.'' Forty years of operational experience has demonstrated that this material is adequately secured under the Agreement State oversight. Additionally, the NRC is proposing to amend the requirements in § 150.20 to reduce the amount of time an Agreement State licensee has to file for reciprocity before initiation of work activities in an NRC jurisdiction, eliminate the need to notify the NRC of location changes for work in offshore waters, and allow SGLs to be recognized by the NRC for the purposes of reciprocity. This action would reduce administrative burden on the applicant and the NRC while maintaining safety.

**IV. Discussion**

The NRC, as directed in E.O. 14300, Section 5, undertook a review of its regulations of the use of byproduct, source, and special nuclear material. The NRC's goal in its review was to identify in its regulations areas that could be modernized while ensuring the continued safe, effective, and efficient use of byproduct material. The NRC has identified changes which would yield significant efficiencies and reduce regulatory burden for licensees, NRC, and Agreement States while upholding our shared commitment to public safety. These actions would reduce the burden of the NRC's licensing process, eliminate the need for certain exemptions from existing regulations, and eliminate unnecessary requirements

Each section presents information on a different part impacted by the proposed rule, detailing what action the NRC is proposing and whom the action affects and how.

The NRC prepared an unofficial redline strikeout version of the proposed changes to regulatory text that is intended to help the reader identify the proposed changes. The unofficial redline strikeout version of the proposed rule is publicly available and is listed in the ''Availability of Documents'' section.

*Part 30 Reducing Anti-Competitive Barriers in Consortium Definition*

On October 1, 2007, the NRC published a final rule (72 FR 55864) to amend 10 CFR part 30 to implement provisions of the Energy Policy Act of 2005 (EPAct). The amendments included a revision to § 30.4 to add a definition for the term ''consortium.'' Under the definition in 10 CFR 30.4, a consortium was an association of medical use licensees and a PET radionuclide production facility located at an educational institution, Federal facility, or noncommercial medical facility ''in the same geographical area'' that jointly own or share the operation and maintenance costs of the facility. The rule provided regulatory relief to consortia engaged in the noncommercial production and distribution of PET radionuclides for medical use, including authorization for noncommercial transfers under § 30.32(j) without requiring a separate distribution license under § 32.72. The geographical limitation was included due to the short half-lives of PET radionuclides, such as fluorine-18 (1.8 hours) and carbon-11 (20 minutes), which require rapid production and delivery to ensure timely medical use. However, there was no safety reason provided for the limitation and it was based on the supply chain difficulties associated with short-lived radionuclides. While some changes in the medical use of byproduct material have introduced longer lived PET radionuclides into use, such as copper-64 (12.7 hours), the NRC has determined that licensees and regulators have found the phrase ''geographical area'' lacks clarity as to when consortium relief applies. In addition, requiring the PET production facility to be located in the same geographic area, when safe transfer of PET radionuclides can occur following all other applicable requirements, unnecessarily inhibits licensees' ability to establish or participate in cost-effective, collaborative PET radionuclide production arrangements.

The NRC proposes a revision to § 30.4 to change the definition for the term ''consortium.'' The definition would support the regulation of accelerator-produced radioactive materials, including PET radionuclides used in medical imaging. Under the proposed definition, a consortium would be an association of medical use licensees and a PET radionuclide production facility that jointly own or share in the operation and maintenance cost of the PET radionuclide production facility that produces PET radionuclides for use in radioactive drugs within the consortium for noncommercial distribution among its associated members for medical use. The proposed rule would remove the requirement to be in the same geographical area and would provide regulatory relief to consortia engaged in the noncommercial production and distribution of PET radionuclides for medical use, including authorization for noncommercial transfers under § 30.32(j) without requiring a separate distribution license under § 32.72.

*Part 30 Modernizing Appendix B and Part 70 Quantities of Licensed Material Used To Assess Financial Assurance for Decommissioning*

Decommissioning financial assurance is a guarantee or other financial agreement provided by a licensee to ensure that sufficient funds are available to complete decommissioning activities in a safe and timely manner. The NRC's regulations in §§ 30.35 and 70.25, ''Financial assurance and recordkeeping for decommissioning,'' provide tables of required funds that need to be saved by each licensee. These regulations rely on the values provided in appendix B to 10 CFR part 30 when determining the amount of DFA required for unsealed and sealed byproduct material and unsealed special nuclear material. As noted in §§ 30.35(a)(1) and 70.25(a)(2), a decommissioning funding plan (DFP) must be submitted when unsealed radionuclide activities exceed $1 \times 10^5$ times the applicable quantities listed in appendix B to 10 CFR part 30 and fixed amounts of DFA are required when unsealed radionuclide activities exceed $1 \times 10^3$ times the applicable quantities listed in that appendix B to part 30. Individuals with licenses authorizing the possession and use of sealed sources or plated foils at quantities $1 \times 10^{12}$ times the values in appendix B to 10 CFR part 30 must also submit DFPs and fixed amounts of DFA are required when radionuclide activities in sealed sources or plated foils exceed $1 \times 10^{10}$ times the applicable quantities listed in appendix B to part 30. The potentially affected licensees are those authorized to possess licensed materials above these limits.

Appendix B to 10 CFR part 30 includes default possession values for radionuclides not specifically listed. The default possession values are equal to the lowest values listed in appendix B to 10 CFR part 30 for specific alpha, beta, and gamma-emitting radionuclides. Use of the default values may result in licensees needing more DFA than is warranted based on the risk to public health and safety. For example, a licensee possessing more

than 0.1 millicurie (mCi) but less than 1 mCi of an unsealed non-alpha-emitting isotope, would be required under § 30.35(d) to provide $225,000 in DFA. To possess more than 1 mCi of the non-alpha-emitting isotope, a licensee would be required to provide $1,125,000 in DFA, and a DFP would be required to possess more than 10 mCi. However, if the NRC revised appendix B to 10 CFR part 30 to adopt the values in appendix C to 10 CFR part 20, the minimum possession threshold for DFA or a DFP would increase 100-fold for accelerator-produced radioactive material (NARM) isotopes germanium (Ge)-68, gold-195, and sodium-22. Therefore, the application of the current generic default possession values creates a regulatory burden by requiring licensees to provide decommissioning funding that is not commensurate with the risk of isotope-specific possession values.

In a petition for rulemaking (PRM) docketed as PRM–30–66, the Organization of Agreement States (OAS) requested that the NRC provide specific possession values for naturally occurring and NARM radionuclides that are not currently listed in appendix B to 10 CFR part 30 so that licensees using these isotopes, especially medical licensees, would not have to apply the appendix's default values to calculate decommissioning funding requirements. The OAS stated that patient health and safety are being compromised due to delays in licensing important diagnostic and therapeutic products that use radionuclides not listed in appendix B to 10 CFR part 30, and that these licensing obstacles could discourage the development of new medical and industrial applications. The OAS also suggested that, rather than issuing exemptions on a case-by-case basis, the more appropriate way to address the inconsistency in appendix B to 10 CFR part 30 is to amend the regulation to add appropriate radionuclides and their corresponding activities.

The NRC is proposing to update appendix B to 10 CFR part 30, ''Quantities of Licensed Material Requiring Labeling,'' with radionuclides and values from appendix C to 10 CFR part 20, ''Quantities of Licensed Material Requiring Labeling'' for values that are equal to or higher than the current default value in appendix B to 10 CFR part 30. This would add radionuclides not currently listed in appendix B to 10 CFR part 30, including radionuclides associated with industrial technologies and current and emerging medical uses.

The proposed revisions to the list of radionuclides in appendix B to 10 CFR part 30 would align with the NRC's regulatory authority under the EPAct. The EPAct amended the definition of byproduct material to include NARM radionuclides and provided the NRC authority over this new category of byproduct material. Germanium (Ge)-68 and gallium (Ga)-68, radionuclide generators are of particular concern to those in the medical field since Ge-68 is not listed in appendix B to 10 CFR part 30 and the default values resulted in overly conservative decommissioning financial assurance requirements. In the report, ''Germanium-68 (Ge-68) Decommissioning Funding Plan (DFP) Final Report,'' dated August 12, 2015, the Advisory Committee on the Medical Uses of Isotopes (ACMUI) concluded that the restrictive aspects of a DFP for Ge-68/Ga-68 generators that arise from the current 10 CFR part 30 regulations were preventing or deterring the use of promising Ga-68 diagnostic imaging agents for patients and recommended that the NRC address the DFP concerns relative to Ge-68/Ga-68 generators through rulemaking. The NRC has granted a limited number of exemptions for licensees that use Ge-68/Ga-68 generators under certain conditions. These exemptions were approved in advance of this rulemaking. By providing a regulatory solution through rulemaking, the NRC would create a more stable regulatory framework for applicants, licensees, and regulators. In cases where the values in appendix C to 10 CFR part 20 are lower than the values currently listed in appendix B to 10 CFR part 30, the NRC proposes maintaining the current values in appendix B to 10 CFR part 30. This means the values listed in appendix B to part 30 would align with the majority of values listed in appendix C to part 20 except for americium-241, cadmium-109, plutonium-239, uranium-233, uranium-234, uranium-235, zirconium-93, the default value for any alpha-emitting radionuclide not listed or mixtures of alpha emitters of unknown composition, and the default value for any radionuclide other than alpha emitting radionuclides not listed or mixtures of beta emitters of unknown composition which would remain at their current values.

Each of the values that would remain at their current values are a factor of 10 higher than what is listed in appendix C to 10 CFR part 20. If the values for these radionuclides were adopted from appendix C to 10 CFR part 20, then the values would decrease, and several licensees would become subject to DFA requirements. This would result in an undue burden to this population of licensees in obtaining DFA or requesting an exemption from the requirements. Since implementing DFA requirements in 1988, the NRC has not identified any instance where a licensee with these radionuclides has had insufficient DFA or any negative safety consequences because of insufficient DFA.

Because there is no safety related reason to decrease any values listed in appendix B to 10 CFR part 30, the NRC proposes maintaining status quo for the values for americium-241, cadmium-109, plutonium-239, uranium-233, uranium-234, uranium-235, zirconium-93, the default value for any alpha-emitting radionuclide not listed or mixtures of alpha emitters of unknown composition, and the default value for any radionuclide other than alpha emitting radionuclides not listed or mixtures of beta emitters of unknown composition in appendix B to 10 CFR part 30. The default values in appendix B to 10 CFR part 30 remain at their current values. These changes will either reduce or not affect the amount of DFA required for licensees, depending on the mixture of radionuclides the licensee possesses.

Finally, the NRC would remove all radionuclides with a half-life of 120 days or less from the updated appendix B to 10 CFR part 30 because these radionuclides are not considered when developing DFA. Additionally, the NRC is also proposing a revision to § 70.25(a)(2) and (b) to specify unsealed special nuclear material ''of half-life greater than 120 days.'' NRC experience shows that short-lived radionuclides do not require major decommissioning efforts, as radionuclides with half-lives of 120 days or less naturally decay to negligible levels within a few years.

This rulemaking also includes changing the title to appendix B to 10 CFR part 30 to clarify the intent and purpose of the appendix. Appendix B to 10 CFR part 30 is used solely for the purpose of calculating the required amounts of DFA. Therefore, this proposed rule would change the title of appendix B to 10 CFR part 30 from ''Quantities of Licensed Material Requiring Labeling'' to ''Quantities of Licensed Material Used to Assess Financial Assurance for Decommissioning.''

These proposed revisions address the changes requested in PRM–30–66 from the OAS requesting that the NRC conduct rulemaking to provide an expeditious solution to the DFA concerns of applicants and licensees who currently use, or plan to use, the unlisted NARM radionuclides, especially in the diagnosis and treatment of diseases.

Under current requirements, licensees may choose to submit either a DFP under § 30.35(e) or a certification that financial assurance for decommissioning has been provided in the amount prescribed by § 30.35(d). Although medical licensees generally possess smaller quantities of radioactive material than major nuclear facilities and typically use certifications under § 30.35(d), they may possess unsealed radionuclides with half-lives greater than 120 days and thus could develop facility-specific decommissioning cost estimates in accordance with § 30.35(e). While the review and approval of DFPs under § 30.35(e) could be resource intensive for both the applicant or licensee and the regulatory agency, some licensees might find the submission of a DFP more cost effective than the certification of financial assurance for decommissioning using DFA values based on the default radionuclide threshold values in appendix B to 10 CFR part 30. The proposed changes to radionuclide values in appendix B to 10 CFR part 30 would decrease, or maintain, the amount required for decommissioning financial assurance for an individual NRC 10 CFR part 30 licensee. After evaluating the impact of the proposed provisions on their decommissioning financial assurance mechanism, a licensee may be required to make revisions that lead to additional costs. However, the NRC expects that most 10 CFR part 30 licensees would benefit from these changes. This was demonstrated both by the petition that initiated the rulemaking and by the public responses to the draft regulatory basis supporting a rulemaking on decommissioning financial assurance for sealed and unsealed radioactive materials (87 FR 25157).

NRC licensees under subpart H of 10 CFR part 70, as required by § 70.25(b) must submit DFPs. The changes to appendix B to 10 CFR part 30 would not impact 10 CFR part 70 licensees, as their possession quantities exceed the threshold identified in § 70.25(d).

Under the proposed rule all affected licensees would be required to review the updated appendix B to 10 CFR part 30 to determine whether changes are needed. Licensees that no longer require DFA or a DFP or could decrease their DFA, could do so voluntarily at their discretion after the effective date of the rule. Licensees would need to request NRC approval when making any changes to their DFAs or DFPs. For licensees where no change is required, the NRC would verify compliance during triannual reviews and as part of routine inspection activities.

*Part 31 Creating New Classes of General Licenses and Modernization of Current Classes of General Licenses*

A. Standard General Licenses (SGL)

Consistent with its authority under the AEA, the NRC may issue general or specific licenses for the use of byproduct, source, and certain quantities of special nuclear material. A specific license is issued to a named entity after the filing of an application with the Commission. Additionally, amendments to specific licenses are required when a variety of changes occur. In the case of applications and amendments, the NRC and licensee engage in back and forth communication until a licensing basis is solidified and documented in a licensing document. Specific licenses cover a wide range of activities of byproduct material and have a variety of associated risk profiles. Some activities are conducted in a standard method across the industry, while others are conducted in a non-uniform manner. The specific licenses for standard operations use consistent license authorizations and conditions, such that, these specific licenses appear almost identical across the industry with the exception of individuals named on the license and the locations authorized by the license. For example, the majority of specifically licensed portable gauge licensees operate under the same license conditions and have the same license commitments. The burden associated with applying for a specific license and maintaining a specific license is unnecessarily high for low risk, standard operations when the specific license follows the standard format.

A GL is issued by regulation and grants authority to entities conducting the activities specified in the regulation issuing the GL. Requirements for general licensees appear in the regulations and are designed to be commensurate with the specific activities covered by the GL. A GL is effective without the need for a user to file an application with the Commission or the issuance of a licensing document to a particular person. However, certain GLs may require registration with the Commission. Under 10 CFR part 31, the Commission grants GLs for certain uses of byproduct material and provides the requirements associated with these GLs. This regulatory framework has proven to be effective and a low burden for many low risk, standard activities.

The NRC is proposing to create a new class of GLs within subpart C of 10 CFR part 31 for a subset of low-risk activities that are currently specifically licensed, including fixed gauging, portable gauging, certain medical uses, certain analytical equipment uses, and certain in vitro testing uses. The impacted groups would be permitted to choose between two licensing pathways. An SGL would require submission of a registration, fee, and certification of understanding for five types of technology. The NRC is proposing that each type of technology has requirements codified in a separate regulation. For example, the NRC is proposing requirements for a Standard General License for Certain Fixed Gauging in § 31.14, a Standard General License for Portable Gauging in § 31.15, a Standard General License for Certain Medical Uses in § 31.16, a Standard General License for Certain Analytical Equipment Including Electron Capture Detectors, X-Ray Fluorescence Devices, and Ion Generators in § 31.17, and a Standard General License for Certain In Vitro Testing in § 31.18. The NRC is proposing administrative requirements, such as notifications and decommissioning, applicable to each of the SGLs in § 31.13.

The proposed rule language is based on standard license conditions and essential standard commitments related to programs necessary for radiological safety and security. The standard license conditions and essential standard commitments were derived from risk significant elements of NUREG–1556, ''Consolidated Guidance About Materials Licenses''. Elements taken from program specific NUREG–1556 Volumes and codified in the rule come from the ''Response from Applicants'' sections of NUREG–1556 and revolve around establishing programs, processes, and procedures to safely conduct licensed activities. These sections are tied to regulatory requirements in 10 CFR that are general in nature so NUREG–1556 provides methodologies to meet the general requirements for the safe conduct of licensed activities.

The proposed rule language requires, by reference, compliance with applicable regulations found in other applicable parts of 10 CFR to ensure the new general licensees comply with all applicable provisions that they are currently subject to by their specific licenses. In addition, the NRC is proposing inventory limitations in § 31.13(c) that would prohibit a single general licensee from aggregation of materials requiring implementation of requirements contained in 10 CFR part 37, materials requiring a decommissioning plan or financial assurance, and materials requiring an emergency plan. The GLs would not be

subject to any requirements beyond what is currently required to obtain a specific license. Under this proposed rule, entities would still have the flexibility to choose to obtain a specific license.

The NRC is proposing conforming changes in other parts of 10 CFR to ensure radioactive materials can be distributed to and from the new GLs. Conforming changes include: the definition of principal activities in § 30.4, addition of SGLs to § 30.6, addition of SGLs in § 30.34(h)(1), addition of SGLs to § 30.35(g), addition of SGLs to § 30.41(d)(1), addition of Standard General License for Certain Medical Uses to § 32.72(a), addition of Standard General License for Certain Medical Uses to § 32.74(a), and addition of SGLs in § 150.20.

Overall, the SGL pathway would reduce the burden on the licensee as well as the NRC while maintaining adequate safety, security, and oversight of these licensed activities. The current licensing pathway would exist as it does today, so no impact may be observed to licensees who chose to remain specifically licensed. However, licensees could select the SGL pathway if they are able to conduct activities within the framework of the SGL for their specified activity. The SGL option would have a lower application fee, lower annual fee, and would eliminate the need to submit licensing correspondence such as amendment requests. Instead of amendments, a notification process would be used for specified program changes. The SGLs would be subject to an inspection program that is equivalent to the inspection for the same specifically licensed activities. As part of the NRC's response to the ADVANCE Act of 2024, the NRC is reviewing current inspection programs including the frequency of inspection conducted under Inspection Manual Chapter 2800, ''Materials Inspection Program''.

B. Current Classes of General Licenses—10 CFR 31.5 Licensees

General licenses in § 31.5 currently authorize use of certain devices. The NRC is proposing changes to these requirements to reduce burden while maintaining protection of public health and safety.

Currently, registrations for generally licensed devices as required by § 31.5(c)(14) must be submitted to the Commission by mail. However, most entities subject to this requirement use electronic communications as their primary communication method. The NRC is proposing to amend § 31.5(c)(14) to add electronic communication methods, such as email, as permitted communication methods. Additionally, the NRC is proposing to add a mailing address that is compatible for signature required correspondence should an entity wish to send their registration as signature required.

Currently, § 31.5(c)(15) permits general licensees to hold devices for a period of no longer than 2 years. The term hold is used to describe a licensee's action of keeping a device in its possession that is no longer in use and no longer planned to be used; this is typically the period where a device is out of service prior to disposal of the device. This has shown to be constraining to business operations since entities may need to hold devices for longer than 2 years. For example, an entity may take a device out of service with the intention of disposing of it. However, it may take longer than 2 years to solicit bids for disposal, obtain a contract, and complete the disposal. The NRC is proposing to amend § 31.5(c)(15) to revise the holding period for GLs from 2 years to 36 months. Additionally, holding periods for generally licensed devices are based on decommissioning time periods for many types of specific licensees. Currently, the time period in § 30.36(d) and § 31.5(c)(15) is 2 years. However, as part of its response to E.O. 14300, the NRC is considering increasing this time period to 3 years.

Currently, § 31.5(c)(15) requires general licensees to perform quarterly physical inventory on devices that are placed on standby. The term standby is used to describe a licensee's action of keeping a device in their possession that they plan to return to service and use in the future. However, the regulatory framework for sealed sources that have fewer inherent safety features require physical inventories every 6 months. For example, sealed sources possessed by medical licensees are subject to § 35.67 which requires physical inventories of sealed sources at a semi-annual periodicity. Similarly, licensed materials in well-logging activities are subject to § 39.37 which requires physical inventories of licensed material at a semi-annual periodicity. Additionally, the majority of sealed sources possessed by specific licensees are subject to semi-annual physical inventories through license conditions based on the applicable volume of the NUREG–1556 series, ''Consolidated Guidance About Materials Licenses.'' A quarterly physical inventory is overly burdensome and restrictive in comparison to the Commission's holistic regulatory framework related to physical inventories. The NRC is proposing to amend § 31.5(c)(15) to change the physical inventory frequency from quarterly to semi-annually for devices on standby. By changing the periodicity to semi-annually, the NRC would ensure consistent requirements are imposed across various licensee populations in regard to physical inventory requirements. Specifically, the risk profile for generally licensed devices is lower than the risk profile for specifically licensed devices for which a semi-annual inventory is required for sealed sources. Since the inception of the generally licensed device program in the 1970s, the NRC has obtained sufficient operating experience to demonstrate that this population of licensees generally has adequate material control and accountability such that quarterly inventories are not necessary.

These changes would affect entities required to register devices under § 31.5. Affected entities currently include holders of certain generally licensed devices. The changes would provide flexibility to the communication methods permitted, which increase efficiency, and save entities the cost of mailing physical copies. Additionally, the changes to holding periods would provide flexibility to entities by allowing them to hold devices for a longer time period before disposal is required, should the time period for decommissioning increase. Finally, the change to physical inventories would reduce the number of times per year that an entity must conduct a physical inventory of their generally licensed devices. This would cut the time spent on physical inventories in half.

C. Current Classes of General Licenses—10 CFR 31.11 Licensees

Currently, § 31.11(a) limits the total activity per vial for in vitro clinical or laboratory testing for certain persons, including physicians. The limit for carbon-14 is 10 microcuries, the limit for hydrogen-3 is 50 microcuries, the limit for selenium-75 is 10 microcuries, and the limit for cobalt-57 is 10 microcuries. Meanwhile, 10 CFR part 20 only requires labeling for quantities that are above these activities. Specifically, 10 CFR part 20 appendix C requires labeling for carbon-14 at 100 microcuries, hydrogen-3 at 1,000 microcuries, selenium-75 at 100 microcuries, and cobalt-57 at 100 microcuries. Additionally, § 30.71 Schedule B provides exempt quantity thresholds that are higher than the GL limits. Specifically, § 30.71 Schedule B states the exempt quantity limit for carbon-14 is 100 microcuries, hydrogen-3 is 1,000 microcuries, selenium-75 is

10 microcuries, and cobalt-57 is 100 microcuries. The conflict between exempt quantities in § 30.71 Schedule B and the values in § 31.11(a) pose an unclear regulatory framework for entities working with quantities above the vial limit, but below the exempt quantity limit.

The NRC is proposing to amend § 31.11(a) to increase the prepackaged unit limit from 10 microcuries to 100 microcuries for carbon-14, from 50 microcuries to 1,000 microcuries for hydrogen-3, from 10 microcuries to 100 microcuries for selenium-75, and from 10 microcuries to 100 microcuries for cobalt-57.

The proposed change would affect entities that are currently required to obtain a specific license for in vitro testing to use prepackaged units above the current limits and instead would allow entities to handle prepackaged units with higher activity under a GL. Additionally, it would provide clarity to the licensee community since the current limits in § 31.11 for carbon-14, hydrogen-3, selenium-75, and cobalt-57 are below the exempt quantity limits in 10 CFR part 30 Schedule B or below the limits requiring labeling in 10 CFR part 20 appendix C.

Finally, physician is currently defined in §§ 30.4 and 35.2. With various rulemakings in progress to meet the requirements of E.O. 14300, divergent definitions across the byproduct material regulatory framework could emerge if the definition in 10 CFR part 35 is revised without also revising the definition in 10 CFR part 30 in parallel. The NRC is proposing conforming changes in § 30.4 to remove the definition of physician as it is already defined in 10 CFR part 35 and not used in 10 CFR part 30. This would increase regulatory clarity and ensure one single definition is present within the NRC's byproduct material regulatory framework.

*Part 32 and 40 Reducing Reporting Requirements for Consumer Products Containing Small Quantities of Radioactive Material*

In this rulemaking, the NRC is proposing to remove certain reporting requirements, while still requiring the information be maintained and available for review by the NRC, to ensure regulatory requirements are commensurate with risk and information needs. On March 24, 1983, the NRC published a final rule (48 FR 12331) to amend 10 CFR part 32. The amendments to 10 CFR part 32 included modifications to the reporting and recordkeeping requirements for licensees authorized to distribute consumer products containing small quantities of byproduct material (exempt items). Prior to this change, these regulations required licensees to submit an annual report to the NRC specifying the total quantity of byproduct material transferred to each type of consumer product and the total number of each product transferred during the reporting period. An annual report was required even if a licensee made no transfers during the reporting period. Under the rule, licensees were required to submit a report every five years, or at the time of application for renewal of the specific license, or at the time the licensee notifies the NRC that it is discontinuing distribution of these consumer products.

On October 16, 2007, the NRC published a final rule (72 FR 58473) to amend 10 CFR part 32, changing the reporting requirements back to an annual basis and to include details on what information should be included in the report. The rationale provided in the 2007 final rule was that changing back to annual reporting cycle, instead of a 5-year-cycle, would provide timely information for the NRC to fully determine the products and amount of byproduct material distributed annually which impacted the efforts of developing the NUREG–1717, ''Systematic Radiological Assessment of Exemptions for Source and Byproduct Materials,'' and contributed to uncertainties in the results.

With respect to source material, on May 29, 2013, the NRC published a final rule (78 FR 32310) to amend 10 CFR part 40. The amendment required licensees to obtain a specific license rather than be permitted to operate under a GL. The amendment also included conditions for the initial distributor such as requirements for reporting and recordkeeping. The rule required that initial distributors of products used under an exemption in § 40.13(c) submit a report of transfer each year, following the same practice as consumer products distributed under 10 CFR part 32.

Since 2013, the NRC has not received complete or timely information regarding products and materials containing byproduct material and source material distributed for use under exemptions from licensing, despite the annual reporting frequency required under the 2007 and 2013 final rules. While the reevaluation of the reporting requirements suggested that annual reporting and additional information to be provided would improve inefficiencies in data collection, these issues have not been resolved. Licensees have not provided information clearly and consistently. There are also programmatic implementation issues in the collection, management, and storage of these reports. The intent of the information was to have readily available data to assess public exposure to radiation from these products and inform the Commission on the extent of distribution, if needed. However, this information, while useful, has been seldomly used. The NRC maintains the same access to the data by requesting information from the licensee when the need arises, instead of requesting a formal report to be submitted annually. Furthermore, the NRC has decades of data that can be used to support gaps in assessing public dose.

The NRC is proposing updating the regulations in §§ 32.12, 32.16, 32.20, 32.25(c), 32.29(c), and 32.32(c) to remove the annual reporting requirements. With this proposed change, licensees would be required to maintain the records of transfer per the record retention policy in § 30.51 and make the information available to the NRC upon request.

The elimination of the reporting requirements would reduce the licensee's burden of preparing and providing records and would reduce the burden of the NRC to collect, manage, and store the reports while still remaining protective of public health and safety given that the NRC will still maintain access to the information. This change would also be applicable to exempt products under 10 CFR part 40 and the required reporting under § 40.53(c). For exempt products under 10 CFR part 40, records would need to be maintained in accordance with § 40.61 and made available to the NRC upon request.

This proposed change would affect specific licensees who maintain a license under §§ 32.11, 32.14, 32.22, 32.26, 32.30, and 40.52 for distribution of consumer products under 10 CFR part 30 or 10 CFR part 40. Licensees would no longer have to submit an annual report to the NRC. Record retention policy would follow the regulations in §§ 30.51 and 40.61, for byproduct and source material respectively. This would allow the NRC to have access to information when needed, while at the same time reducing the burden on licenses in preparing and submitting the reports. Requesting the information when needed may introduce some burden due to unscheduled data collection, but it would be outweighed by the reduction in burden of annually preparing, submitting, and maintaining the records of the report on an annual basis.

*Part 32 Expanding Distribution Pathways for Microsources*

The NRC regulates the distribution of byproduct material for medical use under 10 CFR part 32. Specifically, § 32.72 governs the commercial distribution of radioactive drugs, while § 32.74 governs the distribution of sources and devices containing byproduct material. However, recent developments in clinical practice have highlighted the need to allow both distribution pathways to be available to microsources, which include radioactive microspheres used for intravascular brachytherapy. The proposed amendments to 10 CFR part 32 in this rulemaking would allow additional authorizations for the preparation and distribution of radioactive microspheres.

Microspheres are regulated by the FDA as medical devices and they are not considered radioactive drugs. As such, manufacturing, preparation and transfer of microsources is not addressed under § 32.72 and must be authorized under § 32.74, even though the radiation safety considerations between microsources and radioactive drugs are similar. This requirement has become a burden following the implementation of United States Pharmacopeia (USP) General Chapter <825>, which included standards for the preparation, compounding, dispensing, and repackaging for radioactive microspheres similar to radiopharmaceuticals.

The USP sets quality, purity, strength, and identity standards for medicines, food ingredients, and dietary supplements used in the United States. USP standards are enforceable by the FDA and State Boards of Pharmacy. As such, USP standards are widely adopted in healthcare and pharmaceutical practice. USP <825> requires that sterile radioactive microspheres be prepared in International Organization of Standardization (ISO) Class 5 environments if they are to be used more than one hour after puncture. To comply with these requirements and accommodate patient-specific treatment schedules, medical use licensees have increasingly relied on commercial radiopharmacies to prepare and distribute patient-ready doses of microspheres. As radiopharmacies historically focused their activities on radioactive drugs, they are licensed under § 32.72. However, the current regulatory framework does not authorize commercial radiopharmacies for preparing and distributing microspheres under § 32.72.

The proposed rule would revise § 32.72 to include microsources within its scope, which would allow commercial radiopharmacies that are licensed under this provision to prepare and distribute microspheres. In addition, the proposed rule would expand those who can use the § 32.72 pathway to any applicant who is legally authorized, under applicable Federal or State law, to manufacture, compound, prepare, or distribute radioactive drugs or medical devices to allow flexibility for future pathways allowed by states or the FDA to distribute radioactive drugs and medical devices safely.

The NRC is also proposing to revise § 32.74 to provide provisions specific to microsources, including microspheres. The revised language ensures clarity that licensees can use either § 32.72 or § 32.74 to distribute microsources. The amendments to § 32.74 also clarify that the regulation allows distribution to any licensee authorized to use the source or device under 10 CFR part 35 and does not limit distribution to specific types of medical facilities listed under specific subparts to avoid unnecessary limitations. A conforming change to § 30.32 would be made based on the changes in the structure of § 32.72.

These changes are intended to reduce regulatory burden and improve clarity for regulators and, radiopharmacy licensees, medical device manufacturing licensees, and medical licensees. By allowing both §§ 32.72 and 32.74 to serve as licensing pathways for the distribution of microsources, the NRC is allowing licensees to select the most appropriate regulatory framework based on their business model and operational needs. This flexibility supports compliance with USP <825>, enables timely access to microspheres for patient care, and maintains public health and safety.

*Part 34 Reducing Anti-Competitive Barriers and Administrative Requirements for Industrial Radiography*

The NRC's regulations in 10 CFR part 34 establish the specific requirements for industrial radiography. The proposed changes to 10 CFR part 34 in this rulemaking aim to provide greater flexibly in the use of codes and standards, clarify the two-person rule; and update prescriptive administrative requirements to allow for a more performance-based approach, while continuing to ensure the protection of public health and safety.

Current NRC regulations in § 34.20(a)(1) require that radiographic equipment meet the standards in ANSI N432–1980, ''Radiological Safety for the Design and Construction of Apparatus for Gamma Radiography.'' ANSI N432 was incorporated into NRC regulations on January 10, 1990 (55 FR 843) because manufacturers of radiography equipment were not all consistently using ANSI N432, nor were they uniformly or fully implementing the performance criteria intended to improve radiation safety for workers. However, ANSI N432 has been superseded by ANSI N43.9–1991, ''For Gamma Radiography—Specifications for Design and Testing of Apparatus.'' Additionally, other applicable industry standards have also been developed. Pursuant to the SSDR program in § 32.210, radiographic exposure devices, source assemblies, and sealed sources are evaluated using accepted industry standards to provide reasonable assurance that the radiation safety properties of the source or device are adequate to protect health and minimize danger to life and property. The NRC is removing requirements that incorporate specific standards to stay current with the industry as these standards may become obsolete or superseded. The proposed rule would remove the prescriptive and outdated reference to ANSI N432–1980 and instead require that radiography devices, source assemblies, and sealed sources be evaluated and registered in the SSDR. Additionally, since § 34.20 also discusses associated equipment that is not evaluated under the SSDR, the proposed rule would also require that this equipment meets the manufacturers' specifications and instructions. Manufacturer specifications include design elements and criteria necessary for the safe function of the associated equipment. This change will conform § 34.20 with § 32.210 while continuing to ensure that radiography licensees use and maintain the radiography device, sealed source, and associated equipment in accordance with the industry standards and manufacturer requirements it was designed to meet. The removal of the incorporation by reference of an industry standard will also prevent this requirement from becoming superseded and needing to be revised in the future. Further § 34.20(a)(2) will remain to provide a pathway for licensees to use alternative standards on a case-by-case basis. Finally, NRC is proposing a conforming change to § 34.3 to define SSDR for 10 CFR part 34. These changes will ensure that radiation safety is maintained while reducing anti-competitive regulatory barriers and allowing for innovation in the design of radiography equipment.

On May 28, 1997, the NRC issued § 34.41(a) ''Licenses for Industrial Radiography and Radiation Safety Requirements for Industrial Radiographic Operations,'' commonly called ''the two-person rule,'' which requires a second qualified individual (radiographer or radiographer's assistant) to be present during industrial radiography operations at temporary jobsites (TJS) (62 FR 28948). The purpose of the second individual is to provide immediate assistance when required and to prevent unauthorized entry into the restricted area.

Prior to 2021, the NRC had consistently interpreted § 34.41(a) to require both the radiographer and the second qualified individual to maintain direct observation when radiographic operations are being conducted at a TJS. Through operating experience, this interpretation was found to be unnecessary to protect public health and safety, and on June 1, 2021, the NRC reinterpreted the requirement (86 FR 29173).

Since 2021, NRC has interpreted § 34.41(a) such that the requirements contained in the sentence, ''[t]he additional qualified individual shall observe the operation and be capable of providing immediate assistance to prevent unauthorized entry'' are met if the second qualified individual is in sufficiently close proximity to the operation and sufficiently aware of the ongoing activities to be able to provide assistance or take charge when necessary and to prevent unauthorized entry. The second individual may perform other tasks nearby so long as they are cognizant of the site-specific circumstances when radiographic operations are in progress. In 2021, the NRC also determined that this interpretation makes § 34.41(a) consistent with the requirement in § 34.51 that at least one of the two individuals present at a TJS must ''maintain direct observation of the operation,'' the NRC discontinued planned rulemaking after determining that the reinterpretation resolved the issues raised in PRM–34–6 which requested that 10 CFR part 34 clarify requirements related to the responsibilities of the second individual required to be present during radiographic operations.

The proposed rule would combine the requirements in § 34.51 into § 34.41(a) to create a single, concise requirement regarding the availability and surveillance responsibilities of the qualified individuals performing industrial radiography at TJSs. This change seeks to eliminate ambiguity, allowing for technological innovation in the implementation of the requirement, all while maintaining the integrity of the performance requirements. Combining § 34.41 and § 34.51 into a single simplified requirement enhances regulatory clarity by plainly aligning the requirement with the reinterpretation from 2021.

Part 34 of 10 CFR currently contains obsolete and overly prescriptive administrative requirements dating from its last significant revision in 1997 (62 FR 28948). Many of these requirements are not consistent with the NRC's modern and performance-based approach to oversight. For example, the operational history of § 34.101(c), which requires notification when work activities at a TJS exceed 180 days, is unnecessary because the information is collected during routine inspections and does not provide value to the NRC's performance based oversight program. The proposed rule would also reduce administrative burden on licensees by reducing the record keeping requirements in § 34.89(b) to remove duplicative records and by eliminating the notification requirement in § 34.101(c) which required licensees to notify the appropriate NRC Regional Office prior to exceeding 180 days at a TJS in a calendar year. The notification requirement can be eliminated because it can be reviewed through the routine inspection program.

The proposed rule would align leak testing requirements in § 34.27(c) with the SSDR. The sealed source leak testing frequency in the SSDR is based on the specifications of the sealed source specific to the design of the device for which it is used. This proposed change could reduce administrative burden on radiography licensees while ensuring that radiation safety is maintained and the leak testing frequency used is specific to the source model.

The proposed changes would further streamline 10 CFR part 34 by removing the obsolete legacy requirements related to previous rules that are no longer applicable and that were put in place to allow legacy incorporation for certain requirements in §§ 34.13(b)(2), 34.27(e), 34.41(d), 34.43(a)(2),(h), and (i).

The proposed revisions to 10 CFR part 34 would affect industrial radiographic license holders. The changes would reduce the administrative burden on license holders and the changes to streamline and clarify which would enable greater comprehension of the rule and increased compliance. Additionally, the changes to § 34.20 would allow greater flexibility to industrial radiography equipment manufacturers by removing the overly prescriptive performance design criteria that the equipment must currently meet.

*Part 39 Modernizing Well Logging Regulations*

The NRC is proposing to streamline 10 CFR part 39 to by amending requirements related to instrument calibration intervals (§ 39.33(c)(1)), leakage testing for each sealed source (§ 39.35(c)(1)) and certain notification requirements.

Current NRC regulations in § 39.33(c)(1) require that the licensee shall have each radiation survey instrument calibrated at intervals not to exceed 6 months and after instrument servicing. The proposed rule would extend this frequency from 6 months to 12 months to be consistent with other regulations regarding the calibration of survey instruments found in 10 CFR parts 35 and 36. It is necessary that well logging licensees use equipment that has been calibrated to ensure accuracy of radiation emitted and associated radiation detection practices, however, this should be consistent with other regulations. This would ensure that radiation safety is maintained while decreasing administrative and financial burden on the licensee.

The NRC regulations in § 39.35(c)(1) require that each sealed source (except an energy compensation source (ECS)) must be tested for leakage at intervals not to exceed six months. However, other parts of this chapter allow for leak tests to be conducted at frequency outlined in the SSDR, which may list periods longer than six months. The proposed rule would align the leak testing provisions in other parts of NRC regulations and would be consistent with the intervals approved by the NRC or an Agreement State on the SSDR. It is necessary that well logging licensees ensure sealed sources are not leaking; however, this should be consistent with the source design specifications of the SSDR. This would ensure that radiation safety is maintained, and the leak testing frequency used is specific to the source model while reducing administrative and financial burden on the licensee.

Current NRC regulations in § 39.77(c)(1) require that the licensee shall notify the appropriate NRC Regional Office by telephone of the circumstances that resulted in the inability to retrieve the source and obtain NRC approval to implement abandonment procedures. These procedures are reviewed and approved by the NRC during the licensing process. The proposed rule would reduce administrative burden on applicants and licensees by eliminating

the notification requirement in § 39.77(c)(1). The notification requirement can be eliminated because it is not needed for the licensee to implement operating and emergency procedures for abandonment that have already been approved by the NRC during the licensing process. The NRC's approval is for the licensee to implement the procedures that were approved during licensing, which is unnecessary, because the NRC's approval at the time of notification does not change the previously approved procedures. The removal of § 39.77(c)(1) would eliminate the notification and duplicative approval process for implementing abandonment procedures.

*Part 150 Modernizing Requirements for Agreement State Licensees in Part 150*

The proposed changes 10 CFR part 150 concern (1) regulation of special nuclear material of low strategic significance (SNM–LSS), and (2) reciprocity, which allows the NRC to recognize Agreement State licenses in certain circumstances, and vice versa.

First, consistent with Section 274 of the AEA, Agreement States may assume regulatory authority over SNM in quantities not sufficient to form a critical mass, including SNM–LSS. SNM–LSS includes gram quantities of plutonium or uranium-233 or uranium-235, or certain combinations of the three. These materials are used in research or in the manufacture of certain radiation detectors. Currently, there are 10 Agreement State licensees that possess SNM of low strategic significance (SNM–LSS). While otherwise Agreement State licensees, the NRC reserved regulation over SNM–LSS under its common defense and security authority. Thus, Agreement State licensees possessing SNM–LSS must follow § 73.67 pursuant to § 150.14.

Prior to 2023, the NRC had not exercised any oversight over Agreement State licensees for compliance with § 73.67. On March 6, 2023, a Temporary Instruction (TI) 2800/044,''Assessment of Physical Protection Requirements under § 150.14 For Agreement State Licensee Processing, Using, or Transporting Special Nuclear Material of Low Strategic Significance,'' was issued to evaluate, through inspection, whether Agreement State licensees had adequate physical protection processes and procedures in place for the possession, use, and transport of SNM–LSS consistent with the requirements of § 73.67. The NRC inspectors identified, through TI 2800/044 inspections, that Agreement State licensees in possession of SNM–LSS store the material in secure areas where other radioactive materials are stored. Considering the low safety and security significance of SNM–LSS and the results of TI 2800/044 inspections, the NRC determined that security requirements in § 20.1801 ''Security of stored material'' and § 20.1802 ''Control of material not in storage'' are adequate to secure SNM–LSS.

The current regulatory approach for SNM–LSS Agreement State licensees means that these licensees are subject to oversight by both the NRC and their Agreement State regulator (NRC currently oversees physical protection of SNM–LSS and the Agreement State oversees control of radiation hazards associated with the SNM to ensure adequate protection of public health and safety). In addition, the NRC does not have a pathway to recover inspection costs from these Agreement State licensees and the additional cost for these inspections is shouldered by NRC licensees.

The proposed rule would delete § 150.14, which requires Agreement State licensees that possess SNM–LSS to meet the physical protection requirements in § 73.67. The deletion of § 150.14 would affect Agreement State licensees possessing SNM–LSS by removing the requirement to implement the physical protection requirements in § 73.67. Under this change, the NRC would no longer have oversight of SNM–LSS in Agreement States and the Agreement States would continue to maintain oversight of the security of this material under their current programs based on security requirements found in 10 CFR part 20. There would also be a minimal resource savings for the NRC by no longer having regulatory oversight of this requirement.

The proposed rule also addresses reciprocity, which is the NRC's recognition of Agreement State licenses for work performed in areas of NRC jurisdiction, without the licensee having to obtain a specific license from the NRC. Under reciprocity, the NRC grants a GL to Agreement State licensees for work in NRC jurisdiction for periods not exceeding 180 days in a calendar year (except for activities performed in offshore waters which does not have a time period limit). The provisions in § 150.20 require a specific license from an Agreement State as the basis for the GL to be granted. Areas of NRC jurisdiction include non-Agreement States, areas of exclusive Federal jurisdiction, and offshore waters. The term reciprocity is also used in Agreement States to identify Agreement State recognition of an NRC license and licenses from other Agreement States for work performed in their jurisdiction. Some types of activities conducted under reciprocity include radiography, portable gauge use, well logging, leak testing, and calibration.

Activities conducted by Agreement State licensees in an NRC jurisdiction must meet the GL provisions of § 150.20, ''Recognition of Agreement State Licenses.'' Pursuant to this provision, prior to engaging in licensed activities an agreement state licensee must provide an NRC Form 241 ''Report of Proposed Activities in Non-Agreement States,'' a copy of its Agreement State specific license, and the appropriate fee as prescribed in § 170.31. Currently, Agreement State licensees provide these materials at least 3 days before engaging in an activity for the first time in a calendar year. Additionally, Agreement State licensees must file an amended NRC Form 241 to request approval for changes in work locations, radioactive materials, or work activities different from the initial request. Work performed under reciprocity is limited to 180 days in any calendar year, except for offshore activities, which are authorized for an unlimited period in the year. The NRC has published guidance in NUREG–1556, Volume 19, ''Guidance for Agreement State Licensees About NRC Form 241 ''Report of Proposed Activities in Non-Agreement States, Areas of Exclusive Federal Jurisdiction, or Offshore Waters.''

Between 2020 and 2024, the NRC annually processed on average 180 initial reciprocity filings and 1,386 amended reciprocity filings. Most initial reciprocity requests create a significant workload on NRC regional staff to review and approve the requests within the three-day time window. The majority of, if not all, reciprocity initial applications are approved. Additionally, there is an administrative burden on the licensee to ensure timely filing for initial reciprocity and ensure that amended forms are filed when required (*i.e.,* changes in work location, radioactive material, or different work activities).

The information collected on NRC Form 241 provides the NRC an opportunity for oversight including the conduct of inspections. The NRC conducts approximately 21 of these inspections each year. Each year, NRC staff processes hundreds of reciprocity amendments related to offshore work, mostly for changes in location. Due to logistical challenges and expense required to perform inspections offshore, the NRC has not performed

any inspection of offshore work in several years.

The NRC is proposing to revise § 150.20(b)(1) to reduce the notification time for submitting an initial reciprocity filling from three days before engaging in an activity to the day of the activity. The revision would also delete § 150.20(b)(1)(i)–(iii), which currently allows for submittals with less than three days for emergent reasons, as it would be superfluous. The proposed revisions to § 150.20(b)(1) would allow licensees greater flexibility in scheduling licensed activities that require reciprocity with minimal impact on public health and safety. This change would affect Agreement State licensees performing work in areas of exclusive Federal jurisdiction by reducing the administrative burden to file for reciprocity prior to conducting work activities. Specifically, for reciprocity submitted less than three days prior to engaging in the initial work activities, Agreement State licensees would no longer be required to provide additional justification regarding the emergent nature of the work.

For amended reciprocity filings pursuant to § 150.20(b)(2), the proposed revisions would remove the requirement that Agreement State licensees engaging in activities offshore amend the NRC Form 241 for changes in work locations. This proposed change would affect Agreement State licensees working in offshore waters by significantly decreasing the number of amended NRC Form 241s submitted. Correspondingly, this change would also lessen the administrative burden on NRC staff by reducing the number of NRC Form 241s that are required to be processed.

Finally, to allow SGLs from Agreement States to be recognized by the NRC for the purposes of reciprocity, the proposed rule would revise §§ 150.20(a)(1), 150.20(a)(2), 150.20(b), 150.20(b)(1), and 150.20(b)(5) to include SGLs from Agreement States in addition to specific licenses throughout the requirement. These changes would allow Agreement State licensees, that have been granted an SGL, to work in NRC jurisdiction for up to 180 days without obtaining a specific license or SGL from the NRC. This would ensure that SGLs are not precluded from the ability to use the provisions of § 150.20 which would ensure parity between businesses conducting similar licensed activities but operating under a standard general licensees or specific license.

## V. Specific Requests for Comments

The NRC is seeking feedback from the public on the proposed rule. We are particularly interested in comments and supporting rationale from the public on the following:

- The NRC is seeking comments on how many persons that currently possess a specific license for portable gauge activities, fixed gauge activities, limited medical uses, analytical equipment uses, and in vitro testing would transition to a SGL that is described in the changes to 10 CFR part 31 subpart C. The NRC is also seeking comments on the costs and the benefits of the new SGL. Please provide a basis for your response.
- The NRC is seeking comments on possible impacts to small entities. The regulations in § 2.810, ''NRC size standards,'' provide specific size standards to determine whether a licensee qualifies as a small entity in its regulatory programs.
- As part of the wholesale review of regulations the NRC reviewed all reporting and notification requirements that reside within 10 CFR parts 30–39. The NRC is proposing changes to some of these requirements as part of this rulemaking. During the review, the NRC considered revising notification and reporting requirements in § 30.50(b)(2) to exclude the reporting for certain circumstances that fixed gauge licensees may encounter. This requirement currently requires a 24-hour notification and a 30-day written report for a variety of incidents including when a fixed gauge shutter is found to be inoperable and stuck in the open position. During the review, the NRC considered whether the reporting of fixed gauges with stuck shutters in the open position, when the open position is the normal operating mode, and the stuck position has been found by the licensee to pose no radiation hazard to workers, the public, or the environment was necessary. The NRC considered exploring whether it could issue a generic communication to exclude these events by reinterpreting what is meant in § 30.50(b)(2)(ii) by ''the equipment is required to be available and operable when it is disabled or fails to function.'' Alternatively, the NRC considered revising § 30.50 to provide the exclusion for these circumstances related to fixed gauges. Ultimately, the NRC determined that the impacts to the wide range of circumstances that are reported under § 30.50 warrants further review to ensure all consequences are understood. The NRC is seeking comments on whether inoperable fixed gauges that operate with open shutters but have shutters stuck in the open position, that pose no radiation hazard, warrant reporting and notification to the NRC. If reporting and notifications are warranted, the NRC is seeking comments on the appropriate timeline and content of the reports and notifications. Additionally, the NRC is seeking comments on what criteria, related to fixed gauges with stuck shutters, should be included to determine whether a hazard to the workers, the public, or the environment exists as a result of the stuck shutter. Please provide a basis for your response. Finally, the NRC is seeking comments on all event reporting and notification requirements in 10 CFR parts 30–34, 39, 40, and 150 related to the burden, content, and required timeframe associated with each report or notification. Please provide a basis for your response.

## VI. Initial Regulatory Flexibility Analysis

As required by the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission certifies that this rule, if adopted, would not have a significant economic impact on a substantial number of small entities. Therefore, in accordance with section 605(b), the NRC is not preparing a regulatory flexibility certification analysis. This proposed rule would affect a small number of ''small entities'' as defined by the Regulatory Flexibility Act or the size standards established by the NRC (§ 2.810), but it would not be a significant impact.

Any small entity subject to this regulation that determines, because of its size, it is likely to bear a disproportionate adverse economic impact should notify the Commission of this opinion in a comment that indicates—

(a) The licensee's size and how the proposed regulation would impose a significant economic burden on the licensee as compared to the economic burden on a larger licensee;

(b) How the proposed regulations could be modified to take into account the licensee's differing needs or capabilities;

(c) The benefits that would accrue or the detriments that would be avoided if the proposed regulations were modified as suggested by the licensee;

(d) How the proposed regulation, as modified, would more closely equalize the impact of NRC regulations or create more equal access to the benefits of Federal programs as opposed to providing special advantages to any individual or group; and

(e) How the proposed regulation, as modified, would still adequately protect public health and safety.

Comments should be submitted as indicated under the **ADDRESSES** caption.

## VII. Regulatory Analysis

*A. Introduction*

The NRC has prepared a draft regulatory analysis on this proposed rule. The analysis examines the costs and benefits of the alternatives considered by the NRC. The NRC has preliminarily determined that the proposed action in this rule is expected to reduce regulatory burden and generate cost savings for licensees, the NRC and the Agreement States, when compared to the no-action alternative. The NRC requests public comment on the draft regulatory analysis. Comments on the draft regulatory analysis may be submitted to the NRC as indicated under the **ADDRESSES** caption of this document.

*B. Identification and Preliminary Analysis of Alternative Approaches*

The NRC identified two alternatives for this action: (1) no action (*i.e.,* maintaining the status quo regulatory baseline), and (2) the proposed rulemaking to revise language for the licensing of byproduct material.

The assessment of total costs and benefits discussed previously leads the NRC to the conclusion that the proposed rule, if implemented, would result in quantifiable net cost savings for industry, the NRC and Agreement States. In addition, the NRC concludes that the rule provides nonquantified benefits of regulatory clarity and improved consistency in the regulatory program. The proposed rule is also responsive to stakeholder feedback and aligns with E.O. 14300.

## VIII. Backfitting and Issue Finality

The NRC has determined that this proposed rule would not constitute backfitting as that term is defined in the NRC's backfitting provisions in §§ 50.109, 70.76, 72.62, and 76.76, all titled ''Backfitting,'' or affect the issue finality of an approval issued under 10 CFR part 52, ''Licenses, Certifications, and Approvals for Nuclear Power Plants.'' The proposed amendments would not include any provisions that would impose new or modified requirements on existing licensees, applicants, or certificate holders that are within the scope of a backfitting or issue finality provision. The proposed changes would not inextricably affect activities of licensees that are within the scope of the backfitting or issue finality provisions. Additionally, 10 CFR part 70 licensees within the scope of § 70.76 would not be impacted by this proposed rule. Each of these licensees is already required to submit a site-specific financial assurance plan because their authorized possession limits already exceed the proposed table values. For these reasons, the proposed rule would not meet the definition of ''backfitting'' under § 50.109, § 70.76, § 72.62, or § 76.76, or affect the issue finality of an approval issued under 10 CFR part 52.

This proposed rule also includes the draft guidance documents described in section XIV, ''Availability of Guidance,'' These documents if finalized, would not constitute backfitting as defined in § 50.109, § 70.76, § 72.62, or § 76.76 or affect the issue finality of any approval issued under 10 CFR part 52 because the guidance would not inextricably affect activities of licensees that are within the scope of the backfitting or issue finality provisions. The guidance would not impose new or modified requirements on existing licensees, applicants, or certificate holders that are within the scope of a backfitting or issue finality provision.

## IX. Cumulative Effects of Regulation

The NRC seeks to minimize potential negative consequences resulting from the cumulative effects of regulation (CER). The NRC believes that the de-regulatory impacts of this rulemaking activity are unlikely to cause implementation challenges for stakeholders. In addition, during the pendency of this rulemaking, the NRC is deprioritizing issuance of regulatory actions that might influence the implementation date for the new rule requirements (*e.g.,* orders, generic communications, license amendment requests, and inspection findings of a generic nature).

To fully understand any potential CER implications that could result from this rulemaking, the NRC is asking the following questions. Response to these questions is voluntary and any input will be considered during development of the final rule.

1. The NRC is proposing an effective date that will be 30 days after the date of publication of a final rule. Does this provide sufficient time to implement the proposed requirements? Please provide a rationale for your response.

2. Are there unintended consequences related to this rulemaking and how should they be addressed? Please provide a rationale for your response.

3. Please comment on the NRC's cost and benefit estimates in the regulatory analysis that supports this proposed rule.

## X. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, ''Plain Language in Government Writing,'' published June 10, 1998 (63 FR 31883). The NRC requests comment on this document with respect to the clarity and effectiveness of the language used.

## XI. Environmental Assessment

*A. Introduction*

The NRC has prepared this environmental assessment (EA) of the proposed rule amending regulations for byproduct, source, and special nuclear material use to determine the significance of the environmental effects of the proposed agency action in accordance with the National Environmental Policy Act of 1969, as amended (NEPA) and the NRC's NEPA implementing regulations in 10 CFR part 51, ''Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions.'' As explained below, the NRC has preliminarily determined that the proposed agency action to modernize the NRC regulations for byproduct, source, and special nuclear material use would have no significant effect on the quality of the human environment.

*B. Environmental Impacts of the Proposed Action*

The proposed action would amend multiple NRC regulations in 10 CFR parts 30, 31, 32, 34, 39, 40, 70, and 150 regarding licensed material use. Conforming changes would also be made to guidance consistent with the changes to regulations. Table B–1 lists the sections of the regulations that would be updated and the affected guidance documents.

TABLE B–1 REGULATION UNDER THE PROPOSED MODERNIZING NRC REGULATIONS FOR BYPRODUCT MATERIAL USE

| Rulemaking | Regulations | Guidance |
|---|---|---|
| Modernizing NRC Regulations for Byproduct Material Use. | 30.4, 30.6, 30.32, 30.34, 30.35, 30.41, Appendix B to Part 30, 31.5, 31.11, 31.13 (new), 31.14 (new), 31.15 (new), 31.16 (new), 31.17 (new), 31.18 (new), 32.12, 32.16, 32.20, 32.25, 32.29, 32.32, 32.72, 32.74, 34.3, 34.13, 34.20, 34.23, 34.27, 34.33, 34.41, 34.43, 34.51, 34.89, 34.101, 39.33, 39.35, 39.77, 40.53, 70.25, 150.14, 150.20 | Interim Staff Guidance. |

Conforming changes are administrative actions with no physical environmental effect and provide for the appropriate administrative and regulatory framework for byproduct material use under 10 CFR. An example would be adding a reference to a newly created subsection in an existing regulation. Most of the amendments to NRC regulations in the proposed rule occur within the affected regulation. The proposed rule includes conforming changes to NRC regulations in 10 CFR parts 30, 32, and 34.

B.1 Rule Amendments Addressed Under Categorical Exclusion

The NRC has determined that some of the changes to the regulations identified in this proposed rule meet the criteria for categorical exclusion under § 51.22, ''Categorical Exclusions.'' Categorical exclusions provide a mechanism to identify Federal actions that normally do not have a significant environmental effect on the human environment and for which neither an EA nor environmental impact statement is normally required. This ensures that resources are not expended on the environmental analysis of proposed actions that do not present the potential for significant environmental effects. Rule amendments with applicable categorical exclusions are presented in Table B–2 below and no further NEPA analysis is required.

These proposed rule amendments belong to categories of actions which the Commission, by rule or regulation, has declared to be a categorical exclusion, after first finding that the category of actions do not individually or cumulatively have a significant effect on the human environment. In reviewing list of regulations in Table B–1, the NRC staff have determined that several of the rule amendments under consideration are actions eligible for categorical exclusion under § 51.22(a)(1) or § 51.22(a)(3). The following rulemaking actions meet the criterion for categorical exclusion under § 51.22(a)(1) or § 51.22(a)(3):

TABLE B–2 RULE AMENDMENTS COVERED BY CATEGORICAL EXCLUSION

| Rule amendments | Categorical Exclusion | Reason |
|---|---|---|
| 30.4; 30.6; 30.32; 30.41 31.5; 31 subparts A, B, D and E. 34.3, 34.13; 34.20; 34.23; 34.27; 34.33; 34.43; 34.89; 34.101; 39.33; 39.35; 39.77. | § 51.22(a)(1) | Actions that are administrative, procedural, or solely financial in nature, including examples (iv) and (vi). Example (iv): issuance of or changes to administrative procedures or requirements. Example (vi): the proposed amendments are also corrective or of a minor or nonpolicy nature, and do not substantially modify existing regulations. |
| 30.34, 30.35; 32.12; 32.16; 32.20; 32.25; 32.29; 32.32; 40.53; 70.25. | § 51.22(a)(1) | Actions that are administrative, procedural, or solely financial in nature, including Example (ii): issuance of or changes to recordkeeping or reporting requirements. |

These proposed rule amendments clarify NRC regulations and would not change radiation protection and emergency preparedness requirements while continuing to provide reasonable assurance of adequate protection of public health and safety.

B.2 Rule Amendments Requiring Environmental Assessment

The NRC also evaluated rule amendments that have the potential to affect the human environment and determined that the proposed agency action (rulemaking) would not have a significant environmental effect. These rule amendments would clarify NRC regulations, would not change existing radiation protection and emergency preparedness requirements or overall risk, would continue to provide reasonable assurance of adequate protection of public health and safety, and would result in no new or different environmental effects. The following table presents the basis for why these proposed rule amendments would have no significant environmental effects.

TABLE B–3 BASIS FOR NO SIGNIFICANT ENVIRONMENTAL EFFECTS DETERMINATION FOR RULE AMENDMENTS NOT COVERED BY A CATEGORICAL EXCLUSION

| Rule amendments | Basis for no significant environmental effects |
|---|---|
| Part 30, Appendix B ..... | These proposed amendments would replace the current values in appendix B with applicable values from the table in appendix C, ''Quantities of Licensed Material Requiring Labeling,'' to 10 CFR part 20, ''Standards for Protection against Radiation.'' They also add radionuclides not currently listed in appendix B to 10 CFR part 30, including radionuclides associated with industrial technologies and current and emerging medical uses. The proposed changes would also remove all radionuclides with a half-life of 120 days or less from the appendix, since these radionuclides are not considered when developing decommissioning financial assurance, and amends the title of the table to ''Quantities of Licensed Material Used to Assess Financial Assurance for Decommissioning,'' to more accurately reflect its current use for financial assurance during decommissioning. These changes will either reduce or not affect the amount of DFA required for licensees, depending on the mixture of radionuclides the licensee possesses and would have no different environmental effects. Thus, this regulatory change would have no significant effect on the quality of the human environment. |
| 31.11 ..... | Amendments would allow entities to handle vials for in vitro testing with higher activity under a general license. This change would align limits for carbon-14, hydrogen-3, selenium-75, and cobalt-57 with the exempt quantity limits in 10 CFR part 30 and labelling requirements in appendix C to 10 CFR part 20. The limits in § 31.11 have not been updated since their initial issuance in 1968 and the amendments would bring § 31.11 in step with current regulatory limits in 10 CFR parts 20 and 30. Given that the amendments would align with other existing requirements in 10 CFR parts 20 and 30, the amendments would have no significantly different environmental effects than those evaluated for 10 CFR part 20, and, thus, would have no significant effect on the quality of the human environment. |
| Subpart C—Standard General Licenses: New regulations 31.13 through 31.18. | The amendments to this subpart would establish a new regulatory program and grant standard general licenses in accordance with specific conditions. Each technology would have its own standard general license requirements codified in separate regulations, including:<br>• § 31.14: Certain Fixed Gauging;<br>• § 31.15: Portable Gauging;<br>• § 31.16: Certain Medical Uses;<br>• § 31.17: Certain Analytical Equipment Including Electron Capture Detectors, X-Ray Fluorescence Devices, and Ion Generators; and<br>• § 31.18: Certain In Vitro Testing.<br>These amendments propose a new class of general licenses for some low risk standardized operations that are currently specifically licensed, and all of the specifically licensed activities are currently categorically excluded. Because the NRC previously concluded that these activities do not individually or cumulatively have a significant effect on the human environment, no additional analysis is needed. Additionally, these amendments do not authorize any activities not included in 10 CFR part 30. |
| 32.72; 32.74 ..... | The proposed amendments to § 32.72, commercial distribution of radioactive drugs for medical use under 10 CFR part 35, would be expanded to include microsources (e.g., microspheres) allowing radiopharmacies to prepare and distribute these materials. Proposed amendments would also provide flexibility for future distribution authorized by the U.S. Food and Drug Administration (FDA) or State regulatory bodies. In addition, proposed amendments to § 32.74 would clarify the distribution of sources and devices containing byproduct material. These two changes would ensure that manufacturers and commercial radiopharmacies can be licensed to distribute microsources in a manner consistent with NRC safety requirements and FDA classifications, while minimizing burden on radiopharmacy and medical use licensees. These changes are administrative and procedural and would not authorize any site-specific action on the part of the NRC or licensee. Licensees and applicants would need to request and receive separate regulatory approval before preparing and distributing microsources. Consequently, this rulemaking provides the basis for any procedure granting the license but does not, by its own operation, provide a license for preparation or distribution activities, but rather applicants must comply with the relevant NRC or Agreement State regulations before they can receive a license. Therefore, this rulemaking will not result in any physical impacts to the environment, and the NRC has determined that the action would result in no significant environmental impacts. |
| 34.41; 34.51 ..... | These proposed amendments would combine the requirements in § 34.51 with requirements in § 34.41(a), commonly called ''the two-person rule,'' ''Licenses for Industrial Radiography and Radiation Safety Requirements for Industrial Radiographic Operations'' and eliminate § 34.51. The regulation requires a second qualified individual (radiographer or radiographer's assistant) to be present during industrial radiography operations at temporary jobsites. The revision eliminates ambiguity, allowing for technological innovation in the implementation of the requirement, all while maintaining the integrity of the performance requirements. This action does not alter any the substantive activities under § 34.41(a), and would have no significantly different environmental impacts than those evaluated for § 34.41(a), and, thus, would have no significant effect on the quality of the human environment. |

These proposed rule amendments would modernize existing NRC regulations while ensuring the continued safe, effective, and efficient use of byproduct material to provide reasonable assurance of adequate protection of public health and safety. As noted in Table B–3, these amendments either consist of administrative and procedural changes, or would have no significantly different environmental effects than those in the current regulatory framework. The table also provides rationale supporting the conclusion that these proposed rule amendments would not result in any significant environmental effects.

*C. Summary of the Environmental Impacts of the Proposed Action*

Implementation of the proposed rule would result in no physical changes to the environment, and, therefore, the NRC has determined that this proposed agency action would not have a significant effect on the quality of the human environment. Proposed rule amendments include changes that: (1) are administrative in application and matters of procedure, (2) clarify record keeping and reporting requirements, and (3) would provide an equivalent level of safety and security as current NRC regulations.

In addition, the proposed rule would not affect any threatened or endangered

species or historic properties, as no physical changes to the human environment would occur as a result of this proposed agency action. Accordingly, the NRC finds that the proposed rulemaking would have no significant environmental impact.

*D. Environmental Impacts of the Alternative to the Proposed Agency Action*

Under the no-action alternative (*i.e.,* the status quo), NRC regulations would remain unchanged. As stated in section B of this draft EA, the proposed rule would not have a significant effect on the quality of the human environment. Therefore, the no action alternative and the proposed agency action (*i.e.,* proposed rulemaking) would have the same environmental effect, although there would be costs attributable to reviewing the environmental effects of exemption and license amendment requests under the no action alternative. Licensees would continue to comply with existing NRC regulations or request regulatory relief (exemption) from the regulations. The NRC would continue to evaluate the environmental effects of exemption and license amendment requests. The averted costs (benefits) of the rulemaking would not occur. The Regulatory Analysis for the proposed rule provides information about the costs and benefits of the no action alternative and the proposed agency action (ADAMS Accession No. ML26125A393).

*E. Agencies and Persons Consulted*

The NRC developed the proposed rule and is requesting public comment on this draft EA. The agency will consider comments received on the docket as it develops the final rule and the final EA. The NRC will issue the final EA when it publishes the final rule. The proposed rule is one step in the rulemaking process.

As discussed in section B, the proposed rule provisions would not have a significant effect on the quality of the human environment. For this reason, the proposed rulemaking would not impact threatened or endangered species or critical habitat, and the NRC has determined that section 7 consultation under the Endangered Species Act of 1973, as amended, is not necessary. The proposed regulatory changes do not involve any ground disturbing activities or visual effects that would adversely affect historic properties. Therefore, the NRC has determined that consultation is not required under section 106 of the National Historic Preservation Act of 1966, as amended.

*F. Draft Finding of No Significant Environmental Impacts*

The NRC has prepared this EA to determine the environmental effects of the proposed agency action (*i.e.,* a rulemaking to update NRC regulations). Proposed rule amendments are primarily administrative or procedural in nature and thus would not have any physical environmental effect. As explained in the EA, the NRC has determined the proposed rulemaking would not change radiation protection and emergency preparedness requirements or overall risk, would continue to provide reasonable assurance of adequate protection of public health and safety, and would result in no new or different environmental effects. Therefore, the NRC concludes that the proposed regulatory changes would not have a significant effect on the quality of the human environment. Based on this conclusion, the NRC finds the proposed agency action would have no significant environmental impact. Accordingly, the NRC has determined there is no need to prepare an environmental impact statement.

Concurrent with the publication of this proposed rule, the NRC has sent a copy of the draft EA and this proposed rule to every State Liaison Officer and has requested comments.

**XII. Paperwork Reduction Act Statement**

This proposed rule contains new or amended collections of information subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq). This proposed rule has been submitted to the Office of Management and Budget for review and approval of the information collections.

*Type of submission:* New.

*The title of the information collection:* Modernizing NRC Regulations for Byproduct Material Use.

*The form number if applicable:* NRC Forms 241, 313, 483, and 1003.

*How often the collection is required or requested:* Once, on occasion, and annually.

*Who will be required or asked to respond:* Applicants and licensees licensed to use byproduct, source, and special material.

*An estimate of the number of annual responses:*

10 CFR part 30: 570 (423 reporting responses + 147 recordkeepers)
10 CFR part 31: 1,449 (354 reporting responses + 1,095 recordkeepers)
10 CFR part 32: −109 (−109 reporting responses + 0 recordkeepers)
10 CFR part 34: −577 (−29 reporting responses + −548 recordkeepers)
10 CFR part 39: −8 (−8 reporting responses + 0 recordkeepers)
10 CFR part 40: −27 (−27 reporting responses + 0 recordkeepers)
NRC Form 241: −425 (−425 reporting responses + 0 recordkeepers)
NRC Form 313: −398 (−398 reporting responses + 0 recordkeepers)
NRC Form 483: 60 (60 reporting responses + 0 recordkeepers)
NRC Form 1003: 1,289 (1,289 reporting responses + 0 recordkeepers)
Total: 2,221 (1,528 reporting responses + 693 recordkeepers)

*The estimated number of annual respondents:*

10 CFR part 30: 423 respondents
10 CFR part 31: 1,095 respondents
10 CFR part 32: −109 respondents
10 CFR part 34: −548 respondents
10 CFR part 39: −2 respondents
10 CFR part 40: −27 respondents
NRC Form 241: −25 respondents
NRC Form 313: −398 respondents
Form 483: 60 respondents
NRC Form 1003: 398 respondents
Total: 897 unique respondents to the requirements in this proposed rule

An estimate of the total number of hours needed annually to comply with the information collection requirement or request:

10 CFR part 30: 23,736.6 (23,590 reporting + 146.6 recordkeeping)
10 CFR part 31: 1,490.3 (118.55 reporting + 1,371.8 recordkeeping)
10 CFR part 32: −34.55 (−34.5 reporting + 0 recordkeeping)
10 CFR part 34 −288.5 (−14.5 reporting + –274 recordkeeping)
10 CFR part 39: −4 (−4 reporting + 0 recordkeeping)
10 CFR part 40: −13.5 (−13.5 reporting + 0 recordkeeping)
NRC Form 241: −106.3 (−106.3 reporting + 0 recordkeeping)
NRC Form 313: −1,711.4 (−1,711.4 reporting + 0 recordkeeping)
NRC Form 483: −10.2 (−10.2 reporting + 0 recordkeeping)
NRC Form 1003: 881.55 (881.5 reporting + 0 recordkeeping)
Total: 23,960.4 (22,716.2 reporting + 1,244.4 recordkeeping)

Abstract: The NRC is proposing to amend its regulations to modernize the safe, effective, and efficient use of byproduct, source, and special nuclear material. This action would reduce licensing burden and the need for exemptions from existing regulations; address other deregulatory issues deemed relevant by the NRC; and support the NRC's Principles of Good Regulation, including openness, clarity, and reliability. This effort is consistent with, and implements direction in, the Accelerating Deployment of Versatile,

Advanced Nuclear for Clean Energy Act of 2024 (ADVANCE Act), and recently issued E.O. 14300, ''Ordering the Reform of the Nuclear Regulatory Commission.''

The proposed rule covers a wide range of topics, including the following that would result in a reduction in recordkeeping and reporting requirements:

- Establishing a low burden class of standard GLs.
- Revising the decommissioning financial assurance tables.
- Addressing anti-competitive barriers.
- Reducing reporting of distribution to exempt persons.
- Removing or modifying redundant and unnecessary regulations.
- Reducing the burden for filing amended NRC Form 241's for work activities conducted in offshore waters.

This information collection includes burden reduction associated with revised information collection in 10 CFR parts 30, 31, 32, 34, 39, 40, and Forms 241, 483, and 313. It also includes burden associated with new information collection in proposed 10 CFR part 31 and proposed NRC Form 1003 that would create a low burden licensing option for licensees currently licensed under 10 CFR part 30 who use NRC Form 313.

The NRC is seeking public comment on the potential impact of the information collections contained in this proposed rule and on the following issues:

1. Is the proposed information collection necessary for the proper performance of the functions of the NRC, including whether the information will have practical utility? Please explain your response.
2. Is the estimate of the burden of the proposed information collection accurate? Please explain your response.
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected? Please explain your response.
4. How can the burden of the proposed information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the Office of Management and Budget (OMB) clearance package and proposed rule are available in the ''Availability of Documents'' section of this document or may be viewed free of charge by contacting the NRC's Public Document Room reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* You may obtain information and comment on submissions related to the OMB clearance package by searching on *https://www.regulations.gov* under Docket ID NRC–2025–1205.

You may submit comments on any aspect of these proposed information collection(s), including suggestions for reducing the burden and on the above issues, by the following method:

*Federal rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2025–1205.

Submit comments by June 17, 2026. Comments received after this date will be considered if it is practical to do so, but the NRC staff is able to ensure consideration only for comments received on or before this date.

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the document requesting or requiring the collection displays a currently valid OMB control number.

## XIII. Coordination With NRC Agreement States

On September 3, 2025, the NRC held a Government-to-Government meeting with the OAS to discuss this rulemaking. The rulemaking working group that prepared this proposed rule also included representatives from OAS. Comments from the Agreement States were taken into consideration during the development of this proposed rule.

## XIV. Compatibility of Agreement State Regulations

On the basis of the ''Agreement State Program Policy Statement'' approved by the Commission on October 2, 2017, and published in the **Federal Register** (82 FR 48535; October 18, 2017), NRC program elements can be placed into six categories (A, B, C, D, NRC, or health and safety (H&S)) to form the basis for evaluating and classifying the program elements. Under the Policy Statement, a program element means any component or function of a radiation control regulatory program, including regulations and other legally binding requirements imposed on regulated persons, which contributes to implementation of that program.

Compatibility Category A are those program elements that include basic radiation protection standards and scientific terms and definitions that are necessary to understand radiation protection concepts. Compatibility Category A program elements adopted by an Agreement State should be essentially identical to those of the NRC to provide uniformity in the regulation of agreement material on a nationwide basis.

Compatibility Category B pertains to a limited number of program elements that cross jurisdictional boundaries and should be addressed to ensure uniformity of regulation on a nationwide basis. For Compatibility Category B, the Agreement State program element shall be essentially identical to that of NRC.

Compatibility Category C are those program elements that are important for an Agreement State to have in order to avoid conflict, duplication, gaps, or other conditions that would jeopardize an orderly pattern in the regulation of agreement material on a national basis. An Agreement State program shall embody the essential objectives of the Category C program elements. Under Category C, Agreement State program elements may be more restrictive than NRC program elements; however, they should not be so restrictive as to prohibit a practice authorized by the AEA, as amended, and in the national interest without an adequate public health and safety or environmental basis related to radiation protection.

Compatibility Category D are those program elements that do not meet any of the criteria of Category A, B, or C, above, and are not required to be adopted by Agreement States for purposes of compatibility. An Agreement State has the flexibility to adopt and implement program elements within the State's jurisdiction that are not addressed by the NRC or that are not required for compatibility (*i.e.,* Compatibility Category D). However, such program elements of an Agreement State relating to agreement material shall (1) not create conflicts, duplications, gaps, or other conditions that would jeopardize an orderly pattern in the regulation of agreement material on a nationwide basis; (2) not preclude a practice authorized by the AEA and in the national interest; and (3) not preclude the ability of the NRC to evaluate the effectiveness of Agreement State programs for agreement material with respect to protection of public health and safety.

Compatibility Category NRC are those program elements that address areas of regulation that cannot be relinquished to the Agreement States under the AEA, or provisions of 10 CFR. The NRC maintains regulatory authority over these program elements and the Agreement States must not adopt these NRC program elements. However, an Agreement State may inform its licensees of these NRC requirements through a mechanism under the State's administrative procedure laws, as long

as the State adopts these provisions solely for the purposes of notification, and does not exercise any regulatory authority as a result.

Category H&S program elements embody the basic health and safety aspects of the NRC's program elements. Although H&S program elements are not required for purposes of compatibility, they do have particular health and safety significance. The Agreement State must adopt the essential objectives of such program elements to maintain an adequate program.

This proposed rule is a matter of compatibility between the NRC and the Agreement States, thereby providing consistency among Agreement State and NRC requirements. In this proposed rule, the NRC is not proposing to change the compatibility categories for requirements that are being amended. Therefore, for any requirements that are currently designated as Compatibility A or B, States would have to amend their rules to be essentially identical to the amended rule language.

However, for requirements that are designated as Compatibility C or Category H&S, States may not necessarily have to revise their rules so long as their current rule meets the essential objective for the amended requirement. For instance, the essential objective for § 150.20, is for Agreement States to provide reciprocal recognition of a specific license issued by the NRC or another Agreement State. However, proposed changes to § 150.20 include permitting SGLs to be used for the basis of reciprocal recognition. The NRC is proposing that the Compatibility Category of § 150.20 remain Category C, but to continue to meet the essential objective for the amended requirement, all Agreement States would be required to provide reciprocal recognition of a specific license or SGL issued by the NRC or another Agreement State. The State would have flexibility in the administration and requirements for reciprocity and would not need to revise their current program to remain compatible with the proposed revision to § 150.20.

The NRC is also proposing to remove requirements in §§ 34.20(d) and (e), 34.41(d), 34.43(a)(2), 34.43(h) and (i), 34.51, 34.101(c), and 39.77(c)(1). Except for 34.20(e), these requirements pertain to grandfathering and duplicative requirements and, as such, Agreement States are not required to also remove those regulations; Agreement States keeping their equivalent to the listed regulations (except for § 34.20(e)) would not lead to a disorderly pattern of regulation on a nationwide basis. However, Agreement States should remove their equivalent to § 34.20(e) to remove superseded standards and requirements. Failure to remove this would result in gaps and conflicts between programs in the National Materials Program that would negatively impact the uniformity of regulation on a nationwide basis because only radiographic equipment that meets the appropriate standards and requirements can used by licensees.

In developing the new SGL pathway, the NRC recognizes that Agreement States may not want to adopt the new subpart C of 10 CFR part 31, and it would therefore not be required for purposes of compatibility. For States that choose to adopt this pathway, some of the requirements would be required for either compatibility or H&S purposes. To ensure that transferors of devices and byproduct material are permitted to transfer materials to an SGL, the requirement in § 30.41(d)(1) is being revised.

The NRC is proposing that the Compatibility Category of § 30.41 remain Category C, but the NRC is proposing to clarify that to meet the essential objective for the amended requirement, all Agreement States must ensure that a validated SGL is an acceptable method of verification for § 30.41(c). Since a validated SGL is a verification method for transferring byproduct material under § 30.41(d), the requirement in § 31.13(a)(2), regarding issuing the validated SGL, is proposed to be designated as Compatibility Category C for Agreement States that adopt the SGL pathway. To meet the essential objective for § 31.13(a)(2), an Agreement State would need to issue a document validating an SGL. The SGL pathway codifies the minimum legally binding requirements needed to ensure health and safety that are required to obtain a specific license into the regulations, and it is therefore necessary that the State meet the essential objective for those requirements that have been designated as Compatibility Category C.

Provisions specifying the specific sealed sources and devices that are permitted under the SGL pathway are based on the SSDR use codes and have a proposed designation of Compatibility Category B since there is need for consistency across jurisdictions when using SSDRs for licensing purposes. The SGL for Certain Medical Uses includes an exhaustive list of the radionuclides authorized pursuant to 31.16(a)(2). Because 31.16(a)(2) is proposed to be designated Compatibility Category C, Agreement States would have the flexibility to permit other radionuclides than those authorized under the SGL to be used. However, authorizing additional radionuclides such as PET or generators other than Molybdenum-99/technetium-99m generators would not meet the essential objective for this requirement as these radionuclides or uses require additional licensing requirements to ensure an adequate level of safety. Administrative requirements, such as recordkeeping, are not required for purposes of compatibility and would be Compatibility Category D.

The proposed compatibility (A, B, C, D, and NRC) and adequacy (H&S) categories are designated in the following table.

ADEQUACY AND COMPATIBILITY TABLE

| Section | Change | Subject | Compatibility | |
|---|---|---|---|---|
| | | | Existing | New |
| **Part 30** | | | | |
| 30.4 | Amend | Definitions—Consortium | C | C. |
| 30.4 | Remove | Definitions—Physician | D. | |
| 30.4 | Amend | Definitions—Principal activities | D | D. |
| 30.6(b)(1) | Amend | Communications | D | D. |
| 30.32(j)(2) | Amend | Application for specific licenses | B | B. |

| 39.35(c) | Amend | Leak testing of sealed sources | C | C. |
| 39.77(c)(1) | Remove | Notification of incidents: abandonment procedures for irretrievable sources. | C. | |
| **Part 40** | | | | |
| 40.53(c) | Amend | Conditions for licenses issued for initial transfer of certain items containing source material: Quality control, labeling, and records. | NRC | NRC. |
| **Part 70** | | | | |
| 70.25(a)(2) | Amend | Financial Assurance and Recordkeeping for Decommissioning. | NRC | NRC. |
| 70.25(b) | Amend | Financial Assurance and Recordkeeping for Decommissioning. | H&S | H&S. |
| **Part 150** | | | | |
| 150.14 | Remove | Commission regulatory authority for physical protection.. | NRC. | |
| 150.20 | Amend | Recognition of Agreement State licenses. | C | C. Note—States should not incorporate references to offshore waters. |

*Please Note:* The bracket ''[]'' around a compatibility category designation means that the section may have been adopted elsewhere in a State's rules and it is not necessary to adopt it again.

## XV. Coordination With the Advisory Committee on the Medical Uses of Isotopes

The ACMUI established a subcommittee to review and comment on the draft proposed rule. The subcommittee will make its recommendations to the full committee on this proposed rule at a publicly held teleconference during the public comment period.

## XVI. Voluntary Consensus Standards

The National Technology Transfer and Advancement Act of 1995, Public Law 104–113, requires that Federal agencies use technical standards that are developed or adopted by voluntary consensus standards bodies unless the use of such a standard is inconsistent with applicable law or otherwise impractical. The NRC's goals in amending these regulations are to modernize the safe, effective, and efficient use of byproduct material. This action would reduce licensing burden and the need for exemptions from existing regulations and address other deregulatory issues deemed relevant by the NRC. This action does not constitute the establishment of a standard that contains generally applicable requirements.

## XVII. Availability of Guidance

The NRC expects to update NUREG–1556 series ''Consolidated Guidance About Materials Licenses'', NUREG 1757, Volume 1, ''Consolidated Decommissioning Guidance,'' various Inspection Procedures, and certain Inspection Manual Chapters to make changes to conform with this rulemaking effort. To support an accelerated development schedule for this proposed rule, the updates will be made in a future revision of the guidance, rather than concurrently with this rulemaking. However, for the new SGL program that is proposed in 10 CFR part 31 subpart C, the NRC has drafted interim guidance to aid licensees and the NRC in implementation of the new licensing option. The NRC has also drafted interim staff guidance to address the revised reciprocity requirements in § 150.20, using a Frequently Asked Questions format. The interim guidance will be added to the NRC's public website. You may submit comments on the draft interim guidance by the methods outlined in the **ADDRESSES** section of this document

## XVIII. Executive Orders

The following are Executive orders that are related to this proposed rule:

*A. Executive Order 12866: Regulatory Planning and Review (as Amended by Executive Order 14215, Ensuring Accountability for All Agencies)*

The Office of Information and Regulatory Affairs (OIRA) has determined that this proposed rule is a

significant regulatory action. Accordingly, the NRC submitted this proposed rule to OIRA for review. The NRC is required to conduct an economic analysis in accordance with section 6(a)(3)(B) of E.O. 12866. More can be found in Section VII, of this document, ''Regulatory Analysis.''

*B. Executive Order 14154: Unleashing American Energy*

NRC has examined this proposed rule and has determined that it is consistent with the policies and directives outlined in E.O. 14154.

*C. Executive Order 14192: Unleashing Prosperity Through Deregulation*

This action is tentatively determined to be a deregulatory action as defined by E.O. 14192. Details on the estimated costs of this proposed rule can be found in Section VII, of this document, ''Regulatory Analysis.''

*D. Executive Order 14267: Reducing Anti-Competitive Regulatory Barriers*

E.O. 14267 requires the NRC to identify anti-competitive regulations for recission or modification. It also serves an important regulatory goal. The NRC identified § 30.4 because this regulation creates a barrier to market participation by creating artificial barriers to facility location related to consortiums and PET radionuclide production. In addition, NRC identified § 34.20(a)(1) because this regulation creates a barrier to market participation by limiting the universe of acceptable radiography designs. The NRC identified 10 CFR part 31 because this regulation creates a barrier to market participation by increasing the compliance requirements on all market participants. The proposed changes to 10 CFR part 31 support the objectives of E.O. 14267 by adding standard general licensing pathway and thereby expanding the scope of general licenses for byproduct material to include additional devices and more activities.

*E. Executive Order 14270: Zero-Based Regulatory Budgeting To Unleash American Energy*

E.O. 14270, ''Zero-Based Regulatory Budgeting to Unleash American Energy,'' requires the NRC to insert a conditional sunset date into all new or amended NRC regulations provided the regulations are (1) promulgated under the Atomic Energy Act of 1954, as amended (AEA), the Energy Reorganization Act of 1974, as amended (ERA), and the Nuclear Waste Policy Act of 1982, as amended (NWPA); (2) not statutorily required; and (3) not part of the NRC's permitting regime. The NRC determined that the regulatory changes proposed in this rule are required because they would be necessary for providing reasonable assurance of adequate protection of public health and safety and provide for the common defense and security, and would be part of the NRC's permitting regime authorized by the AEA. Therefore, the NRC views this rulemaking to be outside the scope of E.O. 14270 and did not insert conditional sunset dates for the regulatory changes in this proposed rule.

## XIX. Availability of Documents

The documents identified in the following table are available to interested persons through one or more of the following methods, as indicated.

**List of Subjects**

*10 CFR Part 30*

Byproduct material, Criminal penalties, Government contracts, Intergovernmental relations, Isotopes, Nuclear energy, Nuclear materials, Penalties, Radiation protection, Reporting and recordkeeping requirements, Whistleblowing.

*10 CFR Part 31*

Byproduct material, Criminal penalties, Labeling, Nuclear energy, Nuclear materials, Packaging and containers, Penalties, Radiation protection, Reporting and recordkeeping requirements, Scientific equipment.

*10 CFR Part 32*

Byproduct material, Criminal penalties, Labeling, Nuclear energy, Nuclear materials, Radiation protection, Reporting and recordkeeping requirements.

*10 CFR Part 34*

Criminal penalties, Manpower training programs, Occupational safety and health, Packaging and containers, Penalties, Radiation protection, Radiography, Reporting and recordkeeping requirements, Scientific equipment, Security measures, X-rays.

*10 CFR Part 39*

Byproduct material, Criminal penalties, Labeling, Nuclear energy, Nuclear material, Occupational safety and health, Oil and gas exploration—well logging, Penalties, Radiation protection, Reporting and recordkeeping requirements, Scientific equipment, Security measures, Source material, Special nuclear material.

*10 CFR Part 40*

Criminal penalties, Exports, Government contracts, Hazardous materials transportation, Hazardous waste, Nuclear energy, Nuclear materials, Penalties, Reporting and recordkeeping requirements, Source material, Uranium, Whistleblowing.

*10 CFR Part 70*

Classified information, Criminal penalties, Emergency medical services, Hazardous materials transportation, Material control and accounting, Nuclear energy, Nuclear materials, Packaging and containers, Penalties, Radiation protection, Reporting and recordkeeping requirements, Scientific equipment, Security measures, Special nuclear material, Whistleblowing.

*10 CFR Part 150*

Criminal penalties, Hazardous materials transportation, Intergovernmental relations, Nuclear energy, Nuclear materials, Penalties, Reporting and recordkeeping requirements, Security measures, Source material, Special nuclear material.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended; the Energy Reorganization Act of 1974, as amended; and 5 U.S.C. 552 and 553, the NRC is proposing to amend 10 CFR parts 30, 31, 32, 34, 39, 40, 70 and 150:

## PART 30—RULES OF GENERAL APPLICABILITY TO DOMESTIC LICENSING OF BYPRODUCT MATERIAL

■ 1. The authority citation for part 30 continues to read as follows:

**Authority:** Atomic Energy Act secs. 81, 82, 161, 181, 182, 183, 186, 223, 234 (42 U.S.C. 2111, 2112, 2201, 2231, 2232, 2233, 2236, 2273, 2282); Energy Reorganization Act secs. 201, 202, 206 (42 U.S.C. 5841, 5842, 5846); Government Paperwork Elimination Act sec. 1704 (44 U.S.C. 3504 note); Energy Policy Act of 2005, Pub. L. 109–58, 119 Stat. 549 (2005).

Section 30.7 also issued under Energy Reorganization Act sec. 211, Pub. L. 95–601, sec. 10, as amended by Pub. L. 102–486, sec. 2902 (42 U.S.C. 5851). Section 30.34(b) also issued under Atomic Energy Act sec. 184 (42 U.S.C. 2234). Section 30.61 also issued under Atomic Energy Act sec. 187 (42 U.S.C. 2237).

■ 2. In § 30.4, remove the definition of ''*Physician*'' and revise the definitions of ''*Consortium*'' and ''*Principle activities*'' to read as follows:

**§ 30.4 Definitions.**

* * * * *

*Consortium* means an association of medical use licensees and a PET radionuclide production facility that jointly own or share in the operation and maintenance cost of the PET radionuclide production facility that produces PET radionuclides for use in producing radioactive drugs within the consortium for noncommercial distributions among its associated members for medical use. The PET radionuclide production facility within the consortium must be located at an educational institution or a Federal facility or a medical facility.

* * * * *

*Principal activities,* as used in this part and part 31 of this chapter, means activities authorized by the license which are essential to achieving the purpose(s) for which the license was issued or amended. Storage during which no licensed material is accessed for use or disposal, and activities incidental to decontamination or decommissioning are not principal activities.

* * * * *

■ 3. In § 30.6, revise paragraph (b)(1) to read as follows:

**§ 30.6 Communications.**

* * * * *

(b) * * *

(1) The delegated licensing program includes authority to issue, renew, amend, cancel, modify, suspend, or revoke licenses for nuclear materials issued, and validate standard general license registrations, pursuant to 10 CFR parts 30 through 36, 39, 40, and 70 to all persons for academic, medical, and industrial uses, with the following exceptions:

* * * * *

■ 4. In § 30.32, revise paragraph (j)(2) to read as follows:

**§ 30.32 Application for specific licenses.**

* * * * *

(j) * * *

(2) Evidence that the applicant is qualified to produce radioactive drugs for medical use by meeting one of the criteria in § 32.72(a) of this chapter.

* * * * *

■ 5. In § 30.34, revise paragraph (h)(1) to read as follows:

**§ 30.34 Terms and conditions of licenses.**

* * * * *

(h) * * *

(1) Each general licensee that is required to register by § 31.5(c)(13) or part 31 subpart C in accordance with § 31.13 of this chapter, and each specific licensee shall notify the appropriate NRC Regional Administrator, in writing, immediately following the filing of a voluntary or involuntary petition for bankruptcy under any chapter of title 11 (Bankruptcy) of the United States Code by or against:

* * * * *

■ 6. In § 30.35, revise paragraph (g) introductory text to read as follows:

**§ 30.35 Financial assurance and recordkeeping for decommissioning.**

* * * * *

(g) Each person licensed under this part, part 31 subpart C of this chapter, or parts 32 through 36 and 39 of this chapter shall keep records of information important to the decommissioning of a facility in an identified location until the site is released for unrestricted use. Before licensed activities are transferred or assigned in accordance with § 30.34(b), licensees shall transfer all records described in this paragraph to the new licensee. In this case, the new licensee will be responsible for maintaining these records until the license is terminated. If records important to the decommissioning of a facility are kept for other purposes, reference to these records and their locations may be used. Information the Commission considers important to decommissioning consists of—

■ 7. In § 30.41, revise paragraph (d)(1) to read as follows:

**§ 30.41 Transfer of byproduct material.**

* * * * *

(d) * * *

(1) The transferor may have in his possession, and read, a current copy of the transferee's specific license, validated standard general license, or registration certificate;

* * * * *

■ 8. Revise appendix B to 10 CFR part 30 to read as follows:

Appendix B—Quantities of Licensed Material Used To Assess Financial Assurance for Decommissioning

| Material | Micro-curies |
|---|---|
| Aluminum-26 | 10 |
| Americium-241 | 0.01 |
| Antimony-125 | 100 |
| Argon-39 | 1,000 |
| Barium-133 | 100 |
| Berkelium-249 | 0.1 |
| Beryllium-10 | 1 |
| Bismuth-207 | 10 |
| Bismuth-210m | 0.1 |
| Cadmium-109 | 10 |
| Cadmium-113m | 0.1 |
| Cadmium-113 | 100 |
| Calcium-41 | 100 |
| Calcium-45 | 100 |
| Californium-248 | 0.01 |
| Carbon-14 | 100 |
| Cerium-139 | 100 |
| Cerium-144 | 1 |
| Cesium-134 | 10 |
| Cesium-135 | 100 |
| Cesium-137 | 10 |
| Chlorine-36 | 10 |
| Cobalt-57 | 100 |
| Cobalt-60 | 1 |
| Curium-242 | 0.01 |
| Dysprosium-159 | 100 |
| Europium-150 | 1 |
| Europium-152 | 1 |
| Europium-154 | 1 |
| Europium-155 | 10 |
| Gadolinium-151 | 10 |
| Gadolinium-152 | 100 |
| Gadolinium-153 | 10 |
| Germanium-68 | 10 |
| Gold-195 | 10 |

## PART 31—GENERAL DOMESTIC LICENSES FOR BYPRODUCT MATERIAL

■ 9. The authority citation for part 31 continues to read as follows:

**Authority:** Atomic Energy Act secs. 81, 161, 183, 223, 234 (42 U.S.C. 2111, 2201, 2233, 2273, 2282); Energy Reorganization Act secs. 201, 202 (42 U.S.C. 5841, 5842); Government Paperwork Elimination Act sec. 1704 (44 U.S.C. 3504 note); Energy Policy Act of 2005, sec. 651(e), Pub. L. 109–58, 119 Stat. 806–810 (42 U.S.C. 2014, 2021, 2021b, 2111).

■ 10. Add subpart A, before § 31.1 to read as follows:

## PART 31—GENERAL DOMESTIC LICENSES FOR BYPRODUCT MATERIAL

### Subpart A—General Information

#### § 31.1 Purpose and scope.

* * * * *

■ 11. In § 31.4, revise paragraph (b) and add paragraph (c)(2) to read as follows:

#### § 31.4 Information collection requirements: OMB approval.

* * * * *

(b) The approved information collection requirements contained in this part appear in §§ 31.5, 31.8, 31.11, 31.12, 31.13, 31.14, 31.15, 31.16, 31.17, and 31.18.

(c) * * *

(2) In § 31.13, NRC Form 1003 is approved under control number 3150–XXXX.

* * * * *

■ 12. Add subpart B, before § 31.5, and revise paragraphs (c)(14) and (15) to read as follows:

### Subpart B—General Licenses

#### § 31.5 Certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere.[2]

* * * * *

c. * * *

(14) Shall report changes to the mailing address for the location of use (including change in name of general licensee) within 30 days of the effective date of the change by electronic submission such as Electronic Information Exchange, email to *GLTS.Resource@nrc.gov,* or CD–ROM; via mail to the Director, Office of Nuclear Material Safety and Safeguards, ATTN: GLTS, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001 for mail where a signature is not required; or via mail to the Director, Office of Nuclear Material Safety and Safeguards, ATTN: GLTS, U.S. Nuclear Regulatory Commission, 11555 Rockville Pike, Rockville, MD 20852–2738 for signature required correspondence. For a portable device, a report of address change is only required for a change in the device's primary place of storage. Electronic submissions must be made in a manner that enables the NRC to receive, read, authenticate, distribute, and archive the submission, and process and retrieve it a single page at a time. Detailed guidance on making electronic submissions can be obtained by visiting the NRC 's website at *https://www.nrc.gov/site-help/e-submittals.html;* by email to *MSHD.Resource@nrc.gov;* or by writing the Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. The guidance discusses, among other topics, the formats the NRC can accept, the use of electronic signatures, and the treatment of nonpublic information.

(15) May not hold devices that are not in use for longer than 36 months. If devices with shutters are not being used, the shutter must be locked in the closed position. The testing required by paragraph (c)(2) of this section need not be performed during the period of storage only. However, when devices are put back into service or transferred to another person, and have not been tested within the required test interval, they must be tested for leakage before use or transfer and the shutter tested before use. Devices kept in standby for future use are excluded from the 36 month time limit if the general licensee performs semi-annually physical inventories of these devices while they are in standby.

■ 13. In § 31.11, revise paragraphs (a)(3), (a)(4), (a)(6) and (a)(8) to read as follows:

#### § 31.11 General license for use of byproduct material for certain in vitro clinical or laboratory testing.

(a) * * *

(1) * * *

(3) Carbon-14, in units not exceeding 100 microcuries each for use in in vitro clinical or laboratory tests not involving internal or external administration of byproduct material, or the radiation therefrom, to human beings or animals.

(4) Hydrogen-3 (tritium), in units not exceeding 1000 microcuries each for use in in vitro clinical or laboratory tests not involving internal or external administration of byproduct material, or the radiation therefrom, to human beings or animals.

(5) * * *

(6) Selenium-75, in units not exceeding 100 microcuries each for use in in vitro clinical or laboratory tests not involving internal or external administration of byproduct material, or the radiation therefrom, to human beings or animals.

(7) * * *

(8) Cobalt-57, in units not exceeding 100 microcuries each for use in in vitro clinical or laboratory tests not involving internal or external administration of byproduct material, or the radiation therefrom, to human beings or animals.

* * * * *

■ 14. Add subpart C, consisting of §§ 31.13 through 31.18, to read as follows:

### Subpart C—Standard General Licenses

31.13 Standard General License Requirements.
31.14 Standard General License for Certain Fixed Gauging.
31.15 Standard General License for Portable Gauging.
31.16 Standard General License for Certain Medical Uses.
31.17 Standard General License for Certain Analytical Equipment Including Electron Capture Detectors, X-Ray Fluorescence Devices, and Ion Generators.
31.18 Standard General License for Certain In Vitro Testing.

### Subpart C—Standard General Licenses

#### § 31.13 Standard General License Requirements.

(a) Any person, as defined in § 30.4 of this chapter, engaging in standard general license activities described in § 31.14–31.18 of this part, shall:

(1) At least 30 calendar days prior to acquiring, receiving possessing, using, or transferring byproduct material, file a submittal containing an NRC Form 1003, with the Commission using a communication method defined in § 30.6(a) of this chapter;

(2) Receive from the Commission, a validated standard general license in the form of a copy of NRC Form 1003 with a registration number assigned; and

(3) Pay the appropriate fee as prescribed in § 170.31 of this chapter. No fee will be required to accompany an amendment of a standard general license, except as provided in § 170.31 of this chapter.

(b) A standard general licensee under this subpart shall:

(1) Limit the number of locations of use to no more than five locations of use, excluding temporary job sites as permitted by the standard general licenses in § 31.15 and § 31.17 of this part.

(2) File a submittal containing an NRC Form 1003, with the Commission using a communication method defined in § 30.6(a) of this chapter, at least 30 calendar days prior to the effective date

of any of the following changes to the most recently validated NRC Form 1003: the licensee's direct ownership, controlling ownership of the licensed activities, name of the licensee, location of use addresses, mailing address, Radiation Safety Officer, or materials.

(i) If licensed activities are transferred or assigned to a different ownership, each licensee authorized to possess radioactive material, with a half-life greater than 120 days, in an unsealed form, shall transfer the following records to the new licensee and the new licensee will be responsible for maintaining these records until the license is terminated: Records of disposal of licensed material made under §§ 20.2002 (including burials authorized before January 28, 1981[1]), 20.2003, 20.2004, 20.2005; and Records required by § 20.2103(b)(4) of this chapter.

(3) Pay an annual fee as prescribed in § 171.16 of this chapter.

(c) A person licensed under this subpart shall restrict the possession of licensed material:

(1) To a total quantity below unity for the radionuclides listed in 10 CFR part 37 appendix A, calculated using the Category 2 activity thresholds specified in the table, according to 10 CFR part 37 appendix A;

(2) To quantities below the minimum limits for unsealed and/or sealed material as specified in § 30.35(d) of this chapter for which decommissioning financial assurance is required; and

(3) To quantities below the limits specified in § 30.72 of this chapter, in the form of unsealed material and foil or plated sources, above which, consideration of the need for an emergency plan for responding to a release of licensed material is required.

(d) A person licensed under this subpart shall not abandon byproduct material.

(e) A person licensed under this subpart shall not export the byproduct material except in accordance with part 110 of this chapter.

(f)(1) Within 60 days of the occurrence of any of the following, each licensee shall provide notification to the Commission by filing a submittal containing an NRC Form 1003 with the Commission using a communication method defined in § 30.6(a) of this chapter any of the following and indicate which approach under paragraph (f)(2) of this section the licensee intends to pursue:

(i) The licensee has decided to permanently cease principal activities, at the entire site or in any separate building or outdoor area that contains residual radioactivity such that the building or outdoor area is unsuitable for release in accordance with Commission requirements, or

(ii) No principal activities under the license have been conducted for a period of 36 months, or

(iii) No principal activities have been conducted for a period of 36 months in any separate building or outdoor area that contains residual radioactivity such that the building or outdoor area is unsuitable for release in accordance with NRC requirements.

(2) When notification is made pursuant to paragraph (f)(1) of this section, the licensee must—

(i) Within 45 days, submit a request to delay initiation of decommissioning activities consistent with paragraph (g) of this section, or

(ii) Immediately begin decommissioning its site, or any separate building or outdoor area that contains residual radioactivity so that the building or outdoor area is suitable for release in accordance with NRC requirements, or

(iii) Within 12 months, submit a decommissioning plan, if required by paragraph (f)(3) of this section, and begin decommissioning upon approval of that plan.

(3)(i) A decommissioning plan must be submitted if the procedures and activities necessary to carry out decommissioning of the site or separate building or outdoor area have not been previously approved by the Commission and these procedures could increase potential health and safety impacts to workers or to the public, such as in any cases described in § 30.36(g)(1)(i)–(iv).

(ii) The Commission may approve an alternate schedule for submittal of a decommissioning plan required pursuant to paragraph (f)(2) of this section if the Commission determines that the alternative schedule is necessary to the effective conduct of decommissioning operations and presents no undue risk from radiation to the public health and safety and is otherwise in the public interest.

(iii) Procedures such as those listed in paragraph (f)(3)(i) of this section with potential health and safety impacts may not be carried out prior to approval of the decommissioning plan.

(iv) The proposed decommissioning plan for the site or separate building or outdoor area must include the information listed in § 30.36 (g)(4)(i)–(vi):

(v) The proposed decommissioning plan will be approved by the Commission if the information therein demonstrates that the decommissioning will be completed as soon as practicable and that the health and safety of workers and the public will be adequately protected.

(4) Licensees shall complete decommissioning of the site or separate building or outdoor area as soon as practicable but no later than 24 months following the initiation of decommissioning.

(5) When decommissioning involves the entire site, the licensee shall request license termination as soon as practicable but no later than 24 months following the initiation of decommissioning.

(6) As the final step in decommissioning, the licensee shall—

(i) Certify the disposition of all licensed material, including accumulated wastes, by filing a submittal containing an NRC Form 1003, with the Commission using a communication method defined in § 30.6(a) of this chapter; and

(ii) Conduct a radiation survey of the premises where the licensed activities were carried out and submit a report of the results of this survey, unless the licensee demonstrates in some other manner that the premises are suitable for release in accordance with the criteria for decommissioning in 10 CFR part 20, subpart E. The licensee shall, as appropriate—

(A) Report levels of gamma radiation in units of millisieverts (microroentgen) per hour at one meter from surfaces, and report levels of radioactivity, including alpha and beta, in units of megabecquerels (disintegrations per minute or microcuries) per 100 square centimeters—removable and fixed—for surfaces, megabecquerels (microcuries) per milliliter for water, and becquerels (picocuries) per gram for solids such as soils or concrete; and

(B) Specify the survey instrument(s) used and certify that each instrument is properly calibrated and tested.

(g) The Commission may grant a request to extend the time periods established in paragraph (f). The schedule for decommissioning set forth in paragraph (f) of this section may not commence until the Commission has made a determination on the request. The request must include the following:

(1) Discussion of the business need for continued possession or authorization of licensed material or how the request is otherwise in the public interest.

(2) Discussion of the health and safety plan that will be in effect during the extension period.

(3) Discussion of the current decommissioning cost estimate and the potential for increased decommissioning costs if an extension of the time period is approved.

(4) A timeframe for which principal activities will resume, which shall not exceed 36 months from the date that principal activities ceased at the site, separate building, or outdoor area, as provided for in (f)(1)(ii) and (f)(1)(iii) of this section.

(5) A commitment that, should principal activities not resume within the timeframe specified in paragraph (g)(4), the licensee shall submit provide notification to the NRC consistent with paragraph (f) of this section.

(h) A licensee shall terminate a standard general license with the Commission by filing a submittal containing an NRC Form 1003, with the Commission using a communication method defined in § 30.6(a) of this chapter. The standard general license will be terminated by written notice to the licensee when the Commission determines that:

(i) Byproduct material has been properly disposed;

(ii) Reasonable effort has been made to eliminate residual radioactive contamination, if present; and

(iii)(A) A radiation survey has been performed which demonstrates that the premises are suitable for unrestricted release in accordance with the criteria for decommissioning in 10 CFR part 20, subpart E; or

(B) Other information submitted by the licensee is sufficient to demonstrate that the premises are suitable for unrestricted release in accordance with the criteria for decommissioning in 10 CFR part 20, subpart E.

(iv) Records required by § 30.51 (d) and (f) of this chapter have been received.

**§ 31.14 Standard General License for Certain Fixed Gauging.**

(a)(1) Provided that the provisions of paragraph (b) of this section have been met, a general license is hereby issued to commercial and industrial firms and research, educational and medical institutions, individuals in the conduct of their business, and Federal, State or local government agencies to acquire, receive, possess, use, or transfer byproduct material contained in devices designed and manufactured for the purpose of detecting, measuring, gauging or controlling thickness, density, level, interface location, or qualitative or quantitative chemical composition in accordance with the provisions of paragraph (c) of this section.

(2)(i) The provisions of paragraph (a)(1) of this section apply to byproduct material contained in devices which are registered in the Sealed Source and Device Registry with the Commission under § 32.210, as defined in § 32.2 of this chapter, or with an Agreement State, with the principle use codes D—gamma gauges or E—beta gauges.

(ii) The provisions of paragraph (a)(1) of this section apply to the use specifically licensed devices that are distributed in accordance with § 30.41 of this chapter.

(3) The provisions of paragraph (a)(1) of this section apply for use of these materials at fixed locations listed on the most recent NRC Form 1003 provided to the Commission in accordance with § 31.13 of this part.

(4) The provisions of paragraph (a)(1) of this section do not authorize the manufacture, initial transfer or distribution, or import of devices containing byproduct material.

(b)(1) The general licenses provided in this section are subject to all the provisions of the Act, now or hereafter in effect, and to all applicable rules, regulations, and orders of the Commission including the provisions of §§ 30.7, 30.8, 30.9, 30.10, 30.11, 30.31, 30.34, 30.35, 30.41, 30.50 through 30.64 of this chapter; §§ 31.1 through 31.4 of this part; §§ 31.21 through 31.23 of this part; and to the provisions of 10 CFR parts 19, 20, 21, and 71.

(2) Any person engaging in activities under the general licenses provided in this section need not comply with § 30.34(b) of this chapter.

(3) In addition, any person engaging in activities under the general licenses provided in this section shall comply with the requirements in § 31.13 of this part.

(c) A licensee shall —

(1)(i) Limit the use of sealed sources to those registered either with Commission under § 32.210 of this chapter or with an Agreement State.

(ii) Ensure sealed sources are incorporated in compatible devices, by manufacturer and model, and limited to use as specified in the Sealed Source and Device Registry for the devices manufacturer and model.

(iii) Ensure the activity of byproduct material in sealed sources is limited to the activity listed in the Sealed Source and Device Registry for the associated devices manufacturer and model.

(2)(i) Appoint and designate, in writing, a radiation safety officer responsible for having knowledge of the appropriate regulations and requirements and the authority for taking required actions to comply with appropriate regulations and requirements. The general licensee, through this individual, shall ensure the day-to-day compliance with appropriate regulations and requirements. This appointment does not relieve the general licensee of any of its responsibility in this regard.

(ii) Maintain a record of an individual's training and experience, and appointment as the Radiation Safety Officer for 5 years following their last day in the role.

(3)(i) Designate, in writing, individuals to work as authorized users, who have sufficient training and experience to use and supervise the use of licensed materials. Additionally, Licensee staff engaged in leak test sample collection, on-off mechanism testing, and routine maintenance shall be trained on the licensee's procedures and the manufacturer's written recommendations and instructions for the relevant activities.

(ii) Maintain the designation and record of the individuals' training and experience for 5 years after the individuals last works as an Authorized User for the licensee.

(4) Ensure licensed materials authorized by paragraph (a) of this section are used by, or under the supervision of, individuals who have been designated as authorized users by paragraph (c)(3) of this section.

(5)(i) Operate each device containing byproduct material within the manufacturer's specified temperature and environmental limits such that shielding and shutter mechanisms of the source holder are not comprised.

(ii) Ensure sealed sources containing licensed material are not opened and sources are not removed from source holders.

(iii) Ensure only the gauge manufacturer, distributor, or other person authorized by the Commission or an Agreement State will perform nonroutine maintenance such as installation, initial radiation survey, repair and maintenance of radiological safety components, relocation, replacement, alignment, removal from service, and disposal of sealed sources.

(6)(i) Prepare an evaluation demonstrating that unmonitored individuals are not likely to receive a radiation dose in excess of the limits in § 20.1502 of this chapter; or

(ii) Develop, implement, and maintain a program for individual monitoring of external and internal occupational dose in accordance with § 20.1502 of this chapter.

(iii) maintain records of the evaluation described in (6)(i) for 3 years following the last use of licensed material by unmonitored individuals.

(iv) maintain records of individual monitoring results in accordance with § 20.2106 of this chapter.

(7)(i) Ensure any radiation detection instruments used to perform on-off

mechanism tests and surveys required by this part, 10 CFR part 20, and 10 CFR part 30 are appropriate for the isotopes and activities present and meet the requirements of § 20.1501 of this chapter.

(ii) Ensure the instruments used for required surveys are calibrated at least annually by a person licensed by the Commission or an Agreement State to perform instrument calibration services.

(iii) Maintain a record of the calibration for 3 years. The record must include the model and serial number of the instrument, the date of the calibration, the results of the calibration, and the name of the individual who performed the calibration.

(8)(i) Conduct physical inventories every 6 months to account for all sealed sources and/or devices received and possessed under the license.

(ii) Maintain records of inventories for 3 years from the date of each inventory, and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.

(9) Ensure sealed sources and detector cells are tested for leakage periodically.

(i)The licensee shall keep a record of leak test results in units of becquerels (microcuries) and retain the record for inspection by the Commission for 3 years after the leak test is performed. The final leak test record performed prior to the sealed source or detector cell being transferred or disposed of shall be retained until the license is terminated. Records must also show the dates of performance and the names of persons performing testing.

(ii) Ensure leak tests are performed by an organization licensed by the NRC or an Agreement State to provide leak testing services to other licensees; or by using a leak test sample collection kit supplied by an organization licensed by the NRC or an Agreement State to provide leak test kits and/or sample analysis services to other licensees and according to the kit supplier's instructions. The leak test sample must be taken from the nearest accessible point to the sealed source or detector cell where contamination might accumulate. The leak test sample must be analyzed for radioactive contamination. The analysis must be capable of detecting the presence of 185 Bq [0.005 microcuries] of radioactive material on the test sample and is performed by persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.

(iii)(A) Ensure each sealed source, except sealed sources and detector cells designed to primarily emit alpha particles, are tested at intervals specified either in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under § 32.210 of this chapter or by an Agreement State. In the absence of a registration certificate, sealed sources or detector cell shall be tested for leakage and/or contamination at intervals not to exceed 6 months, or at such other intervals as specified.

(B) Ensure sealed sources and detector cells designed to primarily emit alpha particles are tested for leakage and/or contamination at intervals not to exceed 3 months.

(C) Ensure that, in the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate of registration issued by the Commission under § 32.210 of this chapter or by an Agreement State, prior to the transfer, a sealed source or detector cell received from another person not be put into use until tested and the test results received.

(iv)(A) Ensure that, if the test conducted pursuant to paragraphs (i) and (ii) of this section reveals the presence of 185 becquerels (0.005 microcuries) or more of removable contamination, a report shall be filed with the Commission in accordance with § 30.50(c)(2) of this chapter, and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.

(B) Submit a report to the appropriate NRC Regional Office listed in appendix D of part 20 of this chapter, within 5 days of receiving the test results. The report must describe the equipment involved in the leak, the test results, any contamination which resulted from the leaking source, and the corrective actions taken up to the time the report is made.

(v) Exempt the following sealed sources and detector cells from the periodic leak test requirements set out in paragraphs (i) through (iv) of this section:

(A) Hydrogen-3 (tritium) sources;

(B) Sources containing licensed material with a half-life of 30 days or less;

(C) sources containing licensed material in gaseous form;

(D) Sources of beta- or gamma-emitting radioactive material with an activity of 3.7 MBq [100 microcuries] or less; and

(E) Sources of alpha- or neutron-emitting radioactive material with an activity of 0.37 MBq [10 microcuries] or less.

(F) Sealed sources if they are in storage and are not being used. However, when they are removed from storage for use or transferred to another person and have not been tested within the required leak test interval, they shall be tested before use or transfer. No source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.

(10)(i) Test each gauge for the proper operation of the on-off mechanism (shutter) and indicator, if any, at intervals not to exceed 6 months. This requirement does not apply to gauges that are in storage with the shutter mechanism is in the locked position.

(ii) Maintain on-off mechanism test records for 3 years. The record must include the model and serial number of the device, the date of the test, the results of the test, and the name of the individual who performed the test.

(11) Develop, implement, and maintain procedures for routine maintenance of gauges according to each manufacturer's or distributor's written recommendations and instructions.

(12) Develop, implement, and maintain operating, emergency, and security procedures that meet the requirements of §§ 19.11(a)(3), 20.1101, 20.1801–1802, 20.2201–2203, 2207, 21.21, and 30.50 of this chapter.

**§ 31.15 Standard General License for Portable Gauging.**

(a)(1) Provided that the provisions of paragraph (b) of this section have been met, a general license is hereby issued to commercial and industrial firms and research, educational and medical institutions, individuals in the conduct of their business, and Federal, State or local government agencies to acquire, receive, possess, use, or transfer, byproduct material contained in devices designed and manufactured for the purpose of measuring the physical properties of materials in accordance with the provisions of paragraph (c) of this section.

(2)(i)The provisions of paragraph (a)(1) of this section apply to byproduct material contained in devices which are registered in the Sealed Source and Device Registry with the Commission under § 32.210 of this chapter, as defined in § 32.2 of this chapter, or with an Agreement State, with the principle use codes G—Portable Moisture Density Gauges.

(ii) The provisions of paragraph (a)(1) of this section apply to the use of specifically licensed devices that are distributed in accordance with § 30.41 of this chapter.

(3)(i) The provisions of paragraph (a)(1) of this section authorize use, possession and storage of licensed materials at fixed locations listed on the most recent NRC Form 1003 provided to the Commission in accordance with § 31.13 of this part; and

(ii) Use, possession and storage of licensed materials at temporary job sites of the licensee anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material, including areas of exclusive Federal jurisdiction within Agreement States. If the jurisdiction status of a Federal facility within an Agreement State is unknown, the licensee shall contact the Federal agency controlling the job site in question to determine whether the proposed job site is an area of exclusive Federal jurisdiction.

(iii) Authorization for use of radioactive materials at job sites in Agreement States in areas not under exclusive Federal jurisdiction is not provided under this general license and shall be obtained from the appropriate State regulatory agency.

(4) The provisions of paragraph (a)(1) of this section do not authorize the manufacture, initial transfer or distribution, or import of devices containing byproduct material

(b)(1)The general licenses provided in this section are subject to all the provisions of the Act, now or hereafter in effect, and to all applicable rules, regulations, and orders of the Commission including the provisions of §§ 30.7,30.8, 30.9, 30.10, 30.11, 30.31, 30.34, 30.35, 30.41, 30.50 through 30.64 of this chapter; §§ 31.1 through 31.4 of this part; §§ 31.21 through 31.23 of this part; and to the provisions of 10 CFR parts 19, 20, 21, and 71.

(2) Any person engaging in activities under the general licenses provided in this section need not comply with § 30.34(b) of this chapter.

(3) In addition, any person engaging in activities under the general licenses provided in this section shall comply with the requirements in § 31.13 of this part.

(c) The licensee shall—

(1)(i) Limit the use of sealed sources to those registered either with Commission under § 32.210 of this chapter or with an Agreement State.

(ii) Ensure sealed sources are incorporated in compatible devices, by manufacturer and model, and limited to use as specified in the Sealed Source and Device Registry for the devices manufacturer and model.

(iii) Ensure the activity of byproduct material in sealed sources is limited to the activity listed in the Sealed Source and Device Registry for the associated devices manufacturer and model.

(2)(i) Appoint and designate, in writing, a radiation safety officer responsible for having knowledge of the appropriate regulations and requirements and the authority for taking required actions to comply with appropriate regulations and requirements. The general licensee, through this individual, shall ensure the day-to-day compliance with appropriate regulations and requirements. This appointment does not relieve the general licensee of any of its responsibility in this regard.

(ii) Maintain a record of an individual's training and experience, and appointment as the Radiation Safety Officer for 5 years following their last day in the role.

(3)(i) Designate, in writing, individuals to work as authorized users, who have completed a portable gauge safety course for users and hands-on training in the use of portable gauges.

(ii) Maintain the designation and record of the individual's training and experience for 5 years after the individual last works as an Authorized User for the licensee.

(4) Ensure licensed materials authorized by paragraph (a) of this section are used by, or under the supervision of, individuals who have been designated as authorized users by paragraph (c)(3) of this section.

(5)(i) Prepare an evaluation demonstrating that unmonitored individuals are not likely to receive a radiation dose in excess of the limits in § 20.1502 of this chapter; or

(ii) Develop, implement, and maintain a program for individual monitoring of external and internal occupational dose in accordance with § 20.1502 of this chapter.

(iii) maintain records of the evaluation described in (5)(i) for 3 years following the last use of licensed material by unmonitored individuals.

(iv) maintain records of individual monitoring results in accordance with § 20.2106 of this chapter.

(6)(i) Possess and use, or have access to and use, a radiation detection instrument for surveys required by parts 20 and 71 of this chapter.

(ii) Ensure the instruments used for required surveys are calibrated at least annually by a person licensed by the Commission or an Agreement State to perform instrument calibration services.

(7)(i) Develop, implement, and maintain procedures for ensuring accountability of licensed materials at all times.

(ii) Conduct Physical inventories every 6 months to account for all sealed sources and/or devices received and possessed under the license.

(iii) Maintain records of inventories for 3 years from the date of each inventory, and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.

(8) Ensure sealed sources are tested for leakage periodically.

(i) The licensee shall keep a record of leak test results in units of becquerels (microcuries) and retain the record for inspection by the Commission for 3 years after the leak test is performed. The final leak test record performed prior to the sealed source being transferred or disposed of shall be retained until the license is terminated. Records must also show the dates of performance and the names of persons performing testing.

(ii) Ensure leak tests are performed by an organization licensed by the NRC or an Agreement State to provide leak testing services to other licensees; or by using a leak test sample collection kit supplied by an organization licensed by the NRC or an Agreement State to provide leak test kits and/or sample analysis services to other licensees and according to the kit supplier's instructions. The leak test sample must be taken from the nearest accessible point to the sealed source where contamination might accumulate. The leak test sample must be analyzed for radioactive contamination. The analysis must be capable of detecting the presence of 185 Bq [0.005 microcuries] of radioactive material on the test sample and is performed by persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.

(iii)(A) Ensure each sealed source, except sealed sources designed to primarily emit alpha particles, are tested at intervals specified either in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under § 32.210 of this chapter or by an Agreement State. In the absence of a registration certificate, sealed sources shall be tested for leakage and/or contamination at intervals not to exceed 6 months, or at such other intervals as specified.

(B) Ensure sealed sources designed to primarily emit alpha particles are tested for leakage and/or contamination at intervals not to exceed 3 months.

(C) Ensure, that in the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate

of registration issued by the Commission under § 32.210 of this chapter or by an Agreement State, prior to the transfer, a sealed source received from another person not be put into use until tested and the test results received.

(iv)(A) Ensure, that if the test conducted pursuant to paragraphs (i) and (ii) of this section reveals the presence of 185 becquerels (0.005 microcuries) or more of removable contamination, a report shall be filed with the Commission in accordance with § 30.50(c)(2) of this chapter, and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.

(B) Submit a report to the appropriate NRC Regional Office listed in appendix D of part 20 of this chapter, within 5 days of receiving the test results. The report must describe the equipment involved in the leak, the test results, any contamination which resulted from the leaking source, and the corrective actions taken up to the time the report is made.

(v) Exempt the following sealed sources from the periodic leak test requirements set out in paragraphs (i) through (iv) of this section:

(A) Hydrogen-3 (tritium) sources;

(B) Sources containing licensed material with a half-life of 30 days or less;

(C) sources containing licensed material in gaseous form;

(D) Sources of beta- or gamma-emitting radioactive material with an activity of 3.7 MBq [100 microcuries] or less; and

(E) Sources of alpha- or neutron-emitting radioactive material with an activity of 0.37 MBq [10 microcuries] or less.

(F) Sealed sources if they are in storage and are not being used. However, when they are removed from storage for use or transferred to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.

(9) Develop, implement, and maintain procedures for routine maintenance of gauges according to each manufacturer's or distributor's written recommendations and instructions.

(10) Develop, implement, and maintain operating, emergency, and security procedures that meet the requirements of §§ 20.1101, 20.1801 through 1802, 20.2201 through 2203, 30.34, and 30.50 of this chapter.

**§ 31.16 Standard General License for Certain Medical Uses.**

(a)(1) Provided that the provisions of paragraph (b) of this section have been met, a general license is hereby issued to commercial and industrial firms and research, educational and medical institutions, individuals in the conduct of their business, and Federal, State or local government agencies to manufacture, produce, acquire, receive, possess, prepare, use, or transfer, byproduct material for certain medical uses in accordance with the provisions of paragraph (c) of this section.

(2) The provisions of paragraph (a)(1) of this section apply for use of:

(i) Unsealed gallium-67, indium-111, iodine-123, iodine-125, iodine-131), technetium-99m, thallium-201, and xenon-133 for uptake, dilution, excretion, imaging, and localization studies for which a written directive is not required for medical uses as described in §§ 35.100 and 35.200 of this chapter;

(ii) Molybdenum-99/technetium-99m generators to prepare radiopharmaceuticals for medical uses as described in §§ 35.100 and 35.200 of this chapter; and

(iii) Calibration, transmission, and reference sources for uses as described in § 35.65 of this chapter.

(3)(i) The provisions of paragraph (a)(1) of this section do not apply for use of unsealed byproduct material for mobile medical services as defined in § 35.2.

(ii) The provisions of paragraph (a)(2)(iii) do not apply for use of sources for medical use as defined in § 35.2 of this chapter including with the requirements § 35.500 of this chapter.

(4) The provisions of paragraph (a)(1) of this section apply for use of these materials at fixed locations listed on the most recent NRC Form 1003 provided to the Commission in accordance with § 31.13 of this part.

(b)(1)The general licenses provided in this section are subject to all the provisions of the Act, now or hereafter in effect, and to all applicable rules, regulations, and orders of the Commission including the provisions of §§ 30.7, 30.8, 30.9, 30.10, 30.11, 30.31, 30.34, 30.35, 30.41, 30.50 through 30.64 of this chapter; §§ 31.1 through 31.4 of this part; §§ 31.21 through 31.23 of this part; and to the provisions of 10 CFR parts 19, 20, 21, 35 with the exceptions provided in paragraph (b)(2) of this section, and 10 CFR part 71.

(2) Any person engaging in activities under the general licenses provided in this section need not comply with § 30.34(b) of this chapter and §§ 35.11, 35.12, 35.13, 35.14, 35.18, 35.24(a)-(b), and 35.24(d),of this chapter.

(3) In addition, any person engaging in activities under the general licenses provided in this section shall comply with the requirements in § 31.13 of this part.

(c) A licensee shall—

(1)(i) Designate, in writing, an individual to work as the Radiation Safety Officer, as defined in 10 CFR 35.2 who meets the training and experience requirements in § 35.50 of this chapter to be responsible for implementing the radiation protection program.

(ii) Ensure the individual working as Radiation Safety Officer meets the training, experience and criteria established in § 35.59 of this chapter.

(iii) Maintain the designation and record of the individual's training and experience for 5 years after the individual last works as a Radiation Safety Officer for the licensee.

(iv) For the time period described in § 35.24(c) of this chapter, a licensee may permit an individual qualified to be a Radiation Safety Officer, under §§ 35.50 and 35.59 of this chapter, to function as a temporary Radiation Safety Officer and to perform the functions of a Radiation Safety Officer, as provided in § 35.24(g) of this chapter, if the licensee takes the actions required in paragraphs (2)(i)-(iii) of this paragraph and the required actions in §§ 35.24(e), 35.24(g), and 35.24(h) of this chapter and notifies the Commission in accordance with § 31.13 of this chapter.

(2)(i) Designate, in writing, individuals to work as authorized users, as defined in § 35.2 of this chapter who meet the training and experience requirements in § 35.190 of this chapter for § 35.100 activities § 35.290 of this chapter for § 35.200 activities.

(ii) Ensure individuals working as authorized users meet the training, experience and criteria established in § 35.59 of this chapter.

(iii) Maintain the designation and record of the individual's training and experience for 5 years after the individual last works as an Authorized User for the licensee.

(3) Ensure licensed materials authorized by paragraph (a) of this section are used by, or under the supervision of, individuals who have been designated as authorized users by paragraph (c)(2) of this section.

(4)(i) Prepare an evaluation demonstrating that unmonitored individuals are not likely to receive a radiation dose in excess of the limits in § 20.1502 of this chapter; or

(ii) Develop, implement, and maintain a program for individual monitoring of external and internal occupational dose

in accordance with § 20.1502 of this chapter.

(iii) maintain records of the evaluation described in (4)(i) for 3 years following the last use of licensed material by unmonitored individuals.

(iv) maintain records of individual monitoring results in accordance with § 20.2106 of this chapter.

(5)(i) Ensure any radiation detection instruments used to perform surveys required by this part, 10 CFR parts 20, 30, 35, and 71 are appropriate for the isotopes and activities present and meet the requirements of § 20.1501 of this chapter.

(ii) Ensure the instruments used for required surveys are calibrated at least annually by a person licensed by the Commission or an Agreement State to perform instrument calibration services.

(iii) Maintain a record of the calibrations for 3 years. The record must include the model and serial number of the instrument, the date of the calibration, the results of the calibration, and the name of the individual who performed the calibration.

(6)(i) Develop, implement, and maintain written procedures for sealed-source leak testing that meet the requirements of § 35.67 of this chapter; or

(ii) Ensure leak test sample collection and analysis is performed by an organization authorized by the Commission or an Agreement State to provide leak testing services to other licensees; or

(iii) Use a leak test sample collection kit supplied by an organization licensed by the Commission or an Agreement State to provide leak test kits or sample analysis services to other licensees and according to the instructions provided in the leak test sample collection kit;

(iv) Maintain records of leak testing in accordance with § 35.2067(a) of this chapter.

(7) Develop, implement, and maintain written procedures for safe use of unsealed byproduct material that meet the requirements of §§ 20.1101 and 20.1201 of this chapter.

(8) Develop, implement, and maintain written procedures for safe response to spills of licensed material in accordance with § 20.1101 of this chapter.

(9) Develop, implement, and maintain written procedures for area surveys in accordance with § 20.1101 of this chapter that meet the requirements of §§ 20.1501 and 35.70 of this chapter.

(10) Develop, implement, and maintain written procedures for licensed material accountability and control to ensure that: license possession limits are not exceeded; licensed material in storage is secured from unauthorized access or removal; licensed material not in storage is maintained under constant surveillance and control; records of receipt (either from the licensee's own production operations or from another licensee), transfer, and disposal of licensed material, are maintained.

(11) Develop, implement, and maintain written procedures for a program for training required under § 19.12 of this chapter for each group of workers, including (i) topics covered, (ii) qualifications of the instructors, (iii) method of training, (iv) method for assessing the success of the training, (v) initial training, and (vi) annual refresher training.

(12) Develop, implement, and maintain written waste disposal procedures for licensed material in accordance with § 20.1101 of this chapter, that also meet the requirements of the applicable section of 10 CFR part 20, subpart K, and of § 35.92 of this chapter.

**§ 31.17 Standard General License for Certain Analytical Equipment Including Electron Capture Detectors, X-Ray Fluorescence Devices, and Ion Generators.**

(a)(1) Provided that the provisions of paragraph (b) of this section have been met, a general license is hereby issued to commercial and industrial firms and research, educational and medical institutions, individuals in the conduct of their business, and Federal, State or local government agencies to acquire, receive, possess, use, or transfer, byproduct material contained in devices designed and manufactured for the purpose of detecting, measuring, or qualitatively or quantitatively assessing chemical composition, or for producing an ionized atmosphere in accordance with the provisions of paragraph (c) of this section.

(2)(i) The provisions of paragraph (a)(1) of this section apply to byproduct material contained in devices which are registered in the Sealed Source and Device Registry with the Commission under § 32.210 of this chapter, as defined in § 32.2 of this chapter, or with an Agreement State, with the principle use codes N—Ion Generators, Chromatography, or U—X-Ray Fluorescence.

(ii) The provisions of paragraph (a)(1) of this section apply to the use of specifically licensed devices that are distributed in accordance with § 30.41 of this chapter.

(3)(i) The provisions of paragraph (a)(1) of this section authorize use, possession and storage of licensed materials at fixed locations listed on the most recent NRC Form 1003 provided to the Commission in accordance with § 31.13 of this part; and

(ii) Temporary job sites of the licensee anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material, including areas of exclusive Federal jurisdiction within Agreement States. If the jurisdiction status of a Federal facility within an Agreement State is unknown, the licensee shall contact the Federal agency controlling the job site in question to determine whether the proposed job site is an area of exclusive Federal jurisdiction.

(iii) Authorization for use of radioactive materials at job sites in Agreement States in areas not under exclusive Federal jurisdiction is not provided under this general license, and shall be obtained from the appropriate State regulatory agency.

(4) The provisions of paragraph (a)(1) of this section do not authorize the manufacture, initial transfer or distribution, or import of devices containing byproduct material.

(b)(1)The general licenses provided in this section are subject to all the provisions of the Act, now or hereafter in effect, and to all applicable rules, regulations, and orders of the Commission including the provisions of §§ 30.7, 30.8, 30.9, 30.10, 30.11, 30.31, 30.34, 30.35, 30.41, 30.50 through 30.64 of this chapter; §§ 31.1 through 31.4 of this part; §§ 31.21 through 31.23 of this part; and to the provisions of 10 CFR parts 19, 20, 21, and 71.

(2) Any person engaging in activities under the general licenses provided in this section need not comply with § 30.34(b) of this chapter.

(3) In addition, any person engaging in activities under the general licenses provided in this section shall comply with the requirements in § 31.13 of this chapter.

(c) A licensee shall—

(1)(i) Limit the use of sealed sources to those registered either with Commission under § 32.210 of this chapter or with an Agreement State.

(ii) Ensure sealed sources are incorporated in compatible devices, by manufacturer and model, and limited to use as specified in the Sealed Source and Device Registry for the devices manufacturer and model.

(iii) Ensure the activity of byproduct material in sealed sources is limited to the activity listed in the Sealed Source and Device Registry for the associated devices manufacturer and model.

(2)(i) Appoint and designate, in writing, a radiation safety officer responsible for having knowledge of the appropriate regulations and

requirements and the authority for taking required actions to comply with appropriate regulations and requirements. The general licensee, through this individual, shall ensure the day-to-day compliance with appropriate regulations and requirements. This appointment does not relieve the general licensee of any of its responsibility in this regard.

(ii) Maintain a record of an individual's training, and appointment as the Radiation Safety Officer for 5 years following their last day in the role.

(3)(i) Ensure detector cells containing a titanium tritide foil or scandium tritide foil are only used in conjunction with a properly operating temperature control mechanism that prevents the foil temperature from exceeding that specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission pursuant to § 32.210 of this chapter or equivalent regulations from an Agreement State.

(ii) Ensure when in use, detector cells containing a titanium tritide foil or scandium tritide foil are vented to the outside.

(iii) Ensure sealed sources, source rods, foil sources, or detector cells containing licensed material are not opened or sources removed from source holders or detached from source rods, or foil sources removed from detector cells.

(iv) Except for maintaining labeling as required by 10 CFR part 20 or 10 CFR part 71, the licensee shall not make any changes in the sealed source, device, or source-device combination that would alter the description or specifications as indicated in the respective certificate of registration issued either by the U.S. Nuclear Regulatory Commission pursuant to § 32.210 of this chapter or by an Agreement State.

(v) Ensure maintenance, repair, cleaning, replacement, and disposal of foils contained in detector cells or of sealed sources is performed only by the device manufacturer or other persons specifically authorized by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.

(4)(i) Conduct Physical inventories every 6 months to account for all sealed sources and/or devices received and possessed under the license.

(ii) Maintain records of inventories for 3 years from the date of each inventory, and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.

(5) Ensure sealed sources and plated foil sources are tested for leakage periodically.

(i) The licensee shall keep a record of leak test results in units of becquerels (microcuries) and retain the record for inspection by the Commission for 3 years after the leak test is performed. The final leak test record performed prior to the sealed source or foil plated source being transferred or disposed of shall be retained until the license is terminated. Records must also show the dates of performance and the names of persons performing testing.

(ii) Ensure leak tests are performed by an organization licensed by the NRC or an Agreement State to provide leak testing services to other licensees; or by using a leak test sample collection kit supplied by an organization licensed by the NRC or an Agreement State to provide leak test kits and/or sample analysis services to other licensees and according to the kit supplier's instructions. The leak test sample must be taken from the nearest accessible point to the sealed source or plated foil sources where contamination might accumulate. The leak test sample must be analyzed for radioactive contamination. The analysis must be capable of detecting the presence of 185 Bq [0.005 microcuries] of radioactive material on the test sample and is performed by persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.

(iii)(A) Ensure each sealed source, except sealed sources and plated foil sources designed to primarily emit alpha particles, are tested at intervals specified either in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under § 32.210 of this chapter or by an Agreement State. In the absence of a registration certificate, sealed sources or foil plated source shall be tested for leakage and/or contamination at intervals not to exceed 6 months, or at such other intervals as specified.

(B) Ensure sealed sources and plated foil sources designed to primarily emit alpha particles are tested for leakage and/or contamination at intervals not to exceed 3 months.

(C) Ensure, that in the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate of registration issued by the Commission under § 32.210 of this chapter or by an Agreement State, prior to the transfer, a sealed source or plated foil sources received from another person not be put into use until tested and the test results received.

(iv)(A) Ensure, that if the test conducted pursuant to paragraphs (i) and (ii) of this section reveals the presence of 185 becquerels (0.005 microcuries) or more of removable contamination, a report shall be filed with the Commission in accordance with § 30.50(c)(2) of this chapter, and the source shall be removed immediately from service and decontaminated, repaired, or disposed of in accordance with Commission regulations.

(B) Submit a report to the appropriate NRC Regional Office listed in appendix D of part 20 of this chapter, within 5 days of receiving the test results. The report must describe the equipment involved in the leak, the test results, any contamination which resulted from the leaking source, and the corrective actions taken up to the time the report is made.

(v) Exempt the following sealed sources and plated foil sources from the periodic leak test requirements set out in paragraphs (i) through (iv) of this section:

(A) Hydrogen-3 (tritium) sources;

(B) Sources containing licensed material with a half-life of 30 days or less;

(C) sources containing licensed material in gaseous form;

(D) Sources of beta- or gamma-emitting radioactive material with an activity of 3.7 MBq [100 microcuries] or less; and

(E) Sources of alpha- or neutron-emitting radioactive material with an activity of 0.37 MBq [10 microcuries] or less.

(F) Sealed sources if they are in storage and are not being used. However, when they are removed from storage for use or transferred to another person, and have not been tested within the required leak test interval, they shall be tested before use or transfer. No source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.

(6)(i) Test each analytical instrument, as applicable, for the proper operation of the on-off mechanism (shutter) and indicator, if any, at intervals not to exceed 6 months. This requirement does not apply to analytical instruments that are in storage with the shutter lock mechanism is in the locked position.

(ii) Maintain on-off mechanism test records for 3 years. The record must include the model and serial number of the device, the date of the test, the results of the test, and the name of the individual who performed the test.

**§ 31.18 Standard General License for Certain In Vitro Testing.**

(a)(1) Provided that the provisions of paragraph (b) of this section have been met, a general license is hereby issued

to commercial and industrial firms and research, educational and medical institutions, individuals in the conduct of their business, and Federal, State or local government agencies to acquire, receive, possess, use, or transfer, byproduct material for certain in vitro clinical or laboratory test in accordance with the provisions of paragraph (c) of this section.

(2) The provisions of paragraph (a)(1) of this section apply for use of materials listed in § 31.11(a)(1)–(8) of this part.

(3) The provisions of paragraph (a)(1) of this section do not apply for use of licensed materials in or on humans.

(4) The provisions of paragraph (a)(1) of this section do not authorize the use of licensed material in field applications where radioactivity is released.

(5) The provisions of paragraph (a)(1) of this section apply for use of these materials at fixed locations listed on the most recent NRC Form 1003 provided to the Commission in accordance with § 31.13 of this part.

(b)(1) The general licenses provided in this section are subject to all the provisions of the Act, now or hereafter in effect, and to all applicable rules, regulations, and orders of the Commission including the provisions of §§ 30.7, 30.8, 30.9, 30.10, 30.11, 30.31, 30.34, 30.35, 30.41, 30.50 through 30.64 of this chapter; §§ 31.1 through 31.4 of this part; §§ 31.21 through 31.23 of this part; and to the provisions of 10 CFR parts 19, 20, 21, and 71.

(2) Any person engaging in activities under the general licenses provided in this section need not comply with § 30.34(b) of this chapter or § 31.11 of this part.

(3) In addition, any person engaging in activities under the general licenses provided in this section shall comply with the requirements in § 31.13 of this part.

(c) A licensee shall—

(1)(i) Appoint and designate, in writing, a radiation safety officer responsible for having knowledge of the appropriate regulations and requirements and the authority for taking required actions to comply with appropriate regulations and requirements. The general licensee, through this individual, shall ensure the day-to-day compliance with appropriate regulations and requirements. This appointment does not relieve the general licensee of any of its responsibility in this regard.

(ii) Maintain a record of an individual's training and experience, and appointment as the Radiation Safety Officer for 5 years following their last day in the role.

(2)(i) Designate, in writing, individuals to work as authorized users, who have sufficient training and experience to use and supervise the use of licensed materials.

(ii) Maintain the designation and record of the individuals' training and experience for 5 years after the individuals last works as an Authorized User for the licensee.

(3) Ensure licensed materials authorized by paragraph (a) of this section are used by, or under the supervision of, individuals who have been designated as authorized users by paragraph (c)(3) of this section.

(4)(i) Prepare an evaluation demonstrating that unmonitored individuals are not likely to receive a radiation dose in excess of the limits in § 20.1502 of this chapter; or

(ii) Develop, implement, and maintain a program for individual monitoring of external and internal occupational dose in accordance with § 20.1502 of this chapter.

(iii) maintain records of the evaluation described in (5)(i) for 3 years following the last use of licensed material by unmonitored individuals.

(iv) maintain records of individual monitoring results in accordance with § 20.2106 of this chapter.

(5)(i) Ensure any radiation detection instruments used to perform surveys required by this part, 10 CFR parts 20, 30, and 71 are appropriate for the isotopes and activities present and meet the requirements of § 20.1501 of this chapter.

(ii) Ensure the instruments used for required surveys are calibrated at least annually by a person licensed by the Commission or an Agreement State to perform instrument calibration services.

(iii) Maintain a record of the calibrations for 3 years. The record must include the model and serial number of the instrument, the date of the calibration, the results of the calibration, and the name of the individual who performed the calibration.

(6)(i) Dispose of radioactive waste in accordance with 10 CFR part 20.

(ii) Where appropriate, hold radioactive material with a physical half-life of less than or equal to 275 days for decay-in-storage before disposal in ordinary trash provided:

(A) Before disposal as ordinary trash, the waste shall be surveyed at the container surface with the appropriate survey instrument set on its most sensitive scale and with no interposed shielding to determine that its radioactivity cannot be distinguished from background. All radiation labels shall be removed or obliterated, except for radiation labels on materials that are within containers and that will be managed as biomedical waste after they have been released from the licensee.

(B) A record of each such disposal permitted under this license requirement shall be retained for 3 years. The record must include the date of disposal, the date on which the byproduct material was placed in storage, the radionuclides disposed, the survey instrument used, the background dose rate, the dose rate measured at the surface of each waste container, and the name of the individual who performed the disposal.

(iii) Waste from *in vitro* kits, except mock I–125, that are generally licensed under § 31.11 of this part are exempt from waste disposal regulations in 10 CFR part 20, as set forth in § 31.11(f). Radioactive labels shall be defaced or removed. There is no need to keep any record of release or make any measurement.

(7) Develop, implement, and maintain written procedures for safe use of unsealed byproduct material that meet the requirements of §§ 20.1101 and 20.1201 of this chapter.

(8) Develop, implement, and maintain written procedures for safe response to spills of licensed material in accordance with § 20.1101 of this chapter.

(9) Develop, implement, and maintain written procedures for area surveys in accordance with § 20.1101 of this chapter that meet the requirements of § 20.1501 of this chapter.

(10) Develop, implement, and maintain written procedures for licensed material accountability and control to ensure that: license possession limits are not exceeded; licensed material in storage is secured from unauthorized access or removal; licensed material not in storage is maintained under constant surveillance and control; records of receipt (either from the licensee's own production operations or from another licensee), transfer, and disposal of licensed material, are maintained.

(11) Develop, implement, and maintain written procedures for a program for training required under § 19.12 of this chapter for each group of workers, including (i) topics covered, (ii) qualifications of the instructors, (iii) method of training, (iv) method for assessing the success of the training, (v) initial training, and (vi) annual refresher training.

(12) Develop, implement, and maintain written waste disposal procedures for licensed material in accordance with § 20.1101 of this chapter, that also meet the requirements of the applicable section of 10 CFR part 20, subpart K.

**§ 31.19–31.20 [Reserved]**

■ 15. Add subpart D, before § 31.21 to read as follows:

## Subpart D—Records

**§ 31.21 Maintenance of records.**

* * * * *

■ 16. Add subpart E, before § 31.22 to read as follows:

## Subpart E—Enforcement

**§ 31.22 Violations.**

* * * * *

## PART 32—SPECIFIC DOMESTIC LICENSES TO MANUFACTURE OR TRANSFER CERTAIN ITEMS CONTAINING BYPRODUCT MATERIAL

■ 17. The authority citation for part 32 continues to read as follows:

**Authority:** Atomic Energy Act secs. 81, 161, 181, 182, 183, 223, 234 (42 U.S.C. 2111, 2201, 2231, 2232, 2233, 2273, 2282); Energy Reorganization Act sec. 201 (42 U.S.C. 5841); Government Paperwork Elimination Act sec. 1704 (44 U.S.C. 3504 note); Energy Policy Act of 2005, sec. 651(e), Pub. L. 109–58, 119 Stat. 806–810 (42 U.S.C. 2014, 2021, 2021b, 2111).

■ 18. Revise and republish § 32.12 to read as follows:

**§ 32.12 Same: Records of material transfer.**

(a) Each person licensed under § 32.11 shall maintain records of transfer of byproduct material identifying, by name and address, each person to whom byproduct material is transferred for use under § 30.14 of this chapter or the equivalent regulations of an Agreement State and stating the kinds, quantities, and physical form of byproduct material transferred.

(b) The record must identify the:

(1) Type and quantity of each product or material into which byproduct material has been introduced by calendar year, if applicable;

(2) Name and address of the person who owned or possessed the product or material, into which byproduct material has been introduced, at the time of introduction;

(3) The type and quantity of radionuclide introduced into each product or material; and

(4) The initial concentrations of the radionuclide in the product or material at time of transfer of the byproduct material by the licensee.

(c) The licensee shall maintain the record of a transfer in accordance with § 30.51.

■ 19. Revise and republish § 32.16 to read as follows:

**§ 32.16 Certain items containing byproduct material: Records of transfer.**

(a) Each person licensed under § 32.14 shall maintain records of all transfers of byproduct identifying, by name and address, each person to whom byproduct material is transferred for use under § 30.15 of this chapter or the equivalent regulations of an Agreement State and stating the kinds, quantities, and physical form of byproduct material transferred.

(b) The record must include the following information:

(1) A description or identification of the type of each product and the model number(s), if applicable;

(2) For each radionuclide in each type of product and each model number, if applicable, the total quantity of the radionuclide; and

(3) The number of units of each type of product transferred by calendar year and model number, if applicable;

(c) The licensee shall maintain the record of a transfer in accordance with § 30.51.

■ 20. Revise and republish § 32.20 to read as follows:

**§ 32.20 Same: Records of material transfer.**

(a) Each person licensed under § 32.18 shall maintain records of transfer of material identifying, by name and address, each person to whom byproduct material is transferred for use under § 30.18 of this chapter or the equivalent regulations of an Agreement State and stating the kinds, quantities, and physical form of byproduct material transferred.

(b) The record must include the following information:

(1) For each radionuclide in each physical form, the record shall indicate the total quantity of each radionuclide and the physical form, transferred under the specific license.

(c) The licensee shall maintain the record of a transfer in accordance with § 30.51 of this chapter.

■ 21. Revise and republish § 32.25 to read as follows:

**§ 32.25 Conditions of licenses issued under § 32.22: Quality control, labeling, and records of transfer.**

Each person licensed under § 32.22 shall:

(a) Carry out adequate control procedures in the manufacture of the product to assure that each production lot meets the quality control standards approved by the Commission;

(b) Label or mark each unit so that the manufacturer, processor, producer, or initial transferor of the product and the byproduct material in the product can be identified; and

(c) Each person licensed under § 32.22 shall maintain records of transfer of material identifying, by name and address, each person to whom byproduct material is transferred for use under § 30.19 of this chapter or the equivalent regulations of an Agreement State and stating the kinds, quantities, and physical form of byproduct material transferred.

(1) The record must include the following information:

(i) A description or identification of the type of each product and the model number(s);

(ii) For each radionuclide in each type of product and each model number, the total quantity of the radionuclide; and

(iii) The number of units of each type of product transferred by calendar year and model number, if applicable.

(b) The licensee shall maintain the record of a transfer in accordance with § 30.51.

■ 22. Revise and republish § 32.29 to read as follows:

**§ 32.29 Conditions of licenses issued under § 32.26: Quality control, labeling, and records of transfer.**

Each person licensed under § 32.26 shall:

(a) Carry out adequate control procedures in the manufacture of the product to assure that each production lot meets the quality control standards approved by the Commission;

(b) Label or mark each detector and its point-of-sale package so that:

(1) Each detector has a durable, legible, readily visible label or marking on the external surface of the detector containing:

(i) The following statement: ''CONTAINS RADIOACTIVE MATERIAL'';

(ii) The name of the radionuclide and quantity of activity; and

(iii) An identification of the person licensed under § 32.26 to transfer the detector for use pursuant to § 30.20 of this chapter or equivalent regulations of an Agreement State.

(2) The labeling or marking specified in paragraph (b)(1) of this section is located where its will be readily visible when the detector is removed from its mounting.

(3) The external surface of the point-of-sale package has a legible, readily visible label or marking containing:

(i) The name of the radionuclide and quantity of activity;

(ii) An identification of the person licensed under § 32.26 to transfer the detector for use pursuant to § 30.20 of this chapter or equivalent regulations of an Agreement State; and

(iii) The following or a substantially similar statement: THIS DETECTOR

CONTAINS RADIOACTIVE MATERIAL AND HAS BEEN MANUFACTURED IN COMPLIANCE WITH U.S. NRC SAFETY CRITERIA IN 10 CFR 32.27. THE PURCHASER IS EXEMPT FROM ANY REGULATORY REQUIREMENTS.

(4) Each detector and point-of-sale package is provided with such other information as may be required by the Commission; and

(c) Each person licensed under § 32.26 shall maintain records of transfer of material identifying, by name and address, each person to whom byproduct material is transferred for use under § 30.20 of this chapter or the equivalent regulations of an Agreement State and stating the kinds, quantities, and physical form of byproduct material transferred.

(1) The record must include the following information:

(i) A description or identification of the type of each product and the model number(s);

(ii) For each radionuclide in each type of product and each model number, the total quantity of the radionuclide; and

(iii) The number of units of each type of product transferred by calendar year and model number, if applicable.

(d) The licensee shall maintain the record of a transfer in accordance with § 30.51.

■ 23. Revise and republish § 32.32 to read as follows:

**§ 32.32 Conditions of licenses issued under § 32.30: Quality control, labeling, and records of transfer.**

Each person licensed under § 32.30 shall:

(a) Carry out adequate control procedures in the manufacture of the device to ensure that each production lot meets the quality control standards approved by the Commission;

(b) Label or mark each device and its point-of-sale package so that:

(1) Each item has a durable, legible, readily visible label or marking on the external surface of the device containing:

(i) The following statement: ''CONTAINS RADIOACTIVE MATERIAL'';

(ii) The name of the radionuclide(s) and quantity(ies) of activity;

(iii) An identification of the person licensed under § 32.30 to transfer the device for use under § 30.22 of this chapter or equivalent regulations of an Agreement State; and

(iv) Instructions and precautions necessary to assure safe installation, operation, and servicing of the device (documents such as operating and service manuals may be identified in the label and used to provide this information).

(2) The external surface of the point-of-sale package has a legible, readily visible label or marking containing:

(i) The name of the radionuclide and quantity of activity;

(ii) An identification of the person licensed under § 32.30 to transfer the device for use under § 30.22 of this chapter or equivalent regulations of an Agreement State; and

(iii) The following or a substantially similar statement: ''THIS DEVICE CONTAINS RADIOACTIVE MATERIAL AND HAS BEEN MANUFACTURED IN COMPLIANCE WITH U.S. NUCLEAR REGULATORY COMMISSION SAFETY CRITERIA IN 10 CFR 32.31. THE PURCHASER IS EXEMPT FROM ANY REGULATORY REQUIREMENTS.''

(3) Each device and point-of-sale package contains such other information as may be required by the Commission; and

(c) Each person licensed under § 32.30 shall maintain records of transfer of material identifying, by name and address, each person to whom byproduct material is transferred for use under § 30.22 of this chapter or the equivalent regulations of an Agreement State and stating the kinds, quantities, and physical form of byproduct material transferred.

(1) The record must include the following information:

(i) A description or identification of the type of each product and the model number(s);

(ii) For each radionuclide in each type of product and each model number, the total quantity of the radionuclide; and

(iii) The number of units of each type of product transferred by calendar year and model number, if applicable.

(d) The licensee shall maintain the record of a transfer in accordance with § 30.51.

■ 24. Revise and republish § 32.72 to read as follows:

**§ 32.72 Manufacture, preparation, or transfer for commercial distribution of radioactive drugs or preparation or transfer for commercial distribution microsources containing byproduct material for medical use under part 35.**

(a) An application for a specific license to manufacture, prepare, or transfer for commercial distribution radioactive drugs, or to prepare or transfer for commercial distribution microsources containing byproduct material for use by persons authorized pursuant to part 35 of this chapter or § 31.16 will be approved if:

(1) The applicant satisfies the general requirements specified in § 30.33 of this chapter;

(2) The applicant submits evidence that it is legally authorized, under applicable Federal or State law, to manufacture, compound, prepare, or distribute radioactive drugs or medical devices, including those regulated under 21 CFR part 207, 21 CFR part 212, or 21 CFR part 820, as applicable;

(3) The applicant submits information on the radionuclide; the chemical and physical form; the maximum activity per vial, syringe, generator, or other container of the radioactive drug or microsources; and the shielding provided by the packaging to show it is appropriate for the safe handling and storage of the radioactive drugs or microsources by medical use licensees; and

(4) The applicant commits to the following labeling requirements:

(i) A label is affixed to each transport radiation shield, whether it is constructed of lead, glass, plastic, or other material, of radioactive drugs or microsources to be transferred for commercial distribution. The label must include the radiation symbol and the words ''CAUTION, RADIOACTIVE MATERIAL'' or ''DANGER, RADIOACTIVE MATERIAL''; the name of the radioactive drug, microsource, or its abbreviation; and the quantity of radioactivity at a specified date and time. For radioactive drugs or microsources with a half-life greater than 100 days, the time may be omitted.

(ii) A label is affixed to each syringe, vial, or other container used to hold a radioactive drug or microsources to be transferred for commercial distribution. The label must include the radiation symbol and the words ''CAUTION, RADIOACTIVE MATERIAL'' or ''DANGER, RADIOACTIVE MATERIAL'' and an identifier that ensures that the syringe, vial, or other container can be correlated with the information on the transport radiation shield label, and

(iii) A label is affixed in accordance with the Sealed Source and Device Registry, as applicable.

(b) A licensee that meets the requirements of paragraph (a)(2) and is licensed as a pharmacy by a State Board of Pharmacy or that is operating as a nuclear pharmacy within a Federal medical institution:

(1) May prepare radioactive drugs or microsources for medical use, as defined in § 35.2 of this chapter, provided that the radioactive drug or microsources are prepared by either an authorized nuclear pharmacist, as specified in paragraphs (b)(2) and (b)(4) of this section, or an individual under the supervision of an authorized nuclear pharmacist as specified in § 35.27 of this chapter.

(2) May allow a pharmacist to work as an authorized nuclear pharmacist if:

(i) This individual qualifies as an authorized nuclear pharmacist as defined in § 35.2 of this chapter;

(ii) This individual meets the requirements specified in § 35.55(b) and 35.59 of this chapter, and the licensee has received an approved license amendment identifying this individual as an authorized nuclear pharmacist; or

(iii) This individual is designated as an authorized nuclear pharmacist in accordance with paragraph (b)(4) of this section.

(3) The actions authorized in paragraphs (b)(1) and (b)(2) of this section are permitted in spite of more restrictive language in license conditions.

(4) May designate a pharmacist (as defined in § 35.2 of this chapter) as an authorized nuclear pharmacist if:

(i) The individual was a nuclear pharmacist preparing only radioactive drugs or microsources containing accelerator-produced radioactive material; and

(ii) The individual practiced at a pharmacy at a Government agency or Federally recognized Indian Tribe before November 30, 2007, or at all other pharmacies before August 8, 2009, or an earlier date as noticed by the NRC.

(5) Shall provide to the Commission:

(i) A copy of each individual's certification by a specialty board whose certification process has been recognized by the Commission or an Agreement State as specified in § 35.55(a) of this chapter; or

(ii) The Commission or Agreement State license, or

(iii) Commission master materials licensee permit, or

(iv) The permit issued by a licensee or Commission master materials permittee of broad scope or the authorization from a commercial nuclear pharmacy authorized to list its own authorized nuclear pharmacist, or

(v) Documentation that only accelerator-produced radioactive materials were used in the practice of nuclear pharmacy at a Government agency or Federally recognized Indian Tribe before November 30, 2007, or at all other locations of use before August 8, 2009, or an earlier date as noticed by the NRC; and

(vi) A copy of the State pharmacy licensure or registration, no later than 30 days after the date that the licensee allows, under paragraphs (b)(2)(i) and (b)(2)(iii) of this section, the individual to work as an authorized nuclear pharmacist.

(c) A licensee shall possess and use instrumentation to measure the radioactivity of radioactive drugs and microsources. The licensee shall have procedures for use of the instrumentation. The licensee shall measure, by direct measurement or by combination of measurements and calculations, the amount of radioactivity in dosages of alpha-, beta-, or photon-emitting radioactive drugs or microsources prior to transfer for commercial distribution. In addition, the licensee shall:

(1) Perform tests before initial use, periodically, and following repair, on each instrument for accuracy, linearity, and geometry dependence, as appropriate for the use of the instrument; and make adjustments when necessary; and

(2) Check each instrument for constancy and proper operation at the beginning of each day of use.

(d) A licensee shall satisfy the labeling requirements in paragraph (a)(4) of this section.

(e) Nothing in this section relieves the licensee from complying with applicable FDA, other Federal, and State requirements governing radioactive drugs or microsources.

■ 25. In § 32.74, revise section heading, paragraphs (a) introductory text, (a)(2) introductory text, (a)(2)(ii), (a)(2)(viii), (a)(3) and (b)(1) to read as follows:

**§ 32.74 Manufacture and distribution of sources, microsources, or devices containing byproduct material for medical use.**

(a) An application for a specific license to manufacture and distribute sources, microsources, or devices containing byproduct material to persons licensed under part 35 of this chapter or § 31.16 of this chapter for use as a calibration, transmission, or reference source or for the medical uses listed in part 35 of this chapter will be approved if:

(1) * * *

(2) The applicant submits sufficient information regarding each type of source, or device pertinent to an evaluation of its radiation safety, including:

(i) * * *

(ii) Details of design and construction of the source, or device;

* * * * *

(viii) Instructions for handling and storing the source, or device from the radiation safety standpoint; these instructions are to be included on a durable label attached to the source or device or attached to a permanent storage container for the source, or device: *Provided,* That instructions which are too lengthy for such label may be summarized on the label and printed in detail on a brochure which is referenced on the label.

(3) The label affixed to the source or device, or to the permanent storage container for the source, or device, contains information on the radionuclide, quantity and date of assay, and a statement that the U.S. Nuclear Regulatory Commission has approved distribution of the (name of source, or device) to persons licensed to use byproduct material identified in §§ 35.65, 35.400, 35.500, 35.600, 35.700, and 35.1000 of this chapter as appropriate, and to persons who hold an equivalent license issued by an Agreement State.

* * * * *

(b) * * *

(1) In the event the applicant desires that the source or device be required to be tested for leakage of radioactive material at intervals longer than six months, he shall include in his application sufficient information to demonstrate that such longer interval is justified by performance characteristics of the source or device or similar sources or devices and by design features that have a significant bearing on the probability or consequences of leakage of radioactive material from the source.

## PART 34—LICENSES FOR INDUSTRIAL RADIOGRAPHY AND RADIATION SAFETY REQUIREMENTS FOR INDUSTRIAL RADIOGRAPHIC OPERATIONS

■ 26. The authority citation for part 34 continues to read as follows:

**Authority:** Atomic Energy Act secs. 81, 161, 181, 182, 183, 223, 234 (42 U.S.C. 2111, 2201, 2231, 2232, 2233, 2273, 2282); Energy Reorganization Act sec. 201 (42 U.S.C. 5841); Government Paperwork Elimination Act sec. 1704, (44 U.S.C. 3504 note). Atomic Energy Act of 2005 sec. 651(e), Pub. L. 109–58, 119 Stat. 806–810 (42 U.S.C. 2014, 2021, 2021b, 2111)

Section 34.45 also issued under Energy Reorganization Act sec. 206 (42 U.S.C. 5846).

■ 27. In § 34.3, add in alphabetical order the definition for *Sealed Source and Device Registry* to read as follows:

* * * * *

*Sealed Source and Device Registry* means the national registry that contains all the registration certificates, generated by both the NRC and the Agreement States, that summarize the radiation safety information for the sealed sources and devices and describe the licensing and use conditions approved for the product.

* * * * *

■ 28. In § 34.13, revise paragraph (b) and remove paragraphs (b)(1) and (b)(2). The revision reads as follows:

**§ 34.13 Specific license for industrial radiography.**

* * * * *

(b) The applicant submits an adequate program for training radiographers and radiographers' assistants that meets the requirements of § 34.43. A license applicant need not describe its initial training and examination program for radiographers in the subjects outlined in § 34.43(g).

* * * * *

**§ 34.20 [Amended]**

■ 29. Amend § 34.20 by:
■ a. Revising paragraphs (a)(1) and (a)(2);
■ b. Removing paragraph (c)(8) and redesigning paragraph (c)(9) as paragraph (c)(8); and
■ d. Removing paragraphs (d) and (e).

The revisions read as follows:

**§ 34.20 Performance requirements for industrial radiography equipment.**

* * * * *

(a) * * *

(1) Each radiographic exposure device, source assembly or sealed source must have been evaluated by the NRC or an Agreement State and registered in the Sealed Source and Device Registry, and all associated equipment must meet the manufactures' specifications and instructions.

(2) Engineering analysis may be submitted by an applicant or licensee to demonstrate the applicability of previously performed testing on similar individual radiography equipment components. Upon review, the Commission may find this an acceptable alternative to actual testing of the component pursuant to the requirements referenced in paragraph (a)(1) of this section.

* * * * *

**§ 34.23 [Amended]**

■ 30. In § 34.23, in paragraph (a) remove the phrase ''§ 34.51'' and add in its place the phrase ''§ 34.41''.

**§ 34.27 [Amended]**

■ 31. Amend § 34.27 by:
■ a. In the first sentence of (c)(1), add the phrase ''or at other intervals approved by the Commission or an Agreement State in the Sealed Source and Device Registry'', after the phrase ''6 months'';
■ b. In paragraph (e), removing the phrase ''Licensees will have until June 27, 1998, to comply with the DU leak-testing requirements of this paragraph''.

**§ 34.33 [Amended]**

■ 32. In § 34.33, in paragraph (b) remove the phrase ''§ 34.51'' and add in its place the phrase ''§ 34.41''.

■ 33. Revise and republish § 34.41 to read as follows:

**§ 34.41 Conducting industrial radiographic operations.**

(a) Whenever radiography is performed at a location other than a permanent radiographic installation, the radiographer must be accompanied by at least one other qualified radiographer or an individual who has at a minimum met the requirements of § 34.43(c). Radiography may not be performed if only one qualified individual is present.

(1) During each radiographic operation either the radiographer or the other qualified individual present shall maintain continuous direct visual surveillance of the operation to protect against unauthorized entry into a high radiation area, as defined in 10 CFR part 20 of this chapter.

(2) The second individual present must be in sufficiently close proximity to the radiographic operation and sufficiently aware of the ongoing activities to be able to provide immediate assistance when necessary and to prevent unauthorized entry.

(b) All radiographic operations conducted at locations of use authorized on the license must be conducted in a permanent radiographic installation, unless specifically authorized by the Commission.

(c) A licensee may conduct lay-barge, offshore platform, or underwater radiography only if procedures have been approved by the Commission or by an Agreement State.

■ 34. Amend § 34.43 by:
■ a. Revising paragraph (a) and removing paragraphs (a)(1) and (2); and
■ b. Removing paragraphs (h) and (i).

The revision reads as follows:

**§ 34.43 Training.**

(a) The licensee may not permit any individual to act as a radiographer until the individual has received training in the subjects in paragraph (g) of this section, in addition to a minimum of 2 months of on-the-job training, and is certified through a radiographer certification program by a certifying entity in accordance with the criteria specified in appendix A of this part. (An independent organization that would like to be recognized as a certifying entity shall submit its request to the Director, Office of Nuclear Material Safety and Safeguards, by an appropriate method listed in § 30.6(a) of this chapter.)

* * * * *

**§ 34.51 [Reserved]**

■ 35. Remove and reserve § 34.51.
■ 36. In § 34.89, revise paragraph (b) to read as follows:

**§ 34.89 Location of documents and records.**

* * * * *

(b) Each licensee shall also maintain copies of the following documents and records sufficient to demonstrate compliance at each applicable field station and each temporary jobsite;

(1) The license authorizing the use of licensed material;

(2) Utilization records for each radiographic exposure device dispatched from that location as required by § 34.71.

(3) Records of alarm system and entrance control checks required by § 34.75, if applicable;

(4) Records of direct reading dosimeters such as pocket dosimeter and/or electronic personal dosimeters readings as required by § 34.83;

(5) Current operating and emergency procedures required by § 34.81;

(6) Evidence of the latest calibration of the radiation survey instruments in use at the site, as required by § 34.65;

(7) Evidence of the latest calibrations of alarm ratemeters and operability checks of pocket dosimeters and/or electronic personal dosimeters as required by § 34.83;

(8) Latest survey records required by § 34.85;

(9) The shipping papers for the transportation of radioactive materials required by § 71.5 of this chapter; and

(10) When operating under reciprocity pursuant to § 150.20 of this chapter, a copy of the Agreement State license authorizing the use of licensed materials.

* * * * *

**§ 34.101 [Amended]**

■ 37. In § 34.101, remove and reserve paragraph (c).

## PART 39—LICENSES AND RADIATION SAFETY REQUIREMENTS FOR WELL LOGGING

■ 38. The authority citation for part 39 continues to read as follows:

**Authority:** Atomic Energy Act secs. 53, 57, 62, 63, 65, 69, 81, 82, 161, 181, 182, 183, 186, 223, 234 (42 U.S.C. 2073, 2077, 2092, 2093, 2095, 2099, 2111, 2112, 2201, 2231, 2232, 2233, 2236, 2273, 2282); Energy Reorganization Act secs. 201, 202, 206 (42 U.S.C. 5841, 5842, 5846); Government Paperwork Elimination Act sec. 1704 (44 U.S.C. 3504 note).

**§ 39.33 [Amended]**

■ 39. In § 39.33, in paragraph (c)(1), remove the phrase ''6 months'' and add in its place the phrase ''12 months''.
■ 40. In § 39.35, revise paragraph (c)(1) to read as follows:

**§ 39.35 Leak testing of sealed sources.**

* * * * *

(c) Each sealed source (except an energy compensation source (ECS)) must be tested at intervals not to exceed 6 months or at other intervals approved by the Commission or an Agreement State in the Sealed Source and Device Registry. In the absence of a certificate from a transferor that a test has been made within the 6 months or at other intervals approved by the Commission or an Agreement State in the Sealed Source and Device Registry before the transfer, the sealed source may not be used until tested.

* * * * *

■ 41. In § 39.77, remove paragraph (c)(1) and redesignate paragraphs (c)(2) and (c)(3) as paragraphs (c)(1) and (c)(2).

## PART 40—DOMESTIC LICENSING OF SOURCE MATERIAL

■ 42. The authority citation for part 40 continues to read as follows:

**Authority:** Atomic Energy Act secs. 11(e)(2), 62, 63, 64, 65, 81, 161, 181, 182, 183, 186, 193, 223, 234, 274, 275 (42 U.S.C. 2014(e)(2), 2092, 2093, 2094, 2095, 2111, 2113, 2114, 2201, 2231, 2232, 2233, 2236, 2243, 2273, 2282, 2021, 2022); Energy Reorganization Act secs. 201, 202, 206 (42 U.S.C. 5841, 5842, 5846); Government Paperwork Elimination Act sec. 1704 (44 U.S.C. 3504 note); Energy Policy Act of 2005, Public Law 109–59, 119 Stat. 594 (2005).

Section 40.7 also issued under Energy Reorganization Act sec. 211, Public Law 95–601, sec. 10, as amended by Public Law 102–486, sec. 2902 (42 U.S.C. 5851). Section 40.31(g) also issued under Atomic Energy Act sec. 122 (42 U.S.C. 2152). Section 40.46 also issued under Atomic Energy Act sec. 184 (42 U.S.C. 2234). Section 40.71 also issued under Atomic Energy Act sec. 187 (42 U.S.C. 2237).

■ 43. Revise and republish § 40.53 to read as follows:

**§ 40.53 Conditions for licenses issued for initial transfer of certain items containing source material: Quality control, labeling, and records.**

(a) Each person licensed under § 40.52 shall ensure that the quantities or concentrations of source material do not exceed any applicable limit in § 40.13(c).

(b) Each person licensed under § 40.52 shall ensure that each product is labeled as provided in the specific exemption under § 40.13(c) and as required by their license. Those distributing products to be used under § 40.13(c)(1)(i) and (iii) or equivalent regulations of an Agreement State shall provide radiation safety precautions and instructions relating to handling, use, and storage of these products as specified in the license.

(c)(1) Each person licensed under § 40.52 shall maintain record of transfer.

(2) The record must clearly identify the specific licensee preparing the record and include the license number of the specific licensee and indicate that the products are transferred for use under § 40.13(c), giving the specific paragraph designation, or equivalent regulations of an Agreement State.

(3) The record must include the following information on products transferred to other persons for use under § 40.13(c) or equivalent regulations of an Agreement State:

(i) A description or identification of the type of each product and the model number(s), if applicable;

(ii) For each type of source material in each type of product and each model number, if applicable, the total quantity of the source material; and

(iii) The number of units of each type of product transferred by calendar year and model number, if applicable.

(4) The licensee shall maintain the record of a transfer and all information concerning transfers in accordance with § 40.61.

## PART 70—DOMESTIC LICENSING OF SPECIAL NUCLEAR MATERIAL

■ 44. The authority citation for part 70 continues to read as follows:

**Authority:** Atomic Energy Act of 1954, secs. 51, 53, 57(d), 108, 122, 161, 182, 183, 184, 186, 187, 193, 223, 234, 274, 1701 (42 U.S.C. 2071, 2073, 2077(d), 2138, 2152, 2201, 2232, 2233, 2234, 2236, 2237, 2243, 2273, 2282, 2021, 2297f); Energy Reorganization Act of 1974, secs. 201, 202, 206, 211 (42 U.S.C. 5841, 5842, 5846, 5851); Nuclear Waste Policy Act of 1982, secs. 135, 141 (42 U.S.C. 10155, 10161); 44 U.S.C. 3504 note.

**§ 70.25 [Amended]**

■ 45. Amend § 70.25 by:

■ a. In paragraph (a)(2), remove the phrase ''unsealed special nuclear material'' and add in its place the phrase ''unsealed special nuclear material of half-life greater than 120 days and''; and

■ b. In paragraph (b) introductory text, remove the phrase ''unsealed special nuclear material'' and add in its place the phrase ''unsealed special nuclear material of half-life greater than 120 days''.

## PART 150—EXEMPTIONS AND CONTINUED REGULATORY AUTHORITY IN AGREEMENT STATES AND IN OFFSHORE WATERS UNDER SECTION 274

■ 46. The authority citation for part 150 continues to read as follows:

**Authority:** Atomic Energy Act sec. 161, 181, 223, 234 (42 U.S.C. 2201, 2021, 2231, 2273, 2282); Energy Reorganization Act sec. 201 (42 U.S.C. 5841); Government Paperwork Elimination Act sec. 1704 (44 U.S.C. 3504 note); Energy Policy Act of 2005, Public Law 109–58, 119 Stat. 594 (2005).

Sections 150.3, 150.15, 150.15a, 150.31, 150.32 also issued under Atomic Energy Act secs. 11e(2), 81, 83, 84 (42 U.S.C. 2014e(2), 2111, 2113, 2114). Section 150.14 also issued under Atomic Energy Act sec. 53 (42 U.S.C. 2073). Section 150.15 also issued under Nuclear Waste Policy Act secs. 135 (42 U.S.C. 10155). Section 150.17a also issued under Atomic Energy Act sec. 122 (42 U.S.C. 2152). Section 150.30 also issued under Atomic Energy Act sec. 234 (42 U.S.C. 2282).

**§ 150.14 [Reserved]**

■ 47. Remove and reserve § 150.14.

■ 48. Revise and republish § 150.20 to read as follows:

**§ 150.20 Recognition of Agreement State licenses.**

(a)

(1) Provided that the provisions of paragraph (b) of this section have been met, any person who holds a specific license or a standard general license from an Agreement State, where the licensee maintains an office for directing the licensed activity and retaining radiation safety records, is granted a general license to conduct the same activity in—

(i) Non-Agreement States;

(ii) Areas of Exclusive Federal jurisdiction within Agreement States; and

(iii) Offshore waters.

(2) The provisions of paragraph (a)(1) of this section do not apply if the specific Agreement State license or Agreement State standard general license limits the authorized activity to a specific installation or location.

(b) Notwithstanding any provision to the contrary in any specific license issued by an Agreement State or standard general license granted by an Agreement State to a person engaging in activities in a non-Agreement State, in an area of exclusive Federal jurisdiction within an Agreement State, or in offshore waters under the general licenses provided in this section, the general licenses provided in this section are subject to all the provisions of the Act, now or hereafter in effect, and to all applicable rules, regulations, and orders of the Commission including the provisions of §§ 30.7(a) through (f), 30.9, 30.10, 30.34, 30.41, and 30.51 through 30.63 of this chapter; §§ 40.7(a) through (f), 40.9, 40.10, 40.41, 40.51, 40.61 through 40.63, 40.71, and 40.81 of this chapter; §§ 70.7(a) through (f), 70.9, 70.10, 70.32, 70.42, 70.52, 70.55, 70.56, 70.60 through 70.62 of this chapter;

§§ 74.11, 74.15, and 74.19 of this chapter; and to the provisions of 10 CFR parts 19, 20 and 71 and subparts C through H of part 34, §§ 39.15 and 39.31 through 39.77 of this chapter. In addition, any person engaging in activities in non-Agreement States, in areas of exclusive Federal jurisdiction within Agreement States, or in offshore waters under the general licenses provided in this section:

(1) Shall, no later than the day of engaging in each activity for the first time in a calendar year, file a submittal containing an NRC Form 241, ''Report of Proposed Activities in Non-Agreement States,'' a copy of its Agreement State specific license or a copy of its validated Agreement State standard general license, and the appropriate fee as prescribed in § 170.31 of this chapter with the Regional Administrator of the U.S. Nuclear Regulatory Commission Regional Office listed on the NRC Form 241 and in appendix D to part 20 of this chapter for the Region in which the Agreement State that issued the license is located.

(2) Shall file an amended NRC Form 241 for changes in work locations except for activities performed offshore, radioactive material, or work activities different from the information contained on the initial NRC Form 241.

(3) Shall not, in any non-Agreement State, in an area of exclusive Federal jurisdiction within an Agreement State, or in offshore waters, transfer or dispose of radioactive material possessed or used under the general licenses provided in this section, except by transfer to a person who is specifically licensed by the Commission to receive this material.

(4) Shall not, under the general license concerning activities in non-Agreement States or in areas of exclusive Federal jurisdiction within Agreement States, possess or use radioactive materials, or engage in the activities authorized in paragraph (a) of this section, for more than 180 days in any calendar year, except that the general license in paragraph (a) of this section concerning activities in offshore waters authorizes that person to possess or use radioactive materials, or engage in the activities authorized, for an unlimited period of time.

(5) Shall comply with all terms and conditions of the specific license issued by an Agreement State, or as applicable, comply with the terms and conditions of the standard general license granted by an Agreement State, except such terms or conditions as are contrary to the requirements of this section.

Dated: May 14, 2026.

For the Nuclear Regulatory Commission.

## National Credit Union Administration

12 CFR Parts 702, 704, et al.
Implementing the Guiding and Establishing National Innovation for U.S. Stablecoins Act for the Issuance of Stablecoins by Entities Subject to the Jurisdiction of the National Credit Union Administration; Proposed Rule

## NATIONAL CREDIT UNION ADMINISTRATION

### 12 CFR Parts 702, 704, 706, 745, and 747

**RIN 3133–AG10**

### Implementing the Guiding and Establishing National Innovation for U.S. Stablecoins Act for the Issuance of Stablecoins by Entities Subject to the Jurisdiction of the National Credit Union Administration

**AGENCY:** National Credit Union Administration (NCUA).

**ACTION:** Supplemental proposed rule.

**SUMMARY:** The NCUA Board (Board) is seeking comment on proposed regulations to implement portions of the Guiding and Establishing National Innovation for U.S. Stablecoins Act (GENIUS Act). The GENIUS Act charges the NCUA with licensing, regulating, and supervising Payment Stablecoin issuers that are subsidiaries of federally insured credit unions (FICU subsidiaries). In February 2026, the NCUA issued proposed regulations to govern investments in and licensing of permitted payment stablecoin issuers subject to the NCUA's jurisdiction. This current proposal supplements the previous proposal and would govern the issuance of Payment Stablecoins and certain related activities by entities subject to the NCUA's jurisdiction. This proposal would also make amendments to address share insurance coverage, tokenized shares, and other conforming and clarifying amendments.

**DATES:** Comments must be received by July 17, 2026.

**ADDRESSES:** Comments may be submitted in one of the following ways. (Please send comments by one method only):

- *Federal eRulemaking Portal: https://www.regulations.gov.* The docket number for this proposed rule is NCUA–2026–1024. Follow the ''Submit a comment'' instructions. If you are reading this document on federalregister.gov, you may use the green ''SUBMIT A PUBLIC COMMENT'' button beneath this rulemaking's title to submit a comment to the regulations.gov docket. A plain language summary of the proposed rule is also available on the docket website.
- *Mail:* Address to Melane Conyers-Ausbrooks, Secretary of the Board, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.
- *Hand Delivery/Courier:* Same as mailing address. Mailed and hand-delivered comments must be received by the close of the comment period.

*Public inspection:* Please follow the search instructions on *https://www.regulations.gov* to view the public comments. Do not include any personally identifiable information (such as name, address, or other contact information) or confidential business information that you do not want publicly disclosed. All comments are public records; they are publicly displayed exactly as received, and will not be deleted, modified, or redacted. Comments may be submitted anonymously. If you are unable to access public comments on the internet, you may contact the NCUA for alternative access by calling (703) 518–6540 or emailing *OGCMail@ncua.gov.*

**FOR FURTHER INFORMATION CONTACT:**

*Office of Examination and Insurance:* Amanda Parkhill, at (703) 518–6385 or at 1775 Duke Street, Alexandria, VA 22314. *Office of General Counsel:* Thomas Zells and Rachel Ackmann, Senior Staff Attorneys; or Ariel Woodard-Stephens, Staff Attorney at (703) 518–6540 or at the above address.

I. Background
II. Legal Authority
III. The NCUA Licensing Proposal
IV. The NCUA Standards Proposal
V. General Request for Comment
VI. Regulatory Procedures

## I. Background

On July 18, 2025, President Trump signed the GENIUS Act into law. The GENIUS Act establishes a regulatory framework for Payment Stablecoins and provides pathways for regulation at both the Federal and State level.

Stablecoins are Digital Assets, *i.e.,* digital representations of value recorded on a cryptographically secured Distributed Ledger,[1] such as a blockchain.[2] In contrast to many other types of Digital Assets, stablecoins are intended to maintain a stable value relative to a reference asset, most often fiat currency.[3] Most stablecoin issuers use a pool of high quality and highly liquid reserve assets to back the stablecoin and maintain a stable value.[4] Stablecoins often rely on smart contracts (*i.e.,* self-executing programs that automatically enforce agreements between users) for different aspects of their functionality.[5] When an issuer redeems a tendered stablecoin, it typically accepts a stablecoin from a user or third party in exchange for a fixed amount of Monetary Value, *e.g.,* one dollar.[6] Stablecoins are frequently used to facilitate trading in Digital Assets and may be used for retail and institutional payments.[7] Certain stablecoin issuers have the capability to freeze funds or block transactions involving their stablecoin, which they may do, for example, to effectuate a court order.[8]

The GENIUS Act focuses on a subset of stablecoins: Payment Stablecoins. Under section 2(22) of the Act, ''payment stablecoin'' means ''a digital asset—(i) that is, or is designed to be, used as a means of payment or settlement; and (ii) the issuer of which—(I) is obligated to convert, redeem, or repurchase for a fixed amount of monetary value, not including a digital asset denominated in a fixed amount of monetary value; and (II) represents that such issuer will maintain, or create the reasonable expectation that it will maintain, a stable value relative to the value of a fixed amount of monetary value[.]'' [9] The term does not include a Digital Asset that is (i) a national currency; (ii) a deposit, including a deposit recorded using distributed ledger technology; or (iii) a security, as defined in 15 U.S.C. 77b, 78c, or 80a–2.[10]

The GENIUS Act generally prohibits any Person other than a permitted payment stablecoin issuer (PPSI) from issuing a Payment Stablecoin in the

[4] *See id.* at 90.

[5] *See id.* at 11.

[6] Currently, rather than mint or redeem stablecoins through the issuer, most market participants rely on digital asset

trading platforms to exchange stablecoins for national currencies (or even other stablecoins).

[7] *Id.* at 93.

[8] *See id.* at 105.

[9] 12 U.S.C. 5901(22).

[10] The Act provides that, for the avoidance of doubt, no bond, note, evidence of indebtedness, or investment contract that was issued by a permitted payment stablecoin issuer shall qualify as a security solely by virtue of its satisfying the conditions described in section 2(22)(A) of the Act, consistent with section 17 of the Act. 12 U.S.C. 5901(22)(B)(iii).

United States.[11] It further prohibits digital asset service providers [12] from offering or selling a Payment Stablecoin to a Person in the United States unless the issuer is a PPSI or the issuer is a foreign payment stablecoin issuer that meets certain requirements.[13] The GENIUS Act sets forth various regulatory and licensing requirements for PPSIs and foreign payment stablecoin issuers. In many instances, the GENIUS Act states that the specific requirements applicable to these entities (*e.g.,* those related to capital, liquidity, operational risk management), shall be set forth by regulations issued by the relevant primary Federal payment stablecoin regulator, in coordination with other relevant agencies, as appropriate.[14] This proposed rulemaking represents one piece of the GENIUS Act's implementing regulations.[15]

Under the GENIUS Act, ''insured depository institutions,'' which the Act defines to include both FDIC-insured depository institutions and FICUs (collectively referred to as ''IDIs''), cannot be issuers of Payment Stablecoins. Instead, IDIs must use ''subsidiaries'' as issuers. The GENIUS Act defines the term ''subsidiary of an insured credit union'' to mean ''(A) an organization providing services to the insured credit union that are associated with the routine operations of credit unions, as described in section 107(7)(I) of the Federal Credit Union Act (12 U.S.C. 1757(7)(I)); (B) a credit union service organization, as such term is used under part 712 of title 12, Code of Federal Regulations, with respect to which the insured credit union has an ownership interest or to which the insured credit union has extended a loan; and (C) a subsidiary of a State chartered insured credit union authorized under State law.'' [16] The GENIUS Act requires that issuers that are subsidiaries of IDIs (including subsidiaries of FICUs) must be regulated by the primary Federal payment stablecoin regulators and does not allow them to opt for the state-level regulatory framework. Thus, the NCUA has jurisdiction over Payment Stablecoin issuers that are FICU subsidiaries.

Under the GENIUS Act, only PPSIs may issue a Payment Stablecoin in the United States, subject to certain exceptions and safe harbors. PPSIs are subject to a number of requirements, including requirements related to reserves, capital, liquidity, illicit finance, and information technology risk management standards. For example, PPSIs must maintain reserves backing the Payment Stablecoin on a one-to-one basis using U.S. currency or certain other liquid assets, as specified. PPSIs must also publicly disclose their redemption policy and publish monthly the details of their reserves.

The GENIUS Act details the process for the primary Federal payment stablecoin regulators, which include the NCUA, the Federal Deposit Insurance Corporation (FDIC), the Office of the Comptroller of the Currency (OCC), and the Board of Governors of the Federal Reserve System (Federal Reserve Board), to evaluate and review applications for licenses to be PPSIs and provides examination, supervision, and enforcement authority over PPSIs. Other issues addressed in the GENIUS Act include the provision of custody services for Payment Stablecoins; application of the Bank Secrecy Act and anti-money laundering and economic sanctions requirements; and treatment of PPSIs in insolvency proceedings.

The GENIUS Act establishes clear prohibitions and penalties to prevent the misrepresentation of Federal backing or insurance for Payment Stablecoins and to ensure that only authorized products may be marketed as such.[17] The GENIUS Act explicitly dictates that Payment Stablecoins are not backed by the full faith and credit of the United States, they are not guaranteed by the U.S. Government, nor are they covered by deposit or share insurance from the FDIC or NCUA. Similarly, it is unlawful to market a product in the United States as a Payment Stablecoin unless it is issued pursuant to the GENIUS Act.[18]

As detailed below, the GENIUS Act imposes a number of rulemaking, review, and reporting requirements on the primary Federal payment stablecoin regulators, including the NCUA. This supplemental proposal proposes regulations to implement the standards and restrictions imposed by the GENIUS Act on PPSIs (hereinafter, the ''NCUA Standards Proposal''). This NCUA Standards Proposal supplements the notice of proposed rulemaking that the NCUA published in the **Federal Register** on February 12, 2026, entitled ''Investments in and Licensing of Permitted Payment Stablecoins Issuers'' (hereinafter, the ''NCUA Licensing Proposal'').[19]

Separately, as is required by the GENIUS Act, the NCUA is engaging in a required review of its existing guidance and regulations to determine what steps are necessary, if any, to amend or promulgate new regulations and guidance to clarify FICUs' authority to engage in the Payment Stablecoin activities and investments contemplated by the GENIUS Act.

In addition to the above, the GENIUS Act requires the NCUA to examine and supervise issuers that are FICU subsidiaries. Thus, the NCUA is working to update various NCUA examination policies, guidance, and procedures, such as the National Supervision Policy Manual and Examiner's Guide, to accommodate the new examination and supervision authority over these FICU subsidiaries. The NCUA is also working to determine

[11] See 12 U.S.C. 5902(a). See also 12 U.S.C. 5916 (excepting foreign payment stablecoin issuers that meet certain requirements from the prohibition in section 3 of the Act).

[12] ''Digital asset service provider'' means a person that, for compensation or profit, engages in the business in the United States (including on behalf of customers or users in the United States) of: (1) exchanging digital assets for monetary value; (2) exchanging digital assets for other digital assets; (3) transferring digital assets to a third party; (4) acting as a digital asset custodian; or (5) participating in financial services relating to digital asset issuance. See 12 U.S.C. 5901(7). The term ''digital asset service provider'' does not include (1) a distributed ledger protocol; (2) an immutable and self-custodial software interface; or (3) a person solely by virtue of their (A) developing, operating, or engaging in the business of developing distributed ledger protocols or self-custodial software interfaces; (B) developing, operating, or engaging in the business of validating transactions or operating a distributed ledger; or (C) participating in a liquidity pool or other similar mechanism for the provisioning of liquidity for peer-to-peer transactions. See id. A liquidity pool is a portfolio of digital assets that is algorithmically bound and traded based on smart contracts. Liquidity providers and takers interact with liquidity pools by adding assets that the liquidity pools trade and receive a liquidity pool token in return that is proportionate to the percentage of assets they have contributed to the liquidity pool. Digital Financial Technology Report at 23.

[13] The prohibition against digital asset service providers offering or selling Payment Stablecoins that are not issued by PPSIs begins on July 18, 2028. See 12 U.S.C. 5902(b)(1). The prohibition against digital asset service providers offering or selling Payment Stablecoins that are not issued by foreign payment stablecoin issuers that meet certain requirements goes into effect as of the effective date of the GENIUS Act. See 12 U.S.C. 5902(b)(2). The prohibitions that apply to a digital asset service provider would apply to an issuer to the extent that the issuer is a digital asset service provider.

[14] *See, e.g.,* 12 U.S.C. 5903(a)(4), (b), (h).

[15] For example, on September 19, 2025, the Department of the Treasury issued an advance notice of proposed rulemaking concerning the GENIUS Act. See 90 FR 45159 (Sept. 19, 2025). On December 19, 2025, the FDIC released a notice of proposed rulemaking related to certain application provisions under the GENIUS Act. 90 FR 59409 (Dec. 19, 2025). On February 12, 2026, the NCUA issued a notice of proposed rulemaking relating to investments in and licensing of PPSIs. 91 FR 6531 (Feb. 12, 2026). On March 2, 2026, the OCC issued a notice of proposed rulemaking relating to the issuance of Payment Stablecoins and certain related activities by entities subject to the OCC's jurisdiction. 91 FR 10202 (Mar. 2, 2026).

[16] 12 U.S.C. 5901(33).

[17] *See* 12 U.S.C. 5903(e).

[18] 12 U.S.C. 5903(e)(3).

[19] 91 FR 6531 (Feb. 12, 2026).

whether further guidance to FICUs and FICU subsidiaries may be necessary on these subjects.

This proposal sets forth, and seeks comment on, the regulations that would apply to NCUA-Licensed Permitted Payment Stablecoin Issuers (NCUA-Licensed PPSIs) as well as certain custody activities conducted by FICUs and NCUA-Licensed PPSIs. These proposed regulations do not address stablecoins that do not qualify as Payment Stablecoins or issuers for which the NCUA does not have regulatory or enforcement authority. The GENIUS Act's effective date is the earlier of 18 months after the enactment date (July 18, 2025) or 120 days after the primary Federal payment stablecoin regulators issue final regulations implementing the GENIUS Act. The NCUA anticipates that these implementing regulations will be updated, as necessary, in the years following the effective date of the GENIUS Act as the business practices of NCUA-Licensed PPSIs continue to evolve and develop. In addition, other regulations beyond those addressed in this rulemaking may need to be updated in light of the passage of the GENIUS Act. This proposal would also make amendments to address share insurance coverage, tokenized shares, and other conforming and clarifying amendments.

*A. Self-Executing Provisions*

The GENIUS Act includes a number of self-executing provisions that are not addressed in this rulemaking. For example, the GENIUS Act includes several provisions addressing the applicability of State law to PPSIs. These provisions ensure that FICU subsidiaries approved to be NCUA-Licensed PPSIs are not subject to State licensure and address the effect of the GENIUS Act on State consumer protection laws.

Section 5(h) of the GENIUS Act expressly preempts ''any State requirement for a charter, license, or other authorization to do business with respect to a'' FICU subsidiary approved to be an NCUA-Licensed PPSI.[20] As a result, these entities are only required to obtain authorization to do business from the NCUA, which reduces the unnecessary complexity that would result from requiring these entities to also obtain a charter, license, or other authorization from one or more States. Section 7(f)(4) of the GENIUS Act provides that nothing in the GENIUS Act preempts State consumer protection laws.[21]

Together, these GENIUS Act provisions establish a framework for assessing the applicability of State law to a FICU subsidiary approved to be an NCUA-Licensed PPSI.[22] Because these GENIUS Act provisions are self-executing, the NCUA is not proposing regulatory text to implement them. However, the agency invites public comment on all aspects of this framework, including whether the self-executing provisions of the GENIUS Act should be codified in the NCUA's regulations for convenience.

## II. Legal Authority

As discussed in Section I. Background of this **SUPPLEMENTARY INFORMATION** section, the NCUA is a primary Federal payment stablecoin regulator with respect to a FICU or FICU subsidiary.[23] As a primary Federal payment stablecoin regulator, the GENIUS Act provides authority for the NCUA to approve and license issuance of Payment Stablecoins through FICU subsidiaries,[24] establish regulations for issuing Payment Stablecoins,[25] and examine for and enforce applicable requirements imposed on FICU subsidiaries.[26] The GENIUS Act also confers authority related to standards for custody of Payment Stablecoins, Private Keys, and reserves.[27] The GENIUS Act grants the NCUA general authority to promulgate regulations to carry out the GENIUS Act through appropriate notice and comment rulemaking.[28]

Apart from the GENIUS Act, the FCU Act grants the NCUA a broad mandate to issue regulations governing both Federal Credit Unions (FCUs) and all FICUs. Section 120 of the FCU Act is a general grant of regulatory authority, and it authorizes the Board to prescribe rules and regulations for the administration of the FCU Act.[29] Section 209 of the FCU Act is a plenary grant of regulatory authority to the NCUA to issue rules and regulations necessary or appropriate to carry out its role as share insurer for all FICUs.[30]

Additionally, Section 204 of the FCU Act authorizes the Board, through its examiners, ''to examine any [federally] insured credit union . . . to determine the condition of any such credit union for insurance purposes.'' [31] Section 206(e) of the FCU Act authorizes the Board to take certain actions against a FICU, if, in the opinion of the Board, the credit union ''is engaging or has engaged, or the Board has reasonable cause to believe that the credit union or any institution affiliated party is about to engage, in any unsafe or unsound practice in conducting the business of such credit union.'' [32] Therefore, the Board has statutory authority to determine whether a FICU is operated in an unsafe or unsound manner and terminate a FICU's insurance if a FICU is not operated in a safe or sound manner.

With respect to proposed amendments to clarify the share insurance coverage of funds deposited in Share Accounts at FICUs that serve as Reserve Assets and the treatment of tokenized Share Accounts, in addition to the broad FCU Act authorities provided in sections 120 and 209 of the FCU Act, the FCU Act provides that the ''[d]etermination of the net amount of share insurance under subparagraph (A), shall be in accordance with such regulations as the Board may prescribe . . .'' [33] and that the ''Board may define, with such classifications and exceptions as it may prescribe, the extent of the share insurance coverage provided for member accounts. . ..'' [34] As discussed later in this preamble, the FCU Act also defines the term ''member account.'' [35] The NCUA insures member accounts at all FICUs. Importantly, this term is not limited to those persons enumerated in the credit union's field of membership who have become members. It also includes as member accounts certain nonmembers, such as other nonmember credit unions; nonmember public units and political subdivisions; and, in the case of credit unions serving predominantly low-income members, deposits of nonmembers generally. In other words, the NCUA provides share insurance coverage to members and those otherwise eligible to maintain insured accounts at FICUs.

## III. The NCUA Licensing Proposal

On February 12, 2026, the NCUA published a notice of proposed rulemaking in the **Federal Register** entitled ''Investments in and Licensing of Permitted Payment Stablecoins Issuers.'' The NCUA Licensing Proposal served as the first of two main proposed

[34] 12 U.S.C. 1787(k)(1)(C).

[35] 12 U.S.C. 1752(5).

rules that the NCUA anticipated issuing to implement the GENIUS Act. The NCUA is providing a high-level summary of that proposal to assist stakeholders as they review this second NCUA supplemental proposed rulemaking, the NCUA Standards Proposal, addressing standards for NCUA-Licensed PPSIs and FICUs, among other subjects.

The NCUA interprets the GENIUS Act to limit PPSI status to those institutions functioning as a subsidiary of an IDI (including a FICU),[36] a Federal qualified payment stablecoin issuer,[37] and a State qualified payment stablecoin issuer.[38] FICUs are not permitted to issue Payment Stablecoins directly. However, the GENIUS Act provides that subsidiaries of IDIs may apply and be approved to be PPSIs. As FICUs are expressly defined as IDIs, FICU subsidiaries may apply for and receive approval and license under the GENIUS Act to be PPSIs.

Section 5 of the GENIUS Act establishes the procedures and standards for the ''approval of subsidiaries of insured depository institutions.'' [39] The NCUA is required to ''receive, review, and consider for approval applications'' to issue Payment Stablecoins through a FICU subsidiary and to ''establish a process and framework for the licensing, regulation, examination and supervision of such entities that prioritizes the safety and soundness of such entities.'' Section 5(a)(2) requires the NCUA to issue regulations to carry out section 5.[40] Section 5(g) further requires that the NCUA issue rules necessary for the regulation of the issuance of Payment Stablecoins.[41]

As explained in more detail in the NCUA Licensing Proposal, the GENIUS Act does not allow FICUs to directly issue Payment Stablecoins and instead provides that they must be issued through FICU subsidiaries that receive an NCUA–PPSI license. The Board made certain decisions in proposing to implement the GENIUS Act's application and licensing requirements that it believes will simplify the process and reduce the costs for the credit union industry and the NCUA. The Board discusses this approach in more detail in the NCUA Licensing Proposal.

The NCUA Licensing Proposal determined that it is preferrable for FICU subsidiaries themselves to submit the required applications to be an NCUA-Licensed PPSI jointly with their FICU Parent Company(ies), as defined in the NCUA-Licensing Proposal, rather than having every single FICU investing in them submit an application. The Board's proposed approach would also require the applying FICU subsidiary, and any of its FICU Parent Companies and Principal Shareholders, to provide written certification that any filing or supporting material submitted to the NCUA contains no material misrepresentations or omissions. Further, as required by the GENIUS Act, all Directors and Officers of the applying FICU subsidiary, its FICU Parent Company(ies), and any of its Principal Shareholders would have to provide certain information so that the NCUA can evaluate their competence, experience, and integrity and ensure they do not have felony convictions prohibited by the GENIUS Act. Finally, the NCUA Licensing Proposal proposed limiting FICUs to investing in NCUA-Licensed PPSIs. The Board believes this limitation is consistent with the definition of FICU subsidiary in the GENIUS Act and should not pose a barrier to the credit union industry's ability to facilitate Payment Stablecoin services for their members.

Further information about the proposed regulations to govern the process for reviewing and granting NCUA–PPSI licenses can be found in the NCUA Licensing Proposal.

## IV. The NCUA Standards Proposal

The NCUA is issuing this supplemental proposed rule governing the issuance of Payment Stablecoins and certain related activities by entities subject to the NCUA's jurisdiction to supplement the NCUA Licensing Proposal and substantially implement the NCUA's proposed regulatory regime for NCUA-Licensed PPSIs and FICUs.

The NCUA is proposing the following procedures and standards for NCUA-Licensed PPSIs. Each section of the proposed rule will be discussed separately. As noted, the NCUA is providing a high-level summary of portions of the NCUA Licensing Proposal to assist stakeholders as they review this NCUA Standards Proposal. Unless explicitly stated in this supplemental proposal, the NCUA is not reproposing or otherwise modifying those provisions proposed in the NCUA Licensing Proposal.

The NCUA also notes that, as discussed throughout the NCUA Licensing Proposal, the GENIUS Act frequently uses banking-specific terminology and standards. Given this reliance on banking-specific terminology and the importance of providing consistent regulatory terminology and standards across the various primary Federal payment stablecoin regulators, where possible, proposed part 706 would maintain consistency with the standards and terminology proposed by the other primary Federal payment stablecoin regulators.

### *A. § 706.1. Authority, Purpose, and Scope*

The NCUA Licensing Proposal proposed § 706.1 to describe the authority, purpose, and scope of part 706. The NCUA Standards Proposal is not proposing changes to what was previously proposed, but is restating the explanation provided in the NCUA Licensing Proposal to assist stakeholders as they review this proposal. Proposed § 706.1 would state that the NCUA is issuing part 706 under the GENIUS Act. Section 706.1 would state that part 706 applies to FICUs and all PPSIs with investment or loans from FICUs and sets forth such entities' requirements for an NCUA-issued license. Finally, § 706.1 would state that there is nothing in this part that shall be read to limit the authority of the NCUA to take action under provisions of law other than the GENIUS Act, including action to address unsafe or unsound practices or conditions, or violations of law or regulation, under section 206 of the FCU Act.

[36] As discussed throughout the proposed rule, the GENIUS Act uses banking-specific terminology when defining PPSIs. For example, the GENIUS Act uses the two defined terms ''subsidiary'' and ''insured depository institution'' without using the defined term, ''subsidiary of an insured credit union.'' With respect to subsidiaries of FICUs, the Board believes the defined terms ''subsidiary'' of an ''insured depository institution'' should be read referring to the defined term ''subsidiary of an insured credit union.'' Given that FICUs are defined as insured depository institutions, it appears reasonable to read the terms synonymously. Additionally, the GENIUS Act expressly provides that all subsidiaries of an Insured Credit Union are subject to NCUA jurisdiction incorporating the defined term of ''subsidiary of an insured credit union'' into the definition of primary Federal payment stablecoin regulator. The term primary Federal payment stablecoin regulator is used for approvals under section 5 and it would be inharmonious for the NCUA to approve applications for issuers that otherwise are not subject to NCUA supervision.

[37] A Federal qualified payment stablecoin issuer includes (1) a nonbank entity, (2) an uninsured national bank, and (3) a Federal branch. FICUs and their subsidiaries would not qualify as Federal qualified payment stablecoin issuers.

[38] A State qualified payment stablecoin issuer is an entity that is: (A) legally established under the laws of a State and approved to issue payment stablecoins by a State payment stablecoin regulator; and (B) is not an uninsured national bank chartered by the OCC, a Federal branch, an IDI, or a subsidiary of a national bank, Federal branch, or IDI. FICUs and FICU subsidiaries, including CUSOs, therefore, would not qualify as a State qualified payment stablecoin issuer.

[39] 12 U.S.C. 5904.

[40] 12 U.S.C. 5904(a)(2).

[41] 12 U.S.C. 5904(g).

*B. § 706.2. Definitions*

Proposed § 706.2 would provide the definitions used throughout part 706.[42] It would state that, unless otherwise provided in part 706, the terms used in this part have the same meanings as set forth in 12 U.S.C. 1752 and 5901. It would also state that all accounting terms not otherwise defined in this part have meanings consistent with the commonly accepted meanings under United States generally accepted accounting principles (U.S. GAAP). Proposed § 706.2 would provide the following defined terms specific to part 706.

This NCUA Standards Proposal restates the definitions provided in the NCUA Licensing Proposal to assist commenters. Except where explicitly noted, the NCUA Standards Proposal does not modify the proposed definitions from the NCUA Licensing Proposal.

As discussed throughout the NCUA Licensing Proposal, the GENIUS Act frequently uses banking-specific terminology and standards. Given this reliance on banking-specific terminology and the importance of providing consistent regulatory terminology and standards across the various primary Federal payment stablecoin regulators, where possible, proposed part 706 would maintain consistency with the standards and terminology proposed by the other primary Federal payment stablecoin regulators. The GENIUS Act's reliance on banking-specific terminology also compels the NCUA to at times clarify the best meaning of credit union specific terminology in part 706.

The NCUA solicits stakeholder input as to the below definitions and specifically as to whether individual definitions appropriately balance consistent meaning across the primary Federal payment stablecoin regulators with needed differences to accommodate the credit union industry.

1. Affiliate

The NCUA is proposing to define the term ''Affiliate'' consistent with the definition proposed by the OCC in their Payment Stablecoin notice of proposed rulemaking published in the **Federal Register** on March 2nd (hereinafter, the ''OCC Proposal''). The OCC proposal would define the term consistent with the definition in the Bank Holding Company Act, 12 U.S.C. 1841(k), but modified to use the defined term ''Person'' in place of the term ''company.''[43] Under the proposed rule, the term ''Affiliate'' would mean a Person that controls, is controlled by, or is under common Control with another person. The NCUA believes the proposed definition of Affiliate would include the appropriate individuals and entities that could be involved in Payment Stablecoin issuance. As articulated above, the NCUA also believes that it is important to, where possible, provide consistent regulatory standards across the various primary Federal payment stablecoin regulators.

2. Applying Issuer

As proposed in the NCUA Licensing Proposal, the term ''Applying Issuer'' would mean any entity applying to the NCUA for an NCUA–PPSI license. This term would be used throughout part 706 to generally refer to any entity that is applying for an NCUA–PPSI license. As is required in proposed § 706.103, an Applying Issuer must apply jointly with any Insured Credit Union Parent Company(ies), as defined in the NCUA Licensing Proposal.

3. Bank Secrecy Act

The NCUA is proposing to define the term ''Bank Secrecy Act'' consistent with the definition provided in the GENIUS Act, 12 U.S.C. 5901(2). Under the proposal, the term ''Bank Secrecy Act'' would mean: (1) section 21 of the Federal Deposit Insurance Act (12 U.S.C. 1829b); (2) chapter 2 of title I of Public Law 91–508 (12 U.S.C. 1951 *et seq.*); and (3) subchapter II of chapter 53 of title 31, United States Code and notes thereto (31 U.S.C. 5311 *et seq.*). The proposal would add the phrase ''and notes thereto'' as a clarification.

4. Control

The NCUA is defining ''Control'' such that a Person would control another Person if: (1) the Person directly or indirectly or acting through one or more other Persons owns, controls, or has power to vote 25 percent or more of any class of voting securities of the other Person; (2) the Person controls in any manner the election of a majority of the Directors or trustees of the other Person; or (3) the NCUA determines, after notice and opportunity for hearing, that the Person directly or indirectly exercises a controlling influence over the management or policies of the other Person. Like the definition of ''Affiliate,'' the proposed definition of ''Control'' is generally consistent with the Bank Holding Company Act.[44] The NCUA notes that § 706.111, as proposed in the NCUA Licensing Proposal, included certain provisions regarding changes in control of an NCUA-Licensed PPSI related to ownership interests of FICU Parent Companies. As discussed later in this NCUA Standards Proposal, the NCUA is proposing to change proposed § 706.111 to refer to changes in FICU Parent Companies rather than changes in control. This is to help clarify that NCUA-Licensed PPSIs obtaining investment from FICUs and the investing FICUs should refer to the standards for FICUs that are or would be Parent Companies as described in § 706.111 while NCUA-Licensed PPSIs obtaining investment from non-FICU investors and the non-FICU investors should refer to this definition of Control and § 706.205(m). This is not intended to create a substantive change from the standards applicable to FICU Parent Companies initially proposed in the NCUA Licensing Proposal.

5. Customer

The NCUA is proposing to define the term ''Customer'' to mean a Person that purchases (through any consideration) the products or services of another Person. This term appears in a variety of different contexts in the proposed rule, so the NCUA has proposed a broad definition for the term. The definition for purposes of the proposed rule is not intended to affect any customer identification program or customer due diligence rules.

6. Digital Asset

The NCUA is proposing to define the term ''Digital Asset'' as provided in section 2(6) of the GENIUS Act.[45] Under the proposed rule, the term ''Digital Asset'' would mean any digital representation of value that is recorded on a cryptographically secured Distributed Ledger.

7. Director

As provided in the NCUA Licensing Proposal, proposed § 706.2 would define the term ''Director'' to mean an individual who serves on the board of directors of an Applying Issuer, a Parent Company of the Applying Issuer, or a Principal Shareholder of the Applying

[42] The definitions in proposed § 706.2 describe only terms used in proposed part 706. These definitions do not interpret terms for purposes of any other statute or regulation and are not issued pursuant to section 3(d) of the GENIUS Act (12 U.S.C. 5902(d)).

[43] While the proposed definition of ''Affiliate'' is consistent with the definition in the Bank Holding Company Act, the NCUA would retain interpretive authority with respect to this definition for purposes of proposed 12 CFR part 706.

[44] While the proposed definition of Control is consistent with the definition in the Bank Holding Company Act, the NCUA would retain interpretive authority with respect to this definition for purposes of proposed 12 CFR part 706.

[45] 12 U.S.C. 5901(6).

Issuer. Under the NCUA-Licensing Proposal, individuals meeting the definition of a Director will generally need to complete the NCUA's Biographical and Financial Report so that the NCUA can verify their competence, experience, and integrity, as is required by the GENIUS Act.[46] The Directors and proposed Directors of an Applying Issuer will also generally need to provide legible fingerprints for a biometric based criminal history search so that the NCUA can evaluate whether any of these individuals have been convicted of a felony offense involving insider trading, embezzlement, cybercrime, money laundering, financing of terrorism, or financial fraud as is required by the GENIUS Act.[47]

As part of this NCUA Standards Proposal, the NCUA is proposing to amend the definition as proposed in the NCUA Licensing Proposal to specifically include individuals who serve on the board of directors of an NCUA-Licensed PPSI and to exempt certain advisory directors. These are not intended to be substantive changes, but instead to make clear that (1) an individual that is a Director of an Applying Issuer remains covered by the term Director once the Appling Issuer becomes an NCUA-Licensed PPSI; and (2) the definition is not intended to cover advisory directors who do not have the authority to vote on matters before the board of directors or any committee of the board of directors and provide solely general policy advice to the board of directors or any committee. Additionally, it is worth noting that Directors of NCUA-Licensed PPSIs would be subject to a number of additional requirements imposed by the NCUA Standards Proposal, including those related to Insider and Affiliate transactions in proposed § 706.204(a)(6).

Finally, as noted above, the NCUA is also proposing to include language in the definition of Director exempting advisory directors who do not have the authority to vote on matters before the board of directors or any committee of the board of directors and provides solely general policy advice to the board of directors or any committee.

8. Distributed Ledger

The NCUA is proposing to define the term ''Distributed Ledger'' as provided in the GENIUS Act with certain technical edits.[48] The proposed rule would define the term ''Distributed Ledger'' to mean technology in which (1) data is shared across a network that creates a public digital ledger of verified transactions or information among network participants and (2) cryptography is used to link the data to maintain the integrity of the public ledger and execute other functions. The proposed definition reformats the definition in the GENIUS Act by using numbering to distinguish between the two components of the definition. The formatting changes are technical and do not have a substantive effect on the definition.

9. Distributed Ledger Protocol

The NCUA is proposing to define the term ''Distributed Ledger Protocol'' as provided in the GENIUS Act.[49] The term ''Distributed Ledger Protocol'' would mean publicly available and accessible executable software deployed to a Distributed Ledger, including smart contracts or networks of smart contracts.

10. Eligible Financial Institution

The NCUA is proposing to define ''Eligible Financial Institution'' to mean (1) a Person that (a) is eligible to hold Reserve Assets in custody under section 10(a) of the GENIUS Act; [50] (b) complies with the applicable requirements in section 10(b), (c), and (d) of the GENIUS Act,[51] including with applicable implementing regulations issued by a relevant Federal payment stablecoin regulator as defined in 12 U.S.C. 5901(25), primary financial regulatory agency described in 12 U.S.C. 5301(12)(B) or (C), State bank supervisor, or State credit union supervisor; and (c), if applicable, enters into a custody agreement with an NCUA-Licensed PPSI documenting the Person's compliance with section 10(b), (c) and (d) of the Act as well as policies and procedures to ensure compliance; or (2) a Federal Reserve Bank.

The term ''Eligible Financial Institution'' is relevant to the Reserve Asset diversification and concentration requirements in proposed § 706.202(c) of the proposed rule. Under section 10(a) of the GENIUS Act, a Person may only engage in the business of providing custodial or safekeeping services for the Payment Stablecoin reserve, the Payment Stablecoins used as collateral, or the Private Keys used to issue Payment Stablecoins if the Person (1) is subject to (A) supervision or regulation by a primary Federal payment stablecoin regulator or a primary financial regulatory agency described under subparagraph (B) or (C) of section 2(12) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (12 U.S.C. 5301(12)); or (B) supervision by a State bank supervisor, as defined under section 3 of the FDI Act (12 U.S.C. 1813), or a State credit union supervisor, as defined under section 6003 of the Anti-Money Laundering Act of 2020 (31 U.S.C. 5311 note), and such State bank supervisor or State credit union supervisor makes available to the Federal Reserve such information as the Federal Reserve determines necessary and relevant to the categories of information under section 10(d) of the Act; and (2) complies with the requirements under section 10(b), unless such Person holds such property in accordance with similar requirements as required by a primary Federal payment stablecoin regulator, the Securities and Exchange Commission, or the Commodity Futures Trading Commission.

Eligible Financial Institutions would include IDIs regardless of whether the entities engaged in stablecoin activities or provided custody services to NCUA-Licensed PPSIs because these entities are subject to supervision or regulation by a primary Federal payment stablecoin regulator. Thus, for example, under proposed § 706.202(c) an NCUA-Licensed PPSI could deposit reserves in Share Accounts at a FICU regardless of whether the FICU acted as custodian for the NCUA-Licensed PPSI's other Reserve Assets.

To meet the proposed definition, a financial institution must also comply with the applicable requirements of section 10 of the Act,[52] and the relevant custody agreement must reflect compliance with section 10 as well as policies and procedures to ensure such compliance.[53] These criteria are intended to ensure compliance with section 10 of the Act and to encourage appropriate due diligence of entities that hold Reserve Assets for NCUA-Licensed PPSIs.

The NCUA recognizes that multiple agencies will regulate PPSIs and that multiple agencies regulate the entities that may permissibly custody Reserve Assets. The proposed rule would impose requirements on where and how NCUA-Licensed PPSIs may hold Reserve Assets and would also impose requirements on NCUA-regulated institutions that hold Reserve Assets on behalf of PPSIs, including PPSIs not regulated by the NCUA. Accordingly, there may be overlap between the

[46] 12 U.S.C. 5904(c)(3).

[47] *See* 12 U.S.C. 5903(f).

[48] 12 U.S.C. 5901(8).

[49] 12 U.S.C. 5901(9).

[50] 12 U.S.C. 5909(a).

[51] 12 U.S.C. 5909(b)–(d).

[52] 12 U.S.C. 5909.

[53] As discussed above, to the extent that an Eligible Financial Institution does not engage in custody of covered assets, section 10 of the GENIUS Act (12 U.S.C. 5909) would not apply.

requirements imposed by different regulators with separate requirements implementing section 10 of the GENIUS Act that govern how their regulated entities must handle Reserve Assets placed by other PPSIs. The NCUA invites comment on the best ways to manage potentially overlapping requirements. The proposed rule would require that an ''Eligible Financial Institution'' comply with the requirements in section 10(b), (c), and (d) of the GENIUS Act, including applicable implementing regulations. Accordingly, even if different types of Eligible Financial Institutions are subject to different regulations on the safe handling of Payment Stablecoin Reserve Assets, an NCUA-Licensed PPSI could still custody Reserve Assets at any entity that meets the requirements in the definition of ''Eligible Financial Institution.'' Given the diverse set of entities that may permissibly hold Payment Stablecoin reserves, the proposed definition of ''Eligible Financial Institution'' would not necessarily require that Eligible Financial Institutions be subject to uniform regulations implementing the requirements in section 10(b), (c), and (d) of the GENIUS Act. The proposed rule would require an NCUA-Licensed PPSI to enter into a custody agreement with an Eligible Financial Institution, which would establish a baseline that the Eligible Financial Institution is adhering to the requirements in section 10(b), (c), and (d), along with any implementing regulations. In the absence of this requirement, Reserve Assets might be placed at a financial institution without the financial institution even purporting to comply with the requirements in section 10(b), (c), or (d), or possibly even knowing that its Customer's assets represent Payment Stablecoin reserves.

11. Fair Value

The NCUA is proposing to include a definition of the term ''Fair Value'' in the rule. As proposed, the term ''Fair Value'' would mean the fair value as determined under GAAP.[54] Fair value is used in proposed § 706.202 in describing proposed reserve requirements.

12. FDIC

The NCUA is proposing to define FDIC to mean the Federal Deposit Insurance Corporation. This accords with the definition of ''Corporation'' in section 2(5) of the GENIUS Act.[55] The NCUA has opted not to use the term ''Corporation'' to describe the FDIC because that term is used more broadly in the definition of Person, discussed below.

13. GAAP

The NCUA is proposing to include a definition of the term GAAP in the rule. The proposed rule would define the term ''GAAP'' to mean the generally accepted accounting principles as used in the United States. GAAP is used in the definition of Fair Value and proposed subparts B and D.

14. Immediate Family

The NCUA is proposing to define the term ''Immediate Family'' to mean the spouse of an individual, the individual's minor children, and any of the individual's children (including adults) residing in the individual's home. This term is relevant to the risk management standards concerning Insider and Affiliate transactions. It aligns with the definition in the OCC Proposal and is consistent with the definition in Regulation O.[56]

15. Insider

The NCUA is proposing to define the term ''Insider'' to mean: (1) an Officer or Director of an NCUA-Licensed PPSI; (2) any Parent Company, and the Officers and Directors of the Parent Company, of an NCUA-Licensed PPSI; (3) any Principal Shareholder, and Officers and Directors of the Principal Shareholder, of an NCUA-Licensed PPSI; and (4) a Related Interest of or the Immediate Family of any of these Persons. This term is relevant to the risk management standards concerning Insider and Affiliate transactions. It aligns with the definition in the OCC Proposal, which was adapted from the definition in Regulation O,[57] while accounting for Parent Company FICUs and their Officers and Directors. It has been adapted to make direct reference to the Immediate Family of one of the covered groups of Officers, Directors, Parent Companies, and Principal Shareholders to mitigate the risk of an Insider engaging in inappropriate transactions to benefit Immediate Family members.

16. Insured Credit Union

The NCUA proposes to define the term ''Insured Credit Union'' consistent with the definition of the term in the GENIUS Act.[58] As proposed, the term ''Insured Credit Union'' would have the meaning given to that term in section 101 of the Federal Credit Union Act.[59]

17. Insured Depository Institution

The NCUA is proposing to define the term ''Insured Depository Institution'' consistent with the definition of the term in the GENIUS Act.[60] As proposed, the term ''Insured Depository Institution'' would mean an Insured Depository Institution, as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813) and an Insured Credit Union.

18. Issuing Group

As proposed in the NCUA Licensing Proposal, proposed § 706.2 would define the term ''Issuing Group'' to mean the Applying Issuer and Parent Company(ies) and the Officers, Directors, and Principal Shareholders, if applicable, of the Applying Issuer, its subsidiaries, and Parent Company(ies).

As part of this NCUA Standards Proposal, the NCUA is proposing to amend the definition as proposed in the NCUA Licensing Proposal to specifically include NCUA-Licensed PPSIs. This is not intended to be a substantive change, but instead to make clear that an Applying Issuer that becomes an NCUA-Licensed PPSI remains a member of the Issuing Group and is subject to the requirements proposed part 706 imposes on Issuing Groups.

19. Monetary Value

The NCUA is proposing to define the term ''Monetary Value'' as provided in the GENIUS Act.[61] The proposal would define ''Monetary Value'' to mean a National Currency or deposit (as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813)) denominated in a National Currency.

However, as noted throughout the NCUA's Licensing Proposal and this NCUA Standards Proposal, the GENIUS Act frequently relies on banking-specific terminology. The references to a ''deposit'' as defined by the FDI Act in the GENIUS Act's definitions of ''Monetary Value'' [62] and ''Payment Stablecoin'' [63] are an example of this. Despite these references to FDI Act ''deposits,'' which do not explicitly cover ''accounts,'' [64] as defined by the FCU Act, or ''shares'' at FICUs (defined as ''Share Accounts'' in this proposal), the Board believes the GENIUS Act broadly contemplates treating deposits

[54] See discussion of the definition of ''GAAP,'' infra.

[55] 12 U.S.C. 5901(5).

[56] 12 CFR part 215.

[57] *Id.*

[58] 12 U.S.C. 5901(14).

[59] 12 U.S.C. 1752.

[60] 12 U.S.C. 5901(15).

[61] 12 U.S.C. 5901(17).

[62] *See* 12 U.S.C. 5901(17).

[63] *See* 12 U.S.C. 5901(22).

[64] *See* 12 U.S.C. 1752(5).

at banks and savings associations and funds in Share Accounts at FICUs interchangeably and is concerned that to do otherwise could potentially create interpretive and implementation issues.

More specifically, the GENIUS limits ''Payment Stablecoins'' to Digital Assets that the issuer must (1) ''be obligated to convert, redeem, or repurchase for a fixed amount of monetary value'' and (2) ''represent[ ] that such issuer will maintain, or create the reasonable expectation that it will maintain, a stable value relative to the value of a fixed amount of monetary value[.]'' [65] The GENIUS Act generally defines ''Monetary Value'' to mean (1) a National Currency; or (2) a deposit (as defined by the FDI Act) denominated in a National Currency.[66] In relevant part, a National Currency is defined by the GENIUS Act to include Federal Reserve notes and Money standing to the credit of an account with a Federal Reserve Bank.[67] The Payment Stablecoin definition also clarifies that Digital Assets that are a National Currency or a deposit (as defined by the FDI Act), including a deposit recorded using Distributed Ledger technology, are not Payment Stablecoins.[68]

While the Payment Stablecoin and Monetary Value definitions do not explicitly address ''accounts'' or ''shares'' at FICUs (Share Accounts), the Board believes that an overall reading of the GENIUS Act warrants that funds in Share Accounts at FICUs have Monetary Value (1) for which an issuer is ''obligated to convert, redeem, or repurchase'' their Payment Stablecoins for; and (2) against which an issuer can utilize as ''a fixed amount of monetary value.'' The GENIUS Act provides numerous instances demonstrating the intention that ''deposits'' at FDIC-insured banks and savings associations and ''shares'' at FICUs be treated the same, including: (1) parallel treatment of ''demand deposits'' and ''insured shares'' at all ''insured depository institutions,'' which the Act defines to include both FDIC-insured banks and FICUs, as permissible reserves by which Payment Stablecoins can be backed; [69] (2) explicitly granting FDIC-insured banks and FICUs the power to accept Payment Stablecoin reserves as ''cash on *deposit*'' when providing custody services for PPSIs; [70] (3) explicit recognition that the GENIUS Act does not limit the authority of a bank or credit union to ''accept[] or receiv[e] deposits or shares (in the case of a credit union), and issu[e] digital assets that represent those deposits or shares''; [71] (4) recognition that ''[e]ntities regulated by the primary Federal payment stablecoin regulators [including FICUs] are authorized to engage in the Payment Stablecoin activities and investments contemplated by this Act, including acting as a principal or agent with respect to any Payment Stablecoin and payment of fees to facilitate customer transactions''; [72] and (5) a parallel prohibition for misrepresentation of insured status of Payment Stablecoins by FDIC-insured banks and NCUA-insured credit unions.[73]

Given the GENIUS Act's clear intention that, despite the use of banking-specific terminology, Share Accounts at FICUs and deposits at banks are to be given parallel treatment, the NCUA is specifically seeking comment as to whether the NCUA should adopt a definition of the term ''Deposit'' and, if so, the proper definition. Should the parenthetical to the Federal Deposit Insurance Act definition of a ''deposit'' be dropped? Should a definition specifically include ''deposits'' as defined by the Federal Deposit Insurance Act and ''accounts'' as defined by the FCU Act (and defined as Share Accounts in this proposal)? Relatedly, the Board seeks comment as to whether the NCUA should provide an explicit interpretation in Part 706, the final rule's preamble, or other guidance that the definition of Monetary Value and/or Payment Stablecoin in the GENIUS Act expressly covers a Digital Asset for which an issuer has an obligation to redeem funds placed in a Share Account at a FICU? If so, how? For example, should the NCUA expressly interpret Monetary Value to include a broader conception of ''deposits'' not limited to the definition in section 3 of the Federal Deposit Insurance Act? Does the ubiquitous convertibility of funds in Share Accounts and bank deposits in the U.S. financial system bear on this question (*e.g.,* is redemption in funds placed in a Share Account at a FICU functionally equivalent to redemption in bank deposits for purposes of the scope of a Payment Stablecoin)? What are the practical or evasion risks of possible interpretations? In practice, will FICU subsidiaries likely seek to issue Payment Stablecoins that are redeemable only in funds in Share Accounts, bank deposits, or both?

20. Money

Section 2(18) of the GENIUS Act defines ''Money'' to mean a medium of exchange currently authorized or adopted by a domestic or foreign government, including a monetary unit of account established by an intergovernmental organization or by agreement between two or more countries.[74] This definition is relevant to the definition of National Currency (discussed below) and certain Reserve Assets described in section 4(a)(1)(A)(i) and (iv) of the GENIUS Act.[75] Section 4(a)(1)(A)(i) refers to Money standing to the credit of an account with a Federal Reserve Bank. Section 4(a)(1)(A)(iv) refers to Money received under a repurchase agreement that meets certain requirements. Although the statutory definition of Money clearly includes Monetary Value, it may be unclear at any point in time whether other mediums of exchange have been authorized or adopted by a domestic or foreign government. Moreover, whether a medium of exchange meets this definition may change based on actions of foreign governments or intergovernmental organizations. While it may be relatively clear whether an asset is Money standing to the credit of an account with a Federal Reserve Bank, there could be ambiguity as to whether a particular asset is Money received under a repurchase agreement. Therefore, to promote clarity and uniformity for purposes of determining whether certain assets would qualify as Money under proposed part 706, the NCUA proposes that it would provide prior confirmation publicly that a medium of exchange (other than those defined as Monetary Value) meets the definition of ''Money'' under the GENIUS Act. Specifically, the NCUA proposes to define ''Money'' for the purposes of part 706 to mean Monetary Value and any other medium of exchange that the NCUA has determined is currently authorized or adopted by a domestic or foreign government, including a monetary unit of account established by an intergovernmental organization or by agreement between two or more countries.

21. National Currency

The NCUA is proposing to define the term ''National Currency'' as provided in the GENIUS Act.[76] Under the proposed rule, the term ''National Currency'' would mean (1) a Federal Reserve note (as the term is used in the

first undesignated paragraph of section 16 of the Federal Reserve Act (12 U.S.C. 411)); (2) Money standing to the credit of an account with a Federal Reserve Bank; (3) Money issued by a foreign central bank; or (4) Money issued by an intergovernmental organization pursuant to an agreement by two or more governments.

22. NCUA-Licensed Permitted Payment Stablecoin Issuer

As proposed in the NCUA's Licensing Proposal, proposed § 706.2 would define an NCUA-Licensed Permitted Payment Stablecoin Issuer to mean a Person formed in the United States that is a FICU subsidiary that has been approved and licensed by the NCUA under subpart A to issue Payment Stablecoins.

23. Nonpublic Personal Information

The NCUA is proposing to define the term ''Nonpublic Personal Information'' to mean information (1) provided by a Customer to an NCUA-Licensed PPSI to obtain a financial product or service, (2) about a Customer resulting from any transaction involving a financial product or service between the NCUA-Licensed PPSI and a Customer, or (3) otherwise obtained by the NCUA-Licensed PPSI in connection with providing a financial product or service to a Customer. The proposed definition does not include publicly available information, unless such publicly available information, when combined with other information, would reveal the identity of a Customer or would enable access to the Customer's account.

24. Officer

As proposed in the NCUA's Licensing Proposal, proposed § 706.2 would define the term ''Officer'' to mean the president, chief executive officer, chief operating officer, chief financial officer, chief technology officer, chief lending officer, chief investment officer, chief risk officer, Bank Secrecy Act officer, and any other individual the NCUA identifies in writing to the Issuing Group who exercises significant influence over, or participates in, major policy making decisions of the Issuing Group without regard to title, salary, or compensation. The term also includes employees of entities retained by an Issuing Group to perform such functions in lieu of directly hiring the individuals.

25. Outstanding Issuance Value

The NCUA is proposing to define the term ''Outstanding Issuance Value'' to mean the total consolidated par value of all of an NCUA-Licensed PPSI's Payment Stablecoins. This would include the combined total par value of different brands of Payment Stablecoin issued by the NCUA-Licensed PPSI (*e.g.,* under a white label arrangement) to the extent that such an arrangement complies with proposed 12 CFR part 706. The proposed definition includes the defined term ''Payment Stablecoin'' and should be read consistent with that definition, discussed below. For purposes of calculating the Outstanding Issuance Value, the NCUA believes that a Digital Asset that is, or is designed to be, used as a means of payment or settlement but for which there is not yet an obligation to convert, redeem, or repurchase for a fixed amount of Monetary Value should not be included in the calculation. A Digital Asset minted (*i.e.,* created on a blockchain) by an issuer to be a Payment Stablecoin would not be included in the calculation of Outstanding Issuance Value until the obligation to convert, redeem, or repurchase the Digital Asset for a fixed amount of Monetary Value is incurred.

Similarly, once an issuer permanently removes a Payment Stablecoin from circulation (*e.g.,* burns the Payment Stablecoin) the Digital Asset would cease to be included in the calculation of Outstanding Issuance Value. Payment Stablecoins for which holder access has been restricted pursuant to applicable law, regulation, or court order would remain Payment Stablecoins, as the issuer's obligation to convert, redeem, or repurchase for a fixed amount of Monetary Value continues and the associated reserves are maintained in segregated accounts pending resolution of the restriction. Likewise, if an issuer repurchased a Payment Stablecoin but did not burn the Payment Stablecoin, the stablecoin in the NCUA-Licensed PPSI's inventory would not be part of the issuer's Outstanding Issuance Value (but would become part of the Outstanding Issuance Value if the NCUA-Licensed PPSI subsequently put the Payment Stablecoin back into circulation). Therefore, the proposed definition of ''Outstanding Issuance Value'' only includes Payment Stablecoins for which the NCUA-Licensed PPSI is obligated to convert, redeem, or repurchase for a fixed amount of Monetary Value (generally the issued Payment Stablecoins in circulation).

The NCUA also considered whether the proposed ''Outstanding Issuance Value'' definition should include only those Payment Stablecoins issued by an NCUA-Licensed PPSI, or also the Payment Stablecoins issued by the issuer's non-consolidated Affiliates.[77] The NCUA determined that it was appropriate to limit the proposed definition to include only the Payment Stablecoins issued by an NCUA-Licensed PPSI (and consolidated subsidiaries). The NCUA believes that the proposed definition would scope in the appropriate NCUA-Licensed PPSIs to the relevant provisions regarding Reserve Assets,[78] the frequency of examinations,[79] required audits,[80] and minimum capital calculation [81] without being overly expansive and that it best aligns with the language in the statute. Notwithstanding the proposed definition of ''Outstanding Issuance Value,'' non-consolidated Affiliates of an issuer that issue Payment Stablecoins would separately need to comply with the requirements of the GENIUS Act.

26. Parent Company

As proposed in the NCUA's Licensing Proposal, proposed § 706.2 would define the term ''Parent Company.'' The GENIUS Act requires that applications for a PPSI license granted by a primary Federal payment stablecoin regulator be evaluated using specifically defined factors.[82] One of these factors requires the NCUA to evaluate the competency, experience, and integrity of the Officers and Directors of the Applying Issuer's Parent Company(ies).[83] Proposed § 706.2 would define the term Parent Company to specify when a FICU must sign onto an application and when a FICU's Officers and Directors should be evaluated as part of an Applying Issuer's licensure application. The term Parent Company would also be used to determine when a FICU's investment in an NCUA-Licensed PPSI requires prior notice as a change in control.

Proposed § 706.2 would define a Parent Company as an Insured Credit Union(s) that will own, control or hold the power to vote 10 percent or more of any class of voting securities, or has the ability to direct the management or policies, of a Permitted Payment Stablecoin Issuer. If no Insured Credit Union will own, control or hold the power to vote 10 percent or more of any class of voting securities, the Insured Credit Union with the largest percentage of voting securities in relation to all other Insured Credit Unions is considered the Parent Company.'' Under

[77] As noted above, the definition of ''Outstanding Issuance Value'' includes the consolidated value of issued Payment Stablecoins.

[78] *See* proposed § 706.202.

[79] *See* proposed § 706.205.

[80] *See* id.

[81] See proposed subpart D.

[82] 12 U.S.C. 5904(b)–(c).

[83] 12 U.S.C. 5904(c)(3).

this definition, any FICU that owns 10 percent or more of a class of voting securities would be a Parent Company. Additionally, if no FICU owns 10 percent or more of a class of voting securities, then the FICU with the greatest percentage of a class of voting securities in relation to any other FICU is the Parent Company for purposes of an NCUA PPSI license. The definition would also provide that a FICU that has the ability to direct the management or policies of a PPSI would be considered a Parent Company. The Board believes it is important that the definition of Parent Company cover FICUs that have the power to direct the management or policies of a PPSI regardless of their ownership interests.

27. Payment Stablecoin

The NCUA is proposing to define the term ''Payment Stablecoin'' consistent with the definition of the term in the GENIUS Act, 12 U.S.C. 5901(22), with certain technical changes. Under the proposal, the term ''Payment Stablecoin'' would mean a Digital Asset (i) that is, or is designed to be, used as a means of payment or settlement; and (ii) the issuer of which (A) is obligated to convert, redeem, or repurchase for a fixed amount of Monetary Value, not including a Digital Asset denominated in a fixed amount of Monetary Value; and (B) represents that such issuer will maintain, or creates the reasonable expectation that it will maintain, a stable value relative to the value of a fixed amount of Monetary Value.[84] For a Digital Asset to be a Payment Stablecoin under proposed part 706, the issuer must be obligated to convert, redeem, or repurchase the Digital Asset for a fixed amount of Monetary Value.

The proposed definition also provides that a ''Payment Stablecoin'' does not include a Digital Asset that is a (i) National Currency; (ii) deposit (as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813)), including a deposit recorded using Distributed Ledger technology; or (iii) security, as defined in section 2 of the Securities Act of 1933 (15 U.S.C. 77b), section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c), or section 2 of the Investment Company Act of 1940 (15 U.S.C. 80a–2).

The GENIUS Act's definition of ''Payment Stablecoin'' includes a parenthetical with the term ''deposit'' in (B)(2) limiting the scope of the term to a ''deposit'' as defined in section 3 of the FDI Act. However, as discussed in this preamble's proposed definition of the term ''Monetary Value,'' the Board believes that an overall reading of the GENIUS Act makes clear the intention that, despite the use of banking-specific terminology, Share Accounts at FICUs and deposits at banks are to be given parallel treatment. Further, the GENIUS Act also specifically states that ''[n]othing in this Act may be construed to limit the authority of a Federal credit union [or] State credit union to engage in activities permissible pursuant to applicable State and Federal law, including—(1) accepting or receiving deposits or shares (in the case of a credit union), and issuing digital assets that represent those deposits or shares.'' [85] The GENIUS Act clearly contemplates shares (Share Accounts) represented by Digital Assets, but does not intend to limit the ability of FICUs to directly accept, receive, or issue Digital Assets that represent shares (Share Accounts). Conversely, the GENIUS Act does prohibit FICUs from directly issuing Payment Stablecoins. Given this clear delineation between Share Accounts/deposits represented by digital assets and Payment Stablecoins, the Board believes that in addition to excluding deposits recorded using Distributed Ledger technology from the GENIUS Act's definition of a Payment Stablecoin, shares (Share Accounts) recorded using Distributed Ledger technology are also not covered by the GENIUS Act's definition of a Payment Stablecoin.

The Board is specifically seeking comment as to whether the final rule should modify the text drawn from the GENIUS Act's definition to specifically exempt Share Accounts recorded using Distribution Ledger technology from the GENIUS Act's definition of a Payment Stablecoin. If so, how? Should the NCUA drop the parenthetical to the Federal Deposit Insurance Act definition of the a ''deposit?'' Should the NCUA adopt a definition of the term ''Deposit'' that drops the parenthetical to the Federal Deposit Insurance Act definition of a ''deposit''? Should a definition specifically include ''deposits'' as defined by the Federal Deposit Insurance Act and ''accounts'' as defined by the FCU Act (and defined as Share Accounts in this proposal)? Relatedly, the Board seeks comment as to whether the NCUA should provide an explicit interpretation in Part 706, the final rule's preamble, or other guidance that the definition of Monetary Value and/or Payment Stablecoin in the GENIUS Act expressly covers a Digital Asset for which an issuer has an obligation to redeem funds placed in a Share Account at a FICU? If so, how?

The GENIUS Act's definition of ''Payment Stablecoin'' also contains language clarifying that ''no bond, note, evidence of indebtedness, or investment contract that was issued by a permitted payment stablecoin issuer shall qualify as a security solely [because the issuer satisfies] the conditions in [paragraph (1) of the proposed ''payment stablecoin'' definition], consistent with section 17 of the Act.'' The GENIUS Act provides that this language was included ''for the avoidance of doubt.'' The NCUA determined that it was not necessary to include this language in the proposed ''Payment Stablecoin'' definition because section 17 of the GENIUS Act includes amendments to the cited Federal statutes that clarify that Payment Stablecoins are not securities.

28. Person

The NCUA is proposing to define the term ''Person'' as the term is defined in the GENIUS Act, 12 U.S.C. 5901(24). As proposed, the term ''Person'' would mean an individual, partnership, company, corporation, association, trust, estate, cooperative organization, or other business entity, incorporated or unincorporated.

29. Principal Shareholder

As proposed in the NCUA's Licensing Proposal, proposed § 706.2 would define the term ''Principal Shareholder.'' The GENIUS Act requires that applications for a PPSI license granted by a primary Federal payment stablecoin regulator be evaluated using specifically defined factors.[86] One of these factors requires the NCUA to evaluate the competency, experience, and integrity of the Officers and Directors of the Applying Issuer's Principal Shareholders.[87] Proposed § 706.2 would define a Principal Shareholder to mean a Person other than an Insured Credit Union that directly or indirectly or acting in concert with one or more Persons or companies, or together with members of their Immediate Family, will own, control, or hold the power to vote 10 percent or more of any class of voting securities. Under this definition, any non-FICU that owns 10 percent or more of a class of voting securities would be a Principal Shareholder. Proposed § 706.2 would include the defined term of Principal Shareholder to specify when a non-FICU's Officers and Directors should be evaluated as part of

[84] The NCUA interprets the statutory language in 12 U.S.C. 5901(22) to mean that the PPSI would be obligated to meet redemption requests at par.

[85] *See* 12 U.S.C. 5915(a)(1).

[86] 12 U.S.C. 5904(b)–(c).

[87] 12 U.S.C. 5904(c)(3).

an Applying Issuer's licensure application. The proposed definition is derived from the FDIC's change of control regulations.[88] The intent of the definition is to capture only the non-FICUs that are most likely to have an ability to control or direct the management and policies of the PPSI. Under the proposed definition, if there is an Applying Issuer that is widely held by FICUs that also has non-FICU shareholders, then only the non-FICU shareholders with 10 percent or more of a class of voting securities would be considered Principal Shareholders. The Board believes the definition is the best interpretation of the term Principal Shareholders as used in the GENIUS Act and appropriately balances the NCUA's allocation of its resources with its statutory mandate under the GENIUS Act. While the GENIUS Act requires that the Board evaluate certain statutory factors related to the Officers and Directors of the Principal Shareholders, the Board does not believe it is practical or consistent with congressional intent for the NCUA to review the Officers and Directors of each investing shareholder. Requiring this level of review would disadvantage Applying Issuers seeking NCUA licenses and FICUs investing in them. It would also impose a prohibitive burden on the NCUA's resources, especially when considering the 120-day deadline the GENIUS Act imposes on the NCUA for rendering a decision on a substantially complete application. In summary, the Board believes it is prudent to only review Officers and Directors of an investing shareholder when the investing shareholder would have a material amount of control of the PPSI. The Board selected 10 percent as that is a common threshold used for determining a material amount of control under banking law.

30. Private Key

The NCUA is proposing to define the term ''Private Key'' to mean the unique alphanumeric string that allows an individual to transfer a particular unit of a Digital Asset using a Distributed Ledger. This definition is intended to include shards of a Private Key.[89]

31. Publicly Available Information

The NCUA is proposing to define the term ''Publicly Available Information'' to mean any information that a Person has a reasonable basis to believe is lawfully made available to the general public from: (1) Federal, State, or local government records; (2) widely distributed media; (3) disclosures to the general public that are required to be made by Federal, State, or local law; or (4) a Distributed Ledger.[90]

32. Registered Public Accounting Firm

The NCUA is proposing to define the term ''Registered Public Accounting Firm'' as provided in the GENIUS Act.[91] Under the proposal, the term ''Registered Public Accounting Firm'' would mean a registered public accounting firm set forth in section 2 of the Sarbanes-Oxley Act of 2002 (15 U.S.C. 7201).

33. Related Interest

The NCUA is proposing to define the term ''Related Interest'' of a Person to mean (1) a company that is controlled by that Person; or (2) a political or campaign committee that is controlled by that Person or the funds or services of which will benefit that Person. This term is relevant to the risk management standards for Insider and Affiliate transactions. It aligns with the OCC Proposal and is derived from the definition in Regulation O.[92]

34. Reserve Asset

The NCUA is proposing to define the term ''Reserve Asset'' to mean an asset maintained by an NCUA-Licensed PPSI of a type enumerated in § 706.202(b). An NCUA-Licensed PPSI may maintain Reserve Assets as a custodian.

35. Share Account

The NCUA is proposing to define the term ''Share Account'' to have the same meaning as the term ''account'' in section 101 of the FCU Act (12 U.S.C. 1752(5).

36. State

The NCUA is proposing to define the term ''State'' as provided in the GENIUS Act, 12 U.S.C. 5901(28). Under the proposed rule, the term ''State'' would mean each of the several States of the United States, the District of Columbia and each territory of the United States.

37. Subsidiary of an Insured Credit Union

As discussed at length in the NCUA's Licensing Proposal, proposed § 706.2 would define the definition of Subsidiary of an Insured Credit Union, or FICU subsidiary, as defined in the GENIUS Act. This definition includes three separate prongs. Specifically, the GENIUS Act defines a ''subsidiary of an insured credit union'' to include the following:

(A) an organization providing services to the insured credit union that are associated with the routine operations of credit unions, as described in section 1757(7)(I) of this title;

(B) a credit union service organization, as such term is used under part 712 of title 12, Code of Federal Regulations, with respect to which the insured credit union has an ownership interest or to which the insured credit union has extended a loan; and

(C) a subsidiary of a State chartered insured credit union authorized under State law.[93]

Each prong is a separate and distinct avenue to qualify as a FICU subsidiary for purposes of being a PPSI.

38. Trading Volume

The NCUA is proposing to define the term ''Trading Volume'' to mean the aggregate number of Payment Stablecoins issued by an NCUA-Licensed PPSI that were purchased or sold on exchanges during a specified period of time.

39. Request for Comment

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 1:* Are the definitions in the proposed rule appropriately scoped? How should they be improved?

*Question 2:* Given the GENIUS Act's frequent use of banking-specific terminology, has the proposed rule struck the appropriate balance of maintaining consistency with the standards and terminology used in the GENIUS Act and proposed by the other primary Federal payment stablecoin regulators while also reflecting the nuances of the credit union industry and its terminology? Has the proposed rule appropriately clarified the best meaning for banking and credit union specific terminology? Do the proposal's definitions of terms like ''Share Account,'' ''Insured Credit Union,'' and ''Insured Depository Institution'' enhance the clarity of Part 706? Are there ways that these and other terms could be better defined or utilized to strike the appropriate balance between consistency across regulatory regimes and clarity for those subject to the NCUA's regulations?

*Question 3:* Is the definition of ''Control'' sufficiently clear? If not, how should the NCUA further clarify the term?

*Question 4:* The term ''Customer'' is broadly defined to mean a Person that purchases (through any consideration)

[88] 12 CFR part 303, subpart E.

[89] Sharding refers to dividing a Private Key into distinct pieces for enhanced security.

[90] As noted above, the term ''Distributed Ledger'' is limited to publicly available and accessible ledgers.

[91] 12 U.S.C. 5901(26).

[92] 12 CFR part 215.

[93] 12 U.S.C. 5901(33).

the products or services of another Person. Is the scope of this definition too broad? With respect to Customers of NCUA-Licensed PPSIs, should the definition expressly include only Persons with direct interactions with an NCUA-Licensed PPSI? Alternatively, should the definition include all downstream Payment Stablecoin holders (*i.e.,* not just Customers with direct interactions with the PPSI)? Please address any significant impact or burden the proposed definition or contemplated alternative definitions may have or add given other requirements in the proposed rule, such as the Customer notification requirements in proposed § 706.204. Because the term is used in several different contexts throughout the proposed rule, should the definition of ''Customer'' be refined with respect to certain requirements (*e.g.,* Customer notification)?

*Question 5:* Are the terms ''deposit'' and ''Share Account'' sufficiently clear as used in the proposed rule? If not, how should they be clarified? Is their intersection with the terms ''Monetary Value,'' ''Money,'' and ''Payment Stablecoin'' sufficiently clear? If not, what can the NCUA do to provide further clarity? Would commenters prefer that the proposed rule specifically refer to both deposits and Share Accounts in these terms and throughout the proposed rule or would they prefer the NCUA adopt a defined term ''Deposit'' to cover both deposits as defined by the FDI Act and Share Accounts?

*Question 6:* Is the scope of the term ''Digital Asset'' sufficiently clear? If not, how should it be clarified?

*Question 7:* The proposed rule does not define the term ''digital asset service provider.'' Is the scope of the term digital asset service provider under the statute sufficiently clear? If not, how should it be clarified? Are there specific activities that should be expressly excluded from digital asset service provider activities, consistent with the statutory definition? Should additional guidance on the exclusions from the definition of ''digital asset service provider'' or the meaning of ''engaging in the business'' of providing digital asset service provider activities be clarified? If so, how should the NCUA further clarify these terms? Should the NCUA clarify that only the provision of financial services that directly relate to Digital Asset issuance would result in an entity becoming a digital asset service provider?

*Question 8:* Is the term ''Director'' sufficiently clear? How should the NCUA further clarify the term?

*Question 9:* Is the term ''Distributed Ledger'' sufficiently clear? Should the term ''public digital ledger'' be further clarified? What additional clarifications would be helpful? Should certain permissioned or semi-permissioned digital ledgers be considered ''public?'' If so, how should the definition of ''public'' delineate between different types of permissioned or semi-permissioned blockchains?

*Question 10:* Is the definition of ''Eligible Financial Institution'' appropriately scoped? How could the term be further refined? Are there particular elements of the definition that should be excluded or should be addressed elsewhere in the proposed rule?

*Question 11:* Is the definition of ''Money'' appropriately scoped? Should the NCUA use the exact language of the statute, instead of using the proposed definition?

*Question 12:* Is the term ''Nonpublic Personal Information'' appropriately scoped? How could the term be further refined or clarified?

*Question 13:* The term ''Outstanding Issuance Value'' refers to the total consolidated par value of all of an issuer's Payment Stablecoins. Should the definition also include the par value of non-consolidated Affiliates? If so, what changes should be made to the Reserve Asset requirements to ensure 1:1 backing across all Affiliated entities?

*Question 14:* Is the term ''Payment Stablecoin'' sufficiently clear? If not, how should the definition be amended to provide additional clarity as to whether a particular stablecoin is a ''Payment Stablecoin''? Please describe the types of stablecoins that the NCUA should clarify do not meet the definition of a ''Payment Stablecoin'' and therefore would be outside the scope of the proposed rule. Should there be additional clarity around what it means that a Payment Stablecoin is a Digital Asset ''that is, or is designed to be, used as a means of payment or settlement?'' For example, are there certain settlement scenarios that the NCUA should clarify are not ''designed to be, used as a means of payment or settlement?''

*Question 15:* Is the exclusion of a Digital Asset that ''is a deposit, including a deposit recorded using Distributed Ledger technology'' from the definition of ''Payment Stablecoin'' sufficiently clear? Should the NCUA explicitly state in Part 706 that Share Accounts at FICUs, including Share Accounts recorded using Distributed Ledger technology are excluded from the definition of ''Payment Stablecoin?'' Should the NCUA clarify which tokenized products this exclusion may apply to?

*Question 16:* Is the term ''NCUA-Licensed Permitted Payment Stablecoin Issuer'' sufficiently clear? How should the definition be amended to provide additional clarity as to whether a particular entity issues a Payment Stablecoin and is subject to the requirements of the GENIUS Act? Should the more generic term ''Permitted Payment Stablecoin Issuer'' be used instead? If so, why? If not, why not?

*Question 17:* Is the term ''Person'' sufficiently clear? Should the NCUA further clarify the definition, including with respect to the meaning of ''association'' or other components of the definition?

*Question 18:* Is the term ''Private Key'' sufficiently clear? How could the term be further clarified? Should the NCUA define the term to mean the unique alphanumeric sequence that allows an individual to prove ownership of an account on a Distributed Ledger, including for the purpose of transferring a particular unit of a Digital Asset?

*Question 19:* Should the definition of ''Principal Shareholder'' or any other definitions explicitly incorporate governance instruments other than securities providing voting rights with respect to the activities of the issuer? In particular, are there governance instruments that may not qualify as securities that the NCUA should incorporate or instruments common to partnerships that the NCUA should consider incorporating?

*Question 20:* Is the term ''senior management'' as used in proposed part 706 sufficiently clear? Should the NCUA define the term, for example, to include all or a select subset of Officers?

*Question 21:* The GENIUS Act does not define ''payment stablecoin holder.'' Should the NCUA define the term? If so, should the NCUA define the term to mean the Person that beneficially owns the Payment Stablecoin? Should the NCUA instead define the term based on possession via Digital Wallets or control of cryptographic keys? What considerations relating to custody should the NCUA bear in mind if it chooses to define the term? What interactions with other requirements in the proposed rule should the NCUA consider if it chooses to define the term?

*Question 22:* Should the NCUA refine the definition of Trading Volume? Should the term be limited to trades that occur on exchanges? Should it include transactions that occur outside of an exchange? Should the NCUA define ''exchange'' for purposes of this definition? If so, should the NCUA

define it to mean a Person engaged in the business of making a market in Digital Assets (including Payment Stablecoins)? Should any definition include decentralized exchanges? What impediments are there to PPSIs collecting data concerning Trading Volume?

*C. § 706.2. Severability*

Proposed § 706.3 would provide that the provisions of this proposed part 706 are separate and severable from one another. If any provision is stayed or determined to be invalid, it is the NCUA's intention that the remaining provisions shall continue in effect. If a provision of the rule were found to be invalid, the NCUA anticipates that it would evaluate whether any re-proposal of the rule is appropriate. The NCUA is proposing to include the severability clause to ensure that, in the event any particular provision of the proposed rule is held to be invalid, the remainder of the rule would continue in effect, providing clarity for market participants on how to comply with the NCUA's regulations implementing the GENIUS Act pending any re-proposal.

The NCUA generally intends all of its rulemakings to be severable to the extent portions of the rule are determined to be invalid regardless of the presence of a severability clause. The NCUA is proposing to include an explicit severability clause to this rulemaking given the novelty and scope of the GENIUS Act and the importance of ensuring as much certainty as possible for the regulatory framework for Payment Stablecoins.

*D. Subpart B—NCUA-Licensed Permitted Payment Stablecoin Issuers*

1. § 706.201. Activities

a. Permitted Activities

Section 4(a)(7)(A) of the GENIUS Act sets forth the list of activities in which a PPSI may engage.[94] Additionally, section 16(b) of the GENIUS Act outlines certain additional activities and investments in which PPSIs may engage.[95]

Consistent with the statute, the NCUA is proposing to mirror the permitted activities from section 4(a)(7)(A) of the GENIUS Act in proposed § 706.201(a)(1) through (4), which include: (1) issuing Payment Stablecoins; (2) redeeming Payment Stablecoins; (3) managing reserves related to the issuance or redemption of Payment Stablecoins, including purchasing, selling, and holding Reserve Assets or providing custodial services for reserve assets, consistent with applicable State and Federal law; and (4) providing custodial or safekeeping services for Payment Stablecoins, required reserves, or Private Keys of Payment Stablecoins consistent with the GENIUS Act, as implemented in proposed subpart C.[96] Additionally, proposed § 706.201(a)(8) provides that an NCUA-Licensed PPSI may undertake any other activities that directly support any of the activities in proposed § 706.201(a)(1) through (4), which is explicitly provided for in section 4(a)(7)(A)(v) of the GENIUS Act.[97] One such example of an activity that would qualify under proposed § 706.201(a)(8) because it directly supports both issuance and redemption of Payment Stablecoins would be the NCUA-Licensed PPSI's holding of non-Payment Stablecoin crypto-assets as principal necessary for testing a Distributed Ledger, whether internally developed or acquired from a third-party.[98] Such an activity may be necessary to ensure that the NCUA-Licensed PPSI may operate safely and effectively on a Distributed Ledger. To the extent that NCUA-Licensed PPSIs are unclear about whether an activity qualifies as activity that directly supports the activities in proposed § 706.201 (a)(1) through (a)(4), the NCUA encourages issuers to ask the NCUA directly whether an activity is permissible. The NCUA is seeking comment on whether there should be a more formal process for clarifications around permissibility, including whether the NCUA should provide additional clarity to the public through long-established channels such as Letters to Credit Unions, published frequently asked questions, or other means.

In addition to the activities outlined in section 4(a)(7) of the GENIUS Act, for the sake of clarification, proposed § 706.201(a)(5) provides that NCUA-Licensed PPSIs may assess fees that are associated with the purchasing or redeeming of Payment Stablecoins.[99] This power is inherent in the activities described above and is explicitly recognized in section 4(a)(1)(B)(ii) of the Act.[100]

The NCUA also proposes to include the permitted activities outlined in section 16(b) of the GENIUS Act,[101] namely acting as principal or agent with respect to any Payment Stablecoin and paying fees to facilitate customer transactions.[102] The NCUA notes that the language in section 16(b) of the Act is limited by the clause that provides that entities regulated by the primary Federal payment stablecoin regulators are ''authorized to engage in the payment stablecoin activities and investments contemplated by this Act . . . .'' [103] Accordingly, ''acting as principal or agent with respect to any Payment Stablecoin'' is permissible within the limited set of authorities otherwise prescribed by the GENIUS Act rather than, for example, any activity that may be conducted as principal or agent (*i.e.,* any activity involving a Payment Stablecoin). Therefore, proposed § 706.201(a)(6) would allow NCUA-Licensed PPSIs to hold and transact in Payment Stablecoins as principal or agent. Payment Stablecoins are not, however, a permitted Reserve Asset in proposed § 706.202.[104] To the extent an NCUA-Licensed PPSI is a ''digital asset service provider,'' as defined section 2(7) of the GENIUS Act,[105] the issuer must also comply with the prohibition outlined in section 3(b)(2) of the GENIUS Act,[106] providing that it is unlawful for any digital asset service provider to offer, sell, or otherwise make available in the United States a Payment Stablecoin issued by a foreign payment stablecoin issuer, unless certain conditions are met.

Consistent with section 16(b) of the GENIUS Act, proposed § 706.201(a)(7) would allow NCUA-Licensed PPSIs to pay fees to facilitate Customer transactions (*e.g.,* network or ''gas'' fees). If an issuer's Payment Stablecoin operates on a blockchain that assesses transaction fees, then the issuer may choose to pay transaction fees on behalf of the Customer. The NCUA recognizes that, if an issuer is paying transaction

[96] 12 U.S.C. 5903(a)(7)(A).

[97] 12 U.S.C. 5903(a)(7)(A)(v).

[98] Separate from NCUA-Licensed PPSIs conducting this activity to support their permissible Payment Stablecoin activities, the NCUA believes that the holding of crypto-assets as principal necessary to support other permissible activities is a permissible activity for FCUs. FISCUs must look to State law to determine the permissibility of such activities.

fees on certain Distributed Ledgers, the issuer may have to hold non-Payment Stablecoin crypto-assets to facilitate the payment of these transaction fees. Consistent with the GENIUS Act, such crypto-assets are not permitted Reserve Assets in proposed § 706.202.

Proposed § 706.201(b) incorporates language from section 16(a) of the GENIUS Act and emphasizes that nothing in proposed § 706.201(a) may be construed to limit the authority of an Insured Credit Union to engage in activities permissible pursuant to applicable State and Federal law.[107]

Beyond the core activities and those that directly support those activities, section 4(a)(7)(B) of the GENIUS Act provides a rule of construction such that none of a PPSI's activities discussed above (*i.e.,* issuance, redemption, managing reserve assets, limited custody, *etc.*) are to be construed as a limitation on certain incidental activities or Digital Asset service provider activities if the activities are authorized by the NCUA.[108] Digital Asset service provider activities encompass: (1) exchanging Digital Assets for Monetary Value; (2) exchanging Digital Assets for other Digital Assets; (3) transferring Digital Assets to a third party; (4) acting as a Digital Asset custodian; and (5) participating in financial services relating to Digital Asset issuance.[109] The NCUA is intending to adhere to the GENIUS Act's rule of construction and would authorize additional activities as appropriate.

The NCUA's authority to approve these activities is limited to those activities specified by the GENIUS Act that are consistent with all other Federal and State laws, and provided that in any insolvency proceedings described under section 11 of the GENIUS Act,[110] the activities would not jeopardize the claims of Payment Stablecoin holders, which would rank senior to claims of non-Payment Stablecoin creditors.[111] The NCUA seeks comment on how to implement section 4(a)(7)(B) of the GENIUS Act and whether it should serve as an independent grant of authority or whether it must be consistent with a grant of authority provided from another Federal or State law.[112]

b. Prohibited Activities

The GENIUS Act also provides for certain prohibitions for PPSIs, including the prohibition on rehypothecation in section 4(a)(2),[113] the prohibition on the use of deceptive names in section 4(a)(9),[114] the prohibition against misrepresenting insured status in section 4(e),[115] and the prohibition on paying interest or yield in section 4(a)(11).[116]

In proposed § 706.201(c)(1), the NCUA imports the prohibition on the use of a deceptive name from section 4(a)(9) of the GENIUS Act.[117] This provision prohibits an NCUA-Licensed PPSI from using any combination of terms relating to the United States Government, including ''United States,'' ''United States Government,'' and ''USG,'' in the name of the Payment Stablecoin. This prohibition does not apply to abbreviations relating directly to the currency to which the Payment Stablecoin is pegged, such as ''USD.''

Consistent with section 4(a)(9) of the GENIUS Act,[118] proposed § 706.201(c)(2) would prohibit NCUA-Licensed PPSIs from marketing a Payment Stablecoin in such a way that a reasonable person would perceive the Payment Stablecoin to be legal tender as described in 31 U.S.C. 5103, issued by the United States, or guaranteed or approved by the Government of the United States. The NCUA recognizes that NCUA-Licensed PPSIs may want to market themselves as PPSIs under the GENIUS Act. There is no prohibition against issuers marketing themselves in this manner, so long as they do not run afoul of the prohibitions outlined in proposed § 706.201(c)(1) and (2), including the prohibition against marketing a Payment Stablecoin in such a way that a reasonable person would perceive the Payment Stablecoin to be guaranteed, issued, or approved by the United States. The NCUA notes that misrepresentations by an NCUA-Licensed PPSI cannot be cured by a general disclaimer and that representations and disclosures should be clear to permitted Payment Stablecoin holders and Customers. Consistent with section 4(e) of the GENIUS Act,[119] proposed § 706.201(c)(3) would provide that an NCUA-Licensed PPSI may not directly or through implication represent that Payment Stablecoins are backed by the full faith and credit of the United States, guaranteed by the United States Government, or subject to Federal deposit insurance or Federal share insurance.

Consistent with section 4(a)(11) of the GENIUS Act,[120] proposed § 706.201(c)(4) provides that NCUA-Licensed PPSIs must not pay the holder of any Payment Stablecoin any form of interest or yield (whether in cash, tokens, or other consideration) solely in connection with the holding, use, or retention of such Payment Stablecoin. The NCUA understands that issuers could attempt to make prohibited payments of interest or yield to Payment Stablecoins holders through arrangements with third parties. Moreover, there likely will be a large and changing variety of arrangements with third parties in which issuers could achieve the payment of yield to Payment Stablecoin holders. It would not be possible to identify in detail all, or even most, of the potential arrangements between NCUA-Licensed PPSIs and third parties that the NCUA may prohibit under section 4(a)(11) of the GENIUS Act and the NCUA's rulemaking authority under section 4(h) of the GENIUS Act,[121] particularly as such arrangements may evolve over time. On the other hand, a rule with only a general prohibition on the payment of yield could create uncertainty within the Payment Stablecoin market.

To balance these interests, the NCUA is proposing to include a presumption in paragraph (c)(4)(i) that certain types of arrangements with certain types of Persons would be prohibited payments of yield or interest by the issuer. Specifically, the NCUA would presume that an NCUA-Licensed PPSI is paying the holder of any Payment Stablecoin any form of interest or yield (whether in cash, tokens, or other consideration) solely in connection with the holding, use, or retention of such Payment Stablecoin if: (A) the NCUA-Licensed PPSI has a contract, agreement, or other arrangement with an Affiliate or a related third party to pay interest or yield to the Affiliate or related third party; and (B) the Affiliate [122] or related third party (or Affiliate of such related third party) has a contract, agreement, or

[116] 12 U.S.C. 5903(a)(11).

[117] 12 U.S.C. 5903(a)(9).

[118] 12 U.S.C. 5903(a)(9).

[119] 12 U.S.C. 5903(e).

[120] 12 U.S.C. 5903(a)(11).

[121] Section 4(h) of the GENIUS Act provides that the NCUA and other stablecoin regulators may issue regulations to ''carry out the requirements of this section, including to establish conditions, and to *prevent evasion thereof.*''12 U.S.C. 5903(h) (emphasis added).

[122] A Person would not be included within this second prong solely because the Person is an Affiliate of an Affiliate of the issuer.

other arrangement to pay interest or yield (whether in cash, tokens, or other consideration) to a holder of any Payment Stablecoin issued by the NCUA-Licensed PPSI solely in connection with the holding, use, or retention of such Payment Stablecoin. To the extent that the Person, or an Affiliate of the Person with whom the NCUA-Licensed PPSI has a contract, agreement, or other arrangement to pay interest or yield is a related third party of the NCUA-Licensed PPSI because the NCUA-Licensed PPSI issues Payment Stablecoins on the related third party's behalf or under the related third party's branding, the arrangement between the related third party and the holder of the Payment Stablecoin would consider the holder of the Payment Stablecoin to be the holder of the Payment Stablecoin issued by the NCUA-Licensed PPSI on the related third party's behalf or under the related third party's branding. That is to say, with respect to a white-label relationship, the presumption would be triggered only to the extent the Payment Stablecoin holder is a holder of the related third party's white-labeled stablecoin (as opposed to other Payment Stablecoins issued by the NCUA-Licensed PPSI).

Related third parties would be defined to include any Person paying interest or yield to Payment Stablecoin holders as a service (*i.e.,* on behalf of the NCUA-Licensed PPSI) and any Person that the issuer issues Payment Stablecoins on behalf or under the branding of (*i.e.,* persons that have entered white-label relationship with the issuer). The NCUA believes that the close nexus to the issuer's payments and payments to the Payment Stablecoin holder as well as the close contractual or control relationship between the issuer and the other party would make it highly likely that the issuer's payments of yield or interest would be made to the holder through an intermediary or an attempt the evade the GENIUS Act's prohibition on interest and yield payments. Nonetheless, the NCUA would permit the issuer to rebut the presumption given the issuer provides sufficient evidence to the contrary. Specifically, an NCUA-Licensed PPSI may rebut the presumption by submitting written materials that, in the NCUA's judgment, demonstrate that the contract, agreement, or other arrangement is not prohibited under paragraph (c)(4) and is not an attempt to evade the prohibition.

Other arrangements that are not captured by the presumption may also violate the statutory prohibition or constitute an evasion thereof. The NCUA would assess those arrangements on a case-by-case basis but does not believe that it is necessary to include other arrangements within the rebuttable presumption at this time. The prohibition is not intended to prevent a merchant from independently offering a discount to a Payment Stablecoin holder for using Payment Stablecoins. The prohibition is also not intended to prevent an NCUA-Licensed PPSI from sharing in the profits derived from the Payment Stablecoin with a non-Affiliate partner in a white-label arrangement.

In proposed § 706.201(c)(5), the NCUA proposes to include the language from section 4(a)(2) of the GENIUS Act[123] that prohibits PPSIs from pledging, rehypothecating, or reusing any Reserve Assets required under section 4(a)(1),[124] except for the purposes listed in section 4(a)(2). Thus, consistent with the statute, an NCUA-Licensed PPSI may not pledge, rehypothecate, or re-use any Reserve Assets, either directly or indirectly (*e.g.,* through a third-party custodian of the Reserve Assets), except for the purpose of: (i) satisfying margin obligations in connection with investments in permitted reserves under proposed § 706.202(b)(4) or (5); (ii) satisfying obligations associated with the use, receipt, or provision of standard custodial services; [125] or (iii) creating liquidity to meet reasonable expectations of requests to redeem Payment Stablecoins, such that reserves in the form of Treasury bills with a maturity of 93 days or less may be sold as purchased securities in repurchase agreements,[126] provided that either: (A) the repurchase agreements are cleared by a clearing agency registered with the Securities and Exchange Commission; or (B) the NCUA-Licensed PPSI receives prior approval from the NCUA. By including the phrase ''directly or indirectly'' in the prohibition, it is clear that Congress intended that a custodian that holds the reserves on behalf of a PPSI also may not pledge, rehypothecate or reuse any of the Reserve Assets, other than with respect to the limited exceptions discussed in proposed § 706.201(c)(5). To the extent that a custodian holding the Payment Stablecoin reserves were allowed to bypass this prohibition, it would undermine the relatively safe nature of the Reserve Assets and the confidence that Payment Stablecoin holders have that the Payment Stablecoin will hold its peg.

The NCUA will deem any repurchase agreement approved under this section and section 4(a)(2)(C) of the GENIUS Act, provided that the Treasury bills sold as purchased securities have a maturity of 93 days or less, consistent with the requirement that Treasury bills held as Reserve Assets must have a maturity of 93 days or less, and the liquidity obtained through repurchase borrowings is not being obtained solely for purposes other than meeting redemption requests or compliance with the requirements of this proposed rule. The NCUA believes that providing this prior approval by rule will enhance the ability of NCUA-Licensed PPSIs to obtain liquidity quickly (through outright sales or repurchase agreements) and thereby facilitate the timely redemption of Payment Stablecoins. It is clear from section 4(a)(1)(A) of the Act that PPSIs may maintain identifiable reserves comprising of Money received under certain repurchase agreements.[127] It would frustrate section 4(a)(1)(A)(iv)'s clear permission to maintain such Reserve Assets if PPSIs could only engage in repurchase borrowing transactions upon the completion of cumbersome procedures and one-off supervisory approvals. The ability to obtain immediate liquidity through repurchase borrowings is useful and supplements a PPSI's ability to access immediate liquidity via other means (for example, the maintenance of deposits and Share Accounts at IDIs or actual sales of securities). The prohibition on rehypothecation in proposed § 706.201(c)(5) would, consistent with section 4(a)(2)(C) of the GENIUS Act, prohibit rehypothecation except for the purpose of creating liquidity to meet reasonable expectations of requests for redemption. However, given the fungibility of Money, the NCUA will not scrutinize the exact uses to which repurchase borrowing proceeds are put. The limited circumstances in which the NCUA would not consider rehypothecation permissible would be if repurchase borrowings are obtained solely for some purpose other than obtaining liquidity to meet redemption requests or compliance with the rule—

[123] 12 U.S.C. 5903(a)(2).

[124] 12 U.S.C. 5903(a)(1).

[125] The NCUA interprets this exception, codified in 12 U.S.C. 5903(a)(2)(B), as being related solely to the purposes specified in 12 U.S.C. 5909(c)(2)(B).

[126] Section 4(a)(2)(C) of the Act (12 U.S.C. 5903(a)(2)(C)) states that reserves in the form of Treasury bills may be sold as purchased securities for repurchase agreements with a maturity of 93 days or less if certain conditions are met. The NCUA proposes to clarify, consistent with section 4(a)(1)(iv) of the Act (12 U.S.C. 5903(a)(1)(iv)), that the Treasury bills sold under the repurchase agreement must have a maturity of 93 days or less. Consistent with this clarification and the NCUA's proposed approval of repurchase agreements under section 4(a)(2)(C) of the Act, discussed below, the maturity of the repurchase agreement would be overnight.

[127] 12 U.S.C. 5903(a)(1)(A).

for example, if repurchase proceeds are to be used solely for paying dividends to a PPSI (*i.e.,* removing excess Reserve Assets above the required minimum).

Section 4(h)(1) of the GENIUS Act provides that the NCUA may issue regulations to ''carry out the requirements of this section . . . and to prevent evasion thereof .'' [128] In proposed § 706.201(c)(6), consistent with this statutory authority, the NCUA proposes language that provides that an NCUA-Licensed PPSI must not engage in any activity that the NCUA determines is an evasion of the requirements of section 4 of the GENIUS Act [129] or Part 706.

In proposed § 706.201(b)(7), the NCUA is proposing to prohibit an NCUA-Licensed PPSI from providing credit to its Customers to purchase Payment Stablecoins. The NCUA interprets the GENIUS Act's requirements that a PPSI maintain Reserve Assets consisting of a narrow set of highly liquid assets and that a PPSI engage in a narrow set of activities to be crucial in ensuring a PPSI is able to satisfy redemption requests. If a PPSI lends funds to Customers to enable Customers to purchase Payment Stablecoins, or were to otherwise issue Payment Stablecoins to Customers on credit extended by the PPSI, the PPSI would then, in effect, need to access separate funding to acquire and maintain identifiable Reserve Assets to back the Payment Stablecoins issued on credit. This could result in a highly leveraged balance in which the Reserve Assets do not provide the intended resiliency. The NCUA seeks comment on whether this is an appropriate prohibition, and whether other alternatives would better achieve the statute's objectives.

The NCUA has considered and is requesting comment on whether to prohibit an NCUA-Licensed PPSI from issuing more than one brand of Payment Stablecoin (*i.e.,* more than one set of Payment Stablecoins marketed under the same name). The NCUA recognizes that there are advantages and disadvantages associated with permitting an NCUA-Licensed PPSI to issue multiple brands of Payment Stablecoins that may be co-branded with a named partner in a white-label arrangement. These arrangements can allow parties to leverage the experience and expertise of an NCUA-Licensed PPSI and facilitate a broader range of Payment Stablecoins in the market. However, they may also foster uncertainty about Reserve Assets and encourage contagion and run risk among brands of Payment Stablecoins, including but not limited to brands issued by one issuer. One possibility that the NCUA has considered and is requesting comment on is to restrict each NCUA-Licensed PPSI to issuing only one brand of Payment Stablecoin but to streamline the process for approving applications to become an NCUA-Licensed PPSI if an Affiliate has already been approved. Under this approach, multiple NCUA-Licensed PPSIs could share certain services and back-office functions with each other and might operate under a common risk management framework, but each issuer would be legally separate. This approach would allow an entity to leverage its experience and expertise but may provide more certainty with respect to the rights of Payment Stablecoin holders in the event that an NCUA-Licensed PPSI becomes insolvent.

The NCUA has also considered and is requesting comment on whether to include a provision explicitly prohibiting an NCUA-Licensed PPSI from engaging in unsafe or unsound practices. Pursuant to section 6(a)(3) of the GENIUS Act,[130] the NCUA has the ability to examine NCUA-Licensed PPSIs for risks that may pose a threat to safety and soundness. Further, section 5(a)(1)(B) of the GENIUS Act requires the NCUA to ''establish a process and framework for the licensing, regulation, examination, and supervision of [PPSIs] that prioritizes the safety and soundness of such entities.'' [131] It follows that NCUA-Licensed PPSIs should not be allowed to engage in practices that are unsafe or unsound. Explicitly prohibiting such activities may help the NCUA to address practices that could undermine public confidence in PPSIs and the financial system more generally.

c. Request for Comment

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 23:* Are there activities not contemplated in proposed § 706.201 that PPSIs must be able to engage in for purposes of the GENIUS Act? If so, please describe them and any appropriate limits for these additional activities.

*Question 24:* Should the NCUA clarify that a PPSI may retain an asset manager under a separately managed account under proposed § 706.201(a)(8)?

*Question 25:* Are there other limits or conditions the NCUA should consider with respect to PPSIs acting as principal or agent with respect to any Payment Stablecoin? Should the NCUA specify the activities contemplated under the GENIUS Act for which a PPSI may act as principal or agent in Payment Stablecoins under section 16(b) of the Act? [132]

*Question 26:* Do PPSIs need to hold crypto-assets other than Payment Stablecoins for other purposes beyond paying transaction fees or testing a Distributed Ledger? If so, under what circumstances would a PPSI need to hold such assets?

*Question 27:* Should the final rule include specific provisions addressing an issuer's holding of non-Payment Stablecoin crypto-assets to pay transaction fees, such as limitations on the amount of non-Payment Stablecoin crypto-assets that a PPSI may hold at any time? If so, how should those limits be calibrated? Should any limit be based on anticipated fees, a percentage of assets, or be set at a certain value threshold?

*Question 28:* Should there be any limit on what methods of payment a PPSI can accept when assessing fees, including fees associated with the purchasing or redeeming of Payment Stablecoins? Should the final rule include provisions addressing a PPSI's potential assessment of fees in crypto-assets other than Payment Stablecoins and how long issuers can hold onto such crypto-assets? Are there specific forms of payment outside of fiat and Payment Stablecoin that PPSIs will need to accept that the NCUA should provide additional clarity on?

*Question 29:* Should the NCUA include an approval process for the activities listed in the Section 4(a)(7)(B) of the GENIUS Act, including Digital Asset service provider activities and activities incidental to Payment Stablecoin activities or Digital Asset service provider activities? [133]

*Question 30:* Should the NCUA clarify proposed § 706.201(a)(8) by providing specific examples of activities that directly support the activities in proposed § 706.201(a)(1) through (4)? Are there specific examples of activities that directly support the activities in proposed § 706.201(a)(1) through (4) that should be clarified? Should the NCUA distinguish between what it means for an activity to directly support the activities in proposed § 706.201(a)(1) through (4), and therefore, satisfy the test in proposed § 706.201(a)(8) as opposed to what it means for an activity to be incidental to the activities in proposed § 706.201(a)(1) through (7) provided in

[128] 12 U.S.C. 5903(h)(1).

[129] 12 U.S.C. 5903.

[130] 12 U.S.C. 5905(a)(3).

[131] 12 U.S.C. 5904(a)(1)(B).

[132] 12 U.S.C. 5915(b).

[133] 12 U.S.C. 5903(a)(7)(B).

section 4(a)(7)(B) of the GENIUS Act? Should the NCUA provide an approval process related to Digital Asset service provider activities and/or incidental activities?

*Question 31:* The proposed rule would permit a PPSI to hold non-Payment Stablecoin crypto-assets to pay certain fees (*e.g.,* network fees). Should the rule include an express limitation on the amount of such crypto-assets that the PPSI may hold? For example, the rule could provide that the amount of such crypto-assets may not exceed reasonably expected near-term demand.

*Question 32:* Could the prohibition against paying interest or yield solely in connection with the holding or use of a permitted Payment Stablecoin be clarified? If so, how? Would it be helpful to include a *de minimis* exception to the prohibition to provide certainty with respect to arrangements that are not designed to violate the prohibition and that do not have a meaningful economic impact? If so, is there any specific guidance the NCUA should provide on what *de minimis* means?

*Question 33:* Does the presumption with respect to the prohibition against paying interest or yield solely in connection with the holding, use, or retention of a permitted Payment Stablecoin appropriately address concerns relating to evasion? Is the presumption with respect to the prohibition against paying interest or yield solely in connection with the holding, use, or retention of a permitted Payment Stablecoin appropriately scoped? Is the presumption sufficiently clear? How could the presumption be clarified? Should the NCUA clarify the standard of review under which it would consider written materials to rebut the presumption related to interest or yield and specify whether the NCUA's determination is appealable? Should the NCUA propose any safe harbor for arrangements that the NCUA believes do not violate the statutory prohibition?

*Question 34:* Should the prohibition on interest and yield in proposed § 706.201(c)(4) be broader to prevent issuers from directly or indirectly paying interest or yield to Payment Stablecoin holders (rather than presuming that certain arrangements with Affiliates or related third parties violate the prohibition)? Are there examples of potentially evasive behavior that the NCUA should expressly include in a prohibition? If the NCUA were to expand the prohibition, are there activities that should be expressly carved out of such an expansion?

*Question 35:* Should the prohibition on interest and yield in proposed § 706.201(c)(4) clarify the terms ''pay,'' ''interest,'' ''yield,'' ''solely,'' or any other terms? If so, what clarifications would be helpful? What types of rewards, if any, should be subject to the prohibition?

*Question 36:* What would the economic impact of a narrow prohibition on paying interest or yield solely in connection with the holding, use or retention of a Payment Stablecoin be relative to a broader prohibition (*i.e.,* one that includes relationships with Affiliates or third parties)? What impact would either prohibition have on deposits and funds placed in Share Accounts?

*Question 37:* Is the scope of the prohibition against pledging, rehypothecating, or reusing Reserve Assets sufficiently clear? Are there specific types of transactions, relationships, or structures for which it would be helpful to clarify whether the prohibition applies? For example, should the NCUA clarify whether the prohibition would prevent establishing a collateral trustee that would hold a security interest in Reserve Assets for the benefit of Payment Stablecoin holders? What arguments weigh for and against finding that the prohibition would prohibit these arrangements? If a PPSI sets up a collateral trustee arrangement where the issuer grants a security interest in the Reserve Assets, does this arrangement sufficiently protect the Reserve Assets in the event of insolvency or bankruptcy? Should a PPSI be required to make particular disclosures if it uses such an arrangement? What should those disclosures include?

*Question 38:* Should the NCUA specify what ''creating liquidity to meet reasonable expectations of requests to redeem Payment Stablecoins'' means under proposed § 706.201(c)(5)(iii)? Should the NCUA pre-approve repurchase agreements by rule as proposed in § 706.205(c)(5)(iii)(B)? Alternatively, should the NCUA allow for broad and open-ended approvals of the sale of reserves as purchased securities in repurchase agreements or should approvals be limited to specific types of transactions? What factors should the NCUA consider prior to granting approval of the sale of reserves as purchased securities in repurchase agreements under proposed § 706.201(c)(5)(iii)(B)?

*Question 39:* Should PPSIs be required to provide disclosures stating that Payment Stablecoins are not legal tender, issued by the United States, or guaranteed or approved by the United States? If so, should the NCUA impose any requirements on the manner in which disclosures are made? For example, should the NCUA require that disclosures be made on the PPSI's website, at point of direct sale by the issuer, alongside other types of disclosures, or in some other manner?

*Question 40:* Is any further clarity needed regarding the prohibition on the use of deceptive names, marketing, and representations in proposed § 706.201(c)(1) through (3)? For example, should the NCUA specify what kind of images or branding are likely to violate the prohibition? Should the NCUA require PPSIs to affirmatively state that Payment Stablecoins are not legal tender, issued by the United State, or guaranteed or approved by the Government of the United States? Should the NCUA explicitly require PPSIs to disclose that Payment Stablecoins are not subject to deposit or share insurance?

*Question 41:* Is the proposed prohibition on providing credit to Customers to purchase Payment Stablecoins appropriate? If so, should the prohibition be modified in any way? Should it be narrower or broader? If not, are there alternatives to achieve the intended objective or ensuring Reserve Assets achieve the intended resiliency? Are there any other activities that the NCUA should expressly prohibit as not being permissible and not in direct support of issuance, redemption, managing reserves, and providing certain safekeeping and custody services?

2. § 706.202. Reserve Assets

a. Proposed § 706.202

Proposed § 706.202 contains requirements applicable to Reserve Assets. Section 4(a)(1)(A) of the Act provides that a PPSI must maintain identifiable reserves backing the outstanding Payment Stablecoins of the PPSI on an at least one-to-one basis and specifies the eight permissible Reserve Asset types.[134] The one-to-one backing requirement applies at the PPSI level. A PPSI would not comply with this requirement if it did not maintain Reserve Assets sufficient to meet the one-to-one backing requirement. A PPSI may maintain Reserve Assets through a custodian, including an Affiliate acting as a custodian, as long as the custodian qualifies as an Eligible Financial Institution.

Proposed § 706.202(a)(1) would require that an NCUA-Licensed PPSI maintain Reserve Assets that: (i) are

[134] 12 U.S.C. 5903(a)(1)(A).

identifiable; (ii) are segregated from and not commingled with other assets owned or held by the NCUA-Licensed PPSI; (iii) at all times have a total Fair Value that equals or exceeds the Outstanding Issuance Value of the NCUA-Licensed PPSI; and (iv) are either held directly by the NCUA-Licensed PPSI or within the custody of an Eligible Financial Institution. In order to maintain Reserve Assets that are ''identifiable'' and comply with proposed § 706.202(a)(1)(i), NCUA-Licensed PPSIs must maintain appropriate records to ensure documented ownership and legal entitlement to individual Reserve Assets. Similarly, any ownership arrangements, including ownership via custodians, must comply with applicable laws and regulations, for example, requirements applicable to Customer securities owned through the Fedwire Securities Service. The NCUA generally anticipates that Reserve Assets will be recorded on the NCUA-Licensed PPSI's balance sheet under GAAP and be included in the quarterly reports required under proposed § 706.205(i). An NCUA-Licensed PPSI must maintain the appropriate operational capabilities, internal controls, policies, and safeguards to ensure that Payment Stablecoins are always backed by reserves on an at least a one-to-one basis. Among other things, safeguards may include mechanisms to prevent the issuance of abnormally large amounts of new Payment Stablecoins without additional approvals.[135]

To comply with the requirement in proposed § 706.202(a)(1)(iii), an NCUA-Licensed PPSI must ensure that the Fair Value of Reserve Assets equal or exceed the Outstanding Issuance Value of the outstanding Payment Stablecoins issued by the NCUA-Licensed PPSI at all times. Valuing Reserve Assets at Fair Value (*i.e.,* market value), rather than another measure, such as amortized cost, will help ensure that the Reserve Assets maintained by the NCUA-Licensed PPSI reflect current prices and will be monetizable at a value sufficient to meet any redemption requests at par value. Notably, the Outstanding Issuance Value is based on the total consolidated par value of all of an NCUA-Licensed PPSI's Payment Stablecoins rather than on the Fair Value of the outstanding issued Payment Stablecoin. Thus, if the Fair Value of the Payment Stablecoin decreased (*i.e.,* if the Payment Stablecoin de-pegged in the secondary market), the NCUA-Licensed PPSI would nevertheless be obligated to retain a stock of Reserve Assets, the Fair Value of which equals or exceeds the par value of outstanding Payment Stablecoins. This approach is intended to ensure that the NCUA-Licensed PPSI is able to credibly meet redemption requests, including in adverse circumstances. To take a contrary approach (*e.g.,* basing the Outstanding Issuance Value on the Fair Value of Payment Stablecoins) could allow NCUA-Licensed PPSIs to inappropriately remove assets from the required stock of Reserve Assets when stablecoins de-peg (as Reserve Asset requirements decline, along the with the secondary market price of the Payment Stablecoin), rather than maintaining the Reserve Assets on behalf of Payment Stablecoin holders, which may in turn exacerbate run risk for an NCUA-Licensed PPSI.

Proposed § 706.202(a)(1)(iv) provides that the Reserve Assets must either be held directly by the NCUA-Licensed PPSI or within the custody of an Eligible Financial Institution, which is defined in proposed § 706.2.

Proposed § 706.202(a)(2) would require that an NCUA-Licensed PPSI demonstrate the operational capability to access and monetize the identifiable Reserve Assets, commensurate with the NCUA-Licensed PPSI's risk profile and business model. The NCUA-Licensed PPSI must be able to monetize the Reserve Assets, potentially quickly and at short notice, in order to meet redemption requests. The inability to quickly monetize Reserve Assets would undermine the ability of a PPSI to maintain the stable value of its Payment Stablecoin.

To comply with proposed § 706.202(a)(2), an NCUA-Licensed PPSI must be able to demonstrate the ability to monetize all types of Reserve Assets it maintains. Depending on an NCUA-Licensed PPSI's size, risk profile, business model, activities, and operations, a PPSI may be able to demonstrate monetization in different ways. For example, it may be sufficient for some NCUA-Licensed PPSIs to demonstrate the ability to monetize Treasury bills they hold as Reserve Assets by establishing that they maintain appropriate repurchase arrangements through which they can quickly sell Treasury bills and receive liquid funds with which they can satisfy redemption requests. For other NCUA-Licensed PPSIs, for example, larger issuers or those with more complicated operations, additional measures may be appropriate to demonstrate the operational capability to monetize. It may be appropriate for such NCUA-Licensed PPSIs to maintain multiple alternative methods of monetization (for example, multiple repurchase agreement lines or repurchase agreement lines plus arrangements allowing outright sales of Treasury securities) in order to satisfactorily demonstrate the ability to monetize their Reserve Assets. Such redundant arrangements may be necessary if an NCUA-Licensed PPSI maintains a sufficiently large Treasury position that it could be difficult to monetize the entire position through transactions with a single repo counterparty or if an issuer maintains concentrated positions in particular types of Reserve Assets. The availability of multiple monetization channels helps ensure that an NCUA-Licensed PPSI is not required to monetize assets at reduced or ''fire sale'' prices. Having alternative monetization channels reduces the risk that an issuer would be obliged to accept unfavorable pricing when monetizing Reserve Assets under stress.

For certain NCUA-Licensed PPSIs, it may be necessary to periodically conduct actual monetization transactions (that is, actual outright sales or repurchase transactions) in order to demonstrate the ability to monetize. Actual transactions can more fully confirm that monetization capabilities exist. In the absence of actual test transactions, potential barriers to monetization may still exist. NCUA-Licensed PPSIs may lack the procedures and systems to monetize assets at any time in accordance with standard settlement periods and processes. For example, borrowing agreements may name authorizing officials that are unavailable or inappropriate. Actual monetization transactions may be necessary, for example, for issuers with unusually complicated operations or organizational structures, or for issuers that are particularly dependent on certain monetization channels or the ability to monetize particular assets. Periodic actual monetization transactions can minimize the risk of negative signaling during financial stress. If an NCUA-Licensed PPSI begins using a monetization channel that it has not regularly used in the past, that may spark concerns about the financial health of the issuer. For example, if an NCUA-Licensed PPSI has pre-established a repurchase agreement with a bilateral counterparty but never utilized it, sudden utilization of the repurchase agreement may generate

[135] *C.f.,* Dylan Butts, ''PayPal's crypto partner mints a whopping $300 trillion worth of stablecoins in 'technical error,'" CNBC (Oct. 16, 2025), *https://www.cnbc.com/2025/10/16/paypals-crypto-partner-mints-300-trillion-stablecoins-in-technical-error.html* (describing a technical error leading to the minting of a large amount of new stablecoins).

concerns that the issuer is experiencing a run on its Payment Stablecoins. Periodic test transactions using multiple monetization channels can mitigate such concerns. NCUA-Licensed PPSIs may be able to demonstrate the ability to execute actual monetization transactions in the ordinary course of their business (for example, redeeming Payment Stablecoins) and would not necessarily be required to engage in additional test transactions.

Proposed § 706.202(a)(3) would include requirements for when NCUA-Licensed PPSIs could withdraw Reserve Assets in excess of Outstanding Issuance Value. In order to ensure that sufficient Reserve Assets are maintained to back outstanding Payment Stablecoin issuance, NCUA-Licensed PPSIs would be able to withdraw excess Reserve Assets only after the monthly examination and certification required by section 4(a)(3) of the GENIUS Act [136] and provided for in proposed § 706.202(e) and (f). Specifically, NCUA-Licensed PPSIs would be able to withdraw any surplus Reserve Assets in excess of Outstanding Issuance Value, calculated and reported as of the last day of the previous month, only upon the publication of that month's public disclosure, due at the end of the subsequent month. Only permitting an issuer to withdraw surplus Reserve Assets after examination and certification will promote public confidence about the integrity of the handling of Reserve Assets. Permitting withdrawal of excess Reserve Assets at other intervals would significantly undermine the purpose of examination and certification. If NCUA-Licensed PPSIs were able to withdraw excess Reserve Assets at any time, based only upon their own internal calculations, that could undermine confidence and even create concerns about misconduct, for example if an issuer might make its own bad faith and un-validated determination that an excess existed in order to justify a withdrawal. Proposed § 706.202(a)(3) would also require that, while withdrawals would be based on calculations as of the end of the previous month, an NCUA-Licensed PPSI could only make withdrawals if the remaining Reserve Assets remained at least equal to the current Outstanding Issuance Value, calculated as of the day of withdrawal.

Under proposed § 706.202(b), reserve assets must only comprise: (1) United States coins and currency (including Federal Reserve notes) or Money standing to the credit of an account with a Federal Reserve Bank; (2) funds held as deposits or in Share Accounts [137] that are payable upon demand at an IDI (including any foreign branches or agents, including correspondent banks, of an IDI), subject to any limitation established by the FDIC and the NCUA, as applicable, pursuant to section 4(a)(1)(A)(ii) of the GENIUS Act to address safety and soundness risks of such IDI; [138] (3) Treasury bills, Treasury notes, or Treasury bonds with a remaining maturity of 93 days or less; [139] (4) Money received under repurchase agreements, with the NCUA-Licensed PPSI acting as a seller of securities and with a no longer than overnight maturity, that are backed by Treasury bills with a maturity of 93 days or less; [140] (5) reverse repurchase agreements, with the NCUA-Licensed PPSI acting as a purchaser of securities and with a no longer than overnight maturity, that are collateralized by Treasury bills, Treasury notes, or Treasury bonds on a no longer than overnight basis, subject to overcollateralization in line with standard market terms, that are: (i) tri-party; (ii) centrally cleared through a clearing agency registered with the Securities and Exchange Commission; or (iii) bilateral with a counterparty that the issuer has determined to be adequately creditworthy even in the event of severe market stress; (6) securities issued by an investment company registered under section 8(a) of the Investment Company Act of 1940,[141] or other registered Government money market fund, and that are invested solely in underlying assets described in proposed § 706.202(b)(1) through (5); [142] (7) any other similarly liquid Federal Government-issued asset approved by the NCUA; or (8) any reserve described in proposed § 706.202(b)(1) through (3), (6), or (7), in tokenized form, provided that such reserves comply with all applicable laws and regulations.

The NCUA encourages any NCUA-Licensed PPSI that seeks clarity on whether a specific tokenized asset qualifies as a permissible Reserve Asset under proposed § 706.202(b)(8) to discuss with the NCUA whether the asset qualifies. To the extent feasible, the NCUA is considering publishing a list of, or otherwise making public, the acceptable tokenized Reserve Assets for the sake of transparency. In determining whether a potential Reserve Asset qualifies as ''any other similarly liquid Federal Government-issued asset,'' under proposed § 706.202(b)(7) the NCUA will consider, among other relevant factors, whether: (i) the asset has liquidity characteristics, including during times of stress, comparable to the other Reserve Assets allowed under proposed § 706.202(b); (ii) NCUA-Licensed PPSIs will be operationally capable of monetizing the asset to meet redemption requests, including sudden and high-volume requests; (iii) the asset poses levels of risk comparable to the assets allowed under proposed § 706.202(b), including interest rate risk and counterparty credit risk; and (iv) whether the asset introduces additional risks that may be difficult for NCUA-Licensed PPSIs to manage.

Section 4(a)(4)(A)(iii) of the GENIUS Act requires the NCUA to issue regulations implementing Reserve Asset diversification, including deposit concentration at banking institutions and interest rate risk management standards that (1) are tailored to the business model and risk profile of PPSIs and (2) do not exceed standards that are sufficient to ensure the ongoing operations of PPSIs.[143] As discussed

[136] 12 U.S.C. 5903(a)(3).

[137] Section 4(a)(1)(A)(ii) of the GENIUS Act refers to reserves comprising ''funds held as demand deposits (or other deposits that may be withdrawn upon request at any time) or insured shares at an insured depository institution. . . .'' For the reasons expressed in the sections (section IV.B) of this preamble proposing the defined terms ''Monetary Value'' and ''Share Account), the NCUA is proposing to use the defined term ''Share Account.'' The NCUA believes this approach is clearer than utilizing the undefined term ''insured shares'' from the Act. The proposed rule would also simplify and clarify the GENIUS Act's text by limiting deposits and funds in Share Accounts than can be reserves to those that are ''payable upon demand'' at an IDI. The GENIUS Act refers to ''demand deposits (or other deposits that may be withdrawn upon request at any time). . . .'' The NCUA believes this construction can be more simply stated as proposed without any substantive change.

[138] 12 U.S.C. 5903(a)(1)(A)(ii).

[139] The GENIUS Act permits the inclusion of Treasury bills, notes, or bonds ''(I) with a remaining maturity of 93 days or less; or (II) issued with a maturity of 93 days or less.'' The proposed rule would combine these categories since the former category includes the latter, at least for purposes of complying with the requirements of proposed § 706.202. NCUA-Licensed PPSIs may choose to categorize these assets separately for other reasons, for example, accounting or risk management purposes.

[140] The proposed rule would clarify that a repurchase agreement or reverse repurchase agreement with an intraday maturity could qualify as a permitted reserve asset. Section 4(a)(1)(A)(iv) and (v) of the Act (12 U.S.C. 5903(a)(1)(A(iv) and (v))) specifically refers to repurchase agreements and reverse repurchase agreements with an overnight maturity. The NCUA believes that this provision is intended to permit repurchase agreements and reverse repurchase agreements with a maturity no longer than overnight. Thus, the proposed rule would explicitly permit the use of intraday repurchase agreements and reverse repurchase agreements.

[141] 15 U.S.C. 80a–8(a).

[142] A money market fund that invests in any other assets, including in Treasury securities with a remaining maturity longer than 93 days, would not be eligible to be held as a Reserve Asset.

[143] 12 U.S.C. 5903(a)(4)(A)(iii).

throughout this preamble, the GENIUS Act regularly uses banking-specific terminology. The NCUA interprets ''deposit concentration at banking institutions'' to include deposits and funds in Share Accounts at all IDIs.

In proposing regulations to implement the Reserve Asset diversification requirement, the proposed rule includes two alternative options in proposed § 706.202(c), only one of which would be selected in the final rule. ''Option A'' would include a principles-based general requirement with an optional safe harbor containing quantitative requirements. ''Option B'' would make the quantitative requirements mandatory for all NCUA-Licensed PPSIs. Option A's principle-based general requirement would require an NCUA-Licensed PPSI to maintain Reserve Assets that are sufficiently diverse to manage potential credit, liquidity, interest rate, and price risks. In addition, the principles-based requirement in Option A in proposed § 706.202(c) would require an NCUA-Licensed PPSI to measure and manage the risk that concentrating Reserve Assets at one Eligible Financial Institution or a small number of Eligible Financial Institutions may impair the ability of an NCUA-Licensed PPSI to satisfy redemption demands if individual Eligible Financial Institutions are unable to return, or if there is a delay in returning, Reserve Assets placed by an NCUA-Licensed PPSI.[144] The proposed rule's diversification and concentration requirements would apply to custodial relationships, including sub-custodial arrangements. NCUA-Licensed PPSIs would be expected to ''look through'' any sub-custodial relationships to ensure that Reserve Assets are custodied at the sufficiently diverse number of Eligible Financial Institutions needed to comply with the proposed rule's requirements. Without this requirement, a PPSI might supposedly have its stock of Treasury securities custodied at multiple Eligible Financial Institutions, but sub-custodial relationships could result in the entire stock being custodied at only a single Eligible Financial Institution.

NCUA-Licensed PPSIs with less complex business models and lower risk profiles may be able to maintain a less diverse stock of Reserve Assets than NCUA-Licensed PPSIs with more complex business models or higher risk profiles. However, the NCUA interprets section 4(a)(4)(A)(iii) of the GENIUS Act as mandating some Reserve Asset diversification for all PPSIs,[145] both in types of Reserve Assets maintained and in the number of Eligible Financial Institutions holding a PPSI's Reserve Assets.[146] The NCUA expects that it would be unlikely, for example, that an NCUA-Licensed PPSI, even one with a simple business model and low risk profile, could satisfy the requirements in proposed § 706.202(c) by placing all its Reserve Assets at a single Eligible Financial Institution. Such a reliance on a single third-party location of Reserve Assets could expose the NCUA-Licensed PPSI to the unnecessary risk that its Reserve Assets, or some portion of them, could be unavailable to meet redemption requests. Similarly, the NCUA expects that all NCUA-Licensed PPSIs will need to maintain multiple Reserve Asset types, if only to serve as a back-up to what is otherwise a PPSI's primary Reserve Asset. Some NCUA-Licensed PPSIs may need to maintain more robustly diverse stocks of Reserve Assets to satisfy proposed § 706.202(c), depending on their business model, risk profile, and other relevant factors. For example, a large NCUA-Licensed PPSI with complex operations may need to maintain deposits and/or Share Accounts) with multiple Eligible Financial Institutions, as well as a stock of Treasury bills, potentially custodied with more than one Eligible Financial Institution in order to ensure they are capable of being monetized during periods of financial stress. Factors such as the number of parties that redeem directly with the NCUA-Licensed PPSI, the volume of redemptions (and volatility with respect to such volume), and the number and nature of the blockchains on which a Payment Stablecoin is traded could all increase the complexity of the PPSI's operations and weigh in favor of maintaining multiple different pools of Reserve Assets. NCUA-Licensed PPSIs may be able to comply with this requirement by maintaining multiple deposit accounts and/or Share Accounts, or through deposit or share placement services, as they can comply with the requirement in proposed § 706.202(a)(2) to demonstrate the operational capability to access and monetize the Reserve Assets.

Option A contains a safe harbor under which an NCUA-Licensed PPSI would be deemed to satisfy proposed § 706.202(c) if the PPSI maintains on each business day: (i) at least 10 percent of its required Reserve Assets as deposits and/or funds in Share Accounts payable upon demand at IDIs or Money standing to the credit of an account with a Federal Reserve Bank; (ii) at least 30 percent of its Reserve Assets as deposits and/or funds in Share Accounts payable upon demand at IDIs, Money standing to the credit of an account with a Federal Reserve Bank, or amounts receivable and due unconditionally within five business days on pending sales of Reserve Assets, maturing Reserve Assets, or other maturing transactions (*e.g.,* reverse repurchase agreements); (iii) no more than 40 percent of its Reserve Assets at any one Eligible Financial Institution, whether as deposits and/or funds in Share Accounts payable upon demand at any one IDI, securities custodied at any one Eligible Financial Institution, bilateral reverse repurchase agreements with any counterparty, or through other exposures; (iv) no more than 50 percent of the amount provided in proposed § 706.202(c)(2)(i) at any one Eligible Financial Institution; and (v) Reserve Assets with a weighted average maturity of no more than 20 days.

Weighted average maturity is computed as the sum of the product of each Reserve Asset's (1) remaining maturity and (2) percentage of the total pool of Reserve Assets (based on principal value). Deposits or Share Accounts payable upon demand would have a weighted average maturity of zero. The NCUA invites comments on whether the proposed rule should include an express definition of weighted average maturity, particularly whether the NCUA should adopt the same definition used in SEC Rule 2a–7 (17 CFR 270.2a–7). Paragraph (i) of SEC

[144] Eligible Financial Institutions that hold Reserve Assets in custody or safekeeping must be subject to supervision and comply with the requirements set forth in section 10 of the GENIUS Act (12 U.S.C. 5909). Institutions subject to NCUA supervision would need to comply with the requirements set forth in proposed subpart C of part 706.

[145] 12 U.S.C. 5903(a)(4)(A)(iii).

[146] An NCUA-Licensed PPSI that maintains ownership and control of all of its own Reserve Assets, rather than relying on separate Eligible Financial Institutions, may be able to satisfy the principles-based general diversification and concentration requirement in Option A, depending on the PPSI's particular circumstances. While explicitly requiring all NCUA-Licensed PPSIs to maintain some Reserve Assets at a third-party Eligible Financial Institution may help promote confidence that an issuer's Reserve Assets are diversified across multiple Eligible Financial Institutions, such a requirement may be unnecessary if the PPSI is able to establish its own secure control over the Reserve Assets. Any NCUA-Licensed PPSI maintaining direct ownership and control of Reserve Assets would still be subject to all requirements in proposed § 706.202, notably the requirement in proposed § 706.202(a)(2) under which the PPSI must demonstrate the operational capability to access and monetize Reserve Assets. An NCUA-Licensed PPSI that maintains ownership and control of its own assets may fail to satisfy this requirement, or the diversification and concentration requirements in proposed § 706.202(c), if the PPSI, for example, relies exclusively on arrangements with a single Eligible Financial Institution to monetize its Reserve Assets.

Rule 2a–7 provides that, for certain securities and transactions, maturity should not necessarily be the time remaining until ultimate repayment of principal but instead should be based on other characteristics (for example, the time until an interest rate reset or until demand repayment options can be exercised). The NCUA invites comment on whether this proposed rule should include these same maturity assumptions for certain Reserve Assets. The proposed rule does not include these maturity assumptions since they should not be relevant for most or all permissible Reserve Assets. Even if the maturity assumptions are relevant for certain Reserve Assets that might be permissible (for example, Floating Rate Treasury Notes), the NCUA expects that the limited maturity of Reserve Assets (93 days or less) will diminish the value of applying maturity assumptions. Accordingly, under the proposed rule, the NCUA expects that the maturity of all Reserve Assets, for purposes of calculating weighted average maturity, will be the time remaining until the repayment of principal.

This safe harbor would give NCUA-Licensed PPSIs a transparent and standardized target for achieving compliance with Reserve Asset diversification requirements.[147] However, under Option A, meeting the safe harbor is not the only means to comply with proposed § 706.202(c). Some issuers, particularly smaller and less complex issuers, may be able to comply with § 706.202(c) without meeting the minimum levels in the safe harbor. For example, if a smaller NCUA-Licensed PPSI with a comparatively simple business model and lower risk profile finds it commercially useful to maintain more of its Reserve Assets as deposits and/or funds in Share Accounts payable upon demand, the PPSI may be able to satisfy proposed § 706.202(c) even if the PPSI maintains more than 10 percent of its Reserve Assets as Deposits and/or funds in Share Accounts at one Eligible Financial Institution, depending on particular facts and circumstances. This flexibility is consistent with the GENIUS Act's requirements that the proposed asset diversification requirements be ''tailored to the business model and risk profile of permitted payment stablecoin issuers.'' [148]

The safe harbor's requirement that an NCUA-Licensed PPSI maintain at least 10 percent of its Reserve Assets as ''daily liquidity'': deposits and/or funds in Share Accounts payable upon demand or Money standing to the credit of an account with a Federal Reserve Bank would help ensure that a PPSI has readily available funds necessary to meet redemption requests. While all of the proposed Reserve Assets should be liquid and easily monetizable, the requirement to have some minimum level of immediately liquid funds is additional protection against the risk that a PPSI would be unable to meet redemption requests in a timely manner, which is critical to avoid in order to maintain confidence in the PPSI and the Payment Stablecoin industry as a whole. A minimum requirement of 10 percent would be in line with the largest 1-day redemption events experienced by stablecoin issuers.[149] The NCUA invites comment on whether an alternate minimum is appropriate.

Including a baseline requirement to maintain a minimum percentage of liquidity that is immediately available (without the need to sell any assets, even highly liquid assets like Treasury securities) will help ensure an NCUA-Licensed PPSI's ability to meet redemption requests. The NCUA invites comments on these and other considerations, particularly on whether conservative liquidity requirements are necessary. The proposed rule includes robust liquidity requirements but does not include capital-based overcollateralization or Reserve Asset buffer requirements. An alternative possibility would be to remove some of the proposed liquidity requirements, though this may warrant increased capital or buffer requirements.

The safe harbor would also require that an NCUA-Licensed PPSI maintain at least 30 percent of its Reserve Assets as deposits and/or funds in Share Accounts payable upon demand, Money standing to the credit of an account with a Federal Reserve Bank, or amounts receivable and due unconditionally within five business days on pending sales of Reserve Assets, maturing Reserve Assets, or other maturing transactions. This ''weekly'' liquidity would help ensure that an NCUA-Licensed PPSI is able to meet a series of redemption requests that takes place over multiple days. It will also help prevent issuers from meeting the ''daily'' liquidity requirement but otherwise maintaining a stock of assets that are less readily monetizable. A minimum requirement of 30 percent ''weekly'' liquidity would protect issuers against redemption runs that take place over multiple days, a phenomenon experienced by stablecoin issuers in the past, and a 30 percent minimum requirement would exceed the redemption volumes seen during these redemption runs. In the absence of a minimum ''weekly'' (or other multi-day) requirement, an issuer might only have its stock of 10 percent immediately available liquidity plus owned securities that it would have to actually sell in order to monetize and meet redemption requests. While NCUA-Licensed PPSIs must be prepared to monetize any such securities, it would be safer to have a stock of liquid funds that will automatically become available over the next several days as a first line of defense against multi-day redemption runs.

The safe harbor would also require that an NCUA-Licensed PPSI maintain no more than 40 percent of its Reserve Assets at any one Eligible Financial Institution, whether as Deposits and/or funds in Share Accounts payable upon demand at any one IDI, securities custodied at any one Eligible Financial Institution, bilateral reverse repurchase agreements with any counterparty, or through other exposures. This requirement would prevent an issuer from being overly exposed to any One Eligible Financial Institution. While this requirement would not eliminate the chance of losing Reserve Assets because of distress at an Eligible Financial Institution holding Reserve Assets—or temporarily losing access to Reserve Assets—this requirement would ensure that NCUA-Licensed PPSIs have other stocks of Reserve Assets available to satisfy redemption requests. This requirement is meant to capture all potential exposures to a counterparty. An NCUA-Licensed PPSI could maintain deposits and/or funds in Share Accounts payable upon demand at an IDI while at the same have an Affiliate of that IDI maintain custody of the issuer's securities or serve as a counterparty in repurchase or reverse repurchase transactions. All of these transactions could expose an NCUA-Licensed PPSI's Reserve Assets to the health of a single Eligible Financial Institution. Accordingly, this requirement would aggregate exposures to prevent excessive exposure to any

[147] The NCUA recognizes that, as an NCUA-Licensed PPSI sells more liquid assets to meet redemption requests in times of stress, it may temporarily fail to satisfy the terms of the proposed safe harbor. An NCUA-Licensed PPSI should appropriately diversify its Reserve Assets as soon as practicable following such an event. However, at no point, can an NCUA-Licensed PPSI's Reserve Assets be less than the Fair Value of the Outstanding Issuance Value of the PPSI as required in proposed § 706.202(a)(1)(iii).

[148] 12 U.S.C. 5903(a)(4)(A)(iii)(I).

[149] Although the NCUA referenced SEC Rule 2a–7 when drafting these requirements due to certain similarities between money market funds and PPSIs, the proposed requirements diverge in certain respects based on inherent differences between the two (*e.g.,* Reserve Asset composition).

one Eligible Financial Institution. The phrase ''or other exposures'' is meant to capture any other exposure that creates a similar risk. The NCUA invites comments on alternate minimums besides 40 percent; the 40 percent measure would ensure that no one Eligible Financial Institution would have a majority of an NCUA-Licensed PPSI's Reserve Assets and that issuers spread relationships and operational capabilities across multiple Eligible Financial Institutions in a way that prevents a PPSI coming to rely excessively on one Eligible Financial Institution.

The safe harbor would also require that an NCUA-Licensed PPSI maintain no more than 50 percent of the required daily liquidity specified under proposed paragraph (c)(2)(i) at any one Eligible Financial Institution. This requirement would guard against the risk that problems at one Eligible Financial Institution prevent a PPSI from accessing its Reserve Assets. If an NCUA-Licensed PPSI is dependent on one Eligible Financial Institution to maintain all or a large portion of its Reserve Assets, the PPSI may be excessively exposed to, for example, operational concerns at that Eligible Financial Institution or even the risk of the institution's failure.

Proposed § 706.202(c)(2)(i) is designed to ensure that NCUA-Licensed PPSIs have a sufficient minimum amount of readily available funds to meet redemption requests. However, if that entire amount consists of deposits and/or funds in Share Accounts at one IDI, the PPSI is exposed to the risk that problems at that IDI could wholly prevent the PPSI from accessing its readily available funds. Having at least one other stock of readily available funds as part of a PPSI's Reserve Assets would help ensure that some readily available funds are accessible in order to meet redemption requests. Placing deposits and/or funds in Share Accounts payable upon demand at multiple IDIs, whether directly or through deposit/share placement services, would mitigate the risk of over-exposure to one particular IDI.

Proposed § 706.202(c)(2)(v) would also require, to qualify for the safe harbor, that an NCUA-Licensed PPSI's Reserve Assets have a weighted average maturity of no more than 20 days. This would serve as a backstop against potential losses due to interest rate increases. While PPSIs may permissibly hold Reserve Assets with a maturity of up to 93 days, holding a portfolio of Reserve Assets concentrated at the outer end of that maturity limit exposes the issuer's Reserve Assets to losses due to interest rate increases.[150] Even small losses could undermine confidence in a Payment Stablecoin given the importance of maintaining par and ensuring a stable value. A limit on weighted average maturity imposed across the entire portfolio of an NCUA-Licensed PPSI's Reserve Assets would allow the issuer to hold the entire range of permissible assets while ensuring that the portfolio in aggregate does not have excess exposure to interest rate risk. A limit of 20 days would still allow NCUA-Licensed PPSIs the full range of permissible Reserve Assets (for example, newly issued 3-month Treasury bills) while ensuring that Reserve Assets are not overly concentrated in longer-dated issuances. The NCUA invites comment on whether a weighted average maturity limit of 20 days is appropriate, including whether it would represent a binding constraint for current stablecoin issuers and the desirability of higher or lower limits. The NCUA additionally invites comment on whether the weighted average maturity requirement for a large issuer should differ from that for a smaller issuer (*e.g.,* by allowing smaller issuers to have a longer weighted average maturity such as 30 or 40 days).

As an example, an NCUA-Licensed PPSI with $20 billion of Outstanding Issuance Value could meet the safe harbor by depositing at least $1 billion each at two IDIs. This would meet the requirement in proposed § 706.202(c)(2)(i) that the NCUA-Licensed PPSI maintain at least 10 percent ($2 billion in this example) of its required Reserve Assets as readily available funds as well as the requirement in proposed § 706.202(c)(2)(iv) that the NCUA-Licensed PPSI maintain no more than 50 percent of its readily available funds at any one Eligible Financial Institution ($1 billion in this example). In order to qualify for the safe harbor, the NCUA-Licensed PPSI would still need to satisfy proposed § 706.202(c)(2)(iii), under which an issuer could not maintain more than 40 percent of its Reserve Assets at any one Eligible Financial Institution and proposed § 706.202(c)(2)(ii), under which an NCUA-Licensed PPSI must maintain at least 30 percent of its Reserve Assets as deposits and/or funds in Share Accounts payable upon demand at IDIs, Money standing to the credit of an account with a Federal Reserve Bank, or amounts receivable and due conditionally within five business days on pending sales of Reserve Assts, maturing Reserve Assets, or other maturing transactions. In this example, the NCUA-Licensed PPSI could not keep more than $8 billion in Reserve Assets at any one institution (for instance, invested in a single investment fund) and would also need to maintain at least $6 billion as deposits and/or funds in Share Accounts payable upon demand at IDIs, Money standing to the credit of an account with a Federal Reserve Bank, or amounts receivable and due unconditionally within five business days on pending sales of Reserve Assets or other maturing transactions. The issuer would also need to ensure that its entire stock of Reserve Assets ($20 billion) complied with the requirement to have a weighted average maturity of no more than 20 days. While compliance with the diversification safe harbor would establish compliance with proposed § 706.202(c), it would not relieve an NCUA-Licensed PPSI of its obligations under proposed § 706.202(a). Notably, an NCUA-Licensed PPSI would still be required to maintain and demonstrate the operational capability to monetize its Reserve Assets.

Option B would impose the same quantitative standards as mandatory requirements, rather than an optional safe harbor. Option B would not include the baseline principles-based requirement. While Option B would remove flexibility, it would create a more transparent and readily comprehensible set of requirements. NCUA-Licensed PPSIs, Payment Stablecoin holders, and other parties would be able to discern what requirements NCUA-Licensed PPSIs must adhere to with respect to the Reserve Assets.

Proposed § 706.202(d) would require an NCUA-Licensed PPSI with an Outstanding Issuance Value of $25 billion or more to, on each business day, maintain at least 0.5 percent of its Reserve Assets in the form of deposits and/or funds in Share Accounts at IDIs in amounts that are fully insured by the FDIC and/or NCUA, up to a cap of $500 million. While it may not be practicable to maintain all deposits and/or funds in Share Accounts so that they are fully insured by the FDIC and/or NCUA, having some minimum amount of fully insured deposits and/or funds in Share Accounts will provide an additional measure of security for Reserve Assets

[150] During the rapid increases in interest rates in the early 1980s, 3-month Treasury Bill secondary market rates increased from 12.05 percent to 15.37 percent over the period of a month. *See* Fed. Reserve Econ. Data, ''Table Data—3-Month Treasury Bill Secondary Market Rate, Discount Basis,'' *https://fred.stlouisfed.org/data/WTB3MS* (including Treasury Bill secondary market rates for February 8, 1980, and March 7, 1980). A change of this magnitude would result in a 90-day security losing approximately 0.79 percent of its value.

and can promote market and holder confidence about the integrity of Reserve Assets. Though the required minimum amount is not a large percentage, it would ensure that large NCUA-Licensed PPSIs have some stock of extremely safe and liquid assets: deposits and/or funds in Share Accounts that are fully insured and can be withdrawn freely and that are not exposed to risks like interest rate risk. Having Reserve Assets diffused through the banking system (including the credit union system) may promote confidence by virtue of having at least some Reserve Assets held in traditional IDIs with which holders are already familiar (for example, nearby community banks and FICUs). Payment Stablecoin holders may be reassured by knowing that a minimum portion of Reserve Assets is maintained as deposits and/or funds in Share Accounts that are fully insured, and the diffusion of Reserve Assets may mitigate fears or contagion risks associated with rumors about the health of particular IDIs.

In theory, it would be ideal from the perspective of the safety and soundness of the NCUA-Licensed PPSI if PPSIs would be able to place all deposits and/or funds in Share Accounts, so they are covered by applicable deposit/share insurance limits. However, current deposit/share insurance requirements may make this impossible for larger PPSIs. While NCUA-Licensed PPSIs may use services, such as deposit/share brokers, to distribute deposits and/or funds in Share Accounts across Eligible Financial Institutions—as long as NCUA-Licensed PPSIs are able to maintain the operational capability to access and monetize these deposits and/or funds in Share Accounts—the finite number of Eligible Financial Institutions plus deposit/share insurance limits may render it impossible for larger PPSIs to insure more than a portion of their deposits and/or funds in Share Accounts. The NCUA may revisit this issue if deposit/share insurance requirements change, and the NCUA invites comments about alternative ways to address deposit/share insurance of Reserve Assets held as deposits and/or funds in Share Accounts. The NCUA recognizes the additional security that deposit/share insurance would provide for Payment Stablecoin holders and also recognizes the value of spreading deposits and/or funds in Share Accounts around a broad range of IDIs, rather than potentially having PPSI deposits and/or funds in Share Accounts concentrated at a small number of IDIs. Holding reserves at a very large number of institutions, could, however, introduce additional operational risk that a PPSI would need to manage. The thresholds in proposed § 706.202(d) balance the value and security of spreading Reserve Assets across multiple Eligible Financial Institutions, the capacity of the banking system (and the credit union system) to hold deposits and/or funds in Share Accounts) from any one single depositor, and the operational complexity numerous depository relationships would entail.

Proposed § 706.202(e) would require the NCUA-Licensed PPSI to publish on its website by noon on the last day of each month the composition of the issuer's reserves held pursuant to the GENIUS Act as of the last day of the prior month, using a format substantially similar to the template provided in table 1 to proposed § 706.202(e). The report must contain the total number of outstanding Payment Stablecoins issued by the issuer and the amount (Fair Value) and composition of the reserves, including the average tenor and geographic location of custody of each category of reserve instruments. The information in the report, including the value of Reserve Assets, should be as of the end of the previous month. This implements the requirement in section 4(a)(1)(C) of the GENIUS Act.[151] To satisfy the geographic location requirement, the NCUA expects that it will generally be sufficient for NCUA-Licensed PPSIs to disclose the jurisdiction where Reserve Assets are custodied or located.

Proposed § 706.202(f) implements the applicable requirements of section 4(a)(3) of the GENIUS Act.[152] This provision requires PPSIs to, each month, have the information disclosed in the previous month-end report examined by a Registered Public Accounting Firm. Proposed § 706.202(f)(1) would require the examination of the previous month-end report to occur by noon on the last day of each month and would require the report to be published on the NCUA-Licensed PPSI's website at the same time as the monthly report required under proposed § 706.202(e). Consistent with the GENIUS Act, proposed § 706.202(f)(2) would require the Chief Executive Officer and Chief Financial Officer (or the Persons performing the equivalent functions) of the NCUA-Licensed PPSI to submit a certification as to the accuracy of the monthly report to the NCUA. Under section 4(a)(3)(C) of the Act,[153] any Person who submits this required certification knowing that such certification is false shall be subject to the same criminal penalties as those set forth under 18 U.S.C. 1350(c).

Proposed § 706.202(g) provides for the consequences and remedial measures if an NCUA-Licensed PPSI does not comply with the requirements of § 706.202. Proposed § 706.202(g)(1) would provide that an NCUA-Licensed PPSI must notify the NCUA on any day in which its Reserve Asset amount has fallen below the required minimum in proposed § 706.202(a). Proposed § 706.202(g)(2) would provide that an NCUA-Licensed PPSI falling below the required minimum would be barred from issuing new Payment Stablecoins until it had remediated the shortfall except as necessary to facilitate a transfer of Payment Stablecoins from one Distributed Ledger to another and provided that the net Outstanding Issuance Value does not increase. Proposed § 706.202(g)(3) would provide that, if an NCUA-Licensed PPSI fails to meet its Reserve Asset requirement for 15 consecutive business days, it must begin liquidation of Reserve Assets and redemption of outstanding Payment Stablecoins consistent with § 706.203 and may not charge Customers a fee to redeem their Payment Stablecoins at any time during the liquidation. The NCUA may extend the time period under proposed § 706.202(g)(3) in its sole discretion. Because of the importance of maintaining minimum Reserve Asset levels, the proposed rule would include automatic consequences for any non-compliance intended to prevent any concerns from developing further. This provision is intended to prevent chronic non-compliance with minimum Reserve Asset requirements. The NCUA expects to ensure compliance with other requirements in the proposed rule using traditional supervisory methods, namely having examiners identify concerns that can be escalated into enforcement actions, if necessary. Accordingly, proposed § 706.202(g)(4) provides that if at any point the NCUA determines that an NCUA-Licensed PPSI has not demonstrated that it meets the Reserve Asset requirements in proposed § 706.202(a), (b), (c), or (d), the NCUA may require the issuer to submit a plan describing how the PPSI will attain compliance and the timeline for the plan. If the NCUA determines, either before or after the submission of a plan, that an NCUA-Licensed PPSI faces a significant risk of being unable to attain compliance with the reserve requirements in proposed § 706.202(a), (b), (c), or (d) within a reasonable period, the NCUA may order the issuer

[151] 12 U.S.C. 5903(a)(1)(C).

[152] 12 U.S.C. 5903(a)(3).

[153] 12 U.S.C. 5903(a)(3)(C).

to initiate redemption of all outstanding Payment Stablecoins. Proposed § 706.202(g)(4) also states that the NCUA's authority to require a compliance plan or order redemption does not limit the NCUA's authority to pursue other measures, including enforcement actions, if appropriate.

b. Request for Comment

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 42:* Section 4(a)(1)(A)(vi) of the GENIUS Act includes ''securities issued by an investment company registered under section 8(a) of the Investment Company Act of 1940,[154] or other registered Government money market fund, and that are invested solely in underlying assets described in clauses (i) through (v)'' as eligible Reserve Assets for Payment Stablecoins issued by PPSIs. However, many or all Government money market funds are investment companies registered under section 8(a) of the Investment Company Act of 1940. Should the provision relating to securities issued by investment companies registered under section 8(a) of the Investment Company Act, or other registered Government money market funds, be clarified? Does section 4(a)(1)(A)(vi) permit securities issued by investment companies registered under section 8(a) of the Investment Company Act of 1940 that are not Government money market funds to be Reserve Assets for Payment Stablecoins issued by PPSIs? Are there any registered Government money market funds that are not investment companies registered under section 8(a) of the Investment Company Act? Does section 4(a)(1)(A)(vi) permit securities issued by registered Government money market funds that are not registered under section 8(a) of the Investment Company Act to be Reserve Assets for Payment Stablecoins issued by PPSIs?

*Question 43:* Should the provisions relating to repurchase agreements and reverse repurchase agreements be clarified? For example, should the NCUA provide that deposits and funds in Share Accounts can serve as collateral for repurchase agreements? If so, what limitations, if any, should the NCUA include with respect to the use of deposits and funds in Share Accounts as collateral?

*Question 44:* Should the proposed rule require a buffer or impose haircuts on certain Reserve Assets to ensure that Reserve Asset values do not fall below Outstanding Issuance Values? The GENIUS Act requires PPSIs to maintain identifiable reserves ''on an at least 1 to 1 basis.'' What measures should the proposed rule include to ensure that issuers are able to maintain this minimum? Without a buffer or other measures, the Fair Value of a PPSI's Reserve Assets could fall below the required minimum if there are, for example, sudden increases in interest rates. While proposed § 706.204(a)(3)(i) would include a requirement to manage interest rate risk, should there be a more express requirement for a buffer (for example, 1% of Reserve Assets)? For example, the proposed rule could require PPSIs to maintain an amount of Reserve Assets sufficient to stay above the Outstanding Issuance Value in light of risks facing the PPSI, including interest rate risk and risks associated with the capability to access and monetize Reserve Assets. Are there other considerations the NCUA should take into account if it chose to calibrate such a buffer? As an alternative to requiring such a buffer, should the NCUA provide guidance on what level of buffer is generally appropriate as a matter of prudent risk management?

*Question 45:* Should the NCUA expressly require that a certain percentage of Reserve Assets be held in custody either at an Affiliate or at a third party? What are the potential costs and benefits of this approach, including with respect to operational risk?

*Question 46:* Is the term ''deposits and/or funds in Share Accounts payable upon demand'' sufficiently clear? If not, how should the NCUA clarify the term (*i.e.,* what types of accounts should expressly be included within the term)?

*Question 47:* Should the proposed rule define ''reserve in tokenized form'', to enhance clarity regarding proposed § 706.202(b)(8)? If so, should the NCUA define ''reserve in tokenized form'' to refer to a Digital Asset, as defined in proposed § 706.2, that represents another asset and provides full legal rights to that underlying asset? What modifications to this definition or the rule's related terminology would enhance clarity?

*Question 48:* In the provision in proposed § 706.202(b)(5) regarding reverse repurchase agreements, is the proposed rule sufficiently clear in its reference to ''overcollateralization in line with standard market terms?'' If not, what clarifications would be appropriate?

*Question 49:* Should the NCUA provide additional detail on what securities could be in scope for ''any other similarly liquid Federal Government-issued asset'' under § 706.202(b)(7)? For example, should Treasury securities with remaining maturity of two years or less be permitted under § 706.202(b)(7)? What would be the implications for liquidity or interest rate risk of allowing these types of securities to be held as Reserve Assets? If the NCUA were to permit two-year Treasury securities to be used as Reserve Assets, should the NCUA impose any additional requirements, such as requiring the weighted average maturity of Treasury securities held as reserves to be no more than 93 days (or some shorter timeframe) or requiring additional Reserve Asset diversification requirements (*e.g.,* minimum amount of Reserve Assets held as deposits and/or funds in Share Accounts or minimum number of Eligible Financial Institutions holding the PPSI's Reserve Assets) for PPSIs that hold Treasury securities with a remaining maturity between 94 days and two years?

*Question 50:* Should the proposed rule clarify that Treasury Floating Rate Notes (FRNs) and Treasury Inflation-Protected Securities (TIPs) be included as permissible Reserve Assets, assuming they otherwise meet the requirements of the proposed rule, including maturity requirements? Is there any reason these securities should be excluded? Should Treasury Separate Trading of Registered Interest and Principal of Securities (STRIPS) be included? Are there other instruments that should be considered as included within the GENIUS Act's phrase ''Treasury bills, notes, or bonds''? If these securities are included, should there be additional requirements—for example, both weighted average life and weighted average maturity limits to accommodate interest rate resets in FRNs?

*Question 51:* Should the proposed rule's requirements for Reserve Assets incorporate requirements to reflect potential interactions with the larger market for Treasury securities? For example, should the proposed rule include requirements to prevent any disruptive or negative effects that the management or liquidation of Treasury Reserve Assets might have on markets?

*Question 52:* The proposed rule would, consistent with the GENIUS Act, allow as Reserve Assets funds held as deposits and/or in Share Accounts) that are payable upon demand at an IDI (including any foreign branches or agents, including correspondent banks). Should the proposed rule add definitions for these terms to make them clearer or impose restrictions on the use of foreign branches or agents and correspondent banks? For example, should the proposed rule require that Payment Stablecoins denominated in United States dollars only be backed by deposits and/or funds in Share Accounts that are payable upon demand

[154] 15 U.S.C. 80a-8(a).

at U.S.-based IDIs (*i.e.,* Reserve Assets could not include Eurodollar deposits)? Should the NCUA include any additional requirements with respect to Reserve Assets held abroad, such as applying a haircut to the reserve assets, imposing a capital charge, or including additional policies and procedures to manage the risks associated with holding Reserve Assets abroad?

*Question 53:* Should the NCUA develop a formal process to consider and approve securities under § 706.202(b)(7)? Should the NCUA allow PPSIs or other parties to request that the NCUA consider a specific type of security? Should any determinations on additional securities approved under this authority be made public?

*Question 54:* The proposed rule would require a PPSI to maintain Reserve Assets, the Fair Value of which must equal or exceed the Outstanding Issuance Value at all times. Should the NCUA impose a different standard, such as requiring the Fair Value of Reserve Assets to equal or exceed the Outstanding Issuance Value at the end of each day or at the end of each business day?

*Question 55:* The proposed rule's requirements for Reserve Asset diversification and concentration include two options: (1) a flexible, principles-based baseline requirement plus a quantitative safe harbor or (2) quantitative requirements applicable to all PPSIs. Which option is more appropriate? How should either option, including the quantitative limits included in each option, be modified? For example, should the requirement or safe harbor's provision regarding holding Reserve Assets as deposits and/or funds in Share Accounts payable upon demand or Money standing to the credit of an account with a Federal Reserve Bank be set at five percent, 10 percent, 15 percent or 20 percent? Should this requirement be set at a different percentage (*e.g.,* 10 percent) for small issuers and a larger percentage (*e.g.,* 15 percent) for larger issuers? Should the requirement or safe harbor's provision regarding maintaining Reserve Assets as deposits and/or funds in Share Accounts payable upon demand, Money standing to the credit of an account with a Federal Reserve Bank, or amounts receivable and due unconditionally within five business days on pending sales of Reserve Assets or other maturing transactions be set at 20 percent, 25 percent, or 30 percent? Are the proposed maxima for various types of Reserve Assets that may be held at an Eligible Financial Institution appropriately calibrated? Would a shorter or longer weighted average maturity be appropriate? Should larger issuers have a shorter weighted average maturity requirement than smaller issuers? If the final rule includes quantitative requirements for all PPSIs, should there be additional risk management requirements to ensure that PPSIs appropriately manage diversification and concentration risk? In particular, the risk management requirements could include a requirement that PPSIs must measure and manage the risk that their gross exposure to any one institution or a small number of institutions may impair their ability to satisfy redemption demands.

*Question 56:* The Reserve Asset diversification and concentration limits in proposed § 706.202(c) would not distinguish reserve assets held at Federal Reserve Banks and would therefore include requirements (or conditions of a safe harbor) that would limit the reserve assets held at any one Federal Reserve Bank. In light of the low credit risk associated with Federal Reserve Banks, should the final rule eliminate these requirements or conditions? Specifically, should the NCUA exempt reserve assets held at a Federal Reserve Bank from the conditions in § 706.202(c)(2)(iii) and § 706.202(c)(2)(iv) of Option A and the requirements in § 706.202(c)(3) and § 706.202(c)(4) of option B?

*Question 57:* The Reserve Asset diversification and concentration limits in proposed § 706.202(c) would limit the Reserve Assets, including deposits and/or funds in Share Accounts payable upon demand, at any one Eligible Financial Institution. Should there be an exception to some or all of these requirements for a subsidiary of an NCUA-regulated FICU approved to be a PPSI if the NCUA-regulated FICU has less than a certain amount of total assets? Should the exception be limited to or tailored for Reserve Assets at a Parent Company FICU? For example, should a PPSI that is a subsidiary of an NCUA-regulated FICU Parent Company with less than a certain amount of total assets be permitted to hold a larger percentage, or all, of its Reserve Assets as deposits and/or funds in Share Accounts at the NCUA-regulated FICU Parent Company? Should any such exception be subject to any conditions? For example, should it only be available if the NCUA-regulated FICU is well-capitalized?

*Question 58:* Option A for proposed § 706.202(c) would require that a PPSI must maintain Reserve Assets that are sufficiently diverse to manage potential credit, liquidity, interest rate, or price risks. Are there other risks that should be added to this list, or removed from it? If the final rule adopts mandatory quantitative diversification and concentration requirements, should the requirement to monitor and manage these risks be codified as a separate risk management requirement?

*Question 59:* The NCUA invites comment on the extent to which additional diversification requirements are necessary. Is it necessary to require that PPSIs maintain more than one type of Reserve Asset? Would it be sufficient for the NCUA to require that PPSIs maintain only one secondary, backup Reserve Asset?

*Question 60:* To diversify the maturity profile of Reserve Assets, should PPSIs be required to maintain a minimum amount of their Reserve Assets in cash or equivalents or assets that can be converted more readily into short-term liquidity, for example within a daily or weekly timeframe, akin to the requirements for money market funds in SEC Rule 2a–7?

*Question 61:* Should the proposed rule include other measures to encourage Reserve Assets to be held in the form of fully insured deposits and/or Share Accounts? Proposed § 706.202(d) would include a requirement for larger PPSIs to maintain a minimum percentage of assets as fully insured deposits and/or Share Accounts. While it may be difficult for larger PPSIs to hold reserve assets as fully insured deposits and/or Share Accounts due to deposit and share insurance limits and the finite number of IDIs in the United States, should PPSIs be required to hold some minimum amount of reserves as fully insured deposits and/or Share Accounts) in order to provide extra protection for Payment Stablecoin holders? Should the thresholds in proposed § 706.202(d) be set at different levels: for example, apply to issuers with an Outstanding Issuance Value of $1 billion, $10 billion, $50 billion, or $100 billion or more? Should covered larger issuers be required to maintain a smaller or larger percentage of Reserve Assets as fully insured deposits and/or Share Accounts (for example, 0.1 percent, 0.25 percent, 1 percent, or 2 percent)? Should the cap be higher or lower (for example, $100 million, $250 million, or $1 billion)?

*Question 62:* How should the NCUA calibrate the fully insured deposit and/or Share Account) requirement for PPSIs? Should it be as a percentage of assets or an absolute number? If a percentage, what percentage should that be? If an absolute number, what should that be? Should there be a cutoff for PPSIs above or below a certain size

threshold that should be required to place fully insured deposits and/or Share Accounts? If so, why? What would be the implications of such a cutoff? What is the total amount of fully insured Payment Stablecoin deposits and/or funds in Share Accounts that the banking system in the United States can or should reasonably absorb? What is the total amount of fully insured deposits and/or funds in Share Accounts that an individual community bank or FICU is likely to hold?

*Question 63:* There are approximately 4,380 total insured banks and 4,287 FICUs in the United States. Should the proposed rule include other measures to spread insured Payment Stablecoin deposits and Share Accounts throughout the banking and credit union systems? If so, how broadly should insured deposits and funds in Share Accounts from PPSIs be distributed? For example, should the final rule be calibrated to maximize the number of banks and FICUs in the United States that could hold some amount of insured Deposits and Share Accounts from PPSIs if consistent with their risk appetite and risk management abilities? If so, why? If not, why not?

*Question 64:* Deposit/share placement services could be used to facilitate compliance with these diversification requirements, as long as PPSIs are able to maintain the operational ability to access the deposits and/or funds in Share Accounts, consistent with proposed § 706.202(a). Please describe any risks associated with using such services or other intermediaries and how PPSIs could best mitigate these risks.

*Question 65:* Could Reserve Asset diversification requirements that encourage diffusion of deposits and funds in Share Accounts cause risks to the banking and credit union systems (for example, increasing run risks at banks and FICUs or replacing more stable deposits and funds in Share Accounts with deposits and funds in Share Accounts that are more likely to be withdrawn quickly and in large volumes)? Could such diversification requirements raise operational risks for PPSIs, FICUs, or banks? How difficult would it be for PPSIs to liquidate such deposits and funds in Share Accounts in a stressed environment? If deposit and share insurance rules change, so that even larger PPSIs could be able to hold all their required deposits and or funds in Share Accounts as fully insured, should all deposits and funds in Share Accounts held as Reserve Assets be required to be insured?

*Question 66:* Should the proposed safe harbor (or alternatively, the liquidity requirements directly) require a PPSI to maintain at least 20 percent of required Reserve Assets at IDIs with less than $30 billion in total assets (either directly or indirectly through a deposit/share broker)? Would such an approach help ensure appropriate Reserve Asset diversification, particularly as these smaller IDIs are unlikely to be counterparties to the PPSI in repurchase agreements or reverse repurchase agreements?

*Question 67:* How would the proposed rule affect the amount of deposits and funds in Share Accounts maintained in the United States banking and credit union systems? Would the proposed rule reduce the number of deposits and funds in Share Accounts maintained in the United States banking and credit union system and therefore affect the ability of United States banks and credit unions to lend? What, if any, measures should the proposed rule include to mitigate such concerns? Should the proposed rule include a minimum percent of Reserve Assets as deposits and/or funds in Share Accounts in order to offset potential reductions in overall levels of deposits and funds in Share Accounts?

*Question 68:* One option in the proposed rule would include flexible baseline diversification and concentration requirements, coupled with an optional quantitative safe harbor. Should the default requirement for PPSIs include quantitative limits for Reserve Asset diversification? For example, the NCUA could impose quantitative limits on the maximum amount of uninsured deposits and/or uninsured funds in Share Accounts payable upon demand that PPSIs can maintain with a single IDI, in addition to any restrictions imposed by the FDIC and NCUA pursuant to separate authority under the GENIUS Act. PPSIs might be required to maintain no more than a specified percentage (for example, one percent, five percent, or 10 percent) as uninsured deposits and/or uninsured funds in Share Accounts payable upon demand at a single IDI. Examples of other quantitative limits could include the following.

- Minimum cash limits, such as a minimum amount of Money standing to the credit of an account of a Federal Reserve bank plus deposits and/or funds in Share Accounts payable upon demand as a percentage of operating expenses for a specific period, as a percentage of total Reserve Assets, or as a percentage of modeled stress cash outflows (for example, 10 percent or 15 percent);
- Minimum amount of assets maturing daily, weekly, or over some other time period (for example, assets available on demand or maturing weekly must constitute 20 percent of Reserve Assets);
- Counterparty diversification limits, such as maximum credit exposure to repo or reverse repo counterparties; and
- Limitations on tokenized forms of Reserve Assets under proposed § 706.202(b)(8), such as limiting the amount to no more than a certain percentage (*e.g.,* 20 percent) of a PPSI's total Reserve Assets.

What other limits should be considered? Such requirements could be tailored according to size; for example, larger and more complex PPSIs may be required to adhere to more stringent diversification and concentration requirements.

*Question 69:* Should the NCUA adopt the proposed safe harbor option (Option A) for proposed § 706.202(c)? Does the proposed safe harbor adequately address differences in business models, while addressing risks associated with asset concentration? Should the proposed safe harbor include different quantitative thresholds? What other features should the safe harbor incorporate, if adopted?

*Question 70:* Should the NCUA adopt any other restrictions on Reserve Asset concentration? If so, should they be based on gross exposures to particular counterparties? Or should the restrictions be more prescriptive? For example, should the rule prohibit a PPSI from entering into a reverse repurchase agreement with any counterparty that holds deposits and/or funds in Share Accounts that serve as Reserve Assets for the PPSI? Are the Reserve Asset concentration requirements appropriately calibrated? Should the NCUA require that no more than 5, 10, or 15 percent of a PPSI's Reserve Assets may be deposits or funds in Share Accounts at a single IDI?

*Question 71:* Should the NCUA's concentration requirements include requirements to not have more than a specified portion of Reserve Assets at a single custodian? Would this requirement impose undue burden? For example, would requiring the use of more than one Eligible Financial Institution as custodian of Treasury securities and collateral for reverse repurchase agreements impose undue burden or complexity on the management of Reserve Assets? What are the costs and benefits of such an approach, including from an operational risk perspective?

*Question 72:* Should the proposed rule include measures to ensure that a PPSI is not overly reliant on short-term lending transactions to meet immediate

liquidity needs? In the absence of such a restriction, a PPSI hypothetically might maintain a Reserve Asset portfolio entirely of Treasury securities and rely on overnight repo transactions to generate the daily liquidity amounts required by the proposed rule. This arrangement could leave the PPSI vulnerable to disruptions in repo markets. Should the proposed rule require excluding short-term repayment obligations from daily and weekly liquidity? For example, the proposed rule could require, for daily liquidity, deducting payments due on overnight borrowings and, for weekly liquidity, deducting any payments due within the next five business days? If such a restriction is included, should repayment deductions be offset by any expected inflows?

*Question 73:* Consistent with the GENIUS Act, the proposed rule would allow physical currency, including coins, to serve as Reserve Assets. Nevertheless, given the limitations on transferring physical currency, particularly difficulties that may arise in deploying physical currency quickly to meet sudden demands for redemptions, should the proposed rule impose limits on how much physical currency can serve as Reserve Assets? For example, the proposed rule could require that physical currency constitute no more than 5 percent or 10 percent of a PPSI's Reserve Assets. Should the proposed rule impose special requirements to make sure that physical currency is safeguarded (for example, against theft or fire)? For example, should there be periodic verification or inspection requirements for physical currency used as Reserve Assets?

*Question 74:* The proposed rule would generally require Reserve Assets to be valued at Fair Value for the purpose of determining compliance with the proposed rule's Reserve Asset requirements. Should United States coins and currency be required to be valued at par for purposes of the proposed rule's Reserve Asset requirements?

*Question 75:* Should the proposed rule include special limits on Treasury bonds and notes that may be more thinly traded and therefore more likely to sell at a discount? The GENIUS Act would allow PPSIs to hold as Reserve Assets Treasury notes and bonds so long as they have a maturity of 93 days or less. Older and off-the-run Treasury securities may be more difficult to sell and may only be marketable at a discount.[155] Should the proposed rule limit the portion of Reserve Assets that Treasury bonds and notes can comprise—for example, 20 percent of total Reserve Assets?

*Question 76:* Should the final rule specify the manner in which PPSIs must ''measure and manage'' credit, liquidity, interest rate, price risk, and concentration risk under proposed § 706.202(c)? For example, should the NCUA adopt related record retention or other requirements?

*Question 77:* Should the proposed rule include special measures to ensure that reverse repurchase agreements are appropriately overcollateralized? Proposed § 706.202(b)(5) would permit the inclusion, as Reserve Assets, of reverse repurchase agreements ''subject to overcollateralization in line with standard market terms.'' As one possibility, the proposed rule could include no special measures, and the examination and supervision process could be used to evaluate if particular PPSIs are failing to overcollateralize their reverse repurchase agreements in line with standard market terms. As another possibility, the proposed rule could include more express requirements, for example, that overcollateralization haircuts cannot be less than 0.5 percent.

*Question 78:* Should PPSIs be required to conduct stress tests, including stress tests to manage liquidity and interest rate risks? The GENIUS Act permits the inclusion of bilateral reverse repurchase agreements as Reserve Assets ''with [counterparties] that the issuer has determined to be adequately creditworthy even in the event of severe market stress.'' How should issuers evaluate the impact of ''severe market stress''? Should diversification requirements be based on the outcome of any stress tests? For example, PPSIs could be required to maintain a minimum amount of readily available Reserve Assets (for example, deposits and/or funds in Share Accounts that are payable upon demand and reserve balances) based on the results of liquidity stress tests? In particular, PPSIs could be required to maintain—or could elect to maintain as part of the proposed safe harbor—an amount of readily available Reserve Assets at least sufficient to meet outflow levels predicted by an internal liquidity stress test.

*Question 79:* Should PPSIs be required to adopt written plans or policies and procedures related to liquidity planning? For example, should PPSIs be required to adopt their own concentration restrictions, including limits on deposit and Share Account concentrations at IDIs, that are tailored to their own business model, operations, and risk profile? Similarly, should PPSIs be required to adopt liquidity management plans, which would include provisions to assign responsibility for liquidity risk management and address contingency funding needs?

*Question 80:* Subclause 4(a)(1)(A)(i) of the GENIUS Act provides that reserve assets can include ''money standing to the credit of an account with a Federal Reserve Bank.'' [156] Should diversification requirements include special measures for reserve bank balances if PPSIs are able to maintain them?

*Question 81:* Should the liquidity management standards in proposed part 706 change depending on the standards for timely redemption? For example, should the rule require less stringent liquidity standards (for example, less readily available funds required) if PPSIs have a longer time to redeem tendered Payment Stablecoins?

*Question 82:* Should the proposed rule include additional measures to address de-pegging in the secondary market? For example, should the proposed rule bar a PPSI from issuing new Payment Stablecoins if a PPSI's Payment Stablecoins trade in secondary markets at some price that is a set amount less than par (*e.g.,* trading at or below $0.99, $0.80 or some other amount) for some sustained period of time (*e.g.,* 24 hours)?

*Question 83:* For purposes of incorporating ''average tenor and geographic location of custody of each category of reserve instruments'' in the composition report required under § 706.202(e), what, if any, specific content and structure should the NCUA require? For example, should the report include information about deposit and Share Account concentration and CUSIPs of securities? Should the required content include the composition of the Reserve Assets by type of assets and maturities and by counterparty issuer? For purposes of stating the geographic location of custody, should it suffice to state the country of custody? Or should more granular information be required? Should the NCUA require that the composition report conform to the specified template? Are there specific methods for calculating tenor that the rule should require or explicitly permit?

[155] *See* Dimitri Vayanos & Jiang Wang, ''Market Liquidity—Theory and Empirical Evidence,'' National Bureau of Economic Research Working Paper 18251 (July 2012), *available at https://www.nber.org/system/files/working_papers/w18251/w18251.pdf.*

[156] 12 U.S.C. 5903(a)(1)(A)(i).

For example, should the rule define average tenor as the weighted average maturity or life of the asset? Should the monthly composition report require the issuer to distinguish between insured and uninsured deposits and funds in Share Accounts?

*Question 84:* Are there any additional steps that the NCUA should take to encourage transparency while minimizing burden with respect to the Reserve Asset composition report?

*Question 85:* What modifications to the reporting requirements, including the Reserve Asset composition report, would be appropriate for arrangements where one issuer issues multiple Payment Stablecoins under different brands (*e.g.,* white label arrangements), if that arrangement is permitted in the final rule? Are there any additional disclosures that the issuer should provide in order to ensure that the report is not misleading?

*Question 86:* Should the report be required to list and name any IDIs holding Reserve Assets? Should the report be required to list and name other Eligible Financial Institutions holding Reserve Assets? Should the proposed rule include additional measures to ensure that Reserve Assets are appropriately traceable and linked to their corresponding Payment Stablecoin so as to avoid any difficulties in resolving claims to Reserve Assets?

*Question 87:* For purposes of the composition report and reserves in tokenized form, should the PPSI be required to disclose the location of custody of both the reserve instrument in tokenized form on a ledger and any real-world asset that the reserve in tokenized form represents? What related reporting requirements would be appropriate?

*Question 88:* Should the values and information in the monthly report be required to be as of a particular date or time? Alternatively, should PPSIs publish on their websites a report showing the real-time values of the items required in the monthly composition report? Having the most recent information will make the more report more useful, and the NCUA invites comment on how much real-time reporting is feasible and whether it may only be feasible for certain items. Should the monthly report be required to include both month-end figures (for the previous month) and some information that can be presented in real-time (for example, the value of reserves or Outstanding Issuance Value)? Are there potential challenges in providing assurance over real-time information presented in a monthly report?

*Question 89:* Should the NCUA require PPSIs to publish the monthly certification on their websites, in addition to publishing the monthly Reserve Asset composition report? Should the NCUA specify the content and form of the certification?

*Question 90:* Should the monthly composition report be published at some point before the examination by a Registered Public Accounting Firm? For example, a PPSI could publish the report five days after the end of the previous month and have the report examined 30 days after the end of the previous month and disclose any discrepancies uncovered by the examination. Would the benefits of more timely availability of these reports outweigh the potential costs associated with the risk of subsequent changes as a result of the examination that would be completed at a later date?

*Question 91:* Is the requirement in proposed § 706.202(f) to have information disclosed in the previous month-end report examined by a Registered Public Accounting Firm sufficiently clear? If not, what additional clarity should the NCUA provide with respect to the examination by a Registered Public Accounting Firm? Should the examination be performed at the ''reasonable assurance'' level or at some other standard? What additional standards, if any, should the NCUA apply to ensure that the examination is accurate and appropriate? Should the engagement letter between the PPSI and the Registered Public Accounting Firm require the Registered Public Accounting Firm to attest to whether the PPSI is in compliance with the Reserve Asset requirements in § 706.202 (or a subset thereof), based on the information available to the Registered Public Accounting Firm? What criteria should be used for the examination? Would assurances from the management of the PPSI regarding the information in the issuer's weekly or monthly report be sufficient? If not, what other criteria should be included?

*Question 92:* Should PPSIs be required to monitor the financial condition of Eligible Financial Institutions holding Reserve Assets? Should the financial condition of an Eligible Financial Institution holding an issuer's Reserve Assets be considered in whether issuers have met their deposit and/or funds in Share Account concentration obligations?

*Question 93:* Are there additional considerations that the NCUA should take into account with respect to proposed § 706.202(g)(1), including whether it is appropriate that the PPSI must not issue new Payment Stablecoins until it remediates a shortfall in Reserve Assets? For example, should there be some period of time (*e.g.,* one or two days) where an issuer should be able to issue Payment Stablecoins despite a shortfall? Is the requirement in § 706.202(g)(3) set appropriately at 15 days or should the period be longer or shorter (*e.g.,* 5 days, 10 days, 20 days, 25 days, 30 days)?

*Question 94:* Should the proposed rule include restrictions on expenses that may be charged against Reserve Assets? Is it worth making clear that PPSIs may not charge general corporate expenses against Reserve Assets? While there may be a narrow set of expenses that can be paid from Reserve Assets (for example, interest on a repurchase agreement or fees paid to an investment company holding Reserve Assets), the NCUA expects that paying most other expenses from Reserve Assets would be inconsistent with the requirement for PPSIs to maintain identifiable Reserve Assets backing Outstanding Issuance Value on a 1 to 1 basis and the rehypothecation prohibitions.

3. § 706.203. Redemption

a. Proposed § 706.203

Section 706.203 of the proposed rule addresses redemption requirements imposed by section 4(a)(1)(B) of the GENIUS Act.[157] Consistent with the statute, under proposed § 706.203(a), an NCUA-Licensed PPSI must publicly disclose its current redemption policy.[158] The NCUA proposes that in disclosing its redemption policy, the NCUA-Licensed PPSI must include, at a minimum, certain information. Specifically, proposed § 706.203(a)(1) provides that the NCUA-Licensed PPSI must include a timeframe in which the PPSI will redeem Payment Stablecoins and the timeframe under which the issuer is required to redeem Payment Stablecoins (which, under proposed paragraph § 706.203(b)(1)(i) may not exceed two business days following the date of the requested redemption). In proposed § 706.203(a)(2), the NCUA proposes to require the issuer to include a statement consistent with proposed § 706.203(b)(1)(ii) that any discretionary limitations on timely redemptions can only be imposed by the NCUA. Proposed § 706.203(a)(3) requires that NCUA-Licensed PPSIs include in their redemption disclosures a statement

[157] 12 U.S.C. 5903(a)(1)(B).

[158] Under section 2(22) of the GENIUS Act (12 U.S.C. 5901(22)), the issuer of a Payment Stablecoin must be obligated to convert, redeem, or repurchase a Payment Stablecoin for a fixed amount of Monetary Value, not including a Digital Asset denominated in a fixed amount of Monetary Value.

explaining the scenarios when the redemption period may be extended as provided for in proposed § 706.203(c). Proposed § 706.203(a)(4) provides that the NCUA-Licensed PPSI must provide a statement with clear instructions on how a Payment Stablecoin holder can redeem a Payment Stablecoin, including a link to the website(s) where a Customer can redeem the Payment Stablecoin. Proposed § 706.203(a)(5) would require the issuer to specify the minimum number of Payment Stablecoins, if any, that the NCUA-Licensed PPSI will redeem, provided that the issuer must redeem any number greater than or equal to one Payment Stablecoin, subject to appropriate Customer screening and onboarding. In setting the requirement that an NCUA-Licensed PPSI must redeem any number greater than or equal to one Payment Stablecoin, the NCUA is relying on a natural reading of the definition of ''payment stablecoin.'' Specifically, section 2(22) of the GENIUS Act defines ''payment stablecoin'' as a Digital Asset that an issuer ''is obligated to convert, redeem, or repurchase for a fixed amount of monetary value.'' [159] Since ''payment stablecoin'' is singular, the statutory language suggests that while an issuer could set a minimum redemption threshold at a fraction of a Payment Stablecoin, an issuer must redeem any number greater than or equal to one Payment Stablecoin to comply with the GENIUS Act. Otherwise, the Payment Stablecoin would not be redeemable for a fixed amount of Monetary Value.

Proposed § 706.203(b)(1) provides that an NCUA-Licensed PPSI's redemption policy must provide clear and conspicuous procedures for timely redemption of outstanding Payment Stablecoins. In proposed § 706.203(b)(1)(i), the NCUA is proposing to define ''timely'' to mean that the NCUA-Licensed PPSI would have to redeem a Payment Stablecoin no later than two business days following the date of the requested redemption. The NCUA is proposing this two-business day time frame as an outer limit on when an NCUA-Licensed PPSI must redeem a Payment Stablecoin and understands that many issuers may choose a time frame that is less than two business days. The NCUA believes this time frame provides sufficient responsiveness to Payment Stablecoin holders who seek to redeem their Payment Stablecoins, while also ensuring that PPSIs can appropriately manage liquidity demands. Proposed § 706.203(b)(1)(ii), consistent with the statute, provides that discretionary limitations on timely redemptions can only be imposed by the NCUA.[160]

Proposed § 706.203(c)(1) would provide that the period for timely redemption is extended to seven calendar days if an NCUA-Licensed PPSI faces redemption demands in excess of 10 percent of its Outstanding Issuance Value in a single 24-hour period. The NCUA proposes to use a 24-hour period for this requirement in recognition of the likelihood that there may be significant demands to redeem Payment Stablecoins outside of normal business hours and outside of the hours when many Reserve Assets could be liquidated. As provided for in proposed § 706.203(c)(2), the extended redemption period applies to all redemption requests that are outstanding at the time the 10 percent threshold is met as well as any subsequent redemption requests following the time the threshold is met. Proposed § 706.203(c)(3) clarifies that the extension is non-discretionary and that an NCUA-Licensed PPSI may only redeem any of the outstanding or subsequent redemption requests prior to the seven calendar day period if the NCUA determines that the issuer has the ability to redeem sooner in an orderly fashion and through a fair and transparent process or the NCUA otherwise provides notice to the NCUA-Licensed PPSI that the extended redemption period no longer applies. The NCUA expects that the NCUA-Licensed PPSI seeking to redeem sooner than the seven calendar day period will engage with the NCUA to provide evidence that it can redeem in an orderly fashion and through a fair and transparent process that does not unfairly advantage some Payment Stablecoin holders relative to other Payment Stablecoin holders. Under proposed § 706.203(c)(4), an NCUA-Licensed PPSI that exceeds that 10 percent threshold would be required to provide notice to the NCUA within 24 hours. Using this 24-hour time period will provide appropriate notice to the NCUA and allow an appropriate amount of time to facilitate the orderly liquidation of Reserve Assets. These provisions are intended to facilitate the orderly liquidation of sufficient Reserve Assets in the event of a spike in redemption requests and would help ensure financial stability by lowering the potential price impact of a sudden liquidation of Reserve Assets. Proposed § 706.203(c)(5) provides that the NCUA, may in its discretion, extend timely redemption described in proposed § 706.203(b)(1) or (c)(1), as applicable, if the NCUA determines that the NCUA-Licensed PPSI poses a threat to safety and soundness, financial stability, or such an extension is otherwise in the public interest.

The requirements of this section apply only to the redemption of a Payment Stablecoin by the NCUA-Licensed PPSI (and any entity acting on behalf of the PPSI) and would not apply to secondary market trading. This section is not intended to prevent NCUA-Licensed PPSIs from establishing criteria related to the participants with which PPSIs will interact.

Proposed § 706.203(d)(1) provides that an NCUA-Licensed PPSI must also publicly, clearly, and conspicuously disclose in plain language and in format that is readily noticeable to Customers, readily understandable by Customers, and segregated from other information: (i) the name of the NCUA-Licensed PPSI that issues the Payment Stablecoin; (ii) that the NCUA-Licensed PPSI is the entity that is obligated to convert, redeem, or repurchase the Payment Stablecoin for a fixed amount of Monetary Value; (iii) the link to the monthly composition report of the relevant NCUA-Licensed PPSI's reserves as required under proposed § 706.202(e); and (iv) all fees associated with purchasing or redeeming Payment Stablecoins. The NCUA is including a requirement that the disclosures under proposed § 706.203(d)(1) are readily noticeable by Customers, readily understandable by Customers, and segregated from other information to

[159] 12 U.S.C. 5901(22).

[160] The NCUA notes that section 4(a) of the GENIUS Act (12 U.S.C. 5903(a)) establishes standards for the issuance of Payment Stablecoins applicable to all PPSIs. Section 4(a)(1)(B) requires all PPSIs to publicly disclose their redemption policy. Section 4(a)(1)(B)(i) requires that that redemption policy ''establish clear and conspicuous procedures for timely redemption of outstanding payment stablecoins[.]'' Section 4(a)(1)(B)(i) further provides that ''any discretionary limitations on timely redemptions can only be imposed by a State qualified payment stablecoin regulator, the Corporation, the Comptroller, or the Board, consistent with section 5906 of this title[.]'' The NCUA is not expressly listed in this list of regulators that can impose discretionary limitations on timely redemption. However, based on the structure of section 4, and 4(a)(1) in particular, the NCUA believes that a PPSI subject to the NCUA's jurisdiction must also be subject to any discretionary limitations on timely redemptions imposed by the NCUA. Further, section 5(c)(4) requires the NCUA to evaluate ''whether the redemption policy of the applicant meets the standards under section [4(a)(1)(B)] section 5903(a)(1)(B)'' in granting an NCUA PPSI license to an issuer. Finally, the NCUA also believes the NCUA's authority to impose such discretionary limitations on redemptions is inherently provided for by the NCUA's authority as a primary Federal payment stablecoin regulator of PPSIs that are FICU subsidiaries under section 2(25)(B) of the GENIUS Act (12 U.S.C. 5901(25)(B)) and the NCUA's supervision and enforcement authority over PPSIs that are FICU subsidiaries provided in section 6 of the GENIUS Act (12 U.S.C. 5905).

provide more certainty on what it means to ''publicly, clearly, and conspicuously disclose [the information] in plain language.'' [161] The NCUA is proposing to include the requirement that the disclosures be segregated from other information to ensure that the information in the disclosures is not combined with other non-relevant information that could obscure the importance of these disclosures. Although the NCUA-Licensed PPSI may include additional information beyond what is required in proposed § 706.203(d)(1) in the same disclosure, the information required under proposed § 706.203(d)(1) should be sufficiently separate and must meet the other requirements outlined, including that the information is readily noticeable and readily understandable by Customers. The NCUA believes that the disclosures required under proposed § 706.203(d)(1) are consistent with section 4(a)(1)(B) of the GENIUS Act [162] and are particularly important in the situation where an NCUA-Licensed PPSI issues more than one brand of Payment Stablecoin either directly or through an Affiliate (if the NCUA limits NCUA-Licensed PPSIs to issuing a single brand of Payment Stablecoin). The NCUA believes that these disclosures are necessary to prevent confusion and ensure that Payment Stablecoin holders understand who has the ultimate obligation to redeem their Payment Stablecoin.

Proposed § 706.203(d)(2) provides that an NCUA-Licensed PPSI must update the disclosures in proposed § 706.203(d)(1)(iv) if there are any changes in the fees associated with purchasing or redeeming Payment Stablecoins and provide Customers at least seven calendar days' prior notice of the change, including by securely delivering the notice to current Customers. Proposed § 706.203(d)(3) provides that an NCUA-Licensed PPSI must publish the disclosures in proposed § 706.203(d)(1) and any updates made in accordance with proposed § 706.203(d)(2) on the NCUA-Licensed PPSI's website. Proposed § 706.203(d)(4) provides that an NCUA-Licensed PPSI must include the disclosures in proposed § 706.203(d)(1) and any updates made in accordance with proposed § 706.203(d)(2) in any Customer agreements that it provides.

b. Request for Comment

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 95:* Has the NCUA appropriately defined ''timely'' for purposes of redemption in proposed § 706.203(b)(1)(i) as not exceeding two business days? If not, what may be a more appropriate time frame? For example, should the NCUA consider other time frames ranging from one calendar day to seven calendar days timely? Should the NCUA consider some timeframe longer than seven calendar days timely? Should the NCUA define ''timely'' in a manner that scales with the liquidity of the underlying Reserve Assets or other factors? How should any definition of ''timely'' appropriately balance considerations of price stability and run risk?

*Question 96:* Should the NCUA include a safe harbor for failing to timely redeem a Payment Stablecoin in certain circumstances that may be outside of the PPSI's control (*e.g.,* disruptions to payment or banking systems for which the PPSI is not responsible)?

*Question 97:* Should the NCUA consider a longer redemption period ''timely'' in times of stress? If so, how long should the NCUA extend the redemption period and what metrics and data should the NCUA look to in order to determine whether an extension is warranted? For example, in the proposed rule, if a PPSI faced redemption demands in excess of 10 percent of its Outstanding Issuance Value over one day, the time period for timely redemption is generally extended to seven calendar days. Would other metrics be more appropriate? Should the NCUA automatically extend the time period for timely redemption in the event of a spike in redemption requests? Should the issuer be required to notify the NCUA if it exceeds the threshold for extending the redemption period, as proposed? Should the issuer be required to inform the public upon automatic extension of the time period? Should the extension of the time period to seven calendar days be such that notwithstanding a PPSI being able to demonstrate that it can redeem requests in an orderly fashion and through a fair and transparent process, the PPSI would not be able to redeem sooner than seven calendar days? Should the PPSI be able to make the determination that it can redeem through a fair and transparent process on its own without NCUA approval or should the standard otherwise be changed? Should the extended redemption time period apply to outstanding and subsequent redemption requests as proposed?

*Question 98:* Should the NCUA define ''redemption'' for purposes of the proposed rule? If so, should it be defined broadly to mean that, for example, the PPSI has initiated payment to the Payment Stablecoin holder in return for a tendered Payment Stablecoin? Are there reasons to define ''redemption'' more narrowly? For example, should the NCUA define redemption to mean that the PPSI's payment to a Payment Stablecoin holder in exchange for Payment Stablecoin has settled?

*Question 99:* Are there limitations that the NCUA should impose on redemption fees, *e.g.,* to discourage run risk or to encourage price stability?

*Question 100:* Should the NCUA require PPSIs to deliver notice to current Customers whenever they change fees, as proposed? Are there any specific methods or modes of communication that the NCUA should require? If so, which modes of communication would be most effective and appropriate? Should the notice be waived if the change is a decrease in fees?

*Question 101:* Should the NCUA include specific additional provisions regarding fee disclosures in the regulation text? If so, what additional requirements should be included? Should the NCUA specify how section 5 of the FTC Act relating to unfair or deceptive acts or practices could apply to how the NCUA evaluates the disclosures? [163] To whom should issuers have a responsibility to deliver disclosures regarding changes in fees? Should it be all Payment Stablecoin holders (*e.g.,* include retail holders who purchased from an exchange or secondary market), or should it be a narrower subset of holders (*e.g.,* only holders who purchased directly from the Payment Stablecoin issuer)? Are there obstacles that would make it impractical to deliver change in fee notices to all Payment Stablecoin holders?

*Question 102:* The NCUA has proposed several categories of disclosure in the proposed rule and requested comment as to whether it should propose additional categories. Taken collectively, would these disclosures provide potential Customers of PPSIs with the appropriate information to inform their use of Payment Stablecoins? Are there any steps the NCUA should take to ensure that potential Customers are not confused or overwhelmed by these disclosures, especially in light of the relative unfamiliarity many potential Customers may have with Payment Stablecoins? For example, should the NCUA take any steps to unify required

[161] 12 U.S.C. 5903(a)(1)(B)(ii).

[162] 12 U.S.C. 5903(a)(1)(B).

[163] 15 U.S.C. 45.

disclosures so that they are all provided to Customers at a specific point during the relationship? If so, how should the NCUA ensure that the most pertinent information is sufficiently emphasized? Is there anything else the NCUA should do to ensure that potential Customers are appropriately informed in regard to Payment Stablecoins issued by PPSIs? Are there any technical aspects of Distributed Ledgers or blockchain the NCUA should take advantage of in relation to disclosures? For example, should certain disclosures be automated through smart contracts, such as with wrappers or other techniques?

*Question 103:* Currently, many stablecoin issuers have issuance policies that may limit direct interaction with retail stablecoin holders. What are the potential impacts of these policies on retail stablecoin holders during a liquidity event? Should the NCUA explicitly require PPSIs to redeem Payment Stablecoins presented by any Payment Stablecoin holder that has undergone appropriate on-boarding including Customer screening, as proposed? Should the NCUA require PPSIs to redeem Payment Stablecoins presented by a Payment Stablecoin holder that has an account relationship at a regulated financial institution? Is additional clarity needed as to for whom a PPSI is obligated to redeem a permitted Payment Stablecoin? Should the NCUA impose any additional rules addressing minimum amounts for redemption? For example, should the NCUA prohibit redemption minimums or set the minimum at some point other than one Payment Stablecoin?

4. § 706.204. Risk Management

a. Proposed § 706.204

Section 4(a)(4)(A)(iv) of the GENIUS Act provides that the NCUA must issue regulations implementing appropriate operational, compliance, and information technology risk management principles-based requirements and standards, including Bank Secrecy Act and sanctions compliance standards, that are tailored to the business model and risk profile of NCUA-Licensed PPSIs and are consistent with applicable law.[164] Proposed § 706.204 addresses the requirements and standards required under section 4(a)(4)(A)(iv) of the GENIUS Act. Proposed § 706.204 also addresses interest rate risk management standards under section 4(a)(4)(A)(iii) of the GENIUS Act.[165]

The GENIUS Act requires that the regulation's requirements and standards be ''principles-based.'' Accordingly, the NCUA is proposing flexible standards in § 706.204 that scale based on the nature, scope, and risk of an NCUA-Licensed PPSI's activities. Most of the standards in proposed § 706.204 mirror the standards in the OCC Proposal. The standards in the OCC Proposal are adapted from relevant provisions of 12 CFR part 30, appendices A and B, which in turn implement 12 U.S.C. 1831p–1.[166] The OCC Proposal identified standards from appendices A and B of part 30 that fit the requirements of section 4(a)(4)(A)(iii) or 4(a)(4)(A)(iv) of the GENIUS Act and then, consistent with the statute, adapted and tailored those standards to the business models of PPSIs, as appropriate. The OCC Proposal also noted that the OCC issued a joint statement, together with the Federal Reserve and FDIC, on Risk Management Considerations for Crypto-Asset Safekeeping,[167] and that the standards in the OCC Proposal are consistent with the considerations described in the joint statement.[168] As noted throughout this preamble, the NCUA believes it is important to, where possible, provide consistent standards across the various primary Federal payment stablecoin regulators. The NCUA agrees with the approach taken in the OCC Proposal and feels that it appropriately implements the requirements and standards required under sections 4(a)(4)(A)(iii) and (iv) of the GENIUS Act.[169] As discussed more thoroughly below, the NCUA is proposing to largely mirror the OCC's approach.

Proposed § 706.204(a)(1) requires that an NCUA-Licensed PPSI have internal controls and information systems that are appropriate for the size and complexity of the PPSI and the nature, scope, and risk of its activities and that provide for: (i) an organizational structure with appropriate segregation of duties and an internal control structure that establishes clear lines of authority and responsibility for monitoring adherence to established policies; (ii) effective risk assessment; (iii) timely and accurate financial, operational, and regulatory reporting, including with respect to reports required under proposed part 706; (iv) adequate procedures to safeguard, manage, control, and monetize assets, including Reserve Assets; and (v) compliance with applicable laws and regulations. Internal controls refer to the systems, policies, procedures, and processes effected by the board of directors and other personnel to safeguard PPSI assets, limit or control risks, achieve PPSI objectives, and ensure compliance with applicable laws and regulations. Effective internal controls help the board of directors and management safeguard the NCUA-Licensed PPSI's resources and comply with laws and regulations, as well as reduce the possibility of significant errors and irregularities, and assist in their timely detection when errors and irregularities do occur. Internal controls must also include an effective risk assessment since a PPSI cannot effectively manage its risks without an understanding of its risk profile. The internal controls standards in proposed § 706.204(a)(1) align with those proposed in the OCC Proposal, which are modeled on the internal controls standards in 12 CFR part 30, with some adjustments to accommodate the particular activities and risks of PPSIs. For example, the procedures to safeguard, manage, control, and monetize assets will be expected to include measures to monitor and ensure the deposit and funds in Share Account concentration and diversification requirements are met on a daily basis.[170] Likewise, procedures will be expected to address potential vulnerabilities related to fraud and the theft of Payment Stablecoins or other assets.

The NCUA proposes that § 706.204(a)(2) requires NCUA-Licensed PPSIs have an internal audit system that is appropriate to the size and complexity of the PPSI and the nature, scope, and risk of its activities and that the audit system provides for (i) adequate monitoring of the system of internal controls through an internal audit function, or for an NCUA-Licensed PPSI whose size, complexity or scope of operations does not warrant a full scale internal audit function, a

[164] 12 U.S.C. 5903(a)(4)(A)(iv).

[165] 12 U.S.C. 5903(a)(4)(A)(iii).

[166] The standards listed in 12 U.S.C. 1831p–1 provide a useful reference point for standards that may be applicable to PPSIs. However, 12 U.S.C. 1831p–1 is not a source of authority for issuing these risk management requirements.

[167] *See* OCC, ''Agencies Issue Joint Statement on Risk-Management Considerations For Crypto-Asset Safekeeping'' (July 14, 2025), *available at https://www.occ.gov/news-issuances/news-releases/2025/nr-ia-2025-68.html.*

[168] Consistent with the recommendations in the Digital Financial Technology Report, the NCUA intends to continue to work to provide additional clarity with respect to Digital Asset activities undertaken by NCUA-supervised entities.

[169] 12 U.S.C. 5903(a)(4)(A)(iii)–(iv).

[170] In spring 2023, interest rate increases contributed to the failure of Silicon Valley Bank, which in turn caused the value of one stablecoin, USDC, to fall below $1 in the secondary market when it became evident that much of USDC's reserves were held at Silicon Valley Bank. This event illustrates the potential knock-on effects of changes in interest rates and the importance of continuous monitoring for Payment Stablecoins, particularly if acute stress creates situations where issuers are unable to access reserve assets.

system of independent reviews of key internal controls; (ii) independence and objectivity; (iii) qualified Persons responsible for the audit function; (iv) adequate independent testing and review of internal controls and information systems, verification of published information available to Customers, calculations for required reserves, and regulatory filings; (v) adequate documentation of tests and findings and any corrective actions; (vi) verification and review of management actions to address deficiencies; and (vii) review by the institution's audit committee or board of directors of the effectiveness of the internal audit system. Internal audit systems provide objective, independent reviews of PPSI activities, internal controls, and information systems to help the board of directors and management monitor and evaluate internal control adequacy and effectiveness. An internal audit system, among other items, is expected to independently test and review systems, as appropriate, related to (1) an NCUA-Licensed PPSI's compliance with the GENIUS Act and requirements in any final rules implementing the GENIUS Act; (2) payment systems; and (3) third-party risk management. Well-planned, properly structured audit programs are essential to effective risk management and internal control systems. Effective internal audit programs are a critical defense against fraud and provide vital information to the board of directors about the effectiveness of internal controls systems. An internal audit program's responsibilities include evaluating compliance systems, safeguards around use of payment systems, and risks posed by relationships with and dependence on third parties. While it is important that internal audit functions be conducted by qualified Persons with an appropriate level of independence from other business lines, the proposed rule would not mandate a particular organizational structure (for example, three lines of defense). Proposed § 706.204(a)(2) would not prescribe a one-size-fits-all approach to risk management. Smaller NCUA-Licensed PPSIs with a lower risk profile may be able to comply using a simpler, less delineated, organizational structure, or may be able to outsource certain functions such as the internal audit function, while larger NCUA-Licensed PPSIs, with higher risk-profiles, may require organizational structures with more clearly delineated risk management functions, including internal audit personnel.

Proposed § 706.204(a)(3) addresses interest rate risk and would require an NCUA-Licensed PPSI to (i) manage interest rate risk in a manner that is appropriate to the size and complexity of the PPSI and the complexity of its assets and liabilities and (ii) provide for periodic reporting to management and the board of directors regarding interest rate risk with adequate information for management and the board of directors to assess the level of risk. While PPSIs will hold Reserve Assets that may, depending on their type, have limited or no duration (*e.g.,* in the case of deposits and funds in Share Accounts that are payable upon demand), it is still important for NCUA-Licensed PPSIs to be mindful of this risk, particularly in light of the role of interest rate risk in the failures of previous money market funds, whose investments, like those of PPSIs, were supposed to be limited to short-duration safe assets.[171] Increases in interest rates, particularly in short time periods, can reduce the value of interest-sensitive Reserve Assets, potentially impacting their marketability and liquidity as well as their Fair Value. Similarly, changes in interest rates can affect the earnings of PPSIs since their earnings may rely in substantial part on interest earned on Reserve Assets. Likewise, increases in interest rates may reduce the demand for Payment Stablecoins, particularly since PPSIs are prohibited from paying interest to Payment Stablecoin holders solely in connection with the holding, use, or retention of Payment Stablecoins under proposed § 706.201(c)(4). The GENIUS Act explicitly authorizes interest rate risk management standards under section 4(a)(4)(A)(iii) [172] whereas section 4(a)(4)(A)(iv) [173] authorizes the other requirements and standards proposed in § 706.204. The NCUA proposes that interest rate risk management standards be included under proposed § 706.204 since it is a risk management standard like the other standards already included in proposed § 706.204.

[171] Mismanagement of interest rate risk was a leading cause of failure in two of the three money market funds in the United States in which the net asset value of the fund fell below $1 (also referred to as ''breaking the buck''), ultimately leading to liquidation. *See* In the Matter of John E. Backlund, et al., Investment Company Act Release No. 23639 (January 11, 1999) (SEC administrative order involving the Community Bankers U.S. Government Money Market Fund liquidated in 1994); In the Matter of First Multifund Advisory Corp. and Milton Mound, Initial Decision, File No. 3–5881 (December 29, 1982) (SEC initial decision involving the First Multifund for Daily Income liquidated in 1978).

[172] 12 U.S.C. 5903(a)(4)(A)(iii).

[173] 12 U.S.C. 5903(a)(4)(A)(iv).

The NCUA proposes that § 706.204(a)(4) require an NCUA-Licensed PPSI's asset growth to be prudent and commensurate with an NCUA-Licensed PPSI's risk management capabilities, operational capacity, and staffing. While there are no hard limits to how quickly NCUA-Licensed PPSIs may grow, NCUA-Licensed PPSIs must ensure that growth does not undercut the issuer's capabilities to comply with the requirements of this rule and other applicable law. For example, rapid issuance of new Payment Stablecoins would require rapid increase in reserves, and NCUA-Licensed PPSIs must ensure that they maintain the capabilities to maintain these reserves in compliance with proposed § 706.202 and maintain the ability to access and monetize the reserves in order to meet redemption requests.

The NCUA proposes that § 706.204(a)(5) requires that an NCUA-Licensed PPSI establish and maintain a risk management system that is commensurate with the PPSI's size and complexity and the nature and scope of its operations to evaluate and monitor earnings and ensure that earnings are sufficient to support operations and maintain the capital levels that would be required under subpart D of proposed part 706. To reflect the distinct characteristics of PPSIs as compared to other types of entities, the proposed standards on earnings in proposed § 706.204(a)(5) do not include all the listed elements in paragraph II.H in appendix A to 12 CFR part 30, from which the earnings standard in the OCC's Proposal (proposed § 15.13(a)(5)) and this proposal (proposed § 706.204(a)(5)) were adapted. Nevertheless, under this proposed rule, NCUA-Licensed PPSIs would be expected to comply with the overarching requirement to evaluate and monitor earnings. It may be particularly important for PPSIs to evaluate the volatility and sustainability of earnings, since changes in short-term interest rates could have sudden impacts on PPSI earnings.

Proposed § 706.204(a)(6) addresses Insider and Affiliate transactions and is intended to protect an NCUA-Licensed PPSI from entering into detrimental transactions with Insiders or Affiliates. Under proposed paragraph (a)(6)(i), an NCUA-Licensed PPSI would be required to ensure that transactions between the PPSI and Insiders or Affiliates: (1) are not excessive and do not pose significant risks of material financial loss; (2) are conducted on terms that are the same or at least as favorable to the PPSI as those prevailing at the time for

comparable transactions with or involving non-Insiders or non-Affiliates (or in the absence of comparable transactions, are offered on terms and under circumstances that, in good faith would be offered to, or would apply to non-Affiliates or non-Insiders); and (3) are appropriately documented and reviewed by the board of directors. Proposed paragraph (a)(6)(ii) would require an NCUA-Licensed PPSI to appropriately monitor and validate compliance with these requirements.

Proposed § 706.204(a)(7) would provide requirements for overseeing third-party service provider arrangements. Specifically, an NCUA-Licensed PPSI must (i) exercise appropriate due diligence in selecting its service providers; (ii) require its service providers by contract to implement appropriate measures designed to meet the requirements of part 706; and (iii) as appropriate, monitor its service providers to confirm they have satisfied their obligations under proposed part 706. As part of this monitoring, NCUA-Licensed PPSIs should review audits, summaries of test results, or other equivalent evaluations of its service providers.

Proposed § 706.204(a)(8) would require an NCUA-Licensed PPSI to (i) appropriately monitor and validate compliance with the requirements of § 706.202 and (ii) manage liquidity and concentration risk in a manner that is appropriate to the business model and risk profile of the PPSI.

Proposed § 706.204(b)(1) provides that an NCUA-Licensed PPSI must implement a comprehensive written information security risk and control framework, including a program that assesses and manages information technology and information security risks.

Under proposed § 706.204(b)(2), the board of directors of the NCUA-Licensed PPSI, or an appropriate board committee, must approve the information technology and security program. The board must oversee the development, implementation, and maintenance of the program, including the appointment of a qualified Information Technology and Security Officer. The oversight required of the board or committee includes assigning specific responsibility for program implementation and review of program-related reports.

Under proposed § 706.204(b)(3), an NCUA-Licensed PPSI's information technology and security program must include (i) an inventory and classification of assets, processes, and sensitivity of data; (ii) controls supporting and safeguarding sensitive information and processes; (iii) evaluation, validation, and reporting processes to ensure that key information technology systems and controls, including smart contracts, are operating as intended; (iv) periodic independent testing; and (v) a comprehensive and effective incident identification and assessment process and incident response program.

Under proposed § 706.204(b)(4), an NCUA-Licensed PPSI's information technology and security program must include administrative, technical, and physical safeguards designed to (i) ensure the security and confidentiality of records containing Nonpublic Personal Information about a Customer; (ii) protect against any anticipated threats or hazards to the security or integrity of such records; (iii) protect against unauthorized access to or use of such records that could result in substantial harm or inconvenience to any Customer; and (iv) ensure the proper disposal of such records.

Proposed § 706.204(b)(5) provides that an NCUA-Licensed PPSI must develop, implement, and maintain appropriate measures to ensure secure handling of Digital Assets, including Private Key management, backup, and recovery incorporating: (i) relevant technical, operational, strategic, market, legal, and compliance considerations relating to each Digital Asset and its underlying Distributed Ledger; and (ii) material developments specifically related to supported Digital Assets and their underlying Distributed Ledgers.[174]

Proposed § 706.204(b)(6) would require that an NCUA-Licensed PPSI monitor, evaluate, and adjust, as appropriate the information technology and security program in light of any relevant changes in technology, the sensitivity of its Customer information, internal or external threats, and the PPSI's own changing business arrangements, such as mergers and acquisitions, alliances and joint ventures, third-party arrangements, and changes to applicable information systems.

Proposed § 706.204(b)(7) would provide that an NCUA-Licensed PPSI must conduct a reasonable investigation when it becomes aware of an incident of unauthorized access to sensitive Customer information, including a Customer's Private Key, to determine the likelihood that the information has been or will be misused. The requirements in proposed § 706.204(b)(7) mirror those in the OCC Proposal (proposed § 15.13(b)(7)), which are similar to the OCC's supplement A to appendix B to part 30[175] and the guidance for FICUs, currently located in NCUA's appendix B to part 748.[176] If the NCUA-Licensed PPSI determines that misuse of Customer information has occurred or is reasonably possible, the PPSI must notify the Customer or Customers affected or possibly affected as well as the NCUA as soon as possible. Customer notice must be delayed if an appropriate law enforcement agency determines that notification will interfere with a criminal investigation and provides the NCUA-Licensed PPSI with a written request for the delay. If delayed by investigation, the NCUA-Licensed PPSI must notify its Customers of the misuse or possible misuse of Customer information as soon as law enforcement notifies the PPSI that notification will no longer interfere with the investigation. Proposed § 706.204(b)(7)(ii) recognizes that there may be situations where the NCUA-Licensed PPSI determines that a group of files has been accessed improperly but is unable to identify which specific Customers' information has been accessed. If the circumstances of the unauthorized access lead the NCUA-Licensed PPSI to determine that misuse of the information is reasonably possible, it must notify all Customers in the group.

Proposed § 706.204(b)(8) would provide that an NCUA-Licensed PPSI's information technology and security program must include measures to ensure continuity of operations and recover critical functions in the face of disruptions, including by business impact analyses, testing of vulnerabilities, and testing with critical service providers. Recent corporate information technology system failures have demonstrated the importance of measures to maintain operational resilience. NCUA-Licensed PPSIs should ensure that they have sufficient controls to reliably address operational issues that may arise with burning and minting new Payment Stablecoins and should conduct appropriate due

[174] If an NCUA-Licensed PPSI holds Digital Assets on a Customer's behalf, the PPSI's risk management practices must reflect this activity. Consistent with the July 14, 2025 Joint Statement on Risk-Management Considerations for Crypto-Asset Safekeeping issued by the FDIC, Federal Reserve, and OCC, an NCUA-Licensed PPSI holding Digital Assets on a Customer's behalf would be required to maintain risk management practices, and information security practices in particular, that reflect the PPSI's capacity to understand a complex and evolving asset class, ability to ensure a strong control environment, and appropriate contingency plans to address unanticipated challenges in effectively providing services to Customers.

[175] 12 CFR part 30, Appendix B.

[176] 12 CFR part 748, Appendix B.

diligence before supporting any new Distributed Ledger. Operational resilience will be particularly important for PPSIs, who will depend on Customer confidence in the stable value and availability of their Payment Stablecoins.

Proposed paragraph § 706.204(c) would implement the GENIUS Act's requirement for the NCUA to issue regulations implementing appropriate Bank Secrecy Act and sanctions compliance standards by providing that, in order to ensure compliance with Bank Secrecy Act and sanctions compliance requirements, each NCUA-Licensed PPSI must comply with the Bank Secrecy Act, sections 4(a)(5) and 4(a)(6) of the GENIUS Act,[177] and applicable regulations at 31 CFR Chapter V and 31 CFR Chapter X, including any AML/CFT program, sanctions program, and reporting requirements. The Department of Treasury's Financial Crimes Enforcement Network (FinCEN) and the Office of Foreign Assets Control (OFAC) recently issued a separate proposed rule that would implement the GENIUS Act's directive to treat PPSIs as financial institutions under the Bank Secrecy Act, as well as imposing several unique obligations required by the GENIUS Act.[178] The FinCEN and OFAC proposed rule would also implement the GENIUS Act's directive to require PPSIs to maintain effective sanctions compliance programs. In the interests of reducing burden and promoting consistent requirements, the proposed rule would not contain additional requirements beyond those contained in these proposed rules at this time. Instead, compliance with regulations at 31 CFR Chapter V and 31 CFR Chapter X would constitute compliance with proposed paragraph § 706.204(c). Proposed § 706.204(c) would also specifically reference subpart E of this part, which would provide the NCUA's supervision and enforcement policy for AML/CFT program requirements for NCUA-Licensed PPSIs.

b. Request for Comment

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 104:* How should the NCUA ensure that the standards in proposed § 706.204 are ''principles-based'' while providing sufficient clarity to PPSIs? Should the requirements in proposed § 706.204 be more high level or more detailed?

*Question 105:* Should certain of the risk management requirements only apply to large PPSIs? If so, which requirements should only apply to large PPSIs, and what would be the appropriate threshold for determining that a PPSI is a large issuer (*e.g.,* $10 billion in Outstanding Issuance Value)?

*Question 106:* Which standards from 12 U.S.C. 1831p–1 and 12 CFR part 30 appendices A and B should or should not apply to PPSIs? Are there other standards not in 12 U.S.C. 1831p–1 and 12 CFR part 30 appendices A and B that should apply PPSIs? Commenters are directed to these sources even though they do not apply to FICUs because they serve as a basis for the OCC Proposal.

*Question 107:* Do the proposed risk management requirements appropriately provide for clear management roles, responsibilities, and accountability? If not, how should the proposed risk management requirements be revised?

*Question 108:* Should PPSIs be required to adopt and adhere to a risk appetite statement?

*Question 109:* Should PPSIs be required to regularly (*e.g.,* on at least an annual basis), review their risk management framework and make any changes to appropriately align risk management activities with their business objectives and strategies?

*Question 110:* Should the proposed rule's requirements with respect to interest rate risk management be modified? If so, how? For example, should PPSIs have in place the appropriate policies, procedures and internal controls for their interest rate risk management programs? Should PPSIs develop appropriate measurement of interest rate risk as part of their interest rate risk management programs? Should PPSIs establish risk appetite and limit structure as part of interest rate risk management programs? Should PPSIs incorporate stress testing as part of their interest risk management programs? Should PPSIs be allowed to use assets that do not qualify as Reserve Assets as part of an interest rate risk hedging program? If so, should there be restrictions on the types of instruments used for hedging purpose? Additionally, should the maturities of the hedging instruments be matched with the maturities of the qualified Reserve Assets?

*Question 111:* What types of credit risk may PPSIs face, and how should PPSIs manage these risks? Should the proposed rule include specific requirements or standards related to management of credit risk? If so, what specific requirements or standards should the NCUA consider including?

*Question 112:* Are the risk management requirements in proposed § 706.204(a)(8) necessary in light of the requirements in proposed § 706.202?

*Question 113:* Are there areas that fall under the categories of technological, operational, compliance, or other risk management principles-based requirements and standards that should be included in § 706.204 but were omitted from the proposed rule? Should proposed § 706.204(b) expressly address risks relating to smart contracts, encryption, tokenized assets, or any other technology or procedure? Are there standards which were included but are not applicable to PPSIs? The proposed rule would require the appointment of a qualified Information Technology and Security Officer. Should the rule also require the appointment of a qualified Chief Risk Officer and Chief Audit Executive? The NCUA is considering all possible combinations of the standards in proposed § 706.204 and invites comments on which combination of standards is appropriate as well as whether to remove any of the individual standards in proposed § 706.204.

*Question 114:* Should the NCUA consider operational risk management principles-based requirements and standards to address the situation where an issuer needs to transfer Payment Stablecoins across different blockchains to satisfy a redemption demand? If so, what kind of requirements and standards should the NCUA consider to address this situation? For example, should there be specific requirements relating to locking, minting, or burning Payment Stablecoins to facilitate a transfer?

*Question 115:* Should the NCUA include consumer protection-related compliance risk management principles-based requirements and standards in § 706.204? If so, are there specific standards the NCUA should institute?

*Question 116:* Are there additional requirements concerning data privacy that would be appropriate for the NCUA to include in proposed part 706? Please describe in detail any such standards.

*Question 117:* Are there particular measures necessary to manage compensation-related concerns at PPSIs, notably risks associated with compensating any party with Payment Stablecoins issued by a PPSI?

*Question 118:* Should the NCUA include additional requirements concerning PPSIs' management of their ability to satisfy redemption requests and to monetize Reserve Assets, including by analyzing reasonably anticipated redemption scenarios?

*Question 119:* Should the NCUA include additional requirements relating

[177] 12 U.S.C. 5903(a)(5) and (6).

[178] 91 FR 18582 (Apr. 10, 2026).

to the maintenance of safeguards to prevent the payment of compensation, fees, and benefits that are excessive or that could lead to material financial loss to the PPSI?

*Question 120:* Are the proposed requirements with respect to Insider and Affiliate transactions appropriately tailored? If not, how should they be modified? Should the NCUA consider more prescriptive quantitative or qualitative requirements related to Insider and Affiliate transactions?

*Question 121:* Should the NCUA include any requirements relating to the concentration of management at unaffiliated PPSIs? For example, should the NCUA include limits on the number of unaffiliated PPSIs for which an individual may serve as an Officer or senior management official? Should any such limits be tied to the Outstanding Issuance Value of the PPSI?

*Question 122:* Should the NCUA require PPSIs to acquire insurance against certain risks? For example, should PPSIs be required to hold cyber insurance policies? If so, what should be the minimum coverage requirements? Should the NCUA require some minimum level of property and casualty insurance? If so, what should the minimum level of coverage be? What disclosures, if any, would it be appropriate for a PPSI to make with respect to its insurance coverage and to whom should those disclosures be directed (*e.g.,* investors or Payment Stablecoin holders)? What implications with respect to other applicable disclosure regimes should the NCUA consider when deciding whether to impose any disclosure requirements with respect to insurance coverage? To what extent are the terms and conditions for property and casualty (or other types of) insurance coverage for PPSIs becoming more standardized? What steps, if any, should the NCUA take to encourage standardization to increase certainty and consistency with respect to insurance coverage across jurisdictions?

5. § 706.205. Audits, Reports, and Supervision

a. Examinations

Section 6(a)(1) of the GENIUS Act authorizes primary Federal payment stablecoin regulators, including the NCUA, to supervise PPSIs, as defined in the statute.[179] Section 6(a)(3) of the GENIUS Act authorizes the NCUA to examine PPSIs to assess the nature of their operations and the financial condition of the PPSI; the financial, operational, technological, compliance, and other risks associated within the PPSI that may pose a threat to the safety and soundness of the PPSI or the stability of the financial system of the United States; and the systems of the PPSI for monitoring and controlling the risks.[180] Pursuant to section 6(a)(4)(C) of the GENIUS Act, the NCUA may only request examinations at a cadence and in a format that is similar to that required for similarly situated entities regulated by the NCUA.[181]

NCUA's current examination program for FCUs requires a 12-month examination unless certain criteria are met.[182] FCUs can qualify for an examination every 14 to 24 months based on capital levels, asset size, supervisory ratings, and status of any enforcement actions.[183] The NCUA is proposing to apply this same examination framework to its examination authority over PPSIs. Proposed § 706.205(a) provides that the NCUA will conduct a full-scope examination of every PPSI subject to its supervision at least once during each 12-month period, unless otherwise specified in proposed § 706.205(d). A full-scope examination refers to the comprehensive review of a PPSI's financial condition, risk management practices, compliance with laws and regulations, and overall safety and soundness.

Proposed § 706.205(d) would provide the NCUA with the option to examine some PPSIs on a 14- to 24-month cycle, as determined by the NCUA in its sole discretion, if the issuers satisfy the following conditions: (1) the PPSI currently is not subject to a formal enforcement proceeding or order; (2) no Person became a Parent Company or acquired Control, as specified in §§ 706.111 and 706.205(m), of the PPSI during the preceding 12-month period in which a full-scope examination would have been required but for proposed § 706.205(d); (3) the PPSI has an Outstanding Issuance Value of less than $1 billion or less than $25 billion in total monthly Trading Volume; and (4) the PPSI is in compliance with all of the reserve requirements set forth in proposed § 706.202 and the reporting requirements in proposed § 706.205.

Consistent with the NCUA's statutory authority under the GENIUS Act and the NCUA's supervisory authority over FICUs, proposed § 706.205(e) allows the NCUA to conduct examinations of PPSIs as frequently as the agency deems necessary, including examinations of a limited scope. The NCUA has proposed this provision to ensure the agency has clear authority to conduct ad hoc examinations when emergencies or risks to the safety and soundness of a PPSI or the FICU investors require the agency to deviate from its routine examination cycle.

Proposed § 706.205(b) requires that, upon request, PPSIs must grant NCUA examiners prompt and complete access to all Officers, Directors, employees, agents, and relevant books, records, or documents of any type. The NCUA, through its examination authority over FICUs,[184] and the examination authority the GENIUS Act provides it over PPSIs that are FICU subsidiaries,[185] has authority to access the Officers, agents, and books and records of these institutions. The books and records of a PPSI include, but are not limited to, information retained on Distributed Ledgers. Additionally, proposed § 706.205(c) clarifies that the NCUA may conduct examinations either on site, remotely, or in some combination. Proposed § 706.205(f) provides that all PPSIs must maintain a complete set of books and records in English and in compliance with GAAP. Proposed § 706.205(g) requires all PPSIs to develop and implement a records retention policy that ensures the PPSI can demonstrate compliance with the GENIUS Act, this part, and all applicable laws and regulations.

b. Reports

Section 6(a)(2) of the GENIUS Act requires that each PPSI shall, upon request, submit to the appropriate Federal payment stablecoin regulator a report on: the financial condition of the PPSI; the systems of the PPSI for monitoring and controlling financial and operating risks; compliance by the PPSI (and any subsidiary thereof) with the GENIUS Act; and the compliance of the Federal qualified nonbank payment stablecoin issuer with the Bank Secrecy Act and with laws authorizing the imposition of sanctions and implemented by the Secretary of the Treasury.[186]

Section 6(a)(4) of the GENIUS Act requires the NCUA to take certain actions to promote efficiency in the supervision and examination of PPSIs. The NCUA, in supervising and examining PPSIs, to the fullest extent

[186] 12 U.S.C. 5905(a)(2).

possible, must use existing supervisory reports and other supervisory information and avoid duplication of examination activities, reporting requirements, and requests for information.[187] Proposed § 706.205(j) implements section 6(a)(2) of the GENIUS Act by requiring each PPSI subject to the requirements of section 6(a)(1) of the Act to, upon request, submit to the NCUA a report on: (1) the financial condition of the PPSI; (2) the systems of the PPSI for monitoring and controlling financial and operating risks; (3) compliance by the PPSI (and any subsidiary thereof) with the GENIUS Act and proposed part 706; and (4) compliance of the PPSI with the Bank Secrecy Act and with laws authorizing the imposition of sanctions and implemented by the Secretary of the Treasury. In an effort to clarify the GENIUS Act's requirements, the NCUA has proposed in § 706.205(j)(4) expanding the requirement that Federal qualified nonbank payment stablecoin issuers produce reports of compliance with the requirements of the Bank Secrecy Act and with laws authorizing the imposition of sanctions and implemented by the Secretary of the Treasury to all PPSIs.[188]

In addition to the regulations codifying the reporting requirements in section 6(a)(2) of the GENIUS Act,[189] pursuant to its supervisory authority in section 6(a)(1) of the GENIUS Act,[190] the NCUA is proposing in § 706.205(h) to require PPSIs to submit certain information on a weekly basis, in the manner and form specified by the NCUA to assist in ongoing supervision of the PPSI. At a high level, the NCUA is requesting a PPSI provide information regarding the issuance and redemption, Trading Volume, and Reserve Assets for each Payment Stablecoins it issues. The report would include information relating to the blockchains the Payment Stablecoin is listed on, Outstanding Issuance Value, secondary market activity and price movement, redemption volume and times, detailed information regarding Reserve Assets, and other relevant information. NCUA will provide more information about the specific information requested on a web page that will be available from NCUA's homepage at *www.ncua.gov.* The NCUA believes that requiring a PPSI to provide a confidential set of data on a weekly basis for each Payment Stablecoin it issues will allow the NCUA to understand the PPSI's operations and the risks unique to its business model. This regular data reporting will allow the NCUA to tailor its examinations to be risk-based, which will reduce the burden of examinations by focusing the scope of examinations. Further, the NCUA believes that this regular reporting framework will allow the NCUA to identify and respond more quickly to emerging novel and financial stability risks. The NCUA also believes the information request is currently tracked on a regular basis by stablecoin issuers.

The NCUA is proposing in § 706.205(i) a separate provision that requires PPSIs to submit quarterly reports of financial condition to the NCUA, including, but not limited to income statement, expenses, balance sheet, reserves, changes in equity, investments, capital, Outstanding Issuance Value, and assets under custody, in a standardized format as prescribed by the NCUA within 30 days of the end of the prior quarter. This provision is similar to the quarterly statements of financial condition that FICUs provide through their quarterly Call Report and Profile. The NCUA proposes this provision to ensure that PPSIs provide consistent, standardized statements of financial condition to the NCUA and will include additional information beyond the composition report required under § 706.202(e) and different information than what would be requested in the confidential weekly reporting required under proposed § 706.205(h). Receiving standardized data on a quarterly basis will enhance the NCUA's ability to supervise PPSIs and provide another source of information that can be used to tailor examinations and identify emerging risks.

The information required to be reported under this section will be streamlined substantially relative to the Call Reports filed by FICUs. Standardizing these reporting requirements will enhance the NCUA's ability to supervise PPSIs and provide clarity as to the information a PPSI must report. Similar to FICU financial data, the NCUA intends to publish the information provided in the quarterly report to ensure transparency and provide the public with an understanding of a PPSI's financial condition on an ongoing basis. The NCUA also proposes to require that each quarterly report of financial condition includes a declaration from the PPSI's Chief Financial Officer, or the individual performing an equivalent function, that the report is true and correct to the best of their knowledge and belief. The correctness of the quarterly report of condition shall also be attested to by the signatures of the Directors and senior management of the PPSI other than the Officer making such declaration, with the attestation stating that the report has been examined by them and to the best of their knowledge and belief is true and correct. The NCUA proposes requiring these declarations and attestations to ensure that PPSI's Officers and Directors are accountable for the accuracy of the PPSI's reports of financial condition, similar to existing standards for FICUs.

Proposed § 706.205(k) implements section 5(i) of the GENIUS Act .[191] Consistent with the statute, under the proposed rule, not later than 180 days after the approval of an application under proposed subpart A, and on an annual basis thereafter, a PPSI must submit to the NCUA a certification that the PPSI has implemented anti-money laundering and economic sanctions compliance programs that are reasonably designed to prevent the PPSI from facilitating money laundering, in particular, facilitating money laundering for cartels and organizations designated as foreign terrorist organizations under section 219 of the Immigration and Nationality Act (8 U.S.C. 1189) and the financing of terrorist activities, consistent with the requirements of the GENIUS Act.

c. Audits

Section 4(a)(10) of the GENIUS Act requires that a PPSI with more than $50 billion in consolidated total Outstanding Issuance Value that is not subject to certain reporting requirements under Federal securities laws prepare an annual financial statement.[192] Section 4(a)(10) further provides that a Registered Public Accounting Firm must perform an audit of the annual financial statement. The audited annual financial statement must be made publicly available on the PPSI's website and be

[187] 12 U.S.C. 5905(a)(4).

[188] The NCUA notes that section 6(a)(2) of the GENIUS Act (12 U.S.C. 5905(a)(2)) requires all PPSIs to provide the subsequent list of reports in section 6(a)(2)(A) through (D) to the NCUA upon request, whereas section 6(a)(2)(D) refers to the compliance of ''the Federal qualified nonbank payment stablecoin issuer with the requirements of the Bank Secrecy Act.'' Based on the structure of section 6(a)(2), the NCUA believes all PPSIs must, upon request, produce each of the listed reports and that the NCUA could request the report required in section 6(a)(2)(D) from a PPSI. Additionally, section 6(a)(1) of the GENIUS Act (12 U.S.C. 5905(a)(1)) gives the NCUA supervisory authority over all PPSIs that are FICU subsidiaries, which provides the NCUA with further authority to request the report in section 6(a)(2)(D).

[189] 12 U.S.C. 5905(a)(2). With regards to reporting by a PPSI as to its assets under custody, section 10(d) of the GENIUS Act (12 U.S.C. 5909(d)) provides an additional statutory grant of authority.

[190] 12 U.S.C. 5905(a)(1).

[191] 12 U.S.C. 5904(i).

[192] 12 U.S.C. 5903(a)(10).

submitted annually to the primary Federal payment stablecoin regulator.

Proposed § 706.205(l) implements the requirements of section 4(a)(10) of the GENIUS Act. Under the proposed rule, each PPSI with more than $50 billion in Outstanding Issuance Value that is not subject to the reporting requirements under section 13(a) or 15(d) of the Securities and Exchange Act of 1934 [193] must prepare, in accordance with GAAP, an annual financial statement that must include the disclosure of any related party transactions, as defined by GAAP. Proposed § 706.205(l)(1) requires that a Registered Public Accounting Firm must conduct an audit of the financial statements in accordance with all applicable auditing standards established by the Public Company Accounting Oversight Board. Section 4(a)(10)(A)(iii) of the GENIUS Act describes ''applicable auditing standards'' [194] as those that would apply if the PPSI were subject to the reporting requirements under section 13(a) or 15(d) of the Securities and Exchange Act of 1934.[195] The standards would be enforced by the NCUA for PPSIs subject to the audit requirement under section 4(a)(10)(A)(iii) of the GENIUS Act.[196] Consistent with this framework, the NCUA may at any time request that a Registered Public Accounting Firm provide to the NCUA certain additional information or documents relating to information provided by the PPSI. The Registered Public Accounting Firm must agree to provide copies of any working papers, policies, and procedures relating to services in connection with the audit required under section 4(a)(10)(A)(iii) of the GENIUS Act.[197]

Proposed § 706.205(l)(2) requires the PPSI to: (1) make the audited financial statement publicly available on its website, and (2) submit the audited financial statement annually to the NCUA, in accordance with the GENIUS Act. Under proposed § 706.205(l)(2)(ii), a PPSI would be required to submit to the NCUA annually, within 120 days of the end of its fiscal year, an audited financial statement. If a PPSI is unable to timely file all or any portion of its financial statements, proposed § 706.205(l)(2)(iii) would require the PPSI to submit a written notice of late filing to the NCUA that would: (A) disclose the PPSI's inability to file all, or specified portions, of its annual financial statement and the reasons therefore in reasonable detail; (B) include the date by which the financial statement will be filed; and (C) be filed on or before the deadline for filing the financial statement.

d. Changes in Control

Proposed § 706.205(m) would address changes in Control of an NCUA-Licensed PPSI. Proposed § 706.205(m) would require a Person seeking to acquire Control, as those terms are defined in this part, of a PPSI to follow the requirements of proposed 12 CFR 706.111 in Subpart A as if the Person were a FICU seeking to become a new Parent Company of an NCUA-Licensed PPSI. Thus, consistent with § 706.111, a Person seeking to acquire Control would need to provide 60 days' prior notice to the NCUA. The NCUA could inform the filer that the acquisition has been disapproved, has not been disapproved, or that the review period has been extended.

The NCUA is considering including additional provisions detailing the consequences of failing to follow the procedures under § 706.111 both for new potential FICU Parent Companies and Persons acquiring Control of an NCUA-Licensed PPSI. For example, the NCUA is considering including language stating that, if a Person acquires Control of an NCUA-Licensed PPSI without following the requirements of § 706.111 before the time for the NCUA's review as provided in § 706.111 has expired or after the NCUA has disapproved the acquisition of control, the PPSI: (i) must, within 15 calendar days of the acquisition of Control, provide all information required under § 706.111; and (ii) may be subject to supervisory or enforcement actions relating to any concerns arising from the change in Control, consistent with applicable law. The NCUA welcomes any comments related to proposed § 706.205(m) as well as the additional language the NCUA is considering including in proposed § 706.205(m).

The NCUA proposes requiring this notice to facilitate the NCUA's ongoing examination and supervision of NCUA-Licensed PPSIs. Requiring notice of changes in Control will assist the NCUA in carrying out its mandate to examine PPSIs and is consistent with the NCUA's authority to supervise, request reports, and conduct examinations pursuant to section 6(a) of the GENIUS Act.[198] In addition, requiring notice regarding changes in Control will help the NCUA monitor for and address evasion of the requirements of the GENIUS Act. For example, there may be instances where changes in Control implicate the risk management requirements of the GENIUS Act, Bank Secrecy Act/Anti-Money Laundering (BSA/AML) or sanctions evasion. Similarly, section 5(c) of the GENIUS Act includes requirements designed to prevent an individual that has been convicted of a felony offense involving insider trading, embezzlement, cybercrime, money laundering, financing of terrorism, or financial fraud from serving as an Officer or Director for an applicant.[199] The same section of the GENIUS Act includes provisions addressing the competence, experience, integrity of the Officers, Directors, and Principal Shareholders of the applicant. Absent a requirement to submit a notice regarding a change in Control, an applicant could become licensed with a set of Officers, Directors, and Principal Shareholders that do not raise concerns under section 5(c) of the GENIUS Act and then transfer Control to Persons that do implicate concerns under section 5(c) of the Act or that otherwise raise concerns regarding the ability of the PPSI to comply with the Act and its implementing regulations.[200]

e. Use of Existing Reports and Avoidance of Duplication

Section 6(a)(4) of the GENIUS Act requires the NCUA to take certain actions to promote efficiency in the supervision and examination of PPSIs.[201] The NCUA, in supervising and examining PPSIs, to the fullest extent possible, must use existing supervisory reports and other supervisory information and avoid duplication of examination activities, reporting requirements, and requests for information. Proposed § 706.205(n) and (o) implement the requirements of section 6(a)(4)(A) and (B) of the GENIUS Act by mirroring the statutory requirements and stating that, as a part of its supervision and examination of PPSIs, the NCUA, to the fullest extent possible, will use existing supervisory reports and other supervisory information and avoid duplication of examination activities, reporting requirements, and requests for information.[202] The NCUA will follow this approach, including in developing and issuing related examination policies and processes. The NCUA believes this is the optimal approach because it will allow the NCUA to quickly adapt its supervisory and examination policies to maximize both efficiency and burden

[193] 15 U.S.C. 78m(a) or 78o(d).

[194] 12 U.S.C. 5903(a)(10)(A)(iii).

[195] 15 U.S.C. 78m or 78o(d).

[196] 12 U.S.C. 5903(a)(10)(A)(iii).

[197] 12 U.S.C. 5903(a)(10)(A)(iii).

[198] 12 U.S.C. 5905(a).

[199] 12 U.S.C. 5904(c).

[200] 12 U.S.C. 5904(c).

[201] 12 U.S.C. 5905(a)(4).

[202] 12 U.S.C. 5905(a)(4)(A)–(B).

reduction. This approach is also consistent with the approach that the NCUA takes for other entities under its jurisdiction.

Proposed § 706.205(o) would generally state that the NCUA will, to the fullest extent possible, avoid duplication of examination activities, reporting requirements, and requests for information. The Board understands that FICUs may seek to invest in PPSIs that meet the PPSI definition because they are a subsidiary of a non-FICU IDI, are a Federal qualified payment stablecoin issuer, or a State qualified payment stablecoin issuer. The Board is also aware that these investments may create ambiguity regarding designation of the primary Federal payment stablecoin regulator and requests comment on how such institutions should be treated for purposes of licensing, regulation, supervision, examination, and enforcement. The NCUA and the other primary Federal payment stablecoin regulators may address such potential interjurisdictional issues in the future.

f. Request for Comment

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 123:* Should the NCUA alter the proposed reporting or examination requirements? If so, how? Is there additional information that should be included in the required reports or information that is not included in the proposed rule? Is there information included in the required reports or information that should not be included in the rule?

*Question 124:* Proposed § 706.205(d) sets forth criteria under which a PPSI could qualify for an extended examination cycle. Are those criteria properly calibrated? Is the timeframe for an extended examination cycle appropriate? Should the NCUA consider decreasing or increasing the range for an extended examination cycle? Should the NCUA consider both monthly Trading Volume and Outstanding Issuance Value when determining whether to employ an extended examination cycle? Should the NCUA consider increasing or decreasing the Outstanding Issuance Value and total monthly Trading Volume limits for eligibility for an extended examination cycle? Are there other factors that should be included, such as redemption rates, asset composition, or creditworthiness? If so, how should the NCUA consider those factors?

*Question 125:* In proposed § 706.205(h), the NCUA proposes to collect confidential weekly data from PPSIs to minimize the examination burden on PPSIs. The weekly data would include information relating to: (1) Outstanding Issuance Value, (2) Reserve Assets, (3) redemptions, (4) minting and issuance, (5) exchanges on which the Payment Stablecoin trades, (6) the 100 Persons that hold or trade the Payment Stablecoin the most, (7) data concerning securities held as Reserve Assets (including information regarding Reserve Assets' CUSIPs, yield, weighted average maturity and weighted average life), and (8) information regarding repurchase agreements and reverse repurchase agreements (including information regarding the counterparty, clearing agency, collateral, and interest). Are these the appropriate data fields and categories of information to collect from a PPSI on a weekly basis to understand the operations and risks unique to its business model? If not, are there data fields that the NCUA should not request on a weekly basis and are there any additional data fields beyond those proposed that the NCUA should collect on a weekly basis from a PPSI to better assist in understanding the operations and risks unique to its business model? Should the NCUA collect secondary market transaction data (*e.g.,* trading price and volume)? Or should the NCUA only collect primary market transaction data? Would it be too burdensome for PPSIs to provide the proposed weekly data to the NCUA electronically on a daily or real-time basis? Should the NCUA collect additional data regarding the custody of Reserve Assets (or other Covered Assets)? Should the data collected be made public? If, so, on what timeframe should the data be made public? To what extent, if any, would a PPSI be anticipated to track the information required under the form referred to in proposed § 706.205(h) on a regular or real-time basis for its own use in the absence of a requirement to report it? To what extent would the proposed weekly and quarterly reporting requirements tend to reduce the frequency at which the NCUA would need to examine PPSIs? Are there other reporting requirements that the NCUA could request that might reduce the frequency at which the NCUA would need to examine PPSIs?

*Question 126:* In proposed § 706.205(i), the NCUA requires all PPSIs to submit a quarterly report of financial condition. Should the NCUA tailor this requirement for PPSIs under a certain threshold? If so, what should the threshold be? For PPSIs under the threshold, should the NCUA require less frequent reporting (*e.g.,* every six months) and/or change the data issuers under the threshold are required to submit (*e.g.,* require less data)? Should FICU Parent Companies be required to submit the quarterly report required under proposed § 706.205(i)? If so, why? If not, why not? Should the quarterly report under proposed § 706.205(i) be attached to the Call Report as an appendix as opposed to a separate filing? If so, why? If not, why not? Are there changes that should be made to the Call Report to ensure appropriate reporting while limiting duplicative reporting requirements? Should reports required under proposed § 706.205(i) and proposed part 706 more generally be coordinated and developed on an interagency basis across the primary Federal payment stablecoin regulators? Should any financial information included in the filings be required to be reviewed by a Registered Public Accounting Firm. If so, why? If not, why not?

*Question 127:* In addition to requiring a monthly report of a PPSI's Reserve Asset composition, should the NCUA also require a PPSI to publish a report of the Reserve Asset composition as of a day randomly selected each month by the PPSI's Registered Public Accounting Firm?

*Question 128:* How can the NCUA best minimize duplication of reports, including for PPSIs subject to the audit requirement contained in proposed § 706.205(l)? Should the NCUA include in the rule text its interpretation of ''applicable auditing standards'' under section 4(a)(10)(A)(iii) of the GENIUS Act [203] to mean those that would apply if the PPSI were subject to the reporting requirements under section 13(a) or 15(d) of the Securities and Exchange Act of 1934? [204] Should the NCUA also include in the rule text that the standards would be enforced by the NCUA for PPSIs subject to the audit requirement under section 4(a)(10)(A)(iii) of the GENIUS Act? [205] Should the NCUA also include in the rule text that it may at any time request that a Registered Public Accounting Firm provide to the NCUA certain additional information or documents relating to information provided by the PPSI and that the Registered Public Accounting Firm must agree to provide copies of any working papers, policies, and procedures relating to services in connection with the audit required under section 4(a)(10)(A)(iii) of the GENIUS Act? [206]

[203] 12 U.S.C. 5903(a)(10)(A)(iii).

[204] 15 U.S.C. 78m, 78o(d).

[205] 12 U.S.C. 5903(a)(10)(A)(iii).

[206] *Id.*

*Question 129:* The NCUA is proposing that PPSIs report to the NCUA the total aggregate value of their assets under custody (as part of the quarterly report described in § 706.205(i) of the proposal). For purposes of this calculation, the NCUA is proposing that the Private Keys used to issue Payment Stablecoins, as discussed in section 10 of the GENIUS Act, should be valued at a nominal $1.00 valuation. This reporting convention would prevent double counting of the Private Key and the associated Payment Stablecoin reserves. What are the advantages and disadvantages of this approach? Are there specific risks or information gaps related to the custody of these Private Keys that would not be identified by this reporting convention, including for example, where the Covered Custodian of the Private Key used to issue Payment Stablecoins is not also the custodian of all of the associate Payment Stablecoin reserves? Are there alternative methods to avoid double-counting? For example, what are the advantages and disadvantages of valuing the Private Key used to issue a Payment Stablecoin at the par-value of issuance of the associated Payment Stablecoin less the fair market value of any associated Payment Stablecoin reserves that the Covered Custodian holds under custody?

*Question 130:* Is the change in Control requirement in proposed § 706.205(m) and § 706.111 appropriately calibrated for PPSIs? If not, what changes should the NCUA incorporate into this provision? Should the regulation explicitly provide the consequences for failing to meet the requirements of proposed § 706.205(m) and § 706.111? For example, should the NCUA include a paragraph that would provide that, if a Person acquires Control of a PPSI without following the requirements of § 706.205(m) and § 706.111 before the time for the NCUA's review as provided in § 706.111 has expired or after the NCUA has disapproved the acquisition of Control, the PPSI: (i) must, within 15 calendar days of the acquisition of Control, provide all information required under § 706.111; and (ii) may be subject to supervisory or enforcement actions relating to any concerns arising from the change in Control, consistent with applicable law?

*Question 131:* What approach should the NCUA and other PPSI regulators take to licensing, examining, and regulating PPSIs that may be considered subsidiaries of multiple types of Insured Depository Institutions or a subsidiary of one or more types of Insured Depository Institutions and also a Federal qualified payment stablecoin issuer? Specifically, should PPSIs be required to obtain multiple licenses in some instances? If multiple licenses are required, should NCUA provide a process for expedited licensure of a PPSI or rather than require multiple licenses, rely on the licensure of another Primary Federal payment stablecoin regulator, if the PPSI has already been licensed or approved by another regulator? Should proposed § 706.205(o) expressly provide for avoidance of duplication of examination activities, reporting requirements, and requests for information to address the prospect of a PPSI having an ownership structure that subjects the issuer to the jurisdiction of both the NCUA and another primary Federal payment stablecoin regulator? If so, what should be the scope of NCUA examination, reporting, and supervision? If it is not appropriate to address the prospect of a PPSI having an ownership structure that subjects the issuer to the jurisdiction of both the NCUA and another primary Federal payment stablecoin regulator, why is it not appropriate? Should such ownership structures be addressed through separate guidance or agreements? Should such ownership structures be impermissible? Or are they unlikely to occur in practice?

### *E. Subpart C—Custody*

Section 10 of the GENIUS Act imposes requirements on any Person seeking to provide custodial or safekeeping services for Payment Stablecoin reserves, Payment Stablecoins used as collateral, or the Private Keys used to issue Payment Stablecoins.[207] Among other things, section 10 of the GENIUS Act requires such Persons to be subject to supervision or regulation by a Federal or State supervisor, to treat covered assets as Customer property, to separately account for and not commingle covered assets unless permitted under a listed exception, and to provide their supervisor with certain regulatory information as determined by that supervisor. Section 10 also provides claims of Payment Stablecoin holders priority over other claims on Persons providing custody and exempts certain Persons providing hardware or software services from the requirements of section 10.

The proposal would (1) establish relevant defined terms for purposes of subpart C to clarify the scope of custodial services to which subpart C would apply; (2) set minimum principles-based requirements for NCUA-supervised institutions related to their provision of custodial or safekeeping services to the assets described in Section 10 of the GENIUS Act that are appropriate to protect such custodied assets from the claims of creditors of the institution; and (3) implement other requirements and exclusions of the GENIUS Act.

#### 1. § 706.301. Definitions

The NCUA is proposing to define the assets for which the provision of custodial or safekeeping services trigger the requirements of the GENIUS Act as ''Covered Assets.'' This term would include the assets described in section 10(a) of the GENIUS Act that compose the Payment Stablecoin reserves (discussed above), any Payment Stablecoin used as collateral, and the Private Keys used to issue Payment Stablecoins.[208]

The NCUA is also proposing to include in the definition of Covered Assets any cash or other property of a PPSI, as defined in the GENIUS Act, received by the custodian in the course of provision of custodial or safekeeping services contemplated under the GENIUS Act. Sections 10(b) and (c) of the GENIUS Act each apply the GENIUS Act's custodial requirements not only to the custody of Payment Stablecoin reserves, Payment Stablecoins used as collateral, and the Private Keys used to issue Payment Stablecoins but also to ''cash[ ] and other property'' of a custody Customer of one of those assets.[209]

''Cash [ ] and other property,'' as used in section 10 of the GENIUS Act, appears to refer to cash and other property that a Covered Custodian (defined and discussed below) may receive as custodial property of its Customers, but only to the extent such cash or other property is received in connection with the provision of custodial services for Payment Stablecoin reserves, Payment Stablecoins used as collateral, and the Private Keys used to issue Payment Stablecoins. For example, any interest on Payment Stablecoin Reserve Assets held in custody in a deposit account or Share Account and credited to a Customer's (*i.e.,* a PPSI) custodial account would be the type of cash and other property subject to the custody requirements of the GENIUS Act.

Thus, under the proposed rule, ''Covered Assets'' would mean Payment Stablecoin reserves, Payment Stablecoins used as collateral, and Private Keys used to issue Payment Stablecoins, as well as cash and other

[207] 12 U.S.C. 5909.

[208] 12 U.S.C. 5909(a).

[209] 12 U.S.C. 5909(b)–(c).

property received in the course of the provision of custodial or safekeeping services for such assets.

Separately, the NCUA is proposing to define the entities to which the proposed custody requirements would apply as ''Covered Custodians.'' This term would mean a FICU or NCUA-Licensed PPSI to the extent of such Person's provision of custodial or safekeeping services to Covered Customers (as such term is described below) for Covered Assets.

The NCUA is proposing to define the custodial Customers to which the GENIUS Act's protections apply as ''Covered Customers.'' This term would mean a Person for or on whose behalf a Covered Custodian receives, acquires, or holds Covered Assets.

The NCUA is also proposing to define certain other concepts relative to Covered Asset custodial activities. The proposal would define ''Applicable Law'' for purposes of subpart C as the law of a State or other jurisdiction governing a Covered Custodian's custody relationships, any applicable Federal law governing those relationships, the terms of the Custody Agreement, and any applicable court order. The proposal would define ''Custody Agreement'' as a legally binding contractual agreement between a Covered Customer, as the principal, and the custodian, as the agent, that establishes the custodian's duties and responsibilities in providing safekeeping and ancillary services to the Covered Customer. The proposal would define ''Digital Wallet'' as a software program or hardware device that stores and manages the Private Keys associated with a particular unit of a Digital Asset. The proposal would define ''Sub-Custodian'' as a Person that provides custody and safekeeping services to a Covered Custodian, including through a Digital Wallet for which such Person controls the associated Private Keys, with respect to the Covered Assets of a Covered Customer for which the Covered Custodian otherwise serves as a custodian under this subpart.[210]

2. § 706.302. Covered Asset Custodial Property Requirements

Proposed § 706.302 would implement certain minimum principles-based requirements applicable to a Covered Custodian's provision of custodial and safekeeping services for Covered Assets to ensure that such Covered Assets are treated and dealt with as belonging to the Covered Customers and protected from claims of the Covered Custodian's creditors, as well as the creditors of any Sub-Custodian, as applicable, or the claims of any Customer's creditors. Under proposed § 706.302(a), a Covered Custodian must separately account for the Covered Assets of each Covered Customer and must treat and deal with those Covered Assets as belonging to such Covered Customer and not as the property of the Covered Custodian. Under proposed § 706.302(b), a Covered Custodian must take appropriate steps to protect the Covered Assets of Covered Customers from the claims of creditors of the Covered Custodian and any Sub-Custodian, as applicable, including through adopting, implementing, and maintaining written policies, procedures, and internal controls that are adequate to comply with Applicable Law and that are commensurate with the Covered Custodian's size, complexity, and risk profile and with the nature of the applicable Covered Assets for which it provides custodial or safekeeping services.

The NCUA believes that setting certain minimum principles-based requirements for the provision of these custody services, regardless of the use of omnibus accounts, is consistent with section 10(b)(2) of the GENIUS Act,[211] which requires that applicable custodians ''take such steps as are appropriate to protect the [Covered Assets] of a customer from the claims of creditors of the [custodian]'' and section 13 of the GENIUS Act,[212] which grants the NCUA broad rulemaking authority to implement the GENIUS Act. In considering minimum, principles-based requirements, the NCUA is proposing to require Covered Custodians to take such steps that would typically be expected of a supervised institution as part of sound custodial practices necessary to protect custodied assets from claims of the custodian's creditors.[213]

The NCUA is also proposing in § 706.302(b) to require that a Covered Custodian maintain possession or control of Covered Assets of a Covered Customer that are held directly, including in a Digital Wallet for which the Covered Custodian controls the associated Private Keys. Under the proposal, a Covered Custodian may maintain the Covered Assets of a Covered Customer through the use of a Sub-Custodian if consistent with Applicable Law, provided the Covered Custodian maintains adequate safeguards and internal controls reasonably designed to provide the Covered Custodian with oversight of such Sub-Custodian's compliance with the requirements of this proposed subpart C. Under the proposal, with regards to any Payment Stablecoin or Payment Stablecoin reserve in the form of a tokenized asset held in safekeeping under proposed subpart C, a Covered Custodian, or Sub-Custodian, as applicable, maintains control for purposes of the proposed requirement if it can reasonably demonstrate, consistent with the standard of care established by Applicable Law, that no other party, including the Covered Customer, can transfer the Payment Stablecoin or tokenized asset using a Distributed Ledger without the consent of the custodian or Sub-Custodian, as applicable. This requirement is consistent with past guidance from the other banking agencies on the control of crypto-assets for purposes of safekeeping.[214]

The NCUA intends these principles-based, minimum requirements to be in line with sound custodial management practices that the agency understands are industry standard. An FCU that is a Covered Custodian may not act in a fiduciary capacity. FISCUs' ability to act in a fiduciary capacity will depend upon State law.

The NCUA proposes codifying in proposed § 706.302(c) the exception in section 10(c) of the GENIUS Act to the customer property requirements described in section 10(b).[215] This exception permits a Covered Custodian to withdraw and apply such share of the Covered Assets of a Covered Customer necessary to transfer, adjust, or settle a transaction or transfer of assets applicable to that Covered Customer, including the payment of commissions, taxes, storage, and other charges lawfully accruing in connection with the provision of services to that Covered Customer by the Covered Custodian. The NCUA proposes to specify that any such withdrawal must be consistent with any Applicable Law. For example, the NCUA would expect any such withdrawal to be undertaken only in

[210] A sub-custodian would be subject to the requirements applicable to a custodian under the GENIUS Act, including the requirements under section 10 of the Act (12 U.S.C. 5909).

[211] 12 U.S.C. 5909(b)(2).

[212] 12 U.S.C. 5913.

[213] To the extent that a Covered Custodian, as an accommodation to a Covered Customer, documents in an account statement or other similar document any additional assets of that Customer for which the Covered Custodian does not provide custodial or safekeeping services, including through use of a Sub-Custodian of the Covered Custodian (commonly referred to as ''accommodation assets'' or ''below the line assets''), the NCUA would not expect such assets to be subject to the requirements of subpart C.

[214] *See* OCC, ''Agencies Issue Joint Statement on Risk-Management Considerations For Crypto-Asset Safekeeping,'' (Jul. 14, 2025), *available at https://www.occ.gov/news-issuances/news-releases/2025/nr-ia-2025-68.html*.

[215] 12 U.S.C. 5909(c).

compliance with the terms of a Covered Customer's written Custody Agreement and that any withdrawal of funds from an omnibus account would be properly recorded as to not implicate the custodial assets of any other Covered Customer.

Finally, proposed § 706.302(d) would clarify, consistent with section 10(c)(2)(D) of the GENIUS Act,[216] that a FICU that provides custodial or safekeeping services for Covered Assets may hold Covered Assets that are in the form of cash on deposit (including funds deposited in Share Accounts), provided such treatment is consistent with Federal law.

3. § 706.303. Use of Omnibus Accounts

Proposed § 706.303(a) would implement the GENIUS Act's requirement in section 10(c) of the Act that a Covered Custodian segregate all Covered Assets of Covered Customers and not commingle them with the assets of the Covered Custodian.[217] As discussed above, the proposal clarifies that this requirement does not apply in the case of a FICU that provides custodial or safekeeping services for covered assets that are in the form of cash to the extent the FICU holds such cash in the form of cash on deposit (including funds deposited in Share Accounts), provided such treatment is consistent with Federal law.

Proposed § 706.303(b) sets the terms by which Covered Custodians may use omnibus accounts consistent with the GENIUS Act's requirements to separately account for, treat as, and deal with custodied Covered Assets as belonging to Covered Customers. The NCUA is proposing to allow any Covered Custodian to commingle the Covered Assets of multiple Covered Customers in one or more omnibus accounts, to the extent that the steps it has taken pursuant to proposed § 706.302(b) are adequate to maintain safe and sound practices for the use of omnibus accounts, and to the extent that the use of omnibus accounts is consistent with Applicable Law.

4. Reporting

The NCUA is considering how to implement any additional reporting requirements in subpart C pursuant to section 10(d) of the GENIUS Act, which requires that a Covered Custodian submit to the NCUA certain information ''in such form and manner as [the NCUA] shall determine.'' [218] For Covered Custodians that are FICUs, the NCUA plans to issue updates to the NCUA Form 5300, Call Report, or NCUA Form 4501A, Profile, to collect information on FICUs' custodial businesses.[219] For Covered Custodians that are NCUA-Licensed PPSIs, the NCUA proposes to rely on such entities' reporting pursuant to section 6(a)(2) of the GENIUS Act's reporting requirements [220] as part of the PPSIs' quarterly report on financial condition discussed in proposed § 706.205.[221] The NCUA seeks comment on whether this is the most efficient and effective way to collect such information concerning a Covered Custodian's business operations as well as their processes to protect Customer assets.[222]

Nonetheless, requiring Covered Custodian-specific reporting outside of the context of a Call Report may be appropriate. Specifically, the NCUA is considering requiring Covered Custodians to report on a separate form maintained by the NCUA the following information: (1) total Covered Assets under custody, and (2) total Payment Stablecoin reserves under custody. For Payment Stablecoin reserves under custody, the NCUA is further considering requiring Covered Custodians to report the following: (a) total Payment Stablecoin reserves under custody for (i) an Affiliate and (ii) third parties; (b) total Payment Stablecoin reserves held in a deposit account or Share Account at (i) the Covered Custodian and (ii) a third-party IDI; (c) total Payment Stablecoin reserves held in a deposit account or Share Account that are not covered by FDIC or NCUA insurance at (i) the Covered Custodian and (ii) a third party IDI; and (d) total Payment Stablecoin reserves held in each of the categories listed in section 4(a)(1)(A)(i)–(viii) of the GENIUS Act.[223]

5. § 706.304. Self-Custody Hardware and Software Exclusion

The proposal implements section 10(e) of the GENIUS Act, which provides that the requirements of section 10 of the Act do not apply to any Person solely on the basis that such Person engages in the business of providing hardware or software to facilitate a Customer's own custody or safekeeping of the Customer's Payment Stablecoins or Private Keys.[224] In proposed § 706.304, the NCUA proposes to clarify that the requirements of this proposed subpart C do not apply to any FICU or NCUA-Licensed PPSI solely on the basis that such entity engages in the business of providing hardware or software to facilitate a Person's or entity's self-custody of their Payment Stablecoins or Private Keys. The requirements could nonetheless apply if, for example, an entity controls or holds itself out as controlling such Payment Stablecoins or Private Keys, or provides, or holds itself out as providing safekeeping or custodial services, including services that are ancillary or incidental to its custodial powers, for such Payment Stablecoins or Private Keys.

6. Request for Comment

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 132:* Are the proposed definitions for terms relevant to this section appropriate and sufficiently clear? Would it be helpful to define any other terms?

*Question 133:* The NCUA has interpreted ''cash and other property'' to refer to the cash and other property that a Covered Custodian may receive as custodial property of its Customers, but only to the extent such cash or other property is received in connection with the provision of custodial services for the GENIUS Act's three core custody assets. Is this the appropriate approach? Should the NCUA take a broader view of what constitutes ''cash and other property''? What are the costs and benefits of such an approach? Does the proposal appropriately address the different requirements for noncash Covered Assets and ''cash on deposit'' Covered Assets held at an IDI?

*Question 134:* The NCUA is proposing to define Covered Assets in such a way that the requirements of sections 10(a), (b), and (c) of the GENIUS Act would

[216] 12 U.S.C. 5909(c)(2)(D).

[217] 12 U.S.C. 5909(c).

[218] 12 U.S.C. 5909(d).

[219] Sections 106 and 202 of the Federal Credit Union Act require federally insured credit unions (FICUs) to make financial and other reports to the NCUA. Section 741.5 describes the submission method FICUs must use to provide information to NCUA. NCUA Form 5300, Call Report, is used to file quarterly financial and statistical data through NCUA's online portal, CUOnline. NCUA Form 4501A, Profile, is used to collect non-financial information on credit union operations through NCUA's online portal, CUOnline.

[220] 12 U.S.C. 5905(a)(2).

[221] As noted above, section 10(d) of the GENIUS Act (12 U.S.C. 5909(d)) provides an additional statutory grant of authority for this reporting requirement.

[222] Consistent with the OCC Proposal, the NCUA believes that reporting the Private Key used to issue a Payment Stablecoin held in custody at a $1.00 book value would be consistent with industry practice unless the methodology for determining market value is otherwise set by applicable law. *See, e.g.,* OCC, Letter from Kerri Corn, Director for Credit and Market Risk (June 20, 2007), *available at https://www.occ.treas.gov/topics/supervision-and-examination/capital-markets/asset-management/corporate-trust/memo-misc-schedule-rc-t.pdf* (letter to the American Bankers Association regarding owner trustee fiduciary accounts reported on Schedule RC–T).

[223] 12 U.S.C. 5903(a)(1)(A)(i)–(viii).

[224] 12 U.S.C. 5909(e).

apply to all Covered Assets and is proposing to apply the substantive requirements of those sections as a connected set of requirements.[225] However, sections 10(a), (b), and (c) of the Act use slightly different wording when describing the assets to which each subsection applies and some of the substantive requirements that apply.[226] The NCUA believes that the provisions should be read together to cover the same set of assets and to provide a cogent and harmonized set of requirements for Covered Custodians.[227] Instead of the proposed approach, should the NCUA use the precise statutory language regarding the scope of assets covered separately in paragraphs (a), (b), and (c)? What are the advantages or disadvantages of doing so?

*Question 135:* Proposed subpart C would implement section 10 of the GENIUS Act with respect to entities that are regulated by the NCUA.[228] Are there issues that the NCUA should bear in mind if an NCUA-regulated entity holds reserve assets on behalf of a PPSI that is not regulated by the NCUA and may not be familiar with the NCUA's implementation of section 10 of the GENIUS Act?

*Question 136:* The NCUA is proposing applying these principles-based requirements on Covered Custodians subject to NCUA supervision, rather than requiring NCUA-supervised institutions that seek to custody a Covered Asset to only custody such assets with a custodian that can demonstrate it complies with certain minimum requirements. What are the costs and benefits of this approach, including with regards to administrability, jurisdiction, and the promotion of fair competition?

*Question 137:* The NCUA proposes principles-based requirements in line with sound custodial management practices that the agency understands are industry standard. Does the proposal accurately capture sound custodial management practices that are industry standard?

*Question 138:* Does the proposal provide enough detail regarding what steps are appropriate for a Covered Custodian to protect the Covered Assets of Covered Customers from the claims of creditors of the Covered Custodian? Would more prescriptive or specific requirements be appropriate to implement the requirements of the GENIUS Act? For example, should the NCUA require a Covered Custodian to take appropriate steps to protect the Covered Assets of Covered Customers from the claims of creditors of the Covered Custodian, including through adopting, implementing, and maintaining written policies, procedures, and internal controls adequate for (A) the safekeeping of Covered Assets of Covered Customers; (B) the documentation of Covered Customer relationships through one or more written Custody Agreements; (C) recording and verifying the Covered Assets of Covered Customers; and (D) the conducting of due diligence in the selection of and periodic monitoring of Sub-Custodians, in each case commensurate with the Covered Custodian's size, complexity, and risk profile and with the nature of the applicable Covered Assets in its Covered Customer relationships? What are the costs and benefits of prescriptive versus a principles-based approach?

*Question 139:* Is it sufficiently clear in a custodial relationship when and for what assets the minimum, principles-based requirements of subpart C would apply? For example, are there circumstances where a custodian may be unaware that Payment Stablecoin assets held in an account are being used as collateral and potentially subject to the requirements of subpart C?

*Question 140:* The proposed rule describes how a custodian maintains control of a Payment Stablecoin or tokenized Payment Stablecoin Reserve Assets. Is this description appropriately calibrated? Are there other means by which a custodian should be deemed to have demonstrated control over these types of assets?

*Question 141:* Are there additional considerations the NCUA should take into account regarding a Covered Custodian's use of an omnibus account? For example, should the NCUA consider a high-level principals-based approach to apply generally to a Covered Custodian's provision of custodial or safekeeping services to Covered Customers for Covered Assets while utilizing a more detailed regulatory framework regarding a Covered Custodian's use of omnibus accounts?

*Question 142:* Regarding the proposed rule governing the withdrawal of custodial Covered Assets to pay certain commissions, taxes, storage, and other charges, should the NCUA require any more prescriptive Customer protection requirements, such as those designed to ensure that such withdrawals do not cause any reserve to fall below any minimum coverage of a Payment Stablecoin? What are the costs and benefits of these or any similar approach? For example, in order to implement an effective compliance system, would such a requirement impose undue burdens on a custodian from withdrawing any permitted funds from a custodial account that contains Payment Stablecoin reserves?

*Question 143:* Section 10(c)(3) of the GENIUS Act provides a priority regime regarding the claims of Covered Customers against a Covered Custodian with regards to any Payment Stablecoins used as collateral. The section also allows Covered Customers to expressly waive this priority. What are the potential benefits and drawbacks of such a priority regime, including with regards to whether it may amplify losses to Payment Stablecoin issuers on Payment Stablecoin reserves that are custodied by a Covered Custodian that provides a diversified custodial business should there be a shortfall in a Covered Custodian's custodied assets? What market practices do commenters believe are likely to arise regarding the use of the contractual provisions that waive a Covered Customer's priority regarding Payment Stablecoins used as collateral that are held in custody? To what extent should the NCUA consider either providing guidance on the use of such contractual provisions or requiring Covered Custodians to use such contractual provisions in their Custody Agreements? How are Customer waivers in relation to Covered Custodians likely to impact the resolution of PPSIs? For example, would they lead to additional complications in determining the priority of claims?

*Question 144:* The GENIUS Act provides an exclusion from the custodial requirements to any Person solely on the basis that such Person engages in the business of providing hardware or software to facilitate a Customer's own custody or safekeeping of the Customer's Payment Stablecoins or Private Keys. The NCUA proposes to clarify that it would not consider certain activities to constitute ''solely'' providing hardware or software to facilitate custody or safekeeping of Payment Stablecoins or Private Keys. Should the NCUA consider implementing any other language to prevent the exception from being used to evade the custodial requirements of

[225] 12 U.S.C. 5909(a)–(c).

[226] For example, Section 10(a) of the Act refers to ''the payment stablecoin reserve, the payment stablecoins used as collateral, or the private keys.'' 12 U.S.C. 5909(a). Section 10(b) refers to ''the payment stablecoins, private keys, cash, and other property.'' 12 U.S.C. 5909(b). Section 10(c) refers to ''[p]ayment stablecoin reserves, payment stablecoins, cash, and other property.'' 12 U.S.C. 5909(c).

[227] For example, sections 10(b) and (c) of the Act refer to section 10(a), suggesting that the provisions are meant to be read together to cover the same set of assets.

[228] 12 U.S.C. 5909.

the GENIUS Act? Alternatively, could an NCUA-supervised institution provide ancillary custodial services to a user of such hardware or software (*e.g.,* facilitating the Customer's crypto-asset and fiat currency exchange transactions, transaction settlement, trade execution, recordkeeping, valuation, tax services, reporting, or other appropriate services) while avoiding the minimum, principles-based requirements of the proposal?

*Question 145:* Are there particular circumstances for which the NCUA should provide additional clarification as to the application of subpart C or the applicability of any exception (*e.g.,* regarding Payment Stablecoins locked in a smart contract for purposes of ''wrapping'' the Payment Stablecoin for use on an unsupported blockchain)?

*Question 146:* In order to help ensure that a PPSI is able to meet redemptions on a timely basis, should the NCUA require that any Custody Agreement a Covered Custodian enters into with a PPSI provide for prompt release of any custodied Covered Assets to the Covered Customer's control? For example, should a Custody Agreement require that a Covered Custodian have the ability to transfer control of Covered Assets comprising Payment Stablecoin reserves, or execute and settle at the Covered Customer's direction any such assets, within a specific timeframe? What are the costs and benefits of any such approach?

*Question 147:* To what extent are the portions of the reports required under proposed § 706.205 relevant to custodial activities appropriate to ensure that the NCUA possesses the information necessary to supervise Covered Custodians? If other forms of reporting would be helpful, what are they? If other types of information would be helpful, what are they? What are the costs and benefits of more detailed reporting requirements?

*Question 148:* Does the proposed approach regarding custody of Covered Assets proposed in subpart C, or any alternative approach discussed in comments or suggested by commenters, pose any concerns regarding fair competition between Covered Custodians and entities that are otherwise permissible custodians under section 10(a) of the GENIUS Act but which are not supervised by the NCUA?

### *F. Subpart D—Capital and Operational Backstop*

Section 4(a)(4)(A)(i) of the GENIUS Act requires the Board to establish capital requirements for PPSIs.[229] The capital requirements must be tailored to the business model and risk profile of PPSIs and not exceed requirements sufficient to ensure the ongoing operations of PPSIs. Consistent with the statutory requirement, and the capital requirements proposed by the OCC, the NCUA is proposing a minimum capital requirement that will be tailored to the business model and risk profile of an NCUA-Licensed PPSI. The NCUA's proposed approach for capital focuses primarily on the operational risk of Payment Stablecoin issuers.

Because of the novelty of Payment Stablecoins and various business models for PPSIs being discussed among industry participants, the NCUA believes that setting capital requirements based on individual evaluations of prospective PPSIs would be most appropriate at this time. Therefore, the overall approach in the proposed rule would provide for an individualized evaluation of each prospective PPSI. The NCUA would consider quantitative and qualitative factors including, but not limited to, financial projections, fixed and variable expenses, the nature of fiduciary products and services being proposed, and discussions with organizers when considering the appropriate capital amount for each PPSI.

In addition to establishing the initial capital requirement at licensing, all PPSIs must develop a process to assess and meet their capital requirements,[230] with evaluation by the NCUA through the examination process. As the NCUA gains additional experience and data from reviewing applications for prospective PPSIs and assessments performed by established PPSIs with varying business models and risk profiles, the NCUA may revise its licensing procedures or this rule to incorporate more standardized, objective capital requirements. The NCUA discusses potential options in the following sections and questions and invites feedback on how these options could be revised or incorporated into a final rule, either as elements of a capital requirement, liquidity requirement, or otherwise, because of the intertwined nature of capital and liquidity. For example, capital is generally used to support an entity's risk profile, business strategies, future growth prospects, and provide a cushion against unexpected losses, while liquidity is used to meet an entity's obligations when they come due. An entity that experiences unexpected losses that reduce the holdings of its liquid assets will have less liquidity to satisfy current liabilities, while an entity that needs to use liquidity to satisfy current liabilities may be more limited in its business strategies or future growth prospects.

#### 1. § 706.400. Capital Elements

Under the proposed rule, regulatory capital for PPSIs would consist of two capital elements, common equity tier 1 capital and additional tier 1 capital. These two elements are generally consistent with the capital elements for banking organizations under their respective capital requirements, however they are different than regulatory capital requirements for FICUs.[231] As mutuals, FICUs do not issue stock instruments and therefore must primarily rely on retained earnings to accumulate capital. PPSIs, however, will not likely be structured as mutual institutions, and instead will likely have ownership through stock certificates. Therefore, the NCUA believes it is appropriate to structure PPSI minimum capital requirements similarly to banking organizations and not analogous to FICU capital requirements.

The proposed PPSI capital elements primarily consist of common equity, retained earnings, and noncumulative perpetual preferred stock that meet certain terms designed to ensure significant loss-absorbing capabilities. For example, the proposed terms include provisions that require that the paid-in amount is equity under GAAP, that limit dividends, and that prohibit a PPSI from funding its own equity instruments to ensure that there is a source of external capital to support the PPSI's operations.

Common equity tier 1 capital would consist of common stock instruments (par value, if any, and related surplus), retained earnings, and any accumulated other comprehensive income (AOCI), all as reported under GAAP. Common stock instruments would need to meet various proposed criteria, including being the most subordinated claim on the PPSI's assets, being fully paid-in, having no maturity date, and not being redeemable except with prior NCUA approval. Any dividends must be fully discretionary, paid out only after fulfillment of any other legal or contractual obligations, and from positive retained earnings. In addition, the holders of the instruments must bear losses equally, proportionally, and simultaneously with other holders of common stock instruments. As the most subordinated tier of regulatory capital, common equity tier 1 exhibits the most loss absorbency, as any dividends are discretionary and there is

[229] 12 U.S.C. 5903(a)(4)(A)(i).

[230] *See,* proposed § 706.401(a)(2)(ii).

[231] See, 12 CFR part 3 (OCC); 12 CFR part 217 (FRB); and 12 CFR part 324 (FDIC).

no expectation of redemption or repurchase of the instrument, ensuring any operating funds generated can be used for any other business need of the issuer.

The NCUA also is proposing to include AOCI as a component of common equity tier 1 capital. This treatment is not consistent with the NCUA's capital framework in 12 CFR part 702, however, the NCUA is not proposing to permit any neutralization of AOCI. The NCUA permits neutralization of components of AOCI under part 702 in part to reduce regulatory capital volatility associated with changes in value of available-for-sale fixed income securities due to changes in interest rates. These changes in value due to interest rate movements are generally more pronounced the longer the remaining maturity of the securities. As PPSIs can only hold securities with remaining maturities of 93 days or less as reserve assets, the change in value of these securities due to interest rate movements likely would generate immaterial amounts of AOCI and therefore neutralization is not warranted to reduce volatility.

Additional tier 1 capital would consist of instruments that meet a different set of proposed criteria, generally consistent with noncumulative perpetual preferred stock issuances that are classified as equity under GAAP. Generally, these instruments would be subordinated to all claims except those of common shareholders. The instruments could not have a maturity date but may be callable after at least five years with prior approval of the NCUA. To provide additional flexibility to the issuer when needed, the terms of the instrument must provide for the payment of dividends only if and when declared by the PPSI board of directors. This feature provides the PPSI the ability to retain earnings and capital if needed. These provisions all help ensure that the instrument provides significant loss absorbency by limiting the PPSI's obligations to holders.

The NCUA's capital framework also permits inclusion of subordinated debt instruments in certain circumstances [232] and certain allowances for credit losses. The banking agencies also permit the inclusion of subordinated debt instruments as tier 2 capital instruments. However, the NCUA is not proposing to adopt subordinated debt as a capital component for PPSIs. Allowing a PPSI to employ subordinated debt instruments as capital may incentivize a PPSI to take on additional leverage with a stated repayment obligation, which increases the pressure and risk on the PPSI to generate enough income to repay that obligation instead of increasing the ability of the stablecoin issuer to absorb losses. Separately, as PPSIs would not be providing loans or other credit to Customers, they likely would not have any allowance for credit losses.

The proposed rule would not require any specific ratio between the regulatory capital elements or minimum amounts of any capital element. The NCUA does not believe such a structure for minimum capital is necessary for PPSIs based on their variety of business models. The proposed rule also would not require any specific deductions from regulatory capital instruments for PPSIs. The NCUA's current rules in 12 CFR part 702 require deductions from the definition of capital for purposes of the risk-based capital framework, but does not require deductions from the calculation of net worth. In general, the risk-based capital rule requires deductions because the potentially volatile valuation of those assets reduces their ability to absorb losses. While goodwill and other intangible assets may exhibit similar valuation volatility on the balance sheets of PPSIs, these risks may be addressed though the backstop requirement and proposed requirements around risk management, capital adequacy assessments, and liquidity. For example, a PPSI that holds a significant amount of goodwill from the acquisition of another entity would be expected to appropriately incorporate in its capital adequacy assessment the risk that the goodwill may become impaired and reduce retained earnings.

However, the NCUA is also considering a deduction framework, which could be more limited than the deductions required for FICUs under the risk-based capital framework. A more limited framework may focus deductions on goodwill and other intangible assets, which may be difficult to value and would be unavailable to satisfy redemption claims of Payment Stablecoin holders or support the PPSI during a business disruption. Alternately, the NCUA is considering a simplified capital instrument framework for PPSIs. Under this framework, any balance sheet account that qualifies as equity under GAAP would qualify as a capital element, including common stock, retained earnings, AOCI, and certain preferred stock. This alternative could be easier to implement as it relies on the GAAP definitions of equity without layering on additional requirements. However, those additional requirements reduce the risk to Payment Stablecoin holders and ensure that the equity instruments are sufficiently loss absorbing. For example, the additional proposed requirements help ensure a PPSI does not aggressively redeem equity instruments with funds that are necessary to support the liquidity or operations of the Payment Stablecoin and associated reserves, or make loans to potential shareholders to purchase stock, which provides no loss absorbency. The NCUA could also consider a framework based on tangible capital, which could start with GAAP equity, but deduct any intangible assets from that amount. This approach could address the risk that a PPSI invests material amounts of capital in generally illiquid and potentially volatile or difficult to value intangible assets. These assets would likely be difficult to liquidate if needed to address business disruptions. However, the proposed backstop may be sufficient to address these risks.

2. § 706.401. Minimum Capital Calculation

The NCUA is proposing to establish a minimum capital requirement framework based on the lifecycle of the PPSI. Under this framework, the NCUA will establish the minimum capital requirement for a PPSI as part of the licensing process that will apply for a minimum timeframe, generally three years. The NCUA intends to establish a monetary capital amount for each PPSI that must be maintained and a portion of which must be maintained in certain liquid assets. Under this approach, the NCUA would consider factors such as projected revenues and expenses, cash burn rates, and expenditures necessary to implement the proposed business plan and activities of the applicant. This analysis may include various scenarios based on projected Payment Stablecoin issuance volumes, planned composition of reserves, and projected returns on those reserves in different interest rate environments. During this time, and afterward, the PPSI also would be required to assess its capital adequacy and maintain an amount of capital that is commensurate with its business model and risk profile, subject to review by the NCUA.

a. De Novo Capital Requirement

Under proposed § 706.401, the initial minimum capital requirement would apply during the ''de novo period,'' generally the three-year period following licensing by the NCUA of the

[232] All complex FICUs may include subordinated debt instruments in risk-based capital under 12 CFR 702.104(b)(1)(vii). Low-income FICUs may include subordinated debt instruments as a component of net worth under 12 CFR 702.2 (definition of net worth).

PPSI to issue Payment Stablecoins. This timeframe may be extended or shortened by the NCUA. Generally, the NCUA would expect to lengthen the de novo period based on changes to the business model or activities of the issuer, excessive volatility in issuance and redemptions of the Payment Stablecoin, unexpected operating losses, weak earnings, poor risk management, or violations of the GENIUS Act or implementing rules. The NCUA would expect to shorten the de novo period for an entity that has a history of operating a stablecoin business prior to the effective date of the NCUA's final rule implementing the GENIUS Act or for a PPSI that converts to an NCUA-Licensed PPSI charter from another primary Federal payment stablecoin regulator.

During the de novo period, the requirements may be adjusted by the NCUA based on the actual operations of the PPSI compared to projections or as part of the licensing conditions. The NCUA would expect to consider the proposed PPSI's risk profile, business strategy, future growth prospects, and cushions for unexpected losses when evaluating the appropriate capital amount during the de novo period. At licensing and during the de novo period, the NCUA would consider factors including: the composition, stability, and direction of revenue; the level and composition of expenses; the level of retained earnings; the quantity and direction of strategic risk; the quality of management processes, including the adequacy of internal and external audit, internal controls, and compliance management; the quantity of transaction risk from delivery and administration of asset management products and services; and the impact of external factors, including economic conditions and evolving technology.

Under proposed § 706.401(a)(1)(i)(B), the NCUA is also proposing a floor of $5 million on the minimum capital requirement during the de novo period. This floor is primarily intended to ensure that every PPSI has sufficient resources to support initial operations, particularly to cover the losses that are expected to occur early in the startup phase of a new stablecoin. The $5 million floor is consistent with the OCC's proposed rule and the OCC's experience with chartering de novo national trust banks seeking to provide stablecoin programs.[233]

b. Ongoing Capital Requirement

The proposed rule would require all PPSIs to calculate a minimum capital requirement based on an evaluation of the risks associated with its business model and risk profile. This amount would be based on estimates submitted during the application phase, and after approval, this amount must incorporate the operating history of the PPSI and loss experienced from all sources, including operational risk. The NCUA will review and monitor this requirement and the amount of capital held by the PPSI as part of the examination process. The amount of capital held by the PPSI must appropriately incorporate the operating history and operational risk of the PPSI, consistent with the standards described above that the NCUA uses to determine the capital requirement for de novo Payment Stablecoin issuers. The NCUA is not currently proposing any floors on the minimum capital requirement or frameworks for determining a minimum capital requirement for those risks in the rule text, but has asked questions on possible options the NCUA could consider adopting in a final rule or as part of a future rulemaking. For the final rule, the NCUA may consider implementing a framework for determining more objective capital requirements as the industry evolves and PPSIs establish longer operating histories.

c. Operational Backstop

The NCUA is proposing that a PPSI hold a designated pool of highly liquid assets to maintain the ongoing operations of the PPSI during a business disruption, referred to as the operational backstop. This proposed backstop assets would be independent of the de novo or ongoing capital requirements and from any assets held as Reserve Assets. The purpose of the operational backstop is to help ensure that during a business disruption that impacts operations of the PPSI, a liquid pool of identifiable assets exists to allow the PPSI to meet short-term liquidity needs, stabilize the issuer after the disruption, and continue or resume normal operations. The operational backstop would be calculated based on the actual total expenses of the PPSI over the past 12 months. These expenses, including for utilities, data processing, and salaries, are highly correlated with the PPSI's ability to maintain the operations of its Payment Stablecoin and stabilize from a business disruption. At a minimum, the operational backstop provides a runway for the PPSI to evaluate the source of the disruption and potential responses without needing to take urgent action due to lack of funds. The amount of the operational backstop would be calculated each quarter, based on the PPSI's total expenses as reported in the four most recent quarterly reports filed. For de novo PPSIs, the initial requirement would be based on reasonable expense projections and adjusted each quarter based on actual amounts for that quarter.

The operational backstop amount would need to be held as readily available liquid assets to ensure that funds are available quickly during a business disruption. Specifically, this amount would need to be held in U.S. currency directly or at a Federal Reserve Bank, as deposits and/or funds in Share Accounts that are payable on demand at a U.S. IDI, with those deposits and/or funds in Share Accounts fully insured by the FDIC or NCUA, or in U.S. Treasuries that meet the requirements to qualify as Reserve Assets, which could be readily liquidated. The assets associated with the operational backstop would need to be separately identified in the reports filed under proposed § 706.205, and in any other financial statements of the PPSI, from any Reserve Assets required to support the Payment Stablecoin and any other assets of the PPSI on any reports filed under proposed § 706.205.

While the NCUA considered adjusting the operational backstop to more specifically identify and categorize expenses used in calculating the amount, this approach would create additional burden for PPSIs to track specific expenses, as well as increase the risk of gaming the backstop by PPSIs attempting to reclassify ongoing operating expenses as one-time items. The NCUA also does not want to create incentives or disincentives for different business decisions, such as to purchase or lease assets, by excluding non-cash expenses like depreciation from total expenses.

The proposed minimum capital amount, the capital held by the PPSI, and the operational backstop would be calculated as of the last day of each quarter and disclosed in the reports required under § 706.205 of the proposed rule. Under the proposal, if a PPSI does not meet the minimum capital requirement or have sufficient liquid assets to meet the operational backstop at the end of a quarter, it must make efforts to satisfy the capital requirement and backstop by the end of the following quarter. These efforts may include raising additional capital, reducing the size of the operations or risk profile of the issuer, or converting less-liquid assets into highly liquid assets to satisfy the backstop. Until the capital and backstop requirements are satisfied, the PPSI would be restricted from issuing any new Payment Stablecoins, except as necessary to

[233] 91 FR 10202 (Mar. 2, 2026).

facilitate a transfer of Payment Stablecoins from one Distributed Ledger to another and provided that the Net Outstanding Issuance Value does not increase so that the PPSIs can use their liquidity to address any issues in times of stress instead of further growing the risk by increasing the size of the Payment Stablecoin. If a PPSI fails to meet its capital or backstop requirements for two consecutive quarters, it must begin liquidating Reserve Assets and redeeming outstanding Payment Stablecoins at the start of the following month and can no longer issue any new Payment Stablecoins going forward. A PPSI that is required to redeem its Payment Stablecoins due to a shortage of capital or liquid assets for the backstop would be prohibited from charging Customers a fee for redeeming those Payment Stablecoins. For example, if a PPSI did not have sufficient capital as of June 30, it would be prevented from issuing new Payment Stablecoins, on a net basis, starting in July. If the PPSI increased its capital to meet the minimum requirement on July 8, it could resume issuing stablecoins on July 8. In contrast, if the PPSI did not satisfy its capital or backstop requirements at any time during the quarter and did not meet these requirements again on September 30, it would need to begin redemption of its Payment Stablecoins starting on October 1, regardless of whether it raises additional capital or meets the operational backstop requirements going forward. Due to the nature of PPSIs and the potential for rapid inflows or outflows of funds to issue or redeem Payment Stablecoins, the NCUA believes a timely response is warranted when there is a failure to meet minimum capital and backstop requirements to ensure that a growing Outstanding Issuance Value is appropriately backed by sufficient capital to address the risks associated with the PPSI and any business disruptions. The provisions to limit issuance of new Payment Stablecoins, and potentially redeem outstanding Payment Stablecoins, are intended to ensure that a PPSI maintains an adequate capital base and operational backstop relative to its risks and operations. The proposed quarterly calculation and assessment aligns with the proposed frequency of reporting under proposed § 706.205(i). However, more frequent capital calculations and assessments may be appropriate due to potential fluctuations in stablecoin demand or other factors.

3. § 706.402. Individual Additional Capital or Backstop Requirement

The NCUA expects that a PPSI will appropriately calculate a capital requirement under proposed § 706.401(a) and (b) and would expect to resolve any concerns with the capital adequacy assessment through the examination process. However, in cases where the PPSI's internal capital adequacy assessment is significantly deficient in addressing the capital needs of the PPSI to ensure ongoing operations, the NCUA is proposing a process to impose an individual additional capital or backstop requirement on the PPSI. This process is permitted by section 4(a)(4)(B)(i) of the GENIUS Act.[234]

The proposed rule includes a list of illustrative examples of when the NCUA may consider imposing an individual additional capital or backstop requirement, such as when a PPSI is facing a significant increase in operational risks, excessive volatility in stablecoin issuance or redemptions and the PPSI's management lacks a robust plan to address that volatility, or for additional risks that the PPSI is not appropriately managing or reflecting in the ongoing capital calculation.

Under the proposal, the NCUA would notify the PPSI of the proposed individual additional capital or backstop requirement, including a justification for that requirement and a target achievement date. The board and management of the PPSI generally would have 30 days to respond to that notice. The NCUA may change this time period, as appropriate, based on the condition of the PPSI. For example, the time period may be shortened due to the severity of the underlying issues and need for additional capital or backstop. After the response period, the NCUA would issue a final decision establishing an individual additional capital or backstop requirement for that PPSI, which would remain in effect until modified or rescinded by the NCUA. The decision may require the PPSI to develop and submit to the NCUA, within a specified time period, an acceptable plan to reach the additional capital or backstop requirement established for the PPSI. If, after the NCUA renders its decision, there is a significant change in the circumstances that materially affects the PPSI's capital adequacy or its ability to reach the required capital or backstop requirement, the PPSI may request, or the NCUA may propose to the PPSI, a change in the additional capital or backstop requirement for the PPSI, the date when the minimum must be achieved, or the PPSI's plan (if applicable). The NCUA may decline to consider proposals that are not based on a significant change in circumstances or that are repetitive or frivolous. Pending a decision on reconsideration, the NCUA's original decision and any plan required under that decision shall continue in full force and effect.

4. Proposed Adjustments to the NCUA's Capital Rule (12 CFR Part 702 and 704)

Section 4(a)(4)(C)(iii) of the GENIUS Act specifies that for stablecoin issuers owned by IDIs, the appropriate Federal banking agency (as defined in 12 U.S.C. 1813(q)), which does not include the NCUA, cannot require an IDI that is consolidated with a PPSI to hold any amount of regulatory capital with respect to such PPSI and its assets and operations in excess of the capital that such PPSI must maintain under the capital regulations promulgated under the GENIUS Act.[235] While the NCUA is not an appropriate Federal banking agency under the Federal Deposit Insurance Act, the NCUA is issuing similar proposed rules as the OCC regarding deconsolidation of PPSI subsidiaries for consistency. Therefore, for regulatory capital purposes, the NCUA is proposing to amend 12 CFR parts 702 (natural person FICUs) and 704 (corporate FICUs) to specify that a FICU that owns a consolidated PPSI under GAAP must deconsolidate the PPSI for regulatory capital purposes.

The FICU must deduct any interest in retained earnings of the PPSI from its net worth and, for complex credit unions calculating their capital under the risk-based capital framework, from the capital elements for the risk-based capital numerator.[236] This amount would also be deducted from total assets or total risk-weighted assets for the denominator. This interest reflects the FICU's share of retained earnings of the PPSI that have not been paid out as dividends, and the deduction ensures that the same amount would not count as capital at both the PPSI and its parent FICU. Once earnings from the subsidiary are paid as dividends to the parent FICU, those funds are available for general uses of the FICU and no longer count as capital of the PPSI. Finally, any remaining assets associated

[234] 12 U.S. 5903(a)(4)(B)(i).

[235] 12 U.S.C. 5903(a)(4)(C)(iii).

[236] The OCC's proposal requires deduction from common equity tier 1 capital. FICUs, however, as mutual institutions do not have common equity (stock certificates) and instead would deduct consolidated interests in the PPSI from the numerator, either net worth or its risk-based capital numerator, as applicable.

with the PPSI (after deducting its share of retained earnings), such as investments in or intercompany receivables from a PPSI, would be excluded when calculating the FICU's total assets or risk-weighted assets, as applicable.

To the extent that a subsidiary PPSI incurs net losses, there would be no adjustment to increase its parent FICU's assets or retained earnings to offset those losses, so as to not overstate the resources and financial condition of the parent. As proposed, this deconsolidation and deduction approach would ensure that any assets and capital associated with the PPSI are not double-counted when included in risk-based or net worth ratio calculations at the parent FICU, and that any retained earnings of the PPSI are not double-counted as capital that can be used by the parent FICU.

5. Request for Comment

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 149:* The OCC did not provide a specific treatment for unconsolidated equity interests in PPSIs. The other banking agencies' capital treatment for non-consolidated equities is generally more conservative than the NCUA's treatment for non-consolidated equities. Banking organizations' unconsolidated investments may be subject to deduction in certain circumstances and are generally subject to higher risk weights than under part 702. The NCUA solicits comment on whether the current treatment under part 702 and NCUA's risk-based capital requirements for unconsolidated CUSO equities is appropriate for unconsolidated PPSI exposures.

*Question 150:* Are the proposed requirements for capital elements appropriate and sufficiently clear? Should the NCUA consider permitting tier 2 capital in the form of subordinated debt, similar to the permitted capital element under 702, Subpart D? Should the NCUA consider establishing limits on how much capital of each tier should be required or allowed? Alternately, should the NCUA adopt a simpler measure of capital, such as anything that qualifies as equity under GAAP, instead of importing the bank framework for capital instruments? Should the NCUA use tangible equity (retained earnings, stock, and preferred stock, net of tangible assets) as the measure of capital for a PPSI?

*Question 151:* Should the NCUA require deductions from regulatory capital for goodwill, certain deferred tax assets, or other illiquid or intangible assets, recognizing that these assets may not provide sufficient loss absorbency during a business disruption, and may experience volatility in value or writedowns that could deplete retained earnings? Please provide any data supporting your views.

*Question 152:* Are the proposed components and determination of the minimum capital and backstop requirements appropriate for PPSIs? Which alternatives, if any, should the NCUA consider and why? Should the requirements include any adjustments in recognition of newly acquired or divested businesses, or any other adjustments when calculating total expenses for purposes of the proposed backstop? Please provide any data supporting your views.

*Question 153:* Is the $5 million minimum capital requirement for a de novo PPSI appropriate?

*Question 154:* The NCUA is considering a variable capital component based on a percentage of Outstanding Issuance Value. This component could address operational risks associated with maintaining the Reserve Assets and issuing Payment Stablecoins to Customers. This component may vary directly with the Outstanding Issuance Value. It could also address price and liquidity risks associated with Payment Stablecoin Reserve Assets when those assets may need to be liquidated at below-market value to meet redemption demands. This component could also address price and credit risk associated with certain Payment Stablecoin Reserve Assets, such as uninsured deposits and/or funds in Share Accounts and certain reverse repurchase agreements. As the size of the Outstanding Issuance Value and corresponding Reserve Assets increase, the operational risk may increase. A larger pool of underlying Reserve Assets may increase the number and severity of hacking attempts, while a larger outstanding issuance may encourage attempts to create fraudulent Payment Stablecoins. Similarly, a larger pool of Reserve Assets that may need to be liquidated in a short timeframe to satisfy a run on the Payment Stablecoin would increase the risk that Reserve Assets would need to be liquidated at prices below fair value. However, the risk may not grow as quickly as the growth of Reserve Assets. Larger PPSIs may have more resources to spend on cybersecurity and other risk mitigation strategies. One possible calibration for such a requirement could be 1.0 percent for Payment Stablecoin reserves or Outstanding Issuance Value up to $10 billion, 0.40 percent for Payment Stablecoin reserves or Outstanding Issuance Value between $10 billion and $50 billion, and 0.20 percent for Payment Stablecoin reserves or Outstanding Issuance Value greater than $50 billion. However, the NCUA also recognizes that a PPSI could manage these risks through application of Reserve Asset diversification and liquidity measures. These measures could reduce the risk of unanticipated loss and thus the need for a significant amount of capital. Requirements to mitigate those risks are included elsewhere in this proposal. Moreover, including a variable component for operational risk based on Outstanding Issuance Value may disincentivize growth among PPSIs and prevent their Payment Stablecoins from obtaining economies of scale. Should the NCUA impose a minimum capital requirement based on a set percentage of Outstanding Issuance Value? If so, are the minimum capital requirements and thresholds discussed appropriately calibrated? Please provide any data supporting your views.

*Question 155:* While the capital requirement in the proposed rule text is the NCUA's preferred approach, the NCUA is also considering a variable capital component tied more directly to price and interest rate risk of Payment *S*tablecoin Reserve Assets. Under this approach, a capital charge would apply to Reserve Assets that consist of U.S. Treasuries, repurchase agreements, and tokenized versions of those assets. As a PPSI grows larger, there may be increased risk that a run on the Payment Stablecoin will require liquidation of a significant amount of underlying Reserve Assets over a short time. This may result in the PPSI receiving less than Fair Value for certain Reserve Assets. While the proposed rule's Reserve Asset provisions require consideration of the Fair Value of Reserve Assets, for certain assets such as U.S. Treasuries, a PPSI may need to sell those assets into the market and accept whatever price the market will offer at that time. A similar risk also arises with reverse repurchase agreements entered into by the PPSI, as the counterparty may decline to roll over the repurchase agreement, thus leaving the PPSI with additional Treasuries. In contrast, cash, deposits and funds in Share Accounts, and money market funds likely could be redeemed at par value with no interest rate risk loss to the PPSI. The NCUA could consider calibrating this variable capital component using the market price volatility haircuts used by banking organizations to calculate exposure amounts for repo-style transactions in

12 CFR 324.37.[237] This approach establishes a haircut of 0.5 percent for Treasuries and Treasury collateral posted or received under repurchase agreements with maturities up to one year, but the NCUA could consider more tailored and granular haircuts, such as 0.05 percent to 0.25 percent, which could vary based on the remaining time to maturity for these reserve assets. However, imposing a capital requirement on only certain Payment Stablecoin Reserve Assets may incentivize PPSIs to focus on other Reserve Assets. This approach may also introduce unnecessary complexity into the rule. The NCUA welcomes comment on the proposed approach in the regulatory text and all alternatives. The NCUA also solicits comments on a variable capital component tied to the credit risk of certain Payment Stablecoin Reserve Assets, specifically uninsured deposits and funds in Share Accounts, reverse repurchase agreements, and money market funds. Proposed § 706.202(c) includes provisions (whether as a requirement or safe harbor) that would encourage a PPSI to spread its deposits and funds in Share Accounts among multiple institutions. Moreover, proposed § 706.202(d) would require certain large PPSIs to hold a minimum amount of insured deposits and/or insured funds in Share Accounts. These provisions would help mitigate the counterparty credit risk that a PPSI would face with respect to uninsured Deposits and uninsured funds in Share Accounts. Thus, it may be unnecessary to impose a variable capital component tied to uninsured Deposits. Currently, the FDIC and NCUA deposit and share insurance limits are $250,000 per depositor per account ownership category at each insured bank or credit union.[238] Even if a PPSI attempted to split its deposits and funds in Share Accounts among multiple insured institutions, the total amount of insured deposits and insured funds in Share Accounts would likely be a small proportion of total Reserve Assets. For example, a Payment Stablecoin with $1 billion of Reserve Assets that kept 10 percent of reserves in bank deposits or FICU Share Accounts would need to spread those funds among 400 accounts to ensure all of those deposits and/or Share Accounts remained fully insured. It is more likely a PPSI would choose a much smaller group of IDIs and deposit a larger amount of reserves at each, resulting in a significant amount of uninsured deposits and/or uninsured funds in Share Accounts. These deposits and funds in Share Accounts would be subject to loss in the event of a failure of an IDI. To address this risk, the NCUA could consider a capital charge of 0.40 percent applied to uninsured deposits and/or uninsured funds in Share Accounts, or some other amount, that could be calibrated based on the number of IDIs or size of the uninsured deposit and/or uninsured funds in Share Accounts amount at each IDI.

Under section 4(a)(1)(A)(v) of the GENIUS Act, a reverse repurchase agreement may be entered into by PPSIs on a cleared basis, tri-party basis, or bilateral basis to satisfy Reserve Asset requirements.[239] For cleared reverse repurchase agreements, the transaction occurs through a central clearinghouse that fully backs the transaction, resulting in negligible counterparty credit risk. Under a tri-party repurchase agreement, the collateral for the transaction is held by a third party, reducing the credit risk to the counterparty. However, in bilateral reverse repurchase agreements, the PPSI would rely solely on the collateral provided by its counterparty. Under section 4(a)(1)(A)(v) of the GENIUS Act, acceptable collateral for reverse repurchase agreements could consist of U.S. Treasury bills, notes, or bonds, with no restrictions on original or remaining maturity. Therefore, in a counterparty default, a PPSI could receive long-dated Treasury securities with an extended time to maturity. Even if the reverse repurchase agreement was significantly overcollateralized, the price volatility of long-dated Treasuries could significantly increase the risk of loss to the PPSI on the default of its counterparty. To address this risk, the NCUA could consider imposing a capital requirement equivalent to the market price volatility haircut applied to collateral for repo-style transactions under the banking agencies capital rules in 12 CFR 324.37. The capital requirement could vary based on the remaining maturity of the collateral and the credit risk of the PPSI's counterparty. With respect to Reserve Assets in the form of money market funds, section 4(a)(1)(A)(vi) of the GENIUS Act requires that a PPSI only hold money market funds that invest in certain other eligible reserve assets; however, these include deposits, funds in Share Accounts, and reverse repurchase agreements that give rise to the same risks as if held directly by the PPSI.[240] Therefore, the NCUA could consider a capital charge that would require the PPSI to look through to the underlying assets of the money market fund, similar to the capital requirement for an equity exposure to an investment fund in Appendix A to Part 702—Gross-Up Approach, and Look-Through Approaches.

However, the NCUA considered that imposing a capital charge on these types of Reserve Assets could incentivize PPSIs to hold reserves in other types of assets that could be subject to lower or no specific capital charge. The NCUA does not want to discourage PPSIs from investing Reserve Assets in certain permissible categories, particularly in Share Accounts at FICUs. In addition, the proposed asset diversification and liquidity requirements would help mitigate the risk of loss on Reserve Assets without imposing a financial capital requirement. Should the NCUA adopt a capital requirement based on price risk, credit risk, operational risk, or interest rate risk, including variations on any of the proposals discussed above? Please provide any data supporting your views. For example, should the NCUA impose a charge for credit risk, such as a 2 percent capital charge for uninsured deposits and uninsured funds in Share Accounts? Should the NCUA impose a capital charge to reflect the interest rate risk of certain Reserve Assets, such as Treasury securities? Should the NCUA impose a minimum operational risk capital charge that scales with the size of the issuer, as discussed above (*i.e.,* with a charge of 1 percent for small issuers with a smaller additional marginal charge applying at certain thresholds)? Should any such operational charge be based, in part, on the PPSI's recent losses?

*Question 156:* While the capital requirement in the proposed rule is the NCUA's preferred approach, for PPSIs that also provide custody services to Customers, the NCUA is also soliciting comment about the potential for a variable capital component based on the Fair Value of assets held in custody. Operating a custody business generates a separate set of risks from operating a Payment Stablecoin business, and the risk is potentially increased compared with a standalone custody business, as any loss of the assets in custody could also impact operations of the custody business. This capital component could

[237] Complex FICUs may also use this approach when calculating off-balance sheet assets under 12 CFR 702.104(c)(4)(viii) and (ix).

[238] All shares placed by a member in a particular ownership category—whether in one account or multiple share accounts or at different branches or offices of the same FICU—are aggregated and insured up to the standard maximum share insurance amount for that ownership category. 12 CFR part 745.

[239] 12 U.S.C. 5903(a)(1)(A)(v).

[240] 12 U.S.C. 5903(a)(1)(A)(vi).

reflect costs associated with providing for ongoing operation of a PPSI's custody business, irrespective of the success or failure of the associated Payment Stablecoin issuance. This approach of assessing a capital charge based on the size and scope of a custodian's business is consistent with the GENIUS Act requirement that a PPSI's capital requirements be tailored based on the risk profile of the issuer.[241] The NCUA believes that the risks, in particular the operational risks, associated with providing custody services can be adequately addressed through the de novo and ongoing capital requirements in proposed § 706.401(a)(1) and (2). Proposed § 706.401(a)(2)(i) expressly states that the capital maintained by the PPSI must be commensurate with the level and nature of all risks to which the PPSI is exposed, including risks for off-balance sheet activities. Because the risks associated with operating a custody business would be addressed through a holistic assessment of the PPSI's risks in the proposal, the NCUA does not propose to include a variable capital component relating to assets under custody. The NCUA generally expects that entities engaged in custody businesses will require additional capital to address the operational risk associated with this activity. However, the NCUA solicit comments on whether it should adopt a capital requirement based on assets held in custody by the PPSI? If so, how should that requirement be calibrated? Please provide any data supporting your views.

*Question 157:* Should the NCUA adopt a capital requirement expressly designed to address costs of litigation, legal risk, or legal costs during insolvency that a PPSI may face? If so, how should such a requirement be calibrated?

*Question 158:* Should the capital and backstop requirements be calculated based as of the last day of a given quarter, as proposed? Should the amount instead be calculated across some other period of time, such as an average on a monthly, bi-monthly, biannually, or yearly basis?

*Question 159:* Is the timing for the PPSI to meet capital and backstop requirements appropriate? Are the resulting activity limitations for failing to meet those requirements appropriate? Should any activity limitations be imposed by NCUA on a discretionary basis? For example, should the PPSI be required to notify the NCUA in writing if it fails to meet its capital or operational backstop requirements and include a written contingency plan with measures to be taken by it to restore compliance? The rule could also provide that the NCUA may take certain discretionary actions if necessary, including directing the PPSI to issue capital instruments or acquire additional operational backstop assets; directing the PPSI to suspend or reduce issuance of Payment Stablecoins; or executing an orderly redemption of all outstanding Payment Stablecoins.

*Question 160:* Are there any advantages or disadvantages to setting capital requirements for PPSIs consistent with or different from those set by non-United States regulators? The proposed approach to determining capital requirements is less prescriptive than approaches adopted or proposed in certain foreign jurisdictions. Are there any advantages or disadvantages to setting capital requirements for PPSIs consistent with the approaches adopted by those jurisdictions?

*Question 161:* Are the proposed criteria for imposing an individual additional capital or backstop requirements appropriate and sufficiently clear? For example, should the NCUA define what constitutes ''excessive volatility?''

### *G. Subpart E—Supervision and Enforcement Policy for Anti-Money Laundering/Countering the Financing of Terrorism Program Requirements for NCUA-Licensed PPSIs*

Proposed subpart E of part 706 would articulate the supervision and enforcement frameworks for NCUA-Licensed PPSI's anti-money laundering/countering the financing of terrorism (AML/CFT) programs, which PPSIs are required to maintain under the GENIUS Act [242] and proposed § 706.204(c). The proposed rule defines key terms, describes the NCUA's enforcement and supervision policy with respect to AML/CFT program implementation failures, and establishes a consultation process between FinCEN and the NCUA relating to AML/CFT enforcement actions or significant AML/CFT supervisory actions.

#### 1. § 706.501. Definitions

Proposed § 706.501 would define several terms used throughout the subpart.

The term ''AML/CFT enforcement action'' would mean any formal or informal action taken by the NCUA under authority of 12 U.S.C. 5905 or other applicable law that seeks to penalize, remedy, prevent, or respond to noncompliance with past or ongoing violations of, or past or ongoing deficiencies relating to, an AML/CFT requirement. The term includes a cease-and-desist order, written agreement, consent order, or memorandum of understanding, or the assessment of a civil money penalty. It does not include criminal enforcement.

The term ''AML/CFT requirement'' would mean: (1) a requirement of the Bank Secrecy Act (as that term is defined in proposed part 706)) or of the regulations in title 31, chapter X applicable to PPSIs; (2) a requirement of 12 U.S.C. 5903(a)(5)(A)(i)–(v), 12 U.S.C. 5903(a)(6)(B), or 12 U.S.C. 5903(f)(1)(A); or (3) a requirement prescribed under 12 U.S.C. 1786(q) or this section.

The term ''significant AML/CFT supervisory action'' would mean any written communication or other formal supervisory determination issued by the NCUA that identifies one or more alleged deficiencies, weaknesses, violations of law, or unsafe or unsound practices or conditions relating to an AML/CFT requirement; communicates supervisory expectations to a PPSI regarding actions or remedial measures required to correct the deficiency, weakness, violation, or practice or condition; and contemplates significant or programmatic actions or remedial measures to be taken by the PPSI. The term does not include examiner observations, suggestions, or other informal comments.

#### 2. § 706.502. Supervision and Enforcement Policy

Proposed § 706.502 would articulate the NCUA's enforcement and supervision policy as it relates to AML/CFT requirements. Except with respect to a significant or systemic failure to implement an effective AML/CFT program in accordance with applicable regulations at 31 CFR Chapter X issued by FinCEN, a PPSI that has properly established an AML/CFT program would not be subject to an AML/CFT enforcement action or to a significant AML/CFT supervisory action based on the program requirements issued by FinCEN or proposed § 706.204(c). At the same time, the proposed rule would clarify that nothing in this policy would restrict an AML/CFT enforcement action or a significant AML/CFT supervisory action with respect to a failure to properly establish an AML/CFT program. The NCUA's proposed enforcement and supervisory approach is not intended to affect criminal enforcement liability under the BSA.

#### 3. § 706.503. Consultation

The proposed rule would establish a notice and consultation framework

[241] See 12 U.S.C. 5903(a)(4)(A)(i).

[242] 12 U.S.C. 5903(a)(5) and (6).

applicable when the NCUA intends to initiate an AML/CFT enforcement action or a significant AML/CFT supervisory action, as those terms are defined in the proposed regulation. Under such a consultation framework, before initiating such an action, the NCUA would provide the Director of FinCEN with an opportunity to review the action and would consider any input offered by the Director of FinCEN, which may include any view as to the effectiveness of the PPSI's AML/CFT program. To facilitate that review, the NCUA would be required to provide written notice to the Director of FinCEN of the NCUA's intent to take the action at least 30 days in advance of the proposed action, unless a shorter period is necessary, at the sole discretion of the NCUA, to remedy, prevent, or respond to an unsafe or unsound practice or condition.

Such a notice would be accompanied by the relevant AML/CFT information underlying the proposed action. Relevant AML/CFT information may include, but is not limited to, relevant portions of draft report of examination; relevant portions of a draft enforcement action; examination workpapers supporting the proposed action; and the relevant AML/CFT information submitted by the PPSI to the NCUA. The NCUA would not be obligated to provide information over which the PPSI may claim privilege under Federal or State law. The NCUA would also respond, to the extent reasonably practicable, to requests for additional AML/CFT information from the Director of FinCEN regarding the proposed action. The NCUA seeks comments on such a consultation framework.

4. § 706.504. Disclosure of Supervisory Information

The NCUA has issued regulations that generally prohibit the disclosure of the NCUA's non-public information, except as provided under such regulations.[243] This prohibition generally applies to disclosure of any portion of a report of examination, supervisory correspondence, and any representations concerning such reports or supervisory correspondence, or their findings, including conclusions regarding compliance with AML/CFT compliance program requirements. The proposed rule would clarify that PPSIs may share any information with the FinCEN Director that relates to an existing or potential AML/CFT enforcement action or significant AML/CFT supervisory action.

This proposed rule specifically provides that this authorization to share information includes information that would ordinarily be considered non-public information under the NCUA's rules. To qualify for this information sharing, the information at issue must have an appropriate nexus to an existing or potential AML/CFT enforcement action or significant AML/CFT supervisory action. The NCUA proposes this clarification to ensure that PPSIs can share appropriate information with the FinCEN Director, including in the context of actions subject to the newly established consultation requirement. Otherwise, PPSIs may be unable to provide thorough information to the FinCEN Director, whether proactively or in response to the Director's requests.

While the proposed rule intends to permit such sharing, the NCUA is proposing two alternative methods for permitting such information sharing with the FinCEN Director. Under the first approach, referred to as Option A in the amendatory text below, the NCUA would authorize the disclosure of covered information on the NCUA's behalf to the FinCEN Director and separately permit the FinCEN Director to use such information. This phrasing is intended to mirror the permissible scope of information sharing by the NCUA under 12 U.S.C. 1821(t), which provides that a ''covered agency, in any capacity, shall not be deemed to have waived any privilege applicable to any information by transferring that information to or permitting that information to be used by'' another Federal agency.

Under the alternative approach, referred to as Option B in the amendatory text below, the NCUA would similarly authorize the disclosure of covered information on the NCUA's behalf, as well as similarly authorize the use of such information by the FinCEN Director. The NCUA, however, would expressly require that any such information shared on the NCUA's behalf be contemporaneously disclosed by the PPSI to the NCUA. While the NCUA will necessarily already have access to its own non-public information, this additional requirement is potentially more consistent with the retention of privilege contemplated under 12 U.S.C. 1821(t) and, therefore, potentially provides a greater safeguard against the unintended destruction of privilege. The NCUA also recognizes that PPSIs' willingness to share timely, fulsome information with the FinCEN Director is essential to the success of the consultation framework. Requiring PPSIs to contemporaneously disclose to the NCUA the same non-public information they provide to FinCEN is likely to discourage proactive reporting—particularly where a PPSI perceives the NCUA's proposed action as inconsistent with the AML/CFT priorities or FinCEN policy—and thereby undermine the rule's objective of enhancing FinCEN's role.

Regardless, the proposed rule would include additional clarifying text intended to preserve all applicable privileges. The destruction of privilege over non-public supervisory information could prove harmful both to the NCUA and a PPSI, so the additional language is intended to prevent such consequences.

The NCUA invites comment on these options for permitting greater information sharing with the FinCEN Director regarding existing or potential AML/CFT enforcement actions or significant AML/CFT supervisory actions, including possible alternative methods of accomplishing the rule's objectives without unintentionally impeding applicable privileges.

5. Request for Comment

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 162:* Should the NCUA further refine or clarify any of the concepts or definitions outlined in this proposed supervision and enforcement framework?

*Question 163:* Do any aspects of the GENIUS Act framework with regards to supervision, examination, and enforcement need to be better accounted for if the supervision and enforcement framework were extended to PPSIs, including a consultation framework when the NCUA intends to take an AML/CFT enforcement action or significant AML/CFT supervisory action? For example, should revocation of approval to issue a Payment Stablecoin, if based in whole or in part on AML/CFT deficiencies, be accounted for in, including in the definition of AML/CFT enforcement action?

*Question 164:* Should the proposed consultation process include an asset threshold—*e.g.,* consultation is required for any significant AML/CFT supervisory actions involving PPSIs with $10 billion or more in assets? In addition, or as an alternative, should the proposed rule not require but instead provide the option for PPSIs to request that the NCUA consult with FinCEN prior to initiating a significant AML/CFT supervisory action?

*Question 165:* Notwithstanding the benefits of the proposed consultation described above, the proposal may result in additional review during an examination. How can the consultation

[243] *See* 12 CFR part 792.

process be streamlined and prevent logistical burdens for financial institutions or delays in exam report issuance?

Disclosure of Supervisory Information

*Question 166:* The NCUA invites comment on the two options for permitting greater information sharing with the FinCEN Director regarding AML/CFT enforcement actions or significant AML/CFT supervisory actions. In particular, would the disclosure of confidential supervisory information to FinCEN compromise attorney-client privilege, other applicable privileges, or otherwise undermine the preservation of privilege in 12 U.S.C. 1821(t)?

*H. Assessments*

In the OCC Proposal, the OCC determined that collecting assessments in connection with the GENIUS Act activities of OCC-supervised institutions is necessary and appropriate to facilitate the OCC's functions under the GENIUS Act and conforms with its assessment authorities. The OCC found that its expanded supervisory responsibilities under the GENIUS Act include licensing and registration decisions for certain PPSIs, and monitoring compliance with reserve requirements and other applicable laws and regulations relating to Payment Stablecoin activities warranted the assessments.

Similar to the OCC, the NCUA would also be responsible for expanded oversight functions related to FICU Payment Stablecoin activities and activities of NCUA-Licensed PPSIs. As discussed in the NCUA Standards Proposal, proposed § 706.103 would state that the NCUA may require filing fees to accompany certain filings made under Subpart A. The NCUA also sought comment regarding the pros and cons of recovering the costs of administering the Payment Stablecoin program by imposing charges on individual FICUs or NCUA-Licensed PPSIs, including through an examination fee. The NCUA continues to consider the potential for imposing a licensing fee or examination fee to offset the NCUA's additional costs and seeks comments on how the NCUA should account for the additional expense. The NCUA believes that because Payment Stablecoin activities and investments are optional and based on each FICU's business judgment; and that because it is likely that, at least initially, only a minority of FICUs participate in Payment Stablecoin activities and investments, commenters may consider it more equitable to not pay these costs out of the general FCU operating fee and National Credit Union Share Insurance Fund (NCUSIF) overhead transfer.

The NCUA notes that the intent for any charges would not be to act as a deterrent, but rather as an equitable way of assessing the cost of Payment Stablecoin activities and the NCUA's expanded supervision requirements.

*I. Proposed Amendments to Part 747*

The NCUA is proposing several revisions to the rules of practice and procedure for adjudicatory proceedings part 747 of the NCUA's regulations to incorporate the GENIUS Act's procedural requirements with respect to PPSIs.[244]

Section 6(b) of the GENIUS Act[245] requires the NCUA to follow certain procedures when bringing an enforcement action or imposing civil money penalties against a PPSI for violations of the GENIUS Act, any regulation or order issued under the Act, or any condition imposed in writing between the NCUA and PPSI.

Specifically, section 6(b)(4)(A) of the GENIUS Act[246] requires the NCUA to comply with the procedures set forth in paragraphs (e) and (g) of section 206 of the FCU Act[247] if the NCUA identifies a violation or attempted violation of the GENIUS Act or makes a determination with respect to the enforcement authorities enumerated at sections 6(b)(1) through (3) of the Act.[248] Similarly, section 6(b)(4)(D) of the GENIUS Act[249] permits the NCUA to follow the procedures in section 206(f) of the FCU Act when the NCUA issues a temporary cease-and-desist order.

Section 6(b)(5)(D) of the GENIUS Act clarifies that any civil money penalty imposed under the GENIUS Act may be assessed and collected by the NCUA pursuant to the procedures set forth in section 206(k)(2) of the FCU Act.[250]

Consistent with the GENIUS Act, the NCUA proposes to revise § 747.1 to clarify that the rules of practice and procedure in part 747 apply to the following proceedings: suspension or revocation of registration, cease-and-desist, temporary cease-and-desist, removal and prohibition, or civil money penalties under section 6 of the GENIUS Act.[251] Additionally, the NCUA proposes to revise § 747.703(a) to clarify that the part 747 procedures for formal investigations apply to formal investigations initiated by the NCUA pursuant to section 6 of the GENIUS Act.[252]

The NCUA also proposes several technical revisions. Specifically, the NCUA proposes to revise the definitions of ''institution'' and ''institution-affiliated party'' in § 747.3 to incorporate PPSIs and actions brought pursuant to the Act.

*J. Proposed Amendments to Part 745*

Reserve assets backing Payment Stablecoins are an important component of the statutory framework established by the GENIUS Act. Through this proposal, the NCUA is seeking to clarify the treatment for such reserves for share insurance purposes. In particular, the NCUA is proposing to amend its share insurance rules, found in part 745 of the NCUA's regulations, to provide that funds held in Share Accounts at FICUs as reserves for a Payment Stablecoin would be insured to the PPSI under the NCUA's coverage rules for corporate accounts, but would not be insured to Payment Stablecoin holders on a pass-through basis. As corporate accounts of the PPSI, such accounts would be aggregated with other corporate accounts maintained by the PPSI at the same FICU and insured for up to the Standard Maximum Share Insurance Amount (SMSIA), currently $250,000. The NCUA is seeking comment on whether this is the appropriate approach and reflects the appropriate interpretation of the GENIUS Act and FCU Act.

1. General Principles of Share Insurance Coverage

The NCUA only insures ''accounts,'' as that term is defined in section 101(5) of the FCU Act (12 U.S.C. 1752(5)). ''Share Accounts,'' as defined in Part 706, funds in ''accounts'' (as defined by the FCU Act) at FICUs, which the GENIUS Act provides may comprise a portion of a PPSI's reserves backing its Payment Stablecoins.[253]

The FCU Act establishes the key parameters of share insurance coverage, including the SMSIA, and provides share insurance coverage up to the SMSIA at each separately chartered FICU where accounts are maintained.[254] The FCU Act also provides separate insurance coverage for accounts

[252] *Id.*

[253] The NCUA's share insurance coverage does not apply to other types of Reserve Assets that a PPSI may maintain at a FICU pursuant to the GENIUS Act.

[254] *See* 12 U.S.C. 1787(k).

maintained in different classifications (also known as ownership categories) at the same FICU.[255] In other words, the SMSIA is $250,000 per accountholder, per FICU, for accounts held in each ownership category.

Today, some Share Accounts are eligible for pass-through share insurance. Pass-through share insurance coverage is a mechanism that allows account funds placed at a FICU by a third party on behalf of one or more owners to be insured as if deposited directly at the FICU by the owner(s). Certain regulatory requirements must be satisfied for pass-through share insurance to apply: (1) the account records of the FICU must expressly disclose a basis for pass-through coverage, such as a custodial or agency relationship; (2) the identities and interests of the owners must be ascertainable either from the records of the FICU or records maintained in good faith and in the regular course of business by the account owner or another party that maintains such records for the account owner; and (3) the relationship that provides the basis for pass-through share insurance coverage must be genuine, with the deposited funds actually owned by the named owners.[256]

The NCUA insures ''member accounts''/''accounts'' as defined by section 101(5) of the FCU Act, at all FICUs.[257] Importantly, these terms are not limited to those persons enumerated in the credit union's field of membership who have become members. They also includes certain nonmembers, such as other nonmember credit unions; nonmember public units and political subdivisions; and, in the case of credit unions serving predominantly low-income members, deposits of nonmembers generally. In other words, the NCUA provides share insurance coverage to members and those otherwise eligible to maintain insured accounts at FICU. In general, the NCUA looks to the actual owner of the funds in the ''account'' to satisfy the membership or otherwise be eligible to maintain an insured account requirement.

2. GENIUS Act Provisions Concerning Share Insurance

The GENIUS Act expressly provides that Payment Stablecoins ''shall not be backed by the full faith and credit of the United States, guaranteed by the United States Government, subject to deposit insurance by the Federal Deposit Insurance Corporation, or subject to share insurance by the National Credit Union Administration,'' and it is unlawful to make contrary representations.[258]

These provisions appear to be inconsistent with providing share insurance to Payment Stablecoin holders on a pass-through basis. When the NCUA insures accounts on a pass-through basis, it treats end Customers as accountholders. Treating Payment Stablecoin holders as the insured accountholders on a pass-through basis seems inconsistent with the GENIUS Act's prohibition on Payment Stablecoins being ''subject to share insurance.'' Additionally, third parties that establish pass-through insurance arrangements often market the availability of NCUA share insurance to their customers, which is consistent with the principle that a third party offering pass-through insurance is effectively offering an access mechanism to an NCUA-insured Share Account. The GENIUS Act's firm prohibition on marketing Payment Stablecoins as subject to share insurance seems inconsistent with the concept of Payment Stablecoins serving as an access mechanism for NCUA-insured Share Accounts. Moreover, the fact that a Payment Stablecoin holder would generally engage in transactions by transferring Payment Stablecoins, without funds ever leaving the NCUA-insured Share Account, further differentiates Payment Stablecoin arrangements from existing pass-through arrangements, in which funds generally are withdrawn from the Share Account when transactions are made.

3. Proposed Amendments to § 745.6(b)

For reasons just discussed, the NCUA proposes to amend its share insurance rules, found in part 745 of the NCUA's regulations, to clarify that Share Accounts held as reserves for a Payment Stablecoin are not insured to Payment Stablecoin holders on a pass-through basis. Under the proposed rule, such accounts would be insured as corporate accounts of their owner, the PPSI. The NCUA proposes to amend its share insurance rules for corporate accounts, found at 12 CFR 745.6, to expressly include within their scope funds in Share Accounts held as reserves backing Payment Stablecoins.

The proposed rule would split current 745.6 into two subparagraphs. Paragraph (a) would contain existing 745.6 with no changes. Current 745.6 (and proposed paragraph (a)) provides that Share Accounts of a corporation engaged in any independent activity are added together and insured up to the SMSIA, currently $250,000, in the aggregate.[259] Proposed paragraph (b) would provide that notwithstanding any other provision of part 745, accounts at a FICU held as reserves for a Payment Stablecoin, as defined in the GENIUS Act, are accounts of the PPSI's and insured as corporate accounts. Under the proposed rule, all Share Accounts maintained by a PPSI at a FICU would be added together for purposes of the share insurance limit, regardless of whether those Share Accounts consist of reserves backing Payment Stablecoins or serve some other purpose (such as paying the PPSI's operating expenses). The PPSI's Share Accounts would not be insured to Payment Stablecoin holders on a pass-through basis.

4. Request for Comment on Share Insurance Coverage Proposal

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 167:* Is the NCUA's proposed treatment of Share Accounts that compose reserves for a Payment Stablecoin under section 4 of the GENIUS Act appropriate?[260] Is this the best reading of the GENIUS Act and FCU Act?

*Question 168:* If Payment Stablecoin reserves were eligible for pass-through share insurance, to what extent would PPSIs satisfy pass-through requirements, either today or in the future? Should the requirements be tailored for PPSIs in any way, and if so, how?

*Question 169:* If Payment Stablecoin reserves are or are not eligible for pass-through share insurance, what impact would this have on the market demand for Payment Stablecoins? What impact would it have on the composition of Reserve Assets of PPSIs?

*Question 170:* If Payment Stablecoin reserves are eligible for pass-through share insurance, what impact would that have on the NCUSIF?

*Question 171:* If Payment Stablecoin reserves are eligible for pass-through share insurance, how would that impact the risk of a PPSI's risk of failure?

*Question 172:* Should the availability of pass-through insurance or lack thereof have an impact on any of the

[255] *See* 12 U.S.C. 1787(k)(1)(C).

[256] 12 CFR 745.2(c)(1)–(2).

[258] 12 U.S.C. 5903(e)(1), (2).

[259] The share insurance regulations define being engaged in an ''independent activity'' to mean an activity other than one directed solely at increasing insurance coverage. 12 CFR. 745.6. The NCUA has historically interpreted ''corporation'' broadly for purposes of section 745.6 to include similar forms of organizations established under State law, such as limited liability companies.

[260] 12 U.S.C. 5903(a)(1)(A)(ii).

other requirements in the proposed rule?

5. Treatment of Shares in Tokenized Form

The GENIUS Act establishes a Federal regulatory framework for the issuance of Payment Stablecoins and related Payment Stablecoins activities; the GENIUS Act does not specifically address tokenized deposits or tokenized shares in Share Accounts), other than to provide that the definition of ''payment stablecoin'' does not include, among other things, a deposit, including a deposit recorded using Distributed Ledger technology,[261] and to provide that nothing in the GENIUS Act may be construed to limit the authority of an IDI (including a FICU) to engage in activities permissible pursuant to applicable State and Federal law, including accepting or receiving deposits or shares (in the case of a credit union), and issuing digital assets that represent those deposits or shares.[262] Although Payment Stablecoins and tokenized shares [263] can both be used as a means of payment and can use the same underlying technological components and characteristics, Payment Stablecoins and tokenized shares are economically and legally distinct. Payment Stablecoins generally represent a PPSI's liability where the promise to redeem and to maintain a stable value is backed by highly liquid, short-term, and safe assets (including deposits and funds in Share Accounts at IDIs) held in reserve to mitigate concerns of counterparty risk.

A tokenized share, on the other hand, is a FICU's share liability represented in a particular way: in tokenized form and recorded on a Distributed Ledger technology. Like other shares, tokenized shares fund a FICU's extensions of credit and represent an integral part of the maturity and liquidity transformation services provided by credit unions. FICUs are subject to extensive regulatory and supervisory requirements, and maintain Federal share insurance.

The NCUA is using this proposed rule as a vehicle to clarify the treatment of tokenized shares under the FCU Act. Whether or not a particular tokenized financial product is considered a tokenized share for purposes of the FCU Act is relevant, among other things, to: (1) the applicability of share insurance,[264] (2) distribution of assets in the event of an institution's failure and liquidation,[265] (3) regulatory reporting purposes,[266] and (4) whether it would not be subject to the GENIUS Act.[267] Accordingly, the NCUA is proposing to amend its share insurance rules under part 745 to clarify that the application of share insurance to share accounts does not depend upon the technology or recordkeeping used to record a FICU's share liabilities.

The FCU Act's definition of an ''account''/''member account'' is technology neutral, and therefore, tokenized forms of shares in Share Accounts are not a separate category of accounts under the statute. For a FICU's tokenized financial product to be considered an account, it must meet the statutory definition of ''account''/''member account'' under section 101(5) of the FCU Act (12 U.S.C. 1752(5)). The technology used in crediting an account, evidencing a share liability, or recording or transferring a share, is not a factor in applying the statutory definition. A tokenized product that meets the statutory definition of ''account''/''member account'' is a share account, and as such, is treated no differently under the FCU Act than other forms of share accounts. Accordingly, a FICU member or accountholder using tokenized shares is afforded the same Federal share insurance coverage under the FCU Act as a FICU member or accountholder using non-tokenized shares.

The proposed rule would amend the NCUA's share insurance regulations to expressly include the general principle that the technology or recordkeeping utilized by a FICU to record its account liabilities does not affect whether those liabilities constitute insurable ''accounts.'' The proposed amendment is intended to codify this principle. Thus, a FICU's tokenization of its share ''account'' liabilities would not alter the legal status of those liabilities as insurable share ''accounts.'' Under the proposed rule, members and accountholders with tokenized shares in accounts would be entitled to the same benefits as members and accountholders with more traditional forms of accounts, including the NCUA's share insurance coverage.

Although a tokenized share is an insurable share ''account,'' there may be tokenized FICU liabilities that are not insurable share accounts, irrespective of an intention or representation that such constitute an insurable share account. If a product does not meet the statutory definition of an ''account,'' will not be an insurable share account. FICUs should also be mindful of the evolving characteristics and capabilities of tokenized shares that may lead to any material changes to the underlying nature throughout a product or transaction lifecycle to ensure ongoing alignment of the underlying tokenized share with the FCU Act's statutory definition of account.

As noted above, under the NCUA's regulations, for pass-through share insurance to apply, certain recordkeeping and ownership requirements must be met.[268] The NCUA seeks comment on whether any amendments to the share insurance rules, including the rules related to pass-through coverage, are needed to address tokenized shares.[269] For example, the pass-through insurance rules require that a FICU's account records expressly indicate a relationship, such as a fiduciary or agent relationship, that provides a basis for pass-through coverage.[270] Parties often satisfy this requirement today through account titling. To the extent tokenized Share Account arrangements may involve different approaches to account titling or recordkeeping, the NCUA seeks comment on what clarifications to the NCUA's pass-through rules would be appropriate.

6. Request for Comment on Treatment of Share Accounts in Tokenized Form

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 173:* Is the NCUA's proposed amendment to part 745

[261] *See* 12 U.S.C. 5901(22).

[262] *See* 12 U.S.C. 5915(a)(1).

[263] For purposes of this discussion, the NCUA is using the term ''tokenized shares'' to refer to tokenized forms of funds deposited in in Share Accounts, as defined by proposed Part 706, and ''accounts,'' or ''member accounts'' as defined by section 101(5) of the FCU Act. 12 U.S.C. 1752(5).

[264] *See* 12 U.S.C. 1781(a).

[265] See 12 U.S.C. 1787(b)(11).

[266] *See* 12 U.S.C. 12 U.S.C. 1756, 1766, 1781, and 1782; 12 CFR part 741.

[267] *See* 12 U.S.C. 5901(22)(B)(ii) (stating the GENIUS Act's definition of ''payment stablecoin'' expressly does not include a digital asset that ''is a deposit (as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813)), including a deposit recorded using distributed ledger technology.''). Consistent with the GENIUS Act's rules of construction, which provide that ''[n]othing in this chapter may be construed to limit the authority of a . . . Federal credit union [or] State credit union . . . to engage in activities permissible pursuant to applicable State and Federal law, including—(1) accepting or receiving deposits or shares (in the case of a credit union), and issuing digital assets that represent those deposits or shares,'' the NCUA believes that tokenized shares are not covered by the GENIUS Act's definition of ''payment stablecoin.''

[268] *See* 12 CFR 745.2(c).

[269] The NCUA's pass-through insurance rules support the agency's ability to carry out its statutory obligation to aggregate and insure accounts of each eligible accountholder up to the insurance limit, regardless of whether funds are held in the name of the accountholder or another party. *See* 12 U.S.C. 1787(k)(1)(A)–(B); *see* also 12 U.S.C. 1787(d)(1) (requiring the NCUA to pay share insurance as soon as possible following a FICU's failure).

[270] 12 CFR 745.2(c)(1).

clarifying that the application of share insurance to share ''accounts'' does not depend upon the technology or recordkeeping used to record a FICU's share liabilities appropriate? Should the NCUA consider a more narrow amendment specifically focused on tokenized shares?

*Question 174:* Should the NCUA provide additional clarity regarding the treatment of tokenized shares outside of the share insurance context?

*Question 175:* Would it be helpful for the NCUA to consider defining relevant terms related to tokenized shares for purposes of the FCU Act, and, if so, what defined terms should be considered?

*Question 176:* What key characteristics of tokenized shares might be considered in the context of whether a particular product would be considered an ''account'' under the FCU Act? Do such products, including those that represent tokenized shares in accounts, function similarly or dissimilarly to the types of instruments considered an account for purposes of the FCU Act (*e.g.,* share certificates and other similar official instruments)?

*Question 177:* Although the statutory definition of ''account'' is technology neutral, how might technology and the evolving capabilities of tokenized share account products, including through application of smart contracts, alter the underlying nature of a FICU's liability?

*Question 178:* Should NCUA's rules and regulations be further updated to reflect reporting and recordkeeping considerations that are unique to blockchain and Distributed Ledger-based systems, and if so, how?

*Question 179:* The NCUA determines share insurance coverage at the time of the failure of a FICU, based on the FICU's account records and in accordance with share insurance coverage rules. A FICU's account records are evidence of its share account obligations. What challenges, if any, do tokenized shares in accounts present as to blockchain and Distributed Ledger recordkeeping, particularly as it relates to identifying owners of the accounts and aggregating tokenized shares in accounts with other traditional share accounts?

*Question 180:* How should the NCUA view a Digital Asset that only represents an interest in or claim on a Share Account at a FICU rather than being the tokenized share in an account itself? Under what circumstances could such a product be viewed as a tokenized share in an account of a FICU, and under what circumstances could such a product be viewed as a Payment Stablecoin backed by tokenized shares in Share Accounts? In what other manner could such a product be characterized for purposes of the GENIUS Act and other applicable law (*e.g.,* banking, credit union, and securities laws)? How would Digital Assets that represent tokenized shares in accounts but are not themselves share accounts be treated for accounting purposes; for example as an intangible asset or as cash and cash equivalents?

*Question 181:* What additional clarifications of existing pass-through rules are needed, if any, to address tokenized share arrangements? Should the NCUA's approach to tokenized shares differ in any respect from the approach to other share accounts? To what extent should the NCUA consider modifications with respect to expectations around account titling and recordkeeping? Are there particular considerations for any specific type of third-party arrangement?

## V. General Request for Comment

The NCUA requests feedback on all aspects of the proposed rule, including:

*Question 182:* A PPSI must be obligated to convert, redeem, or repurchase its issued Payment Stablecoins for a fixed amount of Monetary Value, not including a Digital Asset denominated in a fixed amount of Monetary Value. Is additional guidance needed on the accounting treatment for issued Payment Stablecoins and the associated Reserve Assets? If so, what considerations should factor into any such guidance (*e.g.,* what legal structures would be relevant to the accounting treatment)?

*Question 183:* What impact would the proposed rule have on credit creation? How can the NCUA minimize any negative impact to credit creation?

*Question 184:* Should any additional aspects of the proposed rule be adjusted based on the size of the PPSI? For example, are there additional aspects of the proposed rule that should be applied exclusively to issuers with outstanding issuance above a certain amount? Should the NCUA measure the ''size'' of a PPSI by its outstanding Payment Stablecoin issuance or is there a better measurement?

*Question 185:* Are there any aspects of the proposed rule that the NCUA should adjust to promote fair competition between FICUs and non-FICUs?

*Question 186:* Are there any other technical developments in Distributed Ledger Protocols, Digital Assets, or related technologies that the proposed rule should address to ensure the purposes of the GENIUS Act are being met? For example, should the NCUA consider automating aspects of reporting or oversight? Should the NCUA incorporate additional provisions concerning the use of smart contracts when considering compliance with aspects of the proposed rule, such as risk management? Are there dynamics relevant to particular blockchains that could affect liquidity, redemption, operating risk, or run risk that the NCUA should consider and incorporate into any final rule?

*Question 187:* Are there any particular considerations that the NCUA should bear in mind or changes that the NCUA should make with respect to PPSIs that are owned or operated by a consortium of other entities subject to the jurisdiction of various primary Federal payment stablecoin regulators and/or State payment stablecoin regulators?

*Question 188:* Should the NCUA adopt any new rules or change any existing rules to implement the insolvency provisions of the GENIUS Act? Should the NCUA require PPSIs to establish resolution plans?

*Question 189:* Section 12 of the GENIUS Act provides that the primary Federal payment stablecoin regulators, in consultation with the National Institute of Standards and Technology, and other relevant standard-setting organizations, and State bank and credit union regulators, shall assess and, if necessary, prescribe standards for PPSIs to promote compatibility and interoperability with other PPSIs and the broader digital finance ecosystem. What efforts are issuers currently taking to address challenges posed by interoperability? What considerations should the regulators take into account in determining whether standards are necessary? Would the promulgation of standards help to broaden adoption of Payment Stablecoins?

*Question 190:* What are risks posed by different types of interoperability solutions and how might issuers and regulators manage those risks? How can interoperability solutions aid in addressing risks facing issuers? What risks are introduced by cross-chain bridges and other interoperability solutions and how do these risks interact with BSA/AML and sanctions requirements? What steps can be taken to address such BSA/AML and sanctions concerns?

*Question 191:* Is there anything else the NCUA should do to address potential fraud concerns in the context of a final rule? For example, a bad actor may create fraudulent tokens intended to mimic a Payment Stablecoin. Are there technical or other requirements the NCUA should impose to mitigate the potential for such fraudulent tokens to harm consumers? For example, should authentic Payment Stablecoins be

required to have an electronic signature that can be verified by a recipient? Are there other areas of potential fraud that the NCUA should be aware of and should attempt to mitigate in the final rule?

*Question 192:* What changes to existing rules should be made in recognition of the GENIUS Act?

*Question 193:* Should the NCUA establish minimum standards for customer service and dispute resolution for retail holders of Payment Stablecoins, including requirements for response timelines and escalation procedures?

*Question 194:* Should the NCUA require NCUA-Licensed PPSIs above a certain size to conduct periodic ''stress tests'' or run simulations modeled on historical stablecoin de-pegging events? If so, how should stress scenarios be designed and should results be made public?

*Question 195:* Should the NCUA standardize the disclosures that NCUA-Licensed PPSIs are required to provide to Customers similar to how the Truth in Savings Act standardizes disclosures for share accounts, so that Customers can easily compare Payment Stablecoin products, redemption terms, and fee structures across issuers?

*Question 196:* Should the NCUA establish any guardrails on the use of artificial intelligence or automated-decision making systems by NCUA-Licensed PPSIs in the context of risk management, redemption processing, or reserve asset management? Are there particular AI-related operational risks unique to Payment Stablecoin issuance that the proposed rule does not adequately address?

*Question 197:* Many stablecoins are heavily concentrated on one or two public blockchains. Should the NCUA require NCUA-Licensed PPSIs to assess and disclose the risks of dependence on a single blockchain protocol, including the risk that a protocol upgrade, fork, or failure could impair redemption?

*Question 198:* Should the NCUA establish requirements for the treatment of ''lost'' or unclaimed Payment Stablecoins (*e.g.,* due to lost Private Keys or dormant accounts), including escheatment procedures or Customer notification requirements?

*Question 199:* Should the NCUA require independent audits of smart contracts used in Payment Stablecoin issuance and redemption, and should audit results be made public to enhance transparency and Customer trust?

## VI. Regulatory Procedures

### *A. Providing Accountability Through Transparency Act of 2023*

The Providing Accountability Through Transparency Act of 2023 (5 U.S.C. 553(b)(4)) (Act) requires that a notice of proposed rulemaking include the internet address of a summary of not more than 100 words in length of a proposed rule, in plain language, that shall be posted on the internet website under section 206(d) of the E-Government Act of 2002 (44 U.S.C. 3501 note) (commonly known as *regulations.gov*).

In summary, the proposed rule would supplement the NCUA's February 2026 proposal for approval and licensure of permitted payment stablecoin issuers (PPSIs) subject to the NCUA's jurisdiction by providing standards for PPSIs subject to the NCUA's jurisdiction, as required by the Guiding and Establishing National Innovation for U.S. Stablecoins Act (GENIUS Act). This proposal would also make amendments to address share insurance coverage, tokenized shares, and other conforming and clarifying amendments.

The proposal and the required summary can be found at *https://www.regulations.gov.*

### *B. Executive Orders 12866, 13563, and 14192*

Pursuant to Executive Order 12866 (''Regulatory Planning and Review''), as amended by Executive Order 14215, a determination must be made whether a regulatory action is significant and therefore subject to review by the Office of Management and Budget (OMB) in accordance with the requirements of the Executive Order.[271] Executive Order 13563 (''Improving Regulation and Regulatory Review'') supplements and reaffirms the principles, structures, and definitions governing contemporary regulatory review established in Executive Order 12866.[272] This proposed rule was drafted and reviewed in accordance with Executive Order 12866 and Executive Order 13563. OMB has determined that this proposed rule is an economically significant regulatory action under Section 3(f)(1) of Executive Order 12866 and, therefore, is subject to review under Executive Order 12866.

Executive Order 14192 (''Unleashing Prosperity Through Deregulation'') requires that any new incremental costs associated with new regulations shall, to the extent permitted by law, be offset by the elimination of existing costs associated with at least 10 prior regulations.[273] This proposed rule, if finalized as proposed, is expected to be a deregulatory action under Executive Order 14192. NCUA estimates this rule generates $112.6 million in annualized cost savings at a 7% discount rate, discounted relative to year 2024, over a perpetual time horizon.

Scope of Affected Entities

For the purposes of this analysis and Paperwork Reduction Act estimates, NCUA estimates 10 applicants would apply for and be approved as an NCUA-Licensed PPSI in the first few years after the enactment of the proposed rule. Based on current CUSO ownership data, approximately 70 percent are wholly owned. Applying this to the estimated number of PPSIs assumes seven of the ten are wholly owned for consolidation purposes.

To estimate the impact of the proposal, NCUA estimated the total expected issuance per NCUA-Licensed PPSI, using private sector forecasts of aggregate stablecoin issuance, which put the upper bounds at $500 billion in 2026. However, considering the smaller market share credit union's hold in the financial services space, NCUA conservatively assumed a much lower issuance level for NCUA-Licensed PPSIs of $10 billion.

Beyond the direct issuance of Payment Stablecoins under section 4 of the GENIUS Act, the proposed rule would also encompass FICUs that participate in Payment Stablecoin-related activities, as Parent Companies or custodians, consistent with the GENIUS Act. As with estimating the number of NCUA-Licensed PPSIs, the NCUA recognizes significant uncertainty regarding the number of FICUs that would participate in these activities. For the purposes of providing a conservative estimate, the NCUA assumes that approximately 15 FICUs would perform one or more of the activities authorized under the proposed rule.[274]

These estimates establish numbers that serve as the basis for evaluating the costs, benefits, and economic effects of the proposed rule, while acknowledging the inherent uncertainty resulting from a lack of historical precedent.

Baseline

The baseline for this analysis assumes no statutory requirement to establish a consistent framework for PPSIs. Without the statute, and codifying rule, there

[271] 58 FR 51735 (Oct. 4, 1993).

[272] 76 FR 3821 (Jan. 21, 2011).

[273] 90 FR 9065 (Feb. 6, 2025).

[274] This number is consistent with the number of FICUs that report offering digital asset services as of December 31, 2025.

would be a lack of clarity about which entities could issue Payment Stablecoins and general requirements for Payment Stablecoin issuer applicants. This could potentially result in lower consumer adoption because of uncertainty with the safety of Payment Stablecoins and potentially dampen the market for entities to engage in this activity. Persons are more likely to invest in infrastructure and technology to facilitate stablecoin usage when there is regulatory certainty surrounding the activity. Additionally, the requirement for a consistent framework for all PPSIs helps to ensure that a certain category of issuers do not have a competitive advantage over others. The baseline for this analysis assumes no statutory requirement to establish a consistent framework for PPSIs. To calculate estimated costs, the agency assumes that in the baseline, with no established framework, fewer FICU subsidiaries will issue Payment Stablecoins and estimate that only four FICU subsidiaries would become Payment Stablecoin issuers.

Costs and Benefits to Credit Union System

Ideally, a cost-benefit analysis would identify and monetize, with confidence, all costs and benefits of a regulation. Many financial regulations, however, generate costs and/or benefits that cannot be measured with any degree of precision. In this analysis NCUA has included an evaluation of non-quantified benefits and costs as well as quantified benefits and costs.

The main effect of the proposed rule will be to boost aggregate market capitalization of Payment Stablecoins (the likely response to increased demand for stablecoins with greater adoption) in both the credit union system and the broader financial services industry.

If finalized, the proposed rule would establish a new regulatory framework for Payment Stablecoins issued by subsidiaries of FICUs. The new framework could encourage FICU subsidiaries to issue Payment Stablecoins and lead to an expansion of the Payment Stablecoin market. The expansion would provide the general public with more choices for making payments and engaging in transactions and provide regulatory clarity for FICUs seeking to engage in Payment Stablecoin activities.

Costs and benefits are categorized as follows: (a) reporting, recordkeeping, and compliance; (b) capital requirements; and c) custody authority.

Reporting, Recordkeeping, and Compliance

The requirements established by the proposed rule, consistent with the GENIUS Act, would benefit the industry by promoting safety and soundness of NCUA-Licensed PPSIs. The proposed rule includes a number of safeguards to protect Payment Stablecoin holders, such as the standards related to minimum reserve requirements, composition of reserves, and redemption policies, among others.

The proposed rule would also benefit Customers by providing a more secure environment, relative to the baseline, for activities related to Payment Stablecoins. The proposed rule would provide Customers increased assurance that their Payment Stablecoins are subject to elevated regulatory and supervisory standards. By codifying requirements and standards for reserves, redemption policies, and operational and compliance standards, among others, the proposed rule would require that Payment Stablecoin holders are able to redeem Payment Stablecoins issued by an NCUA-Licensed PPSI at par, including during periods of market stress.

Compliance with the Bank Secrecy Act under the proposed rule, as required by the GENIUS Act, would promote maintaining AML/CFT principles as the financial system integrates new payment technologies, and reduce the frequency and severity of harm caused by criminal activity facilitated through a fragmented digital asset regulatory framework.

For purposes of fulfilling the requirements of the Paperwork Reduction Act (PRA), the NCUA has estimated the average costs associated with the recordkeeping, reporting, and disclosure requirements in the proposed rule.[275] While these costs only represent a portion of the total burden costs imposed by the proposed rule, these costs can help estimate a minimum level of the expected costs incurred by the affected populations.

NCUA-Licensed PPSIs would be required under the proposed rule to create and maintain systems of records related to reserve management and internal audits, establish contingency and restoration plans, and maintain AML/CFT and sanctions compliance programs. The proposed rule mandates submission of quarterly reports, annual audited financial statements, and weekly reports to the NCUA. In addition, PPSIs would be required to provide certain reporting to the board of directors on interest rate risk and certify compliance with AML and sanctions compliance programs annually. These efforts will require various reporting, training, and auditing expenses. The following narrative describes the most material costs expected as a result of the proposed rule, based on PRA analysis. This includes the estimated costs to comply with referenced rules related to AML/CFT and the sanctions compliance program. For a complete listing of PRA burden estimates, please see Section VI D.

- Weekly reporting is estimated to require one hour per week. The total weekly burden for 10 NCUA-licensed PPSIs annually is 520 hours.
- Submission of quarterly reports is estimated to be a total of 640 hours annually (16 hours each quarter, per PPSI).
- Submission of audited financial statement audits each year is estimated to take 704 hours annually, totaling 7,040 for 10 PPSIs.
- Regular reporting to the board of directors on interest rate risk management is estimated to average 40 hours each month for a total of 4,800 burden hours.
- The burden for publishing the monthly Reserve Asset composition report is estimated at 48 hours a month, for a total of 4,800 hours in aggregate.
- The proposed rule mandates annual certification that anti-money laundering and economic sanctions programs have been implemented. NCUA estimates the average annual burden of these activities as 80 hours a year for a total of 800 hours for 10 PPSIs.

NCUA estimates that NCUA-Licensed PPSIs would incur an average of 13,800 hours of burden for these activities. The results in a total of $1.73 million using an estimated hourly labor compensation rate of $92.85.[276] In addition, it is estimated that each PPSI will incur costs of $24,983 in the first year to comply with AML/CFT and sanctions compliance requirements, totaling $249,830 for the 10 estimated NCUA-Licensed PPSIs.[277] In total, NCUA-licensed PPSIs would incur an aggregate $1.98 million in estimated costs to comply with the proposed rule's implementation requirements.

Capital

To estimate the monetary cost of the capital requirements in the proposed

[275] These requirements are described fully in Section VI.D.

[276] Estimated hourly compensation rate is based on the total compensation cost for the Financial Activities Industry, Management, business, and financial occupations series from the Bureau of Labor and Statistics (Table 4. Private industry workers by occupational and industry group—2025 Q04 Results).

[277] *See* 91 FR 18582 (Apr. 10, 2026).

rule NCUA assumes an average cost of capital for each issuer and makes other assumptions regarding the inputs to the cost calculations. To calculate the cost of equity capital requirements, NCUA assume that all issuers will initially be required to maintain the minimum amount of capital which includes the $5M requirement for de novo PPSIs and the ongoing 12-month-operating-expense backstop.

For the cost-of-capital calculation, NCUA assumes 10 NCUA-Licensed PPSIs in year one and the upper-bound for market size, measured by the value of outstanding payment stablecoins, will be $10 billion per NCUA-Licensed PPSI. Additionally, it is assumed that seven NCUA-Licensed PPSIs will be wholly owned and therefore consolidated with the parent FICU.

The cost of capital is the ongoing yearly required return on capital that is expected issuers will pay to obtain equity to satisfy capital requirements. The current estimate of the cost of capital in the banking industry ranges from 5–9 percent. For conservative calculations, NCUA is using 5.73% to account for the lower opportunity cost for credit unions and their subsidiaries due to investment limitations.[278]

This estimate assumes that the 12-month operating expense amount for each issuer to be 0.40% of outstanding payment stablecoins. This cost estimate is a conservative estimate of operating costs of government money market mutual funds and the stablecoin issuer Circle (CLCR)'s 10-Qs as reported pursuant to the Securities Exchange Act of 1934.

The first step calculates the total minimum required capital under the proposal for all expected NCUA-Licensed PPSIs. This includes the fixed $5 million capital requirement and the backstop.

To determine the fixed capital cost, NCUA multiplied the $5 million requirement by 10 to arrive at an aggregate capital requirement of $50 million. The cost of the aggregate $50 million of equity capital multiplied by 5.73% equals $2.87 million.

The estimate for the backstop, which is a capital requirement equal to 12 months of operating costs is 0.40% times the expected $100 billion in outstanding stablecoin issuance ($10 billion estimated issuance times 10 estimated NCUA-Licensed PPSIs) which amounts to $400 million. The cost of this $400 million of required capital is the amount of capital times the cost of equity capital (5.73%), which totals $22.9 million.

The total cost of minimum capital requirements for the proposed rule is $25.79 million, the sum of the cost of capital for the backstop ($22.9 million) and the fixed capital requirement ($2.87 million).

Under the baseline, we assume fewer FICU subsidiaries will issue Payment Stablecoins and for those that do, payment stablecoins issued would have been treated as standard balance sheet assets when consolidated with the parent FICU. Therefore, all stablecoin reserve assets would have been subject to the FICU leverage ratio. We assume that all stablecoin reserve assets would have counted toward the leverage requirement for all FICU subsidiaries. We use a capital requirement of 7%, which equals the capital requirement under the leverage ratio to be well capitalized.

Using the above estimate of $10 billion in issuances per issuer and an estimate of only four FICU subsidiary Payment Stablecoin issuers, assumes a total of $40 billion in issuances among the four wholly owned subsidiaries. With $40 billion in stablecoin issuance in the first year, NCUA estimates that these issuers would have $40 billion in stablecoin reserve assets subject to the capital requirement. Given these assumptions, these four wholly owned subsidiaries would need $2.8 billion in additional capital to cover the stablecoin reserves under the leverage ratio. The cost of this capital under the baseline is estimated to be $160.4 million ($2.8 billion × 5.73%). Therefore, after accounting for the regulatory baseline, we estimate the capital requirements under the proposed rule to result in a net savings of approximately $134.6 million in capital relative to the regulatory baseline.[279]

Therefore, we estimate that the proposed rule creates deregulatory cost savings relative to the baseline by allowing NCUA-Licensed PPSIs to hold capital against reserve assets only as required under the proposed rule, rather than applying the leverage ratio applicable to FICUs.

Custody

The proposed rule will likely result in FICUs offering new fee-based income streams from digital asset custody, settlement services, and other related payment stablecoin activities. The ability to settle obligations on-chain using a regulated instrument could provide operational efficiencies and lower costs associated with a FICU's internal accounting functions. By establishing a definitive set of requirements and standards associated with Payment Stablecoins, the proposed rule would benefit FICUs by providing additional opportunities to leverage their existing membership base, payment system networks, risk management, and compliance infrastructures to compete effectively in the digital payments market.

The proposed rule imposes mandates governing certain custodial activities of FICUs and NCUA-Licensed PPSIs.[280] Because this is largely a new activity for FICUs and their subsidiaries, engaging in custody and safekeeping services will likely result in additional costs under the proposed rule. For example, under the proposed rule, these entities would be required to establish and maintain policies, procedures, and systems to protect customer payment stablecoin reserves, payment stablecoins, private keys, cash, and other property.

The NCUA does not have the data necessary to fully quantify these costs, but expects they would generally be mitigated by the ability of a covered custodian to generate additional revenue through custody and safekeeping services.

Total Estimated Costs/Savings

Based on the analysis above, NCUA estimates the total annual cost savings of the proposed rule to be $132.6 million, driven mainly by the capital relief in the proposed rule for capital that would otherwise have had to been held when consolidating the FICU subsidiaries. This considers the $1.98 million annual cost for reporting, recordkeeping, and compliance; the $25.8 million annual cost of capital for NCUA-Licensed PPSIs; and the $160.4 million in annual *savings* from the capital relief when consolidating subsidiaries.

*C. Regulatory Flexibility Act*

The Regulatory Flexibility Act [281] generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment

[278] The cost of capital is based on the Bank (Regional) measure found at *https://pages.stern.nyu.edu/~adamodar/New_Home_Page/datafile/wacc.html.*

[279] This is an estimate of the impact to capital based on the assumptions provided. Actual net savings or costs may vary based on a variety of factors, but illustrates the expected outcome based on the qualitative and quantitative costs and benefits of the rule.

[280] Specifically, the proposed rule imposes requirements relating to the custody of ''covered assets'' which are payment stablecoin reserves, payment stablecoins used as collateral, and private keys used to issue payment stablecoins, as well as cash and other property received in the course of the provision of custody services for such assets.

[281] 5 U.S.C. 601 *et seq.*

rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. If the agency makes such a certification, it shall publish the certification at the time of publication of either the proposed rule or the final rule, along with a statement providing the factual basis for such certification.[282] For purposes of this analysis, the NCUA considers small credit unions to be those having under $100 million in assets.[283] The NCUA fully considered the potential economic impacts of the regulatory amendments on small credit unions.

This rule will only apply to FICUs that wish to invest in NCUA-approved PPSIs, which are generally CUSOs for purposes of this rule, and provide permissible safekeeping and custody services. The NCUA does not anticipate a significant number of small credit unions will invest in PPSIs or work with a subsidiary (CUSO) to apply to become a PPSI. As of June 30, 2025, only 19 percent of small credit unions have invested in a CUSO, compared to 71 percent of credit unions with assets over $100 million supporting that the majority of NCUA-licensed PPSI applicants will be subsidiaries of larger FICUs. However, to establish the upper limit of estimated small credit unions that would have subsidiaries that become NCUA-licensed PPSIs, we can compare the total number of estimated NCUA-licensed PPSIs used for regulatory analysis (10) in this rulemaking to the total number of small credit unions (2,514 as of December 31, 2025) .If all 10 of the estimated NCUA-licensed PPSIs were subsidiaries of small credit unions, this would equate to 0.40 percent of small entities, which is not considered substnatial. Similarly NCUA does not anticipate a substantial number of small credit unions will provide the safekeeping and custody services provided for in the GENIUS Act due to the sophisticated infrastructure necessary for such activities.

Accordingly, the NCUA certifies the proposed rule would not have a significant economic impact on a substantial number of small credit unions.

*D. Paperwork Reduction Act*

This notice of proposed rulemaking has been reviewed for compliance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*). In accordance with the PRA, the NCUA may not conduct or sponsor, and an organization is not required to respond to, an information collection unless the information collection displays a currently valid Office of Management and Budget (OMB) control number. The NCUA has reviewed the notice of proposed rulemaking and determined that it would introduce new information collection requirements pursuant to the PRA. The NCUA is seeking a new control number for these information collection requirements and will submit them to OMB for review and approval.

Proposed Information Collection

*Title of Information Collection:* Requirements and Standards Associated with the Guiding and Establishing National Innovation for U.S. Stablecoins (GENIUS) Act for the Issuance of Stablecoins by Entities Subject to the Jurisdiction of the National Credit Union Administration.

*OMB Control Number:* 3133–NEW.

*Type of Review:* Regular.

*Affected Public:* Private Sector: Not-for-profit institutions.

*Description:* The proposed rule would establish regulatory requirements for NCUA-supervised permitted payment stablecoins issuers as mandated by the GENIUS Act, as well as provide further clarity for NCUA-supervised custodians.

The information collection requirements in the proposed rule are as follows:

NCUA Summary of Estimated Annual Burden (3133–NEW)

| 12 CFR | Information Collection (IC) activity | Type of burden | Number of respondents | Number of responses per respondent (frequency) | Average time per response (hours) | Total estimated annual burden (hours) |
|---|---|---|---|---|---|---|
| **Implementation Burden** | | | | | | |
| 706.108(a) | Written request to NCUA Board for opportunity to appeal application denial. | Reporting | 10 | 1 | 1 | 10 |
| 706.110(a) | Certification of AML program | Reporting | 10 | 1 | 4 | 40 |
| 706.201(c)(4)(iii) | Rebut the presumption described in 706.201(c)(4)(i), by submitting written materials that demonstrate that the contract, agreement, or other arrangement is not prohibited under 706.201(c)(4). | Reporting | 10 | 1 | 1 | 10 |
| 706.201(c)(5)(iii)(B) | Allows PPSIs to address liquidity needs by selling reserves held as Treasury bills with maturities of 93 days or less through repurchase agreements, provided they first obtain approval from the NCUA. | Reporting | 10 | 1 | 4 | 40 |
| 706.202(a)(2) | Demonstrate the capability to access and monetize identifiable reserve assets. | Reporting | 10 | 1 | 4 | 40 |
| 706.202(g)(1) | Notify the NCUA whenever their reserve assets fall below the minimum required level. | Reporting | 10 | 1 | 1 | 10 |
| 706.203(c)(4) | Notify the NCUA within 24 hours if redemption requests for a PPSI exceed 10% of its total outstanding issuance value within a single day. | Reporting | 10 | 1 | 0.5 | 5 |
| 706.204(a)(3) | Requires PPSIs to periodically regularly report on interest rate risk to management and the board of directors. | Reporting | 10 | 1 | 160 | 1,600 |
| 706.204(b)(7)(i) | Investigate unauthorized access to sensitive customer data and, if misuse is confirmed or likely, notify affected customers and the NCUA promptly. | Reporting | 10 | 1 | 4 | 40 |

[282] 5 U.S.C. 605(b).

[283] 80 FR 57512 (Sept. 24, 2015).

NCUA SUMMARY OF ESTIMATED ANNUAL BURDEN (3133–NEW)—Continued

| 12 CFR | Information Collection (IC) activity | Type of burden | Number of respondents | Number of responses per respondent (frequency) | Average time per response (hours) | Total estimated annual burden (hours) |
|---|---|---|---|---|---|---|
| 706.204(b)(7)(ii) | If a PPSI determines that a group of files has been accessed improperly but is unable to identify which specific customers' information has been accessed and the PPSI determines that misuse of the information is reasonably possible, it would be required to notify all customers in the group. | Reporting | 10 | 1 | 4 | 40 |
| 706.205(h) | Submit a confidential weekly report to the NCUA in a specified format, with the necessary information as outlined in forms made available on the NCUA website. | Reporting | 10 | 1 | 16 | 160 |
| 706.205(i) | Submit quarterly reports on financial condition within 30 days after each quarter ends. | Reporting | 10 | 1 | 80 | 800 |
| 706.205(j) | Submit other reports on financial condition requested by the NCUA upon request. | Reporting | 10 | 1 | 16 | 160 |
| 706.205(k) | Submit ongoing compliance reports to the NCUA. Specifically, within 180 days of application approval and then annually, the PPSIs Board of Directors must certify that anti-money laundering and economic sanctions compliance programs have been implemented. | Reporting | 10 | 1 | 80 | 800 |
| 706.205(l)(2)(ii) | Submit audited financial statements annually, within 120 days after the end of its fiscal year to the NCUA. | Reporting | 10 | 1 | 480 | 4,800 |
| 706.205(l)(2)(iii) | Submit a written notice of late filing to NCUA | Reporting | 10 | 1 | 8 | 80 |
| 706.205(m) | Any person intending to acquire control of an licensed PPSI must comply with the procedures outlined in proposed 12 CFR § 706.111 of Subpart A, including providing a 60-day advance notice to the NCUA. | Reporting | 10 | 1 | 2 | 20 |
| 706.400(b)(1)(iii) | Submit request for prior approval from the NCUA to redeem discretionary repurchases. | Reporting | 10 | 1 | 1 | 10 |
| 706.400(c)(v)(A) | Submit request for prior approval from the NCUA to exercise a call option. | Reporting | 10 | 1 | 1 | 10 |
| 706.400(c)(1)(vi) | Submit request for prior approval from the NCUA for redemption or repurchase of the instrument. | Reporting | 10 | 1 | 1 | 10 |
| 706.402(c)(2)(i) | Respond in writing, within 30 days when notified by the NCUA about proposed additional capital or backstop requirements. | Reporting | 10 | 1 | 40 | 400 |
| 706.402(c)(4) | Submit an acceptable plan to reach the additional capital or backstop requirements. | Reporting | 10 | 1 | 40 | 400 |
| 706.202(a)(1) | Maintain records that are identifiable and segregated from other assets owned or held by the PPSI and calculate the fair value of reserve assets. | Recordkeeping | 10 | 1 | 40 | 400 |
| 706.202(f)(2) | Requires the CEO and CFO (or their equivalents) to submit to NCUA a certification of accuracy. | Recordkeeping | 10 | 1 | 8 | 80 |
| 706.203(b) | Establish a redemption policy | Recordkeeping | 10 | 1 | 8 | 80 |
| 706.204(a)(1) | Establish internal controls and information systems that are suitable for their size, complexity, and activity risk. | Recordkeeping | 10 | 1 | 80 | 800 |
| 706.204(a)(2) | Develop an internal audit system tailored to their size, complexity, and risk profile. | Recordkeeping | 10 | 1 | 80 | 800 |
| 706.204(a)(5) | Create and maintain a system, appropriate to size and operational complexity, for evaluating and monitoring earnings. | Recordkeeping | 10 | 1 | 80 | 800 |
| 706.204(a)(6)(i)(C) | Document transactions with insiders or affiliates and have these transactions reviewed by the board of directors. | Recordkeeping | 10 | 1 | 8 | 80 |
| 706.204(b)(1)(2)(3)(4)(6) and (8) | Establish requirements for information technology and security programs for PPSIs and implement a comprehensive written information security risk control framework, including a program that assesses and managements IT and information security risks. | Recordkeeping | 10 | 1 | 160 | 1,600 |
| 706.204(b)(5) | Establish and maintain security measures for the handling of digital assets. | Recordkeeping | 10 | 1 | 80 | 800 |
| 706.205(f) | Maintain a complete set of books and records in English. | Recordkeeping | 10 | 1 | 40 | 400 |
| 706.205(g) | Develop a records retention policy that ensures that can demonstrate compliance with the GENIUS Act 12 CFR part 15, and all applicable laws and regulations. | Recordkeeping | 10 | 1 | 40 | 400 |
| 706.205(1) | PPSIs with over $50 billion in outstanding issuance value, must prepare annual financial statements in accordance with GAAP. | Recordkeeping | 10 | 1 | 160 | 1,600 |

NCUA SUMMARY OF ESTIMATED ANNUAL BURDEN (3133–NEW)—Continued

| 12 CFR | Information Collection (IC) activity | Type of burden | Number of respondents | Number of responses per respondent (frequency) | Average time per response (hours) | Total estimated annual burden (hours) |
|---|---|---|---|---|---|---|
| 706.302(b)(1) | Requires covered custodians to have written controls to protect customer assets from creditor claims, including those of sub-custodians, in compliance with applicable laws and suited to their business size and risk. | Recordkeeping .. | s10 | 1 | 8 | 80 |
| 706.202(e) | Publish monthly composition report on their website detailing reserve assets. | Disclosure | 10 | 1 | 40 | 400 |
| 706.203(a) | Publicly disclose a redemption policy | Disclosure | 10 | 1 | 1 | 10 |
| 706.203(d)(1) | Publicly disclose certain information related to the PPSI, the payment stablecoin, and fees. | Disclosure | 10 | 1 | 8 | 80 |
| 706.205(1)(2)(i) | Disclose audited financial statements on PPSIs website. | Disclosure | 10 | 1 | 16 | 160 |
| 706.504 | Disclose to the NCUA the same non-public information provided to FinCEN. | Disclosure | 10 | 1 | 1 | 10 |
| | **Ongoing Burden** | | | | | |
| 706.201(c)(4)(iii) | Rebut the presumption described in 706.201(c)(4)(i), by submitting written materials that demonstrate that the contract, agreement, or other arrangement is not prohibited under 706.201(c)(4). | Reporting | 10 | 1 | 1 | 10 |
| 706.201(c)(5)(iii)(B) | Allows PPSIs to address liquidity needs by selling reserves held as Treasury bills with maturities of 93 days or less through repurchase agreements, provided they first obtain approval from the NCUA. | Reporting | 10 | 1 | 1 | 10 |
| 706.202(a)(2) | Demonstrate the capability to access and monetize identifiable reserve assets. | Reporting | 10 | 1 | 16 | 160 |
| 706.202(g)(1) | Notify the NCUA whenever their reserve assets fall below the minimum required level. | Reporting | 10 | 1 | 1 | 10 |
| 706.203(c)(4) | Notify the NCUA within 24 hours if redemption requests for a PPSI exceed 10% of its total outstanding issuance value within a single day. | Reporting | 10 | 1 | 0.5 | 5 |
| 706.204(a)(3) | Requires PPSIs to periodically regularly report on interest rate risk to management and the board of directors. | Reporting | 10 | 12 | 40 | 4,800 |
| 706.204(b)(7)(i) | Investigate unauthorized access to sensitive customer data and, if misuse is confirmed or likely, notify affected customers and the NCUA promptly. | Reporting | 10 | 1 | 1 | 10 |
| 706.204(b)(7)(ii) | If a PPSI determines that a group of files has been accessed improperly but is unable to identify which specific customers' information has been accessed and the PPSI determines that misuse of the information is reasonably possible, it would be required to notify all customers in the group. | Reporting | 10 | 1 | 1 | 10 |
| 706.205(h) | Submit a confidential weekly report to the NCUA in a specified format, with the necessary information as outlined in forms made available on the NCUA website. | Reporting | 10 | 52 | 1 | 520 |
| 706.205(i) | Submit quarterly reports on financial condition within 30 days after each quarter ends. | Reporting | 10 | 4 | 16 | 640 |
| 706.205(j) | Submit other reports on financial condition requested by the NCUA upon request. | Reporting | 10 | 1 | 40 | 400 |
| 706.205(k) | Submit ongoing compliance reports to the NCUA. Specifically, within 180 days of application approval and then annually, the PPSIs Board of Directors must certify that anti-money laundering and economic sanctions compliance programs have been implemented. | Reporting | 10 | 1 | 8 | 80 |
| 706.205(l)(2)(ii) | Submit audited financial statements annually, within 120 days after the end of its fiscal year to the NCUA. | Reporting | 10 | 1 | 40 | 400 |
| 706.205(l)(2)(iii) | Submit a written notice of late filing to NCUA | Reporting | 10 | 1 | 16 | 160 |
| 706.205(m) | Any person intending to acquire control of an licensed PPSI must comply with the procedures outlined in proposed 12 CFR § 706.111 of Subpart A, including providing a 60-day advance notice to the NCUA. | Reporting | 10 | 1 | 2 | 20 |
| 706.400(b)(1)(iii) | Submit request for prior approval from the NCUA to redeem discretionary repurchases. | Reporting | 10 | 1 | 1 | 10 |
| 706.400(c)(v)(A) | Submit request for prior approval from the NCUA to exercise a call option. | Reporting | 10 | 1 | 1 | 10 |
| 706.400(c)(1)(vi) | Submit request for prior approval from the NCUA for redemption or repurchase of the instrument. | Reporting | 10 | 1 | 1 | 10 |

NCUA SUMMARY OF ESTIMATED ANNUAL BURDEN (3133–NEW)—Continued

| 12 CFR | Information Collection (IC) activity | Type of burden | Number of respondents | Number of responses per respondent (frequency) | Average time per response (hours) | Total estimated annual burden (hours) |
|---|---|---|---|---|---|---|
| 706.402(c)(2)(i) | Respond in writing, within 30 days when notified by the NCUA about proposed additional capital or backstop requirements. | Reporting | 10 | 1 | 1 | 10 |
| 706.402(c)(4) | Submit an acceptable plan to reach the additional capital or backstop requirements. | Reporting | 10 | 1 | 1 | 10 |
| 706.202(a)(1) | Maintain records that are identifiable and segregated from other assets owned or held by the PPSI and calculate the fair value of reserve assets. | Recordkeeping | 10 | 1 | 4 | 40 |
| 706.202(f)(2) | Requires the CEO and CFO (or their equivalents) to submit to NCUA a certification of accuracy. | Recordkeeping | 10 | 12 | 0.5 | 60 |
| 706.203(b) | Maintain a redemption policy | Recordkeeping | 10 | 1 | 1 | 10 |
| 706.204(a)(1) | Maintain internal controls and information systems that are suitable for their size, complexity, and activity risk. | Recordkeeping | 10 | 1 | 1 | 10 |
| 706.204(a)(2) | Maintain an internal audit system tailored to their size, complexity, and risk profile. not warranted. | Recordkeeping | 10 | 1 | 1 | 10 |
| 706.204(a)(5) | Create and maintain a system, appropriate to size and operational complexity, for evaluating and monitoring earnings. | Recordkeeping | 10 | 1 | 1 | 10 |
| 706.204(a)(6)(i)(C) | Document transactions with insiders or affiliates and have these transactions reviewed by the board of directors. | Recordkeeping | 10 | 1 | 1 | 10 |
| 706.204(b)(1)(2)(3)(4)(6) and (8) | Maintain requirements for information technology and security programs for PPSIs and implement a comprehensive written information security risk control framework, including a program that assesses and managements IT and information security risks. | Recordkeeping | 10 | 1 | 1 | 10 |
| 706.204(b)(5) | Maintain security measures for the handling of digital assets. | Recordkeeping | 10 | 1 | 1 | 10 |
| 706.205(f) | Maintain a complete set of books and records in English. | Recordkeeping | 10 | 1 | 8 | 80 |
| 706.205(g) | Maintain a records retention policy that ensures that can demonstrate compliance with the GENIUS Act 12 CFR part 15, and all applicable laws and regulations. | Recordkeeping | 10 | 1 | 1 | 10 |
| 706.205(1) | PPSIs with over $50 billion in outstanding issuance value, must prepare annual financial statements in accordance with GAAP. | Recordkeeping | 10 | 1 | 1 | 10 |
| 706.302(b)(1) | Requires covered custodians to have written controls to protect customer assets from creditor claims, including those of sub-custodians, in compliance with applicable laws and suited to their business size and risk. | Recordkeeping | 10 | 1 | 8 | 80 |
| 706.202(e) | Publish monthly composition report on their website detailing reserve assets. | Disclosure | 10 | 12 | 8 | 960 |
| 706.203(a) | Publicly disclose a redemption policy | Disclosure | 10 | 1 | 1 | 10 |
| 706.203(d)(1) | Publicly disclose certain information related to the PPSI, the payment stablecoin, and fees. | Disclosure | 10 | 1 | 1 | 10 |
| 706.205(1)(2)(i) | Disclose audited financial statements on PPSIs website. | Disclosure | 10 | 1 | 8 | 80 |
| 706.504 | Disclose to the NCUA the same non-public information provided to FinCEN. | Disclosure | 10 | 1 | 1 | 10 |
| Total Estimated Annual Burden (Hours). | | | | | | 26,770 |

The NCUA invites comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and cost of operation, maintenance, and purchase of services to provide information.

All comments are a matter of public record. Interested persons are invited to submit written comments via email to (1) *PRAComments@ncua.gov* or (2) visit *www.reginfo.gov/public/do/PRAMain* (find this particular information collection by selecting the tab titled ''Information Collection Review'' and click on to the section titled ''Currently under Review—Open for Public comment'').

*E. Executive Order 13132 on Federalism*

Executive Order 13132 encourages regulatory agencies to consider the impact of their actions on State and local interests. The NCUA, an agency as defined in 44 U.S.C. 3502(5), complies with the executive order to adhere to

fundamental federalism principles. As required by the GENIUS Act, the proposed rule would require that all FICU subsidiaries, including subsidiaries of FISCUs, seeking to become PPSIs apply to the NCUA for licensure. It would also impose standards on NCUA-Licensed PPSIs. As any subsidiary of a FISCU cannot be licensed a permitted State payment stablecoin regulator, the rulemaking would not have direct effect on the states, the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

*F. Assessment of Federal Regulations and Policies on Families*

The NCUA has determined that this proposed rule would not affect family well-being within the meaning of Section 654 of the Treasury and General Government Appropriations Act, 1999.[284] While the proposed rule could contribute to an expansion in access to Payment Stablecoin services, the effect would be indirect and not easily quantifiable.

**List of Subjects**

*12 CFR Part 702*

Credit unions, Reporting and recordkeeping requirements.

*12 CFR Part 704*

Credit unions, Reporting and recordkeeping requirements, Surety bonds.

[284] Public Law 105–277, 112 Stat. 2681 (1998).

By the National Credit Union Administration Board, this 14th day of May, 2026.

**Ji Kwon,**

*Acting Secretary of the Board.*

For the reasons stated in the preamble, the NCUA Board proposes to amend chapter VII of title 12 of the Code of Federal Regulations as follows:

## PART 702—CAPITAL ADEQUACY

■ 1. The authority citation for part 702 continues to read as follows:

**Authority:** 12 U.S.C. 1757(9), 1766(a), 1784(a), 1786(e), 1790d.

* * * * *

■ 2. Amend the definition of net worth in § 702.2 by adding paragraph (5) to read as follows:

**§ 702.2 Definitions.**

* * * * *

(5) *Permitted Payment Stablecoin Issuers.* An Insured Credit Union that is consolidated with a permitted payment stablecoin issuer, as defined in § 706.2 of this chapter, must make the following adjustments when calculating its net worth:

(i) Deconsolidate any permitted payment stablecoin issuer from the insured credit union's balance sheet, removing applicable assets, liabilities and equity;

(ii) Deduct from net worth any amount of positive retained earnings that originated from the permitted payment stablecoin issuer to the extent not paid out as dividends to the insured credit union; and

(iii) Exclude any investment in (to the extent not deducted under paragraph (5)(i) of this section) and receivable from the permitted payment stablecoin issuer when calculating total assets, as applicable.

(iv) Any amounts deducted from net worth under paragraph (5) are also deducted from total assets, to the extent not already deducted.

* * * * *

■ 3. Amend § 702.104(b)(2) by:

■ i. In subparagraph (iv), removing ''; and''

■ ii. Adding a new paragraph (v); and

■ iii. Renumbering current paragraph (v) as paragraph (vi) to read as follows:

**§ 702.104 Risk-based capital ratio.**

* * * * *

(b) * * *

(2) * * *

(iv) Identified losses not reflected in the risk-based capital ratio numerator.

(v) *Permitted Payment Stablecoin Issuers.* For an Insured Credit Union with a consolidated permitted payment stablecoin issuer, the deductions and deconsolidation required under paragraph (5) of the definition of net worth; and

(vi) Mortgage servicing assets that exceed 25 percent of the sum of the capital elements in paragraph (b)(1) of this section, less deductions required under paragraphs (b)(2)(i) thorough (v) of this section.

* * * * *

## PART 704—CORPORATE CREDIT UNIONS

■ 4. The authority citation for part 704 continues to read as follows:

**Authority:** 12 U.S.C. 1766(a), 1781, 1789.

■ 5. Amend § 704.2 by amending the definitions of *Retained Earnings* and *Tier 1 capital* to read as follows.

**§ 704.2 Definitions.**

* * * * *

*Retained earnings* means undivided earnings, regular reserve, reserve for contingencies, supplemental reserves, reserve for losses, GAAP equity acquired in a merger, and other appropriations from undivided earnings as designated by management or the NCUA. Retained earnings does not include any amount of positive retained earnings that originated from a consolidated permitted payment stablecoin issuer to the extent not paid out as dividends to the insured credit union;

* * * * *

*Tier 1 capital* means the sum of items in paragraphs (1) and (2) of this definition from which items in paragraphs (3) through (8) of this definition are deducted or adjusted:

(1) Retained earnings;

(2) Perpetual contributed capital;

(3) Deduct the amount of the corporate credit union's intangible assets that exceed one half percent of its moving daily average net assets (however, the NCUA may direct the corporate credit union to add back some of these assets on the NCUA's own initiative, or the NCUA's approval of petition from the applicable State regulator or application from the corporate credit union);

(4) Deduct investments, both equity and debt, in unconsolidated CUSOs;

(5) Deduct an amount equal to any PCC or NCA that the corporate credit union maintains at another corporate credit union;

(6) Deduct any amount of PCC received from federally insured credit unions that causes PCC minus retained earnings, all divided by moving daily average net assets, to exceed two percent when a corporate credit union's

retained earnings ratio is less than two and a half percent.

(7) Deduct any natural person credit union subordinated debt instrument held by the corporate credit union; and

(8) An Insured Credit Union that is consolidated with a permitted payment stablecoin issuer, as defined in § 706.2 of this chapter, must make the following adjustments when calculating its net worth:

(i) Deconsolidate any permitted payment stablecoin issuer from the insured credit union's balance sheet; and

(ii) Exclude any investment in (to the extent not deducted under paragraph (5)(i) of this section) and receivable from the permitted payment stablecoin issuer when calculating total assets, as applicable; and

(9) Mortgage servicing assets that exceed 25 percent of the sum of the capital elements in paragraphs (1) and (2) of this definition, less deductions required under paragraphs (3) thorough (8) of this section.

■ 6. Add reserved part 706 to Subchapter A to read as follows:

**CHAPTER VII—NATIONAL CREDIT UNION ADMINISTRATION**

**SUBCHAPTER A—REGULATIONS AFFECTING CREDIT UNIONS**

## PART 706—PAYMENT STABLECOINS

706.1 Authority, Purpose and Scope.
706.2 Definitions.
706.3 Severability.

**Subpart A—Investment in and Approval of Issuers That Are Subsidiaries of Insured Credit Unions**

706.101 Scope.
706.102 Rules of General Applicability.
706.103 Filing Required.
706.104 Investigations.
706.105 Evaluation of Applications and Factors to be Considered.
706.106 Timing for Decision on Applications.
706.107 Denial.
706.108 Opportunity for Hearing; Final Determination.
706.109 Right to Reapply.
706.110 Certification of Anti-Money Laundering and Economic Sanctions Compliance Programs.
706.111 Change in Parent Company.
706.112 Investment Limitation.

**Subpart B—NCUA-Licensed Permitted Payment Stablecoin Issuers and**

706.201 Activities.
706.202 Reserve Assets.
706.203 Redemption.
706.204 Risk management.
706.205 Audits, Reports, and Supervision.

**Subpart C—Custody**

706.301 Definitions.
706.302 Covered Asset Custodial Property Requirements.
706.303 Use of Omnibus Accounts.
706.304 Self-custody hardware and software exclusion.

**Subpart D—Capital and Operational Backstop**

706.401 Capital Elements.
706.402 Minimum Capital and Backstop.
706.403 Individual Additional Capital or Backstop Requirement.

**Subpart E—Supervision and Enforcement Policy for Anti-Money Laundering/ Countering the Financing of Terrorism Program Requirements for NCUA-Licensed Permitted Payment Stablecoin Issuers**

706.501 Definitions.

**§ 706.502 NCUA Supervision and Enforcement Policy.**

**§ 706.503 FinCEN Consultation.**

**§ 706.504 Disclosure of Supervisory Information to FinCEN.**

**Authority:** 12 U.S.C. 5901 *et seq.;* 12 U.S.C. 1766(a), 1786, and 1789(a)(11).

### § 706.1 Authority, purpose, and scope.

(a) *Authority and purpose.* The NCUA is issuing this part pursuant to its authority under the Guiding and Establishing National Innovation for U.S. Stablecoins Act or GENIUS Act (12 U.S.C. 5901 *et seq.*).

(b) *Scope.* This part applies to insured credit unions and all payment stablecoin issuers with investment or loans from insured credit unions and sets forth the requirements for NCUA-issued licenses.

(c) *No limitation of authority.* Nothing in this part shall be read to limit the authority of the NCUA to take action under other law, including action to address unsafe or unsound practices or conditions, or violations of law or regulation, under section 206 of the FCU Act.

### § 706.2 Definitions.

Unless otherwise provided in this part, the terms used in this part have the same meanings as set forth in 12 U.S.C. 1752 and 5901. All accounting terms not otherwise defined in this section have meanings consistent with the commonly accepted meanings under United States generally accepted accounting principles (U.S. GAAP). The following definitions apply to this part:

*Affiliate* means a Person that controls, is controlled by, or is under common Control with another Person.

*Applying Issuer* means any entity applying to the NCUA for an NCUA permitted payment stablecoin issuer license.

*Bank Secrecy Act* means:

(1) Section 21 of the Federal Deposit Insurance Act (12 U.S.C. 1829b);

(2) Chapter 2 of title I of Public Law 91–508 (12 U.S.C. 1951 *et seq.*); and

(3) Subchapter II of chapter 53 of title 31, United States Code and notes thereto (31 U.S.C. 5311 *et seq.*).

*Control.* A Person controls another Person if:

(1) The Person directly or indirectly or acting through one or more other Persons owns, controls, or has power to vote 25 percent or more of any class of voting securities of the other Person;

(2) The Person controls in any manner the election of a majority of the Directors or trustees of the other Person; or

(3) The NCUA determines, after notice and opportunity for hearing, that the Person directly or indirectly exercises a controlling influence over the management or policies of the other Person.

*Customer* means a Person that purchases (through any consideration) the products or services of another person.

*Digital Asset* means any digital representation of value that is recorded on a cryptographically secured Distributed Ledger.

*Director,* as used in this part:

(1) Means an individual who serves on the board of directors of:

(a) An Applying Issuer;

(b) An NCUA-Licensed Permitted Payment Stablecoin Issuer;

(c) A Parent Company of an Applying Issuer or an NCUA-Licensed Permitted Payment Stablecoin Issuer; or

(d) A Principal Shareholder of the Applying Issuer or NCUA-Licensed Permitted Payment Stablecoin Issuer; and

(2) Does not include an advisory director who does not have the authority to vote on matters before the board of directors or any committee of the board of directors and provides solely general policy advice to the board of directors or any committee.

*Distributed Ledger* means technology in which:

(1) Data is shared across a network that creates a public digital ledger of verified transactions or information among network participants; and

(2) Cryptography is used to link the data to maintain the integrity of the public ledger and execute other functions.

*Distributed Ledger Protocol* means publicly available and accessible executable software deployed to a Distributed Ledger, including smart contracts or networks of smart contracts.

*Eligible Financial Institution* means

(1) A Person that:

(a) Is eligible to hold Reserve Assets in custody under section 10(a) of the GENIUS Act (12 U.S.C. 5909(a));

(b) Complies with the applicable requirements in section 10(b), (c), and

(d) of the GENIUS Act (12 U.S.C. 5909(b), (c), and (d)), including with applicable implementing regulations issued by a relevant primary Federal payment stablecoin regulator as defined in 12 U.S.C. 5901(25), primary financial regulatory agency described in 12 U.S.C. 5301(12)(B) or (C), State bank supervisor, or State credit union supervisor; and

(c) If applicable, enters into a custody agreement with an NCUA-Licensed Permitted Payment Stablecoin Issuer documenting the Person's compliance with section 10(b), (c), and (d) of the GENIUS Act (12 U.S.C. 5909(b), (c), and (d)) as well as policies and procedures to ensure compliance; or

(2) A Federal Reserve Bank.

*Fair Value* means fair value as determined under GAAP.

*FDIC* means the Federal Deposit Insurance Corporation.

*GAAP* means generally accepted accounting principles as used in the United States.

*Immediate Family* means the spouse of an individual, the individual's minor children, and any of the individual's children (including adults) residing in the individual's home.

*Insider* means:

(1) An Officer or Director of an NCUA-Licensed Permitted Payment Stablecoin Issuer;

(2) Any Parent Company, and the Officers and Directors of the Parent Company, of an NCUA-Licensed Permitted Payment Stablecoin Issuer;

(3) Any Principal Shareholder, and Officers and Directors of the Principal Shareholder, of an NCUA-Licensed Permitted Payment Stablecoin Issuer; and

(4) A Related Interest of or the Immediate Family of any of these Persons.

*Insured Credit Union* has the meaning given to that term in section 101 of the Federal Credit Union Act (12 U.S.C. 1752).

*Insured Depository Institution* means:

(1) An insured depository institution, as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)(2)); and

(2) An Insured Credit Union.

*Issuing Group* means the Applying Issuer or NCUA-Licensed Permitted Payment Stablecoin Issuer and its Parent Company(ies), and the Officers, Directors, and Principal Shareholders, if applicable, of the Applying Issuer or NCUA-Licensed Permitted Payment Stablecoin Issuer, its subsidiaries, and Parent Company(ies).

*Monetary Value* means a National Currency or deposit (as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813(l)) denominated in a National Currency.

*Money* means

(1) Monetary Value; and

(2) Any other medium of exchange that the NCUA has determined is currently authorized or adopted by a domestic or foreign government, including a monetary unit of account established by an intergovernmental organization or by agreement between two or more countries.

*National Currency* means—

(1) A Federal Reserve note (as the term is used in the first undesignated paragraph of section 16 of the Federal Reserve Act (12 U.S.C. 411));

(2) Money standing to the credit of an account with a Federal Reserve Bank;

(3) Money issued by a foreign central bank; or

(4) Money issued by an intergovernmental organization pursuant to an agreement by two or more governments.

*NCUA-Licensed Permitted Payment Stablecoin Issuer* means a Person formed in the United States that is a Subsidiary of an Insured Credit Union that has been approved and licensed by the NCUA under subpart A to issue Payment Stablecoins.

*Nonpublic Personal Information,* as used in this part:

(1) Means information—

(i) Provided by a Customer to an NCUA-Licensed Permitted Payment Stablecoin Issuer to obtain a financial product or service;

(ii) About a Customer resulting from any transaction involving a financial product or service between the NCUA-Licensed Permitted Payment Stablecoin Issuer and a Customer; or

(iii) Otherwise obtained by the NCUA-Licensed Permitted Payment Stablecoin Issuer in connection with providing a financial product or service to a Customer; and

(2) Does not include Publicly Available Information, unless such Publicly Available Information, when combined with other information, would reveal the identity of a Customer or would enable access to the Customer's account.

*Officer* means the president, chief executive officer, chief operating officer, chief financial officer, chief technology officer, chief lending officer, chief investment officer, chief risk officer, Bank Secrecy Act officer, and any other individual the NCUA identifies in writing to the Issuing Group who exercises significant influence over, or participates in, major policy making decisions of the Issuing Group without regard to title, salary, or compensation. The term also includes employees of entities retained by an Issuing Group to perform such functions in lieu of directly hiring the individuals.

*Outstanding Issuance Value* means the total consolidated par value of all of an NCUA-Licensed Permitted Payment Stablecoin Issuer's Payment Stablecoins.

*Parent Company* means an insured credit union(s) that will own, control or hold the power to vote 10 percent or more of any class of voting securities, or has the ability to direct the management or policies, of a Permitted Payment Stablecoin Issuer. If no Insured Credit Union will own, control or hold the power to vote 10 percent or more of any class of voting securities, the Insured Credit Union with the largest percentage of voting securities in relation to all other insured credit unions is considered the Parent Company.

*Payment Stablecoin,* as used in this part:

(1) Means a Digital Asset—

(i) That is, or is designed to be, used as a means of payment or settlement; and

(ii) The issuer of which—

(A) Is obligated to convert, redeem, or repurchase for a fixed amount of Monetary Value, not including a Digital Asset denominated in a fixed amount of Monetary Value; and

(B) Represents that such issuer will maintain, or creates the reasonable expectation that it will maintain, a stable value relative to the value of a fixed amount of Monetary Value; and

(2) Does not include a Digital Asset that is a—

(i) National Currency;

(ii) deposit (as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813(l)), including a deposit recorded using Distributed Ledger technology; or

(iii) Security, as defined in section 2 of the Securities Act of 1933 (15 U.S.C. 77b), section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c), or section 2 of the Investment Company Act of 1940 (15 U.S.C. 80a–2).

*Person* means an individual, partnership, company, corporation, association, trust, estate, cooperative organization, or other business entity, incorporated or unincorporated.

*Principal Shareholder* means a Person other than an Insured Credit Union that directly or indirectly or acting in concert with one or more Persons or companies, or together with members of their immediate family, will own, control, or hold the power to vote 10 percent or more of any class of voting securities.

*Private Key* means the unique alphanumeric sequence that allows an individual to transfer a particular unit of

a Digital Asset using a Distributed Ledger.

*Publicly Available Information* means any information that a Person has a reasonable basis to believe is lawfully made available to the general public from:

(1) Federal, State, or local government records;

(2) Widely distributed media;

(3) Disclosures to the general public that are required to be made by Federal, State, or local law; or

(4) A Distributed Ledger.

*Registered Public Accounting Firm* has the meaning set forth in section 2 of the Sarbanes-Oxley Act of 2002 (15 U.S.C. 7201(12)).

*Related Interest* of a Person means:

(1) A company that is controlled by that Person; or

(2) A political or campaign committee that is controlled by that Person or the funds or services of which will benefit that Person.

*Reserve Asset* means an asset maintained by an NCUA-Licensed Permitted Payment Stablecoin Issuer of a type enumerated in § 706.202 (b).

*Share Account* means an ''account'' as defined in section 101 of the FCU Act (12 U.S.C. 1752(5).

*State* means each of the several States of the United States, the District of Columbia, and each territory of the United States.

*Subsidiary of an Insured Credit Union* means—

(1) An organization providing services to the Insured Credit Union that are associated with the routine operations of credit unions, as described in section 107(7)(I) of the Federal Credit Union Act (12 U.S.C. 1757(7)(I));

(2) A credit union service organization, as such term is used under part 712 of this title, with respect to which the Insured Credit Union has an ownership interest or to which the Insured Credit Union has extended a loan;

(3) A subsidiary of a State chartered Insured Credit Union authorized under State law; and

(4) A subsidiary of any entity that meets the definition of a Subsidiary of an Insured Credit Union. All tiers or levels of a Subsidiary of an Insured Credit Union are included as a Subsidiary of an Insured Credit Union.

*Trading Volume* means the aggregate number of Payment Stablecoins issued by an NCUA-Licensed Permitted Payment Stablecoin Issuer that were purchased or sold on exchanges during a specified period of time.

#### § 706.3 Severability.

The provisions of this part are separate and severable from one another. If any provision is stayed or determined to be invalid, it is the NCUA's intention that the remaining provisions shall continue in effect.

### Subpart A—Investment in and Approval of Issuers That Are Subsidiaries of Insured Credit Unions

#### § 706.101 Scope.

This subpart establishes the NCUA rules and procedures for Insured Credit Unions seeking to invest in Payment Stablecoin issuers and for Insured Credit Unions and their subsidiaries to jointly apply for an NCUA permitted payment stablecoin issuer license. It contains information on rules of applicability, where and how to file, and requirements and policies applicable to filings.

#### § 706.102 Rules of general applicability.

(a) *NCUA's Permitted Stablecoin Issuer Licensing Manual.* The NCUA's ''Permitted Stablecoin Issuer Licensing Manual'' (Payment Stablecoin Issuer Manual) provides additional filing guidance, including policies and procedures. This Manual and sample forms are available at *www.ncua.gov.*

(b) *Electronic filing.* The NCUA encourages electronic filing for all filings. The NCUA's Payment Stablecoin Issuer Manual describes the NCUA's electronic filing procedures.

(c) *Reservation of authority.* The rules in this subpart apply to all sections in this part unless otherwise stated. The NCUA may adopt materially different procedures for a particular filing, or class of filings as it deems necessary, for example, in exceptional circumstances or for unusual transactions, after providing notice of the change to the filer and to any other party that the NCUA determines should receive notice.

(d) *Computation of time.* In computing the period of days under this subpart, the NCUA does not include the day of the act or event (*e.g.,* the date a filing is received by the NCUA) from which the period begins to run. When the last day of a period is a Saturday, Sunday, or Federal holiday, the period runs until the end of the next day that is not a Saturday, Sunday or Federal holiday.

#### § 706.103 Filing required.

(a) *Filing.* A Subsidiary of an Insured Credit Union who seeks to issue Payment Stablecoins must apply to the NCUA for an NCUA permitted payment stablecoin issuer license and receive approval before issuing Payment Stablecoins. This application must be filed jointly with any Insured Credit Union Parent Company(ies).

(b) *Where to file.* Any submission under this part should be submitted as provided in the NCUA's Payment Stablecoin Issuer Manual.

(c) *Prefiling meeting.* Before submitting a filing to the NCUA, a potential filer may contact the NCUA to discuss whether a prefiling meeting would be beneficial. The NCUA may grant a prefiling meeting on a case-by-case basis. Submission of a draft business plan or other relevant information before any prefiling meeting may expedite the filing review process. A potential filer considering a novel, complex, or unique proposal is encouraged to contact the NCUA to request a prefiling meeting early in the development of its proposal for the early identification and consideration of policy issues. Information on model business plans can be found in the NCUA's Payment Stablecoin Issuer Manual.

(d) *Certification.* An Applying Issuer, and all of its Parent Companies and any Principal Shareholders, must certify in writing that any filing or supporting material submitted to the NCUA contains no material misrepresentations or omissions. The NCUA may review and verify any information filed in connection with a notice or an application. Any Person responsible for any material misrepresentation or omission in a filing or supporting materials may be subject to enforcement action and other penalties, including criminal penalties provided in 18 U.S.C. 1001.

(e) *Filing fees.*

(1) The NCUA may require filing fees to accompany certain filings made under this subpart before it will accept those filings. If the NCUA requires the aforementioned filing fee, the NCUA will publish an applicable fee schedule on its website at *http://www.NCUA.gov.*

(2) Filing fees must be paid to the NCUA by electronic transfer.

#### § 706.104 Investigations.

(a) *Authority.* The NCUA may examine or investigate and evaluate facts related to a filing to the extent necessary to reach an informed decision.

(b) *Fingerprints.* For certain filings, the NCUA requires fingerprints for a biometric based criminal history search.

#### § 706.105 Evaluation of applications and factors to be considered.

(a) *Scope.* This section describes the procedures and requirements governing NCUA evaluation of an application to be an NCUA-Licensed Permitted Payment Stablecoin Issuer. The NCUA will evaluate each substantially complete

application to determine whether approval would be consistent with the safety and soundness of the Applying Issuer based on the statutory evaluation factors set forth in this section. An applicant should consult the NCUA's Payment Stablecoin Issuer Manual to determine what other information is necessary for the NCUA to evaluate an application using the statutory evaluation factors described in this section.

(b) *Statutory evaluation factors.* The NCUA grants permitted payment stablecoin licenses under the authority of the Guiding and Establishing National Innovation for U.S. Stablecoins Act, 12 U.S.C. 5901 *et seq.,* which requires the NCUA to evaluate:

(1) The ability of the Applying Issuer, based on financial condition and resources, to meet the requirements set forth under 12 U.S.C. 5903 and incorporated in subpart B of part 706;

(2) Whether an individual who has been convicted of a felony offense involving insider trading, embezzlement, cybercrime, money laundering, financing of terrorism, or financial fraud is serving as an Officer or Director of the Applying Issuer;

(3) The competence, experience, and integrity of the Officers, Directors, and Principal Shareholders of the Applying Issuer, its subsidiaries, and Parent Company, including:

(i) the record of those Officers, Directors, and Principal Shareholders of compliance with laws and regulations; and

(ii) the ability of those Officers, Directors, and Principal Shareholders to fulfill any commitments to, and any conditions imposed by, the NCUA in connection with the application at issue and any prior applications;

(4) Whether the redemption policy of the Applying Issuer meets the standards under 12 U.S.C. 5903(a)(1)(B) and incorporated in subpart B of part 706; and

(5) Any other factors established by the NCUA that are necessary to ensure the safety and soundness of the Applying Issuer.

(c) *Policy—*

(1) *In general.* In determining whether to approve an application to be an NCUA-Licensed Permitted Payment Stablecoin Issuer based on the statutory evaluation criteria in paragraph (c), the NCUA is guided by the following policy considerations as they relate to the Applying Issuer:

(i) Whether an Issuing Group has a record of compliance with laws and regulations and whether the Issuing Group is familiar with the laws and regulations applicable to NCUA-Licensed Permitted Payment Stablecoin Issuers and digital asset service providers;

(ii) Whether an Issuing Group has the ability to fulfill any commitments to, and any conditions imposed by, the NCUA in connection with the application at issue and any prior applications;

(iii) Whether an Issuing Group has competent management, including a board of directors, with ability and experience relevant to the types of services to be provided;

(iv) Whether an applicant has capital, liquidity, and capital and liquidity plans sufficient to support the projected volume and type of business;

(v) Whether an applicant has a redemption policy that meets all requirements in subpart B of this part;

(vi) Whether an applicant can reasonably be expected to achieve and maintain profitability; and

(vii) Whether an applicant can be operated in a safe and sound manner by evaluating criteria including, but not limited to, the following:

(A) the ability to meet the operational, compliance, and information technology risk management requirements and standards outlined in subparts B of this part; and

(B) the ability to maintain sufficient technological capabilities to comply with the terms of any lawful order and all applicable laws and regulations.

(2) *NCUA evaluation.* The NCUA evaluates an Issuing Group and its business plan together. The NCUA's judgment concerning one may affect the evaluation of the other. An Issuing Group and its business plan must be stronger in markets where economic conditions are marginal, competition is intense, or the services to be provided have greater or unknown risk.

(d) *Issuing Group—*

(1) *In general.* An Issuing Group must have the competence, experience, and integrity to be active in directing the Applying Issuer's affairs in a safe and sound manner. The business plan and other information supplied in the application, including the completed NCUA Biographical and Financial Report forms, must demonstrate an Issuing Group's collective ability to establish and operate a successful permitted payment stablecoin issuer in the economic and competitive conditions of the market to be served. This collective ability must be demonstrated with consideration of the activities to be engaged in by the Applying Issuer and the services it intends to provide. Each member of the Issuing Group must be knowledgeable about the business plan. An inadequate business plan may be a reason for the NCUA to deny an application because it reflects adversely on the Issuing Group's qualifications.

(2) *Management selection.* The initial board of directors must select competent Officers before the NCUA grants an NCUA permitted payment stablecoin license. Early selection of Officers, especially the chief executive officer, contributes favorably to the preparation and review of a business plan that is accurate, complete, and appropriate for the activities the proposed permitted payment stablecoin issuer intends to engage in, and is necessary for a substantially complete application.

(3) *Financial resources.*

(i) Each member of the Issuing Group must have a history of responsibility, personal honesty, and integrity.

(ii) The Issuing Group must have a realistic plan to enable the Applying Issuer to obtain capital and liquidity when needed.

(iii) Any financial or other business arrangement, direct or indirect, between the Issuing Group or other Insiders and the Applying Issuer must be on nonpreferential terms.

(e) *Business plan—*

(1) *In general.*

(i) An Applying Issuer must submit a business plan that adequately addresses the statutory and related policy considerations set forth in paragraphs (b) and (c) of this section. The plan must reflect sound business and financial principles and demonstrate realistic assessments of risk in light of economic and competitive conditions in the market to be served and the services to be provided.

(ii) The NCUA may offset deficiencies in one factor by strengths in one or more other factors. However, deficiencies in some factors, such as unrealistic earnings prospects, may have a negative influence on the evaluation of other factors, such as capital adequacy, or may be serious enough by themselves to result in denial. The NCUA considers inadequacies in a business plan to reflect negatively on the Issuing Group's ability to operate a successful NCUA-Licensed Permitted Payment Stablecoin Issuer.

(2) *Earnings prospects and financial condition.* An Applying Issuer must submit balance sheets and income statements that demonstrate financial stability and earnings prospects as part of the business plan. This would include both actual and *pro forma* balance sheets and income statements, as applicable based on the availability of actual financial statements. The NCUA reviews all *pro forma* projections for

reasonableness of assumptions and consistency with the business plan.

(3) *Management.*

(i) The Applying Issuer must include in the business plan information sufficient to permit the NCUA to evaluate the overall management ability of the Issuing Group. If the Issuing Group has limited relevant experience, the Officers of the Applying Issuer must be able to compensate for such deficiencies.

(ii) The Applying Issuer may not hire an Officer or elect or appoint a Director if the NCUA objects to that Person at any time prior to the date the Applying Issuer commences business.

(iii) All Issuing Group Officers, Directors, and any Principal Shareholders must also submit the Biographical and Financial Report information described in paragraph (f)(3) of this section to allow the NCUA to evaluate the competence, experience, and integrity of the Officers, Directors, and Principal Shareholders of the Applying Issuer, its subsidiaries, and Parent Company or Parent Companies as described in paragraph (b)(3).

(4) *Capital.* An Applying Issuer must have sufficient initial capital, net of any organizational expenses that will be charged to the Applying Issuer's capital after it begins operations, to support the Applying Issuer's projected volume and type of business as outlined in the business plan. An Applying Issuer also must have a longer-term capital plan that is sufficient to support the future projected volume and type of business and is consistent with the capital requirements in subpart B of this part.

(5) *Liquidity and Reserve Asset diversification.* An Applying Issuer's business plan must address its liquidity and Reserve Asset diversification practice. Issuers must have liquidity and Reserve Asset diversification policies that meet the requirements of subpart B of this part.

(6) *Safety and soundness.* The business plan must demonstrate that the Applying Issuer is aware of, and understands, applicable laws and regulations, and how to conduct safe and sound operations and practices.

(f) *Procedures—*

(1) *Prefiling meeting.* The Issuing Group of an Applying Issuer may request a prefiling meeting with the NCUA before the Applying Issuer files an application. The prefiling meeting normally is held virtually.

(2) *Business plan.* An Applying Issuer must file a business plan that addresses the subjects discussed in paragraph (e) of this section.

(3) *Biographical and financial reports.*

(i) Each Director or Officer or proposed Director or Officer of a member of the Issuing Group or Principal Shareholder must submit to the NCUA the information prescribed in the NCUA's Biographical and Financial Report, available at *www.ncua.gov;*

(ii) Each Director or Officer or proposed Director or Officer of the Applying Issuer must submit legible fingerprints for a biometric based criminal history search; and

(iii) The NCUA may request additional information about any Director or Officer, or proposed Director or Officer, or any Principal Shareholder, if appropriate. The NCUA may waive any of the information requirements of this paragraph if the NCUA determines that it is in the public interest.

(4) *Contact person.* The Applying Issuer must designate a contact person to represent the Issuing Group in all contacts with the NCUA.

(5) *Decision notification.* The NCUA notifies the contact person and other relevant parties in writing of its decision on an application.

(6) *Activities.* Before the NCUA grants a license to an Applying Issuer, the Applying Issuer must be established as a legal entity under State law.

**§ 706.106 Timing for decision on applications.**

(a) *In general.* Not later than 120 days after receiving a substantially complete application for license as an NCUA-Licensed Permitted Payment Stablecoin Issuer, the NCUA will render a decision on the application. If the NCUA fails to render a decision on a complete application within this period, the application shall be deemed approved.

(b) *Substantially complete applications.*

(1) An application is considered substantially complete if the application contains sufficient information for the NCUA to render a decision on whether the Applying Issuer satisfies the factors described in 706.105.

(2) Not later than 30 days after receiving an application, the NCUA will notify the Applying Issuer as to whether the NCUA determined the application to be substantially complete and, if the application is not substantially complete, the additional information the Applying Issuer must provide for the application to be considered substantially complete.

(3) Material Change in Circumstances. An application considered substantially complete under this section will remain substantially complete unless there is a material change in circumstances that requires the NCUA to treat the application as a new application.

**§ 706.107 Denial.**

(a) *Grounds for denia*l.

(1) *In general.* The NCUA will only deny a substantially complete application received under this subpart if the NCUA determines that the activities of the Applying Issuer would be unsafe or unsound based on the statutory evaluation factors described in § 706.105.

(2) *Issuance on open, public, or decentralized network not grounds for denial.* The issuance of a Payment Stablecoin on an open, public, or decentralized network is not a valid ground for denial of an application received under this subpart.

(b) *Explanation required.* If the NCUA denies a substantially complete application received under this subpart, not later than 30 days after the date of such denial, the NCUA shall provide the Applying Issuer with written notice explaining the denial with specificity, including all findings made with respect to all identified material shortcomings in the application and actionable recommendations on how the Applying Issuer could address the identified material shortcomings.

**§ 706.108 Opportunity for hearing; final determination.**

(a) *In general.* Not later than 30 days after the date of receipt of any notice of the denial of an application under this subpart, the Applying Issuer may request, in writing, an opportunity for a written or oral hearing before the NCUA Board to appeal the denial.

*(b) Timing.* Upon receipt of a timely hearing request, the NCUA will notice a time not later than 30 days after the date of receipt of the request and place at which the Applying Issuer may appear, personally or through counsel, to submit written materials or provide oral testimony and oral argument.

*(c) Final determination.* Not later than 60 days after the date of a hearing under this section, the NCUA will notify the Applying Issuer of a final determination, which will contain a statement of the basis for that determination, with specific findings.

*(d) Notice if no hearing.* If an applicant does not make a timely request for a hearing under this section, the NCUA will notify the Applying Issuer, not later than 10 days after the date by which the Applying Issuer may request a hearing under this subparagraph, in writing, that the denial of the application is a final determination of the NCUA.

**§ 706.109 Right to reapply**

The denial of an application under this subpart does not prohibit the

Applying Issuer from filing a subsequent application.

**§ 706.110 Certification of anti-money laundering and economic sanctions compliance programs.**

(a) *In general.* Not later than 180 days after the approval of an application, and on an annual basis thereafter, each NCUA-Licensed Permitted Payment Stablecoin Issuer must submit to the NCUA written certification that the NCUA-Licensed Permitted Payment Stablecoin Issuer has implemented anti-money laundering and economic sanctions compliance programs that are reasonably designed to prevent the NCUA-Licensed Permitted Payment Stablecoin Issuer from facilitating money laundering, in particular, facilitating money laundering for cartels and organizations designated as foreign terrorist organizations under section 219 of the Immigration and Nationality Act (8 U.S.C. 1189), and the financing of terrorist activities, consistent with the requirements of this Act.

(b) *Failure to submit certification.* The failure by an NCUA-Licensed Permitted Payment Stablecoin Issuer to submit the certification required under paragraph (a) constitutes cause for the NCUA to revoke the approval and license of the NCUA-Licensed Permitted Payment Stablecoin Issuer.

**§ 706.111 Change in Parent Company.**

(a) *Change in Parent Company.* An Insured Credit Union must provide the NCUA with sixty days' prior written notice of a proposed acquisition that would cause it to become a Parent Company of an NCUA-Licensed Permitted Payment Stablecoin Issuer.

(b) *Notice.* The notice must include:

(1) Biographical and financial report information described in § 706.105(f)(3) of this part sufficient to allow the NCUA to

(i) Evaluate the competence, experience, and integrity of the proposed Parent Company's Officers and Directors related to Payment Stablecoins; and

(ii) Evaluate the record of the proposed Parent Company's Officer and Directors with compliance with laws and regulations; and

(2) A certification that the proposed Parent Company will fulfill any commitments to, any conditions imposed by, the NCUA in connection with its proposed investment.

(c) *Timing.* The Insured Credit Union may complete its proposed investment to become a Parent Company of an NCUA-Licensed Permitted Payment Stablecoin Issuer at the end of the sixty-day period unless the NCUA issues a notice disapproving the proposed acquisition.

(d) *Notice of disapproval.* The NCUA may disapprove of an insured credit union's proposed investment to become a Parent Company of an NCUA-Licensed Permitted Payment Stablecoin Issuer if it finds that the competence, experience, or integrity of the insured credit union's Officers and Directors indicates the investment would not be in the best interests of the NCUA-Licensed Permitted Payment Stablecoin Issuer or of the public.

(e) *Appeal.* Not later than 30 days after the date of receipt of the notice of disapproval, the notificant may request, in writing, an opportunity for a written or oral hearing before the NCUA to appeal the denial.

**§ 706.112 Investment limitation.**

An Insured Credit Union cannot invest in a Payment Stablecoin issuer unless it is an NCUA-Licensed Permitted Payment Stablecoin Issuer.

## Subpart B—NCUA-Licensed Permitted Payment Stablecoin Issuers

**§ 706.201 Activities.**

(a) Permitted activities. An NCUA-Licensed Permitted Payment Stablecoin Issuer may only:

(1) Issue Payment Stablecoins;

(2) Redeem Payment Stablecoins;

(3) Manage reserves related to the issuance or redemption of Payment Stablecoins, including purchasing, selling, and holding Reserve Assets or providing custodial services for Reserve Assets, consistent with applicable State and Federal law;

(4) Provide custodial or safekeeping services for Payment Stablecoins, required reserves, or Private Keys of Payment Stablecoins, consistent with subpart C of this part;

(5) Assess fees associated with purchasing or redeeming Payment Stablecoins;

(6) Act as principal or agent with respect to any Payment Stablecoin;

(7) Pay fees to facilitate Customer transactions; and

(8) Undertake any other activities that directly support any of the activities described in paragraphs (a)(1) through (4) of this section.

(b) *Rule of construction.* Nothing in paragraph (a) of this section may be construed to limit the authority of an Insured Credit Union to engage in activities permissible pursuant to applicable State and Federal law.

(c) *Prohibitions.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must not:

(1) Use a deceptive name by using any combination of terms relating to the United States Government, including ''United States,'' ''United States Government,'' and ''USG,'' in the name of the Payment Stablecoin. This prohibition does not apply to abbreviations relating directly to the currency to which the Payment Stablecoin is pegged, such as ''USD''.

(2) Market a Payment Stablecoin in such a way that a reasonable person would perceive the Payment Stablecoin to be:

(i) Legal tender as described in 31 U.S.C. 5103;

(ii) Issued by the United States; or

(iii) Guaranteed or approved by the Government of the United States.

(3) Directly or through implication represent that Payment Stablecoins are backed by the full faith and credit of the United States, guaranteed by the United States Government, or subject to Federal deposit insurance or Federal share insurance.

(4) Pay the holder of any Payment Stablecoin any form of interest or yield (whether in cash, tokens, or other consideration) solely in connection with the holding, use, or retention of such Payment Stablecoin.

(i) The NCUA presumes that an NCUA-Licensed Permitted Payment Stablecoin Issuer is paying interest or yield (whether in cash, tokens, or other consideration) to the holder of a Payment Stablecoin solely in connection with the holding, use, or retention of such Payment Stablecoin if:

(A) The NCUA-Licensed Permitted Payment Stablecoin Issuer has a contract, agreement, or other arrangement with an Affiliate of the issuer or related third party to pay interest or yield to the Affiliate or related third party;

(B) The Affiliate or related third party identified in paragraph (c)(4)(i)(A) of this section or, if the Person is a related third party, an Affiliate of such related third party has a contract, agreement, or other arrangement to pay interest or yield (whether in cash, tokens, or other consideration) to a holder of any Payment Stablecoin issued by the NCUA-Licensed Permitted Payment Stablecoin Issuer solely in connection with the holding, use, or retention of such Payment Stablecoin; and

(C) To the extent the Person, or an Affiliate of the Person, identified in paragraph (c)(4)(i)(A) is a related third party of the NCUA-Licensed Permitted Payment Stablecoin Issuer because the NCUA-Licensed Permitted Payment Stablecoin Issuer issues Payment Stablecoins on the related third party's behalf or under the related third party's branding, the arrangement identified in paragraph (c)(4)(i)(B) of this section

considers the holder of the Payment Stablecoin to be the holder of a Payment Stablecoin issued by the NCUA-Licensed Permitted Payment Stablecoin Issuer on the related third party's behalf or under the related third party's branding.

(ii) For purposes of paragraph (c)(4)(i) of this section, a related third party means:

(A) A Person offering to pay interest or yield to Payment Stablecoin holders as a service; and

(B) Any Person that the issuer issues Payment Stablecoins on the Person's behalf or under the Person's branding.

(iii) An NCUA-Licensed Permitted Payment Stablecoin Issuer may rebut the presumption in paragraph (c)(4)(i) of this section by submitting written materials that, in the NCUA's judgment, demonstrate that the contract, agreement, or other arrangement is not prohibited under paragraph (c)(4) of this section and is not an attempt to evade the prohibition.

(5) Pledge, rehypothecate, or reuse any Reserve Assets required under § 706.202 either directly or indirectly (*e.g.,* through a third-party custodian of the Reserve Assets) except for the purpose of:

(i) Satisfying margin obligations in connection with investments in permitted reserves under § 706.202(b)(4) or (5);

(ii) Satisfying obligations associated with the use, receipt, or provision of standard custodial services; or

(iii) Creating liquidity to meet reasonable expectations of requests to redeem Payment Stablecoins, such that reserves in the form of Treasury bills with a maturity of 93 days or less may be sold as purchased securities in repurchase agreements, provided that either:

(A) The repurchase agreements are cleared by a clearing agency registered with the Securities and Exchange Commission; or

(B) The NCUA-Licensed Permitted Payment Stablecoin Issuer receives prior approval from the NCUA. All repurchase agreements under this paragraph (c)(5) wherein the Treasury bills that are sold as purchased securities have a maturity of 93 days or less are approved by the NCUA.

(6) Engage in any activity that the NCUA determines is an evasion of the requirements of section 4 of the GENIUS Act (12 U.S.C. 5903) or this part.

(7) Provide a Customer credit, directly or indirectly, to enable the Customer to purchase or otherwise acquire Payment Stablecoins from the NCUA-Licensed Permitted Payment Stablecoin Issuer.

**§ 706.202 Reserve Assets.**

(a) *Reserve requirement.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must:

(1) Maintain Reserve Assets that:

(i) Are identifiable;

(ii) Are segregated from and not commingled with other assets owned or held by the NCUA-Licensed Permitted Payment Stablecoin Issuer;

(iii) At all times have a total Fair Value that equals or exceeds the Outstanding Issuance Value of the NCUA-Licensed Permitted Payment Stablecoin Issuer; and

(iv) Are either held directly by the NCUA-Licensed Permitted Payment Stablecoin Issuer or within the custody of an Eligible Financial Institution.

(2) Demonstrate the operational capability to access and monetize the identifiable Reserve Assets, commensurate with the NCUA-Licensed Permitted Payment Stablecoin Issuer's risk profile and business model.

(3) Only withdraw any surplus Reserve Assets in excess of Outstanding Issuance Value once per month, upon the publication of the composition report required by paragraph (e) of this section. An NCUA-Licensed Permitted Payment Stablecoin Issuer may withdraw any surplus Reserve Assets, calculated and reported as of the last day of the previous month, after the information in the month-end report is examined and certified pursuant to paragraph (f) of this section, provided that an NCUA-Licensed Permitted Payment Stablecoin Issuer may not withdraw any Reserve Assets if the withdrawal would cause the current Fair Value of Reserve Assets to fall below the current Outstanding Issuance Value, calculated as of the day of withdrawal.

(b) *Composition.* The Reserve Assets required under paragraph (a) of this section must comprise exclusively:

(1) United States coins and currency (including Federal Reserve notes) or money standing to the credit of an account with a Federal Reserve Bank;

(2) Funds held as deposits or in Share Accounts that are payable upon demand at an Insured Depository Institution (including any foreign branches or agents, including correspondent banks, of an insured depository institution), subject to any limitation established by the FDIC and the NCUA, as applicable, pursuant to section 4(a)(1)(A)(ii) of the GENIUS Act (12 U.S.C. 5903(a)(1)(A)(ii)) to address safety and soundness risks of such insured depository institution;

(3) Treasury bills, Treasury notes, or Treasury bonds with a remaining maturity of 93 days or less;

(4) Money received under repurchase agreements, with the NCUA-Licensed Permitted Payment Stablecoin Issuer acting as a seller of securities and with a no longer than overnight maturity, that are backed by Treasury bills with a maturity of 93 days or less;

(5) Reverse repurchase agreements, with the NCUA-Licensed Permitted Payment Stablecoin Issuer acting as a purchaser of securities and with a no longer than overnight maturity, that are collateralized by Treasury bills, Treasury notes, Treasury bonds on a no longer than overnight basis, subject to overcollateralization in line with standard market terms, that are:

(i) Tri-party;

(ii) Centrally cleared through a clearing agency registered with the Securities and Exchange Commission; or

(iii) Bilateral with a counterparty that the issuer has determined to be adequately creditworthy even in the event of severe market stress;

(6) Securities issued by an investment company registered under section 8(a) of the Investment Company Act of 1940 (15 U.S.C. 80a–8(a)), or other registered Government money market fund, and that are invested solely in underlying assets described in paragraphs (b)(1) through (5) of this section;

(7) Any other similarly liquid Federal Government-issued asset approved by the NCUA. In determining whether a potential Reserve Asset qualifies as ''any other similarly liquid Federal Government-issued asset,'' the NCUA will consider, among other relevant factors, whether:

(i) The asset has liquidity characteristics, including during times of stress, comparable to the other Reserve Assets allowed under this paragraph (b);

(ii) NCUA-Licensed Permitted Payment Stablecoin Issuers will be operationally capable of monetizing the asset to meet redemption requests, including sudden and high-volume requests;

(iii) The asset poses levels of risk comparable to those of the assets allowed under this paragraph (b) including interest rate risk and counterparty credit risk; and

(iv) Whether the asset introduces additional risks that may be difficult for NCUA-Licensed Permitted Payment Stablecoin Issuers to manage; or

(8) Any reserve described in paragraphs (b)(1) through (3) or paragraph (b)(6) or (7) of this section in tokenized form, provided that such reserves comply with all applicable laws and regulations.

Option A for Paragraph (c)

(c) *Asset diversification and concentration.*

(1) An NCUA-Licensed Permitted Payment Stablecoin Issuer must maintain Reserve Assets that are sufficiently diverse to manage potential credit, liquidity, interest rate, and price risks. An NCUA-Licensed Permitted Payment Stablecoin Issuer must measure and manage the risk that concentrating Reserve Assets at one Eligible Financial Institution or a small number of Eligible Financial Institutions may impair the ability of an NCUA-Licensed Permitted Payment Stablecoin Issuer to satisfy redemption demands if individual Eligible Financial Institutions are unable to return, or if there is a delay in returning, Reserve Assets placed by an NCUA-Licensed Permitted Payment Stablecoin Issuer.

(2) An NCUA-Licensed Permitted Payment Stablecoin Issuer will be deemed to satisfy the requirements of paragraph (c)(1) of this section if on each business day:

(i) The NCUA-Licensed Permitted Payment Stablecoin Issuer maintains at least 10 percent of its Reserve Assets as deposits or funds in Share Accounts that are payable upon demand or Money standing to the credit of an account with a Federal Reserve Bank;

(ii) The NCUA-Licensed Permitted Payment Stablecoin Issuer maintains at least 30 percent of its Reserve Assets as deposits or funds in Share Accounts that are payable upon demand, Money standing to the credit of an account with a Federal Reserve Bank, or amounts receivable and due unconditionally within five business days on pending sales of Reserve Assets, maturing Reserve Assets, or other maturing transactions;

(iii) The NCUA-Licensed Permitted Payment Stablecoin Issuer maintains no more than 40 percent of its Reserve Assets at any one Eligible Financial Institution, whether as deposits or funds in Share Accounts at any one Insured Depository Institution, securities custodied at any one Eligible Financial Institution, bilateral reverse repurchase agreements with any counterparty, or through other exposures;

(iv) The NCUA-Licensed Permitted Payment Stablecoin Issuer maintains no more than 50 percent of the amount required in paragraph (c)(2)(i) of this section at any one Eligible Financial Institution; and

(v) The NCUA-Licensed Permitted Payment Stablecoin Issuer's total stock of Reserve Assets have a weighted average maturity of no more than 20 days.

Option B for Paragraph (c)

(c) *Asset diversification and concentration.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must on each business day:

(1) Maintain at least 10 percent of its Reserve Assets as deposits or funds in Share Accounts that are payable upon demand or Money standing to the credit of an account with a Federal Reserve Bank;

(2) Maintain at least 30 percent of its Reserve Assets as deposits or funds in Share Accounts that are payable upon demand, Money standing to the credit of an account with a Federal Reserve Bank, or amounts receivable and due unconditionally within five business days on pending sales of Reserve Assets, maturing Reserve Assets, or other maturing transactions;

(3) Maintain no more than 40 percent of its Reserve Assets at any one Eligible Financial Institution, whether as deposits or funds in Share Accounts at any one Insured Depository Institution, securities custodied at any one Eligible Financial Institution, bilateral reverse repurchase agreements with any counterparty, or through other exposures;

(4) Maintain no more than 50 percent of the amount required in paragraph (c)(1) of this section at any one Eligible Financial Institution; and

(5) Maintain Reserve Assets with a weighted average maturity of no more than 20 days.

(d) *Minimum insured amount.* An NCUA-Licensed Permitted Payment Stablecoin Issuer with an Outstanding Issuance Value of $25 billion or more must, on each business day, maintain at least 0.5 percent of its Reserve Assets, up to a cap of $500 million, in the form of deposits or funds in Share Accounts at Insured Depository Institutions that are fully insured by the FDIC and/or NCUA.

(e) *Composition report.* By noon on the last day of each month, an NCUA-Licensed Permitted Payment Stablecoin Issuer must publish the monthly composition of the issuer's Reserve Assets as of the last day of the previous month on the website of the issuer, using a format substantially similar to the template provided in table 1 to this paragraph (e), containing:

(1) The total number of outstanding Payment Stablecoins issued by the issuer; and

(2) The amount and composition of the reserves described in paragraph (a) of this section, including the average tenor and geographic location of custody of each category of reserve instruments.

Table 1 to Paragraph (e)—Monthly Composition Template

TABLE 1 TO PARAGRAPH (e)—MONTHLY COMPOSITION TEMPLATE

| As of YY/YY/YYYY (In thousands of U.S. dollars) | Amount | Geographic location | Average tenor | |
|---|---|---|---|---|
| | **Number of Outstanding Payment Stablecoins** | | | |
| 1 [1] | | ..... | ..... | |
| 2 | | ..... | ..... | |
| 3 | | ..... | ..... | |
| 4 | TOTAL OUTSTANDING PAYMENT STABLECOINS ..... | ..... | ..... | |
| | **Fair Value of Reserve Assets** | | | |
| 5 | Deposits or funds in Share Accounts: ..... | ..... | ..... | |
| 6 | Insured deposits or insured funds in Share Accounts ..... | ..... | ..... | |
| 7 | Uninsured deposits or uninsured funds in Share Accounts ..... | ..... | ..... | |
| 8 | Treasury bills, Treasury notes, or Treasury bonds ..... | ..... | ..... | |
| 9 | Other similarly liquid Federal Government-issued assets approved by NCUA. | ..... | ..... | |
| 10 | Money received under repurchase agreements ..... | ..... | ..... | |

TABLE 1 TO PARAGRAPH (e)—MONTHLY COMPOSITION TEMPLATE—Continued

| As of YY/YY/YYYY (In thousands of U.S. dollars) | Amount | Geographic location | Average tenor | |
|---|---|---|---|---|
| 11 | Reverse repurchase agreements | | | |
| 12 | Securities issued by an investment company solely invested in qualifying reserve assets. | | | |
| 13 | Reserves in tokenized form [2] | | | |
| 14 | Total Reserve Assets [3] | | | |
| 15 | Outstanding repurchase agreement liabilities | | | |
| 16 | Total Reserve Assets net of Outstanding Repurchase Agreement Liabilities. | | | |

[1] List different classes of Payment Stablecoin separately, if applicable. To the extent that different classes of Payment Stablecoins are secured by distinct pools of reserve assets, NCUA-Licensed Permitted Payment Stablecoin Issuers should publish a composition table for each class of Payment Stablecoin and describe the legal mechanism for how the assets are separately secured.

[2] NCUA-Licensed Permitted Payment Stablecoin Issuers must separately list any reserves in tokenized form by category of reserve asset, using multiple rows if appropriate.

[3] Do not double count any reserve assets that may be listed in more than one row for purposes of computing the total.

(f) *Monthly certification; examination of reports by Registered Public Accounting Firm.*

(1) By noon on the last day of each month, an NCUA-Licensed Permitted Payment Stablecoin Issuer must have the information disclosed in the previous month-end report required under paragraph (e) of this section examined by a Registered Public Accounting Firm. The Registered Public Accounting Firm's examination report must be published on the website of the issuer at the same time as the month-end report required under paragraph (e).

(2) Each month, the Chief Executive Officer and Chief Financial Officer (or the Persons performing the equivalent functions) of an NCUA-Licensed Permitted Payment Stablecoin Issuer must submit a certification as to the accuracy of the monthly report required under paragraph (e) of this section to the NCUA.

(g) *Failure to meet minimum Reserve Assets requirement.*

(1) An NCUA-Licensed Permitted Payment Stablecoin Issuer must notify the NCUA on any day in which its Reserve Asset amount has fallen below the required minimum in paragraph (a) of this section.

(2) An NCUA-Licensed Permitted Payment Stablecoin Issuer that fails to satisfy the minimum Reserve Asset requirement in paragraph (a) of this section at any time:

(i) Is prohibited from issuing any new Payment Stablecoins immediately except as necessary to facilitate a transfer of Payment Stablecoins from one Distributed Ledger to another and provided that the net Outstanding Issuance Value does not increase; and

(ii) May not resume issuance until the NCUA-Licensed Permitted Payment Stablecoin Issuer satisfies its minimum Reserve Asset requirement.

(3) If an NCUA-Licensed Permitted Payment Stablecoin Issuer fails to meet its minimum Reserve Asset requirement for 15 consecutive business days (which may be extended in the NCUA's sole discretion), it must:

(i) Begin liquidation of Reserve Assets and redemption of outstanding Payment Stablecoins, consistent with § 706.203; and

(ii) Not charge Customers a fee to redeem their Payment Stablecoins at any time during the liquidation.

(4) If at any point the NCUA determines that an NCUA-Licensed Permitted Payment Stablecoin Issuer has not demonstrated that it meets the Reserve Asset requirements in paragraph (a), (b), (c), or (d) of this section, the NCUA may require the issuer to submit a plan describing how the NCUA-Licensed Permitted Payment Stablecoin Issuer will attain compliance and the timeline for the plan. If the NCUA determines, either before or after the submission of a plan, that an NCUA-Licensed Permitted Payment Stablecoin Issuer faces a significant risk of being unable to attain compliance with the reserve requirements in paragraph (a), (b), (c), or (d) within a reasonable period, the NCUA may order the issuer to initiate redemption of all outstanding Payment Stablecoins. The NCUA's authority to require a compliance plan or order redemption does not limit the NCUA's authority to pursue other measures, including enforcement actions, if appropriate.

**§ 706.203 Redemption.**

(a) *Redemption policy.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must publicly disclose its current redemption policy and include, at a minimum, the following information:

(1) The timeframe in which the issuer will redeem Payment Stablecoins and the timeframe under which the issuer is required to redeem Payment Stablecoins under paragraph (b)(1)(i) of this section;

(2) A statement explaining the limitation in paragraph (b)(1)(ii) of this section;

(3) A statement explaining the scenarios under which the redemption period may be extended as described in paragraph (c) of this section;

(4) A statement with clear instructions on how a Payment Stablecoin holder can redeem a Payment Stablecoin, including a link to the website(s) where a Customer can redeem the Payment Stablecoin; and

(5) The minimum number of Payment Stablecoins, if any, that the NCUA-Licensed Permitted Payment Stablecoin Issuer will redeem, provided that the issuer must redeem any number greater than or equal to one Payment Stablecoin, subject to appropriate Customer screening and onboarding.

(b) *Redemption policy requirements.* An NCUA-Licensed Permitted Payment Stablecoin Issuer's redemption policy must provide:

(1) Clear and conspicuous procedures for timely redemption of outstanding Payment Stablecoins:

(i) That timely redemption may not exceed two business days following the date of the requested redemption; and

(ii) That any discretionary limitations on timely redemptions can only be imposed by the NCUA.

(2) [Reserved]

(c) *Timeliness extended in certain scenarios.*

(1) If an NCUA-Licensed Permitted Payment Stablecoin Issuer faces redemption demands in excess of 10

percent of its Outstanding Issuance Value in a single 24-hour period, the period for timely redemption described in paragraph (b)(1) of this section is immediately extended to seven calendar days by operation of this paragraph (c)(1).

(2) The extended redemption period in paragraph (c)(1) of this section applies to all redemption requests that are outstanding at the time the 10 percent threshold is met as well as any subsequent redemption requests.

(3) An NCUA-Licensed Permitted Payment Stablecoin Issuer may only redeem any of the outstanding or subsequent redemption requests described in paragraph (c)(2) of this section prior to the seven-calendar day period if the NCUA determines that the issuer has the ability to redeem sooner in an orderly fashion and through a fair and transparent process or the NCUA otherwise provides notice to the NCUA-Licensed Permitted Payment Stablecoin Issuer that the extended redemption period no longer applies.

(4) An NCUA-Licensed Permitted Payment Stablecoin Issuer must provide notice to the NCUA within 24 hours if its redemption requests exceed 10 percent of its Outstanding Issuance Value in a single 24-hour period.

(5) The NCUA may also, in its discretion, extend timely redemption described in paragraph (b)(1) or (c)(1) of this section, as applicable, if the NCUA determines that the NCUA-Licensed Permitted Payment Stablecoin Issuer poses a threat to safety and soundness, financial stability, or such an extension is otherwise in the public interest.

(d) *Disclosures and fees associated with purchase and redemption.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must:

(1) Publicly, clearly, and conspicuously disclose in plain language and in a format that is readily noticeable to Customers, readily understandable by Customers, and segregated from other information:

(i) The name of the NCUA-Licensed Permitted Payment Stablecoin Issuer that issues the Payment Stablecoin;

(ii) That the NCUA-Licensed Permitted Payment Stablecoin Issuer is the entity that is obligated to convert, redeem, or repurchase the Payment Stablecoin for a fixed amount of Monetary Value;

(iii) The link to the monthly composition report of the relevant NCUA-Licensed Permitted Payment Stablecoin Issuer's reserves required under § 706.202(e); and

(iv) All fees associated with purchasing or redeeming Payment Stablecoins.

(2) Update the disclosures in paragraph (d)(1)(iv) of this section if there are any changes in fees associated with purchasing or redeeming Payment Stablecoins and provide Customers at least seven calendar days' prior notice of the change, including by securely delivering the notice to current Customers;

(3) Publish the disclosures in paragraph (d)(1) of this section and any updates made in accordance with paragraph (d)(2) of this section on the NCUA-Licensed Permitted Payment Stablecoin Issuer's website; and

(4) Include the disclosures in paragraph (d)(1) of this section and any updates made in accordance with paragraph (d)(2) of this section in any Customer agreements that it provides.

**§ 706.204 Risk management.**

(a) *General operational and managerial standards—*

(1) *Internal controls and information systems.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must have internal controls and information systems to support effective risk management that are appropriate for the size and complexity of the NCUA-Licensed Permitted Payment Stablecoin Issuer and the nature, scope, and risk of its activities and that provide for:

(i) An organizational structure with appropriate segregation of duties and an internal control structure that establishes clear lines of authority and responsibility for monitoring adherence to established policies;

(ii) Effective risk assessment;

(iii) Timely and accurate financial, operational, and regulatory reporting, including with respect to the reports required under this part;

(iv) Adequate procedures to monitor, safeguard, manage, control, and monetize assets, including Reserve Assets; and

(v) Compliance with applicable laws and regulations.

(2) *Internal audit system.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must have an internal audit system that is appropriate to the size and complexity of the NCUA-Licensed Permitted Payment Stablecoin Issuer and the nature, scope, and risk of its activities and that provides for:

(i) Adequate monitoring of the system of internal controls through an internal audit function, or for an NCUA-Licensed Permitted Payment Stablecoin Issuer whose size, complexity or scope of operations does not warrant a full-scale internal audit function, a system of independent reviews of key internal controls;

(ii) Independence and objectivity;

(iii) Qualified Persons responsible for the audit function;

(iv) Adequate independent testing and review of internal controls and information systems, verification of published information available to Customers, calculations for required reserves, and regulatory filings;

(v) Adequate documentation of tests and findings and any corrective actions;

(vi) Verification and review of management actions to address deficiencies; and

(vii) Review by the NCUA-Licensed Permitted Payment Stablecoin Issuer's audit committee or board of Directors of the effectiveness of the internal audit systems.

(3) *Interest rate exposure.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must:

(i) Manage interest rate risk in a manner that is appropriate to the size and complexity of the NCUA-Licensed Permitted Payment Stablecoin Issuer and the complexity of its assets and liabilities; and

(ii) Provide for periodic reporting to the NCUA-Licensed Permitted Payment Stablecoin Issuer's management and board of Directors regarding interest rate risk with adequate information for management and the board of Directors to assess the level of risk.

(4) *Asset growth.* An NCUA-Licensed Permitted Payment Stablecoin Issuer's asset growth must be prudent and commensurate with an NCUA-Licensed Permitted Payment Stablecoin Issuer's risk management capabilities, operational capacity, and staffing.

(5) *Earnings.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must establish and maintain a system that is commensurate with the NCUA-Licensed Permitted Payment Stablecoin Issuer's size and complexity and the nature and scope of its operations to evaluate and monitor earnings and ensure that earnings are sufficient to support operations and maintain the capital levels required by subpart D of this part.

(6) *Insider and Affiliate transactions.*

(i) An NCUA-Licensed Permitted Payment Stablecoin Issuer must ensure that transactions between the NCUA-Licensed Permitted Payment Stablecoin Issuer and Insiders or Affiliates:

(A) Are not excessive and do not pose significant risks of material financial loss;

(B)

(1) Are conducted on terms that are the same or at least as favorable to the NCUA-Licensed Permitted Payment Stablecoin Issuer as those prevailing at the time for comparable transactions

with or involving non-Insiders or non-Affiliates; or

(2) In the absence of comparable transactions, are offered on terms and under circumstances that, in good faith would be offered to, or would apply to non-Affiliates or non-Insiders; and

(C) Are appropriately documented and reviewed by the NCUA-Licensed Permitted Payment Stablecoin Issuer's board of Directors.

(ii) An NCUA-Licensed Permitted Payment Stablecoin Issuer must appropriately monitor and validate compliance with the requirements of paragraph (a)(6)(i) of this section.

(7) *Oversee service provider arrangements.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must:

(i) Exercise appropriate due diligence in selecting its service providers;

(ii) Require its service providers by contract to implement appropriate measures designed to meet the applicable requirements of this part; and

(iii) As appropriate, monitor its service providers to confirm they have satisfied their obligations under this section. As part of this monitoring, NCUA-Licensed Permitted Payment Stablecoin Issuers must review audits, summaries of test results, or other equivalent evaluations of its service providers.

(8) *Liquidity, diversification, and concentration.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must:

(i) Appropriately monitor and validate compliance with the requirements of § 706.202; and

(ii) Manage liquidity and concentration risk in a manner that is appropriate to the business model and risk profile of the NCUA-Licensed Permitted Payment Stablecoin Issuer.

(b) *Information technology and security—*

(1) *Information technology and security program.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must implement a comprehensive written information security risk and control framework, including a program that assesses and manages information technology and information security risks.

(2) *Board of Directors approval.* The NCUA-Licensed Permitted Payment Stablecoin Issuer's board of Directors or an appropriate board committee must approve the information technology and security program described in paragraph (b)(1) of this section and oversee the development, implementation, and maintenance of the program, including the appointment of a qualified Information Technology and Security Officer. Such oversight includes assigning specific responsibility for program implementation and review of program-related reports.

(3) *Required elements of program.* An NCUA-Licensed Permitted Payment Stablecoin Issuer's information technology and security program must include:

(i) An inventory and classification of assets, processes, and sensitivity of data;

(ii) Controls supporting and safeguarding sensitive information and processes;

(iii) Evaluation, validation, and reporting processes to ensure that key information technology systems and controls, including smart contracts, are operating as intended;

(iv) Periodic independent testing; and

(v) A comprehensive and effective incident identification and assessment process and incident response program.

(4) *Security of Customer information.* An NCUA-Licensed Permitted Payment Stablecoin Issuer's information technology and security program must include administrative, technical, and physical safeguards designed to:

(i) Ensure the security and confidentiality of records containing Nonpublic Personal Information about a Customer;

(ii) Protect against any anticipated threats or hazards to the security or integrity of such records;

(iii) Protect against unauthorized access to or use of such records that could result in substantial harm or inconvenience to any Customer; and

(iv) Ensure the proper disposal of such records.

(5) *Safe handling of Digital Assets.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must develop, implement, and maintain appropriate measures to ensure secure handling of Digital Assets, including Private Key management, backup, and recovery incorporating:

(i) Relevant technical, operational, strategic, market, legal, and compliance considerations relating to each Digital Asset and its underlying Digital Ledger; and

(ii) Material developments specifically related to supported Digital Assets and their underlying Digital Ledgers.

(6) *Adjust the program.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must monitor, evaluate, and adjust, as appropriate, the information technology and security program in light of any relevant changes in technology, the sensitivity of its Customer information, internal or external threats, and the NCUA-Licensed Permitted Payment Stablecoin Issuer's own changing business arrangements, such as mergers and acquisitions, alliances and joint ventures, third-party arrangements, and changes to applicable information systems.

(7) *Notification of unauthorized access—*

(i) *Notification to Customers.* When an NCUA-Licensed Permitted Payment Stablecoin Issuer becomes aware of an incident of unauthorized access to sensitive Customer information, including a Customer's Private Key, the NCUA-Licensed Permitted Payment Stablecoin Issuer must conduct a reasonable investigation to promptly determine the likelihood that the information has been or will be misused. If the NCUA-Licensed Permitted Payment Stablecoin Issuer determines that misuse of its information about a Customer has occurred or is reasonably possible, it must notify the affected or possibly affected Customer and the NCUA as soon as possible. Customer notice must be delayed if an appropriate law enforcement agency determines that notification will interfere with a criminal investigation and provides the NCUA-Licensed Permitted Payment Stablecoin Issuer with a written request for the delay. The NCUA-Licensed Permitted Payment Stablecoin Issuer must notify its Customers of the misuse or possible misuse of Customer information as soon as law enforcement notifies the NCUA-Licensed Permitted Payment Stablecoin Issuer that notification will no longer interfere with the investigation.

(ii) *Notification to group of Customers.* If an NCUA-Licensed Permitted Payment Stablecoin Issuer determines that a group of files has been accessed improperly but is unable to identify which specific Customers' information has been accessed and the circumstances of the unauthorized access lead the NCUA-Licensed Permitted Payment Stablecoin Issuer to determine that misuse of the information is reasonably possible, it must notify all Customers in the group.

(8) *Information technology resilience.* An NCUA-Licensed Permitted Payment Stablecoin Issuer's information technology and security program must include measures to ensure continuity of operations and recovery of critical functions in the face of disruptions, including by business impact analyses, testing of vulnerabilities, and testing with critical service providers.

(c) In order to ensure compliance with Bank Secrecy Act and economic sanctions requirements, each NCUA-Licensed Permitted Payment Stablecoin

Issuer must comply with the Bank Secrecy Act, sections 4(a)(5) and 4(a)(6) of the GENIUS Act (12 U.S.C. 5903(a)(5) and (6), and applicable regulations at 31 CFR Chapter V and 31 CFR Chapter X, including any Anti-Money Laundering/Countering the Financing of Terrorism (AML/CFT) program, economic sanctions program, and reporting requirements. Subpart E of this part provides the NCUA's supervision and enforcement policy for AML/CFT program requirements for NCUA-Licensed Permitted Payment Stablecoin Issuers.

**§ 706.205 Audits, reports, and supervision.**

(a) *General.* The NCUA will conduct a full-scope examination of every NCUA-Licensed Permitted Payment Stablecoin Issuer subject to its supervision at least once during each 12-month period, unless otherwise specified in paragraph (d) of this section.

(b) *Access to books and records.* Upon request by the NCUA, NCUA-Licensed Permitted Payment Stablecoin Issuers must grant the NCUA prompt and complete access to all Officers, Directors, employees, agents, and relevant books, records, or documents of any type.

(c) *Location of examinations.* The NCUA may conduct examinations of every NCUA-Licensed Permitted Payment Stablecoin Issuer subject to its supervision, as specified in paragraph (a) of this section, on-site, remotely, or in some combination.

(d) *Extended exam cycle for certain issuers.* Notwithstanding paragraph (a) of this section, the NCUA may conduct a full-scope examination of an NCUA-Licensed Permitted Payment Stablecoin Issuer subject to its supervision at least once during each 14- to 24-month period, as determined by the NCUA in its sole discretion, if the following conditions are satisfied:

(1) The NCUA-Licensed Permitted Payment Stablecoin Issuer currently is not subject to a formal enforcement proceeding or order;

(2) No Person became a Parent Company or acquired Control, as specified in §§ 706.111 and 706.205(m) of this part, of the NCUA-Licensed Permitted Payment Stablecoin Issuer during the preceding 12-month period in which a full-scope examination would have been required but for this paragraph (d);

(3) The NCUA-Licensed Permitted Payment Stablecoin Issuer has an Outstanding Issuance Value of less than $1 billion or less than $25 billion in total monthly Trading Volume; and

(4) The NCUA-Licensed Permitted Payment Stablecoin Issuer is in compliance with all of the reserve requirements set forth in § 706.202 and the reporting requirements of this section.

(e) *Authority to conduct more frequent examinations.* This section does not limit the authority of the NCUA to examine any NCUA-Licensed Permitted Payment Stablecoin Issuer as frequently as the NCUA deems necessary, including examinations of a limited scope.

(f) *Recordkeeping requirements.* All NCUA-Licensed Permitted Payment Stablecoin Issuers must maintain a complete set of books and records in English and in accordance with GAAP.

(g) *Records retention policy.* All NCUA-Licensed Permitted Payment Stablecoin Issuers must develop and implement a records retention policy that ensures the NCUA-Licensed Permitted Payment Stablecoin Issuer can demonstrate compliance with the GENIUS Act, this part, and all applicable laws and regulations.

(h) *Confidential weekly reporting.* All NCUA-Licensed Permitted Payment Stablecoin Issuers must submit to the NCUA, on a weekly basis, in the manner and form specified by the NCUA, a confidential report containing the information requested in the form available at *www.ncua.gov.*

(i) *Reports of financial condition.* All NCUA-Licensed Permitted Payment Stablecoin Issuers must submit to the NCUA a quarterly report on the financial condition of the NCUA-Licensed Permitted Payment Stablecoin Issuer, including, but not limited to, income statement, expenses, balance sheet, reserves, changes in equity, investments, capital, outstanding issuance value, and assets under custody, in a standardized format as prescribed by the NCUA within 30 days of the end of the prior quarter. Forms and instructions are available at *www.ncua.gov.* Each report of financial condition must contain a declaration by the NCUA-Licensed Permitted Payment Stablecoin Issuer's Chief Financial Officer, or the individual performing an equivalent function, that the report is true and correct to the best of their knowledge and belief. The correctness of the report of financial condition must be attested to by the signatures of the Directors and senior management of the NCUA-Licensed Permitted Payment Stablecoin Issuer other than the Officer, or the individual performing an equivalent function, making such declaration, with the attestation stating that the report has been examined by them and to the best of their knowledge and belief is true and correct.

(j) *Submission of other reports.* All NCUA-Licensed Permitted Payment Stablecoin Issuers must, upon request, submit to the NCUA a report on:

(1) The financial condition of the NCUA-Licensed Permitted Payment Stablecoin Issuer;

(2) The systems of the NCUA-Licensed Permitted Payment Stablecoin Issuer for monitoring and controlling financial and operational risks;

(3) Compliance of the NCUA-Licensed Permitted Payment Stablecoin Issuer and any subsidiary thereof with the GENIUS Act, and this part; and

(4) Compliance of the NCUA-Licensed Permitted Payment Stablecoin Issuer with the requirements of the Bank Secrecy Act and with laws authorizing the imposition of sanctions and implemented by the Secretary of the Treasury.

(k) *Ongoing compliance reporting.* Not later than 180 days after the approval of an application under subpart A, and on an annual basis thereafter, an NCUA-Licensed Permitted Payment Stablecoin Issuer must submit to the NCUA a certification by its board of Directors that the NCUA-Licensed Permitted Payment Stablecoin Issuer has implemented anti-money laundering and economic sanctions compliance programs that are reasonably designed to prevent the NCUA-Licensed Permitted Payment Stablecoin Issuer from facilitating money laundering, in particular, facilitating money laundering for cartels and organizations designated as foreign terrorist organizations under section 219 of the Immigration and Nationality Act (8 U.S.C. 1189) and the financing of terrorist activities, consistent with the requirements of the GENIUS Act.

(l) *Audits.* An NCUA-Licensed Permitted Payment Stablecoin Issuer with more than $50 billion in Outstanding Issuance Value that is not subject to the reporting requirements under section 13(a) or 15(d) of the Securities and Exchange Act of 1934 (15 U.S.C. 78m(a) or 78o(d)) must prepare in accordance with GAAP an annual financial statement that must include the disclosure of any related party transactions, as defined by GAAP.

(1) A Registered Public Accounting Firm must perform an audit of the financial statements described in this paragraph (l). The audit must be conducted in accordance with all applicable auditing standards established by the Public Company Accounting Oversight Board, including those relating to auditor independence,

internal controls, and related party transactions.

(2) An NCUA-Licensed Permitted Payment Stablecoin Issuer required to prepare an audited annual financial statement under this paragraph (l) must:

(i) Make the audited financial statements publicly available on the NCUA-Licensed Permitted Payment Stablecoin Issuer's website; and

(ii) Submit the audited financial statements annually, within 120 days after the end of its fiscal year, to the NCUA.

(iii) If an NCUA-Licensed Permitted Payment Stablecoin Issuer is unable to timely file all or any portion of the financial statement described in paragraph (l)(2)(ii) of this section, it must submit a written notice of late filing to the NCUA. The notice must:

(A) Disclose the NCUA-Licensed Permitted Payment Stablecoin Issuer's inability to timely file all, or specified portions, of its annual financial statement and the reasons therefore in reasonable detail;

(B) Include the date by which the financial statement will be filed; and

(C) Be filed on or before the deadline for filing the financial statement.

(m) *Changes in Control.* A Person seeking to acquire Control of an NCUA-Licensed Permitted Payment Stablecoin Issuer must follow the requirements of § 706.111 as though that Person were a Parent Company.

(n) *Use of existing reports.* In supervising and examining an NCUA-Licensed Permitted Payment Stablecoin Issuer, the NCUA will, to the fullest extent possible, use existing reports and other supervisory information.

(o) *Avoidance of duplication.* The NCUA will, to the fullest extent possible, avoid duplication of examination activities, reporting requirements, and requests for information.

## Subpart C—Custody

### § 706.301 Definitions.

For the purposes of this subpart, the following definitions apply:

*Applicable Law* means the law of a State or other jurisdiction governing a Covered Custodian's custody relationships, any applicable Federal law governing those relationships, the terms of the Custody Agreement, and any applicable court order.

*Covered Assets* means Payment Stablecoin reserves, Payment Stablecoins used as collateral, and Private Keys used to issue Payment Stablecoins, as well as cash and other property received in the course of the provision of custodial or safekeeping services for such assets.

*Covered Custodian* means an Insured Credit Union or NCUA-Licensed Permitted Payment Stablecoin Issuer to the extent of such Person's provision of custodial or safekeeping services for Covered Assets.

*Covered Customer* means a Person for or on whose behalf a Covered Custodian receives, acquires, or holds Covered Assets.

*Custody Agreement* means a legally binding contractual agreement between a Covered Customer, as the principal, and the Covered Custodian, as the agent, that establishes the Covered Custodian's duties and responsibilities in providing safekeeping and ancillary services to the Covered Customer.

*Digital Wallet* means a software program or hardware device that stores and manages the Private Keys associated with a particular unit of a Digital Asset.

*Sub-Custodian* means a Person that provides custody and safekeeping services to a Covered Custodian, including through a Digital Wallet for which such Person controls the associated Private Keys, with respect to Covered Assets of a Covered Customer, for which the Covered Custodian otherwise serves as a custodian under this subpart. A sub-custodian is subject to the requirements applicable to a custodian under the GENIUS Act, including the requirements of section 10 of the Act (12 U.S.C. 5909).

### § 706.302 Covered Asset custodial property requirements.

(a) *Separate accounting, treatment, and dealing.* A Covered Custodian must separately account for the Covered Assets of a Covered Customer and must treat and deal with those Covered Assets as belonging to such Covered Customer and not as the property of the Covered Custodian.

(b) *Protection, possession, and control.*

(1) A Covered Custodian must take appropriate steps to protect the Covered Assets of Covered Customers from the claims of creditors of the Covered Custodian and any Sub-Custodian, as applicable, including through adopting, implementing, and maintaining written policies, procedures, and internal controls that are adequate to comply with Applicable Law and that are commensurate with the Covered Custodian's size, complexity, and risk profile and with the nature of the applicable Covered Assets for which it provides custodial or safekeeping services.

(2)

(i) A Covered Custodian must maintain possession or control of the Covered Assets of a Covered Customer that are held directly, including in a Digital Wallet for which the Covered Custodian controls the associated Private Keys; however, a Covered Custodian may maintain the Covered Assets of a Covered Customer through the use of a Sub-Custodian if consistent with Applicable Law, provided the Covered Custodian maintains adequate safeguards and internal controls reasonably designed to provide the Covered Custodian with oversight of such Sub-Custodian's compliance with the requirements of this subpart.

(ii) With regards to any Payment Stablecoin or Payment Stablecoin reserve in the form of a tokenized asset held in safekeeping under this subpart, a Covered Custodian, or Sub-Custodian, as applicable, maintains control for purposes of paragraph (b)(2)(i) of this section if it can reasonably demonstrate, consistent with the standard of care established by applicable law, that no other party, including the Covered Customer, can transfer the Payment Stablecoin or tokenized asset using a Distributed Ledger without the consent of the Covered Custodian or Sub-Custodian, as applicable.

(c) *Withdrawals and application of Covered Assets.* Consistent with Applicable Law, a Covered Custodian may withdraw and apply such share of the Covered Assets of a Covered Customer necessary to transfer, adjust, or settle a transaction or transfer of assets applicable to that Covered Customer, including the payment of commissions, taxes, storage, and other charges lawfully accruing in connection with the provision of services to that Covered Customer by the Covered Custodian.

(d) *Holdings of cash.* Notwithstanding any other provision of this section, an Insured Credit Union that provides custodial or safekeeping services, including as a Sub-Custodian, for Covered Assets that are in the form of cash may hold such cash in the form of a deposit or Share Account liability, provided such treatment is consistent with Federal law.

### § 706.303 Use of omnibus accounts.

(a) *Segregation of Covered Assets.* A Covered Custodian must segregate all Covered Assets of Covered Customers from and not commingle them with the assets of the Covered Custodian, except as permitted under § 706.302(d).

(b) *Commingling covered assets.* A Covered Custodian may, for convenience, commingle the Covered Assets of multiple Covered Customers, in one or more omnibus accounts to the extent that the steps it has taken pursuant to § 706.302(b) are adequate to

maintain safe and sound practices for the use of omnibus accounts, and to the extent that the use of omnibus accounts is consistent with Applicable Law.

**§ 706.304 Self-custody hardware and software exclusion.**

The requirements of this subpart do not apply to any Insured Credit Union or NCUA-Licensed Permitted Payment Stablecoin Issuer solely on the basis that such entity engages in the business of providing hardware or software to facilitate a Person's self-custody of their Payment Stablecoins or Private Keys.

## Subpart D—Capital and Operational Backstop

**§ 706.400 Capital elements.**

(a) *Capital elements.* The minimum capital requirement must consist of common equity tier 1 capital and additional tier 1 capital.

(b) *Common equity tier 1 capital.* Common equity tier 1 capital is the sum of the common equity tier 1 capital elements in this paragraph (b). The common equity tier 1 capital elements are:

(1) Any common stock instruments (plus any related surplus) issued by the NCUA-Licensed Permitted Payment Stablecoin Issuer, net of treasury stock, that meet all the following criteria:

(i) The instrument is paid-in, issued directly by the NCUA-Licensed Permitted Payment Stablecoin Issuer, and represents the most subordinated claim in a receivership, insolvency, liquidation, or similar proceeding of the NCUA-Licensed Permitted Payment Stablecoin Issuer;

(ii) The holder of the instrument is entitled to a claim on the residual assets of the NCUA-Licensed Permitted Payment Stablecoin Issuer that is proportional with the holder's share of the NCUA-Licensed Permitted Payment Stablecoin Issuer's issued capital after all senior claims have been satisfied in a receivership, insolvency, liquidation, or similar proceeding;

(iii) The instrument has no maturity date, can only be redeemed via discretionary repurchases with the prior approval of the NCUA, and does not contain any term or feature that creates an incentive to redeem;

(iv) The NCUA-Licensed Permitted Payment Stablecoin Issuer did not create at issuance of the instrument through any action or communication an expectation that it will buy back, cancel, or redeem the instrument, and the instrument does not include any term or feature that might give rise to such an expectation;

(v) Any cash dividend payments on the instrument are paid out of the NCUA-Licensed Permitted Payment Stablecoin Issuer's net income or retained earnings and are not subject to a limit imposed by the contractual terms governing the instrument;

(vi) The NCUA-Licensed Permitted Payment Stablecoin Issuer has full discretion at all times to refrain from paying any dividends and making any other distributions on the instrument without triggering an event of default, a requirement to make a payment-in-kind, or an imposition of any other restrictions on the NCUA-Licensed Permitted Payment Stablecoin Issuer;

(vii) Dividend payments and any other distributions on the instrument may be paid only after all legal and contractual obligations of the NCUA-Licensed Permitted Payment Stablecoin Issuer have been satisfied, including payments due on more senior claims;

(viii) The holders of the instrument bear losses as they occur equally, proportionately, and simultaneously with the holders of all other common stock instruments before any losses are borne by holders of claims on the NCUA-Licensed Permitted Payment Stablecoin Issuer with greater priority in a receivership, insolvency, liquidation, or similar proceeding;

(ix) The paid-in amount is classified as equity under GAAP;

(x) The NCUA-Licensed Permitted Payment Stablecoin Issuer, or an entity that the NCUA-Licensed Permitted Payment Stablecoin Issuer controls, did not purchase or directly or indirectly fund the purchase of the instrument;

(xi) The instrument is not secured, not covered by a guarantee of the NCUA-Licensed Permitted Payment Stablecoin Issuer or of an Affiliate, and is not subject to any other arrangement that legally or economically enhances the seniority of the instrument;

(xii) The instrument has been issued in accordance with applicable laws and regulations; and

(xiii) The instrument is reported on the NCUA-Licensed Permitted Payment Stablecoin Issuer's financial statements separately from other capital instruments.

(2) Retained earnings.

(3) Accumulated other comprehensive income (AOCI) as reported under GAAP.

(4) Notwithstanding the criteria for common stock instruments referenced in paragraph (b)(1) of this section, common stock issued by the NCUA-Licensed Permitted Payment Stablecoin Issuer and held in trust for the benefit of its employees as part of an employee stock ownership plan does not violate any of the criteria in paragraph (b)(1)(iii), (iv), or (xi) of this section, provided that any repurchase of the stock is required solely by virtue of the Employee Retirement Income Security Act of 1974 (ERISA) for an instrument of an NCUA-Licensed Permitted Payment Stablecoin Issuer that is not publicly-traded. In addition, an instrument issued by a NCUA-Licensed Permitted Payment Stablecoin Issuer to its employee stock ownership plan does not violate the criterion in paragraph (b)(1)(x) of this section.

(c) *Additional tier 1 capital.* Additional tier 1 capital is the sum of additional tier 1 capital elements and any related surplus. Additional tier 1 capital elements are:

(1) Instruments (plus any related surplus) that meet the following criteria:

(i) The instrument is issued and paid-in;

(ii) The instrument is subordinated to payment stablecoin holders, general creditors, and subordinated debt holders of the NCUA-Licensed Permitted Payment Stablecoin Issuer in a receivership, insolvency, liquidation, or similar proceeding;

(iii) The instrument is not secured, not covered by a guarantee of the NCUA-Licensed Permitted Payment Stablecoin Issuer or of an Affiliate, and not subject to any other arrangement that legally or economically enhances the seniority of the instrument;

(iv) The instrument has no maturity date and does not contain a dividend step-up or any other term or feature that creates an incentive to redeem;

(v) If callable by its terms, the instrument may be called by the NCUA-Licensed Permitted Payment Stablecoin Issuer only after a minimum of five years following issuance, except that the terms of the instrument may allow it to be called earlier than five years upon the occurrence of a regulatory event that precludes the instrument from being included in additional tier 1 capital or a tax event that impacts the taxation of the instrument. In addition:

(A) The NCUA-Licensed Permitted Payment Stablecoin Issuer must receive prior approval from the NCUA to exercise a call option on the instrument;

(B) The NCUA-Licensed Permitted Payment Stablecoin Issuer does not create at issuance of the instrument, through any action or communication, an expectation that the call option will be exercised; and

(C) Prior to or simultaneously with exercising the call option, the NCUA-Licensed Permitted Payment Stablecoin Issuer must either replace the instrument to be called with an equal amount of common equity tier 1 or additional tier 1 instruments or demonstrate to the satisfaction of the

NCUA that following redemption, the NCUA-Licensed Permitted Payment Stablecoin Issuer will continue to hold capital commensurate with its risk;

(vi) Redemption or repurchase of the instrument requires prior approval from the NCUA;

(vii) The NCUA-Licensed Permitted Payment Stablecoin Issuer has full discretion at all times to cancel dividends or other distributions on the instrument without triggering an event of default, a requirement to make a payment-in-kind, or an imposition of other restrictions on the NCUA-Licensed Permitted Payment Stablecoin Issuer except in relation to any distributions to holders of common stock or instruments that are pari passu with the instrument;

(viii) Any cash dividend payments on the instrument are paid out of the NCUA-Licensed Permitted Payment Stablecoin Issuer's net income or retained earnings;

(ix) The instrument does not have a credit-sensitive feature, such as a dividend rate that is reset periodically based in whole or in part on the NCUA-Licensed Permitted Payment Stablecoin Issuer's credit quality, but may have a dividend rate that is adjusted periodically independent of the NCUA-Licensed Permitted Payment Stablecoin Issuer's credit quality, in relation to general market interest rates or similar adjustments;

(x) The paid-in amount is classified as equity under GAAP;

(xi) The NCUA-Licensed Permitted Payment Stablecoin Issuer, or an entity that the NCUA-Licensed Permitted Payment Stablecoin Issuer controls, did not purchase or directly or indirectly fund the purchase of the instrument; and

(xii) The instrument does not have any features that would limit or discourage additional issuance of capital by the NCUA-Licensed Permitted Payment Stablecoin Issuer, such as provisions that require the NCUA-Licensed Permitted Payment Stablecoin Issuer to compensate holders of the instrument if a new instrument is issued at a lower price during a specified time frame.

(2) [Reserved]

**§ 706.401 Minimum capital and backstop.**

(a) *Minimum capital requirement.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must hold minimum capital as follows:

(1) *De novo capital requirement.*

(i) A de novo NCUA-Licensed Permitted Payment Stablecoin Issuer must hold minimum capital equal to the greater of:

(A) The amount specified as part of its licensing conditions; or

(B) $5 million.

(ii) A de novo NCUA-Licensed Permitted Payment Stablecoin Issuer means a permitted payment stablecoin issuer that has received NCUA approval to issue a Payment Stablecoin under this part within the prior 3 years.

(iii) A de novo NCUA-Licensed Permitted Payment Stablecoin Issuer must hold this minimum amount for 36 months, or for a shorter or longer period as specified as part of its licensing conditions or as subsequently determined by the NCUA based on the experience of the NCUA-Licensed Permitted Payment Stablecoin Issuer.

(2) *Ongoing capital requirement.*

(i) An NCUA-Licensed Permitted Payment Stablecoin Issuer must maintain capital commensurate with the level and nature of all risks to which the NCUA-Licensed Permitted Payment Stablecoin Issuer is exposed, including risks for off-balance sheet activities.

(ii) An NCUA-Licensed Permitted Payment Stablecoin Issuer must have a process for assessing its overall capital adequacy in relation to its business model and risk profile and a comprehensive strategy for sustaining an appropriate level of capital to maintain ongoing operations.

(b) *Operational backstop.* An NCUA-Licensed Permitted Payment Stablecoin Issuer must maintain assets:

(1) Equal to 12 months of total expenses.

(i) In the case of an NCUA-Licensed Permitted Payment Stablecoin Issuer that has provided quarterly reports under § 706.205 for one year or more, the NCUA-Licensed Permitted Payment Stablecoin Issuer must calculate the amount required under this paragraph (b)(1) using the quarterly expenses reported in the current quarterly report and the three immediately preceding reports.

(ii) For each calendar quarter in the preceding 12 months for which the NCUA-Licensed Permitted Payment Stablecoin Issuer has not filed a quarterly report required under § 706.205 the NCUA-Licensed Permitted Payment Stablecoin Issuer must calculate its expenses using:

(A) Actual expenses, in the case of an NCUA-Licensed Permitted Payment Stablecoin Issuer that was in operation during a calendar quarter in which it did not file a quarterly report under § 706.205; or

(B) Reasonably determined expenses, which may include annualizing expenses from other quarters, in the case of any other NCUA-Licensed Permitted Payment Stablecoin Issuer.

(2) Consisting of:

(i) United States coins and currency (including Federal Reserve notes) or Money standing to the credit of an account with a Federal Reserve Bank;

(ii) Funds held as deposits or in Share Accounts that are payable upon demand at a U.S. Insured Depository Institution, the balances of which are fully insured by the FDIC or the NCUA; and

(iii) U.S. Treasury bills, notes, or bonds with a remaining maturity of 93 days or less, or issued with a maturity of 93 days or less; and

(3) Separately identified from any reserve assets required under § 706.202 or other assets of the NCUA-Licensed Permitted Payment Stablecoin Issuer on the reports filed under § 706.205.

(c) *Failure to meet minimum capital or backstop requirements.*

(1) An NCUA-Licensed Permitted Payment Stablecoin Issuer must comply with its minimum capital and backstop requirements at the end of each quarter based on the amounts reported in the most recent report required under § 706.205.

(2) An NCUA-Licensed Permitted Payment Stablecoin Issuer that fails to satisfy its minimum capital or backstop requirement at the end of a quarter is prohibited from issuing any new Payment Stablecoins, except as necessary to facilitate a transfer of Payment Stablecoins from one Distributed Ledger to another and provided that the net Outstanding Issuance Value does not increase starting on the first day of the following month and until such time as it satisfies its minimum capital and backstop requirements.

(3) If an NCUA-Licensed Permitted Payment Stablecoin Issuer fails to meet its minimum capital or backstop requirements at the end of two consecutive quarters, it must:

(i) Begin liquidation of Reserve Assets and redemption of outstanding Payment Stablecoins, consistent with § 706.203;

(ii) Not charge Customers a fee to redeem their Payment Stablecoins; and

(iii) Not issue any new Payment Stablecoins going forward.

**§ 706.402 Individual additional capital or backstop requirement.**

(a) *Applicability.* The NCUA may require an additional capital or backstop requirement for an individual NCUA-Licensed Permitted Payment Stablecoin Issuer in view of its circumstances. For example, an additional capital or backstop requirement may be appropriate for:

(1) Failure of management to assess an appropriate capital requirement to support ongoing operations consistent

with the NCUA-Licensed Permitted Payment Stablecoin Issuer's business model and risk profile;

(2) An NCUA-Licensed Permitted Payment Stablecoin Issuer that has, or is expected to have, losses resulting in capital inadequacy;

(3) An NCUA-Licensed Permitted Payment Stablecoin Issuer with significant exposure due to management's overall inability to monitor and control financial and operating risks;

(4) An NCUA-Licensed Permitted Payment Stablecoin Issuer that is experiencing significant volatility in Payment Stablecoin issuance or redemption;

(5) An NCUA-Licensed Permitted Payment Stablecoin Issuer with significant exposure due to fiduciary or operational risk;

(6) An NCUA-Licensed Permitted Payment Stablecoin Issuer's significant off-balance sheet activities; or

(7) An NCUA-Licensed Permitted Payment Stablecoin Issuer that may be adversely affected by the activities or condition of its Affiliate(s), or other Persons or institutions, with which it has significant business relationships.

(b) *Standards for determination.* The factors to be considered in the determination will vary in each case and may include, for example:

(1) The conditions or circumstances leading to the NCUA's determination that an additional capital or backstop requirement is appropriate or necessary for the NCUA-Licensed Permitted Payment Stablecoin Issuer;

(2) The exigency of those circumstances or potential problems;

(3) The overall condition, management strength, and future prospects of the NCUA-Licensed Permitted Payment Stablecoin Issuer and, if applicable, its Affiliate(s);

(4) The NCUA-Licensed Permitted Payment Stablecoin Issuer's liquidity, capital, and Payment Stablecoin Reserve Assets compared to its peer group; and

(5) The views of the NCUA-Licensed Permitted Payment Stablecoin Issuer's owners and senior management in any response provided under paragraph (c)(2) of this section.

(c) *Procedures—*

(1) *Notice.* When the NCUA determines that an additional capital or backstop requirement above that set forth in § 706.401 are necessary or appropriate for a particular NCUA-Licensed Permitted Payment Stablecoin Issuer, the NCUA will notify the NCUA-Licensed Permitted Payment Stablecoin Issuer in writing of the proposed additional capital or backstop requirement and the date by which the requirement should be reached (if applicable) and will provide an explanation of why the requirement proposed is considered necessary or appropriate for the NCUA-Licensed Permitted Payment Stablecoin Issuer.

(2) *Response.*

(i)

(A) The NCUA-Licensed Permitted Payment Stablecoin Issuer may respond to the NCUA in writing to the notice.

(B) The response should include any matters which the NCUA-Licensed Permitted Payment Stablecoin Issuer would have the NCUA consider in deciding whether an individual additional capital or backstop requirement should be established for the NCUA-Licensed Permitted Payment Stablecoin Issuer, what the capital or backstop requirement should be, and, if applicable, when it should be achieved.

(C) Any response must be delivered to the designated NCUA official within 30 days after the date on which the NCUA-Licensed Permitted Payment Stablecoin Issuer received the notice or such other time period as the NCUA determines appropriate based on the condition of the NCUA-Licensed Permitted Payment Stablecoin Issuer.

(ii) Failure to respond within the time period specified by the NCUA constitutes a waiver of any objections to the proposed individual additional capital or backstop requirement or the deadline for its achievement.

(3) *Decision.* After the close of the NCUA-Licensed Permitted Payment Stablecoin Issuer's response period, the NCUA will decide, based on a review of the NCUA-Licensed Permitted Payment Stablecoin Issuer's response and other information concerning the NCUA-Licensed Permitted Payment Stablecoin Issuer, whether the individual additional capital or backstop requirement should be established for the NCUA-Licensed Permitted Payment Stablecoin Issuer and, if so, the requirement and the date the requirement will become effective. The NCUA-Licensed Permitted Payment Stablecoin Issuer will be notified of the decision in writing. The notice will include an explanation of the decision, except for a decision not to establish an individual additional capital or backstop requirement for the NCUA-Licensed Permitted Payment Stablecoin Issuer.

(4) *Submission of plan.* The decision may require the NCUA-Licensed Permitted Payment Stablecoin Issuer to develop and submit to the NCUA, within a time period specified, an acceptable plan to reach the additional capital or backstop requirement established for the NCUA-Licensed Permitted Payment Stablecoin Issuer by the date required.

(5) *Change in circumstances.* If, after the NCUA's decision in paragraph (c)(3) of this section, there is a significant change in the circumstances that materially affects the NCUA-Licensed Permitted Payment Stablecoin Issuer's capital adequacy or its ability to reach the required additional capital or backstop requirement by the specified date, the NCUA-Licensed Permitted Payment Stablecoin Issuer may request, or the NCUA may propose to the NCUA-Licensed Permitted Payment Stablecoin Issuer, a change in the additional capital or backstop requirement for the NCUA-Licensed Permitted Payment Stablecoin Issuer, the date when the minimum must be achieved, or the NCUA-Licensed Permitted Payment Stablecoin Issuer's plan (if applicable). Pending a decision on reconsideration, the NCUA's original decision and any plan required under that decision continues in full force and effect.

## Subpart E—Supervision and Enforcement Policy for Anti-Money Laundering/Countering the Financing of Terrorism Program Requirements for NCUA-Licensed Permitted Payment Stablecoin Issuers

### § 706.501 Definitions.

For purposes of this section:

*AML/CFT enforcement action* means any formal or informal action taken under authority of 12 U.S.C. 5905, 12 U.S.C. 1786, or other applicable law, that seeks to penalize, remedy, prevent, or respond to noncompliance with past or ongoing violations of, or past or ongoing deficiencies relating to, an AML/CFT requirement. The term includes—

(1) A cease-and-desist order, written agreement, consent order, or memorandum of understanding; or

(2) The assessment of a civil money penalty.

*AML/CFT requirement* means:

(1) A requirement of the Bank Secrecy Act or applicable regulations at 31 CFR chapter X;

(2) A requirement of 12 U.S.C. 5903(a)(5)(A)(i)–(v), 12 U.S.C. 5903(a)(6)(B), or 12 U.S.C. 5903(f)(1)(A); or

(3) A requirement prescribed under 12 U.S.C. 1786(q) or this section.

*Significant AML/CFT supervisory action* means any written communication or other formal supervisory determination that—

(1) Identifies one or more alleged deficiencies, weaknesses, violations of law, or unsafe or unsound practices or conditions relating to an AML/CFT requirement;

(2) Communicates supervisory expectations to an NCUA-Licensed Permitted Payment Stablecoin Issuer regarding actions or remedial measures required to correct the deficiency, weakness, violation, or practice or condition; and

(3) contemplates significant or programmatic actions or remedial measures to be taken by the NCUA-Licensed Permitted Payment Stablecoin Issuer.

The term does not include examiner observations, suggestions, or other informal comments.

**§ 706.502 NCUA Supervision and Enforcement Policy**

*(a) In general.* Except with respect to a significant or systemic failure to implement an effective AML/CFT program in accordance with applicable regulations at 31 CFR Chapter X, an NCUA-Licensed Permitted Payment Stablecoin Issuer that has established an effective AML/CFT program in accordance with applicable regulations at 31 CFR Chapter X will not be subject to an AML/CFT enforcement action or to a significant AML/CFT supervisory action related to the requirements of 31 U.S.C. 5318(h)(1), this section, or applicable regulations at 31 CFR Chapter X.

(b) *Program establishment violations.* Nothing in this subpart E may be construed to restrict an AML/CFT enforcement action or a significant AML/CFT supervisory action with respect to any failure to establish an effective AML/CFT program in accordance with applicable regulations at 31 Chapter X.

(c) *Criminal enforcement unaffected.* Nothing in this subpart may be construed to affect criminal enforcement liability under the Bank Secrecy Act.

**§ 706.503 FinCEN consultation.**

(a) *Consultation and consideration requirement.* Before initiating an AML/CFT enforcement action or a significant AML/CFT supervisory action, the NCUA will provide the FinCEN Director an opportunity to review the action and will consider any input offered by the FinCEN Director on the action, which may include any view as to the effectiveness of the NCUA-Licensed Permitted Payment Stablecoin Issuer's AML/CFT program.

(b) *Notice requirement.* To provide the FinCEN Director an opportunity to provide a view under paragraph (a) of this section, the NCUA will:

(1) Send written notice to the FinCEN Director of its intent to take that action at least 30 days before taking the action (unless a shorter period of time is necessary, in the sole discretion of the NCUA, to remedy, prevent, or respond to an unsafe or unsound practice or condition), accompanied by the relevant AML/CFT information underlying the proposed action, including the relevant portions of the draft report or enforcement action, the relevant examination workpapers supporting the proposed action, and the relevant AML/CFT information submitted by the NCUA-Licensed Permitted Payment Stablecoin Issuer to the NCUA, other than information over which the NCUA-Licensed Permitted Payment Stablecoin Issuer may claim privilege under Federal or State law; and

(2) Respond to the extent reasonably practicable to requests for additional information from the FinCEN Director regarding the proposed action.

**§ 706.504 . Disclosure of supervisory information to FinCEN.**

[OPTION A]

The NCUA permits a permitted payment stablecoin issuer subject to the NCUA's jurisdiction, on behalf of the NCUA, to disclose to the FinCEN Director, and permits the FinCEN Director to use, any information relating to an existing or potential AML/CFT enforcement action or significant AML/CFT supervisory action to which the permitted payment stablecoin issuer has access.

[OPTION B]

(a) The NCUA permits a permitted payment stablecoin issuer subject to the NCUA's jurisdiction, on behalf of the NCUA, to disclose to the FinCEN Director, and permits the FinCEN Director to use, any information relating to an existing or potential AML/CFT enforcement action or significant AML/CFT supervisory action to which the permitted payment stablecoin issuer has access upon the contemporaneous disclosure of such information to the NCUA

(b) A permitted payment stablecoin issuer's disclosure of information to the FinCEN Director under paragraph (a) of this section does not waive, invalidate, destroy, or otherwise affect any privilege or protection available under Federal or State law, including the attorney-client privilege, the work-product doctrine, the bank-examination privilege, or any other confidentiality or evidentiary privilege.

(c) Any disclosure made by a permitted payment stablecoin issuer under paragraph (a) of this section is made on behalf of the NCUA pursuant to the NCUA's authorization under 12 U.S.C. 1821(t).

## PART 745—SHARE INSURANCE COVERAGE

■ 7. Authority for part 745 continues to read as follows:

**Authority:** 12 U.S.C. 1752(5), 1757, 1765, 1766, 1781, 1782, 1787, 1789; title V, Pub. L. 109–351;120 Stat. 1966.

■ 8. Amend § 745.2 by adding a new paragraph (f) to read as follows:

* * * * *

(f) *Technology used to record accounts.* The technology or type of recordkeeping utilized by an Insured Credit Union to record account liabilities does not affect whether those liabilities constitute ''accounts.''

* * * * *

■ 9. Revise § 745.6 to read as follows:

**§ 745.6 Accounts held by a corporation, partnership or unincorporated association.**

(a) Accounts of a corporation, partnership, or unincorporated association engaged in any independent activity shall be insured up to the SMSIA in the aggregate. The account of a corporation, partnership, or unincorporated association not engaged in an independent activity shall be deemed to be owned by the Person or persons owning such corporation or comprising such partnership or unincorporated association and, for account insurance purposes, the interest of each Person in such an account shall be added to any other account individually owned by such Person and insured up to the SMSIA in the aggregate. For purposes of this section, ''independent activity'' means an activity other than one directed solely at increasing insurance coverage.

(b) Notwithstanding any other provision of this part, accounts at an Insured Credit Union held as reserves for a Payment Stablecoin, as defined in the Guiding and Establishing National Innovation for U.S. Stablecoins Act (GENIUS) (12 U.S.C. 5901), are accounts of the permitted payment stablecoin issuer's and insured as corporate accounts for purposes of this part.

## PART 747—ADMINISTRATIVE ACTIONS, ADJUDICATIVE HEARINGS, RULES OF PRACTICE AND PROCEDURE, AND INVESTIGATIONS

■ 10. The authority citation for part 747 is revised to read as follows:

**Authority:** 12 U.S.C. 1766, 1782, 1784, 1785, 1786, 1787, 1790a, 1790d, 5905, and 5913; 15 U.S.C. 1639e; 42 U.S.C. 4012a; Pub. L. 101–410; Pub. L. 104–134; Pub. L. 109–351; Pub. L. 114–74.

■ 11. Amend § 747.1 by revising paragraph (e) and adding paragraph (f) to read as follows:

**§ 747.1 Scope.**

* * * * *

(e) Suspension or revocation of registration, cease-and-desist, temporary cease-and-desist, removal and prohibition proceedings, or civil money penalties under section 6 of the Guiding and Establishing National Innovation for U.S. Stablecoins Act (''GENIUS Act'') (12 U.S.C. 5905); and

(f) This subpart also applies to all other adjudications required by statute to be determined on the record after opportunity for an agency hearing, unless otherwise specifically provided for in subparts B through J of this part.

■ 14. Amend § 747.3 by revising paragraphs (g) and (h) to read as follows:

**§ 747.3 Definitions.**

* * * * *

(g) Institution includes:

(1) Any Federal credit union as that term is defined in section 101(1) of the Act (12 U.S.C. 1752(1));

(2) Any insured State-chartered credit union as that term is defined in section 101(7) of the FCUA (12 U.S.C. 1752(7)); and

(3) Any NCUA-Licensed Permitted Payment Stablecoin Issuer as that term is defined in 12 CFR 706.2.

(h) Institution-affiliated party means any institution-affiliated party as that term is defined in section 206(r) of the Act (12 U.S.C. 1786(r)). For actions pursuant to the GENIUS Act, institution-affiliated party means any institution-affiliated party as that term is defined in section 2(13) of the GENIUS Act (12 U.S.C. 5901(13)).

* * * * *

■ 12. Amend § 747.3 by revising paragraph (a) to read as follows:

**§ 747.703 Authority to conduct investigations.**

(a) The General Counsel and persons acting on his or her behalf and at his or her direction may conduct such investigations into the affairs of any insured credit union, NCUA-Licensed Permitted Payment Stablecoin Issuer, or institution-affiliated parties as deemed appropriate to determine whether such credit union or party has violated, is violating or is about to violate any provision of the Act, the GENIUS Act, the NCUA Board's regulations or other relevant statutes or regulations that may bear on a party's fitness to participate in the affairs of a credit union or an NCUA-Licensed Permitted Payment Stablecoin Issuer. The General Counsel and persons acting on his or her behalf may investigate whether any party is unfit to participate in the affairs of a credit union or an NCUA-Licensed Permitted Payment Stablecoin Issuer, whether formal enforcement proceedings are warranted, or such other matters as the General Counsel or his or her designee, in his or her discretion, shall deem appropriate. Such investigations may be conducted either informally or formally.

## ELECTRONIC RESEARCH

### World Wide Web

Full text of the daily Federal Register, CFR and other publications is located at: **www.govinfo.gov.**

Federal Register information and research tools, including Public Inspection List and electronic text are located at: **www.federalregister.gov.**

### E-mail

**FEDREGTOC** (Daily Federal Register Table of Contents Electronic Mailing List) is an open e-mail service that provides subscribers with a digital form of the Federal Register Table of Contents. The digital form of the Federal Register Table of Contents includes HTML and PDF links to the full text of each document.

To join or leave, go to **https://public.govdelivery.com/accounts/USGPOOFR/subscriber/new**, enter your email address, then follow the instructions to join, leave, or manage your subscription.

**PENS** (Public Law Electronic Notification Service) is an e-mail service that notifies subscribers of recently enacted laws.

To subscribe, go to **http://listserv.gsa.gov/archives/publaws-l.html and select** *Join or leave the list (or change settings);* then follow the instructions.

**FEDREGTOC** and **PENS** are mailing lists only. We cannot respond to specific inquiries.

**Reference questions.** Send questions and comments about the Federal Register system to: **fedreg.info@nara.gov**

The Federal Register staff cannot interpret specific documents or regulations.

## FEDERAL REGISTER PAGES AND DATE, MAY

23355–23902 ..... 1
23903–24114 ..... 4
24115–24336 ..... 5
24337–24704 ..... 6
24705–25072 ..... 7
25073–25478 ..... 8
25478–25782 ..... 11
25783–26892 ..... 12
26893–27182 ..... 13
27183–27830 ..... 14
27831–28406 ..... 15
28407–29036 ..... 18

## CFR PARTS AFFECTED DURING MAY

At the end of each month the Office of the Federal Register publishes separately a List of CFR Sections Affected (LSA), which lists parts and sections affected by documents published since the revision date of each title.

### 3 CFR

**Proclamations:**
11023 ..... 24321
11024 ..... 24323
11025 ..... 25067
11026 ..... 25477
11027 ..... 26889
11028 ..... 26891
11029 ..... 27829

**Executive Orders:**
14402 ..... 24325
14403 ..... 24329
14404 ..... 25061

**Administrative Orders:**
Notices:
Notice of May 4, 2026 ..... 25069
Notice of May 4, 2026 ..... 25071
Notice of May 7, 2026 ..... 25781
Notice of May 11, 2026 ..... 27181
Presidential Determinations:
No. 2026–13 ..... 27177
Presidential Permits:
Permit of April 30, 2026 ..... 24333

### 5 CFR

## LIST OF PUBLIC LAWS

**Note:** No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws**.

**Last List May 13, 2026**

## Public Laws Electronic Notification Service (PENS)

**PENS** is a free electronic mail notification service of newly enacted public laws. To subscribe, go to *http://listserv.gsa.gov/archives/publaws-l.html*

**Note:** This service is strictly for E-mail notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.
