FEDERAL REGISTER

Vol. 91 Thursday,
No. 135 July 16, 2026

Pages 43511–44728

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 91 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 91, No. 135
Thursday, July 16, 2026

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF ENERGY

2 CFR Part 910

[DOE–HQ–2024–0029]

RIN 1991–AC18

Financial Assistance Regulations—Conflict of Interest and Conflict of Commitment Policy Requirements

AGENCY: Office of Acquisition Management, U.S. Department of Energy.

ACTION: Final rule.

SUMMARY: The Department of Energy (DOE or Department) is amending its Financial Assistance Regulations to establish conflict of interest and conflict of commitment policies and requirements for non-Federal entities applying for or receiving financial assistance awards from the Department, and to implement and standardize certain disclosure requirements applicable to financial assistance applications and awards, including responsibilities, general rules, and procedures for non-Federal entities to identify, evaluate, resolve, and report conflicts of interest, conflicts of commitment, and organizational conflicts of interest, in financial assistance applications and awards.

DATES: This rule is effective on August 17, 2026.

ADDRESSES: The docket for this rulemaking, which includes **Federal Register** notices and comments, can be found at *Regulations.gov* (*www.regulations.gov/document/DOE-HQ-2024-0029-0001*). The docket web page contains instructions on how to access all documents, including public comments, in the docket.

FOR FURTHER INFORMATION CONTACT: Ms. Bari Brooks, U.S. Department of Energy, Office of Acquisition Management, 1000 Independence Avenue SW, Washington, DC 20585; (202) 586–1027 or mail to: *bari.brooks@hq.doe.gov*.

IV. Approval by the Office of the Secretary of Energy

I. Background

The purpose of this rulemaking is to amend the Department's Financial Assistance Regulations at 2 CFR part 910. Specifically, DOE is amending part 910 to prescribe responsibilities, requirements, and procedures for non-Federal entities to identify, evaluate, resolve, and report conflicts of interest, conflicts of commitment, and organizational conflicts of interest in Federal financial assistance applications and awards, as those terms are defined in this final rule.

This final rule implements Office of Management and Budget (OMB) guidance to Federal agencies regarding the establishment of conflict of interest (COI) policies for Federal awards by codifying existing DOE policy, consistent with National Security Presidential Memorandum 33 (NSPM–33) [1] and the CHIPS and Science Act of 2022 (Pub. L. 117–167; August 9, 2022).

DOE is required to establish COI policies for Federal awards pursuant to 2 CFR 200.112, which specifies a non-Federal entity recipient or sub-recipient of a Federal financial assistance award must disclose in writing any potential COI to the Federal awarding agency or pass-through entity in accordance with applicable Federal awarding agency policy.

On December 20, 2021, DOE issued an interim COI policy [2] addressing COI and organizational conflicts of interest. The interim COI policy has been incorporated in and made enforceable through the Special Terms and Conditions for DOE financial assistance awards. The standards established in the interim COI policy provide a reasonable expectation that the design, conduct, and reporting of projects funded wholly or in part under DOE financial assistance awards (*e.g.,* a grant, cooperative agreement, or technology investment agreement) will be free from bias resulting from COI or conflict of commitment (COC).[3] To minimize the implementation burden on non-Federal entities, the interim COI policy largely aligned with the long-standing COI regulations established by the Public Health Service (PHS) at 42 CFR part 50, subpart F, which are applicable to research and development entities that include R&D funded by Public Health Service grants or cooperative agreements.

On June 18, 2024, DOE published in the **Federal Register** a notice of proposed rulemaking proposing to codify in regulation the interim COI policy, COC requirements, and organizational conflict of interest requirements. *See* 89 FR 51460 (June 2024 NOPR). Comments were received from the following:

[1] NSPM–33 established national security policy for U.S. Government-supported research and development (R&D). The purpose of NSPM–33 is to strengthen protections of U.S. Government-supported R&D against foreign government interference and misappropriation, while maintaining an open environment to foster research discoveries and innovation that benefit the United States and the world. NPSM–33 is available at *https://trumpwhitehouse.archives.gov/presidential-actions/presidential-memorandum-united-states-government-supported-research-development-national-security-policy/*.

[3] In general, COC means a situation in which an individual accepts or incurs conflicting obligations, whether foreign or domestic, between or among multiple employers or other entities and may include conflicting commitments of time and effort, including obligations to dedicate time in excess of institutional or DOE policies or commitments.

TABLE I–1—LIST OF COMMENTERS WITH WRITTEN SUBMISSIONS TO THE JUNE 2024 NOPR

Commenter(s)	Comment No. in the Docket	Reference in this final rule
Arizona State University	9	ASU.
Association of American Universities, Council on Government Relations, Association of Public & Land-Grant Universities.	3	AAU *et al.*
Clean Future	7	Clean Future.
Harvard Medical School	18	Harvard Medical School.
Harvard University	4	Harvard.
Ohio State University	21	OSU.
Pennsylvania State University Office for Research Protections	22	Penn State.
Princeton University	19	Princeton.
Purdue University	20	Purdue.
Kacey Strickland	2	Strickland.
UCLA Research & Creative Activities	12	UCLA.
University of California	6	UC.
University of Idaho	17	University of ID.
University of Illinois Urbana-Champaign	13	University of Illinois.
University of Maryland Division of Research	15	University of MD.
University of Mississippi	5	University of MS.
University of New Mexico	8	University of NM
University of Pennsylvania	16	University of PA.
University of Rochester	14	University of Rochester.
University of Wisconsin—Madison	10	UW-Madison.
Washington University in St. Louis	11	Washington University.

A parenthetical reference at the end of a comment quotation or paraphrase in this final rule provides the location of the item in the public record.[4]

The requirements adopted in this final rule are codified in subpart C to 2 CFR part 910 (Subpart C). The requirements regarding COI, COC, and organizational conflicts of interest (OCI) [5] generally apply to non-Federal entities applying and receiving financial assistance awards from DOE as described in 2 CFR 910.122. Subpart C will not be applicable to applicants to or recipients of financial assistance under the programs of the DOE Office of Indian Energy, given that office's statutory mission to maximize the development and deployment of energy solutions for the benefit of American Indians and Alaska Natives; the unique sovereign status of Tribes; the practical limitations such regulations would present Tribes serving their communities, which in certain instances are small and remote; and consideration of traditional Tribal practices.

DOE program offices may tailor as appropriate the COI, COC, and OCI provisions for individuals applying for or receiving a DOE financial assistance award in their individual capacity. Upon the effective date of this final rule, the regulations at 2 CFR part 910, subpart C will supersede the interim COI policy, FAL No. 2022–02.

II. Section-by-Section Analysis

DOE is amending chapter IX of title 2 of the Code of Federal Regulations to add subpart C. Subpart C provides the general requirement for applicants for and recipients of Federal financial assistance from DOE to maintain a COI and COC policy; definitions relevant to the COI and COC policy requirements; and for the disclosure of certain COI, COC, and OCI, by applicants and recipients. Beginning October 1, 2024, updates to several parts of the OMB Guidance for Grants and Agreements (now called the OMB Guidance for Federal Financial Assistance) located in title 2 of the Code of Federal Regulations went into effect. *See* 89 FR 30046; April 22, 2024. In the June 2024 NOPR, DOE stated that it would consider conforming changes to the regulations proposed in the June 2024 NOPR based on the finalized OMB guidance once effective, as appropriate. *See* 89 FR 51460, 51461. This final rule uses terminology and citations consistent with the OMB Guidance for Federal Financial Assistance.

Generally, commenters supported the codification of COI requirements in regulation to ensure the integrity of projects funded by DOE financial assistance, and stated that precise definitions, clear reporting, investigation, and transparency rules serve only to improve the financial assistance process. (UC, No. 6 at 1; Clean Future, No. 1 at 1; Purdue, No. 20 at 1)

Certain commenters expressed concern that parts of the proposed rule were duplicative and redundant in the face of existing, similar Federal requirements. (UC No. 6 at 1–3; AAU *et al.,* No. 3 [6] at 1, 4–5; Purdue, No. 20 at 2; UW-Madison, No. 10 at 1) Commenters requested DOE adopt the interim COI policy with modifications to align it with the PHS standards established by the U.S. Department of Health and Human Services (HHS) already adopted by some organizations. (*Id.*) Commenters claimed that complying with DOE's proposed rule would be unreasonably burdensome, and asserted DOE's proposal was inconsistent with other Agency rules contrary to broader goals of Federal alignment of COI policy. (*Id.*)

UC and AAU *et al.* requested a one-year lead time to allow institutions sufficient time to update their policies, stated insufficient lead time would make compliance impractical, and the one-year lead time provided by PHS

[4] The parenthetical reference provides a reference for information located in the docket for this rulemaking. (Docket No. DOE–HQ–2024–0029–0001, which is maintained at *www.regulations.gov*) The references are arranged as follows: (commenter name, comment docket ID number, page(s) of that document).

[5] An OCI means that because of relationships with a parent company, affiliate, or subsidiary organization, a non- Federal entity is unable or appears to be unable to be impartial in conducting a procurement action involving a related organization. 2 CFR 200.318(c)(2).

[6] A number of commenters expressed support for the AAU *et al.* comments, stating that their institutional positions aligned with the AAU letter (UC, No. 6 at 2; Washington University, No.1 at 1; UCLA, No. 12 at 1; Penn State, No. 22 at 1; University of MD, No. 15 at 1; University of NM, No. 8 at 1; University of MS, No. 5 at 1; Princeton, No. 19 at 1; Harvard Medical School, No. 18 at 1; Harvard, No. 4 at 1; University of PA, No. 16 at 1; University of Rochester, No. 14 at 1; University of ID, No. 17 at 1; ASU, No. 9 at 1; OSU, No. 21 at 1; UW-Madison, No. 10 at 1; University of Illinois, No. 13 at 1).

when establishing its COI regulations. (UC, No. 6 at 8; AAU *et al.,* No. 3 at 8)

The regulations adopted in this final rule generally codify DOE's existing requirements applicable to DOE's financial assistance awards since 2022. *See* FAL No. 2022–02. Additionally, the final rule establishes requirements substantively similar to PHS. Given that this final rule largely reflects existing requirements, the regulations adopted in this final rule are effective 30 days following publication in the **Federal Register**.

As discussed in the following sections, DOE is adopting the COI, COC, and OCI requirements generally as proposed. The final rule codifies and replaces the interim COI policy, which avoids duplication of requirements. The final rule aligns with the COI, COC, and OCI requirements currently applicable to recipients of DOE financial assistance awards, and provides additional details related to the mitigation and reporting of conflicts. Additionally, the adopted COI, COC, and OCI regulations are based on and do not conflict with the PHS requirements. This final rule aligns with the objectives of Executive Order 14303, ''Restoring Gold Standard Science,'' specifically for science to be conducted without conflicts of interest. (*See* 90 FR 22601; May 23, 2025).

New 2 CFR part 910, subpart C as adopted in this final rule consists of §§ 910.200 through 910.270 and appendix A as set forth below:

§ 910.200 Definitions

In the June 2024 NOPR, DOE proposed definitions applicable to the new subpart C. Specifically, DOE proposed to define *conflict of commitment (COC), conflict of interest (COI), covered individual, financial interest, other support, principal investigator (PI), project,* and *significant financial interest. See* 89 FR 51460, 51464–51466. For the reasons provided in the June 2024 NOPR and provided in the following paragraphs, DOE is adopting the definitions as proposed in the June 2024 NOPR with certain changes as discussed in this section.

AAU *et al.* requested DOE remove examples from the regulatory definition of *conflict of commitment,* recommending that examples be reserved for guidance to allow more practical implementation. (AAU *et al.,* No. 3, at 5–6) AAU *et al.* also requested DOE delete reference to certain examples (*i.e.,* obligations to improperly share information with, or to withhold information from, an employer or DOE). (*Id.* at 6) AAU *et al.* further requested DOE remove references to pending employment from the definition of *conflict of commitment,* asserting it is practically impossible for institutions to identify or mitigate COCs in this area, as researchers do not typically share plans to seek other employment with their current employers. (*Id.*)

DOE is maintaining the examples in the *conflict of commitment* definition as proposed. Inclusion of examples in the regulatory text facilitates compliance and avoids the need to consult multiple sources. Obligations to improperly share or withhold information present significant risks to the integrity of DOE funded projects and therefore merit inclusion as an example. The regulations adopted in this final rule specify the criteria required of COC policies adopted by a non-Federal entity. Included in the criteria is a requirement for each covered individual who is participating in a DOE Federal financial assistance award update disclosures on an annual basis and as soon as any new actual, apparent, or potential COI or COC arises. To the extent pending employment results in an actual, apparent, or potential COI or COC, a covered individual would be obligated to report the COI or COC to the non-Federal entity. Accordingly, DOE is including a reference to pending employment in definition of *conflict or commitment* and is adopting the definition of that term as proposed.

DOE proposed *conflict of interest* to mean a situation in which a covered individual or the spouse or a child of the covered individual has a significant financial interest or financial relationship, whether with a domestic or foreign entity, that could directly and significantly affect the design, conduct, reporting or funding of a project or other Federal financial assistance award-related activities. *See* 89 FR 51460, 51465. Examples of situations that may give rise to a COI include, but are not limited to, holding an Executive position, director position, or equity over a certain dollar amount in a company that stands to benefit from Federal financial assistance award-related activities, receiving financial compensation in the form of consulting payments or payment for services from a company that stands to benefit from Federal financial assistance award-related activities, or intellectual property rights or royalties from such rights whose value may be affected by the outcome of Federal financial assistance award-related activities. *Id.*

Commenters objected to the proposed definition of COI, asserting that it does not align with the PHS definition. (UC, No. 6 at 3, 7; AAU *et al.,* No. 3 at 6) UC and AAU *et al.* stated that such inconsistency would require costly realignment of institutional policies. Commenters also recommended removing examples from the regulatory text and placing them in guidance to allow flexibility for real-world circumstances. (*Id.*)

The definition of COI as proposed in the June 2024 NOPR is substantively the same as the PHS term, which is defined as a significant financial interest that could directly and significantly affect the design, conduct, or reporting of PHS-funded research. See 42 CFR 50.603. Both the DOE proposed definitions and the PHS definitions specify which individuals' interests must be considered (*e.g.,* the spouse or a child of the covered individual in addition to the covered individual)—DOE in the proposed definition of *conflict of interest* and PHS in the definition of *significant financial interest* definition.

DOE is maintaining the examples in the definition of *conflict of interest.* Including examples in the regulations avoids the need for applicants and recipients to consult additional documents when determining the applicability of the requirements.

For the reasons provided in the preceding paragraphs, DOE is adopting the definition of *conflict of interest* as proposed in the June 2024 NOPR.

In the June 2024 NOPR, DOE proposed *covered individual* to mean any individual, regardless of title or position, who: (1) Contributes in a substantive, meaningful way to the development or execution (*e.g.,* purpose, design, conduct, or reporting) of a project funded by DOE or proposed for funding by DOE; and, (2) Is designated as a covered individual by DOE. *See* 89 FR 51460, 51465. DOE proposed specifically designating any principal investigator (PI), project director (PD), co-principal investigator (Co-PI), co-project director (Co-PD), or project manager; and any individual (including an individual at the masters or baccalaureate level) that contributes in a substantive, meaningful way to the development or execution of a subject project that is listed by the non-Federal entity in the application for Federal financial assistance, approved budget, progress report, or any other report submitted to DOE by the non-Federal entity regarding the subject project. *Id.*

Several commenters urged narrowing the definition of *covered individual* to focus on individuals with significant influence over project design or execution. (UC, No. 6 at 4, 7–8; Washington University, No. 11, 1–2; AAU *et al.,* No. 3, at 7–8; UW-Madison, No. 10 at 1). Commenters asserted that including all participants, regardless of

role, creates unnecessary administrative burden. (*Id.*)

Under the proposed definition, a *covered individual* would be an individual with significant influence over project design or execution. To clarify further that the *covered individual* definition requires project level control, DOE is defining *covered individual* as an individual who contributes in a substantive, meaningful way to the development or execution of the *scope of work* of a project. The adopted definition also specifies DOE designation applies to individuals for whom a current and pending support disclosure and/or biosketch/resume is submitted with an application for financial assistance. Submission of these forms indicates an individual has sufficient involvement to warrant inclusion as a *covered individual.*

As adopted in this final rule, *covered individual* means any individual, regardless of title or position, who: (1) Contributes in a substantive, meaningful way to the development or execution of the scope of work of a project funded by DOE or proposed for funding by DOE; and, (2) is designated as a covered individual by DOE. Additionally, the final rule designates as covered individuals any principal investigator (PI), project director (PD), co-principal investigator (Co-PI), co-project director (Co-PD), project manager, and any individual regardless of title that is functionally performing as a PI, PD, Co-PI, Co-PD, or project manager; and persons designated in the applicable Notice of Funding Opportunity (NOFO) or terms and conditions of the Federal financial assistance award. Submission of a current and pending support disclosure and/or biosketch/resume for a particular person serves as an acknowledgement that DOE designates that person as a covered individual.

The adopted definition remains consistent with consideration of an individual's responsibilities in the PHS definition of *investigator,* which covers individuals responsible for the design, conduct, or reporting of research funded by PHS. See, 42 CFR 50.603. Additionally, the definition adopted in this final rule is consistent with the use of *covered individual* under the implementation of NPSM–33 and reflects applicants and recipients of DOE funding may use different titles and terminology than those under PHS funding. The adopted definition also provides DOE flexibility to designate additional individuals depending on the sensitivity of a project and potential research security concerns.

The prime applicant is responsible for assessing the applicability of the *covered individual* definition against each person listed on an application for financial assistance from DOE. Further, the prime applicant is responsible for identifying any such individual to DOE for designation as a covered individual, if not already designated by DOE as described above.

Regarding the definition of *significant financial interest,* commenters recommended a *de minimis* disclosure threshold of $5,000 for certain categories (*e.g.,* intellectual property interests, reimbursed travel), noting that requiring disclosure of smaller amounts diverts resources from higher risk oversight. (UC, No. 6 at 4–5, 7; Washington University, No. 11 at 2; AAU *et al.,* No. 3 at 10)

As explained by HHS when establishing a comparable definition of *significant financial interest,* requiring the disclosure of the value of travel reimbursements could be difficult, particularly in the case of sponsored travel, which is paid on behalf of the covered individual and not reimbursed by the covered individual, so that the exact monetary value may not be readily available. *See* 76 FR 53256, 53265 (September 26, 2011). HHS identified similar difficulties in determining the precise value of intellectual property interests. *Id.*

Because of the difficulty in determining the monetary value of sponsored travel and intellectual property interests, a *de minimis* threshold would risk creating uncertainty when determining compliance. Moreover, applying a *de minimis* threshold could potentially lead to additional burden in determining whether the threshold is exceeded (*e.g.,* covered individuals would need to obtain estimates or appraisals to determine whether a significant financial interest existed).

For the reasons discussed in the preceding paragraphs, DOE adopts the definition of *significant financial interest* as proposed and consistent with the definition established by HHS.

The proposed definition of *significant financial interest* includes consideration of *other support,* for which DOE separately proposed a definition. DOE proposed *other support* to mean all resources made available to a covered individual in support of and/or related to all of their professional research (including basic and fundamental research), development, demonstration, and/or deployment efforts, including resources provided directly to the covered individual rather than through the research organization, and regardless of whether or not they have monetary value (*e.g.,* even if the support received is only in-kind, such as office/laboratory space, equipment, supplies, or employees). *See* 89 FR 51460, 51465. The proposed definition further provided the term includes resource and/or financial support from all foreign and domestic entities, including but not limited to, gifts provided with terms or conditions, financial support for laboratory personnel, and participation of student and visiting researchers and visiting scholars supported by other sources of funding. *Id.*

AAU *et al.* opposed inclusion of a definition for *other support,* describing it as redundant and a source of compliance uncertainty. (AAU *et al.,* No. 3 at 8) DOE proposed a definition of *other support* recognizing certain resources made available to a covered individual may not readily be characterized as current or pending support, and that such support has the potential to create a conflict. There may be instances in which support could be characterized as either *other support* or as current and pending support. This potential overlap does not impact the reporting required by a covered individual as reporting does not require further categorization of a significant financial interest.

DOE is adopting language to clarify *other support* includes gifts provided without terms or conditions. This clarification is consistent with what is required to be reported under the Current and Pending Financial Assistance Letter 2022–04. Accordingly, DOE is establishing a definition for *other support* as proposed.

§ 910.210 Applicability

Section 910.210 establishes the applicability of the COI and COC policy and reporting requirements in new subpart C as proposed. In general, the requirements are applicable to non-Federal entities that are applicants to or recipients of a DOE Federal financial assistance award.

Washington University recommended removing the proposed provision allowing the requirements to be tailored for individuals receiving financial assistance. Washington University, No. 11 at 3. Washington University stated that permitting such tailoring would defeat the purpose of a unifying set of requirements and significantly increase the administrative burden on institutions to comply with varying application of the same regulation. (*Id.*)

DOE clarifies that the tailoring provision at § 910.210(a)(2) applies to individuals applying for or receiving financial assistance in their individual capacity. DOE would not tailor the requirements of this subpart when the

non-Federal entity is a university or research facility.

§ 910.220

Reserved.

§ 910.230 Required Conflict of Interest (COI) and Conflict of Commitment (COC) Policies

As proposed in the June 2024 NOPR, § 910.230 would require non-Federal entities that are applicants to or recipients of DOE Federal financial assistance to establish and maintain written and enforced policies addressing actual, apparent, and potential COI and COC. *See* 89 FR 51460, 51466–51467. Proposed § 910.230 would also establish requirements COI and COC policy requirements for subrecipients. Under the proposed regulations, COI and COC policies would be required to mandate certain reporting by covered individuals to the non-Federal entity, as well as required training.

Per the June 2024 NOPR, any non-Federal entity that is an applicant to or recipient of a DOE Federal financial assistance award must maintain a written and enforced policy addressing actual, apparent, and potential COI and COC, both foreign and domestic.

Washington University commented inclusion of ''actual, apparent, or potential'' does not align with, nor is included in, the definition of a COI, and that inclusion of the terms creates ambiguity in what institutions should identify as a COI or COC. (Washington University, No. 11 at 4.) AAU *et al.* recommended deletion of the term ''apparent'' from the phrase ''actual, apparent, or potential'' COI in proposed § 910.230(a), stating that absent a precise regulatory definition use of the term risks uncertainty and redundancy. (AAU *et al.,* No. 3 at 9)

''Actual, apparent, or potential'' describe the relevant types of COIs and COCs. An actual COI occurs when a significant financial interest or financial relationship exists that could directly and significantly affect the design, conduct, reporting or funding of a project or other Federal financial assistance award-related activities. A potential COI occurs when there is the possibility such a significant or financial relationship will arise in the future (*e.g.,* when an individual applies for employment). Under FAL 2022–02, apparent conflicts are included in the definition of *potential conflicts.* However, an apparent conflict may be distinct from a potential conflict. An apparent conflict occurs when a conflict may appear to exist to a reasonable outside observer even if there is no actual or potential conflict. To clarify the distinction between an apparent conflict and a potential conflict, DOE proposed to separately specify the terms. Use of *apparent* and *potential* are consistent with the common understanding of those terms and regulatory definitions are not necessary. DOE is adopting the use of ''actual, potential, and apparent'' as proposed.

Commenters recommended removing the COC policy requirements, asserting that institutions cannot reasonably monitor individual commitments. (AAU *et al.,* No. 3 at 10; Washington University, No. 11 at 4) Washington University stated that requirements extending a recipient's COC policy to a subrecipient are impractical as they would require the recipient institution to have knowledge of both external commitments and the institutional obligations of each covered individual for a subrecipient. (Washington University, No. 11 at 4) AAU *et al.* commented COC concerns are already addressed though FAL 2022–02 and the common disclosure forms contain an individual certification statement that each senior/key person must complete regarding current and pending support. (AAU *et al.,* No. 3)

The proposed regulations would require a subrecipient to certify it has COI and COC policies that comply with the DOE regulations, or if a subrecipient cannot provide such certification, the subrecipient's covered individuals would be subject to the COI and COC policy of the recipient. Under either option, a covered individual would be required to report an actual, apparent, and potential COC to the subrecipient or recipient comparable to the requirement to reporting required for a COI. An implemented COC policy and COI policy both rely on the reporting of the covered individuals. As proposed, applicability of the COI and COC policies to a subrecipient must be established in a written agreement between the recipient and subrecipient. Such a written agreement would establish the reporting, timing, and compliance obligations of the subrecipient to the recipient.

Common forms and use of tools such as digital persistent identifiers provide means for tracking and demonstrating compliance, but in and of themselves, do not establish a transparent requirement and process for ensuring any such conflicts are identified and appropriately mitigated. As noted, adoption of this final rule will supersede FAL 2022–02.

Codifying the requirements for COI and COC upholds NSPM–33 through clearly articulated requirements and processes for appropriate disclosure of information related to both COIs and COCs. Effective implementation across recipients and subrecipients of DOE financial assistance will make it more difficult for individuals to conceal materially important support, obligations, conflicts of interest, and/or relationships that, when concealed, could lead to DOE making inadequately informed funding decisions. Effective implementation will also make it easier for recipients to identify and address noncompliance in a timely and fair manner. For these reasons, DOE is adopting the COC provisions in 2 CFR 200.201 as proposed.

DOE proposed covered individuals update required disclosures to the non-Federal entity on an annual basis and as soon as any new actual, apparent, or potential COI or COC arises. *See* 89 FR 51460, 51466. AAU *et al.* and UC requested aligning the timing of ongoing reporting requirements with existing PHS rules and inclusion of a clear compliance timeline, noting that the proposed rule would increase administrative burden. (AAU *et al.,* No. 3 at 9; UC No. 6 at 8–9) Strikland requested DOE define ''as soon as.'' (Strikland, No. 2 at 1) AAU *et al.* and UC requested specifying a 30-day period to report new conflicts, stating that a defined time would provide more regulatory certainty and be better understood by researchers. (AAU *et al.,* No. 3 at 9; UC No. 6 at 8–9)

DOE is generally adopting the reporting criteria as proposed. The reporting criteria reflects DOE's general requirement that applicants for financial assistance as well as recipients comply with the COI and COC policies and generally align with the requirements applicable under FAL 2022–02. DOE acknowledges that requiring reporting ''as soon as possible'' is less certain than specifying a timeframe. To reduce this uncertainty, the final rule specifies that a new COI or COC must be reported as soon as practicable, but not later than 15 days, after it arises.

DOE proposed requiring COI and COC policies to mandate each covered individual to complete COI and COC training prior to engaging in projects funded under a DOE Federal financial assistance award and complete refresher training least every two years. *See* 89 FR 51460, 51466. Commenters recommended increasing required training intervals to four years to align with PHS regulations and minimize administrative impact. (AAU *et al.,* No. 3 at 10; Purdue, No. 20 at 2–3; Washington University, No. 11 at 3)

DOE is adopting the training frequency as proposed. Covered

individuals are required to update their disclosures annually and periodically as COIs and COCs arise. Training more frequently than every four years helps ensure the annual and periodic updates are completed correctly and completely. The two-year training cycle reflects the focus on increased training under the CHIPS and Science Act of 2022 and NPSM–33. Further, the final rule does not prohibit non-federal entities from aligning the two-year cycle with longer training cycles as may be adopted by other agencies. Additionally, the research security training developed for compliance with CHIPs and Science Act of 2022 [7] addresses COIs and COCs and therefore could be relied upon to meet this requirement.

§ 910.240 Reporting Conflicts of Interest (COIs) and Conflicts of Commitment (COCs)

As proposed, § 910.240 would establish requirements for non-Federal entities to report to DOE certain identified COIs and COCs and mitigation measures. *See* 89 FR 51460, 51467. In general, proposed § 910.240(a) would require applicants and recipients of DOE financial assistance to disclose to DOE any actual, apparent, or potential COI or COC if such conflict cannot be eliminated or appropriately managed or reduced in accordance with the non-Federal entity's policy. In addition, the proposed subsection would require disclosure of any actual, apparent, or potential COI or COC involving any foreign governments, their instrumentalities, or any other entities owned, funded, or otherwise controlled by a foreign government, as well as any measures the entity has taken to eliminate or, where appropriate, manage or reduce the COI or COC.

UC requested removal of the reference to 2 CFR 200.112, stating that the referenced CFR section is limited to conflicts that might arise when a non-federal entity expends funds under a Federal award, such as decisions about subrecipient selection or procurement, and the reference may lead to confusion. (UC, No. 6 at 9).

The language of 2 CFR 200.112 is not as narrow as suggested by UC. That section requires Federal agencies to establish COI policies for Federal awards and a recipient or subrecipient to disclose in writing any potential COI to the Federal agency in accordance with the established Federal agency policies. 2 CFR 200.112. Reference to section 2 CFR 200.112 explicitly identifies the requirements in proposed 2 CFR 910.240 as DOE's implementation of the regulatory direction in the OMB Guidance for Federal Financial Assistance at 2 CFR part 200. DOE is including the reference to 2 CFR 200.112 in the adopted § 910.240.

Commenters opposed requiring COI and COC reporting as part of an application for DOE financial assistance stating the costs of such reviews would be unreasonable, absent assurance of award. (AAU *et al.,* No. 3 at 10; UC, No. 6 at 6–7; Washington University, No. 11 at 5) Commenters further stated that it would be overly burdensome to require reviews prior to submission as such reporting would require institutions to complete reviews, identify potential conflicts, and design and implement management plans for projects that may not be funded, and that there is not sufficient time between receipt of completed proposals from investigators, and submission deadlines. (*Id.*)

Under the proposed reporting requirements, individuals that would qualify as covered individuals under a funding opportunity would be required to identify any actual, apparent, or potential COI or COC were the non-Federal entity awarded financial assistance under that opportunity. *See* 89 FR 51460, 51467. As a result of annual COI and COC reporting and periodic training, it is expected that individuals participating in an application for financial assistance will be able to readily ascertain whether an award would create an actual, apparent, or potential COI or COC. DOE recognizes that changes may occur after application. However, in evaluating potential selections for award, it is crucial for DOE to be aware of possible COIs and COCs that would arise under the award and that could not be mitigated. For example, identifying a COI or COC that cannot be mitigated for the primary investigator listed on an application weighs into DOE's evaluation of the personnel on a proposed project. Identifying such COIs and COCs as part of the application process will facilitate submission of applications that are more representative of a project were it awarded. Additionally, as part of DOE's on-going research security responsibilities it is crucial to be aware of possible COIs and COCs involving any foreign governments, their instrumentalities, or any other entities owned, funded, or otherwise controlled by a foreign government, were DOE to award the applicant project. Identification of COIs and COCs that cannot be mitigated and COIs and COCs related to foreign governments at the application process reduces the likelihood of selected projects not proceeding to award because of such conflicts. DOE is adopting the reporting requirements applicable to applicants and recipients as proposed.

UC recommended limiting the reporting of COIs and COCs related to foreign governments ''if known'' and ''where appropriate,'' and stated it can be complicated to determine if an entity is connected to a foreign government as the information may not be publicly available or accessible. (UC, No. 6 at 9)

DOE is not adopting language as suggested by UC. If a covered individual is listed on an application for or participating in a project receiving DOE financial assistance, it is incumbent on the individual have a reasonable understanding of whom that individual is conducting business and exercise due diligence to determine whether such interest presents an actual, apparent, or potential COI or COC.

Washington University asserted that the proposed rule required four different reporting scenarios, (unmanageable COI/COC, all foreign COI/COC, all COI/COC as required by the funding opportunity, and all COI/COC per the terms and conditions of an award) and that the multiple reporting matrices overcomplicates reporting by requiring award specific reporting requirements and increases the risk for failure to report. (Washington University, No. 11 at 4; *see also* AAU *et al.,* No. 3 at 10) AAU *et al.* recommended removal of the ''case-specific'' reporting requirements and instead adoption of a uniform reporting requirement that aligns with the PHS standards. (AAU *et al.,* No. 3 at 12)

As explained, the proposed rule would require reporting of all COIs and COCs that are unmanageable and all COIs and COCs related to foreign governments. Based on the sensitivity of the funded subject area or an awarded project, DOE proposed that reporting of additional conflicts could be required. It is not uncommon for DOE to specify tailored application and award requirements in order to address concerns and/or circumstances specific to a funding opportunity or an award. Any such tailored reporting requirements would be explicitly delineated in the relevant notice of funding opportunity or award, as may be applicable. DOE strives for consistency across Federal agencies to the extent such consistency is consistent with DOE's mission and responsibilities. DOE is adopting the provisions which provide DOE flexibility that make application/award specific modifications to the COI and COC reporting requirements

[7] *See www.nsf.gov/research-security/training.*

commensurate with sensitives and risks particular to a funding opportunity or award, as proposed.

Proposed § 910.240(d) provided that in addition to the annual COI/COC report, DOE may require a non-Federal entity to routinely, or upon request, submit all or some covered individuals' disclosures. *See* 89 FR 51460, 51467. AAU *et al.* objected to routine reporting requirements in addition to the annual reporting, stating mandating disclosures ''routinely'' would make it extremely difficult for institutions to establish and maintain efficient processes for collecting and reviewing disclosures and making required reports. (AAU *et al.,* No. 3 at 12)

Proposed § 910.240(d) addresses instances in which reporting more than on an annual basis may be necessary. Such instances, as specified in the proposed regulation: as part of monitoring the non-Federal entity's compliance with this subpart; bankruptcy of the non-Federal entity; other legal winding down of the non-Federal entity; acquisition of the non-Federal entity by a foreign entity, where ''acquisition'' includes a foreign entity obtaining a controlling interest in the non-Federal entity; or as otherwise set forth in 2 CFR part 200 and this part. As illustrated by the specified circumstances, routine submission of covered individuals' disclosures would be required in circumstances that may warrant a heightened degree of oversight. DOE does not anticipate such routine reporting to be typical. DOE is establishing § 910.240(d) as proposed.

Proposed § 200.240(e) provided if a non-Federal entity becomes aware that a covered individual failed to comply with the non-Federal entity's COI and COC policy or a management plan, the non-Federal entity must promptly notify DOE in writing of the failure to comply and of the corrective action taken or to be taken. *See* 89 FR 51460, 51467.

AAU *et al.* requested a non-Federal entity be provided 60 days to report such failures, stating 60 days would provide time to take any necessary corrective action and would align with the NASA and PHS requirements, and FAL 2022–02. (AAU *et al.,* No. 3 at 12)

DOE is not adopting a 60-day period for reporting non-compliance as suggested by AAU *et al.* DOE notes that FAL 2022–02 establishes a requirement to ''promptly'' report noncompliance. *See* FAL 2022–02, *Remedies.* Receiving prompt notification allows DOE to take corrective action in a timely manner. DOE also notes that the proposal would not require the non-Federal entity to have taken corrective action prior to reporting, explicitly stating that report may include corrective action the non-Federal entity will take.

For the reasons discussed in the preceding paragraphs, DOE is adopting § 910.240, *Reporting conflicts of interest (COIs) and conflicts of commitment (COCs),* as proposed.

§ 910.250 Organizational Conflicts

Consistent with 2 CFR 200.318, DOE proposed requirements regarding non-Federal entities with a parent, affiliate, or subsidiary organization that is not a state government, local government, or Indian tribe, the non-Federal entity must maintain written standards of conduct covering organizational conflicts of interest (OCIs) as that term is defined in 2 CFR 200.318(c)(2). *See* 89 FR 51460, 51467. DOE notes that in the context of the Federal Acquisition Regulations, the head of an agency or their designee may waive the organizational conflicts of interest requirement by determining that its application in a particular situation would not be in the Government's interest. 48 CFR 9.503.

DOE is adopting § 910.250 as proposed.

§ 910.260 Reporting Organizational Conflicts of Interest (OCIs)

DOE proposed reporting requirements relevant to any potential or actual OCI to DOE. *See* 89 FR 51460, 51467. Proposed section 910.260 would establish the timing and content required of such reports. As proposed, non-Federal entities would be required to report any potential or actual OCI within five business days of learning of the conflict. Washington University recommended extending reporting timelines from five days to 60 days to align with PHS standards and reduce administrative burden. (Washington University, No. 11 at 5–6).

Identifying and mitigating OCIs is necessary to ensure the integrity of procurement activities under a Federally funded award. A failure or delay in identifying an OCI can make mitigation more difficult and risks costs associated with the subject procurement being unallowable, which can increase the administrative burden and costs to recipients when addressing identified OCIs. As proposed, the non-Federal entity would not be required to have implemented mitigation measures prior to reporting. The recipient would be required to report plans to avoid, eliminate, or mitigate the OCI. Timely reporting of an OCI allows DOE to coordinate and undertake necessary measures. DOE recognizes that five business days may not be sufficient time for a non-Federal entity to report an OCI. DOE is adopting a 15-day period for reporting consistent with historical practice for the terms and conditions of DOE awards.

DOE is adopting § 910.260 as proposed, but with a 15-day period required for reporting.

§ 910.270 Remedies, Penalties, and Enforcement

Proposed § 910.270 would specify actions DOE may take if a non-Federal entity fails to disclose a COI or COC or fails to sufficiently manage or mitigate such a conflict. *See* 89 FR 51460, 51467–51468. Proposed section 910.270 would also specify the remedies for failure to disclose an OCI. *See* 89 FR 51460, 51468.

AAU *et al.* expressed concern with language requiring a disclosure or mitigation to ''ensure the integrity of the DOE-supported project'' and ''protect the government's interests,'' asserting that the meaning of these terms is not defined and not readily ascertainable by non-Federal entities. (AAU *et al.,* No. 3 at 13–14) Similarly, AAU *et al.* expressed concern with DOE's evaluation of whether a COI or COC would ''adversely impact the project.'' (AAU *et al.,* No. 3 at 14)

In exercising appropriate stewardship over Federal funding, DOE has the responsibility of ensuring funding is spent in a manner consistent with the Department's programmatic objectives, that safeguards the security of federally funded projects, and that maintains the integrity of science produced using Federal funds. Recipients of Federal funds accept such funding subject to Federal oversight. As proposed, § 910.270(a) specifies the actions DOE may take in response to a failure to disclose or adequately manage, or mitigate a COI or COC, including providing the non-Federal entity an opportunity to take additional action.

AAU *et al.* further requested limiting § 910.270 to procurement activities as opposed to ''procurement or transaction'' activities as proposed. (AAU *et al.,* No. 3 at 14)

Non-Federal entities may undertake transactions to acquire goods and services similar to procurement transactions, but that rely on different mechanisms and/or authorities. These other transactions have the potential to raise OCI concerns in the same manner as procurement transactions. DOE is clarifying the applicability of § 910.270 extends to such other transactions.

To provide for the appropriate exercise of Federal stewardship over federally funded projects, DOE is adopting § 910.270 as proposed, but clarifying its applicability to other

transactions similar to procurement transactions.

Appendix A

AAU *et al.* and Washington University requested replacing appendix certification statements with institution-specific attestation statements to reduce administrative burden. (AAU *et al.,* No. 3 at 10; Washington University, No. 11 at 3)

DOE is adopting the specific certification statement as proposed. Appendix A provides uniform language that avoids the need for non-Federal entities to separately develop statements and ensures the legal enforceability of such statements.

III. Regulatory Review and Procedural Requirements

A. Review under Executive Orders 12866 and 14192

Executive Order (E.O.) 12866, ''Regulatory Planning and Review,'' requires agencies, to the extent permitted by law to: (1) propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs (recognizing that some benefits and costs are difficult to quantify); (2) tailor regulations to impose the least burden on society, consistent with obtaining regulatory objectives, taking into account, among other things, and to the extent practicable, the costs of cumulative regulations; (3) select, in choosing among alternative regulatory approaches, those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity); (4) to the extent feasible, specify performance objectives, rather than specifying the behavior or manner of compliance that regulated entities must adopt; and (5) identify and assess available alternatives to direct regulation, including providing economic incentives to encourage the desired behavior, such as user fee or profit or marketable permits, or providing information upon which choices can be made by the public. DOE has determined that this final rule is consistent with these principles, including the requirement that, to the extent permitted by law, agencies adopt a regulation only upon a reasoned determination that its benefits justify its costs and, in choosing among alternative regulatory approaches, those approaches maximize net benefits.

Section 6(a) of E.O. 12866 also requires agencies to submit ''significant regulatory actions'' to the Office of Information and Regulatory Affairs (OIRA) for review. OIRA has determined that this regulatory action does not constitute a ''significant regulatory action'' under section 3(f) of E.O. 12866. Accordingly, this action was not submitted to OIRA for review under E.O. 12866.

DOE has examined this rulemaking and has determined that it is consistent with the policies and directives outlined in E.O. 14192, ''Unleashing Prosperity Through Deregulation.'' This final rule is considered an E.O. 14192 deregulatory action. The final rule will not impose additional costs to applicants and recipients of financial assistance. The regulations codify and streamline the Department's policies and requirements currently addressed through financial assistance letters, notice of funding opportunity announcements, and award terms and conditions. Moreover, the rule streamlines the financial assistance process by facilitating the use of common forms and improve consistency in the disclosure requirements across Federal agencies, consistent with NSPM–33. DOE did not estimate the cost savings of this final rule.

B. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, ''Civil Justice Reform,'' (61 FR 4729, February 7, 1996), imposes on Executive agencies the general duty to adhere to the following requirements: (1) eliminate drafting errors and ambiguity; (2) write regulations to minimize litigation; and (3) provide a clear legal standard for affected conduct rather than a general standard and promote simplification and burden reduction.

With regard to the review required by section 3(a), section 3(b) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) clearly specifies the preemptive effect, if any; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the United States Attorney General.

Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or if it is unreasonable to meet one or more of them. DOE has completed the required review and determined that, to the extent permitted by law, this rule meets the relevant standards of Executive Order 12988.

C. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.)* requires preparation of an initial regulatory flexibility analysis for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. As required by Executive Order 13272, ''Proper Consideration of Small Entities in Agency Rulemaking,'' (67 FR 53461, August 16, 2002), DOE published procedures and policies on February 19, 2003, to ensure that the potential impacts of its rules on small entities are properly considered during the rulemaking process (68 FR 7990). DOE has made its procedures and policies available on the Office of General Counsel's website at *www.energy.gov/gc/office-general-counsel.*

DOE has reviewed this rule under the provisions of the Regulatory Flexibility Act and the procedures and policies published on February 19, 2003. DOE certifies that this rule will not have significant economic impact on a substantial number of small entities. The factual basis for this certification is set forth below.

The final rule is applicable to non-Federal entities that are applicants to or recipients of financial assistance awards from the Department. Non-Federal entities, including small entities, are currently subject to the Department's interim policies implementing the conflicts provisions at 2 CFR 200.112 and the requirements regarding OCI at 2 CFR 200.318(c). This final rule codifies the existing policies applicable to financial assistance awards from the Department. Additionally, the applicable DOE program office may tailor as appropriate the COI, COC, and OCI provisions for individuals that are applicants to or recipients of a DOE financial assistance award.

Accordingly, DOE certifies that this rule will not have a significant economic impact on a substantial number of small entities, and, therefore, no regulatory flexibility analysis is required. DOE will transmit a certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

D. Review Under the Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Ch. 3506; 5 CFR part 1320, appendix A.1) (PRA), DOE reviewed this rule and determined that there are no new collections of information contained therein. DOE's financial assistance reporting and recordkeeping burdens have been approved under OMB Control No. 1910–0400.

E. Review Under the National Environmental Policy Act.

DOE has determined that promulgation of this rule falls into a class of actions that would not individually or cumulatively have a significant impact on the human environment, as determined by DOE's regulations implementing the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) (NEPA). Specifically, DOE determined that this rule is covered under the categorical exclusion found in DOE's NEPA regulations at paragraph A6 of appendix A to subpart D, 10 CFR part 1021.

Categorical exclusion A6 applies to rulemakings that are strictly procedural. Additionally, DOE has preliminarily determined that this rule is covered under the Categorical Exclusion found in DOE's NEPA regulations at paragraph A5 of appendix A to subpart D, 10 CFR part 1021, which applies to a rulemaking that amends an existing rule or regulation and that does not change the environmental effect of the rule or regulation being amended. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

F. Review Under Executive Order 13132

Executive Order 13132, ''Federalism'' (64 FR 43255, August 4, 1999), imposes certain requirements on agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. Agencies are required to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and carefully assess the necessity for such actions. The Executive order requires agencies to have an accountability process to ensure meaningful and timely input by state and local officials in the development of regulatory policies that have federalism implications.

On March 14, 2000, DOE published a statement of policy describing the intergovernmental consultation process it will follow in the development of such regulations (65 FR 13735). DOE has examined the rule and has determined that it does not preempt State law and does not have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. No further action is required by Executive Order 13132.

G. Review Under Executive Order 13175

Under Executive Order 13175 (65 FR 67249, November 6, 2000) on ''Consultation and Coordination with Indian Tribal Governments,'' DOE may not issue a discretionary rule that has ''Tribal'' implications and imposes substantial direct compliance costs on Indian Tribal governments. DOE has determined that the final rule would not have such effects and concludes that Executive Order 13175 does not apply to this rulemaking.

H. Review Under the Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of $100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. (2 U.S.C. 1532(a), (b)) The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a ''significant intergovernmental mandate,'' and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them. On March 18, 1997, DOE published a statement of policy on its process for intergovernmental consultation under UMRA. 62 FR 12820. DOE's policy statement is also available at *https://energy.gov/sites/prod/files/gcprod/documents/umra_97.pdf*. This rule does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of $100 million or more in any one year by the private sector. As a result, the analytical requirements of UMRA do not apply.

I. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277), requires Federal agencies to issue a Family Policymaking Assessment for any rulemaking or policy that may affect family well-being. This rulemaking will have no impact on the autonomy or integrity of the family as an institution. Accordingly, DOE has concluded that it is not necessary to prepare a Family Policymaking Assessment.

J. Review Under Executive Order 13211

Executive Order 13211, ''Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use,'' (66 FR 28355, May 22, 2001), requires Federal agencies to prepare and submit to OIRA, of the Office of Management and Budget (OMB), a Statement of Energy Effects for any proposed significant energy action. A ''significant energy action'' is defined as any action by an agency that promulgates or is expected to lead to promulgation of a final rule, and that: (1) is a significant regulatory action under Executive Order 12866, or any successor order, (2) is likely to have a significant adverse effect on the supply, distribution, or use of energy, or (3) is designated by the Administrator of OIRA as a significant energy action. For any proposed significant energy action, the agency must give a detailed statement of any adverse effects on energy supply, distribution or use should the proposal be implemented, and of reasonable alternatives to the action and their expected benefits on energy supply, distribution and use. This rule is not a significant energy action. Moreover, it will not have a significant adverse effect on the supply, distribution, or use of energy, nor has it been designated as a significant energy action by the Administrator of OIRA. Accordingly, DOE has not prepared a Statement of Energy Effects.

K. Review Under the Treasury and General Government Appropriations Act, 2001

The Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for agencies to review most disseminations of information to the public under guidelines established by each agency pursuant to general guidelines issued by OMB. OMB's guidelines were published at 67 FR 8452 (February 22, 2002), and

DOE's guidelines were published at 67 FR 62446 (October 7, 2002). DOE has reviewed this rule under the OMB and DOE guidelines and has concluded that it is consistent with applicable policies in those guidelines.

L. Congressional Notification

As required by 5 U.S.C. 801, DOE will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that the rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

IV. Approval by the Office of the Secretary of Energy

The Secretary of Energy has approved publication of this final rule.

List of Subjects in 2 CFR Part 910

Accounting, Administrative practice and procedure, Grant programs, Reporting and recordkeeping requirements.

Signing Authority

This document of the Department of Energy was signed on July 10, 2026, by Derek Passarelli, Director of the Golden Field Office and Senior Procurement Executive, and William J. Quigley, Deputy Associate Administrator for Office of Partnership and Acquisition Services and Senior Procurement Executive, National Nuclear Security Administration, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE/NNSA. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register.**

Signed in Washington, DC on July 14, 2026.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

For reasons set out in the preamble, DOE amends chapter IX of title 2 of the Code of Federal Regulations as set forth below:

PART 910—UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS

■ 1. The authority citation for part 910 continues to read as follows:

Authority: 42 U.S.C. 7101, *et seq.;* 31 U.S.C. 6301–6308; 50 U.S.C. 2401 *et seq.;* 2 CFR part 200.

■ 2. Add subpart C to read as follows:

Subpart C—Conflicts of Interest, Conflicts of Commitment, Organizational Conflicts of Interest, and Other Matters of Concern

Sec.

910.200 Definitions.
910.210 Applicability.
910.220 [Reserved]
910.230 Required conflict of interest (COI) and conflict of commitment (COC) policies.
910.240 Reporting conflicts of interest (COIs) and conflicts of commitment (COCs).
910.250 Organizational conflicts.
910.260 Reporting organizational conflicts of interest (OCIs).
910.270 Remedies, penalties, and enforcement.
Appendix A to Subpart C of Part 910—Disclosure Certification Statement

§ 910.200 Definitions.

For the purposes of this subpart, the following definitions are applicable:

Conflict of commitment (COC) means a situation in which an individual accepts or incurs conflicting obligations, whether foreign or domestic, between or among multiple employers or other entities. This may include conflicting commitments of time and effort, including obligations to dedicate time in excess of institutional or DOE policies or commitments. Other types of conflicting obligations, including but not limited to, obligations to improperly share information with, or to withhold information from, an employer or DOE, can also threaten research, technology or economic security and integrity. Examples of situations that may give rise to conflicts of commitment include, but are not limited to, current or pending employment; positions, appointments, or affiliations such as titled academic, professional, or institutional appointments, whether remuneration is received and whether full-time, part-time, or voluntary (including adjunct, visiting, or honorary positions); and participation in or applications to foreign government-sponsored talent recruitment or similar programs.

Conflict of interest (COI) means a situation in which a covered individual or the spouse or a child of the covered individual has a significant financial interest or financial relationship, whether with a domestic or foreign entity, that could directly and significantly affect the design, conduct, reporting or funding of a project or other Federal financial assistance award-related activities. Examples of situations that may give rise to a COI include, but are not limited to, holding an Executive position, director position, or equity over a certain dollar amount in a company that stands to benefit from Federal financial assistance award-related activities, receiving financial compensation in the form of consulting payments or payment for services from a company that stands to benefit from Federal financial assistance award-related activities, or intellectual property rights or royalties from such rights whose value may be affected by the outcome of Federal financial assistance award-related activities.

Covered individual means any individual, regardless of title or position, who:

(1) Contributes in a substantive, meaningful way to the development or execution of the scope of work of a project funded by DOE or proposed for funding by DOE; and,

(2) Is designated as a covered individual by DOE.

(3) DOE designates as covered individuals any principal investigator (PI), project director (PD), co-principal investigator (Co-PI), co-project director (Co-PD), project manager, and any individual regardless of title that is functionally performing as a PI, PD, Co-PI, Co-PD, or project manager; and persons designated in the applicable Notice of Funding Opportunity (NOFO) or terms and conditions of the Federal financial assistance award. Submission of a current and pending support disclosure and/or biosketch/resume for a particular person serves as an acknowledgement that DOE designates that person as a covered individual.

DOE means the U.S. Department of Energy and the National Nuclear Security Administration (NNSA).

Financial interest means anything of monetary value, whether or not the value is readily ascertainable.

Other support means all resources made available to a covered individual in support of and/or related to all of their professional research (including basic and fundamental research), development, demonstration, and/or deployment efforts, including resources provided directly to the covered individual rather than through the research organization, and regardless of whether or not they have monetary

value (*e.g.,* even if the support received is only in-kind, such as office/laboratory space, equipment, supplies, or employees). This includes resource and/or financial support from all foreign and domestic entities, including, but not limited to, gifts provided with terms or conditions, gifts provided without terms or conditions, financial support for laboratory personnel, and participation of student and visiting researchers and visiting scholars supported by other sources of funding.

Principal investigator (PI) means an individual identified to direct a project by an applicant to or recipient of a DOE Federal financial assistance award.

Project means the interdependent activities funded wholly or in part under the DOE Federal financial assistance award. A project has a defined start and end point with objectives described in an application or in an approved scope that, when attained, signify completion and achievement of a specific goal, and creation of a unique product, service, or result. For Federal financial assistance awards that include recipient cost share as part of the approved budget, activities funded with that recipient cost share are included.

Significant financial interest means:

(1) A financial interest consisting of one or more of the following interests of the covered individual (and those of the covered individual's spouse and dependent children) that reasonably appears to be related to the covered individual's non-Federal entity responsibilities:

(i) With regard to any foreign or domestic publicly traded entity, a significant financial interest exists if the value of any remuneration received from the entity in the twelve months preceding the disclosure and the value of any equity interest in the entity as of the date of disclosure, when aggregated, exceeds $5,000. For purposes of this definition, remuneration includes salary and any payment for services not otherwise identified as salary (*e.g.,* consulting fees, honoraria, paid authorship); equity interest includes any stock, stock option, or other ownership interest, as determined through reference to public prices or other reasonable measures of fair market value;

(ii) With regard to any foreign or domestic non-publicly traded entity, a significant financial interest exists if the value of any remuneration, not otherwise disclosed as current, pending, or other support, received from the entity in the twelve months preceding the disclosure, when aggregated, exceeds $5,000, or when the covered individual (or the covered individual's spouse or dependent children) holds any equity interest (*e.g.,* stock, stock option, or other ownership interest); and

(iii) Intellectual property rights and interests (*e.g.,* patents, copyrights), upon receipt of income related to such rights and interests.

(2) Any reimbursed or sponsored travel (*i.e.,* that which is paid on behalf of the covered individual and not reimbursed to the covered individual so that the exact monetary value may not be readily available) related to their institutional responsibilities that is not otherwise disclosed in current and pending or other support disclosures, but does not include travel that is reimbursed or sponsored by a Federal, State, or local government agency of the United States; a domestic Institution of Higher Education; or a domestic research institute that is affiliated with a domestic Institution of Higher Education.

(3) The term *significant financial interest* does not include the following types of financial interests: salary, royalties, or other remuneration paid by the non-Federal entity to the covered individual if the covered individual is currently employed or otherwise appointed by the non-Federal entity, including intellectual property rights assigned to the non-Federal entity and agreements to share in royalties related to such rights; any ownership interest in the non-Federal entity held by the covered individual, if the non-Federal entity is a commercial or for-profit organization; income from investment vehicles, such as mutual funds and retirement accounts, as long as the covered individual does not directly control the investment decisions made in these vehicles; income from seminars, lectures, or teaching engagements sponsored by a Federal, State, or local government agency of the United States, a domestic Institution of Higher Education, or a domestic research institute that is affiliated with a domestic Institution of Higher Education; or income from service on advisory committees or review panels for a Federal, State, or local government agency of the United States, a domestic Institution of Higher Education, or a domestic research institute that is affiliated with a domestic Institution of Higher Education.

§ 910.210 Applicability.

(a) This subpart applies to any non-Federal entity that is an applicant to or recipient of a DOE Federal financial assistance award on or after August 17, 2026, including any covered individual who plans to participate in or is participating in the project funded wholly or in part under the DOE Federal financial assistance award, and each non-Federal entity subrecipient under the Federal financial assistance award, subject to the following exceptions:

(1) This subpart does not apply to DOE Office of Indian Energy applications and Federal financial assistance awards.

(2) For an individual that is an applicant to or recipient of a DOE Federal financial assistance award the requirements of this subpart may be tailored to the extent determined appropriate by the applicable DOE program office.

(b) [Reserved]

§ 910.220 [Reserved]

§ 910.230 Required conflict of interest (COI) and conflict of commitment (COC) policies.

(a) Any non-Federal entity that is an applicant to or recipient of a DOE Federal financial assistance award must maintain a written and enforced policy addressing actual, apparent, and potential COI and COC, both foreign and domestic. The non-Federal entity must make its written policy available within five business days following any request for the policy.

(b) The policy required under paragraph (a) of this section must:

(1) Designate a non-Federal entity official(s) to solicit and review COI and COC disclosures from each covered individual who is planning to participate in, or is participating in, the project funded under a DOE Federal financial assistance award;

(2) Require review by the designated official(s) of all covered individuals' disclosures to determine whether an actual, apparent, or potential COI or COC exists; and, if so, require the designated official(s) determine the actions that have been and shall be taken to eliminate or, where appropriate, manage or reduce the conflict. Examples of conditions or restrictions that a recipient or subrecipient might impose to manage, reduce, or eliminate a conflict include, but are not limited to:

(i) Public disclosure of the conflict (*e.g.,* when presenting or publishing the project);

(ii) For projects involving human subjects, disclosure of the conflict directly to participants;

(iii) Appointment of an independent monitor or oversight committee capable of taking measures to protect the purpose, design, conduct, and reporting of the project against bias resulting from the conflict;

(iv) Modification of the project plan;

(v) Change of personnel or personnel responsibilities, or disqualification of personnel from participation in all or a portion of the project;

(vi) Reduction or elimination of the financial interest (*e.g.,* sale of an equity interest) or commitment; or

(vii) Severance of relationship(s) that create the conflict;

(3) Ensure that covered individuals have provided all required disclosures to the non-Federal entity no later than the time an application is submitted to DOE. In the event a non-Federal entity seeks to add a covered individual after the time of application, the non-Federal entity must require the covered individual make such disclosures prior to participating in a project funded under a DOE Federal financial assistance award;

(4) Require each covered individual who is participating in the DOE Federal financial assistance award update those disclosures on an annual basis and as soon as practicable, but in no event later than 15 days after any new actual, apparent, or potential COI or COC arises;

(5) Require each disclosure be signed and dated by the covered individual and include the certification statement in appendix A to this subpart;

(6) Require each covered individual to complete COI and COC training prior to engaging in projects funded under a DOE Federal financial assistance award and complete refresher training least every two years. The training must cover the non-Federal entity's COI and COC policy and the covered individual's responsibilities regarding disclosures. The non-Federal entity must require covered individual to complete COI and COC training within 30 days of any of the following circumstances:

(i) The non-Federal entity revises its COI and COC policies or procedures in any manner that affects the responsibilities of a covered individual;

(ii) A covered individual is new to a non-Federal entity; or

(iii) A non-Federal entity finds that a covered individual is not in compliance with the non-Federal entity's COI and COC policy or applicable management plan;

(7) With regard to reimbursed or sponsored travel, the non-Federal entity's COI and COC policy must require, at a minimum, reporting the purpose of the trip, the identity of the sponsor/organizer, the destination, and the duration. In accordance with the non-Federal entity's policy, the non-Federal entity official(s) will determine if further information is needed, including a determination or disclosure of monetary value, in order to determine whether the travel constitutes a COI or COC with the project funded under the DOE Federal financial assistance award; and

(8) Include adequate enforcement mechanisms and provide for sanctions where appropriate.

(c) Any non-Federal entity that receives a DOE Federal financial assistance award must ensure that subrecipients, if any, follow the requirements of this subpart by:

(1) Incorporating as part of a written agreement with the subrecipient terms that establish either the COI and COC policy of the recipient or that of the subrecipient will apply to the subrecipient's covered individuals.

(2) If the subrecipient's covered individuals must comply with the subrecipient's COI and COC policy, the subrecipient shall certify as part of the agreement referenced in paragraph (c)(1) of this section that its policy complies with this subpart. If the subrecipient cannot provide such certification, the agreement shall state that subrecipient's covered individuals are subject to the COI and COC policy of the recipient.

(3) Additionally, if the subrecipient's covered individuals must comply with the subrecipient's COI and COC policy, the agreement referenced in paragraph (c)(1) of this section shall specify time period(s) for the subrecipient to report all identified financial COI and COC to the recipient. Such time period(s) shall be sufficient to enable the recipient to provide timely COI/COC reports, as necessary, to DOE, as required by this subpart.

(4) Alternatively, if the subrecipient's covered individuals must comply with the recipient's COI and COC policy, the agreement referenced in paragraph (c)(1) of this section shall specify time period(s) for the subrecipient to submit all covered individual's disclosures to the recipient. Such time period(s) shall be sufficient to enable the recipient to comply timely with its review, management, and reporting obligations under this subpart.

§ 910.240 Reporting conflicts of interest (COIs) and conflicts of commitment (COCs).

(a) Consistent with 2 CFR 200.112, a non-Federal entity that is an applicant to or recipient of DOE financial assistance must disclose to DOE in writing any actual, apparent, or potential COI or COC, including any actual, apparent, or potential COI or COC reported to the recipient by a subrecipient, if such conflict cannot be eliminated or appropriately managed or reduced in accordance with the entity's policy. In addition, such entity must disclose to DOE in writing any actual, apparent, or potential COI or COC, including any actual, apparent, or potential COI or COC reported to the recipient by a subrecipient, involving any foreign governments, their instrumentalities, or any other entities owned, funded, or otherwise controlled by a foreign government, as well as any measures the entity has taken to eliminate or, where appropriate, manage or reduce the COI or COC.

(1) For all conflicts that require disclosure to DOE:

(i) A non-Federal entity applying for DOE funding must clearly and explicitly disclose such conflict(s) in the application.

(ii) In the event a non-Federal entity seeks to add a covered individual after the time of application, the non-Federal entity must clearly and explicitly disclose such conflict(s) in writing to DOE prior to the individual participating in the project.

(2) If specified in the applicable funding opportunity announcement and/or terms and conditions of the Federal financial assistance award, a DOE program office may require the non-Federal entity disclose to DOE in writing all covered individuals' COIs and COCs, including those COIs and COCs determined by the non-Federal entity to be appropriately managed or reduced.

(b) DOE may require the non-Federal entity to provide associated disclosures, supporting documentation to demonstrate how the COI or COC was managed or reduced; and sufficient information to enable DOE to understand the nature and extent of the COI or COC, and to assess whether the actions are sufficient to ensure the integrity of the DOE-supported project and to protect the Government's interests.

(c) For any COI or COC previously reported by the non-Federal entity regarding an ongoing project funded under a DOE Federal financial assistance award, the non-Federal entity must provide DOE with an annual COI/COC report that addresses the status of the COI or COC and, if applicable, any changes to the management plan for the duration of the DOE Federal financial assistance award. The annual COI/COC report must specify whether the conflict is still being managed or if it remains unmanaged/unmanageable. Alternatively, the annual COI/COC report must explain why the conflict no longer exists. The non-Federal entity must provide annual COI/COC reports to DOE for the duration of the project period (including extensions with or

without funds) in the time and manner required by term and condition of the Federal financial assistance award.

(d) In addition to the annual COI/COC report, DOE may require a non-Federal entity to routinely, or upon request, submit all or some covered individuals' disclosures. Circumstances when DOE may require a non-Federal entity to submit all or some of such covered individual disclosures include but are not limited to:

(1) As part of monitoring the non-Federal entity's compliance with this subpart;

(2) Bankruptcy of the non-Federal entity;

(3) Other legal winding down of the non-Federal entity;

(4) Acquisition of the non-Federal entity by a foreign entity, where ''acquisition'' includes a foreign entity obtaining a controlling interest in the non-Federal entity; or

(5) As otherwise set forth in 2 CFR part 200 and this part.

(e) If a non-Federal entity becomes aware that a covered individual failed to comply with the non-Federal entity's COI and COC policy or a management plan, the non-Federal entity must promptly notify DOE in writing of the failure to comply and of the corrective action taken or to be taken. DOE will evaluate the situation and, as necessary, take appropriate action, which may include referring the matter to the non-Federal entity for further corrective action consistent with non-Federal entity's established COI and COC policies, DOE directing the non-Federal entity to take specific mitigation measures, or termination of the Federal financial assistance award.

§ 910.250 Organizational conflicts.

(a) Consistent with 2 CFR 200.318, if a non-Federal entity has a parent, affiliate, or subsidiary organization that is not a State government, local government, or Indian Tribe, the non-Federal entity must maintain written standards of conduct covering organizational conflicts of interest (OCI) as that term is defined in 2 CFR 200.318(c)(2).

(b) If the effects of a potential or actual OCI cannot be avoided, eliminated, or mitigated, the procurement or other transaction anticipated by the non-Federal entity must not be made using DOE or cost share funds.

§ 910.260 Reporting organizational conflicts of interest (OCIs).

The non-Federal entity must disclose in writing any potential or actual OCI to DOE within 15 business days of learning of the conflict.

(a) The non-Federal entity must provide the disclosure to DOE in an application for financial assistance and prior to engaging in a procurement or other transaction to acquire services or property, using DOE funds with a parent, affiliate, or subsidiary organization that is not a State government, local government, or Indian Tribe.

(b) The disclosure must include, at a minimum, the following:

(1) The name, address, and website (as applicable) of the entity that presents a potential or actual OCI;

(2) The relationship between the non-Federal entity and the entity at issue;

(3) The nature of the anticipated procurement or other transaction with the parent, affiliate, or subsidiary organization; the anticipated value of the procurement or other transaction; and the basis for making the procurement or other transaction with the parent, affiliate, or subsidiary organization;

(4) The basis for the non-Federal entity's determination regarding the existence of an OCI; and

(5) How the non-Federal entity will avoid, eliminate, or mitigate the OCI.

§ 920.270 Remedies, penalties, and enforcement.

(a)(1) If a non-Federal entity fails to disclose a conflict of interest (COI) or conflict of commitment (COC) as required under this subpart, or fails to sufficiently manage or mitigate a COI or COC to ensure the integrity of the DOE-supported project or to protect the Government's interests, DOE may:

(i) Require the non-Federal entity take action to eliminate or mitigate the conflict to a risk level acceptable to DOE. In the event the non-Federal entity does not eliminate or mitigate the conflict to a risk level acceptable to DOE, DOE may determine the Federal financial assistance award no longer effectuates the program goals or agency priorities and terminate the Federal financial assistance award;

(ii) Determine the circumstances disqualify an entity or individual from participating in all or a portion of a Federal financial assistance award; or

(iii) Reject an application.

(2) DOE may inquire, at any time before, during, or after a Federal financial assistance award, into any covered individual's disclosures and the non-Federal entity's review (including any retrospective review) of and response to such disclosure, regardless of whether the disclosure resulted in the non-Federal entity's determination of a COI or COC. A non-Federal entity is required to submit or permit on-site review of all records pertinent to compliance with this subpart. To the extent permitted by law, DOE will maintain the confidentiality of all records of financial interests. Based on its review of records or other information that may be available, DOE may determine that a particular COI or COC will bias the objectivity of or adversely impact the project funded under the DOE Federal financial assistance award to such an extent that further corrective action is needed or that the non-Federal entity has not managed the COI or COC in accordance with this subpart. DOE may determine that the imposition of specific award conditions under 2 CFR 200.208 is necessary. DOE may also take one or more the actions specified under 2 CFR 200.339, as appropriate in such circumstances.

(b) If a non-Federal entity fails to disclose an OCI to DOE prior to engaging in a procurement or other transaction to acquire services or property, using DOE funds with a parent, affiliate, or subsidiary organization that is not a State, local government, or Indian Tribe, the costs of such procurement or transaction may be disallowed. If a non-Federal entity fails to disclose an OCI to DOE that is not avoided, eliminated, or mitigated or fails to avoid, eliminate, or mitigate a disclosed OCI, prior to engaging in a procurement or other transaction using DOE funds with a parent, affiliate, or subsidiary organization that is not a State, local government, or Indian Tribe, DOE may determine that imposition of specific award conditions under 2 CFR 200.208 is necessary. DOE may also take one or more actions specified under 2 CFR 200.339, as appropriate in the circumstances.

(c) Any false, fictitious, or fraudulent information, or the omission of any material fact, on a disclosure, report, or other record required under this subpart may be subject to criminal, civil, or administrative penalties for fraud, false statements, false claims or otherwise. (18 U.S.C. 287 and 1001 and 31 U.S.C. 3729–3733 and 3801–3812)

(d) If fraud, misrepresentation, or related misconduct is suspected in relation to any disclosure submitted to DOE, then the cognizant contracting officer and/or program official should coordinate with appropriate counsel and thereafter, as appropriate, refer the matter to the DOE Office of Inspector General (OIG).

(e) If a covered individual knowingly fails to disclose required information, DOE may take one or more of the following enforcement or other actions:

(1) Reject an application;

(2) Suspend or terminate a Federal financial assistance award;

(3) Temporarily or permanently discontinue or de-obligate any or all funding for the covered individual or non-Federal entity;

(4) Refer recipients for consideration of suspension or debarment proceedings;

(5) Refer the failure to disclose to the DOE OIG for further investigation or to Federal law enforcement authorities to determine whether any criminal or civil laws were violated;

(6) Report the entity in the Federal Awardee Performance and Integrity Information System (FAPIIS) to alert other Federal agencies to the noncompliance;

(7) Take one or more of the actions described in 2 CFR 200.339; or

(8) Take such other actions against the covered individual or non-Federal entity as authorized under applicable law or regulations.

Appendix A to Subpart C of Part 910—Disclosure Certification Statement

All disclosures required under this subpart must include the following certification statement:

''I understand that this Disclosure is required to obtain funding from the U.S. Government. I, [Full Name and Title], certify to the best of my knowledge and belief that the information contained in this Disclosure Statement is true, complete, and accurate. I understand that any false, fictitious, or fraudulent information, misrepresentations, half-truths, or omissions of any material fact, may subject me to criminal, civil or administrative penalties for fraud, false statements, false claims, or otherwise. (18 U.S.C. 287, 1001, and 1031, and 31 U.S.C. 3729–3733 and 3801–3812). I further understand and agree that:

(1) The statements and representations made herein are material to the U.S. Government's funding decision, and

(2) I have a responsibility to update the disclosures during the period of performance of the Federal financial assistance award should circumstances change which impact the responses provided above.''

BILLING CODE 6450–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 21 and 22

[Docket No. FAA–2026–6965]

Accepted Consensus Standards for Light-Sport Category Aircraft: Airplane, Glider, Powered Lift, and Gyroplane

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notification of Availability (NOA).

SUMMARY: This document announces the availability of ASTM International (ASTM) consensus standards for use as an FAA-accepted means of compliance (MOC) to support issuance of special airworthiness certificates for the categories of light-sport category aircraft and light-sport category kit-built aircraft described herein. The FAA accepts the following ASTM standards (with changes identified in this document): F3815–26a, ''Standard Specification for Integration for Light Sport Airplane,'' F3836–26, ''Standard Specification for Integration for Light Sport Glider,'' F3840–26,[1] ''Standard Specification for Integration for Light Sport Powered-Lift and Multicopter,'' and F3841–26, ''Standard Specification for Integration for Light Sport Gyroplane''. FAA's acceptance of these ASTM integration standards as an MOC includes FAA's acceptance of the underlying ASTM functional standards as set forth Tables 1–8 herein. The FAA will maintain a listing of FAA accepted MOCs for light-sport category aircraft on the FAA's Light-Sport Category Aircraft web page at *https://www.faa.gov/aircraft/gen_av/light_sport.*

DATES: Acceptance of these MOC is effective on July 16, 2026. Comments must be received on or before August 17, 2026.

ADDRESSES: Send comments identified by docket number FAA–2026–6965 using any of the following methods:

☐ *Federal eRulemaking Portal:* Go to *www.regulations.gov* and follow the online instructions for sending your comments electronically.

☐ *Email:* Send comments to: *9-ACE-AVR-LSA-Comments@faa.gov.* Specify the standard being addressed by ASTM designation and title. Mark all comments: Consensus Standards Comments.

FOR FURTHER INFORMATION CONTACT: John Stoll, Federal Aviation Administration, Policy and Standards Division, AIR–600, Product Policy Management: Systems Standards Section, AIR–63A; email: *john.stoll@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to submit any written data, views, or arguments about this notice. Comments should identify the consensus standard number and be sent to an address listed under **ADDRESSES**. The FAA will forward all comments received on or before the closing date to the ASTM F37 Committee on Light-Sport Aircraft for consideration, who may change the standard in light of the comments received. The FAA will address all comments received during its recurring review of the consensus standards and participation in the consensus standards revision process.

Background

Under the provisions of the National Technology Transfer and Advancement Act of 1995 [2] and Office of Management and Budget (OMB) Circular A–119, ''Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities,'' effective January 27, 2016, the FAA participates in the development of consensus standards for use as a means of carrying out its policy objectives where appropriate.

Consistent with the ''Certification of Aircraft and Airmen for the Operation of Light-Sport Aircraft'' final rule (69 FR44772, July 27, 2004) and the ''Small Airplane Revitalization Act of 2013'',[3] the FAA has been working with industry and other stakeholders through the ASTM F37 Committee on Light-Sport Aircraft (hereafter F37) to develop consensus standards as an MOC in certificating airplanes, gliders, powered-parachutes, weight-shift control, and lighter-than-air under §§ 21.190 and 21.191(i)(2) since 2004.

The Modernization of Special Airworthiness Certification (MOSAIC) final rule (90 FR 35034), published on July 24, 2025, anticipated that beginning on July 24, 2026, new consensus standards would need to be developed as the MOC to the design, production, and airworthiness requirements of part 22 subpart B, including the performance

[1] The ASTM Standard F3840–26 is intended to serve as an MOC for both powered-lift and multicopters, but at this time FAA is only accepting it as an MOC for powered-lift light-sport category aircraft.

[2] *Ref* Public Law 104–113, as amended by Public Law 107–107.

[3] Public Law 113–53.

expansions and new classes of aircraft allowed by this rule. With FAA participation, F37 has worked to publish a new framework of standards that could serve as MOCs to the changes provided by the MOSAIC final rule. In addition to the previously addressed categories of aircraft, these new standards also expand the applicability to new categories of aircraft such as gyroplane and powered-lift.

As stated in the MOSAIC final rule, the FAA would publish a notice of availability (NOA) of those consensus standards in the **Federal Register** when the Administrator accepts the consensus standards as an acceptable MOC. The FAA reviewed the published ASTM consensus standards developed by F37 as the basis for an MOC to §§ 21.190, 21.191(k), 21.193(h), and each section of part 22 subpart B except § 22.175. The Administrator accepts ASTM F3815–26a, F3836–26, F3840–26, and F3841–26 as an MOC for the requirements of §§ 21.190, 21.191(k), 21.193(h), and part 22 subpart B.

Consensus standards that have been FAA-accepted prior to the July 24, 2026, effective date of part 22 will:

- Still apply to:
  - Alterations and repairs of ''light-sport aircraft'' (the terminology of such aircraft prior to MOSAIC) certificated prior to July 24, 2026; and
  - Issuance of airworthiness certificates for the experimental purpose of operating light-sport category kit-built aircraft with a light-sport category aircraft statement of compliance (FAA Form 8130–15) signed prior to July 24, 2026.
- Not apply to:
  - Light-sport category aircraft certificated on or after July 24, 2026; or
  - Issuance of airworthiness certificates for the experimental purpose of operating light-sport category kit-built aircraft with a light-sport category aircraft statement of compliance (FAA Form 8130–15) signed after July 24, 2026.

Aircraft certificated as light-sport category aircraft or kit aircraft for the experimental purpose of operating light-sport category kit-built aircraft on or after July 24, 2026, must comply with part 22 and consensus standards that have been accepted by the FAA as an MOC to part 22.

Means of Compliance Accepted

F37 has structured their light-sport category aircraft consensus standards under an integration and functional standard framework. F37 has developed integration standards for specific categories of light-sport category aircraft (*e.g.,* airplane, glider, powered lift, and gyroplane). These integration standards identify a package of functional standards that are applicable to the specific light-sport category of aircraft addressed by that integration standard and that are intended to work together as a whole. Each underlying functional standard covers a specific topic such as structures, landing gear, propellers, engines, etc. Many functional standards are applicable to more than one category of light-sport aircraft and will be identified in multiple integration standards whereas other functional standards are only applicable to a specific light-sport category of aircraft and will only be identified in the integration standard applicable to that category. For each light-sport category of aircraft, a tailored integration standard identifies which functional standards are required to be the MOC to part 22 and certain portions of part 21.

The FAA accepts ASTM integration standards F3815–26a, F3836–26, F3840–26, and F3841–26 as an MOC for the airworthiness requirements of §§ 21.190, 21.191(k), 21.193(h), and part 22 subpart B, with the footnotes identified in Tables 1, 3, 5, and 7. This acceptance includes only the version of the functional standards referenced in the MOC summary tables in those integration standards.[4] If an underlying functional standard is revised, that standard is not accepted by the FAA until it is identified in a new revision of the integration standard that is accepted by the FAA. For ease of use, Tables 2, 4, 6, and 8 provide a side-by-side view, linking the applicable §§ 21.190, 21.191(k), 21.193(h), and part 22 subpart B regulations to the respective ASTM integration standard.

Guidance

This is a guidance document. Its content is not legally binding in its own right and will not be relied upon by the Department as a separate basis for affirmative enforcement action or other administrative penalty. Conformity with the guidance document is voluntary only, and nonconformity will not affect rights and obligations under existing statutes and regulations.

[4] The FAA previously accepted ASTM F2930–16, Standard Guide for Compliance with Light Sport Aircraft Standards (*see* 82 FR 16271, April 3, 2017). F2930–16 is not referenced in the F3815–26a, F3836–26, F3840–26, or F3841–26 integration standards and is not being accepted by this NOA. While F2930–16 is not required for compliance with the regulations discussed in this NOA, that standard may continue to be used for reference purposes only.

TABLE 1—PART 22 SUBPART B ACCEPTED MOC FOR LIGHT-SPORT CATEGORY AIRPLANES BASED ON ASTM CONSENSUS STANDARDS F3815–26a

ASTM number as identified in F3815–26a	ASTM document title
F2316–12 (2022).	Standard Specification for Airframe Emergency Parachutes.
F2339–26	Standard Practice for Design and Manufacture of Reciprocating Engines for Light Sport Aircraft.
F2483–26	Standard Practice for Maintenance Program for Light Sport Category Aircraft.
F2506–26	Standard Specification for Design and Testing of Light Sport Aircraft Propellers.
F2563–16 (2025).	Standard Practice for Kit Assembly Instructions of Aircraft Intended Primarily for Recreation.
F2745–15 (2023).	Standard Specification for Required Product Information to be Provided with an Airplane.
F2746–26a	Standard Specification for Pilot's Operating Handbook (POH) for Light Sport Category Aircraft.
F2839–11 (2025)[5].	Standard Practice for Compliance Audits to ASTM Standards on Light Sport Aircraft.
F2840–26a	Standard Practice for Design and Manufacture of Electric Engine for Light Sport Aircraft.
F2972–26	Standard Specification for Light Sport Aircraft Manufacturer's Quality Assurance System.
F3035–26	Standard Practice for Production Acceptance in the Manufacture of a Light Sport Aircraft.
F3198–25	Standard Specification for Light Sport Aircraft Manufacturer's Continued Operational Safety (COS) Program.
F3331–18 (2023).	Standard Practice for Aircraft Water Loads.
F3338–24	Standard Specification for Design of Electric Engines for General Aviation Aircraft.
F3619–26	Standard Specification for Aeroelasticity Requirements for a Light Sport Category Airplane.
F3695–26	Standard Specification for Angle of Attack (AoA) Functional Requirements.
F3737–25	Standard Specification for Aircraft Design and Construction.
F3746–26	Standard Specification for Maintenance Manuals for Light Sport Category Aircraft.
F3768–26a	Standard Specification for IFR Operations in IMC for a Light-Sport Aircraft.

TABLE 1—PART 22 SUBPART B ACCEPTED MOC FOR LIGHT-SPORT CATEGORY AIRPLANES BASED ON ASTM CONSENSUS STANDARDS F3815–26a—Continued

ASTM number as identified in F3815–26a	ASTM document title
F3792–26	Standard Specification for Light Sport Category Aircraft Flown at Night.
F3793–26a	Standard Specification for Flight Characteristics and Performance.
F3810–26b	Standard Specification for Oxygen Systems for Light Sport Aircraft.
F3813–26	Standard Specification for Light Sport Category Aircraft Occupant Safety.
F3814–26	Standard Specification for Light Sport Category Aircraft Electrical Systems.
F3824–26	Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft.
F3825–26	Standard Specification for Operating Limitations, Markings, Placards, and Warnings for Light Sport Aircraft.
F3826–26	Standard Specification for Liquid Energy Storage Systems for Light Sport Category Aircraft.
F3827–26	Standard Specification for Indirect Flight Controls.

TABLE 1—PART 22 SUBPART B ACCEPTED MOC FOR LIGHT-SPORT CATEGORY AIRPLANES BASED ON ASTM CONSENSUS STANDARDS F3815–26a—Continued

ASTM number as identified in F3815–26a	ASTM document title
F3828–26	Standard Specification for Structures for Light Sport Category Aircraft.
F3829–26	Standard Specification for Light Sport Category Aircraft Powerplant Systems.
F3830–26	Standard Specification for Electrical Energy Storage Systems.
F3831–26	Standard Specification for Aircraft Intended for Water Operations.
F3833–26[6]	Standard Guide for Computer Based Control Systems (CBCS).
F3834–26	Standard Specification for Systems and Equipment for Light Sport Category Aircraft.
F3835–26	Standard Specification for Light Sport Category Aircraft Landing Gear Systems.
F3845–26	Standard Practice for the Design and Manufacturing of Turbine Engines for Light Sport Category Aircraft.

TABLE 1—PART 22 SUBPART B ACCEPTED MOC FOR LIGHT-SPORT CATEGORY AIRPLANES BASED ON ASTM CONSENSUS STANDARDS F3815–26a—Continued

ASTM number as identified in F3815–26a	ASTM document title
F3851–26	Standard Specification for Light Sport Category Aircraft.

[5] ASTM references F2839–11 (2025) in the ASTM integration standards for light-sport category airplanes (F3815–26a), gliders (F3836–26), powered-lifts (F3840–26), and gyroplanes (F3841–26). ASTM intended this standard to be optional and not required for compliance under all of these integration standards. However, ASTM unintentionally referenced F2839–11 (2025) as a mandatory requirement for § 21.190(d) for the powered-lift, and gyroplane integration standards. Accordingly, with respect to FAA's acceptance of F3815–26a, F3836–26, F3840–26, and F3841–26 as MOCs, F2839 is optional and is not required for compliance.

[6] ASTM references F3833–26 for § 22.185 in the ASTM integration standards for light-sport category airplanes (F3815–26a), gliders (F3836–26), powered-lifts (F3840–26), and gyroplanes (F3841–26). FAA notes that F3833–26 is not required for compliance § 22.185 and FAA has made no determination of its suitability, but that standard may be used for reference purposes.

TABLE 2—LIGHT-SPORT CATEGORY AIRPLANE SIDE-BY-SIDE VIEW OF §§ 21.190, 21.191(k), 21.193(h), AND PART 22 SUBPART B AND ASTM F3815–26A SECTION(S)

Title 14 regulation(s)	ASTM F3815–26a reference standards(s)
§ 21.190	
§ 21.190(c) Application for special airworthiness certificate in the light-sport category.	F3824–26 Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft. F2746–26a Standard Specification for Pilot's Operating Handbook (POH) for Light Sport Category Aircraft. F2745–15 (2023) Standard Specification for Required Product Information to be Provided with an Airplane. F3746–26 Standard Specification for Maintenance Manuals for Light Sport Category Aircraft. F2483–26 Standard Practice for Maintenance Program for Light Sport Category Aircraft.
§ 21.190(d) Manufacturer's Statement of Compliance	F3198–25 Standard Specification for Light Sport Aircraft Manufacturer's Continued Operational Safety (COS) Program. F3824–26 Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft. F2745–15 (2023) Standard Specification for Required Product Information to be Provided with an Airplane. F2972–26 Standard Specification for Light Sport Aircraft Manufacturer's Quality Assurance System.
§ 21.191	
§ 21.191(k) Issue of experimental airworthiness certificates.	F2563–16 (2025) Standard Practice for Kit Assembly Instructions of Aircraft Intended Primarily for Recreation.
§ 21.193	
§ 21.193(h) Application for Special Airworthiness certificates issued for experimental purposes.	F3746–26 Standard Specification for Maintenance Manuals for Light Sport Category Aircraft.

§ 22.170 Placards and markings	F3825–26 Standard Specification for Operating Limitations, Markings, Placards, and Warnings for Light Sport Aircraft.
	F3829–26 Standard Specification for Light Sport Category Aircraft Powerplant Systems.
	F2506–26 Standard Specification for Design and Testing of Light Sport Aircraft Propellers.
	F3814–26 Standard Specification for Light Sport Category Aircraft Electrical Systems.
	F3824–26 Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft.
	F3792–26 Standard Specification for Light Sport Category Aircraft Flown at Night.
	F3695–26 Standard Specification for Angle of Attack (AoA) Functional Requirements.
	F3768–26a Standard Specification for IFR Operations in IMC for a Light-Sport Aircraft.
	F3746–26 Standard Specification for Maintenance Manuals for Light Sport Category Aircraft.
§ 22.180 Special requirements for light-sport category aircraft with simplified flight controls.	ASTM has not submitted for FAA acceptance, and FAA has not otherwise accepted a consensus standard to enable this requirement. Therefore, manufacturers are not eligible to declare compliance with § 21.180 and have their airplanes be designated as light-sport category aircraft with simplified flight controls at this time.
§ 22.185 Quality Assurance System	F2972–26 Standard Specification for Light Sport Aircraft Manufacturer's Quality Assurance System.
	F3737–25 Standard Specification for Aircraft Design and Construction.
	F3198–25 Standard Specification for Light Sport Aircraft Manufacturer's Continued Operational Safety (COS) Program.
	F3833–26 Standard Guide for Computer Based Control Systems (CBCS).
§ 22.190 Finding of compliance by trained staff	F2972–26 Standard Specification for Light Sport Aircraft Manufacturer's Quality Assurance System.
§ 22.195 Ground and flight testing	F3035–26 Standard Practice for Production Acceptance in the Manufacture of a Light Sport Aircraft.
	F3824–26 Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft.
	F3695–26 Standard Specification for Angle of Attack (AoA) Functional Requirements.

TABLE 3—PART 22 SUBPART B ACCEPTED MOC FOR LIGHT-SPORT CATEGORY GLIDER BASED ON ASTM CONSENSUS STANDARDS F3836–26

ASTM No. as identified in F3836–26	ASTM document title
F2316–12 (2022)	Standard Specification for Airframe Emergency Parachutes.
F2339–26	Standard Practice for Design and Manufacture of Reciprocating Engines for Light Sport Aircraft.
F2483–26	Standard Practice for Maintenance Program for Light Sport Category Aircraft.
F2506–26	Standard Specification for Design and Testing of Light Sport Aircraft Propellers.
F2563–16 (2025)	Standard Practice for Kit Assembly Instructions of Aircraft Intended Primarily for Recreation.
F2745–15 (2023)	Standard Specification for Required Product Information to be Provided with an Airplane.
F2746–26a	Standard Specification for Pilot's Operating Handbook (POH) for Light Sport Category Aircraft.
F2839–11 (2025)[7]	Standard Practice for Compliance Audits to ASTM Standards on Light Sport Aircraft.
F2840–26a	Standard Practice for Design and Manufacture of Electric Engine for Light Sport Aircraft.
F2972–26	Standard Specification for Light Sport Aircraft Manufacturer's Quality Assurance System.
F3035–26	Standard Practice for Production Acceptance in the Manufacture of a Light Sport Aircraft.
F3198–25	Standard Specification for Light Sport Aircraft Manufacturer's Continued Operational Safety (COS) Program.
F3338–24	Standard Specification for Design of Electric Engines for General Aviation Aircraft.
F3619–26	Standard Specification for Aeroelasticity Requirements for a Light Sport Category Airplane.
F3695–26	Standard Specification for Angle of Attack (AoA) Functional Requirements.
F3737–25	Standard Specification for Aircraft Design and Construction.
F3746–26	Standard Specification for Maintenance Manuals for Light Sport Category Aircraft.
F3768–26a	Standard Specification for IFR Operations in IMC for a Light-Sport Aircraft.
F3792–26	Standard Specification for Light Sport Category Aircraft Flown at Night.
F3793–26a	Standard Specification for Flight Characteristics and Performance.
F3810–26b	Standard Specification for Oxygen Systems for Light Sport Aircraft.
F3813–26	Standard Specification for Light Sport Category Aircraft Occupant Safety.
F3814–26	Standard Specification for Light Sport Category Aircraft Electrical Systems.
F3824–26	Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft.
F3825–26	Standard Specification for Operating Limitations, Markings, Placards, and Warnings for Light Sport Aircraft.
F3826–26	Standard Specification for Liquid Energy Storage Systems for Light Sport Category Aircraft.
F3827–26	Standard Specification for Indirect Flight Controls.
F3828–26	Standard Specification for Structures for Light Sport Category Aircraft.
F3829–26	Standard Specification for Light Sport Category Aircraft Powerplant Systems.
F3830–26	Standard Specification for Electrical Energy Storage Systems.
F3831–26	Standard Specification for Aircraft Intended for Water Operations.
F3833–26[8]	Standard Guide for Computer Based Control Systems (CBCS).
F3834–26	Standard Specification for Systems and Equipment for Light Sport Category Aircraft.
F3835–26	Standard Specification for Light Sport Category Aircraft Landing Gear Systems.
F3845–26	Standard Practice for the Design and Manufacturing of Turbine Engines for Light Sport Category Aircraft.
F3851–26	Standard Specification for Light Sport Category Aircraft.

§ 22.195 Ground and flight testing	F3035–26 Standard Practice for Production Acceptance in the Manufacture of a Light Sport Aircraft.
	F3824–26 Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft.
	F3695–26 Standard Specification for Angle of Attack (AoA) Functional Requirements.

[9] The glider integration standard, ASTM F3836, unintentionally listed F3851–26, as a functional standard for § 22.140 in Table A1.1. of that integration standard. F3851–26 is not required as part of the MOC for § 22.140.

TABLE 5—PART 22 SUBPART B ACCEPTED MOC FOR LIGHT-SPORT CATEGORY POWERED-LIFT BASED ON ASTM CONSENSUS STANDARDS F3840–26

ASTM No. as identified in F3840–26	ASTM document title
F2316–12 (2022)	Standard Specification for Airframe Emergency Parachutes.
F2339–26	Standard Practice for Design and Manufacture of Reciprocating Engines for Light Sport Aircraft.
F2483–26	Standard Practice for Maintenance Program for Light Sport Category Aircraft.
F2506–26	Standard Specification for Design and Testing of Light Sport Aircraft Propellers.
F2563–16 (2025)	Standard Practice for Kit Assembly Instructions of Aircraft Intended Primarily for Recreation.
F2745–15 (2023)	Standard Specification for Required Product Information to be Provided with an Airplane.
F2746–26a	Standard Specification for Pilot's Operating Handbook (POH) for Light Sport Category Aircraft.
F2839–11 (2025) [10]	Standard Practice for Compliance Audits to ASTM Standards on Light Sport Aircraft.
F2840–26a	Standard Practice for Design and Manufacture of Electric Engine for Light Sport Aircraft.
F2972–26	Standard Specification for Light Sport Aircraft Manufacturer's Quality Assurance System.
F3035–26	Standard Practice for Production Acceptance in the Manufacture of a Light Sport Aircraft.
F3198–25	Standard Specification for Light Sport Aircraft Manufacturer's Continued Operational Safety (COS) Program.
F3331–18 (2023)	Standard Practice for Aircraft Water Loads.
F3338–24	Standard Specification for Design of Electric Engines for General Aviation Aircraft.
F3619–26	Standard Specification for Aeroelasticity Requirements for a Light Sport Category Airplane.
F3695–26	Standard Specification for Angle of Attack (AoA) Functional Requirements.
F3737–25	Standard Specification for Aircraft Design and Construction.
F3746–26	Standard Specification for Maintenance Manuals for Light Sport Category Aircraft.
F3792–26	Standard Specification for Light Sport Category Aircraft Flown at Night.
F3793–26a	Standard Specification for Flight Characteristics and Performance.
F3810–26b	Standard Specification for Oxygen Systems for Light Sport Aircraft.
F3813–26	Standard Specification for Light Sport Category Aircraft Occupant Safety.
F3814–26	Standard Specification for Light Sport Category Aircraft Electrical Systems.
F3824–26	Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft.
F3825–26	Standard Specification for Operating Limitations, Markings, Placards, and Warnings for Light Sport Aircraft.
F3826–26	Standard Specification for Liquid Energy Storage Systems for Light Sport Category Aircraft.
F3827–26	Standard Specification for Indirect Flight Controls.
F3828–26	Standard Specification for Structures for Light Sport Category Aircraft.
F3829–26	Standard Specification for Light Sport Category Aircraft Powerplant Systems.
F3830–26	Standard Specification for Electrical Energy Storage Systems.
F3831–26	Standard Specification for Aircraft Intended for Water Operations.
F3833–26 [11]	Standard Guide for Computer Based Control Systems (CBCS).
F3834–26	Standard Specification for Systems and Equipment for Light Sport Category Aircraft.
F3835–26	Standard Specification for Light Sport Category Aircraft Landing Gear Systems.
F3838–26	Standard Specification for Light Sport Category Thrust Borne Aircraft Landing Gear Systems.
F3845–26	Standard Practice for the Design and Manufacturing of Turbine Engines for Light Sport Category Aircraft.
F3851–26	Standard Specification for Light Sport Category Aircraft.

TABLE 7—PART 22 SUBPART B ACCEPTED MOC FOR LIGHT-SPORT CATEGORY GYROPLANE BASED ON ASTM CONSENSUS STANDARDS F3841–26

ASTM No. as identified in F3841–26	ASTM document title
F2316–12 (2022)	Standard Specification for Airframe Emergency Parachutes.
F2339–26	Standard Practice for Design and Manufacture of Reciprocating Engines for Light Sport Aircraft.
F2483–26	Standard Practice for Maintenance Program for Light Sport Category Aircraft.
F2506–26	Standard Specification for Design and Testing of Light Sport Aircraft Propellers.
F2563–16 (2025)	Standard Practice for Kit Assembly Instructions of Aircraft Intended Primarily for Recreation.
F2745–15 (2023)	Standard Specification for Required Product Information to be Provided with an Airplane.
F2746–26a	Standard Specification for Pilot's Operating Handbook (POH) for Light Sport Category Aircraft.
F2839–11 (2025) [12]	Standard Practice for Compliance Audits to ASTM Standards on Light Sport Aircraft.
F2840–26a	Standard Practice for Design and Manufacture of Electric Engine for Light Sport Aircraft.
F2972–26	Standard Specification for Light Sport Aircraft Manufacturer's Quality Assurance System.
F3035–26	Standard Practice for Production Acceptance in the Manufacture of a Light Sport Aircraft.
F3198–25	Standard Specification for Light Sport Aircraft Manufacturer's Continued Operational Safety (COS) Program.
F3331–18 (2023)	Standard Practice for Aircraft Water Loads.
F3338–24	Standard Specification for Design of Electric Engines for General Aviation Aircraft.
F3737–25	Standard Specification for Aircraft Design and Construction.
F3746–26	Standard Specification for Maintenance Manuals for Light Sport Category Aircraft.
F3792–26	Standard Specification for Light Sport Category Aircraft Flown at Night.
F3793–26a	Standard Specification for Flight Characteristics and Performance.
F3810–26b	Standard Specification for Oxygen Systems for Light Sport Aircraft.
F3813–26	Standard Specification for Light Sport Category Aircraft Occupant Safety.
F3814–26	Standard Specification for Light Sport Category Aircraft Electrical Systems.
F3824–26	Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft.
F3825–26	Standard Specification for Operating Limitations, Markings, Placards, and Warnings for Light Sport Aircraft.
F3826–26	Standard Specification for Liquid Energy Storage Systems for Light Sport Category Aircraft.
F3827–26	Standard Specification for Indirect Flight Controls.
F3828–26	Standard Specification for Structures for Light Sport Category Aircraft.
F3829–26	Standard Specification for Light Sport Category Aircraft Powerplant Systems.
F3830–26	Standard Specification for Electrical Energy Storage Systems.
F3831–26	Standard Specification for Aircraft Intended for Water Operations.
F3833–26 [13]	Standard Guide for Computer Based Control Systems (CBCS).
F3834–26	Standard Specification for Systems and Equipment for Light Sport Category Aircraft.
F3835–26	Standard Specification for Light Sport Category Aircraft Landing Gear Systems.
F3838–26	Standard Specification for Light Sport Category Thrust Borne Aircraft Landing Gear Systems.
F3844–26	Standard Specification for Light Sport Gyroplane Rotor System.
F3845–26	Standard Practice for the Design and Manufacturing of Turbine Engines for Light Sport Category Aircraft.
F3851–26	Standard Specification for Light Sport Category Aircraft.

	F3829–26 Standard Specification for Light Sport Category Aircraft Powerplant Systems.
§ 22.165 Emergency Evacuation	F3813–26 Standard Specification for Light Sport Category Aircraft Occupant Safety.
	F3824–26 Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft.
§ 22.170 Placards and markings	F3825–26 Standard Specification for Operating Limitations, Markings, Placards, and Warnings for Light Sport Aircraft.
	F3792–26 Standard Specification for Light Sport Category Aircraft Flown at Night.
	F3824–26 Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft.
	F3814–26 Standard Specification for Light Sport Category Aircraft Electrical Systems.
	F3829–26 Standard Specification for Light Sport Category Aircraft Powerplant Systems.
	F2506–26 Standard Specification for Design and Testing of Light Sport Aircraft Propellers.
	F3746–26 Standard Specification for Maintenance Manuals for Light Sport Category Aircraft.
§ 22.180 Special requirements for light-sport category aircraft with simplified flight controls.	ASTM has not submitted for FAA acceptance, and FAA has not otherwise accepted, a consensus standard to enable this requirement. Therefore, manufacturers are not eligible to declare compliance with § 21.180 and have their gyroplanes be designated as light-sport category aircraft with simplified flight controls at this time.
§ 22.185 Quality Assurance System	F2972–26 Standard Specification for Light Sport Aircraft Manufacturer's Quality Assurance System.
	F3833–26 Standard Guide for Computer Based Control Systems (CBCS).
	F3198–25 Standard Specification for Light Sport Aircraft Manufacturer's Continued Operational Safety (COS) Program.
	F3737–25 Standard Specification for Aircraft Design and Construction.
§ 22.190 Finding of compliance by trained staff	F2972–26 Standard Specification for Light Sport Aircraft Manufacturer's Quality Assurance System.
§ 22.195 Ground and flight testing	F3035–26 Standard Practice for Production Acceptance in the Manufacture of a Light Sport Aircraft.
	F3844–26 Standard Specification for Light Sport Gyroplane Rotor System.
	F3737–25 Standard Specification for Aircraft Design and Construction.[15]
	F3824–26 Standard Specification for Non-Fatigue Aerial Work for Light Sport Category Aircraft.

Section 21.190 requires FAA-accepted consensus standards as an MOC to requirements in §§ 21.190, 21.191(k), 21.193(h), and part 22 subpart B for issuance of special airworthiness certificates for light-sport category aircraft and light-sport category kit-built aircraft. The MOC accepted by this NOA provides one means, but not the only means, of complying with these requirements. Any consensus standards body may submit other consensus

[14] ASTM F3841–26, the integration standard for gyroplanes, unintentionally omitted F3835–25 as a functional standard for § 22.110 in Table A1.1. F3835–26 is part of the MOC for § 22.110.

[15] The gyroplane integration standard, ASTM F3841, unintentionally listed F3737–25 as a functional standard for § 22.195 in Table A1.1. of that integration standard. F3737–25 is not required as part of the MOC for § 22.195.

standards to the FAA for review and acceptance for this purpose.

Editorial, Reapproval, Revision, or Withdrawal

ASTM policy states that a consensus standard should be reviewed in its entirety by the responsible subcommittee and must be balloted for reapproval, revision, or withdrawal within five years of its last approval date. When an ASTM standard is reapproved, that reapproval is denoted by the year in parentheses (*e.g.,* F2427–05a (2013)). This date indicates the completion of a review cycle with no technical changes made to the standard. In addition, ASTM issues editorial changes denoted by a superscript epsilon in the standard designation (*e.g.,* F3235–17ε[1]). This epsilon indicates information was corrected, and it did not change the meaning or intent of a standard. Since reapprovals and editorial changes do not change the technical content of standards, any standard that the FAA has accepted pursuant to this NOA that is later reapproved or editorially changed by ASTM will, unless the FAA has announced otherwise, be considered accepted by the FAA without the need for an updated NOA.

ASTM revises a standard to make changes to its technical content. Revisions are identified by a hyphen after the document number, which is followed by the last two numbers of the year of acceptance or of last revision. If the standard is revised again during the same year, this is indicated by adding an ''a'' for the second revision, ''b'' for the third revision, and so on for each revision. Since revisions change the technical content, revisions to consensus standards that are the basis for an MOC accepted by this NOA will not be automatically accepted and will require further FAA acceptance for the revisions to be an accepted MOC.

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2026–4819; Airspace Docket No. 26–ANE–2]

RIN 2120–AA66

Amendment of Class D Airspace and Class E Airspace Over New Bedford, MA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Class D and Class E airspace over New Bedford, MA. This action adds a 0.7 mile long, 3.6-mile-wide extension to the northwest side of the existing Class D airspace to properly contain current Instrument Flight Rules (IFR) operations. This action also updates the airport name and geographic coordinates in both the New Bedford, MA Class D and Class E airspace legal descriptions. This action also replaces ''Airport/Facility Directory'' in the Class D airspace legal description with ''Chart Supplement'' to comply with current FAA guidance.

DATES: Effective 0901 UTC, October 29, 2026. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order JO 7400.11 and publication of conforming amendments.

ADDRESSES: A copy of the notice of proposed rulemaking (NPRM), all comments received, this final rule, and all background material may be viewed online at *www.regulations.gov* using the FAA Docket number. Electronic retrieval help and guidelines are available on the website. It is available 24 hours a day, 365 days a year. An electronic copy of this document may also be downloaded from *www.federalregister.gov*.

FAA Order JO 7400.11K, Airspace Designations and Reporting Points, as well as subsequent amendments, can be viewed online at *www.faa.gov/air_traffic/publications/*. For further information, you may also contact the Rules and Regulations Group, Policy Directorate, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20597; Telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends Class D and Class E airspace in New Bedford, MA.

History

The FAA published an NPRM for Docket No. FAA–2026–4819 in the **Federal Register** (91 FR 24760; May 7, 2026), proposing to amend Class D and Class E airspace in New Bedford, MA. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Difference From the NPRM

Subsequent to the publication of the NPRM in the **Federal Register**, the FAA discovered that there was a typographical error in ''The Proposal'' section of the NPRM preamble. The bearing from the airport for the extension to the Class D airspace was listed as 318° but should have been 308° as correctly listed in the proposed airspace legal description in ''The Amendment'' section of the NPRM. This change represents only a ministerial correction of a typographical error in the preamble. As mentioned, the correct bearing was provided in the proposed legal description of the NPRM.

Accordingly, the FAA finds good cause that recirculating the NPRM for public notice and comment is unnecessary.

Incorporation by Reference

Class D and Class E airspace designations are published in paragraphs 5000 and 6005 of FAA Order JO 7400.11, Airspace Designations and Reporting Points, which is incorporated by reference in 14 CFR 71.1 on an annual basis. This document amends the latest version of that order, FAA Order JO 7400.11K, dated August 4, 2025, and effective September 15, 2025. These amendments will be published in the next update to FAA Order JO 7400.11. FAA Order JO 7400.11K, which lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points, is publicly available as listed in the **ADDRESSES** section of this document.

The Rule

This action amends 14 CFR part 71 by modifying Class D and Class E airspace over New Bedford, MA. A review of the current airspace revealed that the New Bedford, MA Class D airspace did not properly contain IFR operations on the northwest side of the airport. Specifically, arrivals on the RNAV Runway 14 approach and departures to the northwest were not properly contained. This action adds an extension to the Class D airspace within 1.8 miles each side of the 308° bearing from the New Bedford Regional Airport extending from the 4-mile radius of the airport to 4.7 miles northwest of the airport.

This action also updates the airport name in both the New Bedford Class D and Class E airspace legal descriptions from ''New Bedford Municipal Airport'' to ''New Bedford Regional Airport.'' This action also updates the geographic coordinates of the New Bedford Regional Airport in both the Class D and Class E airspace legal descriptions, specifically, from (lat. 41°40′35″ N, long. 70°57′28″ W) to (lat. 41°40′36″ N long. 70°57′28″ W), which is one second of latitude. This action also updates the verbiage in the Class D airspace legal description from ''Airport/Facility Directory'' to ''Chart Supplement'' to comply with current FAA guidance.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Order 2100.6B, ''Rulemaking and Guidance Procedure'' (March 10, 2025); and (3) is expected to result in, at most, de minimis costs from compliance with applicable operating requirements or minor flight rerouting for operators choosing to navigate around the controlled airspace. Since these amendments are routine and the expected impact to operators is de minimis, the FAA certifies that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1G, ''FAA National Environmental Policy Act Implementing Procedures'' paragraph B–2.5(a). This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant the preparation of an environmental assessment.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11K, Airspace Designations and Reporting Points, dated August 4, 2025, and effective September 15, 2025, is amended as follows:

Paragraph 5000 Class D Airspace.

* * * * *

ANE MA D New Bedford, MA [Amended]

New Bedford Regional, MA
(Lat. 41°40′36″ N, long. 70°57′28″ W)

That airspace extending upward from the surface to and including 2,600 feet MSL within a 4-mile radius of New Bedford Regional Airport and within 1.8 miles each side of the 308° bearing from the airport extending from the 4-mile radius to 4.7 miles northwest of the airport. This Class D airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Chart Supplement.

* * * * *

6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANE MA E5 New Bedford, MA [Amended]

New Bedford Regional, MA
(Lat. 41°40′36″ N, long. 70°57′28″ W)

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of New Bedford Regional Airport, and within 4.5 miles each side of the 218° bearing from the airport extending from the 6.5-mile radius to 14.1 miles southwest of the airport.

* * * * *

Issued in College Park, Georgia, on July 14, 2026.

Kristen Leake,

Acting Manager, Airspace & Procedures South Team, Eastern Service Center, Air Traffic Organization.

[FR Doc. 2026–14391 Filed 7–15–26; 8:45 am]

BILLING CODE 4910–13–P

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1601

RIN 3046–AB41

FEP Agency Designation Procedures: Revising Location of FEP Agency Lists

AGENCY: Equal Employment Opportunity Commission.

ACTION: Final rule.

SUMMARY: The Equal Employment Opportunity Commission (EEOC or Commission) is revising its procedural regulations regarding fair employment practice agencies (FEP agencies or FEPAs). The lists of FEPAs in the regulations will be removed, and the agency will instead publish the lists of current FEPAs on its public website.

DATES: This rule is effective as of July 16, 2026.

FOR FURTHER INFORMATION CONTACT: Kimberly Essary, Associate Legal Counsel, Office of Legal Counsel, U.S. Equal Employment Opportunity Commission at (202) 921–3152 or *kimberly.essary@eeoc.gov*. Requests for this document in an alternative format should be made to the EEOC's Office of Communications and Legislative Affairs at (202) 921–3191 (voice), 1–800–669–

6820 (TTY), or 1–844–234–5122 (ASL video phone).

SUPPLEMENTARY INFORMATION: Section 706 of title VII of the Civil Rights Act of 1964 recognizes a State or a political subdivision of a State that has a State or local law prohibiting unlawful employment discrimination, and that authorizes a State or local authority to grant or seek relief from such unlawful practice or to institute criminal proceedings with respect to the practice. The Commission's procedural regulations at 29 CFR part 1601, subpart G set forth the criteria for formal designation of such State or local authorities as ''FEP agencies.'' The procedural regulations at subsections 1601.74 and 1601.80 include lists of the FEP agencies recognized by the Commission.

To more efficiently and effectively provide the public with access to a listing of current FEP agencies, the EEOC is removing the lists of FEP agencies currently found in subpart G of its procedural regulations and instead will publish these lists on its public website at *https://www.eeoc.gov/fair-employment-practices-agencies-fepas-and-dual-filing*. The lists will be updated at least annually.

This final rule also includes a small clarifying change to the text of subsection 1601.70(d), which makes reference to a State FEP agency, a local FEP agency, or ''both.'' A revision is made to account for circumstances where there may be more than one local agency in a State in addition to a State agency.

Under 5 U.S.C. 553(b)(B), a rulemaking can be exempt from prior notice and comment if the agency finds good cause ''that notice and public procedure thereon are impractical, unnecessary, or contrary to the public interest.'' The absence of this rule, or significant delay in its promulgation, is unnecessary and would delay informing the public in the most accessible way of current information, thus making it contrary to the public interest. Listing the FEP agencies on the EEOC's public website, which is visited regularly by charging parties, respondents, stakeholders, and the public, is the easiest and quickest way to disseminate this information to the public. This method allows the EEOC to more easily keep the lists up to date, and to ensure that the public has the most accurate information possible regarding what State and local entities are FEP agencies. It additionally saves taxpayer money otherwise spent on publication in the **Federal Register** simply to update the lists of FEP agencies, when that information can be provided more quickly, in a more accessible format, in a location that is more likely to be consulted by the public.

Because the EEOC is merely changing the location where the lists are published—an administrative rather than substantive change—there is ''good cause'' under 5 U.S.C. 553(b)(B) for this final rule to become effective without prior notice and comment. The change to subsection 1601.70 is likewise not a substantive change, as it has no impact on FEP agency procedures, but more clearly describes the existing procedures where a State houses multiple local FEP agencies. For the same reasons, there is good cause to provide for an immediate effective date. See 5 U.S.C. 553(d)(3).

Regulatory Procedures

Executive Order 12866

The Commission has complied with the principles in section 1(b) of Executive Order 12866, Regulatory Planning and Review. This rule is not a ''significant regulatory action'' under section 3(f) of the Executive Order and does not require an assessment of potential costs and benefits under section 6(a)(3)(B)(ii) of the Executive Order.

Paperwork Reduction Act

This final rule contains no new information collection requirements subject to review by the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601–612) only requires a regulatory flexibility analysis when the APA requires notice and comment procedures, or the agency otherwise issues such a notice. As stated above, notice and comment procedures are neither required nor being used for this rule. Accordingly, the Regulatory Flexibility Act does not apply.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1501 *et seq.*

Congressional Review Act

This regulation does not substantially affect the rights or obligations of non-agency parties and, accordingly, is not a ''rule'' as that term is used by the Congressional Review Act (Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996). Therefore, the reporting requirement of 5 U.S.C. 801 does not apply.

List of Subjects in 29 CFR Part 1601

Administrative practice and procedure, Equal employment opportunity.

Accordingly, for the reasons set forth in the preamble, the Equal Employment Opportunity Commission amends 29 CFR part 1601 as follows:

PART 1601–PROCEDURAL REGULATIONS

■ 1. The authority citation for part 1601 continues to read as follows:

Authority: 42 U.S.C. 2000e to 2000e–17; 42 U.S.C. 12111 to 12117; 42 U.S.C. 2000ff to 2000ff–11; 42 U.S.C. 2000gg to 2000gg–6; 28 U.S.C. 2461 note, as amended; Pub. L. 104–134, Sec. 31001(s)(1), 110 Stat. 1373.

§ 1601.70 [Amended]

■ 2. In § 1601.70, amend paragraph (d) by adding the words ''the State and local agencies'' after the word ''both'' in the second sentence.

■ 3. Amend § 1601.71 by revising paragraph (a) to read as follows:

§ 1601.71 FEP agency notification.

(a) When the Commission determines that an agency or authority meets the criteria outlined in section 706(c) of title VII and § 1601.70, the Commission shall so notify the agency by letter and shall notify the public by publication of an updated list of FEP agencies on the Commission's public website, *https://www.eeoc.gov/fair-employment-practices-agencies-fepas-and-dual-filing*.

* * * * *

§ 1601.74 [Removed and Reserved]

■ 4. Remove and reserve § 1601.74.

■ 5. Amend § 1601.75 by revising paragraph (c) to read as follows:

§ 1601.75 Certification of designated FEP agencies.

* * * * *

(c) Upon Commission approval of a designated FEP agency for certification, it shall notify the agency of its certification and shall effect such certification by publication of an updated list of FEP agencies on the Commission's public website at *https://www.eeoc.gov/fair-employment-practices-agencies-fepas-and-dual-filing*.

■ 6. Amend § 1601.79 by revising the last sentence to read as follows:

§ 1601.79 Revocation of certification.

* * * The revocation shall be effected by publication of an updated list of FEP agencies on the Commission's public website at *https://www.eeoc.gov/fair-employment-practices-agencies-fepas-and-dual-filing*.

§ 1601.80 [Removed and Reserved]

■ 7. Remove and reserve § 1601.80.

For the Commission,

Dated: July 10, 2026.

Andrea R. Lucas,

Chair.

BILLING CODE 6570–01–P

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 310

[Docket ID: DoD–2024–OS–0112]

RIN 0790–AL45

Privacy Act of 1974; Implementation

AGENCY: Office of the Secretary of Defense (OSD), Department of Defense (DoD).

ACTION: Final rule.

SUMMARY: The Department of Defense (Department or DoD) is issuing a final rule to amend its regulations to exempt portions of DoD–0024, ''Catch a Serial Offender (CATCH) Program Records,'' system of records from certain provisions of the Privacy Act of 1974. Specifically, the rule exempts portions of the CATCH Program Records from certain provisions of the Privacy Act to avoid interference during the conduct of criminal, civil, or administrative actions or investigations and to protect the identity of confidential sources pertaining to adult sexual assault allegations.

DATES: This rule is effective on August 17, 2026.

FOR FURTHER INFORMATION CONTACT: Ms. Rahwa Keleta, Chief, Privacy and Civil Liberties Division, Oversight and Compliance Directorate, 4800 Mark Center Drive, Attn: Mailbox #24, Suite 05F16, Alexandria, VA 22350–1700, *osd.mc-alex.odam.mbx.pcld-sorn@mail.mil*; (703) 571–0070.

SUPPLEMENTARY INFORMATION:

Discussion of Comments and Changes

The proposed rule was published in the **Federal Register** (89 FR 85892–85895) on October 29, 2024. Comments were accepted until December 30, 2024. The Department received five public comments. Commenters were generally supportive of the rule and the program; two commenters raised questions and concerns regarding the implementation of the CATCH Program Records system, including victim eligibility, the assurance of accurate records, and the selection of Privacy Act exemptions.

With respect to victim eligibility, eligibility criteria are established by sexual assault prevention and response policy rather than this Privacy Act rulemaking. Regarding the assurance of the accuracy of information, the CATCH Program Records system records information voluntarily submitted by victims. Because the system is intended to generate investigative leads rather than serve as an evidentiary database, determinations of accuracy and credibility are made through established investigative and adjudicative processes.

Concerning Privacy Act exemptions, DoD notes that the exemptions are consistent with the Privacy Act of 1974 and are necessary to preserve the integrity of the system by preventing subjects of reports from accessing or altering information in ways that could compromise ongoing investigative efforts.

After careful consideration of all comments, DoD has determined that the existing eligibility criteria, safeguards, and exemptions adequately address the concerns raised. Accordingly, no changes to the final rule text are required.

This final rule adds to the DoD's Privacy Act exemptions for Department-wide systems of records found in 32 CFR 310.13(e)(16). *Note:* When the proposed rule was published, the intended location of the exemption rule was 32 CFR 310.13(e)(15); because an exemption rule for a different SORN has since been added to that location, this final rule will now be codified at 32 CFR 310.13(e)(16).

I. Background

In finalizing this rule, DoD exempts portions of this system of records titled, ''CATCH a Serial Offender Program Records,'' DoD–0024 from certain provisions of the Privacy Act. This system of records covers DoD's maintenance of records used to collect and compare sexual assault reports for the purpose of identifying alleged serial sexual assault offenders. These records will consist of information voluntarily submitted into the CATCH system by eligible victims who elect to participate in the CATCH program and provide information about an alleged adult sexual assault incident, without identifying such victims, through established CATCH processes.

II. Privacy Act Exemption

The Privacy Act allows Federal agencies to exempt eligible records in a system of records from certain provisions of the Act, including those that provide individuals with a right to request access to and amendment of their own records. If an agency intends to exempt a particular system of records, it must first go through the rulemaking process pursuant to 5 U.S.C. 553(b)(1)–(3), (c), and (e). The DoD is amending 32 CFR part 310 to add a new Privacy Act exemption rule for the DoD–0024, CATCH a Serial Offender Program Records, system of records. The DoD is adding an exemption for this system of records pursuant to 5 U.S.C. 552a(j)(2) to prevent the harms articulated in this rule from occurring. The DoD is claiming an exemption from several provisions of the Privacy Act, including various access, amendment, disclosure of accounting, and certain recordkeeping and notice requirements, to avoid, among other harms, frustrating the underlying purposes for which the information was gathered.

III. Regulatory Analysis

Executive Order 12866, ''Regulatory Planning and Review,'' and Executive Order 13563, ''Improving Regulation and Regulatory Review''

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. It has been determined that this rulemaking is not a significant regulatory action.

Executive Order 14192, ''Unleashing Prosperity Through Deregulation''

This rule is not subject to Executive Order 14192, because this rule is not a significant regulatory action under Executive Order 12866.

Congressional Review Act (5 U.S.C. 804(2))

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the

Congress and to the Comptroller General of the United States. DoD will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States. A major rule may take effect no earlier than 60 calendar days after Congress receives the rule report or the rule is published in the **Federal Register**, whichever is later. This rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Section 202, Public Law 104–4, ''Unfunded Mandates Reform Act''

Section 202(a) of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1532(a)) requires agencies to assess anticipated costs and benefits before issuing any rule whose mandates may result in the expenditure by State, local and Tribal governments in the aggregate, or by the private sector, in any one year of $100 million in 1995 dollars, updated annually for inflation. This rulemaking will not mandate any requirements for State, local, or Tribal governments, nor will it affect private sector costs.

Public Law 96–354, ''Regulatory Flexibility Act'' (5 U.S.C. 601 et seq.)

The Director of Administration and Management has certified that this rulemaking is not subject to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) because it would not, if promulgated, have a significant economic impact on a substantial number of small entities. This rulemaking is concerned only with the administration of Privacy Act systems of records within the DoD. Therefore, the Regulatory Flexibility Act, as amended, does not require DoD to prepare a regulatory flexibility analysis.

Public Law 96–511, ''Paperwork Reduction Act'' (44 U.S.C. 3501 et seq.)

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) was enacted to minimize the paperwork burden for individuals; small businesses; educational and nonprofit institutions; Federal contractors; State, local and Tribal governments; and other persons resulting from the collection of information by or for the Federal Government. The Act requires agencies obtain approval from the Office of Management and Budget before using identical questions to collect information from ten or more persons. This rulemaking does not impose reporting or recordkeeping requirements on the public.

Executive Order 13132, ''Federalism''

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a final rule that has federalism implications, imposes substantial direct requirement costs on State and local governments, and is not required by statute, or has federalism implications and preempts State law. This final rule will not have a substantial effect on State and local governments.

Executive Order 13175, ''Consultation and Coordination With Indian Tribal Governments''

Executive Order 13175 establishes certain requirements that an agency must meet when it promulgates a final rule that imposes substantial direct compliance costs on one or more Indian tribes, preempts Tribal law, or affects the distribution of power and responsibilities between the Federal Government and Indian tribes. This final rule will not have a substantial effect on Indian Tribal governments.

List of Subjects in 32 CFR Part 310

Privacy.

Accordingly, 32 CFR part 310 is amended as follows:

PART 310—PROTECTION OF PRIVACY AND ACCESS TO AND AMENDMENT OF INDIVIDUAL RECORDS UNDER THE PRIVACY ACT OF 1974

■ 1. The authority citation for 32 CFR part 310 continues to read as follows:

Authority: 5 U.S.C. 552a.

■ 2. Amend § 310.13 by adding paragraph (e)(16) to read as follows:

§ 310.13 Exemptions for DoD-wide systems.

* * * * *

(e) * * *

(16) *System identifier and name.* DoD–0024, ''CATCH a Serial Offender Program Records.''

(i) *Exemptions.* This system of records is exempt from 5 U.S.C. 552a (c)(3) and (4); (d)(1), (2), (3), and (4); (e)(1); (e)(2); (e)(3); (e)(4)(G), (H), and (I); (e)(5); (e)(8); (f) and (g).

(ii) *Authority.* 5 U.S.C. 552a (j)(2).

(iii) *Exemption from the particular subsections.* Exemption from the particular subsections is justified pursuant to 5 U.S.C. 552a(j)(2) for the following reasons:

(A) *Subsection (c)(3), (d)(1), and (d)(2).* Records in this system of records may contain investigatory material compiled for criminal law enforcement purposes to include information identifying criminal offenders and alleged offenders, information compiled for the purpose of criminal investigation, or reports compiled during criminal law enforcement proceedings. Application of exemption (j)(2) may be necessary as access to, amendment of, or release of the accounting of disclosures of such records could inform a record subject of an investigation of the existence, nature, or scope of an actual or potential law enforcement or disciplinary investigation, and thereby seriously impede law enforcement or prosecutorial efforts by permitting the record subject and other persons to whom he might disclose the records to avoid criminal penalties or disciplinary measures; access to, amendment of, or release of the accounting of disclosures could also reveal confidential sources who might not have otherwise come forward to assist in an investigation and thereby hinder DoD's ability to obtain information from future confidential sources and result in an unwarranted invasion of the privacy of others.

(B) *Subsection (c)(4), (d)(3) and (4).* These subsections are inapplicable to the extent that an exemption is being claimed from subsections (d)(1) and (2).

(C) *Subsection (e)(1).* In the collection of information for investigatory or law enforcement purposes, it is not always possible to conclusively determine the relevance and necessity of particular information in the early stages of the investigation or adjudication. In some instances, it will be only after the collected information is evaluated in light of other information that its relevance and necessity for effective investigation and adjudication can be assessed. Collection of such information permits more informed decision-making by the Department when making required disciplinary and prosecutorial determinations.

(D) *Subsection (e)(2).* To collect information from the subject individual could serve notice that he or she is the subject of a criminal investigation and thereby present a serious impediment to such investigations. Collection of information only from the individual accused of criminal activity or misconduct could also subvert discovery of relevant evidence and subvert the course of justice. Accordingly, application of exemption (j)(2) may be necessary.

(E) *Subsection (e)(3).* To inform individuals as required by this subsection could reveal the existence of a criminal investigation and compromise investigative efforts. Accordingly, application of exemption (j)(2) may be necessary.

(F) *Subsection (e)(4)(G) and (H).* These subsections are inapplicable to the extent exemption is claimed from subsections (d)(1) and (2).

(G) *Subsection (e)(4)(I).* To the extent that this provision is construed to require more detailed disclosure about record sources than the broad, generic information currently published in the system notice, an exemption from this provision is necessary to protect the confidentiality of sources of information and to protect privacy and physical safety of witnesses and informants. Accordingly, application of exemption (j)(2) may be necessary.

(H) *Subsection (e)(5).* It is often impossible to determine in advance if investigatory records contained in this system are accurate, relevant, timely and complete, but, in the interests of effective law enforcement, it is necessary to retain this information to maintain an accurate record of the investigatory activity to preserve the integrity of the investigation and satisfy various Constitutional and evidentiary requirements, such as mandatory disclosure of potentially exculpatory information in the investigative file to a defendant. It is also necessary to retain this information to aid in establishing patterns of activity and provide investigative leads. With the passage of time, seemingly irrelevant or untimely information may acquire new significance as further investigation brings new details to light and the accuracy of such information can only be determined through judicial processes. Accordingly, application of exemption (j)(2) may be necessary.

(I) *Subsection (e)(8).* To serve notice could give persons sufficient warning to evade investigative efforts. Accordingly, application of exemption (j)(2) may be necessary.

(J) *Subsection (f).* To the extent that portions of the system are exempt from the provisions of the Privacy Act concerning individual access and amendment of records, DoD is not required to establish rules concerning procedures and requirements relating to such provisions. Accordingly, application of exemptions (j)(2) may be necessary.

(K) *Subsection (g).* This subsection is inapplicable to the extent that the system is exempt from other specific subsections of the Privacy Act to which the civil remedies provisions pertain.

(iv) *Exempt records from other systems.* In the course of carrying out the overall purpose for this system, exempt records from other systems of records may in turn become part of the records maintained in this system. To the extent that copies of exempt records from those other systems of records are maintained in this system, the DoD claims the same exemptions for the records from those other systems that are entered into this system, as claimed for the prior system(s) of which they are a part, provided the reason for the exemption remains valid and necessary.

Dated: July 14, 2026.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001–FR–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2026–0424]

Special Local Regulations; Marine Events Within the Southwest District

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce special local regulations for the Dutch Shoe Regatta on July 17, 2026, to provide for the safety of life on navigable waterways during this event. Our regulation for marine events within Coast Guard Southwest District identifies the regulated area for this event in San Diego, CA. During the enforcement periods, the operator of any vessel in the regulated area must comply with directions from the Patrol Commander or any Official Patrol displaying a Coast Guard ensign.

DATES: The regulations in 33 CFR 100.1101, Table 1 to § 100.1101, Item No. 4, will be enforced from 8 a.m. to 7 p.m. on July 17, 2026.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of enforcement, email Lieutenant Shelley Turner, Waterways Management, U.S. Coast Guard Sector San Diego, CA; telephone (619) 278–7033, email *D11MarineEventsSD@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce special local regulations in 33 CFR 100.1101 for the Dutch Shoe Regatta regulated area from 8 a.m. to 7 p.m. on July 17, 2026. This action is being taken to provide for the safety of life on navigable waterways during this event. Our regulation for Southern California Annual Marine Events for the San Diego Captain of the Port Zone, § 100.1101, line 4, specifies the location of the regulated area for the Dutch Shoe Regatta which encompasses portions of the San Diego Bay. During the enforcement periods, as reflected in § 100.1101(b), if you are the operator of a vessel in the regulated area you must comply with directions from the Patrol Commander or any Official Patrol displaying a Coast Guard ensign.

In addition to this notification of enforcement in the **Federal Register**, the Coast Guard plans to provide notification of this enforcement period via the Local Notice to Mariners and marine information broadcasts.

R.C. Tucker,

Captain, U.S. Coast Guard, Captain of the Port San Diego.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2026–0942]

Special Local Regulations; Marine Events in the Coast Guard Sector Detroit Captain of the Port Zone

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce the special local regulation (SLR) for the annual St. Clair River Classic Power Boat Race. This action is necessary to safely control vessel movements in the vicinity of the race and provide for the safety of the general boating public. During the enforcement period, the operator of any vessel in the regulated areas must comply with directions from the Patrol Commander or any Official Patrol displaying a Coast Guard ensign.

DATES: The regulations in 33 CFR 100.911, Table 1, Event 7, will be in effect from 11 a.m. on July 25, 2026, until 7 p.m. on July 26, 2026. This regulation will be enforced from 11 a.m. through 5 p.m. on July 25, 2026, and from 10 a.m. through 7 p.m. on July 26, 2026.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of enforcement, call or email Tracy Girard, Prevention Department, U.S. Coast Guard; telephone (313) 347–3007, email *Tracy.M.Girard@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the special local

regulation in 33 CFR 100.911, Table 1, Event 7, for the St. Clair River Classic Power Boat Race from 11 a.m. through 7 p.m. on July 25, 2026, and from 10 a.m. through 7 p.m. on July 26, 2026. This action is being taken to provide for safe control of vessel movements in the vicinity of the race and provide for the safety of the general boating public. Our regulation in § 100.911, Table 1, Event 7, specifies the location of the regulated area for the St. Clair River Classic Power Boat Race. During the enforcement period, no vessel may enter the regulated area without prior approval from the Coast Guard's designated Patrol Commander (PATCOM). The PATCOM may restrict vessel operation within the regulated area to vessels having particular operating characteristics. Vessels desiring to transit the regulated area may do so only with prior approval of the PATCOM and when so directed by that officer. The PATCOM may be contacted on Channel 16 (156.8 MHZ) by the call sign ''Coast Guard Patrol Commander.'' Vessels permitted to transit the regulated area will operate at no wake speed and in a manner which will not endanger participants in the event or any other craft.

In addition to this notification of enforcement in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification of this enforcement period via Broadcast Notice to Mariners or Local Notice to Mariners. If the Captain of the Port determines that any of these special local regulations need not be enforced for the full duration stated in this document, he or she may suspend such enforcement and notify the public of the suspension via Broadcast Notice to Mariners.

Caren C. Damon,

Captain, U.S. Coast Guard, Captain of the Port Detroit.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R03–OAR–2026–3764; FRL–13384–01–R3]

Air Plan Approval; Pennsylvania; Interim Final Determination To Stay and Defer Sanctions Related to Reasonably Available Control Technology Requirements (RACT) for Volatile Organic Compounds (VOC) Control Technique Guidelines (CTG) Under the 2008 Ozone National Ambient Air Quality Standards (NAAQS)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Interim final determination.

SUMMARY: The Environmental Protection Agency (EPA) is making an interim final determination (IFD) that Pennsylvania has submitted revisions to the state implementation plan (SIP) that satisfy the requirements under the Clean Air Act (CAA) to implement Reasonably Available Control Technology (RACT) for volatile organic compounds (VOC) Control Technique Guidelines (CTG) for the 2008 ozone national ambient air quality standards (NAAQS). The effect of this IFD is to stay emission offset sanctions and defer the imposition of highway funding sanctions triggered by an August 16, 2024 EPA disapproval of a prior Pennsylvania SIP addressing VOC CTG RACT requirements for the 2008 ozone NAAQS. This IFD is consistent with a proposed action, published elsewhere in this issue of the **Federal Register**, in which the EPA is proposing approval of revisions to Pennsylvania's SIP, as submitted on May 10, 2023, January 20, 2026, February 17, 2026 and April 10, 2026 to address VOC CTG RACT requirements for the 2008 and 2015 NAAQS.

DATES: This interim final determination is effective on July 16, 2026. However, comments will be accepted until August 17, 2026.

ADDRESSES: The EPA has established a docket for this action under Docket ID Number EPA–R03–OAR–2026–3764. All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* confidential business information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Sean Silverman, Planning & Implementation Branch (3AD30), Air & Radiation Division, U.S. Environmental Protection Agency, Region III, 1600 John F Kennedy Boulevard, Philadelphia, Pennsylvania 19103. The telephone number is (215) 814–5511. Mr. Silverman can also be reached via electronic mail at *silverman.sean@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On August 16, 2024, the EPA took final action to disapprove portions of the Pennsylvania SIP revisions submitted on August 13, 2018 that, among other things, certified the Commonwealth had satisfied its VOC CTG RACT obligations for the 2008 ozone NAAQS.[1] The EPA's August 16, 2024 final disapproval (August 2024 disapproval) started a sanctions clock under CAA section 179 and 40 CFR 52.31. The two-to-one new source emissions offset sanctions took effect on March 16, 2026 (18 months following the September 16, 2024 effective date of the August 2024 disapproval), while highway funding sanctions will take effect on September 16, 2026, unless the State submits, and the EPA approves, SIP revisions that correct the deficiencies identified in the August 2024 disapproval.

On May 10, 2023, January 20, 2026, February 17, 2026 and April 10, 2026, PADEP submitted SIP revisions to address the deficiencies identified in the August 2024 disapproval. In the Proposed Rules section in this issue of the **Federal Register**, the EPA is concurrently proposing to approve these SIP revisions. There, the EPA proposes to find that Pennsylvania's current SIP-approved regulations, newly submitted regulations for certain CTG categories, and incorporated limits from permits for four facilities meet the Commonwealth's VOC CTG RACT Requirements for the 2008 and 2015 ozone NAAQS. The proposed determination is based on the EPA's analysis of Pennsylvania's SIP revisions, including supplemental technical support provided by the EPA. Accordingly, the EPA is proposing that these SIP revisions address the deficiencies identified in the EPA's August 2024 disapproval with respect to 2008 ozone VOC CTG RACT

[1] *See* 89 FR 66599.

requirements, which started the sanctions clock for offset and highway sanctions in Pennsylvania.

II. What action is the EPA taking?

The EPA is making an IFD to stay the application of the offset sanctions and defer the application of the highway sanctions associated with the EPA's August 2024 disapproval of certain VOC CTG RACT requirements for the 2008 ozone NAAQS for Pennsylvania. This determination is based on the EPA's concurrent proposal (referenced above) to approve the Pennsylvania SIP revisions regarding VOC CTG RACT for the 2008 (and 2015) ozone NAAQS, which resolve the deficiencies that triggered sanctions under section 179 of the CAA.

Based on the EPA's proposed approval that determines that the aforementioned Pennsylvania VOC CTG RACT SIP revisions address the deficiencies identified in the August 2024 disapproval and are likely approvable, relief from sanctions should be provided as quickly as possible. This interim final determination is consistent with the requirements of the Administrative Procedure Act (APA) [2] for Federal agency rulemaking. Generally, under the APA, agency rulemaking affecting the rights of individuals must comply with certain minimum procedural requirements, including publishing a notice of proposed rulemaking in the **Federal Register** and providing an opportunity for the public to submit written comments on the proposal, before the rulemaking can have final effect. The EPA will not be providing an opportunity for public comment before those deferrals or stays are effective. However, the EPA will provide an opportunity to comment on the proposed approval that is the basis for this IFD and will provide an opportunity, after the fact, for the public to comment on the IFD. Thus, an opportunity for comment will be provided before any sanctions clock is permanently stopped or any already applied sanctions are permanently lifted. In the context of the proposed approval, and with respect to the interim final rule, the public would have an opportunity to comment on the appropriateness of the EPA's interim final determination that the State had corrected the deficiencies and on whether the State should remain subject to sanctions, even though the deferral or stay is already effective.

Section 553(b)(4)(B) of the APA provides that the notice and opportunity for comment requirements do not apply when the Agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' In this instance, the EPA believes it would be both impracticable and contrary to the public interest to have to propose and provide an opportunity to comment before any relief is provided from the effect of sanctions. The EPA has reviewed Pennsylvania's SIP submissions addressing the August 2024 disapproval and, through its proposed action, is indicating that it is more likely than not that the SIP submissions correct the deficiencies that were the basis for the disapproval action that started the sanctions clock. Therefore, it is not in the public interest to apply sanctions. The EPA believes that it is necessary to use the interim final rulemaking process to stay the application of the offset sanctions and defer the application of the highway funding sanctions while we complete our rulemaking process on the approvability of Pennsylvania's SIP revisions intended to address the VOC CTG RACT requirements for the 2008 (and 2015) ozone NAAQS.

Consistent with 5 U.S.C. 553(d)(1) of the APA, the EPA finds there is good cause for this action to become effective immediately upon publication. Section 553(d)(1) of the APA provides that final rules shall not become effective until 30 days after publication in the **Federal Register** ''except . . . a substantive rule which grants or recognizes an exemption or relieves a restriction.'' The purpose of this provision is to ''give affected parties a reasonable time to adjust their behavior before the final rule takes effect.'' *Omnipoint Corp.*v. *Fed. Commc'n Comm'n,* 78 F.3d 620, 630 (D.C. Cir. 1996); see also United States v. Gavrilovic, 551 F.2d 1099, 1104 (8th Cir. 1977) (quoting legislative history). However, when the agency grants or recognizes an exemption or relieves a restriction, affected parties do not need a reasonable time to adjust because the effect is not adverse. Because this rule relieves a restriction, the EPA finds good cause under 5 U.S.C. 553(d)(1) for this action to become effective on the date of publication of this action.

As noted in this document, in the Proposed Rules section in this issue of the **Federal Register**, the EPA has proposed to find that Pennsylvania's SIP Revisions submitted on May 10, 2023, January 20, 2026, February 17, 2026 and April 10, 2026 address the deficiencies identified by the EPA in its August 2024 disapproval. In accordance with 40 CFR 52.31(d)(2)(ii), when a State has submitted a revised plan to correct the deficiency, and the EPA proposes to approve the plan and issues an IFD that the revised plan corrects the deficiency after 18 months but before 24 months from the beginning of the sanctions clock, application of the new source emission offset sanction shall be stayed and application of the highway sanction shall be deferred. However, if issues are raised during the public comment period of the proposed plan approval which cannot be addressed and the revised plan is ultimately disapproved, the new source offset sanction shall reapply immediately and the highway sanction shall apply immediately on the date of the final disapproval if that date is more than six months after the date the offset sanctions became effective. In Pennsylvania, the offset sanction was imposed on March 16, 2026, and the highway sanction, if not deferred, would be imposed on September 16, 2026.

III. Statutory and Executive Order Reviews

A. General Requirements

This action defers sanctions and imposes no additional requirements. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Is not an Executive Order 14192 (90 FR 9065, February 6, 2025) regulatory action because this action is not significant under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement

[2] 5 U.S.C. 551 *et seq.*

Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act

This action does not have Tribal implications, as specified in Executive Order 13175. This action stays and defers application of sanctions and imposes no new requirements. In addition, this action does not apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a tribe has jurisdiction, and will not impose substantial direct costs on Tribal governments or preempt Tribal law. Thus, Executive Order 13175 does not apply to this action.

This action is subject to the Congressional Review Act, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 14, 2026. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

[EPA–R09–OAR–2025–0056; FRL–12601–03–R9]

Air Plan Revisions; California; Antelope Valley Air Quality Management District; New Source Review; Stationary Source Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing an approval of seven permitting rules as a revision to the Antelope Valley Air Quality Management District (AVAQMD or ''District'') portion of the California State Implementation Plan (SIP). These revisions concern the District's New Source Review (NSR) permitting program for new and modified sources of air pollution under part D of title I of the Clean Air Act (CAA or ''Act''). The revised rules address deficiencies identified in a previous limited disapproval action, correct a newly identified deficiency for one permitting rule, and incorporate other revisions related to NSR requirements. This action updates the District's portion of the California SIP with the revised rules.

DATES: This rule is effective August 17, 2026.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2025–0056. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *https://www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information. If you need assistance in a language other than English or if you are a person with a disability who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

I. Proposed Action

On March 26, 2025 (90 FR 13719), the EPA proposed approval of six rules and a limited approval and limited disapproval of one rule that were submitted for incorporation into the California SIP.

The EPA had finalized this action on July 3, 2023 (88 FR 42621). Table 1 of this preamble lists the rules in the current SIP with the dates they were adopted or amended by the AVAQMD, submitted by the California Air Resources Board (CARB), the governor's designee for California SIP submittals, and approved by the EPA.

TABLE 1—CURRENT SIP RULES

District rule number	Title/subject	State effective date	Epa approval date
1300	New Source Review General	7/20/2021	7/3/2023 (88 FR 42621)
1301	New Source Review Definitions	7/20/2021	7/3/2023 (88 FR 42621)
1302 (except 1302(C)(5) and1302(C)(7)(c))	New Source Review Procedure	7/20/2021	7/3/2023 (88 FR 42621)
1303	New Source Review Requirements	7/20/2021	7/3/2023 (88 FR 42621)
1304	New Source Review Emissions Calculations	7/20/2021	7/3/2023 (88 FR 42621)
1305	New Source Review Emissions Offsets	7/20/2021	7/3/2023 (88 FR 42621)

TABLE 1—CURRENT SIP RULES—Continued

District rule number	Title/subject	State effective date	Epa approval date
1306	New Source Review for Electric Energy Generating Facilities.	7/20/2021	7/3/2023 (88 FR 42621)
1309	Emission Reduction Credit Banking	7/20/2021	7/3/2023 (88 FR 42621)

CARB submitted the rules that are listed in table 2 of this preamble to replace the EPA-approved rules currently in the SIP as listed in table 1 of this preamble. CARB also intended the submitted rules to: satisfy the minor NSR and nonattainment NSR (NNSR) requirements of section 110(a)(2)(C) and part D of title I of the Act; satisfy the EPA's implementing regulations at title 40 of the Code of Federal Regulations (CFR) part 51; and resolve deficiencies identified in our July 3, 2023 final NSR action (''2023 NSR Action'') [1] that included a limited disapproval of Rules 1301, 1302, 1303, 1304, 1305, and 1309, as amended on July 20, 2021.

TABLE 2—SUBMITTED RULES

District rule number	Title/subject	Amended or adopted	Amendment or adoption date	Submittal date [a]
1301	New Source Review Definitions	Amended	12/30/2024	1/7/2025
1302 [b] (except 1302(C)(5) and 1302(C)(7)(c)).	New Source Review Procedures	Amended	12/30/2024	1/7/2025
1303	State New Source Review Requirements	Amended	12/30/2024	1/7/2025
1304	State New Source Review Emissions Calculations.	Amended	12/30/2024	1/7/2025
1305	State New Source Review Emissions Offsets.	Amended	12/30/2024	1/7/2025
1309	Emission Reduction Credit Banking	Amended	12/30/2024	1/7/2025
1314	Federal Nonattainment New Source Review for Ozone Precursors.	Adopted (New Rule)	7/15/2025 [c]	10/1/2025 [c]

[a] The submittal for Rules 1301, 1302, 1303, 1304, 1305, 1309, and 1314 was transmitted to the EPA via a letter from CARB dated January 6, 2025. We note that no revisions were submitted for Rules 1300 and 1306, therefore, they will not be replaced.
[b] Subsections 1302(C)(5)(d) and 1302(C)(7)(c)(iii) of Rule 1302 specifically state that subsections 1302(C)(5) and 1302(C)(7)(c) are not submitted to the EPA and are not intended to be included as part of the California SIP.
[c] As we explain in this rule and in our March 23, 2026 proposed rulemaking (91 FR 13797), CARB submitted an amended version of Rule 1314 for inclusion in the SIP.

In our March 26, 2025 (90 FR 13719) proposed action, we proposed approval of CARB's January 7, 2025 submittal of Rules 1301, 1302, 1303, 1304, 1305, and 1309 as authorized under section 110(k)(3) of the Act. We determined that these submitted rules satisfy the statutory and regulatory requirements in part D of the Act (including sections 172, 173, 182(c)(6), and 182(d)), and in the relevant provisions of sections 110(a)(2) and 302(z) of the Act, as well as 40 CFR 51.160 through 51.165, and 51.307, and they address the deficiencies previously identified by the EPA.[2] On the same day, we also made an interim final determination (IFD) (90 FR 13702, March 26, 2025) that the submittal from CARB corrected the SIP deficiencies we identified in the 2023 NSR Action, allowing us to stay the application of the offset sanction and to defer the application of the highway sanction resulting from that action.

In our March 26, 2025 (90 FR 13719) proposed action, we also proposed a limited approval and limited disapproval of Rule 1314 as authorized in sections 110(k)(3) and 301(a) of the Act,[3] because although the version of AVAQMD Rule 1314 that CARB submitted on January 7, 2025, fulfilled most of the relevant CAA requirements and strengthened the SIP, it did not include the reasonable possibility requirements in 40 CFR 51.165(a)(6) and (7). We determined that this was a deficiency that the AVAQMD could resolve by including the requirements in 40 CFR 51.165(a)(6) and (7) in Rule 1314.

Following the EPA's March 26, 2025 (90 FR 13719) proposed limited approval and limited disapproval of Rule 1314, on October 16, 2025, CARB submitted to the EPA an amended Rule 1314 (hereafter referred to as the ''October 2025 submittal'').[4] Locally amended Rule 1314 supersedes the version of Rule 1314 that CARB submitted to the EPA on January 7, 2025. In our March 23, 2026 proposal, we proposed approval of Rule 1314 as submitted in the October 2025 submittal as authorized in section 110(k)(3) of the Act. We simultaneously withdrew our proposed limited approval and limited disapproval of Rule 1314 from the March 2025 Proposed Action (91 FR 13797, March 23, 2026).

II. Public Comments and EPA Responses

The EPA's March 26, 2025 (90 FR 13719), and March 23, 2026 proposed actions each provided a 30-day public comment period, as did the March 26, 2025 (90 FR 13702) IFD. The public

[1] 88 FR 42621.

[2] 88 FR 42621 (July 3, 2023), and 90 FR 13719 (March 26, 2025). The EPA's proposal and technical support document (TSD), which can be found in the docket for this action, contain a more detailed discussion of the District's submitted rules that form the basis for our proposed action.

[3] CAA sections 110(k)(3) and 301(a) authorize the EPA to issue a limited approval and limited disapproval action that will strengthen the SIP and require the State to correct a deficient provision.

[4] The AVAQMD locally amended Rule 1314 on July 15, 2025. Documentation of AVAQMD's adoption of amendments is included in the docket for this action.

comment periods for the March 26, 2025 (90 FR 13719) proposed action and IFD began on the date of their publication in the **Federal Register** and closed on April 25, 2025. During this period, the EPA received one comment letter from an anonymous commenter concerning the IFD (Comment 1). The public comment period for the March 23, 2026 proposed action began on March 23, 2026, its date of publication in the **Federal Register**, and closed on April 22, 2026. During this period, the EPA received one comment letter from an anonymous commenter (Comment 2).

Comment 1: The commenter expressed concern with the EPA's use of an interim final rule to delay sanctions before giving the public any chance to provide input or react. The commenter wrote that clean air is a human right, which is something that should not be taken lightly because it affects everybody and delaying action without public input seems unstable. The commenter also questioned AVAQMD Rule 1314's limited approval, stating that the limited approval begs the question of whether or not the alterations are enough to meet Federal standards. The commenter wrote that if the issues from 2023 are not fully addressed, pausing sanctions would be the wrong decision. The commenter concluded by encouraging the EPA to follow through with a more transparent and just final review that includes meaningful public feedback and a readiness to reinstate sanctions if the rules fall short during final review.

Response to Comment 1: EPA acted consistently with notice and comment requirements in publishing the March 26, 2025 (90 FR 13719), IFD, which stayed and deferred offset and highway sanctions, respectively, in the AVAQMD. As we explained in section II, ''EPA Evaluation and Action'' of the IFD, we preliminarily determined that the State corrected the deficiencies we identified in the 2023 NSR Action and relief from sanctions should be provided as quickly as possible.[5] In delaying sanctions, the IFD invoked the Administrative Procedure Act good cause exception, which allows Federal agencies to bypass standard notice-and-comment procedures under certain circumstances including bypassing public notice and comment before an action takes effect. However, the IFD stated that we were providing the public with an opportunity to comment on the EPA's determination after the effective date of the March 26, 2025 IFD. The IFD also stated that we would consider any comments received in deciding the appropriateness of such determination. As discussed in the IFD, the IFD itself stayed the offset sanction and deferred the highway sanction.[6] It did not terminate those sanctions—the sanctions would not be terminated until the effective date of a final full approval.[7]

As we explained in the IFD, we believe that notice-and-comment rulemaking before the effective date of that action was impracticable and contrary to the public interest.[8] When we proposed action on March 26, 2025, we had reviewed the State's submittal and found that it was more likely than not that the State had corrected the deficiencies that were the basis for the limited disapproval in the 2023 NSR Action that started the sanctions clocks.[9] Therefore, we stated that it was not in the public interest to apply sanctions.[10] We did not receive any comments from the public to change our understanding that the submitted rules satisfy CAA requirements and resolve the deficiencies we identified in the 2023 NSR Action.

The commenter's statement that they ''question Rule 1314's limited approval which begs the question if the alterations are enough to meet Federal standards'' may be based on the commenter's misunderstanding of the substance of the rulemaking, which the EPA can clarify here. In the March 26, 2025 rulemaking, the EPA proposed that the rules CARB submitted as part of the January 7, 2025 submittal package resolved the deficiencies the EPA identified in the 2023 NSR Action. Separately, the EPA identified a deficiency in Rule 1314. The deficiency we identified and explained in the March 26, 2025 rulemaking was unrelated to the deficiencies that were the basis for the disapproval in the 2023 NSR Action. That deficiency would not affect the sanctions clocks associated with the 2023 NSR Action.[11] Thus, there is nothing that changes our understanding that the District's rules satisfy the CAA requirements.

As the EPA explained in our 1994 rulemaking on the sequence of sanctions for findings made pursuant to section 179 of the CAA, we believe that it is consistent with CAA section 179 to treat proposed full approvals following disapprovals as the basis for deferring or staying the application of sanctions, while not permanently stopping the sanctions clock or permanently lifting sanctions.[12] Here, the District fixed all of the deficiencies that the EPA identified in the 2023 NSR Action. The proposed full approval then forms the basis for the EPA to issue an IFD, which the EPA publishes in a separate action in the **Federal Register**, as we did here.[13] As we explained in 1994, we believe this approach is consistent with the requirements of Administrative Procedures Act section 553 because the opportunity for comment is provided before any sanctions clock is permanently stopped, while in the meantime enabling the EPA to pause sanctions that would unnecessarily risk potential disruption in government programs and the marketplace after EPA has determined it is more likely than not that the State has corrected the deficiency.[14]

For the reasons described here, the EPA's position is that the March 26, 2025 IFD provided the public with the opportunity to comment on the stay of the offset sanction and deferral of the highway sanction, which the EPA correctly paused on the basis that the State more likely than not had corrected the deficiencies that were the reason for the sanctions. No comments were submitted that changed our understanding.

Comment 2: The commenter stated that they did not understand the summary of the EPA's proposed action.

Response to Comment 2: The EPA summary was meant to provide an overview of the proposed action and how it will impact the AVAQMD portion of the California SIP.

The comment letters can be found in the docket for this action and are accessible at *www.regulations.gov*.

III. EPA Action

None of the submitted comments change our assessment of the submitted rules as described in our proposed actions. Although we initially proposed a limited approval and limited disapproval of Rule 1314, the District amended Rule 1314 on July 15, 2025. CARB submitted the amended rule to the EPA on October 16, 2025, which superseded the January 1, 2025 submittal of that rule.

As authorized in section 110(k)(3) of the Act, the EPA is fully approving the

[5] 90 FR 13702, 13703 (March 26, 2025).

[6] Id.

[7] Id.

[8] Id.

[9] Id.

[10] Id.

[11] In any event, the District fixed the deficiency we identified in the March 26, 2025 (90 FR 13719) proposed action and CARB submitted the amended rule to supersede the January 7, 2025 submittal. As we explain in section I of this preamble, we proposed to fully approve amended Rule 1314 in our March 23, 2026 proposed action (91 FR 13797).

[12] 59 FR 39832, 39849 (August 4, 1994).

[13] Id.

[14] Id. at 39849–50.

submitted versions of Rules 1301, 1302 (except 1302(C)(5) and 1302(C)(7)(c)), 1303, 1304, 1305, 1309 and 1314 into the California SIP. The December 30, 2024 version of Rules 1301, 1302 (except 1302(C)(5) and 1302(C)(7)(c)), 1303, 1304, 1305, and 1309 will replace the previously approved versions of rules 1301, 1302 (except 1302(C)(5) and 1302(C)(7)(c)), 1303, 1304, 1305, and 1309 in the SIP. New Rule 1314, locally amended on July 15, 2025, will also be incorporated into the SIP.

This approval resolves all deficiencies that formed the basis for our previous limited disapprovals in the 2023 NSR Action of Rules 1301, 1302 (except 1302(C)(5) and 1302(C)(7)(c)), 1303, 1304, 1305, and 1309. As a result of this action, the sanctions that were stayed and deferred in our March 26, 2025 IFD are now terminated, and a Federal implementation plan to resolve the deficiency is no longer required under section 110(c) of the Act.

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference the AVAQMD rules described in table 2 of this preamble. These rules implement the District's NSR permitting program for new and modified sources of air pollution under part D of title I of the CAA. The EPA has made, and will continue to make, these materials available through *https://www.regulations.gov* and in hard copy at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve State choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Is not an Executive Order 14192 (90 FR 9065, February 6, 2025) regulatory action because this action is not significant under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

This action is subject to the Congressional Review Act, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 14, 2026. Filing a petition for reconsideration by the Administrator for this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See CAA section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Administrative practice and procedure, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxide, Volatile organic compounds.

Dated: July 6, 2026.

Michael Martucci,

Acting Regional Administrator, Region 9.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority : 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Amend § 52.220a, paragraph (c), table 5, under the heading ''Regulation XIII—New Source Review'' by:

■ a. Revising the entries for ''1301'', ''1302 (except 1302(C)(5) and 1302(C)(7)(c))'', ''1303'', ''1304'', ''1305'', and ''1309''; and

■ b. Adding an entry for ''1314'' in numerical order.

The revisions and addition read as follows:

§ 52.220a Identification of plan–in part.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 70

[EPA–R07–OAR–2026–1156; FRL–13242–02–R7]

Air Plan Approval; Iowa; Revisions to Iowa Air Quality Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve revisions to the Iowa State Implementation Plan (SIP) and the Operating Permit Program to incorporate recent changes to the Iowa Administrative Code (IAC). The revisions include removal of the Voluntary Operating Permit (VOP) Program language; removal of the Emission Reduction Program language; new and renumbered rules; replacement of duplicative language with references to state statute and federal regulations; updated definitions; consolidation of 14 chapters into 8 chapters; and minor clarifications to language and grammar. The EPA is also finalizing corrections to the erroneous incorporation of several rules into the Iowa SIP pursuant to the Clean Air Act (CAA). These revisions do not decrease the stringency of the SIP or have an adverse effect on air quality. The EPA's final approval of this rule revision is in accordance with the requirements of the CAA.

DATES: This final rule is effective on August 17, 2026.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R07–OAR–2026–1156. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *i.e.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *https://www.regulations.gov* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional information.

FOR FURTHER INFORMATION CONTACT: Allyson Prue, Environmental Protection Agency, Region 7 Office, Air Quality

Planning Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; telephone number: (913) 551–7277; email address *prue.allyson@epa.gov*.

SUPPLEMENTARY INFORMATION:

Throughout this document ''we,'' ''us,'' and ''our'' refer to EPA.

III. The EPA's Response to Comments
IV. What action is the EPA taking?
V. Incorporation by Reference
VI. Statutory and Executive Order Reviews

I. What is being addressed in this document?

The EPA is finalizing approval of revisions to the Iowa SIP and Title V Operating Permit Program received on July 26, 2024. All revisions were completed due to an administrative process required by Executive Order 10 (E.O.–10), issued by the Iowa Governor in January 2023. The revisions are to section 567—Iowa Air Quality Regulations. The EPA is finalizing the following revisions to the SIP-approved chapters:

Chapter 20—SCOPE OF TITLEmndash;DEFINITIONS is rescinded.

Chapter 21—COMPLIANCE is retitled COMPLIANCE, EXCESS EMISSIONS, AND MEASUREMENT OF EMISSIONS. Revisions to this chapter include the removal of the Emission Reduction Program language; adoption by reference of federal language; incorporation of rules from the now-removed Chapters 24, 25, 26, and 29; removal of numerous definitions; updated citations; and minor revisions to grammar and wording.

Chapter 22—CONTROLLING POLLUTION—PERMITS is retitled CONTROLLING AIR POLLUTION—CONSTRUCTION PERMITTING. Revisions to SIP-approved text include the removal of the VOP Program; incorporation of rules from the now-removed Chapters 20 and 28; language relocation; updated citations; and minor revisions to grammar and wording.

Chapter 23–EMISSION STANDARDS is retitled AIR EMISSION STANDARDS. Revisions to this chapter include removal of redundant language; updated citations; and minor revisions to grammar and wording.

Chapter 24–EXCESS EMISSIONS is retitled OPERATING PERMITS. Revisions to SIP-approved sections are administrative in nature and include updated citations and minor revisions to grammar and wording.

Chapter 25—MEASUREMENT OF EMISSIONS is rescinded.

Chapter 26—PREVENTION OF AIR POLLUTION EMERGENCY EPISODES is rescinded.

Chapter 28—AMBIENT AIR QUALITY STANDARDS is rescinded.

Chapter 29—QUALIFICATIONS IN VISUAL DETERMINATION OF THE OPACITY OF EMISSIONS is rescinded.

Chapter 31—NONATTAINMENT AREAS is retitled NONATTAINMENT NEW SOURCE REVIEW. Revisions to this chapter include the removal of language referencing nonattainment areas, because Iowa no longer has any areas designated nonattainment prior to May 18, 1998; updated citations; and minor revisions to grammar and wording.

Chapter 33—SPECIAL REGULATIONS AND CONSTRUCTION PERMIT REQUIREMENTS FOR MAJOR STATIONARY SOURCES—PREVENTION OF SIGNIFICANT DETERIORATION (PSD) OF AIR QUALITY is retitled CONSTRUCTION PERMIT REQUIREMENTS FOR MAJOR STATIONARY SOURCES—PREVENTION OF SIGNIFICANT DETERIORIATION (PSD). Revisions to this chapter include numerous adoptions by reference of federal language, removal of redundant language, updated citations, and minor revisions to grammar and wording.

The EPA is finalizing the following revisions to the Title V Operating Permit Program:

Chapter 22—CONTROLLING POLLUTION—PERMITS is retitled CONTROLLING AIR POLLUTION—CONSTRUCTION PERMITTING. Revisions include language relocation, updated citations, and minor revisions to grammar and wording. Additionally, numerous definitions from IAC 567—22.1 and IAC 567—22.10(1) are retained in the Title V Operating Permit Program.

Chapter 23—EMISSION STANDARDS is retitled AIR EMISSION STANDARDS. The EPA is finalizing approval of Iowa's request to incorporate the definitions at IAC 567—23.1(4) into the Title V Operating Permit Program. The terms were previously approved into the Title V Operating Permit Program but were relocated to IAC 567—23.1(4).

Chapter 24—EXCESS EMISSIONS is retitled OPERATING PERMITS. Revisions to this chapter include removal of the (VOP) Program language; numerous adoptions by reference of federal language; removal of redundant language and of provisions requiring that copies of Title V operating permit applications be submitted to EPA Region 7; updated citations; and minor revisions to grammar and wording.

Chapter 30—FEES is retained. Revisions to this chapter include addition of clarifying language, removal of redundant language, and updated citations.

The revisions to the Iowa SIP and Title V Operating Permit Program are described in more detail in the proposed rulemaking located in this docket.

Additionally, the EPA is finalizing removal of IAC 567—Chapter 27, IAC 567—22.1(3)''b''(8), IAC 567–23.1(1), and IAC 567–25.1(12) from the Iowa SIP under the authority of CAA 110(k)(6). The EPA determined these provisions were approved into the Iowa SIP in error because they are not required by the CAA for implementation, maintenance, or enforcement of the NAAQS. The full text of the rule revisions as well as the EPA's analysis of the revisions can be found in the technical support documents (TSDs) which are part of this docket.

II. Have the requirements for approval of SIP and operating permit program revisions been met?

The State's submission has met the public notice requirements for SIP submissions in accordance with 40 CFR 51.102. The submission also satisfied the completeness criteria of 40 CFR part 51, appendix V. The State provided public notice on this SIP revision from December 27, 2023, to January 30, 2024, and received no comments. In addition, as explained above and in more detail in the TSDs which are part of this docket, the revisions meet the substantive SIP requirements of the CAA, including section 110 and implementing regulations.

III. The EPA's Response to Comments

The public comment period on the EPA's proposed rule opened March 26, 2026, the date of its publication in the **Federal Register** and closed on April 27, 2026 (91 FR 14658). During this period, the EPA received four comments. One anonymous comment was overall supportive of this action, and one citizen comment was blank. The EPA acknowledges the blank submission.

The EPA is responding to the anonymous supportive comment and the two additional citizen comments. Summaries of these comments and the EPA's responses are provided below. All comments are available for review in the docket for this action.

Comment 1: Commenter 1 states that, although the proposal is framed as administrative cleanup (reorganization, elimination of certain chapters, elimination of the voluntary operating permit program, and correction of prior incorporation errors), administrative

restructuring is not neutral. The commenter requests that the EPA critically evaluate and transparently disclose the practical effects of the revisions on how requirements are applied, understood, and enforced, rather than treating them as purely ministerial changes.

Response 1: The EPA disagrees with the commenter's assertion that the EPA did not critically evaluate and transparently disclose the practical effects of the revisions. The EPA notes that the commenter provides broad high-level observations and recommendations and does not cite or engage with the docket materials, including the EPA's technical support documents that describe the EPA's evaluation of the revisions to the Iowa SIP that it proposes to approve. The EPA summarizes and responds to the commenter's significant comments below, identified as Comments 1A through 1D.

Comment 1A: The commenter stated the EPA should demonstrate that removal of chapters and the VOP program did not result in reduced compliance obligations or enforceability; less rigorous oversight; or the loss of regulatory tools without replacement. Absent this clarity, the commenter views the removals as subtraction rather than streamlining.

Response 1A: The EPA disagrees with commenter's assertion that the removal of certain chapters and the voluntary operating permit program constitutes a subtraction of protections in Iowa's SIP. The docket for this rulemaking includes a state provided crosswalk, titled ''EO10_AQB_Rules_Crosswalk_06192024'' and each TSD includes a redline/strikeout showing how provisions were reorganized and where functions are retained or relocated. The EPA reviewed these materials and determined that all substantive SIP requirements remain legally enforceable and that the restructuring does not change emission limits, compliance obligations, or enforceability.

This comment also referenced the removal of the VOP program language. The full technical analysis of the removal of the VOP program language is in the TSD titled ''(3) IA–194_TSD_Chapters 23, 24,'' and includes references to other state regulations that provide similar mechanisms to the VOP program. As detailed in the TSD and the Voluntary Operating Permit Background and Summary document in the docket, Iowa's VOP program was discontinued by the State in 2015 after Iowa determined that its construction permitting program could provide federally enforceable synthetic minor limits. The VOP program is not required under the Title V Operating Permit Program or section 110 of the CAA. Discontinuation of the State's VOP program does not change federal applicability thresholds or permitting obligations under New Source Review (NSR), Prevention of Significant Deterioration (PSD), or title V, does not alter any source's status, and does not void any existing federally enforceable permit conditions where limiting conditions are needed (*e.g.,* to establish synthetic minor status). Under IAC 567–Chapter 22, a source seeking to limit potential to emit below major thresholds remains subject to PSD until it receives a construction permit that caps the project below PSD thresholds, and IAC 567–22.3(6) authorizes IDNR to limit hazardous air pollutant (HAP) potential to emit below major source thresholds. Prior to removing the VOP rules from the Iowa Administrative Code, IDNR either modified existing construction permits or issued new construction permits for VOP facilities, as needed, to establish the same federally enforceable operational limits and maintain synthetic minor status in lieu of a VOP permit.

The EPA finds that Iowa's Chapter 22 construction permit rules provide adequate authority to establish and enforce synthetic minor limits for criteria pollutants and HAPs; accordingly, removal of the VOP regulations does not reduce the scope or enforceability of applicable requirements, does not shift any facilities into less rigorous oversight pathways, and does not retire necessary regulatory tools. Therefore, the EPA concludes that these changes are streamlining measures that do not reduce the scope or enforceability of applicable requirements and satisfy CAA section 110(l).

Comment 1B: While generally supportive of the EPA's correction of past incorporation errors, the commenter requested the EPA clearly distinguish between true clerical or technical corrections as well as changes that alter the legal status, applicability, or enforceability of provisions, in relation to the CAA 110(k)(6) error corrections. If a provision previously treated as enforceable is no longer incorporated, the commenter asserts this is a substantive regulatory change that should be identified and justified.

Response 1B: The EPA disagrees with commenter's assertion that it did not fully evaluate the impact of its proposed CAA 110(k)(6) error corrections, and notes that the commenter does not identify a specific concern with the EPA's proposed error corrections. The EPA thoroughly reviewed each amendment, and each analysis distinguishes between clerical and technical corrections for each revision. Additionally, the EPA provided a technical analysis of each CAA 110(k)(6) error correction. The full analysis of IAC 567–Chapter 27 can be found in the TSD titled ''(1) IA–194_TSD_Chapters 21, 27, 31, 33.'' The full analysis of IAC 567–22.1(3)''b''(8) and IAC 567–25.1(12) can be found in the TSD titled ''(2) IA–194_TSD_Chapters 22, 30.'' The full analysis of IAC–23.1(1) can be found in the TSD titled ''(3) IA–194_TSD_Chapters 23, 24.''

In the TSDs, the EPA identifies discrete prior approvals that were mistaken because they were administrative or not related to CAA section 110 criteria pollutant programs. Examples include: (1) removing Chapter 27 (Local Program Acceptance) from the SIP because it is administrative and not required for NAAQS implementation or enforcement; (2) removing IAC 567–23.1(1) from the SIP because it pertains to New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants references (CAA sections 111 and 112) requirements and cites non-SIP regulations, thus it should not have been approved into the SIP; (3) removing IAC 567–22.1(3)''b''(8) (case-by-case maximum achievable control technology (MACT)) and IAC 567–22.7(2)''f'' (a continuous emissions monitoring requirement tied to an alternative emission control program not approved into the SIP) because they concern hazardous air pollutants or non-enforceable SIP constructs and therefore were erroneously included in the SIP.

Across the TSDs, the EPA emphasizes that CAA section 110(k)(6) corrections are limited to addressing prior errors, such as approval of state-only or administrative provisions, cross-reference problems, or content outside the scope of CAA section 110, and are not used to make discretionary policy changes or to relax federally enforceable requirements. The EPA documents that each correction maintains the SIP's stringency and does not diminish monitoring, reporting, recordkeeping, compliance, or enforcement obligations, and therefore does not decrease the stringency of the SIP or have an adverse effect on air quality.

Comment 1C: The commenter acknowledges that there are usability improvements that can be gained for the regulated community in the consolidation of rules, but that this can hinder the public's ability to track obligations and violations. The

commenter requested that the EPA ensure that the revised structure does not obscure regulatory requirements and that enforcement pathways remain clear and accessible, not buried in reorganized frameworks.

Response 1C: The EPA acknowledges that regulations should be clear and traceable for both regulated entities and the public, and concludes that the proposed revisions to the Iowa SIP preserve both. The docket includes a state provided crosswalk, titled ''EO10_AQB_Rules_Crosswalk_06192024,'' and each TSD includes a redline/strikeout which shows how provisions were reorganized and where functions are retained or relocated. The TSDs also describe that the revisions streamline duplicative text and consolidate 14 chapters into 8 without reducing stringency, and they list differences between the previously approved SIP and the updated chapters, thereby functioning as a crosswalk to where prior requirements now reside and indicate what was removed. The EPA verified that cross-references were updated and requirements remain accessible. As demonstrated by the EPA's analysis in the TSDs, the EPA finds the revisions do not obscure regulatory requirements, preserve public-facing traceability, and maintain clear, accessible enforcement pathways.

Comment 1D: The commenter stated that EPA should explicitly analyze and disclose the net effect of these revisions, not just their individual justifications. The commenter also stated that the EPA should affirm, in plain terms, that no emission limits are relaxed; that monitoring, reporting, and enforcement mechanisms are not weakened; and that the revisions do not introduce compliance gaps or delays in enforcement. The commenter further states that if the EPA cannot make these assurances, that it should reconsider its approval.

Response 1D: The EPA agrees that evaluating cumulative effects is important, and, as documented across the TSDs, concludes that the revisions maintain overall stringency, and enforceability without creating compliance gaps. The EPA thoroughly analyzed each revision in this rulemaking and concluded in the proposed rulemaking (91 FR 14658) that these revisions do not decrease the stringency of the Iowa SIP or have an adverse effect on air quality. The four TSDs for this rulemaking clearly demonstrate and state in plain terms that no emission limitations were relaxed; compliance and enforcement mechanisms were not weakened; and that the revisions do not introduce compliance gaps or delays in enforcement. The EPA has determined that each revision is administrative or clarifying and does not change any emission limit, compliance obligation, or enforcement mechanism without equivalent replacement, as applicable. Furthermore, as documented in the TSDs, the EPA has demonstrated that its CAA section 110(k)(6) error corrections and the proposed revisions to the Iowa SIP streamline organization while preserving federally enforceable requirements and oversight consistent with the requirements of the Clean Air Act. Accordingly, the EPA finds that reconsideration of its proposed approval is unwarranted.

Comment 2: The commenter stated that removing the case-by-case MACT provisions from the Iowa SIP as a CAA section 110(k)(6) error correction could weaken federal oversight of HAP limits, make enforcement of HAPs more difficult, and create regulatory gaps that may affect public health through exposure to HAPs. The commenter encouraged the EPA to reconsider the removal of the case-by-case MACT provisions from the Iowa SIP.

Response 2: The EPA disagrees that removing case-by-case MACT provisions from the Iowa SIP weakens federal oversight of hazardous air pollutants. This action corrects a prior SIP inclusion error and does not remove or relax any HAP emission limits or alter federal or state enforcement authorities.

The EPA provided a thorough technical analysis of the removal of the case-by-case MACT determination language in the TSD titled ''(2) IA–194_TSD_Chapters 22, 30.'' As explained in the TSD, because case-by-case MACT determinations involve HAPs and not criteria pollutants, they are not a requirement of CAA section 110 and are therefore not a required component of SIPs. Case-by-case MACT determinations are implemented and enforced under Clean Air Act section 112 (including sections 112(g) and 112(j) and 40 CFR part 63). The EPA generally does not approve HAP-only requirements into SIPs; when states adopt procedures to implement CAA section 112(g)/(j), the EPA approves them under section 112(l), and resulting MACT limits are federally enforceable through construction permits and Title V operating permits. The State of Iowa's incorporation by reference of 40 CFR part 63, subpart B in IAC 567-Chapter 23.1(4) provides it with adequate authority to conduct case-by-case MACT determinations. As a result, case-by-case MACT requirements applicable to sources in Iowa will continue to apply and be federally enforceable under section 112 and associated permits, ensuring no regulatory gaps in air toxics oversight. Therefore, no changes have been made in response to this comment.

Comment 3: A commenter expresses overall support for the proposed approval, stating that the revisions appear to reorganize, update, and clean up the rules without reducing protections. The commenter agrees with removal of provisions that were erroneously included in the SIP, provided that doing so does not weaken air quality protections. The commenter also requests that the EPA continue to monitor implementation to ensure that the removal of older programs does not create problems in permitting or pollution monitoring.

Response 3: The EPA appreciates the commenter's support for the proposed action. Under CAA section 110(k), the EPA may approve SIP revisions only if they meet all applicable CAA requirements, and, consistent with CAA section 110(l), the EPA may not approve a SIP revision that would interfere with attainment or maintenance of the NAAQS, reasonable further progress, or any other applicable requirement; where relevant, CAA section 193 also prohibits relaxation of certain pre-1990 nonattainment measures absent equivalent or greater emissions reductions. Consistent with the EPA's statutory and regulatory authorities, the EPA's approval of these revisions is based on a determination, explained in this action, that the revisions do not relax emissions limits or weaken monitoring, reporting, recordkeeping, compliance certification, or enforcement mechanisms, and that corrections do not reduce federally enforceable protections. The EPA will continue to exercise its oversight authorities to ensure that implementation of Iowa's SIP and title V program remains consistent with the Clean Air Act.

IV. What action is the EPA taking?

The EPA is taking final action to amend the Iowa SIP and Title V Operating Permit Program by approving the State's request to revise section 567, Title II-Iowa Air Quality Regulations. Additionally, the EPA is finalizing multiple CAA 110(k)(6) error corrections.

V. Incorporation by Reference

In this document, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, and as discussed in section I. of this preamble, the EPA is finalizing the incorporation by reference of section

567, Title II of the Iowa Air Quality Administrative Regulations:

- Chapter 21—Compliance, Excess Emissions, and Measurement of Emissions, which provides provisions for air quality compliance, excess emissions, and measurement of emissions;
- Chapter 22—Controlling Air Pollution, which provides provisions for air quality construction permitting as well as applicable air quality definitions;
- Chapter 23—Air Emission Standards, which provides provisions for air emission standards as well as applicable air quality definitions;
- Chapter 24—Operating Permits, which includes provisions for Title V Operating Permits, Acid Rain Permits, and Small Source Operating Permits;
- Chapter 30—Fees, which defines specific air quality fees owed by air contaminant sources;
- Chapter 31—Nonattainment New Source Review, which provisions for the preconstruction review and permitting program applicable to new or modified major sources of air pollutants in areas that do not meet the National Ambient Air Quality Standards (NAAQS); and
- Chapter 33—Construction Permit Requirements for Major Stationary Sources-Prevention of Significant Deterioration (PSD), which provides provisions for the preconstruction permitting program applicable to new or modified major stationary sources of air pollutants.

The state effective date of these rules is June 19, 2024. The EPA has made, and will continue to make, these materials generally available through *https://www.regulations.gov* and at the EPA Region 7 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

Therefore, these materials have been approved by the EPA for inclusion in the State Implementation Plan, have been incorporated by reference by the EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of the EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.[1]

Also, in this document, the EPA is finalizing removal of rules that were previously incorporated by reference from the Iowa SIP. In accordance with the requirements of 1 CFR 51.5, the EPA is removing IAC 567—Chapter 27, IAC 567–22.1(3)''b''(8), IAC 567–23.1(1), and IAC 567–25.1(12) discussed in section I of this preamble and as set forth below in the revision to 40 CFR part 52.

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993);
- Is not an Executive Order 14192 (90 FR 9065, February 6, 2025) regulatory action because this action is not significant under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a state program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

This action is subject to the Congressional Review Act (CRA), and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 14, 2026. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects

40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

40 CFR Part 70

Environmental protection, Administrative practice and procedure, Air pollution control, Intergovernmental relations, Operating permits, Reporting and recordkeeping requirements.

Dated: July 6, 2026.

James Macy,

Regional Administrator, Region 7.

For the reasons stated in the preamble, the EPA amends 40 CFR parts 52 and 70 as set forth below:

[1] 62 FR 27968, May 22, 1997.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart Q—Iowa

■ 2. In § 52.820, in the table in paragraph (c):

■ a. Remove the center heading ''Chapter 20-Scope of Title-Definitions'' and the entries ''567–20.1'', ''567–20.2'', and ''567–20.3''.

■ b. Revise the center heading ''Chapter 21-Compliance'' to read ''Chapter 21-Compliance, Excess Emissions, and Measurement of Emissions'' and the entries ''567–21.1'', ''567–21.2'', ''567–21.3'', ''567–21.4'', ''567–21.5'', and ''567–21.6'' and add the entries ''567–21.7'', ''567–21.8'', ''567–21.10'', ''567–21.13'', ''567–21.14'', ''567–21.15'', ''567–21.16'', and ''567–21.17''.

■ c. Revise the center heading ''Chapter 22-Controlling Pollution'' to read ''Chapter 22-Controlling Air Pollution'' and the entries ''567–22.1'', 567–22.2'', ''567–22.3'', 567–22.4'', ''567–22.5'', ''567–22.8'', ''567–22.9'', and ''567–22.10''; add the entry ''567–22.11''; and remove the entries ''567–22.105'', ''567–22.200'', ''567–22.201'', ''567–22.202'', ''567–22.203'', ''567–22.204'', ''567–22.205'', ''567–22.206'', ''567–22.207'', ''567–22.208'', ''567–22.209'', and ''567–22.300''.

■ d. Revise the center heading ''Chapter 23-Emission Standards for Contaminants'' to read ''Chapter 23-Air Emission Standards'' and the entries ''567–23.1'', ''567–23.2'', ''567–23.3'', and ''567–23.4''.

■ e. Revise the center heading ''Chapter 24-Excess Emissions'' to read ''Chapter 24-Operating Permits''; remove the entries ''567–24.1'' and 567–24.2''; and add the entries ''567–24.105'' and ''567–24.300''.

■ f. Remove the center heading ''Chapter 25-Measurement of Emissions'' and the entry ''567–25.1''.

■ g. Remove the center heading ''Chapter 26-Prevention of Air Pollution Emergency Episodes'' and the entries ''567–26.1'', ''567–26.2'', ''567–26.3'', and ''567–26.4''.

■ h. Remove the center heading ''Chapter 27-Certificate of Acceptance'' and the entries ''567–27.1'', ''567–27.2'', ''567–27.3'', ''567–27.4'', and ''567–27.5''.

■ i. Remove the center heading ''Chapter 28-Ambient Air Quality Standards'' and the entry ''567–28.1''.

■ j. Remove the center heading ''Chapter 29-Qualification in Visual Determination of the Opacity of Emissions'' and the entry ''567–29.1''.

■ k. Revise the center heading ''Chapter 31-Nonattainment Areas'' to read ''Chapter 31-Nonattainment New Source Review'' and the entries ''567–31.1'', ''567–31.3'', ''567–31.4'', ''567–31.9'', and ''567–31.10'' and remove entries ''567–31.2 and 567–31.20''.

■ l. Revise the center heading ''Chapter 33-Special Regulations and Construction Permit Requirements for Major Stationary Sources-Prevention of Significant Deterioration (PSD) of Air Quality'' to read ''Chapter 33-Construction Permit Requirements for Major Stationary Sources-Prevention of Significant Deterioration (PSD)'' and the entries ''567–33.1'', ''567–33.3'', ''567–33.9'', and 567–33.10''.

The revisions and additions read as follows:

§ 52.820 Identification of plan.

PART 70—STATE OPERATING PERMIT PROGRAMS

■ 3. The authority citation for part 70 continues to read as follows:

Authority: 42 U.S.C. 7401, *et seq.*

■ 4. Appendix A to part 70 is amended by adding paragraph (aa) under ''Iowa'' to read as follows:

Appendix A to Part 70-Approval Status of State and Local Operating Permits Programs

* * * * *

Iowa

* * * * *

(aa) The Iowa Department of Natural Resources submitted for program approval revisions to rules 567-Chapter 22 and 567–30.4 on July 26, 2024. Rules 567–22.100 through 567–22.300(12) are now located in Chapter 24 and are referred to as 567–24.100 through 567–24.300(12). Rules 567–22.117 through 567–22.119 (now 567–24.117 through 567–24.119) as well as rules 567–22.210 through 567–22.299 (now 567–24.210 through 567–24.299) remain reserved and are not part 70 approved. Previously part 70 approved rules 567–22.200 through 567–22.209 (now 567–24.200 through 567–24.209) have been reserved as a part of this approval and are no longer part 70 approved. Revisions were also made to rule 567–30.4. Numerous definitions located in 576–22.1, 567–22.10(1), and 567–23.1(4) retain part 70 approval. The state effective date is June 19, 2024. This revision is effective August 17, 2026.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 52 and 81

[EPA–R05–OAR–2024–0461; EPA–R05–OAR–2025–0222; FRL–13226–02–R5]

Air Plan Approval and Air Quality Designation; Ohio; Attainment Plan and Redesignation of the Canton Area to Attainment of the 2008 Lead Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The U.S. Environmental Protection Agency (EPA or Agency) is approving the attainment plan and comprehensive emissions inventory for the Canton Nonattainment Area for the 2008 Lead (Pb) National Ambient Air Quality Standards (NAAQS) submitted by the Ohio Environmental Protection Agency (Ohio EPA or Ohio) on

September 19, 2024. Additionally, the EPA is determining that the Canton Nonattainment Area has attained the 2008 Pb NAAQS and is approving Ohio's April 25, 2025, maintenance plan for continued attainment. With these approvals, the EPA is acting in accordance with Ohio's request to redesignate the Canton Nonattainment Area from nonattainment to attainment of the 2008 Pb NAAQS. The EPA is taking these actions in accordance with the Clean Air Act (CAA) and the Agency's implementation regulations regarding the 2008 Pb NAAQS. The EPA proposed these actions on March 27, 2026, with publication in the **Federal Register** on April 10, 2026, and we received no adverse comments.

DATES: This final rule is effective on July 16, 2026.

ADDRESSES: The EPA has established two dockets for this action under Docket ID Nos. EPA–R05–OAR–2024–0461 and EPA–R05–OAR–2025–0222.[1] All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *i.e.,* Confidential Business Information (CBI), Proprietary Business Information (PBI), or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through *https://www.regulations.gov* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional information.

FOR FURTHER INFORMATION CONTACT: Alisa Liu, Air and Radiation Division (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, telephone number: (312) 353–3193, email address: *liu.alisa@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document whenever ''we,'' ''us,'' or ''our'' is used, we mean the EPA. We use multiple acronyms and terms in this preamble. While this list may not be exhaustive, to ease the reading of this preamble and for reference purposes, the EPA defines the following terms and acronyms here:

CAA Clean Air Act
CBI Confidential Business Information
EPA Environmental Protection Agency
NAAQS National Ambient Air Quality Standard
Ohio EPA Ohio Environmental Protection Agency
μg/m³ Micrograms per cubic meter
NPRM Notice of Proposed Rulemaking
Pb Lead
PBI Proprietary Business Information
SIP State Implementation Plan

b. What is the legal authority and requirements?
II. Background
III. Summary of Ohio's Submittals
IV. The EPA's Evaluation of Ohio's Submittals
V. Conclusion
VI. Statutory and Executive Order Reviews

I. Executive Summary

a. What action is the EPA taking?

The EPA is approving the attainment plan for the Canton Nonattainment Area for the 2008 Pb NAAQS and the comprehensive Pb emissions inventory submitted by Ohio EPA on September 19, 2024. Additionally, the EPA is determining that the Canton Nonattainment Area has attained the 2008 Pb NAAQS and is approving Ohio's April 25, 2025, maintenance plan for continued attainment. With these approvals, the EPA is also acting in accordance with Ohio's request to redesignate the Canton Nonattainment Area from nonattainment to attainment of the 2008 Pb NAAQS.

b. What is the legal authority and requirements?

The EPA is taking these actions in accordance with the CAA sections 107(d)(3)(E) and 172 in determining whether the State met all requirements applicable to the Canton Nonattainment Area under CAA sections 110(a)(2)(D)(i)(I), 110(a)(2)(I), 110(a)(2)(K), 110(l), 172(c)(3), 175A, 191, and 192(a), and the Agency's implementation regulations regarding the 2008 Pb NAAQS at 40 CFR part 50, appendix R, 40 CFR part 51, subparts F and G, and 40 CFR part 58.

II. Background

On April 10, 2023, the EPA redesignated portions of the Canton-Stark County, Ohio area from an unclassifiable/attainment area to a nonattainment area for the 2008 Pb NAAQS pursuant to CAA section 107(d)(3).[2] The redesignation was based on ambient air quality monitoring from a source-oriented monitor near the Republic Steel-Canton Plant, which manufactured leaded steel products at the time, that resulted in a 2019–2021 design value that exceeded the 2008 Pb NAAQS of 0.15 micrograms per cubic meter (μg/m³).[3] The Canton Nonattainment Area includes the Republic Steel-Canton Plant site and encompasses the portions of Stark County that are bounded on the north by State Route OH–153 (12th Street NE; Mahoning Road), on the east by Broadway Avenue, on the south by State Route OH–172 (Tuscarawas Street E; Lincoln Street E), and the west by State Route OH–43-Northbound (Cherry Avenue NE).

On September 10, 2023, the parent company of Republic Steel, Grupo Simec, announced the permanent closure of the Republic Steel-Canton Plant, and all associated air permits were terminated effective July 26, 2024. By the end of 2024, ambient air monitoring demonstrated that airborne Pb levels had declined to 0.00 μg/m³ and that the three-year design value for 2022–2024 for the Canton Nonattainment Area had achieved 0.15 μg/m³, thereby meeting the 2008 Pb NAAQS.

III. Summary of Ohio's Submittals

The redesignation of the Canton, Ohio area from unclassifiable/attainment to nonattainment for the 2008 Pb NAAQS imposed certain planning requirements on the State of Ohio to reduce Pb concentrations within this area.[4] On September 19, 2024, Ohio submitted a revision to its SIP for the 2008 Pb NAAQS in the Canton Nonattainment Area, which was comprised of an attainment plan with ambient air monitoring data, emissions inventory, attainment demonstration, and contingency measures. Then, on April 25, 2025, Ohio provided the first 10-year maintenance plan for keeping the Canton Nonattainment Area in attainment and submitted a request to the EPA to redesignate the Canton Nonattainment Area to attainment.

IV. The EPA's Evaluation of Ohio's Submittals

On March 27, 2026, the EPA proposed to approve Ohio's September 19, 2024, attainment plan and comprehensive Pb emissions inventory for the Canton Nonattainment Area for the 2008 Pb NAAQS. Based on complete, quality-assured ambient air monitoring data for 2022–2024, the EPA also proposed to determine that the Canton Area had attained the 2008 Pb NAAQS and to approve Ohio's April 25, 2025, maintenance plan for continued attainment. With these elements of

[1] Docket ID No. EPA–R05–OAR–2024–0461 relates to Ohio's attainment demonstration, and Docket ID No. EPA–R05–OAR–2025–0222 relates to Ohio's redesignation request and maintenance plan.

[2] 88 FR 14920; 14921 (March 10, 2023).

[3] 88 FR 14920; 14922 (March 10, 2023).

[4] 88 FR 14920; 14921 (March 10, 2023).

Ohio's State Implementation Plan (SIP) in place, EPA proposed to act in accordance with Ohio's request to redesignate the area to attainment.[5] In taking these separate, but related, actions, we note that the EPA has previously determined that approval actions on SIP elements for a nonattainment area and the associated redesignation may occur simultaneously.[6] [7]

An explanation of the CAA requirements, a detailed analysis of Ohio's submittals, and the EPA's reasons for proposing approval and redesignation were provided in the notice of proposed rulemaking [8] and the Agency's December 11, 2025, Technical Support Document, which are included in the dockets for this rulemaking, and will not be fully restated here.

In that proposal, based on complete, quality-assured ambient air monitoring data, we proposed to find that the area had achieved a design value of 0.15 μg/m [3] for the most recent three-year period 2022–2024, thereby meeting the 2008 Pb NAAQS of 0.15 μg/m [3]. While the EPA proposed to determine that the Canton Nonattainment Area had monitored attainment of the 2008 Pb NAAQS, we noted that this, in and of itself, did not constitute a redesignation to attainment. We identified the five criteria for redesignating an area from nonattainment to attainment found in CAA section 107(d)(3)(E) and addressed how Ohio's submittals effectively met each of the criteria:

(i) the Administrator determines that the area has attained the NAAQS;

(ii) the Administrator has fully approved the applicable implementation plan for the area under CAA section 110(k);

(iii) the Administrator determines that the improvement in air quality is due to permanent and enforceable reductions in emissions resulting from implementation of the applicable implementation plan and applicable Federal air pollutant control regulations and other permanent and enforceable reductions;

(iv) the Administrator has fully approved a maintenance plan for the area as meeting the requirements of CAA section 175A; and

(v) the State containing such area has met all requirements applicable to the area under CAA section 110 and part D of CAA title 1.[9]

II. Public Comments

The public comment period for this proposed rule ended on May 11, 2026. During the comment period, the EPA received two comment letters that were supportive of the Agency's proposed actions. All comments received are included in the dockets for this rulemaking.

III. Conclusion

The EPA is approving all of Ohio's required SIP elements herein simultaneously in conjunction with acting in accordance with Ohio's request to redesignate the Canton Nonattainment Area from nonattainment to attainment of the 2008 Pb NAAQS. Specifically, the EPA is taking the following separate, but related, actions:

1. Approving Ohio's September 19, 2024, Canton Pb SIP Revision as meeting the applicable requirements of CAA sections 110(a)(2)(D)(i)(I), 110(a)(2)(I), 110(a)(2)(K), 110(l), 172, 191, and 192(a) and 40 CFR 51 subparts F and G.

2. Determining that the Canton Nonattainment Area is attaining the 2008 Pb NAAQS.

3. Approving Ohio's comprehensive Pb emissions inventory for the Canton Nonattainment Area as meeting the applicable requirements of CAA section 172(c)(3).

4. Approving Ohio's 2025 Canton Pb Maintenance Plan as meeting the applicable requirements of CAA section 175A.

5. Determining that Ohio's 2024 Canton Pb SIP Revision as well as Ohio's 2025 Canton Pb Maintenance Plan and Redesignation Request have met the applicable requirements for the EPA to redesignate the Canton Nonattainment Area from nonattainment to attainment of the 2008 Pb NAAQS under CAA section 107(d)(3)(E).

6. Acting in accordance with Ohio's April 25, 2025, Canton Pb Redesignation Request and redesignating the Canton Nonattainment Area from nonattainment to attainment of the 2008 Pb NAAQS in accordance with CAA section 107(d)(3)(E)(i) through (v).

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve State choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Is not an Executive Order 14192 (90 FR 9065, February 6, 2025) regulatory action because this action is not significant under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal

governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

This action is subject to the Congressional Review Act, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 14, 2026. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (*See* section 307(b)(2).)

List of Subjects

40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Lead, Particulate matter, and Reporting and recordkeeping requirements.

40 CFR Part 81

Environmental protection, Air pollution control, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: July 8, 2026.

Anne Vogel,

Regional Administrator, Region 5.

For the reasons stated in the preamble, title 40 CFR parts 52 and 81 are amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. In § 52.1870, the table in paragraph (e) is amended:

■ a. Under the heading ''Summary of Criteria Pollutant Attainment Plans'', by adding an entry for ''Lead (2008)'' before the first entry for ''Ozone (8-Hour, 2015)''; and

■ b. Under the heading ''Summary of Criteria Pollutant Maintenance Plan'', by adding an entry for ''Lead (2008)'' after the first entry for ''Lead (2008)'' (with the State date of 10/29/2013).

The additions read as follows:

§ 52.1870 Identification of plan.

New Source Performance Standards Review for Stationary Combustion Turbines and Stationary Gas Turbines; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Correcting amendments.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is making corrections to the New Source Performance Standards Review for Stationary Combustion Turbines and Stationary Gas Turbines final rule (''Final NSPS Rule'') that published in the **Federal Register** (FR) on January 15, 2026, and became effective on January 15, 2026. After publication, the EPA identified inadvertent technical and typographical errors in the **Federal Register** regulatory text and is correcting those errors.

DATES: Effective on August 17, 2026.

ADDRESSES: The EPA established a docket for this action under Docket ID No. EPA–HQ–OAR–2024–0419. The docket lists all documents at *https://www.regulations.gov.* Although listed, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. The EPA does not place certain other material, such as copyrighted material, on the internet; this material is publicly available only as portable document format (PDF) versions accessible only on EPA computers in the docket office reading room. The public cannot download certain databases and physical items from the docket but may request these items by contacting the docket office at (202) 566–1744. The docket office has 10 business days to respond to such requests. With the exception of such material, publicly available docket materials are available electronically at *https://www.regulations.gov* or on EPA computers in the docket office reading room at the EPA Docket Center, WJC West Building, Room Number 3334, 1301 Constitution Ave. NW, Washington, DC. The Public Reading Room hours of operation are 8:30 a.m. to 4:30 p.m. Eastern Time (ET), Monday through Friday (except Federal holidays). The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the EPA Docket Center is (202) 566–1742.

FOR FURTHER INFORMATION CONTACT: For information about this action, contact U.S. EPA, Attn.: John Ashley, Industrial Processing and Power Division (D243–02), 109 T.W. Alexander Drive, P.O. Box 12055, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–1458; and email address: *ashley.john@epa.gov.*

SUPPLEMENTARY INFORMATION: The EPA is correcting the Final NSPS Rule, New Source Performance Standards Review for Stationary Combustion Turbines and Stationary Gas Turbines, which was published in the **Federal Register** at 91 FR 1910 on January 15, 2026. Following publication of this document, the EPA identified inadvertent technical and typographical errors in the regulatory text of new 40 Code of Federal Regulations (CFR) part 60, subpart KKKKa (''Subpart KKKKa''), as well as regulatory text amended by the Final NSPS Rule in existing 40 CFR part 60, subparts KKKK and GG (''Subpart KKKK'' and ''Subpart GG,'' respectively).

With this action, the EPA is correcting the following errors in FR Document Number (FR Doc) 2026–00677 and appearing at 91 FR 1910 in the **Federal Register** of January 15, 2026:

- At 91 FR 1975, third column, 40 CFR part 60, subpart GG. Final NSPS Rule instruction 3 amended § 60.330 by revising paragraph (a) and adding paragraphs (c) through (e). The EPA corrects the regulatory text in paragraph (e) to read as being applicable to a ''gas turbine'' instead of a ''combustion turbine.'' The EPA is making this correction for consistency with Subpart GG, which applies to the stationary gas turbines source category.
- At 91 FR 1978, third column, 40 CFR part 60, subpart KKKK. Final NSPS Rule instruction 9 amended § 60.4305 by revising paragraphs (a) and (b) and adding paragraphs (c) through (e). The EPA corrects the regulatory text in paragraph (e) to read as being applicable to ''combustion turbines'' instead of ''stationary gas turbines.'' The EPA is making this correction for consistency with Subpart KKKK, which applies to the stationary combustion turbines source category. In addition, the EPA removes the word ''stationary'' from the same phrase in paragraph (e) because turbines subject to title II of the Clean Air Act (CAA) are not stationary sources.
- At 91 FR 1979, second column, 40 CFR part 60, subpart KKKK. Final NSPS Rule instruction 14 added § 60.4331. In § 60.4331 paragraphs (a) through (e), the EPA listed the requirements for operating a stationary temporary combustion turbine. The EPA corrects paragraph (a) to add the phrases ''owners or operators of'' and ''may elect to be a temporary combustion turbine and'' in the first sentence. These additions are necessary to clarify that the stationary temporary combustion turbine subcategory is optional for qualifying combustion turbines. Furthermore, the EPA adds the phrase ''as an alternative to the otherwise applicable emission standards and monitoring, recordkeeping, and

reporting requirements of this subpart'' to the end of paragraph (a) to clarify that only those that elect to own or operate a stationary temporary combustion turbine must comply with the requirements in paragraphs (b) through (e) of this section. As conforming edits, the EPA deletes the phrases ''you may operate,'' ''so long as you,'' and ''all of'' from paragraph (a). In paragraph (c) introductory text and paragraph (d), the EPA deletes the phrase ''Unless you elect to demonstrate compliance through the otherwise applicable monitoring, recordkeeping, and reporting requirements of this subpart'' because this notice adds that phrase to paragraph (a). The EPA adds the word ''combustion'' before ''turbine'' in the first sentence of paragraph (e)(1) for consistency.

- At 91 FR 1982, third column, 40 CFR part 60, subpart KKKK. Final NSPS Rule instruction 23 amended § 60.4380 by revising paragraph (b)(3). The EPA corrects the regulatory text in paragraph (b)(3) to reflect the use of an arithmetic average to determine the applicable nitrogen oxide (NO_X) standard for averaging periods during which multiple NO_X emission standards apply. The Final NSPS Rule inadvertently incorporated regulatory text from Subpart KKKKa that specified the use of a heat input weighted average.
- At 91 FR 1982, third column, 40 CFR part 60, subpart KKKK. Final NSPS Rule instruction 24 amended § 60.4395 by revising the introductory text. The EPA corrects the heading of this section to read ''When must I submit my reports?'' instead of ''What must I submit my reports?''
- At 91 FR 1984, third column, 40 CFR part 60, subpart KKKK. Final NSPS Rule instruction 28 amended § 60.4420 by adding and revising certain definitions. The EPA is making an editorial change to the last sentence of the ''stationary combustion turbine'' definition. The EPA adds the word ''combustion'' before the word ''turbine'' for consistency and moves the phrase ''all related requirements'' to before the phrase ''promulgated pursuant to title II of the Clean Air Act'' for grammatical correctness.
- At 91 FR 1985, table 1, second column, 40 CFR part 60, subpart KKKK. Final NSPS Rule instruction 29 amended Table 1 to Subpart KKKK of Part 60—Nitrogen Oxide Emission Limits for New Stationary Combustion Turbines. In the second column of the table, ''Combustion turbine heat input at peak load (HHV),'' the EPA amended the threshold for the subcategories of ''Turbines located north of the Arctic Circle (latitude 66.5 degrees north), turbines operating at less than 75 percent of peak load, modified and reconstructed offshore turbines, and turbines operating at temperatures less than 0 °F.'' Specifically, the EPA amended the size threshold for these subcategories by including a heat input-based threshold of 300 million British thermal units per hour (MMBtu/h) in addition to the existing 30 megawatts (MW) output-based threshold. The EPA is making a technical correction to revert to the 30 MW output-based threshold in Subpart KKKKa. As a conforming edit and for consistency across the subparts, the EPA revises table 1 of Subpart KKKK by reverting to the previous output-based threshold of 30 MW alone for these subcategories of turbines. Because the EPA retained the 30 MW metric as part of the size threshold in Subpart KKKK in the Final NSPS Rule, this change in Subpart KKKK has no practical effect. All combustion turbines with outputs greater than 30 MW also have base load ratings of greater than 300 MMBtu/h, so the added 300 MMBtu/h metric had no applicability implications.
- At 91 FR 1985, table 1, first column, 40 CFR part 60, subpart KKKK. Final NSPS Rule instruction 29 amended Table 1 to Subpart KKKK of Part 60—Nitrogen Oxide Emission Limits for New Stationary Combustion Turbines. In the last row of the table, the EPA added a subcategory for ''Combustion turbines bypassing the heat recovery unit.'' The EPA adds the phrase ''firing natural gas'' to the first column of this row. The EPA is making this correction for consistency with the previous applicable emission standards for units firing non-natural gas fuels in Subpart KKKK. The EPA restores those previous emission standards in Subpart KKKK by clarifying that this subcategory's NO_X emission standard applies only to units firing natural gas.
- At 91 FR 1985, table 1, first column, 40 CFR part 60, subpart KKKK. Final NSPS Rule instruction 29 amended Table 1 to Subpart KKKK of Part 60—Nitrogen Oxide Emission Limits for New Stationary Combustion Turbines. The EPA corrects an omission from the table and lists subcategories for stationary temporary combustion turbines firing natural gas and firing fuels other than natural gas. These additional rows at the end of the table include the associated NO_X emission standards for these subcategories, consistent with the discussion in the preamble at 91 FR 1925. The Final NSPS Rule inadvertently omitted these rows.
- At 91 FR 1986, second column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4310a paragraph (d), the EPA identified ''stationary gas turbines'' as not being subject to this subpart if they are subject to title II of the CAA. The EPA corrects paragraph (d) to read as being applicable to ''combustion turbines'' instead of ''stationary gas turbines.'' The EPA is making this correction for consistency with Subpart KKKKa, which applies to the stationary combustion turbines source category. In addition, the EPA removes the word ''stationary'' from the same phrase in paragraph (d) because turbines subject to title II of the CAA are not stationary sources.
- At 91 FR 1987, third column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4331a paragraphs (a) through (e), the EPA listed the requirements for operating a stationary temporary combustion turbine. The EPA corrects paragraph (a) to add the phrases ''owners or operators of'' and ''may elect to be a temporary combustion turbine and'' in the first sentence. This addition is necessary to clarify that the stationary temporary combustion turbine subcategory is optional for qualifying combustion turbines. Furthermore, the EPA adds the phrase ''as an alternative to the otherwise applicable emission standards and monitoring, recordkeeping, and reporting requirements of this subpart'' to the end of paragraph (a) to clarify that only those that elect to own or operate a stationary temporary combustion turbine must comply with the requirements in paragraphs (b) through (e) of this section. As conforming edits, the EPA deletes the phrases ''you may operate,'' ''so long as you,'' and ''all of'' from paragraph (a). In paragraph (c) introductory text and paragraph (d), the EPA deletes the phrase ''Unless you elect to demonstrate compliance through the otherwise applicable monitoring, recordkeeping, and reporting requirements of this subpart'' because this notice adds that phrase to paragraph (a). The EPA adds the word ''combustion'' before ''turbine'' in the first sentence of paragraph (e)(1) for consistency.
- At 91 FR 1988, second column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4333a paragraph (b)(1), the EPA listed the general requirements for complying with the NO_X emission standards. In paragraph (b)(1), the EPA corrects the stated interval between performance

tests to 14-calendar-months instead of 12-calendar-months. The EPA is making this correction to align performance testing requirements in paragraph (b)(1) with the Agency's response to public comments, which states, ''The language in 40 CFR 60.4333a(b) has been updated to be consistent with the 14- and 26-calendar-month testing gaps prescribed in subpart KKKK.'' [1]

- At 91 FR 1989, first column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4333a paragraph (d)(3), the EPA listed the methods that an owner or operator of a stationary combustion turbine must use to demonstrate compliance with a sulfur dioxide (SO_2) emission standard. The Final NSPS Rule inadvertently omitted a reference to § 60.4372a, which contains the additional acceptable method of using fuel records of the total sulfur content for the combusted fuel to demonstrate compliance. The EPA corrects the last sentence of § 60.4333a paragraph (d)(3) by adding a reference to § 60.4372a to clarify—consistent with the intent of the Final NSPS Rule—that maintaining records is an option for demonstrating compliance with the applicable SO_2 emission standard.
- At 91 FR 1991, third column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4350a, the EPA listed instructions for determining excess NO_X emissions using continuous emission monitoring system (CEMS) data. In § 60.4350a paragraph (d), the EPA explained the proper procedure for estimating emissions for hours with missing data. The EPA adds the phrase ''of this chapter'' after ''part 75'' in the first sentence of paragraph (d) for consistency. In addition, the EPA replaces the phrase ''of the hour of'' in the second sentence with ''of the hourly load value of'' after ''± 10 percent.'' The EPA is making this change to clarify the proper procedure for estimating emissions.
- At 91 FR 1992, third column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4350a paragraph (f)(1), the EPA provided equation 1 for calculating the hourly average NO_X emissions rate, including a list that defines the variables used in the equation. For variable T, the second sentence describes a calculation that ''consists of useful thermal output on an annual basis.'' The EPA corrects this description to clarify that variable T ''consists of useful thermal output on a 12-calendar-month basis'' instead of an ''annual'' basis, which could be confused with calendar-years. The EPA is making this change for consistency with the intent of the Final NSPS Rule, which bases emissions standards on a 12-calendar-month rolling average.
- At 91 FR 1995, third column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4374a paragraph (g)(2), the EPA provided equation 2 for calculating the hourly average NO_X emissions rate, including a list that defines the variables used in the equation. For variable T, the second sentence describes a calculation that ''consists of useful thermal output on an annual basis.'' The EPA corrects this description to clarify that variable T ''consists of useful thermal output on a 12-calendar-month basis'' instead of an ''annual'' basis, which could be confused with calendar-years. The EPA is making this change for consistency with the intent of Final NSPS Rule, which bases emissions standards on a 12-calendar-month rolling average.
- At 91 FR 2000, first column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4400a, the EPA listed instructions for conducting performance tests to demonstrate compliance with the NO_X emissions standards without using a NO_X CEMS. The EPA corrects paragraph (d) introductory text to specify that owners or operators must conduct the performance test at any load condition within ± 30 percent of 100 percent of the base load rating and may perform testing at the highest achievable load point if they cannot achieve at least 70 percent of the base load rating in practice. The percentages listed in paragraph (d) introductory text of the Final NSPS Rule inadvertently included ± 25 percent and 75 percent from Subpart KKKK. Subpart KKKKa defines ''full load'' as greater than or equal to 70 percent of the base load rating of the turbine. Therefore, the correct percentages are ''± 30 percent'' instead of ''± 25 percent'' and ''70 percent'' instead of ''75 percent.'' The EPA makes the same corrections to § 60.4400a paragraph (d)(2).
- At 91 FR 2000, second column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4405a, the EPA listed instructions for conducting performance tests to demonstrate compliance with the NO_X emissions standards using a NO_X CEMS. The EPA corrects paragraph (b)(1) to specify that owners or operators must conduct the performance test at a single load level, within ± 30 percent of 100 percent of the base load rating, and owners or operators may perform testing at the highest achievable load point if they cannot achieve at least 70 percent of the base load rating in practice. The percentages listed in paragraph (b)(1) of the Final NSPS Rule inadvertently included ± 25 percent and 75 percent from Subpart KKKK. Subpart KKKKa defines ''full load'' as greater than or equal to 70 percent of the base load rating of the turbine. Therefore, the correct percentages are ''± 30 percent'' instead of ''± 25 percent'' and ''70 percent'' instead of ''75 percent.''
- At 91 FR 2000, third column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4415a paragraph (a) and paragraph (b) introductory text, the EPA listed instructions for owners or operators to conduct performance tests to demonstrate compliance with the SO_2 emissions standard. The EPA corrects § 60.4415a paragraph (a) to clarify that ''you may submit fuel records, . . .'' instead of ''must submit fuel records,'' because using fuel records is not the only acceptable method of demonstrating compliance. Similarly, in § 60.4415a paragraph (b) introductory text, the EPA inadvertently omitted the phrase ''and are not using fuel records, you . . .'' Accordingly, the EPA corrects the introductory text to read: ''If you are an owner or operator of an affected facility complying with the SO_2 emissions standard and are not using fuel records, you must conduct the performance test by measuring the SO_2 emissions in the stationary combustion turbine exhaust gases using the methods in either paragraph (b)(1) or (2) of this section.''
- At 91 FR 2001, second column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Subpart KKKKa consisting of sections 60.4300a to 60.4420a. In § 60.4420a, the Final NSPS Rule included definitions that apply to this subpart. The EPA removes the definitions of ''annual capacity factor,'' ''high-utilization source,'' and ''low-utilization source''

[1] See the document ''Summary of Public Comments and Responses: Review of New Source Performance Standards for Stationary Combustion Turbines and Stationary Gas Turbines,'' Section 8.5.2 Continuous emission monitoring, available in the docket (EPA Docket ID No. EPA–HQ–OAR–2024–0419) for this rulemaking at *https://www.regulations.gov*.

because Subpart KKKKa does not use those terms. In addition, the EPA revises the definition of ''gross energy output'' in paragraph (3) to specify a ''12-calendar-month'' instead of an ''annual'' basis, the definition of ''stationary combustion turbine'' to move ''all related requirements'' before the phrase ''promulgated pursuant to title II of the Clean Air Act'' for grammatical correctness, and the definition of ''turbine tuning'' to clarify that Subpart KKKKa limits turbine tuning to 30 hours per 12-calendar-month period. The use of the phrase ''12-calendar-month'' instead of the word ''annual'' in the ''gross energy output'' and ''turbine tuning'' definitions is necessary to ensure consistency with the 12-calendar-month basis for emission standards and the intent of the Final NSPS Rule. Furthermore, the EPA adds the definition of ''utilization'' because that term is relevant for subcategorization purposes.

• At 91 FR 2004, table 1, second column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Table 1 to Subpart KKKKa of Part 60—Nitrogen Oxide Emission Standards for Stationary Combustion Turbines. In the second column of the table, ''Combustion turbine base load rated heat input (HHV),'' the EPA set a heat-input threshold for the subcategories of turbines ''Located north of the Arctic Circle (latitude 66.5 degrees north), operating at ambient temperatures less than 0 °F (-18 °C), modified or reconstructed offshore turbines, operated during periods of turbine tuning, byproduct-fired turbines, and/or operating at less than 70 percent of the base load rating.'' Specifically, the EPA set the threshold for this subcategory as a heat input-based threshold of 300 MMBtu/h. The EPA intended for this threshold in Subpart KKKKa to be equivalent to the output-based threshold of 30 MW in Subpart KKKK. The EPA attempted to align the combustion turbine size subcategories in both subparts with heat input-based thresholds for associated NO_X standards for consistency.[2] The EPA did not intend to effectuate a substantive change in the size threshold for these subcategories.[3] However, the EPA is now aware that these two forms of threshold are not equivalent for all combustion turbines in these subcategories that could be subject to Subpart KKKKa, and this change inadvertently substantively altered this threshold, which was not the Agency's intent.[4] Therefore, the EPA corrects this unintended error in table 1 to Subpart KKKKa by reverting to the output-based threshold of 30 MW in Subpart KKKK for these subcategories of turbines in Subpart KKKKa.

• At 91 FR 2004, table 1, first column, 40 CFR part 60, subpart KKKKa. Final NSPS Rule instruction 30 added Table 1 to Subpart KKKKa of Part 60—Nitrogen Oxide Emission Standards for Stationary Combustion Turbines. To better clarify the NO_X emission standards applicable to stationary temporary combustion turbines consistent with the discussion in the preamble,[5] the EPA adds the subcategories of temporary turbines firing natural gas and temporary turbines firing fuels other than natural gas to the end of the table in separate rows. The EPA removes the reference to temporary turbines from the subcategory of ''New, firing natural gas, either offshore turbines, turbines bypassing the heat recovery unit, and/or temporary turbines'' as a conforming edit and inserts ''and/or'' before the phrase ''turbines bypassing the heat recovery unit.''

Section 553 of the Administrative Procedure Act provides that when an agency for good cause finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment.[6] The EPA has determined that there is good cause for making this rule final without prior proposal and opportunity for comment because the changes to the rule are minor, noncontroversial in nature, and correct inadvertent typographical and technical errors. These changes align regulatory text with the EPA's expressed intent in the Final NSPS Rule preamble and do not substantively change the requirements of the Final NSPS Rule except to the extent necessary to align the regulatory text with the EPA's intent, which the preamble expressly states. Thus, the corrected regulatory text in this action has already had notice and opportunity for public comment, rendering further notice and opportunity for public comment unnecessary. The EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(B).

List of Subjects in 40 CFR Part 60

Environmental protection, Administrative practice and procedures, Air pollution control, Reporting and recordkeeping requirements.

Accordingly, 40 CFR part 60 is corrected by making the following correcting amendments:

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

■ 1. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart GG—Standards of Performance for Stationary Gas Turbines

■ 2. Amend § 60.330 by revising paragraph (e) to read as follows:

§ 60.330 Applicability and designation of affected facility.

* * * * *

(e) A gas turbine that is subject to this subpart and is not a ''major source'' or located at a ''major source'' (as that term is defined at 42 U.S.C. 7661 (2)) is exempt from the requirements of 42 U.S.C. 7661a(a).

Subpart KKKK—Standards of Performance for Stationary Combustion Turbines

■ 3. Amend § 60.4305 by revising paragraph (e) to read as follows:

§ 60.4305 Does this subpart apply to my stationary combustion turbine?

* * * * *

(e) Combustion turbines subject to title II of the Clean Air Act are not subject to this subpart.

■ 4. Amend § 60.4331 by revising paragraph (a), paragraph (c) introductory text, and paragraphs (d) and (e)(1) to read as follows:

§ 60.4331 What are the requirements for operating a stationary temporary combustion turbine?

(a) Notwithstanding any other provision of this subpart, owners or operators of a small- or medium-size stationary combustion turbine (*i.e.,* a combustion turbine with a base load rating less than or equal to 850 MMBtu/h) at a single location for up to 24 consecutive months, may elect to be a temporary combustion turbine and comply with the requirements in paragraphs (b) through (e) of this section as an alternative to the otherwise

[2] *See* 91 FR 1928 (January 15, 2026).

[3] *Id.*

[4] See the petition for reconsideration filed with the EPA by the American Petroleum Institute (API), available in the rulemaking docket under Docket ID # EPA–HQ–OAR–2024–0419–0246. It is the Agency's expectation that this correction fully resolves the issue raised in this petition for reconsideration.

[5] *See* 91 FR 1925 (January 15, 2026).

[6] 5 U.S.C. 553(b)(B).

applicable emission standards and monitoring, recordkeeping, and reporting requirements of this subpart.

* * * * *

(c) Compliance with the NO_X emissions standard must be demonstrated through maintaining the documentation in paragraphs (c)(1) and (2) of this section on-site:

* * * * *

(d) Compliance with the SO_2 emissions standard must be demonstrated through complying with the provisions in § 60.4365.

(e) * * *

(1) The combustion turbine may only be located at the same stationary source (or group of stationary sources located within a contiguous area and under common control) for a total period of 24 consecutive months. This is the total period of residence time allowed after the turbine commences operation at the location, regardless of whether the turbine is in operation for the entire 24-consecutive-month period.

* * * * *

■ 5. Amend § 60.4380 by revising paragraph (b)(3) to read as follows:

§ 60.4380 How are excess emissions and monitor downtime defined for NO_X?

* * * * *

(b) * * *

(3) For averaging periods during which multiple emissions standards apply, the applicable standard for the averaging period is the arithmetic average of the applicable standards during each hour. For hours with multiple emission standards, the applicable standard for that hour is determined based on the condition that corresponded to the highest emissions standard.

* * * * *

■ 6. Amend § 60.4395 by revising the section heading to read as follows:

§ 60.4395 When must I submit my reports?

* * * * *

■ 7. Amend § 60.4420 by revising the definition of ''Stationary combustion turbine'' to read as follows:

§ 60.4420 What definitions apply to this subpart?

* * * * *

Stationary combustion turbine means all equipment, including but not limited to the turbine, the fuel, air, lubrication and exhaust gas systems, control systems (except emissions control equipment), heat recovery system, and any ancillary components and sub-components comprising any simple cycle stationary combustion turbine, any regenerative/recuperative cycle stationary combustion turbine, any combined cycle combustion turbine, and any combined heat and power combustion turbine based system. Stationary means that the combustion turbine is not self-propelled or intended to be propelled while performing its function. It may, however, be mounted on a vehicle for portability. Portable combustion turbines are excluded from the definition of ''stationary combustion turbine,'' and not regulated under this part, if the combustion turbine meets the definition of ''nonroad engine'' under title II of the Clean Air Act and applicable regulations and is certified to meet emission standards and all related requirements promulgated pursuant to title II of the Clean Air Act.

* * * * *

■ 8. Revise table 1 to subpart KKKK of part 60 to read as follows:

TABLE 1 TO SUBPART KKKK OF PART 60—NITROGEN OXIDE EMISSION LIMITS FOR NEW STATIONARY COMBUSTION TURBINES

Combustion turbine type	Combustion turbine heat input at peak load (HHV)	NO_X emission standard
New turbine firing natural gas, electric generating	≤50 MMBtu/h	42 ppm at 15 percent O_2 or 290 ng/J of useful output (2.3 lb/MWh).
New turbine firing natural gas, mechanical drive	≤50 MMBtu/h	100 ppm at 15 percent O_2 or 690 ng/J of useful output (5.5 lb/MWh).
New turbine firing natural gas	>50 MMBtu/h and ≤850 MMBtu/h.	25 ppm at 15 percent O_2 or 150 ng/J of useful output (1.2 lb/MWh).
New, modified, or reconstructed turbine firing natural gas	>850 MMBtu/h	15 ppm at 15 percent O_2 or 54 ng/J of useful output (0.43 lb/MWh).
New turbine firing fuels other than natural gas, electric generating.	≤50 MMBtu/h	96 ppm at 15 percent O_2 or 700 ng/J of useful output (5.5 lb/MWh).
New turbine firing fuels other than natural gas, mechanical drive.	≤50 MMBtu/h	150 ppm at 15 percent O_2 or 1,100 ng/J of useful output (8.7 lb/MWh).
New turbine firing fuels other than natural gas	>50 MMBtu/h and ≤850 MMBtu/h.	74 ppm at 15 percent O_2 or 460 ng/J of useful output (3.6 lb/MWh).
New, modified, or reconstructed turbine firing fuels other than natural gas.	>850 MMBtu/h	42 ppm at 15 percent O_2 or 160 ng/J of useful output (1.3 lb/MWh).
Modified or reconstructed turbine	≤50 MMBtu/h	150 ppm at 15 percent O_2 or 1,100 ng/J of useful output (8.7 lb/MWh).
Modified or reconstructed turbine firing natural gas	>50 MMBtu/h and ≤850 MMBtu/h.	42 ppm at 15 percent O_2 or 250 ng/J of useful output (2.0 lb/MWh).
Modified or reconstructed turbine firing fuels other than natural gas.	>50 MMBtu/h and ≤850 MMBtu/h.	96 ppm at 15 percent O_2 or 590 ng/J of useful output (4.7 lb/MWh).
Turbines located north of the Arctic Circle (latitude 66.5 degrees north); turbines operating at less than 75 percent of peak load; modified and reconstructed offshore turbines; and turbines operating at temperatures less than 0 °F.	≤30 MW output	150 ppm at 15 percent O_2 or 1,100 ng/J of useful output (8.7 lb/MWh).
Turbines located north of the Arctic Circle (latitude 66.5 degrees north); turbines operating at less than 75 percent of peak load; modified and reconstructed offshore turbines; and turbines operating at temperatures less than 0 °F.	>30 MW output	96 ppm at 15 percent O_2 or 590 ng/J of useful output (4.7 lb/MWh).

TABLE 1 TO SUBPART KKKK OF PART 60—NITROGEN OXIDE EMISSION LIMITS FOR NEW STATIONARY COMBUSTION TURBINES—Continued

Combustion turbine type	Combustion turbine heat input at peak load (HHV)	NO_X emission standard
Heat recovery units operating independent of the combustion turbine.	All sizes	54 ppm at 15 percent O_2 or 110 ng/J of useful output (0.86 lb/MWh).
Combustion turbines bypassing the heat recovery unit firing natural gas.	>50 MMBtu/h	25 ppm at 15 percent O_2 or 150 ng/J of useful output (1.2 lb/MWh).
Temporary turbine firing natural gas	≤850 MMBtu/h	25 ppm at 15 percent O_2 or 150 ng/J of useful output (1.2 lb/MWh).
Temporary turbine firing fuels other than natural gas	≤850 MMBtu/h	74 ppm at 15 percent O_2 or 460 ng/J of useful output (3.6 lb/MWh).

Subpart KKKKa—Standards of Performance for Stationary Combustion Turbines

■ 9. Amend § 60.4310a by revising paragraph (d) to read as follows:

§ 60.4310a What stationary combustion turbines are not subject to this subpart?

* * * * *

(d) Combustion turbines subject to title II of the Clean Air Act are not subject to this subpart.

■ 10. Amend § 60.4331a by revising paragraph (a), paragraph (c) introductory text, and paragraphs (d) and (e)(1) to read as follows:

§ 60.4331a What are the requirements for operating a stationary temporary combustion turbine?

(a) Notwithstanding any other provision of this subpart, owners or operators of a small- or medium-size stationary combustion turbine (*i.e.,* a combustion turbine with a base load rating less than or equal to 850 MMBtu/h) at a single location for up to 24 consecutive months, may elect to be a temporary combustion turbine and comply with the requirements in paragraphs (b) through (e) of this section as an alternative to the otherwise applicable emission standards and monitoring, recordkeeping, and reporting requirements of this subpart.

* * * * *

(c) Compliance with the NO_X emissions standard must be demonstrated through maintaining the documentation in paragraphs (c)(1) and (2) of this section on-site:

* * * * *

(d) Compliance with the SO_2 emissions standard must be demonstrated through complying with the provisions in § 60.4372a.

(e) * * *

(1) The combustion turbine may only be located at the same stationary source (or group of stationary sources located within a contiguous area and under common control) for a total period of 24 consecutive months. This is the total period of residence time allowed after the turbine commences operation at the location, regardless of whether the turbine is in operation for the entire 24-consecutive-month period.

* * * * *

■ 11. Amend § 60.4333a by revising paragraphs (b)(1) and (d)(3) to read as follows:

§ 60.4333a What are my general requirements for complying with this subpart?

* * * * *

(b) * * *

(1) Except as provided for in paragraphs (b)(2) through (5) of this section, you must conduct subsequent performance tests within 14 calendar months of the date that the previous performance test was conducted.

* * * * *

(d) * * *

(3) Conduct an initial performance test according to § 60.8 and use the applicable methods in § 60.4415a. Thereafter, maintain records (such as a current, valid purchase contract, tariff sheet, or transportation contract) documenting that total sulfur content for the initial and subsequent fuel combusted in your stationary combustion turbine at all times does not exceed applicable conditions specified in § 60.4370a or § 60.4372a; or

* * * * *

■ 12. Amend § 60.4350a by revising paragraph (d) and equation 1 to paragraph (f)(1) to read as follows:

§ 60.4350a How do I use the NO_X CEMS data to determine excess emissions?

* * * * *

(d) Data used to meet the requirements of this subpart shall not include substitute data values derived from the missing data procedures of part 75 of this chapter, nor shall the data be bias adjusted according to the procedures of part 75 of this chapter. For units complying with the 12-calendar-month mass-based standard, emissions for hours of missing data shall be estimated by using the average emissions rate of non-out-of-control hours within ±10 percent of the hourly load value of missing data within the 12-calendar-month period. If non-out-of-control data is not available, the maximum hourly emissions rate during the 12-calendar-month period shall be used.

* * * * *

(f) * * *

(1) * * *

Equation 1 to Paragraph (f)(1)

$$P = \frac{(Pe)_t}{T} + \frac{(Pe)_c}{T} - Pe_A + P_s + P_o \quad \text{(Eq. 1)}$$

Where:

P = Gross or net energy output of the stationary combustion turbine system in MWh;

$(Pe)_t$ = Electrical or mechanical energy output of the combustion turbine engine in MWh;

$(Pe)_c$ = Electrical or mechanical energy output (if any) of the steam turbine in MWh;
Pe_A = Electric energy used for any auxiliary loads in MWh (only applicable to owners/operators electing to demonstrate compliance on a net output basis);
P_s = Useful thermal energy of the steam, measured relative to ISO conditions, not used to generate additional electric or mechanical output, in MWh;
P_o = Other useful heat recovery, measured relative to ISO conditions, not used for steam generation or performance enhancement of the stationary combustion turbine; and
T = Electric Transmission and Distribution Factor. Equal to 0.95 for CHP combustion turbine where at least 20.0 percent of the total gross useful energy output consists of electric or direct mechanical output and 20.0 percent of the total gross useful energy output consists of useful thermal output on a 12-calendar-month basis. Equal to 1.0 for all other combustion turbines.

* * * * *

■ 13. Amend § 60.4374a by revising equation 2 to paragraph (g)(2) to read as follows:

§ 60.4374a How do I demonstrate compliance with my SO_2 emissions standard and determine excess emissions using a SO_2 CEMS?

* * * * *

(g) * * *

(2) * * *

Equation 2 to Paragraph (g)(2)

$$P = \frac{(Pe)_t}{T} + \frac{(Pe)_c}{T} - Pe_A + P_s + P_o \quad \text{(Eq. 2)}$$

Where:

P = Gross energy output of the stationary combustion turbine system in MWh;
$(Pe)_t$ = Electrical or mechanical energy output of the stationary combustion turbine in MWh;
$(Pe)_c$ = Electrical or mechanical energy output (if any) of the steam turbine in MWh;
Pe_A = Electric energy used for any auxiliary loads in MWh;
P_s = Useful thermal energy of the steam, measured relative to ISO conditions, not used to generate additional electric or mechanical output, in MWh;
P_o = Other useful heat recovery, measured relative to ISO conditions, not used for steam generation or performance enhancement of the stationary combustion turbine; and
T = Electric Transmission and Distribution Factor. Equal to 0.95 for CHP combustion turbine where at least 20.0 percent of the total gross useful energy output consists of electric or direct mechanical output and 20.0 percent of the total gross useful energy output consists of useful thermal output on a 12-calendar-month basis. Equal to 1.0 for all other combustion turbines.

* * * * *

■ 14. Amend § 60.4400a by revising paragraph (d) introductory text and paragraph (d)(2) to read as follows:

§ 60.4400a How do I conduct performance tests to demonstrate compliance with my NO_X emissions standard if I do not have a NO_X CEMS?

* * * * *

(d) The performance test must be done at any load condition within ±30 percent of 100 percent of the base load rating. You may perform testing at the highest achievable load point, if at least 70 percent of the base load rating cannot be achieved in practice. You must conduct three separate test runs for each performance test. The minimum time per run is 20 minutes.

* * * * *

(2) For a combined cycle or CHP combustion turbine with supplemental heat (duct burner), you must measure the total NO_X emissions downstream of the duct burner. The duct burner must be in operation within ±30 percent of 100 percent of the base load rating of the duct burners or the highest achievable load if at least 70 percent of the base load rating of the duct burners cannot be achieved during the performance test.

* * * * *

■ 15. Amend § 60.4405a by revising paragraph (b)(1) to read as follows:

§ 60.4405a How do I conduct a performance test if I use a NO_X CEMS?

* * * * *

(b) * * *

(1) Perform a minimum of nine RATA reference method runs, with a minimum time per run of 21 minutes, at a single load level, within ±30 percent of 100 percent of the base load rating while the source is combusting the fuel that is a normal primary fuel for that source. You may perform testing at the highest achievable load point, if at least 70 percent of the base load rating cannot be achieved in practice. The ambient temperature must be greater than 0 °F during the RATA runs. The Administrator or delegated authority may approve performance testing below 0 °F if the timing of the required performance test and environmental conditions make it impractical to test at ambient conditions greater than 0 °F.

* * * * *

■ 16. Amend § 60.4415a by revising paragraph (a) and paragraph (b) introductory text to read as follows:

§ 60.4415a How do I conduct performance tests to demonstrate compliance with my SO_2 emissions standard?

(a) If you are an owner or operator of an affected facility complying with the fuel-based standard, you may submit fuel records (such as a current, valid purchase contract, tariff sheet, transportation contract, or results of a fuel analysis) to satisfy the requirements of § 60.8.

(b) If you are an owner or operator of an affected facility complying with the SO_2 emissions standard and are not using fuel records, you must conduct the performance test by measuring the SO_2 emissions in the stationary combustion turbine exhaust gases using the methods in either paragraph (b)(1) or (2) of this section.

* * * * *

■ 17. Amend § 60.4420a by:
■ a. Removing the definition of ''Annual capacity factor'';
■ b. Revising the definition of ''Gross energy output'';
■ c. Removing the definitions of ''High-utilization source'' and ''Low-utilization source'';
■ d. Revising the definitions of ''Stationary combustion turbine'' and ''Turbine tuning''; and
■ e. Adding the definition of ''Utilization'' in alphabetical order.

The revisions and addition read as follows:

§ 60.4420a What definitions apply to this subpart?

* * * * *

Gross energy output means:

(1) For simple cycle and combined cycle combustion turbines, the gross useful work performed is the gross electrical or direct mechanical output from both the combustion turbine engine and any associated steam turbine(s).

(2) For a CHP combustion turbine, the gross useful work performed is the gross electrical or direct mechanical output from both the combustion turbine engine and any associated steam turbine(s) plus any useful thermal output measured relative to ISO

conditions that is not used to generate additional electrical or mechanical output or to enhance the performance of the unit (*i.e.,* steam delivered to an industrial process).

(3) For a CHP combustion turbine where at least 20.0 percent of the total gross useful energy output consists of useful thermal output on a 12-calendar-month basis, the gross useful work performed is the gross electrical or direct mechanical output from both the combustion turbine engine and any associated steam turbine(s) divided by 0.95 plus any useful thermal output measured relative to ISO conditions that is not used to generate additional electrical or mechanical output or to enhance the performance of the unit (*i.e.,* steam delivered to an industrial process).

(4) For a district energy CHP combustion turbine where at least 20.0 percent of the total gross useful energy output consists of useful thermal output on a 12-calendar-month basis, the gross useful work performed is the gross electrical or direct mechanical output from both the combustion turbine engine and any associated steam turbine(s) divided by 0.95 plus any useful thermal output measured relative to ISO conditions that is not used to generate additional electrical or mechanical output or to enhance the performance of the unit (*e.g.,* steam delivered to an industrial process) divided by 0.95.

* * * * *

Stationary combustion turbine means all equipment including, but not limited to, the combustion turbine engine, the fuel, air, lubrication and exhaust gas systems, control systems (except post combustion emissions control equipment), heat recovery system (including heat recovery steam generators and duct burners); steam turbine; fuel compressor and/or pump, any ancillary components and sub-components comprising any simple cycle stationary combustion turbine, any combined cycle combustion turbine, and any combined heat and power combustion turbine based system; plus any integrated equipment that provides electricity or useful thermal output to the combustion turbine engine (*e.g.,* onsite photovoltaics), heat recovery system, or auxiliary equipment. Stationary means that the combustion turbine is not self-propelled or intended to be propelled while performing its function. It may, however, be mounted on a vehicle for portability. Portable combustion turbines are excluded from the definition of ''stationary combustion turbine,'' and not regulated under this part, if the combustion turbine meets the definition of ''nonroad engine'' under title II of the Clean Air Act and applicable regulations and is certified to meet emissions standards and all related requirements promulgated pursuant to title II of the Clean Air Act.

* * * * *

Turbine tuning means planned maintenance or parameter performance testing of a combustion turbine engine involving adjustment of the operating configuration to maintain proper combustion dynamics or testing machine operating performance. Turbine tuning is limited to 30 hours per 12-calendar-month period.

* * * * *

Utilization means the ratio between the actual heat input to a combustion turbine engine (not including any heat input to an HRSG) during a 12-calendar-month period and the potential heat input to the combustion turbine engine had it operated at the base load rating for every hour during the 12-calendar-month period. Heat input during a system emergency as defined in this section is excluded when determining the utilization rate. Actual and potential heat input derived from non-combustion sources (*e.g.,* solar thermal) are not included when calculating the utilization.

* * * * *

■ 18. Revise table 1 to subpart KKKKa of part 60 to read as follows:

TABLE 1 TO SUBPART KKKKa OF PART 60—NITROGEN OXIDE EMISSION STANDARDS FOR STATIONARY COMBUSTION TURBINES

Combustion turbine type	Combustion turbine base load rated heat input (HHV)	Input-based NO_X emission standard [1]	Optional output-based NO_X standard [2]
New, firing natural gas with utilization rate >45 percent.	>850 MMBtu/h	5 ppm at 15 percent O_2 or 7.9 ng/J (0.018 lb/MMBtu).	0.054 kg/MWh-gross (0.12 lb/MWh-gross) 0.055 kg/MWh-net (0.12 lb/MWh-net).
New, firing natural gas with utilization rate ≤45 percent and with design efficiency ≥38 percent.	>850 MMBtu/h	25 ppm at 15 percent O_2 or 40 ng/J (0.092 lb/MMBtu).	0.38 kg/MWh-gross (0.83 lb/MWh-gross) 0.39 kg/MWh-net (0.85 lb/MWh-net).
New, firing natural gas with utilization rate ≤45 percent and with design efficiency <38 percent.	>850 MMBtu/h	9 ppm at 15 percent O_2 or 14 ng/J (0.033 lb/MMBtu).	0.17 kg/MWh-gross (0.37 lb/MWh-gross) 0.17 kg/MWh-net (0.38 lb/MWh-net).
New, modified, or reconstructed, firing non-natural gas.	>850 MMBtu/h	42 ppm at 15 percent O_2 or 70 ng/J (0.16 lb/MMBtu).	0.45 kg/MWh-gross (1.0 lb/MWh-gross) 0.46 kg/MWh-net (1.0 lb/MWh-net).
Modified or reconstructed, firing natural gas, at all utilization rates, with design efficiency ≥38 percent.	>850 MMBtu/h	25 ppm at 15 percent O_2 or 40 ng/J (0.092 lb/MMBtu).	0.38 kg/MWh-gross (0.83 lb/MWh-gross) 0.39 kg/MWh-net (0.85 lb/MWh-net).
Modified or reconstructed, firing natural gas, at all utilization rates, with design efficiency <38 percent.	>850 MMBtu/h	15 ppm at 15 percent O_2 or 24 ng/J (0.055 lb/MMBtu).	0.28 kg/MWh-gross (0.62 lb/MWh-gross) 0.29 kg/MWh-net (0.30 lb/MWh-net).
New, firing natural gas, at utilization rate >45 percent.	>50 MMBtu/h and ≤850 MMBtu/h.	15 ppm at 15 percent O_2 or 24 ng/J (0.055 lb/MMBtu).	0.20 kg/MWh-gross (0.43 lb/MWh-gross) 0.20 kg/MWh-net (0.44 lb/MWh-net).
New, firing natural gas, at utilization rate ≤45 percent.	>50 MMBtu/h and ≤850 MMBtu/h.	25 ppm at 15 percent O_2 or 40 ng/J (0.092 lb/MMBtu).	0.54 kg/MWh-gross (1.2 lb/MWh-gross) 0.56 kg/MWh-net (1.2 lb/MWh-net).
Modified or reconstructed, firing natural gas	>20 MMBtu/h and ≤850 MMBtu/h.	42 ppm at 15 percent O_2 or 67 ng/J (0.15 lb/MMBtu).	0.91 kg/MWh-gross (2.0 lb/MWh-gross) 0.92 kg/MWh-net (2.0 lb/MWh-net).

TABLE 1 TO SUBPART KKKKa OF PART 60—NITROGEN OXIDE EMISSION STANDARDS FOR STATIONARY COMBUSTION TURBINES—Continued

Combustion turbine type	Combustion turbine base load rated heat input (HHV)	Input-based NO_X emission standard [1]	Optional output-based NO_X standard [2]
New, firing non-natural gas	>50 MMBtu/h and ≤850 MMBtu/h.	74 ppm at 15 percent O_2 or 120 ng/J (0.29 lb/MMBtu).	1.6 kg/MWh-gross (3.6 lb/MWh-gross) 1.6 kg/MWh-net (3.7 lb/MWh-net).
Modified or reconstructed, firing non-natural gas.	>20 MMBtu/h and ≤850 MMBtu/h.	96 ppm at 15 percent O_2 or 160 ng/J (0.37 lb/MMBtu).	2.1 kg/MWh-gross (4.7 lb/MWh-gross) 2.2 kg/MWh-net (4.8 lb/MWh-net).
New, firing natural gas	≤50 MMBtu/h	25 ppm at 15 percent O_2 or 40 ng/J (0.092 lb/MMBtu).	0.64 kg/MWh-gross (1.4 lb/MWh-gross) 0.65 kg/MWh-net (1.4 lb/MWh-net).
New, firing non-natural gas	≤50 MMBtu/h	96 ppm at 15 percent O_2 or 160 ng/J (0.37 lb/MMBtu).	2.4 kg/MWh-gross (5.3 lb/MWh-gross) 2.5 kg/MWh-net (5.4 lb/MWh-net).
Modified or reconstructed, all fuels	≤20 MMBtu/h	150 ppm at 15 percent O_2 or 240 ng/J (0.55 lb/MMBtu).	3.9 kg/MWh-gross (8.7 lb/MWh-gross) 4.0 kg/MWh-net (8.9 lb/MWh-net).
New, firing natural gas, either offshore turbines and/or turbines bypassing the heat recovery unit.	>50 MMBtu/h	25 ppm at 15 percent O_2 or 40 ng/J (0.092 lb/MMBtu).	N/A.
Located north of the Arctic Circle (latitude 66.5 degrees north), operating at ambient temperatures less than 0 °F (−18 °C), modified or reconstructed offshore turbines, operated during periods of turbine tuning, byproduct-fired turbines, and/or operating at less than 70 percent of the base load rating.	≤30 MW output	150 ppm at 15 percent O_2 or 240 ng/J (0.55 lb/MMBtu).	N/A.
Located north of the Arctic Circle (latitude 66.5 degrees north), operating at ambient temperatures less than 0 °F (−18 °C), modified or reconstructed offshore turbines, operated during periods of turbine tuning, byproduct-fired turbines, and/or operating at less than 70 percent of the base load rating.	> 30 MW output	96 ppm at 15 percent O_2 or 150 ng/J (0.35 lb/MMBtu).	N/A.
Heat recovery units operating independent of the combustion turbine.	All sizes	54 ppm at 15 percent O_2 or 86 ng/J (0.20 lb/MMBtu).	N/A.
Temporary turbines firing natural gas	≤850 MMBtu/h	25 ppm at 15 percent O_2 or 40 ng/J (0.092 lb/MMBtu).	N/A.
Temporary turbines firing non-natural gas	≤850 MMBtu/h	74 ppm at 15 percent O_2 or 120 ng/J (0.29 lb/MMBtu).	N/A.

[1] Input-based standards are determined on a 4-operating-hour rolling average basis.
[2] Output-based standards are determined on a 30-operating-day average basis.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[EPA–R07–OAR–2026–4952; FRL–13457–02–R7]

Approval and Promulgation of State Plan (Negative Declaration) for Designated Facilities and Pollutants; Nebraska; Commercial and Industrial Solid Waste Incineration Units

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking direct final action to accept a negative declaration submitted by the Nebraska Department of Water, Energy, and Environment (NDWEE) to satisfy the emission guidelines and associated compliance times requirements for Commercial and Industrial Solid Waste Incineration (CISWI) units for the State of Nebraska. The negative declaration certifies that there are no existing sources within the jurisdiction of Nebraska that must comply with the rule. This action is being taken in accordance with the Clean Air Act (CAA) requirements for emission guidelines and state plans for existing sources.

DATES: This direct final rule will be effective September 14, 2026, without further notice, unless the EPA receives adverse comment by August 17, 2026. If the EPA receives adverse comment, we

will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R07–OAR–2026–4952, to *https://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Allyson Prue, Environmental Protection Agency, Region 7 Office, Air Quality Planning Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; telephone number: (913) 551–7277; email address: *prue.allyson@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document ''we,'' ''us,'' and ''our'' refer to the EPA.

Table of Contents

I. What is a CAA 111(d) Plan?
II. What are the Regulatory Requirements for CISWIs?
III. Why is this Action Necessary?
IV. Statutory and Executive Order Reviews

I. What is a CAA 111(d) Plan?

Sections 111(d) and 129 of the CAA require states to submit plans to control certain pollutants (designated pollutants) at existing solid waste combustor facilities (designated facilities) whenever standards of performance have been established under CAA section 111(b) for new sources of the same type, and the EPA has established emission guidelines for such existing sources. Section 129 of the CAA is specific to solid waste combustion and requires the EPA to establish the new source performance standards (NSPS) and emission guidelines for existing sources for each category of solid waste incineration units, which include CISWI units, as addressed in this action. Under CAA section 129, the NSPS and emission guidelines must contain numerical emissions limitations for particulate matter (total and fine), opacity (as appropriate), sulfur dioxide, hydrogen chloride, oxides of nitrogen, carbon monoxide, lead, cadmium, mercury, and dioxins and dibenzofurans. While the NSPS are directly applicable to affected facilities, emission guidelines for existing units are intended for states to use to develop a state plan to submit to the EPA. Once approved by the EPA, the state plan becomes federally enforceable. If a state does not submit an approvable state plan to the EPA, the EPA is responsible for developing, implementing, and enforcing a federal plan. The regulations at 40 CFR part 60, subpart B, contain general provisions applicable to the adoption and submittal of state plans for controlling designated pollutants. The regulations at 40 CFR part 62, subpart A, provide the procedural framework by which the EPA will approve or disapprove such plans submitted by a state.

However, 40 CFR 60.23(b) and 62.06 provide that if a state does not have any existing solid waste incineration units for the relevant emission guidelines, the state shall submit a letter to the EPA certifying that no such units exist within the state (*i.e.,* a negative declaration) in lieu of a state plan. A negative declaration exempts the state from the provisions of subpart B regarding the submittal of a CAA section 111(d)/129 plan.

II. What are the Regulatory Requirements for CISWIs?

On December 1, 2000, the EPA originally promulgated the NSPS and emission guidelines to reduce air pollution from CISWI units, which are codified at 40 CFR part 60, subparts CCCC and DDDD, respectively. *See* 65 FR 75338. These rulemakings underwent a number of revisions and amendments throughout the 2000s, with the most recent amendments being finalized on June 23, 2016. *See* 81 FR 40956. Due to significant changes to applicability in the March 21, 2011 CISWI rulemaking, the EPA required states to resubmit state plans for existing source CISWI. *See* 76 FR 15704 and 78 FR 9112. Existing source CISWI units are those which have commenced construction on or before June 4, 2010, or were modified no later than August 7, 2013. The emission guidelines for existing source CISWI are codified at 40 CFR part 60, subpart DDDD.

States subject to 40 CFR part 60, subpart DDDD (subpart DDDD) must submit a state plan to the EPA that implements the CISWI emission guidelines as per 40 CFR 60.2505. A state with no existing units submits a negative declaration letter in place of a state plan in accordance with 40 CFR 60.2510. The Nebraska Department of Water, Energy, and Environment, formerly the Nebraska Department of Environmental Quality at the time of submission, submitted a negative declaration to the EPA on March 26, 2018, certifying that there are no existing sources in the State of Nebraska subject to the requirements of subpart DDDD. On May 21, 2026, the EPA received confirmation from the NDWEE that the 2018 negative declaration is current and that there continues to be no existing sources in the State subject to the requirements of subpart DDDD.

III. Why is this Action Necessary?

In this final rule, the EPA will amend 40 CFR part 62 to reflect receipt of the negative declaration letter for the State of Nebraska, certifying that there are no existing CISWI units within its jurisdiction subject to 40 CFR part 60, subpart DDDD, in accordance with section 111(d) of the CAA.

If a designated facility is later found within the mentioned jurisdictions after publication of the final action, then the facility will become subject to the requirements of the federal plan for that designated facility, including the compliance schedule. The federal plan will no longer apply if we subsequently receive and approve a CAA section 111(d)/129 plan from the jurisdiction with the overlooked facility.

We are publishing this direct final rule without prior proposed rule because we view this as a noncontroversial action and anticipate no adverse comment. However, in the ''Proposed Rules'' section of this **Federal Register**, we are publishing a separate document that will serve as the proposed rule to approve the negative declaration if adverse comments are received on this direct final rule. We will not institute a second comment period on this action. Any parties interested in commenting must do so at this time. For further information about commenting on this rule, see the **ADDRESSES** section of this document. If the EPA receives adverse comment, we will publish a timely withdrawal in the **Federal Register** informing the public that this direct final rule will not take effect. We will address all public comments in any subsequent final rule based on the proposed rule.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator has the authority to approve a 111(d) negative declaration in lieu of a state plan that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7411(d); 42 U.S.C. 7429; 40 CFR part 60, subparts B and DDDD; and 40 CFR part 62, subpart A. Thus, in reviewing 111(d) negative declaration letters, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993);
- Is not an Executive Order 14192 (90 FR 9065, February 6, 2025) regulatory action because this action is not significant under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA.

In addition, this action is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

This action is subject to the Congressional Review Act (CRA), and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 14, 2026. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

List of Subjects in 40 CFR Part 62

Environmental protection, Administrative practice and procedure, Air pollution control, Commercial and industrial solid waste incinerators, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: July 6, 2026.

James Macy,

Regional Administrator, Region 7.

For the reasons stated in the preamble, the EPA amends 40 CFR part 62 as set forth below:

PART 62—APPROVAL AND PROMULGATION OF STATE PLANS FOR DESIGNATED FACILITIES AND POLLUTANTS

■ 1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart CC—Nebraska

■ 2. Revise § 62.6916 to read as follows:

§ 62.6916 Identification of plan-negative declaration.

On March 26, 2018, the State of Nebraska Department of Environmental Quality submitted a letter certifying no Commercial and Industrial Solid Waste Incineration units subject to 40 CFR part 60, subpart DDDD operate within the State's jurisdiction.

BILLING CODE 6560–50–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 635

[Docket No. 220919–0193; RTID 0648–XF881]

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries; Harpoon Category Quota Transfer

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; quota transfer.

SUMMARY: NMFS is transferring 6.4 metric tons (mt) of Atlantic bluefin tuna (BFT) quota from the Reserve category to the Harpoon category resulting in an adjusted Harpoon category quota 65.6 mt and a Reserve category quota of 1 mt. This action is intended to provide further harvest opportunities for Harpoon category fishermen, based on consideration of the regulatory determination criteria regarding inseason adjustments and applies to Atlantic Tunas Harpoon category (commercial) permitted vessels. The Harpoon category fishery will remain open until November 15, 2026, or until the adjusted Harpoon quota is reached, whichever comes first.

DATES: The quota transfer is effective July 14, 2026, through November 15, 2026.

FOR FURTHER INFORMATION CONTACT: Larry Redd, Jr., *larry.redd@noaa.gov*, or Becky Curtis, *becky.curtis@noaa.gov*, or by email or phone at 301–427–8503.

SUPPLEMENTARY INFORMATION: Atlantic BFT fisheries are managed under the 2006 Consolidated Atlantic Highly Migratory Species (HMS) Fishery Management Plan (FMP) and its amendments, pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) and consistent with the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*). HMS implementing regulations are at 50 CFR part 635. Section 635.27(a) divides the U.S. BFT quota, established by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic fishing categories, per the allocations established in the HMS FMP and its amendments. NMFS is required under the Magnuson-Stevens Act at 16 U.S.C. 1854(g)(1)(D) to provide U.S. fishing

vessels with a reasonable opportunity to harvest quotas under relevant international fishery agreements such as the ICCAT Convention, which is implemented domestically pursuant to ATCA.

As described in § 635.27(a), the current baseline U.S. BFT quota is 1,316.14 mt (not including the 25 mt ICCAT allocated to the United States to account for bycatch of BFT in pelagic longline fisheries in the Northeast Distant Gear Restricted Area per § 635.27(a)(3)). The baseline quotas for the Harpoon and Reserve categories are 59.2 mt and 38.2 mt, respectively. To date, NMFS has published one action that adjusted the Reserve category quota (91 FR 5855, February 10, 2026). The current adjusted Reserve category quota is 7.4 mt. As described under § 635.27(a)(4), the Harpoon category quota is available from June 1 through November 15 of each year.

Separate from this action, NMFS published a proposed rulemaking that would implement the 2025 ICCAT recommendation (Recommendation 25–05) regarding western BFT management (91 FR 24789, May 7, 2026). Consistent with that recommendation, that proposed rule, would increase the baseline U.S. BFT quota from 1,316.14 mt to 1,509.98 mt and adjust all the subquotas accordingly. In that proposed rule, the Harpoon category baseline quota would increase from 59.2 mt to 67.9 mt and the Reserve category baseline quota would increase from 38.2 mt to 43.8 mt. The comment period on that proposed rule ended on June 8, 2026. Any final rule implementing ICCAT Recommendation 25–05 would likely be effective in mid-2026 or later.

Transfer From the Reserve Category to the Harpoon Category Fishery

Under § 635.27(a)(8), NMFS has the authority to transfer quota among fishing categories or subcategories after considering the determination criteria provided under § 635.27(a)(7). This section focuses on the calculations involved in transferring quota currently available from the 2026 Reserve category to the 2026 Harpoon category quota; the consideration of the determination criteria can be found below after this section.

As stated above, the baseline Harpoon category quota and adjusted Reserve category quota are 59.2 mt and 7.4 mt, respectively. Transferring 6.4 mt from the Reserve category to the Harpoon category, results in an adjusted Harpoon category quota of 65.6 mt (59.2 mt + 6.4 mt = 65.6 mt), and an adjusted Reserve category quota of 1 mt (7.4 mt − 6.4 mt = 1 mt). The Harpoon category quota is available for use by Atlantic Tunas Harpoon category permitted vessels.

In summary, this transfer results in an adjusted Harpoon quota of 65.6 mt and an adjusted Reserve quota of 1 mt. The Harpoon category fishery will remain open until November 15, 2026, or until the adjusted Harpoon quota is reached, whichever comes first.

Consideration of the Relevant Determination Criteria

NMFS has considered all of the relevant determination criteria and their applicability to this inseason quota transfer (§ 635.27(a)(7)). These criteria include, but are not limited to, the following:

Regarding the usefulness of information obtained from catches in the particular category for biological sampling and monitoring of the status of the stock (§ 635.27(a)(7)(i)), biological samples collected from BFT landed by Harpoon category fishermen and provided by BFT dealers continue to provide NMFS with valuable parts and data for ongoing scientific studies of BFT age and growth, migration, and reproductive status. Additional opportunity to land BFT in the Harpoon category would support the continued collection of a broad range of data for these studies and for stock monitoring purposes.

NMFS also considered the catches of the Harpoon category quota to date and the likelihood of closure of the Harpoon category fishery if no adjustment is made (§ 635.27(a)(7)(ii)), as well as daily landing trends and the availability of BFT on fishing grounds (§ 635.27(a)(7)(ix)). To date, preliminary landings data indicate that the Harpoon category has landed approximately 63.1 mt for the Harpoon category. Without a quota transfer at this time, the Harpoon category would very likely exceed the available quota and NMFS would have to stop BFT fishing activities even though commercial-sized BFT remain available in the areas where Harpoon category permitted vessels operate. A quota transfer at this time provides limited additional opportunities to harvest the U.S. BFT quota while avoiding exceeding it.

Regarding the projected ability of the vessels fishing under the Harpoon category to harvest the additional amount of BFT quota transferred before the end of the fishing year (§ 635.27(a)(7)(iii)), NMFS considered Harpoon category landings over the last several years and landings to date this year. Landings are highly variable and depend on access to commercial-sized BFT and fishing conditions, among other factors. By allowing for the current quota transfer, NMFS anticipates that the Harpoon category quota would be used before the end of the fishing season. Additionally, this quota transfer would allow Harpoon category fishermen to take advantage of the current availability of BFT on the fishing grounds and provide a reasonable opportunity to harvest the available U.S. BFT quota.

NMFS also considered the estimated amounts by which quotas for other gear categories of the fishery might be exceeded (§ 635.27(a)(7)(iv)), the ability to account for all 2026 landings and dead discards (§ 635.27(a)(7)(xi)), and the ability to facilitate quota accounting (§ 635.27(a)(7)(xii)). With the exception of 2024, the total U.S. BFT landings in recent years typically have been below the available U.S. quota such that the United States has carried forward the maximum amount of underharvest allowed by ICCAT from one year to the next. When total U.S. BFT landings are above the available U.S. quota, the United States reduces the next year's quota by the overharvest amount (including reducing the various fishing category subquotas by their respective overharvest amounts), as was necessary in 2025 to account for overharvest of the 2024 adjusted U.S. quota, consistent with ICCAT recommendations. NMFS will need to account for 2026 landings and dead discards within the 2026 adjusted U.S. quota, and anticipates having sufficient quota to do so.

NMFS also considered the effects of the transfer on the BFT stock and on accomplishing the objectives of the HMS FMP (§ 635.27(a)(7)(v) and (vi)). This transfer would be within established quotas and subquotas, which are implemented consistent with ICCAT recommendations, ATCA, and the objectives of the HMS FMP and amendments. In establishing these quotas and subquotas and associated management measures, ICCAT and NMFS considered the best scientific information available, objectives for stock management and status, and effects on the stock. This quota transfer is in line with the established management measures and stock status determinations. Another principal consideration is the objective of providing opportunities to harvest the available Harpoon category quota without exceeding the annual quota, based on the objectives of the HMS FMP and its amendments, including to achieve optimum yield on a continuing basis and to allow all permit categories a reasonable opportunity to harvest available BFT quota allocations (related to § 635.27(a)(7)(x)). Finally, we note that the amount remaining in the

Reserve category is sufficient for anticipated exempted fishing and other permitted research needs.

In summary, this transfer results in an adjusted Harpoon quota of 65.6 mt and an adjusted Reserve quota of 1 mt. The Harpoon category fishery will remain open until November 15, 2026, or until the adjusted Harpoon quota is reached, whichever comes first.

Monitoring and Reporting

NMFS will continue to monitor the BFT fishery closely. Per § 635.5(b)(2)(i)(A), dealers are required to submit landing reports within 24 hours of a dealer receiving BFT. Late reporting by dealers compromises NMFS' ability to timely implement actions such as quota and retention limit adjustments, as well as closures, and may result in enforcement actions. Additionally, and separate from the dealer reporting requirement, Harpoon category vessel owners are required per § 635.27(a)(4) to report their own catch of all BFT retained or discarded dead within 24 hours of the landing(s) or end of each trip, by accessing *https://hmspermits.noaa.gov*, using the HMS Catch Reporting app, or calling 888–872–8862 (Monday through Friday from 8 a.m. until 4:30 p.m. Eastern Time).

Depending on the level of fishing effort and catch rates of BFT, NMFS may determine that additional adjustments are necessary to ensure available subquotas are not exceeded in 2026 or to enhance scientific data collection from, and fishing opportunities in, all geographic areas as specified under § 635.27(a)(7). If needed, subsequent adjustments will be published in the **Federal Register**. In addition, fishermen may access *https://hmspermits.noaa.gov/home*, for updates on quota monitoring and inseason adjustments.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act (16 U.S.C. 1855(d)) and regulations at 50 CFR part 635 and this action is exempt from review under Executive Order 12866.

The Assistant Administrator for NMFS (AA) finds that pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice of, and opportunity for public comment on, this action because it is impracticable and contrary to the public interest for the following reasons. Specifically, the regulations implementing the HMS FMP and amendments provide for inseason adjustments and quota transfers to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Providing prior notice and an opportunity for public comment is impracticable and contrary to the public interest as this fishery is currently underway and, based on the most recent landings information, the 2026 Harpoon category quota is projected to be reached shortly. Delaying this action could result in BFT landings that exceed the Harpoon category quota. Additionally, a delay in implementing this action would preclude the fishery from harvesting BFT that are currently available on the fishing grounds and that might otherwise become unavailable. This action does not raise conservation and management concerns and would support effective management of the BFT fishery. This action does not affect the overall ICCAT-allocated U.S. BFT quota. NMFS notes that the public had an opportunity to comment on the underlying rulemakings that established the U.S. BFT quota and the inseason adjustment criteria.

For all of the above reasons, the AA finds that pursuant to 5 U.S.C. 553(d)(3), there is good cause to waive the 30-day delay in effective date.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: July 14, 2026.

Shannon Bettridge,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 260209–0039; RTID 0648–XF890]

Fisheries of the Northeastern United States; Summer Flounder Fishery; Quota Transfer From North Carolina to Virginia

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; quota transfer.

SUMMARY: NMFS announces that the State of North Carolina is transferring a portion of its 2026 commercial summer flounder quota to the Commonwealth of Virginia. This adjustment to the 2026 fishing year quota is necessary to comply with the Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan (FMP) quota transfer provisions. This announcement informs the public of the revised 2026 commercial quotas for North Carolina and Virginia.

DATES: Effective July 15, 2026, through December 31, 2026.

FOR FURTHER INFORMATION CONTACT: Matthew Rigdon, Fishery Management Specialist, (978) 281–9336.

SUPPLEMENTARY INFORMATION: Regulations governing the summer flounder fishery are found in 50 CFR 648.100 through 648.111. These regulations require annual specification of a commercial quota that is apportioned among the coastal states from Maine through North Carolina. The process to set the annual commercial quota and the percent allocated to each state is described in § 648.102, and the final 2026 allocations were published on February 19, 2026 (91 FR 7896).

The final rule implementing amendment 5 to the FMP, as published in the **Federal Register** on December 17, 1993 (58 FR 65936), provided a mechanism for transferring summer flounder commercial quota from one state to another. Two or more states, under mutual agreement and with the concurrence of the NMFS Greater Atlantic Regional Administrator, can transfer or combine summer flounder commercial quota under § 648.102(c)(2). The Regional Administrator is required to consider three criteria in the evaluation of requests for quota transfers or combinations: (1) the transfers or combinations would not preclude the overall annual quota from being fully harvested; (2) the transfers address an unforeseen variation or contingency in the fishery; and (3) the transfers are consistent with the objectives of the FMP and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The Regional Administrator has determined these three criteria have been met for the transfer approved in this notification.

North Carolina is transferring 12,719 pounds (lb; 5,769 kilograms (kg)) of summer flounder to Virginia through a mutual agreement between the states. This transfer was requested to repay landings made by out-of-state permitted vessels under safe harbor agreements. The revised summer flounder quotas for 2026 are: North Carolina, 2,907,006 lb (1,318,596 kg); and Virginia, 2,433,727 lb (1,103,920 kg).

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens

Act. This action is required by 50 CFR 648.102(c)(2)(i) through (iv), which was issued pursuant to section 304(b) of the Magnuson-Stevens Act, and is exempted from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 14, 2026.

Shannon Bettridge,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 91, No. 135
Thursday, July 16, 2026

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2026–7221; Project Identifier MCAI–2025–01377–T]

RIN 2120–AA64

Airworthiness Directives; Bombardier, Inc., Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Bombardier, Inc., Model BD–700–2A12 airplanes. This proposed AD was prompted by a report that the protective film cover on certain secondary power distribution assemblies (SPDA) might not have been removed. This proposed AD would require an inspection of certain SPDA for the presence of the protective film cover and applicable corrective actions. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by August 31, 2026.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2026–7221; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

Material Incorporated by Reference:

- For Transport Canada material identified in this proposed AD, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca.* You may find this material on the Transport Canada website at *tc.canada.ca/en/aviation.* It is also available at *regulations.gov* under Docket No. FAA–2026–7221.
- You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

FOR FURTHER INFORMATION CONTACT: Jonathan Duong, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments using a method listed under the **ADDRESSES** section. Include ''Docket No. FAA–2026–7221; Project Identifier MCAI–2025–01377–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Jonathan Duong, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

Transport Canada, which is the aviation authority for Canada, has issued Transport Canada AD CF–2025–40, dated August 20, 2025 (Transport Canada AD CF–2025–40) (also referred to as the MCAI), to correct an unsafe condition for certain Bombardier, Inc., Model BD–700–2A12 airplanes. The MCAI states that a manufacturing quality escape notice reported that a protective film cover (red protection film) might not have been removed from the bottom face of the No. 1 and No. 2 SPDA. If uncorrected, the blockage of the holes in the mesh on the SPDA could impede proper airflow, adversely affecting cooling performance. This could lead to overheating, operation outside of the normal unit conditions, and eventual SPDA failure, which could result in the loss of any system or combination of systems powered by these units, potentially affecting the safe operation of the airplane.

The FAA is proposing this AD to address the unsafe condition on these products.

You may examine the MCAI in the AD docket at *regulations.gov* under Docket No. FAA–2026–7221.

Material Incorporated by Reference Under 1 CFR Part 51

Transport Canada AD CF–2025–40 specifies procedures for conducting a visual inspection of the top and bottom faces of the No. 1 and No. 2 SPDA for the presence of the protective film cover and, if applicable, corrective actions to remove the protective film cover. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the civil aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with this State of Design Authority, that authority has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in Transport Canada AD CF–2025–40 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate Transport Canada AD CF–2025–40 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with Transport Canada AD CF–2025–40 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Material required by Transport Canada AD CF–2025–40 for compliance will be available at *regulations.gov* under Docket No. FAA–2026–7221 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 25 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
1 work-hours × $85 per hour = $85	$0	$85	$2,125

The FAA estimates the following costs to do any necessary on-condition action that would be required based on the results of any required actions. The FAA has no way of determining the number of aircraft that might need this on-condition action:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
1 work-hour × $85 per hour = $85	Negligible	$85

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Bombardier, Inc.: Docket No. FAA–2026–7221; Project Identifier MCAI–2025–01377–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by August 31, 2026.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Bombardier, Inc., Model BD–700–2A12 airplanes, certificated in any category, as identified in Transport Canada AD CF–2025–40, dated August 20, 2025 (Transport Canada AD CF–2025–40).

(d) Subject

Air Transport Association (ATA) of America Code 24, Electrical power.

(e) Unsafe Condition

This AD was prompted by a report that the protective film cover might not have been removed from the bottom face of the No. 1 and No. 2 secondary power distribution assemblies (SPDA). The FAA is issuing this AD to address the blockage of the holes in the mesh on the SPDA, which could impede proper airflow, adversely affecting cooling performance. The unsafe condition, if not addressed, could lead to overheating, operation outside of the normal unit conditions, and eventual SPDA failure, which could result in the loss of any system or combination of systems powered by these units, potentially affecting the safe operation of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, Transport Canada AD CF–2025–40.

(h) Exception to Transport Canada AD CF–2025–40

Where Transport Canada AD CF–2025–40 refers to its effective date, this AD requires using the effective date of this AD.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (j) of this AD and email to: *AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, International Validation Branch, FAA; or Transport Canada; or Bombardier, Inc.'s Transport Canada Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(j) Additional Information

For more information about this AD, contact Jonathan Duong, Aviation Safety Engineer, FAA, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; phone: 516–228–7300; email: *9-avs-nyaco-cos@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the material listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this material as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Transport Canada AD CF–2025–40, dated August 20, 2025.

(ii) [Reserved]

(3) For Transport Canada material identified in this AD, contact Transport Canada, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *TC.AirworthinessDirectives-Consignesdenavigabilite.TC@tc.gc.ca.* You may find this material on the Transport Canada website at *tc.canada.ca/en/aviation.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, visit *www.archives.gov/federal-register/cfr/ibr-locations* or email *fr.inspection@nara.gov.*

Issued on July 13, 2026.

Steven W. Thompson,

Acting Deputy Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R03–OAR–2026–3764; FRL–13384–02–R3]

Air Plan Approval; Pennsylvania; Reasonably Available Control Technology (RACT) for Volatile Organic Compounds (VOC) Control Technique Guidelines (CTG) Under the 2008 and 2015 Ozone National Ambient Air Quality Standards (NAAQS)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve four state implementation plan (SIP) revisions submitted by the Commonwealth of Pennsylvania received on May 10, 2023, January 20, 2026, February 17, 2026, and April 10, 2026, through the Pennsylvania Department of Environmental Protection (PADEP). The SIP revisions address reasonably available control technology (RACT) requirements for the 2008 and 2015 ozone national ambient air quality standards (NAAQS) relating to control technique guidelines (CTGs) for volatile organic compounds (VOC) via previously adopted CTG regulations, three new CTG regulations and four facilities covered by the CTG for the Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins respectively. This action is being taken under the Clean Air Act (CAA).

DATES: Written comments must be received on or before August 17, 2026.

ADDRESSES: Submit your comments, identified by Docket ID No EPA–R03–OAR–2026–3764 at *https://www.regulations.gov,* or via email to *gordon.mike@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. For either manner of submission, the EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be confidential business information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment

contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *www.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Sean Silverman, Planning & Implementation Branch (3AD30), Air & Radiation Division, U.S. Environmental Protection Agency, Region III, 1600 John F Kennedy Boulevard, Philadelphia, Pennsylvania 19103. The telephone number is (215) 814–5511. Mr. Silverman can also be reached via electronic mail at *silverman.sean@epa.gov.*

SUPPLEMENTARY INFORMATION: On January 20, 2026 PADEP submitted a revision to its SIP certifying that through a combination of: (1) regulations previously approved into the SIP; (2) regulations proposed to be approved into the SIP; and (3) portions of redacted permits proposed to be incorporated into the SIP that RACT is being implemented for VOC sources covered by a CTG to meet Pennsylvania's RACT requirements under the CAA and implementing regulations for the 2008 and 2015 Ozone NAAQS. PADEP submitted four SIP revisions to accomplish this (herein collectively referred to as the VOC CTG RACT SIP). A description of these submissions is summarized below.

On May 10, 2023, PADEP submitted the first of the four revisions to its SIP establishing RACT requirements to control VOC emissions from sources covered by the following CTGs: (1) Shipbuilding and Ship Repair Operations (Surface Coating), 61 FR 44050 (August 27, 1996);[1] (2) Large Petroleum Dry Cleaners, EPA–450/3–82–009;[2] (3) Control of Volatile Organic Compound Leaks from Synthetic Organic Chemical Polymer and Resin Manufacturing Equipment, EPA–450/3–83–006;[3] (4) Control of Volatile Organic Compound Emissions from Air Oxidation Processes in Synthetic Organic Chemical Manufacturing Industry (SOCMI), EPA–450/3–84–015;[4] and (5) Control of Volatile Organic Compound Emissions from Reactor Processes and Distillation Operations in Synthetic Organic Chemical Manufacturing Industry, EPA–450/4–91–031.[5]

On January 20, 2026, a second SIP submission was received which contained supporting analysis for all four SIP submissions demonstrating that the submittals meet VOC CTG RACT requirements for the 2008 and 2015 Ozone NAAQS. The bulk of this submission relates to PADEP's previously adopted regulations and associated analysis.

On February 17, 2026, a third SIP submission was received containing portions of three redacted permits for specific facilities. In lieu of adopting new regulations to address VOC CTG RACT from manufacturing high density polyethylene, polypropylene and polystyrene resins (CTG EPA 450–3–83–008, November 1983),[6] PADEP seeks to incorporate by reference into the Pennsylvania SIP portions of redacted permits for each source subject to this CTG. The February 17, 2026 SIP submission certifies that these redacted permits contain conditions that are consistent with or more stringent than the CTG and implement VOC CTG RACT Requirements for these sources for the 2008 and 2015 Ozone NAAQS. The February 17th submission contained the redacted permits for Multiplastic Extrusions Hazelton (permit 40–00083), Rohm & Haas Co Bristol (permit 09–00015), and Shell Chemical Appalachia (permit 04–00740).

On April 10, 2026, a fourth SIP submission was received from PADEP certifying that a permit for the BASF Monaca Plant (permit 04–00306), which was submitted to and approved by the EPA as RACT for the 1997 ozone NAAQS, meets or exceeds the CTG for controlling VOC emissions from manufacturing high density polyethylene, polypropylene and polystyrene resins (EPA–450/3–83–008, November 1983) and remains sufficient to implement VOC CTG RACT for the 2008 and 2015 ozone NAAQS.

As explained below, the EPA is proposing to approve each of these four SIP revisions. Based on this proposed approval, in the Rules and Regulations section in this **Federal Register**, the EPA is simultaneously issuing an interim final determination (IFD) that Pennsylvania's four SIP revisions address the deficiencies cited as the basis of the EPA's August 16, 2024 final disapproval (August 2024 disapproval) of certain portions of Pennsylvania's 2008 VOC CTG RACT regulations. The effect of the IFD is to stay emission offset sanctions and defer the imposition of highway funding sanctions triggered by the EPA's August 2024 disapproval of a prior Pennsylvania SIP submission addressing VOC CTG RACT for the 2008 ozone NAAQS. Comments on the IFD should be submitted in accordance with the instructions in that action.

I. Background

A. Ozone NAAQS and RACT Requirements

On July 18, 1997, the EPA promulgated a revised standard for ground level ozone based on 8-hour average concentrations.[7] The 8-hour averaging period replaced the previous 1-hour averaging period adopted in 1979, and the level of the NAAQS was changed from 0.12 parts per million (ppm) to 0.08 ppm. On March 27, 2008, the EPA further strengthened the 8-hour ozone standards from 0.08 ppm to 0.075 ppm (2008 8-hour ozone NAAQS).[8] On October 26, 2015, the EPA adopted another revision to the ozone standard by strengthening the 8-hour ozone standards to 0.070 ppm (2015 ozone NAAQS), but the 2008 ozone standard remains in effect.[9] This action concerns VOC CTG RACT requirements, described in more detail below, under both the 2008 and 2015 8-hour NAAQS.

The CAA addresses emissions of NO_X and VOC to prevent photochemical reactions that result in ozone formation. Section 182(b)(2) of the CAA requires states with ozone nonattainment areas classified as Moderate or higher to submit a SIP revision requiring the implementation of RACT. The EPA has consistently defined ''RACT'' as the lowest emission limit that a particular source is capable of meeting by the application of the control technology that is reasonably available considering

[1] The CTG for Shipbuilding and Ship Repair Operations (Surface Coating) has no standalone document, it is a combination of the information in 61 FR 44050 (Aug. 27, 1996) and the previously published ACT. Alternative Control Technology Document—Surface Coating Operations at Shipbuilding and Ship Repair Facilities.

technological and economic feasibility.[10]

The CAA requires RACT revisions for three specific categories of sources for the ozone NAAQS. First, CAA section 182(b)(2)(A) requires RACT for each category of VOC sources in the nonattainment area covered by a CTG document issued by the EPA between November 15, 1990 and the date of attainment.[11] Second, CAA section 182(b)(2)(B) requires RACT for all VOC sources in the area covered by any CTG issued before November 15, 1990. Third, CAA section 182(b)(2)(C) requires RACT for all other major stationary sources of VOC located in the nonattainment area. In addition, CAA section 182(f) subjects major stationary sources of NO_X to the same RACT requirements applicable to major stationary sources of VOC.[12] The EPA has not issued any CTGs for categories of NO_X sources, so the effect of CAA section 182(f) is to require that SIPs also mandate RACT for major stationary sources of NO_X in accordance with CAA section 182(b)(2)(C). The ozone RACT requirements under CAA section 182(b)(2) are usually referred to as VOC CTG RACT, non-CTG VOC RACT, and major NO_X RACT. In addition, section 184(a) of the CAA established an Ozone Transport Region (OTR) comprised of 12 eastern states, including all of Pennsylvania, and the District of Columbia. CAA section 184(b)(1)(B) requires implementation of RACT with respect to all sources of VOCs in an OTR state that are covered by a CTG issued before or after November 15, 1990. These OTR RACT requirements for CTG sources apply throughout the Commonwealth of Pennsylvania.

On March 6, 2015, the EPA published a final rule that outlined the obligations related to required SIP requirements for the 2008 8-hour ozone NAAQS.[13] This proposed rulemaking, herein referred to as the ''2008 ozone implementation rule,'' contained, among other things, a description of the EPA's expectations for states with RACT obligations. The 2008 ozone implementation rule indicated that states could meet RACT with: (1) the establishment of new or more stringent requirements that meet RACT control levels; (2) a certification that previously adopted RACT controls in their SIP, under a prior ozone NAAQS, represent adequate RACT control levels for the 2008 8-hour ozone NAAQS; or (3) a combination of these two approaches. In addition, a State could submit a negative declaration in instances where, for a particular CTG, there are no sources within the State covered by that CTG.[14]

In the EPA's 2008 ozone implementation rule, the Agency explains that ''states should refer to the existing CTGs and ACTs for purposes of meeting their RACT requirements, as well as all relevant information (including recent technical information and information received during the public comment period) that is available at the time that they are developing their RACT SIPs. . . .'' [15] The EPA's Implementation Rule for the 2015 ozone NAAQS retains the existing general 2008 RACT requirements.[16]

B. Challenge to Approval, Court Proceedings, Voluntary Remand, Reconsideration and Partial Disapproval

On August 13, 2018, PADEP submitted to the EPA two SIP revisions to satisfy certain RACT requirements for sources of VOC emissions required by sections 182(b)(2) and 184(b)(l)(B) of the CAA and the implementing regulations for the 2008 8-hour ozone NAAQS.[17]

On December 14, 2020, the EPA published a full approval of PADEP's two August 13, 2018 SIP submittals.[18] The approval was challenged in the U.S. Court of Appeals for the Third Circuit, and on September 3, 2021, that court granted the EPA's request for remand without vacatur of the Agency's final full approval.[19]

A petitioner filed litigation in the Eastern District of Pennsylvania on May 16, 2023, arguing the EPA had unreasonably delayed in its reconsideration of the final approval of the August 13, 2018 SIP submittals. On December 15, 2023, the court filed a consent decree requiring that the EPA complete its reconsideration of the December 14, 2020 final rule by November 15, 2024.[20]

After reconsideration, the EPA partially approved and partially disapproved the August 13, 2018 submittals on August 16, 2024 (August 2024 disapproval).[21] Specifically, the EPA approved certain clarifying amendments as well as a negative declaration submitted by PADEP. The EPA disapproved the remainder of both SIP submittals related to CTGs and control of VOC emissions from industrial cleaning solvents for the 2008 8-hour ozone NAAQS. In that disapproval, the EPA determined that it erred in previously approving the VOC CTG RACT portion of PADEP's RACT certification SIP, as the record did not provide sufficient support that the regulations identified by PADEP implemented the VOC CTG RACT requirements of the 2008 8-hour ozone NAAQS. As clarified in the 2008 implementation rule, RACT analyses should consider any technical advances since previous approvals of the RACT rules and provide evidence that other relevant information, including recent technical information and information available at the time of adoption, were considered to determine RACT.[22] PADEP did not provide this analysis in the August 2018 submittals. The EPA therefore concluded that PADEP's SIP submittals did not fully evaluate VOC RACT CTG requirements. See the EPA's Notice of Proposed Rulemaking and Final Rulemaking for that action for a complete discussion of these issues.[23]

The EPA's August 2024 disapproval action commenced a sanctions clock under CAA section 179, providing for emission offset sanctions for new or modified sources within the Commonwealth if the EPA has not fully approved a revised plan within 18 months of the effective date of the final disapproval (March 16, 2026), and providing for highway funding sanctions in affected nonattainment areas if the EPA has not fully approved a revised plan within six months of the imposition of offset sanctions (September 16, 2026). The sanctions clock can be stopped only if the

[10] *See* memorandum from Roger Strelow, Assistant Administrator for Air and Waste Management, to Regional Administrators, ''Guidance for Determining Acceptability of SIP Regulations in Non-Attainment Areas,'' and 44 FR 53761, 53762 (Sept. 17, 1979).

[11] The EPA provides states with guidance concerning what types of controls could constitute RACT for a given source category through the issuance of CTG and alternative control technique (ACT) documents.

[12] A ''major source'' is defined based on the source's potential to emit NO_X or VOC, and the applicable ton per year emission thresholds defining a ''major'' source differ based on the classification of the nonattainment area in which the source is located. *See* sections 182(c) through (f) and 302 of the CAA.

[20] A copy of the court order is located in the docket for this action. Docket Id. EPA–R03–OAR–2026–3764 in *regulations.gov*.

[21] *See* 89 FR 66599 (Aug. 16, 2024).

[22] As explained in this document, EPA defines RACT as the lowest emission limit that a particular source is capable of meeting by the application of the control technology that is reasonably available considering technological and economic feasibility.

[23] *See* 89 FR 43359 (May 17, 2024) and 89 FR 66599 (Aug. 16, 2024).

conditions of the EPA's regulations at 40 CFR 52.31 are met.

However, as referenced above, in a separate action concurrent with this proposed approval, the EPA has issued an IFD that Pennsylvania's SIP Revisions submitted on May 10, 2023, January 20, 2026, February 10, 2026 and April 10, 2026 resolve the deficiencies which the EPA cited in the August 2024 disapproval action specific to VOC CTG RACT for the 2008 8-hour ozone NAAQS. The IFD stays the emission offset sanctions and defers the imposition of highway funding sanctions triggered by the EPA's August 2024 disapproval.

Pursuant to CAA section 110(c)(1)(B), August 2024 disapproval also initiated an obligation for the EPA to promulgate a Federal implementation plan (FIP) within 24 months unless PADEP has submitted, and the EPA has fully approved, a plan addressing the applicable VOC CTG RACT requirements.

II. Summary of SIP Revision and the EPA Analysis

A. Certifying Adopted Control Technique Guidelines Regulations as VOC CTG RACT

In this section, the EPA outlines its review, analysis and conclusions regarding PADEP's previously adopted VOC CTG RACT regulations addressed in the January 20, 2026 submission as well as its newly adopted CTG regulations addressed in the May 10, 2023 submission. PADEP performed, and the EPA evaluated and supplemented a RACT due diligence analysis, described in more detail below. The EPA's analysis and supplemented information is available in the EPA's technical support document (TSD). PADEP's original analysis for both the previously adopted and newly adopted regulations is available in appendices A–2 and B–2 of the Commonwealth's January 20, 2026 SIP submission.[24] The EPA has not identified any new control technologies that are reasonably available considering technological and economic feasibility for these sources. Pursuant the EPA's review of PADEP's submissions, the EPA is proposing to determine that the VOC controls for the CTG categories in table 1, in this document, that were addressed in previously adopted regulations, still represent VOC CTG RACT for implementing the 2008 and 2015 ozone NAAQS in the Commonwealth of Pennsylvania.[25]

On October 1, 2024, the EPA approved Pennsylvania's VOC CTG RACT regulation for the Oil and Natural Gas Industry (EPA –453/B–16–001, October, 2016).[26] Pennsylvania submitted this regulation in response to a November 16, 2020, and a December 16, 2021 Finding of Failure to Submit.[27] The EPA's approval occurred after the August 2024 disapproval. This approval satisfies Pennsylvania's Oil and Gas CTG requirements for the 2008 and 2015 Ozone NAAQS, see docket EPA–R03–OAR–2023–0300 for details. As a SIP approved regulation is already in place for this CTG, the EPA will not take action on PADEP's Oil and Gas CTG regulation in this proposed rulemaking.

The EPA is also proposing to determine that based on its review of PADEP's analysis, the State regulations contained in the May 10, 2023 SIP submission (see table 2 in this document) are sufficient to implement VOC CTG RACT requirements for the 2008 and 2015 Ozone Standards for SOCMI, Shipbuilding and Large Petroleum Dry Cleaning Categories.[31] The rationale is provided in the EPA's TSD and PADEP's analysis is available in the Commonwealth's January 20, 2026 SIP submission. Pennsylvania has no existing Large Petroleum Dry Cleaning facilities and an approved negative declaration.[32] The negative declaration from the EPA's December 14, 2020 approval was retained, not disapproved, in the EPA's August 16, 2024 reconsideration.[33] Pennsylvania is reaffirming in the January 20, 2026 submission that there are no existing sources in this category and that the negative declaration remains. See PADEP's ''2015 RACT Certification Document'' Section 7, in PADEP's January 20, 2026 submission for supporting information.[34]

[28] The CTG regulations for wood furniture coating and ship building are listed in table 1, CTG source category 42 of this document and table 2, CTG source category 46.

[29] The EPA approved PADEP's RACT SIP revision under the 1997 ozone NAAQS, including a negative declaration for this CTG on July 7, 2017 (82 FR 31464). PADEP's SIP revision noted that eight (8) sources previously coded in PADEP's stationary source inventory as flat wood paneling were recoded in the 2005 Air Information Management System (AIMS) to correctly reflect their operations as wood furniture and cabinet manufacturing. Pennsylvania's CTG based rule for flatwood paneling surface coating processes, 25 Pa. Code § 129.52c, was based on the 2006 CTG for Flat Wood Paneling Coating which is more stringent than the 1978 CTG for Surface Coating of Flat Wood Paneling.

[30] These are being approved as SIP strengthening measures, see section B number 21 and 22 of EPA's TSD located in the docket for this action for supporting analysis. Docket Id. EPA–R03–OAR–2026–3764 in *regulations.gov*.

[31] *See* section B of the EPA's TSD located in the docket for this action for supporting analysis. Docket Id. EPA–R03–OAR–2026–3764 in *regulations.gov*.

TABLE 2—NEW VOC CTG RACT REGULATIONS FOR SOCMI, SHIPBUILDING AND LARGE PETROLEUM DRY CLEANERS

CTG source category	Pa. regulation title 25. environmental protection, chapter 129	RACT basis document	SIP revision approved by the EPA (date and citation)
43. SOCMI Distillation and Reactor Processes.	SOURCES OF VOC: Section 129.71—Synthetic organic chemical and polymer manufacturing—fugitive sources. SOURCES OF VOC: Added new section 129.71a—Control of VOC emissions from the synthetic organic chemical manufacturing industry—air oxidation, distillation and reactor processes.	CTG: Control of Volatile Organic Compound Emissions from Reactor Processes and Distillation Operations Processes in the Synthetic Organic Chemical Manufacturing Industry, EPA-450/4-91-031, August 1993.	Submission date: 5/12/23. PADEP is requesting that EPA approves and incorporates amended 25 Pa. Code Chapter 121.1, and newly added 25 Pa. Code 129.71a as part of the Commonwealth's SIP. 25 Pa. Code 129.71 is already approved into the SIP, as noted in Table 1.
44. Large petroleum dry cleaners	SOURCES OF VOC: Pennsylvania added new section 25 Pa. Code Chapter 129.63b.	CTG: Control of VOC emissions from large petroleum dry cleaners EPA–450/3–82–009, September 1982.	Submission date: 5/12/23. PADEP is requesting that EPA approves and incorporates 25 Pa. Code Chapter 129.63b as part of the Commonwealth's SIP.
45. SOCMI Air Oxidation, Processes ...	SOURCES OF VOC: Section 129.71—Synthetic organic chemical and polymer manufacturing—fugitive sources.. SOURCES OF VOC: Section 129.71a—Control of VOC emissions from the synthetic organic chemical manufacturing industry—air oxidation, distillation and reactor processes.	CTG: Control of VOC emissions from the synthetic organic chemical manufacturing industry (SOCMI)—air oxidation, EPA–450/3–84–015, December 1984.	Submission date: 5/12/23. PADEP is requesting that EPA approves and incorporates 25 Pa. Code Chapter 129.71a as part of the Commonwealth's SIP.
46. Shipbuilding and ship repair facilities with surface coating operations.	Pennsylvania amended 25 Pa. Code Chapter 129.52.	CTG: Control of VOC emissions from the shipbuilding and ship repair facilities with surface coating operations, 61 FR–44050, August 1996.	Submission date: 5/12/23. PADEP is requesting that EPA approves and incorporates amendments made to 25 Pa. Code Chapter 129.52 as part of the Commonwealth's SIP.

Pennsylvania conducted its RACT analysis for CTGs by: (1) identifying all applicable categories of CTGs within the Commonwealth; (2) listing the Commonwealth regulation that implements RACT requirements for each CTG; (3) submitting a negative declaration when there are no CTG applicable sources within the Commonwealth; and (4) performing a due diligence analysis on each CTG regulation.

Pennsylvania performed the due diligence analyses in accordance with the EPA's December 19, 2024 ''Due Diligence Review Framework for Air Agencies Developing RACT SIP Revisions,'' to demonstrate that its CTG RACT submittals for the Commonwealth are sufficient to meet VOC CTG RACT requirements under the 2008 and 2015 ozone NAAQS.[35] In Appendix A–2 and B–2 of the January 20, 2026 submission, the Commonwealth details the basis for concluding that its SIP submittals fulfill VOC CTG RACT through comparison with RACT rules developed by other States, CTG documents, results from the review of the RACT/BACT/LAER clearinghouse (RBLC), and other readily available resources. See the EPA's TSD for the EPA's own analysis and summary of PADEP's SIP submission.

B. Certifying Permits for Facilities Covered by the CTG for the Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins as VOC CTG RACT

Pennsylvania does not have regulations for sources covered by the CTG for the Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins [36] located in the Commonwealth. Rather than adopt categorical rules for sources falling into this CTG category, Pennsylvania requested that the EPA approve specific portions of source-specific, federally enforceable permits for the pertinent facilities for incorporation into the Pennsylvania SIP, listed in table 3, in this document. Three of these permits were submitted to the EPA as a SIP revision on February 17, 2026.

[35] *See* Ozone NAAQS Resource Document: Due Diligence Review Framework for Air Agencies Developing RACT SIP Revisions *www.epa.gov/ground-level-ozone-pollution/resource-document-air-agencies-developing-ract-sip-revisions-ozone.*

[36] *See* EPA–450/3–83–008, Nov. 1983 available at *nepis.epa.gov/Exe/ZyPDF.cgi?Dockey=000029VI.txt.*

TABLE 3—PERMITS FOR FACILITIES COVERED BY THE CTG FOR THE MANUFACTURE OF HIGH-DENSITY POLYETHYLENE, POLYPROPYLENE, AND POLYSTYRENE RESINS

[EPA–450/3–83–008]

Facility name	Permit No.
MULTI PLASTICS EXTRUSIONS INC/HAZLETON	40–00083
ROHM & HAAS CO/BRISTOL	09–00015
SHELL CHEMICAL APPALACHIA	04–00740
BASF MONACA *	04–00306

* Previously approved by the EPA as RACT for the 1997 ozone NAAQS (see 66 FR 52705 October 17, 2001).

A fourth facility, BASF Monaca (04–00306), was also determined to have equipment subject to this CTG. CTG Requirements for the affected sources in Permit No 04–00306 were previously approved by the EPA as RACT for the 1997 ozone NAAQS at the BASF Monaca Plant.[37] After reviewing the conditions in this permit, PADEP determined that RACT requirements applicable to subject sources at BASF, that are already approved into the SIP for the 1997 ozone NAAQS, remain adequate to implement VOC CTG RACT for the 2008 and 2015 ozone NAAQS. A Certification SIP was submitted to the EPA on April 10, 2026 and was based on the due diligence analysis outlined in section C of the EPA's TSD.

The EPA is proposing to approve specific portions of the initial three permits listed in Table 3, in this document, (40–0083, 09–00015,04–00740) for incorporation into the SIP to fulfill the Commonwealth's VOC CGT RACT requirements for the category of sources covered by the CTG for the Manufacture of High-Density Polyethylene, Polypropylene, and Polystyrene Resins for the 2008 and 2015 Ozone NAAQS. These redacted permits that the EPA proposes for incorporation by reference were included in the February 17, 2026 SIP submission. Additionally, the EPA is proposing to determine that the controls in the BASF permit (04–00306), that were previously approved into the SIP to fulfill the 1997 ozone RACT requirements for this CTG, remain VOC CTG RACT for the 2008 and 2015 ozone NAAQS.

III. Proposed Action

The EPA's review of these materials indicates that PADEP's submittals are adequate to meet the ozone-specific RACT requirements for VOC CTG sources of CAA sections 172(c)(1), 182(b)(2)(A) and (B) and 184(b)(1)(B) of the CAA, for the 2008 and 2015 8-hour ozone NAAQS and are in accordance with CAA section 110. Therefore, the EPA is proposing to approve the four Pennsylvania SIP revisions relating to VOC CTG RACT for the 2008 and 2015 ozone NAAQS, which were submitted on May 10, 2023, January 20, 2026, February 17, 2026, and April 10, 2026. Consistent with this proposed finding, the EPA also proposes that these materials are sufficient to address the deficiencies outlined in the August 2024 disapproval.

The following bullets were adapted from the August 2024 disapproval final rule publication in 89 FR 66599, August 16, 2024, section IV, labeled ''Final Action.'' Accompanying these bullets are a brief explanation of how the May 10, 2023, January 20, 2026, February 17, 2026, and April 10, 2026, submissions address the deficiencies outlined in that disapproval action.

- In the August 16, 2024 (89 FR 66599) final rule, the EPA disapproved PADEP's certification that their adoption and implementation of regulations to control VOC emissions is consistent with the EPA's CTGs and represents RACT for these covered CTG sources for the 2008 ozone standard. The EPA determined that it erred in previously approving the CTG portion of PADEP's RACT certification SIP, as there was insufficient support in the record that the identified provisions fulfilled the RACT requirements of the 2008 8-hour ozone NAAQS for CTG sources. The January 20, 2026 submission contains extensive technical analysis for all of the PADEP's VOC CTG RACT regulations. In this action, the EPA is proposing that this analysis is sufficient to demonstrate that these provisions meet VOC CTG RACT requirements for the 2008 and 2015 Ozone NAAQS, thus resolving this issue.
- In the August 16, 2024 final rule, the EPA disapproved PADEP's incorporation of specific permit conditions for the purpose of establishing source-specific RACT-level controls for three facilities. Two facilities were subject to the ''Shipbuilding/Repair ACT (EPA 453/R–94–032, April 1994) and the EPA's CTG for Shipbuilding and Ship Repair Operations (Surface Coating) (61 FR 44050, August 27, 1996)'' and one facility was subject to ''Control of Volatile Organic Compound Emissions from Air Oxidation Processes in Synthetic Organic Chemical Manufacturing Industry, EPA–450/3–84–015, December 1984.'' Rather than promulgate a rule to address the RACT requirements of those CTGs for only three affected sources, PADEP incorporated the requirements of the CTGs into Federally enforceable permits and submitted the applicable permit limits for incorporation into the SIP. The EPA determined that the record did not support its conclusion that these permits met VOC CTG RACT requirements and disapproved those components of the submission. The May 12, 2023 submission contains new Rules for the Control of VOC emissions from the synthetic organic chemical manufacturing industry (SOCMI) air oxidation, (EPA–450/3–84–015, December 1984), Control of Volatile Organic Compound Emissions from Reactor Processes and Distillation Operations Processes in the Synthetic Organic Chemical Manufacturing Industry, (EPA 450/4 91 031, August 1993) and Shipbuilding and Ship Repair Facilities with Surface coating operations (See 61 FR–44050 August 1996). The submission also contains extensive technical analysis. The EPA is proposing that these newly adopted regulations and accompanying technical analysis demonstrate that these rules are sufficient to meet VOC CTG RACT for the 2008 and 2015 Ozone Standard, thus resolving this issue.
- In the August 16, 2024 final rule, the EPA disapproved the addition of 25 Pa. Code 129.63a (relating to the control of VOC from industrial cleaning solvents (ICS)) and the amendments to 25 Pa. Code sections 121.1 and 129.51, as PADEP's analysis did not look beyond the CTG requirements. PADEP's January 20, 2026 submission contains extensive technical analysis looking at resources beyond the CTG. This analysis can be reviewed in the attached TSD. The EPA is proposing in this action that this analysis demonstrated that PADEP's

[37] *See* 66 FR 52705, (Oct. 17, 2001).

Industrial Cleaning Solvent CTG is sufficient to meet VOC CTG RACT for the 2008 and 2015 Ozone Standard, thus resolving these issues.

The EPA is soliciting public comments on this proposed approval. These comments will be considered before taking final action.

IV. Incorporation by Reference

In this document, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the amendments to 25 Pa. Code Chapters 121.1, 129.52, and newly added 25 Pa. Code Chapters 129.63b and 129.71a effective January 21, 2023 (see annex A of the May 10, 2023 submission). The EPA is also proposing to incorporate by reference portions of permits described in section II of this document as redacted in Pennsylvania's February 20, 2026 SIP revision. The EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region III Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Clean Air Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve State choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Is not an Executive Order 14192 (90 FR 9065, February 6, 2025) regulatory action because this action is not significant under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it approves a State program;
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001); and
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act.

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian Tribe has demonstrated that a Tribe has jurisdiction. In those areas of Indian country, the rule does not have Tribal implications and will not impose substantial direct costs on Tribal governments or preempt Tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[EPA–R07–OAR–2026–4952; FRL–13457–01–R7]

Approval and Promulgation of State Plan (Negative Declaration) for Designated Facilities and Pollutants; Nebraska; Commercial and Industrial Solid Waste Incineration Units

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to accept a negative declaration submitted by the Nebraska Department of Water, Energy, and Environment (NDWEE) to satisfy the emission guidelines and associated compliance times requirements for Commercial and Industrial Solid Waste Incineration (CISWI) units for the State of Nebraska. The negative declaration certifies that there are no existing sources within the jurisdiction of Nebraska that must comply with the rule. This action is being taken in accordance with the Clean Air Act (CAA) requirements for emission guidelines and state plans for existing sources. In the ''Rules and Regulations'' section of this **Federal Register**, we are approving the State's negative declaration submission as a direct final rule without a prior proposed rule. If we receive no adverse comment, we will not take further action on this proposed rule.

DATES: Comments must be received by August 17, 2026.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R07–OAR–2026–4952, to *https://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Allyson Prue, Environmental Protection Agency, Region 7 Office, Air Quality Planning Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; telephone number: (913) 551–7277; email address: *prue.allyson@epa.gov.*

SUPPLEMENTARY INFORMATION: This document proposes to take action on approving the State of Nebraska's negative declaration, submitted in accordance with 40 CFR 60.23(b) and 62.06, to satisfy requirements in the emission guidelines and compliance times for CISWI units. We have

published a direct final rule approving the State's negative declaration submission in the ''Rules and Regulations'' section of this **Federal Register**, because we view this as a noncontroversial action and anticipate no relevant adverse comment. We have explained our reasons for this action in the preamble to the direct final rule. If we receive no adverse comment, we will not take further action on this proposed rule. If we receive adverse comment, we will withdraw the direct final rule and it will not take effect. We would address all public comments in any subsequent final rule based on this proposed rule. We do not intend to institute a second comment period on this action. Any parties interested in commenting must do so at this time. For further information, please see the information provided in the **ADDRESSES** section of this document.

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Part 493

[CMS–3485–NC]

RIN 0938–AW01

Request for Information; Clinical Laboratory Improvement Amendments of 1988 (CLIA) Regulations

AGENCY: Centers for Medicare & Medicaid Services (CMS) and Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Request for information.

SUMMARY: Clinical laboratory testing technology has advanced significantly since the Clinical Laboratory Improvement Amendments of 1988 (CLIA) regulations were implemented in 1992. This request for information (RFI) seeks input from the public regarding various topics related to the CLIA regulations, including: breath testing; laboratory processes and procedures; emergency preparedness, biosafety and biosecurity, and cybersecurity; and specialty testing areas. Responses to this RFI may be used to help inform CMS and the CDC as to what types of action, if any, should be taken to update the existing CLIA regulations through future notice and comment rulemaking.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, by September 14, 2026.

ADDRESSES: In commenting, refer to file code CMS–3485–NC.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation at *https://www.regulations.gov/docket/CMS-2026-2345.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–3485–NC, P.O. Box 8016, Baltimore, MD 21244–8016.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–3485–NC, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT:

Penny Keller at *penny.keller@cms.hhs.gov,* 410–786–2035.

Jake D. Bunn at *jbunn@cdc.gov,* 404–498–4493.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *https://www.regulations.gov.* Follow the search instructions on that website to view public comments. CMS will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the commenter will take actions to harm an individual. CMS continues to encourage individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

I. Background

On October 31, 1988, Congress enacted the Clinical Laboratory Improvement Amendments of 1988 (CLIA) (Pub. L. 100–578), which amended section 353 of the Public Health Service Act (PHSA). CLIA requires all facilities that examine materials derived from the human body for purposes of providing information for the diagnosis, prevention, or treatment of any disease or impairment of, or the assessment of the health of, human beings to obtain a certificate from HHS. CLIA also requires such facilities to meet certain requirements such as maintaining a quality assurance and quality control program adequate and appropriate for the validity and reliability of the laboratory examinations and other procedures of the laboratory and maintaining laboratory personnel standards. The implementing regulations at 42 CFR part 493 specify, in part, the conditions and standards that a clinical laboratory must meet to achieve and maintain CLIA certification. These conditions and standards strengthen Federal oversight of clinical laboratories and help ensure the accuracy and reliability of patient test results.

II. Solicitation of Public Comments

This RFI seeks public comments on various topics related to the CLIA regulations. CMS and the CDC are issuing this RFI to gather input from the public regarding the following topics related to the CLIA regulations: (A) breath testing; (B) laboratory processes and procedures; (C) emergency preparedness, biosafety and biosecurity, and cybersecurity; and (D) specialty testing areas. CMS, the CDC, interested parties, and State Agency surveyors identified the topics in this RFI as areas in which the CLIA regulations may need to be updated to better reflect current knowledge and advancements in laboratory testing. Commenters are encouraged to identify the specific section and question number(s) (for example, Section A. Breath Testing, Question 1; Section B. Laboratory Processes and Procedures, Subsection 2. Specimen Preparation Activities and Personnel, Question 2) addressed in each portion of their submission and to organize comments consistent with the

structure of this RFI. We encourage input from a wide variety of interested parties on the questions set forth in this RFI.

A. Breath Testing

CMS and the CDC believe that testing using certain newer technologies may fall within the scope of CLIA and its implementing regulations because they may involve examination of ''materials derived from the human body for purposes of providing information for the diagnosis, prevention, or treatment of any disease or impairment of, or the assessment of the health of, human beings.'' For example, when the CLIA regulations were promulgated in 1992 (57 FR 7002),[1] breath testing had not yet been developed for clinical use and was only utilized for purposes of law enforcement. However, during the SARS-CoV–2 (COVID–19) Public Health Emergency (PHE), researchers and manufacturers developed breath tests for COVID–19, demonstrating an increased interest in expanding its clinical application. As breath testing is not specifically addressed in the current CLIA regulations, CMS has received inquiries regarding whether breath testing for cancer diagnosis, microbial identification, and gastrointestinal disorders is subject to CLIA and its implementing regulations.

CMS and the CDC seek public comments on breath testing used in clinical settings to inform whether updates to the CLIA regulations should be considered. In addition, we seek input on the following specific questions:

1. What breath tests are facilities performing for clinical use?
2. What methodologies and technologies do facilities use in breath testing for clinical use?
3. What type of facilities (such as hospitals, gastrointestinal clinics, and reference laboratories) perform breath testing for clinical use?
4. How do facilities collect, transport, and store clinical breath specimens? What challenges, if any, are encountered?

B. Laboratory Processes and Procedures

1. Pathology Specimen Block Retention

The CLIA regulatory requirement at § 493.1105(a)(7)(ii) currently stipulates that pathology specimen blocks must be retained for a minimum period of 2 years. However, advancements in molecular diagnostics now enable laboratories to perform retrospective testing on tissues more than 2 years old.

CMS and the CDC seek public comments on laboratories' experience with requests for additional testing on pathology specimen blocks beyond the required 2-year retention period. Specifically, we seek input on the following question:

1. What types of requests does the laboratory receive for additional testing on pathology specimen blocks after the required 2-year retention period, and how frequently does the laboratory receive them?

2. Specimen Preparation Activities and Personnel

The preanalytic phase of laboratory testing encompasses all processes that occur before the analytical testing, including specimen collection, preparation, and handling. The scope of specimen preparation activities is broad, encompassing processes such as centrifuging, aliquoting, tissue processing, slide staining, inoculating culture plates, and extracting ribonucleic acid (RNA) and deoxyribonucleic acid (DNA). At § 493.2, the definition of ''laboratory'' provides that facilities only collecting or preparing specimens (or both) or only serving as a mailing service and not performing testing are not considered laboratories for CLIA certification purposes. Given the critical role that preanalytic processes play in ensuring accurate and reliable test results, and the potential impact of preanalytic errors on patient care, CMS and the CDC are soliciting public comment on the preanalytic practices currently employed by clinical laboratories, as well as the qualifications, education, and experience of personnel responsible for performing these activities. In addition, we seek input on the following specific questions:

1. What activities does the laboratory consider to be part of specimen preparation (for example, centrifuging, aliquoting, loading on analyzers, adding chemicals for preparation, tissue processing, slide staining, inoculating culture plates, DNA/RNA extraction)?
2. What is the education and experience of the personnel who perform specimen preparation activities for your laboratory?
3. What types of training does the laboratory provide for the personnel who perform specimen preparation activities?
4. How does the laboratory ensure that personnel who perform specimen preparation activities remain competent?

3. Suboptimal Specimens

Section 493.1242(a) of the CLIA regulations requires laboratories to establish and follow written policies and procedures for specimen acceptability and rejection. Clinical laboratories sometimes receive specimens in suboptimal conditions that do not meet their specimen acceptability policies and procedures and are asked by providers to perform testing. CMS has received inquiries regarding the handling of suboptimal specimens.

CMS and the CDC seek public comments on how laboratories address suboptimal specimens. In addition, we seek input on the following specific questions:

1. What are the circumstances under which the laboratory tests suboptimal specimens?
2. How often does your laboratory test suboptimal specimens annually?
3. How does the laboratory document and report results from suboptimal specimens?
4. How does the laboratory communicate with ordering providers regarding suboptimal specimens?
5. What quality assurance measures does the laboratory apply to the testing of suboptimal specimens?
6. What challenges does the laboratory face in managing suboptimal specimens while ensuring test result quality?

4. Establishment and Verification of Performance Specifications

The CLIA regulatory requirement at § 493.1253 requires laboratories to verify performance specifications when introducing any unmodified Food and Drug Administration (FDA)-cleared or approved test system, and to establish performance specifications when introducing any test system that is not FDA-cleared or approved, or that is a modification to an FDA-cleared or approved test system. The performance specifications required to be established at § 493.1253(b)(2) include accuracy, precision, analytical sensitivity, analytical specificity to include interfering substances, reportable range of test results for the test system, reference intervals (normal values), and any other performance characteristics required for test performance. CMS has received inquiries regarding the performance specifications of tests that are not FDA-cleared or approved, including modifications to FDA-cleared or approved tests.

[1] *Medicare, Medicaid and CLIA Programs; Regulations Implementing the Clinical Laboratory Improvement Amendments of 1988 (CLIA) Final Rule with Comment Period* (57 FR 7002, February 28, 1992), available at *https://tile.loc.gov/storage-services/service/ll/fedreg/fr057/fr057040/fr057040.pdf.*

CMS and the CDC seek public comments on how laboratories establish performance specifications for tests that are not FDA-cleared or approved, including modifications of FDA-cleared or approved tests. In addition, we seek input on the following specific questions:

1. For tests that are not FDA-cleared or approved, including modifications of FDA-cleared or approved tests, what challenges does the laboratory encounter when establishing adequate performance specifications and appropriate acceptance criteria? Specify the relevant test or procedure associated with such challenges.

2.a. What testing methods (for example, toxicology and next-generation sequencing (NGS)), and/or specific applications of those methods (for example, use of NGS to test for somatic or germline variants, minimal residual disease, methylation, bacterial resistance mutations, viral identification, or HLA matching), have unique performance characteristics that need to be established and are not already addressed in the CLIA regulations or guidance?

2.b. What are those performance characteristics (for example, stability studies, carry-over, internal standards, ionization, and clinical validity)?

3. How does the laboratory currently design, develop, and prepare reagents for tests developed in-house?

4. What types of modifications does the laboratory commonly make to FDA-cleared or approved test systems?

5. Calibration Verification

Calibration verification procedures are critical to ensuring the accuracy and reliability of clinical laboratory test systems. Section 493.1255 requires laboratories performing nonwaived testing to substantiate the continued accuracy of their test systems throughout the laboratory's reportable range of results. Specifically, § 493.1255(b)(1) requires laboratories to follow the manufacturer's calibration verification instructions.

Manufacturers design factory-calibrated, non-adjustable instruments, including closed systems and cartridge-based analyzers such as point-of-care test systems, with embedded reagents and calibration parameters that are locked at the time of manufacture. CMS has received inquiries regarding calibration verification for test systems that manufacturers entirely calibrate, and that end users cannot adjust.

CMS and the CDC seek public comments on calibration verification practices for factory-calibrated, non-adjustable instruments. In addition, we seek input on the following specific question:

1. What technical and operational challenges does the laboratory face when performing calibration verification on FDA-cleared or approved manufacturer-calibrated devices?

6. Postanalytic Interpretation and Use of Artificial Intelligence (AI)

CMS has received multiple inquiries regarding which postanalytic activities CMS considers part of the testing process. Test systems are becoming increasingly complex and integrated with advanced technology and AI systems. Certain software and software functions are subject to regulation as medical devices under the Federal Food, Drug, and Cosmetic Act.

As test systems become increasingly complex, CMS and the CDC seek public comments on the use of advanced technology or AI-assisted interpretation in clinical laboratories and the testing process. In addition, we seek input on the following specific questions:

1. How does the laboratory use software algorithms or AI tools in the postanalytic process?

2. Under what circumstances are software functions, including certain AI tools, used for the interpretation of the results of a test? For example, NGS, histocompatibility, and pharmacogenomics testing.

3. What roles do software functions, including certain AI tools, currently play in the interpretation of histopathology slides or results?

4. What methods do laboratories use to verify the performance of the software functions (including image resolution accuracy and quality, and AI tools as well as the performance of computers and monitors) used with a test system?

5. Are there additional technology considerations for high complexity tests, including but not limited to laboratory use of automation, laboratory use of cloud analytics, and laboratory use of artificial intelligence, that CMS and the CDC should consider incorporating into the CLIA regulations?

7. Data-Only Facilities

Section 493.2 of the CLIA regulations defines a ''laboratory'' as a facility for the biological, microbiological, serological, chemical, immunohematological, hematological, biophysical, cytological, pathological, or other examination of materials derived from the human body for the purpose of providing information for the diagnosis, prevention, or treatment of any disease or impairment of, or the assessment of the health of, human beings. In addition, § 493.2 defines ''distributive testing'' as laboratory testing performed on the same specimen, or an aliquot of it, that requires sharing it between two or more laboratories to obtain all data required to complete an interpretation or calculation necessary to provide a final reportable result for the originally ordered test. When such testing occurs at multiple locations with different CLIA certificates, CMS considers it distributive testing.

Facilities that only process analytical data or provide specialized data interpretation, some of which may be manufacturers of medical device software, have emerged. CMS has received inquiries on whether these types of data-only facilities require a CLIA certificate. These inquiries have in part focused on facilities that review and interpret genetic data, digital images, and perform calculations of risk factors.

CMS and the CDC seek public comments on data-only facilities. In addition, we seek input on the following question:

- What activities do data-only facilities perform to generate, or help to generate, test results and interpretations?

8. Remote Direct Observation Competency Assessment

Sections 493.1413(b)(8)(i) and (iv) and 493.1451(b)(8)(i) and (iv) of the CLIA regulations include direct observation of routine patient test performance and instrument maintenance and function checks as part of the evaluation of testing personnel competency by the technical consultant or technical supervisor. CMS has received requests from laboratories to include remote technology solutions in their competency assessment processes. Interested parties have advocated for the use of virtual competency assessments, particularly noting that facilities in rural areas would benefit from such remote assessment capabilities. At its November 2024 meeting, the Clinical Laboratory Improvement Advisory Committee (CLIAC) recommended that CMS allow remote assessment to be used for the direct observation component of competency assessment.[2] This recommendation included using both on-site and virtual access technology to assess laboratory personnel competency, especially in remote or rural areas where in-person assessments are difficult or expensive.

CMS and the CDC seek public comments, including evidence,

[2] CLIAC November 2024 Meeting Summary, *https://www.cdc.gov/cliac/php/meetings/index.html#cc-widget-e3e3.*

research, and trends on the use of remote technology to conduct the direct observation component of competency assessments for laboratory personnel. In addition, we seek input on the following specific questions:

1. How does the laboratory currently use remote direct observation for competency assessment?

2. What types of devices (for example, smartphones, tablets, virtual reality devices/glasses, and dedicated video systems) does the laboratory currently use for remote direct observation for competency assessment?

3. What challenges or limitations does the laboratory encounter with remote direct observation for competency assessment?

C. Emergency Preparedness, Biosafety and Biosecurity, and Cybersecurity

1. Emergency Preparedness

In 2016, CMS issued the Medicare and Medicaid Programs; Emergency Preparedness Requirements for Medicare and Medicaid Participating Providers and Suppliers final rule,[3] which established national emergency preparedness requirements for certain healthcare provider types to ensure adequate planning for natural disasters, human-caused disasters, facility emergencies, and emerging infectious diseases. However, this rule did not include CLIA-certified independent laboratories in its scope.

A 2025 Office of Inspector General (OIG) Report recommended that CMS consider requiring independent laboratories that participate in Medicare to have emergency preparedness plans to better ensure that Medicare enrollees have access to diagnostic testing related to an emerging infectious disease or a biological toxin in the event of a future PHE.[4] CLIA and its implementing regulations encompass a broad spectrum of laboratories, ranging from physician offices to large reference laboratories. CLIA regulations apply to laboratories, as defined at § 493.2, regardless of their Medicare participation.

CMS and the CDC seek public comments on how laboratories prepare for emergencies and any associated operational challenges. In addition, we seek input on the following specific questions:

1. What are the best practices for laboratory emergency preparedness? Indicate the type of laboratory, for example, hospital-based or independent laboratory.

2. What challenges does the laboratory face in maintaining operations during emergencies such as natural and human-caused disasters, facility emergencies, and emerging infectious diseases?

3. What elements does the laboratory include in its current emergency preparedness plans and protocols?

4. What lessons has the laboratory learned from recent emergency situations (for example, natural disasters, pandemics, and power outages)?

2. Biosafety and Biosecurity

The CLIA regulatory requirement at § 493.1101 requires laboratories to, among other things, establish appropriate safety procedures and comply with applicable Federal, State, and local requirements. Sections 493.1407(e)(2) and 493.1445(e)(2) assign laboratory directors the responsibility for ensuring that physical plant and environmental conditions provide a safe environment in which employees are protected from physical, chemical, and biological hazards.

During the COVID–19 PHE, the CDC provided comprehensive guidance on biosafety and biosecurity protocols, risk assessments, and safety practices for laboratory personnel handling infectious materials.[5] This guidance highlighted the essential role of proper biosafety and biosecurity training in ensuring that laboratory personnel could safely conduct testing procedures while minimizing risks to themselves, their colleagues, and the broader community. This training was essential at the beginning of the COVID–19 PHE, when patient testing volumes and operational demands increased, along with exposure risks for personnel. Throughout the COVID–19 PHE, the CDC received numerous inquiries from laboratories regarding biosafety and biosecurity knowledge and training.

CMS and the CDC seek public comments on biosafety and biosecurity protocols, risk assessments, and safety practices for laboratory personnel handling infectious materials. Respondents should not include any information that might be considered proprietary or confidential. In addition, we seek input on the following specific questions:

1. What challenges does the laboratory face in biosafety and biosecurity?

2. What elements or best practices does the laboratory include in its current biosafety and biosecurity plans and protocols?

3. How does the laboratory train personnel on biosafety and biosecurity plans and protocols?

3. Cybersecurity

Cybersecurity threats across the healthcare sector have expanded in both scope and severity.[6] As clinical laboratories increasingly rely on digital systems and connected technologies—such as Laboratory Information System (LIS), Electronic Health Record (EHR) integration, automated diagnostic devices, and virtual or remote access to laboratory and patient data—new cybersecurity risks have emerged. Various HHS agencies have a role in cybersecurity.

CMS and the CDC seek public comments on laboratory cybersecurity practices and experiences. Respondents should not include any information that might be considered proprietary or confidential. In addition, we seek input on the following specific questions:

1. What cybersecurity protocols/policies does the laboratory have in place to protect patient data and laboratory operations?

1.a. What is the frequency and process you follow to verify new or existing user identity and access requirements?

1.b. Are individuals, entities, or both outside the U.S. and its Territories ever allowed to access your lab systems that contain personal information? If so, when and under what conditions?

1.c. How does your laboratory system(s) restrict ports and/or internet protocol (IP) addresses used to access the environment?

1.d. What elements are included in your cybersecurity incident response plan?

2. What challenges or experiences has the laboratory faced in maintaining cybersecurity?

3. Which laboratory job position(s) is responsible for cybersecurity in the laboratory?

4. How does the laboratory train personnel on cybersecurity?

D. Specialty Testing Areas

1. General

CMS has received inquiries about adding additional specialties to the CLIA regulations, including, but not limited to, Mohs testing, andrology, and molecular testing.

Given the rapid advancements in laboratory medicine, diagnostic technologies, and clinical practice patterns, CMS and the CDC are seeking public comments on operational challenges that laboratories encounter with specialties or subspecialties that are governed by the current CLIA regulations. In addition, we seek input on the following specific questions:

1. What specific challenges or limitations, if any, does your laboratory currently experience with the test specialty and subspecialty categories in the CLIA regulations? For example, are there areas where existing CLIA test specialty and subspecialty categories could be revised to better reflect current laboratory testing practices?

2. Are there additional specialties or subspecialties that CMS and the CDC should consider incorporating into the CLIA regulations to ensure comprehensive oversight of laboratory testing as specialties evolve? Provide evidence-based rationale supporting their inclusion, including considerations related to patient safety, testing complexity, and public health impact.

2. Clinical Cytogenetics

If a laboratory provides services in the specialty of clinical cytogenetics, in addition to requirements in other subparts of Part 493, the laboratory must meet the requirements set forth in §§ 493.1225, 493.1230 through 493.1256, 493.1276, and 493.1281 through 493.1299 of the CLIA regulations.

Clinical cytogenetics provides genetic testing for chromosome abnormalities associated with congenital disorders and cancer. Laboratories employ both conventional cytogenetic and molecular cytogenomic approaches, including fluorescence in situ hybridization (FISH), to analyze genomic abnormalities at chromosomal and subchromosomal levels. Cytogenetic test results are important in managing patients with constitutional genetic conditions and cancer, as well as providing risk assessments for genetic counseling.[7] Over the last 30 years, the field of clinical cytogenetics has seen significant technological advances, including molecular testing.[8]

CMS and the CDC seek public comments on technical advancements in clinical cytogenetic testing. In addition, we seek input on the following specific questions:

1. What clinical cytogenetics test procedures and technologies does the laboratory currently use?

2. What, if any, challenges does the laboratory face with existing CLIA regulations applicable to clinical cytogenetics?

3. Immunohematology

Immunohematology is an area of laboratory medicine that involves the selection and preparation of blood and blood components for transfusion as well as the monitoring of those components following transfusion.[9] Electronic crossmatching systems use computer algorithms to compare patient blood type information and antibody screening results with donor blood characteristics stored in Blood Establishment Computer Systems (BECS). The distinction between traditional serologic crossmatching and electronic crossmatching represents a fundamental shift in laboratory methodology. Serologic crossmatching involves the physical mixing of a patient specimen with donor red blood cells to directly test for compatibility reactions. Electronic crossmatching, by contrast, relies on validated computer systems that must receive FDA clearance, for which laboratories must verify performance specifications, with qualified technologists reviewing and approving all results despite the automated nature of the compatibility determination.[10] Since the CLIA regulations were promulgated, the field of immunohematology testing has seen significant medical and technological advancements.[11]

CMS and the CDC seek public comments on technical advancements in immunohematology. In addition, we seek input on the following specific questions:

1. What immunohematology practices and technologies does the laboratory currently use?

2. What, if any, challenges does the laboratory face with existing CLIA regulations for immunohematology?

3. What operational challenges does the laboratory face with electronic crossmatches?

4. What type of quality assurance issues does the laboratory encounter in electronic crossmatch compared to the traditional serologic crossmatch?

4. Microbiology

Blood culture contamination (BCC) represents a significant quality concern within microbiology specialty testing that directly impacts patient care outcomes, healthcare costs, and antimicrobial stewardship efforts. Contaminated blood cultures can lead to false-positive results, resulting in unnecessary antimicrobial therapy, extended hospital stays, additional diagnostic procedures, and increased healthcare expenditures. Furthermore, high contamination rates may mask true bacteremia cases and compromise the laboratory's ability to provide accurate diagnostic information to clinicians.

There are no specific CLIA regulations governing BCC rates or mandating systematic monitoring and corrective action protocols. At its November 2023 meeting, CLIAC recommended updating the CLIA regulations to include BCC rate monitoring within the laboratory quality management system.[12]

Considering the critical nature of blood culture testing in diagnosing life-threatening infections, CMS and the CDC seek public comments on how laboratories monitor BCC rates. In addition, we seek input on the following specific questions:

1. What best practices has the laboratory implemented to reduce and monitor BCC?

2. What challenges does the laboratory face in maintaining low blood culture contamination rates?

III. Collection of Information Requirements

This is an RFI only. In accordance with the implementing regulations of the Paperwork Reduction Act of 1995 (PRA), specifically 5 CFR 1320.3(h)(4), this general solicitation is exempt from the PRA. Facts or opinions submitted in response to general solicitations of comments from the public, published in the **Federal Register** or other publications, regardless of the form or format thereof, provided that no person is required to supply specific information pertaining to the commenter, other than that necessary for self-identification, as a condition of the agency's full consideration, are not generally considered information collections and therefore not subject to the PRA.

This RFI is issued solely for information and planning purposes; it does not constitute a Request for Proposal (RFP), applications, proposal abstracts, or quotations. This RFI does not commit the U.S. Government to contract for any supplies or services or make a grant award. Further, we are not seeking proposals through this RFI and will not accept unsolicited proposals. Responders are advised that the U.S. Government will not pay for any information or administrative costs incurred in response to this RFI; all costs associated with responding to this RFI will be solely at the interested party's expense. We note that not responding to this RFI does not preclude participation in any future procurement, if conducted. It is the responsibility of the potential responders to monitor this RFI announcement for additional information pertaining to this request. In addition, we note that CMS will not respond to questions about the policy issues raised in this RFI.

We will actively consider all input as we develop future regulatory proposals or future subregulatory policy guidance. We may or may not choose to contact individual responders. Such communications would be for the sole purpose of clarifying statements in the responders' written responses. Contractor support personnel may be used to review responses to this RFI. Responses to this notice are not offers and cannot be accepted by the U.S. Government to form a binding contract or issue a grant. Information obtained as a result of this RFI may be used by the U.S. Government for program planning on a non-attribution basis. Respondents should not include any information that might be considered proprietary or confidential. This RFI should not be construed as a commitment or authorization to incur cost for which reimbursement would be required or sought. All submissions become U.S. Government property and will not be returned. In addition, we may publicly post the public comments received, or a summary of those public comments.

Mehmet Oz, Administrator of the Centers for Medicare & Medicaid Services, approved this document on July 8, 2026.

Jay Bhattacharya, MD, Ph.D., Senior Official Carrying out the Delegable Duties of the Centers for Disease Control and Prevention Director, approved this document on July 13, 2026.

Robert F. Kennedy, Jr.,

Secretary, Department of Health and Human Services.

Notices

Federal Register
Vol. 91, No. 135
Thursday, July 16, 2026

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Doc. No. AMS–FGIS–26–1123]

Grain Inspection Advisory Committee Meeting

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of Federal advisory committee meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, this notice announces an upcoming meeting of the Grain Inspection Advisory Committee (Committee). The Committee meets no less than once annually to advise the Secretary of Agriculture on the programs and services delivered by the Agricultural Marketing Service (AMS) under the U.S. Grain Standards Act. Recommendations by the Committee help AMS meet the needs of its customers, who operate in a dynamic and changing marketplace.

DATES: The meeting will be held on August 25, from 1:00 p.m. to 5:30 p.m. Central and on August 26, 2026, from 8:00 a.m. to 12:00 p.m. Central.

Written Comments: Any member of the public may file written comments with the Committee before or within 15 days after the date on which the meeting concludes. Comments should be submitted via email to *Anthony.T.Goodeman@usda.gov.* The Committee will consider comments submitted on or before 11:59 p.m. ET on August 10, 2026, prior to the meeting. Comments submitted after this date will be provided to the Committee, but the Committee may not have adequate time to consider those comments prior to the meeting. Comments submitted after the conclusion of the meeting will be posted on the public website.

Oral Comments: The Committee is providing the public an opportunity to present oral comments and will accommodate as many individuals and organizations as time permits. Persons or organizations wishing to make oral comments must pre-register by 11:59 p.m. ET, August 20, 2026, and may only register for one speaking slot. Instructions for registering and participating in the meeting can be obtained by contacting the person listed in the **FOR FURTHER INFORMATION CONTACT** section by or before the deadline.

ADDRESSES: *Meeting Location:* The Committee meeting will take place at the AMS National Grain Center, 10383 N. Ambassador Drive, Kansas City, Missouri 64153. Further meeting details can be found at the Advisory Committee website at *https://www.ams.usda.gov/about-ams/facas-advisory-councils/giac.*

FOR FURTHER INFORMATION CONTACT: Anthony Goodeman by phone at (202) 720–0291 or by email at *Anthony.T.Goodeman@usda.gov.*

SUPPLEMENTARY INFORMATION: The purpose of the Committee is to provide advice to AMS with respect to the implementation of the U.S. Grain Standards Act (7 U.S.C. 71–87k). Information about the Committee is available on the AMS website at *https://www.ams.usda.gov/about-ams/facas-advisory-councils/giac.*

The agenda for the upcoming meeting will focus on grain inspection matters including, but not limited to, regulatory updates; technology modernization initiatives; inspection policies; and operational updates.

The meeting will be open to the public. Public participation will be limited to written statements and interested parties who have registered to present comments orally to the Committee.

Equal opportunity practices, in accordance with USDA policies, will be followed in all membership appointments to the Committee.

In accordance with Federal civil rights law and USDA civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the State or local Agency that administers the program or contact USDA through the Telecommunications Relay Service at 711 (voice and TTY). Additionally, program information may be made available in languages other than English.

Dated: July 13, 2026.

Cikena Reid,

USDA Committee Management Officer.

[FR Doc. 2026–14253 Filed 7–15–26; 8:45 am]

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by August 17, 2026 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day

Review—Open for Public Comments'' or by using the search function. An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Agricultural Research Service

Title: Evaluation of User Satisfaction with NAL Internet Sites.

OMB Control Number: 0518–0040.

Summary of Collection: This is a reinstatement without change of a currently approved information collection request. The National Agricultural Library (NAL) measures user satisfaction with internet sites in order for NAL to comply with Executive Order 12862, which directs federal agencies that provide significant services directly to the public to survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services. NAL internet sites are a vast collection of web pages created and maintained by component organizations of NAL.

Need and Use of the Information: The purpose of the research is to ensure that intended audiences find the information provided on the internet sites easy to access, clear, informative, and useful. The research will provide a means by which to classify visitors to the NAL internet sites, to better understand how to serve them. The information generated from this research will enable NAL to evaluate the success of its web presence in support of its mission to facilitate the creation of agricultural knowledge through the acquisition, curation, and dissemination of the information needed to solve agricultural challenges today and in the future. If the information is not collected, NAL will be limited in its ability to provide accurate, timely information to its user community.

Description of Respondents: Individuals or households; business or other for-profit; not-for-profit institutions; farms; State, local or Tribal government.

Number of Respondents: 3,410.

Frequency of Responses: Reporting: annually.

Total Burden Hours: 419.

Rachelle Ragland-Greene,

Departmental Information Collection Clearance Officer.

[FR Doc. 2026–14297 Filed 7–15–26; 8:45 am]

BILLING CODE 3410–03–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and approval under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by August 17, 2026 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food Safety and Inspection Service

Title: Procedures for the Notification of New Technology.

OMB Control Number: 0583–0127.

Summary of Collection: The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary (7 CFR 2.18 and 2.53), as specified in the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601, *et seq.*), the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*), and the Egg Products Inspection Act (EPIA) (21 U.S.C. 1031, *et seq.*). These statutes mandate that FSIS protect the public by verifying that meat, poultry, and egg products are safe, wholesome, and properly labeled.

FSIS established flexible procedures to actively encourage the development and use of new technologies in meat and poultry establishments and egg products plants. These procedures facilitate notification to the Agency of any new technology that is intended for use in meat and poultry establishments and egg products plants so that the Agency can decide whether the new technology requires a pre-use review. A pre-use review often includes an in-plant trial.

Need and Use of the Information: FSIS will collect information to determine if a pre-use review is needed. If an in-plant trial is necessary, FSIS will request that the firm submit a protocol that is designed to collect relevant data to support the use of the new technology. To not collect this information would reduce the effectiveness of the meat, poultry, and egg products inspection program.

Description of Respondents: Business or other for-profit.

Number of Respondents: 210.

Frequency of Responses: Recordkeeping; Reporting: on occasion.

Total Burden Hours: 12,800.

Food Safety and Inspection Service

Title: Nutrition Labeling of Major Cuts of Single-Ingredient Raw Meat or Poultry Products and Ground or Chopped Meat and Poultry Products.

OMB Control Number: 0583–0148.

Summary of Collection: The Food Safety and Inspection Service (FSIS) has been delegated the authority to exercise the functions of the Secretary as provided in the Federal Meat Inspection Act (FMIA) (21 U. S.C. 601 *et. seq.*) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451, *et seq.*) These statutes mandate that FSIS protect the public by verifying that meat and poultry products are safe, wholesome, and properly labeled. FSIS requires nutrition labeling of the major cuts of single-ingredients, raw meat and poultry products, unless an exemption applies. FSIS also requires nutrition labels on all ground or chopped meat and poultry products, with or without added seasonings, unless an exemption applies. Further, the nutrition labeling requirements for all ground or chopped

meat and poultry products are consistent with the nutrition labeling requirements for multi-ingredient and heat processed products (9 CFR 381.400(a), 9 CFR 317.300(a), 9 CFR 317.301(a), 9 CFR 381.401(a)).

Need and Use of the Information: FSIS requires nutrition labeling of major cuts of single-ingredient, raw meat and poultry products, all ground or chopped meat and poultry products to ensure that consumers will use this information to make better informed nutrition choices when purchasing these meat and poultry products.

Description of Respondents: Business or other for-profit.

Number of Respondents: 76,439.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 67,861.

Levi S. Harrell,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–DM–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by August 17, 2026 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Animal and Plant Health Inspection Service

Title: Control of Chronic Wasting Disease.

OMB Control Number: 0579–0189.

Summary of Collection: The Animal Health Protection Act (AHPA) of 2002 is the primary Federal law governing the protection of animal health. The law gives the Secretary of Agriculture broad authority to detect, control, and eradicate pests or diseases of livestock or poultry, and to pay claims arising from destruction of animals. Disease prevention is the most effective method for maintaining a healthy animal population and enhancing the Animal and Plant Health Inspection Service (APHIS) ability to complete in exporting animals and animal products. Chronic wasting disease (CWD) is a transmissible spongiform encephalopathy (TSE) of elk, deer and moose typified by chronic weight loss leading to death. The presence of CWD disease in cervids causes significant economic and market losses to U.S. producers. To accelerate the control and limit the spread of this disease in the United States, APHIS created a cooperative, voluntary Federal-State-private sector CWD Herd Certification Program. The program is designed to identify farmed or captive herds infected with CWD and provided for the management of these herds in a way that reduces the risk of spreading CWD.

Need and Use of the Information: APHIS will collect information from owners of elk, deer, and moose herds who choose to participate in the CWD Herd Certification program. They would need to follow program requirements for animal identification, testing, herd management, and movement of animals into and from herds. APHIS also established requirements for the interstate movement of cervids to prevent movement of elk, deer, and moose that pose a risk of spreading CWD. Carrying out this program will entail the use of several information collection activities and three APHIS forms. Failing to collect it would make it impossible for APHIS to maintain its CWD Herd Certification Program, thereby hindering APHIS' ability to prevent and control the spread of CWD in the United States.

Description of Respondents: Business or other for-profit and not-for-profit; State, Local or Tribal Government.

Number of Respondents: 1,588.

Frequency of Responses: Reporting and Recordkeeping: On occasion.

Total Burden Hours: 162,510.

Rachelle Ragland-Greene,

Departmental Information Collection Clearance Officer.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2026–0433]

Notice of Request for Revision to and Extension of Approval of an Information Collection; Horse Protection Regulations

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Revision to and extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a revision to and extension of approval of an information collection associated with the Horse Protection Program and enforcement of the Horse Protection Act.

DATES: We will consider all comments that we receive on or before September 14, 2026.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Enter APHIS–2026–0433 in the Search field. Select the Documents tab, then select the Comment button in the list of documents.
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2026–0433, Regulatory Analysis and Development, PPD, APHIS, Regulatory Analysis and Development, PPD, APHIS, 5601 Sunnyside Ave., #AP760, Beltsville, MD 20705.

Supporting documents and any comments we receive on this docket may be viewed at *www.regulations.gov* or in our reading room, which is located in Room 1620 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30

p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the Horse Protection Act Regulations, contact Ms. SaMonia Ford, APHIS, Animal Care, 2150 Centre Avenue, Building B, 3W11, Fort Collins, CO 80526; 970–494–7478; *AC.PublicComment@usda.gov.* For more information on the information collection reporting process, contact Ms. Sheniqua Harris, APHIS' Paperwork Reduction Act Coordinator, at (301) 851–2528 or email *APHIS.PRA@usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: Horse Protection Regulations.

OMB Control Number: 0579–0056.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Horse Protection Act (HPA) of 1970 (Pub. L. 91–540), as amended July 13, 1976 (Pub. L. 94–360), was enacted to prevent showing, exhibiting, selling, or auctioning of ''sore'' horses, and certain transportation of sore horses in connection therewith, at horse shows, horse exhibitions, horse sales, and horse auctions. ''Soring'' is a process whereby chemical or mechanical agents, or a combination thereof, are applied to the limbs(s) of a horse in order to exaggerate its gait(s). A ''sore'' horse is one that has been subjected to prohibited practices and, as a result, suffers, or can reasonably be expected to suffer, physical pain or distress, inflammation, or lameness when walking, trotting or otherwise moving. A horse that is ''sore'' is prohibited from entering or participating in HPA-regulated events because exhibitors, owners, and trainers of such horse may obtain unfair advantage over individuals exhibiting horses that are not ''sore.''

Section 1828 of the HPA authorizes the promulgation of regulations to implement the provisions of the Act. Those regulations are found in Title 9, Chapter I, Part 11, of the Code of Federal Regulations. The regulations delineate procedures relative to three processes:

(1) Certification of licensing programs for Designated Qualified Persons (DQPs) that are operated by Horse Industry Organizations (HIOs). Managers and operators of HPA-regulated events may appoint and retain the services of DQPs to inspect and detect a horse that is sore or otherwise noncompliant with the HPA (Section 1823(c) of the Act), (2) Responsibilities and liabilities of management (Section 1823(d) of the Act), and (3) Prohibitions and requirements concerning persons involved in transportation of certain horses (Section 1824, paragraph (1) of the Act).

An HIO wishing to certify a program to license DQPs to inspect horses for compliance under the HPA must satisfy and abide by the requirements of the HPA and regulations. After requesting and receiving United States Department of Agriculture (USDA) certification from the Animal and Plant Health Inspection Service (APHIS), HIOs must maintain an acceptable DQP program and recordkeeping systems. The responsibilities of HIOs, DQPs, event management, and horse transporters are outlined in the regulations.

APHIS works with HIOs on an ongoing basis to oversee their performance under the HPA. Throughout the year, APHIS uses training sessions, conference calls, and open letters to HIOs, event managers, exhibitors, owners, trainers, custodians, and farriers involved in HPA-covered activities to provide communication and feedback to address issues and strengthen enforcement under the Act. Data collected throughout the year from within APHIS and from the HIOs and event management provide an account of the HIOs' performance and progress toward eliminating the soring of horses and promoting fair competition. HIOs, through their certified licensing programs for DQPs, provide the primary means of detecting sored horses.

Title 9, Chapter I, Part 12, of the Code of Federal Regulations provides the Rules of Practice applicable to adjudicatory, administrative proceedings under Sections 1825(a), (b) and (c) of the HPA. Subpart A incorporates the Uniform Rules of Practice for the Department of Agriculture promulgated in subpart H of Part 1, subtitle A, title 7, Code of Federal Regulations. Subpart B sets forth Supplemental Rules of Practice allowing stipulations in settlement of particular matters if specified procedures are followed.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for 3 years. APHIS has amended this information collection by decreasing the number of Respondents resulting in a decrease in Responses and Total Burden Hours being reported for the collection.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.,* permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 1.235 hours per response.

Estimated annual number of respondents: 380.

Estimated annual number of responses per respondent: 6.

Estimated annual number of responses: 1,934.

Estimated total annual burden on respondents: 2,389 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 13th day of July 2026.

Kelly Moore,

Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2026–0826]

Notice of Request for Revision to and Extension of Approval of an Information Collection; Citrus Canker, Citrus Greening, and Asian Citrus Psyllid; Quarantine and Interstate Movement Regulations

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Revision to and extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to

request a revision to and extension of approval of an information collection associated with the regulations to prevent the spread of citrus canker, citrus greening, and citrus greening's vector, the Asian citrus psyllid, to noninfested areas of the United States.

DATES: We will consider all comments that we receive on or before September 14, 2026.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Enter APHIS–2026–0826 in the Search field. Select the Documents tab, then select the Comment button in the list of documents.
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2026–0826, Regulatory Analysis and Development, PPD, APHIS, 5601 Sunnyside Ave., #AP760, Beltsville, MD 20705.

Supporting documents and any comments we receive on this docket may be viewed at *www.regulations.gov* or in our reading room, which is located in Room 1620 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the regulations for the interstate movement of regulated articles to prevent the spread of citrus canker, citrus greening, and citrus greening's vector, the Asian citrus psyllid, contact Dr. Abby Stilwell, National Policy Manager for Citrus Health Response Program, EDP, PPQ, APHIS, 920 Main Campus Drive, Suite 200, Raleigh, NC 27606; (919)–323–6296. For information on the information collection reporting process, contact Ms. Sheniqua Harris, APHIS' Paperwork Reduction Act Coordinator, at (301) 851–2528 or email *APHIS.PRA@usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: Citrus Canker, Citrus Greening, and Asian Citrus Psyllid; Quarantine and Interstate Movement Regulations.

OMB Control Number: 0579–0363.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U.S.C. 7701 *et seq.*) authorizes the Secretary of the U.S. Department of Agriculture (USDA), either independently or in cooperation with States, to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests and diseases that are new to or not widely distributed within the United States. Under the Act, the Secretary may also issue regulations requiring plants and plant products moved in interstate commerce to be subject to remedial measures determined necessary to prevent the spread of the pest or disease, or requiring the objects to be accompanied by a permit issued by the Secretary prior to movement. The USDA's Animal and Plant Health Inspection Service (APHIS) administers the regulations to implement the PPA.

Citrus canker is a plant disease that is caused by the bacterium *Xanthomonas citri* subsp. *citri* that affects plants and plant parts of citrus and citrus relatives of the Rutaceae family. Citrus canker can cause defoliation and other serious damage to the leaves and twigs of susceptible plants. It can also cause lesions on the fruit of infected plants and cause infected fruit to drop from trees before reaching maturity. The aggressive A (Asiatic) strain of citrus canker can infect susceptible plants rapidly and lead to extensive economic losses in commercial citrus-producing areas. Citrus greening, also known as Huanglongbing, is considered to be one of the most serious citrus diseases in the world. Citrus greening is a bacterial disease that attacks the vascular system of host plants. This bacterial pathogen can be transmitted by grafting and, under laboratory conditions, by parasitic plants. The pathogen can also be transmitted by two insect vectors, one of which is *Diaphorina citri* Kuwayama, the Asian citrus psyllid (ACP). ACP can also cause economic damage to citrus in groves and nurseries by direct feeding. Both adults and nymphs feed on young foliage, depleting the sap and causing galling or curling of leaves. High populations feeding on a citrus shoot can kill the growing tip.

Under the regulations in ''Subpart M-Citrus Canker'' (7 CFR 301.75–1 through 301.75–17) and ''Subpart N-Citrus Greening and Asian Citrus Psyllid'' (7 CFR 301.76 through 301.76–11), APHIS restricts the interstate movement of regulated articles from quarantined areas to control the artificial spread of citrus canker and citrus greening and its vector, ACP, to noninfested areas of the United States. The regulations contain requirements that involve information collection activities, including labeling; recordkeeping; and appealing the cancellation of a certificate, permit, or compliance agreement.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years. APHIS has amended this information collection by removing PPQ Form 519 (Compliance Agreement), PPQ Form 530 (Limited Permit), PPQ Form 540 (Federal Certificate) and PPQ Form 523 (Emergency Action Notification) and moving these activities to a new PPQ Permit information collection. In addition, the total annual respondents has decreased.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.,* permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.398 hours per response.

Respondents: Commercial nurseries/operations in U.S. States or U.S. Territories quarantined for citrus canker, citrus greening, or ACP.

Estimated annual number of respondents: 593.

Estimated annual number of responses per respondent: 16,609.

Estimated annual number of responses: 9,849,138.

Estimated total annual burden on respondents: 325,201 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 9th day of July 2026.

Kelly Moore,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Administration

National School Lunch, Special Milk, and School Breakfast Programs, National Average Payments/Maximum Reimbursement Rate

AGENCY: Food and Nutrition Administration (FNA), USDA

ACTION: Notice.

SUMMARY: This Notice announces the annual adjustments to the national average payments, the amount of money the Federal Government provides States for lunches, afterschool snacks, and breakfasts served to children participating in the National School Lunch and School Breakfast Programs; to the maximum reimbursement rates, the maximum per lunch rate from Federal funds that a State can provide a school food authority for lunches served to children participating in the National School Lunch Program; and to the rate of reimbursement for a half-pint of milk served to non-needy children in a school or institution that participates in the Special Milk Program for Children. The annual payments and rates adjustments for the National School Lunch and School Breakfast Programs reflect changes in the Food Away From Home series of the Consumer Price Index for All Urban Consumers. The annual rate adjustment for the Special Milk Program reflects changes in the Producer Price Index for Fluid Milk Products. Further adjustments are made to these rates to reflect higher costs of providing meals in Alaska, Guam, Hawaii, Puerto Rico, and Virgin Islands. The payments and rates are prescribed on an annual basis each July.

DATES: These rates are in effect from July 1, 2026, through June 30, 2027.

FOR FURTHER INFORMATION CONTACT: Penny Burke, Branch Chief, Program Monitoring and Operational Support Division, Child Nutrition Programs, FNA USDA, 1400 Independence Avenue SW, Washington, DC 20250, 720–822–8597.

SUPPLEMENTARY INFORMATION:

Background

Special Milk Program for Children—Pursuant to section 3 of the Child Nutrition Act of 1966, as amended (42 U.S.C. 1772), the Department announces the rate of reimbursement for a half pint of milk served to non-needy children in a school or institution that participates in the Special Milk Program for Children. This rate is adjusted annually to reflect changes in the Producer Price Index for Fluid Milk Products, published by the Bureau of Labor Statistics of the Department of Labor.

National School Lunch and School Breakfast Programs—Pursuant to sections 11 and 17A of the Richard B. Russell National School Lunch Act, (42 U.S.C. 1759a and 1766a), and section 4 of the Child Nutrition Act of 1966 (42 U.S.C. 1773), the Department annually announces the adjustments to the National Average Payment Factors and to the maximum Federal reimbursement rates for lunches and afterschool snacks served to children participating in the National School Lunch Program and breakfasts served to children participating in the School Breakfast Program. Adjustments are prescribed each July 1, based on changes in the Food Away From Home series of the Consumer Price Index for All Urban Consumers, published by the Bureau of Labor Statistics of the Department of Labor.

Lunch Payment Levels—Section 4 of the Richard B. Russell National School Lunch Act (42 U.S.C. 1753) provides general cash for food assistance payments to States to assist schools in purchasing food. The Richard B. Russell National School Lunch Act provides two different section 4 payment levels for lunches served under the National School Lunch Program. The lower payment level applies to lunches served by school food authorities in which less than 60 percent of the lunches served in the school lunch program during the second preceding school year were served free or at a reduced price. The higher payment level applies to lunches served by school food authorities in which 60 percent or more of the lunches served during the second preceding school year were served free or at a reduced price.

To supplement these section 4 payments, section 11 of the Richard B. Russell National School Lunch Act (42 U.S.C. 1759a) provides special cash assistance payments to aid schools in providing free and reduced-price lunches. The section 11 National Average Payment Factor for each reduced-price lunch served is set at 40 cents less than the factor for each free lunch.

As authorized under sections 8 and 11 of the Richard B. Russell National School Lunch Act (42 U.S.C. 1757 and 1759a), maximum reimbursement rates for each type of lunch are prescribed by the Department in this Notice. These maximum rates are to ensure equitable disbursement of Federal funds to school food authorities.

Performance-based Reimbursement—In addition to the funding mentioned above, school food authorities certified as meeting the meal pattern and nutrition standard requirements set forth in 7 CFR parts 210 and 220 are eligible to receive performance-based cash assistance for each reimbursable lunch served.

Afterschool Snack Payments in Afterschool Care Programs—Section 17A of the Richard B. Russell National School Lunch Act (42 U.S.C. 1766a) establishes National Average Payments for free, reduced-price, and paid afterschool snacks as part of the National School Lunch Program.

Breakfast Payment Factors—Section 4 of the Child Nutrition Act of 1966 (42 U.S.C. 1773) establishes National Average Payment Factors for free, reduced-price, and paid breakfasts served under the School Breakfast Program and additional payments for free and reduced-price breakfasts served in schools determined to be in ''severe need'' because they serve a high percentage of free and reduced eligible children.

Adjusted Payments

The following specific section 4, section 11, and section 17A National Average Payment Factors and maximum reimbursement rates for lunch, the afterschool snack rates, and the breakfast rates are in effect from July 1, 2026, through June 30, 2027. Due to a higher cost of living, the average payments and maximum reimbursements for Alaska, Guam, Hawaii, Puerto Rico, and Virgin Islands are higher than those for all other States. The District of Columbia uses figures specified for the contiguous States. These rates do not include the value of USDA Foods or cash-in-lieu of USDA Foods, which schools receive as additional assistance for each meal served to participants under the Program. A notice announcing the value of USDA Foods and cash-in-lieu of USDA Foods is published separately in the **Federal Register**.

Adjustments to the national average payment rates for all lunches served under the National School Lunch Program, breakfasts served under the School Breakfast Program, and afterschool snacks served under the National School Lunch Program are rounded down to the nearest whole cent.

Special Milk Program Payments

For the period July 1, 2026, through June 30, 2027, the rate of reimbursement for a half pint of milk served to a non-needy child in a school or institution that participates in the Special Milk Program is 28.00 cents. This change is

based on the 4.18 percent increase in the Producer Price Index for Fluid Milk Products from May 2025 to May 2026.

As a reminder, schools or institutions with pricing programs that elect to serve milk free to eligible children continue to receive the average cost of a half pint of milk (the total cost of all milk purchased during the claim period divided by the total number of purchased half pints) for each half pint served to an eligible child.

National School Lunch Program Payments

Overall, payments for the National School Lunch Program and the Afterschool Snack Program reflect 3.54 percent increase in the national average payment rates for schools and residential child care institutions for the period July 1, 2026, through June 30, 2027 in the Consumer Price Index for All Urban Consumers for the Food Away From Home series during the 12-month period May 2025 to May 2026 (from a level of 381.228 in May 2025, as previously published in the **Federal Register** to 394.728 in May 2026)

These changes are reflected below.

Section 4 National Average Payment Factors– In school food authorities that served less than 60 percent free and reduced-price lunches in School Year (SY) 2024–2025, the payments for meals served are: *Contiguous States*—paid rate—45 cents (1 cent increase from the 2025–2026 rate); free and reduced-price rate—45 cents (1 cent increase); maximum rate—53 cents (1 cent increase); Alaska—paid rate—74 cents (3 cent increase); free and reduced-price rate—74 cents (3 cent increase); maximum rate—84 cents (1 cent increase); *Guam, Hawaii, Puerto Rico, and Virgin Islands*—paid rate—59 cents (2 cents increase); free and reduced-price rate—59 cents (2 cent increase); maximum rate 68 cents (1 cent increase).

In school food authorities that served 60 percent or more free and reduced-price lunches in SY 2024–2025, payments are: *Contiguous States*—paid rate—47 cents (1 cent increase); free and reduced-price rate—47 cents (1 cent increase); maximum rate—53 cents (1 cent increase); *Alaska*—paid rate—76 cents (3 cents increase, free and reduced-price rate—76 cents (3 cent increase), maximum rate—84 cents (1 cent increase); *Guam, Hawaii, Puerto Rico, and Virgin Islands*—paid rate—61 cents (2 cents increase); free and reduced-price rate—61 cents (2 cent increase); maximum rate 68 cents (1 cent increase).

School food authorities certified to receive the performance-based cash assistance will receive an additional 9 cents (adjusted annually) added to the above amounts as part of their section 4 payments.

Section 11 National Average Payment Factors—Contiguous States– free lunch—4 dollars and 31 cents (15 cents increase from the SY 2025–2026 rate); reduced-price lunch—3 dollars and 91 cents (15 cents increase); *Alaska*—free lunch—6 dollars and 98 cents (24 cents increase), reduced-price lunch—6 dollars and 58 cents (24 cents increase); *Guam, Hawaii, Puerto Rico, and Virgin Islands*—free lunch—5 dollars and 60 cents (19 cents increase), reduced-price lunch—5 dollars and 20 cent (19 cents increase).

Afterschool Snacks in Afterschool Care Programs—The payments are: *Contiguous States*—free snack—1 dollar and 30 cents (4 cents increase from the SY 2025–2026), reduced-price snack—65 cents (2 cents increase), paid snack—12 cents (1 cents increase); *Alaska*—free snack—2 dollars and 12 cents (8 cents increase), reduced-price snack—1 dollar and 6 cents (4 cents increase), paid snack—19 cents (1 cent increase); *Guam, Hawaii, Puerto Rico, and Virgin Islands*—free snack—1 dollar and 70 cents (6 cents increase), reduced-price snack—85 cents (3 cents increase), paid snack—15 cents (no change).

School Breakfast Program Payments

Overall, payments for the School Breakfast Program reflect a 3.54 percent increase in the national average payment rates for schools and residential child care institutions for the period July 1, 2026, through June 30, 2027 in the Consumer Price Index for All Urban Consumers in the Food Away From Home series during the 12-month period May 2025 to May 2026 (from a level of 381.228 in May 2025, as previously published in the **Federal Register** to 394.728 in May 2026).

These changes are reflected below.

For schools ''not in severe need'' the payments are: *Contiguous States*—free breakfast—2 dollars and 54 cents (8 cents increase from the SY 2025–2026 rate), reduced-price breakfast—2 dollars and 24 cents (8 cents increase), paid breakfast—42 cents (2 cent increase); *Alaska* free breakfast—4 dollars and 9 cents (14 cents increase), reduced-price breakfast—3 dollars and 79 cents (14 cents increase), paid breakfast—64 cents (2 cents increase); *Guam, Hawaii, Puerto Rico, and Virgin Islands*—free breakfast—3 dollars and 29 cents (11 cents increase), reduced-price breakfast—2 dollars and 99 cents (11 cents increase), paid breakfast—52 cents (1 cent increase).

For schools in ''severe need'' the payments are: *Contiguous States*—free breakfast—3 dollars and 5 cents (11 cents increase from the SY 2025–2026), reduced-price breakfast—2 dollars and 75 cents (11 cents increase), paid breakfast—42 cents (2 cent increase); *Alaska*—free breakfast—4 dollars and 90 cents (17 cents increase), reduced-price breakfast—4 dollars and 60 cents (17 cents increase), paid breakfast—64 cents (2 cents increase); *Guam, Hawaii, Puerto Rico, and Virgin Islands*—free breakfast—3 dollars and 94 cents (13 cents increase), reduced-price breakfast—3 dollars and 64 cents (13 cents increase), paid breakfast—52 cents (1 cent increase).

Payment Chart

The following chart illustrates the lunch National Average Payment Factors with the sections 4 and 11 already combined to indicate the per lunch amount; the maximum lunch reimbursement rates; the reimbursement rates for afterschool snacks served in afterschool care programs; the breakfast National Average Payment Factors including severe need schools; and the milk reimbursement rate. All amounts are expressed in dollars or fractions thereof. The payment factors and reimbursement rates used for the District of Columbia are those specified for the contiguous States.

BILLING CODE 3410–30–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meetings of the Montana Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: Commission on Civil Rights.

ACTION: Announcement of public briefings.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act, that the Montana Advisory Committee (Committee) to the U.S. Commission on Civil Rights will hold a public briefing every second Thursday of the month (September 2026 through December 2026) via Zoom at 3:00 p.m. MT. The purpose of these briefings is to hear testimony concerning potential civil rights violations resulting from Diversity, Equity, and Inclusion Policies at Montana Public Universities.

DATES:

- Thursday, September 10, 2026, from 3:00 p.m.–4:00 p.m. Mountain Time
- Thursday, October 8, 2026, from 3:00 p.m.–4:00 p.m. Mountain Time
- Thursday, November 12, 2026, from 3:00 p.m.–4:00 p.m. Mountain Time
- Thursday, December 10, 2026, from 3:00 p.m.–4:00 p.m. Mountain Time

ADDRESSES: The briefings will be held via Zoom Webinar. Members of the public only need to register once.

Registration Link (Audio/Visual) for All Meetings: https://www.zoomgov.com/webinar/register/WN_al1uOdtmQfWayWGrd3rJ7g.

Join by Phone (Audio Only) for All meetings: (833) 435–1820 USA Toll-Free; Meeting ID: 165 131 9571.

Agendas (Note: final briefing agendas will be available prior to each meeting date).

FOR FURTHER INFORMATION CONTACT: Ana Victoria Fortes, Designated Federal Officer, at *afortes@usccr.gov* or (202) 681–0857.

SUPPLEMENTARY INFORMATION: These virtual committee meetings are available to the public through the registration links above. Any interested member of the public may join at the links to listen to this meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. Pursuant to the Federal Advisory Committee Act, public minutes of the meetings will include a list of persons who are present at the meetings. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Closed captioning is available by selecting ''CC'' in the Zoom meeting platform. To request additional accommodations, please email Support Services Specialist, Angelica Trevino at *atrevino@usccr.gov* at least 10 business days prior to each meeting.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the scheduled meeting. Written comments may be emailed to Ana Fortes at *afortes@usccr.gov.* Persons who desire additional information may contact the Regional Programs Coordination Unit at (202) 681–0857.

Records generated from these meetings may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meetings. Records of the meetings will be available via the file sharing website: *https://usccr.app.box.com/folder/314981673190?s=mw9mbsf7b9dy00grnfelpzs0tykg6isr.*

as well as at: *www.facadatabase.gov* under the Commission on Civil Rights, selecting the Advisory Committee of interest. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov*, or may contact the Regional Programs Coordination Unit at the phone number listed above.

Dated: July 13, 2026.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

Foreign-Trade Zones Board

[Order No. 2184]

Approval of Subzone Status; Webco Industries, Inc.; Kellyville, Oklahoma

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones (FTZ) Act provides for ''. . . the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes,'' and authorizes the Foreign-Trade Zones Board to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs and Border Protection ports of entry;

Whereas, the Board's regulations (15 CFR part 400) provide for the establishment of subzones for specific uses;

Whereas, the Muskogee City-County Port Authority, grantee of Foreign-Trade Zone 164, has made application to the Board for the establishment of a subzone at the facility of Webco Industries, Inc., located in Kellyville, Oklahoma (FTZ Docket B–47–2026, docketed May 13, 2026);

Whereas, notice inviting public comment has been given in the **Federal Register** (91 FR 28554, May 18, 2026) and the application has been processed pursuant to the FTZ Act and the Board's regulations; and,

Whereas, the Board adopts the findings and recommendations of the examiners' memorandum, and finds that the requirements of the FTZ Act and the Board's regulations are satisfied;

Now, Therefore, the Board hereby approves subzone status at the facility of Webco Industries, Inc., located in Kellyville, Oklahoma (Subzone 164B), as described in the application and **Federal Register** notice, subject to the

FTZ Act and the Board's regulations, including section 400.13.

Dated: July 3, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance. Alternate Chairman, Foreign-Trade Zones Board.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–139]

Certain Mobile Access Equipment and Subassemblies Thereof From the People's Republic of China: Preliminary Results, Preliminary Determination of No Shipments, and Partial Rescission of Antidumping Duty Administrative Review; 2024–2025

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that certain exporters made sales of subject merchandise at less than normal value (NV) during the period of review (POR), April 1, 2024, through March 31, 2025, and that these companies qualify for separate rates. We also preliminarily find that one additional exporter is no longer eligible for a separate rate and that one exporter made no shipments during the POR. Finally, we are rescinding this review with respect to four companies with existing separate rates who had no entries of subject merchandise during the POR. Interested parties are invited to comment on these preliminary results of review.

DATES: Applicable July 16, 2026.

FOR FURTHER INFORMATION CONTACT: Javier Barrientos, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2243.

SUPPLEMENTARY INFORMATION:

Background

On May 20, 2025, based on timely requests for review, in accordance with 19 CFR 351.221(c)(1)(i), we initiated an administrative review of the antidumping duty (AD) order on mobile access equipment and subassemblies thereof (MAE) from the People's Republic of China (China).[1] On July 8, 2025, Commerce selected Zhejiang Dingli Machinery Co., Ltd. (Dingli) as the sole mandatory respondent in this review.[2]

Due to the lapse in appropriations and Federal Government shutdown, on November 14, 2025, Commerce tolled all deadlines in administrative proceedings by 47 days.[3] Additionally, due to a backlog of documents that were electronically filed via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS) during the Federal Government shutdown, on November 24, 2025, Commerce tolled all deadlines in administrative proceedings by an additional 21 days.[4] On February 27, 2026, we extended the deadline for the preliminary results of this review to June 30, 2026.[5] On June 30, 2026, we further extended the deadline for the preliminary results of this review to July 7, 2026.[6]

For a complete description of the events that followed the initiation of this review, *see* the Preliminary Decision Memorandum.[7] A list of the topics discussed in the Preliminary Decision Memorandum is attached as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via ACCESS, which is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Scope of the Order

The merchandise covered by the scope of the *Order* is MAE from China. For a complete description of the scope of the *Order, see* the Preliminary Decision Memorandum.

Rescission of Administrative Review, in Part

Pursuant to 19 CFR 351.213(d)(3), it is Commerce's practice to rescind an administrative review of an AD order where it concludes that there were no suspended entries of subject merchandise during the POR.[8] Normally, upon completion of an administrative review, the suspended entries are liquidated at the AD assessment rate for the review period.[9] Therefore, for an administrative review to be conducted, there must be a reviewable, suspended entry that Commerce can instruct U.S. Customs and Border Protection (CBP) to liquidate at the calculated AD assessment rate for the review period.[10] Commerce notified all interested parties of its intent to rescind the instant review regarding the following four companies because there were no reviewable, suspended entries of subject merchandise from these companies during the POR: (1) Lingong Group Jinan Heavy Machinery Co., Ltd.; (2) Mantall Heavy Industry Co., Ltd.; (3) Noblelift Intelligent Equipment Co., Ltd.; and (4) Sany Marine Heavy Industry Co., Ltd.[11] Although we invited interested parties to comment,[12] we received no comments from any interested party.

In the absence of any suspended entries of subject merchandise from these companies during the POR, we are rescinding this administrative review

[12] *Id.*

for the above-referenced companies, in accordance with 19 CFR 351.213(d)(3).

Preliminary Determination of No Shipments

One exporter in this review, Oshkosh JLG (Tianjin) Equipment Technology Co., Ltd. (JLG Tianjin) certified that it had no shipments of subject merchandise to the United States during the POR. At our request, JLG Tianjin submitted documentation supporting its claim. As a result, and based on the record evidence submitted by JLG Tianjin, we preliminarily find that the company did not have shipments of subject merchandise during the POR. Consistent with Commerce's assessment practice, we are completing the review with respect to JLG Tianjin and intend to issue appropriate instructions to CBP based on the final results of review.[13]

Methodology

Commerce is conducting this review in accordance with section 751(a)(1)(B) of the Tariff Act of 1930, as amended (the Act). Because China is a non-market economy country within the meaning of section 771(18) of the Act, we calculated NV in accordance with section 773(c) of the Act. For a full description of the methodology underlying our preliminary results, *see* the Preliminary Decision Memorandum.

Separate Rates

We preliminarily determine that, in addition to Dingli, two companies not individually examined are eligible for separate rates in this administrative review, Hunan Sinoboom Intelligent Equipment Co., Ltd. (Sinoboom) and Terex (Changzhou) Machinery Co., Ltd. (Terex), while one exporter, Xuzhou Construction Machinery Group Imp. & Exp. Co., Ltd., is not.[14]

The Act and Commerce's regulations do not address the establishment of a separate rate to be applied to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. Generally, Commerce looks to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in an investigation, for guidance when calculating the rate for separate-rate respondents which Commerce did not examine individually in an administrative review.

Dumping Margin for Non-Selected Separate Rate Companies

The Act does not address the establishment of a rate to apply to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(e)(2) of the Act. However, Commerce's regulation at 19 CFR 351.109(g) states that Commerce will determine the rate for non-selected companies by following the process set forth in 19 CFR 351.109(f)(1)–(2), which generally parallels the process for determining the all-others rate in an investigation under section 735(c)(5) of the Act.

Section 735(c)(5)(A) of the Act and 19 CFR 351.109(f) state that, for companies not investigated, in general, we will determine an all-others rate by weight averaging the estimated weighted-average dumping margins established for the individually investigated exporters, excluding zero and *de minimis* rates or any rates based entirely on facts available.

Commerce calculated an individual estimated weighted-average dumping margin for Dingli that is not zero, *de minimis,* or based entirely on facts otherwise available. Dingli is the sole mandatory respondent in this review. Thus, the weighted-average dumping margin calculated for Dingli is the preliminary dumping margin assigned to Sinoboom and Terex in this administrative review.[15]

China-Wide Entity

Commerce's policy regarding conditional review of the China-wide entity applies to this administrative review.[16] Under this policy, the China-wide entity will not be under review unless a party specifically requests, or Commerce self-initiates, a review of the entity. Because no party requested a review of the China-wide entity, the entity is not under review, and the entity's rate (*i.e.,* 165.14 percent)[17] is not subject to change.

Preliminary Results of Review

Commerce preliminarily determines that the following weighted-average dumping margins exist for the period April 1, 2024, through March 31, 2025:

Exporter	Weighted-average dumping margin (percent)
Zhejiang Dingli Machinery Co., Ltd	35.79
Non-Individually Examined Companies Receiving a Separate Rate	
Hunan Sinoboom Intelligent Equipment Co., Ltd	35.79
Terex (Changzhou) Machinery Co., Ltd.	35.79

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties for these preliminary results within 10 days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

Commerce received a timely request from the petitioner[18] to verify the information submitted in this administrative review, pursuant to 19 CFR 351.307(b)(1).[19] As provided in section 782(i)(3) of the Act, Commerce intends to verify the information reported by Dingli prior to issuing its final results.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this review. Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[20] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[21]

As provided under 19 CFR 351.309(c)(2)(iii) and (d)(2)(iii), we request that interested parties provide at the beginning of their briefs a public executive summary for each issue raised

[13] *See* Preliminary Decision Memorandum at ''Preliminary Determination of No Shipments'' for further discussion.

[14] *See* Preliminary Decision Memorandum at ''Separate Rate Determinations'' for further discussion.

[15] *Id.*

[16] *See Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings,* 78 FR 65963 (November 4, 2013).

[17] *See Order,* 87 FR at 22191.

[18] The petitioner in this proceeding is the Coalition of American Manufacturers of Mobile Access Equipment.

[19] *See* Petitioner's Letter, ''Request for Administrative Review,'' dated April 30, 2025. Additionally, Commerce conducted no verification in the prior two segments.

[20] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Procedures*).

[21] *See* 19 CFR 351.309(c)(2) and (d)(2).

in their briefs.[22] Further, we request that interested parties limit their public, executive summary of each issue to no more than 450 words, not including citations. We intend to use the public, executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final results in this administrative review. We request that interested parties include footnotes for relevant citations in the public, executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[23]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS by 5:00 p.m. Eastern Time within 30 days after the date of publication of this notice. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants, and whether any participant is a foreign national; and (3) a list of issues to be discussed. Oral presentations at the hearing will be limited to issues raised in the briefs. If a request for a hearing is made, Commerce will inform parties of the scheduled date for the hearing.[24]

Assessment Rates

Pursuant to section 751(a)(2)(A) of the Act and 19 CFR 351.212(b)(1), Commerce will determine, and CBP shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review.

If Dingli's weighted-average dumping margin is not zero or *de minimis* (*i.e.,* less than 0.50 percent) in the final results of this review, Commerce intends to calculate importer-specific assessment rates on the basis of the ratio of the total amount of dumping calculated for each importer's examined sales to the total entered value of those sales. Where we do not have entered values for all U.S. sales to a particular importer, we will calculate an importer-specific, per-unit assessment rate on the basis of the ratio of the total amount of dumping calculated for the importer's examined sales to the total quantity of those sales.[25] To determine whether an importer-specific, per-unit assessment rate is *de minimis,* in accordance with 19 CFR 351.106(c)(2), we also will calculate an importer-specific *ad valorem* ratio based on estimated entered values. If Dingli's weighted-average dumping margin is zero or *de minimis* or where an importer-specific *ad valorem* assessment rate is zero or *de minimis,* we will instruct CBP to liquidate appropriate entries without regard to antidumping duties.[26]

For entries that were not reported in the U.S. sales database submitted by Dingli during this review, Commerce will instruct CBP to liquidate such entries at the China-wide rate.

For the companies that were not selected for individual examination in this administrative review but which qualified for a separate rate, we will instruct CBP to assess antidumping duties on all appropriate entries at a rate equal to the weighted-average dumping margin determined in the final results of this review, unless that rate is zero or *de minimis,* in which case we intend to instruct CBP to liquidate relevant entries without regards to antidumping duties.

With respect to JLG Tianjin, we have preliminarily found no shipments and intend to issue appropriate instructions to CBP based on the final results of the review.

Similarly, for the final results, if we continue to treat the companies identified in Appendix II as part of the China-wide entity, we will instruct CBP to apply an *ad valorem* assessment rate of 165.14 percent to all entries of subject merchandise during the POR which were exported by those companies.

For the companies for which the review is being rescinded with these preliminary results, we will instruct CBP to assess antidumping duties on all appropriate entries rates equal to the cash deposit rate for estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption during the period April 1, 2024, through March 31, 2025, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue assessment instructions to CBP for the rescinded companies no earlier than 35 days after the date of publication of this notice in the **Federal Register**.

The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable. Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for shipments of the subject merchandise from China entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by sections 751(a)(2)(C) of the Act: (1) for the companies listed above which have a separate rate, the cash deposit rate will be that established in the final results of this review (except, if the rate is zero or *de minimis,* then zero cash deposit will be required); (2) for previously investigated or reviewed China and non-China exporters not listed above that received a separate rate in a prior segment of this proceeding, the cash deposit rate will continue to be the existing exporter-specific rate; (3) for all Chinese exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be the existing rate for the China-wide entity of 165.14 percent; and (4) for all non-China exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the Chinese exporter that supplied that non-China exporter. These deposit requirements, when imposed, shall remain in effect until further notice.

Final Results of Review

Unless otherwise extended, Commerce intends to issue the final results of this administrative review, which will include the results of its analysis of issues raised in case and rebuttal briefs, within 120 days of publication of these preliminary results of review in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping and/or countervailing duties prior to liquidation of the

[22] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of double antidumping duties, and/or an increase in the amount of antidumping duties by the amount of countervailing duties.

Notification to Interested Parties

We are issuing and publishing these preliminary results of review in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(4).

Dated: July 7, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Certain Aluminum Foil From the People's Republic of China: Preliminary Results and Rescission, in Part, of Countervailing Duty Administrative Review; 2024

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that countervailable subsidies were provided to producers and exporters of certain aluminum foil (aluminum foil) from the People's Republic of China (China). The period of review (POR) is January 1, 2024, through December 31, 2024. In addition, Commerce is rescinding this review, in part, with respect to five companies. Interested parties are invited to comment on these preliminary results.

DATES: Applicable July 16, 2026.

FOR FURTHER INFORMATION CONTACT: Harrison Tanchuck or Madeline Robinson, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–7421 or (202) 482–0585, respectively.

SUPPLEMENTARY INFORMATION:

Background

On May 20, 2025, based on timely requests for review, in accordance with 19 CFR 351.221(c)(1)(i), we initiated an administrative review of the countervailing duty order on aluminum foil from China.[1] On August 1, 2025, Commerce selected Dingheng New Materials Co., Ltd. (Dingheng) and Jiangsu Zhongji Lamination Materials Co., Ltd. (Zhongji) as the mandatory respondents in this administrative review.[2] On August 14, 2025, Zhongji notified Commerce that it would not participate in this review.[3] On August 18, 2025, the petitioners[4] withdrew their request for review with respect to five entities, listed in Appendix II.[5]

Due to the lapse in appropriations and Federal Government shutdown, on November 14, 2025, Commerce tolled all deadlines in administrative proceedings by 47 days.[6] Additionally, due to a backlog of documents that were electronically filed via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS) during the Federal Government shutdown, on November 24, 2025, Commerce tolled all deadlines in administrative proceedings by an additional 21 days.[7] Between February and June 2026, we extended the

[7] *See* Memorandum, ''Tolling of all Case Deadlines,'' dated November 24, 2025.

deadline for the preliminary results of this review until July 7, 2026.[8]

For a complete description of the events that followed the initiation of this review, *see* the Preliminary Decision Memorandum.[9] A list of topics discussed in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via ACCESS. ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Scope of the Order

The product covered by the *Order* is aluminum foil from China. For a complete description of the scope of the *Order, see* the Preliminary Decision Memorandum.

Rescission of Administrative Review, in Part

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if all parties that requested the review withdraw their requests within 90 days of publication of the notice of initiation. As noted above, Commerce received timely filed withdrawal requests with respect to the companies listed in Appendix II, and no other parties requested a review of these companies. Therefore, we are rescinding this administrative review with respect to these companies, pursuant to 19 CFR 351.213(d)(1).

Methodology

Commerce is conducting this administrative review in accordance with section 751(a)(l)(A) of the Tariff Act of 1930, as amended (Act). For each of the subsidy programs found countervailable, Commerce preliminarily determines that there is a subsidy, *i.e.,* a financial contribution by an ''authority'' that gives rise to a benefit to the recipient, and that the subsidy is specific.[10] For a full description of the methodology underlying our conclusions, including our reliance, in part, on facts otherwise available with adverse inferences pursuant to sections 776(a) and (b) of the Act, *see* the Preliminary Decision Memorandum.

Preliminary Results of Review

As a result of this review, we preliminarily determine the following net countervailable subsidy rates exist for the POR, January 1, 2024, through December 31, 2024:

Company	Subsidy rate (percent *ad valorem*)
Dingheng New Materials Co., Ltd.[11]	21.62
Jiangsu Zhongji Lamination Materials Co., Ltd.[12]	149.69

Disclosure

Commerce intends to disclose the calculations and analysis performed to interested parties for these preliminary results within 10 days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

Commerce received a timely request from the petitioners to verify the information submitted in this administrative review, pursuant to 19 CFR 351.307(b)(1)(iv).[13]

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance.[14] Pursuant to 19 CFR 351.309(c)(1)(ii), we have modified the deadline for interested parties to submit case briefs to Commerce no later than 21 days after the date of the publication of this notice.[15] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[16] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[17] All briefs must be filed electronically using ACCESS. An electronically filed document must be received successfully in its entirety in ACCESS by 5:00 p.m. Eastern Time on the established deadline.

As provided under 19 CFR 351.309(c)(2)(iii) and (d)(2)(iii), we request that interested parties provide at the beginning of their briefs a public executive summary for each issue raised in their briefs.[18] Further, we request that interested parties limit their executive summary of each issue to no more than 450 words, not including citations. We intend to use the executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final results in this administrative review. We request that interested parties include footnotes for relevant citations in the executive summary of each issue. Note that Commerce has amended certain of its requirements

[8] *See* Memoranda, ''Extension of Deadline for Preliminary Results of Countervailing Duty Administrative Review,'' dated February 12, 2026; ''Extension of Deadline for Preliminary Results of Countervailing Duty Administrative Review,'' dated June 30, 2026.

[9] *See* Memorandum, ''Decision Memorandum for the Preliminary Results of the Administrative Review of Countervailing Duty Order on Certain Aluminum Foil from the People's Republic of China; 2024,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[10] *See* sections 771(5)(B) and (D) of the Act regarding financial contribution; section 771(5)(E) of the Act regarding benefit; and section 771(5A) of the Act regarding specificity.

[11] As discussed in the Preliminary Decision Memorandum, Commerce has found the following companies to be cross-owned with Dingheng: Jiangsu Dingsheng New Materials Joint-Stock Co., Ltd.; Dingsheng Aluminum Industries (Hong Kong) Trading Co., Ltd. or Dingsheng Aluminium Industries (Hong Kong) Trading Co., Limited or Dingsheng Aluminium Industries (Hong Kong) Trading Co., Ltd; Hangzhou Dingsheng Import & Export Co., Ltd. or Hangzhou Dingsheng Import and Export Co., Ltd. or Hangzhou Dingsheng Import&Export Co., Ltd.; Hangzhou Teemful Aluminium Co., Ltd.; Inner Mongolia Liansheng New Energy Material Co., Ltd. (or Inner Mongolia Liansheng New Energy Material Joint-Stock Co., Ltd.); Inner Mongolia Xinxing New Energy Material Co., Ltd. (or Inner Mongolia Xinxing New Material Co., Ltd.); Hangzhou Dingsheng Industrial Group Co., Ltd.; Hangzhou DingCheng Aluminium Co., Ltd. or Hangzhou DingCheng Aluminum Co., Ltd; Luoyang Longding Aluminum Co., Ltd.; Walson (HK) Trading Co., Limited; Hangzhou Five Star Aluminium Co., Ltd.; and Thai Ding Li New Materials Co., Ltd. (collectively, Dingsheng Respondents).

[12] Commerce has previously found the following companies to be to be cross-owned with Jiangsu Zhongji Lamination Materials Co., Ltd. (Zhongji): (1) Jiangsu Huafeng Aluminium Industry Co., Ltd. (Jiangsu Huafeng), (2) Shantou Wanshun New Material Group Co., Ltd. (f/k/a Shantou Wanshun Package Material Stock Co., Ltd.), (3) Anhui Zhongji Battery Foil Sci&Tech Co., Ltd. (AKA Anhui Zhongii Battery Foil Science & Technology Co., Ltd.) (f/k/a Anhui Maximum Aluminium Industries Company Limited), (4) Sichuan Wanshun Zhongji Aluminium Industry Co., Ltd., and (5) Anhui Maximum Aluminum Co., Ltd. Furthermore, Commerce has also previously found that Zhongji wholly owns trading company Jiangsu Zhongji Lamination Materials Co., (HK) Limited. *See Certain Aluminum Foil from the People's Republic of China: Final Results of Countervailing Duty Administrative Review; 2023,* 91 FR 7438 (February 18, 2026).

[13] *See* Petitioners' Letter, ''Petitioners' Request for Verification,'' dated August 22, 2025.

[14] *See* 19 CFR 351.309(c)(1)(ii); *see also* 19 CFR 351.303 (for general filing requirements).

[15] *See* 19 CFR 351.309.

[16] *See* 19 CFR 351.309(d); *see also Administrative Protective Order, Service, and Other Procedures in Antidumping and Countervailing Duty Proceedings,* 88 FR 67069, 67077 (September 29, 2023) (*APO and Service Procedures*).

[17] *See* 19 CFR 351.309(c)(2) and (d)(2).

[18] We use the term ''issue'' here to describe an argument that Commerce would normally address in a comment of the Issues and Decision Memorandum.

pertaining to the service of documents in 19 CFR 351.303(f).[19]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, filed electronically via ACCESS by 5:00 p.m. Eastern Time within 30 days after the date of publication of this notice. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants and whether any participant is a foreign national; and (3) a list of issues to be discussed. Oral presentations at the hearing will be limited to those raised in the briefs. If a request for a hearing is made, Commerce will inform parties of the scheduled date for the hearing.[20]

Assessment Rates

Consistent with section 751(a)(1) of the Act and 19 CFR 351.212(b)(2), upon issuance of the final results, Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, countervailing duties on all appropriate entries covered by this review.

For the companies listed in Appendix II for which the review is being rescinded, Commerce will instruct CBP to assess countervailing duties on all appropriate entries at a rate equal to the cash deposit of estimated CVDs required at the time of entry, or withdrawal from warehouse, for consumption, during the period January 1, 2024, through December 31, 2024, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue rescission instructions to CBP no earlier than 35 days after the date of publication of this notice in the **Federal Register**.

Commerce intends to issue assessment instructions to CBP regarding Dingheng and Zhongji no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.107(e), Commerce intends to instruct CBP to collect cash deposits of estimated countervailing duties with regard to shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review, as follows: (1) the cash deposit rate for the companies listed above will be equal to the company-specific estimated individual countervailable subsidy rates determined in the final results of this review, except if the rate is less than 0.50 percent and, therefore, *de minimis* within the meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rate will be zero; (2) if both the producer and exporter of the subject merchandise have company-specific estimated subsidy rates assigned, and their rates differ, then the applicable cash deposit rate will be the higher of these two rates; (3) if either the producer or the exporter, but not both, of the subject merchandise has a company-specific estimated subsidy rate assigned, the applicable cash deposit rate will be that company's company-specific rate; and (4) the cash deposit rate for all other producers and exporters will be continue to be 13.28 percent, the all-others subsidy rate established in the investigation.[21] These cash deposit instructions, when imposed, shall remain in effect until further notice.

Final Results of Review

Unless the deadline is extended, Commerce intends to issue the final results of this administrative review, which will include the results of Commerce's analysis of the issues raised in the case briefs, within 120 days of publication of these preliminary results in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(1).

Notification to Interested Parties

We are issuing and publishing these preliminary results in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.221(b)(4).

Dated: July 7, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Tris(hydroxymethyl)aminomethane From the People's Republic of China: Postponement of Preliminary Determination in the Countervailing Duty Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable July 16, 2026.

FOR FURTHER INFORMATION CONTACT: Shane Subler at (202) 482–6241 or Katerina Katsiadas at (202) 482–4929, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On May 11, 2026, the U.S. Department of Commerce (Commerce) initiated a countervailing duty (CVD) investigation of imports of Tris(hydroxymethyl)aminomethane (Tris) from the People's Republic of China (China).[1] Currently, the preliminary determination is due no later than July 15, 2026.

Postponement of Preliminary Determination

Section 703(b)(1) of the Tariff Act of 1930, as amended (the Act), requires Commerce to issue the preliminary determination in a countervailing duty investigation within 65 days after the date on which Commerce initiated the investigation. However, section 703(c)(1) of the Act permits Commerce

[1] *See Tris(hydroxymethyl)aminomethane from the People's Republic of China: Initiation of Countervailing Duty Investigation,* 91 FR 28559 (May 18, 2026) (*Initiation Notice*).

to postpone the preliminary determination until no later than 130 days after the date on which Commerce initiated the investigation if: (A) the petitioner makes a timely request for a postponement; [2] or (B) Commerce concludes that the parties concerned are cooperating, that the investigation is extraordinarily complicated, and that additional time is necessary to make a preliminary determination.

Commerce has determined that parties involved in these proceedings are cooperating because parties have requested extensions of time to respond to questionnaires,[3] and/or submitted portions of questionnaire responses.[4] In addition, we find that this investigation is extraordinarily complicated within the meaning of section 703(c)(1)(B)(i) of the Act and that Commerce requires additional time to reach its preliminary determination.

Section 703(c)(1)(B)(i)(I) of the Act provides that ''the number and complexity of the alleged countervailable subsidy practices'' is a consideration in determining whether a case is extraordinarily complicated. In these cases, Commerce is investigating an unusually high number of alleged subsidy programs and will require additional time to analyze the questionnaire responses and issue appropriate requests for clarification and additional information, particularly regarding questions of affiliation and cross-ownership and program use by the respondents.

In accordance with 19 CFR 351.205(e), the petitioner has stated the reasons for requesting a postponement of the preliminary determination, and Commerce finds no compelling reason to deny the request. Therefore, in accordance with section 703(c)(1)(B) of the Act, Commerce is postponing the deadline for the preliminary determination to no later than 130 days after the date on which this investigation was initiated, *i.e.,* September 18, 2026. Pursuant to section 705(a)(1) of the Act and 19 CFR 351.210(b)(1), the deadline for the final determination of this investigation will continue to be 75 days after the date of the preliminary determination.

Notification to Interested Parties

This notice is issued and published pursuant to section 703(c)(2) of the Act and 19 CFR 351.205(f)(1).

Dated: July 10, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

[C–557–822]

Utility Scale Wind Towers From Malaysia: Rescission of Countervailing Duty Administrative Review; 2024

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is rescinding the administrative review of the countervailing duty (CVD) order on utility scale wind towers (wind towers) from Malaysia for the period of review (POR) January 1, 2024, through December 31, 2024.

DATES: Applicable July 16, 2026.

FOR FURTHER INFORMATION CONTACT: Kelsie Hohenberger AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2517.

SUPPLEMENTARY INFORMATION:

Background

On August 4, 2021, Commerce published in the **Federal Register** the CVD order on wind towers from Malaysia.[1] On August 1, 2025, Commerce published a notice of opportunity to request an administrative review of the *Order*.[2] On September 2, 2025, the Wind Tower Trade Coalition (the petitioner) submitted a timely request that Commerce conduct an administrative review.[3] On September 25, 2025, Commerce initiated an administrative review with respect to five companies.[4]

Due to the lapse in appropriations and Federal Government Shutdown, on November 14, 2025, Commerce tolled all deadlines in administrative proceedings by 47 days.[5] Additionally, due to a backlog of documents that were electronically filed via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS) during the Federal Government shutdown, on November 24, 2025, Commerce tolled all deadlines in administrative proceedings by an additional 21 days.[6] Accordingly the deadline for the preliminary results of this review is now July 10, 2026.

On November 18, 2025, Commerce placed on the record U.S. Customs and Border Protection (CBP) entry data for the companies subject to the review, showing no reviewable POR entries, and invited interested parties to comment.[7] No party filed comments with respect to the CBP data. On March 13, 2026, Commerce issued a notice of intent to rescind the 2024 administrative review and invited interested parties to comment.[8] No party filed comments with respect to the Notice of Intent to Rescind.

Rescission of Review

Pursuant to 19 CFR 351.213(d)(3), it is Commerce's practice to rescind an administrative review of a CVD order where it concludes that there were no entries of subject merchandise during the POR.[9] Normally, upon completion of an administrative review, the

[2] The petitioner in this proceeding is Advancion Corporation (the petitioner). *See* Petitioner's Letter, ''Petitioner's Request for Postponement of Preliminary Determination,'' dated July 2, 2026. In its letter, the petitioner requested that Commerce postpone the preliminary determination because interested parties are cooperating and Commerce required additional time to collect and analyze responses from the Government of the People's Republic of China (GOC) and the mandatory respondents.

[8] *See* Memorandum, ''Notice of Intent to Rescind Review,'' dated March 13, 2026 (Notice of Intent to Rescind).

[9] *See, e.g., Welded Line Pipe from the Republic of Turkey: Rescission of the Antidumping Duty Administrative Review; 2019–2020,* 87 FR 27988 (May 10, 2022); *see also, e.g., Certain Softwood Lumber Products from Canada: Final Results and Final Rescission, in Part, of the Countervailing Duty Administrative Review, 2020,* 87 FR 48455 (August 9, 2022); and *Certain Non-Refillable Steel Cylinders from the People's Republic of China: Rescission of Countervailing Duty Administrative Review; 2020–2021,* 87 FR 64008 (October 21, 2022).

suspended entries are liquidated at the CVD assessment rate(s) calculated for the review period.[10] Therefore, for an administrative review to be conducted, there must be a reviewable, suspended entry that Commerce can instruct CBP to liquidate at the calculated CVD assessment rates for the review period.[11] As noted above, there were no suspended entries of subject merchandise for any companies subject to this review during the POR. Accordingly, in the absence of reviewable, suspended entries of subject merchandise during the POR, we are hereby rescinding this administrative review in its entirety, in accordance with 19 CFR 351.213(d)(3).

Cash Deposit Requirements

As Commerce has proceeded to a final rescission of this administrative review, no cash deposit rates will change. Accordingly, the current cash deposit requirements shall remain in effect until further notice.

Assessment Rates

Commerce will instruct CBP to assess countervailing duties on all appropriate entries of wind towers from Malaysia. Countervailing duties shall be assessed at rates equal to the cash deposit rate of estimated countervailing duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instructions to CBP no earlier than 35 days after publication of this notice in the **Federal Register**.

Notification Regarding Administrative Protective Order

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213(d)(4).

[10] *See* 19 CFR 351.212(b)(2).

Certain Passenger Vehicle and Light Truck Tires From the People's Republic of China: Continuation of Antidumping Duty Order and Countervailing Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the U.S. Department of Commerce (Commerce) and the U.S. International Trade Commission (ITC) that revocation of the antidumping duty (AD) order and countervailing duty (CVD) order on certain passenger vehicle and light truck tires (passenger tires) from the People's Republic of China (China) would likely lead to the continuation or recurrence of dumping, and countervailable subsidies, and material injury to an industry in the United States, Commerce is publishing a notice of continuation of these AD and CVD orders.

DATES: Applicable July 7, 2026.

FOR FURTHER INFORMATION CONTACT: Eric Chen, AD/CVD Operations, Office IX, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2860.

SUPPLEMENTARY INFORMATION:

Background

On August 10, 2015, Commerce published in the **Federal Register** the AD and CVD orders on passenger tires from China.[1] On January 2, 2026, the ITC instituted,[2] and Commerce initiated,[3] the second sunset review of the *Orders,* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act). As a result of its reviews, Commerce determined that revocation of the *Orders* would likely lead to the continuation or recurrence of dumping and countervailable subsidies, and therefore, notified the ITC of the magnitude of the margins of dumping and subsidy rates likely to prevail should the *Orders* be revoked.[4]

On July 7, 2026, the ITC published its determination, pursuant to sections 751(c) and 752(a) of the Act, that revocation of the *Orders* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.[5]

Scope of the Orders

The scope of the *Orders* is passenger vehicle and light truck tires. Passenger vehicle and light truck tires are new pneumatic tires, of rubber, with a passenger vehicle or light truck size designation. Tires covered by these *Orders* may be tube-type, tubeless, radial, or non-radial, and they may be intended for sale to original equipment manufacturers or the replacement markets.

Subject tires have, at the time of importation, the symbol ''DOT'' on the sidewall, verifying that the tires conforms to applicable motor vehicle safety standards. Subject tires may also have the following prefixes or suffix in their tire size designation, which also appears on the sidewall of the tire:

Prefix designations:

P—Identifies a tire intended primarily for service on passenger cars.

LT—Identifies a tire intended primarily for service on light trucks.

Suffix letter designations:

LT—Identifies light truck tires for service on trucks, buses, trailers, and multipurpose passenger vehicles used in nominal highway service.

All tired with a ''P'' or ''LT'' prefix, and all tires with an ''LT'' suffix in their sidewall markings are covered by these *Orders* regardless of their intended use. In addition, all tires that lack a ''P'' or ''LT'' prefix or suffix in their sidewall markings, as well as tires that include

[1] *See Certain Passenger Vehicle and Light Truck Tires from the People's Republic of China: Amended Final Affirmative Antidumping Duty Determination and Antidumping Duty Order; and Amended Final Affirmative Countervailing Duty Determination and Countervailing Duty Order,* 80 FR 47902 (August 10, 2015).

[2] *See Passenger Vehicle and Light Truck Tires from China; Institution of a Five-Year Reviews,* 91 FR 159 (January 2, 2026).

[3] *See Initiation of Five-Year (Sunset) Reviews,* 91 FR 125 (January 2, 2026).

[4] *See Certain Passenger Vehicle and Light Truck Tires from the People's Republic of China: Final Results of the Expedited Second Sunset Review of the Antidumping Duty Orders,* 91 FR 23955 (May 4, 2026), and accompanying Issues and Decision Memorandum (IDM); and *Certain Passenger Vehicle and Light Truck Tires from the People's Republic of China: Final Results of the Expedited Second Sunset Review of the Countervailing Duty Order,* 91 FR 23966 (May 4, 2026), and accompanying IDM.

[5] *See Passenger Vehicle and Light Truck Tires from China,* 91 FR 41661 (July 7, 2026) (*ITC Final Determination*).

any other prefix or suffix in their sidewall marking, are included in the scope, regardless of their intended use, as long at the tire is of a size that is among the numerical size designations listing in the passenger car section or light truck section of the Tire and Rime Association Year Book (TRA Year Book), as updated annually, unless the tire falls within one of the specific exclusions set out below.

Passenger vehicle and light truck tires, whether or not attached to wheel or rims, are included in the scope. However, if a subject tire is imported attached to a wheel or rim, only the tire is covered by the scope.

Specifically excluded from the scope are the following types of tires:

(1) Racing car tires; such tires do not bear the symbol ''DOT'' on the sidewall and may be marked with ''ZR'' in size designation;

(2) New pneumatic tires, of rubber, of a size that is not listed in the passenger car section or light truck section of the TRA Year Book;

(3) Pneumatic tires, of rubber, that are not new, including recycled and retreaded tires;

(4) Non-pneumatic tires, such as solid rubber tires;

(5) Tires designed and marked exclusively as temporary use spare tires for passenger vehicles which, in addition, exhibit each of the following characteristics:

a. The size designation and load index combination molded on the tire's sidewall are listed in Table PCT–1B (''T'' Type Spare Tires for Temporary Use on Passenger Vehicles) of the TRA Year Book,

b. The designation ''T'' is molded into the tire's sidewall as part of the size designation, and,

c. The tire's speed rating is molded on the sidewall, indicating the rated speed in MPH or a letter rating as listed by TRA Year Book, and the rated speed is 81 MPH or a ''M'' rating;

(6) Tired designed and marketed exclusively for specialty tires (ST) use which, in addition, exhibit each of the following conditions:

a. The size designation molded on the tire's sidewall is listed in the ST sections of the TRA Year Book,

b. The designation ''ST'' is molded into the tire's sidewall as part of the size designation,

c. The tire incorporates a warning, prominently molded on the sidewall, that the tire is ''For Trailer Service Only'' or ''For Trailer Use Only'',

d. The load index molded on the tire's sidewall meets or exceeds those load indexes listed in the TRA Year Book for the relevant ST tire size, and

e. Either

i. The tire's speed rating is molded on the sidewall, indicating the rated speed in MPH or a letter rating as listed by the TRA Year Book, and the rated speed does not exceed 81 MPH or an ''M'' rating; or

ii. The tire's speed rating molded on the sidewall is 87 MPH or an ''N'' rating, and in either case the tire's maximum pressure and maximum load limit are molded on the sidewall and either

1. Both exceed the maximum pressure and maximum load limit for any tire of the same size designation in either the passenger car or light truck section of the TRA Year Book; or

2. If the maximum cold inflation pressure molded on the tire is less than any cold inflation pressure listed for that size designation in either the passenger car or light truck section of the TRA Year Book, the maximum load limit molded on the tire is higher than the maximum load limit listed at that cold inflation pressure for that size designation in either the passenger car or light truck section of the TRA Year Book.

(7) Tires designed and marketed exclusively for off-road use and which, in addition, exhibit each of the following characteristics:

a. The size designation and load index combination molded on the tire's sidewall are listed in the off-the-road, agricultural, industrial, or ATV section of the TRA Year Book,

b. In addition to any size designation markings, the tire incorporates a warning, prominently molded on the sidewall, that the tire is ''Not for Highway Service'' or ''Not for Highway Use'',

c. The tire's speed rating is molded on the sidewall, indicating the rated speed in MPH or a letter rating as listed by the TRA Year Book, and the rated speed does not exceed 55 MPH or a ''G'' rating, and

d. The tire features a recognizable off-road tread design.

The products covered by the *Orders* are currently classified under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 4011.10.10.10, 4011.10.10.20, 4011.10.10.30, 4011.10.10.40, 4011.10.10.50, 4011.10.10.60, 4011.10.10.70, 4011.10.50.00, 4011.20.10.05, and 4011.20.50.10. Tires meeting the scope description may also enter under the following HTSUS subheadings: 4011.90.2050, 4011.99.45.10, 4011.99.45.50, 4011.99.85.10, 4011.99.85.50, 8708.70.45.30, 8708.70.45.45, 8708.70.45.46, 8708.70.45.48, 8708.70.45.60, 8708.70.60.30, 8708.70.60.45, and 8708.70.60.60. While HTSUS subheadings are provided for convenience and for customs purposes, the written description of the subject merchandise is dispositive.

Continuation of the Orders

As a result of the determinations by Commerce and the ITC that revocation of the *Orders* would likely lead to continuation or recurrence of dumping, countervailable subsidies, and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act, Commerce hereby orders the continuation of the *Orders.* U.S. Customs and Border Protection will continue to collect AD and CVD cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of the continuation of the *Orders* will be July 7, 2026.[6] Pursuant to section 751(c)(2) of the Act and 19 CFR 351.218(c)(2), Commerce intends to initiate the next five-year reviews of the *Orders* not later than 30 days prior to the fifth anniversary of the date of the last determination by the ITC.

Administrative Protective Order (APO)

This notice also serves as a final reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

These five-year (sunset) reviews and this notice are in accordance with sections 751(c) and 751(d)(2) of the Act and published in accordance with section 777(i) of the Act, and 19 CFR 351.218(f)(4).

Dated: July 13, 2026.

Scot Fullerton,

Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Xanthan Gum From the People's Republic of China: Final Results of Antidumping Duty Administrative Review and Final Determination of No Shipments; 2023–2024

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) determines that Neimenggu Fufeng Biotechnologies Co., Ltd. (aka Inner Mongolia Fufeng Biotechnologies Co., Ltd.), Shandong Fufeng Fermentation Co., Ltd., and Xinjiang Fufeng Biotechnologies Co., Ltd. (collectively, Fufeng) and Deosen Biochemical (Ordos) Ltd. (Deosen) sold xanthan gum from the People's Republic of China (China) at less than normal value during the period of review (POR), July 1, 2023, through June 30, 2024. Additionally, we find that Jianlong Biotechnology Co., Ltd. (Jianlong), Jilin Meihua Amino Acid Co., Ltd (Jilin Meihua), Meihua Group International Trading (Hong Kong) Limited/Langfang Meihua Biotechnology Co., Ltd.,/ Xinjiang Meihua Amino Acid Co., Ltd (Meihua), and Ningxia Top Hydrocolloids Co., Ltd.(Ningxia) are eligible for a separate rate. Commerce also determines that Deosen Biochemical Ltd., had no shipments during the POR.

DATES: Applicable July 16, 2026.

FOR FURTHER INFORMATION CONTACT: Joseph Molokwu or Paul Kebker, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–8043 or (202) 482–2254, respectively.

SUPPLEMENTARY INFORMATION:

Background

On January 9, 2026, Commerce published the *Preliminary Results* in the **Federal Register** and invited interested parties to comment.[1] Commerce extended the deadline for the final results by 60 days until July 8, 2026.[2] On June 11, 2026, Commerce issued a post-preliminary analysis memorandum and invited interested parties to comment on those results.[3] On July 8, 2026, Commerce placed U.S. Customs and Border (CBP)'s *de novo* review of Enforce and Protect Act (EAPA) 8144 on the record of the review.[4] For further details regarding the events that occurred subsequent to the *Preliminary Results, see* the Issues and Decision Memorandum.[5] Commerce conducted this administrative review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order [6]

The product covered by scope of the *Order* is xanthan gum from China. For a full description of the scope of the *Order, see* the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs are addressed in the Issues and Decision Memorandum. A list of the issues parties raised and to which we responded in the Issues and Decision Memorandum is provided in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS), which is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Final Determination of No Shipments

In the *Preliminary Results,* Commerce determined that Deosen Biochemical Ltd. did not have shipments of subject merchandise during the POR.[7] As we received no information to contradict our preliminary determination with respect to Deosen Biochemical Ltd, we continue to find that it made no shipments of subject merchandise to the United States during the POR.

Changes Since the Preliminary Results

Based on a review of the record, and comments received from interested parties regarding our *Preliminary Results* and Post-Preliminary Analysis, we made certain changes to the weighted-average dumping margin calculations for both Fufeng and Deosen. For further discussion of these changes, *see* the Issues and Decision Memorandum.

Separate Rates

In the *Preliminary Results,* we determined that Fufeng, Deosen, and four other companies demonstrated their eligibility for a separate rate.[8] For these final results, we continue to determine that the Fufeng, Deosen, and the four non-examined companies are eligible for a separate rate. We received comments on our calculation of a separate rate in the Post-Preliminary Analysis. Commerce has made no changes to our methodology for calculating a separate rate from the *Preliminary Results.*

China-Wide Entity

Under Commerce's policy regarding the conditional review of the China-wide entity,[9] the China-wide entity will not be under review unless a party specifically requests, or Commerce self-initiates, a review of the entity. Because no party requested a review of the China-wide entity in this review, the entity is not under review, and the entity's rate (*i.e.,* 154.07 percent) is not subject to change.[10]

Aside from Deosen Biochemical Ltd., for which we continune to find no shipments, and CP Kelco (Shandong) Biological Company Limited, for which this review was rescinded at the *Preliminary Results,* Commerce considers all other companies for which a review was requested and did not demonstrate separate rate eligibility to be part of the China-wide entity. For these final results, we continue to consider Shanghai Smart Chemicals Co. Ltd. to be part of the China-wide entity because it did not file a separate rate application or certification.

Final Results of Review

We determine that the following weighted average dumping margins exist for the period July 1, 2023, through June 30, 2024:

Exporter	Weighted-average dumping margin (percent)
Deosen Biochemical (Ordos) Ltd	22.57
Neimenggu Fufeng Biotechnologies Co., Ltd. (aka Inner Mongolia Fufeng Biotechnologies Co., Ltd.)/Shandong Fufeng Fermentation Co., Ltd./Xinjiang Fufeng Biotechnologies Co., Ltd.[11]	38.62
Non-Individually Examined Companies Receiving a Separate Rate:	
Jianlong Biotechnology Co., Ltd. (formerly, Inner Mongolia Jianlong Biochemical Co., Ltd.)	35.61
Jilin Meihua Amino Acid Co., Ltd	35.61
Meihua Group International Trading (Hong Kong) Limited/Langfang Meihua Biotechnology Co., Ltd.,/Xinjiang Meihua Amino Acid Co., Ltd	35.61
Ningxia Top Hydrocolloids Co., Ltd	35.61

Disclosure

Commerce intends to disclose its calculations and analysis performed for these final results of review to interested parties within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(C) of the Act and 19 CFR 351.212(b)(1), Commerce will determine, and CBP shall assess, antidumping duties on all appropriate entries of subject merchandise covered by the final results of this review. Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the publication date of these final results in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

For Fufeng and Deosen, Commerce will calculate importer-specific assessment rates for antidumping duties, in accordance with 19 CFR 351.212(b)(1). Where the respondent reported reliable entered values, Commerce intends to calculate importer-specific *ad valorem* assessment rates by aggregating the amount of dumping calculated for all U.S. sales to the importer and dividing this amount by the total entered value of the merchandise sold to the importer.[12] Where the respondent did not report entered values, Commerce will calculate importer-specific assessment rates by dividing the amount of dumping for reviewed sales to the importer by the total quantity of those sales. Commerce will calculate an estimated *ad valorem* importer-specific assessment rate to determine whether the per-unit assessment rate is *de minimis* (*i.e.,* 0.50 percent or below); however, Commerce will use the per-unit assessment rate where entered values were not reported.[13] Where an importer-specific *ad valorem* assessment rate is not zero or *de minimis,* Commerce will instruct CBP to collect the appropriate duties at the time of liquidation. Where either the respondent's weighted average dumping margin is zero or *de minimis,* or an importer-specific *ad valorem* assessment rate is zero or *de minimis,* Commerce will instruct CBP to liquidate appropriate entries without regard to antidumping duties.[14]

For entries submitted by an exporter individually examined during this review that were not reported in the U.S. sales database, but that entered under the case number of that exporter (*i.e.,* at the individually-examined exporter's cash deposit rate), Commerce will instruct CBP to liquidate such entries at the China-wide entity rate (*i.e.,* 154.07 percent).[15]

For respondents not individually examined in this administrative review that qualified for a separate rate (*i.e.,* Jianlong, Jilin Meihua, Meihua, and Ningxia), the assessment rate will be the weighted average of the dumping margin assigned to the mandatory respondents (*i.e.,* Fufeng and Deosen) in these final results of this review.[16]

For the respondents not eligible for a separate rate, that are part of the China-wide entity, we intend to instruct CBP to apply an *ad valorem* assessment rate of 154.07 percent (*i.e.,* the China-wide entity rate) to all entries of subject merchandise exported by these companies during the POR.

Additionally, for the above companies for which we made final no shipment determinations, any suspended entries that entered under that exporter's case number will be liquidated at the China-wide entity rate.

Cash Deposit Requirements

Pursuant to section 751(a)(2)(C) of the Act, the cash deposit requirements effective for shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of review will be as follows: (1) for the exporters listed in the table above, the cash deposit rate will be the rate indicated; (2) for previously investigated or reviewed exporters of subject merchandise not listed in the table above that have separate rates, the cash deposit rate will continue to be the

[11] Commerce continues to find that Neimenggu Fufeng Biotechnologies Co., Ltd. (aka Inner Mongolia Fufeng Biotechnologies Co., Ltd.), Shandong Fufeng Fermentation Co., Ltd., and Xinjiang Fufeng Biotechnologies Co., Ltd. are a single entity. *See Xanthan Gum from the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review and Preliminary Determination of No Shipments; 2013–2014,* 80 FR 47464 (August 7, 2015), and accompanying PDM at 6, unchanged in *Xanthan Gum from the People's Republic of China: Final Results of Antidumping Duty Administrative Review; 2013–2014,* 82 FR 11428 (February 23, 2017).

[12] *See* 19 CFR 351.212(b)(1).

[13] *Id.*

[14] *See* 19 CFR 351.106(c)(2).

[15] *See Order,* 78 FR at 43144.

[16] *See Drawn Stainless Steel Sinks from the People's Republic of China: Preliminary Results of the Antidumping Duty Administrative Review and Preliminary Determination of No Shipments: 2014–2015,* 81 FR 29528 (May 12, 2016), and accompanying PDM at 10–11, unchanged in *Drawn Stainless Steel Sinks from the People's Republic of China: Final Results of Antidumping Duty Administrative Review; Final Determination of No Shipments; 2014–2015,* 81 FR 54042 (August 15, 2016).

most recently published exporter-specific rate; (3) for all China exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be the rate previously established for the China-wide entity (*i.e.,* 154.07 percent); and (4) for all non-China exporters of subject merchandise which have not received their own rate, the cash deposit rate will be the rate applicable to the China exporter that supplied that non-China exporter. The cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification of Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during the POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order (APO)

This notice also serves as a reminder to parties subject to an APO of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the terms of an APO is a sanctionable violation.

Notification to Interested Parties

Commerce is issuing and publishing the final results of this review in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: July 8, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

International Trade Administration

[A–549–833]

Citric Acid and Certain Citrate Salts From Thailand: Preliminary Results of Antidumping Duty Administrative Review; 2024–2025

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that producers/exporters subject to this review did not make sales of subject merchandise at less than normal value (NV) during the period of review (POR), July 01, 2024, through June 30, 2025. Interested parties are invited to comment on these preliminary results of review.

DATES: Applicable July 16, 2026.

FOR FURTHER INFORMATION CONTACT: Anjali Mehindiratta, and Joy Zhang, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–9127.

SUPPLEMENTARY INFORMATION:

Background

On June 30, 2025, based on timely requests for review, in accordance with 19 CFR 351.221(c)(1)(i), we initiated an administrative review of the antidumping duty order on citric acid and certain citrate salts (citric acid) from Thailand.[1] On September 10, 2025, we selected COFCO and Sunshine as the mandatory respondents in this antidumping administrative review.[2]

Due to the lapse in appropriations and Federal Government shutdown, on November 14, 2025, Commerce tolled all deadlines in administrative proceedings by 47 days,[3] and, due to a backlog of documents that were electronically filed via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS) during the Federal Government shutdown, on November 24, 2025, Commerce tolled all deadlines in administrative proceedings by an additional 21 days.[4] Finally, on June 3, 2026, Commerce extended the preliminary results of this review by 30 days, to no later than July 9, 2026.[5]

For a complete description of the events that followed the initiation of this review, *see* the Preliminary Decision Memorandum.[6] A list of the topics discussed in the Preliminary Decision Memorandum is attached as an appendix to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via ACCESS. ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/frnotices.*

Scope of the Order

The merchandise subject to the *Order* is citric acid from Thailand. For a

complete description of the scope of the *Order, see* the Preliminary Decision Memorandum.

Methodology

Commerce is conducting this review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act). Export price and constructed export price are calculated in accordance with section 772 of the Act. NV is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum.

Rate for Non-Individually Examined Companies

The Act does not address the establishment of a rate to apply to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. However, Commerce's regulation at 19 CFR 351.109(g) sets forth the process for determining the rate for non-individually examined companies. This regulation explains that Commerce generally will follow the process for calculating the all-others rate under 19 CFR 351.109(f) and section 735(c)(5) of the Act.

Under section 735(c)(5)(A) of the Act, the all-others rate is normally an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any rates that are zero, *de minimis* (*i.e.,* less than 0.5 percent), or determined entirely on the basis of facts available. Where the weighted-average dumping margin for each of the individually examined companies is zero, *de minimis,* or based entirely on facts available, section 735(c)(5)(B) of the Act provides that Commerce may use ''any reasonable method to establish the estimated all-others rate for exporters and producers not individually investigated, including averaging the estimated weighted-average dumping margins determined for the exporters and producers individually investigated.'' [7]

In this review, we preliminarily calculated dumping margins of zero percent for both COFCO and Sunshine. Consistent with 19 CFR 351.109(f)(2)(iii), the U.S. Court of Appeals for the Federal Circuit's Decision in *Albermarle,*[8] and Commerce's practice in this proceeding,[9] we preliminarily assigned the non-selected company a zero percent rate, based on the rates calculated for the two mandatory respondents.

Preliminary Results of Review

As a result of this review, we preliminarily determine the following estimated weighted-average dumping margin exists for the period July 01, 2024, though June 30, 2025:

Producer or exporter	Weighted-average dumping margin (percent)
COFCO Biochemical (Thailand) Co., Ltd	0.00
Sunshine Biotech International Co. Ltd	0.00
Xitrical Group Co. LTD	0.00

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties for these preliminary results within 10 days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance. Pursuant to 19 CFR 351.309(c)(1)(ii), we have modified the deadline for interested parties to submit case briefs to Commerce to no later than 21 days after the date of the publication of this notice.[10] Rebuttal briefs, limited to issues raised in the case briefs, may be filed not later than five days after the date for filing case briefs.[11] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[12] All briefs must be filed electronically using ACCESS. An electronically filed document must be received successfully in its entirety in ACCESS by 5:00 p.m. Eastern Time on the established deadline.

As provided under 19 CFR 351.309(c)(2)(iii) and (d)(2)(iii), we request that interested parties provide at the beginning of their briefs a public executive summary for each issue raised in their briefs.[13] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final results in this administrative review. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[14]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS by 5:00 p.m. Eastern Time within 30 days after the date of publication of this notice. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Oral presentations at the hearing will be limited to issues raised in the briefs. If a request for a hearing is made, Commerce will inform parties of the scheduled date for the hearing.[15]

Assessment Rates

Pursuant to section 751(a)(2)(A) of the Act and 19 CFR 351.212(b)(1), Commerce will determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise in accordance with the final results of this review.

If the weighted-average dumping margin is not zero or *de minimis* (*i.e.,* less than 0.50 percent) for COFCO or Sunshine in the final results of this review, Commerce intends to calculate importer-specific assessment rates on the basis of the ratio of the total amount of dumping calculated for each importer's examined sales to the total entered value of those sales. Where we do not have entered values for all U.S. sales to a particular importer, we will

[7] *See* 19 CFR 351.109(f)(2)(iii).

[14] *See APO and Service Procedures.*

[15] *See* 19 CFR 351.310(d).

calculate an importer-specific, per-unit assessment rate on the basis of the ratio of the total amount of dumping calculated for the importer's examined sales to the total quantity of those sales.[16] To determine whether an importer-specific, per-unit assessment rate is *de minimis,* in accordance with 19 CFR 351.106(c)(2), we also will calculate an importer-specific *ad valorem* ratio based on estimated entered values. If COFCO's or Sunshine's weighted-average dumping margin is zero or *de minimis* or where an importer-specific *ad valorem* assessment rate is zero or *de minimis,* we will instruct CBP to liquidate appropriate entries without regard to antidumping duties.[17]

In accordance with Commerce's ''automatic assessment'' practice, for entries of subject merchandise during the POR produced by COFCO and Sunshine for which they did not know that the merchandise was destined for the United States, we intend to instruct CBP to liquidate those entries at the all-others rate calculated in the less-than-fair-value (LTFV) investigation if there is no rate for the intermediate company(ies) involved in the transaction.[18]

For the company which was not selected for individual examination, Xitrical Group Co. LTD, we will instruct CBP to assess antidumping duties at an *ad valorem* assessment rate equal to the company-specific weighted-average dumping margin determined in the final results.

Cash Deposit Requirements

The following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the companies listed above will be that established in the final results of this review, except if the rate is less than 0.50 percent and, therefore, *de minimis* within the meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rate will be zero; (2) for previously investigated or reviewed companies not covered by this review, the cash deposit rate will continue to be the company-specific cash deposit rate published for the most recently completed segment of this proceeding in which the company participated; (3) if the exporter is not a firm covered in this review, or the LTFV investigation, but the manufacturer is, then the cash deposit rate will be the rate established for the most recent segment for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 11.25 percent, the all-others rate established in the LTFV investigation.[19] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

We are issuing and publishing these preliminary results of review in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213(h)(2) and 351.221(b)(4).

Dated: July 9, 2026.

Christopher Abbott,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Certain Steel Nails From Malaysia: Final Results of Antidumping Duty Administrative Review; 2023–2024; Correction

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

ACTION: Notice; correction.

SUMMARY: The U.S. Department of Commerce (Commerce) published notice in the **Federal Register** of May 14, 2026, in which Commerce published the final results of the 2023–2024 administrative review of the antidumping duty (AD) order on certain steel nails from Malaysia. This notice inadvertently included the company Foison Hardware Inc. as a company subject to the review.

FOR FURTHER INFORMATION CONTACT: Tyler Weinhold, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1121.

SUPPLEMENTARY INFORMATION:

Background

On May 14, 2026, Commerce published in the **Federal Register** the final results of the 2023–2024 AD administrative review of certain steel nails from Malaysia.[1] In the *Final Results,* we inadvertently included the company Foison Hardware Inc. as a company subject to the review.

Correction

In the **Federal Register** of May 14, 2026, in FR Doc 2026–09709, on page 27250, in the second column, under ''Appendix II,'' correct the ''Non-Selected Companies for Individual Review'' section by removing ''1. Foison Hardware Inc.''

Notification to Interested Parties

This notice is issued and published in accordance with section 751(a)(1) and 777(i) of the Tariff Act of 1930, as amended, and 19 CFR 351.221(b)(5).

National Oceanic and Atmospheric Administration

[RTID 0648–XF749]

Request for Information on Ropeless Fishing; Fisheries of the Northeastern United States and Atlantic Coastal Fisheries Cooperative Management

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; request for information.

SUMMARY: NMFS is requesting information from fishery participants and others with specialized knowledge on the potential use of ropeless fishing gear, which includes on-demand fishing gear and other fixed gear that does not use persistent buoy lines. This information will inform any potential future use, development, and management of these systems in fisheries in the Greater Atlantic Region. NMFS intends to summarize the responses to this request for information and share that summary publicly.

DATES: Responses are due on or before October 14, 2026.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2026–2080, by the following method:

• *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Visit *https://www.regulations.gov* and type NOAA–NMFS–2026–2080 in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.

Instructions: When responding to this request for information, please label your response with the corresponding question number to which your input is directed. Comments sent by any other method than the one listed above, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, *etc.*), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Copies of supporting documentation to this request for information are available online. The technical report *Evaluation of On-Demand Gear Acoustic Interoperability Approaches in the Northeast U.S.* by the MITRE Corporation, is available at *https://library.oarcloud.noaa.gov/noaa_documents.lib/NMFS/On-Demand_Gear_Interoperability_Report.pdf.* The Northeast Fisheries Science Center report *A Proposal for Functional Data Specifications of On-Demand Fishing Gear, Version 2* (Galvez, 2026) is available at *https://repository.library.noaa.gov/view/noaa/73583/noaa_73583_DS1.pdf.*

FOR FURTHER INFORMATION CONTACT: Caroline Potter, Fisheries Resource Management Specialist, (978) 281–9325; *caroline.potter@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

Under the Consolidated Appropriations Act, 2023, NMFS is required to, ''in consultation with affected States and fishing industry participants, promote the innovation and adoption of gear technologies'' (Division JJ, Title I, Section 101(a)(1)). The Act mandates this effort to implement ''new regulations for the American lobster and Jonah crab fisheries consistent with the [Marine Mammal Protection Act (MMPA) and Endangered Species Act] that take effect by December 31, 2028, utilizing existing and innovative gear technologies, as appropriate'' (Division JJ, Title I, Section 101(a)(2)).

Accordingly, NMFS is providing resources to support the development of ropeless fishing gear as a potential voluntary alternative for fixed-gear fishermen to operate in areas with persistent buoy line restrictions while minimizing risks to large marine mammals. NMFS continues to collaborate with fishermen, technology manufacturers, state agencies, fishery management organizations, and other partners to explore the benefits and limitations of these technologies. This request for information (RFI) is a key step of this ongoing effort to comply with the mandates of the Consolidated Appropriations Act, 2023. This RFI does not limit NMFS' ability to consider other innovative gear or management activities and various management options are being considered.

Buoy lines connecting physical surface markers with fixed fishing gear—such as traps, pots, and gillnets—can become entangled with large whales, leading to the serious injury or death of the whale. Restricting the use of persistent buoy lines is one way to reduce the risk of entanglement for protected species, including North Atlantic right whales. Ropeless fishing gear substantially reduces entanglement risk and, if approved, could be used in areas with persistent buoy line restrictions.

In 2021, to comply with the requirements of the MMPA and respond to high rates of incidental deaths and serious injuries exceeding allowable limits, NMFS amended the Atlantic Large Whale Take Reduction Plan (86 FR 51970, September 17, 2021). This rule restricted the use of persistent buoy lines in particularly high-risk entanglement hotspot areas during times of the year when North Atlantic right whales and persistent buoy lines are most likely to co-occur.

The Consolidated Appropriations Act, 2023, requires NMFS to implement ''additional whale protection measures by December 31, 2028,'' (Division JJ, Title I, Section 101(a)(1)). If the best available scientific data shows that U.S. commercial fixed-gear fisheries continue to exceed the MMPA's legal thresholds, new or modified times and areas where persistent buoy lines are restricted may be considered, including during right whale aggregations. However, if authorized by NMFS, fixed-gear fishermen could use ropeless gear to continue fishing in new or modified areas, as well as the previously restricted areas.

Currently, the regulations governing the operation of federal waters fisheries in the Greater Atlantic Region require all fixed fishing gear to have physical surface markers (buoy/high flyer with radar reflector/pennant) (*e.g.,* 50 CFR 648 for Council-managed fisheries and part 697 for the lobster/Jonah crab fisheries). As a result of these gear marking requirements, any area that prohibits persistent buoy lines, but would otherwise allow fishing without those buoy lines, remains an area closed to fixed-gear fishing.

In 2025, the New England and Mid-Atlantic Fishery Management Councils initiated the Joint Omnibus Alternative Gear-Marking Framework Adjustment to consider whether to recommend that NMFS allow the use of fixed gear without physical surface markers in Council-managed fisheries if an equivalent alternative marking method

is used. NMFS is also considering whether to similarly modify the Federal American lobster/Jonah crab gear-marking regulations. If NMFS authorizes the use of gear-marking alternatives, such as digital gear markings, lobstermen could regain fishing access to current and any potential future restricted areas by using authorized ropeless fishing gear. Similarly, with these alternatives, fishermen could respond to sudden aggregations of large whales in an area by removing one or both endline(s), thereby reducing the likelihood of entanglement for the period of time the whales remain in an area. However, the Councils' action was postponed, pending additional input from stakeholders including the fishing industry. NMFS has, likewise, postponed action with respect to the lobster and Jonah crab fisheries to gather additional input and ensure consistency among the actions.

This RFI requests information specific to the program design, utility, limitations, and technical capability of ropeless fishing. It contains questions and associated context that were developed with a focus on Greater Atlantic Region operational and management considerations. However, NMFS also welcomes feedback informed by experiences where these gear alternatives are being used outside the Greater Atlantic Region. This RFI does not request comment on the number, size, location, or seasonality of any existing or future whale protection areas. The public will be notified if and when NMFS requests comment on those topics, which will occur through a different process and at a later time.

Description of Ropeless Fishing Gear

In this RFI, the term ''ropeless'' is used to describe all types of fixed-gear fishing that does not use persistent buoy lines. Therefore, ropeless fishing gear includes fixed gear rigged with an on-demand device or timed-retrieval device that triggers a retrieval mechanism. While gear rigged with these devices can still have ropes that are used to retrieve the gear, any buoy lines are only intended to remain in the water column for a short time during gear retrieval. Because ropeless gear refers to all fixed gear without any persistent buoy lines, it also encompasses fixed gear without one of these devices that can be retrieved by grappling. A string or trawl of fixed gear that uses a traditional, persistent buoy line on only one end is referred to as ''one-end ropeless.'' The end without the persistent buoy line may or may not be rigged with an on-demand or timed-retrieval device and retrieval mechanism.

Both trap/pot and gillnet gear, as well as other fixed gear types, can be fished in a ropeless configuration. For on-demand and timed-retrieval devices, the line can be stowed on the ocean floor rather than vertically in the water column between the bottom gear and the surface marker. An on-demand device uses acoustic communication to activate a retrieval mechanism such as a pop-up buoy, inflatable lift bag, or buoyant-rope spool. Timed-retrieval devices are designed to function similarly, except they use a timer or galvanic link to activate a retrieval mechanism. All of these types of ropeless fishing gear can be marked using alternative gear-markings such as digital markings.

Section III of this RFI provides definitions of the terms used in this RFI.

Ropeless Fishing Gear's Functional Equivalence to Traditional Gear

Ropeless fishing gear that does not use persistent buoy lines and surface markers should reproduce the functions served by surface markers. Such functions may include, but are not limited to: Allowing ocean users to visually detect the location of the gear; conveying set direction; allowing the gear to be retrieved; conveying identifying information that is required by the relevant fishery (*e.g.,* permit number); and allowing law enforcement to locate, retrieve, and redeploy the gear. Reproducing these functions allows fishermen and other ocean users to continue to operate in close proximity to the fixed gear while minimizing gear conflict. To achieve these functions, in part, ropeless fishing gear can be marked and visualized digitally. This RFI requests comment on how this should most effectively be accomplished.

II. Topics for Comment

1.0 Authorization of Ropeless Fishing Gear

Context

Through the Alternative Gear-Marking Framework Adjustment action, the New England and Mid-Atlantic Councils are considering when and where digitally marked gear could be allowed in its fixed gear fisheries. NMFS is concurrently considering whether to modify Federal lobster gear-marking regulations to relieve surface marking restrictions. During this process, the Councils received feedback highlighting the diversity of the fixed-gear industry, suggesting that regulatory changes must account for regional differences in fishing practices. In addition, other solutions such as grappling or removing one endline have been suggested as potential solutions to reduce large whale entanglement risk. Therefore, NMFS requests comments on information that will help inform decision making.

Questions

1. What experience do you have with ropeless fishing gear?

2. Ropeless fishing gear: Under what specific environmental, seasonal, or operational circumstances should NMFS authorize the use of ropeless fishing gear? Conversely, under what circumstances should its use be denied?

3. One-end ropeless gear: Under what specific circumstances should NMFS authorize the use of one-end ropeless gear? When should it be explicitly denied?

4. Do you support the use of grappling-only ropeless fishing gear? What limitations or guidelines should accompany its use?

2.0 Safety and Performance of On-Demand and Timed-Retrieval Fishing Gear

Context

NMFS is working to develop standards that ropeless systems would need to meet to be approved for use in regular commercial fishing operations in the Greater Atlantic Region. Establishing these standards will help ensure that fishermen have a range of safe, reliable, and effective system options from which to choose.

Safety

Ensuring that ropeless systems are safe to use is of paramount importance. Ropeless fishing gear eliminates the persistent endlines that could otherwise entangle a crewmember during deployment. However, because there is no persistent buoy line immediately available, recovering a crewmember who becomes entangled in a groundline could be more difficult. Thus, while some note that ropeless gear reduces the initial risk of crewmember entanglement by eliminating the endline that can entangle the crew, others caution that it could decrease the chances of a successful recovery if a ''man overboard'' incident occurs from groundline entanglement.

Stakeholders have also raised operational safety concerns regarding the gear itself. These include the physical weight of the systems, the use of compressed air tanks, the hauling process, mechanical or digital failures, and premature releases. Additionally, safety concerns related to potential gear conflicts have been noted.

While there have been no documented safety incidents during on-demand research and trials conducted by the Northeast Fisheries Science Center, developers are actively working on a ''man overboard'' feature that would immediately trigger the gear's retrieval mechanism. One developer has implemented this feature with its on-demand gear. However, gear rigged with a timed-retrieval device or gear that requires grappling would not necessarily support this function, potentially limiting this safety option for those gear types. Concerns have also been raised about the safety of grappling for ropeless gear.

Questions

5. What are the human safety-related concerns with and benefits of on-demand fishing? How do these concerns and benefits compare with traditional fishing gear?

6. What safety requirements or standards should be considered as part of approving a ropeless system for use?

7. Is ''man overboard'' functionality helpful for improving safety? If so, should it be a mandatory requirement for some or all types of ropeless gear? Are there other features that could increase safety of ropeless gear?

8. How could timed-retrieval devices or grappling methods be modified to increase safety?

Successful Retrievals

Ensuring that on-demand or timed-retrieval devices function as intended is necessary for the safe and continued operation of the gear. When retrieving on-demand fishing gear, ''success'' is measured by the ability to acoustically communicate with the device on the seafloor, trigger the release mechanism, and retrieve the gear at the surface. The overall success rate is over 91 percent for trials conducted under an EFP by the Northeast Fisheries Science Center. Nearly every unsuccessful haul was retrieved by other means, such as grappling. Based on anecdotes from fishermen using traditional fixed gear—which is subject to loss from storms, vessel traffic, gear conflict, and other losses—this 91-percent retrieval rate of on-demand gear is at least as good as, if not better than, fishing with traditional fixed gear. For the EFP trials from summer 2020 to early 2026, fewer than 1 in 600 hauls have led to the loss of an on-demand device, a recovery rate of 99.8 percent. While the Northeast Fisheries Science Center is not currently testing timed-retrieval devices, a similar measure of success, such as retrieval rate, could be developed for that gear type. However, determining the reliability of grappling may prove more difficult.

Questions

9. Should individual makes and models of ropeless fishing gear be subject to minimum reliability standards prior to approval for use? If so, how would you approach implementing this? Specifically, which components of a ropeless system (*e.g.,* the release mechanism, the on-demand/timed-retrieval device, other) should be subject to minimum reliability standards? What success criteria and testing parameters (*e.g.,* duration of deployment, depth, specific fishery conditions) should be used to evaluate reliability?

10. If a ropeless system no longer meets a reliability standard, what should the process be for re-approval?

11. Should fishermen be allowed to design and use their own rope containment systems to pair with approved on-demand or timed-retrieval release mechanisms or should complete-only designs be approved (with all or some modifications prohibited)?

12. Should there be a periodic inspection requirement to ensure gear safety or viability?

Premature Releases

On-demand or timed-retrieval systems have the potential to prematurely release. Tracking and reporting these premature releases is critical for at least two reasons: (1) It is important to know when and where buoy lines are present in the water column, especially if the area prohibits persistent vertical buoy lines; and (2) if a particular make and model of on-demand or timed-retrieval gear repeatedly releases prematurely, that information would be important for decision making, including device approval by NMFS.

Questions

13. Should fishermen be required to report premature releases of on-demand or timed-retrieval fishing gear?

14. Should premature release notifications be automatically sent to the gear owner and/or NMFS? Currently, this requires an additional device and increases the price of each ropeless system.

3.0 Alternative Gear Marking

Context

Currently, most vessel operators testing ropeless systems manually mark the gear's location by a button-push using a gear manufacturer-provided digital application using a tablet or smartphone. This creates a digital mark of the gear's position. However manual entry is prone to error; an operator may forget to mark gear during deployment, resulting in missing or inaccurate location data. Additionally, an operator could intentionally log a digital marker without actually deploying gear, creating a false mark. Both of these scenarios decrease the reliability of data that other ocean users would rely on to operate near ropeless fishing gear and avoid gear conflicts.

Ropeless gear can be marked automatically. For example, surface markings can be automatically created when the gear is deployed into the water. In addition, some on-demand systems automatically mark the gear's location on the seafloor via acoustic localization if the vessel is equipped with a through-hull transducer (although there may be other methods by which this functionality could be achieved). However, most systems do not currently have this capability and might only adopt it if it becomes a regulatory requirement. Furthermore, for fixed gear with physical surface markers, fishermen must estimate the location of gear on the seafloor based on the location of the buoys at the surface. Alternatively, acoustic communication can detect and mark the gear's position on the seafloor. This method may provide more accurate and precise gear location markings than using a global positioning system (GPS) to mark the gear's deployment location at the surface; however, it increases cost and technological complexity. Because gear density and the potential for gear conflict vary by region, it may be necessary to require the use of more precise location marking technology in certain areas. NMFS sponsored the technical report *Evaluation of On-Demand Gear Acoustic Interoperability Approaches in the Northeast U.S.* by the MITRE Corporation (see **ADDRESSES**), which, in part, examines localization accuracy requirements of ropeless gear.

Questions

15. How precisely do you need to know the geographic location of ropeless fishing gear to ensure safe operations and prevent gear conflicts (*e.g.,* within 25 feet of the true location)? In what specific areas, depths, or fishery conditions do you need to have this level of location precision? Are there other areas, depths, or fishery conditions where you would need more or less precision?

16. Should ropeless systems be required to automatically mark their deployment locations to eliminate human error, or is manual input (*e.g.,* via a mobile app or chartplotter) sufficient?

17. If manual marking is permitted, what measures or penalties should be considered to deter the creation of false marks or the failure to mark deployed gear?

18. How should NMFS balance the high cost and complexity of reliance on through-hull transducers for automatic acoustic marking against the need for highly reliable spatial data?

19. How desirable is it to be able to mark ropeless gear and trigger release mechanisms with a chartplotter as opposed to using a manufacturer's mobile application?

4.0 Gear Viewing

Context

Ocean users (*e.g.,* mobile fishing vessels, other fixed-gear vessels, vessels transiting nearby) must be able to detect ropeless fishing gear. This is a fundamental element of functional equivalence to physical surface markers (discussed in Section I. Introduction). Currently, in the Greater Atlantic Region, other ocean users can access location information from every ropeless system, regardless of manufacturer, on a unified platform that alleviates the potential need to monitor multiple applications or devices. This is accomplished through a data aggregator that compiles the location information for ropeless gear (generated by individual fixed-gear fishing vessels and ropeless gear manufacturers) and disseminates the information to other user groups. NMFS has developed partnerships and prototype data aggregation systems with independent organizations to facilitate the exchange of ropeless gear location information. For more discussion about data aggregators, see Section 9.0.

Option for Sharing Ropeless Gear Location Data

Decision-makers should establish rules regarding what information a data aggregator shares and with whom. For example, in an extreme case, a data aggregator could allow the precise location and identification information of digitally marked gear to be viewable to anyone and from shore. Alternatively, shoreside viewing could be restricted to displaying only areas of high gear density (without identifying information). As another option, viewing could be restricted to users within a specific physical distance from the gear comparable to visual sighting of traditional gear.

Determining how digital gear-marking data are shared requires balancing three key factors: Data transmission costs; the privacy of a vessel's location; and the privacy of the fishing gear's location. It should also be noted that sending and receiving ropeless gear information to and from a data aggregator in near real-time would require access to the internet or cellular data. However, there may be specific circumstances where information is not needed in near-real time, such as in areas with low fishing effort.

There are at least four possible options for sharing gear location information with vessels at sea:

Option 1: Curated by a Data Aggregator

- *Process:* A vessel actively shares its current location with a data aggregator. The data aggregator transmits location data of ropeless gear within a pre-specified radius of the vessel.
- *Priorities/trade offs:* This prioritizes ropeless gear location privacy and lower data transmission costs, but it requires vessels to anonymously provide their physical location to the aggregator.

Option 2: GPS Filtered on Vessel

- *Process:* A data aggregator sends all ropeless gear location data to a vessel (or all locations within a certain range of where the vessel is taking its trip). The vessel's integrated GPS technology then filters the information locally, displaying only the gear within a specified radius.
- *Priorities/trade offs:* Compared to option 1, this would increase vessel location privacy, but could increase data transmission costs and may create data security vulnerabilities that could expose ropeless gear information beyond the specified radius if the GPS-filtering technology was hacked.

Option 3: Criteria-Based Access

- *Process:* This refines Options 1 or 2 by restricting the aggregator to only send data to vessels that meet specific criteria (*e.g.,* vessels actively permitted to fish in certain areas or fisheries).
- *Priorities/trade offs:* This alleviates some data security concerns, but significantly increases management and administrative complexity.

Option 4: Fully Public

- *Process:* The data aggregator publicly shares all ropeless gear location data.
- *Priorities/trade offs:* This places the highest priority on vessel location privacy. However, it essentially eliminates on-demand gear location privacy and has a comparatively high data transmission cost.

Some of these options require a data aggregator to temporarily know the location of the vessels to which it is sharing gear location data. This is similar to how you need to allow a mapping/navigational app to know your location while traveling for it to provide directions, traffic, or road conditions in real-time. A data governance plan (discussed in Section 9) could specify how long a data aggregator may retain vessel location data.

While NMFS has implemented location data collection programs, such as vessel monitoring systems, and states have implemented electronic tracking of Federal lobster vessels, these programs were created for specific purposes and mandate specifically what information must be shared when and with whom. Moreover, these programs do not include all vessels that operate near fixed gear. Thus, these programs, and similar state programs, are not sufficient as a comprehensive solution if vessel location needs to be shared with a data aggregator for the purposes of disseminating ropeless gear location information.

Questions

20. Which of the four data-sharing options (or combination thereof) is preferable, and why? How should data transmission costs, privacy of a vessel's location, and privacy of the fishing gear's location be prioritized against each other?

21. Under what circumstances is it necessary or desirable that ropeless fishing gear markings be viewable and updated in near real-time? Under what circumstances is it unnecessary?

22. At what specific distance from deployed ropeless gear should its location become visible on a vessel's display? Should this distance vary for specific fisheries, users, or circumstances?

23. Should digitally marked gear be viewable from shore? If so, which specific user groups (*e.g.,* law enforcement, researchers, the general public) should have shoreside access? Would you support shoreside viewability if it only provided aggregated and anonymized information (*e.g.,* a heat map)?

24. Should there be a tiered-distance threshold where *only* the gear's location is viewable from a certain distance away, but detailed identifying information (*e.g.,* permit or ownership details, as appropriate) becomes visible only when the vessel is in very-close proximity?

25. Should vessel location data be shared with a data aggregator so it may curate and provide only the gear data within a specific radius (Option 1; akin to sharing your location with a mapping application for driving directions)? If

not, what are your concerns regarding this option?

5.0 Gear Conflict

Context

Gear conflict avoidance relies on vessel operators adequately marking their gear, maintaining a vigilant watch, and taking necessary steps to avoid marked gear. Generally, all fishermen have equal access to fish in Federal waters in the manner specified by law. Fishermen are prohibited from causing a gear conflict by negligently and without authorization removing, damaging, or tampering with another person's fishing gear. These obligations and requirements apply whether the fisherman is utilizing traditional or ropeless fishing gear and whether they operate with fixed or mobile gear.

Many stakeholders express concern that eliminating or reducing the number of physical surface markers with ropeless gear will increase the incidence of gear conflict. Conversely, others suggest that digitally marked gear may actually reduce conflicts due to the distinct advantages of digital marks. Environmental factors—such as nighttime operations, fog, and heavy seas—severely limit the visibility of traditional surface markers. Digital marking provides reliable, long-range viewability of fixed gear under both normal and adverse conditions that may be superior to visual sightings of surface markers.

Furthermore, because ropeless gear could be less susceptible to displacement by heavy weather, and some systems can be acoustically detected even if displaced, its adoption could result in less ''ghost'' gear, further reducing the potential for conflict. Additionally, removing physical buoy lines from the water column allows vessels to safely transit directly over fixed gear without causing a conflict.

Stakeholders have also pointed out that digital marks could significantly assist in the enforcement and resolution of gear conflict incidents. If law enforcement agencies are authorized to access digital gear-marking data, combining near real-time ropeless gear locations with existing vessel tracking systems (such as vessel monitoring systems or automatic identification systems) could provide useful data to support investigations into gear conflicts.

In 1996, at the recommendation of the New England Council in coordination with the Mid-Atlantic Council and the Atlantic States Marine Fisheries Commission, NMFS implemented a process for resolving gear conflicts in fixed and mobile gear fishery management plans through a framework adjustment. NMFS or the Councils could initiate a new framework adjustment that specifically considers and delineates the operational obligations and responsibilities for fishing with, and around, ropeless fishing gear in Federal waters.

Questions

26. What are the gear conflict-related benefits and concerns of ropeless fishing? How are those benefits or concerns different for one-end ropeless?

27. Are specific steps or regulatory measures necessary to proactively decrease gear conflicts related to ropeless fishing? If so, what are they?

28. Is it necessary for fishing vessels operating around ropeless gear to view digital gear markings in near real-time? Does this depend on the fishery or location?

29. Should fishing vessels operating near ropeless gear be required by regulation to carry the technology necessary (*e.g.,* internet and a visualization tool, such as a chartplotter) to view digital gear markings in near real-time? Or, are the consequences of causing a gear conflict enough deterrence that such regulatory requirements are not necessary?

30. Should fishermen be required to report gear conflicts?

31. Does the digitization of fishing gear locations improve situational awareness of gear locations at sea?

6.0 Equity

Context

Currently, the Greater Atlantic Region fixed-gear fishery regulations require various physical surface markers, prohibiting the use of ropeless gear. Research and testing of ropeless fishing gear is being conducted through exempted fishing permits (EFP), which allow approved vessels to engage in otherwise prohibited activities. While some view EFPs as a viable pathway for permitting ropeless fishing to advance our knowledge and experience, others argue they are inequitable because they grant fishing privileges to a limited number of select permit holders. NMFS, in general, supports permanently relieving the restrictions on gear-marking requirements, in part, to minimize the burden on the industry to apply for and report on EFPs, as well as to minimize governmental resource burdens. Furthermore, long-term reliance on EFPs to authorize ropeless fishing could lead to unequal access and opportunities among fishermen.

Some forms of ropeless fishing—such as on-demand gear—require different technology compared to traditional fixed-gear fishing. For fishermen who choose to adopt ropeless gear, their operational methods could change in ways that some allege would potentially alter the character of the fishery. Some have voiced concerns that the technological and financial requirements of on-demand gear could shift the balance of competitive success, which could ultimately lead to the consolidation of some fixed-gear fisheries. Others note that industries regularly adapt to emerging technologies while maintaining the character of the industry.

Questions

32. What specific equity concerns do you have regarding the authorization and use of ropeless fishing gear?

33. What measures could NMFS implement to address equity concerns?

34. How does the current reliance on EFPs impact the development, fairness, and opportunity within the fishery?

35. How can ropeless fishing programs be designed and managed to ensure fair access and equitable outcomes for all willing participants and affected parties?

7.0 Potential Training Requirements To Use Ropeless Fishing Gear

Context

As with any technology, it is assumed that experience with a new gear will foster proficiency with its use. To establish a baseline of proficiency, a knowledge demonstration or training requirement could be required before fishermen are authorized to use ropeless systems. This requirement could be structured in various ways, ranging from an on-the-water practical test to simply reviewing educational materials (such as ''how-to'' videos for a manufacturer's mobile application) followed by a brief knowledge assessment. If a training requirement is deemed necessary, decisions on which entities should develop and provide this training, and exactly how fishermen should be expected to demonstrate their competency with ropeless systems, will need to be made.

Questions

36. Should ropeless users be required to demonstrate that they know how to properly deploy, retrieve, and/or mark ropeless fishing gear before being authorized to use it?

37. If a knowledge demonstration or training requirement is implemented, what specific elements or milestones should be required of the operator? Who should be responsible for developing

and administering this training (*e.g.,* NMFS, gear manufacturers, other)?

38. Should other ocean users (*e.g.,* mobile gear fishermen) be required to demonstrate proficiency in using the visualization technology necessary to detect digitally marked gear?

39. How should NMFS handle repeated instances of operator error? How would NMFS distinguish between an operator error and an equipment malfunction?

8.0 Law Enforcement

Context

Ropeless systems present both challenges and practical utility for law enforcement. For example, on-demand gear manufacturers currently use proprietary acoustic communication protocols, requiring law enforcement vessels to carry multiple, manufacturer-specific deck boxes and transducers to retrieve and inspect different ropeless gear systems. While efforts are underway to develop and test a universal deck box capable of communicating with all on-demand gear, this remains a technological hurdle. If manufacturers adopted a common acoustic-signaling standard, a universal deck box would be unnecessary; however, there is currently no industry-wide initiative or regulatory requirement to pursue a standardized acoustic protocol. The MITRE Corporation's technical report *Evaluation of On-Demand Gear Acoustic Interoperability Approaches in the Northeast U.S.* (see **ADDRESSES**) examines whether a common acoustic signaling approach is needed.

In addition to the challenge of triggering on-demand devices, enforcement personnel must be trained to safely operate various proprietary release mechanisms to retrieve and properly redeploy gear during at-sea inspections. Furthermore, it may be impractical for law enforcement to inspect timed-retrieval devices. Safety and logistical concerns also exist for grappling ropeless gear. Covert inspections may also be logistically challenging.

Despite these physical challenges, digitally marked gear offers practical utility for enforcement operations. If law enforcement personnel are authorized to access digital gear location data from shore, or from an expanded radius at-sea, it could streamline patrol trip planning and help agencies allocate their on-water resources more efficiently. Likewise, digital markers and associated data records could provide law enforcement with useful information to support investigations—information that is simply not available with traditional fixed gear.

Questions

40. What concerns or suggestions do you have regarding enforcing ropeless fishing?

41. How should law enforcement address the inspection of ropeless gear that is rigged with timed-retrieval devices or that is grapple-only?

9.0 Data Governance and Management

Context

Data Standard

For digital gear markings to successfully reproduce the functions of physical surface markers, a robust data-governance framework must be developed to ensure that essential information flows efficiently among data users. NMFS is currently working to identify the specific information that should be aggregated from ropeless fishing systems and disseminated to end users. Standardizing the data associated with digitally marked gear (as is done for other U.S. fisheries programs) can support software development, efficiency in information management and dissemination, and generally increase the quality and accuracy of data. A potential list of data elements and user groups is provided in a Northeast Fisheries Science Center report (Galvez, 2026, see **ADDRESSES**).

Data Aggregator(s)

As described in Section 5.0, an entity must act as a data aggregator that collects and disseminates the location information of ropeless fishing gear. Currently, two organizations act as data aggregators in the Greater Atlantic Region. NMFS has conducted an initial evaluation regarding the role of the Federal government in providing these data services, as well as the additional legal requirements that would apply. Federal management of ropeless gear location information would likely require complex procedures to comply with multiple Federal statutes. Given that certain Federal statutory requirements would not necessarily apply to private or independent entities, a non-Federal third party could aggregate this data more efficiently than NMFS, potentially providing more effective data services for ocean users.

Currently, data from each on-demand system is transmitted to the manufacturer's database, transmitted to one data aggregator, shared with the other data aggregator, and finally distributed back out to visualization platforms. Having a single data aggregator and fewer points of transmission would reduce errors and latency and increase reliability and efficiency. It would be helpful to determine if multiple organizations should be allowed to coordinate with each other and each act as a data aggregator or if only one organization should act as a data aggregator. In addition, NMFS is seeking stakeholder input on what requirements there should be for digitally marked gear databases to protect fishermen's proprietary data.

Questions

42. How should data for ropeless fishing be governed and managed?

43. Do you have any additional feedback or recommendations regarding the list of data elements in the report *A Proposal for Functional Data Specifications of On-Demand Fishing Gear* (Galvez, 2026, see **ADDRESSES**)? Are there any missing data elements, or elements that should be modified or removed?

44. What specific security and operational requirements should be considered for independent third parties managing digitally marked gear locations and other associated data?

10.0 Additional Considerations

Questions

45. Is there any other information that you would like to share in response to this request for information or regarding ropeless fishing more generally?

46. NMFS has heard concerns regarding the cost of systems. For fishermen who choose to fish with ropeless fishing gear, there could be several ways to reduce the cost of acquiring ropeless systems, such as by leasing gear from gear libraries or utilizing grant or loan programs. How should NMFS balance the potential regulatory requirements for technologically complex features (*e.g.,* automated acoustic marking, real-time data transmission, *etc.*) against the potential cost of these features?

47. Beyond the direct cost of purchasing ropeless gear, what are the other economic costs of ropeless fishing? What are the economic benefits?

48. Should NMFS require a common acoustic protocol or signaling standard for all approved on-demand systems to ensure interoperability across the industry, or should manufacturers be permitted to maintain proprietary acoustic approaches? This topic is discussed in the MITRE technical report *Evaluation of On-Demand Gear Acoustic Interoperability Approaches in the Northeast U.S.* (see **ADDRESSES**).

49. If NMFS allows the use of ropeless fishing gear, should the option to use it be phased in (*e.g.,* by specific geographic regions, by fishery, or through pilot programs)?

50. How can NMFS design ropeless fishing regulations to be flexible enough to accommodate future technological advancements?

51. What are the potential environmental benefits or consequences of fishing with ropeless gear? What are the potential benefits or consequences of ropeless fishing on fisheries operations?

52. Ropeless fishing gear is currently being used in fisheries outside of the Greater Atlantic Region. Do you have examples of its use or management outside the Greater Atlantic Region that should be emulated or avoided within the Greater Atlantic Region?

III. Definitions

Grappling: Method of retrieving fishing gear from the ocean floor by dragging a weighted hook along the bottom to snag rope (such as a groundline or bridle) that is connected to traps, pots, or nets.

Interoperability: Capability of different technologies, systems, devices, models, or brands to communicate, share information, and function with each other.

Retrieval mechanism: Apparatus designed to surface a retrieval line to allow for the hauling of fixed gear. For example, a buoyant spool, inflatable lift bag, and pop-up buoy.

On-demand device: Equipment that uses acoustic release technology to trigger a retrieval mechanism.

On-demand fishing gear: Fixed gear equipped with at least one on-demand device.

On-demand system: Combination of technologies and devices, including an on-demand device, that allow for the deployment, retrieval, and marking of fixed gear positions without persistent buoy lines. This definition excludes the technology needed to share and display digital gear marks. An on-demand system is a type of ropeless system.

One-end ropeless: String or trawl of fixed gear that uses a traditional, persistent buoy line on only one end. The end without the persistent buoy line may or may not be rigged with an on-demand or timed-retrieval device and retrieval mechanism.

Ropeless fishing gear: Fixed fishing gear that operates without persistent buoy lines. This definition includes fixed gear rigged with an on-demand device or timed-retrieval device that triggers a retrieval mechanism, as well as fixed gear that can only be retrieved by grappling.

Ropeless system: Combination of technologies and devices that allow for the deployment, retrieval, and marking of fixed gear positions without persistent buoy lines. This definition excludes the technology needed to share and display digital gear marks. This definition includes, but is not limited to, on-demand systems and timed-retrieval systems.

Timed-retrieval device: Equipment that uses a pre-set timer or a degradable galvanic link to trigger a retrieval mechanism.

Timed-retrieval fishing gear: Fixed gear equipped with at least one timed-retrieval device.

Timed-retrieval system: Combination of technologies and devices, including a timed-retrieval device, that allow for the deployment, retrieval, and marking of fixed gear positions without persistent buoy lines. This definition excludes the technology needed to share and display digital gear marks. A timed-retrieval system is a type of ropeless system.

Persistent buoy line: Traditional fixed gear endline or vertical line that extends from the fishing gear on the seafloor to the physical surface marker for the entirety of the soak time.

IV. Other

Please note that this is an RFI only. In accordance with the implementing regulations of the Paperwork Reduction Act of 1995 (PRA), specifically 5 CFR 1320.3(h)(4), this general solicitation is exempt from the PRA. Facts or opinions submitted in response to general solicitations of comments from the public, published in the **Federal Register** or other publications, regardless of the form or format thereof, provided that no person is required to supply specific information pertaining to the commenter, other than that necessary for self-identification, as a condition of the agency's full consideration, are not generally considered information collections and therefore not subject to the PRA.

This RFI is issued solely for information and planning purposes; it does not constitute a request for proposals, applications, proposal abstracts, or quotations. This RFI does not commit the U.S. Government to contract for any supplies or services or make a grant award. Further, NMFS is not seeking proposals through this RFI and will not accept unsolicited proposals. Choosing not to respond to this RFI does not preclude participation in any future procurement, if conducted.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XF865]

Gulf Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The Gulf Fishery Management Council (Gulf Council) will hold a 2 day in-person meeting of its Standing and Shrimp Scientific and Statistical Committees (SSC).

DATES: The meeting will be held in-person on Tuesday, July 21 and Wednesday, July 22, 2026, from 9 a.m.–5 p.m., EDT daily.

ADDRESSES: The meeting will take place at the Gulf Council's office located at 4107 W. Spruce Street, Suite 200, Tampa, FL 33607. Hybrid connection information will be available on the Council's website at *https://www.gulfcouncil.org* and clicking on the ''meeting tab''.

Council address: Gulf Fishery Management Council, 4107 W. Spruce Street, Suite 200, Tampa, FL 33607; telephone: (813) 348–1630.

FOR FURTHER INFORMATION CONTACT: Mr. Ryan Rindone, Lead Fishery Biologist, Gulf Fishery Management Council; *ryan.rindone@gulfcouncil.org,* telephone: (813) 348–1630.

SUPPLEMENTARY INFORMATION:

Tuesday, July 21, 2026; 9 a.m.–5 p.m. EDT

The meeting will begin with introductions and adoption of agenda, review and approval of Meeting Minutes and Summary from the May 2026 SSC webinar meeting, and Scope of Work.

The SSCs will review and discuss Estimation of Shrimp Trawl Bycatch Methodology and Gray Triggerfish Bycatch Estimation, including presentations, background materials and SSC Discussion.

The SSC will also receive recommendations from the Working Group on Shrimp Trawl Bycatch for Finfish.

The SSCs will then review the Minimum Threshold Number of Federal Gulf Shrimp Permits, including presentations, background materials and SSC Discussion.

Public comments, if any, will be heard at the end of the day.

Wednesday, July 22, 2026; 9 a.m.–5 p.m. EDT

The SSC will review and discuss Fisheries Integrated Modeling System Peer-review, Gulf King Mackerel Landings and Length Composition Data from Mexico, Gulf Tilefish Data Triage and Stock Evaluation Options, and the Greater Amberjack Count and the planned SEDAR Assessment for Gulf Greater Amberjack; including presentations, background materials and SSC Discussion and Recommendations.

Public comments, if any, will be heard at the end of the day followed by the review of any Other Business items.

— Meeting Adjourns

The meeting will also be broadcast via webinar. You may register to listen in only by visiting *https://www.gulfcouncil.org* and clicking on the SSC meeting on the calendar.

The Agenda is subject to change, and the latest version along with other meeting materials will be posted on *https://www.gulfcouncil.org* as they become available.

Although other non-emergency issues not on the agenda may come before the Scientific and Statistical Committees for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (MSA), those issues may not be the subject of formal action during this meeting. Actions of the Scientific and Statistical Committee will be restricted to those issues specifically identified in the agenda and any issues arising after publication of this notice that require emergency action under Section 305(c) of the MSA, provided the public has been notified of the Council's intent to take-action to address the emergency.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XF880]

Fisheries of the Gulf of America; Southeast Data, Assessment, and Review; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of webinar.

SUMMARY: The Southeast Data Assessment and Review (SEDAR) 105 assessment process of Gulf gag grouper will consist of a series of assessment webinars. See **SUPPLEMENTARY INFORMATION.**

DATES: The SEDAR 105 Topical Working Group Red Tide Mortality I webinar will be held August 5, 2026, from 1—4 p.m. Eastern Time.

ADDRESSES:

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

Meeting address: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (See **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; (843) 571–4366. Email: *Julie.neer@safmc.net.*

SUPPLEMENTARY INFORMATION: The Gulf, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with the National Marine Fisheries Service and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the SEDAR process. SEDAR is a participatory process for developing, evaluating and reviewing information used for fisheries management advice. This multi-step process for determining the status of fish stocks in the Southeast Region may include (1) a Data stage, and (2) an Assessment stage, and (3) a Review stage. Each stage produces a report summarizing decisions made during that stage. A final stock assessment report is produced at the end of a SEDAR process documenting data sets used, model configurations and the opinions from the independent peer review. Participants for SEDAR projects are appointed by the Gulf, South Atlantic, and Caribbean Fishery Management Councils and National Marine Fisheries Service Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants may include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations; International experts; and staff of Councils, Commissions, and state and Federal agencies.

The items of discussion during the SEDAR 105 Topical Working Groups Data Recommendations webinar are as follows:

Participants will review the data analyses and make recommendations.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: July 14, 2026.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Climate and Ecosystem Steering Committee via webinar to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This webinar will be held on Monday, July 27, 2026, at 9 a.m. EST.

Webinar registration URL information:

https://nefmc-org.zoom.us/meeting/register/p8VdVDnKS9KnNTkpeJkSRw.

ADDRESSES:

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Cate O'Keefe, Ph.D., Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Climate and Ecosystem Steering Committee will meet to receive an update on the forthcoming Northeast Climate Vulnerability Analysis 2.0. They will also discuss on-ramps for climate and ecosystem information into management. The Committee will receive a report from a recent Council workshop on Dynamic Reference Points. Also, on the agenda is to discuss other ongoing Inflation Reduction Act funded projects, as needed. Other business will be discussed, if necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Cate O'Keefe, Ph.D., Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XF897]

South Atlantic Fishery Management Council (Council)—Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public hearings.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold three in-person public hearings and one webinar hearing pertaining to amendment 60 to the Fishery Management Plan (FMP) for the Snapper Grouper Fishery of the South Atlantic Region. This amendment considers removing the 2-for-1 requirement for obtaining a snapper grouper commercial transferable permit; revising stowage requirements and species restrictions for commercial vessels with longline gear on board to allow switching to or from this gear during a commercial trip, increasing trip limits for several snapper grouper species, and requiring sale of all snapper grouper harvested by commercial vessels.

DATES: The in-person hearings public hearings will take place on August 10, 11, and 19, 2026, beginning at 6 p.m., EDT. The webinar hearing will take place on August 31, 2026, beginning at 6 p.m., EDT. Registration for webinar is required. For specific dates and times, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES:

Council address: South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N Charleston, SC 29405. Information, including a link to webinar registration will be posted on the Council's website at: *https://safmc.net/public-hearings-and-scoping/* when it becomes available.

In-Person Meeting Locations

Monday, August 10, 2026: North Carolina Division of Marine Fisheries Central District Office, 5285 Highway 70 West, Morehead City, NC 28557; phone: (252) 515–5500.

Tuesday, August 11, 2026: Brunswick County Administrative Building, 30 Government Center Drive NE, Bolivia, NC 28422; phone: (910) 253–2017.

Wednesday, August 19, 2026: Heckscher Drive Community Club, Inc., 9364 Heckscher Drive, Jacksonville, Florida 32226; phone: (904) 759–6996.

FOR FURTHER INFORMATION CONTACT: Ashley Oliver, Outreach Coordinator, SAFMC; phone (843) 571–4366 or toll free (866) SAFMC–10; FAX (843) 769–4520; email: *Ashley.Oliver@safmc.net.*

SUPPLEMENTARY INFORMATION: A public hearing document, an online public comment form, and other materials will be posted to the Council's website at *https://safmc.net/public-hearings-and-scoping/* as they become available. Written comments should be addressed to John Carmichael, Executive Director, SAFMC, 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405. Written comments must be received by September 1, 2026, at 5 p.m. During the hearings Council staff will provide an overview of actions being considered in the amendment. Staff will answer clarifying questions on the presented information and the proposed actions. Following the presentation and questions, the public will have the opportunity to provide comments on the amendment.

Amendment 60 to the Snapper Grouper FMP

The amendment aims to increase the long-term stability of the commercial fishery by maintaining the current number of permits and to increase flexibility, adaptability, access, and economic profitability in the snapper grouper commercial sector. The amendment proposes to remove the 2-for-1 requirement for obtaining a transferable snapper grouper (SG 1) commercial permit, which would facilitate transfer of permits, thereby increasing active participation of permit holders in the fishery. Revising bottom longline gear stowage requirements and species restrictions would provide additional flexibility for commercial fishermen that use bottom longline gear to be able to deploy multiple gears within a trip, thereby improving trip efficiency while maintaining law enforcement's ability to monitor the gear used to catch snapper grouper species. The amendment includes several actions to consider increasing commercial trip limits for greater amberjack, vermilion snapper, red porgy, hogfish (Georgia-North Carolina stock), red grouper, gray triggerfish, and golden tilefish (hook-and-line only) to better achieve optimum yield and

increase trip efficiency. Finally, the amendment proposes to require sale of all commercially harvested snapper grouper, which would improve reporting accuracy and promote commercial snapper grouper permits to be solely used to harvest fish for sale.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the council office (see **ADDRESSES**) 5 days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XF867]

Endangered Species; File No. 29736

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Katrina Phillips, Ph.D., Dauphin Island Sea Lab 101, Bienville Blvd., Dauphin Island, AL 36528, has applied in due form for a permit to take loggerhead (*Caretta caretta*), green (*Chelonia mydas*), Kemp's ridley (*Lepidochelys kempii*), hawksbill (*Eretmochelys imbricata*), and leatherback (*Dermochelys coriacea*) sea turtles for purposes of scientific research.

DATES: Written comments must be received on or before August 17, 2026.

ADDRESSES: The application and related documents are available for review by selecting ''Records Open for Public Comment'' from the ''Features'' box on the Applications and Permits for Protected Species home page, *https://apps.nmfs.noaa.gov,* and then selecting File No. 29736 from the list of available applications. These documents are also available upon written request via email to *NMFS.Pr1Comments@noaa.gov.*

Written comments on this application should be submitted via email to *NMFS.Pr1Comments@noaa.gov.* Please include File No. 29736 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to *NMFS.Pr1Comments@noaa.gov.* The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Amy Hapeman or Erin Markin, Ph.D., (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

The applicant proposes to study juvenile, subadult, and adult sea turtle demography and distribution in the northern Gulf of America. Researchers would capture up to 60 green, 7 hawksbill, 60 Kemp's ridley, 40 loggerhead, and 1 leatherback sea turtles by tangle and dip net annually. Researchers would perform the following procedures on sea turtles prior to their release: epibiota removal; flipper tag; passive integrated transponder tag; biologically sample (skin swab, blood, scute, fecal, and skin biopsy); measure; weigh; and photograph/video. A subset of green, Kemp's ridley, and loggerhead sea turtles may receive a transmitter attachment. The permit is requested for 10 years.

Dated: July 14, 2026.

Larissa Plants,

Acting Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

[RTID 0648–XF875]

Gulf Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public hearings and webinars.

SUMMARY: The Gulf Fishery Management Council (Gulf Council) will hold two public hearings via webinar to solicit public comments on For-Hire Electronic Reporting.

DATES: The public hearing webinars will take place Thursday, August 13 and Monday, August 17, 2026. The webinars will begin at 6 p.m. EDT and will conclude no later than 8 p.m. EDT. For specific dates and times, see **SUPPLEMENTARY INFORMATION**. Written public comments must be received on or before 5 p.m. EDT on August 17, 2026.

ADDRESSES: Please visit the Gulf Council website at *https://www.gulfcouncil.org for* meeting materials and webinar registration information.

Meeting addresses: The public hearings will be held via virtual webinars. For dates and times see **SUPPLEMENTARY INFORMATION** below.

Council address: Gulf Fishery Management Council, 4107 W Spruce Street, Suite 200, Tampa, FL 33607; telephone: (813) 348–1630.

FOR FURTHER INFORMATION CONTACT: Emily Muehlstein; Public Information Officer; *emily.muehlstein@gulfcouncil.org,* Gulf Fishery Management Council; telephone: (813) 348–1630.

SUPPLEMENTARY INFORMATION: The agenda for the virtual public hearings is as follows: Council staff will begin with a brief presentation on the Generic Amendment to modify the Reef Fish and Coastal Migratory Pelagic Fishery Management Plans to Modify the Gulf For-Hire Data Collection Program. The Amendment considers defining a mechanism and timing for for-hire data reporting, requiring trip notification and effort reporting, and establishing economic reporting for for-hire vessels.

Staff and a Council member will be available to answer any questions, and the public will have the opportunity to provide testimony on the amendment and other related testimony.

Scheduled Webinars:

Thursday, August 13, 2026; via webinar

Monday, August 17, 2026; via webinar

Visit *https://www.gulfcouncil.org* website and click on the ''meetings and public hearings'' tab for registration information. After registering, you will receive a confirmation email containing information about joining the webinar.

International Whaling Commission; 70th Meeting; Announcement of Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: This notice announces the date, time, and access information of the public meeting being held, in a virtual format, prior to the 70th meeting of the International Whaling Commission (IWC).

DATES: The public meeting will be held August 7, 2026 at 2 p.m. EDT.

ADDRESSES: The meeting will be held in a virtual/online format. Attendees must register in advance to attend the public meeting at the following link: *https://noaanmfs-meets.webex.com/weblink/register/r9cdc9744baf07d17de58d871bb33b17e.*

FOR FURTHER INFORMATION CONTACT: Madison Harris, *Madison.Harris@noaa.gov* or (301) 427–8371.

SUPPLEMENTARY INFORMATION: The Secretary of Commerce is responsible for implementing the domestic obligations of the United States under the International Convention for the Regulation of Whaling, 1946. The U.S. IWC Commissioner has responsibility for the preparation and negotiation of U.S. positions on international issues concerning whaling and for all matters involving the IWC. The U.S. IWC Commissioner is staffed by the Department of Commerce and assisted by the Department of State, and the Marine Mammal Commission.

The IWC will hold its 70th meeting in Hobart, Australia from September 28-October 2, 2026. Additional information about the IWC meeting, including a draft agenda for the meeting, is posted on the IWC Secretariat's website at *https://iwc.int/events-and-workshops/iwc70-2026.*

NOAA will hold a public meeting on August 7, 2026 to discuss the upcoming IWC meeting. U.S. persons and entities with an interest in U.S. whale conservation and management policy may participate and share views about the topics and proposals to be discussed at the meeting of IWC. The information obtained from this session will help the U.S. government in its preparations for the Commission meeting, including engagement with other IWC Member Governments, consideration of proposals, and formulation of U.S. positions.

The August 7 meeting will be held at 2 p.m. EDT in a virtual format. Meeting access and conferencing platform information will be sent to those who register. To participate, interested persons must register in advance via the following link: *https://noaanmfs-meets.webex.com/weblink/register/r9cdc9744baf07d17de58d871bb33b17e.*

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Madison Harris, *Madison.Harris@noaa.gov* or (301) 427–8371, by July 17, 2026.

Dated: July 14, 2026.

South Atlantic Fishery Management Council (Council)—Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a meeting.

SUMMARY: The South Atlantic Fishery Management Council's (Council) Scientific and Statistical Committee (SSC) will hold a meeting on August 12, 2026.

DATES: The SSC meeting will be held via webinar from 9 a.m. to 12 p.m. EDT on August 12, 2026.

ADDRESSES:

Meeting Address: The meeting will be held via webinar. Registration is required and will be available at: *https://safmc.net/events/august-2026-ssc-meeting/.*

Council address: South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Dr. Judd Curtis, Quantitative Fishery Scientist, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; phone 843/571–4366 or toll free 866/SAFMC–10; FAX 843/769–4520; email: *judd.curtis@safmc.net.*

SUPPLEMENTARY INFORMATION: The meeting is open to the public via webinar as it occurs. Webinar registration is required. Information regarding webinar registration is available from the Council's website at: *https://safmc.net/events/august-2026-ssc-meeting/.* The meeting agenda, briefing book materials, and online comment form will be posted to the Council's website 2 weeks prior to the meeting. Written comment on SSC agenda topics is to be distributed to the Committee through the Council office, similar to all other briefing materials. For this meeting, the deadline for submission of written comment is 12 p.m. EDT August 12, 2026.

The meeting agenda will include discussion of the South Atlantic Spawning Special Management Zones; review of the terms of reference for the upcoming red grouper, snowy grouper, and vermilion snapper stock assessments, and an evaluation of stock risk ratings under the acceptable biological catch control rule. The SSC will receive updates to SSC workgroup and Southeast Data, Assessment, and Review (SEDAR) panels and conduct other business as needed. The SSC will provide guidance to staff and make recommendations for Council consideration.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the council office (see **ADDRESSES**) 5 days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

[Docket ID: DoD–2026–OS–1552]

Privacy Act of 1974; System of Records

AGENCY: Defense Logistics Agency, Department of Defense (DoD)

ACTION: Rescindment of a System of Records Notice (SORNs).

SUMMARY: In accordance with the Privacy Act of 1974, the Defense Logistics Agency (DLA) is providing notice to rescind a system of records titled ''DLA Hometown News Release,'' S190.10. The system of records was established for the purpose of distributing information on activities and accomplishments of DLA military and civilian personnel to hometown newspapers and broadcast stations throughout the United States. These records are now covered under the Defense Visual Information Distribution Service (DVIDS), DPA 04.

DATES: The rescindment of these SORNs is effective August 17, 2026.

ADDRESSES: You may submit comments, identified by docket number and title, by either of the following methods:

* *Federal Rulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.

* *Mail:* Department of Defense, Office of the Director of Administration and Management, Oversight and Compliance Directorate, Regulatory Division, 4800 Mark Center Drive, Attn: Mailbox 24, Suite 05F16, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *https://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Monica Owczarzak, Senior Privacy Officer, Information Governance and Compliance Division, Chief Digital and AI Office (J6D), 8725 John J. Kingman Road, Fort Belvoir, VA 22060–6221, 571–684–0406.

SUPPLEMENTARY INFORMATION:

I. Background

The Defense Logistics Agency (DLA) system of records DLA Hometown News Releases, S190.10 (April 17, 20213; 78 FR 22854) was established for the purpose of distributing information on activities and accomplishments of DLA military and civilian personnel to hometown newspapers and broadcast stations throughout the United States. These records are now covered under the Defense Visual Information Distribution Service (DVIDS), DPA 04 (November 14, 2022; 87 FR 68140).

DoD SORNs have been published in the **Federal Register** and are available at the Oversight and Compliance Directorate, Privacy and Civil Liberties Division website at *https://pclt.defense.gov/DIRECTORATES/Privacy-and-Civil-Liberties-Directorate/Privacy/SORNS.*

II. Privacy Act

Under the Privacy Act, a ''system of records'' is a group of records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined as a U.S. citizen or alien lawfully admitted for permanent residence.

In accordance with 5 U.S.C. 552a(r) and Office of Management and Budget (OMB) Circular No. A–108, DoD has provided a report of this rescindment to OMB and Congress.

SYSTEM NAME AND NUMBER:

DLA Hometown News Releases, S190.10.

HISTORY:

April 17, 2013; 78 FR 22854; June 24, 2011; 76 FR 37082.

Dated: July 14, 2026.

DEPARTMENT OF DEFENSE

Office of the Secretary

Renewal of Department of Defense Federal Advisory Committee-National Security Education Board

AGENCY: Department of Defense (DoD).

ACTION: Renewal of Federal advisory committee.

SUMMARY: The DoD (referred to herein as ''the Department,'' ''Department of War'' or ''DoW'') is publishing this notice to announce that it is renewing the National Security Education Board (NSEB) as a non-discretionary Federal advisory committee.

FOR FURTHER INFORMATION CONTACT: Jim Freeman, Advisory Committee Management Officer for the Department of War, 703–692–5952.

SUPPLEMENTARY INFORMATION: The NSEB is being renewed in pursuant to 50 United State Code (U.S.C.) 1903 and accordance with the provisions of chapter 10 of Title 5, U.S.C. (commonly known as ''the Federal Advisory Committee Act'' or ''FACA'') and 41 Code of Federal Regulations (CFR) 102–3.50(a). The charter and contact information for the NSEB's Designated Federal Officer (DFO) is found at: *https://www.facadatabase.gov/FACA/apex/FACAPublicAgencyNavigation.* Pursuant to 50 U.S.C. 1902(a)(3), the NSEB shall consult on the National Security Scholarship, Fellowships, and Grant Program as described in more detail in 50 U.S.C. Ch. 37.

Pursuant to 50 U.S.C. 1903(b), the NSEB shall be composed of the following fourteen individuals or the representatives of such individuals:

1. The Secretary of Defense, who shall serve as the Chair of the NSEB.
2. The Secretary of Education.
3. The Secretary of State.
4. The Secretary of Commerce.
5. The Secretary of Homeland Security.
6. The Secretary of Energy.
7. The Director of National Intelligence.
8. The Chair of the National Endowment for the Humanities.
9. Six individuals appointed by the President, who shall be experts in the fields of international, language, area, and counterproliferation studies education and who may not be officers or employees of the Federal Government.

Members of the NSEB appointed by the President shall be appointed for a period specified by the President at the time of their appointment, but not to exceed four years. NSEB members who are not full-time or permanent part-time Federal civilian officers or employees, or active-duty members of the Uniformed Services, shall be appointed as experts or consultants pursuant to 5 U.S.C. 3109 to serve as special government employee members. NSEB members who are full-time or permanent part-time Federal civilian officers or employees, or active-duty members of the Uniformed Services, shall be appointed pursuant to 41 CFR 102–3.130(a) to serve as regular government employee members. Pursuant to 50 U.S.C. 1903(c), individuals appointed by the President shall receive no compensation for service on the NSEB. All members shall receive reimbursement of official NSEB-related travel and per diem.

The public or interested organizations may submit written statements to the NSEB about the NSEB's mission and functions. Written statements may be submitted at any time or in response to the stated agenda of planned meeting of the NSEB. All written statements shall be submitted to the DFO for the NSEB, and this individual will ensure that the written statements are provided to the membership for their consideration.

Dated: July 14, 2026.

BILLING CODE 6001–FR–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Renewal of Department of Defense Federal Advisory Committee-Board of Regents, Uniformed Services University of the Health Sciences

AGENCY: Department of Defense (DoD).

ACTION: Renewal of Federal advisory committee.

SUMMARY: The DoD (referred to herein as ''the Department,'' ''Department of War'' or ''DoW'') is publishing this notice to announce that it is renewing the Board of Regents, Uniformed Services University of the Health Sciences (BoR USUHS) as a non-discretionary Federal advisory committee.

FOR FURTHER INFORMATION CONTACT: Jim Freeman, Advisory Committee Management Officer for the Department of War, 703–692–5952.

SUPPLEMENTARY INFORMATION: The BoR USUHS is being renewed in pursuant to section 2113a of title 10, United States Code (U.S.C.) and in accordance with the provisions of chapter 10 of Title 5, U.S.C. (commonly known as ''the Federal Advisory Committee Act'' or ''FACA'') and 41 Code of Federal Regulations (CFR) 102–3.50(a). The charter and contact information for the BoR USUHS's Designated Federal Officer (DFO) is found at: *https://www.facadatabase.gov/FACA/apex/FACAPublicAgencyNavigation.*

The BoR USUHS provides independent advice and recommendations on matters pertaining to carrying out the Secretary's responsible to conduct the business of the Uniformed Services University of the Health Sciences (''the University''). And on matters critical to the full accreditation and successful operation of the University.

Pursuant to 10 U.S.C. 2113a(b), the BoR USUHS shall consist of 16 members appointed by the Secretary of War and the Deputy Secretary of War (''the Department of War (DoW) Appointing Authority''), as follows:

a. nine people outstanding in the fields of health care, higher education administration, or public policy, who shall be appointed from civilian life by the DoW Appointing authority;

b. the Secretary of Defense, or his or her designee, who shall be an ex officio member;

c. the Director of the Defense Health Agency, who shall be an ex officio member;

d. the Surgeons General of the Uniformed Services, who shall be ex officio members; and

e. the President of the University, who shall be a non-voting ex officio member.

BoR USUHS members who are not ex officio members shall be appointed by the DoW Appointing Authority, pursuant to 10 U.S.C. 2113a(b)(1) and (c) for a six-year term of service except that:

a. any member appointed to fill a vacancy occurring before the expiration of the term for which his or her predecessor was appointed shall be appointed for the remainder of such term; and,

b. any member whose term of office has expired shall continue to serve until his or her successor is appointed.

Appointments for BoR USUHS members who are not ex officio members shall be renewed on an annual basis in accordance with DoW policy and procedures. No member, unless approved by the DoW Appointing Authority in writing, may serve on more than two DoW Federal advisory committees at one time or serve more than two consecutive terms of service on an advisory committee, to include its subcommittees.

BoR USUHS members who are not full-time or permanent part-time Federal civilian officers or employees, nor active-duty members of the Uniformed Services, shall be appointed as experts or consultants pursuant to 5 U.S.C. 3109 to serve as special government employee (SGE) members. BoR USUHS members who are full-time or permanent part-time Federal civilian officers or employees, or active-duty members of the Uniformed Services, shall be designated pursuant to 41 CFR 102–3.130(a) to serve as regular government employee (RGE) members.

Pursuant to 10 U.S.C. 2113a(d), the DoW Appointing Authority shall appoint the BoR USUHS chair for a term

of service of one-to-two years, with annual renewal, which shall not exceed the member's approved BoR USUHS appointment, in accordance with DoW policy and procedures.

All members of the BoR USUHS are appointed to exercise their own best judgement on behalf of the DoW, without representing any particular point of view, and to discuss and deliberate in a manner that is free from conflicts of interest.

Pursuant to 10 U.S.C. 2113a(e), BoR USUHS members, who are not ex officio members, shall be entitled to receive compensation. In accordance with a May 5, 2022 decision by the Secretary of Defense, each BoR USUHS members appointed consistent with 10 U.S.C. 2113a(b)(1), shall be entitled to receive compensation at the daily GS–15, step 10 level rate, with locality pay, while attending conferences or meetings or otherwise performing official duties as a member of the BoR USUHS. All BoR USUHS members shall be eligible for official BoR USUHS-related travel and per diem.

The public or interested organizations may submit written statements to the BoR USUHS about the BoR USUHS's mission and functions. Written statements may be submitted at any time or in response to the stated agenda of planned meeting of the BoR USUHS. All written statements shall be submitted to the DFO for the BoR USUHS, and this individual will ensure that the written statements are provided to the membership for their consideration.

Dated: July 14, 2026.

Stephanie J. Bost,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6001–FR–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL26–81–000]

Kammer Juniata Transmission, LLC; Notice of Institution of Section 206 Proceeding and Refund Effective Date

On July 10, 2026, the Commission issued an order in Docket No. EL26–81–000 pursuant to section 206 of the Federal Power Act (FPA), 16 U.S.C. 824e, instituting an investigation to determine whether Kammer Juniata Transmission, LLC's proposed Formula Rate Template is unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. *Kammer Juniata Transmission, LLC* 196 FERC ¶ 61,015 (2026).

The refund effective date in Docket No. EL26–81–000, established pursuant to section 206(b) of the FPA, will be the date of publication of this notice in the **Federal Register**.

Any interested person desiring to be heard in Docket No. EL26–81–000 must file a notice of intervention or motion to intervene, as appropriate, with the Federal Energy Regulatory Commission, in accordance with Rule 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.214 (2025), within 21 days of the date of issuance of the order.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. From FERC's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field. User assistance is available for eLibrary and the FERC's website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202)502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFile'' link at *http://www.ferc.gov.* In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

Dated: July 13, 2026.

Carlos D. Clay,

Deputy Secretary.

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

Filings in Existing Proceedings

Docket Numbers: RP26–969–001.

Applicants: Natural Gas Pipeline Company of America LLC.

Description: Tariff Amendment: Supplement Filing to Amendment to a Negotiated Rate Agreement Filing- to be effective 7/2/2026.

Filed Date: 7/10/26.

Accession Number: 20260710–5182.

Comment Date: 5 p.m. ET 7/22/26.

Any person desiring to protest in any the above proceedings must file in accordance with Rule 211 of the Commission's Regulations (18 CFR 385.211) on or before 5:00 p.m. Eastern Time on the specified comment date.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, contact the Office of Public Participation at (202) 502–6595 or *OPP@ferc.gov.*

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OLEM–2026–3103; FRL–13427–01–OLEM]

Good Samaritan Remediation Permit for the Bodie Mine Project

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Bodie Mine is a mine site located in Okanogan County, Washington. On June 11, 2026, Trout Unlimited Inc. (Trout Unlimited) applied for a Good Samaritan remediation permit pursuant to the Good Samaritan Remediation of Abandoned Hardrock Mines Act of 2024 (2024 Good Samaritan Act or Act). The EPA has preliminarily determined that the application is complete and meets all applicable requirements of the Act. The EPA has also made the preliminary determination that the site and parties are eligible for a Good Samaritan permit, the activities are low risk, and the activities will result in measurable progress towards achieving improved soil, sediment compared to baseline conditions at the site. After the comment period closes and all comments have been considered, the EPA will determine whether to grant the permit.

DATES: Comments must be received on or before August 17, 2026.

ADDRESSES: You may send comments, identified by Docket ID No. EPA–HQ–OLEM–2026–3103, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov/* (our preferred method). Follow the online instructions for submitting comments.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, Office of Mountains, Deserts and Plains Docket, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand Delivery or Courier:* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operations are 8:30 a.m.–4:30 p.m., Monday–Friday (except Federal Holidays).

Instructions: All submissions received must include the Docket ID No. for this document. Comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided. For detailed instructions on sending comments and additional information on the public review and comment process, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Jamey Watt, Office of Land and Emergency Management, Office of Mountains, Deserts and Plains, Environmental Protection Agency, 1200 Pennsylvania Ave. NW; telephone number: (202) 566–0196; email address: *watt.jamey@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Public Participation

Written Comments

Submit your comments, identified by Docket ID No. EPA–HQ–OLEM–2026–3103, at *https://www.regulations.gov* (our preferred method), or the other methods identified in the **ADDRESSES** section. Once submitted, comments cannot be edited or removed from the docket. The EPA may publish any comment received on its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI), Proprietary Business Information (PBI), or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion on all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). Please visit *https://www.epa.gov/dockets/commenting-epa-dockets* for additional submission methods; the full EPA public comment policy; information about CBI, PBI, or multimedia submissions; and general guidance on making effective comments.

II. General Information

The Good Samaritan Remediation of Abandoned Hardrock Mines Act of 2024 (Good Samaritan Act or Act) was signed into law on December 17, 2024 (Public Law 118–155). The Act creates a pilot program that authorizes EPA to issue up to 15 remediation permits for eligible

projects to qualified ''Good Samaritans'' to voluntarily clean up ''abandoned hardrock mine sites.'' These permits enable Good Samaritans and Cooperating Persons to carry out remediation activities while being protected from certain liability risks under the Comprehensive Environmental Response, Compensation, and Liability Act and the Clean Water Act, provided the work complies with the terms of the permit. Specifically, Good Samaritan projects, as compared to baseline conditions, must make measurable progress towards achieving applicable water quality standards, improved soil quality, improved sediment quality, other improved environmental or safety conditions, or reductions in the threats to soil, sediment, or water quality or other environmental or safety conditions.

This notice for public review and comment is prepared in support of a Bodie Mine Good Samaritan remediation permit pursuant to the 2024 Good Samaritan Act and is limited to the scope of activities proposed under that application. The Bodie Mine is a mine site located at 1144 Toroda Creek Road, Bodie, WA 98859 in Okanogan County, Washington. The proposed remediation activities will excavate and remove up to 790 tons of contaminated soil from the streambank and contaminated sediments from the streambed along 400 linear feet of Toroda Creek. After the contaminated soil and sediment are removed, the streambank will be reconstructed and stabilized using coir lifts, riprap and native revegetation techniques that will minimize the possibility for future erosion. This proposed activity is estimated to eliminate approximately 104 tons of contaminated tailing deposits from eroding into Toroda Creek each year.

Based on the information included in the Bodie Mine Good Samaritan remediation permit application and the draft NEPA Environmental Assessment of the proposed project, the EPA has preliminarily determined that the application is complete and meets all applicable requirements of section 4(c) of the Act. The EPA has also made preliminary determinations that are required under section 4(m) of the Act, including that the site and parties are eligible, the proposed action is a low-risk activity that will make measurable progress toward achieving improvements in environmental conditions compared to baseline conditions, and the proposed action is otherwise consistent with the Act. Specifically, the EPA is proposing to make the following determinations:

(1) Trout Unlimited Inc. qualifies as a Good Samaritan. Trout Unlimited had no role in the creation of the historic mine residue at the site and is not a past or present owner of the site (see Trout Unlimited application cover letter dated June 11, 2026, information in their Bodie Mine Environmental Information Document dated June 3, 2026, and EPA's Decision Document dated June 17, 2026, all documents included in the *regulations.gov* docket for public review).

(2) Geo-Mineral Exploration Inc. qualifies as a Cooperating Person. Geo-Mineral Exploration Inc. had no role in the creation of the historic mine residue at the site and cannot afford to comply with potentially applicable requirements under either the Comprehensive Environmental Response, Compensation, and Liability Act or the Clean Water Act (see Trout Unlimited application cover letter dated June 11, 2026 and information in their Bodie Mine Environmental Information Document dated June 3, 2026, and EPA's Decision Document dated June 17, 2026, all documents included in the *regulations.gov* docket for public review).

(3) Strider Construction Inc. qualifies as a Cooperating Person. Strider Construction Inc., the remediation contractor, had no role in the creation of the historic mine residue at the site and is not a responsible owner or operator (see Trout Unlimited and Strider Construction's application addendum dated June 24, 2026 and EPA's Decision Document, both are included in the *regulations.gov* docket for public review).

(4) The project is designed to remediate historic mine residue at an abandoned hardrock mine site to protect human health and the environment (see the 2023 Toroda Creek Mine Tailings Erosion Elimination Work Plan included in the *regulations.gov* docket for public review).

(5) The proposed project is designed to meet all goals set forth in the application and they are acceptable to the EPA (see the 2023 Toroda Creek Mine Tailings Erosion Elimination Work Plan and the Bodie Mine Environmental Information Document dated June 3, 2026, both documents included in the *regulations.gov* docket for public review).

(6) The proposed activities, as compared to the baseline conditions described in the application, will make measurable progress toward achieving—

a. Improved soil quality;

b. Improved sediment quality;

c. Other improved environmental or safety conditions; and

d. Reductions in threats to soil, sediment, or water quality or other environmental or safety conditions.

The proposed activities will excavate and remove up to 790 tons of contaminated soil from the streambank and contaminated sediments from the streambed along 400 linear feet of Toroda Creek. After the contaminated soil and sediment are removed, the streambank will be reconstructed and stabilized using coir lifts, riprap and native revegetation techniques that will minimize the possibility for future erosion. This proposed activity is estimated to eliminate approximately 104 tons of tailing deposits from eroding into Toroda Creek each year (see the Bodie Mine Environmental Information Document dated June 3, 2026, which is included in the *regulations.gov* docket for public review).

(7) The overall objectives of reclamation at Toroda Creek are to reduce the current and/or threatened release of hazardous substances to the environment, protect human health and the environment by minimizing direct contact with contaminants, and prevent degradation of adjacent lands. By halting the active erosion of Toroda Creek into the mine tailings along the proposed project reach, this project will minimize pollution from added siltation as well as toxics including arsenic, cadmium, lead, mercury, selenium, copper, and zinc currently found in the tailings on the site (see the 2023 Toroda Creek Mine Tailings Erosion Elimination Work Plan and the Bodie Mine Environmental Information Document dated June 3, 2026, both documents included in the *regulations.gov* docket for public review).

(8) Trout Unlimited has adequately demonstrated, for purposes of the scope and remediation goals of this project, that it:

a. Has the proper and appropriate experience and capacity to complete the project;

b. Will complete the project;

c. Has the financial and other resources to address contingencies; and

d. Has granted the EPA access to and provided the EPA the authority to review the records related to compliance with the draft permit.

(See the 2023 Toroda Creek Mine Tailings Erosion Elimination Work Plan, the Bodie Mine Environmental Information Document dated June 3, 2026, EPA's Decision Document dated June 17, 2026, and the draft Bodie Mine Good Samaritan Permit language, all are

included in the *regulations.gov* docket for public review.)

(9) The proposed project poses a low risk to the environment, as the methods of remediation are frequently and successfully used, potential negative consequences are minimal, and the NEPA Environmental Assessment results in a Finding of No Significant Impact (FONSI) (see the Draft NEPA Environmental Assessment for the project included in the *regulations.gov* docket for public review).

(10) Trout Unlimited and the EPA's efforts did not identify a past or present owner or other party that meets the definition of a responsible owner or operator for the site. In particular, the EPA has not identified (i) any person that is legally responsible under section 301 of the Clean Water Act for a discharge that originates from the abandoned hardrock mine site, and has the financial ability to comply with the requirements described in that section, or (ii) a present or past owner or operator or other person that is liable with respect to a release or threat of release of a hazardous substance, pollutant, or contaminant associated with the historic mine residue at or from the abandoned hardrock mine site under section 104, 106, 107, or 113 of the Comprehensive Environmental Response, Compensation, and Liability Act, and has the financial ability to comply with each requirement described in those sections, as applicable.

(See Trout Unlimited's application cover letter dated June 11, 2026, information in their Bodie Mine Environmental Information Document dated June 3, 2026, and EPA's Decision Document dated June 17, 2026, all documents are included in the *regulations.gov* docket for public review).

The EPA has developed this notice pursuant to the 2024 Good Samaritan Act and in support of the Administration's commitment to transparency in all aspects of the EPA's work and to demonstrate EPA's progress toward making the 2024 Good Samaritan Act pilot program a success.Additional EPA Good Samaritan information can be found at *https://www.epa.gov/cleanups/good-samaritan-remediation-abandoned-hardrock-mines-program.*

Thomas D. Croci,

Acting Assistant Administrator, Office of Land and Emergency Management.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OGC–2026–3697; FRL–13392–01–OGC]

Proposed Consent Decree; Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with the Clean Air Act, as amended (CAA or the Act), notice is given of a proposed consent decree in *Center for Biological Diversity et al.* v. *Lee Zeldin, No. 3:25–cv–6568–AMO.* On August 5, 2025, Plaintiffs Center for Biological Diversity and Sierra Club filed a complaint in the United States District Court, Northern District of California, San Francisco Division. The EPA designated various areas of the country as nonattainment with respect to the 2010 SO_2 NAAQS. States that contain areas that are designated as nonattainment are required to provide State Implementation Plan submissions to the EPA within 18 months of the effective date of designations. The EPA is providing notice of this proposed consent decree, which would resolve all claims in the case by establishing deadlines for the EPA to take final action as specified in the decree.

DATES: Written comments on the proposed consent decree must be received by August 17, 2026.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2026–3697, online at *https://www.regulations.gov* (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to *https://www.regulations.gov*, including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Additional Information about Commenting on the Proposed Consent Decree'' heading under the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Karen Bianco, Air and Radiation Law Office, Office of General Counsel, U.S. Environmental Protection Agency; telephone (202) 564–3298; email address *bianco.karen@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining a Copy of the Proposed Consent Decree

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2026–3697) contains a copy of the proposed consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744 and the telephone number for the OEI Docket is (202) 566–1752.

The electronic version of the public docket for this action contains a copy of the proposed consent decree and is available through *https://www.regulations.gov.* You may use *https://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

II. Additional Information About the Proposed Consent Decree

The appropriate EPA official shall:

1. No later than August 28, 2026, sign a notice of final rulemaking pursuant to CAA section 110(k)(2)–(4), 42 U.S.C. 7410(k)(2)–(4) to approve, disapprove, conditionally approve, or approve in part and conditionally approve or disapprove in part, the October 3, 2023 Hayden, AZ SO_2 SIP revision;

2. No later than March 1, 2027, sign a notice of final rulemaking pursuant to CAA section 110(k)(2)–(4), 42 U.S.C. 7410(k)(2)–(4) to approve, disapprove, conditionally approve, or approve in part and conditionally approve or disapprove in part, the October 24, 2022 Navarro County, TX SO_2 SIP revision;

3. No later than December 18, 2026, sign a notice of final rulemaking pursuant to CAA section 110(k)(2)–(4), 42 U.S.C. 7410(k)(2)–(4) to approve, disapprove, conditionally approve, or approve in part and conditionally approve or disapprove in part, the February 9, 2023 Sullivan County, TN SO_2 SIP revision; and

4. No later than July 30, 2027, sign a notice of final rulemaking pursuant to CAA section 110(k)(2)–(4), 42 U.S.C. 7410(k)(2)–(4) to approve, disapprove, conditionally approve, or approve in part and conditionally approve or

disapprove in part, the October 24, 2022 Howard and Hutchinson Counties, TX SO_2 SIP revisions.

5. No later than 15 business days after signature of each final action under the Consent Decree, EPA shall send notice of the action to the Office of the Federal Register for review and publication in the **Federal Register**.

6. After EPA has completed the actions set forth in this Consent Decree, notice of each final action required by Paragraph 3 has been published in the **Federal Register**, and the parties have resolved the issue of costs of litigation (including reasonable attorney fees), EPA may move to have this Consent Decree terminated and the above-captioned matter shall be dismissed with prejudice. Plaintiffs shall have 14 calendar days to respond to such motion, unless the parties stipulate to a longer time.

7. The deadlines established by the Consent Decree may be extended (a) by written stipulation of Plaintiffs and EPA and filed with the Court, or (b) by the Court upon motion by any party for good cause shown pursuant to the Federal Rules of Civil Procedure and upon consideration of any response by the non-moving party and any reply.

8. If a lapse in EPA appropriations occurs within 120 days prior to any deadline for final action in the Consent Decree, all such deadlines shall be extended automatically one day for each day of the lapse in appropriations. Nothing in this Paragraph shall preclude EPA from seeking an additional extension of time through modification of the Consent Decree.

III. Additional Information About Commenting on the Proposed Consent Decree

Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2026–3697, via *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from this docket. EPA may publish any comment received to its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document. Note that written comments containing CBI and submitted by mail may be delayed and deliveries or couriers will be received by scheduled appointment only.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *https://www.regulations.gov* website to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

Gautam Srinivasan,

Associate General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–13484–01–R6]

Clean Air Act Operating Permit Program; Order on Petition for Objection to State Operating Permit for Mitsubishi Chemical America, Inc., MCA Geismar Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final order on petition.

SUMMARY: The Environmental Protection Agency (EPA) Administrator signed an order dated June 9, 2026, denying a petition dated September 9, 2024, from RISE St. James, Healthy Gulf, Louisiana Bucket Brigade, Sierra Club, and Earthjustice (Petitioners). The petition requested that the EPA object to a Clean Air Act (CAA) title V operating permit issued by the Louisiana Department of Environmental Quality (LDEQ) to Mitsubishi Chemical America, Inc. for its MCA Geismar Site located in Geismar, Ascension Parish, Louisiana.

FOR FURTHER INFORMATION CONTACT: Dr. Andy Chase; EPA Region 6 Air Permits Section; telephone number: (214) 665–2732; email address: *chase.andy@epa.gov.* The final order and petition are available electronically at: *https://www.epa.gov/title-v-operating-permits/title-v-petition-database.*

SUPPLEMENTARY INFORMATION: The EPA received a petition from RISE St. James, Healthy Gulf, Louisiana Bucket Brigade, Sierra Club, and Earthjustice dated September 9, 2024, requesting that the EPA object to the issuance of operating permit no. 0180–00233–V0, issued by Louisiana Department of Environmental Quality (LDEQ) to Mitsubishi Chemical America, Inc.'s MCA Geismar Site in Geismar, Ascension Parish, Louisiana. On June 9, 2026, the EPA Administrator issued an order denying the petition. The order itself explains the basis for the EPA's decision.

Sections 307(b) and 505(b)(2) of the CAA provide that a petitioner may request judicial review of those portions of an order that deny issues in a petition. Any petition for review shall be filed in the United States Court of Appeals for the appropriate circuit no later than September 14, 2026.

Dated: July 7, 2026.

James McDonald,

Director, Air and Radiation Division, Region 6.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments received are subject to public disclosure. In general, comments received will be made available without change and will not be modified to remove personal or business information including confidential, contact, or other identifying information. Comments should not include any information such as confidential information that would not be appropriate for public disclosure.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Benjamin W. McDonough, Secretary of the Board, 20th Street and Constitution Avenue, NW, Washington DC 20551–0001, not later than August 17, 2026.

A. Federal Reserve Bank of Dallas (Lindsey Wieck, Director, Mergers & Acquisitions) 2200 North Pearl Street, Dallas, Texas 75201–2272. Comments can also be sent electronically to *Comments.applications@dal.frb.org:*

1. *Ark Financial Holding, Inc., Cooper, Texas;* to become a bank holding company by acquiring Cooper Lake Financial Corporation, and thereby indirectly acquiring The First National Bank in Cooper, both of Cooper, Texas.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Patient Safety Organizations: Expired Listing for the Informed Patient Safety Organization (IPSO)

AGENCY: Agency for Healthcare Research and Quality (AHRQ), Department of Health and Human Services (HHS).

ACTION: Notice of delisting.

SUMMARY: The Patient Safety and Quality Improvement Final Rule (Patient Safety Rule) authorizes AHRQ, on behalf of the Secretary of HHS, to list as a patient safety organization (PSO) an entity that attests that it meets the statutory and regulatory requirements for listing. A PSO can be ''delisted'' by the Secretary if it is found to no longer meet the requirements of the Patient Safety and Quality Improvement Act of 2005 (Patient Safety Act) and Patient Safety Rule, when a PSO chooses to voluntarily relinquish its status as a PSO for any reason, or when a PSO's listing expires. The listing for Informed Patient Safety Organization (IPSO), PSO number P0252, a component entity of Informed Surgical, Inc. has expired, and AHRQ has delisted the PSO accordingly.

DATES: The delisting was effective at 12:00 Midnight ET (2400) on July 6, 2026.

ADDRESSES: The directories for both listed and delisted PSOs are ongoing and reviewed weekly by AHRQ. Both directories can be accessed electronically at the following HHS website: *https://www.pso.ahrq.gov/listed.*

FOR FURTHER INFORMATION CONTACT: Cathryn Bach, Center for Quality Improvement and Patient Safety, AHRQ, 5600 Fishers Lane, MS 07E01D, Rockville, MD 20857; Telephone (toll free): (866) 403–3697; Telephone (local): (301) 427–1111; TTY (toll free): (866) 438–7231; TTY (local): (301) 427–1130; Email: *pso@ahrq.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Patient Safety Act, 42 U.S.C. 299b-21 to 299b-26, and the related Patient Safety Rule, 42 CFR part 3, published in the **Federal Register** on November 21, 2008 (73 FR 70732–70814), establish a framework by which individuals and entities that meet the definition of provider in the Patient Safety Rule may voluntarily report information to PSOs listed by AHRQ, on a privileged and confidential basis, for the aggregation and analysis of patient safety work product.

The Patient Safety Act authorizes the listing of PSOs, which are entities or component organizations whose mission and primary activity are to conduct activities to improve patient safety and the quality of health care delivery.

HHS issued the Patient Safety Rule to implement the Patient Safety Act. AHRQ administers the provisions of the Patient Safety Act and Patient Safety Rule relating to the listing and operation of PSOs. The Patient Safety Rule authorizes AHRQ to list as a PSO an entity that attests that it meets the statutory and regulatory requirements for listing. A PSO can be ''delisted'' if it is found to no longer meet the requirements of the Patient Safety Act and Patient Safety Rule, when a PSO chooses to voluntarily relinquish its status as a PSO for any reason, or when a PSO's listing expires. Section 3.108(d) of the Patient Safety Rule requires AHRQ to provide public notice when it removes an organization from the list of PSOs.

Section 3.104(e)(1) of the Patient Safety Rule specifies that a PSO's listing, unless revoked or relinquished earlier, automatically expires at midnight of the last day of the three-year listing period if, prior to this deadline, the required certifications for a new three-year listing are not submitted by the PSO and accepted by AHRQ. These conditions were not met. Accordingly, Informed Patient Safety Organization (IPSO), PSO number P0252, a component entity of Informed Surgical, Inc., was delisted effective at 12:00 Midnight ET (2400) on July 6, 2026.

More information on PSOs can be obtained through AHRQ's PSO website at *http://www.pso.ahrq.gov.*

BILLING CODE 4160–90–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Meeting of the Advisory Board on Radiation and Worker Health, National Institute for Occupational Safety and Health

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, the Centers for Disease Control and Prevention (CDC) announces the following meeting of the Advisory Board on Radiation and Worker Health (ABRWH). This meeting is open to the public, but without an oral public comment period. The public is welcome to submit written comments in advance of the meeting, to the contact person below. The public is also welcome to listen to the meeting by joining the audio conference (information below). The audio conference line has 150 ports for callers.

DATES: The meeting will be held on October 8, 2026, from 11 a.m. to 1 p.m., EDT.

Written comments must be received on or before October 1, 2026.

ADDRESSES: You may submit comments by mail to: Rashaun Roberts, Ph.D., Designated Federal Officer, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, 1090 Tusculum Avenue, Mailstop C–24, Cincinnati, Ohio 45226. Email: *ocas@cdc.gov.*

Written comments received in advance of the meeting will be included in the official record of the meeting.

Meeting Information: The USA toll-free dial-in number is 1–888–994–4478; the passcode is 249193631. The Meeting ID: 286 533 548 251 834; passcode is: Rs7WP9Sg, and the Web conference by Teams meeting connection: *https://teams.microsoft.com/meet/286533548251834?p=vEbJ5Pb8VculYlegd7.*

FOR FURTHER INFORMATION CONTACT: Rashaun Roberts, Ph.D., Designated Federal Officer, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, 1090 Tusculum Avenue, Mailstop C–24, Cincinnati, Ohio 45226, Telephone: (513) 533–6800, Email: *ocas@cdc.gov.*

SUPPLEMENTARY INFORMATION:

Background: The Advisory Board was established under the Energy Employees Occupational Illness Compensation Program Act of 2000 to advise the President on a variety of policy and technical functions required to implement and effectively manage the compensation program. Key functions of the Advisory Board include providing advice on the development of probability of causation guidelines, which have been promulgated by the Department of Health and Human Services (HHS) as a final rule; advice on methods of dose reconstruction, which have also been promulgated by HHS as a final rule; advice on the scientific validity and quality of dose estimation and reconstruction efforts being performed for purposes of the compensation program; and advice on petitions to add classes of workers to the Special Exposure Cohort (SEC). In December 2000, the President delegated responsibility for funding, staffing, and operating the Advisory Board to HHS, which subsequently delegated this authority to the CDC. NIOSH implements this responsibility for CDC.

The charter was issued on August 3, 2001, renewed at appropriate intervals, and rechartered under Executive Order 14109 (September 29, 2023) on March 22, 2024. Unless continued by the President, the Advisory Board will terminate on September 30, 2027, consistent with Executive Order 14354 of September 29, 2025.

Purpose: The Advisory Board is charged with (a) providing advice to the Secretary, HHS, on the development of guidelines under Executive Order 13179; (b) providing advice to the Secretary, HHS, on the scientific validity and quality of dose reconstruction efforts performed for this program; and (c) upon request by the Secretary, HHS, advising the Secretary on whether there is a class of employees at any Department of Energy facility who were exposed to radiation but for whom it is not feasible to estimate their radiation dose, and on whether there is reasonable likelihood that such radiation doses may have endangered the health of members of this class.

Matters to be Considered: The agenda will include discussions on the following: Program updates; updates from workgroup and subcommittee reports; update on the status of SEC petitions; and planning for a December 2026 Advisory Board meeting. Agenda items are subject to change as priorities dictate. For additional information, please contact Toll Free 1–800–232–4636.

The Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Office of Strategic Business Initiatives, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Docket No. CDC–2026–0892]

Order Under Sections 362 and 365 of the Public Health Service Act Continuing the Suspension of the Right To Introduce Certain Persons From Countries Where a Quarantinable Communicable Disease Exists

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), a component of the Department of Health and Human Services (HHS), announces it is issuing an Order under Section 362 and 365 of the Public Health Service Act, and associated implementing regulations, continuing the suspension of the right to introduce certain persons from countries where an outbreak of a quarantinable communicable disease exists. This Order was issued on July 13, 2026, and shall remain in effect through 4:59 p.m. Eastern Daylight Time (EDT) on Wednesday, August 12, 2026. This Order may be amended or rescinded prior to that time at the discretion of the Director.

DATES: This action took effect July 13, 2026, at 5:00 p.m. EDT. Written comments must be received on or before July 31, 2026.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2026–0892 by either of the methods listed below. Do not submit comments by email. CDC does not accept comments by email.

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Division of Global Migration Health, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H16–4, Atlanta, GA 30329.

Instructions: All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to *http://regulations.gov,* including any personal information provided. For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Matthew J. Buzzelli, Chief of Staff, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS V18–2, Atlanta, GA 30329. Phone: 404–639–7000. Email: *cdcregulations@cdc.gov.*

SUPPLEMENTARY INFORMATION: On May 18, 2026, the Senior Official Carrying out the Delegable Duties of the Director of the Centers for Disease Control and Prevention signed an Order prohibiting the introduction of certain persons who have departed from, or were otherwise present within, specified countries during the last 21 days. On May 22, 2026, the Assistant Secretary for Health (ASH), HHS, signed an Amended Order that reflected updates to 42 CFR 71.40(f), which no longer provided an exemption for lawful permanent residents from such orders. CDC accepted comments on both the original Order and Amended Order through June

22, 2026. On June 21, 2026, the ASH signed a new 30-day Order continuing the previous Order, without change, and provided a 15-day comment period. During this time CDC received five comments, which are addressed below. On July 13, 2026, the ASH signed a new order continuing the previous Order without change and providing updates on the current epidemiologic situation and status of the outbreak. With this Order, CDC continues the suspension of the right to introduce certain persons who have departed from, or were otherwise present within, specified countries during the last 21 days. This Order is effective for a period of 30 days.

Response To Comments on Previous Orders

Comment: One commenter argues that CDC lacks authority to exempt U.S. citizens from the scope of the Order and requests that CDC rescind the exemption. The commenter contends that section 362 of the Public Health Service Act authorizes suspension of the introduction of ''persons'' without distinguishing between U.S. citizens and noncitizens and asserts that public health considerations outweigh any constitutional concerns. The commenter further argues that CDC should exercise its authorities more broadly in responding to the Ebola outbreak.

Response: CDC appreciates this comment, however it is outside the scope of the continued Order. This Order is consistent with CDC's foreign quarantine regulations, including 42 CFR 71.40, which exclude U.S. citizens and U.S. nationals from the suspension authority. CDC is therefore making no changes in response to this comment.

Comment: Another commenter strongly opposed the previous order noting that citizens should have the right to return to the United States given the country's capacity to deal with special pathogens like Ebola.

Response: CDC appreciates this comment. The continued Order does not apply to U.S. citizens or U.S. nationals, who are exempt under 42 CFR 71.40(f).

Comment: Three of the commenters requested that CDC reconsider allowing lawful permanent residents (LPRs) to return under the same screening and monitoring protocols that apply to U.S. citizens as was allowed in the original May 18, 2026, Order.

Response: CDC appreciates these comments. With respect to LPRs, the continued Order is consistent with CDC's current foreign quarantine regulations. The removal of the exemption for LPRs resulted from amendments to 42 CFR 71.40(f) and is outside the scope of this Order. Accordingly, CDC is making no changes in response to this comment.

Commen Two of these commenters also requested that Uganda be evaluated independently and removed from the list of countries noting that since the outbreak began, Uganda has implemented significant measures to reduce the risk of importation from the DRC, including restrictions on cross-border passenger travel, enhanced border screening, and additional public health controls for travelers entering from affected areas.

Response: CDC appreciates this comment but does not agree that Uganda should be removed from the list of designated countries or evaluated independently of the broader regional outbreak at this time. Available epidemiologic information indicates ongoing transmission and the potential for rapid changes in the outbreak. Because the outbreak remains interconnected across national borders, CDC's assessment must consider regional epidemiology, including transmission dynamics in neighboring countries. Accordingly, CDC has determined that applying the Order to persons who have been present in the DRC, Uganda, or South Sudan during the preceding 21 days remains the most effective and administratively practical approach to reducing the risk of Ebola disease introduction into the United States while the public health assessment continues.

CDC carefully considered all comments and determined that they did not warrant changes to the requirements of the Order issued June 21, 2026. The new Order, issued on July 13, 2026, provides updated information regarding the status of the Ebola disease outbreak and CDC response efforts and maintains the previous travel restrictions. CDC will accept comments for this Order using docket CDC–2026–0892. A copy of the Order is provided below and a copy of the signed Order can be found at https://www.cdc.gov/port-health/legal-authorities/evdorder.html.

U.S. Department of Health and Human Services Centers for Disease Control and Prevention (CDC)

Order Under Sections 362 & 365 of the Public Health Service Act (42 U.S.C. 265, 268) and 42 CFR § 71.40

Continuing the Suspension of the Right to Introduce Certain Persons from Countries Where A Quarantinable Communicable Disease Exists

I. Executive Summary

The Centers for Disease Control and Prevention (CDC), a component of the U.S. Department of Health and Human Services (HHS), issues this Order pursuant to Sections 362 and 365 of the Public Health Service (PHS) Act, 42 U.S.C. 265, 268, and their implementing regulations. This Order continues the suspension of the right to introduce ''covered aliens,'' as defined herein, into the United States for a period of thirty days, subject to the outcome of an ongoing comprehensive public health risk assessment. This Order is necessary to protect the health of the United States from the serious risk posed by the introduction of Ebola disease into the United States by covered aliens based on the outbreak of Ebola disease caused by the Bundibugyo virus confirmed present in Democratic Republic of the Congo (DRC) and Uganda.

This Order applies to covered aliens who have departed from, or were otherwise present within, DRC, Uganda, or South Sudan during the last 21 days (regardless of their country of origin). This Order is based on an assessment of the most recently available data and current conditions regarding the Ebola disease outbreak.

This Order is time-limited and shall be in effect for 30 days from the date of issuance. This Order is intended to address the serious risk of introduction of Ebola disease into the United States, while allowing the U.S. Government to continue an ongoing assessment of the current and evolving conditions of the Ebola disease outbreak in consultation with other stakeholders.

This Order is severable from previously issued Orders under Sections 362 and 365 of the Public Health Service (PHS) Act, 42 U.S.C. 265, 268, and their implementing regulations under 42 CFR part 71. Any provision of this Order held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, shall be construed so as to continue to give the maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability.

II. Authority, Scope, and Purpose

I issue this Order pursuant to Sections 362 and 365 of the Public Health Service (PHS) Act, 42 U.S.C. 265, 268, and their implementing regulations under 42 CFR part 71,[1] which authorize the CDC Director to suspend the right to

[1] Control of Communicable Diseases; Foreign Quarantine: Suspension of the Right to Introduce and Prohibition of Introduction of Persons into United States from Designated Foreign Countries or Places for Public Health Purposes, 85 FR 56424 (Sept. 11, 2020), as amended by 91 FR 31362 (May 27, 2026); 42 CFR 71.40.

introduce [2] persons into the United States when the Director determines that the existence of a quarantinable communicable disease in a foreign country or place creates a serious danger of the introduction of such disease into the United States and the danger is so increased by the introduction of persons from the foreign country or place that a temporary suspension of the right of such introduction is necessary to protect public health.

This Order applies to persons who have departed from, or were otherwise present within, DRC, Uganda, and South Sudan during the last 21 days (regardless of their country of origin), including lawful permanent residents of the United States, subject to the exceptions detailed below. For purposes of this Order, I refer to persons covered by the Order as ''covered aliens.''

This Order does *not* apply to the following:

- U.S. citizens and U.S. nationals; [3]
- Members of the armed forces of the United States and associated personnel, U.S. government personnel serving overseas, associated personnel, and their spouses and children, subject to required assurances; [4]
- Persons whom customs officers determine, with approval from a supervisor, should be excepted from this Order based on the totality of the circumstances, including consideration of significant law enforcement, officer and public safety, humanitarian, and public health interests. The U.S. Department of Homeland Security (DHS) will consult with CDC regarding the standards for such exceptions to help ensure consistency with current CDC guidance and public health recommendations; and
- Persons who would otherwise be subject to this Order, who are permitted to enter the United States based on an exception provisionally granted by CDC with confirmation based on a public health assessment at time of entry under a DHS-approved process documented and shared with CDC which includes appropriate public health mitigation protocols, per CDC guidance.

The purpose of this Order is twofold. First, this Order aims to continue minimizing the number of covered aliens entering the United States who have been within countries experiencing a known or suspected outbreak of Ebola disease and thereby reduce the risk of introduction of Ebola disease into the United States. Second, this Order is intended to facilitate an ongoing public health assessment and risk profile of the Ebola disease outbreak. Thirty days is the amount of time necessary for CDC to conduct an updated public health assessment and determine whether there has been a material change in the outbreak trajectory. Such information will enable the acting CDC Director to make an informed determination regarding what restrictions are necessary going forward and provide the opportunity for the development of a comprehensive mitigation and containment plan in consultation with stakeholders.

III. Factual Basis

A. Ebola Disease

Viral hemorrhagic fever refers to a group of severe illnesses caused by certain viruses that damage the body's blood vessels and affect the ability of the blood to clot properly. Viral hemorrhagic fevers include diseases such as Ebola, Marburg, Lassa fever, and dengue hemorrhagic fever.

Bundibugyo virus disease (BVD) is a severe and often fatal illness caused by one of the viruses in the Ebola family. Ebola disease outbreaks occur mainly in parts of sub-Saharan Africa and can spread rapidly in communities with limited healthcare resources. Ebola disease caused by the Bundibugyo virus is a rare form of Ebola first identified during an outbreak in Bundibugyo District, Uganda, in 2007. Bundibugyo virus is one of several species within the orthoebolavirus family and causes symptoms similar to other forms of Ebola, including fever, weakness, vomiting, diarrhea, and, in severe cases, hemorrhagic complications and organ failure. The disease spreads through direct contact with infected bodily fluids or contaminated materials.

The incubation period for Ebola disease caused by the Bundibugyo virus is typically between 2 and 21 days, with most people developing symptoms within 4 to 10 days after exposure. During this incubation period, infected persons do not spread the virus until symptoms begin.

Screening for Bundibugyo virus disease focuses on identifying symptoms and possible exposure history, such as recent travel to affected areas or contact with infected aliens. Suspected patients are evaluated for symptoms including fever, weakness, vomiting, diarrhea, and bleeding, and laboratory confirmation is performed using specialized tests such as PCR (polymerase chain reaction) to detect the virus in blood and other body fluid samples. Health authorities also use temperature checks, contact tracing, and isolation procedures to prevent transmission.

There are currently no widely approved vaccines or specific antiviral treatments for the Bundibugyo strain of Ebola disease. Treatment mainly consists of supportive care, including intravenous fluids, electrolyte replacement, oxygen support, pain and fever management, and treatment of secondary infections. Early medical care significantly improves survival chances. Robust public health measures such as early detection, rapid isolation, strong infection prevention measures (*i.e.,* use of personal protective equipment [PPE]), and monitoring of contacts are critical to controlling outbreaks and reducing deaths. A clinical trial of monoclonal antibodies is presently underway in DRC.[5] However, experts expect it will be several months before these therapeutics are potentially available for wider use.

B. Ongoing Bundibugyo Virus Disease Outbreak

The confirmed ongoing outbreak of Ebola virus disease caused by the Bundibugyo virus in DRC and Uganda continues to escalate in intensity. The outbreak remains centered in eastern DRC's Ituri Province, although cases have been identified in North Kivu, South Kivu, Haut-Uele, and Tshopo provinces. This geographic expansion is concerning, particularly given that response efforts are still not at the scale required for outbreak containment. On June 15, 2026, when the last Order was issued, DRC reported 837 confirmed cases across 31 health zones. As of July 12, 2026, DRC reports 1,873 confirmed cases and 672 deaths across 41 health zones, with cases more than doubling since issuance of the June 22 Order.

As recently as July 10, 2026, the ongoing Bundibugyo Ebola virus outbreak in DRC continues to spread despite response efforts. In the outbreak's epicenter, an estimated 80 percent of newly confirmed cases are not linked to known contacts, indicating substantial undetected community transmission.[6] Recent assessments

[6] Bonnerot, C., Reuters, *Congo Ebola outbreak still spreading largely undetected, WHO official says,* available at *https://www.reuters.com/business/healthcare-pharmaceuticals/congo-ebola-outbreak-*

indicate that the true magnitude of the outbreak may be two to four times greater than reported surveillance data suggest. Surveillance challenges persist in the most heavily affected areas, with conflict and insecurity, weak health infrastructure, and relatively porous borders in the region complicating containment efforts. Although contact tracing efforts are underway, they remain insufficient because the expected number of contacts has not yet been identified and the daily follow-up necessary to rapidly detect symptomatic individuals and ensure their prompt isolation has not been achieved.

As of July 12, 2026, Uganda reports 20 confirmed cases of Ebola disease and two confirmed deaths, as well as one probable case and one probable death. All cases in Uganda have been epidemiologically linked to the ongoing outbreak in DRC, with cross-border importations have occurred, resulting in secondary transmission among family members and caregivers [7] Ugandan authorities have activated emergency response systems, expanded surveillance, and strengthened screening at borders and health facilities. Uganda has significant prior experience managing Ebola disease outbreaks, including the Sudan virus strain outbreak in 2025, which improved preparedness and response capacity. Although the outbreak in Uganda has been concentrated in Kampala and despite Uganda's response efforts, continued overland travel from DRC poses an ongoing risk of cross-border transmission, particularly among healthcare workers and in western Ugandan districts that serve as points of entry for travelers seeking medical care.

To date, South Sudan has not reported any confirmed Ebola disease cases in the current outbreak.[8] However, it is considered at high risk because of its close border with affected areas in eastern DRC and Uganda, limited healthcare infrastructure, and cross-border population movement. Regional and international agencies, including WHO and Africa CDC, are supporting preparedness measures, surveillance, and coordination among the three countries to prevent wider spread. Despite these efforts there continues to be a risk that the outbreak in DRC and Uganda could spread to South Sudan through cross-border travel by infected individuals during the virus's incubation period, when they have been exposed but are not yet showing symptoms.

Travelers moving between affected countries and major international transit hubs could unknowingly carry the Bundibugyo virus before becoming ill. Such travelers may spread the outbreak beyond the affected countries and ultimately reach the United States. DRC, Uganda, and South Sudan are connected to the global aviation network through a series of regional and international transit hubs that provide pathways into the United States. Travelers departing from outbreak-affected regions frequently transit through densely populated metropolitan airports such as Addis Ababa Bole International Airport (ADD), Jomo Kenyatta International Airport (NBO) in Nairobi, Brussels Airport (BRU), Hamad International Airport (DOH) in Doha, Dubai International Airport (DXB), and Istanbul Airport (IST), all of which maintain extensive passenger connectivity to major U.S. gateway airports including John F. Kennedy International Airport (JFK), Washington Dulles International Airport (IAD), Hartsfield-Jackson Atlanta International Airport (ATL), Chicago O'Hare International Airport (ORD), and Los Angeles International Airport (LAX). These international transportation corridors support continuous movement of travelers between Central and East Africa and major U.S. metropolitan centers, increasing the likelihood that aliens exposed to Ebola disease could enter the United States before symptoms become apparent. Complex multi-leg itineraries and the rapid pace of international travel create substantial challenges for identifying potentially infected travelers before arrival.

A traveler infected in outbreak regions of DRC and Uganda may transit through multiple countries and major international airports before developing fever or other clinical signs of disease. The risk of Bundibugyo virus disease introduction into the United States is heightened by the virus's incubation period, which can extend up to 21 days, allowing infected persons to travel internationally while asymptomatic and therefore unlikely to be detected through routine symptom-based screening measures. The current outbreak has already demonstrated this risk: a physician infected while providing patient care in DRC traveled internationally before becoming ill and was diagnosed only after arriving in France.[9] That case required extensive public health coordination, including federal, state, and local government efforts to identify, notify, and monitor potentially exposed U.S. citizens, demonstrating that a single infected traveler can impose significant cross-border public health response demands even without onward transmission occurring within the United States. Accordingly, the interconnected nature of global air travel presents a credible pathway for Bundibugyo virus disease importation into the United States, underscoring the importance of aggressive surveillance, traveler monitoring, airport public health screening, healthcare preparedness, and rapid containment capabilities.

While the France case illustrates the public health challenges posed by infected travelers moving internationally before becoming symptomatic, the ongoing outbreak has also demonstrated that substantial U.S. public health resources may be required to respond to an Ebola exposure or infection in any U.S. citizen. On July 10, 2026, CDC announced that an additional U.S. citizen working for a humanitarian organization in DRC had tested positive for Bundibugyo virus disease.[10] The individual, who was not involved in direct patient care,[11] prompted an extensive U.S. public health response. CDC, in coordination with the humanitarian organization, initiated contact tracing, exposure risk assessments, and monitoring activities to identify high-risk contacts and evaluate potential exposures among humanitarian personnel who had recently returned to, or are planning to return to, the United States. The Department of State arranged medical evacuation outside of DRC for treatment. This incident demonstrates that even when an infected U.S. citizen remains overseas, the outbreak can require substantial U.S. public health resources to identify, assess, and monitor potentially exposed individuals associated with international humanitarian operations.

Travelers utilizing air transit pathways originating in or passing through DRC, Uganda, and South Sudan

include non-U.S. citizens, including regional migrants, foreign contract workers, humanitarian personnel, business travelers, students, refugees, and third-country nationals moving through international aviation hubs in Africa, the Middle East, and Europe. Many travelers entering U.S.-bound itineraries from these pathways may do so under temporary visas, refugee or asylum processing mechanisms, international organizational travel, or multi-country itineraries that obscure their original point of departure. As a result, public health screening and border security systems face heightened operational complexity in identifying travelers with recent exposure histories linked to Ebola-affected regions, particularly when travelers originate from or transit through multiple jurisdictions prior to arrival at major U.S. metropolitan airports.

CDC issued a Level 2 Travel Health Notice (THN, practice enhanced precautions) for Ituri and North Kivu provinces of DRC and a Level 1 THN (practice usual precautions) for Uganda on May 15, 2026.[12] On May 18, 2026,[13] CDC escalated the Level 2 THN for to a Level 3 THN (reconsider nonessential travel) for Ituri and North Kivu Provinces; South Kivu was added to the Level 3 on May 22, 2026. On May 27, 2026, the THN for Uganda was elevated to a Level 2. On June 15, 2026 CDC issued a Level 2 THN for the remainder of DRC and Uganda.[14] This modification reflects the geographic distribution of reported cases and does not indicate a reduced level of concern regarding the outbreak, which continues to expand in affected areas and poses a risk of further transmission and geographic spread.

CDC modeling indicates that, absent rapid and sustained public health interventions, the outbreak could become one of the largest Ebola epidemics ever recorded.[15] The analysis further demonstrates that early identification of cases, contact tracing, isolation and treatment of symptomatic persons, community engagement, and safe burial practices are critical to reducing transmission and mitigating outbreak growth.[16] CDC has concluded that the current outbreak is already the largest known outbreak of Bundibugyo virus disease and that large-scale, sustained public health measures are necessary to prevent further international spread of the disease and to reduce the risk of introduction of infected persons into the United States.[17] Commensurate with the deterioration of the epidemiological situation in DRC, CDC escalated its response to the outbreak to a Level 1, the highest level within the agency's Graduated Response Framework.[18] Designating the response as a Level 1 indicates the gravity of the situation and allows additional staffing support from across the response, with immediate lines of communication with agency leadership.

Restricting entry of covered aliens into the United States reduces the volume of higher-risk international arrivals requiring public health monitoring and follow-up. By limiting the number of potentially exposed travelers entering through major U.S. ports of entry, federal, state, and local public health authorities have concentrated finite surveillance, screening, contact tracing, quarantine management, and medical monitoring resources on returning U.S. citizens and U.S. nationals, including those who have worked in the outbreak areas.

Paired with the DHS arrival restrictions redirecting travelers to specific U.S. airports,[19] this approach has reduced operational strain on airport screening systems, CDC port health stations, public health laboratories, and healthcare facilities responsible for evaluating suspected Bundibugyo virus disease cases. It also has improved the ability of authorities to conduct detailed exposure assessments, ensure compliance with monitoring requirements during the 21-day incubation period, rapidly identify symptomatic travelers, and allocate specialized isolation and treatment capacity more effectively. In the context of a rapidly evolving Bundibugyo virus disease outbreak with significant cross-border mobility, prioritizing surveillance efforts toward a smaller and more traceable traveler population has strengthened the overall effectiveness of U.S. disease containment and border health security operations.

IV. Legal Basis for This Order Under Sections 362 and 365 of the Public Health Service Act and 42 CFR 71.40

CDC is issuing this Order pursuant to sections 362 and 365 of the Public Health Service Act (42 U.S.C. 265, 268) and the implementing regulation at 42 CFR 71.40. In accordance with these authorities, the CDC Director is permitted to prohibit, in whole or in part, the introduction into the United States of persons from designated foreign countries (or one or more political subdivisions or regions thereof) or places, only for such period of time that the Director deems necessary to avert the serious danger of the introduction of a quarantinable communicable disease,[20] by issuing an Order in which the Director determines that:

(1) By reason of the existence of any quarantinable communicable disease in a foreign country (or one or more political subdivisions or regions thereof) or place there is serious danger of the introduction of such quarantinable communicable disease into the United States; and

(2) This danger is so increased by the introduction of persons from such country (or one or more political subdivisions or regions thereof) or place that a suspension of the right to introduce such persons into the United States is required in the interest of public health.[21]

Section 362 and the implementing regulation provide the Director with a public health tool to suspend introduction of persons not only to prevent the introduction of a quarantinable communicable disease, but also to aid in continued efforts to mitigate spread of that disease.[22]

The term ''introduction into the United States'' is defined in 42 CFR 71.40 as ''the movement of a person from a foreign country (or one or more political subdivisions or regions thereof) or place, or series of foreign countries or places, into the United States so as to bring the person into contact with persons or property in the United States, in a manner that the Director determines

[19] DHS, Arrival Restrictions Applicable to Flights Carrying Persons Who Have Recently Traveled From or Were Otherwise Present Within the Democratic Republic of the Congo, Uganda, or South Sudan, 91 FR 29896 (May 21, 2026).

[20] *See* Exec. Order No. 13,295, Revised List of Quarantinable Communicable Diseases (April 2, 2003) (adding viral hemorrhagic fevers, including Ebola, to the U.S. federal list of quarantinable communicable diseases).

[21] 42 U.S.C. 265; 42 CFR 71.40.

[22] 85 FR 56424 at 56425–26.

to present a risk of transmission of a quarantinable communicable disease to persons, or a risk of contamination of property with a quarantinable communicable disease.'' 42 CFR 71.40(b)(1). Similarly, the term ''serious danger of the introduction of such quarantinable communicable disease into the United States'' is defined as, ''the probable introduction of one or more persons capable of transmitting the quarantinable communicable disease into the United States, even if persons or property in the United States are already infected or contaminated with the quarantinable communicable disease.'' 42 CFR 71.40(b)(3).

Section 71.40(b)(2) defines ''[p]rohibit, in whole or in part, the introduction into the United States of persons'' in Section 362 to mean ''to prevent the introduction of persons into the United States by suspending any right to introduce into the United States, physically stopping or restricting movement into the United States.'' *See also* 42 U.S.C. 265 (authorizing the prohibition when the danger posed by the communicable disease ''is so increased by the introduction of persons . . . from such country . . . that a suspension of the right to introduce such persons . . . is required in the interest of public health'').

As stated in the Final Rule for 42 CFR 71.40, CDC ''may, in its discretion, consider a wide array of facts and circumstances when determining what is required in the interest of public health in a particular situation . . . includ[ing] . . . [t]he overall number of cases of disease; any large increase in the number of cases over a short period of time; the geographic distribution of cases; any sustained (generational) transmission; the method of disease transmission; morbidity and mortality associated with the disease; the effectiveness of contact tracing; the adequacy of state and local health care systems; and the effectiveness of state and local public health systems and control measures.'' [23]

As stated in 42 CFR 71.40, this Order does not apply to U.S. citizens, U.S. nationals, members of the armed forces of the United States and associated personnel if the Secretary of War provides assurance to the Director that the Secretary of War has taken or will take measures such as quarantine or isolation, or other measures maintaining control over such individuals, to prevent the risk of transmission of the quarantinable communicable disease into the United States, or United States government employees or contractors on orders abroad, or their accompanying family members who are on their orders or are members of their household, if the Director receives assurances from the relevant head of agency and determines that the head of the agency or department has taken or will take measures such as quarantine or isolation, to prevent the risk of transmission of a quarantinable communicable disease into the United States.[24]

In addition, this Order does not apply to additional classes of persons excepted by the CDC Director. Creating exceptions in the Order is consistent with Section 362 and 42 CFR 71.40. Section 362 explicitly states that the prohibition of introduction into the United States may be ''in whole or in part.'' This phrase is also included in section 71.40(a) and, as explained in the Final Rule, is intended to allow the Director to narrowly tailor the use of the authority to what is required in the interest of public health.[25] As noted in the Final Rule for 42 CFR 71.40, the CDC Director may also take into account international obligations and humanitarian concerns.[26] Pursuant to this capability, CDC is therefore excepting certain categories of persons, as described herein.

This Order will be in effect for 30 days to avert the serious danger of the introduction, transmission, and spread of Ebola disease into the United States. Finally, as directed by 42 CFR 71.40(c), this Order sets out the following:

(1) The foreign countries (or one or more political subdivisions or regions thereof) or places from which the introduction of persons is being prohibited;

(2) The period of time or circumstances under which the introduction of any persons or class of persons into the United States is being prohibited;

(3) The conditions under which that prohibition on introduction will be effective, in whole or in part, including any relevant exceptions that the Director determines are appropriate;

(4) The means by which the prohibition will be implemented; and

(5) The serious danger posed by the introduction of the quarantinable communicable disease in the foreign country or countries (or one or more political subdivisions or regions thereof) or places from which the introduction of persons is being prohibited.

V. Determination and Implementation

Based on the foregoing, I hereby determine that Ebola disease, a highly transmissible quarantinable communicable disease, is confirmed present in DRC and Uganda. There is a material risk that the outbreak will spread to South Sudan. I also determine that the prevalence of Ebola disease in these foreign countries constitutes a serious danger of the introduction of this disease into the United States due to the limited screening and testing and mitigation measures currently available. Finally, I determine that a temporary 30-day suspension of the right to introduce covered aliens is necessary to protect the public health from the serious danger of the introduction of Ebola disease into the United States, pending an ongoing public health assessment of the Ebola disease outbreak.

I consulted with the Department of State, DHS, and other federal departments as needed before I issued this Order and requested that DHS aid in the enforcement of this Order because CDC does not have the capability, resources, or personnel needed to do so.[27] As part of the consultation, DHS developed operational plans for implementing this Order. These plans are consistent with the language of this Order.

Although this Order is not a rule subject to notice and comment under the Administrative Procedure Act (APA) and is issued with immediate effect, in order to ensure that the forthcoming public health risk assessment is informed by public input, the Order is being issued with a simultaneous 15-day comment period.

This Order takes effect at 5:00 p.m. Eastern Daylight Time on Monday, July 13, 2026. For individuals intending to travel to the United States by air, the Order will apply to flights departing after 4:59 p.m. Eastern Daylight Time on Tuesday, July 13, 2026.

* * * * *

In testimony whereof, the Assistant Secretary for Health, U.S. Department of Health and Human Services, has hereunto set his hand at Washington, DC this 14th day of July, 2026.

Dated: 07/14/2026.

Admiral Brian Christine, MD, Assistant Secretary for Health (ASH) and Head of the United States Public Health Service (USPHS) Commissioned Corps, Department of Health and Human Services.

Public Participation

Interested persons or organizations are invited to participate by submitting

[23] *Id.* at 56444.

[24] 42 CFR 71.40(e) and (f).

[25] 85 FR 56424 at 56444.

[26] *Id.* at 56447.

[27] 42 U.S.C. 268; 42 CFR 71.40(d).

written views, recommendations, and data so that the public can provide input that may inform the forthcoming public health risk assessment and whether any subsequent exercise of this authority is necessary.

Please note that comments received, including attachments and other supporting materials, are part of the public record and are subject to public disclosure. Comments will be posted on *https://www.regulations.gov.* Therefore, do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure. If you include your name, contact information, or other information that identifies you in the body of your comments, that information will be on public display. CDC will review all submissions and may choose to redact, or withhold, submissions containing private or proprietary information such as Social Security numbers, medical information, inappropriate language, or duplicate/near duplicate examples of a mass-mail campaign. Do not submit comments by email. CDC does not accept comment by email.

Authority

The authority for this order is Sections 362 and 365 of the Public Health Service Act (42 U.S.C. 265, 268), as amended.

Dated: July, 14, 2026.

Brian Christine,

Admiral, Assistant Secretary for Health (ASH) and Head of the United States Public Health Service (USPHS) Commissioned Corps, Department of Health and Human Services.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10450 and CMS–643]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by August 17, 2026.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing*

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment.

Information Collection

1. *Type of Information Collection Request:* Revision of a currently approved Information Collection; *Title of Information Collection:* Consumer Assessment of Healthcare Providers and Systems (CAHPS) Survey for Merit-based Incentive Payment Systems (MIPS); *Use:* This is a request to revise the information collection for the CAHPS for MIPS Survey. The CAHPS for MIPS survey is used in the Quality Payment Program (QPP) to collect data on fee-for-service Medicare beneficiaries' experiences of care with eligible clinicians participating in MIPS and is designed to gather only the necessary data that CMS needs for assessing physician quality performance, and related public reporting on physician performance, and should complement other data collection efforts. The survey consists of the core Agency for Healthcare Research and Quality (AHRQ) CAHPS Clinician & Group Survey, version 3.0, plus additional survey questions to meet CMS's information and program needs. The survey information is used for quality reporting, the compare tool on the Medicare.gov website, and annual statistical experience reports describing MIPS data for all MIPS eligible clinicians.

This 2026 information collection request addresses the requirements related to the statutorily required quality measurement. The CAHPS for MIPS survey results in burden to three different types of entities: groups, virtual groups, and subgroups; vendors; and beneficiaries associated with administering the survey. Virtual groups are subject to the same requirements as groups and subgroups; therefore, we will refer only to ''groups'' as an inclusive term for all entities unless otherwise noted.

The revision consists of a change to the vendor participation form to collect cost information from survey vendors. The collection of this cost information was proposed in the CY 2025 PFS final rule (*89 FR 62010*) and (*89 FR 62123*). The revision also includes changes to the vendor participation form to collect information related to the addition of web to the existing mail-phone administration protocol. The addition of web as the first mode of administration was proposed in the CY 2026 PFS final rule (*90 FR 49266*) and (*90 FR 49760*).

The changes to the vendor participation form consist of:

- 2 new items to collect information on cost
- 1 new item to collect information related to web administration of the survey
- 12 items revised to collect information related to web administration of the survey

The cost information is readily available to survey vendors, as a result adding it to the vendor participation form does not affect burden. The web survey requires vendors to collect additional information to complete the vendor participation form. We estimate an additional hour of burden for a total of 11 hours per application, an increase to the 10 hours per application first established in the CY 2018 Quality Payment Program final rule (*82 FR 30216*). We also assume this change would not affect survey vendor participation. *Form Number:* CMS–10450 (OMB control number: 0938–1222); Frequency: Yearly; *Affected Public:* Business or other for-profits and Not-for-profit institutions and Individuals and Households; *Number of Respondents:* 26,976; *Total Annual Responses:* 26,976; *Total Annual Hours:* 6,139 (For policy questions regarding this collection contact Julie Johnson at 410–786–1507.)

2. *Type of Information Collection Request:* Reinstatement with change of a previously approved collection; *Title of Information Collection:* Hospice Survey and Deficiencies Report Form and Supporting Regulations; *Use:* A hospice is a heath care entity that provides palliative care (relief of pain and uncomfortable symptoms), as opposed to curative care, to terminally ill individuals. In addition to meeting the patient's medical needs, hospice care addresses the physical, psychosocial, and spiritual needs of the patient, as well as psychosocial needs of the patient's family/caregiver related to the terminal illness. The emphasis of the hospice program is on keeping the hospice patient at home with family and friends as long as possible.

The CMS–643 form is primarily a coding worksheet designed to facilitate data collection during a hospice survey for Medicare participation. It is used to collect several data elements related to patient health and safety, record reviews and data about the specific hospice's operations, staffing and demographics. CMS has made several revisions to this form based on duplication of collected information from the CMS–643 and the CMS–417 form titled ''Hospice Request for Certification in the Medicare Program'' (OMB Control number: 0938–0313). The CMS–643 is completed by surveyors during onsite survey activity and poses minimal to no burden on the hospice provider.

The data collected on the CMS–643 form is entered into the internet Quality Improvement and Evaluation System (iQIES) surveyor database during the course of an initial, recertification or complaint survey. Hospice surveyors that have access to the electronic iQIES system while onsite at a hospice, can enter the CMS–643 form data directly into the system. If this access is not available to the surveyor, they can record their finding directly onto the CMS–643 form and input the data into the system later. We removed the requirement for the surveyors to sign CMS–643 to certify their findings as this process has been automated once information is entered into the iQIES database. *Form Number:* CMS–643 (OMB control number: 0938–0379); *Frequency:* Yearly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 7,029; *Total Annual Responses:* 2,343; *Total Annual Hours:* 1,172. (For policy questions regarding this collection contact Caecilia Andrews at 410–786–2190.)

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

Medicaid and Children's Health Insurance Program (CHIP) Generic Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services (CMS), Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: On May 28, 2010, the Office of Management and Budget (OMB) issued Paperwork Reduction Act (PRA) guidance related to the ''generic'' clearance process. Generally, this is an expedited process by which agencies may obtain OMB's approval of collection of information requests that are ''usually voluntary, low-burden, and uncontroversial collections,'' do not raise any substantive or policy issues, and do not require policy or methodological review. The process requires the submission of an overarching plan that defines the scope of the individual collections that would fall under its umbrella. On October 23, 2011, OMB approved our initial request to use the generic clearance process under control number 0938–1148 (CMS–10398). It was last approved on April 26, 2021, via the standard PRA process which included the publication of 60- and 30-day **Federal Register** notices. The scope of the April 2021 umbrella accounts for Medicaid and CHIP State plan amendments, waivers, demonstrations, and reporting. This **Federal Register** notice seeks public comment on one or more of our collection of information requests that we believe are generic and fall within the scope of the umbrella. Interested persons are invited to submit comments regarding our burden estimates or any other aspect of this collection of information, including: the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by July 30, 2026.

ADDRESSES: When commenting, please reference the applicable form number (CMS–10398 #/CMS–10434 #) and the OMB control number (0938-). To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address:

CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: CMS–10398 #/CMS–10434 #/OMB control number: 0938–, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in

this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/medicare/regulations-guidance/legislation/paperwork-reduction-act-1995/pra-listing.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at 410–786–4669.

SUPPLEMENTARY INFORMATION: Following is a summary of the use and burden associated with the subject information collection(s). More detailed information can be found in the collection's supporting statement and associated materials (see **ADDRESSES**).

Generic Information Collections

1. *Title of Information Collection:* CHIP State Plan Eligibility; *Type of Information Collection Request:* Revision of an active collection of information request; *Use:* Section 71112 of the Working Families Tax Cut (WFTC) Act (Pub. L. 119–21) amended section 2102(b)(1)(B) of the Social Security Act by retaining the state option to provide retroactive CHIP eligibility while limiting states from beginning coverage any earlier than two months prior to the month of application. This 2026 iteration adds a new template (CS22, ''Retroactive Eligibility for Children and/or Pregnant Women'') that includes required eligibility attestations for the state to document state assurances/elections and verification processes, including that the State will provide coverage during a ROP (reasonable opportunity period) of at least 90 days; *Form Number:* CMS–10398 #17 (OMB control number: 0938–1148); *Frequency:* Once and occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 41; *Total Annual Responses:* 41; *Total Annual Hours:* 820. (For policy questions regarding this collection contact Abby Kahn at 410–786–4321.)

2. *Title of Information Collection:* Model Application Template and Instructions for State Child Health Plan Under Title XXI of the Social Security Act, State Children's Health Insurance Program; *Type of Information Collection Request:* Revision of an active collection of information request; *Use:* Section 71103 of the WFTC legislation adds new paragraph (88) under section 1902(a) of the Social Security Act with corresponding amendments to section 2107(e)(1) to create new state plan requirements related to address verification. Beginning no later than January 1, 2027, the 50 States and the District of Columbia must regularly obtain updated address information from reliable data sources while Medicaid/CHIP managed care contracts must require prompt transmission to the state of updated address information obtained or verified directly with the individual.

This 2026 iteration also adds several new state assurances and updates existing requirements in the CHIP state plan template. The state must attest that each contracted managed care entity or plan promptly transmits to the state any enrollee address information it receives directly from the enrollee or verifies directly with the enrollee and that the state regularly obtains updated address information for Medicaid and CHIP enrollees from reliable data sources.

Consistent with our February 8, 2024 (89 FR 8758) final rule CMS–0057–F (RIN 0938–AU87) this iteration amends the quality assurance for prior authorizations in the CHIP state plan template. States must provide a narrative description of methods used to ensure prior authorization determination timeframes are met within 7 calendar days for standard requests and 72 hours for expedited requests. States must also provide an assurance that prior authorization data will be posted on the state's website by March 31 for data from the previous calendar year. We estimate all states with a separate CHIP will be required to submit a SPA to attest to compliance with the provisions of CMS–0057–F.

Revisions to the template require the state to: attest that it has a process to regularly obtain address information for enrolled individuals and attest that it uses specified reliable data sources for updated address information. It also requires the state to describe its quality oversight for prior authorization determination timeframes.

Form Number: CMS–10398 #34 (OMB control number: 0938–1148); *Frequency:* Annual; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 41; *Total Annual Responses:* 82; *Total Annual Hours: 328.* (For policy questions regarding this collection contact Abby Kahn at 410–786–4321.)

3. *Title of Information Collection:* Home and Community Based Services (HCBS) Quality Measure Set (QMS) Reporting; *Type of Information Collection Request:* New collection of information; *Use:* This new collection of information supports reporting requirements for states participating in the Money Follows the Person (MFP) demonstration. As a condition of award under the MFP demonstration, participating state Medicaid agencies are required to report on measures included in the Home and Community-Based Services (HCBS) Quality Measure Set (QMS) beginning September 1, 2026; *Form Number:* CMS–10398 #95 (OMB control number: 0938–1148); *Frequency:* Biennial and once; *Affected Public:* Individuals and households, and State, Local, or Tribal Governments; *Number of Respondents:* 48,048; *Total Annual Responses:* 24,024; *Total Annual Hours:* 109,200. For policy questions regarding this collection contact Melanie Brown at 410–786–1095.

4. *Title of Information Collection:* Medicaid State Plan Eligibility; *Type of Information Collection Request:* Revision of an active collection of information request; *Use:* This 2026 iteration incorporates revisions related to sections 71103, 71107, and 71112 of the WFTC legislation. The revisions are associated with RU S95 (Regularly Obtain Address Information for Enrolled Individuals) for section 71103; RU S94 (Eligibility Process) and RU S96 (Frequency of Renewals of Eligibility) for section 71107; and RU S85 (Beginning Dates of Eligibility) for section 71112; *Form Number:* CMS–10434 #15 (OMB control number: 0938–1188); *Frequency:* Once and occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 56; *Total Annual Responses:* 56; *Total Annual Hours:* 1,120. (For policy questions regarding this collection contact Abby Kahn at 410–786–4321.)

5. *Title of Information Collection:* Health Home State Plan Amendment (SPA); *Type of Information Collection Request:* Revision of an active collection of information request; *Use:* Information submitted via the Health Home State Plan Amendment (SPA) web-based application is used by CMS to analyze a State's proposal to implement Section 1945 and/or Section 1945A of the Act. Section 1945 provides a State plan option to provide coordinated care through a health home program for individuals with chronic conditions while Section 1945A provides a State plan option to provide coordinated care through a health home program for children with medically complex conditions; *Form Number:* CMS–10434 #22 (OMB control number: 0938–1188); *Frequency:* Yearly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 35; *Total Annual Responses:* 35; *Total Annual Hours:* 2,800. (For policy questions regarding this collection contact Sara Rhoades at 410–786–4484.)

6. *Title of Information Collection:* Child and Adult Core Set Measures; *Type of Information Collection Request:* Revision of an active collection of information request; Use: For federal

fiscal year (FFY) 2026, States are required to submit data on 25 Child Core Set and 10 behavioral health Adult Core Set mandatory quality measures. We also added two new optional stratification standards to state reporting: foster care status (Child measures only) and Medicaid expansion status (Adult measures only).

States will be required to report stratified data for 2026 on: 12 Child Core Set measures and 5 Adult Core Set behavioral health measures. As per usual practice, states can choose to voluntarily submit data on up to two provisional measures and three utilization measures on the Child Core Set and up to 23 voluntary measures, two provisional measures, and one utilization measure on the Adult Core Set and provide measurement data stratified by race, ethnicity, sex (male/female), geography (urban/rural), foster care status (Child measures only) or Medicaid expansion status (Adult measures only). Questions related to stratification have been provided as a separate reviewable units (RUs) and revised to include foster care status and Medicaid expansion standards.

For the mandatory measures on the Child and Adult Core Sets, the burden estimate has been updated to reflect efficiencies in state reporting, improvements in the reporting system, and the requirement to stratify 50% of these measures. For the voluntary measures on the Adult Core Set, the burden estimate has been updated to reflect the number of states who have reported these measures since mandatory reporting was implemented.

For the annual exemption request, the burden estimate has been updated based on the number of states who submitted exemption requests since mandatory reporting began.

Form Number: CMS–10434 #26 (OMB control number: 0938–1188); *Frequency:* Yearly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 61,293; *Total Annual Responses:* 61,431; *Total Annual Hours:* 85,489. (For policy questions regarding this collection contact Virginia (Gigi) Raney at 410–786–6117.)

7. *Title of Information Collection:* Health Home Core Sets; *Type of Information Collection Request:* Revision of an active collection of information request; *Use:* Information submitted via the Health Home Core Sets web-based application is used by CMS to analyze the Health Home programs. Through the establishment of sections 1945 and 1945A of the Social Security Act (the Act) states may elect a new Health Homes service option under the Medicaid state plan that could help states address and receive additional federal support for enhanced integration and care coordination for Medicaid eligible individuals with chronic conditions, such as mental health conditions, including substance use disorders, asthma, diabetes, heart disease, overweight, and medically complex children. *Form Number:* CMS–10434 #47 (OMB control number: 0938–1188); *Frequency:* Yearly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 45; *Total Annual Responses:* 45; *Total Annual Hours:* 4,350. (For policy questions regarding this collection contact Sara Rhoades at 410–786–4484.)

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4169–69–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for Office of Management and Budget Review; Evaluation of the Next Generation Child Support Employment Services Demonstration

AGENCY: Office of Child Support Enforcement, Administration for Children and Families, Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Office of Child Support Enforcement (OCSE), Administration for Children and Families (ACF), Department of Health and Human Services, is proposing to collect data for a new implementation and outcomes study, Evaluation of the Next Generation Child Support Employment Services Demonstration (NextGen).

DATES: Comments due August 17, 2026.

ADDRESSES: The public may view and comment on this information collection request at: *https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202607-0970-006.* You can also obtain copies of the proposed collection of information by emailing *infocollection@acf.hhs.gov.* Identify all emailed requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: OCSE proposes data collection activity as part of NextGen. In August 2024, OCSE issued eight grants and two section 1115 waivers to 10 child support agencies to provide employment and other support services to noncustodial parents:

- Los Angeles County, CA
- Sacramento and Stanislaus Counties, CA
- Cherokee Nation
- Lac Courte Oreilles
- Louisiana
- Minnesota
- Nooksack (waiver)
- Ponca (waiver)
- Virginia
- Washington

The goal is to increase the consistency of child support payments through improved employment and earnings. NextGen is a 5-year project; the first year and a half will be dedicated to planning and piloting demonstration programs, followed by three and a half years of full implementation. NextGen sites will receive technical assistance as they plan, pilot, and implement their programs. The technical assistance team will also conduct an evaluation that will include implementation and outcome studies. The NextGen demonstration will yield important information about the best practices and challenges regarding child support-led employment and other support services and partnerships in a variety of settings. Evaluating this information will produce insights on the development and implementation of these partnerships, and the employment and child support-related outcomes they can generate for parents and families. The evaluation will help local, state, and tribal child support agencies design and implement child support-led employment programs in ways that work for their local communities.

NextGen sites will receive technical assistance throughout the 5-year demonstration. The goal of the technical assistance is to help sites deliver strong programs to noncustodial parents, including helping them adapt to services as needed. The information collection activity for technical assistance will include providing sites with a Management Information System (MIS) to use for NextGen enrollment and case management. NextGen staff will enter information about received services into the MIS system. These data will help staff as they deliver the intervention. An overview of the NextGen evaluation's implementation and outcomes studies follow.

1. Implementation study. The goal of the implementation study is to document variation in program implementation, such as program structures, enrollment strategies, employment and child support services offered, program partnerships and

linkages, and local policy or economic factors. The design and implementation elements will contextualize the outcomes study's findings and serve as important sources of insight regarding the startup, operation, and sustainability strategies for child support-led employment services. Key information collection activities for the implementation study will include:

- MIS data for participants who consent to be in the study to understand participant characteristics and how they responded to NextGen services
- Semi-structured interviews with child support staff and staff from partner organizations
- Semi-structured interviews with program participants to learn about their experiences in the NextGen program

2. *Outcomes study.* The goal of the outcomes study is to measure and assess relevant outcomes, including changes in employment and earnings, and child support payment amounts and consistency. Child support administrative data will be used to obtain outcomes information about NextGen participants' child support orders, payments, child support debt, and enforcement history during the 12 months before and after enrollment. Data from the National Directory of New Hires will be collected to report outcomes on employment and earnings for all participants. Other activities include collecting and analyzing baseline data about NextGen participants from the MIS who consent to be in the evaluation.

This 30-Day Notice covers the following data collection activities:

- MIS to track program enrollment, baseline information, and program participation
- Staff and community partner interview topic guide
- Participant interview topic guide

Respondents: Respondents for this information collection include grantee and tribal waiver staff and partners, and study participants. Specific respondents per instrument are outlined in the burden table below.

Annual Burden Estimates

Data collection is expected to take place over a 3-year period and annual burden has been calculated to reflect this timeline. ACF will submit an extension request to OMB when necessary, prior to the initial expiration date.

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours	Annual burden hours
MIS to track program participation	5,400	1	1.5	8,100	2,700
Staff and community partner interview topic guide	100	1	1.00	100	33
Participant interview topic guide	100	1	1.00	100	33
Estimated Total Annual Burden Hours					2,766

Authority: 42 U.S.C. 651 *et seq.* and 42 U.S.C. 1315.

Mary C. Jones,

ACF/OPRE Certifying Officer.

[FR Doc. 2026–14279 Filed 7–15–26; 8:45 am]

BILLING CODE 4184–41–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[Office of Management and Budget #: 0970–0426]

Submission for Office of Management and Budget Review; Child and Family Services Plan, Annual Progress and Services Report, and Annual Budget Expenses Request and Estimated Expenditures (Child and Family Services–101)

AGENCY: Children's Bureau, Administration for Children and Families, Department of Health and Human Services.

ACTION: Request for public comments.

SUMMARY: The Children's Bureau (CB), Administration for Children and Families (ACF) is requesting a 3-year extension of the collection of information under the Child and Family Services Plan (CFSP), the Annual Progress and Services Report (APSR), and the Annual Budget Expenses Request and Estimated Expenditures (Child and Family Services (CFS)–101) collection (Office of Management and Budget #: 0970–0426, expiration July 31, 2026). There are minor changes to the CFS–101 form and changes to the way the information is collected in narrative form to reduce burden and decrease duplicative reporting. The annual collection of Monthly Caseworker Visit Data has been discontinued in the CFSP/APSR and data from Care Analysis and Reporting System will be used instead.

DATES: Comments due August 17, 2026.

ADDRESSES: The public may view and comment on this information collection request at: *https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=202607-0970-007.* You can also obtain copies of the proposed collection of information by emailing *infocollection@acf.hhs.gov.* Identify all emailed requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: Currently, under title IV–B, subparts 1 and 2 of the Social Security Act (the Act), states, territories, and tribes are required to submit a CFSP (45 CFR 1357.15(a)(1)). The CFSP outlines activities the state, tribe, or territory will carry out in administering programs and services to promote the safety, permanency, and well-being of children and families, including, as applicable, those activities conducted under the John H. Chafee Foster Care Program for Successful Transition to Adulthood (section 477 of the Act) and the state grant authorized by the Child Abuse Prevention and Treatment Act. By June 30 of each year, states, territories, and tribes are also required to submit an APSR and a financial report called the CFS–101. The APSR is a yearly report that discusses progress made by a state, territory, or tribe in accomplishing the goals and objectives cited in its CFSP (45 CFR 1357.16(a)). The APSR contains updated information about service needs and organizational capacities throughout the 5-year plan period and includes information on the use of other grant programs where annual reporting is required. The CFS–101 has 3 parts. Part I is an annual budget request for the upcoming fiscal year (FY). Part II includes a summary of planned expenditures by program area for the upcoming FY, the estimated number of individuals or families to be served, and the geographical service area. Part III includes actual expenditures by program area, numbers of families and individuals served by

program area, and the geographic areas served for the last complete FY.

The Supporting America's Children and Families Act, Public Law 118–258, was signed into law on January 4, 2025. This law reauthorizes and amends title IV–B programs. The new title IV–B reporting requirements will be added to the CFSP/APSR instructions. New requirements under title IV–B, subpart 3 requires that CB reduce administrative burden on the title IV–B program to eliminate duplication and streamline reporting requirements to reduce the number of hours required for compliance by at least 15 percent in coordination with activities required under the Paperwork Reduction Act. CB has already begun these activities to gather input to streamline reporting and reduce burden.

Respondents: Currently, states, territories, and tribes must complete the CFSP, APSR, and CFS–101. There are approximately 180 tribal entities that currently receive IV–B funding. There are 53 states (including the Commonwealth of Puerto Rico, the District of Columbia, and the Virgin Islands) that must complete the CFSP, APSR, and CFS–101.

Annual Burden Estimates: Burden estimates have been adjusted to reflect the updates to the APSR and the CFSP and the elimination of the caseworker visit data. The average burden per response for the APSR has been reduced from 82 hours to 50 hours and for the CFSP it has been reduced from 123 hours to 90 hours. Overall, this is a 48 percent reduction in burden associated with this information collection.

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours	Annual burden hours
APSR	233	3	50	34,950	11,650
CFSP	47	1	90	4,230	1,410
CFS–101, Part I, Part II, and III	233	3	5	3,495	1,165
Estimated Total Annual Burden Hours					14,225

Authority: Title IV–B, subparts 1, 2, and 3 of the Social Security Act (the Act), and title IV–E, section 477 of the Act; sections 106 and 108 of CAPTA (42 U.S.C. 5106a. and 5106d.); and Supporting America's Children and Families Act, Pub. L. 118–258, signed into law on January 4, 2025.

Mary C. Jones,

ACF/OPRE Certifying Officer.

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2026–N–7606]

Process for FDA Data Requests To Inform Certain Over-the-Counter Monograph Drug Activities; Procedure

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the process for FDA to issue Data Requests for the submission of data from the public to help inform certain future over-the counter (OTC) monograph drug activities, including development of FDA-initiated proposed orders to modify conditions described in an OTC monograph. FDA is issuing this notice to inform the public and interested parties of the process that FDA is implementing to issue these Data Requests.

DATES: The announcement of the process is published in the **Federal Register** on July 16, 2026.

FOR FURTHER INFORMATION CONTACT: Michael Boblitz, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993–002, 301–837–7651.

SUPPLEMENTARY INFORMATION:

I. Background

Section 505G of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355h) sets forth the framework for the regulation of OTC monograph drugs.[1] OTC monograph drugs may be marketed without a new drug application approved under section 505 of the FD&C Act (21 U.S.C. 355) if they meet the requirements of section 505G of the FD&C Act, as well as other applicable requirements. An OTC monograph set forth in a final order under section 505G for a therapeutic category of drugs describes the conditions, such as active ingredients, uses (indications), doses, routes of administration, labeling, and testing, under which OTC monograph drugs within such therapeutic category are generally recognized as safe and effective (GRASE) for their intended use. The conditions described in an OTC monograph may be amended, revoked, or otherwise modified in accordance with a final order issued under section 505G(b) of the FD&C Act.[2] Either FDA or a requestor[3] can initiate the order process in section 505G(b). A requestor can initiate the order process by submitting an OTC monograph order request[4] with respect to certain drugs, classes of drugs, or combinations of drugs.[5] FDA may opt to announce Data Requests described in this notice to help inform certain future OTC monograph drug activities, including development of FDA-initiated proposed orders.

II. Procedures for Data Requests

When FDA seeks data and information from the public to help inform certain OTC monograph drug activities, such as development of a potential FDA-initiated proposed order to add a GRASE condition to an OTC monograph, FDA intends to announce a Data Request on the OTC Monographs@FDA portal at *https://www.accessdata.fda.gov/scripts/cder/omuf/.* The Data Request will include instructions on the submission of the data and information to FDA, including

[1] Per section 744L(5) of the FD&C Act, an ''OTC monograph drug'' is defined as a nonprescription drug without an approved new drug application which is governed by the provisions of section 505G.

[2] Under section 505G(b)(1) of the FD&C Act, ''The Secretary may, on the initiative of the Secretary or at the request of one or more requestors, issue an administrative order determining whether there are conditions under which a specific drug, a class of drugs, or a combination of drugs, is determined to be . . . (i) not subject to section 503(b)(1) [*i.e.,* nonprescription]; and (ii) generally recognized as safe and effective under section 201(p)(1)''.

[3] Under section 505G(q)(3) of the FD&C Act (21 U.S.C. 355h(q)), the term *requestor* refers to any person or group of persons marketing, manufacturing, processing, or developing an OTC monograph drug.

[4] An OTC monograph order request means a request for an order submitted under section 505G(b)(5) of the FD&C Act (see section 744L(7) of the FD&C Act).

[5] See section 505G(b)(5) of the FD&C Act.

with respect to confidential information. The Data Request will also include instruction on how submissions may be viewed by the public. Additionally, interested parties and the public generally may sign up for FDA email mailing lists on the OTC Monographs@FDA portal to receive messages and alerts when FDA announces a Data Request described in this notice or other OTC monograph drug activities. FDA also intends to list future planned Data Requests of the type described in this notice in its Annual Forecast for Planned Monograph Activities, which is a nonbinding list issued each year of planned OTC monograph drug activities that FDA intends to initiate over the ensuing 3 years. It is available on the OTC Monographs@FDA portal.

This notice is not intended to announce the process with respect to requests for data to inform finalization of GRASE determinations for drugs described in section 505G(a)(3) of the FD&C Act (GRASE finalizations). The process FDA will use to request data packages to support GRASE finalizations will be announced in a future notice before any related crowdsourcing on that process, as described in the Over-the-Counter Monograph User Fee Program Performance Goals and Procedures—Fiscal Years 2026–2030 document (OMUFA II commitment letter).[6] In addition, this notice is unrelated to the following:

- any future **Federal Register** notice to solicit stakeholder feedback on test methods described in OTC monographs and the Test Methods Crowdsourcing described in section I.H of the OMUFA II commitment letter;
- the submission of relevant data and other information by a requestor (including a group of joint requestors) in an OTC monograph order request (OMOR)[7] submitted under section 505G(b)(5) of the FD&C Act;
- the requirement under section 505G(b)(2) of the FD&C Act to provide for a public comment period on a proposed order; and
- the requirement under section 505G(b)(4) of the FD&C Act, addressing certain expedited safety orders, to provide for a public comment period on an interim final order.

Grace R. Graham,

Deputy Commissioner for Policy, Legislation, and International Affairs.

[FR Doc. 2026–14283 Filed 7–15–26; 8:45 am]

BILLING CODE 4164–01–P

[6] The OMUFA II commitment letter can be accessed at *https://www.fda.gov/media/182750/download.*

[7] OTC monograph order request (OMOR) is defined in section 744L(7) of the FD&C Act for purposes of user fees supporting FDA activities under section 505G of the FD&C Act and refers to a request for FDA to issue an administrative order pursuant to a request submitted under section 505G(b)(5) of the FD&C Act.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Government Owned Invention Available for License: Chimeric Antigen Receptors Targeting the Gamma Delta (γδ) T-Cell Receptor

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Cancer Institute (NCI) seeks research co-development partners and/or licensees for a set of Chimeric Antigen Receptors (CARs) that target the γδ T-Cell Receptor.

FOR FURTHER INFORMATION CONTACT: Inquiries related to this license opportunity should be directed to: Andrew Burke, Ph.D. Senior Technology Transfer Manager at Email: *burkear@mail.nih.gov* or Phone: 240–276–5484.

SUPPLEMENTARY INFORMATION: T cells express two main types of receptors based on the proteins that make up the T-cell receptor (TCR) heterodimers: αβ (alpha beta) and γδ (gamma delta). T cells expressing the γδ TCR are detected at lower frequencies compared with T cells expressing the αβ TCR. γδ T cells make up 0.3–10% of peripheral blood T cells. The γδ TCR is expressed on the cell surface of several aggressive cancers, including—but not limited to—hepatosplenic T-cell lymphoma, primary cutaneous γδ T-cell lymphoma and T-cell acute lymphoblastic leukemia (T–ALL). These cancers carry poor prognosis as they are often resistant to chemotherapy. In addition, to their roles in cancer development, γδ T cells may also play role in autoimmune diseases, including psoriasis, rheumatoid arthritis, multiple sclerosis and myositis. There is evidence that γδ T cells are involved in initiation or persistence of these autoimmune diseases. To this end, new treatment options are needed for γδ T-cell malignancies and autoimmune diseases.

Researchers at the National Cancer Institute (NCI) have developed several CARs targeting the γδ TCR. These CARs can specifically bind to and immunologically recognize human γδ TCR. Binding of the CAR to the γδ TCR elicits an immune response that allows for killing of cells expressing this TCR.

''This Notice is in accordance with 37 CFR 404.4 Authority to grant licenses.''

NIH Reference Number: E–214–2024.

Related Technologies: N/A.

Product Type: Oncology | Immunology.

Therapeutic Area(s): Therapeutic.

Development Stage: Pre-clinical (*in vivo* validation).

Publications:

- Kochenderfer JN, et al. Development of Novel Chimeric Antigen Receptors Targeting the Gamma-Delta (γδ) T-Cell Receptor. (*https://doi.org/10.1182/blood-2024-204126*).

Patents: PCT/US2025/040252, filed August 1, 2025.

Potential Commercial Applications

- Enables the GMP production of personalized T cell therapy products targeting tumor specific mutations with a high percentage of engineered cells.

Competitive Advantages

- Increased therapeutic benefit due to enhanced persistence and performance following adoptive T cell transfer.
- Increased therapeutic benefit due to improved surface expression of the therapeutic TCR αβ.
  - TCR alpha/beta chains substantially eliminate the risk of mis-pairing with the endogenous alpha/beta chain sequences expressed by the host cell.
- Improved manufacturing since the population is highly enriched for the desired engineered cells.
  - Greatly increases the frequency of tumor-specific T cells following expansion, exceeding what is achieved using alternative methods to generate mutation- or tumor-specific T cells.

Collaboration Opportunity: Researchers at the NCI seek licensing for TCR-engineered T cells that will facilitate the ACT process.

Dated: July 13, 2026.

BILLING CODE 4167–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Government Owned Invention Available for License: Selective Expansion of Engineered TCR–T Cells for Use in Adoptive Cell Immunotherapy

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Cancer Institute (NCI) seeks capable licensees interested in commercializing T cell receptor (TCR)-engineered T cells expressing murine/human hybrid receptors.

FOR FURTHER INFORMATION CONTACT: Inquiries related to this license opportunity should be directed to: Andrew Burke, Ph.D. at Email: *burkear@mail.nih.gov* or Phone: 240–276–5484.

SUPPLEMENTARY INFORMATION: TCR–T therapies, particularly those targeting patient-specific neoantigens, remain a promising approach to the treatment metastatic cancers. Contemporary gene engineering techniques permit both the targeted integration of the exogenous receptor(s) and further genetic manipulation of the host cells to enhance persistence and performance following adoptive transfer (*e.g.,* through disruption of immune checkpoints such as (*CISH* or *PD1*). However, these techniques often suffer from low transduction efficiencies and may result in the generation of infusion products with sub-optimal percentages of targeted cells.

NCI scientists designed a new method that enables the selective expansion of T lymphocytes, under GMP conditions, that have been engineered to stably express a murine-human hybrid TCR. These hybrid TCRs consist of human variable regions and murine constant regions. The inventive approach uses irradiated feeder cells and an anti-mouse TCR beta constant region antibody (*e.g.,* H57) to provide stimulation, enabling the specific activation and expansion of T cells transduced with the hybrid TCRs. Critically, replacement of the OKT3 activating antibody from the standard rapid expansion protocol with one specific for the TCR murine constant region prevents the outgrowth of non-transduced cells. Consequently, the new method produces a cell population highly enriched for the desired engineered cells.

NCI seeks to market this method, which is analogous to an antigen-specific stimulation of the T cell, to companies interested in developing personalized ACT companies interested in developing personalized ACT.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Government Owned Invention Available for License: Method of Manufacturing Papilloma Infiltrating Lymphocyte (PIL) Cell Therapy Products as a Treatment for Patients With Chronic Viral Infection(s)

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Cancer Institute (NCI) seeks research co-development partners and/or licensees for development of papilloma-infiltrating lymphocytes (PIL) as treatment for patients with chronic human papillomavirus (HPV) 6 or 11 infections.

FOR FURTHER INFORMATION CONTACT: Inquiries related to this license opportunity should be directed to: Suna Gulay French, Ph.D., Technology Transfer Manager, NCI, Technology Transfer Center, Email: *suna.gulay@nih.gov* or Phone: 240–276–7424.

SUPPLEMENTARY INFORMATION: Recurrent respiratory papillomatosis (RRP) and anogenital condyloma are caused by chronic infection with human papillomavirus (HPV) types 6 or 11. These conditions lead to the development of papillomatous growths in different regions of the body. RRP affects the upper aerodigestive tract, condylomas the anogenital area. In RRP, growths in the aerodigestive tract can cause dysphonia, dyspnea and—in severe cases—airway obstruction. This may lead to recurrent pneumonia or respiratory failure.

Current treatment for RRP primarily involves repeated surgical debulking or laser ablation to manage symptoms. However, the virus often persists in a latent state, resulting in continual papilloma regrowth. The need for frequent procedures exposes patients to cumulative anesthetic and surgical risks, emotional distress, significantly diminished quality of life and persistent healthcare costs. There are no approved systemic therapies for chronic HPV 6 or 11-related conditions despite progress in localized treatments such as surgery and laser ablation. This highlights a clear unmet need for effective, curative therapies.

Researchers at the NCI have developed a novel adoptive cell therapy approach to target conditions driven by HPV types 6 or 11. They successfully identified and preferentially expanded HPV 6 and/or 11-specific T cells from papilloma tissue obtained from RRP

patients. These PILs demonstrated the ability to eliminate papillomatous tissue. Relatedly, a T cell manufacturing method holds promise for developing cell-based therapies for widespread use in chronic HPV 6/11-related conditions—including RRP and anogenital condyloma. Notably, the ability to isolate and expand antigen-specific lymphocytes from non-cancerous growths represents an exciting advancement in the field of adoptive cell therapy—potentially paving the way for treating a broader range of non-malignant diseases.

The Center for Immuno-Oncology and the Surgical Oncology Program of the NCI, Center for Cancer Research are actively seeking industry partners to support the clinical development and commercialization of this approach. It is particularly well-suited for biotech firms focused on T cell therapies or addressing HPV-related diseases. Strategic collaboration could accelerate market entry and unlock significant value in an area with high unmet medical need.

''This Notice is in accordance with 37 CFR 404.4 Authority to grant licenses.''

NIH Reference Number: E–143–2024–0.

Related Technologies: N/A.

Product Type: Infectious Disease | Immunology.

Therapeutic Area(s): Therapeutic.

Development Stage: Pre-clinical (*in vivo* validation).

Publications:

- Bai K, Norberg SM, Sievers C, Meyer T, et al. Durable response in a patient with recurrent respiratory papillomatosis treated with immune checkpoint blockade. (*https://doi.org/10.1002/hed.27144*).

Patents: PCT/US2025/051640, filed October 20,2025.

Potential Commercial Applications

- Immunotherapy for chronic HPV-related conditions such as RRP and anogenital condyloma.
- Development of personalized T cell therapies targeting HPV 6 or HPV 11 infections.
- Generation of T cell receptor (TCR) libraries for research and therapeutic purposes.

Competitive Advantages

- Addresses lack of approved systemic therapies for chronic HPV 6 or 11-related conditions.
- Potential to treat both non-cancerous and cancerous HPV-related conditions.
- PILs represent novel therapeutic approach.
- Drug development for RRP may qualify for regulatory incentives due to the rarity of the disease.
- Increased therapeutic efficacy from the ability to produce oligoclonal T cell populations.
- Selective expansion of T cells with high specificity for HPV 6 or HPV 11 antigens.
- Methodology applicable to both therapeutic and preventative treatments for chronic HPV infections.

Collaboration Opportunity: Researchers at the NCI seek licensing and/or co-development research collaborations for PIL in treatment for chronic HPV6/11-associated diseases.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276–0361.

Project: Application for the Reviewer Contact Information Form (OMB No. 0930–0255)—Reinstatement

Section 501(h) of the Public Health Service (PHS) Act (42 U.S.C. 290aa), 2 CFR 200.205, and DHHS Grants Policy directs the Assistant Secretary of the Substance Abuse and Mental Health Services Administration (SAMHSA) to establish a merit review committee to carry out the merit review requirements for applications received for discretionary grant programs. SAMHSA administers large discretionary grant programs under authorization of Title V, and, for many years, SAMHSA has funded discretionary grants to provide substance use and mental health services, research, technical assistance, and training to advance behavioral health and to improve the lives of individuals living with mental and substance use disorders, and their families.

In support of its merit review efforts, SAMHSA desires to continue to expand the quantity and experience of peer reviewers it recruits for their merit reviews of discretionary grant applications. To accomplish that end, SAMHSA has determined that it is important to proactively seek the inclusion of new and qualified individuals. Accordingly, SAMHSA has developed an application form for use by individuals who wish to apply to serve as SAMHSA peer reviewers.

The application form has been developed to capture the essential information about the individual applicants. The most consistent method to accomplish this is through completion of a standard form by all interested people which captures their knowledge, education, and expertise, in a consistent manner. SAMHSA will use the information provided on the form to identify appropriate peer reviewers. Depending on their knowledge, education, and expertise, applicants may be invited to serve on merit review committees.

The following changes are proposed in the form:

1. Changed ''Gender'' to ''Sex''.
2. Removed ''Transgender'' and ''Prefer not to Answer'' from Sex category.
3. Removed Ethnicity category and combined it with Race/Ethnicity.
4. Added ''Middle Eastern or North African'' under Race/Ethnicity.
5. Removed ''Mixed Race'' from Race/Ethnicity category.
6. Removed ''LGBTQ'' and ''Minorities (African American, Hispanic or Latino, etc.)'' from Secondary Expertise.
7. Removed the SAMSHA Values That Promote Positive Behavioral Health Statement on page 4.

The following table shows the annual response burden estimate.

Number of respondents	Responses/ respondent	Burden/responses (hours)	Total burden hours
300	1	1.5	450

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Alicia Broadus,

Public Health Advisor.

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Accreditation and Approval of Camin Cargo Control, Inc. (Thorofare, NJ) as a Commercial Gauger and Laboratory

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of accreditation and approval of Camin Cargo Control, Inc. (Thorofare, NJ), as a commercial gauger and laboratory.

SUMMARY: Notice is hereby given, pursuant to CBP regulations, that Camin Cargo Control, Inc. (Thorofare, NJ), has been approved to gauge petroleum and certain petroleum products and accredited to test petroleum and certain petroleum products for customs purposes for the next three years as of September 30, 2025.

DATES: Camin Cargo Control, Inc. (Thorofare, NJ) was approved and accredited as a commercial gauger and laboratory as of September 30, 2025. The next triennial inspection date will be scheduled for September 2028.

FOR FURTHER INFORMATION CONTACT: Robert P. Munivez, Laboratories and Scientific Services, U.S. Customs and Border Protection, 4150 Interwood South Parkway, Houston, TX 77032, tel. 281–560–2900.

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to 19 CFR 151.12 and 19 CFR 151.13, that Camin Cargo Control, Inc., 1301 Metropolitan Ave, Thorofare, NJ 08066, has been approved to gauge petroleum and certain petroleum products and accredited to test petroleum and certain petroleum products for customs purposes, in accordance with the provisions of 19 CFR 151.12 and 19 CFR 151.13.

Camin Cargo Control, Inc. (Thorofare, NJ) is approved for the following gauging procedures for petroleum and certain petroleum products from the American Petroleum Institute (API):

API chapter	Title
3	Tank Gauging.
7	Temperature Determination.
8	Sampling.
11	Physical Properties Data.
12	Calculation of Petroleum Quantities.
17	Marine Measurement.

Camin Cargo Control, Inc. (Thorofare, NJ), is accredited for the following laboratory analysis procedures and methods for petroleum and certain petroleum products set forth by the U.S. Customs and Border Protection Laboratory Methods (CBPL) and American Society for Testing and Materials (ASTM):

CBPL No.	ASTM	Title
27–01	D287	Standard Test Method for API Gravity of Crude Petroleum and Petroleum Products (Hydrometer Method).
27–03	D4006	Standard Test Method for Water in Crude Oil by Distillation.
27–04	D95	Standard Test Method for Water in Petroleum Products and Bituminous Materials by Distillation.
27–05	D4928	Standard Test Method for Water in Crude Oils by Coulometric Karl Fischer Titration.
27–06	D473	Standard Test Method for Sediment in Crude Oils and Fuel Oils by the Extraction Method.
27–08	D86	Standard Test Method for Distillation of Petroleum Products at Atmospheric Pressure.
27–13	D4294	Standard Test Method for Sulfur in Petroleum and Petroleum Products by Energy-Dispersive X-ray Fluorescence Spectrometry.
27–46	D5002	Standard Test Method for Density, Relative Density, and API Gravity of Crude Oils by Digital Density Analyzer.
27–48	D4052	Standard Test Method for Density, Relative Density, and API Gravity of Liquids by Digital Density Meter.
27–58	D5191	Standard Test Method for Vapor Pressure of Petroleum Products and Liquid Fuels (Mini Method).
N/A	D130	Standard Test Method for Corrosiveness to Copper from Petroleum Products by Copper Strip Test.
N/A	D2699	Standard Test Method for Research Octane Number of Spark-Ignition Engine Fuel.
N/A	D2700	Standard Test Method for Motor Octane Number of Spark-Ignition Engine Fuel.
N/A	D3606	Standard Test Method for Determination of Benzene and Toluene in Spark Ignition Fuels by Gas Chromatography.
N/A	D5453	Standard Test Method for Determination of Total Sulfur in Light Hydrocarbons, Spark Ignition Engine Fuel, Diesel Engine Fuel, and Engine Oil by Ultraviolet Fluorescence.
N/A	D5769	Standard Test Method for Determination of Benzene, Toluene, and Total Aromatics in Finished Gasolines by Gas Chromatography/Mass Spectrometry.

Anyone wishing to employ this entity to conduct laboratory analyses and gauger services should request and receive written assurances from the entity that it is accredited or approved by the U.S. Customs and Border Protection to conduct the specific test or gauger service requested. Alternatively, inquiries regarding the specific test or gauger service this entity is accredited or approved to perform may be directed to the U.S. Customs and Border Protection by calling (281) 560–2900. The inquiry may also be sent to *CBPGaugersLabs@cbp.dhs.gov.* Please reference the website listed below for a complete listing of CBP approved gaugers and accredited laboratories. *http://www.cbp.gov/about/labs-scientific/commercial-gaugers-and-laboratories.*

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Accreditation and Approval of Camin Cargo Control, Inc. (East Providence, RI) as a Commercial Gauger and Laboratory

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of accreditation and approval of Camin Cargo Control, Inc. (East Providence, RI), as a commercial gauger and laboratory.

SUMMARY: Notice is hereby given, pursuant to CBP regulations, that Camin Cargo Control, Inc. (East Providence, RI), has been approved to gauge petroleum and certain petroleum products and accredited to test petroleum and certain petroleum products for customs purposes for the next three years as of August 19, 2025.

DATES: Camin Cargo Control, Inc. (East Providence, RI) was approved and accredited as a commercial gauger and laboratory as of August 19, 2025. The next triennial inspection date will be scheduled for August 2028.

FOR FURTHER INFORMATION CONTACT: Robert P. Munivez, Laboratories and Scientific Services, U.S. Customs and Border Protection, 4150 Interwood South Parkway, Houston, TX 77032, tel. 281–560–2900.

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to 19 CFR 151.12 and 19 CFR 151.13, that Camin Cargo Control, Inc., 66 Commercial Way, East Providence, RI 02914, has been approved to gauge petroleum and certain petroleum products and accredited to test petroleum and certain petroleum products for customs purposes, in accordance with the provisions of 19 CFR 151.12 and 19 CFR 151.13.

Camin Cargo Control, Inc. (East Providence, RI) is approved for the following gauging procedures for petroleum and certain petroleum products from the American Petroleum Institute (API):

API chapter	Title
3	Tank Gauging.
7	Temperature Determination.
8	Sampling.
12	Calculation of Petroleum Quantities.
17	Marine Measurement.

Camin Cargo Control, Inc. (East Providence, RI), is accredited for the following laboratory analysis procedures and methods for petroleum and certain petroleum products set forth by the U.S. Customs and Border Protection Laboratory Methods (CBPL) and American Society for Testing and Materials (ASTM):

CBPL No.	ASTM	Title
27–08	D86	Standard Test Method for Distillation of Petroleum Products at Atmospheric Pressure.
27–11	D445	Standard Test Method for Kinematic Viscosity of Transparent and Opaque Liquids (and Calculation of Dynamic Viscosity).
27–14	D2622	Standard Test Method for Sulfur in Petroleum Products by Wavelength Dispersive X-Ray Fluorescence Spectrometry.
27–48	D4052	Standard Test Method for Density, Relative Density, and API Gravity of Liquids by Digital Density Meter.

CBPL No.	ASTM	Title
27–53	D2709	Standard Test Method for Water and Sediment in Middle Distillate Fuels by Centrifuge.
27–54	D1796	Standard Test Method for Water and Sediment in Fuel Oils by the Centrifuge Method (Laboratory Procedure).
27–57	D7039	Standard Test Method for Sulfur in Gasoline and Diesel Fuel by Monochromatic Wavelength Dispersive X-Ray Fluorescence Spectrometry.
27–58	D5191	Standard Test Method for Vapor Pressure of Petroleum Products and Liquid Fuels (Mini Method).

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Notice of Issuance of Final Determination Concerning Philips North America LLC Ultrasound System 5100 POC Series

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of final determination.

SUMMARY: This document provides notice that U.S. Customs and Border Protection (CBP) has issued a final determination concerning the country of origin of the Philips North America LLC Ultrasound System 5100 POC Series. Based upon the facts presented, CBP has concluded that the last substantial transformation of the Philips North America LLC Ultrasound System 5100 POC Series occurs in the United States.

DATES: The final determination was issued on July 10, 2026. A copy of the final determination is attached. Any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of this final determination no later than August 17, 2026.

FOR FURTHER INFORMATION CONTACT: Reema Bogin, Valuation and Special Programs Branch, Regulations and Rulings, Office of Trade, at (202) 325–7703.

SUPPLEMENTARY INFORMATION: Notice is hereby given that on July 10, 2026, CBP issued a final determination concerning the country of origin of the Philips North America LLC Ultrasound System 5100 POC Series for purposes of Title III of the Trade Agreements Act of 1979. This final determination, Headquarters Ruling Letter (HQ) H346632, was issued at the request of Philips North America LLC. under procedures set forth at 19 CFR part 177, subpart B, which implements Title III of the Trade Agreements Act of 1979, as amended (19 U.S.C. 2511–18). In the final determination, CBP has concluded that the last substantial transformation of the Philips North America LLC Ultrasound System 5100 POC Series occurs in the United States.

Section 177.29, CBP Regulations (19 CFR 177.29), provides that a notice of final determination shall be published in the **Federal Register** within 60 days of the date the final determination is issued. Section 177.30, CBP Regulations (19 CFR 177.30), provides that any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of a final determination within 30 days of publication of such determination in the **Federal Register**.

Alice A. Kipel,

Executive Director, Regulations and Rulings, Office of Trade.

CATEGORY: Origin
Kevin J. Maynard, Wiley Rein LLP, 2050 M St NW, Washington, DC 20036
RE: U.S. Government Procurement; Title III, Trade Agreements Act of 1979 (19 U.S.C. 2511); Subpart B, Part 177, CBP Regulations; Philips North America LLC; Country of Origin of Ultrasound System 5100 POC Series; Substantial Transformation

Dear Mr. Maynard:

This is in response to your request, dated April 3, 2025, on behalf of your client, Philips North America LLC (''Philips''), for a final determination concerning the country of origin of its Ultrasound System 5100 POC Series (''Philips Ultrasound System''), pursuant to Title III of the Trade Agreements Act of 1979 (''TAA''), as amended (19 U.S.C. 2511 *et seq.*), and subpart B of Part 177, U.S. Customs and Border Protection (''CBP'') Regulations (19 CFR 177.21 *et seq.*). Philips is a party-at-interest within the meaning of 19 CFR 177.22(d)(1) and § 177.23(a) and is therefore entitled to request this final determination.

FACTS

The merchandise at issue is the Philips Ultrasound System, which is used to perform diagnostic ultrasound imaging by transmitting and processing sound waves to create a visual representation of a patient's internal organs and tissues. It consists of a number of components and major subassemblies from various countries, including the United States, all of which are assembled together and programmed with proprietary system software at Philips' facility in Bothell, Washington.

You state that each Philips Ultrasound System consists of more than 200 individual subcomponent parts (including screws and fasteners) that are from a variety of different countries. You further explain that according to the costed bill of materials submitted with your request, approximately 53% to 56% of the material cost of the Philips Ultrasound System are costs of subcomponents that are manufactured in the United States or a TAA-designated country, including critical components such as the display monitor and the control panel.[1] The

[1] This exhibit consists of an Excel spreadsheet with separate tabs for the costed bill of materials for

Continued

remaining 44% to 47% of the material cost of the Philips Ultrasound System represents subcomponents from non-TAA-designated countries. Non-material costs, such as assembly, are discussed below.

You state that the Philips Ultrasound System can be grouped together into the following major subassemblies: (1) an E-box, which generates electrical signals that are transmitted to the transducer to generate soundwaves for generating patient images, and then receives signals back from the transducer that are turned into diagnostic images using Philips' proprietary software; (2) a cart subassembly, which provides the physical structure that houses all of the hardware, power supply, and electronics that comprise the finished system, allows medical professionals to transport and position the system for use, and organizes and stores cables and other accessories; (3) a transducer, which receives signals from the E-box and generates a high-pressured wave (*i.e.,* soundwave) that is propagated toward the patient tissue medium (*e.g.,* organ, bone) to produce a diagnostic image, and also receives echoed soundwaves that are reflected from the tissue medium while transmitting that information back to the E-box for processing into an image; (4) a display monitor, which receives signals from the E-box and displays the images for user interpretation; (5) a control panel, which allows the user to turn the system on and off, as well as a touch pad and knobs for more tactile response for viewing and modifying the imaging parameters during clinical exams; and (6) proprietary system software, which controls and unifies all of the discrete functions of the finished system, including generating and processing ultrasound waves and converting into diagnostic images.

You explain that the assembly of the Philips Ultrasound System occurs in two phases. In the first phase, which takes places in Mexico, a third-party manufacturer assembles various subcomponents together to produce the E-box and cart subassemblies. In the second phase, which takes place in the United States, the E-box and cart subassemblies are assembled with the transducer and control panel (both of which are assembled in the United States) and the display monitor (sourced from a TAA country) into the finished product, which is programmed with Philips' proprietary software.

the ''Standard'' and ''Pro'' transducer configurations of the subject Philips Ultrasound System.

Assembly Process in Mexico

E-Box and Cart Subassemblies

As stated above, a third-party manufacturer in Mexico assembles and integrates the E-box and cart subassemblies. During the first step, which takes approximately 35 minutes to complete, more than 146 individual components, including the PC module, printed circuit board assemblies (''PCBAs''), and various hardware components, are assembled together to produce the E-box. During the second step, which also takes approximately 35 minutes to complete, 35 different hardware components, including screws, clamps, and brackets, are assembled together to produce the cart subassembly. During the third step, which also takes approximately 35 minutes to complete, the E-box and cart are assembled and wired together. Once this is completed, a test version of Philips' proprietary software, which was compiled into object code in the United States, is loaded onto the subassemblies. This test version of the software is only valid for a set duration to allow for testing, after which it will no longer launch to the ultrasound application. The hard drives are re-formatted during the next phase.

You state that in total, the assembly operations in Mexico involve approximately 200 components and will take approximately 450 minutes to complete, consisting of 105 minutes of assembly, 100 minutes for loading the test version software, 110 minutes for testing, and 135 minutes for material handling and packaging. You further state that the E-box and cart subassemblies, which have been assembled and wired together, are unable to function as an ultrasound system prior to the final assembly and programming operations that will be performed in the United States.

Assembly Process in the United States

Transducer Subassembly

Assembly operations in the United States are performed at two separate Philips facilities in Reedsville, Pennsylvania, and Bothell, Washington. At the Pennsylvania facility, the transducer subassembly is assembled from various components, including a sensor from a non-TAA-designated country and a cable assembly from the United States. This is followed by various testing operations on each transducer subassembly. In total, the transducer assembly and testing operations performed at the Pennsylvania facility take approximately 90 minutes to complete (approximately 20 minutes of assembly plus approximately 70 minutes of testing).[2] You provided our office with a confidential and proprietary list of assembly steps that occur in the United States.

Final Assembly

The next stage of assembly operations in the United States moves to Philips' facility in Washington. Assembly operations here include final assembly, integration, and testing of the finished Philips Ultrasound System. Here, the E-box and cart are assembled together with the transducer, the display monitor (sourced from a TAA-designated country), the control panel (sourced from a third-party manufacturer in the United States), and other minor components and accessories (*e.g.,* storage bins, gel and cable holder, probe holder, and printer subassemblies) to produce the finished ultrasound system. As part of the final assembly operations, a final, updated version of the system software, which was developed in both the United States and a non-TAA-designated country and compiled into object code in the United States, is programmed onto the E-box. In total, the assembly operations performed at the Washington facility involve 26 components and take approximately 320 minutes to complete (approximately 40 minutes of assembly, 100 minutes of programming time, 140 minutes for testing, and 40 minutes for order configuration, such as picking accessories).

In combination, the two stages of the assembly process at Philips' facilities in the United States involve approximately 32 components and take approximately 410 minutes to complete (60 minutes of assembly, 100 minutes of programming the system with software, 210 minutes for testing, and 40 minutes for order configuration). You state that only after these final assembly and programming operations have been completed in the United States is the Philips Ultrasound System able to function as an ultrasound system.

Upon request from our office, you also provided color exploded-view diagrams of each subcomponent and manufacturing process flow charts for the production of the E-box, cart subassembly, and final assembly operations. In response to additional inquiry from our office, you also

[2] You state that there are two configurations of the Philips Ultrasound System. One configuration uses a ''Standard'' transducer, while the other configuration uses a ''Pro'' transducer. You confirm that the transducer subassembly used in both of these configurations is assembled and tested in the United States as part of the final assembly process.

provided an updated costed bill of materials for the Philips Ultrasound System and for the transducer subassembly.

Issue

What is the country of origin of the Philips Ultrasound System for purposes of U.S. Government procurement?

Law and Analysis

CBP issues country of origin advisory rulings and final determinations as to whether an article is or would be a product of a designated country or instrumentality for the purpose of granting waivers of certain ''Buy American'' restrictions in U.S. law or practice for products offered for sale to the U.S. Government, pursuant to subpart B of Part 177, 19 CFR 177.21 *et seq.,* which implements Title III, Trade Agreements Act of 1979, as amended (19 U.S.C. 2511–2518).

CBP's authority to issue advisory rulings and final determinations stems from 19 U.S.C. 2515(b)(1), which states:

> For the purposes of this subchapter, the Secretary of the Treasury shall provide for the prompt issuance of advisory rulings and final determinations on whether, under section 2518(4)(B) of this title, an article is or would be a product of a foreign country or instrumentality designated pursuant to section 2511(b) of this title.

Emphasis added.

The Secretary of the Treasury's authority mentioned above, along with other customs revenue functions, are delegated to the Secretary of Homeland Security via Treasury Department Order (TO) 100–20 ''Delegation of Customs revenue functions to Homeland Security,'' dated October 30, 2024, and are subject to further delegations to CBP (*see also* 19 CFR part 177, subpart B).

The rule of origin set forth in 19 U.S.C. 2518(4)(B) states:

> An article is a product of a country or instrumentality only if (i) it is wholly the growth, product, or manufacture of that country or instrumentality, or (ii) in the case of an article which consists in whole or in part of materials from another country or instrumentality, it has been substantially transformed into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed.

See also 19 CFR 177.22(a).

In rendering advisory rulings and final determinations for purposes of U.S. Government procurement, CBP applies the provisions of subpart B of Part 177 consistent with the Federal Acquisition Regulation (''FAR''). *See* 19 CFR 177.21. In this regard, CBP recognizes that the FAR restricts the U.S. Government's purchase of products to U.S.-made or designated country end products for acquisitions subject to the TAA. *See* 48 CFR 25.403(c)(1).

The FAR, 48 CFR 25.003, defines ''U.S.-made end product'' as:

> . . . an article that is mined, produced, or manufactured in the United States or that is substantially transformed in the United States into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was transformed.

The FAR, 48 CFR 25.003, defines ''designated country end product'' as:

> . . . a WTO GPA [World Trade Organization Government Procurement Agreement] country end product, an FTA [Free Trade Agreement] country end product, a least developed country end product, or a Caribbean Basin country end product.

Once again, we note that the Philips Ultrasound Systems are assembled in Mexico and the United States, with components sourced from both TAA-designated countries, as well as non-TAA-designated countries. Mexico is a TAA-designated country.

In order to determine whether a substantial transformation occurs when components of various origins are assembled into completed products, CBP considers the totality of the circumstances and makes such determinations on a case-by-case basis. The country of origin of the item's components, extent of the processing that occurs within a country, and whether such processing renders a product with a new name, character, and use are primary considerations in such cases. Additionally, factors such as the resources expended on product design and development, the extent and nature of post-assembly inspection and testing procedures, and worker skill required during the actual manufacturing process will be considered when determining whether a substantial transformation has occurred. No one factor is determinative.

In *Data General* v. *United States,* 4 C.I.T. 182 (1982), the court determined that the programming of a foreign PROM (''Programmable Read-Only Memory'' chip) in the United States substantially transformed the PROM into a U.S. article. In the United States, the programming bestowed upon each integrated circuit its electronic function, that is, its ''memory,'' which could be retrieved. The court concluded that the programming altered the character of the PROM and that altering the non-functioning circuitry comprising the PROM through technological expertise in order to produce a functioning read only memory device, possessing a desired distinctive circuit pattern, was no less a ''substantial transformation'' than the manual interconnection of transistors, resistors and diodes upon a circuit board creating a similar pattern. The programming established the ''essence'' of the PROM, its pattern of interconnections, or stored memory.

In Headquarters Ruling Letter (''HQ'') H219597, dated April 3, 2013, two ultrasound systems, identified as the S2000 and Antares ultrasound systems, were engineered, designed and subject to final assembly in the United States from U.S. and foreign components. CBP noted that substantial manufacturing operations were performed in China, the United States, Korea, and Italy. The electronics module, which was partially assembled in China, was imported into the United States, where it was assembled with other core components, including Korean-origin transducers that sent and received acoustic signals, an Italian-origin monitor that displayed images, and a U.S.-origin control panel that served as the user interface. The completely assembled ultrasound systems were then uploaded with U.S. designed, developed, and written operating system software and application software. The information provided indicated that the software was necessary for the ultrasound systems to perform their intended function of providing diagnostic information (an observable image with related data). It took approximately 23–24 hours to produce the finished S2000 ultrasound system of which 13–14 hours took place in the United States. Approximately 24–25 hours of time were expended to produce the finished Antares ultrasound system of which 14–15 hours took place in the United States. In addition, the assembly, integration, and testing in the United States were conducted by specialized technicians. All of the research and development, product engineering, and design investment occurred in the United States. Based on the totality of the circumstances, CBP found that the last substantial transformation occurred in the United States, the location where the final assembly and installation of the operating system software and application software occurred. Prior to the assembly and programming in the United States, the products were unable to carry out the functions of the ultrasound systems. However, the assembly and programming in the United States created a new product that was capable of providing diagnostic information. Consequently, CBP found that the country of origin of the ultrasound systems was the United States.

HQ H203555, dated April 23, 2012, concerned the country of origin of certain oscilloscopes. CBP considered five manufacturing scenarios. In the various scenarios, the motherboard and the power controller of either Malaysian or Singaporean origin were assembled in Singapore with subassemblies of Singaporean origin into oscilloscopes. CBP found that under the various scenarios, there were three countries under consideration where programming and/or assembly operations took place, the last of which was Singapore. CBP noted that no one country's operations dominated the manufacturing operations of the oscilloscopes. As a result, while the boards assembled in Malaysia were important to the function of the oscilloscopes, and the U.S. firmware and software were used to program the oscilloscopes in Singapore, the final programming and assembly of the oscilloscopes was in Singapore; hence, Singapore imparted the last substantial transformation, and the country of origin of the oscilloscopes was Singapore.

In the instant matter, the ultrasound system is comprised of various components and subassemblies from several countries, including the United States, Mexico, and other TAA-designated and non-TAA-designated countries. For example, the E-box and cart subassemblies are assembled in Mexico. The display monitor is sourced from a TAA-designated country while the control panel is manufactured in the United States. Also in the United States, the components of the transducer subassembly are assembled together in a relatively minor operation. While the essential function of the transducer subassembly is imparted by the sensor sourced from a non-TAA-designated country, the transducer subassembly is further integrated and assembled together in the United States with various subassemblies sourced either from TAA-designated countries or manufactured in the United States, including the E-box and cart subassemblies, the display monitor, control panel, and other components and accessories to produce the ultrasound system in the United States. The completely assembled ultrasound systems are then programmed with a final, updated version of the proprietary system software in the United States. As previously noted, the processing in Mexico takes approximately 450 minutes while the processing in the United States takes approximately 410 minutes. We further note that along with a combined 860 minutes of processing that occurs in the United States or Mexico (a TAA-designated country), approximately 53% to 56% of the material cost of the subject merchandise are costs of subcomponents that are manufactured in the United States or a TAA-designated country. You state that prior to the final assembly, programming, and testing operations performed in the United States, none of the subassemblies is able to carry out the functions of an ultrasound system. Thus, the subject ultrasound system is capable of producing diagnostic images only after these subassemblies are assembled together and programmed with software in the United States.

As in HQ H219597, the loading of the proprietary software in the United States, which was partially developed in the United States where the object code was also compiled, is necessary to ''translate'' the signals from the transducer into images to be displayed on the monitor. In addition, both in HQ H219597 and in the instant manufacturing scenario, the core subassemblies are manufactured or sourced from various countries but are unable to carry out the functions of an ultrasound system until they are assembled together and programmed in the United States. Unlike in HQ H219597, a greater and more equivalent amount of manufacturing operations occurs across two countries, the United States and Mexico, compared to manufacturing operations occurring in non-TAA-designated countries. Nevertheless, the ultrasound system is not functional until final assembly and programming in the United States that occurs after manufacturing operations in Mexico are complete. Therefore, based on the totality of the circumstances, we find that the last substantial transformation occurs in the United States, the location where the final assembly and proprietary software programming occur. Prior to these operations in the United States, the products are unable to carry out the functions of ultrasound systems. Thus, the assembly and programming in the United States create a new product that is capable of providing diagnostic information. Consequently, we find that the last substantial transformation occurs in the United States, and therefore, the Philips Ultrasound System is not a product of a foreign country or instrumentality designated pursuant to 25 U.S.C. 2511(b). As to whether the Philips Ultrasound System produced in the United States qualifies as a ''U.S.-made end product,'' you may wish to consult the relevant government procuring agency and review *Acetris Health, LLC* v. *United States,* 949 F.3d 719 (Fed. Cir. 2020).

Holding

Based on the facts and analysis set forth above, the country of origin of the Philips Ultrasound System will be considered the United States for purposes of U.S. Government procurement.

Notice of this final determination will be given in the **Federal Register**, as required by 19 CFR 177.29. Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 CFR 177.31, that CBP reexamine the matter anew and issue a new final determination. Pursuant to 19 CFR 177.30, any party-at-interest may, within 30 days of publication of the **Federal Register** Notice referenced above, seek judicial review of this final determination before the U.S. Court of International Trade.

Sincerely,

Alice A. Kipel,

Executive Director, Regulations and Rulings, Office of Trade.

[FR Doc. 2026–14310 Filed 7–15–26; 8:45 am]

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0012]

Agency Information Collection Activities; Revision of a Currently Approved Collection: Petition for Alien Relative

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) invites the general public and other Federal agencies to comment upon this proposed revision of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until September 14, 2026.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0012 in the body of the letter, the agency name and Docket ID USCIS–2007–0037. Submit comments via the Federal eRulemaking Portal website at *https://www.regulations.gov* under e-Docket ID number USCIS–2007–0037.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, John R Pfirrmann-Powell, Acting Deputy Chief, telephone number (240) 721–3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: *https://www.regulations.gov* and entering USCIS–2007–0037 in the search box. Comments must be submitted in English, or an English translation must be provided. All submissions will be posted, without change, to the Federal eRulemaking Portal at *https://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *https://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Petition for Alien Relative.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–130; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary* Individuals or households. Form I–130 allows U.S. citizens, U.S. nationals (who are not U.S. citizens), or lawful permanent residents of the United States to petition on behalf of certain alien relatives (beneficiaries) who wish to immigrate to the United States. Form I–130A is for the beneficiary of Form I–130 to certify certain information contained on Form I–130.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–130 is 472,753 and the estimated hour burden per response is 2.3 hours; the estimated total number of respondents for the information collection I–130A is 438,179 and the estimated hour burden per response is 0.4 hours; the estimated total number of respondents for the information collection I–130 E-filing is 472,753 and the estimated hour burden per response is 1.6 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 2,019,008 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $378,202,400.

Dated: July 13, 2026.

John R. Pfirrmann-Powell,

Acting Deputy Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

[FR Doc. 2026–14384 Filed 7–15–26; 8:45 am]

BILLING CODE 9111–97–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R7–NWRS–2026–1156; FXRS12630700000–267–FF07R08000; OMB Control Number 1018–0141]

Agency Information Collection Activities; Alaska Big Game Guide Use Survey

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the U.S. Fish and Wildlife Service (Service), are proposing to renew an information collection with revisions.

DATES: Comments will be accepted on or before September 14, 2026. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. Eastern Time on the closing date. To ensure your comment is received and considered, you must submit it using one of the methods identified in the **ADDRESSES** section of this document. Comments submitted through any method not authorized in this document, or sent to an address not listed here, will not be considered.

ADDRESSES:

Comment submission: All submissions must include the docket number [FWS–R7–NWRS–2026–1156] for this document. You must submit comments using one of the following methods:

- *Electronic submission:* Federal eRulemaking Portal at: *https://www.regulations.gov.* In the Search box, enter FWS–R7–NWRS–2026–1156, which is the docket number for this action. Then click the Search button. On the resulting page, you may submit a comment by clicking on ''Comment.'' Please ensure that you have found the correct document before submitting your comments.
- *U.S. mail:* Service Information Collection Clearance Officer, Attn: Docket No. FWS–R7–NWRS–2026–

1156, U.S. Fish and Wildlife Service, MS: PRB (JAO/3W), 5275 Leesburg Pike, Falls Church, VA 22041–3803.

Comments submitted through any method not authorized in this document, or sent to an address not listed here, will not be considered. We will not accept comments via email, fax, or hand delivery. We are not required to consider comments that are submitted after the comment period ends or that are submitted via a method outside of these instructions. Comments containing profanity, vulgarity, threats, or other inappropriate content will not be considered. We will post all comments at *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Madonna Baucum, Service Information Collection Clearance Officer, by email at *Info_Coll@fws.gov,* or by telephone at (703) 358–2503. Individuals who are hearing or speech impaired may call the Federal Relay Service at 1–800–877–8339 for TTY assistance. You may also view the information collection request (ICR) at *http://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again soliciting comments from the public and other Federal agencies on the proposed information collection request (ICR) described below. We are especially interested in public comments addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment—including your PII—may be made publicly available at any time. While you can ask us in your comment to withhold your PII from public review, we cannot guarantee that we will be able to do so.

Abstract: The National Wildlife Refuge Administration Act of 1966, as amended (16 U.S.C. 668dd–ee), authorizes the Service to permit uses—including commercial visitor services—on national wildlife refuges when such activities are determined to be compatible with the purposes for which each refuge was established. To support the provision of high-quality visitor services for wildlife-dependent recreation across the National Wildlife Refuge System, the Service issues permits for commercial guide services, including big game hunting, sport fishing, wildlife viewing, river trips, and other guided activities.

The Service uses Form 3–2538, ''Alaska Guide Service Evaluation,'' to collect information necessary to evaluate commercial guide services operating on national wildlife refuges in Alaska. This information assists refuge managers in assessing service quality, monitoring compliance with permit conditions, and ensuring that commercial activities align with refuge purposes and visitor experience objectives. Information gathered via Form 3–2538 allows the Service to:

- Monitor the quality of services provided by commercial guides.
- Gauge client satisfaction with the services.
- Assess the impacts of the activity on refuge resources.

We collect the following information from participants in the Alaska guide program via Form 3–2538:

- Details regarding the guided trip—name of the person(s) or outfitters guiding the trip and top three purposes for visiting the refuge.
- Experiences with guided trip.
- Level of satisfaction with guided trip and details regarding purpose of visit to refuge.
- Suggestions for improvements.
- Details about visitor—gender; State and/or country of residence; year of birth; race or ethnicity; details regarding formal schooling; and approximate household income.
- Contact information for follow-up questions (optional).

We collect this information to better understand visitor satisfaction and to effectively adapt visitor services programming in the Alaska Region. Form 3–2538 provides refuges with a quantitative, standardized tool that reflects social science survey design best practices and can be used consistently across the region. Individual refuge programs use the collected information to establish baseline conditions for guide-supported visitor experiences and to adjust management over time to ensure they continue to provide the desired opportunities on Alaska's refuges.

Proposed Revisions

With this submission, we will propose the following changes to this information collection:

1. Change the title of the collection from ''Alaska Guide Service Evaluation'' to ''Alaska Big Game Guide Use Survey.''

2. Remove the following questions from Form 3–2538:

a. Question 3: What was the name of the outfitter(s) for your guided trip? Outfitter name(s).

b. Question 4: What was the name(s) of the person(s) who guided you? Guide Name(s).

c. Removal of all questions in Section 5—A little about you.

3. Add a field at the end of Section 3 for respondents to explain their responses (optional).

4. Renumber Section 6 to be Section 5.

5. Add a point-of-contact at the end of the new Section 6 for respondents to contact any questions or concerns they would like to share or discuss.

6. Correct minor grammatical and formatting errors.

The public may request a copy of updated draft Form 3–2538 contained in this information collection by sending a request to the Service Information Collection Clearance Officer (see **ADDRESSES**).

Title of Collection: Alaska Big Game Guide Use Survey.

OMB Control Number: 1018–0141.

Form Number: Form 3–2538.

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: Clients of permitted commercial guide service providers.

Total Estimated Number of Annual Respondents: 300.

Total Estimated Number of Annual Responses: 300.

Estimated Completion Time per Response: 20 minutes.

Total Estimated Number of Annual Burden Hours: 100.

Respondent's Obligation: Voluntary.

Frequency of Collection: One time, following use of commercial guide services.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Madonna Baucum,

Information Collection Clearance Officer, U.S. Fish and Wildlife Service.

[FR Doc. 2026–14256 Filed 7–15–26; 8:45 am]

BILLING CODE 4333–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[A2407–014–004–065516, #O2509–014–004–125222; 267.LLHQ220000.L10200000.PK0000]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Grazing Management: Range Improvement Agreements and Permits Materials

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Bureau of Land Management (BLM) is requesting to extend an approved information collection.

DATES: Interested persons are invited to submit comments on or before August 17, 2026.

ADDRESSES: Written comments and recommendations for this information collection request (ICR) should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Jessica Phillips by email at *jmphillips@blm.gov,* or by telephone at (406) 490–5654. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at *http://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the PRA and 5 CFR 1320.8(d)(1), we invite the public and other Federal agencies to comment on new, proposed, revised and continuing collections of information. This helps the BLM assess impacts of its information collection requirements and minimize the public's reporting burden. It also helps the public understand BLM information collection requirements and ensure requested data is provided in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on March 19, 2026 (91 FR 13324). No comments were received in response to that notice.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again inviting the public and other Federal agencies to comment on the proposed ICR described below. The BLM is especially interested in public comments addressing the following:

(1) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used.

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency could minimize the burden of the information collection on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personally identifiable information in your comment, you should be aware that your entire comment—including your personally identifiable information—may be made publicly available at any time. While you can ask us in your comment to withhold your personally identifiable information from public review, we cannot guarantee that we will be able to do so.

Abstract: OMB Control Number 1004–0019 covers the information collections concerning range improvements to improve livestock grazing management, improve watershed conditions, enhance wildlife habitat on BLM lands, or serve similar purposes. Under 43 CFR 4120.3–1(b), the BLM requires that an operator enter into a Cooperative Range Improvement Agreement, or obtain a Range Improvement Permit, before installing, using, maintaining, and/or modifying a range improvement. The BLM uses Form 4120–6, Cooperative Range Improvement Agreement, to document cooperative range improvement construction arrangements with grazing operators. This OMB control number is currently scheduled to expire on August 31, 2026. The BLM request that OMB renew this OMB control number for an additional three (3) years.

Title of Collection: Grazing Management: Range Improvements Agreements and Permits (43 CFR Subpart 4120).

OMB Control Number: 1004–0019.

Form Numbers: 4120–6, Cooperative Range Improvement Agreement; and 4120–7, Range Improvement Permit.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Holders of BLM grazing permits or grazing leases.

Total Estimated Number of Annual Respondents: 530.

Total Estimated Number of Annual Responses: 530.

Estimated Completion Time per Response: Varies from 1 to 2 hours per response.

Total Estimated Number of Annual Burden Hours: 1,060.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion.

Total Estimated Annual Non-hour Burden Cost: $0.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Darrin King,

Information Collection Clearance Officer.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Alaska Native Vietnam-Era Veterans Allotments

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Information Collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Bureau of Land Management (BLM) proposes extending an information collection.

DATES: Interested persons are invited to submit comments on or before August 17, 2026.

ADDRESSES: Written comments and recommendations for this information collection request (ICR) should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request additional information about this Information Collection Request (ICR), contact Michael Everett, by email at *meverett@blm.gov,* or by telephone at (907) 271–3786. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. You may also view the ICR at *http://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the PRA (44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), we invite the public and other Federal agencies to comment on new, proposed, revised and continuing collections of information. This helps the BLM assess impacts of its information collection requirements and minimize the public's reporting burden. It also helps the public understand BLM information collection requirements and ensure requested data are provided in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on March 27, 2026 (91 FR 14866). No comments were received in response to that notice.

As part of our continuing effort to reduce paperwork and respondent burdens, we are again inviting the public and other Federal agencies to comment on the proposed ICR described below. The BLM is especially interested in public comments addressing the following:

(1) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used.

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How the agency could minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments submitted in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personally identifying information in your comment, you should be aware that your entire comment—including your personally identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personally identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: Under OMB Control Number 1004–0216 the BLM collects information related to Native veteran land allotment applications. The authority for this Program is section 1119 of the John D. Dingell, Jr. Conservation, Management, and Recreation Act of March 12, 2019, Public Law 116–9, codified at 43 U.S.C. 1629g–1. This OMB control number is currently scheduled to expire on July 31, 2026. The BLM request that OMB renew this OMB control number for an additional three (3) years.

Title of Collection: Alaska Native Vietnam-Era Veterans Allotments (43 CFR 2569).

OMB Control Number: 1004–0216.

Form Numbers: Alaska Native Vietnam-Era Veterans Allotments Application, AK 2569–10.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Individuals and State/Local/Tribal governments.

Total Estimated Number of Annual Respondents: 1,265.

Total Estimated Number of Annual Responses: 1,265.

Estimated Completion Time per Response: Varies from 4.5 hours to 30 minutes per response.

Respondent's Obligation: Required to obtain or retain a benefit.

Frequency of Collection: On occasion.

Total Estimated Number of Annual Hours: 3,828.

Total Estimated Annual Non-hour Burden Cost: $55,000.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Darrin King,

Information Collection Clearance Officer.

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–WASO–NRNHL–DTS#-43244;PPWOCRADI0, PCU00RP14.R50000]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting electronic comments on the significance of properties nominated before July 4, 2026, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted by July 31, 2026.

ADDRESSES: Comments are encouraged to be submitted electronically to *National_Register_Submissions@nps.gov* with the subject line ''Public Comment on <property or proposed district name, (County) State≤.'' If you have no access to email, you may send them via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C Street NW, MS 2013, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Sherry A. Frear, Chief, National Register of Historic Places/National Historic Landmarks Program, 1849 C Street NW, MS 2013, Washington, DC 20240, *sherry_frear@nps.gov,* 202–913–3763.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before July 4, 2026. Pursuant to 36 CFR 60.13, comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1510]

Certain Convertible Child Highchairs; Notice of Institution of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on June 12, 2026, under section 337 of the Tariff Act of 1930, as amended, on behalf of Kids2, LLC of Atlanta, Georgia. A letter supplementing the complaint was filed on June 30, 2026. The complaint, as supplemented, alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain convertible child highchairs by reason of the infringement of certain claims of U.S. Patent No. 9,101,225 (''the '225 patent''); U.S. Patent No. 9,883,749 (''the '749 patent''); U.S. Patent No. 10,278,513 (''the '513 patent''); U.S. Patent No. 10,835,053 (''the '053 patent''); and U.S. Patent No. 11,534,006 (''the '006 patent''). The complaint, as supplemented, further alleges that an industry in the United States exists as required by the applicable Federal Statute.

The complainant requests that the Commission institute an investigation and, after the investigation, issue a limited exclusion order and cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205–2000. General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.*

FOR FURTHER INFORMATION CONTACT: Susan Orndoff, The Office of the Secretary, Docket Services Division, U.S. International Trade Commission, telephone (202) 205–1802.

SUPPLEMENTARY INFORMATION:

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2025).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on July 14, 2026, *ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted

to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain products identified in paragraph (2) by reason of infringement of one or more of claims 6, 7, and 9–14 of the '225 patent; claims 3–8 of the '749 patent; claims 3–25 of the '513 patent; claims 3, 6, 7, 9–13, 17–20, and 22–34 of the '053 patent; and claims 3, 4, 6, 7, 10, 11, 13, 14, and 18–23 of the '006 patent, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) Pursuant to section 210.10(b)(1) of the Commission's Rules of Practice and Procedure, 19 CFR 210.10(b)(1), the plain language description of the accused products or category of accused products, which defines the scope of the investigation, is ''[c]onvertible children's highchairs with a second child seat that nests a first child seat in a highchair configuration and that is removable from the first child seat to be used independently as a booster seat when securely placed on another support surface such as a dining chair'';

(3) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) *The complainant is:* Kids2, LLC, 3333 Piedmont Rd., Suite 1800, Atlanta, Georgia 30305.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Graco Children's Products Inc., 5 Concourse Parkway, 8th Floor, Atlanta, Georgia 30328

Newell Brands Distribution LLC, 3419 Ritner Highway, Newville, PA, 17241

Newell Brands Inc., 5 Concourse Parkway, Atlanta, GA 30328

Newell Brands Canada ULC, 6 Manchester Court, Unit 1, Bolton, ON L7E 2J3 Canada

Baby Trend, Inc., 13048 Valley Boulevard, Fontana, California 92335

(4) For the investigation so instituted, the Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

The Office of Unfair Import Investigations will not participate as a party in this investigation.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(e) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.

Issued: July 14, 2026.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2026–14355 Filed 7–15–26; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation 731–TA–1740 (Final)]

Multifunctional Acrylate and Methacrylate Monomers and Oligomers From South Korea; Determination

On the basis of the record [1] developed in the subject investigation, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that an industry in the United States is materially injured by reason of imports of multifunctional acrylate and methacrylate monomers and oligomers (''MAMMOs'') from South Korea, provided for in subheadings 2916.12.50, 2916.14.20, 3824.99.29, 3907.29.00, and 3907.30.00 of the Harmonized Tariff Schedule of the United States, that have been found by the U.S. Department of Commerce (''Commerce'') to be sold in the United States at less than fair value (''LTFV'').[2] [3]

[1] The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] 91 FR 31415, May 27, 2026.

Background

The Commission instituted these investigations effective March 27, 2025, following receipt of petitions filed with the Commission and Commerce by Arkema, Inc., King of Prussia, Pennsylvania, alleging that an industry in the United States is materially injured and threatened with material injury by reason of subsidized imports of MAMMOs from Taiwan and LTFV imports of MAMMOs from South Korea and Taiwan. The Commission scheduled the final phase of the investigations following notification of preliminary determinations by Commerce that imports of MAMMOs from Taiwan were being sold at LTFV within the meaning of 733(b) of the Act (19 U.S.C. 1673b(b)) and subsidized within the meaning of section 703(b) of the Act (19 U.S.C. 1671b(b)). Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on September 5, 2025 (90 FR 42984).[4] All persons who requested the opportunity were permitted to participate.

The investigation schedules became staggered when Commerce did not align its antidumping duty investigation with respect to MAMMOs from South Korea with its antidumping and countervailing duty investigations with respect to MAMMOs from Taiwan and reached earlier final determinations on imports of MAMMOs from Taiwan. On March 4, 2026, the Commission issued final affirmative determinations in its antidumping and countervailing duty investigations of MAMMOs from Taiwan (91 FR 11337, March 9, 2026). Following notification of a final determination by Commerce that imports of MAMMOs from South Korea were being sold at LTFV within the meaning of section 735(a) of the Act (19 U.S.C. 1673d(a)), notice of the supplemental scheduling of the final phase of the Commission's antidumping duty investigation with respect to

[3] The Commission also finds that imports subject to Commerce's affirmative critical circumstances determination are not likely to undermine seriously the remedial effect of the antidumping duty order on South Korea.

[4] Due to the lapse in appropriations and ensuing cessation of Commission operations, the Commission tolled its schedule for this proceeding. The schedule was revised in subsequent notices published in the **Federal Register** on December 1, 2025 (90 FR 55175) and December 16, 2025 (90 FR 58307).

MAMMOs from South Korea was given by posting copies of the notices in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of June 5, 2026 (91 FR 34250).

The Commission made this determination pursuant to § 735(b) of the Act (19 U.S.C. 1673d(b)). It completed and filed its determination in this investigation on July 13, 2026. The views of the Commission are contained in USITC Publication 5761 (July 2026), entitled *Multifunctional Acrylate and Methacrylate Monomers and Oligomers from South Korea: Investigation 731–TA–1740 (Final).*

By order of the Commission.

Issued: July 13, 2026.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–646 and 731–TA–1502–1516 (Review)]

Prestressed Concrete Steel Wire Strand From Argentina, Colombia, Egypt, Indonesia, Italy, Malaysia, Netherlands, Saudi Arabia, South Africa, Spain, Taiwan, Tunisia, Turkey, Ukraine, and United Arab Emirates; Scheduling of Full Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of full reviews pursuant to the Tariff Act of 1930 to determine whether revocation of the countervailing duty order on prestressed concrete steel wire strand (''PC strand'') from Turkey and the revocation of the antidumping duty orders on PC strand from Argentina, Colombia, Egypt, Indonesia, Italy, Malaysia, Netherlands, Saudi Arabia, South Africa, Spain, Taiwan, Tunisia, Turkey, Ukraine, and United Arab Emirates would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time.

DATES: July 9, 2026.

FOR FURTHER INFORMATION CONTACT: Lawrence Jones (202–205–3358), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this review may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—On April 7, 2026, the Commission determined that responses to its notice of institution of the subject five-year review were such that a full review should proceed (91 FR 41660, July 7, 2026); accordingly, a full review is being scheduled pursuant to section 751(c)(5) of the Tariff Act of 1930 (19 U.S.C. 1675(c)(5)). A record of the Commissioners' votes, the Commission's statement on adequacy, and any individual Commissioner's statements are available from the Office of the Secretary and at the Commission's website.

Participation in the review and public service list.—Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in this review as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11 of the Commission's rules, by 45 days after publication of this notice. A party that filed a notice of appearance following publication of the Commission's notice of institution of the review need not file an additional notice of appearance. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the review.

For further information concerning the conduct of this review and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this review available to authorized applicants under the APO issued in the review, provided that the application is made by 45 days after publication of this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the review. A party granted access to BPI following publication of the Commission's notice of institution of the review need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.—The prehearing staff report in the review will be placed in the nonpublic record on October 28, 2026, and a public version will be issued thereafter, pursuant to section 207.64 of the Commission's rules.

Hearing.—The Commission will hold an in-person hearing in connection with the review beginning at 9:30 a.m. on Thursday, November 19, 2026. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before 5:15 p.m. on Tuesday, November 10, 2026. Any requests to appear as a witness via videoconference must be included with your request to appear. Requests to appear via videoconference must include a statement explaining why the witness cannot appear in person; the Chairman, or other person designated to conduct the review, may in their discretion for good cause shown, grant such a request. Requests to appear as remote witness due to illness or a positive COVID–19 test result may be submitted by 3 p.m. the business day prior to the hearing. Further information about participation in the hearing will be posted on the Commission's website at *https://www.usitc.gov/calendarpad/calendar.html.*

A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference, if deemed necessary, to be held at 9:30 a.m. on Friday, November 13, 2026. Parties shall file and serve written testimony and presentation slides in connection with their presentation at the hearing by no later than noon on November 18, 2026. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.24 of the Commission's rules. Parties must submit

any request to present a portion of their hearing testimony *in camera* no later than 7 business days prior to the date of the hearing.

Written submissions.—Each party to the review may submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of section 207.65 of the Commission's rules; the deadline for filing is 5:15 p.m. on November 6, 2026. Parties shall also file written testimony in connection with their presentation at the hearing, and posthearing briefs, which must conform with the provisions of section 207.67 of the Commission's rules. The deadline for filing posthearing briefs is 5:15 p.m. on December 1, 2026. In addition, any person who has not entered an appearance as a party to the review may submit a written statement of information pertinent to the subject of the review on or before 5:15 p.m. on December 1, 2026. On December 21, 2026, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before 5:15 p.m. on January 5, 2027, but such final comments must not contain new factual information and must otherwise comply with section 207.68 of the Commission's rules. All written submissions must conform with the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

Additional written submissions to the Commission, including requests pursuant to section 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the review must be served on all other parties to the review (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

The Commission has determined that these reviews are extraordinarily complicated and therefore has determined to exercise its authority to extend the review period by up to 90 days pursuant to 19 U.S.C.1675(c)(5)(B).

Authority: This review is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

By order of the Commission.

Issued: July 13, 2026.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731–TA–1782–1785 (Preliminary)]

Polytetramethylene Ether Glycol from China, South Korea, Taiwan, and Vietnam; Determinations

On the basis of the record [1] developed in the subject investigations, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of polytetramethylene ether glycol (''PTMEG'') from China, South Korea, Taiwan, and Vietnam, provided for in subheadings 3907.29.00 and 2932.11.00 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (''LTFV'').[2]

Commencement of Final Phase Investigation

Pursuant to section 207.18 of the Commission's rules, the Commission also gives notice of the commencement of the final phase of its investigations. The Commission will issue a final phase notice of scheduling, which will be published in the **Federal Register** as provided in section 207.21 of the Commission's rules, upon notice from the U.S. Department of Commerce (''Commerce'') of an affirmative preliminary determinations in the investigations under § 733(b) of the Act, or, if the preliminary determinations are negative, upon notice of an affirmative final determinations in those investigations under § 735(a) of the Act. Parties that filed entries of appearance in the preliminary phase of the investigations need not enter a separate appearance for the final phase of the investigations. Any other party may file an entry of appearance for the final phase of the investigations after publication of the final phase notice of scheduling. Industrial users, and, if the merchandise under investigation is sold at the retail level, representative consumer organizations have the right to appear as parties in Commission antidumping investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations. As provided in section 207.20 of the Commission's rules, the Director of the Office of Investigations will circulate draft questionnaires for the final phase of the investigations to parties to the investigations, placing copies on the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*), for comment.

Background

On April 8, 2026, BASF Corporation, Florham Park, New Jersey, filed petitions with the Commission and Commerce, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV imports of PTMEG from China, South Korea, Taiwan, and Vietnam. Accordingly, effective April 8, 2026, the Commission instituted antidumping duty investigation Nos. 731–TA–1782–1785 (Preliminary).

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of April 13, 2026 (91 FR 18879). The Commission conducted its conference on April 29, 2026. All persons who requested the opportunity were permitted to participate.

The Commission made these determinations pursuant to § 733(a) of the Act (19 U.S.C. 1673b(a)). It completed and filed its determinations in these investigations on May 26, 2026. The views of the Commission are contained in USITC Publication 5746 (June 2026), entitled *Polytetramethylene Ether Glycol from China, South Korea, Taiwan, and Vietnam: Investigation Nos. 731–TA–1782–1785 (Preliminary).*

By order of the Commission.

Issued: July 14, 2026.

DATES: July 10, 2026.

FOR FURTHER INFORMATION CONTACT: Caitlyn Costello (202–205–2058), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION: On March 6, 2026, the Commission established a schedule for the final phase of the subject antidumping and countervailing duty investigations (91 FR 16967, April 3, 2026). On May 29, 2025, counsel for Lysine Fair Trade Coalition and its individual members (collectively, ''Petitioners'') filed a request to appear at the hearing. No other parties submitted a request to appear at the hearing. On July 9, 2026, counsel for the Petitioners withdrew their request to appear at the hearing, filed a request that the Commission cancel the scheduled hearing for this proceeding and indicated a willingness to respond to any Commission questions in lieu of an actual hearing. The Commission considers Petitioners' letter to be a request under 19 CFR 201.12 to take action with respect to these investigations, and that cancellation is appropriate because a public hearing is not necessary to address the legal and factual issues these investigations present. Consequently, the Commission has cancelled the public hearing in connection with this proceeding, scheduled to begin at 9:30 a.m. on July 14, 2026. Parties to this proceeding should respond to any written questions posed by the Commission in their posthearing briefs, which are due to be filed on July 22, 2026.

For further information concerning this proceeding, see the Commission's notice cited above and the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

Authority: This proceeding is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.21 of the Commission's rules.

By order of the Commission.

Issued: July 13, 2026.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2026–14277 Filed 7–15–26; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–1741]

Importer of Controlled Substances Application: Catalent Greenville, Inc.

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Catalent Greenville, Inc. has applied to be registered as an importer of basic class(es) of controlled substance(s). Refer to **SUPPLEMENTARY INFORMATION** listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants, therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before August 17, 2026. Such persons may also file a written request for a hearing on the application on or before August 17, 2026.

ADDRESSES: The Drug Enforcement Administration requires that all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to *https://www.regulations.gov* and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on *https://www.regulations.gov.* If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment. All requests for a hearing must be sent to: (1) Drug Enforcement Administration, Attn: Hearing Clerk/OALJ, 8701 Morrissette Drive, Springfield, Virginia 22152; and (2) Drug Enforcement Administration, Attn: DEA Federal Register Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152. All requests for a hearing should also be sent to: Drug Enforcement Administration, Attn: Administrator, 8701 Morrissette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.34(a), this is notice that on June 4, 2026, Catalent Greenville, Inc., 1240 Sugg Parkway, Greenville, North Carolina 27834–9006, applied to be registered as an importer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
Lysergic acid diethylamide	7315	I
3,4-Methylenedioxymethamphetamine	7405	I
Psilocybin	7437	I

The company plans to import the listed controlled substances for dosage formulations development for research, clinical trial studies and analytical purposes. No other activities for these drug codes are authorized for this registration.

Approval of permit applications will occur only when the registrant's business activity is consistent with what is authorized under 21 U.S.C. 952(a)(2). Authorization will not extend to the import of Food and Drug Administration-approved or non-approved finished dosage forms for commercial sale.

Thomas Prevoznik,

Deputy Assistant Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–1739]

Bulk Manufacturer of Controlled Substances Application: AMPAC Fine Chemicals LLC

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: AMPAC Fine Chemicals LLC has applied to be registered as a bulk manufacturer of basic class(es) of controlled substance(s). Refer to **SUPPLEMENTARY INFORMATION** listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants, therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before September 14, 2026. Such persons may also file a written request for a hearing on the application on or before September 14, 2026.

ADDRESSES: The Drug Enforcement Administration requires that all comments be submitted electronically through the Federal eRulemaking Portal, which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to *https://www.regulations.gov* and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on *https://www.regulations.gov.* If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.33(a), this is notice that on May 7, 2026, AMPAC Fine Chemicals LLC, Highway 50 and Hazel Avenue, Rancho Cordova, California 95670, applied to be registered as a bulk manufacturer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
Norlevorphanol	9634	I
Amphetamine	1100	II
Lisdexamfetamine	1205	II
Methylphenidate	1724	II
Levomethorphan	9210	II
Levorphanol	9220	II
Thebaine	9333	II
Remifentanil	9739	II
Tapentadol	9780	II

The company plans to bulk manufacture the listed controlled substances for use as intermediates, impurity testing, and distribution to its customers. No other activities for these drug codes are authorized for this registration.

Thomas Prevoznik,

Deputy Assistant Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

[OMB Number 1122–0017]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Title—Semi-Annual Progress Report for the Technical Assistance Program

AGENCY: Office on Violence Against Women, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Office on Violence Against Women (OVW), Department of Justice (DOJ, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until August 17, 2026.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Tiffany Watson, Office on Violence Against Women, at 202–307–6026 or *Tiffany.Watson@usdoj.gov.*

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register** on May 14, 2026, allowing a 60-day comment period. Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

— Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
— Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
— Enhance the quality, utility, and clarity of the information to be collected; and/or
— Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 1122–0017. This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a currently approved collection.

2. *Title of the Form/Collection:* Semi-annual Progress Report for the Technical Assistance Program.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection:* Form Number: 1122–0017. U.S. Department of Justice, Office on Violence Against Women.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* The affected public includes the 53 programs providing technical assistance as recipients under the Technical Assistance Program.

The primary purpose of the OVW Technical Assistance Program is to provide assistance to grantees and their subgrantees to enhance the success of local projects they are implementing

with VAWA grant funds. In addition, OVW is focused on building the capacity of criminal justice and victim services organizations to respond effectively to sexual assault, domestic violence, dating violence, and stalking and to foster partnerships between organizations that have not traditionally worked together to address violence against women, such as faith-and community-based organizations.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply:* It is estimated that it will take the 53 respondents (Technical Assistance Providers) approximately one hour to complete a semi-annual progress report twice a year. The Semi-annual Progress Report for the Technical Assistance Program is divided into sections that pertain to the different types of activities in which Technical Assistance Providers are engaged.

6. *An estimate of the total public burden (in hours) associated with the collection:* The total annual hour burden to complete the semi-annual progress report form is 106 hours. It will take approximately one hour for the grantees to complete the form twice a year.

7. An estimate of the total annual cost burden associated with the collection, if applicable: The annualized costs to the Federal Government resulting from the OVW staff review of the progress reports submitted by grantees are estimated to be $6,144.89.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Enterprise Portfolio Management, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218 Washington, DC 20530.

Dated: July 14, 2026.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2026–14385 Filed 7–15–26; 8:45 am]

BILLING CODE 4410–FX–P

DEPARTMENT OF JUSTICE

[OMB Number 1122–0024]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Title—Semi-Annual Progress Report for Grantees From the Tribal Sexual Assault Services Program

AGENCY: Office on Violence Against Women, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Office on Violence Against Women (OVW), Department of Justice (DOJ), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until August 17, 2026.

FOR FURTHER INFORMATION CONTACT: If you have comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact: Tiffany Watson, Office on Violence Against Women, at 202–307–6026 or *Tiffany.Watson@usdoj.gov*.

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register** on May 14, 2026, allowing a 60-day comment period. Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so, how the quality, utility, and clarity of the information to be collected can be enhanced; and—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 1122–0024. This information collection request may be viewed at *www.reginfo.gov*. Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a Currently Approved Collection.

2. *Title of the Form/Collection:* Semi-Annual Progress Report for the Tribal Sexual Assault Services Program.

3. *Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection: Form Number:* 1122–0024. U.S. Department of Justice, Office on Violence Against Women.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* The affected public includes the approximately 17 grantees of the Tribal Sexual Assault Services Program. The Sexual Assault Services Program (SASP), created by the Violence Against Women Act of 2005 (VAWA 2005), is the first federal funding stream solely dedicated to the provision of direct intervention and related assistance for victims of sexual assault. The SASP encompasses four different funding streams for States and Territories, Tribes, State Sexual Assault Coalitions, Tribal Coalitions, and culturally specific organizations. Overall, the purpose of SASP is to provide intervention, advocacy, accompaniment, support services, and related assistance for adult, youth, and child victims of sexual assault, family and household members of victims, and those collaterally affected by the sexual assault.

The Tribal SASP supports efforts to help survivors heal from sexual assault trauma through direct intervention and related assistance including 24-hour sexual assault hotlines, crisis intervention, and medical and criminal justice accompaniment. The Tribal SASP will support such services through the establishment, maintenance, and expansion of programs and projects to assist those victimized by sexual assault.

5. *An estimate of the total number of respondents and the amount of time*

estimated for an average respondent to respond/reply: It is estimated that it will take the approximately 17 respondents (grantees from the Tribal Sexual Assault Services Program) approximately one hour to complete a semi-annual progress report. The semi-annual progress report is divided into sections that pertain to the different types of activities in which grantees may engage. A Tribal SASP grantee will only be required to complete the sections of the form that pertain to its own specific activities.

6. *An estimate of the total public burden (in hours) associated with the collection:* The total annual hour burden to complete the data collection forms is 34 hours, that is 17 grantees completing a form twice a year with an estimated completion time for the form being one hour.

7. *An estimate of the total annual cost burden associated with the collection, if applicable:* The annualized costs to the Federal Government resulting from the OVW staff review of the progress reports submitted by grantees are estimated to be $1,971.00.

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Enterprise Portfolio Management, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W–218 Washington, DC 20530.

Dated: July 14, 2026.

Agency Information Collection Activities; Proposed eCollection eComments Requested; Revision of a Previously Approved Collection; Title—Electronic Applications for the Attorney General's Honors Program and the Summer Law Intern Program (HP/SLIP)

AGENCY: Office of Adjudication, Recruitment, and Management, Justice Management Division, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Office of Adjudication, Recruitment and Management, Department of Justice (DOJ), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 30 days until August 17, 2026.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Deana Willis, Assistant Director, Office of Adjudication, Recruitment, and Management, c/o Deana Willis, 450 5th Street NW, Suite 10200, Washington, DC, 20530, 202–514–8900, *Deana.Willis@usdoj.gov.*

SUPPLEMENTARY INFORMATION: The proposed information collection was previously published in the **Federal Register** on May 15, 2026, allowing a 60-day comment period. Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/*PRAMain. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number [1105–0030]. This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Justice, information collections currently under review by OMB.

DOJ seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOJ notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Abstract: Candidates enter information pertinent to legal employment on a series of electronic screens (the number of screens varies by Program; hiring organizations vary by year). The data is then certified and submitted into a database for OARM review and transmission to the components that consider the candidates for legal employment. The candidate is automatically notified by email that his/her application has been received when he/she certifies and submits his/her electronic application, and provided other hiring status updates throughout the hiring cycle.

The Department of Justice developed an in-house electronic application managed by the Office of Chief Information Office (OCIO) Service Delivery Staff (SDS) Application Services Branch (ASB) to replace one previously managed by contract with an outside vendor. There is no impact on the public burden.

The questions presented to applicants are unchanged except for the following deletions:

- Questions relating to geographic preference;
- A checklist of practice area interests;
- Two ''check the box'' questions about undergraduate awards;
- A ''yes/no'' question presented only to SLIP-Pathways applicants asking whether the law school transcript listed failing grades;

The estimate of annualized cost to the federal government is $71,429.00.

Overview of This Information Collection

1. *Type of Information Collection:* Revision of a previously approved collection.

2. *The Title of the Form/Collection:* Electronic Applications for the Attorney General's Honors Program and the Summer Law Intern Program.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* N/A.

4. *Affected public who will be asked or required to respond, as well as the obligation to respond:* Affected Public-Individuals. The obligation to respond is voluntary.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 1900 candidates apply to the HP & SLIP annually. It is estimated that the electronic application takes approximately one hour to complete and submit. It is further estimated that it takes an average of an additional 45 minutes to review the instructions, search existing data sources, gather and maintain the data needed, and complete and review the information collected. In addition, approximately 600 HP applicants will complete a Virtual Interview Scheduling form. Each Interview Scheduling Form will take approximately 10 minutes to complete. Thus, the annual burden would be 3425 hours based on 1900 applicants (the average number of applications received in the last several years) x 1.75 response hours (estimated time to collect the appropriate information and complete the Program application) plus 100 hours (time for 600 HP candidates to complete the Virtual Interview Scheduling Form).

6. *An estimate of the total annual burden (in hours) associated with the collection:* The total annual burden hours for this collection is 3425 hours.

7. *An estimate of the total annual cost burden associated with the collection, if applicable:* $71,492.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency	Total annual responses	Time per response (minutes)	Total annual burden (hours)
Electronic application (individuals).	1900	1/annually	1900	105	3325
Virtual Interview Scheduling Form (Individuals).	600	1/annually	600	10	100
Unduplicated Totals.	2500	.....	2500	.....	3425

If additional information is required contact: Darwin Arceo, Department Clearance Officer, United States Department of Justice, Justice Management Division, Enterprise Portfolio Management, Two Constitution Square, 145 N Street NE, 4W–218, Washington, DC.

Dated: July 13, 2026.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

DATES: Written comments should be received on or before September 14, 2026 to be assured consideration.

ADDRESSES: Interested persons are invited to submit written comments on the information collection to Dacia Rogers, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314, Suite 6070; Fax No. (703) 519–8161; or email at *PRAComments@NCUA.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submission may be obtained by contacting Dacia Rogers at (703) 518–6547.

SUPPLEMENTARY INFORMATION:

OMB Number: 3133–0098.

Title: Advertising of Excess Insurance, 12 CFR 740.3.

Type of Review: Extension of a previously approved collection.

Abstract: Federally insured credit unions which offer or provide excess insurance coverage for their accounts must indicate the type and amount of such insurance, the name of the carrier and a statement that the carrier is not affiliated with the NCUSIF or the Federal government in all advertising that mentions account insurance.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 297.

OMB Number: 3133–0117.

Title: Designation of Low-Income Status, 12 CFR 701.34(a).

Type of Review: Extension of a previously approved collection.

Abstract: The Federal Credit Union Act (12 U.S.C. 1752(5)) authorizes the NCUA Board to define low-income members so that credit unions with a membership serving predominantly low-income members can benefit from certain statutory relief and receive assistance from the Community Development Revolving Loan Fund (CDRLF). Under the authority of 12 CFR 701.34(a), NCUA must obtain certain data to determine if a credit union qualifies for the designation. NCUA uses the information from credit unions to determine whether they meet the criteria for the low-income designation.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 356.

OMB Number: 3133–0134.

Title: Truth in Savings (TISA), 12 CFR part 707.

Type of Review: Extension of a previously approved collection.

Abstract: NCUA's TISA regulation requires credit unions to provide specific disclosures when an account is opened, when a disclosed term changes or a term account is close to renewal, on periodic statements of account activity, in advertisements, and upon a member's

or potential member's request. 12 CFR 707.4, 707.5, 707.6, 707.8. Credit unions that provide periodic statements are required to include information about fees imposed, the annual percentage yield earned during those statement periods, and other account terms. The requirements for creating and disseminating account disclosures, change in terms notices, term share renewal notices, statement disclosures, and advertising disclosures are necessary to implement TISA's purpose of providing the public with information that will permit informed comparisons of accounts at depository institutions.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 298,563.

OMB Number: 3133–0154.

Title: Prompt Corrective Action, 12 CFR 702 (Subparts A–D).

Type of Review: Extension of a previously approved collection.

Abstract: Section 216 of the Federal Credit Union Act (12 U.S.C. 1790d) mandates prompt corrective action requirements for federally insured credit unions (FICUs) that become less than well capitalized. The NCUA Board is required to (1) adopt, by regulation, a system of prompt corrective action to restore the net worth of inadequately capitalized FICUs; and (2) develop an alternative system of prompt corrective action for new credit unions that carries out the purpose of prompt corrective actions while allowing an FICU reasonable time to build its net worth to an adequately capitalized level. Part 702 implements the statutory requirements and, to achieve this, various information collections to meet the purpose of prompt corrective action as circumstances require.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 2,433.

OMB Number: 3133–0166.

Title: Home Mortgage Disclosure Act (HMDA), 12 CFR 1003 (Regulation C).

Type of Review: Extension of a previously approved collection.

Abstract: The collection of this data is required under the Home Mortgage Disclosure Act. The information collection is intended to provide the public with loan data that can be used—(i) to help determine whether financial institutions are serving the housing needs of their communities; Reg C 203.1(b)(1)(ii); (ii) to assist public officials in distributing public-sector investments so as to attract private investment to areas where it is needed; Reg CC 203.1(b)(1)(iii) and (iii) to assist in identifying possible discriminatory lending patterns and enforcing anti-discrimination statutes. Reg C 203.1(b)(2).

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 145,886.

OMB Number: 3133–0167.

Title: Foreign Branching, 12 CFR 741.11.

Type of Review: Extension of a previously approved collection.

Abstract: This collection covers the additional information a credit union must provide to establish a branch office outside the United States (except for U.S. embassies and military installations). This is a three step process (1) The credit union must receive written approval from the host country to establish a branch, (2) The credit union must develop a detailed business plan, and (3) The credit union must submit documentation showing host country approval, state regulatory approval (if applicable), and the business plan to NCUA and receive NCUA approval before establishing the branch office.

Affected Public: Private Sector: Not-for-profit institutions.

Estimated Total Annual Burden Hours: 33.

Request for Comments: Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will become a matter of public record. The public is invited to submit comments concerning: (a) whether the collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of the information on the respondents, including the use of automated collection techniques or other forms of information technology.

By the National Credit Union Administration Board.

Melane Conyers-Ausbrooks,

Secretary of the Board.

BILLING CODE 7535–01–P

NUCLEAR REGULATORY COMMISSION

[Project No. 99902077; NRC–2026–2641]

Eden Radioisotopes, LLC; Construction Permit Application

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice; receipt, acceptance for docketing, opportunity to request a hearing and petition for leave to intervene; order imposing procedures.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC, the Commission) is providing public notice of receipt and availability of, and has accepted for review and docketed, an application from Eden Radioisotopes, LLC (Eden) for a construction permit for a medical isotope production complex to be built near Eunice, Lea County, New Mexico. The construction permit application is dated May 5, 2026. This notice also provides the public an opportunity to request a hearing and petition for leave to intervene with respect to that application. The NRC staff will conduct safety and environmental reviews of the construction permit application. If the NRC issues a construction permit, the applicant, Eden, would be authorized to construct its proposed complex in accordance with the provisions of the construction permit. Because the application contains Sensitive Unclassified Non-Safeguards Information (SUNSI), this notice includes an order that imposes procedures to obtain access to SUNSI for contention preparation.

DATES: The application was docketed on June 15, 2026. A request for a hearing or petition for leave to intervene must be filed by September 14, 2026. Any potential party as defined in section 2.4 of title 10 of the *Code of Federal Regulations* (10 CFR) who believes access to SUNSI is necessary to respond to this notice must request document access by July 27, 2026.

ADDRESSES: Please refer to Docket ID NRC–2026–2641 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2026–2641. Address questions about Docket IDs in *Regulations.gov* to Bridget Curran; telephone: 301–415–1003; email: *Bridget.Curran@nrc.gov.* For technical questions, contact the individual(s) listed in the ''For Further Information Contact'' section of this document.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin ADAMS Public Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.

• *NRC's PDR:* The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Andrew Miller, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–1080; email: *Andrew.Miller@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Discussion

By letter dated May 5, 2026, Eden filed, pursuant to Section 104c. of the Atomic Energy Act of 1954, as amended, and 10 CFR part 50, ''Domestic Licensing of Production and Utilization Facilities,'' an application for a construction permit for a medical isotope production complex consisting of a non-power, open-pool reactor facility, a separation processing hot cell facility, a target fabrication facility, and a waste packaging, handling, and storage facility. This complex would be located near Eunice, Lea County, New Mexico. The reactor facility would use light water as the moderator and coolant and individual annular low-enriched uranium fueled targets.

The publicly available version of the construction permit application is available in ADAMS under Package Accession No. ML26125A060. Along with other documents, the ADAMS package includes the transmittal letter (ADAMS Accession No. ML26125A061), the preliminary safety analysis report and environmental report (ADAMS Accession No. ML26125A141), and the quality assurance program description (ADAMS Accession No. ML26125A071). The information submitted by Eden includes certain general information such as financial qualifications submitted pursuant to 10 CFR 50.33, ''Contents of applications; general information,'' certain technical information submitted pursuant to 10 CFR 50.34, ''Contents of applications; technical information,'' and an environmental report submitted pursuant to 10 CFR part 51, ''Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions.''

The NRC staff determined that the construction permit application is complete and acceptable for docketing in accordance with 10 CFR 2.101(a) and 10 CFR part 50 and assigned it Docket No. 99902077. The NRC staff provided Eden notice of the acceptance and docketing determination by letter dated June 15, 2026 (ADAMS Accession No. ML26146A213).

The NRC staff will perform a detailed technical review of the construction permit application and document its safety findings in a safety evaluation report. Also, in accordance with 10 CFR part 51, ''Environmental Protection Regulations for Domestic Licensing and Related Regulatory Functions,'' the NRC staff will complete an environmental review of the application.

Docketing of the construction permit application does not preclude the NRC staff from requesting additional information from the applicant as the review proceeds, nor does it predict whether the Commission will grant or deny the application. If the Commission finds that the construction permit application meets the applicable standards of the Atomic Energy Act of 1954, as amended, and the Commission's regulations, and that any required notifications to other agencies and bodies have been made, the Commission will issue a construction permit, in the form and containing conditions and limitations that the Commission finds appropriate and necessary.

II. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person (petitioner) whose interest may be affected by this action may file a request for a hearing and petition for leave to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult 10 CFR 2.309. If a petition is filed, the presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

Petitions must be filed no later than 60 days from the date of publication of this notice in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document. Petitions and motions for leave to file new or amended contentions that are filed after the 60-day deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii).

A State, local government body, Federally recognized Indian Tribe, or designated agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h) no later than 60 days from the date of publication of this notice. Alternatively, a State, local government body, Federally recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

For information about filing a petition and about participation by a person not a party under 10 CFR 2.315, see ADAMS Accession No. ML20340A053 (*https://adamswebsearch2.nrc.gov/webSearch2/main.jsp?AccessionNumber=ML20340A053*) and on the NRC's public website (*https://www.nrc.gov/about-nrc/regulatory/adjudicatory/hearing.html#participate*).

III. Electronic Submittals (E-Filing)

All documents filed in NRC adjudicatory proceedings, including documents filed by an interested State, local government body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as further discussed, is granted. Detailed guidance on electronic submissions is located in the ''Guidance for Electronic Submissions to the NRC'' (ADAMS Accession No. ML13031A056) and on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals.html*).

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *Hearing.Docket@nrc.gov,* or by telephone at 301–415–1677, to: (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access

the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals/getting-started.html*). After a digital ID certificate is obtained and a docket created, the participant must submit adjudicatory documents in Portable Document Format. Guidance on submissions is available on the NRC's public website (*https://www.nrc.gov/site-help/electronic-sub-ref-mat.html*). A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. ET on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed to obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website (*https://www.nrc.gov/site-help/e-submittals.html*), by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., ET, Monday through Friday, excluding government holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is publicly available at *https://ehd.nrc.gov/home,* unless excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information such as social security numbers, home addresses, or personal phone numbers in their filings unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

IV. Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information for Contention Preparation

A. This Order contains instructions regarding how potential parties to this proceeding may request access to documents containing Sensitive Unclassified Non-Safeguards Information (SUNSI).

B. Within 10 days after publication of this notice of hearing and opportunity to petition for leave to intervene, any potential party who believes access to SUNSI is necessary to respond to this notice may request access to SUNSI. A ''potential party'' is any person who intends to participate as a party by demonstrating standing and filing an admissible contention under 10 CFR 2.309. Requests for access to SUNSI submitted later than 10 days after publication of this notice will not be considered absent a showing of good cause for the late filing, addressing why the request could not have been filed earlier.

C. The requestor shall submit a letter requesting permission to access SUNSI to the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, and provide a copy to the Deputy General Counsel for Licensing, Hearings, and Enforcement, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. The expedited delivery or courier mail address for both offices is: U.S. Nuclear Regulatory Commission, 11555 Rockville Pike, Rockville, Maryland 20852. The email addresses for the Office of the Secretary and the Office of the General Counsel are *Hearing.Docket@nrc.gov* and *RidsOgcMailCenter.Resource@nrc.gov,*[1] respectively. The request must include the following information:

(1) A description of the licensing action with a citation to this **Federal Register** notice;

(2) The name and address of the potential party and a description of the potential party's particularized interest that could be harmed by the action identified in C.(1); and

(3) The identity of the individual or entity requesting access to SUNSI and the requestor's basis for the need for the information in order to meaningfully participate in this adjudicatory proceeding. In particular, the request must explain why publicly available versions of the information requested would not be sufficient to provide the basis and specificity for a proffered contention.

D. Based on an evaluation of the information submitted under paragraph C, the NRC staff will determine within 10 days of receipt of the request whether:

(1) There is a reasonable basis to believe the petitioner is likely to establish standing to participate in this NRC proceeding; and

(2) The requestor has established a legitimate need for access to SUNSI.

E. If the NRC staff determines that the requestor satisfies both D.(1) and D.(2), the NRC staff will notify the requestor in writing that access to SUNSI has been granted. The written notification will contain instructions on how the requestor may obtain copies of the requested documents, and any other conditions that may apply to access to

[1] While a request for hearing or petition to intervene in this proceeding must comply with the filing requirements of the NRC's ''E-Filing Rule,'' the initial request to access SUNSI under these procedures should be submitted as described in this paragraph.

those documents. These conditions may include, but are not limited to, the signing of a Non-Disclosure Agreement or Affidavit, or Protective Order,[2] setting forth terms and conditions to prevent the unauthorized or inadvertent disclosure of SUNSI by each individual who will be granted access to SUNSI.

F. Filing of Contentions. Any contentions in these proceedings that are based upon the information received as a result of the request made for SUNSI must be filed by the requestor no later than 25 days after receipt of (or access to) that information. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of hearing or opportunity for hearing), the petitioner may file its SUNSI contentions by that later deadline.

G. Review of Denials of Access.

(1) If the request for access to SUNSI is denied by the NRC staff after a determination on standing and requisite need, the NRC staff shall immediately notify the requestor in writing, briefly stating the reason or reasons for the denial.

(2) The requestor may challenge the NRC staff's adverse determination by filing a challenge within 5 days of receipt of that determination with: (a) the presiding officer designated in this proceeding; (b) if no presiding officer has been appointed, the Chief Administrative Judge, or if this individual is unavailable, another administrative judge, or an Administrative Law Judge with jurisdiction pursuant to 10 CFR 2.318(a); or (c) if another officer has been designated to rule on information access issues, with that officer.

(3) Further appeals of decisions under this paragraph must be made pursuant to 10 CFR 2.311.

H. Review of Grants of Access. A party other than the requestor may challenge a NRC staff determination granting access to SUNSI whose release would harm that party's interest independent of the proceeding. Such a challenge must be filed within 5 days of the notification by the NRC staff of its grant of access and must be filed with: (a) the presiding officer designated in this proceeding; (b) if no presiding officer has been appointed, the Chief Administrative Judge, or if he or she is unavailable, another administrative judge, or an Administrative Law Judge with jurisdiction pursuant to 10 CFR 2.318(a) if another officer has been designated to rule on information access issues, with that officer.

If challenges to the NRC staff determinations are filed, these procedures give way to the normal process for litigating disputes concerning access to information. The availability of interlocutory review by the Commission of orders ruling on such NRC staff determinations (whether granting or denying access) is governed by 10 CFR 2.311.[3]

I. The Commission expects that the NRC staff and presiding officers (and any other reviewing officers) will consider and resolve requests for access to SUNSI, and motions for protective orders, in a timely fashion in order to minimize any unnecessary delays in identifying those petitioners who have standing and who have propounded contentions meeting the specificity and basis requirements in 10 CFR part 2. The attachment to this Order summarizes the general target schedule for processing and resolving requests under these procedures.

It is so ordered.

Authority: 42 U.S.C. 2011 *et seq.*

Dated: July 14, 2026.

For the Nuclear Regulatory Commission.

Jody Martin,

Secretary of the Commission.

Attachment 1—General Target Schedule for Processing and Resolving Requests for Access to Sensitive Unclassified Non-Safeguards Information in This Proceeding

Day	Event/activity
0	Publication of **Federal Register** notice of hearing or opportunity for hearing, including order with instructions for access requests.
10	Deadline for submitting requests for access to Sensitive Unclassified Non-Safeguards Information (SUNSI) which contains information: (i) supporting the standing of a potential party identified by name and address; and (ii) describing the need for the information in order for the potential party to participate meaningfully in an adjudicatory proceeding.
60	Deadline for submitting petition for intervention which contains: (i) demonstration of standing; and (ii) all contentions whose formulation does not require access to SUNSI (+25 Answers to petition for intervention; +7 petitioner/requestor reply).
20	U.S. Nuclear Regulatory Commission (NRC) staff informs the requestor of the staff's determination whether the request for access provides a reasonable basis to believe standing can be established and demonstrates the need for SUNSI. (NRC staff also informs any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information.) If NRC staff makes the finding of need for SUNSI and likelihood of standing, NRC staff begins document processing (*i.e.,* preparation of redactions or review of redacted documents).
25	If NRC staff finds no ''need'' or no likelihood of standing, the deadline for petitioner/requestor to file a motion seeking a ruling to reverse the NRC staff's denial of access; NRC staff files copy of access determination with the presiding officer (or Chief Administrative Judge or other designated officer, as appropriate). If NRC staff finds ''need'' for SUNSI, the deadline for any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information to file a motion seeking a ruling to reverse the NRC staff's grant of access.
30	Deadline for NRC staff's reply to motions to reverse NRC staff determination(s).
40	(Receipt +30) If NRC staff finds standing and need for SUNSI, deadline for NRC staff to complete information processing and file motion for Protective Order and draft Non-Disclosure Agreement or Affidavit. Deadline for applicant/licensee to file Non-Disclosure Agreement or Affidavit for SUNSI.
A	If access is granted: issuance of presiding officer or other designated officer decision on motion for protective order for access to SUNSI (including schedule for providing access and submission of contentions) or decision reversing a final adverse determination by the NRC staff.
A + 3	Deadline for filing executed Non-Disclosure Agreements or Affidavits. Access provided to SUNSI consistent with decision issuing the Protective Order.

[2] Any motion for Protective Order or draft Non-Disclosure Affidavit or Agreement for SUNSI must be filed with the presiding officer or the Chief Administrative Judge if the presiding officer has not yet been designated, within 30 days of the deadline for the receipt of the written access request.

[3] Requestors should note that the filing requirements of the NRC's E-Filing Rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562; August 3, 2012) apply to appeals of NRC staff determinations (because they must be served on a presiding officer or the Commission, as applicable), but not to the initial SUNSI request submitted to the NRC staff under these procedures.

Day	Event/activity
A + 28	Deadline for submission of contentions whose development depends upon access to SUNSI. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of hearing or notice of opportunity for hearing), the petitioner may file its SUNSI contentions by that later deadline.
A + 53	(Contention receipt +25) Answers to contentions whose development depends upon access to SUNSI.
A + 60	(Answer receipt +7) Petitioner/Intervenor reply to answers.
>A + 60	Decision on contention admission.

POSTAL REGULATORY COMMISSION

[Docket Nos. K2026–125; MC2026–299 and K2026–296; MC2026–302 and K2026–298; MC2026–303 and K2026–299; MC2026–304 and K2026–300]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* July 21, 2026.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *https://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. Public Proceeding(s)
III. Summary Proceeding(s)

I. Introduction

Pursuant to 39 CFR 3041.405, the Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to Competitive negotiated service agreement(s). The request(s) may propose the addition of a negotiated service agreement from the Competitive product list or the modification of an existing product currently appearing on the Competitive product list.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

Section II identifies the docket number(s) associated with each Postal Service request, if any, that will be reviewed in a public proceeding as defined by 39 CFR 3010.101(p), the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each such request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 and 39 CFR 3000.114 (Public Representative). The Public Representative does not represent any individual person, entity or particular point of view, and, when Commission attorneys are appointed, no attorney-client relationship is established. Section II also establishes comment deadline(s) pertaining to each such request.

The Commission invites comments on whether the Postal Service's request(s) identified in Section II, if any, are consistent with the policies of title 39. Applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3041. Comment deadline(s) for each such request, if any, appear in Section II.

Section III identifies the docket number(s) associated with each Postal Service request, if any, to add a standardized distinct product to the Competitive product list or to amend a standardized distinct product, the title of each such request, the request's acceptance date, and the authority cited by the Postal Service for each request. Standardized distinct products are negotiated service agreements that are variations of one or more Competitive products, and for which financial models, minimum rates, and classification criteria have undergone advance Commission review. *See* 39 CFR 3041.110(n); 39 CFR 3041.205(a). Such requests are reviewed in summary proceedings pursuant to 39 CFR 3041.325(c)(2) and 39 CFR 3041.505(f)(1). Pursuant to 39 CFR 3041.405(c)–(d), the Commission does not appoint a Public Representative or request public comment in proceedings to review such requests.

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

II. Public Proceeding(s)

1. *Docket No(s).:* K2026–125; *Filing Title:* USPS Request Concerning Amendment One to Priority Mail & USPS Ground Advantage Contract 935, with Material Filed Under Seal; *Filing Acceptance Date:* July13, 2026; *Filing Authority:* 39 CFR. 3035.105 and 39 CFR 3041.505; *Public Representative:* Kenneth Moeller; *Comments Due:* July 21, 2026.

2. *Docket No(s).:* MC2026–299 and K2026–296; *Filing Title:* USPS Request to Add Priority Mail Express International, Priority Mail International & First-Class Package International Service Contract 117 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* July 3, 2026; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3035.105, and 39 CFR 3041.310; *Public Representative:* Maxine Bradley; *Comments Due:* July 21, 2026.

III. Summary Proceeding(s)

1. *Docket No(s).:* MC2026–292 and K2026–289; *Filing Title:* USPS Request to Add New Fulfillment Standardized Distinct Product, PM–GA Contract 1029, and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* July 2, 2026; *Filing Authority:* 39 U.S.C. 3642 and 3633, 39 CFR 3035.105, and 39 CFR 3041.325.

2. *Docket No(s).:* MC2026–294 and K2026–291; *Filing Title:* USPS Request to Add New Mid-Market Standardized Distinct Product, PM–GA Contract 1030, and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* July 2, 2026; *Filing Authority:* 39 U.S.C. 3642 and 3633, 39 CFR 3035.105, and 39 CFR 3041.325.

3. *Docket No(s).:* MC2026–295 and K2026–292; *Filing Title:* USPS Request to Add New Fulfillment Standardized Distinct Product, PM–GA Contract 1031,

and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* July 2, 2026; *Filing Authority:* 39 U.S.C. 3642 and 3633, 39 CFR 3035.105, and 39 CFR 3041.325.

This Notice will be published in the **Federal Register**.

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105885; File No. SR–FINRA–2026–014]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend FINRA Rule 1210 (Registration Requirements)

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 29, 2026, the Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by FINRA. FINRA has designated the proposed rule change as constituting a ''non-controversial'' rule change under paragraph (f)(6) of Rule 19b–4 under the Act,[3] which renders the proposal effective upon receipt of this filing by the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to amend FINRA Rule 1210 (Registration Requirements) to reduce the waiting periods for retaking FINRA qualification examinations.

The text of the proposed rule change is available on FINRA's website at *http://www.finra.org* and at the principal office of FINRA.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 17 CFR 240.19b–4(f)(6).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

FINRA Rule 1210 requires each person engaged in the investment banking or securities business of a member to be registered with FINRA as a representative or principal in each category of registration appropriate to his or her functions and responsibilities as specified in FINRA Rule 1220 (Registration Categories), unless exempt from registration pursuant to FINRA Rule 1230 (Associated Persons Exempt from Registration). Under FINRA Rule 1210.03 (Qualification Examinations and Waivers of Examinations), before a person can be registered with FINRA he or she must pass the appropriate qualification examinations or obtain a waiver of the qualification examination requirement.

If a person fails a FINRA qualification examination, FINRA Rule 1210.06 (Waiting Periods for Retaking a Failed Examination) sets forth the time the person must wait before he or she can retake that qualification examination. For the first and second failed attempts, the person must wait 30 calendar days to retake the qualification examination. A person who fails a qualification examination three or more times within a two-year period must wait 180 calendar days before he or she can retake that examination.[4] These waiting periods apply to all FINRA qualification examinations, including the Securities Industry Essentials (''SIE'') qualification examination.[5]

[4] For the 180-day waiting period calculation, failed qualification examination attempts from more than two years ago are not included in determining the total number of times an individual has failed the qualification examination.

[5] The waiting period applies to the specific qualification examination that the person fails. For example, if a person fails the SIE examination, he or she would not be required to wait 30 days to take the Series 7 (General Securities Representative) qualification examination.

The current qualification examination waiting periods were implemented in 1989 because extensive automation of the registration and qualification process had made it possible for applicants to make multiple attempts to pass qualification examinations in rapid succession, often within very brief periods.[6] The waiting periods were adopted to address three main purposes. The first was to encourage candidates who did not pass the qualification examination to study and learn more about the job functions of the registration category rather than just focusing on the recently seen test questions. The second was to protect the integrity of the qualification examinations. Allowing an individual to retest multiple times in a short period of time increases the risk that test content could be compromised because the individual may share questions with others. The third purpose was to give FINRA time to investigate and address potential breaches of the FINRA Qualification Examination Rules of Conduct (''Rules of Conduct'').[7]

Since the implementation of the current retake waiting periods, the FINRA qualification program has undergone changes that have shifted the principal risks discussed above that originally informed the rule. Today's high-volume FINRA qualification examinations use extensive question banks that contain thousands of questions, with each test taker receiving only a small subset of questions per attempt. This approach reduces both the likelihood that repeat test takers will depend on memorized questions from prior attempts and the risk of content being disseminated to others. Additionally, FINRA employs data forensics and advanced technology to identify misconduct and compromised examination content, taking appropriate corrective action when such incidents occur. Moreover, these enhanced detection capabilities help to ensure that the shortened waiting periods would not compromise FINRA's ability to conduct timely investigations into possible cheating or other violations of the Rules of Conduct.

Over the past several years, FINRA has received input from various industry channels about the burden that the current qualification examination waiting periods place on individuals seeking to enter the securities industry. Similar feedback regarding these

[6] *See* Securities Exchange Act Release No. 26909 (June 8, 1989), 54 FR 25652 (June 16, 1989) (Order Approving File No. SR–NASD–89–14).

[7] The Rules of Conduct are available at *https://www.finra.org/registration-exams-ce/qualification-exams/exam-day/finra-rules-conduct.*

challenges was received by FINRA in response to its request for comment on modernizing FINRA rules, guidance, and processes for the organization and operation of member workplaces.[8] Given this consistent input and FINRA's current efforts to modernize its requirements to make sure that they remain relevant and effective, FINRA is proposing to shorten the required qualification examination retake waiting periods to 15 days after the first and second failed attempts, and 60 days after the third and all subsequent failed attempts that occur within a two-year period. FINRA believes that as a result of the changes to the qualification program that have occurred since the implementation of the current retake waiting periods, shortening the waiting periods in this manner would lessen the burden on individuals who are trying to register to begin their employment in the securities industry while also continuing to protect investors by maintaining appropriate program integrity.

The proposed rule change would apply only to FINRA qualification examinations (including the SIE qualification examination) and would not impact the waiting periods for other qualification examinations that FINRA administers on behalf of the Municipal Securities Rulemaking Board (''MSRB''), the National Futures Association (''NFA'') or the North American Securities Administrators Association (''NASAA'').[9] To reduce confusion regarding which waiting periods apply to which qualification examinations and in the interest of harmonizing the waiting periods across all qualification examinations should the proposal become effective, FINRA has engaged in discussions with the MSRB, the NFA and NASAA to communicate its intention to change the waiting periods.[10] If an agreement cannot be reached to harmonize the waiting periods for all qualification examinations, FINRA would work with other SROs and NASAA to address the operational implications of the proposal to mitigate any potential confusion for the securities industry.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[11] which requires, among other things, that FINRA rules be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

FINRA believes that the proposed rule change would lessen the burden on individuals who are trying to register to begin their employment in the securities industry in a manner that would continue to protect investors and the public interest. Specifically, as discussed above, the proposed rule change would allow FINRA to maintain the appropriate integrity of its qualification examinations. In this regard, changes to FINRA's qualifications program have reduced the risk that repeat test takers will depend on memorized questions from prior attempts and the risk of content being disseminated to others. In addition, under the proposed waiting periods, FINRA would continue to have sufficient time to conduct timely investigations into possible cheating or other misconduct.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change modifies FINRA qualification examination waiting periods in recognition of changes to the FINRA qualification program, consistent with the purposes of the waiting periods as described above.

Economic Impact Assessment

FINRA has undertaken an economic impact assessment, as set forth below, to analyze the economic baseline for the proposed amendment and its potentially significant economic impacts, including anticipated costs and benefits, relative to the baseline, and the alternatives considered in assessing how best to meet FINRA's regulatory objectives.

Regulatory Need

In light of changes to the FINRA qualification program, shorter examination retake waiting periods may offer a better balance between the benefits of promoting learning and facilitating examination security and the costs to individuals seeking registration and the firms that employ or would employ them.

Economic Baseline

The economic baseline includes the current qualification examination retake waiting period structure, the limitations on individual job functions and responsibilities during waiting periods, and the associated costs to individuals and firms. The economic baseline also includes incentives to learn, risks to qualification examination integrity and risks of qualification examination material harvesting as these risks relate to waiting periods.

We analyzed data from candidates with first attempts in 2024 for FINRA's three most popular qualification examinations: the SIE, the Series 7, and the Series 24 (General Securities Principal). Over 70 percent of individuals pass these qualification examinations on the first attempt. Retake rates vary across these qualification examinations: 65 percent of individuals who fail the SIE take the qualification examination a second time, compared to 85 percent for the Series 7 and 78 percent for the Series 24.

Economic Impacts

Under the proposed retake waiting period structure of 15–15–60 days, the cumulative mandatory waiting period until the fourth attempt for candidates who fail three consecutive attempts will fall by 150 days, to 90 days. Only some individuals, however, would make use of the opportunity under the proposed structure to proceed more quickly. For the SIE, 23 percent of individuals currently make a second attempt as quickly as possible (within 30 to 34 days). For the Series 7 and the Series 24, the figures are, respectively, 21 percent and 14 percent. These individuals may want to proceed even more quickly. However, 40 percent of individuals who take the SIE a second time currently wait over 60 days to do so. The figures for the Series 7 and the Series 24 are 32 percent and 52 percent, respectively.

[8] *See Regulatory Notice 25–07* (April 2025). All commenters addressing this topic recommended either reducing or removing the qualification examination retake waiting periods. Those who commented on the 30-day waiting periods proposed shortening them to 15 days. *See, e.g.,* letter from Roseann Viscardi, President, Association of Registration Management, Inc., to Jennifer Piorko Mitchell, Office of the Corporate Secretary, FINRA, dated July 14, 2025 (''ARM''). Concerning the 180-day waiting period, commenters proposed reducing it to either 30 or 60 days. *See, e.g.,* ARM; letter from Bernard V. Canepa, Managing Director and Associate General Counsel, and Alyssa Pompei, Vice President and Assistant General Counsel, Securities Industry and Financial Markets Association, to Jennifer Piorko Mitchell, Office of the Corporate Secretary, FINRA, dated July 14, 2025.

[9] More information on the qualification examinations that FINRA administers on behalf of the MSRB, the NFA and NASAA is available on FINRA's website at *https://www.finra.org/registration-exams-ce/qualification-exams.*

[10] FINRA also has communicated its intention to change the qualification waiting periods to other self-regulatory organizations (''SROs'') because some SROs would need to engage in rulemaking to harmonize their rules with the proposed changes as they have codified their qualification examination waiting periods under their respective rules.

[11] 15 U.S.C. 78o–3(b)(6).

Whether shortened waiting periods would affect pass rates is uncertain.

For high-volume examinations, FINRA does not expect this change would reduce the incentive to learn the material that will be tested on a qualification examination. Given large examination banks, the likelihood of seeing the same question again on an attempt is likely not much greater under the proposed rule change than currently under the baseline. For many lower-volume examinations, candidates are generally employed and looking to advance and are incentivized to study and pass.

Anticipated Benefits

Under the proposed rule change, individuals who retake and pass FINRA qualification examinations more quickly may be better positioned to advance in their careers more quickly. Members benefit from being able to give advanced job functions and responsibilities more quickly to individuals who under the baseline would retake and ultimately pass FINRA examinations. Members also benefit from being able to more quickly terminate individuals who would retake and not ultimately pass FINRA examinations. Accordingly, members spend less in salary and other expenses on individuals who do not meet their workforce needs and more on individuals who do meet such needs.[12]

Anticipated Costs

Reducing waiting periods might lead some candidates to attempt to retake a qualification examination quickly without making necessary adjustments, potentially resulting in additional failures and extending overall time to qualification. Where members can influence retake timing, they will need to determine if there are risks of additional failure and turnover from less time between retakes of qualification examinations and whether those risks are offset by other benefits.

Any reduction in waiting periods may have a nominal cost related to FINRA's ability to respond to test security concerns in a timely manner and the associated potential risks to investors and members. FINRA believes this risk is mitigated by changes to the FINRA qualification program discussed above.

Alternatives Considered

Other changes to the qualification examination waiting times were considered, including 15–30–90 days. FINRA believes that a retake waiting period structure of 15–15–60 days provides an appropriate balance between potential benefits to individuals and members and potential costs and risks described above.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[13] and Rule 19b–4(f)(6) thereunder.[14]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–FINRA–2026–014 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–FINRA–2026–014. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of FINRA. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–FINRA–2026–014 and should be submitted on or before August 6, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2026–14262 Filed 7–15–26; 8:45 am]

BILLING CODE 8011–01–P

[12] The assessment of the anticipated benefits of the proposed rule change assumes that the waiting periods for all qualification examinations are the same. The full potential benefits of the proposal may not be realized otherwise.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105887; File No. SR–PEARL–2026–33]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Exchange's Options Regulatory Fee (ORF)

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, MIAX PEARL, LLC (''MIAX Pearl'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Pearl Options Exchange Fee Schedule (''Fee Schedule'') regarding the Options Regulatory Fee (''ORF'').

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/pearl-options/rule-filings,* and at the Exchange's principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange previously filed to amend its ORF assessment and collection methodology,[3] with the rate to be set closer to the implementation date of the amended ORF collection methodology. At this time, the Exchange proposes to set the ORF rate effective July 1, 2026 to $0.0240 per contract side. Additionally, the Exchange proposes to amend the rule text that describes the ORF collection methodology to provide greater clarity to the ORF collection methodology.

July 1, 2026 ORF

As of July 1, 2026, the Exchange will assess ORF for options transactions that clear in the ''customer'' range at The Options Clearing Corporation (''OCC''), however ORF will be assessed to each Members [4] for executions that occur on the Exchange. Specifically, the ORF will be collected on behalf of the Exchange from Members and non-members for all customer transactions executed on the Exchange. ORF would be assessed and collected on all ultimately cleared customer contracts, taking into account adjustments for CMTA that were provided to the Exchange the same day as the trade.[5] Further, the Exchange would bill ORF according to the clearing instructions provided on the execution. More specifically, the Exchange proposes to assess ORF based on the clearing instruction provided on the execution on trade date and would not take into consideration CMTA changes or transfers that occur at OCC.[6]

Based on the Exchange's review of regulatory costs, ORF revenue, and options transaction volume, the Exchange proposes to set the ORF rate effective July 1, 2026 to $0.0240 per contract side. On June 2, 2026, the Exchange notified Members of the proposed ORF rate effective July 1, 2026 via a Regulatory Circular.[7] The Exchange will continue to monitor the amount of revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed regulatory costs. More specifically, the Exchange will endeavor to ensure that the amount of revenue collected from the ORF will not exceed 80% of the Exchange's regulatory costs. The Exchange will monitor its regulatory costs and revenues at a minimum on a semi-annual basis. If the Exchange determines regulatory revenues exceed or are insufficient to cover a material portion of its regulatory costs in a given year, the Exchange will adjust the ORF by submitting a fee change filing to the Securities and Exchange Commission (the ''Commission''). The Exchange will notify Members of adjustments to the ORF via a Regulatory Circular in advance of any change.

As is the case today, the Exchange will monitor the amount of revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed regulatory costs. In determining whether an expense is considered a regulatory cost, the Exchange will continue to review all costs and makes determinations if there is a nexus between the expense and a regulatory function. The Exchange notes that fines collected by the Exchange in connection with a disciplinary matter will continue to offset regulatory costs.

Revenue generated from ORF, when combined with all of the Exchange's other regulatory fees and fines, is designed to cover a material portion of the regulatory costs to the Exchange of the supervision and regulation of Members' customer options business including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities. Regulatory costs include direct regulatory expenses and certain indirect expenses in support of the regulatory function. The direct expenses include in-house and third party service provider costs to support the day-to-day regulatory work such as surveillances, investigations and examinations. The indirect expenses are only those expenses that are in support of the regulatory functions, such areas include Office of the General Counsel, technology, finance, and internal audit.

Rule Text Amendment

The Exchange proposes to delete the last sentence of the rule text ''The ORF is not assessed on outbound linkage trades.'' This revision more accurately describes the Exchange's collection process as explained in its prior rule proposal.[8] The Exchange proposes this revised rule text because it provides greater clarity to the manner in which ORF is collected.

Additionally, the Exchange proposes to remove obsolete text regarding an ORF rate that is no longer in effect.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act [9] in general, and furthers the objectives of Section 6(b)(4) of the Act [10] in particular, in that it is an equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The Exchange also believes the proposal furthers the objectives of Section 6(b)(5) of the Act [11] in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange believes that the proposed fee change is reasonable, equitable and not unfairly discriminatory in that it is charged to all

[3] *See* Securities and Exchange Act Release No. 104711 (January 28, 2026) 91 FR 4771 (February 2, 2026) (SR–PEARL–2026–01)(Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt a New Methodology for Assessment and Collection of the Options Regulatory Fee (ORF)).

[4] The term ''Member'' means an individual or organization that is registered with the Exchange pursuant to Chapter II of Exchange Rules for purposes of trading on the Exchange as an ''Electronic Exchange Member'' or ''Market Maker.'' Members are deemed ''members'' under the Exchange Act. *See* the Definitions section of the Fee Schedule and Exchange Rule 100.

[5] Adjustments to CMTA that occur at OCC would not be taken into account.

[6] Adjustments that were made the same day as the trade on the Exchange will be taken into account.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(4).

[11] 15 U.S.C. 78f(b)(5).

Exchange transactions that clear in the ''customer'' range at the OCC. Additionally, the Exchange believes that the proposed fee change ensures fairness by assessing a specific fee to those Members that require more Exchange regulatory services based on the amount of customer options business they conduct. Over recent years, options trading volume has increased with a growing percentage of the volume applicable to customer transactions. Customers trading on the Exchange (through a Member) benefit from the protections of a robust regulatory program including the maintenance of fair and orderly markets and protections against fraud and other manipulation. The Exchange believes it is equitable and not unfairly discriminatory to assess a regulatory fee to transactions that clear in the ''customer'' range to cover regulatory costs, but not to transactions clearing in the ''firm'' or ''market maker'' range because Clearing Members [12] and Market Makers [13] (who clear in the Firm and Market Maker range), as those market participants are generally subject to other Exchange fees, fines and obligations. For example, Clearing Members and Market Makers are required to pay Exchange application fees, permit fees, and connectivity fees, amongst others. In addition, all fines issued by the Exchange for regulatory infractions are assessed only to Members and would be applied to regulatory revenues. The Exchange expects that Clearing Members from whom the ORF is collected will pass through the fee to their customers (as the Exchange understands occurs today). In addition, Market Makers in particular are subject to various quoting and other obligations to ensure that they provide stable and liquid markets, which benefit all market participants including customers. Excluding Market Maker transactions from the ORF collection will allow Market Makers to better manage their costs more effectively thus enabling them to better allocate resources toward technology, risk management, and capacity to ensure continued liquidity provision.

In addition to the overall increase in ''customer'' range volume generally, regulating customer trading activity is more labor intensive and requires greater expenditure of human and technical resources than regulating non-customer trading activity, which tends to be more automated and less labor-intensive. For example, there are costs associated with main office and branch office examinations (*e.g.,* staff and travel expenses), as well as investigations into customer complaints and terminations of registered persons. As a result, the costs associated with administering the customer component of the Exchange's overall regulatory program are materially higher than the costs associated with administering the non-customer component (*e.g.,* Clearing Member proprietary transactions) of its regulatory program.[14] While the Exchange notes that it has broad regulatory responsibilities with respect to its Member's activities, irrespective of where their transactions take place, the Exchange believes it is reasonable to assess the proposed fee to only those transactions occurring on the Exchange. The proposed change more narrowly tailors the fee to products and transactions with a direct connection to the Exchange. With this proposal, transactions that would clear in the ''customer'' range occurring on other exchanges would no longer be subject to an ORF assessed by the Exchange.

The Exchange further believes that the proposed change fee is reasonable because it would help ensure that revenue collected from the ORF, in combination with other regulatory fees and fines, would cover a material portion of the Exchange's regulatory costs.

As noted above, the Exchange will also continue to monitor on at least a semiannual basis the amount of revenue collected from the ORF to ensure that it, in combination with its other regulatory fees and fines, would cover a material portion of the Exchange's regulatory costs and not exceed it.

Additionally, the Exchange proposes to delete the last sentence of the rule text and to remove obsolete text regarding the ORF rate that is no longer in effect. The Exchange believes that the proposal to delete the last sentence of the rule text and to remove obsolete text regarding the ORF rate that is no longer in effect would promote just and equitable principles of trade and remove impediments to and perfect the mechanism of a free and open market and a national market system because the proposed change would provide greater clarity to market participants regarding the Exchange's Fee Schedule. It is in the public interest for the Exchange's Fee Schedule to be accurate so as to eliminate the potential for confusion.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. This proposal does not create an unnecessary or inappropriate intra-market burden on competition because the ORF applies to all customer activity on the Exchange, thereby raising regulatory revenue to offset regulatory expenses. It also supplements the regulatory revenue derived from non-customer activity. The Exchange notes, however, the proposed change is not designed to address any competitive issues. Indeed, this proposal does not create an unnecessary or inappropriate inter-market burden on competition because it is a regulatory fee that supports regulation in furtherance of the purposes of the Act. The Exchange is obligated to ensure that the amount of regulatory revenue collected from ORF, in combination with its other regulatory fees and fines, does not exceed regulatory costs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [15] and paragraph (f) of Rule 19b–4 [16] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

[12] Clearing Member means a Member that has been admitted to membership in the Clearing Corporation pursuant to the provisions of the rules of the Clearing Corporation. *See* Exchange Rule 100.

[13] Market Maker means a Member registered with the Exchange for the purpose of making markets in options contracts traded on the Exchange and that is vested with the rights and responsibilities specified in Chapter VI of the Exchange Rules. *See* Exchange Rule 100.

[14] If the Exchange changes its method of funding regulation or if circumstances otherwise change in the future, the Exchange may decide to modify the ORF or assess a separate regulatory fee on Member proprietary transactions if the Exchange deems it advisable.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–PEARL–2026–33 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–PEARL–2026–33. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–PEARL–2026–33 and should be submitted on or before August 6, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105890; File No. SR–CboeBZX–2026–058]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Amend the Definition of Professional To Require Monthly Reviews of Orders

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') proposes to amend the definition of Professional[3] to require monthly reviews of orders. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/equities/regulation/rule_filings/bzx/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Rule 16.1, which defines Professional as any person or entity that (A) is not a broker or dealer in securities; and (B) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s). All Professional orders shall be appropriately marked by Options Members.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the definition of Professional to modify the Exchange's quarterly review of Professional orders. This filing is based on a proposal recently submitted by Nasdaq ISE, LLC (''ISE'').[4]

Today, orders for any Public Customer[5] that average more than 390 orders per day during any month of a calendar quarter must be represented as Professional orders for the next calendar quarter.[6] In order to properly represent orders entered on the Exchange, Options Members[7] are required currently to review their Public Customers' activity and, on at least a quarterly basis, designate orders as Public Customer orders or Professional orders.[8] Specifically, Options Members are required to conduct a quarterly review and make any appropriate changes to the way in which they are representing orders within five days after the end of each calendar quarter.[9] While Options Members are required to designate accounts on a quarterly basis, if during a quarter the Exchange identifies a customer for which orders are being represented as Public Customer orders but that has averaged more than 390 orders per day during a month, the Exchange must notify the Options Member and the Options Member is required to change the manner in which it is representing the customer's orders within five days.[10]

[4] *See* Securities Exchange Act Release No. 105218 (April 13, 2026), 91 FR 20542 (April 16, 2026) (SR ISE–2026–16) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Review of Professional Orders.)

[5] *See* Rule 16.1, which defines Public Customer as a person that is not a broker or dealer in securities.

[6] The requirement to review Public Customers' activity on at least a quarterly basis to determine whether orders that are not for the account of a broker-dealer should be represented as Public Customer Orders or Professional Orders is not in the current rule text, however it was described in the adopting proposal. See Securities Exchange Act Release No. 78226 (July 5, 2016), 81 FR 44903 (July 11, 2016) (BatsBZX–2016–31) (Notice of Filing of Proposed Rule Change Relating to Calculation Methodology for Counting Professional Orders) (''SR–BatsBZX–2016–31''). The current proposal seeks to codify the timing for review of Public Customers' activity.

[7] *See* Rule 16.1, which defines Options Member as a firm, or organization that is registered with the Exchange pursuant to Chapter XVII of these Rules for purposes of participating in options trading on BZX Options as an ''Options Order Entry Firm'' or ''Options Market-Maker.''

[8] *See* 81 FR 44903 at 44904.

[9] *See id.*

[10] *See id.*

Proposal

At this time, the Exchange proposes to shorten the quarterly review and designation to a monthly review. The Exchange proposes to amend the definition of Professional in Rule 16.1 to require that orders for any customer that had an average of more than 390 orders per day during any calendar month be represented as Professional orders for the next calendar month.

As noted, currently, each Options Member is required to monitor Public Customer orders to determine if the Public Customer has averaged more than 390 orders per day during a month. Determining whether a Public Customer has executed more than 390 orders per day during a month requires computing a daily average. As such, Options Members should be performing the workflow necessary to designate orders on a daily basis. Therefore, the proposal does not amend the current workflow, rather, the proposal amends the timeframe to change the manner in which the customer's order is being represented from five days after the end of each calendar quarter to five days after the end of each calendar month.

The Exchange does not believe that this amendment is a significant departure from the current rule, nor does it impose any burden on any Options Member because each broker-dealer is required currently to perform the necessary calculation daily to arrive at the requisite average. Further, in addition to the calculation, broker-dealers are subject to know-your-customer and suitability requirements under FINRA Rules 2090 (Know Your Customer) and 2111 (Suitability) and would need to consider whether a customer meets the Professional designation for purposes of determining best execution and making appropriate recommendations. The Exchange notes that the trading behavior of a Public Customer can be distinguished from that of a Professional which is the purpose of the separate designations. Finally, some Options Members currently designate a Public Customer that has averaged more than 390 orders per day during a month as a Professional on a more expedited basis, not waiting until five days after the quarter.

The Exchange believes that a calendar month is a sufficient time period to determine whether the activity of a customer meets the criteria for a Professional order. The Exchange believes that the shortened time period will ensure that the spirit of the designation of Professional order is met in that Options Members will make any appropriate changes to the way in which they are representing orders in a 30-day timeframe as opposed to a 90-day timeframe, thereby ensuring the designation is applied in a more expeditious manner.

The Exchange continues to believe that identifying Professional Orders based upon the average number of orders entered in qualified accounts is an appropriate and objective approach to reasonably distinguish such persons and entities from retail investors or market participants.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[11] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [12] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [13] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange's proposal to shorten the quarterly look-back to a monthly look-back is consistent with the Act because it will ensure that the spirit of the designation of Professional order continues to be met, only on a more expedited basis—removing a potential delay of two months before affecting a change in the designation. The Exchange believes that this amendment will remove impediments to and perfect the mechanism of a free and open market and a national market system by promoting the consistent application of its rules and shortening the timeframe to change the designation for all Options Members while continuing to provide a sufficient time period to determine whether the activity of a customer meets the criteria for a Professional order. Further, the Exchange believes that the shortened time period will continue to promote consistency in the treatment of orders as Professional orders while also preventing members with high volume from receiving benefits reserved for Public Customer orders.

As noted, currently, each Options Member is required to monitor Public Customer orders to determine if the Public Customer has averaged more than 390 orders per day during a month. Determining whether a Public Customer has executed more than 390 orders per day during a month requires computing a daily average. As such, Options Members should be performing the workflow necessary to designate orders on a daily basis. Therefore, the proposal does not amend the current workflow, rather, the proposal amends the timeframe to change the manner in which the customer's order is being represented from five days after the end of each calendar quarter to five days after the end of each calendar month.

The Exchange does not believe that this amendment is a significant departure from the current rule, nor does it impose any burden on any Options Member because each broker-dealer is required currently to perform the necessary calculation daily to arrive at the requisite average. Further, in addition to the calculation, broker-dealers are subject to know-your customer and suitability requirements under FINRA Rules 2090 (Know Your Customer) and 2111 (Suitability) and would need to consider whether a customer meets the Professional designation for purposes of determining best execution and making appropriate recommendations. Finally, some Options Members currently designate a Public Customer that has averaged more than 390 orders per day during a month as a Professional on a more expedited basis, not waiting until five days after the quarter.

The Exchange notes that the trading behavior of a Public Customer can be distinguished from that of a Professional which is the purpose of the separate designations. The Exchange continues to believe that identifying Professional orders based upon the average number of orders entered in qualified accounts is an appropriately objective approach to reasonably distinguish such persons and entities from retail investors or market participants. Priority is one of the marketplace advantages provided to Public Customer orders on the Exchange. Public Customer orders are given execution priority over non-Customer orders and quotations of market makers at the same price. Another marketplace advantage afforded

[11] 15 U.S.C. 78f(b).

[12] 15 U.S.C. 78f(b)(5).

[13] *Id.*

to Public Customer orders on the Exchange is that members are generally not assessed transaction fees or are assessed lower fees for the execution of Public Customer orders. The purpose of these marketplace advantages is to attract retail order flow to the Exchange by leveling the playing field for retail investors over market Professionals. This proposal will continue to provide Public Customer accounts with marketplace advantages and distinguish those accounts non-Professional retail investors from the Professionals accounts. The Exchange notes that some non-broker-dealer individuals and entities have access to information and technology that enables them to Professionally trade listed options in the same manner as a broker or dealer in securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange does not believe that the proposed rule change will impose any burden on intra-market competition because, today, each Options Member is required to monitor Public Customer orders to determine if the Public Customer has averaged more than 390 orders per day during a month. Determining whether a Public Customer has executed more than 390 orders per day during a month requires computing a daily average. As such, Options Members should be performing the workflow necessary to designate orders on a daily basis. Therefore, the proposal does not amend the current workflow, rather, the proposal amends the timeframe to change the manner in which the customer's order is being represented from five days after the end of each calendar quarter to five days after the end of each calendar month.

The Exchange does not believe that this amendment is a significant departure from the current rule, nor does it impose any burden on any Options Member because each broker-dealer is required currently to perform the necessary calculation daily to arrive at the requisite average. Further, in addition to the calculation, broker-dealers are subject to know-your-customer and suitability requirements under FINRA Rules 2090 (Know Your Customer) and 2111 (Suitability) and would need to consider whether a customer meets the Professional designation for purposes of determining best execution and making appropriate recommendations. Finally, some Options Members currently designate a Public Customer that has averaged more than 390 orders per day during a month as a Professional on a more expedited basis, not waiting until five days after the quarter.

The Exchange notes that the trading behavior of a Public Customer can be distinguished from that of a Professional which is the purpose of the separate designations.

Further, the designation of Professional orders would not result in any different treatment of such orders for purposes of compliance with the Exchange's Rules. Public Customers have been granted certain priority over other non-broker-dealer individuals and entities that have access to information and technology that enables them to Professionally trade listed options in the same manner as a broker or dealer in securities. Further, the Public Customer designation allows the Exchange to attract order flow or create more competitive markets.

Also, the Exchange does not believe that the proposed rule change will impose any burden on inter-market competition because other exchanges are expected to adopt similar rules.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

A. significantly affect the protection of investors or the public interest;

B. impose any significant burden on competition; and

C. become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[14] and Rule 19b–4(f)(6)[15] thereunder.[16]

A proposed rule change filed under Rule 19b–4(f)(6)[17] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[18] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that the proposed rule change will ensure fair competition among the exchanges by allowing the Exchange to shorten the quarterly review and designation to a monthly review of Options Members to determine whether the activity of a customer meets the criteria for a Professional order. For these reasons, and because the proposed rule change raises no new or novel legal or regulatory issues, the Commission finds that waiver of the operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change to be operative upon filing.[19]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CboeBZX–2026–058 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange

[14] 15 U.S.C. 78s(b)(3)(A).

[15] 17 CFR 240.19b–4(f)(6).

[16] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[17] 17 CFR 240.19b–4(f)(6).

[18] 17 CFR 240.19b–4(f)(6)(iii).

[19] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeBZX–2026–058. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CboeBZX–2026–058 and should be submitted on or before August 6, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[20]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105892; File No. SR–EMERALD–2026–18]

Self-Regulatory Organizations; MIAX Emerald, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Exchange's Options Regulatory Fee (ORF)

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, MIAX Emerald, LLC (''MIAX Emerald'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Emerald Options Exchange Fee Schedule (''Fee Schedule'') regarding the Options Regulatory Fee (''ORF'').

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/emerald-options/rule-filings,* and at the Exchange's principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange previously filed to amend its ORF assessment and collection methodology,[3] with the rate to be set closer to the implementation date of the amended ORF collection methodology. At this time, the Exchange proposes to set the ORF rate effective July 1, 2026 to $0.0220 per contract side. Additionally, the Exchange proposes to amend the rule text that describes the ORF collection methodology to provide greater clarity to the ORF collection methodology.

July 1, 2026 ORF

As of July 1, 2026, the Exchange will assess ORF for options transactions that clear in the ''customer'' range at The Options Clearing Corporation (''OCC''), however ORF will be assessed to each Members [4] for executions that occur on the Exchange. Specifically, the ORF will be collected on behalf of the Exchange from Members and non-members for all customer transactions executed on the Exchange. ORF would be assessed and collected on all ultimately cleared customer contracts, taking into account adjustments for CMTA that were provided to the Exchange the same day as the trade.[5] Further, the Exchange would bill ORF according to the clearing instructions provided on the execution. More specifically, the Exchange proposes to assess ORF based on the clearing instruction provided on the execution on trade date and would not take into consideration CMTA changes or transfers that occur at OCC.[6]

Based on the Exchange's review of regulatory costs, ORF revenue, and options transaction volume, the Exchange proposes to set the ORF rate effective July 1, 2026 to $0.0220 per contract side. On June 2, 2026, the Exchange notified Members of the proposed ORF rate effective July 1, 2026 via a Regulatory Circular.[7] The Exchange will continue to monitor the amount of revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed regulatory costs. More specifically, the Exchange will endeavor to ensure that the amount of revenue collected from the ORF will not exceed 80% of the Exchange's regulatory costs. The Exchange will monitor its regulatory costs and revenues at a minimum on a semi-annual basis. If the Exchange determines regulatory revenues exceed or are insufficient to cover a material portion of its regulatory costs in a given year, the Exchange will adjust the ORF by submitting a fee change filing to the Securities and Exchange Commission (the ''Commission''). The Exchange will notify Members of adjustments to the ORF via a Regulatory Circular in advance of any change.

As is the case today, the Exchange will monitor the amount of revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed regulatory costs. In determining whether an expense is considered a regulatory cost, the Exchange will continue to review all costs and makes determinations if there is a nexus between the expense and a regulatory function. The Exchange notes that fines

[20] 17 CFR 200.30–3(a)(12), (59).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities and Exchange Act Release No. 104709 (January 28, 2026) 91 FR 4653 (February 2, 2026) (SR–EMERALD–2026–01)(Self-Regulatory Organizations; MIAX Emerald, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt a New Methodology for Assessment and Collection of the Options Regulatory Fee (ORF)).

[4] The term ''Member'' means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed ''members'' under the Exchange Act. *See* the Definitions section of the Fee Schedule and Exchange Rule 100.

[5] Adjustments to CMTA that occur at OCC would not be taken into account.

[6] Adjustments that were made the same day as the trade on the Exchange will be taken into account.

[7] *See https://www.miaxglobal.com/alert/2026/06/02/miax-exchange-group-option-markets-options-regulatory-fee-1.*

collected by the Exchange in connection with a disciplinary matter will continue to offset regulatory costs.

Revenue generated from ORF, when combined with all of the Exchange's other regulatory fees and fines, is designed to cover a material portion of the regulatory costs to the Exchange of the supervision and regulation of Members' customer options business including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities. Regulatory costs include direct regulatory expenses and certain indirect expenses in support of the regulatory function. The direct expenses include in-house and third party service provider costs to support the day-to-day regulatory work such as surveillances, investigations and examinations. The indirect expenses are only those expenses that are in support of the regulatory functions, such areas include Office of the General Counsel, technology, finance, and internal audit.

Rule Text Amendment

The Exchange proposes to delete the last sentence of the rule text ''The ORF is not assessed on outbound linkage trades.'' This revision more accurately describes the Exchange's collection process as explained in its prior rule proposal.[8] The Exchange proposes this revised rule text because it provides greater clarity to the manner in which ORF is collected.

Additionally, the Exchange proposes to remove obsolete text regarding an ORF rate that is no longer in effect.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act[9] in general, and furthers the objectives of Section 6(b)(4) of the Act[10] in particular, in that it is an equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The Exchange also believes the proposal furthers the objectives of Section 6(b)(5) of the Act[11] in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange believes that the proposed fee change is reasonable, equitable and not unfairly discriminatory in that it is charged to all Exchange transactions that clear in the ''customer'' range at the OCC. Additionally, the Exchange believes that the proposed fee change ensures fairness by assessing a specific fee to those Members that require more Exchange regulatory services based on the amount of customer options business they conduct. Over recent years, options trading volume has increased with a growing percentage of the volume applicable to customer transactions. Customers trading on the Exchange (through a Member) benefit from the protections of a robust regulatory program including the maintenance of fair and orderly markets and protections against fraud and other manipulation. The Exchange believes it is equitable and not unfairly discriminatory to assess a regulatory fee to transactions that clear in the ''customer'' range to cover regulatory costs, but not to transactions clearing in the ''firm'' or ''market maker'' range because Clearing Members[12] and Market Makers[13] (who clear in the Firm and Market Maker range), as those market participants are generally subject to other Exchange fees, fines and obligations. For example, Clearing Members and Market Makers are required to pay Exchange application fees, permit fees, and connectivity fees, amongst others. In addition, all fines issued by the Exchange for regulatory infractions are assessed only to Members and would be applied to regulatory revenues. The Exchange expects that Clearing Members from whom the ORF is collected will pass through the fee to their customers (as the Exchange understands occurs today). In addition, Market Makers in particular are subject to various quoting and other obligations to ensure that they provide stable and liquid markets, which benefit all market participants including customers. Excluding Market Maker transactions from the ORF collection will allow Market Makers to better manage their costs more effectively thus enabling them to better allocate resources toward technology, risk management, and capacity to ensure continued liquidity provision.

In addition to the overall increase in ''customer'' range volume generally, regulating customer trading activity is more labor intensive and requires greater expenditure of human and technical resources than regulating non-customer trading activity, which tends to be more automated and less labor-intensive. For example, there are costs associated with main office and branch office examinations (*e.g.,* staff and travel expenses), as well as investigations into customer complaints and terminations of registered persons. As a result, the costs associated with administering the customer component of the Exchange's overall regulatory program are materially higher than the costs associated with administering the non-customer component (*e.g.,* Clearing Member proprietary transactions) of its regulatory program.[14] While the Exchange notes that it has broad regulatory responsibilities with respect to its Member's activities, irrespective of where their transactions take place, the Exchange believes it is reasonable to assess the proposed fee to only those transactions occurring on the Exchange. The proposed change more narrowly tailors the fee to products and transactions with a direct connection to the Exchange. With this proposal, transactions that would clear in the ''customer'' range occurring on other exchanges would no longer be subject to an ORF assessed by the Exchange.

The Exchange further believes that the proposed change fee is reasonable because it would help ensure that revenue collected from the ORF, in combination with other regulatory fees and fines, would cover a material portion of the Exchange's regulatory costs.

As noted above, the Exchange will also continue to monitor on at least a semiannual basis the amount of revenue collected from the ORF to ensure that it, in combination with its other regulatory

[8] *See supra* note 3.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(4).

[11] 15 U.S.C. 78f(b)(5).

[12] Clearing Member means a Member that has been admitted to membership in the Clearing Corporation pursuant to the provisions of the rules of the Clearing Corporation. *See* Exchange Rule 100.

[13] Market Makers refers to ''Lead Market Makers,'' ''Primary Lead Market Makers,'' and ''Registered Market Makers'' collectively. Lead Market Maker means a Member registered with the Exchange for the purpose of making markets in securities traded on the Exchange and that is vested with the rights and responsibilities specified in Chapter VI of these Rules with respect to Lead Market Makers. Primary Lead Market Maker means a Lead Market Maker appointed by the Exchange to act as the Primary Lead Market Maker for the purpose of making markets in securities traded on the Exchange. Registered Market Maker means a Member registered with the Exchange for the purpose of making markets in securities traded on the Exchange, who is not a Lead Market Maker and is vested with the rights and responsibilities specified in Chapter VI of these Rules with respect to Registered Market Makers. *See* Exchange Rule 100.

[14] If the Exchange changes its method of funding regulation or if circumstances otherwise change in the future, the Exchange may decide to modify the ORF or assess a separate regulatory fee on Member proprietary transactions if the Exchange deems it advisable.

fees and fines, would cover a material portion of the Exchange's regulatory costs and not exceed it.

Additionally, the Exchange proposes to delete the last sentence of the rule text and to remove obsolete text regarding the ORF rate that is no longer in effect. The Exchange believes that the proposal to delete the last sentence of the rule text and to remove obsolete text regarding the ORF rate that is no longer in effect would promote just and equitable principles of trade and remove impediments to and perfect the mechanism of a free and open market and a national market system because the proposed change would provide greater clarity to market participants regarding the Exchange's Fee Schedule. It is in the public interest for the Exchange's Fee Schedule to be accurate so as to eliminate the potential for confusion.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. This proposal does not create an unnecessary or inappropriate intra-market burden on competition because the ORF applies to all customer activity on the Exchange, thereby raising regulatory revenue to offset regulatory expenses. It also supplements the regulatory revenue derived from non-customer activity. The Exchange notes, however, the proposed change is not designed to address any competitive issues. Indeed, this proposal does not create an unnecessary or inappropriate inter-market burden on competition because it is a regulatory fee that supports regulation in furtherance of the purposes of the Act. The Exchange is obligated to ensure that the amount of regulatory revenue collected from ORF, in combination with its other regulatory fees and fines, does not exceed regulatory costs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [15] and paragraph (f) of Rule 19b–4 [16] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–EMERALD–2026–18 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–EMERALD–2026–18. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–EMERALD–2026–18 and should be submitted on or before August 6, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105891; File No. SR–CBOE–2026–060]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Definition of Professional To Require Monthly Reviews of Orders

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') proposes to amend the definition of Professional [3] to require monthly reviews of orders. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/options/regulation/rule_filings/cone/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Rule 1.1, which defines Professional as any person or entity that (a) is not a broker or dealer in securities, and (b) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s).

the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the definition of Professional to modify the Exchange's quarterly review of Professional orders. This filing is based on a proposal recently submitted by Nasdaq ISE, LLC (''ISE'').[4]

Today, orders for any Public Customer[5] that average more than 390 orders per day during any month of a calendar quarter must be represented as Professional orders for the next calendar quarter.[6] In order to properly represent orders entered on the Exchange, Trading Permit Holder Organizations (''TPH organizations'')[7] are required currently to review their Public Customers' activity and, on at least a quarterly basis, designate orders as Public Customer orders or Professional orders.[8] Specifically, TPH organizations are required to conduct a quarterly review and make any appropriate changes to the way in which they are representing orders within five days after the end of each calendar quarter.[9] While TPH organizations are required to designate accounts on a quarterly basis, if during a quarter the Exchange identifies a customer for which orders are being represented as Public Customer orders but that has averaged more than 390 orders per day during a month, the Exchange must notify the TPH organization and the TPH organization is required to change the manner in which it is representing the customer's orders within five days.[10]

Proposal

At this time, the Exchange proposes to shorten the quarterly review and designation to a monthly review. The Exchange proposes to amend the definition of Professional in Rule 1.1 to require that orders for any customer that had an average of more than 390 orders per day during any calendar month be represented as Professional orders for the next calendar month.

As noted, currently, each TPH organization is required to monitor Public Customer orders to determine if the Public Customer has averaged more than 390 orders per day during a month. Determining whether a Public Customer has executed more than 390 orders per day during a month requires computing a daily average. As such, TPH organizations should be performing the workflow necessary to designate orders on a daily basis. Therefore, the proposal does not amend the current workflow, rather, the proposal amends the timeframe to change the manner in which the customer's order is being represented from five days after the end of each calendar quarter to five days after the end of each calendar month.

The Exchange does not believe that this amendment is a significant departure from the current rule, nor does it impose any burden on any TPH organization because each broker-dealer is required currently to perform the necessary calculation daily to arrive at the requisite average. Further, in addition to the calculation, broker-dealers are subject to know-your-customer and suitability requirements under FINRA Rules 2090 (Know Your Customer) and 2111 (Suitability) and would need to consider whether a customer meets the Professional designation for purposes of determining best execution and making appropriate recommendations. The Exchange notes that the trading behavior of a Public Customer can be distinguished from that of a Professional which is the purpose of the separate designations. Finally, some TPH organizations currently designate a Public Customer that has averaged more than 390 orders per day during a month as a Professional on a more expedited basis, not waiting until five days after the quarter.

The Exchange believes that a calendar month is a sufficient time period to determine whether the activity of a customer meets the criteria for a Professional order. The Exchange believes that the shortened time period will ensure that the spirit of the designation of Professional order is met in that TPH organizations will make any appropriate changes to the way in which they are representing orders in a 30-day timeframe as opposed to a 90-day timeframe, thereby ensuring the designation is applied in a more expeditious manner. The Exchange continues to believe that identifying Professional Orders based upon the average number of orders entered in qualified accounts is an appropriate and objective approach to reasonably distinguish such persons and entities from retail investors or market participants.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[11] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[12] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[13] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange's proposal to shorten the quarterly look-back to a monthly look-back is consistent with the Act because it will ensure that the spirit of the designation of Professional

[4] *See* Securities Exchange Act Release No. 105218 (April 13, 2026), 91 FR 20542 (April 16, 2026) (SR ISE–2026–16) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Review of Professional Orders).

[5] *See* Rule 1.1, which defines Public Customer as a person that is not a Broker-Dealer.

[6] The requirement to review Public Customers' activity on at least a quarterly basis to determine whether orders that are not for the account of a broker-dealer should be represented as Public Customer Orders or Professional Orders is not in the current rule text, however it was described in the adopting proposal. See Securities Exchange Act Release No. 77049 (February 4, 2016), 81 FR 7173 (February 10, 2016) (CBOE–2016–005) (Notice of Filing of Proposed Rule Change Relating to Professionals Order Counting) (''SR–CBOE–2016–005''). The current proposal seeks to codify the timing for review of Public Customers' activity.

[7] *See* Cboe By-Laws, which defines ''Trading Permit Holder'' as any individual, corporation, partnership, limited liability company or other entity authorized by the Rules that holds a Trading Permit. If a Trading Permit Holder is an individual, the Trading Permit Holder may also be referred to as an ''individual Trading Permit Holder.'' If a Trading Permit Holder is not an individual, the Trading Permit Holder may also be referred to as a ''TPH organization.'' A Trading Permit Holder is a ''member'' solely for purposes of the Act; however, one's status as a Trading Permit Holder does not confer on that Person any ownership interest in the Exchange

[9] *See id.*

[10] *See id.*

[11] 15 U.S.C. 78f(b).

[12] 15 U.S.C. 78f(b)(5).

[13] *Id.*

order continues to be met, only on a more expedited basis—removing a potential delay of two months before affecting a change in the designation. The Exchange believes that this amendment will remove impediments to and perfect the mechanism of a free and open market and a national market system by promoting the consistent application of its rules and shortening the timeframe to change the designation for all TPH organizations while continuing to provide a sufficient time period to determine whether the activity of a customer meets the criteria for a Professional order. Further, the Exchange believes that the shortened time period will continue to promote consistency in the treatment of orders as Professional orders while also preventing members with high volume from receiving benefits reserved for Public Customer orders.

As noted, currently, each TPH organization is required to monitor Public Customer orders to determine if the Public Customer has averaged more than 390 orders per day during a month. Determining whether a Public Customer has executed more than 390 orders per day during a month requires computing a daily average. As such, TPH Organizations should be performing the workflow necessary to designate orders on a daily basis. Therefore, the proposal does not amend the current workflow, rather, the proposal amends the timeframe to change the manner in which the customer's order is being represented from five days after the end of each calendar quarter to five days after the end of each calendar month.

The Exchange does not believe that this amendment is a significant departure from the current rule, nor does it impose any burden on any TPH organization because each broker-dealer is required currently to perform the necessary calculation daily to arrive at the requisite average. Further, in addition to the calculation, broker-dealers are subject to know-your customer and suitability requirements under FINRA Rules 2090 (Know Your Customer) and 2111 (Suitability) and would need to consider whether a customer meets the Professional designation for purposes of determining best execution and making appropriate recommendations. Finally, some TPH organizations currently designate a Public Customer that has averaged more than 390 orders per day during a month as a Professional on a more expedited basis, not waiting until five days after the quarter.

The Exchange notes that the trading behavior of a Public Customer can be distinguished from that of a Professional which is the purpose of the separate designations. The Exchange continues to believe that identifying Professional orders based upon the average number of orders entered in qualified accounts is an appropriately objective approach to reasonably distinguish such persons and entities from retail investors or market participants. Priority is one of the marketplace advantages provided to Public Customer orders on the Exchange. Public Customer orders are given execution priority over non-Customer orders and quotations of market makers at the same price. Another marketplace advantage afforded to Public Customer orders on the Exchange is that members are generally not assessed transaction fees or are assessed lower fees for the execution of Public Customer orders. The purpose of these marketplace advantages is to attract retail order flow to the Exchange by leveling the playing field for retail investors over market Professionals. This proposal will continue to provide Public Customer accounts with marketplace advantages and distinguish those accounts non-Professional retail investors from the Professionals accounts. The Exchange notes that some non-broker-dealer individuals and entities have access to information and technology that enables them to Professionally trade listed options in the same manner as a broker or dealer in securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange does not believe that the proposed rule change will impose any burden on intra-market competition because, today, each TPH organization is required to monitor Public Customer orders to determine if the Public Customer has averaged more than 390 orders per day during a month. Determining whether a Public Customer has executed more than 390 orders per day during a month requires computing a daily average. As such, TPH organizations should be performing the workflow necessary to designate orders on a daily basis. Therefore, the proposal does not amend the current workflow, rather, the proposal amends the timeframe to change the manner in which the customer's order is being represented from five days after the end of each calendar quarter to five days after the end of each calendar month.

The Exchange does not believe that this amendment is a significant departure from the current rule, nor does it impose any burden on any TPH organization because each broker-dealer is required currently to perform the necessary calculation daily to arrive at the requisite average. Further, in addition to the calculation, broker-dealers are subject to know-your-customer and suitability requirements under FINRA Rules 2090 (Know Your Customer) and 2111 (Suitability) and would need to consider whether a customer meets the Professional designation for purposes of determining best execution and making appropriate recommendations. Finally, some TPH organizations currently designate a Public Customer that has averaged more than 390 orders per day during a month as a Professional on a more expedited basis, not waiting until five days after the quarter.

The Exchange notes that the trading behavior of a Public Customer can be distinguished from that of a Professional which is the purpose of the separate designations. Further, the designation of Professional orders would not result in any different treatment of such orders for purposes of compliance with the Exchange's Rules. Public Customers have been granted certain priority over other non-broker-dealer individuals and entities that have access to information and technology that enables them to Professionally trade listed options in the same manner as a broker or dealer in securities. Further, the Public Customer designation allows the Exchange to attract order flow or create more competitive markets.

Also, the Exchange does not believe that the proposed rule change will impose any burden on inter-market competition because other exchanges are expected to adopt similar rules.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

A. significantly affect the protection of investors or the public interest;

B. impose any significant burden on competition; and

C. become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the

Act[14] and Rule 19b–4(f)(6)[15] thereunder.[16]

A proposed rule change filed under Rule 19b–4(f)(6)[17] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[18] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that the proposed rule change will ensure fair competition among the exchanges by allowing the Exchange to shorten the quarterly review and designation to a monthly review of TPH organizations to determine whether the activity of a customer meets the criteria for a Professional order. For these reasons, and because the proposed rule change raises no new or novel legal or regulatory issues, the Commission finds that waiver of the operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change to be operative upon filing.[19]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

[14] 15 U.S.C. 78s(b)(3)(A).

[15] 17 CFR 240.19b–4(f)(6).

[16] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[17] 17 CFR 240.19b–4(f)(6).

[18] 17 CFR 240.19b–4(f)(6)(iii).

[19] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–CBOE–2026–060 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CBOE–2026–060. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–CBOE–2026–060 and should be submitted on or before August 6, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[20]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105896; File No. SR–EMERALD–2026–17]

Self-Regulatory Organizations; MIAX Emerald, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the MIAX Emerald Options Exchange Fee Schedule To Extend the Temporary Discount Program for Historical Requests of Certain Open-Close Report Data Until December 31, 2026

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'' or ''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, MIAX Emerald, LLC (''MIAX Emerald'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Emerald Options Exchange Fee Schedule (''Fee Schedule'') to extend the temporary discount program for historical requests of certain Open-Close Report (described below) data.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/emerald-options/rule-filings,* and at the Exchange's principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section 6)e) of the Fee Schedule to extend the temporary discount program for historical requests of certain Open-Close Report data until December 31, 2026. In general, the Exchange currently provides a temporary 20% discount on fees assessed to Open-Close Report subscribers that purchase $20,000 or more in a single order of historical Open-Close Report data (with one exception, described below), which

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

discount is set to expire on June 30, 2026.[3]

By way of background, the Exchange offers an end-of-day summary and two intra-day versions of the Open-Close Report (described in more detail below).[4] The End-of-Day Open-Close Report (referred to herein as the ''End-of-Day Report'') is a volume summary of trading activity on the Exchange at the option level by origin (Priority Customer,[5] Non-Priority Customer, Firm, Broker-Dealer, and Market Maker[6]), side of the market (buy or sell), contract volume, and transaction type (opening or closing). All volume is further broken down into trade size buckets (less than 100 contracts, 100–199 contracts, greater than 199 contracts).

The Intra-Day Open-Close Report provides similar information to that of the End-of-Day Report but is produced and updated at two different intervals during the trading day: 1 minute (referred to herein as the ''1-Minute Report'') and 10 minutes (referred to herein as the ''10-Minute Report''). For the 1-Minute Report and 10-Minute Report, data is captured in ''snapshots'' taken every 1 minute or 10 minutes, respectively, throughout the trading day and is available to subscribers within five minutes of the conclusion of each 1 minute or 10 minute period. Each update represents the aggregate data captured from the current ''snapshot'' and all previous ''snapshots.'' The 1-Minute and 10-Minute Reports provides a volume summary of trading activity on the Exchange at the option level by origin (Priority Customer, Non-Priority Customer, Firm, Broker-Dealer, and Market Maker), side of the market (buy or sell), and transaction type (opening or closing). All volume is further broken down into trade size buckets (less than 100 contracts, 100–199 contracts, greater than 199 contracts).

Each version of the Open-Close Report contains proprietary Exchange trade data and does not include trade data from any other exchange. The Intra-Day and End-of-Day Open-Close Report data products are completely voluntary products, in that the Exchange is not required by any rule or regulation to make this data available and that potential customers may purchase it on an ad-hoc basis only if they voluntarily choose to do so. The Open-Close Report is also a historical data product and not a real-time data feed.

The Exchange makes the Open-Close Report available for purchase to Members[7] and non-Members.[8] Customers may currently purchase the Open-Close Report on a subscription basis (monthly) or by ad-hoc request for a specified month or number of months. The Exchange assesses the following fees for active subscriptions: $600 per month for subscribing to the End-of-Day Report; $2,000 per month for subscribing to the 10-Minute Report; and $6,000 per month for subscribing to the 1-Minute Report.[9] The Exchange also assesses the following fees for ad-hoc historical requests: $500 per request per month for ad-hoc requests for historical End-of-Day Report data;[10] $1,000 per request per month for ad-hoc requests for historical 10-Minute Report data;[11] and $2,500 per request per month for ad-hoc requests for historical 1-Minute Report data.[12] The Exchange also provides discounts or free data for customers who request multiple subscriptions, make ad-hoc requests for historical data for multiple types of the Open-Close Report, or who are Qualifying Academic Purchasers.[13]

Open-Close Report data is subject to direct competition from similar end-of-day and intra-day options trading summaries offered by several other options exchanges.[14] All of these exchanges offer essentially the same end-of-day and intra-day options trading summary information for trading activity on those exchanges.

Currently, the Exchange provides a temporary pricing incentive program in which subscribers that make ad-hoc requests for historical Open-Close Report data receive a percentage fee discount when a specific purchase threshold is met. Footnote ''e.'' below the table of fees in Section 6)e) of the Fee Schedule provides that from January 1, 2026 through June 30, 2026, any single ad-hoc purchase of historical End-of-Day Report data and/or historical 10-Minute Report data by an existing End-of-Day Report or 10-Minute Report subscriber totaling $20,000 or more, will receive a 20% discount when the subscriber purchases the same category of historical data for which they have a monthly subscription.[15] Section 6)e) of the Fee Schedule further provides that this discount cannot be combined with any other discount offered by the Exchange, including the academic discount provided to Qualifying Academic Purchasers of historical Open-Close Report data. To encourage the purchase of monthly subscriptions to Open-Close Report data, the temporary discount program is provided only to existing monthly subscribers who purchase the same category of historical data for which they have a monthly End-of-Day Report or 10-Minute Report subscription. The temporary discount program is currently set to expire on June 30, 2026.

The Exchange now proposes to extend the temporary discount program until December 31, 2026.[16] The purpose of this extension is to continue attracting subscribers of historical Open-Close Report data and making such data more widely accessible. The Exchange notes that the proposed discount will continue to not apply to ad-hoc historical requests for the 1-Minute Report.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[17] in general, and furthers the objectives of Section 6(b)(5)

[3] *See* Securities Exchange Act Release No. 104605 (January 14, 2026), 91 FR 2410 (January 20, 2026) (SR–EMERALD–2025–24).

[4] *See, generally,* Exchange Rule 531(e)(1).

[5] *See* Exchange Rule 100.

[6] *Id.* The Exchange notes that certain terms are not specifically defined in the Rulebook, including Non-Priority Customer, Firm, Broker-Dealer.

[7] *See* Exchange Rule 100.

[8] *See* Fee Schedule, Section 6)e).

[9] *Id.*

[10] An ad-hoc request for historical End-of-Day Report data can be for any number of months beginning with June 2021 for which the data is available. *Id.*

[11] An ad-hoc request for historical 10-Minute Report data can be for any number of months beginning with March 2019 for which the data is available. *Id.*

[12] An ad-hoc request for historical 1-Minute Report data can be for any number of months beginning with March 2019 for which the data is available. *Id.*

[13] In order to qualify for the academic pricing, an academic purchaser must: (1) be an accredited academic institution or member of the faculty or staff of such an institution, and (2) use the data in independent academic research, academic journals and other publications, teaching and classroom use, or for other bona fide educational purposes (*i.e.* academic use). *See* Securities Exchange Act Release No. 97307 (April 13, 2024), 88 FR 24217 (April 19, 2023) (SR–EMERALD–2023–09).

[14] *See, e.g.,* Cboe DataShop, Open-Close Volume Summary products offered by Cboe Exchange, Inc. (''Cboe''), Cboe C2 Exchange, Inc. (''C2''), Cboe EDGX Exchange, Inc. (''EDGX''), and Cboe BZX Exchange, Inc. (''BZX''), *available at https://datashop.cboe.com/cboe-options-open-close-volume-summary* (last visited June 8, 2026).

[15] The discount applies on an order-by-order basis. To qualify for the discount, an order must contain an ad-hoc request for historical End-of-Day Report data and/or historical 10-Minute Report data and must total $20,000 or more. The Exchange does not aggregate purchases made throughout a billing cycle for purposes of this incentive program. The discount applies to the total purchase price once the $20,000 minimum purchase is satisfied (for example, a qualifying order of $25,000 would be discounted to $20,000, *i.e.* receiving a 20% discount of $5,000).

[16] The Exchange notes that at the end of this period, the temporary discount program will expire unless the Exchange files another 19b–4 Rule Filing with the Securities and Exchange Commission (the ''Commission'') to amend the terms or extend the discount program.

[17] 15 U.S.C. 78f(b).

of the Act,[18] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and to protect investors and the public interest, and that it is not designed to permit unfair discrimination among customers, brokers, or dealers. The Exchange also believes that its proposed changes to its Fee Schedule concerning fees for the Open-Close Report is consistent with Section 6(b) of the Act [19] in general, and furthers the objectives of Section 6(b)(4) of the Act [20] in particular, in that it is an equitable allocation of dues, fees and other charges among its members and other recipients of Exchange data.

In adopting Regulation NMS, the Commission granted self-regulatory organizations (''SROs'') and broker-dealers increased authority and flexibility to offer new and unique market data to the public. It was believed that this authority would expand the amount of data available to consumers, and also spur innovation and competition for the provision of market data. Particularly, the Open-Close Report further broadens the availability of U.S. options market data to investors consistent with the principles of Regulation NMS. The data product also promotes increased transparency through the dissemination of the Open-Close Report. Particularly, information regarding opening and closing activity across different option series during the trading day may indicate investor sentiment, which may allow market participants to make better informed trading decisions throughout the day. Subscribers to the data may also be able to enhance their ability to analyze option trade and volume data and create and test trading models and analytical strategies. The Exchange believes that the Open-Close Report provides a valuable tool that subscribers can use to gain comprehensive insight into the trading activity in a particular series, but also emphasizes such data is not necessary for trading and completely optional. Moreover, several other exchanges offer similar data products which offer the same type of data content through end-of-day or intra-day reports.[21]

The Exchange operates in a highly competitive environment. Indeed, there are currently 18 registered options exchanges that trade options. Based on publicly available information, no single options exchange had more than approximately 11–12% of the equity options market share for the month of May 2026 and the Exchange represented only approximately 3.13% of the equity options market share for that month.[22] The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Particularly, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [23] Making similar data products available to market participants fosters competition in the marketplace, and constrains the ability of exchanges to charge supra-competitive fees. In the event that a market participant views one exchange's data product as more or less attractive than the competition they can, and do, switch between similar products. The extension of the fee discount for historical Open-Close Report data is a result of this competitive environment, as the Exchange seeks to continue attracting subscribers of historical Open-Close Report data and making such data more widely accessible.

The Exchange believes that extending the temporary discount program for any Member or non-Member who purchases historical End-of-Day Report or historical 10-Minute Report data is reasonable because such purchasers will continue to receive a 20% discount for purchasing $20,000 or more worth of such historical Open-Close Report data. The Exchange believes the extended discount is reasonable as it gives purchasers additional time to use and test the historical Open-Close Report data at a discounted rate and therefore should continue to encourage and promote users to purchase the historical Open-Close Report data. Further, the extension of the temporary discount is intended to continue promoting increased use of the Exchange's historical Open-Close Report data by defraying some of the costs a purchaser would ordinarily have to expend. Further, continuing to provide the discount only to existing subscribers of a monthly End-of-Day Report or 10-Minute Report subscription is designed to encourage the purchase of monthly subscriptions to Open-Close Report data.

The Exchange believes that the extension of the temporary discount program is equitable and not unfairly discriminatory because it applies equally to all Members and non-Members who are existing subscribers of the End-of-Day Report or 10-Minute Report and choose to also purchase historical Open-Close Report data for the same category of products. Providing the discount only to existing subscribers is not unfairly discriminatory because it is a reasonable means to encourage the purchase of monthly subscriptions to Open-Close Report data.

The Exchange believes it is reasonable, equitable and not unfairly discriminatory to exclude ad-hoc requests for historical 1-Minute Report data from the discount program because a participant who subscribes to the 1-Minute Report (or requests historical 1-Minute Reports) receives ten times the data points that they would receive in comparison to the 10-Minute Report, which is more beneficial since they are receiving additional data based on shorter intervals. The increased frequency of data intervals in the 1-Minute Report provides more current information and more data reporting intervals. As such, the Exchange believes it reasonable, equitable and not unfairly discriminatory to exclude ad-hoc requests for historical 1-Minute Report data from the discount program because of the enhanced value of the 1-Minute Report, which is 10 times the amount of data. In addition, the Exchange offers free historical data for any current subscriber to the 1-Minute Report who makes an ad-hoc request for historical 1-Minute Report data. In particular, a current 1-Minute Report subscriber who purchases historical 1-Minute Report data may submit an ad-hoc request for historical End-of-Day Report data and/or historical 10-Minute Report data for the same date or date range for no additional charge.[24]

Lastly, the purchase of this data product is discretionary and not compulsory. Indeed, no market participant is required to purchase the historical Open-Close Report data, and the Exchange is not required to make the historical Open-Close Report data available to all investors. Potential purchasers may request the data at any

time if they believe it to be valuable or may decline to purchase such data.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange operates in a highly competitive environment in which the Exchange must continually adjust its fees to remain competitive. Because competitors are free to modify their own fees in response, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited. As discussed above, Open-Close Report data is subject to direct competition from several other options exchanges that offer substantively similar substitutes to the Exchange's Open-Close Report, albeit for trading data on those exchanges.[25] Moreover, purchase of historical Open-Close Report data is entirely optional. It is designed to help investors understand underlying market trends to improve the quality of investment decisions, but is not necessary to execute a trade.

The rule change is grounded in the Exchange's efforts to compete more effectively. In this competitive environment, potential purchasers are free to choose which, if any, similar product to purchase to satisfy their need for market information. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges. Further, the Exchange believes that the proposed change will not cause any unnecessary or inappropriate burden on intermarket competition, as the extension of the temporary discount program applies uniformly to any purchaser of historical Open-Close Report data.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[26] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors, or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–EMERALD–2026–17 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–EMERALD–2026–17. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–EMERALD–2026–17 and should be submitted on or before August 6, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[27]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105894; File No. SR–PEARL–2026–34]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the MIAX Pearl Options Exchange Fee Schedule To Amend Certain Fees and Rebates Applicable to Transactions in Non-Penny Classes for All Origins

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, MIAX PEARL, LLC (''MIAX Pearl'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Pearl Options Exchange Fee Schedule (the ''Fee Schedule'') to amend certain fees and rebates applicable to transactions in non-Penny Classes (defined below) for all origins.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/pearl-options/rule-filings* and at the Exchange's principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section 1)a) of the Fee Schedule to: (1) amend the Priority Customer [3] origin table to increase Maker (described below) rebates [4] in all tiers in non-Penny Classes; (2) amend the MIAX Pearl Market Maker [5] origin table to amend Maker rebates in all tiers in non-Penny Classes and increase Taker fees in all tiers in non-Penny Classes; and (3) amend the Non-Priority Customer, Firm, BD, and Non-MIAX Pearl Market Maker origin (collectively referred to herein as the ''Professional origin'') [6] table to amend Maker rebates in all tiers in non-Penny Classes and increase Taker fees in all tiers in non-Penny Classes.

Background

The Exchange currently assesses transaction rebates and fees to all market participants which are based upon the total monthly volume executed by the Member [7] on MIAX Pearl in the relevant, respective origin type (not including Excluded Contracts) [8] (as the numerator) expressed as a percentage of (divided by) TCV [9] (as the denominator). In addition, the per contract transaction rebates and fees are applied retroactively to all eligible volume for that origin type once the respective threshold tier has been reached by the Member. The Exchange aggregates the volume of Members and their Affiliates.[10] Members that place resting liquidity, *i.e.,* orders resting on the Book [11] of the MIAX Pearl System,[12] are paid the specified ''maker'' rebate (each a ''Maker''), and Members that execute against resting liquidity are assessed the specified ''taker'' fee (each a ''Taker''). For opening transactions and ABBO [13] uncrossing transactions, per contract transaction rebates and fees are waived for all market participants. Finally, Members are assessed lower transaction fees and receive lower rebates for order executions in standard option classes in the Penny Interval Program [14] (''Penny Classes'') than for order executions in standard option classes which are not in the Penny Interval Program (''non-Penny Classes''), where Members are assessed higher transaction fees and receive higher rebates.

Proposal To Amend the Priority Customer Origin Table To Increase Maker Rebates in Non-Penny Classes

First, the Exchange proposes to amend the Priority Customer origin table to increase the Maker rebates in all tiers for Priority Customer orders in non-Penny Classes that trade against all origins. Currently, the Priority Customer origin table provides certain volume criteria thresholds for all tiers that are based upon the total monthly volume executed in all option classes by a Priority Customer on MIAX Pearl as a percentage of TCV. Pursuant to the Priority Customer origin table, Priority Customers qualify for Maker rebates of ($1.06) per contract for all tiers when Priority Customer orders in non-Penny Classes trade against all origins.

The Exchange now proposes to amend the Priority Customer origin table to increase the Maker rebates from ($1.06) to ($1.19) per contract for all tiers for Priority Customer orders in non-Penny Classes that trade against all origins. The Exchange does not propose to amend any of the volume threshold criteria or the Taker fee for Priority Customers in non-Penny Classes.

The purpose of this proposed change is for business and competitive reasons in order to attract additional non-Penny Class volume from Members by increasing the Maker rebates for options

[3] The term ''Priority Customer'' means a person or entity that (i) is not a broker or dealer in securities, and (ii) does not place more than 390 orders in listed options per day on average during a calendar month for its own beneficial accounts(s). The number of orders shall be counted in accordance with Interpretation and Policy .01 of Exchange Rule 100. *See* the Definitions section of the Fee Schedule and Exchange Rule 100, including Interpretation and Policy .01.

[4] Rebates are denoted in parentheses in the Fee Schedule.

[5] The term ''Market Maker'' means a Member registered with the Exchange for the purpose of making markets in options contracts traded on the Exchange and that is vested with the rights and responsibilities specified in Chapter VI of Exchange Rules. *See* the Definitions section of the Fee Schedule and Exchange Rule 100.

[6] The Exchange notes that certain terms are not specifically defined in the Rulebook, including away Non-Priority Customer, Firm, BD, and Non-MIAX Pearl Market Make.

[7] The term ''Member'' means an individual or organization that is registered with the Exchange pursuant to Chapter II of Exchange Rules for purposes of trading on the Exchange as an ''Electronic Exchange Member'' or ''Market Maker.'' Members are deemed ''members'' under the Exchange Act. *See* the Definitions section of the Fee Schedule and Exchange Rule 100.

[8] The term ''Excluded Contracts'' means any contracts routed to an away market for execution. *See* the Definitions section of the Fee Schedule.

[9] The term ''TCV'' means total consolidated volume calculated as the total national volume in those classes listed on MIAX Pearl for the month for which the fees apply, excluding consolidated volume executed during the period time in which the Exchange experiences an ''Exchange System Disruption'' (solely in the option classes of the affected Matching Engine (as defined below)). *See* the Definitions section of the Fee Schedule. The term ''Exchange System Disruption'' means an outage of a Matching Engine or collective Matching Engines for a period of two consecutive hours or more, during trading hours. *Id.* A ''Matching Engine'' is a part of the MIAX Pearl electronic system that processes options orders and trades on a symbol-by-symbol basis. Some Matching Engines will process option classes with multiple root symbols, and other Matching Engines may be dedicated to one single option root symbol (for example, options on SPY may be processed by one single Matching Engine that is dedicated only to SPY). A particular root symbol may only be assigned to a single designated Matching Engine. A particular root symbol may not be assigned to multiple Matching Engines. *Id.* The Exchange believes that it is reasonable and appropriate to select two consecutive hours as the amount of time necessary to constitute an Exchange System Disruption, as two hours equates to approximately 1.4% of available trading time per month. The Exchange notes that the term ''Exchange System Disruption'' and its meaning have no applicability outside of the Fee Schedule, as it is used solely for purposes of calculating volume for the threshold tiers in the Fee Schedule.

[10] The term ''Affiliate'' means (i) an affiliate of a Member of at least 75% common ownership between the firms as reflected on each firm's Form BD, Schedule A, or (ii) the Appointed Market Maker of an Appointed EEM (or, conversely, the Appointed EEM of an Appointed Market Maker). An ''Appointed Market Maker'' is a MIAX Pearl Market Maker (who does not otherwise have a corporate affiliation based upon common ownership with an EEM) that has been appointed by an EEM and an ''Appointed EEM'' is an EEM (who does not otherwise have a corporate affiliation based upon common ownership with a MIAX Pearl Market Maker) that has been appointed by a MIAX Pearl Market Maker, pursuant to the following process. A MIAX Pearl Market Maker appoints an EEM and an EEM appoints a MIAX Pearl Market Maker, for the purposes of the Fee Schedule, by each completing and sending an executed Volume Aggregation Request Form by email to *membership@miaxoptions.com* no later than 2 business days prior to the first business day of the month in which the designation is to become effective. Transmittal of a validly completed and executed form to the Exchange along with the Exchange's acknowledgement of the effective designation to each of the Market Maker and EEM will be viewed as acceptance of the appointment. The Exchange will only recognize one designation per Member. A Member may make a designation not more than once every 12 months (from the date of its most recent designation), which designation shall remain in effect unless or until the Exchange receives written notice submitted 2 business days prior to the first business day of the month from either Member indicating that the appointment has been terminated. Designations will become operative on the first business day of the effective month and may not be terminated prior to the end of the month. Execution data and reports will be provided to both parties. *See* the Definitions section of the Fee Schedule.

[11] The term ''Book'' means the electronic book of buy and sell orders and quotes maintained by the System. *See* Exchange Rule 100.

[12] The term ''System'' means the automated trading system used by the Exchange for the trading of securities. *See* Exchange Rule 100.

[13] The term ''ABBO'' means the best bid(s) or offer(s) disseminated by other Eligible Exchanges (defined in Exchange Rule 1400(g)) and calculated by the Exchange based on market information received by the Exchange from OPRA. *See* the Definitions section of the Fee Schedule and Exchange Rule 100.

[14] *See* Securities Exchange Act Release No. 88992 (June 2, 2020), 85 FR 35142 (June 8, 2020) (SR–PEARL–2020–06).

transactions in non-Penny Classes in all tiers for Priority Customer orders. The Exchange believes that this may, in turn, encourage Members to submit more Priority Customer orders, leading to increased liquidity on the Exchange to the benefit of all market participants by providing more trading opportunities and tighter spreads.

Proposal To Amend the Market Maker Origin Table To Amend Maker Rebates in all Tiers and Increase Taker Fees in all Tiers in Non-Penny Classes

The Exchange proposes to amend the Market Maker origin table to amend the Maker rebates in all tiers and increase the Taker fees in all tiers for Market Maker orders in non-Penny Classes that trade against all origins. Currently, pursuant to the Market Maker origin table, Market Makers qualify for the Maker rebate of ($0.55) per contract or Taker fee of $1.20 per contract in tier 1 for non-Penny Classes if the Market Maker executes above 0.00% to at least 0.20% of TCV. Market Makers can qualify for the Maker rebate of ($0.55) per contract or Taker fee of $1.20 per contract in tier 2 for non-Penny Classes by achieving at least one of the following three volume calculations: (i) if the Market Maker executes above 0.20% to at least 0.50% of TCV; or (ii) if the Market Maker executes above 0.55% in SPY/QQQ/IWM classes; or (iii) if the Market Maker executes above 0.30% in SPY/QQQ/IWM classes when adding liquidity to the Exchange.[15] Market Makers can qualify for the Maker rebate of ($0.60) per contract or Taker fee of $1.20 per contract in tier 3 for non-Penny Classes by achieving at least one of the following two volume calculations: (i) if the Market Maker executes above 0.50% to at least 0.85% of TCV; or (ii) if the Market Maker executes above 1.10% in SPY when adding liquidity.[16] Market Makers can qualify for the Maker rebate of ($0.65) per contract or Taker fee of $1.20 per contract in tier 4 for non-Penny Classes by achieving at least one of the following two volume calculations: (i) if the Market Maker executes above 0.85% to at least 1.25% of TCV; or (ii) if the Market Maker executes above 2.50% in SPY.[17] Market Makers can qualify for the Maker rebate of ($0.70) per contract or Taker fee of $1.20 per contract in tier 5 for non-Penny Classes if the Market Maker executes above 1.25% to at least 1.40% of TCV. Finally, Market Makers can qualify for the Maker rebate of ($0.85) per contract or Taker fee of $1.20 per contract in tier 6 if the Market Maker executes above 1.40% of TCV.

The Exchange now proposes to amend the Market Maker origin table to (i) increase the Maker rebates to ($0.80) per contract for tiers 1, 2, 3, 4, and 5 for Market Maker orders in non-Penny Classes that trade against all origins; and (ii) reduce the Maker rebate from ($0.85) to ($0.80) per contract for tier 6 for Market Maker orders in non-Penny Classes that trade against all origins. The Exchange also proposes to increase the Taker fees from $1.20 to $1.21 per contract for all tiers for Market Maker orders in non-Penny Classes that trade against all origins. The Exchange does not propose to amend any of the volume threshold criteria.

The purpose of the proposed changes to the Maker rebates is for business and competitive reasons in order to attract additional non-Penny Class volume from Members by increasing the Maker rebates for options transactions in non-Penny Classes in tiers 1, 2, 3, 4, and 5 for Market Maker orders. The Exchange believes that this may, in turn, encourage Members to submit more Market Maker orders, leading to increased liquidity on the Exchange to the benefit of all market participants by providing more trading opportunities and tighter spreads. Additionally, the Exchange believes that even with the proposed decrease to the Maker rebate for Marker Maker orders in non-Penny Classes in tier 6 and the proposed increase to the Taker fees for Market Maker orders in non-Penny Classes in all tiers, the Exchange's Maker rebates and Taker fees will remain competitive with the rebates offered and fees assessed by other exchanges for similar transactions.[18]

Proposal To Amend the Professional Origin Table To Amend Maker Rebates in Certain Tiers and Increase Taker Fees in all Tiers in Non-Penny Classes

The Exchange proposes to amend the Professional origin table to increase the Maker rebates in tiers 1, 2, 3, 4, and 5 for Professional orders in non-Penny Classes that trade against all origins, reduce the Marker rebate in tier 6 for Professional orders in non-Penny Classes that trade against all origins, and increase the Taker fees in all tiers for Professional orders in non-Penny Classes that trade against all origins. The Professional origin table provides certain volume criteria thresholds for all tiers that are based upon the total monthly volume executed in all option classes by a Professional on MIAX Pearl as a percentage of TCV. Currently, Professionals can qualify for the following rebates and fees for transactions in non-Penny Classes: (i) Maker rebate of ($0.55) per contract or Taker fee of $1.20 per contract in tier 1 if the Professional executes above 0.00% to at least 0.20% of TCV; (ii) Maker rebate of ($0.55) per contract or Taker fee of $1.20 per contract in tier 2 if the Professional executes above 0.20% to at least 0.50% of TCV; (iii) Maker rebate of ($0.60) per contract or Taker fee of $1.20 per contract in tier 3 if the Professional executes above 0.50% to at least 0.85% of TCV; (iv) Maker rebate of ($0.65) per contract or Taker fee of $1.20 per contract in tier 4 if the Professional executes above 0.85% to at least 1.25% of TCV; (v) Maker rebate of ($0.70) per contract or Taker fee of $1.20 per contract in tier 5 if the Professional executes above 1.25% to at least 1.50% of TCV; and (vi) Maker rebate of ($0.85) per contract or Taker fee of $1.20 per

[15] In tier 2 for the Market Maker origin, the alternative volume criteria (above 0.55% in SPY/QQQ/IWM) is calculated based on the total monthly volume executed by the Market Maker collectively in SPY, QQQ, and IWM options on MIAX Pearl in the relevant origin type, not including Excluded Contracts, (as the numerator) expressed as a percentage of (divided by) SPY/QQQ/IWM TCV (as the denominator). In Tier 2 for the Market Maker origin, the alternative volume criteria (above 0.30% in SPY/QQQ/IWM when adding liquidity) is calculated based on the total monthly volume that added liquidity executed by the Market Maker collectivity in SPY, QQQ, and IWM options on MIAX Pearl in the relevant origin type, not including Excluded Contracts, (as the numerator) expressed as a percentage of (divided by) SPY/QQQ/IWM TCV (as the denominator). *See* Fee Schedule, Section 1)a) (explanatory notes section below the tables).

[16] In tier 3 for the Market Maker origin, the alternative volume criteria (above 1.10% in SPY when adding liquidity) is calculated based on the total monthly volume that added liquidity executed by the Market Maker solely in SPY options on MIAX Pearl, not including Excluded Contracts, (as the numerator) expressed as a percentage of (divided by) SPY TCV (as the denominator). Market Makers that do not qualify for the alternative volume criteria in tier 3 will receive the tier 3 rates in the Market Maker origin table in Penny Classes and non-Penny Classes. Members will receive the highest tier based on the thresholds achieved. *See* Fee Schedule, Section 1)a), footnote ✦.

[17] In tier 4 for the Market Maker origin, the alternative volume criteria (above 2.50% in SPY) is calculated based on the total monthly volume executed by the Market Maker solely in SPY options on MIAX Pearl in the relevant origin type, not including Excluded Contracts, (as the numerator) expressed as a percentage of (divided by) SPY TCV (as the denominator). *See* Fee Schedule, Section 1)a) (explanatory notes section below the tables).

[18] *See* The Nasdaq Stock Market LLC (''Nasdaq''), Options 7: Pricing Schedule, Section 2, Nasdaq Options Market—Fees and Rebates (providing NOM Market Makers a rebate up to ($0,40) per contract for adding liquidity to Nasdaq in non-penny classes and assessing NOM Market Makers a fee of $1.25 per contract for removing liquidity from Nasdaq in non-penny classes); *see also* MEMX LLC (''MEMX'') Options Fee Schedule, Transaction Fees section (providing market makers a rebate of ($0.80) per contract for adding liquidity to MEMX in non-penny classes and assessing market makers a fee of $1.21 per contract for removing liquidity from MEMX in non-penny classes).

contract in tier 6 if the Professional executes above 1.50%.

The Exchange now proposes to amend the Professional origin table to increase the Maker rebates to ($0.80) per contract for tiers 1, 2, 3, 4, and 5 for Professional orders in non-Penny Classes that trade against all origins and reduce the Maker rebates from ($0.85) to ($0.80) per contract for tier 6 for Professional orders in non-Penny Classes that trade against all origins. The Exchange also proposes to increase the Taker fees from $1.20 to $1.21 per contract for all tiers for Professional orders in non-Penny Classes that trade against all origins. The Exchange does not propose to amend any of the volume threshold criteria.

The purpose of the proposed changes to the Maker rebates is for business and competitive reasons in order to attract additional non-Penny Class volume from Members by increasing the Maker rebates for options transactions in non-Penny Classes in tiers 1, 2, 3, 4, and 5 for Professional orders. The Exchange believes that this may, in turn, encourage Members to submit more Professional orders, leading to increased liquidity on the Exchange to the benefit of all market participants by providing more trading opportunities and tighter spreads. Additionally, the Exchange believes that even with the proposed decrease to the Maker rebates for Professional orders in non-Penny Classes in tier 6 and proposed increase to the Taker fees for Professional orders in non-Penny Classes in all tiers that the Exchange's Maker rebates and Taker fees will remain competitive with the rebates offered and fees assessed by at least one other exchange for similar transactions.[19]

Implementation

The proposed changes are effective beginning July 1, 2026.

2. Statutory Basis

The Exchange believes that its proposal to amend the Fee Schedule is consistent with Section 6(b) of the Act [20] in general, and furthers the objectives of Section 6(b)(4) of the Act,[21] in that it is an equitable allocation of reasonable dues, fees and other charges among Exchange Members and issuers and other persons using its facilities, and 6(b)(5) of the Act,[22] in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [23]

There are currently 18 registered options exchanges competing for order flow. Based on publicly-available information, and excluding index-based and singly-listed options, no single exchange had more than approximately 11–12% of the multiply-listed equity options market share for the month of May 2026.[24] Therefore, no exchange possesses significant pricing power. More specifically, the Exchange had a market share of approximately 1.69% of executed volume of multiply-listed equity options for the month of May 2026.[25]

Proposal To Amend the Priority Customer Origin Table To Increase All Maker Rebates in Non-Penny Classes

The Exchange believes its proposal to amend the Priority Customer origin to increase the Maker rebates in all tiers to ($1.19) per contract for Priority Customer orders in non-Penny Classes that trade against all origins is reasonable, equitable and not unfairly discriminatory because it would further incentivize Priority Customer orders to the Exchange. The Exchange believes that this may, in turn, encourage Members to submit more Priority Customer orders, leading to increased liquidity on the Exchange to the benefit of all market participants by providing more trading opportunities and tighter spreads. The Exchange believes the proposed increased Maker rebates in all tiers for Priority Customer orders in non-Penny Classes is equitable and not unfairly discriminatory because it will apply equally to all market participants who provide Priority Customer orders in such classes.

Proposals To Amend the Market Maker and Professional Origins To Amend Maker Rebates in all Tiers and Increase Taker Fees in all Tiers in Non-Penny Classes

The Exchange believes its proposal to amend the Market Maker and Professional origins to increase the Maker rebates in tiers 1, 2, 3, 4, and 5 to ($0.80) per contract for Market Maker and Professional orders in non-Penny Classes that trade against all origins is reasonable, equitable and not unfairly discriminatory because it would further incentivize Market Maker and Professional orders to the Exchange. The Exchange believes that this may, in turn, encourage Members to submit more Market Maker and Professional orders, leading to increased liquidity on the Exchange to the benefit of all market participants by providing more trading opportunities and tighter spreads. The Exchange believes the proposed increased Maker rebates in tiers 1, 2, 3, 4, and 5 for Market Maker and Professional orders in non-Penny Classes is equitable and not unfairly discriminatory because it will apply equally to all market participants who provide Market Maker and Professional orders in such classes.

The Exchange believes the proposal to amend the Market Maker and Professional origins to reduce the Maker rebates from ($0.85) to ($0.80) per contract in tier 6 in non-Penny Classes is reasonable, equitably allocated, and not unfairly discriminatory because, even with the proposed decrease, the Exchange believes the proposed Maker rebates will not discourage Market Maker and Professional order flow. The Exchange notes that despite the changes proposed herein, the Exchange's proposed Maker rebate of ($0.80) per contract for the Market Maker and Professional origin for respective tier 6 in non-Penny Classes remains competitive with the Maker rebates for similar executions that are charged by other equity options exchanges.[26]

The Exchange believes the proposal to amend the Market Maker and Professional origins to increase Taker fees to $1.21 per contract in all tiers in non-Penny Classes is reasonable, equitably allocated, and not unfairly discriminatory because, even with the

[19] *See* MEMX Options Fee Schedule, Transaction Fees section (providing professional a rebate of ($0.72) for adding liquidity to MEMX in non-penny classes and assessing professional a fee of $1.21 per contract for removing liquidity from MEMX in non-penny classes).

[26] *See supra* notes 18 and 19.

proposed increase, the Exchange believes the proposed Taker fees will not discourage Market Maker and Professional order flow. The Exchange notes that despite the changes proposed herein, the Exchange's proposed Taker fee of $1.21 per contract for the Market Maker and Professional origin for all tiers in non-Penny Classes remains competitive with (and lower than) the Taker fees for similar executions that are charged by other equity options exchanges.[27]

The Exchange believes that even with the proposed decrease to the Maker rebates for Market Maker and Professional orders in non-Penny Classes in tier 6 and proposed increase to the Taker fees for Market Maker and Professional orders in non-Penny Classes in all tiers, the Exchange's Maker rebates and Taker fees for Market Maker and Professional transactions in non-Penny Classes will continue to encourage such market participants to trade on the Exchange. In turn, this should continue to contribute to a deep and liquid market to the benefit of all market participants and allow the Exchange to maintain its attractiveness as a trading venue. The Exchange further believes the proposed decreased rebates and increased Taker fees are equitable and not unfairly discriminatory because the proposed decreased rebates and increased fees will apply to all Market Maker and Professional origin orders in non-Penny Classes, regardless of volume.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Intra-Market Competition

The Exchange does not believe that any of the proposed changes will impose any burden on intra-market competition. The Exchange believes its proposal to amend the Priority Customer origin to increase the Maker rebates in all tiers for Priority Customer orders in non-Penny Classes that trade against all origins will not impose any burden on intra-market competition. Instead, the Exchange believes this proposed change will promote competition because it will further incentivize Priority Customer orders to the Exchange. The Exchange believes that this may, in turn, encourage Members to submit more Priority Customer orders, leading to increased liquidity on the Exchange to the benefit of all market participants by providing more trading opportunities and tighter spreads.

Similarly, the Exchange believes its proposal to amend the Market Maker and Professional origins to increase the Maker rebates in tiers 1, 2, 3, 4, and 5 for Market Maker and Professional orders in non-Penny Classes that trade against all origins will not impose any burden on intra-market competition. Instead, the Exchange believes this proposed change will promote competition because it will further incentivize Market Maker and Professional orders to the Exchange. The Exchange believes that this may, in turn, encourage Members to submit more Market Maker and Professional orders, leading to increased liquidity on the Exchange to the benefit of all market participants by providing more trading opportunities and tighter spreads.

The Exchange believes that its proposal to reduce Maker rebates in tier 6 and increase Taker fees for Market Maker and Professional transactions in non-Penny Classes will not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because these changes are for business and competitive reasons. The Exchange notes that despite the changes proposed herein, the Exchange's rebates and fees remain competitive with the maker rebates offered and the taker fees assessed by at least one other exchanges for similar executions in non-penny classes by those exchanges market makers and professional customers.[28]

Inter-Market Competition

The Exchange does not believe that the proposed changes will impose any burden on inter-market competition and the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. There are currently 18 registered options exchanges competing for order flow. Based on publicly-available information, and excluding index-based options, no single exchange had more than approximately 11–12% of the multiply-listed equity options market share for the month of May 2026.[29] Therefore, no exchange possesses significant pricing power. More specifically, the Exchange had a market share of approximately 1.69% of executed volume of multiply-listed equity options for the month of May 2026.[30]

In such an environment, the Exchange must continually adjust its rebates and tiers to remain competitive with other options exchanges. Because competitors are free to modify their own fees and tiers in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited. The Exchange believes that the proposed rule changes reflect this competitive environment because they modify the Exchange's fees and rebates in a manner that encourages market participants to continue to provide liquidity and to send order flow to the Exchange.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[31] and Rule 19b–4(f)(2)[32] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or

[27] *See supra* notes 18 and 19.

• Send an email to *rule-comments@sec.gov.* Please include file number SR–PEARL–2026–34 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–PEARL–2026–34. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–PEARL–2026–34 and should be submitted on or before August 6, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[33]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105899; File No. SR–CME–2026–001]

Self-Regulatory Organizations; Chicago Mercantile Exchange Inc.; Order Approving a Proposed Rule Change Relating to Amendments to Chicago Mercantile Exchange Inc.'s Rules Governing Performance Bond Requirements: Account Holder Level

July 13, 2026.

I. Introduction

On June 1, 2026, the Chicago Mercantile Exchange Inc. (''CME'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'' or ''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend CME Rule 930 in Chapter 9 of the CME Rulebook relating to customer performance bond requirements for security futures contracts that CME intends to list for trading.[3]

The proposed rule change was published for comment in the **Federal Register** on June 8, 2026.[4] The Commission received no comment letters in response to the Notice. This order approves the proposed rule change.

II. Description of the Proposed Rule Change

A. Background

As described more fully in the Notice, on April 10, 2026, CME, in its capacity as a designated contract market, submitted a 1–N notice filing to the Commission to register as a national securities exchange for security futures products pursuant to the notice registration provisions of Section 6(g) of the Exchange Act.[5] On April 29, 2026, the Commission issued a notice acknowledging receipt of such written notice and effectiveness of CME's notice registration as a national securities exchange contemporaneously with CME's submission of the 1–N notice on April 10, 2026.[6]

CME submitted the proposed rule change in connection with its plans to list cash-settled single stock futures, to establish customer-level margin requirements for security futures that are consistent with current Commission (and Commodity Futures Trading Commission (''CFTC'')) requirements.[7]

B. Proposed Rule Change

CME proposes revisions to Rule 930 (Performance Bond Requirements; Account Holder Level) to establish procedures relating to the determination and administration of customer margin requirements for security futures, as well as to exclude qualifying security futures dealers from those requirements and related regulatory requirements. The proposed additions to Rule 930 largely reinstate the margin provisions for security futures that CME previously added to Rule 930, with some modifications to align with the Commission's (and CFTC's) current margin requirements for security futures and some non-substantive clarification changes to the prior text.[8]

1. Performance Bond Rates

CME proposed that proposed Rule 930.B.2.a. would provide that customer performance bond rates shall be established at levels no lower than those prescribed by SEC Rule 242.403 and CFTC Regulation 41.45 or any successor regulations. Proposed Rule 930.B.2.c. elaborates by establishing the requisite performance bond level for each long or short position in a security future at 15% of the current market value of such security futures contract, or such other requirement as may be established by the SEC and CFTC for purposes of SEC Rule 242.403(b)(1) and CFTC Regulation 41.45(b)(1).

Proposed Rule 930.B.2.d. sets out exceptions to that 15% requirement as permitted under SEC Rule 242.403(b)(2) and CFTC Regulation 41.45(b)(2), which establish that a self-regulatory authority may set the required initial or maintenance performance bond level for offsetting positions involving security futures and related positions at a level lower than the level that would apply if performance bond requirements for such positions were calculated separately based on the aforementioned 15% requirement, provided the rules establishing such lower performance bond levels meet the criteria set forth in Section 7(c)(2)(B) of the Act.[9]

Proposed Rule 930.B.2.d. includes a table that sets out in detail the performance bond offsets available with respect to particular combinations of security futures and related positions. CME stated that the offset strategies in the table align with those the SEC and CFTC have acknowledged are permissible, as set forth in their joint 2020 release on customer margin rules relating to security futures.[10]

2. Exclusions From Margin Requirements

Non-customers. Proposed Rule 930.B.2.b. would identify ''exempted persons'' and ''market makers'' as non-

[9] That section requires that: (I) the margin requirements for a security future product be consistent with the margin requirements for comparable option contracts traded on any exchange registered pursuant to [Section 6(a) of the Act]; and (II) initial and maintenance margin levels for a security future product not be lower than the lowest level of margin, exclusive of premium, required for any comparable option contract traded on any exchange registered pursuant to [Section 6(a) of the Act], other than an option on a security future. *See* Notice, 91 FR at 34694.

[10] *See* Notice, 91 FR at 34694.

customers for the purpose of the rule amendments. Those non-customers would be exempt from the application of the rule's provisions. For the purposes of CME's rulebook, CME stated that the term ''exempted person'' has the definition specifically referenced in applicable SEC and CFTC regulations.[11]

Market Maker Exclusion. SEC Rule 242.400(c)(2)(v) and CFTC Regulation 41.42(c)(2)(v) permit exchanges to adopt rules containing specified requirements for security futures dealers, on the basis of which the financial relations between security futures intermediaries, on the one hand, and qualifying security futures dealers, on the other, are excluded from the customer performance bond requirements for security futures. Rules so adopted by an exchange must meet the criteria set forth in Section 7(c)(2)(B) of the Act. CME proposes a market maker exclusion in its proposed Rule 930.B.2.b. consistent with the requirements of those provisions. To qualify for the market maker exclusion, a person must be a member of CME and registered as a dealer with the SEC under Section 15(b) of the Act.[12]

A proposed market maker must also hold itself out as willing to buy and sell security futures for its own account on a regular or continuous basis. As described more fully in the Notice, the proposed market maker exclusion provides three alternative ways for a person to satisfy this requirement.[13] Under the first alternative CME proposes, the market maker must (1) provide continuous two-sided quotations throughout the trading day for all delivery months of security futures contracts representing a meaningful proportion of the total trading volume of security futures contracts on the Exchange, subject to relaxation during unusual market conditions as determined by CME (such as a fast market in either a security futures contract or a security underlying a security futures contract) at which times the market maker must use its best efforts to quote continuously and competitively; and (2) when providing quotations, quote with a maximum bid/ask spread of no more than the greater of $0.20 or 150% of the bid/ask spread in the primary market for the security underlying each security futures contract. Beginning on the 181st calendar day after the commencement of trading of security futures contracts on the Exchange, a ''meaningful proportion of the total trading volume of security futures contracts on the Exchange from time to time'' shall mean a minimum of 20% of such trading volume.

Under the second alternative, CME proposed that the market maker must (1) respond to at least 75% of the requests for quotation for all delivery months of security futures contracts representing a meaningful proportion of the total trading volume of security futures contracts on the Exchange, subject to relaxation during unusual market conditions as determined by the CME (such as a fast market in either a security futures contract or a security underlying a security futures contract) at which times the Market Maker must use its best efforts to quote competitively; and (2) when responding to requests for quotation, quote within five seconds with a maximum bid/ask spread of no more than the greater of $0.20 or 150% of the bid/ask spread in the primary market for the security underlying each security futures contract. As with the first alternative, beginning on the 181st calendar day after the commencement of trading of security futures contracts on the Exchange, a ''meaningful proportion of the total trading volume of security futures contracts on the Exchange from time to time'' shall mean a minimum of 20% of such trading volume.

Under the third alternative, CME proposes that the market maker is assigned to a group of security futures contracts listed on the Exchange that is either unlimited in nature (''Unlimited Assignment'') or is assigned to no more than 20% of the security futures contracts listed on the Exchange (''Limited Assignment''). In addition, CME states that this alternative provides that: (a) At least 75% of the market maker's total trading activity in Exchange security futures contracts is in its assigned security futures contracts, measured on a quarterly basis; (b) during at least 50% of the trading day, the market maker has bids or offers in the market that are at or near the best market, except in unusual market conditions (such as a fast market in either a security futures contract or a security underlying a security futures contract), with respect to at least 25% (in the case of an Unlimited Assignment) or at least one (in the case of a Limited Assignment) of its assigned security futures contracts; and (c) the first two requirements are satisfied on at least 90% (in the case of an Unlimited Assignment) or 80% (in the case of a Limited Assignment, or in the case of either an Unlimited or Limited Assignment but where the Exchange is listing four or fewer security futures contracts) of the trading days in each calendar quarter.[14]

Under the proposed revisions, market makers are required to maintain books and records including trading statements and other financial records that would evidence compliance with these standards. CME stated that this recordkeeping requirement includes, without limitation, such trading statements and other financial records as may be necessary specifically to verify compliance. CME stated that failure on the part of a market maker to comply with these standards may result in revocation of security futures dealer status or other sanctions provided under CME Rules.[15]

3. Performance Bond Administration

Proposed Rule 930.C.2.a identifies the types of performance bonds that a security futures intermediary may accept from a customer. Consistent with SEC Rule 242.404(b) and CFTC Regulation 41.46(b), CME proposes that acceptable types of performance bonds are limited to: deposits of cash, margin securities (subject to specified restrictions), exempted securities, any other assets permitted under Regulation T of the Board of Governors of the Federal Reserve System (''Federal Reserve Board'') to satisfy a performance bond deficiency in a securities margin account, and any combination of the foregoing. Proposed Rule 930.C.2.a. further provides that the different types of eligible performance bonds are to be valued in accordance with the applicable principles set forth in SEC Rules 242.404(c) and 242.404(e) and CFTC Regulations 41.46(c) and 41.46(e).

CME also proposed Rule 930.C.2.b. which provides that a security futures intermediary shall not accept as performance bond from any customer securities that have been issued by that customer or an affiliate of that customer unless the intermediary files a petition with and receives permission from the Exchange for such purpose. Proposed Rule 930.C.2.c. provides that all assets deposited by a customer to meet performance bond requirements must be and remain unencumbered by third-party claims against that customer.[16]

Proposed Rule 930.K.2. requires a security futures intermediary to take the deduction required with respect to an underfunded account in computing its net capital under applicable SEC and CFTC Regulations if the customer has failed to comply with a required performance bond call within a

[11] 17 CFR 41.43(a)(9); 17 CFR 242.401(a)(9).

[12] *See* Notice, 91 FR at 34694–36945.

[13] *See* Notice, 91 FR at 34695 (describing the three proposed alternatives in detail).

[16] *See* Notice, 91 FR at 34695.

reasonable period of time. CME stated that this requirement is consistent with SEC Rule 242.406(a) and CFTC Regulation 41.48(a). Further, proposed Rule 930.K.2. requires the liquidation of an account where there is a liquidating deficit, in accordance with SEC Rule 242.406(b) and CFTC Regulation 41.48(b).[17]

III. Discussion and Commission Findings

After careful review, the Commission finds that the proposed rule change is consistent with the requirements of the Exchange Act and the rules and regulations thereunder applicable to a national securities exchange.[18] As discussed in more detail below, the Commission finds that the proposed rule change is consistent with, Section 6(b)(5) of the Act [19] which requires, among other things, that the rules of a national securities exchange be designed to promote just and equitable principles of trade and, in general, to protect investors and the public interest.

Further, as discussed in more detail below, the Commission finds that the proposed rule change is consistent with Section 7(c)(2)(B) of the Exchange Act.[20] Section 7(c)(2)(B) of the Exchange Act requires, among other things, that the levels of margin (initial and maintenance) for security futures preserve the financial integrity of markets trading security futures, prevent systemic risk, be consistent with the margin requirements for comparable exchange-traded options, and be no lower than the lowest level of margin, exclusive of premium, required for any comparable exchange-traded option.[21] The CFTC and SEC (together the ''Commissions'') have jointly adopted customer margin requirements for security futures pursuant to authority delegated to them by the Federal Reserve Board under Section7(c)(2)(B) of the Exchange Act.[22]

The proposed rule change is consistent with the customer margin rules for security futures that the Commissions jointly adopted.[23] In particular, CME's proposed Rule 930.B.2.c. provides that for a security future held in a futures account, the minimum margin level for each long or short position in a security future shall not be less than 15% of the current market value of the relevant security futures contract.[24] This minimum margin requirement is consistent with the 15% margin requirement the Commissions adopted in the 2020 Security Futures Margin Release.[25] The offsets CME proposed in proposed CME Rule 930.B.2.d. also are consistent with the strategy-based offsets permitted for comparable offset positions involving exchange-traded options and published in the 2020 Security Futures Margin Release.[26]

In addition, CME proposed a market maker exclusion from the scope of the proposed security futures margin rule.[27] The Commissions' joint security futures margin rules do not apply to a member of a national securities exchange or national securities association that is registered with the exchange as a ''security futures dealer'' pursuant to exchange rules that must meet several criteria, including a requirement that a security futures dealer be required ''to hold itself out as being willing to buy and sell security futures for its own account on a regular or continuous basis.'' [28] To meet the market maker exclusion, CME proposed, among other things, that a person must be a member of CME and registered as a dealer with the SEC under Section 15(b) of the Act, and meet one of the three alternatives in proposed Rule 930.B.2.b. to satisfy the requirement it holds itself out as willing to buy and sell security futures for its own account on a regular or continuous basis.[29] These requirements are consistent with joint security future margin rules the Commission adopted [30] in that they require, among other things, that a CME member satisfy of one of the three proposed alternatives [31] to comply with the requirement that a market maker hold itself out as willing to buy and sell security futures for its own account on a regular or continuous basis.[32]

The proposed rule change establishes margin requirements for security futures traded on CME that would not be lower than the requirements under SEC and CFTC regulations or any successor regulations.[33] This requirement will ensure that margin requirements for security futures traded on CME under CME's proposed margin rules remain consistent with the Commissions' joint security futures margin rules and with Section 7(c)(2)(B) under the Exchange Act.[34] In addition, the 15% margin requirement will ensure that margin levels for security futures are set a sufficiently prudent level at the account level for customers of security futures intermediaries that trade security futures on CME.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Exchange Act,[35] that the proposed rule change (SR–CME–2026–001) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[36]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105886; File No. SR–MIAX–2026–29]

Self-Regulatory Organizations; Miami International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Exchange's Options Regulatory Fee (ORF)

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, Miami International Securities Exchange, LLC (''MIAX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Options Exchange Fee Schedule (''Fee Schedule'') regarding the Options Regulatory Fee (''ORF'').

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/miax-options/rule-filings,* and at the Exchange's principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange previously filed to amend its ORF assessment and collection methodology,[3] with the rate to be set closer to the implementation date of the amended ORF collection methodology. At this time, the Exchange proposes to set the ORF rate effective July 1, 2026 to $0.0170 per contract side. Additionally, the Exchange proposes to amend the rule text that describes the ORF collection methodology to provide greater clarity to the ORF collection methodology.

July 1, 2026 ORF

As of July 1, 2026, the Exchange will assess ORF for options transactions that clear in the ''customer'' range at The Options Clearing Corporation (''OCC''), however ORF will be assessed to each Members [4] for executions that occur on the Exchange. Specifically, the ORF will be collected on behalf of the Exchange from Members and non-members for all customer transactions executed on the Exchange. ORF would be assessed and collected on all ultimately cleared customer contracts, taking into account adjustments for CMTA that were provided to the Exchange the same day as the trade.[5] Further, the Exchange would bill ORF according to the clearing instructions provided on the execution. More specifically, the Exchange proposes to assess ORF based on the clearing instruction provided on the execution on trade date and would not take into consideration CMTA changes or transfers that occur at OCC.[6]

Based on the Exchange's review of regulatory costs, ORF revenue, and options transaction volume, the Exchange proposes to set the ORF rate effective July 1, 2026 to $0.0170 per contract side. On June 2, 2026, the Exchange notified Members of the proposed ORF rate effective July 1, 2026 via a Regulatory Circular.[7] The Exchange will continue to monitor the amount of revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed regulatory costs. More specifically, the Exchange will endeavor to ensure that the amount of revenue collected from the ORF will not exceed 80% of the Exchange's regulatory costs. The Exchange will monitor its regulatory costs and revenues at a minimum on a semi-annual basis. If the Exchange determines regulatory revenues exceed or are insufficient to cover a material portion of its regulatory costs in a given year, the Exchange will adjust the ORF by submitting a fee change filing to the Securities and Exchange Commission (the ''Commission''). The Exchange will notify Members of adjustments to the ORF via a Regulatory Circular in advance of any change.

As is the case today, the Exchange will monitor the amount of revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed regulatory costs. In determining whether an expense is considered a regulatory cost, the Exchange will continue to review all costs and makes determinations if there is a nexus between the expense and a regulatory function. The Exchange notes that fines collected by the Exchange in connection with a disciplinary matter will continue to offset regulatory costs.

Revenue generated from ORF, when combined with all of the Exchange's other regulatory fees and fines, is designed to cover a material portion of the regulatory costs to the Exchange of the supervision and regulation of Members' customer options business including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities. Regulatory costs include direct regulatory expenses and certain indirect expenses in support of the regulatory function. The direct expenses include in-house and third party service provider costs to support the day-to-day regulatory work such as surveillances, investigations and examinations. The indirect expenses are only those expenses that are in support of the regulatory functions, such areas include Office of the General Counsel, technology, finance, and internal audit.

Rule Text Amendment

The Exchange proposes to delete the last sentence of the rule text ''The ORF is not assessed on outbound linkage trades.'' This revision more accurately describes the Exchange's collection process as explained in its prior rule proposal.[8] The Exchange proposes this revised rule text because it provides

[8] *See supra* note 3.

greater clarity to the manner in which ORF is collected.

Additionally, the Exchange proposes to remove obsolete text regarding an ORF rate that is no longer in effect.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act [9] in general, and furthers the objectives of Section 6(b)(4) of the Act [10] in particular, in that it is an equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The Exchange also believes the proposal furthers the objectives of Section 6(b)(5) of the Act [11] in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange believes that the proposed fee change is reasonable, equitable and not unfairly discriminatory in that it is charged to all Exchange transactions that clear in the ''customer'' range at the OCC. Additionally, the Exchange believes that the proposed fee change ensures fairness by assessing a specific fee to those Members that require more Exchange regulatory services based on the amount of customer options business they conduct. Over recent years, options trading volume has increased with a growing percentage of the volume applicable to customer transactions. Customers trading on the Exchange (through a Member) benefit from the protections of a robust regulatory program including the maintenance of fair and orderly markets and protections against fraud and other manipulation. The Exchange believes it is equitable and not unfairly discriminatory to assess a regulatory fee to transactions that clear in the ''customer'' range to cover regulatory costs, but not to transactions clearing in the ''firm'' or ''market maker'' range because Clearing Members [12] and Market Makers [13] (who clear in the Firm and Market Maker range), as those market participants are generally subject to other Exchange fees, fines and obligations. For example, Clearing Members and Market Makers are required to pay Exchange application fees, permit fees, and connectivity fees, amongst others. In addition, all fines issued by the Exchange for regulatory infractions are assessed only to Members and would be applied to regulatory revenues. The Exchange expects that Clearing Members from whom the ORF is collected will pass through the fee to their customers (as the Exchange understands occurs today). In addition, Market Makers in particular are subject to various quoting and other obligations to ensure that they provide stable and liquid markets, which benefit all market participants including customers. Excluding Market Maker transactions from the ORF collection will allow Market Makers to better manage their costs more effectively thus enabling them to better allocate resources toward technology, risk management, and capacity to ensure continued liquidity provision.

In addition to the overall increase in ''customer'' range volume generally, regulating customer trading activity is more labor intensive and requires greater expenditure of human and technical resources than regulating non-customer trading activity, which tends to be more automated and less labor-intensive. For example, there are costs associated with main office and branch office examinations (*e.g.,* staff and travel expenses), as well as investigations into customer complaints and terminations of registered persons. As a result, the costs associated with administering the customer component of the Exchange's overall regulatory program are materially higher than the costs associated with administering the non-customer component (*e.g.,* Clearing Member proprietary transactions) of its regulatory program.[14] While the Exchange notes that it has broad regulatory responsibilities with respect to its Member's activities, irrespective of where their transactions take place, the Exchange believes it is reasonable to assess the proposed fee to only those transactions occurring on the Exchange. The proposed change more narrowly tailors the fee to products and transactions with a direct connection to the Exchange. With this proposal, transactions that would clear in the ''customer'' range occurring on other exchanges would no longer be subject to an ORF assessed by the Exchange.

The Exchange further believes that the proposed change fee is reasonable because it would help ensure that revenue collected from the ORF, in combination with other regulatory fees and fines, would cover a material portion of the Exchange's regulatory costs.

As noted above, the Exchange will also continue to monitor on at least a semiannual basis the amount of revenue collected from the ORF to ensure that it, in combination with its other regulatory fees and fines, would cover a material portion of the Exchange's regulatory costs and not exceed it.

Additionally, the Exchange proposes to delete the last sentence of the rule text and to remove obsolete text regarding the ORF rate that is no longer in effect. The Exchange believes that the proposal to delete the last sentence of the rule text and to remove obsolete text regarding the ORF rate that is no longer in effect would promote just and equitable principles of trade and remove impediments to and perfect the mechanism of a free and open market and a national market system because the proposed change would provide greater clarity to market participants regarding the Exchange's Fee Schedule. It is in the public interest for the Exchange's Fee Schedule to be accurate so as to eliminate the potential for confusion.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. This proposal does not create an unnecessary or inappropriate intra-market burden on competition because the ORF applies to all customer activity on the Exchange, thereby raising regulatory revenue to offset regulatory expenses. It also supplements the regulatory revenue

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(4).

[11] 15 U.S.C. 78f(b)(5).

[12] Clearing Member means a Member that has been admitted to membership in the Clearing Corporation pursuant to the provisions of the rules of the Clearing Corporation. *See* Exchange Rule 100.

[13] Market Makers refers to ''Lead Market Makers,'' ''Primary Lead Market Makers,'' and ''Registered Market Makers'' collectively. Lead Market Maker means a Member registered with the Exchange for the purpose of making markets in securities traded on the Exchange and that is vested with the rights and responsibilities specified in Chapter VI of these Rules with respect to Lead Market Makers. Primary Lead Market Maker means a Lead Market Maker appointed by the Exchange to act as the Primary Lead Market Maker for the purpose of making markets in securities traded on the Exchange. Registered Market Maker means a Member registered with the Exchange for the purpose of making markets in securities traded on the Exchange, who is not a Lead Market Maker and is vested with the rights and responsibilities specified in Chapter VI of these Rules with respect to Registered Market Makers. *See* Exchange Rule 100.

[14] If the Exchange changes its method of funding regulation or if circumstances otherwise change in the future, the Exchange may decide to modify the ORF or assess a separate regulatory fee on Member proprietary transactions if the Exchange deems it advisable.

derived from non-customer activity. The Exchange notes, however, the proposed change is not designed to address any competitive issues. Indeed, this proposal does not create an unnecessary or inappropriate inter-market burden on competition because it is a regulatory fee that supports regulation in furtherance of the purposes of the Act. The Exchange is obligated to ensure that the amount of regulatory revenue collected from ORF, in combination with its other regulatory fees and fines, does not exceed regulatory costs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [15] and paragraph (f) of Rule 19b–4 [16] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or SR–MIAX–2026–29 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–MIAX–2026–29. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–MIAX–2026–29 and should be submitted on or before August 6, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105888; File No. SR–C2–2026–019]

Self-Regulatory Organizations; Cboe C2 Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Definition of Professional To Require Monthly Reviews of Orders

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, Cboe C2 Exchange, Inc. (the ''Exchange'' or ''C2'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe C2 Exchange, Inc. (the ''Exchange'' or ''C2'') proposes to amend the definition of Professional [3] to require monthly reviews of orders. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Commission's website (*https://www.sec.gov/rules/sro.shtml*), the Exchange's website (*https://www.cboe.com/us/options/regulation/rule_filings/ctwo/*), and at the principal office of the Exchange.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the definition of Professional to modify the Exchange's quarterly review of Professional orders. This filing is based on a proposal recently submitted by Nasdaq ISE, LLC (''ISE'').[4]

Today, orders for any Public Customer [5] that average more than 390 orders per day during any month of a calendar quarter must be represented as Professional orders for the next calendar quarter.[6] In order to properly represent orders entered on the Exchange, Trading Permit Holder Organizations (''TPH

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Rule 1.1, which defines Professional as any person or entity that (a) is not a broker or dealer in securities, and (b) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s).

[4] *See* Securities Exchange Act Release No. 105218 (April 13, 2026), 91 FR 20542 (April 16, 2026) (SR ISE–2026–16) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Review of Professional Orders.)

[5] *See* Rule 1.1, which defines Public Customer as a person that is not a broker or dealer in securities.

[6] The requirement to review Public Customers' activity on at least a quarterly basis to determine whether orders that are not for the account of a broker-dealer should be represented as Public Customer Orders or Professional Orders is not in the current rule text, however it was described in the adopting proposal. See Securities Exchange Act Release No. 78187 (June 28, 2016), 81 FR 43681 (July 5, 2016) (C2–2016–009) (Notice of Filing of Proposed Rule Change Relating to Professionals Order Counting) (''SR–C2–2016–009''). The current proposal seeks to codify the timing for review of Public Customers' activity.

organizations'') [7] are required currently to review their Public Customers' activity and, on at least a quarterly basis, designate orders as Public Customer orders or Professional orders.[8] Specifically, TPH organizations are required to conduct a quarterly review and make any appropriate changes to the way in which they are representing orders within five days after the end of each calendar quarter.[9] While TPH organizations are required to designate accounts on a quarterly basis, if during a quarter the Exchange identifies a customer for which orders are being represented as Public Customer orders but that has averaged more than 390 orders per day during a month, the Exchange must notify the TPH organization and the TPH organization is required to change the manner in which it is representing the customer's orders within five days.[10]

Proposal

At this time, the Exchange proposes to shorten the quarterly review and designation to a monthly review. The Exchange proposes to amend the definition of Professional in Rule 1.1 to require that orders for any customer that had an average of more than 390 orders per day during any calendar month be represented as Professional orders for the next calendar month.

As noted, currently, each TPH organization is required to monitor Public Customer orders to determine if the Public Customer has averaged more than 390 orders per day during a month. Determining whether a Public Customer has executed more than 390 orders per day during a month requires computing a daily average. As such, TPH organizations should be performing the workflow necessary to designate orders on a daily basis. Therefore, the proposal does not amend the current workflow, rather, the proposal amends the timeframe to change the manner in which the customer's order is being represented from five days after the end of each calendar quarter to five days after the end of each calendar month.

The Exchange does not believe that this amendment is a significant departure from the current rule, nor does it impose any burden on any TPH organization because each broker-dealer is required currently to perform the necessary calculation daily to arrive at the requisite average. Further, in addition to the calculation, broker-dealers are subject to know-your-customer and suitability requirements under FINRA Rules 2090 (Know Your Customer) and 2111 (Suitability) and would need to consider whether a customer meets the Professional designation for purposes of determining best execution and making appropriate recommendations. The Exchange notes that the trading behavior of a Public Customer can be distinguished from that of a Professional which is the purpose of the separate designations. Finally, some TPH organizations currently designate a Public Customer that has averaged more than 390 orders per day during a month as a Professional on a more expedited basis, not waiting until five days after the quarter.

The Exchange believes that a calendar month is a sufficient time period to determine whether the activity of a customer meets the criteria for a Professional order. The Exchange believes that the shortened time period will ensure that the spirit of the designation of Professional order is met in that TPH organizations will make any appropriate changes to the way in which they are representing orders in a 30-day timeframe as opposed to a 90-day timeframe, thereby ensuring the designation is applied in a more expeditious manner. The Exchange continues to believe that identifying Professional Orders based upon the average number of orders entered in qualified accounts is an appropriate and objective approach to reasonably distinguish such persons and entities from retail investors or market participants.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[11] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [12] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [13] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange's proposal to shorten the quarterly look-back to a monthly look-back is consistent with the Act because it will ensure that the spirit of the designation of Professional order continues to be met, only on a more expedited basis—removing a potential delay of two months before affecting a change in the designation. The Exchange believes that this amendment will remove impediments to and perfect the mechanism of a free and open market and a national market system by promoting the consistent application of its rules and shortening the timeframe to change the designation for all TPH organizations while continuing to provide a sufficient time period to determine whether the activity of a customer meets the criteria for a Professional order. Further, the Exchange believes that the shortened time period will continue to promote consistency in the treatment of orders as Professional orders while also preventing members with high volume from receiving benefits reserved for Public Customer orders.

As noted, currently, each TPH organization is required to monitor Public Customer orders to determine if the Public Customer has averaged more than 390 orders per day during a month. Determining whether a Public Customer has executed more than 390 orders per day during a month requires computing a daily average. As such, TPH Organizations should be performing the workflow necessary to designate orders on a daily basis. Therefore, the proposal does not amend the current workflow, rather, the proposal amends the timeframe to change the manner in which the customer's order is being represented from five days after the end of each calendar quarter to five days after the end of each calendar month.

The Exchange does not believe that this amendment is a significant departure from the current rule, nor does it impose any burden on any TPH

[7] *See* C2 By-Laws, which defines ''Trading Permit Holder'' as any individual, corporation, partnership, limited liability company or other entity authorized by the Rules that holds a Trading Permit. If a Trading Permit Holder is an individual, the Trading Permit Holder may also be referred to as an ''individual Trading Permit Holder.'' If a Trading Permit Holder is not an individual, the Trading Permit Holder may also be referred to as a ''TPH organization.'' A Trading Permit Holder is a ''member'' solely for purposes of the Act; however, one's status as a Trading Permit Holder does not confer on that Person any ownership interest in the Exchange.

[13] *Id.*

organization because each broker-dealer is required currently to perform the necessary calculation daily to arrive at the requisite average. Further, in addition to the calculation, broker-dealers are subject to know-your customer and suitability requirements under FINRA Rules 2090 (Know Your Customer) and 2111 (Suitability) and would need to consider whether a customer meets the Professional designation for purposes of determining best execution and making appropriate recommendations. Finally, some TPH organizations currently designate a Public Customer that has averaged more than 390 orders per day during a month as a Professional on a more expedited basis, not waiting until five days after the quarter.

The Exchange notes that the trading behavior of a Public Customer can be distinguished from that of a Professional which is the purpose of the separate designations. The Exchange continues to believe that identifying Professional orders based upon the average number of orders entered in qualified accounts is an appropriately objective approach to reasonably distinguish such persons and entities from retail investors or market participants. Priority is one of the marketplace advantages provided to Public Customer orders on the Exchange. Public Customer orders are given execution priority over non-Customer orders and quotations of market makers at the same price. Another marketplace advantage afforded to Public Customer orders on the Exchange is that members are generally not assessed transaction fees or are assessed lower fees for the execution of Public Customer orders. The purpose of these marketplace advantages is to attract retail order flow to the Exchange by leveling the playing field for retail investors over market Professionals. This proposal will continue to provide Public Customer accounts with marketplace advantages and distinguish those accounts non-Professional retail investors from the Professionals accounts. The Exchange notes that some non-broker-dealer individuals and entities have access to information and technology that enables them to Professionally trade listed options in the same manner as a broker or dealer in securities.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange does not believe that the proposed rule change will impose any burden on intra-market competition because, today, each TPH organization is required to monitor Public Customer orders to determine if the Public Customer has averaged more than 390 orders per day during a month. Determining whether a Public Customer has executed more than 390 orders per day during a month requires computing a daily average. As such, TPH organizations should be performing the workflow necessary to designate orders on a daily basis. Therefore, the proposal does not amend the current workflow, rather, the proposal amends the timeframe to change the manner in which the customer's order is being represented from five days after the end of each calendar quarter to five days after the end of each calendar month.

The Exchange does not believe that this amendment is a significant departure from the current rule, nor does it impose any burden on any TPH organization because each broker-dealer is required currently to perform the necessary calculation daily to arrive at the requisite average. Further, in addition to the calculation, broker-dealers are subject to know-your-customer and suitability requirements under FINRA Rules 2090 (Know Your Customer) and 2111 (Suitability) and would need to consider whether a customer meets the Professional designation for purposes of determining best execution and making appropriate recommendations. Finally, some TPH organizations currently designate a Public Customer that has averaged more than 390 orders per day during a month as a Professional on a more expedited basis, not waiting until five days after the quarter.

The Exchange notes that the trading behavior of a Public Customer can be distinguished from that of a Professional which is the purpose of the separate designations.

Further, the designation of Professional orders would not result in any different treatment of such orders for purposes of compliance with the Exchange's Rules. Public Customers have been granted certain priority over other non-broker-dealer individuals and entities that have access to information and technology that enables them to Professionally trade listed options in the same manner as a broker or dealer in securities. Further, the Public Customer designation allows the Exchange to attract order flow or create more competitive markets.

Also, the Exchange does not believe that the proposed rule change will impose any burden on inter-market competition because other exchanges are expected to adopt similar rules.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

A. significantly affect the protection of investors or the public interest;

B. impose any significant burden on competition; and

C. become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[14] and Rule 19b–4(f)(6)[15] thereunder.[16]

A proposed rule change filed under Rule 19b–4(f)(6)[17] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[18] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requested that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that the proposed rule change will ensure fair competition among the exchanges by allowing the Exchange to shorten the quarterly review and designation to a monthly review of TPH organizations to determine whether the activity of a customer meets the criteria for a Professional order. For these reasons, and because the proposed rule change raises no new or novel legal or regulatory issues, the Commission finds that waiver of the operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and

[14] 15 U.S.C. 78s(b)(3)(A).

[15] 17 CFR 240.19b–4(f)(6).

[16] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[17] 17 CFR 240.19b–4(f)(6).

[18] 17 CFR 240.19b–4(f)(6)(iii).

designates the proposed rule change to be operative upon filing.[19]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–C2–2026–019 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–C2–2026–019. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–C2–2026–019 and should be submitted on or before August 6, 2026.

[19] For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[20]

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2026–14265 Filed 7–15–26; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105897; File No. SR–SAPPHIRE–2026–27]

Self-Regulatory Organizations; MIAX Sapphire, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the MIAX Sapphire Options Exchange Fee Schedule To Extend the Temporary Discount Program for Historical Requests of Certain Open-Close Report Data Until December 31, 2026

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'' or ''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, MIAX Sapphire, LLC (''MIAX Sapphire'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Sapphire Options Exchange Fee Schedule (''Fee Schedule'') to amend the MIAX Sapphire Options Exchange Fee Schedule (''Fee Schedule'') to extend the temporary discount program for historical requests of certain Open-Close Report (described below) data.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/miax-sapphire/rule-filings,* and at the Exchange's principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section 6)c) of the Fee Schedule to extend the temporary discount program for historical requests of certain Open-Close Report data until December 31, 2026. In general, the Exchange currently provides a temporary 20% discount on fees [3] assessed to Open-Close Report subscribers that purchase historical Open-Close Report data (with one exception, described below), which discount is set to expire on June 30, 2026.[4]

By way of background, the Exchange offers an end-of-day summary and two intra-day versions of the Open-Close Report (described in more detail below).[5] The End-of-Day Open-Close Report (referred to herein as the ''End-of-Day Report'') is a volume summary of trading activity on the Exchange at the option level by origin (Priority Customer,[6] Non-Priority Customer, Firm, Broker-Dealer, and Market Maker [7]), side of the market (buy or sell), contract volume, and transaction type (opening or closing). All volume is further broken down into trade size buckets (less than 100 contracts, 100–199 contracts, greater than 199 contracts).

The Intra-Day Open-Close Report provides similar information to that of the End-of-Day Report but is produced and updated at two different intervals during the trading day: 1 minute (referred to herein as the ''1-Minute Report'') and 10 minutes (referred to herein as the ''10-Minute Report''). For

[20] 17 CFR 200.30–3(a)(12), (59).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Unlike the Exchange's affiliates that offer a similar discount for historical purchases of their Open-Close Report data, the Exchange does not require a subscriber to achieve a minimum monetary threshold in order to receive the discount. This is because the Exchange is still a relatively new market, having only launched electronic trading operations less than two years ago.

[4] *See* Securities Exchange Act Release No. 104604 (January 14, 2026), 91 FR 2384 (January 20, 2026) (SR–SAPPHIRE–2025–45).

[5] *See, generally,* Exchange Rule 531(e)(1).

[6] *See* Exchange Rule 100.

[7] *Id.* The Exchange notes that certain terms are not specifically defined in the Rulebook, including Non-Priority Customer, Firm, Broker-Dealer.

the 1-Minute Report and 10-Minute Report, data is captured in ''snapshots'' taken every 1 minute or 10 minutes, respectively, throughout the trading day and is available to subscribers within five minutes of the conclusion of each 1 minute or 10 minute period. Each update represents the aggregate data captured from the current ''snapshot'' and all previous ''snapshots.'' The 1-Minute and 10-Minute Reports provides a volume summary of trading activity on the Exchange at the option level by origin (Priority Customer, Non-Priority Customer, Firm, Broker-Dealer, and Market Maker), side of the market (buy or sell), and transaction type (opening or closing). All volume is further broken down into trade size buckets (less than 100 contracts, 100–199 contracts, greater than 199 contracts).

Each version of the Open-Close Report contains proprietary Exchange trade data and does not include trade data from any other exchange. The Intra-Day and End-of-Day Open-Close Report data products are completely voluntary products, in that the Exchange is not required by any rule or regulation to make this data available and that potential customers may purchase it on an ad-hoc basis only if they voluntarily choose to do so. The Open-Close Report is also a historical data product and not a real-time data feed.

The Exchange makes the Open-Close Report available for purchase to Members [8] and non-Members.[9] Customers may currently purchase the Open-Close Report on a subscription basis (monthly) or by ad-hoc request for a specified month or number of months. The Exchange assesses the following fees for active subscriptions: $600 per month for subscribing to the End-of-Day Report; $2,000 per month for subscribing to the 10-Minute Report; and $6,000 per month for subscribing to the 1-Minute Report.[10] The Exchange also assesses the following fees for ad-hoc historical requests: $500 per request per month for ad-hoc requests for historical End-of-Day Report data; [11] $1,000 per request per month for ad-hoc requests for historical 10-Minute Report data; [12] and $2,500 per request per month for ad-hoc requests for historical 1-Minute Report data.[13] The Exchange also provides discounts or free data for customers who request multiple subscriptions, make ad-hoc requests for historical data for multiple types of the Open-Close Report, or who are Qualifying Academic Purchasers.[14]

Open-Close Report data is subject to direct competition from similar end-of-day and intra-day options trading summaries offered by several other options exchanges.[15] All of these exchanges offer essentially the same end-of-day and intra-day options trading summary information for trading activity on those exchanges.

Currently, the Exchange provides a temporary pricing incentive program in which subscribers that make ad-hoc requests for historical Open-Close Report data receive a percentage fee discount for all purchases. Footnote ''e.'' below the table of fees in Section 6)c) of the Fee Schedule provides that from January 1, 2026 through June 30, 2026, any single ad-hoc purchase of historical End-of-Day Report data and/or historical 10-Minute Report data by an existing End-of-Day Report or 10-Minute Report subscriber will receive a 20% discount when the subscriber purchases the same category of historical data for which they have a monthly subscription.[16] Section 6)c) of the Fee Schedule further provides that this discount cannot be combined with any other discount offered by the Exchange, including the academic discount provided to Qualifying Academic Purchasers of historical Open-Close Report data. To encourage the purchase of monthly subscriptions to Open-Close Report data, the temporary discount program is provided only to existing monthly subscribers who purchase the same category of historical data for which they have a monthly End-of-Day Report or 10-Minute Report subscription. The temporary discount program is currently set to expire on June 30, 2026.

The Exchange now proposes to extend the temporary discount program until December 31, 2026.[17] The purpose of this extension is to continue attracting subscribers of historical Open-Close Report data and making such data more widely accessible. The Exchange notes that the proposed discount will continue to not apply to ad-hoc historical requests for the 1-Minute Report.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[18] in general, and furthers the objectives of Section 6(b)(5) of the Act,[19] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and to protect investors and the public interest, and that it is not designed to permit unfair discrimination among customers, brokers, or dealers. The Exchange also believes that its proposed changes to its Fee Schedule concerning fees for the Open-Close Report is consistent with Section 6(b) of the Act [20] in general, and furthers the objectives of Section 6(b)(4) of the Act [21] in particular, in that it is an equitable allocation of dues, fees and other charges among its members and other recipients of Exchange data.

In adopting Regulation NMS, the Commission granted self-regulatory organizations (''SROs'') and broker-dealers increased authority and flexibility to offer new and unique market data to the public. It was believed that this authority would expand the amount of data available to consumers, and also spur innovation and competition for the provision of market data. Particularly, the Open-Close Report further broadens the availability of U.S. options market data to investors consistent with the principles of Regulation NMS. The data product also promotes increased transparency through the dissemination

[8] *See* Exchange Rule 100.

[9] *See* Fee Schedule, Section 6)c).

[10] *Id.*

[11] An ad-hoc request for historical End-of-Day Report data can be for any number of months beginning with August 2024 for which the data is available. *Id.*

[12] An ad-hoc request for historical 10-Minute Report data can be for any number of months beginning with August 2024 for which the data is available. *Id.*

[13] An ad-hoc request for historical 1-Minute Report data can be for any number of months beginning with August 2024 for which the data is available. *Id.*

[14] In order to qualify for the academic pricing, an academic purchaser must: (1) be an accredited academic institution or member of the faculty or staff of such an institution, and (2) use the data in independent academic research, academic journals and other publications, teaching and classroom use, or for other bona fide educational purposes (*i.e.* academic use). *See* Securities Exchange Act Release No. 100751 (August 16, 2024), 89 FR 68010 (August 22, 2024) (SR–SAPPHIRE–2024–09).

[15] *See, e.g.,* Cboe DataShop, Open-Close Volume Summary products offered by Cboe Exchange, Inc. (''Cboe''), Cboe C2 Exchange, Inc. (''C2''), Cboe EDGX Exchange, Inc. (''EDGX''), and Cboe BZX Exchange, Inc. (''BZX''), *available at https://datashop.cboe.com/cboe-options-open-close-volume-summary* (last visited June 8, 2026).

[16] The discount applies on an order-by-order basis. To qualify for the discount, an order must contain an ad-hoc request for historical End-of-Day Report data and/or historical 10-Minute Report data.

[17] The Exchange notes that at the end of this period, the temporary discount program will expire unless the Exchange files another 19b–4 Rule Filing with the Securities and Exchange Commission (the ''Commission'') to amend the terms or extend the discount program.

[18] 15 U.S.C. 78f(b).

[19] 15 U.S.C. 78f(b)(5).

[20] 15 U.S.C. 78f(b).

[21] 15 U.S.C. 78f(b)(4).

of the Open-Close Report. Particularly, information regarding opening and closing activity across different option series during the trading day may indicate investor sentiment, which may allow market participants to make better informed trading decisions throughout the day. Subscribers to the data may also be able to enhance their ability to analyze option trade and volume data and create and test trading models and analytical strategies. The Exchange believes that the Open-Close Report provides a valuable tool that subscribers can use to gain comprehensive insight into the trading activity in a particular series, but also emphasizes such data is not necessary for trading and completely optional. Moreover, several other exchanges offer similar data products which offer the same type of data content through end-of-day or intra-day reports.[22]

The Exchange operates in a highly competitive environment. Indeed, there are currently 18 registered options exchanges that trade options. Based on publicly available information, no single options exchange had more than approximately 11–12% of the equity options market share for the month of May 2026 and the Exchange represented only approximately 3.86% of the equity options market share for that month.[23] The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Particularly, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [24] Making similar data products available to market participants fosters competition in the marketplace, and constrains the ability of exchanges to charge supra-competitive fees. In the event that a market participant views one exchange's data product as more or less attractive than the competition they can, and do, switch between similar products. The extension of the fee discount for historical Open-Close Report data is a result of this competitive environment, as the Exchange seeks to continue attracting subscribers of historical Open-Close Report data and making such data more widely accessible.

The Exchange believes that extending the temporary discount program for any Member or non-Member who purchases historical End-of-Day Report or historical 10-Minute Report data is reasonable because such purchasers will continue to receive a 20% discount for purchasing historical Open-Close Report data. The Exchange believes the extended discount is reasonable as it gives purchasers additional time to use and test the historical Open-Close Report data at a discounted rate and therefore should continue to encourage and promote users to purchase the historical Open-Close Report data. Further, the extension of the temporary discount is intended to continue promoting increased use of the Exchange's historical Open-Close Report data by defraying some of the costs a purchaser would ordinarily have to expend. Further, continuing to provide the discount only to existing subscribers of a monthly End-of-Day Report or 10-Minute Report subscription is designed to encourage the purchase of monthly subscriptions to Open-Close Report data.

The Exchange believes that the extension of the temporary discount program is equitable and not unfairly discriminatory because it applies equally to all Members and non-Members who are existing subscribers of the End-of-Day Report or 10-Minute Report and choose to also purchase historical Open-Close Report data for the same category of products. Providing the discount only to existing subscribers is not unfairly discriminatory because it is a reasonable means to encourage the purchase of monthly subscriptions to Open-Close Report data.

The Exchange believes it is reasonable, equitable and not unfairly discriminatory to exclude ad-hoc requests for historical 1-Minute Report data from the discount program because a participant who subscribes to the 1-Minute Report (or requests historical 1-Minute Reports) receives ten times the data points that they would receive in comparison to the 10-Minute Report, which is more beneficial since they are receiving additional data based on shorter intervals. The increased frequency of data intervals in the 1-Minute Report provides more current information and more data reporting intervals. As such, the Exchange believes it reasonable, equitable and not unfairly discriminatory to exclude ad-hoc requests for historical 1-Minute Report data from the discount program because of the enhanced value of the 1-Minute Report, which is 10 times the amount of data. In addition, the Exchange offers free historical data for any current subscriber to the 1-Minute Report who makes an ad-hoc request for historical 1-Minute Report data. In particular, a current 1-Minute Report subscriber who purchases historical 1-Minute Report data may submit an ad-hoc request for historical End-of-Day Report data and/or historical 10-Minute Report data for the same date or date range for no additional charge.[25]

Lastly, the purchase of this data product is discretionary and not compulsory. Indeed, no market participant is required to purchase the historical Open-Close Report data, and the Exchange is not required to make the historical Open-Close Report data available to all investors. Potential purchasers may request the data at any time if they believe it to be valuable or may decline to purchase such data.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange operates in a highly competitive environment in which the Exchange must continually adjust its fees to remain competitive. Because competitors are free to modify their own fees in response, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited. As discussed above, Open-Close Report data is subject to direct competition from several other options exchanges that offer substantively similar substitutes to the Exchange's Open-Close Report, albeit for trading data on those exchanges.[26] Moreover, purchase of historical Open-Close Report data is entirely optional. It is designed to help investors understand underlying market trends to improve the quality of investment decisions, but is not necessary to execute a trade.

The rule change is grounded in the Exchange's efforts to compete more effectively. In this competitive environment, potential purchasers are free to choose which, if any, similar product to purchase to satisfy their need for market information. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges. Further, the Exchange believes that the proposed

[22] *See supra* note 15.

[24] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (''Regulation NMS Adopting Release'').

[25] *See* Fee Schedule, Section (6)(c), note b.

[26] *See supra* note 15.

change will not cause any unnecessary or inappropriate burden on intermarket competition, as the extension of the temporary discount program applies uniformly to any purchaser of historical Open-Close Report data.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[27] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors, or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–SAPPHIRE–2026–27 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–SAPPHIRE–2026–27. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–SAPPHIRE–2026–27 and should be submitted on or before August 6, 2026.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105893; File No. SR–SAPPHIRE–2026–28]

Self-Regulatory Organizations; MIAX Sapphire, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Exchange's Options Regulatory Fee (ORF)

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, 2026, MIAX Sapphire, LLC (''MIAX Sapphire'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Sapphire Options Exchange Fee Schedule (''Fee Schedule'') to amend the MIAX Sapphire Options Exchange Fee Schedule (''Fee Schedule'') regarding the Options Regulatory Fee (''ORF'').

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/miax-sapphire/rule-filings,* and at the Exchange's principal office.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange previously filed to amend its ORF assessment and collection methodology,[3] with the rate to be set closer to the implementation date of the amended ORF collection methodology. At this time, the Exchange proposes to set the ORF rate effective July 1, 2026 to $0.0220 per contract side. Additionally, the Exchange proposes to amend the rule text that describes the ORF collection methodology to provide greater clarity to the ORF collection methodology.

July 1, 2026 ORF

As of July 1, 2026, the Exchange will assess ORF for options transactions that clear in the ''customer'' range at The Options Clearing Corporation (''OCC''), however ORF will be assessed to each Members [4] for executions that occur on the Exchange. Specifically, the ORF will be collected on behalf of the Exchange from Members and non-members for all customer transactions executed on the Exchange. ORF would be assessed and collected on all ultimately cleared customer contracts, taking into account adjustments for CMTA that were provided to the Exchange the same day as the trade.[5] Further, the Exchange

[3] *See* Securities and Exchange Act Release No. 104713 (January 28, 2026) 91 FR 4750 (February 2, 2026) (SR–SAPPHIRE–2026–01) (Self-Regulatory Organizations; MIAX SAPPHIRE, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt a New Methodology for Assessment and Collection of the Options Regulatory Fee (ORF)).

[4] The term ''Member'' means an individual or organization that is registered with the Exchange pursuant to Chapter II of MIAX Sapphire Rules for purposes of trading on the Exchange as an ''Electronic Exchange Member'' or ''Market Maker.'' Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[5] Adjustments to CMTA that occur at OCC would not be taken into account.

would bill ORF according to the clearing instructions provided on the execution. More specifically, the Exchange proposes to assess ORF based on the clearing instruction provided on the execution on trade date and would not take into consideration CMTA changes or transfers that occur at OCC.[6]

Based on the Exchange's review of regulatory costs, ORF revenue, and options transaction volume, the Exchange proposes to set the ORF rate effective July 1, 2026 to $0.0220 per contract side. On June 2, 2026, the Exchange notified Members of the proposed ORF rate effective July 1, 2026 via a Regulatory Circular.[7] The Exchange will continue to monitor the amount of revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed regulatory costs. More specifically, the Exchange will endeavor to ensure that the amount of revenue collected from the ORF will not exceed 80% of the Exchange's regulatory costs. The Exchange will monitor its regulatory costs and revenues at a minimum on a semi-annual basis. If the Exchange determines regulatory revenues exceed or are insufficient to cover a material portion of its regulatory costs in a given year, the Exchange will adjust the ORF by submitting a fee change filing to the Securities and Exchange Commission (the ''Commission''). The Exchange will notify Members of adjustments to the ORF via a Regulatory Circular in advance of any change.

As is the case today, the Exchange will monitor the amount of revenue collected from the ORF to ensure that it, in combination with other regulatory fees and fines, does not exceed regulatory costs. In determining whether an expense is considered a regulatory cost, the Exchange will continue to review all costs and makes determinations if there is a nexus between the expense and a regulatory function. The Exchange notes that fines collected by the Exchange in connection with a disciplinary matter will continue to offset regulatory costs.

Revenue generated from ORF, when combined with all of the Exchange's other regulatory fees and fines, is designed to cover a material portion of the regulatory costs to the Exchange of the supervision and regulation of Members' customer options business including performing routine surveillances, investigations, examinations, financial monitoring, and policy, rulemaking, interpretive, and enforcement activities. Regulatory costs include direct regulatory expenses and certain indirect expenses in support of the regulatory function. The direct expenses include in-house and third party service provider costs to support the day-to-day regulatory work such as surveillances, investigations and examinations. The indirect expenses are only those expenses that are in support of the regulatory functions, such areas include Office of the General Counsel, technology, finance, and internal audit.

Rule Text Amendment

The Exchange proposes to delete the last sentence of the rule text ''The ORF is not assessed on outbound linkage trades.'' This revision more accurately describes the Exchange's collection process as explained in its prior rule proposal.[8] The Exchange proposes this revised rule text because it provides greater clarity to the manner in which ORF is collected.

Additionally, the Exchange proposes to remove obsolete text regarding an ORF rate that is no longer in effect.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act[9] in general, and furthers the objectives of Section 6(b)(4) of the Act[10] in particular, in that it is an equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The Exchange also believes the proposal furthers the objectives of Section 6(b)(5) of the Act[11] in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange believes that the proposed fee change is reasonable, equitable and not unfairly discriminatory in that it is charged to all Exchange transactions that clear in the ''customer'' range at the OCC. Additionally, the Exchange believes that the proposed fee change ensures fairness by assessing a specific fee to those Members that require more Exchange regulatory services based on the amount of customer options business they conduct. Over recent years, options trading volume has increased with a growing percentage of the volume applicable to customer transactions. Customers trading on the Exchange (through a Member) benefit from the protections of a robust regulatory program including the maintenance of fair and orderly markets and protections against fraud and other manipulation. The Exchange believes it is equitable and not unfairly discriminatory to assess a regulatory fee to transactions that clear in the ''customer'' range to cover regulatory costs, but not to transactions clearing in the ''firm'' or ''market maker'' range because Clearing Members[12] and Market Makers[13] (who clear in the Firm and Market Maker range), as those market participants are generally subject to other Exchange fees, fines and obligations. For example, Clearing Members and Market Makers are required to pay Exchange application fees, permit fees, and connectivity fees, amongst others. In addition, all fines issued by the Exchange for regulatory infractions are assessed only to Members and would be applied to regulatory revenues. The Exchange expects that Clearing Members from whom the ORF is collected will pass through the fee to their customers (as the Exchange understands occurs today). In addition, Market Makers in particular are subject to various quoting and other obligations to ensure that they provide stable and liquid markets, which benefit all market participants including customers. Excluding Market Maker transactions from the ORF collection will allow Market Makers to better manage their costs more effectively thus enabling them to better allocate resources toward technology, risk management, and capacity to ensure continued liquidity provision.

In addition to the overall increase in ''customer'' range volume generally, regulating customer trading activity is more labor intensive and requires greater expenditure of human and technical resources than regulating non-customer trading activity, which tends to be more automated and less labor-intensive. For example, there are costs

[6] Adjustments that were made the same day as the trade on the Exchange will be taken into account.

[7] *See https://www.miaxglobal.com/alert/2026/06/02/miax-exchange-group-option-markets-options-regulatory-fee-1.*

[8] *See supra* note 3.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(4).

[11] 15 U.S.C. 78f(b)(5).

[12] Clearing Member means a Member that has been admitted to membership in the Clearing Corporation pursuant to the provisions of the rules of the Clearing Corporation. *See* Exchange Rule 100.

[13] Market Maker means a Member registered with the Exchange for the purpose of making markets in options contracts traded on the Exchange and that is vested with the rights and responsibilities specified in Chapter VI of the Exchange Rules. *See* Exchange Rule 100.

associated with main office and branch office examinations (*e.g.,* staff and travel expenses), as well as investigations into customer complaints and terminations of registered persons. As a result, the costs associated with administering the customer component of the Exchange's overall regulatory program are materially higher than the costs associated with administering the non-customer component (*e.g.,* Clearing Member proprietary transactions) of its regulatory program.[14] While the Exchange notes that it has broad regulatory responsibilities with respect to its Member's activities, irrespective of where their transactions take place, the Exchange believes it is reasonable to assess the proposed fee to only those transactions occurring on the Exchange. The proposed change more narrowly tailors the fee to products and transactions with a direct connection to the Exchange. With this proposal, transactions that would clear in the ''customer'' range occurring on other exchanges would no longer be subject to an ORF assessed by the Exchange.

The Exchange further believes that the proposed change fee is reasonable because it would help ensure that revenue collected from the ORF, in combination with other regulatory fees and fines, would cover a material portion of the Exchange's regulatory costs.

As noted above, the Exchange will also continue to monitor on at least a semiannual basis the amount of revenue collected from the ORF to ensure that it, in combination with its other regulatory fees and fines, would cover a material portion of the Exchange's regulatory costs and not exceed it.

Additionally, the Exchange proposes to delete the last sentence of the rule text and to remove obsolete text regarding the ORF rate that is no longer in effect. The Exchange believes that the proposal to delete the last sentence of the rule text and to remove obsolete text regarding the ORF rate that is no longer in effect would promote just and equitable principles of trade and remove impediments to and perfect the mechanism of a free and open market and a national market system because the proposed change would provide greater clarity to market participants regarding the Exchange's Fee Schedule. It is in the public interest for the Exchange's Fee Schedule to be accurate so as to eliminate the potential for confusion.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. This proposal does not create an unnecessary or inappropriate intra-market burden on competition because the ORF applies to all customer activity on the Exchange, thereby raising regulatory revenue to offset regulatory expenses. It also supplements the regulatory revenue derived from non-customer activity. The Exchange notes, however, the proposed change is not designed to address any competitive issues. Indeed, this proposal does not create an unnecessary or inappropriate inter-market burden on competition because it is a regulatory fee that supports regulation in furtherance of the purposes of the Act. The Exchange is obligated to ensure that the amount of regulatory revenue collected from ORF, in combination with its other regulatory fees and fines, does not exceed regulatory costs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [15] and paragraph (f) of Rule 19b–4 [16] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–SAPPHIRE–2026–28 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–SAPPHIRE–2026–28. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–SAPPHIRE–2026–28 and should be submitted on or before August 6, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105895; File No. SR–PEARL–2026–32]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the MIAX Pearl Options Exchange Fee Schedule To Extend the Temporary Discount Program for Historical Requests of Certain Open-Close Report Data Until December 31, 2026

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'' or ''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, MIAX PEARL, LLC (''MIAX Pearl'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Pearl Options Exchange Fee Schedule (''Fee Schedule'') to extend the temporary discount program for historical requests of certain Open-Close Report (described below) data.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/pearl-options/rule-filings,* and at the Exchange's principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section 6)d) of the Fee Schedule to extend the temporary discount program for historical requests of certain Open-Close Report data until December 31, 2026. In general, the Exchange currently provides a temporary 20% discount on fees assessed to Open-Close Report subscribers that purchase $20,000 or more in a single order of historical Open-Close Report data (with one exception, described below), which discount is set to expire on June 30, 2026.[3]

By way of background, the Exchange offers an end-of-day summary and two intra-day versions of the Open-Close Report (described in more detail below).[4] The End-of-Day Open-Close Report (referred to herein as the ''End-of-Day Report'') is a volume summary of trading activity on the Exchange at the option level by origin (Priority Customer,[5] Non-Priority Customer, Firm, Broker-Dealer, and Market Maker [6]), side of the market (buy or sell), contract volume, and transaction type (opening or closing). All volume is further broken down into trade size buckets (less than 100 contracts, 100–199 contracts, greater than 199 contracts).

The Intra-Day Open-Close Report provides similar information to that of the End-of-Day Report but is produced and updated at two different intervals during the trading day: 1 minute (referred to herein as the ''1-Minute Report'') and 10 minutes (referred to herein as the ''10-Minute Report''). For the 1-Minute Report and 10-Minute Report, data is captured in ''snapshots'' taken every 1 minute or 10 minutes, respectively, throughout the trading day and is available to subscribers within five minutes of the conclusion of each 1 minute or 10 minute period. Each update represents the aggregate data captured from the current ''snapshot'' and all previous ''snapshots.'' The 1-Minute and 10-Minute Reports provides a volume summary of trading activity on the Exchange at the option level by origin (Priority Customer, Non-Priority Customer, Firm, Broker-Dealer, and Market Maker), side of the market (buy or sell), and transaction type (opening or closing). All volume is further broken down into trade size buckets (less than 100 contracts, 100–199 contracts, greater than 199 contracts).

Each version of the Open-Close Report contains proprietary Exchange trade data and does not include trade data from any other exchange. The Intra-Day and End-of-Day Open-Close Report data products are completely voluntary products, in that the Exchange is not required by any rule or regulation to make this data available and that potential customers may purchase it on an ad-hoc basis only if they voluntarily choose to do so. The Open-Close Report is also a historical data product and not a real-time data feed.

The Exchange makes the Open-Close Report available for purchase to Members [7] and non-Members.[8] Customers may currently purchase the Open-Close Report on a subscription basis (monthly) or by ad-hoc request for a specified month or number of months. The Exchange assesses the following fees for active subscriptions: $600 per month for subscribing to the End-of-Day Report; $2,000 per month for subscribing to the 10-Minute Report; and $6,000 per month for subscribing to the 1-Minute Report.[9] The Exchange also assesses the following fees for ad-hoc historical requests: $500 per request per month for ad-hoc requests for historical End-of-Day Report data; [10] $1,000 per request per month for ad-hoc requests for historical 10-Minute Report data; [11] and $2,500 per request per month for ad-hoc requests for historical 1-Minute Report data.[12] The Exchange also provides discounts or free data for customers who request multiple subscriptions, make ad-hoc requests for historical data for multiple types of the

Open-Close Report, or who are Qualifying Academic Purchasers.[13]

Open-Close Report data is subject to direct competition from similar end-of-day and intra-day options trading summaries offered by several other options exchanges.[14] All of these exchanges offer essentially the same end-of-day and intra-day options trading summary information for trading activity on those exchanges.

Currently, the Exchange provides a temporary pricing incentive program in which subscribers that make ad-hoc requests for historical Open-Close Report data receive a percentage fee discount when a specific purchase threshold is met. Footnote ''e.'' below the table of fees in Section 6)d) of the Fee Schedule provides that from January 1, 2026 through June 30, 2026, any single ad-hoc purchase of historical End-of-Day Report data and/or historical 10-Minute Report data by an existing End-of-Day Report or 10-Minute Report subscriber totaling $20,000 or more, will receive a 20% discount when the subscriber purchases the same category of historical data for which they have a monthly subscription.[15] Section 6)d) of the Fee Schedule further provides that this discount cannot be combined with any other discount offered by the Exchange, including the academic discount provided to Qualifying Academic Purchasers of historical Open-Close Report data. To encourage the purchase of monthly subscriptions to Open-Close Report data, the temporary discount program is provided only to existing monthly subscribers who purchase the same category of historical data for which they have a monthly End-of-Day Report or 10-Minute Report subscription. The temporary discount program is currently set to expire on June 30, 2026.

The Exchange now proposes to extend the temporary discount program until December 31, 2026.[16] The purpose of this extension is to continue attracting subscribers of historical Open-Close Report data and making such data more widely accessible. The Exchange notes that the proposed discount will continue to not apply to ad-hoc historical requests for the 1-Minute Report.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[17] in general, and furthers the objectives of Section 6(b)(5) of the Act,[18] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and to protect investors and the public interest, and that it is not designed to permit unfair discrimination among customers, brokers, or dealers. The Exchange also believes that its proposed changes to its Fee Schedule concerning fees for the Open-Close Report is consistent with Section 6(b) of the Act [19] in general, and furthers the objectives of Section 6(b)(4) of the Act [20] in particular, in that it is an equitable allocation of dues, fees and other charges among its members and other recipients of Exchange data.

In adopting Regulation NMS, the Commission granted self-regulatory organizations (''SROs'') and broker-dealers increased authority and flexibility to offer new and unique market data to the public. It was believed that this authority would expand the amount of data available to consumers, and also spur innovation and competition for the provision of market data. Particularly, the Open-Close Report further broadens the availability of U.S. options market data to investors consistent with the principles of Regulation NMS. The data product also promotes increased transparency through the dissemination of the Open-Close Report. Particularly, information regarding opening and closing activity across different option series during the trading day may indicate investor sentiment, which may allow market participants to make better informed trading decisions throughout the day. Subscribers to the data may also be able to enhance their ability to analyze option trade and volume data and create and test trading models and analytical strategies. The Exchange believes that the Open-Close Report provides a valuable tool that subscribers can use to gain comprehensive insight into the trading activity in a particular series, but also emphasizes such data is not necessary for trading and completely optional. Moreover, several other exchanges offer similar data products which offer the same type of data content through end-of-day or intra-day reports.[21]

The Exchange operates in a highly competitive environment. Indeed, there are currently 18 registered options exchanges that trade options. Based on publicly available information, no single options exchange had more than approximately 11–12% of the equity options market share for the month of May 2026 and the Exchange represented only approximately 1.69% of the equity options market share for that month.[22] The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Particularly, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [23] Making similar data products available to market participants fosters competition in the marketplace, and constrains the ability of exchanges to charge supra-competitive fees. In the event that a market participant views one exchange's data product as more or less attractive than the competition they can, and do, switch between similar products. The extension of the fee discount for historical Open-Close Report data is a result of this competitive environment, as the Exchange seeks to continue attracting subscribers of historical Open-Close

[13] In order to qualify for the academic pricing, an academic purchaser must: (1) be an accredited academic institution or member of the faculty or staff of such an institution, and (2) use the data in independent academic research, academic journals and other publications, teaching and classroom use, or for other bona fide educational purposes (*i.e.* academic use). *See* Securities Exchange Act Release No. 97305 (April 13, 2024), 88 FR 24242 (April 19, 2023) (SR–PEARL–2023–17).

[14] *See, e.g.,* Cboe DataShop, Open-Close Volume Summary products offered by Cboe Exchange, Inc. (''Cboe''), Cboe C2 Exchange, Inc. (''C2''), Cboe EDGX Exchange, Inc. (''EDGX''), and Cboe BZX Exchange, Inc. (''BZX''), *available at https://datashop.cboe.com/cboe-options-open-close-volume-summary* (last visited June 8, 2026).

[15] The discount applies on an order-by-order basis. To qualify for the discount, an order must contain an ad-hoc request for historical End-of-Day Report data and/or historical 10-Minute Report data and must total $20,000 or more. The Exchange does not aggregate purchases made throughout a billing cycle for purposes of this incentive program. The discount applies to the total purchase price once the $20,000 minimum purchase is satisfied (for example, a qualifying order of $25,000 would be discounted to $20,000, *i.e.* receiving a 20% discount of $5,000).

[16] The Exchange notes that at the end of this period, the temporary discount program will expire unless the Exchange files another 19b–4 Rule Filing with the Securities and Exchange Commission (the ''Commission'') to amend the terms or extend the discount program.

Report data and making such data more widely accessible.

The Exchange believes that extending the temporary discount program for any Member or non-Member who purchases historical End-of-Day Report or historical 10-Minute Report data is reasonable because such purchasers will continue to receive a 20% discount for purchasing $20,000 or more worth of such historical Open-Close Report data. The Exchange believes the extended discount is reasonable as it gives purchasers additional time to use and test the historical Open-Close Report data at a discounted rate and therefore should continue to encourage and promote users to purchase the historical Open-Close Report data. Further, the extension of the temporary discount is intended to continue promoting increased use of the Exchange's historical Open-Close Report data by defraying some of the costs a purchaser would ordinarily have to expend. Further, continuing to provide the discount only to existing subscribers of a monthly End-of-Day Report or 10-Minute Report subscription is designed to encourage the purchase of monthly subscriptions to Open-Close Report data.

The Exchange believes that the extension of the temporary discount program is equitable and not unfairly discriminatory because it applies equally to all Members and non-Members who are existing subscribers of the End-of-Day Report or 10-Minute Report and choose to also purchase historical Open-Close Report data for the same category of products. Providing the discount only to existing subscribers is not unfairly discriminatory because it is a reasonable means to encourage the purchase of monthly subscriptions to Open-Close Report data.

The Exchange believes it is reasonable, equitable and not unfairly discriminatory to exclude ad-hoc requests for historical 1-Minute Report data from the discount program because a participant who subscribes to the 1-Minute Report (or requests historical 1-Minute Reports) receives ten times the data points that they would receive in comparison to the 10-Minute Report, which is more beneficial since they are receiving additional data based on shorter intervals. The increased frequency of data intervals in the 1-Minute Report provides more current information and more data reporting intervals. As such, the Exchange believes it reasonable, equitable and not unfairly discriminatory to exclude ad-hoc requests for historical 1-Minute Report data from the discount program because of the enhanced value of the 1-Minute Report, which is 10 times the amount of data. In addition, the Exchange offers free historical data for any current subscriber to the 1-Minute Report who makes an ad-hoc request for historical 1-Minute Report data. In particular, a current 1-Minute Report subscriber who purchases historical 1-Minute Report data may submit an ad-hoc request for historical End-of-Day Report data and/or historical 10-Minute Report data for the same date or date range for no additional charge.[24]

Lastly, the purchase of this data product is discretionary and not compulsory. Indeed, no market participant is required to purchase the historical Open-Close Report data, and the Exchange is not required to make the historical Open-Close Report data available to all investors. Potential purchasers may request the data at any time if they believe it to be valuable or may decline to purchase such data.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange operates in a highly competitive environment in which the Exchange must continually adjust its fees to remain competitive. Because competitors are free to modify their own fees in response, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited. As discussed above, Open-Close Report data is subject to direct competition from several other options exchanges that offer substantively similar substitutes to the Exchange's Open-Close Report, albeit for trading data on those exchanges.[25] Moreover, purchase of historical Open-Close Report data is entirely optional. It is designed to help investors understand underlying market trends to improve the quality of investment decisions, but is not necessary to execute a trade.

The rule change is grounded in the Exchange's efforts to compete more effectively. In this competitive environment, potential purchasers are free to choose which, if any, similar product to purchase to satisfy their need for market information. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges. Further, the Exchange believes that the proposed change will not cause any unnecessary or inappropriate burden on intermarket competition, as the extension of the temporary discount program applies uniformly to any purchaser of historical Open-Close Report data.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[26] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors, or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include file number SR–PEARL–2026–32 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–PEARL–2026–32. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the filing will

[24] *See* Fee Schedule, Section 6)d), note b.

[25] *See supra* note 14.

[26] 15 U.S.C. 78s(b)(3)(A)(ii).

be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to file number SR–PEARL–2026–32 and should be submitted on or before August 6, 2026.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[27]

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–105898; File No. SR–MIAX–2026–28]

Self-Regulatory Organizations; Miami International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fee Schedule To Extend the Temporary Discount Program for Historical Requests of Certain Open-Close Report Data Until December 31, 2026

July 13, 2026.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'' or ''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 30, 2026, Miami International Securities Exchange, LLC (''MIAX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the MIAX Options Exchange Fee Schedule (''Fee Schedule'') to extend the temporary discount program for historical requests of certain Open-Close Report (described below) data.

The text of the proposed rule change is available on the Exchange's website at *https://www.miaxglobal.com/markets/us-options/miax-options/rule-filings,* and at the Exchange's principal office.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Section (6)(e) of the Fee Schedule to extend the temporary discount program for historical requests of certain Open-Close Report data until December 31, 2026. In general, the Exchange currently provides a temporary 20% discount on fees assessed to Open-Close Report subscribers that purchase $20,000 or more in a single order of historical Open-Close Report data (with one exception, described below), which discount is set to expire on June 30, 2026.[3]

By way of background, the Exchange offers an end-of-day summary and two intra-day versions of the Open-Close Report (described in more detail below).[4] The End-of-Day Open-Close Report (referred to herein as the ''End-of-Day Report'') is a volume summary of trading activity on the Exchange at the option level by origin (Priority Customer,[5] Non-Priority Customer, Firm, Broker-Dealer, and Market Maker [6]), side of the market (buy or sell), contract volume, and transaction type (opening or closing). All volume is further broken down into trade size buckets (less than 100 contracts, 100–199 contracts, greater than 199 contracts).

The Intra-Day Open-Close Report provides similar information to that of the End-of-Day Report but is produced and updated at two different intervals during the trading day: 1 minute (referred to herein as the ''1-Minute Report'') and 10 minutes (referred to herein as the ''10-Minute Report''). For the 1-Minute Report and 10-Minute Report, data is captured in ''snapshots'' taken every 1 minute or 10 minutes, respectively, throughout the trading day and is available to subscribers within five minutes of the conclusion of each 1 minute or 10 minute period. Each update represents the aggregate data captured from the current ''snapshot'' and all previous ''snapshots.'' The 1-Minute and 10-Minute Reports provides a volume summary of trading activity on the Exchange at the option level by origin (Priority Customer, Non-Priority Customer, Firm, Broker-Dealer, and Market Maker), side of the market (buy or sell), and transaction type (opening or closing). All volume is further broken down into trade size buckets (less than 100 contracts, 100–199 contracts, greater than 199 contracts).

Each version of the Open-Close Report contains proprietary Exchange trade data and does not include trade data from any other exchange. The Intra-Day and End-of-Day Open-Close Report data products are completely voluntary products, in that the Exchange is not required by any rule or regulation to make this data available and that potential customers may purchase it on an ad-hoc basis only if they voluntarily choose to do so. The Open-Close Report is also a historical data product and not a real-time data feed.

The Exchange makes the Open-Close Report available for purchase to Members [7] and non-Members.[8] Customers may currently purchase the Open-Close Report on a subscription basis (monthly) or by ad-hoc request for a specified month or number of months. The Exchange assesses the following fees for active subscriptions: $600 per month for subscribing to the End-of-Day Report; $3,000 per month for subscribing to the 10-Minute Report; and $9,000 per month for subscribing to the 1-Minute Report.[9] The Exchange also assesses the following fees for ad-hoc historical requests: $500 per request per month for ad-hoc requests for historical End-of-Day Report data; [10] $1,000 per request per month for ad-hoc requests for historical 10-Minute Report

data; [11] and $4,000 per request per month for ad-hoc requests for historical 1-Minute Report data.[12] The Exchange also provides discounts or free data for customers who request multiple subscriptions, make ad-hoc requests for historical data for multiple types of the Open-Close Report, or who are Qualifying Academic Purchasers.[13]

Open-Close Report data is subject to direct competition from similar end-of-day and intra-day options trading summaries offered by several other options exchanges.[14] All of these exchanges offer essentially the same end-of-day and intra-day options trading summary information for trading activity on those exchanges.

Currently, the Exchange provides a temporary pricing incentive program in which subscribers that make ad-hoc requests for historical Open-Close Report data receive a percentage fee discount when a specific purchase threshold is met. Footnote ''e.'' below the table of fees in Section (6)(e) of the Fee Schedule provides that from January 1, 2026 through June 30, 2026, any single ad-hoc purchase of historical End-of-Day Report data and/or historical 10-Minute Report data by an existing End-of-Day Report or 10-Minute Report subscriber totaling $20,000 or more, will receive a 20% discount when the subscriber purchases the same category of historical data for which they have a monthly subscription.[15] Section (6)(e) of the Fee Schedule further provides that this discount cannot be combined with any other discount offered by the Exchange, including the academic discount provided to Qualifying Academic Purchasers of historical Open-Close Report data. To encourage the purchase of monthly subscriptions to Open-Close Report data, the temporary discount program is provided only to existing monthly subscribers who purchase the same category of historical data for which they have a monthly End-of-Day Report or 10-Minute Report subscription. The temporary discount program is currently set to expire on June 30, 2026.

The Exchange now proposes to extend the temporary discount program until December 31, 2026.[16] The purpose of this extension is to continue attracting subscribers of historical Open-Close Report data and making such data more widely accessible. The Exchange notes that the proposed discount will continue to not apply to ad-hoc historical requests for the 1-Minute Report.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[17] in general, and furthers the objectives of Section 6(b)(5) of the Act,[18] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and to protect investors and the public interest, and that it is not designed to permit unfair discrimination among customers, brokers, or dealers. The Exchange also believes that its proposed changes to its Fee Schedule concerning fees for the Open-Close Report is consistent with Section 6(b) of the Act [19] in general, and furthers the objectives of Section 6(b)(4) of the Act [20] in particular, in that it is an equitable allocation of dues, fees and other charges among its members and other recipients of Exchange data.

In adopting Regulation NMS, the Commission granted self-regulatory organizations (''SROs'') and broker-dealers increased authority and flexibility to offer new and unique market data to the public. It was believed that this authority would expand the amount of data available to consumers, and also spur innovation and competition for the provision of market data. Particularly, the Open-Close Report further broadens the availability of U.S. options market data to investors consistent with the principles of Regulation NMS. The data product also promotes increased transparency through the dissemination of the Open-Close Report. Particularly, information regarding opening and closing activity across different option series during the trading day may indicate investor sentiment, which may allow market participants to make better informed trading decisions throughout the day. Subscribers to the data may also be able to enhance their ability to analyze option trade and volume data and create and test trading models and analytical strategies. The Exchange believes that the Open-Close Report provides a valuable tool that subscribers can use to gain comprehensive insight into the trading activity in a particular series, but also emphasizes such data is not necessary for trading and completely optional. Moreover, several other exchanges offer similar data products which offer the same type of data content through end-of-day or intra-day reports.[21]

The Exchange operates in a highly competitive environment. Indeed, there are currently 18 registered options exchanges that trade options. Based on publicly available information, no single options exchange had more than approximately 11–12% of the equity options market share for the month of May 2026 and the Exchange represented only approximately 8.32% of the equity options market share for that month.[22] The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Particularly, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [23] Making similar data products available to market participants fosters

[11] An ad-hoc request for historical 10-Minute Report data can be for any number of months beginning with January 2013 for which the data is available. *Id.*

[12] An ad-hoc request for historical 1-Minute Report data can be for any number of months beginning with January 2013 for which the data is available. *Id.*

[13] In order to qualify for the academic pricing, an academic purchaser must: (1) be an accredited academic institution or member of the faculty or staff of such an institution, and (2) use the data in independent academic research, academic journals and other publications, teaching and classroom use, or for other bona fide educational purposes (*i.e.* academic use). *See* Securities Exchange Act Release No. 97302 (April 13, 2024), 88 FR 24221 (April 19, 2023) (SR–MIAX–2023–15).

[14] *See, e.g.,* Cboe DataShop, Open-Close Volume Summary products offered by Cboe Exchange, Inc. (''Cboe''), Cboe C2 Exchange, Inc. (''C2''), Cboe EDGX Exchange, Inc. (''EDGX''), and Cboe BZX Exchange, Inc. (''BZX''), *available at https://datashop.cboe.com/cboe-options-open-close-volume-summary* (last visited June 8, 2026).

[15] The discount applies on an order-by-order basis. To qualify for the discount, an order must contain an ad-hoc request for historical End-of-Day Report data and/or historical 10-Minute Report data and must total $20,000 or more. The Exchange does not aggregate purchases made throughout a billing cycle for purposes of this incentive program. The discount applies to the total purchase price once the $20,000 minimum purchase is satisfied (for example, a qualifying order of $25,000 would be discounted to $20,000, *i.e.* receiving a 20% discount of $5,000).

[16] The Exchange notes that at the end of this period, the temporary discount program will expire unless the Exchange files another 19b–4 Rule Filing with the Securities and Exchange Commission (the ''Commission'') to amend the terms or extend the discount program.

[23] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) (''Regulation NMS Adopting Release'').

competition in the marketplace, and constrains the ability of exchanges to charge supra-competitive fees. In the event that a market participant views one exchange's data product as more or less attractive than the competition they can, and do, switch between similar products. The extension of the fee discount for historical Open-Close Report data is a result of this competitive environment, as the Exchange seeks to continue attracting subscribers of historical Open-Close Report data and making such data more widely accessible.

The Exchange believes that extending the temporary discount program for any Member or non-Member who purchases historical End-of-Day Report or historical 10-Minute Report data is reasonable because such purchasers will continue to receive a 20% discount for purchasing $20,000 or more worth of such historical Open-Close Report data. The Exchange believes the extended discount is reasonable as it gives purchasers additional time to use and test the historical Open-Close Report data at a discounted rate and therefore should continue to encourage and promote users to purchase the historical Open-Close Report data. Further, the extension of the temporary discount is intended to continue promoting increased use of the Exchange's historical Open-Close Report data by defraying some of the costs a purchaser would ordinarily have to expend. Further, continuing to provide the discount only to existing subscribers of a monthly End-of-Day Report or 10-Minute Report subscription is designed to encourage the purchase of monthly subscriptions to Open-Close Report data.

The Exchange believes that the extension of the temporary discount program is equitable and not unfairly discriminatory because it applies equally to all Members and non-Members who are existing subscribers of the End-of-Day Report or 10-Minute Report and choose to also purchase historical Open-Close Report data for the same category of products. Providing the discount only to existing subscribers is not unfairly discriminatory because it is a reasonable means to encourage the purchase of monthly subscriptions to Open-Close Report data.

The Exchange believes it is reasonable, equitable and not unfairly discriminatory to exclude ad-hoc requests for historical 1-Minute Report data from the discount program because a participant who subscribes to the 1-Minute Report (or requests historical 1-Minute Reports) receives ten times the data points that they would receive in comparison to the 10-Minute Report, which is more beneficial since they are receiving additional data based on shorter intervals. The increased frequency of data intervals in the 1-Minute Report provides more current information and more data reporting intervals. As such, the Exchange believes it reasonable, equitable and not unfairly discriminatory to exclude ad-hoc requests for historical 1-Minute Report data from the discount program because of the enhanced value of the 1-Minute Report, which is 10 times the amount of data. In addition, the Exchange offers free historical data for any current subscriber to the 1-Minute Report who makes an ad-hoc request for historical 1-Minute Report data. In particular, a current 1-Minute Report subscriber who purchases historical 1-Minute Report data may submit an ad-hoc request for historical End-of-Day Report data and/or historical 10-Minute Report data for the same date or date range for no additional charge.[24]

Lastly, the purchase of this data product is discretionary and not compulsory. Indeed, no market participant is required to purchase the historical Open-Close Report data, and the Exchange is not required to make the historical Open-Close Report data available to all investors. Potential purchasers may request the data at any time if they believe it to be valuable or may decline to purchase such data.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange operates in a highly competitive environment in which the Exchange must continually adjust its fees to remain competitive. Because competitors are free to modify their own fees in response, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited. As discussed above, Open-Close Report data is subject to direct competition from several other options exchanges that offer substantively similar substitutes to the Exchange's Open-Close Report, albeit for trading data on those exchanges.[25] Moreover, purchase of historical Open-Close Report data is entirely optional. It is designed to help investors understand underlying market trends to improve the quality of investment decisions, but is not necessary to execute a trade.

The rule change is grounded in the Exchange's efforts to compete more effectively. In this competitive environment, potential purchasers are free to choose which, if any, similar product to purchase to satisfy their need for market information. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges. Further, the Exchange believes that the proposed change will not cause any unnecessary or inappropriate burden on intermarket competition, as the extension of the temporary discount program applies uniformly to any purchaser of historical Open-Close Report data.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[26] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) necessary or appropriate in the public interest; (ii) for the protection of investors, or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #21700 and #21701; GUAM Disaster Number GU–20001]

Presidential Declaration of a Major Disaster for Public Assistance Only for the Territory of Guam

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is notice of the Presidential declaration of a major disaster for Public Assistance Only for the territory of Guam (FEMA–4921–DR), dated June 30, 2026.

Incident: Super Typhoon Sinlaku.

DATES: Issued on June 30, 2026.

Incident Period: April 11, 2026 through April 18, 2026.

Physical Loan Application Deadline Date: August 31, 2026.

Economic Injury (EIDL) Loan Application Deadline Date: March 30, 2027.

ADDRESSES: *Visit the MySBA Loan Portal at https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Sharon Henderson, Office of Disaster Recovery and Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given as a result of the President's major disaster declaration on June 30, 2026, Private Non-Profit organizations providing essential services of a governmental nature may file disaster loan applications online using the MySBA Loan Portal *https://lending.sba.gov* or in person at other locally announced locations. For further assistance please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

The following areas have been determined to be adversely affected by the disaster:

Primary Area: Guam.

The Interest Rates are:

	Percent
For Physical Damage:	
Private Non-Profit Organizations with Credit Available Elsewhere	3.625
Private Non-Profit Organizations without Credit Available Elsewhere	3.625
For Economic Injury:	
Private Non-Profit Organizations without Credit Available Elsewhere	3.625

The number assigned to this disaster for physical damage is 217008 and for economic injury is 217010.

SMALL BUSINESS ADMINISTRATION

Advisory Committee Charter Renewal

AGENCY: U.S. Small Business Administration (SBA).

ACTION: Notice of advisory committee charter renewal.

SUMMARY: Pursuant to sections 14(b) (1) and 9(c) of the Federal Advisory Act (Pub. L. 92–463) and consultation with the General Services Administration, the Small Business Administration has determined that the Invention, Innovation, Entrepreneurship Advisory Committee and the Investment Capital Advisory Committee are in the public interest and essential to the conduct of agency business. Accordingly, the charters for these committees are renewed for a two-year period, effective from the date they are filed with Congress.

DATES: Renewed through July 21, 2028.

FOR FURTHER INFORMATION CONTACT: Andrienne Johnson, Committee Management Officer (CMO), Office of the Administrator, (202) 205–6685 or *FACA@sba.gov.*

SUPPLEMENTARY INFORMATION:

The Invention, Innovation, and Entrepreneurship Advisory Committee

The Invention, Innovation, and Entrepreneurship Advisory Committee provides advice and recommendations to SBA on matters relating to the innovation ecosystem, innovation commercialization and lab-to-market translation. Committee members shall examine the issues, challenges and obstacles facing U.S. innovation economy stakeholders in these subject areas and recommend to SBA policy and programmatic changes to help strengthen and refine SBA's programs and services.

Investment Capital Advisory Committee

The Investment Capital Advisory Committee provides advice and recommendations to SBA on matters relating to institutional investment market trends, innovation, and policy impacting small businesses' ability to access patient investment capital. Committee members will examine the issues, challenges and obstacles facing capital markets, investment managers, and small business entrepreneurs and the stakeholders supporting them in these subject areas and recommend to SBA policy and programmatic changes to help strengthen and refine SBA's programs and services to better facilitate the flow of investment capital to undercapitalized small businesses.

(Authority: 5 U.S.C.10.)

Dated: July 14, 2026.

Andrienne Johnson,

Committee Management Officer.

Administrative Declaration of a Disaster for the State of Illinois

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is notice of an Administrative declaration of a disaster for the state of ILLINOIS dated July 10, 2026.

Incident: Severe Storms and Tornadoes.

DATES: Issued on July 10, 2026.

Incident Period: June 11, 2026.

Physical Loan Application Deadline Date: September 8, 2026.

Economic Injury (EIDL) Loan Application Deadline Date: April 12, 2027.

ADDRESSES: *Visit the MySBA Loan Portal at https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Jennifer Talarico, Office of Disaster Recovery and Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given as a result of the Administrator's disaster declaration, applications for disaster loans may be submitted online using the MySBA Loan Portal *https://lending.sba.gov* or in person at other locally announced locations. For further assistance please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Cook, LaSalle.

Contiguous Counties:

Illinois: Bureau, DeKalb, DuPage, Grundy, Kane, Kendall, Lake, Lee, Livingston, Marshall, McHenry, Putnam, Will, Woodford.

Indiana: Lake.

The Interest Rates are:

	Percent
For Physical Damage:	
Homeowners with Credit Available Elsewhere	5.750
Homeowners without Credit Available Elsewhere	2.875
Businesses with Credit Available Elsewhere	8.000
Businesses without Credit Available Elsewhere	4.000
Private Non-Profit Organizations with Credit Available Elsewhere	3.625
Private Non-Profit Organizations without Credit Available Elsewhere	3.625
For Economic Injury:	
Business and Small Agricultural Cooperatives without Credit Available Elsewhere	4.000
Private Non-Profit Organizations without Credit Available Elsewhere	3.625

The number assigned to this disaster for physical damage is 21681C and for economic injury is 216820.

The states which received an SBA Administrative declaration are Illinois, Indiana.

(Catalog of Federal Domestic Assistance Number 59008)

(Authority: 13 CFR 123.3(b).)

James Stallings,

Associate Administrator, Office of Disaster Recovery & Resilience.

BILLING CODE 8026–09–P

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #21698 and #21699; MISSOURI Disaster Number MO–20030]

Presidential Declaration of a Major Disaster for Public Assistance Only for the State of Missouri

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is notice of the Presidential declaration of a major disaster for Public Assistance Only for the state of Missouri (FEMA–4924–DR), dated June 30, 2026.

Incident: Severe Storms, Tornadoes, and Flooding.

DATES: Issued on June 30, 2026.

Incident Period: April 23, 2026 through April 28, 2026.

Physical Loan Application Deadline Date: August 31, 2026.

Economic Injury (EIDL) Loan Application Deadline Date: March 30, 2027.

ADDRESSES: *Visit the MySBA Loan Portal at https://lending.sba.gov* to apply for a disaster assistance loan.

FOR FURTHER INFORMATION CONTACT: Jennifer Talarico, Office of Disaster Recovery and Resilience, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given as a result of the President's major disaster declaration on June 30, 2026, Private Non-Profit organizations providing essential services of a governmental nature may file disaster loan applications online using the MySBA Loan Portal *https://lending.sba.gov* or in person at other locally announced locations. For further assistance please contact the SBA disaster assistance customer service center by email at *disastercustomerservice@sba.gov* or by phone at 1–800–659–2955. If you are deaf, hard of hearing, or have a speech disability, please dial 7–1–1 to access telecommunications relay services.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Carroll, Chariton, Greene, Holt, Howard, Monroe, Randolph, Ripley, Saline, St. Francois.

The Interest Rates are:

	Percent
For Physical Damage:	
Private Non-Profit Organizations with Credit Available Elsewhere	3.625
Private Non-Profit Organizations without Credit Available Elsewhere	3.625
For Economic Injury:	
Private Non-Profit Organizations without Credit Available Elsewhere	3.625

The number assigned to this disaster for physical damage is 21698B and for economic injury is 216990.

(Catalog of Federal Domestic Assistance Number 59008)

(Authority:13 CFR 123.3(b).)

James Stallings,

Associate Administrator, Office of Disaster Recovery & Resilience.

BILLING CODE 8026–09–P

DEPARTMENT OF STATE

[Public Notice: 13066]

Specially Designated Global Terrorist Designations of Juarez Cartel and Los Viagras

Acting under the authority of and in accordance with section 1(a)(ii)(A) of Executive Order 13224, as amended (''E.O. 13224'' or ''Order''), I hereby determine that the person known as

Juarez Cartel (also known as Cartel de Juarez, La Linea, Vicente Carrillo Fuentes Organization, VCFO, Carrillo Fuentes Drug Trafficking Organization, Barrio Azteca) and Los Viagras (also known as Los Viagras Cartel, Cartel de Los Viagras, Los Blancos de Troya) are foreign persons who have committed or have attempted to commit, poses a significant risk of committing, or have participated in training to commit acts of terrorism that threaten the security of U.S. nationals or the national security, foreign policy, or economy of the United States.

Consistent with the determination in section 10 of E.O. 13224 that prior notice to persons determined to be subject to the Order who might have a constitutional presence in the United States would render ineffectual the blocking and other measures authorized in the Order because of the ability to transfer funds instantaneously, I determine that no prior notice needs to be provided to any person subject to this determination who might have a constitutional presence in the United States, because to do so would render ineffectual the measures authorized in the Order.

This determination shall be published in the **Federal Register**.

Dated: July 2, 2026.

Marco Rubio,

Secretary of State, U.S. Department of State.

[FR Doc. 2026–14278 Filed 7–15–26; 8:45 am]

BILLING CODE 4710–AD–P

DEPARTMENT OF STATE

[Public Notice: 13065]

Foreign Terrorist Organization Designation of Juarez Cartel and Los Viagras

Based upon a review of the Administrative Records assembled in this matter, and in consultation with the Attorney General and the Secretary of the Treasury, I have concluded that there is a sufficient factual basis to find that the relevant circumstances described in section 219 of the Immigration and Nationality Act, as amended (hereinafter ''INA'') (8 U.S.C. 1189), exist with respect to: Juarez Cartel (also known as Cartel de Juarez, La Linea, Vicente Carrillo Fuentes Organization, VCFO, Carrillo Fuentes Drug Trafficking Organization, Barrio Azteca) and Los Viagras (also known as Los Viagras Cartel, Cartel de Los Viagras, Los Blancos de Troya).

Therefore, I hereby designate the aforementioned organizations and their respective aliases as Foreign Terrorist Organizations pursuant to section 219 of the INA.

This determination shall be published in the **Federal Register**. These designations go into effect upon publication.

Dated: July 2, 2026.

Marco Rubio,

Secretary of State, U.S. Department of State.

BILLING CODE 4710–AD–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36943]

Harrison County Railroad Authority—Change of Operators Exemption—Gulf & Ship Island Railroad LLC

Harrison County Railroad Authority (HCRA), a noncarrier, has filed a verified notice of exemption under 49 CFR 1150.31 to replace Gulf & Ship Island Railroad LLC (GSIR) as the operator over approximately 5 miles of rail line (the Line), which is part of a line of railroad commonly known as the Seaway Lead and is controlled via ownership and a lease by Harrison County Development Commission (the County), a noncarrier. The Line extends between a point approximately 800 feet east of U.S. Highway 49 on the Seaway Lead, and the end of the Seaway Lead at Bernard Bayou Industrial Park at or near Gulfport in Harrison County, Miss.

According to the verified notice, GSIR, the current operator of the Line, and the County have terminated their agreement, and HCRA will become the new operator of the Line. HCRA states that it is a subsidiary of the County, which voted on June 30, 2026, to authorize HCRA to file its verified notice. HCRA represents that GSIR stated it would not oppose the change of operating authority, which will release GSIR from its common carrier obligation.

HCRA certifies that its projected annual revenues as a result of this transaction will not result in the creation of a Class II or Class I rail carrier and will not exceed $5 million. HCRA also certifies that the proposed transaction does not impose or include an interchange commitment. Under 49 CFR 1150.32(b), a change in operators exemption requires that notice be given to shippers. HCRA certifies that it has provided a copy of its verified notice to all customers on the Line.

The transaction may be consummated on or after July 30, 2026, the effective date of the exemption (30 days after the verified notice was filed).

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed by July 23, 2026 (at least seven days before the exemption becomes effective).

All pleadings, referring to Docket No. FD 36943, must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on HCRA's representative, Justin J. Marks, Clark Hill PLC, 1001 Pennsylvania Avenue NW, Suite 1300 South, Washington, DC 20004.

According to HCRA, this action is categorically excluded from environmental review under 49 CFR 1105.6(c) and from historic preservation reporting requirements under 49 CFR 1105.8(b).

Board decisions and notices are available at *www.stb.gov.*

Decided: July 14, 2026.

By the Board, Anika S. Cooper, Chief Counsel, Office of Chief Counsel.

Kenyatta Clay,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

FAA Approval of Noise Compatibility Program 14 CFR Part 150 Dane County Regional Airport, Madison, Wisconsin

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its findings on the noise compatibility program submitted by the Dane County for Dane County Regional Airport (MSN). On December 21, 2023, the FAA determined that the noise exposure maps (NEMs) submitted by Dane County were in compliance with applicable requirements. On July 10, 2026, the FAA approved the Dane County Regional Airport noise compatibility program. The noise compatibility program consisted of 18 recommended measures, including 9 noise abatement measures, 5 land use measures, and 4 program management measures. Of the measures, 12 were approved, 2 were

partially approved, 1 was approved as voluntary, 1 was disapproved, and 2 were determined to have no present FAA action.

DATES: The effective date of the FAA's approval of the Dane County Regional Airport noise compatibility program is July 10, 2026.

FOR FURTHER INFORMATION CONTACT: Emma Lienau, Chicago Airports District Office, 2300 Devon Avenue, Suite 312, Des Plaines, Illinois 60018. Tel: 847–294–7551.

SUPPLEMENTARY INFORMATION: This notice announces FAA's approval of the noise compatibility program for Dane County Regional Airport, effective July 10, 2026. Per United States Code section 47504 (49 U.S.C. 47504) and Title 14, Code of Federal Regulations (CFR) Part 150, an airport sponsor who has previously submitted a noise exposure map may submit to the FAA a noise compatibility program which sets forth the measures taken or proposed by the airport sponsor for the reduction of existing non-compatible land uses and prevention of additional non-compatible land uses within the area covered by the NEMs. As required by 49 U.S.C. 47504, such programs must be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and the FAA.

The FAA does not substitute its judgment for that of the airport sponsor with respect to which measures should be recommended for action. The FAA approval or disapproval of an airport sponsor's recommendations in its noise compatibility program are made in accordance with the requirements and standards pursuant to 49 U.S.C. 47504 and 14 CFR part 150, which is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of 14 CFR 150.23;

b. Program measures are reasonably consistent with achieving the goals of reducing existing non-compatible land uses around the airport and preventing the introduction of additional non-compatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations of FAA's approval of NCPs are delineated in 14 CFR part 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state, or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where federal funding is sought, requests for project grants must be submitted to the FAA Airports District Office in Des Plaines, Illinois.

The Dane County submitted the NEMs, descriptions, and other documentation produced during the noise compatibility planning study to the FAA and the FAA determined that the NEMs for MSN were in compliance with the applicable requirements under 14 CFR part 150. The NEMs became effective on December 21, 2023. Notice of this determination was published in the **Federal Register** on Friday, February 9, 2024 (FR Doc. 2024–02660). For FAA's review and approval, Dane County submitted the updated NCP, based on the accepted NEMs, on October 24, 2025. The FAA officially began its formal review of the program on January 13, 2026, and was limited by law to approve or disapprove the program within 180 days (other than the use of new or modified flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program. Notice of the intent to review the NCP was published in the **Federal Register** on January 15, 2026 (FR Doc. 2026–00683). The **Federal Register** Notice also announced the start of the 60-day public review period for the NCP and its documentation. The FAA received 9 comments during the public review period.

The submitted program contained 18 proposed actions to minimize impacts of aviation noise (on and/or off the airport, as applicable). The FAA completed its review and determined that the procedural and substantive requirements of 49 U.S.C. 47504 and 14 CFR part 150 were satisfied. A Record of Approval for the overall program was issued by the FAA effective July 10, 2026.

The specific program elements and their individual determinations are as follows:

NA–1: Develop Noise Abatement Flight Paths and Encourage Use of Such Flight Paths to Avoid Aircraft Overflying Educational Facilities to the South of the Airport—No Action Required at This Time.

NA–2: Encourage aircraft departing Runway 32 to pass through 2,500 feet Mean Sea Level (MSL) before turning left—Approved.

NA–3: Encourage eastbound and southbound aircraft exceeding 12,500 pounds departing Runway 3 to climb on runway heading through 2,500 feet Mean Sea Level (MSL) before turning right—Approved.

NA–4: Encourage all aircraft exceeding 12,500 pounds and departing Runway 21 to turn left 10 degrees as soon as safe and practicable—Approved.

NA–5: Encourage use of the established visual approach and departure corridors for helicopters—Approved.

NA–6: Modify the existing preferential runway use program to improve the compliance with aircraft arriving from and departing to the north—Partially Approved.

NA–7: Encourage the use of Noise Abatement Departure Profile (NADP) procedures by operators of jet aircraft—Approved as Voluntary.

NA–8: Consider Runway Reconfiguration to Address Noncompatible Land Use to the South of the Airport—No Action Required at This Time.

NA–9: Encourage the Wisconsin Air National Guard 115th Fighter Wing to limit F–35A aircraft operations to the daytime—Disapproved for the Purposes of Part 150.

LU–1: Maintain Existing Compatible Land Uses in the Airport Vicinity—Approved.

LU–2: Continue Voluntary Land Acquisition of Noncompatible Land Uses Inside The 70 DNL Noise Contour—Approved.

LU–3: Acquire Cherokee Marsh and Token Creek Park Areas Should They Be Considered for Noise-Sensitive Use—Partially Approved.

LU–4: Monitor for voluntary land acquisition of the Oak Park Terrace mobile home community—Approved.

LU–5: Implement a Sound Insulation Program to Provide Treatment to Noise Sensitive Structures Within the 65 DNL Noise Contour—Approved.

PM–1: Re-Establish And Maintain a Noise Advisory Committee—Approved.

PM–2: Continue and Improve Noise Complaint Response Program—Approved.

PM–3: Regular Updates of the Noise Exposure Map—Approved.

PM–4: Periodic Evaluation and Update of the Noise Compatibility Program when Necessary—Approved.

These determinations are set forth in detail in a Record of Approval signed by the Great Lakes Region, Airports Division Manager on July 10, 2026. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the Dane County Regional Airport. The Record of Approval also will be available on-line at *https://www.faa.gov/airports/environmental/airport_noise/part_150/states.*

Issued in Des Plaines, IL.

Dated: July 10, 2026.

James Gregory Keefer,

Director, Airports Division, Great Lakes Region.

[FR Doc. 2026–14255 Filed 7–15–26; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Noise Exposure Map Notice; Boca Raton Airport, Boca Raton, Florida

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the Noise Exposure Maps submitted by the Boca Raton Airport Authority for the Boca Raton Airport under the provisions of 49 U.S.C. 47501 *et seq.* (Aviation Safety and Noise Abatement Act) and 14 CFR part 150 are in compliance with applicable requirements.

DATES: The effective date of the FAA's determination on the Noise Exposure Maps is July 9, 2026.

FOR FURTHER INFORMATION CONTACT: Heather Chasez, Federal Aviation Administration, Orlando Airports District Office, 8427 SouthPark Circle, Suite 524, Orlando, Florida 32819, (407) 487–7236.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA finds that the Noise Exposure Maps submitted for the Boca Raton Airport are in compliance with applicable requirements of Title 14 Code of Federal Regulations (CFR) Part 150, effective July 9, 2026. Under 49 U.S.C. 47503 of the Aviation Safety and Noise Abatement Act (''the Act''), an airport operator may submit to the FAA Noise Exposure Maps which meet applicable regulations and which depict non-compatible land uses as of the date of submission of such maps, a description of projected aircraft operations, and the ways in which such operations will affect such maps. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies, and persons using the airport. An airport operator who has submitted Noise Exposure Maps that are found by FAA to be in compliance with the requirements of 14 CFR part 150, promulgated pursuant to the Act, may submit a Noise Compatibility Program for FAA approval, which sets forth the measures the airport operator has taken or proposes to take to reduce existing non-compatible uses and prevent the introduction of additional non-compatible uses.

The FAA has completed its review of the Noise Exposure Maps and accompanying documentation submitted by the Boca Raton Airport Authority. The documentation that constitutes the ''Noise Exposure Maps'' as defined in 14 CFR 150.7 includes: 2025 Existing Condition Noise Exposure Map, 2030 Future Condition Noise Exposure Map, Runway 5 Flight Tracks Map, Runway 23 Flight Tracks Map, Touch and Go Flight Tracks Map, Helicopter Flight Tracks Map, the Existing and Future Conditions Noise Exposure Map, and Supporting Documentation Report. The FAA has determined that these Noise Exposure Maps and accompanying documentation are in compliance with applicable requirements. This determination is effective on July 9, 2026.

FAA's determination on the airport operator's Noise Exposure Maps is limited to a finding that the maps were developed in accordance with the procedures contained in Appendix A of 14 CFR part 150. Such determination does not constitute approval of the airport operator's data, information or plans, or a commitment to approve a Noise Compatibility Program or to fund the implementation of that Program. If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a Noise Exposure Map submitted under Section 47503 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise exposure contours, or in interpreting the Noise Exposure Maps to resolve questions concerning, for example, which properties should be covered by the provisions of Section 47506 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under 14 CFR part 150 or through FAA's review of the Noise Exposure Maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator that submitted those maps, or with those public agencies and planning agencies with which consultation is required under Section 47503 of the Act. The FAA has relied on the certification by the airport operator, under 14 CFR 150.21, that the statutorily required consultation has been accomplished.

Copies of the full Noise Exposure Maps and report are available for examination by appointment at the following location: Federal Aviation Administration, Orlando Airports District Office, 8427 SouthPark Circle, 5th Floor, Orlando, Florida 32819. The Noise Exposure Maps and report are also available for viewing and download at the airport's website (*https://bocaairport.com/noise-exposure-map-update/*).

To arrange an appointment to review the Noise Exposure Maps and report, contact Heather Chasez, Federal Aviation Administration, Southern Region/Orlando Airports District Office, 8427 SouthPark Circle, Suite 524, Orlando, FL 32819, (407) 487–7236. Questions may be directed to the individual named above under the heading, **FOR FURTHER INFORMATION CONTACT**.

Issued in Orlando Airports District Office, Orlando, FL on July 9, 2026.

Juan C. Brown,

Manager, Orlando Airports District Office.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[FAA–2026–7459]

Notice of Intent; Anchorage Terminal Area Airspace and Procedures Study Notice of Intent for Preparation for an Environmental Assessment.

AGENCY: Federal Aviation Administration (FAA), Department of Transportation.

ACTION: Notice of Intent (NOI) for the Commencement of the Anchorage Terminal Area Airspace and Procedures Study (ATAAPS) Environmental Assessment (EA) UIN EAXX–021–12–WSC–1768398367.

SUMMARY: The FAA, in cooperation with the United States Air Force, is announcing the commencement of the ATAAPS EA for the proposed Anchorage terminal airspace redesign. ATAAPS involves changes to the airspace, aircraft flight paths, and aircraft altitudes in the Anchorage basin and surrounding areas. The EA will evaluate the potential environmental impacts of the proposed airspace redesign (Proposed Action) and alternatives, including the No Action alternative. The FAA has not made a final decision on any airspace/procedure amendments related to the Proposed Action. The FAA is currently establishing a timeline for the EA. Project updates will be posted to the FAA ATAAPS web page at: *https://www.faa.gov/about/office_org/headquarters_offices/ara/alaskan_region/ataaps.*

This project would increase safety and improve efficiency of the National Airspace System (NAS) and homeland defense capabilities, by optimizing aircraft arrival and departure procedures that serve multiple airports—specifically in the Anchorage basin and surrounding areas—including: Ted Stevens Anchorage International Airport (ANC), Elmendorf Air Force Base Airport (EDF), Bryant Army Airfield Airport (FRN), Lake Hood Airport (LHD), and Merrill Field Airport (MRI).

As a critical strategic gateway for homeland defense, Joint Base Elmendorf-Richardson (JBER) is currently restricted to operating below the facility's intended capacity and fleet mix until surrounding airspace is officially modified. The Instrument Landing System (ILS) for Runway 17 is integral to improving JBER operations and cannot become operational under the current airspace design. (JBER runway designations are currently 16/34 and 06/24, but will be updated due to Magnetic Variation changes to Runways 17/35 and 07/25 before completion of the EA.)

The FAA is initiating this EA and will engage the public, government agencies, and tribes as appropriate.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph Bert, Federal Aviation Administration, Team Manager, Environmental/Community Involvement/NAS Analytics, Operations Support Group, Western Service Center|, email: *9-AJO-ATAAPS-Environmental@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

ATAAPS addresses national security concerns as well as air traffic system inefficiencies within the Anchorage basin and surrounding areas. The ATAAPS EA will be prepared pursuant to the National Environmental Policy Act of 1969. The EA will consider at least two alternatives: the Proposed Action and the No Action alternative. The Proposed Action being developed focuses on airspace optimization for aircraft routes and controlled airspace within the Anchorage basin and surrounding areas. Area navigation (RNAV)-based standard instrument departure (SID) and standard terminal arrival (STAR) procedures have been in effect in the Anchorage basin and surrounding areas for nearly 20 years. These arrival and departure procedures will be designed with advanced RNAV capabilities and will maintain safety and improve efficiency of the NAS, benefitting pilots, air traffic controllers, and the general public.

The Proposed Action is not anticipated to increase the number of aircraft operations at the study airports or involve the physical construction of any facilities.

The Proposed Action will include the following elements:

- UPDATED AIRSPACE BOUNDARIES. Aircraft operating in the Anchorage basin currently fly within the Anchorage Part 93 airspace in which specific, special air traffic rules are in effect (see 14 CFR part 93). These rules address issues like high-density traffic, unique airspace configurations, and limitations related to military operations and national parks. The evaluation of airspace in the Anchorage basin includes Class C and Class D airspace around affected airports.
- UPDATED DEPARTURE ROUTES AND/OR FIXES FROM THE STUDY AIRPORTS. Routes and fixes will connect study airports to optimized high-altitude routes using satellite-based RNAV technology.
- UPDATED ARRIVAL ROUTES AND/OR FIXES INTO THE STUDY AIRPORTS. Routes and fixes will connect transitions from high-altitude routes to existing approach procedures for the study airports using advanced RNAV procedures.

The FAA will establish a general study area, wherein proposed procedure changes below 10,000 feet above ground level (AGL) will be evaluated for potential environmental impacts. Additionally, the FAA will evaluate areas where FAA policy requires special consideration for potential noise impacts—which may include national parks, national wildlife refuges, historic sites and traditional cultural properties—for proposed procedure changes below 18,000 feet AGL. The Proposed Action may include procedure changes at altitudes greater than 18,000 feet AGL (high altitudes) within an approximate 200-nautical mile radius of Anchorage; however, these high-altitude changes are considered generally outside the affected environmental study area per FAA Order 1050.1G, *FAA National Environmental Policy Act Implementing Procedures.* The FAA will provide a notice of availability (NOA) for the draft EA at a future date.

Issued in Des Moines, Washington, on July 14, 2026.

B. G. Chew,

Group Manager, Operations Support Group, Western Service Center.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2026–1553]

Agency Information Collection Activities; Renewal of an Approved Information Collection: Inspection, Repair and Maintenance

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FMCSA announces its plan to submit the Information Collection Request (ICR) described below to the Office of Management and Budget (OMB) for its review and approval and invites public comment. The information collection concerns records of inspection, repair, and maintenance of commercial motor vehicles (CMVs). FMCSA requests approval to renew an ICR entitled, ''Inspection, Repair and Maintenance.'' FMCSA collects this information to ensure that motor carriers have adequate documentation of their inspection, repair, and maintenance programs necessary to reduce the likelihood of CMV crashes.

DATES: Comments must be received on or before September 14, 2026.

ADDRESSES: You may submit comments identified by Docket Number FMCSA–2026–1553 by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov/docket/FMCSA-2026-1553/document.* Follow the online instructions for submitting comments.
- *Mail:* Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, W58–213, West Building, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Dockets Operations, U.S. Department of Transportation, 1200 New Jersey Avenue SE, W58–213, Washington, DC, 20590–0001 between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.
- *Fax:* (202) 493–2251.

To avoid duplication, please use only one of these four methods. See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Mr. José R. Cestero, Mechanical Engineer, FMCSA Vehicle and Roadside Operations Division, DOT, FMCSA, 1200 New Jersey Avenue SE, Washington, DC 20590–0001; (202) 309–9284; *jose.cestero@dot.gov.*

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2026–1553), indicate the specific section of this document to which your comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *https://www.regulations.gov/docket/FMCSA-2026-1553/document,* click on this notice, click ''Comment,'' and type your comment into the text box on the following screen.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing.

FMCSA will consider all comments and material received during the comment period.

Privacy Act

In accordance with 5 United States Code (U.S.C.) 553(c), DOT solicits comments from the public to better inform its regulatory process. DOT posts these comments, including any personal information the commenter provides, to *www.regulations.gov* as described in the system of records notice DOT/ALL 14 (Federal Docket Management System (FDMS)), which can be reviewed at *https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices.* The comments are posted without edits and are searchable by the name of the submitter.

Background

The Secretary of Transportation (Secretary) is authorized under the provisions of 49 U.S.C. 31502 to prescribe requirements for, among other things, safety of operations of equipment of motor carriers that operate CMVs in interstate commerce. Under 49 U.S.C. 31136, the Secretary also has authority to prescribe regulations to ensure that CMVs are maintained, equipped, loaded, and operated safely. Under 49 U.S.C. 31142 the Secretary must establish standards for annual or more frequent inspections of CMVs. The Secretary's authority to establish improved standards or methods to ensure brakes and brake systems of CMVs are inspected by appropriate employees and maintained properly is provided under 49 U.S.C. 31137(g). These authorities have been delegated to the Administrator of the Federal Motor Carrier Safety Administration in 49 CFR 1.87.

Motor carriers must maintain, or require maintenance of, records documenting the inspection, repair and maintenance activities performed on their owned and leased vehicles. There are no prescribed forms. Electronic recordkeeping is allowed (see 49 CFR 390.31(d)). Documents requiring a signature must be capable of replication (*e.g.,* photocopy, facsimile, etc.) in such form that will provide an opportunity for signature verification upon demand. Also, if electronic recordkeeping is used, all of the relevant data on the original documents must be included in the electronic transmission for the records to be valid.

The motor carrier industry has never questioned the need to keep CMV maintenance records. In fact, most motor carriers would keep some records without any regulatory requirements to do so. Records of inspection, repair, and maintenance; roadside inspection reports; driver vehicle inspection reports; the documentation of periodic inspections; the evidence of the qualifications of individuals performing periodic inspections; and the evidence of brake inspectors' qualifications contain the minimum amount of information necessary to document that a motor carrier has established a system of inspection, repair, and maintenance for its equipment which meets the standards in 49 CFR part 396.

FMCSA and its representatives use these records to verify motor carriers' compliance with the inspection, repair, and maintenance standards in part 396. This ICR supports DOT's strategic goal of safety. The ICR also ensures that motor carriers have adequate records to document the inspection, repair, and maintenance of their CMVs, and to ensure that adequate measures are taken to keep their CMVs in safe and proper operating condition at all times. Compliance with the inspection, repair, and maintenance regulations helps to reduce the likelihood of accidents attributable, in whole or in part, to the mechanical condition of the CMV. This ICR submittal includes updated data regarding the number of motor carriers subject to the Federal Motor Carrier Safety Regulations, vehicle counts, inspections, and other underlying data used to estimate the total burden hours.

If the recordkeeping were required to be completed less frequently, it would greatly hinder the ability of FMCSA and State officials and representatives to ascertain that CMVs are satisfactorily maintained. The timely documentation of CMV inspection, repair, and maintenance enables FMCSA and State officials to evaluate the present state of a motor carrier's CMV maintenance program and to check the current level of regulatory compliance at any point in a carrier's maintenance schedule or program.

FMCSA has identified periodic inspection standards of 22 States, the District of Columbia, the Alabama Liquefied Petroleum Gas Board, 10 Canadian Provinces, and 1 Canadian Territory that are comparable to, or as effective as, the Federal periodic inspection requirements. FMCSA does not require Federal periodic inspections and the related recordkeeping for motor carriers that comply with these equivalent periodic inspection programs. FMCSA is not aware of any other duplicative standards or recordkeeping requirements that apply to motor carriers.

FMCSA does not employ this collection of information for statistical use.

Title: Inspection, Repair and Maintenance.

OMB Control Number: 2126–0003.

Type of Request: Renewal of a currently approved information collection.

Respondents: Motor carriers and CMV drivers.

Estimated Number of Respondents: 715,289 motor carriers and 5,793,962 drivers.

Estimated Time per Response: Varies according to the requirements for specific records.

Expiration Date: March 31, 2027.

Frequency of Response: Varies according to requirements for specific records.

Estimated Total Annual Burden: 13,184,781 hours [9,023,865 hours for inspection, repair, and maintenance + 3,800,113 hours for driver inspection reports + 174,636 hours for disposition of roadside inspection reports + 144,045 hours for periodic inspections + 22,253 hours for records of inspector qualifications + 19,869 hours for records of brake inspector qualifications].

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) whether the proposed collection is necessary for the performance of FMCSA's functions; (2) the accuracy of the estimated burden; (3) ways for FMCSA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize or include your comments in the request for OMB's clearance of this information collection.

Issued under the authority of 49 CFR 1.87.

Nicole S. Michel,

Acting Associate Administrator, Office of Research and Registration.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2009–0078]

Notice of Petition for Amendment of Waiver of Compliance

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: This document provides the public notice that the American Short Line and Regional Railroad Association (ASLRRA) petitioned FRA to amend an existing waiver of certain regulations related to hours of service.

DATES: FRA must receive comments on the petition by September 14, 2026. FRA will consider comments received after that date to the extent practicable.

ADDRESSES:

Comments: Comments related to this docket may be submitted by going to *https://www.regulations.gov* and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and docket number. All comments received will be posted without change to *https://www.regulations.gov;* this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to *https://www.regulations.gov* and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: William Smith, Railroad Safety Specialist, FRA Operating Practices Division, telephone: 682–305–6709, email: *William.Smith@dot.gov.*

SUPPLEMENTARY INFORMATION: Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letter received June 3, 2026, ASLRRA petitioned FRA for an amendment of a waiver of compliance from certain provisions of the Federal hours of service (HOS) laws contained at 49 U.S.C. 21103(a)(4). The relevant Docket Number is FRA–2009–0078.

Specifically, ASLRRA seeks to amend its existing waiver by adding 8 railroads to the list of railroad participants in the original waiver. ASLRRA stated the following railroads expressed a desire to participate in the waiver and maintain at each of their headquarters supporting documentation of employee support, as required:

- Northeast Atlanta Railroad
- Columbia Basin Railroad
- Central Washington Railroad
- Waterloo Railroad
- Cimmaron Valley Railroad
- Kansas City West Bottom Railroad
- Oregon Eastern Railroad
- Nebraska Kansas Colorado Railroad

ASLRRA states it conducts training multiple times annually for waiver participants to clarify the requirements of the waiver.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov.*

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

Communications received by September 14, 2026 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

Privacy Act

Anyone can search the electronic form of any written communications and comments received into any of FRA's dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.* See also *https://www.regulations.gov/privacy-notice* for the privacy notice of *regulations.gov.*

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA–2010–0030]

Massachusetts Bay Transportation Authority's Request To Amend its Positive Train Control System

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of availability and request for comments.

SUMMARY: This document provides the public with notice that, on July 9, 2026, the Massachusetts Bay Transportation Authority (MBTA) submitted a request for amendment (RFA) to its FRA-certified positive train control (PTC)

system. FRA is publishing this notice and inviting public comment on the railroad's RFA.

DATES: FRA will consider comments received by August 5, 2026. FRA may consider comments received after that date to the extent practicable and without delaying implementation of valuable or necessary modifications to a PTC system.

ADDRESSES:

Comments: Comments may be submitted by going to *https://www.regulations.gov* and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and the applicable docket number. The relevant PTC docket number for this host railroad is Docket No. FRA–2010–0030. For convenience, all active PTC dockets are hyperlinked on FRA's website at *https://railroads.dot.gov/research-development/program-areas/train-control/ptc/railroads-ptc-dockets.* All comments received will be posted without change to *https://www.regulations.gov;* this includes any personal information.

FOR FURTHER INFORMATION CONTACT: Gabe Neal, Staff Director, Signal, Train Control, and Crossings Division, telephone: 816–516–7168, email: *Gabe.Neal@dot.gov.*

SUPPLEMENTARY INFORMATION: In general, title 49 United States Code (U.S.C.) section 20157(h) requires FRA to certify that a host railroad's PTC system complies with title 49 Code of Federal Regulations (CFR) part 236, subpart I, before the technology may be operated in revenue service. Before making certain changes to an FRA-certified PTC system or the associated FRA-approved PTC Safety Plan (PTCSP), a host railroad must submit, and obtain FRA's approval of, an RFA to its PTC system or PTCSP under 49 CFR 236.1021.

Under 49 CFR 236.1021(e), FRA's regulations provide that FRA will publish a notice in the **Federal Register** and invite public comment in accordance with 49 CFR part 211, if an RFA includes a request for approval of a material modification of a signal or train control system. Accordingly, this notice informs the public that, on July 9, 2026, MBTA submitted an RFA to its PTC system, the Advanced Civil Speed Enforcement System II, seeking FRA's approval of a temporary outage of MBTA's PTC system to support the reconfiguration of Control Point CP–44 on the Worcester Main Line. That RFA is available in Docket No. FRA–2010–0030.

Interested parties are invited to comment on MBTA's RFA by submitting written comments or data. During FRA's review of this railroad's RFA, FRA will consider any comments or data submitted within the timeline specified in this notice and to the extent practicable, without delaying implementation of valuable or necessary modifications to a PTC system. *See* 49 CFR 236.1021; *see also* 49 CFR 236.1011(e). Under 49 CFR 236.1021, FRA maintains the authority to approve, approve with conditions, or deny a railroad's RFA at FRA's sole discretion.

Privacy Act Notice

In accordance with 49 CFR 211.3, FRA solicits comments from the public to better inform its decisions. DOT posts these comments, without edit, including any personal information the commenter provides, to *https://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.* See *https://www.regulations.gov/privacy-notice* for the privacy notice of *regulations.gov.* To facilitate comment tracking, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. If you wish to provide comments containing proprietary or confidential information, please contact FRA for alternate submission instructions.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2026–1651]

Notice of Petition for Waiver of Compliance

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: This document provides the public notice that CSX Transportation Inc. (CSXT) petitioned FRA for relief from certain regulations concerning tests and inspections of extended haul trains.

DATES: FRA must receive comments on the petition by September 14, 2026. FRA will consider comments received after that date to the extent practicable.

ADDRESSES:

Comments: Comments related to this docket may be submitted by going to *https://www.regulations.gov* and following the online instructions for submitting comments.

Instructions: All submissions must include the agency name and docket number. All comments received will be posted without change to *https://www.regulations.gov;* this includes any personal information. Please see the Privacy Act heading in the **SUPPLEMENTARY INFORMATION** section of this document for Privacy Act information related to any submitted comments or materials.

Docket: For access to the docket to read background documents or comments received, go to *https://www.regulations.gov* and follow the online instructions for accessing the docket.

FOR FURTHER INFORMATION CONTACT: Michael Barron, Railroad Safety Specialist, FRA Motive Power & Equipment Division, telephone: 202–493–1367, email: *michael.barron@dot.gov.*

SUPPLEMENTARY INFORMATION: Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letter dated June 5, 2026, CSXT petitioned FRA for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 232 (Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment; End-of-Train Devices). FRA assigned the petition Docket Number FRA–2026–1651.

Specifically, CSXT seeks relief from the requirements of § 232.213, *Extended haul trains,* to continue operating certain extended haul trains up to a maximum of 1,785 miles. To extend the operating miles, CSXT proposes requirements for the trains to receive a Class 1 brake test and mechanical inspection by a qualified mechanical inspector prior to each train's initial departure. Further, the petition states that the waiver applies only to trains on approved routes equipped with wayside detectors.

In support of its request, CSXT expressed that the waiver will ''maintain or enhance overall brake system safety,'' reduce employees' exposure during walking inspections, improve ''train fluidity while preserving mechanical integrity,'' and align ''inspection practices with demonstrated equipment performance.''

A copy of the petition, as well as any written communications concerning the

petition, is available for review online at *www.regulations.gov.*

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

Communications received by September 14, 2026 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

Privacy Act

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2020–0127]

Deepwater Port License Application: Blue Marlin Offshore Port Project—Final Public Hearing

AGENCY: Maritime Administration, U.S. Department of Transportation.

ACTION: Notice of final public hearing.

SUMMARY: The Maritime Administration (MARAD) and the U.S. Coast Guard (USCG) announce the final public hearing for the Blue Marlin Offshore Port (BMOP) Deepwater Port license application for the export of oil from the United States to nations abroad. The BMOP Deepwater Port license application describes a project located approximately 99 statute miles off the coast of Cameron Parish, Louisiana, with an approximate water depth of 162 feet. MARAD encourages public participation in the final public hearing and is providing information on how to participate at the final public hearing and welcomes comments on the BMOP Deepwater Port license application.

DATES: MARAD and USCG will hold two final public hearings in connection with the BMOP Application. The first public hearing will be held on Aug. 4, 2026, from 6:00 p.m. to 8:00 p.m. Central Daylight Time (CDT) in the Cameron Parish Police Jury West Annex, 148 Smith Circle, Cameron, LA. The second public hearing will be held on Aug. 5, 2026, from 6:00 p.m. to 8:00 p.m. CDT in the Bob Bowers Civic Center, 3401 Cultural Center Drive, Port Arthur, TX 77640. Each public hearing will be preceded by an Informational Open House, held between 5:00 p.m. and 6:00 p.m. CDT. Materials submitted in response to this request for comments on the BMOP Deepwater Port license application may be submitted verbally or in writing during the public hearing mentioned above. If you choose to submit comments in writing regarding the BMOP Deepwater Port license application, you may do so via the Federal eRulemaking Portal or the Federal Docket Management Facility as detailed in the **ADDRESSES** section below by 11:59 p.m. EDT on Aug. 5, 2026.

ADDRESSES: You may submit comments identified by DOT Docket Number MARAD–2020–0127 by any one of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Search MARAD–2020–0127 and follow the instructions for submitting comments.
- *Mail or Hand Delivery:* The DOT Docket is located at the U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590. Documents may be delivered between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

Note: If you mail or hand-deliver your comments, we recommend that you include your name, mailing address, email address, or telephone number so that we can contact you if we have questions regarding your submission.

Instructions: All submissions received must include the agency name and specific docket number. All comments received will be posted without change to the docket at *www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Mr. Brent Yezefski, Program Manager, USCG, telephone: 202–372–1351, email: *DeepwaterPorts@USCG.mil;* or Dr. Efrain Lopez, Senior Transportation Industry Analyst, Office of Deepwater Ports, MARAD, telephone: 202–366–9761, email: *Deepwater.Ports@dot.gov.*

SUPPLEMENTARY INFORMATION:

Final Public Hearing

MARAD encourages the public to attend the informational open house and final public hearing for the BMOP Deepwater Port license application. Speakers at the public hearing will be recognized in the following order: elected officials, public agencies, individuals, or groups in the sign-up order, and then anyone else who wishes to speak.

In order to allow everyone a chance to speak at the public hearing, MARAD may limit speaker time, extend the hearing hours, or both. Speakers must identify themselves, and any organization they represent, by name. All remarks will be recorded and transcribed for inclusion in the public docket.

Commenters may submit written material at the hearing either in place of, or in addition to, speaking. Written material should include the commenter's name and address and will be included in the public docket and made available to the public on the Federal Docket Management System (FDMS) website at *www.regulations.gov.* MARAD will also accept written comments submitted to FDMS by 11:59 p.m. EDT, Aug. 5, 2026 (*see* **ADDRESSES**).

If you plan to participate in the public hearing and need special assistance such as sign language interpretation, non-English language translator services or other reasonable accommodation, please notify MARAD (*see* **FOR FURTHER INFORMATION CONTACT**) at least seven business days in advance of the public hearing. Include your contact information as well as information about your specific needs.

Comments During the Final Public Hearing

MARAD encourages comments on the proposed BMOP Deepwater Port license application, verbally or in writing during the final public hearing. Comments may be used to inform MARAD's Record of Decision for the BMOP Deepwater Port license application. MARAD encourages you to review the applicant's information online on the FDMS website at

www.regulations.gov under DOT Docket Number MARAD–2020–0127. The application, all comments, and associated documentation will be found on the docket..

Privacy Act: Anyone can search the electronic form of all comments received into the FDMS website by the docket number and name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.).

Summary of the Application

BMOP is proposing to construct, own, operate, and eventually decommission a Deepwater Port terminal in the Gulf of America to export domestically produced crude oil. Use of the Deepwater Port would include the loading of various grades of crude oil at flow rates of up to 80,000 barrels per hour (bph). The BMOP Deepwater Port would allow for up to one Very Large Crude Carrier (VLCC) or other crude oil carrier to moor at the catenary anchor leg mooring (CALM) and connect with the Deepwater Port via floating connecting crude oil hoses. The maximum loading volume for VLCCs or other crude oil carriers would be approximately 2 million barrels per day, 365 days per year.

A Notice of Application that summarized the BMOP Deepwater Port License Application was published in the **Federal Register** on Nov. 4, 2020 (85 FR 70233). A Notice of Intent to Prepare an Environmental Impact Statement (EIS) and a Notice of Public Scoping Meeting was published in the **Federal Register** on November 5, 2020 (85 FR 70707). A Notice of Availability for the DEIS and Notice of Public Meeting was published in the **Federal Register** on Feb. 21, 2025 (90 FR 10444).

By Order of the Maritime Administrator.

T. Mitchell Hudson, Jr.

Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2020–0127]

Deepwater Port License Application: Blue Marlin Offshore Port Project-Final Environmental Impact Statement

AGENCY: Maritime Administration, U.S. Department of Transportation.

ACTION: Notice of availability; final environmental impact statement.

SUMMARY: The Maritime Administration (MARAD) and the U.S. Coast Guard (USCG) announce the availability of the Final Environmental Impact Statement (FEIS) for the Blue Marlin Offshore Port (BMOP) Deepwater Port license application for the export of oil from the United States to nations abroad. The BMOP Deepwater Port license application describes a project located approximately 99 statute miles off the coast of Cameron Parish, Louisiana, with an approximate water depth of 162 feet. The FEIS analyzes the potential environmental impacts of the Project and the alternatives to the proposed action, including the no action alternative. The FEIS will inform MARAD's decision to approve, approve with conditions, or disapprove the BMOP Deepwater Port license application.

ADDRESSES: The FEIS and detailed information about the Project can be found on the Federal Docket Management System (FDMS) website at *https://www.regulations.gov* and searching for Docket Number MARAD–2020–0127.

FOR FURTHER INFORMATION CONTACT: Mr. Brent Yezefski, Program Manager, USCG, telephone: 202–372–1351, email: *DeepwaterPorts@USCG.mil;* or Dr. Efrain Lopez, Senior Transportation Industry Analyst, Office of Deepwater Ports, MARAD, telephone: 202–366–9761, email: *Deepwater.Ports@dot.gov.*

SUPPLEMENTARY INFORMATION:

Proposed Action

BMOP is proposing to construct, own, operate and eventually decommission a Deepwater Port terminal in the Gulf of America to export domestically produced crude oil. Use of the Deepwater Port would include the loading of various grades of crude oil at flow rates of up to 80,000 barrels per hour (bph). The BMOP Deepwater Port would allow for up to one Very Large Crude Carrier (VLCC) or other crude oil carrier to moor at the catenary anchor leg mooring (CALM) and connect with the Deepwater Port via floating connecting crude oil hoses. The maximum volume of loading VLCCs or other crude oil carriers would be approximately 2 million barrels per day, 365 days per year.

A Notice of Application that summarized the BMOP Deepwater Port License Application was published in the **Federal Register** for public comment on November 4, 2020 (85 FR 70233). A Notice of Intent to Prepare an Environmental Impact Statement (EIS) and a Notice of Public Scoping Meeting was published in the **Federal Register** for public comment on November 5, 2020 (85 FR 70707). A Notice of Availability for the DEIS and Notice of Public Meeting was published in the **Federal Register** for public comment on February 21, 2025 (90 FR 10444). This Notice of Availability incorporates the aforementioned **Federal Register** notices by reference.

The Notice of Intent to prepare the EIS previously anticipated a public comment period on the FEIS. However, in keeping with Executive Order 14154, *Unleashing American Energy,* and after reviewing the National Environmental Policy Act's statutory requirements, MARAD has determined that it will not solicit public comments on the FEIS, which is issued as final. Substantive comments received from the public were considered and incorporated, as appropriate, into the FEIS. Public comments generally resulted in the addition of clarifications and analysis, but comments did not identify substantial new circumstances or information relevant to environmental concerns that have a bearing on the proposed action or its impacts.

All substantive comments received, along with MARAD's responses and considerations, are available on the public docket at MARAD–2020–0127. Please note that the public will have an opportunity to provide comments on the BMOP Deepwater Port Application at the final public hearing and public comment period, announced via separate notice.

Availability of the FEIS

The FEIS and detailed information about the Project can be found on the FDMS website at *https://www.regulations.gov* and searching for Docket Number MARAD–2020–0127.

Cooperating Agencies

The following Federal agencies and State governmental entities participated as cooperating agencies under the National Environmental Policy Act (NEPA) in the preparation of the FEIS: Bureau of Safety and Environmental Enforcement; U.S. Environmental Protection Agency; National Marine Fisheries Service; Pipeline and Hazardous Materials Safety Administration; U.S. Army Corps of Engineers; Bureau of Ocean Energy Management; U.S. Fish and Wildlife Service; Texas Park and Wildlife; Louisiana Department of Natural Resources; Texas Commission on Environmental Quality; Texas Department of Transportation; Texas General Land Office; Texas Historical Commission (State Historic Preservation Office); Texas Railroad Commission;

Coastal Protection and Restoration Authority of Louisiana; Louisiana Department of Environmental Quality; Louisiana Office of State Lands; Louisiana Office of Cultural Development (State Historic Preservation Office); Louisiana Offshore Terminal Authority; Native American Tribes.

(Authority: 33 U.S.C. 1501, *et seq.;* 49 CFR 1.93(h))

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), revise the critical habitat designation for the contiguous U.S. distinct population segment (DPS) of the Canada lynx (*Lynx canadensis*) under the Endangered Species Act of 1973, as amended (Act). In total, approximately 14,030 square miles (36,340 square kilometers) in Colorado, Idaho, Montana, and Washington, fall within the boundaries of the revised critical habitat designation. This revision fulfills our obligations under a settlement agreement to address issues raised by the District Court of Montana regarding our 2014 final critical habitat designation.

DATES: This rule is effective August 17, 2026.

ADDRESSES: This final rule is available on the internet at *https://www.regulations.gov* and on the Service's website at *https://ecos.fws.gov/ecp/species/A073?*. Comments and materials we received are available for public inspection at *https://www.regulations.gov* at Docket No. FWS–R6–ES–2024–0142.

Availability of supporting materials: Supporting materials we used in preparing this rule, such as the species status assessment (SSA) report addendum, are available on the Service's website at *https://ecos.fws.gov/ecp/species/A073?,* at *https://www.regulations.gov* at Docket No. FWS–R6–ES–2024–0142, or both. For the critical habitat designation, the coordinates or plot points or both from which the maps are generated are included in the decision file for this critical habitat designation and are available at *https://www.regulations.gov* at Docket No. FWS–R6–ES–2024–0142 and on the Service's website at *https://www.fws.gov/species/canada-lynx-lynx-canadensis.*

FOR FURTHER INFORMATION CONTACT: Amity Bass, Field Supervisor, U.S. Fish and Wildlife Service, Montana Ecological Services Field Office, 585 Shepard Way, Suite 1, Helena, MT 59601; telephone 406–449–5225. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION:

Executive Summary

Why we need to publish a rule. Under the Endangered Species Act (Act), any species that is determined to be threatened or endangered requires critical habitat to be designated to the maximum extent prudent and determinable. Designations and revisions of critical habitat can be completed only by issuing a rule through the Administrative Procedure Act rulemaking process (5 U.S.C. 551 *et seq.*).

The contiguous U.S. DPS of the Canada lynx was listed as a threatened species in 2000. The range of the DPS spans parts of the States of Colorado, Idaho, Maine, Minnesota, Montana, New Hampshire, New Mexico, Washington, and Wyoming. We designated critical habitat for the Canada lynx DPS in 2006 and revised the designation in 2009 and 2014. On November 29, 2024, in response to a settlement agreement, we published a proposed rule to revise critical habitat for the Canada lynx DPS.

What this document does. This final rule revises the existing designation of critical habitat for the threatened contiguous U.S. Canada lynx DPS. We are revising Canada lynx critical habitat in the western United States only because this part of the range was the subject of a 2016 court order that found fault with our 2014 final critical habitat rule for not designating critical habitat in Colorado and in five National Forests in Idaho and Montana, and because we have new scientific information on lynx habitat in the western United States. We are not making any revisions to existing critical habitat in Maine and Minnesota.

The basis for our action. Section 3(5)(A) of the Act defines critical habitat as (i) the specific areas within the geographical area occupied by the species, at the time it is listed, on which are found those physical or biological features (I) essential to the conservation of the species and (II) which may require special management considerations or protections; and (ii) specific areas outside the geographical area occupied by the species at the time it is listed, upon a determination by the Secretary of the Interior (Secretary) that such areas are essential for the conservation of the species. Section 4(b)(2) of the Act states that the Secretary must make the designation on the basis of the best scientific data available and after taking into consideration the economic impact, the impact on national security, and any other relevant impacts of specifying any particular area as critical habitat.

Previous Federal Actions

Please refer to the proposed critical habitat rule (89 FR 94656) for the Canada lynx DPS published on November 29, 2024, for a detailed description of previous Federal actions concerning this species.

Peer Review

On December 1, 2023, a team of Service biologists, in consultation with recognized lynx and climate experts, completed an addendum to the 2017 SSA report for the Canada lynx DPS (Service 2023, entire). The SSA report (Service 2017, entire) and addendum (Service 2023, entire) represent a compilation of the best scientific and commercial data available concerning the status of the species, including the impacts of past, present, and future factors (both negative and beneficial) affecting the species.

In accordance with our joint policy on peer review published in the **Federal Register** on July 1, 1994, (59 FR 34270) and our August 22, 2016, memorandum updating and clarifying the role of peer review in listing and recovery actions under the Act, we solicited independent scientific review of the information contained in the Canada lynx SSA report addendum. We sent the SSA report addendum to five independent peer reviewers and received five responses. Results of this structured peer review process can be found at *https://www.regulations.gov* at Docket No. FWS–R6–ES–2024–0142. We incorporated the results of these reviews, as appropriate, into the SSA report, which was the foundation for the proposed rule and this final rule. A summary of the peer review comments can be found in the proposed rule (89 FR 94656 at 94659, November 29, 2024).

Summary of Changes From the Proposed Rule

In the proposed rule published on November 29, 2024, (89 FR 94656) we announced we were considering

approximately 594 square miles (mi^2) (1,541 square kilometers (km^2)) for exclusion under section 4(b)(2) of the Act. We considered excluding all Tribal lands in Montana and New Mexico as well as lands in Montana, managed in accordance with the Montana Department of Natural Resources and Conservation (DNRC) Forested State Trust Lands Habitat Conservation Plan (Montana DNRC and U.S. Fish and Wildlife Service 2010b, entire), and lands in Washington, managed in accordance with the Washington Department of Natural Resources (WDNR) Lynx Habitat Management Plan for WDNR-managed Lands (WDNR 2006, entire). The proposed exclusion of Tribal lands in New Mexico no longer applies because we have determined in this final rule that areas proposed in New Mexico, including Tribal lands, are not critical habitat. We are excluding the other areas described above from the final critical habitat designation.

We also received several comments providing information that supported excluding additional areas from the final critical habitat designation because the benefits of excluding additional areas outweighed the benefits of including the areas. These additional areas include: State of Montana Department of Fish, Wildlife, and Parks (MTFWP) Wildlife management areas (43 mi^2 (113 km^2)); and Green Diamond Resources lands in Montana (7 mi^2 (18 km^2)).

In total, we are excluding approximately 625 mi^2 (1,619 km^2) of lands from the final critical habitat designation for the Canada lynx DPS. Our rationale for each of these exclusions is provided in the Consideration of Impacts Under Section 4(b)(2) of the Act section below.

We have revised the physical and biological features (PBFs) since the proposed rule for clarity due to public comments received. We have determined that the following PBFs are essential to the conservation of the Canada lynx DPS: (1) presence of snowshoe hares that support lynx residency and reproduction over time within a mosaic of boreal/subalpine forest structural stages that includes snowshoe hare habitat with dense horizontal cover at ground- or snow-level; (2) winter conditions that provide and maintain deep persistent unconsolidated (fluffy) snow; (3) presence of denning structures, including downed trees, root wads, and accumulations of coarse woody debris; (4) habitat types, such as dry forest or meadows, that are between boreal forest patches and are likely to be used by lynx traveling between those patches within and among home ranges; and (5) landscapes with suitable habitat large enough (483 mi^2 (greater than or equal to 1,250 km^2)) to support breeding populations. These PBFs describe the most important needs for Canada lynx at the species level.

In response to public and Federal agency comments, we reviewed and made changes to the proposed critical habitat units in both the Southern Rockies (Unit 6) and in the Northern Rockies and Cascades (Units 3 and 4). These changes, in addition to the exclusions, resulted in an overall decrease from the proposed rule of 1,041 mi^2 (2,695 km^2) in Unit 3, 279 mi^2 (722 km^2) in Unit 4, and 2,642mi^2 (6,842 km^2) in Unit 6. We also made changes in the Greater Yellowstone Area (GYA; Unit 5), removing all areas from critical habitat designation. Changes in Unit 4 were relatively minor; we adjusted the boundaries to remove a few areas of lower elevation dry forest that were outside of modeled likely lynx habitat. In Unit 3 we made some similar minor boundary adjustments, removing some small areas and also adding in a few areas of likely lynx habitat that is occupied. The bigger changes in Unit 3 were to remove some smaller polygons that did not meet the minimum size requirements, including the polygon along the Montana-Idaho border near Lolo Pass as well as the polygons in the Selkirk Mountains. Changes in the Southern Rockies were made to align better with the final data from the Squires et al. 2024 modeling effort that identified areas of likely and core habitat for lynx in the Southern Rockies. The revised critical habitat polygons contain the PBFs for lynx, and they encompass the substantial areas of likely and core habitat that have supported lynx occupancy and reproduction and other habitats that provide connectivity between those patches of the best habitat.

In addition, in the proposed rule we stated that we could not map critical habitat in sufficient detail to exclude each and every developed area or other areas that are unlikely to contain the PBFs essential to the conservation of lynx. Some comments received during the public comment period requested further detail of the types of areas excluded by text from the critical habitat designation. Since the proposed rule, we revised the part of the rule that explains what areas within the boundaries of critical habitat do not contain the PBFs essential to the conservation of the lynx DPS and are thus not considered critical habitat. Those areas include: lands covered by buildings, houses, pavement, and other structures; paved highways and roads; active mines and *existing* mining infrastructure; existing developed ski runs and tree islands, ski lifts, and associated ski area infrastructure and buildings; and irrigation infrastructure.

We made minor, nonsubstantive editorial revisions and corrections throughout this rule to ensure better consistency and to clarify information.

Summary of Comments and Recommendations

In the proposed rule published on November 29, 2024 (89 FR 94656), we requested that all interested parties submit written comments on the proposal by January 28, 2025. We also contacted appropriate Federal and State agencies, Tribal entities, scientific experts and organizations, and other interested parties and invited them to comment on the proposal. A newspaper notice inviting general public comment was published in U.S.A. Today on December 11, 2024. We did not receive any requests for a public hearing. All substantive information received during the comment period has either been incorporated directly into this final critical habitat designation or is addressed below.

Peer Reviewer Comments

As discussed in Peer Review above, we received comments from five peer reviewers on the draft SSA report addendum. We reviewed all comments we received from the peer reviewers for substantive issues and new information regarding the contents of the SSA report addendum (Service 2023, entire). The peer reviewers generally concurred with our methods and conclusions. The peer reviewers provided additional information, terminology clarifications, suggestions to explain uncertainties, clarifications to the explanation of our resiliency model, and other editorial suggestions. Peer reviewer comments and suggestions were incorporated as appropriate in the final version of the SSA report addendum (Service 2023, entire).

Federal Agency Comments

(1) Comment: The U.S. Department of Agriculture (USDA) expressed desire for more precise language regarding areas of non-suitable habitat that fall within the proposed critical habitat that includes the exclusion of lands covered by buildings, pavement, and other structures.

Our response: Given the extensive areas needed to support lynx populations, and thus the scale at which critical habitat was mapped, it was impractical to show all areas of

development, infrastructure, and other areas of non-suitable habitat that are not included in the designation. Rather, these areas are excluded by text in regulation at 50 CFR 17.95. We revised our description of these types of areas within the boundaries of the final critical habitat designation that lack the PBFs necessary for lynx, to specify that existing developed areas with buildings, pavement, and other structures, such as irrigation-related infrastructure, are not included. We do note that some areas, such as the vegetation surrounding reservoirs, may provide lynx habitat and should be assessed on site-specific bases. See *Criteria Used To Identify Critical Habitat* below for more information.

(2) Comment: USDA, through a National Forest in Colorado, requested the Service revise the moving window analysis of the Squires et al. (2024, entire) model. USDA stated that the Service appears to have used an arbitrary cutoff that is beyond the 95 percent cutoff that the paper proposes as likely habitat. USDA stated there is a large amount of ponderosa pine (*Pinus ponderosa*), mountain shrublands, mountain grasslands and dry-mixed conifer forests dominated by ponderosa pine, Douglas fir (*Pseudotsuga menziesii*), and white fir (*Abies concolor*) vegetation that is being considered as critical habitat for lynx. These vegetation types do not comprise lynx habitat nor do they provide habitat for primary or alternate prey species. USDA stated that their management in these fire adapted vegetation types is to promote forest conditions that are more resilient to natural disturbances such as insects, disease, and wildfire. USDA suggested that the designation of these vegetation types as critical habitat potentially conflicts with forest management of these vegetation types and has potential to mislead public interpretation of science-based principles for management.

Our response: We reviewed the mapping process used by the Western Lynx Biology Team (WLBT 2022, entire)—an interagency team of biologists from the Service, Forest Service, National Park Service, and Bureau of Land Management (BLM). The WLBT created tier polygons in the Southern Rockies based on an earlier draft of the model developed by Dr. John Squires and his colleagues, and our proposed critical habitat in the Southern Rockies used the tier 1 polygons from WLBT. The final model selected for publication (Squires et al. 2024) changed from what the WLBT used. Upon review of the Squires et al 2024 paper, we became aware that the WLBT polygons were based on the draft earlier model; thus, we reviewed the revised published model and revised our critical habitat polygons using the final published version of the model, following the WLBT's methods. The final critical habitat polygons for the Southern Rockies unit contain the physical or biological features for the Canada lynx and encompass all substantial areas of likely and core habitat, as well as habitats that provide connectivity in between, and they encompass the areas that have continued to support persistent lynx residency and occupancy.

In Colorado, as in other areas, high-quality lynx habitat (*e.g.,* mesic, boreal forest types) is often set within a matrix of dry forest types, rocky peaks, and other habitats that do not provide high-quality foraging or denning habitat for lynx but are important for connecting those high-quality lynx habitats to support large enough areas to provide for an individual lynx's home range. The revised critical habitat polygons substantially reduce the amount of dry forest types mentioned by USDA, and more closely map areas of high-probability lynx habitat. However, some areas of drier forest types, meadows, and mountain peaks fall within the critical habitat polygons. These areas may be used by lynx that are traveling within or between home ranges, and thus they provide connectivity, but they are not likely to contain habitat for foraging or denning. Vegetation management, fuels reduction, and other activities in these drier forest and non-boreal forest patches within the critical habitat polygons may be beneficial for reducing fire risk to the high-quality lynx habitats.

Lynx are primarily associated with mesic, boreal forest types such as spruce (*Picea* spp.) and fir *(Abies* spp.). Within lynx range in the western United States, these habitat types are often patchily distributed within a matrix of drier forest types and other habitats. Squires et al. (2024, entire) note that the relatively small areas of ''likely'' (*i.e.,* high-quality lynx habitat) and ''core'' habitats were patchily distributed and spatially limited within a matrix of ''unlikely'' habitat and that the shape of lynx habitat was convoluted due to the complex mountain topography that dominates the Southern Rocky Mountains. The critical habitat polygons capture the substantial areas of ''likely'' and ''core'' habitat, which are the habitats most likely to be used by resident lynx. The polygons also conservatively include the areas in between patches of ''likely'' habitat that provide the connective matrix. This resulted in the critical habitat polygons including some of the ''unlikely'' habitat in the matrix that connects patches of ''likely'' lynx habitat. In doing so, the critical habitat polygons capture broad areas with enough ''likely'' habitat to support multiple lynx home ranges, while also considering the within-home range and between-home range connectivity necessary for daily movements and interactions (*e.g.,* males traveling to multiple female home ranges). The critical habitat polygons do not capture areas that lynx may travel on occasion for making exploratory or long-range dispersal movements.

Forest management, fuels reduction, and most other activities within drier forest types, meadows, and other non-boreal forest types within the critical habitat polygons are unlikely to affect critical resources for lynx, such as foraging and denning habitat or winter snow conditions. The designation of critical habitat does not preclude forest management practices from occurring but provides assurance that forest management will not result in the destruction or adverse modification of the critical habitat at the scale of the entire critical habitat designation.

Comments From States

(3) Comment: Montana Fish, Wildlife, and Parks (MTFWP) supported the exclusion of lands in Montana that are managed by the Montana Department of Natural Resources and Conservation (DNRC) from critical habitat designation. The DNRC has a habitat conservation plan (HCP) and State administrative rules (MT Admin Rules 36.11.428(4)) that specifically outline the conservation, monitoring, and management of lynx and their habitat on DNRC-managed lands. This HCP ensures that important habitats for lynx will be conserved and managed for the benefit of the species. MTFWP felt that designation of these areas as critical habitat will not provide any additional protections or benefits to the species; however, designating these areas may cause unneeded restrictions.

Our response: We have excluded lands covered by the Montana DNRC HCP from the critical habitat designation because the benefits of excluding them outweigh the benefits of including them as critical habitat. See Consideration of Impacts Under Section 4(b)(2) of the Act, below, for our full exclusion analysis of these areas.

(4) Comment: MTFWP commented that their agency has six wildlife management areas (WMAs; Nevada Lake, North Swan Valley, Fish Creek, Blackfoot-Clearwater, Marshal Creek, and Bad Rock Canyon) that overlap

portions of the proposed Canada lynx critical habitat. WMAs in Montana are managed by MTFWP and have specific plans for each property. These plans include management strategies to benefit the diversity of wildlife species and their habitats, including Canada lynx. MTFWP recommended that the Service exclude WMAs in Montana from the designation of Canada lynx critical habitat.

Our response: We have excluded WMAs managed by MTFWP from the critical habitat designation because the benefits of excluding them outweigh the benefits of including them as critical habitat. See Consideration of Impacts Under Section 4(b)(2) of the Act, below, for our full exclusion analysis of these areas.

(5) Comment: MTFWP supported the removal of lynx critical habitat in the Greater Yellowstone Area (GYA) and applauded the Service for identifying the areas, according to science, that do not support resident Canada lynx populations or occupancy.

Our response: We removed the GYA from critical habitat designation, based on the limited ecological capacity of the area to support Canada lynx, and the historical and contemporary records indicating only episodic lynx occurrence, not a persistent population occupying the GYA.

(6) Comment: MTFWP supported the findings from the model presented in Olson et al. (2021, entire) as the best current model for designating critical habitat. They also commented that even though the model may estimate high-quality areas, that does not mean the areas are occupied by lynx or would support a resident population.

Our response: The Olson et al. (2021) species distribution model (SDM) was a foundational scientific resource for delineating potential lynx habitat and was developed using empirical data from verified detections and radio-collared lynx, making it one of the most robust and contemporary tools available to the Service.

We agree that areas identified as having high probability of lynx use in the SDMs represent potential habitat and do not, on their own, demonstrate current occupancy or assure that an area can support a resident population. Multiple factors beyond modeled habitat quality- such as vegetation condition, prey abundance, disturbance history, and intra- or inter-specific competition—can influence whether lynx are present in a particular area or able to persist there over time. Accordingly, while the SDM identifies where habitat capable of supporting lynx may occur, the Service does not equate modeled habitat with demonstrated occupancy or confirmed capacity to sustain resident populations. Instead, occupancy and residency evaluations incorporate additional information on local conditions, survey data, and other ecological considerations. We also appreciate the efforts of the states and other partners to continue conducting scientifically rigorous surveys and studies of occupancy to inform current and future evaluations and management for the species.

(7) Comment: Citing recent lynx occupancy surveys conducted in Montana, Idaho, and Wyoming, MTFWP stated that neither Idaho nor Wyoming detected a lynx during the study period (December 1, 2023, to April 30, 2024). MTFWP suggested that this information contradicts the Service's statement in the proposed rule that all areas proposed as critical habitat are occupied, and it does not support the need for Canada lynx critical habitat designation in northern Idaho or any of the GYA. MTFWP urged the Service to consider these newest lynx occupancy survey findings regarding any revision or elimination of those areas in the final critical habitat designation.

Our response: We reviewed the recent occupancy surveys as well as other information regarding occupancy and verified records of lynx. We are not designating any critical habitat in the GYA, in either the Montana or the Wyoming portions of the area. The contemporary occupancy survey referenced in this comment, as well as other surveys conducted for lynx in the GYA, indicate the GYA is not occupied by a persistent population, and no verified evidence of successful reproduction has been recorded in decades. Similarly, we are not designating critical habitat in the Selkirks in Idaho, where the tri-state surveys failed to detect lynx (see also response to comment 10 below).

All of the critical habitat we are designating in Montana (in Unit 3) was occupied at the time of listing and is currently occupied by persistent resident populations. The small amount of critical habitat we are designating in Idaho is part of the Purcell Mountain Range; lynx occupancy was detected in the Purcell Range in the 2023–2024 surveys, and the Purcell Range has supported a persistent reproductive population for many years. Thus, all areas we are designating have had persistent reproductive populations and verified occupancy, as evidenced by multiple survey efforts.

(8) Comment: The Colorado Department of Transportation (CDOT) requested that the Service consider removing the entire existing operational right-of-way along roads as defined in Federal Highway Administration regulations (23 U.S.C. 101) under section 4(b)(2) of the Act from critical habitat. Existing operational right-of-way refers to the right-of-way that has been disturbed for an existing transportation facility or is maintained for a transportation purpose. The existing operational right-of-way is actively maintained by transportation agencies, and therefore, would not include the PBFs essential to the conservation of lynx.

Our response: As discussed in *Criteria Used To Identify Critical Habitat,* below, paved roads and transportation facilities that fall within the boundaries of critical habitat do not contain the PBFs essential to the conservation of lynx and are not considered critical habitat. Though paved roads and adjacent graveled shoulders do not contain PBFs, other vegetated sections of operational rights-of-way may contain habitat features occasionally used by lynx and snowshoe hares and are included in this designation.

(9) Comment: CDOT expressed concerns about how critical habitat designation would influence future projects, such as road construction and maintenance and avalanche mitigation operations. They asked for clarification on what types or categories of ''road construction and maintenance'' would be included under the special management considerations that may be required for critical habitat.

Our response: When designating critical habitat, we assess whether the specific areas within the geographical area occupied by the species at the time of listing contain features which are essential to the conservation of the species and which may require special management considerations or protection (see Special Management Considerations or Protection, below, for more information). As described earlier, some areas within the boundaries of mapped critical habitat do not contain the PBFs essential to the conservation of the lynx DPS and are thus not considered critical habitat. Those areas include paved highways and roads that would not be subject to the special management considerations because they do not contain PBFs essential to the conservation of lynx. However, for projects that impact designated critical habitat in areas with the PBFs (*e.g.,* road widening or vegetation removal that affect snowshoe hare densities), the areas of habitat containing the PBFs may require special management considerations or protection, although

these are not requirements. Due to the variable nature of road construction, maintenance activities, and avalanche mitigation that may occur across the range of critical habitat, it is not feasible in this rule to specify which particular activities may or may not adversely affect critical habitat or warrant additional conservation measures. In general, paved roads and highways are more likely to result in habitat loss and fragmentation as they facilitate higher traffic volumes and/or speeds than smaller unpaved forest roads (Service 2017, pp. 100–102). The spatial and temporal scale of any activity should be examined, as well as any design features or specific conservation measures, to determine whether direct or indirect alteration of habitat would occur to the extent that the value of critical habitat for the survival and recovery of lynx would be appreciably diminished. For questions regarding whether specific activities may constitute adverse effects to critical habitat, we encourage project proponents and action agencies to work with the appropriate Ecological Services Field Office (*https://www.fws.gov/locations*) to determine effects to critical habitat and ways to minimize them through project design.

(10) Comment: The Idaho Governor's Office of Species Conservation stated that they believe areas in Idaho are not essential to the conservation of lynx, and provided the following points as evidence: (1) limited observations of lynx despite combined lynx-focused camera survey efforts, camera survey efforts for other forest carnivores, and camera survey efforts for large carnivores and ungulates; (2) insufficient predicted habitat to support a breeding population, which requires a minimum of 483 mi^2 (1,250 km^2) as defined in the proposed rule (based on area alone, the proposed habitat patches could only support a small number of individuals even if all critical habitat were fully occupied); (3) even if fully occupied, this area would not contribute significantly to the population because these proposed areas are disjunct and peripheral to the larger matrix of modeled high-quality habitat and are unlikely to meaningfully contribute to population resilience (Unit 3 Northern Rockies); and (4) proposed areas in Idaho are peripheral and are not even between areas of known occupancy or sufficiently large areas of predicted high-quality, but are unoccupied, habitat. Based on the best available information, the Idaho Governor's Office of Species Conservation (OSC) suggested that the Service should not designate any critical habitat in Idaho.

Our response: The final critical habitat designation includes a small area in northern Idaho that is in the northeast corner of the state, in an area within the Purcell Mountains. This area is directly connected to the rest of the mountain range that is located in Montana, and there is no ecological separation along the state line. The Purcell Mountains support regular occupancy and reproduction by multiple individual lynx (Squires et al. 2010, p. 1498; Olson et al. 2021, p. 1669). Survey efforts in the Purcells regularly detect lynx, including in the portion of the mountain range that falls within Idaho.

We have removed other areas of Idaho, including the Selkirk Mountains and the area around Lolo Pass from the critical habitat designation. Both of those areas were included in our proposed rule, due to being identified as tier 1 polygons by the WLBT. However, upon closer examination of the best available information, including information received since the proposed rule, these areas do not meet the definition of critical habitat. See Summary of Changes From the Proposed Rule for more information. We note that the Selkirks and the Lolo Pass area may function as important areas to support intermittent or even persistent occupancy and reproduction by lynx, peripheral to the core areas within Unit 3. Although they do not meet the definition of critical habitat in this designation, we encourage conservation considerations that preserve or improve conditions that allow these areas to contribute to lynx conservation.

(11) Comment: The State of Idaho requested exclusion of Idaho State endowment trust land from the critical habitat designation for the Canada lynx DPS and challenged the assertion that the proposed critical habitat is an accurate predictor of lynx distribution and home ranges in the State.

Our response: The proposed critical habitat included tier 1 polygons in the Selkirk Mountains that overlapped some Idaho State endowment trust lands. The final designation does not include this area and thus does not include the Idaho trust lands. As such, it is not necessary to consider an exclusion.

(12) Comment: The Idaho Governor's Office of Species Conservation stated the Service should analyze how the addition of critical habitat will have an economic impact to logging contractors, counties, and small communities. They also stated that having the additional layer of critical habitat opens these areas to increased litigation. Adding additional critical habitat acreage in Idaho increases the liability for legal challenges on a larger scale. The Service should analyze how the increase in critical habitat will impact the counties, State and Federal government's costs related to litigation.

Our response: We developed an incremental effects memorandum (IEM) considering the probable incremental economic impacts that may result from this critical habitat designation. The information contained in our IEM was then used to develop a screening analysis of the probable effects of the proposed designation of critical habitat for the Canada lynx DPS (Industrial Economics, Inc. (IEc) 2024, entire). We later revised the screening analysis for the final critical habitat rule (IEc 2026, entire). We considered economic impacts to logging contractors, counties, and small communities. We did not consider any potential increase in litigation costs associated with the addition of critical habitat, as this would be speculative. The analysis found that this critical habitat rule is unlikely to meet the threshold for an economically significant rule having an annual effect on the economy on the of $100 million or more. Designating occupied areas as critical habitat typically causes little, if any, incremental impacts above and beyond the impacts of listing the species, as is the case with Canada lynx DPS.

The public may view critical habitat designation as potentially resulting in incremental impacts in the form of lower property values; however, recent analysis of critical habitat property value impacts indicates that, at a national level on average, critical habitat designation has little to no effect on values for developed and undeveloped properties (IEc 2024 and 2026, p. 21, internal citations omitted). Similarly, the Service recognizes that some segments of the public see any critical habitat designation as severely limiting property rights; however, critical habitat designation has no regulatory effect on private actions on private land that do not involve Federal approval or action. We recognize that there are private actions on private lands that involve Federal actions; however, there should already be section 7 consultations taking place in these situations. The incremental effects of revising critical habitat for the Canada lynx DPS are likely to be limited to changes in administrative effort to evaluate the potential for adverse modification of Canada lynx DPS critical habitat. See *Exclusions Based on Economic Impacts,* below.

(13) Comment: The State of Idaho is concerned that the designation of Canada lynx critical habitat will devalue

its recently-acquired land and increase the likelihood that the State will reduce future purchases of land that might otherwise be developed or ecologically impaired. The commenter is also concerned about additional economic losses from new regulatory requirements, including reduced bidding from purchasers on timber sales because of the seasonal timber harvest restrictions and transportation and infrastructure limits.

Our response: See our response to Comment 11, explaining that there are no state lands included in the final critical habitat designation in Idaho, which moots some of the concerns. We provide additional responses here regarding the economic concerns expressed in the comment. See also our response to Comment 44.

In general, real or perceived regulatory restrictions on land use can reduce the market value of the land. In the case of critical habitat for lynx, the Service finds that the rule is unlikely to generate additional restrictions on land use above and beyond any restrictions due to the presence of the species and its listing status. Nonetheless, the perception that additional restrictions may occur can affect land values. Section 4 of the economic screening analysis acknowledges that critical habitat may affect property values in certain circumstances; however, the screening analysis describes that a comprehensive review and synthesis of the economics literature on this topic found that the potential for property value impacts is species-specific and not generalizable to all critical habitat designations (IEc 2024 and 2026, p. 21). While some studies identify negative property value effects of critical habitat designation, others find that critical habitat can positively affect property values, and others find no effect. Mamun et al. (2023, entire), as cited in the economics screening memorandum (IEc 2024 and 2026, p. 21), represents the most comprehensive analysis of critical habitat property value impacts conducted to date. They found that critical habitat designation has an average of ''little to no effect'' on values for developed and undeveloped properties nationally. Nevertheless, the potential for a critical habitat designation to affect a property's value is species-specific and is acknowledged as a potential effect of this rule.

(14) Comment: The Washington Department of Fish and Wildlife (WDFW) notes that the Service is considering excluding lands in Washington from the critical habitat designation that are managed in accordance with the WDNR) Lynx Habitat Management Plan (LHMP) for WDNR-managed lands (WDNR 2006, entire). WDFW also noted that the WDNR indicated that implementation and effectiveness monitoring results would be summarized in biennial reports to the Service and WDFW (WDNR 2006, p. 63) and that their 2006 plan would be updated as more is learned about lynx habitat relationships and management strategies through periodic reviews every five years (WDNR 2006, p. 6). To their knowledge, no such reports have been produced or shared and, with the exception of a limited-scope amendment in 2011, the plan has not been updated. Without an update to the WDNR's 2006 plan, and with no reports on implementation, neither WDFW nor the Service can make any statements on effectiveness. WDFW suggests the Service should request the biennial reports and consider these lands for inclusion in the critical habitat designation.

Our response: We appreciate the concerns outlined by WDFW regarding the WDNR LHMP. In March 2025, both the Service and WDFW received a comprehensive report from WDNR on the implementation and effectiveness of their LHMP. The Service has reviewed the 2025 report and is currently working with WDFW and WDNR to evaluate the 2006 LHMP to determine the elements of the plan that warrant updating. WDNR has committed to completing any updates to the LHMP by 2028 (Crump, in lit. 2025). We appreciate the commitment of the WDNR to manage lands according to the LHMP and best available science, and we have excluded lands currently managed under the 2006 WDNR LHMP from the critical habitat designation because the benefits of excluding them outweigh the benefits of including them as critical habitat. See Consideration of Impacts Under Section 4(b)(2) of the Act, below, for our full exclusion analysis of these areas.

(15) Comment: WDNR supports the proposed rule including continuing to exclude lands managed under the 2006 WDNR LHMP from critical habitat designation. WDNR remains committed to following the LHMP until lynx are de-listed, or until 2076, whichever is shorter.

Our response: We appreciate the commitment of the WDNR to manage lands according to the LHMP, and we have excluded lands managed under WDNR's LHMP from the critical habitat designation because the benefits of excluding them outweigh the benefits of including them as critical habitat. See Consideration of Impacts Under Section 4(b)(2) of the Act, below, for our full exclusion analysis of these areas.

(16) Comment: WDFW stated that establishment of a reintroduced lynx population in the Kettle Range of Washington could prompt consideration of a critical habitat designation congruent with the delineation of critical habitat for the reintroduced lynx population in Colorado (Unit 6 Southern Rockies). WDFW explained that the Kettle Range meets the ecological needs of lynx and snowshoe hares; thus, there will need to be an analysis of the success of the reintroduction project to determine if this area is essential to the conservation of the species. WDFW requested that the Service consider whether the Kettle Range warrants inclusion as critical habitat.

Our response: We note that habitat modeling and mapping (Olson et al. 2021, entire; WLBT 2022, entire) identified roughly 283 mi^2 (732 km^2) of lynx habitat in the Kettle Range of northeastern Washington, where the Confederated Tribes of the Colville Nation and their partners are attempting to establish a lynx population by translocating lynx from southern British Columbia, Canada. Based on previously estimated lynx home range sizes and densities in Washington, that area could potentially support 10 to 20 lynx; however, the success of this effort and the ability of the area to support a reproductive population over time remain uncertain.

The Kettle Range does not contain the minimum 483 mi^2 (greater than or equal to 1,250 km^2) of suitable habitat thought to support a resilient breeding population of at least 25 lynx, which is the minimum habitat patch size the Service considered in the draft recovery outline (Service 2005, p. 5), the recovery plan (Service 2024, p. 35), and the critical habitat criteria, nor is the area in close proximity to other larger areas that do support breeding populations. The Kettle Range was not identified as a focal area in the recovery plan (Service 2024, entire). We do not consider the Kettle Range to have been occupied by lynx at the time of listing in 2000 based on historical lynx occurrence data. As such, to include the Kettle Range in the designation as unoccupied critical habitat according to the Act, we would have to make a determination that that area is essential for the conservation of the species. Although this area may contain some of the PBFs required by lynx, the area is not essential for the conservation of the Canada lynx because of its small habitat patch size, distance from other occupied areas, and the uncertainty of the success of the translocation effort. As a result, we are not including the Kettle Range in this

designation. However, the translocation effort, and continued consideration of habitat management for lynx, may provide additional areas to support redundancy and resiliency for the DPS as peripheral area to the core areas designated as critical habitat.

(17) Comment: The Wyoming Game and Fish Department applauds the Service's decision to substantially remove designated critical habitat in the GYA. However, because there is still a lack of evidence for a persistent historical population in the GYA, there is little suitable habitat present, and two recent survey efforts detected no evidence of lynx, it is inappropriate for the GYA to contain any designated critical habitat. Additionally, the State suggests it is unlikely the GYA will become prime lynx habitat given the effects of climate change, and the recovery plan is not aimed at increasing lynx populations. Thus, the Service should allocate its resources towards units already containing self-sufficient lynx populations.

Our response: See our response to comment 7 above. After reviewing the best available information, we agree that the GYA does not meet the statutory definition of critical habitat because it lacks the PBFs essential to the conservation of the species. Although species distribution models identify portions of the GYA as potentially suitable habitat, multiple lines of evidence demonstrate that the area has not supported a persistent reproductive lynx population. The last documented instances of reproduction in the GYA include one female that failed to raise kittens in the Wyoming Range in the late 1990s (Squires et al. 2003, p. 13) and one female with a kitten on the east side of Yellowstone Lake in the early 2000s (Murphy et al. 2006, p. 203). Historical and contemporary records show that lynx use of the GYA has been intermittent, with no evidence of a persistent breeding population. Extensive surveys in much of the GYA have failed to document other instances of reproduction, and surveys in the past decade have failed to detect any lynx at all.

The inability to support a persistent breeding population of lynx may be a reflection of naturally marginal and patchy habitats and relatively low hare abundance in much of the GYA, resulting in only an intermittent ability of this unit to support resident lynx (Service 2018, p. 47). The absence of a persistent breeding population for at least the past 30 years indicates that the GYA does not contain the physical or biological features (PBFs) essential to lynx conservation—most notably, PBF 1 (the presence of snowshoe hares that support lynx residency and reproduction over time) and PBF 5 (landscapes large enough to support breeding populations).

In the proposed rule, we included the tier 1 areas in the GYA identified by the WLBT in the Wyoming Range and the Union Pass and Togwotee Pass area. These areas comprise 12 percent of the GYA (as identified in the SSA; Service 2018, p. 153–158), and are the areas with the most documented lynx use and predicted habitat in the GYA. Although Berg et al. (2012, entire) documented relatively high snowshoe hare densities in the Wyoming Range, compared with those in Yellowstone National Park (Hodges et al. 2009), this part of the GYA has still not supported a persistent breeding population. The only documented reproductive attempt in this area was from a female in the late 1990s whose kittens did not survive to adulthood; she later died of starvation (Squires and Oakleaf 2005, Squires et al. 2003). The radio-collared male present at that same time made multiple long-range movements out of the area, possibly due to food limitation (Squires and Oakleaf 2005). Other lynx that briefly occupied the Wyoming Range after dispersing from their reintroduction sites in Colorado remained only short periods (all less than a year) before moving on (Ivan 2017, p. 12–36). Surveys in the past decade have not detected any lynx (MT FWP 2024, entire; Abernathy and Cook 2024, entire; J. Wilmot, June 17, 2026, personal communication). Despite the habitat models indicating potential habitat, the lack of a persistent reproducing lynx population demonstrates these tier 1 areas do not contain the habitat features essential for lynx conservation.

We also found no evidence that land management practices are responsible for the absence of persistent breeding lynx populations in the GYA. The Wyoming Range and other tier 1 areas have been managed by the U.S. Forest Service under the same management direction that has been applied in other areas that support persistent breeding populations (*e.g.,* Units 3, 4, and 6 managed under the LCAS; ILBT 2013). Despite active conservation measures and sufficient time for some impacted areas to regenerate into higher-quality post-fire hare and lynx habitat, lynx have not naturally recolonized this unit, and reintroduced Colorado lynx that dispersed into the area have not maintained longterm home ranges or produced kittens (Service 2018, p. 47). Because the best available science shows the GYA does not support a persistent breeding lynx population and that this area does not contain the physical and biological features essential to lynx, the Service has concluded that no portion of the GYA meets the statutory definition of critical habitat and therefore is not designating critical habitat in this area.

Although we are not designating critical habitat in the GYA, the area may provide movement and foraging opportunities during rare population irruptions or for dispersing individuals. Habitats in the GYA may retain favorable temperatures and snow conditions for lynx in the future, though it is unknown if that will translate to the potential to support resident breeding populations (Service 2023, p. 66–70). Periodic monitoring for lynx, including efforts to detect multiple individuals and evidence of reproduction, will provide valuable insight into the area's condition and its ability to support the species as future conditions change. However, recovery of the DPS does not rely on establishing a breeding population in the GYA, and all recovery criteria can be met by existing populations elsewhere (Service 2024, entire).

(18) Comment: The Utah Public Lands Policy Coordinating Office commented that although the Service was court-ordered to designate critical habitat in Colorado, the State of Utah does not support the Service's decision to designate critical habitat in Colorado. The Utah Public Lands Policy Coordinating Office believes that the inclusion of those areas punishes proactive conservation efforts and has, and will continue to, discourage future actions taken by States to restore species' ranges. Colorado's lynx introductions began just before the species' listing, and the populations occur primarily on Federal land. Colorado has invested heavily in lynx introductions and demonstrated a consistent record of conservation actions for the species. Based on these actions and the commitments contained in the Conservation Plan for Canada Lynx in Colorado (Colorado Division of Wildlife 2002, entire), the Utah Public Lands Policy Coordinating Office stated the exclusion of Colorado from the critical habitat designations would not lead to extinction.

Our response: We commend the State of Colorado for the success of their Canada lynx reintroduction program and contribution to the conservation of this species. In determining whether we would conduct an exclusion analysis, we first evaluated whether the proponent of those exclusions presented credible information to support the

benefits of excluding these areas. We found Utah Public Lands Policy Coordinating Office's request to exclude Colorado from the critical habitat designation did not meet this standard. The Conservation Plan for Canada Lynx in Colorado referenced in the comment is largely a plan to minimize take of reintroduced lynx and to ensure success of the reintroduction program rather than a plan to enact habitat conservation measures that would benefit lynx habitat in Colorado. We find that the commenters have not provided credible information that a meaningful impact may support benefits of excluding these areas from critical habitat. Therefore, an exclusion analysis was not warranted. We note that the State of Colorado did not comment on the proposed rule and did not request an exclusion. In terms of the position that designating critical habitat would deter future reintroductions of species, we acknowledge that position but point out that a species reintroduction does not cause a critical habitat designation.

Although we omitted Colorado from initial critical habitat designations, a court found that to be inconsistent with the Act and best available science. In fact, recent modeling (Squires et al. 2024) has confirmed the presence of the essential physical or biological features for the Canada lynx. Although beyond the scope of this rulemaking, we recognize that conservation benefit agreements and other conservation tools—such as establishing an experimental population under section 10(j) of the Act—can offer meaningful support to states and other partners engaged in species restoration efforts. We encourage individuals interested in reintroduction and restoration efforts to work with their local Field Office to explore how these tools can best provide regulatory assurances to support proactive conservation.

Comments From Tribes

(19) Comment: The Jicarilla Apache Nation requests that the Service exclude the Jicarilla Apache Nation lands from the final designation of lynx critical habitat.

Our response: We announced in the proposed rule that we were considering exclusions of Jicarilla Apache Nation lands from the critical habitat designation because the benefits of excluding them outweigh the benefits of including them as critical habitat. However, upon reexamination of the Southern Rockies Unit (Unit 6), we have determined in this final rule that areas proposed as critical habitat in New Mexico, including Jicarilla Apache Nation lands, do not meet our criteria for designation as critical habitat. Thus, there is no need for an exclusion in the final rule.

(20) Comment: The Kootenai Tribe of Idaho believes areas in Bonner and Boundary Counties in Idaho should be included in the critical habitat designation. The habitat in this area appears to meet the criteria for designation as critical habitat for lynx. The Tribe expressed support for the revised delineation of critical habitat in the western United States, particularly the inclusion of areas in the Northern Rocky Mountains and Southern Rocky Mountains; however, they urge the Service to continue prioritizing connectivity corridors that are vital for maintaining genetic diversity and the resilience of lynx populations, particularly those at the southern periphery of the species' range.

Our response: Areas in both Bonner and Boundary Counties contain likely lynx habitat and were included in the proposed rule (89 FR 94656, November 29, 2024). However, only the area of Boundary County that is within the Purcell Mountains is designated as final critical habitat. Other areas, including the Selkirk Mountains and part of the Cabinet Mountains in northern Idaho contain some habitat for lynx and may play a role in providing peripheral habitat and habitat for connectivity, but they do not meet the definition of critical habitat. We acknowledge the importance of connectivity to the conservation of the Canada lynx DPS. The PBFs essential to the conservation of Canada lynx we have used to delineate critical habitat include permeable landscapes conducive to within-unit daily movements and dispersal (see *Criteria Used To Identify Critical Habitat,* below).

Public Comments

(21) Comment: Several commenters called for the protection of connectivity areas between lynx populations, particularly between core habitat units. Commenters argued that without robust protections in these areas, the potential for genetic interchange and resilience against climate impacts may be severely compromised, making populations more vulnerable to extinction. Some viewed the term ''connectivity'' as ambiguous, with suggestions to use clearer language regarding lynx movement and its implications for habitat designation. Commenters pointed out what they felt were inconsistencies between critical habitat and scientific studies, especially regarding the GYA. They argued that the proposed critical habitat did not reflect areas that are crucial for lynx movement and genetic exchange. There were suggestions for further research into lynx migration paths, especially those connecting Canada to the United States, and for these pathways to be designated as critical habitat to support the species' recovery.

Our response: We considered two main types of connectivity in relation to the critical habitat units, which roughly encompass the different lynx populations for the DPS. When evaluating habitat for those populations, we considered intra-unit connectivity, which refers to connectivity related to daily movements within a lynx home range (*i.e.,* an individual walking through an open meadow in between two stands of dense boreal forest). We also considered inter-unit connectivity, which regards individuals that move from one critical habitat unit to another; for example, a lynx that resides in Unit 6 (Southern Rockies) dispersing to Unit 3 (Northern Rockies). Our response to comment 2 above addresses intra-unit connectivity. The remainder of this response will focus on inter-unit connectivity.

Areas of mapped lynx habitat outside of the critical habitat polygons may provide important habitat for individual lynx. Many areas outside of critical habitat contain likely lynx habitat, or even moderate-probability habitat, and some of those areas may support periodic occupancy and/or provide foraging and resting habitat for dispersing individuals.

Lynx have also been documented dispersing long distances from areas that support populations, including individuals that roamed widely after being reintroduced in Colorado and in the Kettle Range (Ivan 2012 and 2017, entire; Piccinini 2026, personal communication), as well as individuals that have traveled long distances in the GYA (Squires and Oakleaf 2005, entire), or moved north from Unit 3 (Northern Rockies) into Canada (Squires 2025, unpublished data). During such movements, lynx have used a variety of habitat types, occurring intermittently and temporarily in suboptimal, marginal, and unsuitable habitats that do not contain the PBFs essential to lynx in enough abundance and proximity to support reproductive populations of lynx over time. Lynx are able to find smaller patches of suitable habitat that will support an individual but not a persistent population. Thus, some habitats outside of critical habitat polygons may play an important role in facilitating inter-unit connectivity, but they are not included in designated critical habitat, as lynx have shown to be adept dispersers that are capable of using a wider range of habitats for

dispersal than what they use for residency (Squires 2025, personal communication March 2025; Ivan 2012 and 2017, entire; Arnold et al. 2025, entire).

Lynx populations in the contiguous Unites State are believed to be influenced by lynx population dynamics in Canada, and many of the populations in Canada are directly interconnected with United States populations. Therefore, retaining connectivity with the larger lynx population in Canada is thought to be important to ensuring long-term persistence of lynx populations in the United States. Critical habitat Units 3 (Northern Rockies) and 4 (North Cascades) are directly connected to Canada, whereas Units 5 (Greater Yellowstone Area) and 6 (Southern Rockies) are more isolated with swaths of low probability lynx habitat in between, as well as some areas of moderate or even smaller amounts of high-quality habitat in certain areas. The WLBT (2022, entire) identified tier 2 and tier 3 areas as those that may support connectivity, either by providing habitat for resident animals and/or providing stepping stones of habitat for dispersers. We do not want to discredit the value of these areas; however, lynx are wide-ranging animals with a well-documented ability to make long journeys across both suitable and unsuitable habitats (Service 2017, p. 40–43; Interagency Lynx Biology Team (ILBT) 2013, p. 8, Ivan 2012 and 2017, entire). There is no evidence that human-caused factors have significantly reduced the ability of lynx to disperse or resulted in the loss of genetic or demographic interchange (ILBT 2013, p. 34). The level of diminished connectivity at which DPS populations could be affected is unknown; however, we have no evidence that current connectivity between lynx populations in the DPS and those in the core of the lynx's range are inadequate to maintain the genetic and demographic health of the DPS population or that this situation is likely to change in the foreseeable future.

Areas of lynx habitat outside of critical habitat may provide valuable habitat for individual lynx and for inter-population connectivity. This is especially true for tier 1 areas not included as critical habitat and tier 2 and 3 polygons identified by the WLBT, as well as areas of habitat adjacent to or connecting areas of critical habitat. Because the species list area for lynx is much broader than critical habitat, many areas of mapped lynx habitat may still be considered in section 7 consultations for the species, in which effects to connectivity and peripheral habitat will be considered.

(22) Comment: Some commenters suggested that the Service include both ''moderate-'' and ''high-'' quality habitats (as identified in Olson et al. 2021), or all areas identified as tier 1 and 2 (as identified in WLBT 2022, entire) in the critical habitat designation to enhance connectivity and support lynx populations. Many commenters advocated for expanding the critical habitat designation rather than reducing it. Specific areas suggested for inclusion included, but are not limited to, the Mummy and Never Summer Mountain Ranges in Colorado, the Little Pend Oreille and Salmo Priest landscapes in Washington, the Bitterroot Mountains and Beaverhead-Deerlodge National Forest in Montana, and other areas that may facilitate movement in between areas of high-quality habitat.

Our response: We considered all of the areas mentioned in comments, but we did not add any to the final critical habitat designation. This final critical habitat designation focuses on the areas most capable of supporting persistent breeding populations, as described in *Criteria Use to Identify Critical Habitat.* We relied primarily on the process developed by WLBT to identify areas large enough and with enough high-quality habitat to support multiple lynx home ranges. As such, not all areas modeled as ''moderate'' or ''high'' probability are included in the critical habitat designation. We also did not include the tier 2 and 3 areas identified by WLBT, since those areas are less naturally capable of supporting persistent breeding populations. Many of the tier 2 and 3 polygons have very few verified records of lynx occurrences, no evidence that they ever supported lynx over time, and are not essential to lynx conservation and recovery. Tier 1 polygons not included in critical habitat, as well as tier 2 and 3 areas and other areas of mapped habitat may provide habitat for connectivity, occasional occupancy, and even occasional reproduction. These areas may contain some of the PBFs, but do not provide enough habitat in close enough juxtaposition to support at least 25 individuals; thus they do not contain landscapes with suitable habitat large enough (483 mi^2 (greater than or equal to 1,250 km^2)) to support breeding populations (*i.e.,* PBF 5).

Finally, in our consideration of additional areas outside of what we proposed for critical habitat, we made sure to consider the areas specifically addressed in the 2016 court order from the Montana District Court, including Colorado and parts of the Beaverhead-Deerlodge, Bitterroot, Nez Perce, Lolo, and Helena National Forests of Montana and Idaho. Our decision to include, or not include, Colorado and portions of those National Forests followed the same rationale provided above for all other areas suggested by commenters.

(23) Comment: Some comments advocated for the inclusion of Federal, State, Tribal, and local agencies as cooperating partners in the critical habitat planning process. Commenters saw this collaboration as essential for balancing habitat protection with local economic interests. Commenters stressed the importance of working with local collaborative groups already engaged in forest resilience projects to identify and protect critical lynx habitats.

Our response: The Service has worked with multiple partners over the past 25 years, since lynx were first listed as threatened, to support and interpret the best available science and information to guide recovery of the species. In particular, the proposed rule for critical habitat was built on the foundation of the WLBT (2022, entire) Framework for Conservation of Canada Lynx, which was an interagency effort between the majority land managers where lynx habitat is found in the western United States. An important part of the critical habitat process was the opportunity for partners and the public to review the proposed rule and provide comments and relevant information during the public comment period. We received comments from several States and Tribes in response to our November 29, 2024, proposed rule (89 FR 94656). See comments 1 through 20 above. The Service then considered all of the comments received when finalizing the critical habitat designation. We modified proposed critical habitat as a result of information provided in those comments. Additionally, the Service works with partners, particularly the U.S. Forest Service (USFS), which manages the vast majority of lynx habitat in the western United States, as well as other landowners (*e.g.* State trust land managers, willing private partners) to develop habitat management strategies (*e.g.* HCPs) to conserve lynx habitat and work towards recovery of the species.

(24) Comment: We received requests from Mineral and Sanders Counties in Montana, to exclude several areas, including all USFS lands in the timber base (*i.e.,* lands identified in National Forest land and resource management plans, or forest plans, as suitable for timber harvest). They asserted various reasons for these requests, including: reducing government processes,

reducing litigation, a need to provide management flexibility and ease of administration, economic impacts, and other reasons. Several other commenters also recommend excluding areas from critical habitat designation that are currently used for timber production or other economic activities. They argued that these areas are vital for local economies and cultural heritage.

Our Response: Much of the designated critical habitat falls within the suitable timber base on National Forests, and the Forest Service must consult with the Service regarding any actions that may affect the critical habitat. Under the Endangered Species Act, the question is not whether an action causes *any* adverse effect to critical habitat, but whether it causes effects that are so substantial that they *appreciably diminish* the habitat's ability to support the conservation (survival and recovery) of the species. Activities may cause limited or temporary adverse effects to some physical or biological features of critical habitat without reaching this threshold. Given the need for a mosaic that includes dense early-successional forests that support snowshoe hares, some disturbance is needed within lynx critical habitat, which can come from both natural and anthropogenic causes, including timber harvest. Therefore, the designation of critical habitat for Canada lynx does not, by itself, prevent logging.

However, we recognize that a critical habitat designation creates an increased administrative workload and associated economic impacts. Within designated critical habitat, Federal agencies must consult with the Service on any actions that may affect critical habitat. Consultation already occurs for the species, but critical habitat adds an additional analysis in consultation workloads.

Consistent with 50 CFR 424.12, our economic screening analysis considered the probable incremental economic impacts of designating critical habitat. The Service may rely on this information as part of the weighing of the benefits of excluding particular areas from critical habitat against the benefits of including them. As described in the economic screening analysis, the Service finds that it is unlikely that critical habitat will change how projects and activities are managed (IEc 2024 and 2026, entire). Accordingly, additional timber harvest restrictions are not a probable outcome of the critical habitat rule, and economic impacts of the designation are limited to relatively minor administrative costs (IEc 2024 and 2026, entire).

We did not conduct an exclusion analysis for these areas based on government process requirements or ease of administration because the commenters did not provide information that there are meaningful impacts pertaining to these areas, or information that may support the benefits of excluding these areas. We do not agree with the assertion that the critical habitat designation conflicts with a need to provide management flexibility, because critical habitat designation in and of itself does not dictate or prescribe any management restrictions or requirements. Most Federal land management agencies have restrictions in their existing land and resource management plans to conserve the species (*e.g.,* USFS's 2007 Northern Rockies Lynx Management Direction Final Environmental Impact Statement), but those are actions the land management agencies determined they would undertake to do their part to conserve the species, as required under 7(a)(1) of the Act.

Similarly, critical habitat designation has no effect on private actions on private land that do not involve Federal approval or action, and even if there is a Federal nexus, critical habitat does not come with specific restrictions—only the requirement for Federal agencies to consult and avoid destruction or adverse modification of critical habitat (see also our response to comment 26 below). Thus, we did not consider the information provided by the commenter to be credible information that there are meaningful impacts to timber production. We also did not conduct an exclusion analysis for these areas based on economic impacts because the commenters did not provide information on the economic impacts of a designation to consider in an analysis of the exclusion requests listed here.

(25) Comment: Many commenters emphasized the necessity for further research on lynx habitat, including the impacts of climate change, habitat connectivity, and the adaptability of lynx to various stressors. Specific areas of concern include the habitat requirements of snowshoe hares and alternative prey species. Commenters contended that more research is necessary to determine lynx occupancy before eliminating areas of critical habitat, and expressed concern that we were not considering areas of refuge and stepping stone areas between core areas, and that more comprehensive monitoring and surveys must be conducted in connectivity areas. Some commenters questioned the adequacy of the data used to support the proposed critical habitat reductions, suggesting that additional research and consideration of various habitat models are needed to make informed decisions.

Our response: To ensure that our final determination is based on the best available information, we conducted a thorough literature review, as represented in the SSA report (Service 2017, entire) and the SSA report addendum (Service 2023, entire). We also considered any literature published after the SSA report addendum and all information provided to us in public comments. While more research may further enhance our understanding of the species' needs and refine mapping, such information is not currently available. Critical habitat designations made on the basis of the best available information at the time of designation will not control the direction and substance of future recovery implementation strategies, HCPs, or other species conservation planning efforts if new information available at the time of these planning efforts calls for a different outcome.

(26) Comment: Several commenters expressed concern that the designation of critical habitat could lead to increased restrictions on land use, potentially affecting agricultural and rural residential properties.

Our response: The designation of critical habitat only affects activities that involve a Federal permit, license, or funding. Federal agencies that carry out, fund, or permit activities (*i.e.,* Federal nexus) on private lands must consider effects to critical habitat. If there is a Federal nexus for a project that may affect lynx or lynx habitats associated with agricultural and rural residential properties, the associated Federal agency must review the actions to determine whether consultation with the Service is necessary to ensure that these activities do not destroy or adversely modify critical habitat. We recognize that there may be private actions on private lands that involve Federal permits or funds, and that may trigger the need for the Federal agency to consult with the Service on those actions; however, there should already be section 7 consultations taking place in these situations to consider impacts to lynx and to support a jeopardy determination in all areas where the species may be present. Since lynx currently occupy all areas we are designating as critical habitat, the added consideration of critical habitat is primarily an administrative effort.

Section 7 consultation is necessary when a Federal agency funds, authorizes, or carries out an action that may affect critical habitat. If adverse effects to the critical habitat are

expected, the Service prepares a biological opinion to determine whether the proposed action results in destruction or adverse modification of the critical habitat, meaning effects that are so substantial that they appreciably diminish the habitat's ability to support the conservation of the species. If destruction or adverse modification is not expected, no additional requirements are required, although the Service may provide voluntary conservation recommendations. Only if the project is expected to result in destruction or adverse modification of the critical habitat would the Service require additional conservation measures in the form of a reasonable and prudent alternative. Based on past section 7 consultations for lynx in designated critical habitat, consultations on private lands are very rare, and none have resulted in a destruction or adverse modification determination.

Due to the very small amount of private land in the critical habitat designation (less than 1 percent), it is unlikely any activities on private lands would destroy or adversely modify critical habitat. We do not anticipate significant restrictions on otherwise lawful activities as a result of these consultations, and we expect little, if any, impacts to private landowners because activities on private lands will only undergo section 7 consultation if they have a Federal nexus.

(27) Comment: A comment from the Montezuma County Board of Commissioners in Colorado requested that the Service exclude all private lands. The commenter explained that private lands make up only 4 percent of the proposed critical habitat area and most are already surrounded by protected lands or ''unlikely'' habitat. Private lands are economically and culturally important to local communities, especially those that do not have large scale commercial recreation. The comment further states that, in most cases, future development is already strictly regulated by local governments for private lands near large-scale commercial recreation.

Our response: Canada lynx critical habitat would only affect projects or activities on private lands where there is a Federal nexus, because section 7 of the Act requires Federal agencies to consult with the Service when there is potential for activities to destroy or adversely modify critical habitat. Absent critical habitat designation, projects and activities with a Federal nexus occurring on private lands within lynx habitat are already subject to section 7 consultation due to the listing status of the Canada lynx DPS, to ensure those projects and activities do not adversely affect the species. In developing the critical habitat rule, the Service considered the potential for critical habitat to result in different project modifications than those typically recommended to avoid adverse effects on the species and found that it would most likely make the same recommendations for project modification with or without the critical habitat designation. Therefore, it is unlikely that the critical habitat designation would result in additional or different project modifications on private lands above and beyond what would already be recommended due to the listing status of the species The economic screening analysis found that the critical habitat designation is unlikely to generate economic costs beyond minor administrative efforts for projects and activities with a Federal nexus that require section 7 consultation (IEc 2024 and 2026, entire). Therefore, we are choosing not to exclude private lands from the critical habitat designation for the Canada lynx DPS.

(28) Comment: Commenters objected to eliminating 88 percent of critical habitat for the Canada lynx in the GYA, which is already under stress from human activities including tourism and roadkill incidents. Commenters also provided citations to historical data regarding lynx occupancy and population estimates in an effort to show the GYA's importance to lynx conservation and contended that the GYA was essential to conservation due to its role in connectivity.

Our response: See our responses to comments 7, 17, and 21, above. In addition, we reviewed all of the information provided during the public comment period, information in our records regarding historical and contemporary lynx use of the GYA and current habitat models. After reviewing the best available scientific information—including historical records, recent surveys, and analyses of lynx movement and habitat use—the Service has determined that no areas within the GYA meet the statutory definition of critical habitat. Lynx use of the GYA has been intermittent, with historical occurrences largely reflecting dispersal events rather than evidence of a persistent population, and no verified lynx detections have been documented in recent survey efforts (MT FWP 2024; J. Wilmot, personal communication, 2026; Service 2023, p. 27). The few verified attempts at reproduction by lynx in the GYA have failed to produce any kittens that survived to adulthood (Squires and Oakleaf 2005; Ivan 2017).Although lynx have occasionally moved through or temporarily resided in parts of the region for a few months to a few years at a time, this limited use does not demonstrate that the area contains the physical or biological features essential to lynx conservation, particularly when considering there has not been verified successful reproduction nor evidence of multiple individuals occupying home ranges to constitute a resident population.

The recovery plan for lynx (Service 2024, entire) also informed our determination; although the plan recognizes that portions of the GYA may function as a potential climate refugium in the future, it does not identify the GYA as necessary for achieving recovery and does not recommend establishing a population there as part of the recovery strategy. While conserving habitat that may provide long-term resilience is valuable, the potential for future suitability does not satisfy the statutory criteria for critical habitat today. Because the GYA neither contains essential features nor plays an essential role in the species' current conservation, the Service is not designating any critical habitat within this area.

(29) Comment: We received several comments related to the Kettle Range in Washington. Commenters argued that this area has a long history of lynx presence and reproduction, and it is essential for connectivity between lynx populations in Washington and Canada. Commenters described the Kettle Range as a core habitat area that should be included in the critical habitat designation. Commenters expressed concern with the Service's assertion that the Kettle Range was unoccupied at the time of listing. They cited evidence from past reports and scientific studies that confirm the presence of lynx in this area, arguing that the Service's conclusions are inconsistent with the best available data.

Our response: The Kettle Range in northeastern Washington historically supported a lynx population (Stinson 2001, pp. 13–14), and habitat models indicate the area provides probable habitat for lynx (Olson et al. 2021, entire). The WLBT identified the Kettle Range as a tier 1 area, meaning it is a relatively large area of contiguous habitat with a high abundance of high probability modeled habitat capable of supporting multiple home ranges (WLBT 2022, p. 23). While the Kettle Range was a traditional lynx stronghold for fur trappers in Washington, the population declined to very few by the 1980s. When critical habitat was designated in 2009 and in 2014, the Service concluded that the Kettle Range

was unoccupied at the time of listing in 2000. We reviewed the information provided by commenters challenging the question of occupancy at the time of listing. The primary evidence supporting occupancy at the time of listing came from materials submitted to the Service by WDFW in response to the 2009 critical habitat designation, which refuted the Service's reported number of lynx detections. However, by 2014, WDFW had changed their position relative to lynx occupancy in the Kettle Range.

The Service's determination that the Kettle Range was unoccupied at the time of listing was upheld in *Wildearth Guardians* v. *U.S. Department of the Interior,* 205 F. Supp. 3d 1176 (D. Mont 2016). Lynx surveys conducted over the past few decades detected no to very few lynx (WDFW 2016, p. 4) until 2021 when the Confederated Tribes of the Colville Reservation began a lynx reintroduction effort in the Kettle Range. Many of the individuals released in the area have traveled north back into Canada, although some have remained in the Kettle Range. The success of the reintroduction program is still being evaluated. The best available information continues to suggest that the Kettle Range was not occupied by a persistent population of lynx at the time of listing in 2000. In addition, the reintroduction efforts are too recent to know if lynx will persist in this area into the future.

Regardless of the current occupancy and reintroduction efforts, the Kettle Range contains some of the PBFs important to lynx, but its spatial configuration and quantity of habitat do not appear to be sufficient to provide for the conservation of lynx as we describe in our response to comment 16, above. We also considered whether the Kettle Range acts as part of a larger network of habitat with areas to the north in Canada and/or to the east and west in Washington. The Kettle Range is substantially more isolated than other habitat areas within the lynx range, and the area is smaller than the criteria we established to meet the definition of critical habitat. There has been no evidence that the Kettle Range supports lynx making east-west movements into or out of the Kettle Range to connect with other populations in the Cascades and Northern Rockies. Further, we did not determine this area is essential to the conservation and recovery of the DPS, as described in our recovery plan (Service 2024, p. 25), though we highlighted it as an area that may contribute to the DPS. Therefore, the Kettle Range was not included as critical habitat for the above reasons.

(30) Comment: Some commenters thought that critical habitat should be designated in Oregon.

Our response: In the SSA report, we state that it seems likely that lynx occurred historically in Oregon only intermittently as dispersers, or as small, naturally ephemeral populations; not as persistent resident breeding populations (Service 2017, pp. 43–44). This assessment is based on a comprehensive, peer-reviewed analysis of verified historical lynx records that was published at the time the DPS was listed (McKelvey et al. 2000a, entire) and on research and monitoring that have occurred since then. We conclude that Oregon has not historically or recently contributed to the persistence and conservation of lynx in the DPS and is unlikely to do so in the future (Service 2017, p. 44). There is no evidence that any areas in Oregon were occupied at the time of listing or that habitats in Oregon are capable of supporting resident breeding populations (Service 2017, p. 44). No areas of Oregon were included in the recovery plan for lynx as being necessary to support recovery goals. Thus, because the state is unoccupied, does not contain habitat capable of supporting resident breeding populations, and is not essential for meeting conservation or recovery goals for the species, we did not designate any areas of Oregon as critical habitat for lynx.

(31) Comment: Commenters requested a comprehensive National Environmental Policy Act (NEPA) analysis to assess the potential impacts of the proposed rule, including a review of economic costs and benefits.

Our response: The Department has determined that this agency action does not require an environmental analysis under NEPA. See *National Environmental Policy Act (42 U.S.C. 4321 et seq.),* below.

(32) Comment: Some commenters were critical of State management plans, particularly those from Washington and Montana, and stated current measures may not adequately protect lynx populations. Some commenters called for a thorough evaluation of existing HCPs to ensure they provide adequate protections for lynx habitats. These commenters suggested that exclusions from the critical habitat designation should only occur if these plans demonstrate stronger conservation measures than currently identified.

Our response: We reviewed the WDNR LHMP and Montana DNRC HCP, as well as monitoring reports from both of those agencies (WDNR 2025, entire; Montana MTDNRC 2025, entire) as well as data showing lynx regularly use lands covered by the State management plans. The plans include conservation measures to conserve the PBFs of habitat to support dense snowshoe hares and to provide a mosaic of structural stages, which provides protection for lynx populations. These plans have been in place since 2006 and 2010, respectively, and the affected State lands continue to be used by resident lynx and contribute to resiliency of Units 3 (Northern Rockies) and 4 (North Cascades). WDNR has recently committed to reviewing its LMHP with the Service, and Montana DNRC meets annually with the Service to review its HCP and discuss any new science that may need to guide their management. These commitments are adequate for the Service to have determined that the plans provide conservation benefits for the species and its habitat, and the benefits of excluding them outweigh the benefits of including them as critical habitat. See Consideration of Impacts Under Section 4(b)(2) of the Act, below, for our full exclusion analysis of these areas.

(33) Comment: Commenters urged the Service to consider historical range and population data when designating critical habitat, arguing that many areas deemed ''unoccupied'' may still be essential for lynx conservation. Many comments referenced historical data on lynx detections in areas not included in critical habitat. Commenters presented evidence of past detections and potential populations to argue for the retention of these areas in the critical habitat designation. Commenters emphasized the necessity for the Service to incorporate the best available science, particularly Thornton and Murray (2024a, entire), which discusses the historical distribution of lynx.

Our response: The Service has examined instances of lynx detections on multiple occasions, including in our review of data submitted with public and agency comments, in the SSA report (Service 2017, entire) and in previous critical habitat rules. In determining the geographic area occupied by the species at the time of listing, we used data providing verified evidence of lynx occurrence. We examined additional information provided in public comments on the proposed rule, including Thornton and Murray (2024a, entire) which implies a broad historical occupancy by lynx and substantial range contractions over the 20th century. This implication is contrary to the information we present in the SSA report (Service 2017, entire) and SSA report addendum (Service 2023, entire). Substantial concerns exist

from other lynx researchers about the Thornton and Murray (2024a, entire) analysis, including several issues that limit the application of the paper to lynx conservation, including model design and validation, extensive extrapolation, ambiguous source data, and plausibility of the results (Ivan et al. 2024, entire). Given the extensive concerns about the Thornton and Murray (2024a, entire) paper (Ivan et al. 2024, entire; also see Thornton and Murray 2024b, entire), we did not rely on it for evidence of past occupancy of lynx, and join Ivan et al. (2024, entire) in disagreeing with Thornton and Murray's characterizations of historical or potential future lynx habitat. Instead, we relied on verified records (as defined in McKelvey et al. (2000, entire) and the species distribution models developed by Olson et al. (2021, entire) and Squires et al. (2024, entire), for indicating where habitat exists that may support resident lynx, which were developed using empirical data from collared lynx as well as verified locations of individual lynx, and thus are more robust and represent the best available science.

We did not include all areas where lynx have historically been detected. Lynx are adept dispersers, as evidenced by genetic connectivity indications (Schwartz et al. 2002, entire) and recent global positioning system (GPS) collar data (Ivan 2012, entire; Squires 2025, unpublished data; Arnold et al. 2025, entire), such that a single verified record does not indicate regular occupancy or habitat suitability. We explain below how we used verified records to determine areas occupied at the time of listing and the contemporary habitat models (Olson et al. 2021, entire; Squires et al. 2024, entire) to indicate where suitable habitat exists to support lynx populations. None of the unoccupied areas, and very little of the other areas suggested by commenters fall within areas identified in the recovery plan (Service 2024, entire). Thus, we did not find reason to designate unoccupied areas nor all areas within the historical range as critical habitat because they are not essential for the conservation of the species.

(34) Comment: Commenters argued that areas like the GYA and Colorado may offer resilience against climate change and should be preserved for lynx conservation. Some commenters called for protections that consider the long-term viability of high-elevation forests, which are expected to retain suitable habitat conditions longer than lower-elevation areas.

Our response: In the SSA Addendum (Service 2023, Chapter 6.1) and recovery plan for lynx (Service 2024, entire), the Service considered that some high elevation areas in Colorado and parts of the GYA may retain suitable temperature and climate conditions for lynx longer than lower elevation portions of the range. These are important considerations to monitor into the future, but they do not warrant critical habitat designation in and of themselves.

We are designating critical habitat in some areas of Colorado where high elevation boreal forests currently contain the physical or biological features (PBFs) essential to lynx conservation, where lynx occupancy at the time of listing was documented, and where the PBFs are present and support a persistent resident reproductive lynx population. In contrast, although the recovery plan recognizes that parts of the GYA may function as a potential future climate refugium, it does not identify the GYA as necessary for achieving recovery, does not recommend establishing a population there, and current data show that the area lacks the PBFs necessary to support resident or persistent lynx populations.

(35) Comment: Commenters called for the Service to clarify our criteria for determining suitable lynx habitat. Commenters also asked for clarity on the specific PBFs required for lynx habitat, and how those PBFs need to be assessed when evaluating project effects to critical habitat.

Our response: Our determination of suitable lynx habitat and thus critical habitat designation was based primarily on lynx SDMs developed by Olson et al. (2021, entire) and Squires et al. (2024, entire) and refined by the WLBT (2022, entire), with modifications as described in *Criteria Used To Identify Critical Habitat.* These SDMs predict areas likely to be used by lynx, based on primarily abiotic factors (temperature, moisture) and broad-scale vegetation data. These models predict areas with environmental conditions that correspond to lynx occurrence, based primarily on abiotic factors such as temperature and moisture and broad-scale vegetation characteristics. The SDMs are necessary to identify large landscapes capable of supporting multiple overlapping lynx home ranges.

However, the models do not depict fine-scale habitat attributes known to influence lynx presence and reproduction—specifically snowshoe hare habitat, denning structures, and snow characteristics—which we identify as PBFs. Because mapped data for these finer-scale PBFs are not available at the spatial resolution of lynx home ranges in the western United States, we used the SDMs as a proxy to identify areas likely capable of supporting those PBFs. Lynx presence strongly correlates with the occurrence of these PBFs, and therefore areas predicted by the SDMs are expected to contain the habitat conditions essential to the species.

The SDMs strongly correlate high-probability lynx habitat with areas of high snowshoe hare densities, including a strong alignment with the Holbrook et al. (2017, entire) model of areas with high snowshoe hare densities in western Montana and with Hodges et al. (2009, entire) finding of overall low snowshoe hare densities across most of Yellowstone National Park. Because snowshoe hare densities are strongly influenced by dynamic stand structure conditions—such as horizontal cover, which can be affected by wildfire, forest thinning, and natural regeneration—these attributes cannot be mapped at a consistent scale suitable for defining critical habitat.

In response to comments requesting a definition of ''deep, fluffy'' snow, we have revised the PBF for clarity and provide here a functional explanation of this PBF. These snow conditions are essential because they confer a competitive advantage to Canada lynx over other carnivores such as bobcats and coyotes. While snow characteristics vary across the species' range, we are not aware of a universally accepted quantitative metric for this feature. However, we qualitatively define it as primarily unconsolidated (fluffy) snow that is sufficiently deep to impede predators with higher foot loads than lynx and that persists for a substantial portion of the year, particularly during winter months when foraging opportunities are most limited. The SDMs incorporate temperature and moisture data that serve as proxies for snowpack characteristics—such as depth, moisture (which affects compaction), and persistence—thus capturing regional variation in snow conditions and predicting areas where lynx are likely to be found.

(36) Comment: Some commenters expressed support for excluding Tribal lands and lands managed by the Montana DNRC and Washington DNR from lynx critical habitat designation. They argued that existing management plans and conservation initiatives, such as the Montana DNRC HCP, already provide adequate protection for lynx and their habitats. Other commenters expressed concerns about excluding state lands and urged the Service to carefully evaluate whether those plans provide adequate protection for the species and its habitat.

Our response: We evaluated the request and have excluded all Tribal lands and the Montana DNRC and Washington DNR lands from the final critical habitat designation, as explained below in the section titled Consideration of Impacts Under Section 4(b)(2) of the Act.

(37) Comment: A timber company requested exclusions for their northern forestlands around Richards Mountain, citing their management under the Native Fish HCP and adherence to Sustainable Forestry Initiative (SFI) standards, which promote sustainable practices and habitat protection.

Our response: We evaluated the request and have excluded those lands from the final critical habitat designation, as explained below in the section titled Consideration of Impacts Under Section 4(b)(2) of the Act.

(38) Comment: Commenters commended the Service for using advanced habitat modeling to refine critical habitat boundaries, emphasizing the importance of focusing on tier 1 habitats (as documented in WLBT 2022, entire) that are crucial for lynx occupancy and reproductive success.

Our response: The recent habitat modeling has been foundational to this critical habitat revision (Olson et al. 2021, entire; Squires et al. 2024, entire), along with the WLBT (2022, entire) identification of key habitat areas from the models and the tiered approach to model outputs by evaluating the extent and proportion of modeled high-quality habitat.

(39) Comment: A timber company urged the Service to conduct a cost-benefit analysis regarding the designation of Federal lands as critical habitat, arguing that the economic costs may outweigh the benefits of habitat protection. They stressed the importance of maintaining non-wilderness Federal forests for timber supply and regional economic health.

Our response: As stated in our response to comment 12, above, we developed an IEM considering the probable incremental economic impacts that may result from this designation of critical habitat. The information contained in our IEM was then used to develop a screening analysis of the probable economic effects of the designation of critical habitat for the Canada lynx DPS (IEc 2024 and 2026, entire). The analysis found that this critical habitat rule is unlikely to meet the threshold for an economically significant rule as defined in section 3(f)(1) of Executive Order (E.O.) 12866. Designating occupied areas as critical habitat typically causes little, if any, incremental impacts above and beyond the impacts of listing the species, as is the case with lynx. The incremental effects of revising critical habitat for lynx are likely to be limited to changes in administrative effort to evaluate the potential for adverse modification of Canada lynx critical habitat. The economic screening analysis also considers the potential benefits of designating critical habitat. According to the analysis, additional efforts to conserve lynx are not predicted. As the designation is unlikely to lead to additional or different project modifications and recommendations, no ancillary economic benefits are anticipated (see *Exclusions Based on Economic Impacts,* below).

Under the Act, critical habitat serves an important conservation function by identifying areas essential for the recovery of listed species and ensuring that federal actions do not destroy or adversely modify those areas (16 U.S.C. 1536). This designation for lynx provides several non-economic benefits. Critical habitat helps guide Federal agencies in project planning and consultation, ensuring that habitat features vital for species survival and recovery—such as within-population connectivity and potential foraging areas—are maintained. Identifying critical habitat also raises awareness of the species' conservation needs and fosters partnerships among Federal, state, tribal, and private stakeholders. This can lead to voluntary conservation measures and improved land-use planning, and it can add value to areas for conservation initiatives. For example, some conservation organizations seek to invest in conservation easements or acquisitions in areas identified as critical to the conservation of listed species. Other landowners may voluntarily develop habitat management plans or HCPs in designated critical habitat. This revised designation helps focus conservation efforts on areas most important for the species.

(40) Comment: Various commenters requested that ski area lands not be designated as lynx critical habitat, asserting that these areas do not represent high-quality lynx habitat and have been managed for recreation for decades. One commenter representing the Colorado ski industry requested a comprehensive NEPA process to analyze the impacts of the proposed designation, particularly regarding ski areas in Colorado, which they believe should not be classified as critical habitat due to their long-standing management for recreational use.

Our response: We examined the science regarding ski areas, and particularly relied upon the Olson et al. (2018, entire) study from Colorado regarding lynx use of developed ski areas versus areas where dispersed recreation occurs. The study found that lynx appeared to avoid high-intensity developed ski resorts, especially when recreation was most intense; however, lynx did not exhibit strong negative responses to dispersed recreation and used areas in which little to no recreation occurred. Because of that research, we determined it was not appropriate to include developed ski runs and lifts and associated infrastructure as critical habitat, as specified in the section *Criteria Used To Identify Critical Habitat,* below. However, some ski areas have permit areas or boundaries that extend beyond the existing developed footprint, where existing recreation is not resulting in lynx avoidance. These areas still provide habitat for lynx.

The Department has determined that this agency action does not require an environmental analysis under NEPA. See *National Environmental Policy Act (42 U.S.C. 4321 et seq.),* below.

(41) Comment: Commenters argued that Colorado (Unit 6, Southern Rockies) does not meet the Act's requirements for critical habitat designation, noting that much of it was unoccupied when the lynx DPS was listed and questioning its essentiality for lynx conservation.

Our response: When the Canada lynx DPS was listed in 2000, the State of Colorado had recently begun a lynx reintroduction effort. As such, some areas of Colorado that overlap with Unit 6 were occupied when the DPS was listed, as individual lynx were exploring the new area. Over the past 25 years, lynx have settled into certain areas that are regularly occupied and where the habitat has proven to support a persistent breeding population. In the recovery plan, we identified Unit 6, particularly the focal areas, as being essential for recovery (Service 2024, p. 22), and these areas meet the definition of critical habitat. The areas we are designating as critical habitat are a subset of the focal areas, are centered around the concentrated areas of likely habitat, and are large enough to support population goals outlined in the recovery plan. Other areas of potential lynx habitat in Colorado may be important for supporting connectivity, exploratory movements, or occasional occupancy, but do not meet the definition of critical habitat in this rule.

(42) Comment: Citing economic implications and lack of habitat, a mining company requested the exclusion from critical habitat designation of their private lands in

Colorado related to the Climax and Henderson mines.

Our response: In determining our response to this request, we first considered the commenter's claim that the areas associated with the mines do not provide habitat for lynx. In evaluating the areas using aerial imagery and lynx habitat maps, we observed some areas have been developed and no vegetation exists (*i.e.,* mine pits and associated infrastructure). These developed areas are already excluded from critical habitat by text in the rule. However, in other portions of the properties, forested vegetation exists, and some is mapped as potential habitat for lynx, and/or it may provide habitat to facilitate within-unit permeability and connectivity and there has been evidence of lynx use of forested areas adjacent to the mines in recent years (Baigas et al. 2017, p. 206). Thus, there is biological value in parts of the lands in question. Next, we evaluated whether the proponent of those exclusions presented credible information of a meaningful impact that supports the benefits of excluding these areas outweighing the benefits of including these areas. We found that the request did not provide credible information and the asserted costs and economic impacts are based on a misunderstanding that critical habitat designation restricts activities on private lands that would impede any future development or activities associated with the mines, which it does not.

As described in the economic screening analysis (IEc 2024 and 2026, entire), one of the purposes of the assessment is to provide the Service with information necessary to inform its decision making as part of the section 4(b)(2) exclusion process. The economic screening analysis finds that critical habitat designation is unlikely to generate economic costs beyond minor administrative efforts for projects and activities with a Federal nexus that require section 7 consultation. If future actions on the mine properties are being authorized, funded, or carried out by a Federal agency, such as the surrounding National Forests, the Federal agency must consider the impacts to designated critical habitat and ensure the action does not destroy or adversely modify the critical habitat. We encourage private landowners to consider conservation measures that may retain the value of the habitat for lynx when developing future projects.

(43) Comment: Some commenters opposed the exclusion of Tribal and State lands from critical habitat protections. Commenters advocated for partnerships with Tribal and State leaders to co-manage lands that are essential for lynx habitat rather than excluding them.

Our response: The Secretary may exclude any area from critical habitat if the benefits of exclusion outweigh those of inclusion, so long as exclusion will not result in extinction of the species concerned. In this rule, we have excluded some Tribal and State lands from the final critical habitat designation. These exclusions represent existing partnerships and management objectives that benefit the species. See Consideration of Impacts Under Section 4(b)(2) of the Act, below, for further explanation of why exclusion of these areas outweighs the benefits of including them in critical habitat.

(44) Comment: Several commenters expressed concerns about how critical habitat designation could curtail forest management, timber production, and fuels reduction activities. Others worried that the absence of critical habitat designation could lead to increased logging or thinning in lynx habitat.

Our response: A critical habitat designation does not by itself impose specific restrictions or forest management requirements unless a proposed action would result in the destruction or adverse modification (DAM) of the critical habitat. If the Service determines that a proposed action would cause DAM, the Service must develop a Reasonable and Prudent Alternative (RPA) to the proposed action. The RPA would include additional conservation measures necessary to avoid DAM.

Of the 157 formal consultations reviewed from 2018 through 2024, most of which were forest management and fuels reduction project, none resulted in a DAM determination. In fact, since critical habitat was first designated for lynx in 2006, no proposed action has resulted in DAM or required an RPA. When evaluating Forest Service and BLM land management plans that incorporate the Lynx Conservation Assessment and Strategy (LCAS) and/or have been revised to include Northern Rockies Lynx Management Direction (NRLMD) or Southern Rockies Lynx Amendment (SRLA) standards, guidelines, and objectives, the Service has consistently determined in both plan-level and project-level biological opinions that these conservation measures are sufficient to avoid jeopardy to the species and DAM where critical habitat is designated. Most of these existing plans include allowances for timber harvest and fuels reduction within lynx habitat in certain structural stages and allow for treatment of all structural stages within the wildland urban interface. Forest management and fuel reduction projects proposed under current land management plan direction have incorporated adequate restrictions to avoid jeopardy to the species, under current conditions. Additional considerations for critical habitat have provided redundancy without imposing further restrictions.

The effects of timber harvest depend on the size, scale, and spatial arrangement of treatments. When used judiciously and at scales biologically relevant to lynx, logging and other forest management tools are an important part of managing critical habitat. The Lynx Conservation Assessment and Strategy (ILBT 2013) recommends using fire and mechanical treatments to maintain or create a mosaic of successional stages within lynx habitat and recommends focusing treatments in areas that have the potential to improve snowshoe hare habitat by developing dense horizontal cover. Existing forest management plans, such as the NRLMD (USFS 2007) and SRLA (USFS 2008), already provide sideboards for timber harvest in lynx habitat, regardless of critical habitat designation. We anticipate that this designation will not impose additional restrictions beyond those already in place to avoid jeopardy to the species.

Lynx habitat conservation can include forest management, including timber harvest, as a tool for creating and maintaining valuable structural stages to support foraging, denning, and other needs. The LCAS includes a conservation measure for vegetation management in lynx habitat that provides a ''mosaic that includes dense early-successional coniferous and mixed-coniferous-deciduous stands, along with a component of mature multi-story coniferous stands to produce the desired snowshoe hare density'' at spatial scales approximately the size of female lynx home ranges (ILBT 2013, p. 90–91). The WLBT Framework synthesized additional science that was published since the LCAS and included recommendations for vegetation mosaics based on published scientific literature (*e.g.,* Kosterman et al. 2018, Holbrook et al. 2017 and 2019). Such a mosaic can be created by using such tools as prescribed fire, mechanical vegetation treatments, and natural disturbances, among others. The LCAS and WLBT documents are useful tools for guiding conservation measures within lynx critical habitat and informing effects analyses in Section 7 consultations. However, we also acknowledge that the WLBT Framework is not a comprehensive lynx conservation strategy and does not

incorporate all vegetation designations needed for applied forest management, wildfire risk reduction, and lynx conservation decision-making. We encourage action agencies, landowners, and others to consider these recommendations, alongside other relevant science on lynx, forest management and fire risk, and other best available vegetation information, when developing projects and management strategies within lynx critical habitat.

Critical Habitat

Background

Critical habitat is defined in section 3(5)(A) of the Act as:

(1) The specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the Act, on which are found those physical or biological features.

(a) Essential to the conservation of the species, and

(b) Which may require special management considerations or protection; and

(2) Specific areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Our regulations at 50 CFR 424.02 define the geographical area occupied by the species as an area that may generally be delineated around species' occurrences, as determined by the Secretary (*i.e.,* range). Such areas may include those areas used throughout all or part of the species' life cycle, even if not used on a regular basis (*e.g.,* migratory corridors, seasonal habitats, and habitats used periodically, but not solely by vagrant individuals).

Conservation, as defined under section 3 of the Act, means to use and the use of all methods and procedures that are necessary to bring an endangered or threatened species to the point at which the measures provided pursuant to the Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation, and, in the extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

Critical habitat receives protection under section 7 of the Act through the requirement that each Federal action agency ensure, in consultation with the Service, that any action they authorize, fund, or carry out is not likely to result in the destruction or adverse modification of designated critical habitat. The designation of critical habitat does not affect land ownership or establish a refuge, wilderness, reserve, preserve, or other conservation area. Such designation also does not allow the government or public to access private lands. Such designation does not require implementation of restoration, recovery, or enhancement measures by non-Federal landowners. Rather, designation requires that, where a landowner requests Federal agency funding or authorization for an action that may affect an area designated as critical habitat, the Federal agency consult with the Service under section 7(a)(2) of the Act. If the action may affect the listed species itself (such as for occupied critical habitat), the Federal agency would have already been required to consult with the Service even absent the designation because of the requirement to ensure that the action is not likely to jeopardize the continued existence of the species. Even if the Service were to conclude after consultation that the proposed activity is likely to result in destruction or adverse modification of the critical habitat, the Federal action agency and the landowner are not required to abandon the proposed activity, or to restore or recover the species; instead, they must implement ''reasonable and prudent alternatives'' to avoid destruction or adverse modification of critical habitat.

Under the first prong of the Act's definition of critical habitat, areas within the geographical area occupied by the species at the time it was listed are included in a critical habitat designation if they contain physical or biological features (1) which are essential to the conservation of the species and (2) which may require special management considerations or protection. For these areas, critical habitat designations identify, to the extent known using the best scientific data available, those physical or biological features that are essential to the conservation of the species (such as space, food, cover, and protected habitat).

Under the second prong of the Act's definition of critical habitat, we can designate critical habitat in areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Section 4(b)(2) of the Act requires that we designate critical habitat on the basis of the best scientific data available. Further, our Policy on Information Standards Under the Endangered Species Act (published in the **Federal Register** on July 1, 1994 (59 FR 34271)), the Information Quality Act (section 515 of the Treasury and General Government Appropriations Act for Fiscal Year 2001 (Pub. L. 106–554; H.R. 5658)), and our associated Information Quality Guidelines provide criteria, establish procedures, and provide guidance to ensure that our decisions are based on the best scientific data available. They require our biologists, to the extent consistent with the Act and with the use of the best scientific data available, to use primary and original sources of information as the basis for recommendations to designate critical habitat.

When we are determining which areas should be designated as critical habitat, our primary source of information is generally the information compiled in the SSA report and information developed during the listing process for the species. Additional information sources may include any generalized conservation strategy, criteria, or outline that may have been developed for the species; the recovery plan for the species; articles in peer-reviewed journals; conservation plans developed by States and counties; scientific status surveys and studies; biological assessments; other unpublished materials; or experts' opinions or personal knowledge.

Habitat is dynamic, and species may move from one area to another over time. We recognize that critical habitat designated at a particular point in time may not include all of the habitat areas that we may later determine are necessary for the recovery of the species. For these reasons, a critical habitat designation does not signal that habitat outside the designated area is unimportant or may not be needed for recovery of the species. Areas that are important to the conservation of the species, both inside and outside the critical habitat designation, will continue to be subject to: (1) conservation actions implemented under section 7(a)(1) of the Act; (2) regulatory protections afforded by the requirement in section 7(a)(2) of the Act for Federal agencies to ensure their actions are not likely to jeopardize the continued existence of any endangered or threatened species; and (3) the prohibitions found in the 4(d) rule. Federally funded or permitted projects affecting listed species outside their designated critical habitat areas may

still result in jeopardy findings in some cases. These protections and conservation tools will continue to contribute to recovery of the species. Similarly, critical habitat designations made on the basis of the best scientific data available at the time of designation will not control the direction and substance of future recovery plans, HCPs, or other species conservation planning efforts if new information available at the time of those planning efforts calls for a different outcome.

Physical or Biological Features Essential to the Conservation of the Species

In accordance with section 3(5)(A)(i) of the Act and regulations at 50 CFR 424.12(b), in determining which areas we will designate as critical habitat from within the geographical area occupied by the species at the time of listing, we consider the physical or biological features that are essential to the conservation of the species and which may require special management considerations or protection. The regulations at 50 CFR 424.02 define ''physical or biological features essential to the conservation of the species'' as the features that occur in specific areas and that are essential to support the life-history needs of the species, including, but not limited to, water characteristics, soil type, geological features, sites, prey, vegetation, symbiotic species, or other features. A feature may be a single habitat characteristic or a more complex combination of habitat characteristics. Features may include habitat characteristics that support ephemeral or dynamic habitat conditions. Features may also be expressed in terms relating to principles of conservation biology, such as patch size, distribution distances, and connectivity. For example, physical features essential to the conservation of the species might include gravel of a particular size required for spawning, alkaline soil for seed germination, protective cover for migration, or susceptibility to flooding or fire that maintains necessary early-successional habitat characteristics. Biological features might include prey species, forage grasses, specific kinds or ages of trees for roosting or nesting, symbiotic fungi, or absence of a particular level of nonnative species consistent with conservation needs of the listed species. The features may also be combinations of habitat characteristics and may encompass the relationship between characteristics or the necessary amount of a characteristic essential to support the life history of the species.

In considering whether features are essential to the conservation of the species, we may consider an appropriate quality, quantity, and spatial and temporal arrangement of habitat characteristics in the context of the life-history needs, condition, and status of the species. These characteristics include, but are not limited to, space for individual and population growth and for normal behavior; food, water, air, light, minerals, or other nutritional or physiological requirements; cover or shelter; sites for breeding, reproduction, or rearing (or development) of offspring; and habitats that are protected from disturbance.

Species Needs, Habitat, Ecological Requirements

A comprehensive review of the species description, biology, taxonomy, genetics, life history, ecology, distribution, species needs, habitat, and ecological requirements of the Canada lynx DPS is presented in the SSA report (Service 2017, entire) and SSA report addendum (Service 2023, entire). Here we present a summary of information relevant to the PBFs essential to the conservation of lynx.

The Canada lynx is a North American wild cat that is most strongly associated with northern-latitude boreal forests (*e.g.,* taiga) of Canada and Alaska (McCord and Cardoza 1982, p. 729; Agee 2000, pp. 39–41; Aubry et al. 2000, pp. 373–374; Mowat et al. 2000, p. 272). The southern peripheries of the boreal forest and lynx range extend into the northern contiguous United States. The lynx is a medium-sized cat with long legs and large, well-furred paws, which make it well-adapted for traversing and hunting in deep, unconsolidated snow. Its low foot-loading (weight per surface area of foot) is thought to provide a competitive advantage (Buskirk et al. 2000a, p. 90; Buskirk et al. 2000b, p. 400; ILBT 2013, pp. 26, 36, 81) over other terrestrial predators of snowshoe hare, the lynx's primary prey.

Lynx rely heavily on snowshoe hares to support survival, reproduction, recruitment, and therefore, population persistence (Ruggiero et al. 2000a, p. 110; Mowat et al. 2000, p. 270; Steury and Murray 2004, pp. 128, 136–138; Service 2005, p. 2; ILBT 2013, p. 30–34; 79 FR 54782, September 12, 2014). All aspects of lynx life history are inextricably tied to the snowshoe hare, which comprises most of the lynx diet throughout its range (Nellis et al. 1972, pp. 323–325; Brand et al. 1976, pp. 422–425; Koehler and Aubry 1994, pp. 75, 85; Apps 2000, pp. 358–359, 363; Aubry et al. 2000, pp. 375–378; Mowat et al. 2000, pp. 267–268), including the DPS (Koehler 1990, p. 848; von Kienast 2003, pp. 37–38; ; Moen 2009, p. 7; Vashon et al. 2012, p. 11; Olson 2015, pp. 60–69; Ivan and Shenk 2016, p. 1053). Being highly specialized hare predators, lynx require landscapes that consistently support relatively high hare densities (McCord and Cardoza 1982, p. 744; Quinn and Parker 1987, pp. 684–685; Aubry et al. 2000, pp. 375–378).

The best available science, including recent research in the lynx DPS' range, suggest that landscape-level snowshoe hare densities that are consistently greater than 0.2 hares/acre (0.5 hares/hectare) and have favorable snow conditions, that is, deep and persistent unconsolidated (''fluffy'') snow, for about 4 months per year are needed to support lynx occupancy, reproduction, and recruitment (Hoving et al. 2005, p. 749; Gonzalez et al. 2007, p. 7; Squires and Ruggiero 2007, pp. 313–314; Moenand Windels 2012, pp. 352–354; Simons-Legaard et al. 2013, pp. 567, 574–575). At the southern periphery of lynx distribution, some places, including within the range of the DPS, seem to be at minimum thresholds to meet these requirements or do so inconsistently.

Lynx and snowshoe hares are strongly associated with moist boreal forests, where winters are long, cold, and snowy (Bittner and Rongstad 1982, p. 154; McCord and Cardoza 1982, p. 743; Quinn and Parker 1987, pp. 684–685; Agee 2000, pp. 39–47; Aubry et al. 2000, pp. 373–382; Hodges 2000a, pp. 183–191; Hodges 2000b, pp. 136–140; McKelvey et al. 2000a, pp. 211–232). The predominant vegetation of boreal forest is conifer trees, primarily species of spruce and fir (*Picea* spp. and *Abies* spp., respectively; Elliot-Fisk 1988, pp. 34–35, 37–42). Snowshoe hares feed on conifers, deciduous trees, and shrubs (Hodges 2000a, pp. 181–183) and are most abundant in forests with dense understories that provide forage, cover to escape from predators, and protection during extreme weather (Wolfe et al. 1982, pp. 665–669; Litvaitis et al. 1985, pp. 869–872; Hodges 2000a, pp. 183–195; Hodges 2000b, pp. 136–140). Lynx population dynamics, survival, and reproduction are closely tied to snowshoe hare availability, making snowshoe hare habitat the primary component of lynx habitat.

Lynx distribution and population persistence are also influenced by snow conditions (Peers et al. 2012, pp. 4–9). The species is generally restricted to areas that receive deep and persistent unconsolidated snow, which is thought to allow lynx to outcompete other terrestrial hare predators that are less efficient in such conditions because of

their proportionately longer limbs and very large feet (McCord and Cardoza 1982, pp. 748–749; Quinn and Parker 1987, p. 684; Buskirk et al. 2000a, pp. 89–94; Buskirk et al. 2000b, pp. 400–401; Ruggiero et al. 2000b, pp. 445–449; Hoving 2001, p. 75; Hoving et al. 2005, pp. 744–749; Carroll 2007, entire; Gonzalez et al. 2007, entire; ILBT 2013, pp. 25–26; 79 FR 54782). The lynx's physical adaptations (*i.e.,* long legs and large, well-furred paws) are thought to provide the lynx a seasonal advantage over potential terrestrial competitors and predators, which generally have higher foot-loading, causing them to sink into the snow more than the lynx (McCord and Cardoza 1982, p. 748; Murray and Boutin 1991, entire; Buskirk et al. 2000a, pp. 86–95; Ruediger et al. 2000, pp. 1–11; Ruggiero et al. 2000b, pp. 445, 450).

Buskirk et al. (2000a, entire) described potential exploitation (for food) and interference (avoidance) competition between lynx and other terrestrial and avian predators of hares, several of which have also been documented to prey on lynx. Coyotes (*Canis latrans*) were thought most likely to exert local or regionally important exploitation competition impacts to lynx (Buskirk et al. 2000a, p. 89); however, subsequent research showed an insignificant amount of competition for hares between lynx and coyotes in winter (Kolbe et al. 2007, p. 1416; Dowd and Gese 2012, entire; Guillaumet et al. 2015, pp. 141–144), and evidence of competition with, and displacement of lynx by, bobcats (*Lynx rufus*) (Robinson 2006, pp. 120–129; Peers et al. 2012, pp. 4–9; Peers et al. 2013, entire; Sirén et al. 2021, p. 1768; Sirén et al. 2022, pp. 761–762). Coyotes, bobcats, and cougars (*Puma concolor;* also, mountain lion) are capable of imparting interference competition (*i.e.,* aggressive encounters) effects on lynx (Buskirk et al. 2000a, p. 89; Scully et al. 2018, pp. 765–766; King et al. 2020, p. 338). Interference would most likely occur during summer but could also occur during winter in areas lacking deep, unconsolidated snow (ILBT 2013, p. 36).

Individual lynx require large landscapes with hare densities that maximize their chances of (1) surviving from birth to independence, (2) establishing and maintaining a home range, (3) breeding successfully, and (4) contributing genes to future generations (Breitenmoser et al. 1993, p. 552). These landscapes also must provide conditions that allow lynx to compete sufficiently for hares and minimize the likelihood of predation and other sources of lynx mortality.

Lynx populations need large (thousands of km^2) boreal forest landscapes with hare densities capable of supporting (1) multiple lynx home ranges, (2) reproduction and recruitment most years, and (3) at least some survival, even during years when hare numbers are low. Lynx populations estimated at fewer than 25 individuals or occupying habitat areas too small to support at least 25 individual lynx (less than 483 mi^2 (1,250 km^2)) are considered ''not resilient/functionally extirpated'' because populations that small are unlikely to persist over time (Service 2023, pp. 50–51). Small populations are more vulnerable to catastrophic events, such as disease outbreaks or large wildfires that can affect multiple home ranges. At the periphery of the species' range, source-sink dynamics within a metapopulation structure mean that some populations may be naturally ephemeral (Service 2023, p. 58): smaller populations or individuals may occupy limited habitat for a time, then disappear, a pattern observed within the lynx DPS. While the overall contribution of these smaller habitat areas to metapopulation dynamics is not fully understood, they may play important roles in dispersal, range expansion, and demographic connectivity. However, core areas for the species are those with enough high-capability habitat to support resilient populations. Habitat patches of at least 483 mi^2 (1,250 km^2) are critical for providing the redundancy, resiliency, and representation needed for recovery across the DPS (Service 2024, p. 14).

Large boreal forest landscapes also must have snow conditions (consistency, depth, and duration) that allow lynx to outcompete other terrestrial hare predators. To persist, lynx populations must exhibit recruitment and immigration rates that equal or exceed mortality and emigration rates on average over the long term. Immigration may be particularly important to the persistence and stability of lynx populations at the southern periphery of the range, including those within the DPS, where hare densities are generally low and hare populations are either non-cyclic or weakly-cyclic compared to northern populations. Low hare densities reduce the likelihood that lynx recruitment will consistently equal or exceed mortality. Non-cyclic or weakly-cyclic hare populations are unlikely to allow the rapid lynx population recovery observed in northern lynx populations outside of the DPS when hare numbers increase dramatically after cyclic population crashes. Conversely, more stable hare populations, even at lower landscape-level densities, likely provide stability (*i.e.,* prevent periodic steep declines) among lynx populations on the periphery of the DPS' range and southern Canada. Although immigration rates for DPS populations are unknown, as is the rate and periodicity of immigration needed to provide demographic stability among them, connectivity with, and immigration from, lynx populations in Canada are believed to be important to the persistence of lynx populations in the DPS (McKelvey et al. 2000a, pp. 232–242; McKelvey et al. 2000b, pp. 32–34; Schwartz et al. 2002, entire; Service 2005, p. 2; ILBT 2013, pp. 34, 42, 47, 54, 60, 65; Squires et al. 2013, p. 187; 79 FR 54782). Genetic data indicate that north-south movement renders the contiguous U.S. and Canada populations panmictic (Schwartz et al. 2002, entire), indicating a strong propensity for lynx to make north-south movements; however, telemetry data from marked individuals to date exhibit few east-west dispersals between populations (Olson et al. 2021, p. 1669; Ivan 2012 and 2017, entire).

Lynx are highly vagile, capable of moving long distances (several thousand km) over varied terrain and through a wide range of habitats, and they are even capable swimmers. As such, there are likely few complete barriers to dispersal or exploratory movements (Arnold et al. 2025, p. 1577; Ivan 2012, entire; Squires 2025, unpublished data), which genetic research supports, given high gene flow (Service 2017, p. 24–25, internal citations omitted). Within home ranges, however, residents are less tolerant of poor-quality habitats and rugged terrain. Natural features such as rivers and rocky peaks, as well as anthropogenic features such as highways and railways and residential developments, may be navigable but they create more challenges for individuals by increasing exposure, mortality risk, and energetic requirements (Service 2017, p. 100–102). Changes to vegetation structure can influence lynx movements within home ranges; in Montana, fragmentation from forest thinning decreased the probability of lynx movements across the forested landscape (Squires et al. 2013, p. 192). Lynx in the Northern Rockies also seem sensitive to changes in forest structure and avoid large forest openings like recent clearcuts and thinned areas, particularly in winter (Squires et al. 2010, p. 1654). Kosterman et al. (2018, entire) suggested that mature forest in a connected configuration creates an energetically efficient context for Canada lynx to

acquire snowshoe hares and successfully reproduce. While no single feature typically prevents movement outright, the accumulation of natural and human-generated barriers can fragment boreal forest habitat within an individual's home range. This fragmentation can raise energetic costs, reduce access to high-quality foraging and denning areas, and thereby affect overall fitness, reproductive success, and survival.

Lynx dens have been documented in both mature and younger boreal forest stands and the amount of structure (*e.g.,* downed trees; large, woody debris; tip-up mounds) seems to be more important than the age of the forest stand for lynx denning habitat (Service 2017, p. 29, internal citations omitted). Denning habitat is not thought to be a limiting factor for lynx in the DPS, given the abundance of denning structures in dense boreal forest stands. Management actions that maintain coarse woody debris in areas occupied by lynx, such as leaving large-diameter logs in piled configurations or by retaining patches of dense burned forests that will windthrow over time, may provide future den sites as managed or burned stands regenerate (Squires et al. 2008, p. 1505).

The greatest challenges to the long-term viability of the DPS include projected warming and drought-related impacts (*e.g.,* loss of temperature, snow, and vegetation conditions supportive of lynx populations) and increases in the size, frequency, and severity of wildfires and vegetation-damaging insect outbreaks in lynx habitats. Modeled future warming is projected to cause a gradual but steady decline in lynx habitat distribution and quality of all focal areas and thus, a reduction in their ability to support persistent breeding populations in the future (Service 2023, p. 5). Large forest disturbances, such as wildfire, may influence how a landscape can produce sufficient hare densities, with some areas taking long periods of time for forest recovery, while other areas respond within a few decades to provide high-quality lynx foraging and denning habitat. The pace and scale of wildfires and other natural and anthropogenic disturbances within the SSA units in the future will strongly influence the DPS. Strategic forest management and fuels reduction within lynx critical habitat can ensure a mosaic of lynx habitat with abundant foraging for individuals while also reducing the risks of catastrophic wildfire that can negatively affect lynx as well as human infrastructure in the wildland urban interface. Thus, a special management consideration for lynx critical habitat should include updated strategies for incorporating the best available scientific information into management plans that manage proactively for desired mosaics and fuels reduction at spatial scales relevant to individual lynx within the critical habitat units.

Summary of Essential Physical or Biological Features

We derive the specific physical or biological features essential to the conservation of Canada lynx from studies of the species' habitat, ecology, and life history as described below. Additional information can be found in the 2014 final critical habitat rule (79 FR 54782, September 12, 2014), the 2017 SSA report (Service 2017, entire), and the SSA report addendum (Service 2023, entire); available on *https://www.regulations.gov* under Docket No. FWS–R6–ES–2024–0142.

We have determined that the following PBFs are essential to the conservation of the Canada lynx DPS:

(1) Presence of snowshoe hares that support lynx residency and reproduction over time within a mosaic of boreal/subalpine forest structural stages that includes snowshoe hare habitat with dense horizontal cover at ground- or snow-level.

(2) Winter conditions that provide and maintain deep persistent unconsolidated (fluffy) snow.

(3) Presence of denning structures, including downed trees, root wads, and accumulations of coarse woody debris.

(4) Habitat types, such as dry forest or meadows, that are between boreal forest patches and are likely to be used by lynx traveling between those patches within and among home ranges.

(5) Landscapes with suitable habitat large enough (483 mi^2 (greater than or equal to 1,250 km^2)) to support breeding populations.

The PBFs identified above are those that are known to be important to lynx conservation based on decades of lynx research (as summarized in Service 2017, entire). The PBFs work in concert with one another, and must be present in the right amounts and juxtaposition to be able to support lynx in their various functions. We focused our identification of critical habitat on those areas where the PBFs are likely to occur in enough quantity and proximity to support persistent, breeding populations of lynx. The scientific literature does not confer precisely what quantities and spatial arrangements of the physical and biological features are needed to support lynx populations throughout the range of the DPS. However, we find that evidence of breeding populations is the best way to verify that the physical and biological features essential to lynx are present in sufficient quantity and spatial configuration to meet the needs of the species.

Because mapping has not been conducted to assess each of the PBFs at the scale of the lynx range in the western United States, we chose to use a proxy to identify areas with the PBFs that can support persistent resident breeding populations. We found the best proxy for identifying those PBFs was using the SDMs created by Olson et al. (2021, entire) and Squires et al. (2024, entire), and refined by the WLBT (2022, entire). The SDMs were based on GPS locations from collared lynx in reproductive populations in Montana, Washington, Wyoming, and Colorado, respectively. This proxy was appropriate because research has shown that lynx employ multi-scale selection of habitats by first choosing landscapes where the PBFs are abundant and then choosing home ranges within those larger landscapes that have appropriate amounts of snow depth, snowshoe hare occupancy, and boreal forest (Holbrook et al. 2017, entire). Within home ranges, lynx preferentially use stands with certain structural conditions that support high hare densities. The SDMs predict lynx habitat probability based on primarily abiotic factors (*e.g.,* temperature and moisture) as well as forest productivity. It is highly probable these three covariates are proxies for snow amount, duration, density, and consistency that give lynx a sufficiently long seasonal competitive advantage in hunting their primary prey species, snowshoe hares, over other terrestrial hare predators (*e.g.,* bobcats and coyotes). These variables also likely influence hare populations and density, and, by extension, lynx, which are indirectly reliant on the environmental conditions that favor hares (Service 2023, p. 61). The attributes that explained the lynx locations were then extrapolated across the western United States to identify potential habitats in all areas, regardless of current vegetation structure (*i.e.,* regardless of whether forests are dense or if they have been thinned) and regardless of whether lynx have been detected there in recent years. In other words, by using models that were built using recorded lynx movements to tell us where potential habitat occurs, we are considering all the PBFs that are identified above at the same time to identify areas that are essential to the conservation of lynx.

For individual project-level analysis of effects to critical habitat, it is most appropriate to assess effects to the PBFs themselves rather than the SDMs, which were tools used to help identify the

areas to designate as critical habitat. Assessing the PBF related to snowshoe hares and their habitat is best conducted at the site or project-specific scale, where regionally specific information on horizontal cover and vegetation conditions can be used to evaluate the condition of the PBF at the time a project is proposed. Abundant information is available to help correlate snowshoe hare relative abundance with vegetation variables that describe stand-level characteristics, which are often more reasonable to measure and describe. Definitions of ''dense horizontal cover'' may vary by region and by season. Similarly, we do not expect project proponents to have to measure or quantify snow conditions when evaluating effects to the critical habitat; rather, project evaluations should consider any actions that may affect snow compaction or overall quantity and discuss effects to the PBF as such. The presence of denning structures is not thought to be a limiting factor for lynx in the DPS, and dens have been documented in both mature and younger forest stands. It is not necessary for project-level evaluations to quantify denning sites, but project development should ensure that potential denning structures (*e.g.,* downed trees, woody debris, tip-up mounds) are retained and/or recruited such that they continue to be present and distributed across multiple areas at the scale of a female home range. The PBF related to permeable landscapes is also best suited to qualitative versus quantitative evaluations that consider any barriers or disruptions to connectivity within or between home ranges within the critical habitat polygons. Widescale habitat probability models and/or SDMs are necessary for identifying and assessing the PBF regarding landscapes with suitable habitat to support breeding populations. We do not anticipate individual projects, such as forest management or small development projects, to impact this PBF, as it is mostly driven by bioclimatic features at broad spatial scales. Programmatic plans (such as land or resource management plans) are likely the best level for assessing effects to this PBF.

We note here that the 2014 critical habitat rule included a discussion of primary constituent elements (PCEs) essential to the conservation of lynx (79 FR 54782 at 54811, September 12, 2014). The Service no longer uses PCEs to define critical habitat; rather, we now evaluate and describe the PBFs that are essential to the conservation of the species in accordance with the definitions in the Act and our implementing regulations at 50 CFR 424.12(b). We have identified the PBFs in this revised critical habitat rule for the Canada lynx DPS in the western United States. The analysis provided in the 2014 critical habitat rule in support of critical habitat Units 1 (Maine) and 2 (Minnesota), including the description of PCEs, still applies to those units and is not subject to this revision. Even though the eastern critical habitat units are based on PCEs, those PCEs are biologically similar to the PBFs used in this rule.

Special Management Considerations or Protection

When designating critical habitat, we assess whether the specific areas within the geographical area occupied by the species at the time of listing contain features which are essential to the conservation of the species and which may require special management considerations or protection. The features essential to the conservation of lynx may require special management considerations or protections to reduce the following threats: climate change; vegetation management; wildland fire management; and habitat loss/fragmentation through development, roads, and mining (ILBT 2013, pp. 68–78; Service 2017, pp. 51–105). A detailed discussion of activities influencing the Canada lynx DPS and its habitat can be found in the SSA report (Service 2017, pp. 51–105) and SSA report addendum (Service 2023, pp. 31–46). This critical habitat rule does not prohibit these or any other activities within lynx critical habitat.

Since the DPS was listed in 2000, nearly all Federal forest plans and resource management plans throughout the DPS range have been revised in coordination with the Service and the lynx research community to include science-based measures and management practices consistent with lynx conservation, thereby greatly reducing the potential for population-scale habitat deterioration on Federal lands. These efforts have contributed significantly to addressing the threat for which the DPS was listed—the inadequacy of regulatory mechanisms in USFS and BLM land and resource management plans at that time. Additionally, Federal partners continue to incorporate the best available science into lynx habitat management practices on Federal lands; however, climate change-related impacts have the potential to reduce lynx and snowshoe hare habitat within the DPS in the future. Special management considerations or protections that may be required within critical habitat areas to address these threats include, but are not limited to, maintaining high-quality lynx habitat and potential climate refugia areas; maintaining boreal forest vegetation communities that support high densities of snowshoe hares and resident lynx breeding populations; supporting connectivity within and between home ranges; implementation of forest management practices that prevent or reduce risk of catastrophic wildfire; reducing indirect impacts to habitat from activities adjacent to critical habitat units; and minimizing habitat disturbance, fragmentation, and destruction through use of best management practices for vegetation management activities. Tools to create or maintain a desired mosaic of structural stages that are beneficial to lynx within critical habitat can include logging and timber management, prescribed and natural fire, and others (ILBT 2013, p. 91; WLBT 2022, p. 27). Other management considerations or protections may relate to ensuring highways and developments are permeable for lynx crossing within critical habitat polygons.

Conservation Strategy and Selection Criteria Used To Identify Critical Habitat

Conservation Strategy

We developed a conservation strategy for the Canada lynx DPS to determine and select areas occupied at the time of listing that contain the PBFs essential to the conservation of the species, which was heavily informed by our recovery plan (Service 2024). The goal of our conservation strategy for lynx is to recover the DPS to the point where the protections of the Act are no longer necessary. The role of critical habitat in achieving this conservation goal is to identify the specific areas within the range of the Canada lynx DPS that provide the essential PBFs without which the lynx's range-wide resiliency, redundancy, and representation would be insufficient to achieve recovery. This, in turn, requires an understanding of the fundamental parameters of lynx biology and ecology based on well-accepted conservation biology and ecological principles for conserving species and their habitats, such as those described in the SSA report (Service 2017, entire), SSA report addendum (Service 2023, entire), and recovery plan (Service 2024, entire).

The conservation strategy is the outline for the long-term viability of the Canada lynx DPS. In developing our conservation strategy, we focused on maintaining sufficient representation

and redundancy within the DPS by maintaining or improving the resiliency of lynx populations and conserving their habitats. The conservation strategy includes the following:

(1) Maintenance or improvement of the current resiliency of the five breeding lynx populations (Maine, Minnesota, North Cascades, Northern Rocky Mountains, Southern Rocky Mountains) to preserve the redundancy and representation of the DPS.

(2) Identification and conservation of high-quality lynx habitat and potential climate refugia within the previously mentioned five areas.

(3) Continued implementation and refinement of regulatory mechanisms and other conservation measures that incorporate the best available science to ensure the conservation of lynx habitats and populations.

(4) Populations distributed across the three large representative units in the DPS range (Northeast, Midwest, and West), and

(5) Habitat that:

(a) Supports high- or moderately-resilient resident lynx breeding populations.

(b) Supports connectivity between DPS populations and the core of the lynx's range in Canada.

(c) Provides the climatic conditions that support resident populations.

(d) Provides the boreal forest vegetation communities that support high densities of snowshoe hare and resident lynx breeding populations.

(e) Is potentially capable of providing climate refugia.

Criteria Used To Identify Critical Habitat

As required by section 4(b)(2) of the Act, we use the best scientific data available to designate critical habitat. In accordance with the Act and our implementing regulations at 50 CFR 424.12(b), we review available information pertaining to the habitat requirements of the species and identify specific areas within the geographical area occupied by the species at the time of listing and any specific areas outside the geographical area occupied by the species to be considered for designation as critical habitat. The occupied areas identified encompass the varying habitat types and distribution of lynx and provide sufficient habitat to allow for maintaining the populations. We are not designating any areas outside the geographical area occupied by the species at the time of listing because we have not identified any unoccupied areas that meet the definition of critical habitat. Designating areas outside the geographical area occupied by lynx at the time of listing would not improve the likelihood of recovery (the point at which the protections of the Act are no longer necessary and delisting the DPS would be appropriate). The recovery plan did not identify any areas that were not occupied at the time of listing as necessary for recovery. Thus, because these areas are not essential for the conservation and recovery of the lynx DPS, designating them would not comply with the Act.

We considered connectivity to be important factors for the DPS, as populations in the lower 48 states function as a metapopulation—a network of local populations that exchanges individuals but has somewhat independent dynamics. To maintain genetic diversity and resilience, connectivity is important both within the SSA units (*i.e.,* intra-unit connectivity) and between units (*i.e.,* inter-unit connectivity). Population connectivity has two components: genetic and demographic. Genetic connectivity is defined as the degree to which gene flow affects evolutionary processes within populations, and demographic connectivity is the relative contribution of dispersal to population dynamics (Lowe and Allendorf 2010, p. 3039). Both are influenced by inter- and intra- unit movement of individuals. Within a population unit, connectivity is important for accessing daily resources, finding mates, and shifting home ranges to respond to disturbances or changing habitats. While lynx primarily use boreal forest habitats for feeding and other daily life functions, those habitats are often naturally fragmented in the range of the DPS, separated by drier forest types, meadows, mountain peaks, and other habitats. The WLBT (2022) tier 1 polygons capture some of those other habitats where they are interspersed with boreal forest habitats, and thus we considered those other habitats to be part of the critical habitat for lynx to support intra-unit connectivity. However, given the well-documented ability of lynx to make long journeys across both suitable and unsuitable habitats (Service 2017, p. 40–43; ILBT 2013, p. 8, Ivan 2012 and 2017, entire) and the lack of evidence that human-caused factors have significantly reduced the ability of lynx to disperse (Arnold et al. 2025, entire; ILBT 2013, p. 34), no additional management constraints or restrictions would be placed on those other habitats within the critical habitat. Between population units, dispersal and transitory movements can provide genetic and demographic connectivity. Given that lynx are adept dispersers and given the vast array of habitats used during transitory and dispersal movements (*e.g.,* Ivan 2012 and 2017, entire; Squires and Oakleaf 2005, entire; Squires 2025, unpublished data), we did not identify any specific habitats or areas to designate as critical habitat.

The 2024 recovery plan for the Canada Lynx DPS identifies the maintenance of multiple, resilient populations across the DPS's range as essential for recovery. The plan emphasizes that populations occupying areas smaller than 483 mi^2 (1,250 km^2) are unlikely to be demographically or genetically viable in the long term, due to increased risks of stochastic events, genetic drift, and local extirpation. By using 483 mi^2 (1,250 km^2) as a minimum area criterion for critical habitat, the Service ensures that designated units are large enough to support the ecological processes necessary for population persistence and recovery, consistent with the recovery plan's goals for redundancy, resiliency, and representation across the DPS.

In previous critical habitat designations, we identified lynx habitat using expert judgement of vegetation and habitat types and elevation thresholds. For the western United States, we now have new, state-of-the-art lynx habitat models (Olson et al. 2021, entire; Squires et al. 2024, entire) based on the best empirical data of lynx locations across the western United States. The models accurately map environmental covariates (abiotic and biotic features) found at lynx locations, as compared to a random sample of background locations, within and outside of known home ranges. These models were built using data from thousands of verified fine-scale GPS locations of radio-marked resident lynx in Montana, Washington, Wyoming, and Colorado. Additionally, the models were tested and verified using location data withheld from building the models and incidental lynx occurrence data that included locations within home ranges and locations outside of home ranges. The models cover the western extent of the Canada lynx DPS range and indicate the relative likelihood of lynx presence in Washington, Idaho, western Montana, northwestern and south-central Wyoming, northeastern Utah, western Colorado, and northern New Mexico.

These models and their use to identify high-quality lynx habitat were documented in the WLBT report (2022, entire). The WLBT included species experts from the Service, USFS, and BLM, as well as scientists from the USDA Rocky Mountain Research

Station who led the development of the new habitat models. The interagency team used a science-based approach to identify key habitat areas from the models and developed a tiered approach to model outputs by evaluating the extent and proportion of modeled high-quality habitat. The WLBT framework underwent review from lynx researchers (WLBT 2022, p. 45–47).

The WLBT used the models to identify areas of high conservation value for lynx where high-quality habitat is abundant, and further assigned those areas into three tiers. Tier 1 polygons provide large and well-connected areas with high proportions of high-quality habitat and support long-term lynx occupancy and reproduction. Tier 2 polygons contain lower proportions of high-quality habitat, and they provide habitat for expansion or redundant habitat areas. In tier 2, the objective is to provide habitat to support periodic to regular occupancy, which may include reproductively successful individuals. Tier 3 areas are generally smaller islands of habitat that may function as ''stepping stones for dispersing lynx; these areas may be important to maintain connectivity and facilitate dispersal across the landscape and among tiers.

The WLBT mapping effort and underlying SDMs identify habitat with the climatic and vegetation characteristics necessary to support lynx residency and reproduction. This includes boreal and subalpine forested habitats with a mosaic of variable forest successional and structural stages, dense horizontal cover, persistent snow, and moderate to high snowshoe hare densities, set within a matrix of other habitat types that provide areas for connectivity. Our proposed critical habitat maps relied heavily on the tier 1 areas described by the WLBT (2022, p. 23), and we made changes to the proposed critical habitat maps based on comments received, as detailed in *Criteria Used To Identify Critical Habitat.* When designating critical habitat, we are not required to designate all areas where a species occurs. We chose to focus on tier 1 polygons because these are the areas that have at least 50 percent of the polygon in the highest quality habitat. Tier 1 habitat is the most valuable to long-term lynx occupancy and reproduction and sufficient to provide for the conservation of the Canada lynx DPS. We did not use tier 2 or 3 polygons because those areas have lower proportions of high-quality lynx habitat; thus, they are not likely to support long-term occupancy and reproduction.

Following the public comment period on our proposed rule, we reviewed all of the proposed critical habitat polygons. We removed some polygons entirely, and we refined the boundaries of several proposed critical habitat units. These changes were made to the Service's critical habitat boundaries, not to the original WLBT polygons.

In Unit 3, we removed some areas from the final critical habitat designation that lacked evidence of regular lynx reproduction, and they also lacked adequate size and close proximity to other larger areas of modeled high-quality habitat with known persistent occupancy and reproduction; these include the Lolo Pass polygon and the 3 Selkirk Mountains polygons. These polygons are all smaller than 483 mi^2 (1,250 km^2), both individually and when combined, which is the minimum area thought necessary to support a resilient lynx population as identified in the SSA report addendum (Service 2023, pp. 50–51). We retained a few smaller polygons where they exist within close proximity (<10 mi or 16 km) of other large tier 1 areas (such that in combination with those larger areas they do provide habitat areas greater than or equal to 483 mi^2 (1,250 km^2)) and have known persistent lynx residency and reproduction (*i.e.,* the Garnet Range and the Dalton Mountain areas in Unit 3).

We also refined the boundaries of the critical habitat in a few areas to better align with likely habitat from the Olson et al. (2021, entire) model outputs (*i.e.,* the 95 percent withheld threshold that the WLBT used), trimming out edge areas of low or moderate probability habitat where vegetation types are dry or unsuitable. We did not remove any patches of dry forest, meadows, or rocky areas within the interior of critical habitat polygons, in an effort to acknowledge the role those areas likely play in providing within-home range and between-home range connectivity. We also added additional area onto two polygons in two locations: southwest of Seeley Lake, Montana, and in the northern Swan Range in Montana. In these areas, the best available information—such as lynx detections, known family group use, or lynx movement data—showed that high-quality or well used habitat exists in areas with some likely lynx habitat. In several places, we chose *not* to make any changes to the proposed polygons where doing so would contradict localized knowledge, collar data, or Resource Selection Function (RSF) models (*e.g.,* Holbrook 2017, entire; Squires 2013, entire). Collectively, these edits refined our critical habitat polygon boundaries to reflect high-quality, regularly used, and ecologically supported lynx habitat.

In Unit 5, the GYA, we removed all of the areas that were included in the proposed rule, and we did not add any areas, resulting in no areas of designated critical habitat in the GYA. Although habitat models identify portions of the GYA—such as the Wyoming Range and areas around Union and Togwotee Pass—as having some potential habitat, and the WLBT identified those areas as tier 1, historical and contemporary data indicate only intermittent use and lack of a persistent breeding population in those areas or any other areas of the GYA, and recent State and Federal surveys have repeatedly failed to detect lynx populations in the region. The absence of a persistent breeding population for at least the past 30 years or more indicates that the GYA does not contain the physical or biological features (PBFs) essential to lynx conservation—most notably, PBF 1—the presence of snowshoe hares that support lynx residency and reproduction over time, and PBF 5—suitable habitat enough to support a persistent breeding population.

In Unit 6, the Service discovered that the WLBT had relied on an earlier version of the Southern Rockies lynx habitat model (cited in WLBT 2022 as Squires et al. in prep.), to develop the tier polygons in the Southern Rockies. We chose to re-map polygons in the Southern Rockies using the final habitat model (published as Squires et al. 2024, entire) and using the same delineation process originally applied by WLBT to delineate new polygons that captured the substantial areas of likely lynx habitat. This process produced six revised polygons for the Southern Rockies. Two polygons fell within WLBT's original tier 2 areas, were smaller than 483 mi^2 (1,250 km^2), and lacked confirmed persistent occupancy or reproduction. Thus, we treated those the same as the original tier 2 areas and did not include them in the critical habitat designation. The remaining four polygons fell within WLBT tier 1 areas; expert review confirmed that three adjacent northern polygons function ecologically as a single unit despite their separation in the final model, and the southernmost San Juans polygon reflects the most persistent and well-documented lynx use since reintroduction. Therefore, the critical habitat designation for the Southern Rockies includes the four revised polygons occurring within the original WLBT tier 1 areas.

These polygons were then reviewed by Service biologists, using the best

available information, to ensure that all polygons have the PBFs essential to Canada lynx. These features include: (1) presence of snowshoe hares that support lynx residency and reproduction over time within a mosaic of boreal/subalpine forest structural stages that includes snowshoe hare habitat with dense horizontal cover at ground- or snow-level; (2) winter conditions that provide and maintain deep persistent unconsolidated (fluffy) snow; (3) presence of denning structures, including downed trees, root wads, and accumulations of coarse woody debris; (4) habitat types, such as dry forest or meadows, that are between boreal forest patches and are likely to be used by lynx traveling between those patches within and among home ranges; and (5) landscapes with suitable habitat large enough (483 mi^2 (greater than or equal to 1,250 km^2)) to support breeding populations.

When determining critical habitat boundaries, we made an effort to avoid including developed areas because such lands lack physical or biological features necessary for lynx. We could not map critical habitat at a granular scale in order to exclude each and every developed area or other areas that are unlikely to contain the PBFs. The scale of the maps we prepared under the parameters for publication within the Code of Federal Regulations may not reflect the exclusion of such developed lands. Areas within the boundaries of this final critical habitat designation that do not include the PBFs necessary for lynx and are not designated as critical habitat include: lands covered by buildings, houses, pavement, and other structures; paved highways and roads; active mines and existing mining infrastructure; existing developed ski runs and tree islands, ski lifts, and associated ski area infrastructure and buildings; and irrigation infrastructure. Any such lands inadvertently left inside critical habitat boundaries shown on the maps of this rule have been excluded by text in the final rule and are not designated as critical habitat. Therefore, a Federal action involving these lands would not trigger section 7 consultation with respect to critical habitat and the requirement of no adverse modification unless the specific action would affect the physical or biological features in the adjacent critical habitat.

The critical habitat designation is defined by the map or maps, as modified by any accompanying regulatory text, presented at the end of this document under Regulation Promulgation. We include more detailed information on the boundaries of the critical habitat designation in the preamble of this document. We will make the coordinates or plot points or both on which each map is based available to the public on *https://www.regulations.gov* at Docket No. FWS–RX–ES–2024–0142, and on our internet site: *https://www.fws.gov/species/canada-lynx-lynx-canadensis.*

Final Critical Habitat Designation

Critical habitat was last designated for the Canada lynx DPS in 2014 and included five units in the contiguous United States (79 FR 54782, September 12, 2014). We are revising critical habitat for the Canada lynx in the western United States to fulfill our obligations under a settlement agreement to address issues raised by the District Court of Montana regarding our previous critical habitat designation in 2014. Existing critical habitat units 1 (Maine) and 2 (Minnesota) were not implicated in the court order; we also did not find new habitat modeling or information that would necessitate a reassessment of critical habitat for those areas. Thus, the existing critical habitat units 1 (Maine) and 2 (Minnesota) are not addressed in this revision to lynx critical habitat and remain in place as described in the 2014 critical habitat final rule. We did, however, take a comprehensive look at critical habitat for lynx in the western United States, considering new science that was not available at the time of the 2014 critical habitat revision. The critical habitat areas we describe below constitute our current best assessment of areas that meet the definition of critical habitat for lynx in the western United States. The three areas we designate as critical habitat are: (1) Unit 3: Northern Rockies; (2) Unit 4: North Cascades; and (3) Unit 6: Southern Rockies. Table 1, below, shows the critical habitat units and the approximate area of each unit. All units were occupied at the time of listing in 2000. Table 1 lists the critical habitat units and their approximate sizes broken down by major land ownership.

TABLE 1—WESTERN CRITICAL HABITAT UNITS FOR CANADA LYNX (MI^2 (KM^2))

[Area estimates reflect all land within critical habitat unit boundaries]

Critical habitat unit	Federal	State	Private	Other	Total
3. Northern Rockies	6,911 (17,900)	1 (2)	6 (16)	0 (0)	6,918 (17,918)
4. North Cascades	2,072 (5,367)	1 (1)	3 (7)	0 (0)	2,076 (5,375)
6. Southern Rockies	4,898 (12,685)	6 (16)	126 (326)	8 (20)	5,038 (13,047)
Total	13,881 (35,952)	8 (19)	135 (349)	8 (20)	14,030 (36,340)

Note: Area sizes may not sum due to rounding. Numbers are calculated using the U. S. Geological Survey's (USGS) Protected Areas Database for the United States 3.0 dataset (USGS 2022) supplemented with the BLM 2023 Surface Management Agency dataset (BLM 2023).

We present brief descriptions of all units, and reasons why they meet the definition of critical habitat for the Canada lynx DPS below.

Unit 3: Northern Rockies

Unit 3 consists of 6,918 mi^2 (17,900 km^2) located in northwestern Montana in portions of Flathead, Glacier, Granite, Lake, Lewis and Clark, Lincoln, Missoula, Pondera, Powell, and Teton Counties and northern Idaho in portions of Boundary County. The revision represents a 2,865-mi^2 (7,419-km^2) reduction from the 2014 designation for this unit (approximately 29 percent reduction), although it includes new areas of critical habitat in northern Idaho. This unit was occupied by lynx at the time of listing and is currently occupied by the species. Lynx are known to be widely distributed throughout this unit and breeding has been documented in multiple locations. This unit supports a resident population with regular occupancy and reproduction. The historical and current sizes of the resident lynx population in this unit are unknown, but it is currently thought to be capable of supporting 200 to 300 lynx home ranges (Service 2017, p. 110). This unit is directly connected to lynx habitats and populations in southwestern Alberta and southeastern British Columbia, Canada. Lynx in this unit represent the southern extent of a larger cross-border population, most of which occurs in western Canada.

Land ownership within the unit is over 99 percent Federal, with less than one 1 percent state or private. Federal lands in this unit include National Forest System lands within the Kootenai, Flathead, and Helena-Lewis and Clark National Forests in Montana and the Idaho Panhandle National Forest in Idaho; National Park Service lands in Glacier National Park; and BLM lands in the Garnet Resource Area. Most state lands in this unit were excluded, as explained in *Exclusions Based on Other Relevant Impacts* section below, including lands managed by the Montana DNRC and MTFWP. Tribal lands within this unit were also excluded, including parts of the Confederated Salish and Kootenai Tribes Flathead Reservation and the Blackfeet Reservation, both in Montana.

The PBFs essential to the conservation of the Canada lynx in this unit may require special management considerations or protections to address activities that may result in removal or reduction of boreal/subalpine forest conditions that support Canada lynx and snowshoe hares. Such activities may include, but are not limited to, forestry and fuel reduction; efforts to reduce extensive high-severity fires in lynx habitat; highway construction and maintenance; and commercial, recreational, and energy/mineral development. These activities may remove or reduce boreal forest in a manner that impacts snowshoe hare densities, the size of suitable habitat patches to support breeding lynx populations, and permeability of landscapes for lynx daily movements and dispersal in this unit. Climate change is expected to negatively impact the duration of deep fluffy snow conditions favorable to lynx in this unit over time.

Unit 4: North Cascades

Unit 4 consists of 2,076 mi^2 (5,375 km^2) located in north-central Washington in portions of northern Chelan, Okanogan, and eastern Skagit and Whatcom Counties. The revision represents a 241-mi^2 (624-km^2; 13 percent) increase from the 2014 designation for this unit. Most of the increase is on the western side of the unit, in the North Cascades National Park. This unit was occupied by lynx at the time of listing and is currently occupied by the species. Lynx are known to be distributed throughout much of this unit, and breeding has been documented. The Service estimates that this unit is potentially capable of supporting a resident population of 90 to 120 lynx, but extensive large wildfires in roughly half of lynx habitat over the past 15 to 20 years are thought to have reduced its carrying capacity commensurately (but perhaps temporarily). Nonetheless, a systematic lynx DNA collection effort between 2018 and 2024 documented 73 individual lynx in north central Washington, including 40 males and 33 females (Akins and Preckler-Quisquater 2025, unpublished report). This unit is directly connected to lynx habitats and populations in southern British Columbia, Canada. Lynx in this unit represent the southern extent of a larger cross-border population, most of which occurs in western Canada.

Land ownership within the unit is over 99 percent Federal, with small parcels of private land that represents less than one-half of 1 percent of the unit. The 2,072 mi^2 (5,367 km^2) of Federal lands in the unit include mostly lands within the Okanogan-Wenatchee National Forest and a small amount of North Cascades National Park. It also includes a small area of state land on the Methow Wildlife Area, but the majority of state land was excluded, including State Forest lands managed by the WDNR (see *Exclusions Based on Other Relevant Impacts* section below).

The PBFs essential to the conservation of the Canada lynx in this unit may require special management considerations or protections to address activities that may result in removal or reduction of boreal/subalpine forest conditions that support Canada lynx and snowshoe hares. Such activities may include, but are not limited to, timber and fuels management; efforts to reduce extensive high-intensity wildfires; highway construction and maintenance; and commercial, recreational, and energy/mineral development. These activities may remove or reduce boreal forest in a manner that impacts snowshoe hare densities, the size of suitable habitat patches to support breeding lynx populations, and permeability of landscapes for lynx daily movements and dispersal in this unit. Climate change is expected to negatively impact the duration of deep fluffy snow conditions favorable to lynx in this unit over time.

Unit 6: Southern Rockies

Although there is no critical habitat Unit 5 in this designation, other documents including the SSA and SSA Addendum and the recovery plan all refer to the Southern Rockies as Unit 6 (Service 2017, entire; Service 2023, entire; Service 2024, entire). Thus, we have retained that nomenclature in this critical habitat designation to retain consistency. Unit 6 consists of 5,038 mi^2 (13,047 km^2) located in west-central and southwestern Colorado in portions of Archuleta, Chaffee, Clear Creek, Conejos, Dolores, Eagle, Gilpin, Grand, Gunnison, Hinsdale, La Plata, Lake, Mineral, Montezuma, Ouray, Park, Pitkin, Rio Grande, San Juan, San Miguel, and Summit Counties. Critical habitat was not previously designated in the Southern Rockies. At the time of listing, this unit was occupied by lynx translocated from Canada and Alaska, and it is currently occupied by the descendants of those released lynx. It is uncertain whether this unit historically supported a resident population or if lynx presence was naturally ephemeral and intermittent (Service 2017, p. 43, 112).

The area currently supports a resident breeding population that is the result of the State of Colorado's Canada Lynx Reintroduction Program, which included the 1999 to 2006 translocations of 218 lynx from Canada and Alaska into the San Juan Mountains in southwestern Colorado, with continued lynx occurrence and reproduction documented annually since then. Lynx researchers with Colorado Parks and Wildlife estimate the current size of the population at 75 to 150 resident lynx. This unit is not directly connected to lynx habitats and populations elsewhere in the DPS range or in the core of the species' range in western Canada; however, historical records suggest that dispersing lynx associated with cyclic irruptions of lynx from Canada into the northern contiguous U.S. occasionally reached the Southern Rockies. Some of the lynx released into Colorado dispersed into surrounding states, with some traveling into the GYA, Montana, Idaho, Utah, Nebraska, and New Mexico. The recovery plan for lynx (Service 2024, entire) identifies maintaining a population with moderate resiliency for the Colorado population as a component of the recovery strategy, as that population adds to redundancy and resiliency for the DPS.

Land ownership within the unit is approximately 97 percent Federal, less than 3 percent private, and less than 1 percent State and local government. Most of the Federal lands (95 percent) occur on National Forests, including the Arapaho, Gunnison, Pike, Rio Grande, Roosevelt, San Isabel, San Juan, Uncompahgre, and White River National Forests in Colorado. Approximately 5 percent of Federal lands occur on BLM lands and smaller parcels of Service and Bureau of Reclamation lands.

The PBFs essential to the conservation of the Canada lynx in this

unit may require special management considerations or protections to address activities that may result in removal or reduction of boreal/subalpine forest conditions that support lynx and snowshoe hare. Such activities may include, but are not limited to, road construction and maintenance and commercial, recreational, and energy/mineral development. These activities may remove or reduce boreal forest in a manner that impacts snowshoe hare densities, the size of suitable habitat patches to support breeding lynx populations, and permeability of landscapes for lynx daily movements and dispersal in this unit. Climate change is expected to negatively impact the duration of snow conditions favorable to lynx in this unit over time; however, this unit is among the most resilient to climate change given the geography and high altitudes available for subalpine forests to respond to various climatic scenarios (Service 2023, pp. 60–70).

Effects of Critical Habitat Designation

Section 7 Consultation

Section 7(a)(2) of the Act requires Federal agencies, including the Service, to ensure that any action they authorize, fund, or carry out is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of designated critical habitat of such species. Destruction or adverse modification means a direct or indirect alteration that appreciably diminishes the value of critical habitat for the conservation of a listed species. Such alterations may include, but are not limited to, those that alter the physical or biological features essential to the conservation of a species or that preclude or significantly delay development of such features (50 CFR 402.02). Compliance with the requirements of section 7(a)(2) is documented through our issuance of:

(1) A concurrence letter for Federal actions that may affect, but are not likely to adversely affect, listed species or critical habitat; or

(2) A biological opinion for Federal actions that may affect, and are likely to adversely affect, listed species or critical habitat.

When we issue a biological opinion concluding that a project is likely to jeopardize the continued existence of a listed species and/or destroy or adversely modify critical habitat, we provide reasonable and prudent alternatives to the project, if any are identifiable, that would avoid the likelihood of jeopardy and/or destruction or adverse modification of critical habitat. We define ''reasonable and prudent alternatives'' (at 50 CFR 402.02) as alternative actions identified during formal consultation that:

(1) Can be implemented in a manner consistent with the intended purpose of the action,

(2) Can be implemented consistent with the scope of the Federal agency's legal authority and jurisdiction,

(3) Are economically and technologically feasible, and

(4) Would, in the Service Director's opinion, avoid the likelihood of jeopardizing the continued existence of the listed species or avoid the likelihood of destroying or adversely modifying critical habitat.

Reasonable and prudent alternatives can vary from slight project modifications to extensive redesign or relocation of the project. Costs associated with implementing a reasonable and prudent alternative are similarly variable.

Regulations at 50 CFR 402.16 set forth requirements for Federal agencies to reinitiate consultation. Reinitiation of consultation is required and shall be requested by the Federal agency or by the Service, where discretionary Federal involvement or control over the action has been retained or is authorized by law and: (1) If the amount or extent of taking specified in the incidental take statement is exceeded; (2) if new information reveals effects of the action that may affect listed species or critical habitat in a manner or to an extent not previously considered; (3) if the identified action is subsequently modified in a manner that causes an effect to the listed species or critical habitat that was not considered in the biological opinion or written concurrence; or (4) if a new species is listed or critical habitat designated that may be affected by the identified action. As provided in 50 CFR 402.16, the requirement to reinitiate consultations for new species listings or critical habitat designation does not apply to certain agency actions (*e.g.,* certain land management plans issued by the BLM or USFS).

Due to the ephemeral and dynamic nature of some of the PBFs (*e.g.* snow, mosaic structural stages, etc.) we do not expect all PBFs to be present at all times. Project proponents or action agencies can use qualitative or quantitative measures to determine the functionality of the PBFs and proposed project related changes. The Service will evaluate proposed actions with a Federal nexus occurring within critical habitat based on whether or not they maintain or contribute to the overall functionality of the critical habitat.

Destruction or Adverse Modification of Critical Habitat

The key factor related to the destruction or adverse modification determination is whether implementation of the proposed Federal action directly or indirectly alters the designated critical habitat in a way that appreciably diminishes the value of the critical habitat for the conservation of the listed species (*i.e.,* Canada lynx DPS). As discussed above, the role of critical habitat is to support physical or biological features essential to the conservation of a listed species and provide for the conservation of the species.

Section 4(b)(8) of the Act requires that our proposed or final regulations include, to the maximum extent practicable, a brief description and evaluation of those activities (whether public or private) which, in the opinion of the Secretary, if undertaken may adversely modify critical habitat, or may be affected by such designation. Activities that may be affected by designation of critical habitat for the Canada lynx include those that may affect the physical or biological features of the Canda lynx' critical habitat (see Physical or Biological Features Essential to the Conservation of the Species, above). Importantly, determinations of destruction or adverse modification consider whether the proposed action is likely to appreciably diminish the value of the critical habitat for the conservation of lynx. Adverse effects to one or more PBFs do not necessarily constitute destruction or adverse modification of the critical habitat.

Exemptions

Application of Section 4(a)(3) of the Act

Section 4(a)(3)(B)(i) of the Act provides that the Secretary shall not designate as critical habitat any lands or other geographical areas owned or controlled by the Department of Defense (DoD), or designated for its use, that are subject to an integrated natural resources management plan (INRMP) prepared under section 101 of the Sikes Act Improvement Act of 1997 (16 U.S.C. 670a), if the Secretary determines in writing that such plan provides a benefit to the species for which critical habitat is proposed for designation. There are no DoD lands with a completed INRMP within the final critical habitat designation.

Consideration of Impacts Under Section 4(b)(2) of the Act

Section 4(b)(2) of the Act states that the Secretary shall designate and make revisions to critical habitat on the basis of the best available scientific data after taking into consideration the economic impact, the impact on national security, and any other relevant impact of specifying any particular area as critical habitat. The Secretary may exclude any area from critical habitat if the benefits of exclusion outweigh those of inclusion, so long as exclusion will not result in extinction of the species concerned. Exclusion decisions are governed by the regulations at 50 CFR 424.19 and the Policy Regarding Implementation of Section 4(b)(2) of the Endangered Species Act (hereafter, the ''2016 Policy;'' 81 FR 7226, February 11, 2016)—both of which were developed jointly with the National Marine Fisheries Service (NMFS). We also refer to a 2008 Department of the Interior Solicitor's opinion entitled, ''The Secretary's Authority to Exclude Areas from a Critical Habitat Designation under Section 4(b)(2) of the Endangered Species Act'' (M–37016). We explain each decision to exclude areas, as well as decisions not to exclude, to demonstrate that the decision is reasonable.

When evaluating the exclusion of a particular area from the designation, we identify the benefits of including the area in the designation, identify the benefits of excluding the area from the designation, and evaluate whether the benefits of exclusion outweigh the benefits of inclusion. If the analysis indicates that the benefits of exclusion outweigh the benefits of inclusion, the Secretary may exercise discretion to exclude the area only if such exclusion would not result in the extinction of the species. In making the determination to exclude a particular area, the statute on its face, as well as the legislative history, are clear that the Secretary has broad discretion regarding which factor(s) to use and how much weight to give to any factor. In this final rule, we explain any decision to exclude areas, as well as decisions not to exclude, to make clear the rational basis for our decision. We describe below the process that we undertook for deciding whether to exclude any areas—taking into consideration each category of impacts and our analysis of the relevant impacts.

Exclusions Based on Economic Impacts

Section 4(b)(2) of the Act and its implementing regulations require that we consider the economic impact that may result from a designation of critical habitat. In order to consider economic impacts, we prepared an IEM and screening analysis which, together with our narrative and interpretation of effects, we consider to be our economic analysis of the critical habitat designation and related factors (IEc 2024 and 2026, entire). The analysis, dated August 12, 2024, was made available for public review from November 29, 2024, through January 28, 2025. The economic analysis addressed probable economic impacts of critical habitat designation for the Canada lynx. Following the close of the comment period, we reviewed and evaluated all information submitted during the comment period that may pertain to our consideration of the probable incremental economic impacts of this critical habitat designation. Additional information relevant to the probable incremental economic impacts of critical habitat designation for the Canada lynx is summarized below and available in the screening analysis for the Canada lynx (IEc 2026, entire), available at *https://www.regulations.gov.*

The full description of the findings from the economic analysis is outlined in the proposed rule (89 FR 94656; November 29, 2024). We received an updated economic analysis on April 30, 2026, which incorporated changes made between the proposed and final rule and updated to 2026 dollars (IEc 2026, entire). The incremental effects of revising critical habitat for the Canada lynx are likely to be limited to changes in administrative effort to evaluate the potential for adverse modification of Canada lynx critical habitat. The entities most likely to incur incremental costs are parties who are required to conduct section 7 consultations, including Federal action agencies and, in some cases, third parties, most frequently State agencies or municipalities. This analysis finds that administrative costs and cost savings are on the order of $42,000 and $48,000 respectively, in a given year (2026 dollars). The expected net effect of revising critical habitat for the Canada lynx is a $5,200 decrease in administrative costs per year. Incremental economic benefits and forgone benefits are not anticipated. The economic analysis concludes that the revised rule for lynx critical habitat is unlikely to reach $100 million, which would make it a significant regulatory action under section 3(f)(1) of E.O. 12866.

Following the issuance of E.O. 14225 (*Immediate Expansion of American Timber Production*) and E.O. 14308 (*Empowering Commonsense Wildfire Prevention and Response*), the Service reviewed the revised critical habitat designation for Canada lynx to assess potential impacts in forested areas prioritized for timber production and wildfire mitigation. The E.O.s emphasize increasing domestic timber output and streamlining forest management. This critical habitat designation does not impart any restrictions on forest management activities. The designation does necessitate section 7 consultations for any actions, including timber and fuels, when there is a Federal nexus, to ensure the proposed action will not result in the destruction or adverse modification of the critical habitat. Approximately 52 percent of revised critical habitat overlaps with areas designated under the Forest Health and Fuels Emergency Situation Determination, where emergency authorities may be used to expedite forest health and fuels reduction projects, including emergency consultations.

Forest management activities, including timber harvest and wildfire risk reduction projects, can be beneficial tools for creating a mosaic of differing successional forest stages within lynx critical habitat (ILBT 2013, p. 91). Fuels reduction projects not only protect human infrastructure, they may also be designed to sustain high-quality lynx habitat by reducing the likelihood of extensive wildfire spread to mature forest areas of clynx habitat. Forest management can also create dense regenerating forest stands that support high hare densities as they regrow. All of these activities, when conducted strategically and informed by the best available science, can be a part of managing critical habitat for lynx.

The USFS has been consulting with the Service on projects affecting lynx critical habitat under the 2014 critical habitat designation on National Forests in units 3, 4, and 5. Thus, this revision is not expected to result in substantial changes for those National Forests in terms of consultations. In areas where critical habitat has not previously been designated (for example, National Forests in Colorado), the USFS will have to consider effects to critical habitat in addition to effects on the species and consult with the Service on projects that may affect the critical habitat. As a result, there will be incremental economic impacts resulting from the administrative costs associated with section 7 consultations that must include additional analysis for National Forests in Colorado. As such, the incremental economic impact of the designation is expected to be limited to minor administrative costs associated with section 7 consultation. Because this designation results in a 37 percent

decrease in critical habitat compared to the 2014 rule, administrative costs will be less in areas that are no longer designated.

As discussed above, we considered the economic impacts of the critical habitat designation, and the Secretary is not exercising his discretion to exclude any areas from this designation of critical habitat for the Canada lynx based on economic impacts.

Exclusions Based on Impacts on National Security and Homeland Security

In preparing this rule, we determined that there are no lands within the designated critical habitat for the Canada lynx that are owned or managed by the DoD or Department of Homeland Security, and, therefore, we anticipate no impact on national security or homeland security. We did not receive any additional information during the public comment period for the proposed critical habitat designation regarding impacts of the designation on national security or homeland security that would support excluding any specific areas from the final critical habitat designation under the authority of section 4(b)(2) of the Act and our implementing regulations at 50 CFR 424.19, as well as the 2016 Policy.

Exclusions Based on Other Relevant Impacts

Under section 4(b)(2) of the Act, we consider any other relevant impacts, in addition to economic impacts and impacts on national security as discussed above. To identify other relevant impacts that may affect the exclusion analysis, we consider a number of factors, including whether there are approved and permitted conservation agreements or plans covering the species in the area such as safe harbor agreements (SHAs), candidate conservation agreements with assurances (CCAAs), ''conservation benefit agreements'' or ''conservation agreements'' (CBAs) (CBAs are a new type of agreement replacing SHAs and CCAAs in use after April 2024 (89 FR 26070; April 12, 2024)) or HCPs—or whether there are non-permitted conservation agreements and partnerships that would be encouraged by designation of, or exclusion from, critical habitat. In addition, we look at whether Tribal conservation plans or partnerships, Tribal resources, or government-to-government relationships of the United States with Tribal entities may be affected by the designation. We also consider any State, local, social, or other impacts that might occur because of the designation.

When identifying the benefits of inclusion for an area, we consider the additional regulatory benefits that area would receive due to the protection from destruction or adverse modification as a result of actions with a Federal nexus, the educational benefits of mapping essential habitat for recovery of the listed species, and any benefits that may result from a designation due to State or Federal laws that may apply to critical habitat. In the case of the Canada lynx, the benefits of critical habitat include public awareness of the presence of Canada lynx and the importance of habitat protection.

When identifying the benefits of exclusion, we consider, among other things, whether exclusion of a specific area is likely to result in conservation, or in the continuation, strengthening, or encouragement of partnerships. Additionally, continued implementation of an ongoing management plan that provides equal to or more conservation than a critical habitat designation would reduce the benefits of including that specific area in the critical habitat designation.

We evaluate the existence of a conservation plan when considering the benefits of inclusion. We consider a variety of factors, including, but not limited to, whether the plan is finalized; how it provides for the conservation of the essential physical or biological features; whether there is a reasonable expectation that the conservation management strategies and actions contained in a management plan will be implemented into the future; whether the conservation strategies in the plan are likely to be effective; and whether the plan contains a monitoring program or adaptive management to ensure that the conservation measures are effective and can be adapted in the future in response to new information.

After identifying the benefits of inclusion and the benefits of exclusion, we carefully weigh the two sides to evaluate whether the benefits of exclusion outweigh those of inclusion. If our analysis indicates that the benefits of exclusion outweigh the benefits of inclusion, we then determine whether exclusion would result in extinction of the species. If exclusion of an area from critical habitat will result in extinction, we will not exclude it from the designation.

Based on the information provided by entities seeking exclusion, as well as additional public comments we received, and the best scientific data available, we evaluated whether certain lands in critical habitat Units 3, and 4 are appropriate for exclusion from the final designation under section 4(b)(2) of the Act. If our analysis indicates that the benefits of excluding lands from the final designation outweigh the benefits of designating those lands as critical habitat, then the Secretary may exercise their discretion to exclude the lands from the final designation. In the paragraphs below, we provide our analysis of the areas being excluded under section 4(b)(2) of the Act.

Private or Other Non-Federal Conservation Plans or Agreements Associated With Permits Under Section 10 of the Act

As mentioned above, as part of our 4(b)(2) analysis, we consider whether there are approved and permitted conservation agreements or plans covering the species in the area such as SHAs, CCAAs, CBAs or HCPs. Under sections 10(a)(1)(A) and 10(a)(1)(B) of the Act, non-Federal entities may develop these agreements or plans when they seek authorization for take that may otherwise be prohibited under section 9 through an enhancement of survival (EOS) or incidental take permit (ITP), respectively.

Property owners seeking an EOS permit collaborate with the Service to develop a CBA to support the application. The EOS permit authorizes take associated with implementing the agreement and ongoing land management activities that provide a net conservation benefit to the covered species. The CBA replaces two previous types of voluntary agreements (SHAs and CCAAs) going forward for new agreements after May 2024. However, permitted SHAs and CCAAs or those noticed in the **Federal Register** prior to May 2024 remain in effect.

For incidental take permits issued under section 10(a)(1)(B) of the Act, applicants are required to develop a conservation plan, more commonly known as an HCP, to support their application. ITPs authorize take that is incidental to, but not the purpose of, carrying out otherwise lawful activities provided that the impact of the taking is minimized and mitigated to the maximum extent practicable.

For both section 10(a)(1)(A) and 10(a)(1)(B) permits, we provide permittees with assurances. In the case of 10(a)(1)(A) permits, we may not require additional or different conservation measures to be undertaken by a permittee without the consent of the permittee. In the case of section 10(a)(1)(B), we will not impose further land-, water-, or resource-use restrictions, or require additional commitments of land, water, or finances, beyond those agreed to in the HCP.

We place great value on the partnerships that are developed during the preparation and implementation of conservation plans and agreements. In some cases, permittees agree to do more for the conservation of the species and their habitats on private lands than designation of critical habitat would provide alone.

When we undertake a discretionary section 4(b)(2) exclusion analysis based on conservation plans or agreements, we anticipate consistently excluding such areas if incidental take caused by the activities in those areas is covered by the permit under section 10 of the Act and the plan meets all of the following three factors (see the 2016 Policy for additional details. Because combining types of agreements such as SHAs and CCAAs into the term ''CBAs'' is a recent development (see 89 FR 26070, April 12, 2024), the 2016 Policy did not expressly reference CBAs. However, because CBAs replace CCAAs and SHAs moving forward we treat CBAs similarly to how we treat CCAA/SHA/HCPs described below:

a. The permittee is properly implementing the CCAA/SHA/HCP and is expected to continue to do so for the term of the agreement. A CCAA/SHA/HCP is properly implemented if the permittee is and has been fully implementing the commitments and provisions in the CCAA/SHA/HCP, implementing agreement, and permit.

b. The species for which critical habitat is being designated is a covered species in the CCAA/SHA/HCP, or very similar in its habitat requirements to a covered species. The recognition that the Services extend to such an agreement depends on the degree to which the conservation measures undertaken in the CCAA/SHA/HCP would also protect the habitat features of the similar species.

c. The CCAA/SHA/HCP specifically addresses that species' habitat and meets the conservation needs of the species in the planning area.

The Montana DNRC Forested Trust Lands HCP (Montana DNRC and USFWS 2010a, entire; 2010b as amended, entire; 2010c, entire) was permitted in 2012 under section 10(a)(1)(B) of the Act for a period of 50 years (Service 2011a, entire; 2011b, entire). The HCP was amended in 2018 to incorporate the terms of a 2015 Settlement Agreement on the Stillwater State Forest, and it was amended again in 2022 to add newly acquired forest lands. The permit has been amended twice to address issues and concerns and to add lands that the Montana DNRC acquired (Service 2018, entire; 2022, entire). The HCP covers about 889 mi^2 (2,561 km^2) of forested State trust lands in western Montana. The HCP trust lands occur on both blocked and scattered parcels within three Montana DNRC land offices: the Northwestern, Central, and Southwestern Land Offices. Blocked lands are primarily in three State Forests: Stillwater, Coal Creek, and Swan. Scattered parcels refer to all other HCP project lands outside of blocked lands. About 179 mi^2 (463 km^2) of lands managed in accordance with the HCP overlap with the area we proposed as lynx critical habitat in Unit 3. Most of those lands occur in areas identified in the HCP as high-priority areas for lynx conservation known as Lynx Management Areas (LMAs), with the remainder in scattered blocks (Montana DNRC and USFWS 2010b as amended, pp. 2–46–2–61).

The HCP covers activities that are primarily associated with commercial forest management and also includes grazing on forested trust lands. In addition to lynx, the HCP also covers grizzly bears (*Ursus arctos horribilis*) and bull trout (*Salvelinus confluentus*), both listed as threatened species under the Act, and two non-listed fish species, the westslope cutthroat trout (*Oncorhynchus clarkii lewisi*) and the Interior (Columbia River) redband trout (*Oncorhynchus mykiss gairdneri*).

The HCP includes a Lynx Conservation Strategy consisting of a suite of lynx habitat commitments that apply to all lands in the HCP project area supporting lynx habitat and additional commitments that apply to LMAs (Montana DNRC and USFWS 2010b as amended, pp. 2–46–2–61). The Montana DNRC has been implementing the Lynx Conservation Strategy since the first year of implementation in 2012 and reports to the Service annually (*e.g.,* Montana DNRC 2025, entire). The conservation commitments of the plan were officially added into the State's Administrative Rules for Forest Management in 2021, including the Lynx Conservation Strategy. The Lynx Conservation Strategy minimizes impacts of forest management activities on lynx and lynx critical habitat associated with the HCP, while allowing Montana DNRC to meet its fiduciary and stewardship trust responsibilities. Montana DNRC requested that lands subject to the HCP be excluded from critical habitat.

The goal of the Lynx Conservation Strategy is to support Federal lynx conservation efforts by managing for habitat elements important to lynx and their prey that contribute to the landscape-scale occurrence of lynx. HCP commitments in the strategy are associated with two types of habitat areas: (1) lynx habitat on lands within the HCP, and (2) lynx habitat on specific LMA subunits of HCP lands where resident lynx are known to occur or likely to occupy the area periodically. The HCP includes specific objectives to achieve this goal:

(1) Minimize potential for disturbance to known den sites;

(2) Map potential lynx winter foraging, summer foraging, and temporarily non-suitable habitats;

(3) Retain coarse woody debris and other denning attributes;

(4) Limit conversion of suitable lynx habitat to temporarily nonsuitable habitat per decade in LMAs;

(5) Ensure adequate amounts of foraging habitat are maintained in LMAs;

(6) Provide for habitat connectivity where vegetation and ownership patterns allow; and

(7) Maintain suitable lynx habitat on Montana DNRC scattered parcels outside LMAs (Montana DNRC and USFWS 2010b as amended, pp. 2–46–2–61).

The Lynx Conservation Strategy places an additional conservation emphasis on geographic areas most likely to remain high-priority areas to promote lynx conservation into the future (Montana DNRC and USFWS 2010b as amended, p. 2–53). These HCP lands occur in primary lynx habitat types, which are likely to provide snow depths and the vegetation species compositions necessary for preferred winter foraging conditions as well as ensure that the HCP helps support Federal efforts to provide adequate amounts of suitable lynx habitat. It also describes how Montana DNRC will monitor and evaluate the implementation and effectiveness of the HCP (Montana DNRC and USFWS 2010b as amended, pp. 4–27–4–37). Prior to the HCP, Montana DNRC had been managing for lynx diligently for over a decade under existing ARMs. The HCP and the ARMs will ensure that habitat features important for the conservation of lynx will occur on Montana DNRC's HCP-managed lands long term.

In the 2014 final revised critical habitat designation (79 FR 54782; September 12, 2014), we determined that the benefits of excluding lands managed in accordance with the Montana DNRC HCP outweighed the benefits of including them in the designation, and that doing so would not result in extinction of the species. We reaffirm that determination in this rule based on the analysis below.

Benefits of Inclusion—

On Montana DNRC HCP State lands, it is relatively infrequent for an action with a Federal nexus that triggers consultation under section 7 of the Act to occur; therefore, little benefit would be realized through section 7 consultation if these lands were included in the critical habitat designation. Some educational benefits of designating critical habitat for lynx on Montana DNRC HCP-managed lands may exist; however, we believe there is already substantial awareness of lynx conservation issues because of the following: lynx are listed under the Act and addressed by Montana State law, the public review process for the Montana DNRC HCP, Montana DNRC's forest management alignment with the recovery plan (Service 2024, entire), and lynx and snowshoe hare research and surveys being conducted by various entities within the state of Montana.

Benefits of Exclusion—

The Montana DNRC HCP provides substantial protection of features essential to the conservation of lynx on HCP-managed lands and provides a greater level of lynx management on these State lands than would be achieved with designation of critical habitat. Because the HCP provides lynx-specific objectives and strategies for different geographic locations, guidelines to meet the objectives, and monitoring to evaluate implementation and effectiveness, the measures contained in the HCP exceed any measures that might result from critical habitat designation. As a result, we do not anticipate any actions on these lands that would reduce the landscape-scale availability of important lynx and hare habitats or would otherwise diminish the conservation value of these lands to the lynx DPS.

The exclusion of Montana DNRC HCP-managed lands from critical habitat would help preserve the partnerships that have developed between the Service and the State through development and implementation of the HCP, the existing ARMs, and the intent of the State Forest Land Management Plan, all of which provide for long-term lynx conservation. Requiring additional redundant processes of permit applicants/holders who have already undergone an extensive Federal process to apply for a permit also appreciably undermines the benefit of HCPs for cooperators and reduces the certainty otherwise provided by a single clear plan.

Benefits of Exclusion Outweigh the Benefits of Inclusion—

We have evaluated the exclusion of approximately 179 mi^2 (463 km^2) of lands managed by the Montana DNRC in accordance with the HCP. We have determined that it is unlikely that including these HCP-managed areas in the final designation would lead to any changes in Montana DNRC management (*i.e.,* no additional conservation measures would be recommended to further avoid impacts to lynx and hare habitats); therefore, the benefits of inclusion are low.

We find that few, if any, additional conservation benefits would be realized through section 7 of the Act because activities with a Federal nexus are infrequent on these State lands. Additionally, the habitat conservation measures addressing the features essential to conservation of lynx are already being implemented on Montana DNRC lands under the HCP, have been demonstrated to be effective, will be in place until at least 2061, and are providing for the maintenance and protection of the PBFs essential to the conservation of the lynx DPS.

Therefore, we have determined that the benefits of excluding lands managed in accordance with the Montana DNRC HCP in Unit 3 outweigh the benefits of including these lands as critical habitat. Based on the above considerations, and consistent with the direction provided in section 4(b)(2) of the Act, we find that greater benefits to lynx are likely to be achieved by excluding Montana DNRC HCP lands from the final designation rather than by including them.

Exclusion Will Not Result in Extinction of the Species—

The Montana DNRC HCP (1) provides biologically meaningful and quantifiable measures for the long-term conservation of lynx and the PBFs essential to the species, (2) includes long-term certainty of implementation, (3) employs rigorous monitoring and reporting requirements, and (4) applies an adaptive management approach. Therefore, it is our determination that the exclusion of Montana DNRC HCP lands from critical habitat will not result in the extinction of the lynx DPS. We therefore exclude 179 mi^2 (463 km^2) of lands managed in accordance with the Montana DNRC HCP from Unit 3 of this final revised lynx critical habitat designation.

Non-Permitted Conservation Plans, Agreements, or Partnerships

Shown below is a non-exhaustive list of factors that we consider in evaluating how non-permitted plans or agreements affect the benefits of inclusion or exclusion. These are not required elements of plans or agreements. Rather, they are some of the factors we may consider, and not all of these factors apply to every plan or agreement. We also consider information provided by proponents of an exclusion on the non-permitted plan or agreement.

(i) The degree to which the record of the plan, or information provided by proponents of an exclusion, supports a conclusion that a critical habitat designation would impair the realization of the benefits expected from the plan, agreement, or partnership.

(ii) The extent of public participation in the development of the conservation plan.

(iii) The degree to which there has been agency review and required determinations (*e.g.,* State regulatory requirements), as necessary and appropriate.

(iv) Whether National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) was required.

(v) The demonstrated implementation and success of the chosen mechanism.

(vi) The degree to which the plan or agreement provides for the conservation of the physical or biological features that are essential to the conservation of the species.

(vii) Whether there is a reasonable expectation that the conservation management strategies and actions contained in a management plan or agreement will be implemented.

(viii) Whether the plan or agreement contains a monitoring program and adaptive management to ensure that the conservation measures are effective and can be modified in the future in response to new information.

The proposed critical habitat designation included areas that are covered by the following non-permitted plans providing for the conservation of the Canada lynx: (1) State of Montana Department of Fish, Wildlife, and Parks Wildlife Management Areas (MTFWP WMAs); (2) WDNR) Lynx Habitat Management Plan for DNR-managed Lands (WDNR LHMP); (3) Green Diamond Resource Company lands; and (4) Idaho State Trust lands.

MTFWP WMAs

The MTFWP manages multiple state-owned WMAs across the state of Montana. These WMAs are managed with wildlife and wildlife habitat conservation as the priority. Six WMAs are within the proposed critical habitat boundary, including Nevada Lake, North Swan Valley, Fish Creek, Blackfoot-Clearwater, Marshal Creek, and Bad Rock Canyon WMAs. Each WMA has a specific management plan that includes management strategies to benefit the diversity of wildlife species and their habitats, including Canada lynx. The state manages the WMAs with the goal of providing wildlife habitat. Some of the WMAs have seasonal

closures that restrict public access to the WMA during the winter and spring, which allows for undisturbed habitat during the breeding season for lynx and during winter and early spring when food sources are most limited. The Marshal Creek WMA, sits in the heart of some of the best lynx habitat in Montana (Olson et al. 2021, entire), and it has supported multiple reproductively successful female lynx (Kosterman et al. 2018, entire) and regular occupancy (Southwestern Crown Carnivore Monitoring Team 2023, p. 25–26) under the State's management. Management goals for the Marshal Creek WMA include permanently protecting and restoring critical wildlife habitat, and forest management projects are designed to recruit, enhance, and maintain multistoried mature mesic and boreal forest stands, which provides benefits to lynx (MTFWP 2010, entire). The Blackfoot-Clearwater WMA (BCWMA) has been managed by FWP since 1948 and has continued to support habitat for primarily big game but also for Canada lynx and other native species since that time (MTFWP 1989, 2025, entire). A recent forest management project proposed on the BCWMA was designed to reduce fuels and promote forest health and will result in overall benefits to lynx habitat. Other WMAs also provide habitat for lynx, and the MTFWP often confers with the Service regarding lynx management when planning land management projects in the WMAs. MTFWP requested that lands in the WMAs be excluded from critical habitat.

Benefits of Inclusion—

On MTFWP WMAs, it is relatively infrequent for an action with a Federal nexus that triggers consultation under section 7 of the Act to occur; therefore, little benefit would be realized through section 7 consultation if these lands were included in the critical habitat designation. Minimal educational benefits of designating critical habitat for lynx on MTFWP WMAs may exist. We believe there is already substantial awareness of lynx conservation issues because of the following: lynx are listed under the Act; the public review process MTFWP must undertake for habitat management activities that MTFWP proposes to conduct on its WMAs, including compliance with the Montana Environmental Protection Act (MEPA); the MTFWP's inclusion of lynx conservation considerations in their State Wildlife Action Plan (MTFWP, in prep); and lynx and snowshoe hare research and surveys being conducted by various entities within the state of Montana, including lynx occupancy surveys conducted by MTFWP.

Benefits of Exclusion—

The MTFWP's management that specifically prioritizes habitat for wildlife on WMAs provides a greater level of management for the lynx on these State lands than would be achieved with designation of critical habitat. Since WMAs are already under active management for wildlife habitat conservation, adding them to the critical habitat designation would be redundant and would not provide additional conservation benefits. While the consultation requirement associated with critical habitat on WMAs would only be triggered if there was a Federal nexus, such review would add little benefit, and it would require the use of resources to ensure regulatory compliance that could otherwise be used for on-the-ground management of targeted listed or sensitive species. Therefore, the benefits of exclusion include the reduction of administrative costs of section 7 compliance in the event that the MTFWP is conducting management actions on WMAs that have a Federal nexus that would trigger section 7 consultation, eliminating the need for a separate analysis of the effects of an action on lynx habitat.

Benefits of Exclusion Outweigh the Benefits of Inclusion—

We have evaluated the exclusion of approximately 43 mi^2 (113 km^2) of lands managed by the MTFWP as WMAs. We have determined that it is unlikely that including these areas in the final designation would lead to any changes in MTFWP management, as they manage these lands to conserve fish, wildlife, and plants and their habitats. Exclusion of these lands will not increase the likelihood that management activities would be proposed which would appreciably diminish the value of the habitat for the conservation of the species. Designation of critical habitat on WMAs would provide redundant, but no additional increment of conservation value for lynx in terms of management emphasis or public recognition or education by the MTFWP beyond what currently exists. We find that few, if any, additional conservation benefits would be realized through section 7 of the Act, because activities with a Federal nexus are infrequent on these State lands.

Therefore, we have determined that the benefits of excluding MTFWP WMAs outweigh the benefits of including these lands as critical habitat. Based on the above considerations, and consistent with the direction provided in section 4(b)(2) of the Act, we find that greater benefits to lynx are likely to be achieved by excluding MTFWP WMAs from the final designation rather than by including them.

Exclusion Will Not Result in Extinction of the Species—

The MTFWP WMAs represent a fraction of a percent of the lands with the PBFs necessary to support the lynx DPS. MTFWP's wildlife-focused management assures long-term certainty of adaptive management that benefits wildlife habitat by the state wildlife management agency. Therefore, it is our determination that the exclusion of MTFWP WMAs from critical habitat will not result in the extinction of the lynx DPS. We therefore exclude 43 mi^2 (113 km^2) of MTFWP WMAs from this final revised lynx critical habitat designation.

WDNR Lynx Habitat Management Plan for DNR-Managed Lands (WDNR LHMP)

The WDNR LHMP encompasses 197 mi^2 (510 km^2) of WDNR-managed lands distributed throughout north-central and northeastern Washington in areas delineated as Lynx Management Zones in the Washington State Lynx Recovery Plan (Stinson 2001, p. 39; WDNR 2006, pp. 5–13). Of the area covered by the plan, 166 mi^2 (430 km^2) overlaps the area proposed as critical habitat. The WDNR LHMP was finalized in 2006 and is a revision of the 1996 WDNR lynx plan. The 1996 plan was developed as a substitute for a species-specific state critical habitat designation required by Washington Forest Practices rules in response to the lynx being State-listed as threatened (WDNR 2006, p. 5). The 2006 WDNR LHMP included further provisions to avoid the incidental take of lynx (WDNR 2006, p. 6). WDNR is committed to following the LHMP until 2076, or until the lynx is delisted (WDNR 2006, p. 6). WDNR requested that lands subject to the LHMP be excluded from critical habitat.

The WDNR LHMP contains measures to guide WDNR in creating and preserving quality lynx habitat through its forest management activities. The objectives and strategies of the LHMP are developed for multiple planning scales (ecoprovince and ecodivision, Lynx Management Zone, Lynx Analysis Unit (LAU), and ecological community), and include:

(1) Encouraging genetic integrity at the species level by preventing bottlenecks between British Columbia and Washington by limiting size and shape of temporary non-habitat along the border and maintaining major routes of dispersal between British Columbia and Washington;

(2) Maintaining connectivity between subpopulations by maintaining

dispersal routes between and within zones and arranging timber harvest activities that result in temporary non-habitat patches among watersheds so that connectivity is maintained within each zone;

(3) Maintaining the integrity of requisite habitat types within individual home ranges by prolonging the persistence of snowshoe hare habitat that provides lynx forage and retaining coarse woody debris that provides denning habitat; and

(4) Maintaining connectivity between and integrity within home ranges used by individuals and/or family groups by providing a diversity of successional stages within each LAU and connecting denning sites and foraging sites with forested cover without isolating them with open areas by prolonging the persistence of snowshoe hare habitat and retaining coarse woody debris for denning sites (WDNR 2006, p. 29).

The LHMP identifies specific guidelines to achieve the objectives and strategies at each scale; it also describes how WDNR will monitor and evaluate the implementation and effectiveness of the LHMP (WDNR 2006, pp. 29–63). In response to several wildfires that reduced the availability of suitable lynx habitat in the Okanogan Lynx Management Zone, WDNR developed the Okanogan Lynx Management Zone Interim Management Guidelines and Recommendations (WDNR 2008, entire) to protect the remaining lynx habitat and assure no net loss of quality foraging habitat as a result of timber management activities. The Okanogan guidelines are considered a modification of the 2006 LHMP that will be implemented until WDNR, in conjunction with the Service and WDFW, have determined they are no longer necessary as additional conservation measures. WDNR has been managing for lynx for almost three decades, and lynx continue to be detected on and around the WDNR lands. A review of the WDNR monitoring report sent to the Service in March of 2025 demonstrates the WDNR has been following the LHMP (WDNR 2025, entire). The Service has concluded that the management strategies implemented are effective but could potentially be updated to incorporate newer science. The WDNR has committed to working with the Service to review newer science and determine what, if any, changes need to be made to the LHMP. They have committed to completing any updates to the LHMP by 2028 (Crump, C. in litt. 2025).

In the 2014 final revised critical habitat designation, (79 FR 54782; September 12, 20214), we determined that the benefits of excluding lands managed in accordance with the WDNR LHMP outweighed the benefits of including them in the designation, and that doing so would not result in extinction of the species. We reaffirm that determination in this rule based on the analysis below.

Benefits of Inclusion—

On WDNR State lands, it is uncommon for an action with a Federal nexus that triggers consultation under section 7 of the Act to occur; therefore, little benefit would be realized through section 7 consultation if these lands were included in the designation. Some educational benefits to designating critical habitat for lynx on WDNR-managed lands may exist; however, we believe there is already substantial awareness of lynx conservation issues because lynx are listed both under the Act and Washington State law; the public review process for the WDNR LHMP and the Washington State Lynx Recovery Plan (Stinson 2001, entire); lynx and snowshoe hare research that has been or is being conducted by the USFS Pacific Northwest Research Station, Washington State University, University of Washington, University of Montana, and Home Range Wildlife Research; and surveys that have been or are being conducted by WDNR, WDFW and the USFS.

Benefits of Exclusion—

The WDNR LHMP has provided substantial protection of features essential to the conservation of lynx on WDNR lands and has provided a greater level of lynx management on these State lands than would be achieved with the designation of critical habitat. Because the LHMP provides lynx-specific objectives and strategies for different planning scales, guidelines to meet the objectives, and monitoring to evaluate implementation and effectiveness, the measures contained in the WDNR LHMP exceed any measures that might result from critical habitat designation. As a result, we do not anticipate any actions on these lands that would destroy or adversely modify habitats essential to the conservation of the lynx DPS. The exclusion of WDNR lands from critical habitat would help preserve the partnerships that we have developed with the State of Washington through development and implementation of the 2006 LHMP and the original 1996 lynx plan, both of which provide for long-term lynx conservation.

Benefits of Exclusion Outweigh the Benefits of Inclusion—

We evaluated the exclusion of approximately 166 mi^2 (430 km^2) of lands managed by the WDNR. Including WDNR lands managed in accordance with the LHMP in the final designation would not lead to additional conservation measures being implemented because WDNR already manages in a way that provides benefits for lynx and snowshoe hare habitat; therefore, the benefits of inclusion are low. We find that few additional conservation benefits would be realized through section 7 of the Act because actions on these State lands rarely have a Federal nexus. The habitat conservation measures addressing the features essential to the conservation of lynx are already being implemented on WDNR lands under the WDNR LHMP, have a proven record of effectiveness, will be in place until at least 2076, and are providing for those PBFs essential to the conservation of lynx.

Therefore, we have determined that the benefits of excluding lands managed in accordance with the WDNR LHMP in Unit 4 outweigh the benefits of including these lands as critical habitat. Based on the above considerations, and consistent with the direction provided in section 4(b)(2) of the Act, we find that greater benefits to lynx are likely to be achieved by excluding WDNR LHMP lands from the final designation rather than by including them.

Exclusion Will Not Result in Extinction of the Species—

We have determined that the exclusion of lands managed in accordance with the WDNR LHMP from Unit 4 of this final revised critical habitat designation for the lynx DPS will not result in the extinction of the species because the WDNR LHMP provides for the conservation of lynx and the PBFs essential to the conservation of lynx. The jeopardy standard of section 7(a)(2) of the Act and routine implementation of conservation measures through the section 7 process also provide assurances that the subspecies will not go extinct. The protections afforded to the lynx under the jeopardy standard will remain in place for the areas excluded from revised critical habitat. We therefore exclude 166 mi^2 (430 km^2) of lands managed in accordance with the WDNR LHMP from Unit 4 of this final revised lynx critical habitat designation.

Green Diamond Resource Company Lands

The Green Diamond Resource Company (hereafter Green Diamond) is a family-owned business that owns and manages over 2,500 mi^2 (6,475 km^2) of land in California, Oregon, Washington, and Montana. Approximately 7 mi^2 (18

km²) of the proposed critical habitat overlaps Green Diamond lands in Montana in Unit 3. Green Diamond has a long history of developing and implementing long-term habitat and species conservation plans to guide its forest management practices. Green Diamond lands in northwestern Montana that overlap the tier 1 polygon are all under a permanent conservation easement that precludes development and protects wildlife habitat in perpetuity. The easement was completed in early 2025 through the Montana Great Outdoors Conservation Easement with MTFWP. This preclusion of development is particularly beneficial for maintaining the integrity of ecosystems that support lynx prey and other ecological functions. In the event the lands are sold, the easement stays with the land, ensuring conservation in perpetuity. The easement allows landowners to sustainably harvest wood products from the timberlands, and Green Diamond's lands are independently certified as sustainably managed under Sustainable Forestry Initiative (SFI) standards. The SFI mission is to promote sustainable forest management and conserve water quality, biodiversity, wildlife habitat, species at risk, and forests with exceptional conservation value. Green Diamond also manages its lands under an HCP designed to conserve native fishes until 2030. While not lynx-specific, the HCP provides incidental benefits for lynx by ensuring considerable riparian protection that provides dense forest for foraging and travel. Additionally, the HCP, conservation easement, and SFI certification demonstrate Green Diamond's commitment to conservation and offer incidental protections for lynx and their habitat.

Benefits of Inclusion—

The principal benefit of including an area in a critical habitat designation is the requirement of Federal agencies to ensure that actions they fund, authorize, or carry out are not likely to result in the destruction or adverse modification of any designated critical habitat, which is one of the regulatory standards of section 7(a)(2) of the Act, under which consultation is completed. A critical habitat designation may provide a regulatory benefit for lynx when there is a Federal nexus present for a project that may affect critical habitat; however, as Green Diamond lands are private property and consultations are expected to be rare, critical habitat is expected to have little effect due to the lack of a Federal nexus. Thus, the regulatory benefit is limited and dependence on private conservation actions is more important.

Another important benefit of including lands in a critical habitat designation is that it can serve to educate landowners, agencies, Tribes, and the public regarding the potential conservation value of an area and may help focus conservation efforts on areas of high value for certain species. Some educational benefits to designating critical habitat for lynx on Green Diamond lands may exist; however, we believe there is already substantial awareness of lynx conservation issues since lynx have been listed under the Act since 2000 and through the past critical habitat rules that designated critical habitat for the species on the lands now owned by Green Diamond, who purchased the lands knowing they were designated critical habitat. As a result, the educational value of the designation is minimal.

Benefits of Exclusion—

The benefits of excluding Green Diamond lands from the designation of critical habitat are substantial. The area will continue to provide conservation value to the species by continuing and strengthening our effective working relationship with Green Diamond to promote voluntary, proactive conservation and recovery of the lynx and its habitat on their lands. Green Diamond has indicated to the Service a desire to renew and expand the HCP that currently covers native fish and is valid until 2030, including an interest in adding lynx and other listed species to the HCP, which would cover roughly 453 mi² (1,173 km²) of Green Diamond lands in Montana. Excluding the Green Diamond lands from the critical habitat designation would minimize any additional review of future projects if there is a Federal nexus, and encourage voluntary conservation measures such as the HCP, conservation easement, and SFI certification. The exclusion may also serve to encourage other private landowners to pursue voluntary conservation measures that benefit lynx and other listed species in the future.

Benefits of Exclusion Outweigh the Benefits of Inclusion—

We evaluated the exclusion of approximately 7 mi² (18 km²) of Green Diamond lands. Including Green Diamond lands in the final designation would likely not lead to any changes in Green Diamond management (to further avoid destroying or adversely modifying that habitat), and therefore, the benefits of inclusion are low. We find that few additional conservation benefits would be realized through section 7 of the Act, because actions on these private lands rarely have a Federal nexus. Recognizing the contributions of private landowners committed to sustainable forest management, and the substantial value of conservation easements that benefit wildlife species and their habitat, not only aligns with the conservation goals of the Service but also strengthens partnerships with private stakeholders. The Green Diamond lands, managed under voluntary conservation efforts, are providing for those PBFs essential to the conservation of the species.

Therefore, we have determined that the benefits of excluding lands owned and managed by Green Diamond in Unit 3 outweigh the benefits of including these lands as critical habitat. Based on the above considerations, and consistent with the direction provided in section 4(b)(2) of the Act, we find that greater benefits to lynx are likely to be achieved by excluding Green Diamond lands from the final designation rather than by including them.

Exclusion Will Not Result in Extinction of the Species—

We have determined that the exclusion of Green Diamond lands from Unit 3 of this final revised critical habitat designation for the lynx DPS will not result in the extinction of the species because the voluntary conservation easement and Green Diamond's conservation-focused management provide for the conservation of the species and the PBFs essential to it and because the amount of land excluded is a fraction of a percent of the overall area identified as critical habitat for the lynx DPS. The jeopardy standard of section 7(a)(2) of the Act, and routine implementation of conservation measures through the section 7 process, also provide assurances that the species will not go extinct. The protections afforded to the lynx under the jeopardy standard will remain in place for the areas excluded from revised critical habitat. We therefore exclude 7 mi² (18 km²) of lands owned by Green Diamond Resource Company in Unit 3 of this final revised lynx critical habitat designation.

Tribal Lands

Several E.O.s, Secretary's Orders (S.O.s), and policies concern working with Tribes. These guidance documents generally confirm our trust responsibilities to Tribes, recognize that Tribes have sovereign authority to control Tribal lands, emphasize the importance of developing partnerships with Tribal governments, and direct the Service to consult with Tribes on a government-to-government basis.

A joint S.O. that applies to both the Service and the NMFS—S.O. 3206, *American Indian Tribal Rights, Federal–Tribal Trust Responsibilities, and the Endangered Species Act* (June 5, 1997)—is the most comprehensive of the various guidance documents related to Tribal relationships and Act implementation, and it provides the most detail directly relevant to the designation of critical habitat. In addition to the general direction discussed above, the appendix to S.O. 3206 explicitly recognizes the right of Tribes to participate fully in any listing process that may affect Tribal rights or Tribal trust resources; this includes the designation of critical habitat. Section 3(B)(4) of the Appendix requires us to consult with affected Tribes ''when considering the designation of critical habitat in an area that may impact Tribal trust resources, Tribally owned fee lands, or the exercise of Tribal rights.'' That provision also instructs the Service to avoid including Tribal lands within a critical habitat designation unless the area is essential to conserve a listed species, and it requires the Service to ''evaluate and document the extent to which the conservation needs of the listed species can be achieved by limiting the designation to other lands.''

Our implementing regulations at 50 CFR 424.19 and the 2016 Policy are consistent with S.O. 3206. When we undertake a discretionary exclusion analysis, in accordance with S.O. 3206, we consult with any Tribe whose Tribal trust resources, Tribally-owned fee lands, or Tribal rights may be affected by including any particular areas in the designation, and we evaluate the extent to which the conservation needs of the species can be achieved by limiting the designation to other areas. When we undertake a discretionary 4(b)(2) exclusion analysis, we always consider exclusion of Tribal lands, and give great weight to Tribal concerns in analyzing the benefits of exclusion.

However, S.O. 3206 does not override the Act's statutory requirement of designation of critical habitat. As stated above, we must consult with any Tribe when a designation of critical habitat may affect Tribal lands or resources. The Act requires us to identify areas that meet the definition of ''critical habitat'' (*i.e.,* areas occupied at the time of listing that contain the essential physical or biological features that may require special management considerations or protection and unoccupied areas that are essential to the conservation of a species), without regard to land ownership. While S.O. 3206 provides important direction, it expressly states that it does not modify the Secretaries' statutory authority under the Act or other statutes.

Flathead Indian Reservation and Blackfeet Reservation Lands

Areas proposed for critical habitat designation overlap with Tribal lands in Unit 3 including 186 mi² (482 km²) of lands on the Flathead Indian Reservation and 44 mi² (113 km²) on the Blackfeet Indian Reservation. We communicated with representatives for the Confederated Salish and Kootenai Tribes (CSKT) of the Flathead Nation and the Blackfeet Tribe, all of whom expressed a desire for their lands to be excluded from the final critical habitat designation.

In the previous final rules designating revised critical habitat for lynx, published in the **Federal Register** on February 25, 2009 (74 FR 8616) and September 12, 2014 (79 FR 54782), we determined that the benefits of excluding Flathead Indian Reservation Lands outweighed the benefits of including them. We determined that exclusion of these Tribal lands from the designation of critical habitat for the lynx will not result in the extinction of the species because the CSKT implement programs for the conservation of the species, and physical and biological features essential to it, in occupied areas. The protections afforded to the lynx under the jeopardy standard will remain in place for the areas considered for exclusion from revised critical habitat. Therefore, and in light of S.O. 3206 and Tribal management of lynx and their habitat, we are excluding 186 mi² (482 km²) of Flathead Indian Reservation Lands from the revised lynx critical habitat designation. Previous rules did not consider excluding any Blackfeet Reservation lands, as these were only identified as meeting the definition of critical habitat in the more recent habitat models (Olson et al. 2021, entire; Squires et al. 2024, entire) and identified as part of the tier 1 areas by the WLBT (WLBT 2022, entire).

Benefits of Inclusion—

The principal benefit of including an area in a critical habitat designation is the requirement of Federal agencies to ensure that actions that they fund, authorize, or carry out are not likely to result in the destruction or adverse modification of any designated critical habitat, which is one of the regulatory standards of section 7(a)(2) of the Act under which consultation is completed. Although the CSKT and Blackfeet Tribes are not Federal agencies, some actions taken by the Tribes may have a Federal nexus if they fall under the jurisdiction of the Bureau of Indian Affairs (BIA) due to Federal funding or authorization or because actions are occurring on lands held in trust for the Tribe.

We have provided the Tribes and the BIA with technical assistance on project implementation and conducted informal consultations with agencies implementing, funding, or authorizing actions on Tribal lands. We have conducted one formal consultation with the BIA related to lynx, a framework programmatic consultation for the Blackfeet Forest Management Plan that concluded some future forest management activities on the Blackfeet lands may result in short-term adverse effects to lynx due to habitat modifications, but they will not likely jeopardize the continued existence of the species. In fact, the forest management actions may provide benefits to lynx habitats by reducing the risk of catastrophic wildfire and creating a mosaic of forest structural stages. Because both tribes practice land management and prioritize conservation, we do not anticipate an increase in section 7 consultations in the future and, as a result, the regulatory benefit of critical habitat would be minimal.

Another potential benefit of critical habitat designation would be to signal the importance of these lands to Tribal governments, Federal agencies, scientific organizations, State and local governments, and the public to encourage conservation efforts, funding, or research to benefit the lynx and its habitat. By publication of the proposed rule and this final rule, we are educating the public of the location of core lynx habitat and areas most important for the conservation and recovery of the lynx DPS. Given that lynx have been listed and researched in these areas for over two decades and given that the habitat mapping efforts have already informed the public and Tribes about the value of these areas and helped to focus potential conservation actions, the educational benefits from designating critical habitat on Tribal-owned or -managed Lands would be small.

Benefits of Exclusion—

Under self-governance, the CSKT and Blackfeet Nation Tribes maintain their own high conservation standards and their own Wildlife Management divisions. According to their mission statement, the CSKT's Wildlife Management Program is charged with the protection, enhancement and management of terrestrial wildlife species and habitats to provide for viable populations of all wildlife species, and the Program actively engages in partnerships and research to benefit wildlife species and their

habitats. Additionally, most of the high-quality lynx habitat on the Flathead Reservation occurs in areas with formal protective status, including (1) The long-designated Mission Mountains and Rattlesnake Tribal Wilderness Areas, which are largely roadless and managed for wilderness qualities; (2) the South Fork/Jocko Primitive Area, which is open to use only by Tribal members and in which commercial timber harvest is prohibited. The Blackfeet Tribe's Fish and Wildlife Department has proven to be a model of professional wildlife management in the region through a variety of programs, services, research, meaningful collaborations and projects. The Forest Management Plan includes considerations for mapped lynx habitat for the next 15 years, including a variety of forestry practices to promote a mosaic of structural stages, and the Tribe recognizes the conservation measures from the Canada Lynx Conservation Assessment and Strategy (ILBT 2013, entire) to incorporate into planned forest management activities.

Tribal lands that fall within the proposed critical habitat are small in size relative to the large landscape required to sustain the lynx populations in these areas. Although these Tribal lands support lynx habitat and the PBFs, they have a smaller role in lynx conservation compared to the extensive National Forest lands in the western United States. Due to Tribal natural resource management philosophies, plans, and practices that are already in place on Tribal lands (*e.g.,* Blackfeet Forest Management Plan 2024, Confederated Salish and Kootenai Forest Management Plans 1999 and 2005), it is highly unlikely that activities approaching the threshold of adverse modification would occur.

The Tribes have a long history of professional wildlife management and conservation. The designation of critical habitat on their lands would be considered an unwanted intrusion into Tribal self-governance, thus compromising the government-to-government relationship essential to achieving our mutual goal of managing for healthy ecosystems upon which the viability of threatened and endangered species populations depend. It is unlikely that additional benefits to lynx would result from designating these lands as critical habitat.

S.O. 3206, ''American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act'' (June 5, 1997) states that, ''critical habitat shall not be designated in such areas unless it is determined essential to conserve a listed species.'' The President's memorandum of April 29, 1994, ''Government-to- Government Relations with Native American Tribal Governments'' (59 FR 22951); E.O. 13175 (''Consultation and Coordination with Indian Tribal Governments''), and the relevant provision of the Departmental Manual of the Department of the Interior (512 DM 2) also emphasize that Tribal lands should be evaluated to determine whether their inclusion in a critical habitat designation is essential to the species. Therefore, we believe that fish, wildlife, and other natural resources on Tribal lands are better managed under Tribal authorities, policies, and programs than through Federal regulation wherever possible and practicable.

Benefits of Exclusion Outweigh the Benefits of Inclusion—

Exclusion of Tribal lands is warranted because affected Tribes already take actions to avoid negative impacts to lynx and to conserve habitat. In discussions with each of the Tribes, we heard them voicing their commitment to ensuring that lynx remain a viable part of the ecosystem.

We have determined that conservation of lynx can be achieved on Tribal lands within the critical habitat units through the continuation of the cooperative partnerships between the Service and the Tribes, and without designating them as critical habitat. The management plans, activities, and land-use designations being implemented on Tribal lands described above are likely to ensure continued conservation of lynx on Tribal lands. Given the importance of government-to-government relationship with Tribes, the benefit of maintaining our commitment to the E.O. by excluding these lands outweighs the benefit of including them in critical habitat. Therefore, pursuant to section 4(b)(2) of the Act, we have excluded Tribal lands in Unit 3 in this final rule from critical habitat for the lynx DPS.

Exclusion Will Not Result in Extinction of the Species—

We have determined that exclusion of Tribal lands from the designation of critical habitat for the lynx will not result in the extinction of the species because the Confederated Salish and Kootenai Tribes and Blackfeet Tribe implement natural resource and wildlife management programs that ensure conservation of the species, and the physical and biological features essential to it, in occupied areas. Additively, the Tribal lands excluded from critical habitat comprise 230 mi^2 (595 km^2), which is approximately 1 percent of the total critical habitat proposed in the western United States (Units 3, 4, 5, and 6). The protections afforded to lynx under the jeopardy standard will remain in place for the areas considered for exclusion from revised critical habitat. Therefore, in light of S.O. 3206 and Tribal management of lynx and their habitat, 186 mi^2 (482 km^2) of lands on the Flathead Indian Reservation and 44 mi^2 (113 km^2) on the Blackfeet Indian Reservation lands have been excluded from lynx critical habitat designation in this final rule.

Summary of Exclusions

As discussed above, based on the information provided by entities seeking exclusion, as well as any additional public comments received, we evaluated whether certain lands in the proposed critical habitat were appropriate for exclusion from this final designation pursuant to section 4(b)(2) of the Act. We are excluding the following areas from critical habitat designation for the Canada lynx: lands covered by the Montana DNRC HCP, lands covered by the Washington DNR Lynx Habitat Management Plan, Green Diamond Resource lands, and Tribal lands of the Flathead Reservation and Blackfeet Reservation.

TABLE 2—AREAS EXCLUDED FROM CRITICAL HABITAT DESIGNATION BY CRITICAL HABITAT UNIT

Unit	Specific area	Areas meeting the definition of critical habitat excluded, in square miles (mi^2) (square kilometers (km^2))
3. Northern Rockies ..	Tribal Lands: Flathead Reservation, MT	186 (482)
3. Northern Rockies ..	Tribal Lands: Blackfeet Reservation, MT	44 (113)
3. Northern Rockies ..	Montana DNRC Multi-species HCP	179 (463)
3. Northern Rockies ..	Montana Fish Wildlife & Parks Wildlife Management Areas	43 (113)
3. Northern Rockies ..	Green Diamond Resources	7 (18)

Required Determinations

Regulatory Planning and Review (E.O.s 12866, 13563, 14192)

E.O. 12866 provides that the Office of Information and Regulatory Affairs (OIRA) in the OMB will review all significant rules as defined by section 3(f) of E.O. 12866. OIRA has determined that this final rule is significant under E.O. 12866.

E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the Nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. E.O. 13563 directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this rule in a manner consistent with these requirements This final rule is considered an E.O. 14192 deregulatory action.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

Under the Regulatory Flexibility Act (RFA; 5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA; title II of Pub. L. 104–121, March 29, 1996), whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effects of the rule on small entities (*i.e.,* small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of the agency certifies the rule will not have a significant economic impact on a substantial number of small entities. The SBREFA amended the RFA to require Federal agencies to provide a certification statement of the factual basis for certifying that the rule will not have a significant economic impact on a substantial number of small entities.

According to the Small Business Administration, small entities include small organizations such as independent nonprofit organizations; small governmental jurisdictions, including school boards and city and town governments that serve fewer than 50,000 residents; and small businesses (13 CFR 121.201). Small businesses include manufacturing and mining concerns with fewer than 500 employees, wholesale trade entities with fewer than 100 employees, retail and service businesses with less than $5 million in annual sales, general and heavy construction businesses with less than $27.5 million in annual business, special trade contractors doing less than $11.5 million in annual business, and agricultural businesses with annual sales less than $750,000. To determine whether potential economic impacts to these small entities are significant, we considered the types of activities that might trigger regulatory impacts under this designation as well as types of project modifications that may result. In general, the term ''significant economic impact'' is meant to apply to a typical small business firm's business operations.

Under the RFA, as amended, and as understood in light of recent court decisions, Federal agencies are required to evaluate the potential incremental impacts of rulemaking on those entities directly regulated by the rulemaking itself; in other words, the RFA does not require agencies to evaluate the potential impacts to indirectly regulated entities. The regulatory mechanism through which critical habitat protections are realized is section 7 of the Act, which requires Federal agencies, in consultation with the Service, to ensure that any action authorized, funded, or carried out by the agency is not likely to destroy or adversely modify critical habitat. Therefore, under section 7, only Federal action agencies are directly subject to the specific regulatory requirement (avoiding destruction and adverse modification) imposed by critical habitat designation. Consequently, only Federal action agencies will be directly regulated by this designation. The RFA does not require evaluation of the potential impacts to entities not directly regulated. Moreover, Federal agencies are not small entities. Therefore, because no small entities will be directly regulated by this rulemaking, we certify that this critical habitat designation will not have a significant economic impact on a substantial number of small entities.

During the development of this final rule, we reviewed and evaluated all information submitted during the comment period on the proposed rule (89 FR 94656; November 29, 2024) that may pertain to our consideration of the probable incremental economic impacts of this critical habitat designation. Based on this information, we affirm our certification that this critical habitat designation will not have a significant economic impact on a substantial number of small entities, and a regulatory flexibility analysis is not required.

Energy Supply, Distribution, or Use (E.O. 13211)

E.O. 13211 (''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'') requires agencies to prepare statements of energy effects ''to the extent permitted by law'' when undertaking actions identified as significant energy actions (66 FR 28355; May 22, 2001). E.O. 13211 defines a ''significant energy action'' as an action that (i) is a significant regulatory action under E.O. 12866; and (ii) is likely to have a significant adverse effect on the supply, distribution, or use of energy. This rule is a significant regulatory action under E.O. 12866. In our economic analysis, we did not find that this proposed critical habitat designation revision would significantly affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action, and no statement of energy effects is required.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*), we make the following finding:

(1) This rule will not produce a Federal mandate. In general, a Federal mandate is a provision in legislation, statute, or regulation that would impose an enforceable duty upon State, local, or Tribal governments, or the private sector, and includes both ''Federal intergovernmental mandates'' and ''Federal private sector mandates.'' These terms are defined in 2 U.S.C. 658(5)–(7). ''Federal intergovernmental mandates'' include a regulation that ''would impose an enforceable duty upon State, local, or Tribal governments'' with two exceptions. It excludes ''a condition of Federal assistance.'' It also excludes ''a duty arising from participation in a voluntary Federal program,'' unless the regulation ''relates to a then-existing Federal program under which $500,000,000 or more is provided annually to State, local, and Tribal governments under entitlement authority,'' if the provision would ''increase the stringency of conditions of assistance'' or ''place caps upon, or otherwise decrease, the Federal Government's responsibility to provide funding,'' and the State, local, or Tribal governments ''lack authority'' to adjust accordingly. At the time of enactment, these entitlement programs were: Medicaid; Aid to Families with Dependent Children work programs; Child Nutrition; Food Stamps; Social Services Block Grants; Vocational Rehabilitation State Grants; Foster Care, Adoption Assistance, and Independent Living; Family Support Welfare Services; and Child Support Enforcement. ''Federal private sector mandate'' includes a regulation that ''would impose an enforceable duty upon the private sector, except (i) a condition of Federal assistance or (ii) a duty arising from participation in a voluntary Federal program.''

The designation of critical habitat does not impose a legally binding duty on non-Federal Government entities or private parties. Under the Act, the only regulatory effect is that Federal agencies must ensure that their actions are not likely to destroy or adversely modify critical habitat under section 7. While non-Federal entities that receive Federal funding, assistance, or permits, or that otherwise require approval or authorization from a Federal agency for an action, may be indirectly impacted by the designation of critical habitat, the legally binding duty to avoid destruction or adverse modification of critical habitat rests squarely on the Federal agency. Furthermore, to the extent that non-Federal entities are indirectly impacted because they receive Federal assistance or participate in a voluntary Federal aid program, the Unfunded Mandates Reform Act would not apply, nor would critical habitat shift the costs of the large entitlement programs listed above onto State governments.

(2) This rule will not significantly or uniquely affect small governments, because much of the designation (99 percent) occurs on Federal lands. Furthermore, based on an analysis conducted for the previous designation of critical habitat in 2014 and extrapolated to this designation, we do not expect this rule to significantly or uniquely affect small governments. Small governments will be affected only to the extent that any programs having Federal funds, permits, or other authorized activities must ensure that their actions will not adversely affect the critical habitat. Therefore, a small government agency plan is not required.

Takings (E.O. 12630)

In accordance with E.O. 12630 (''Governmental Actions and Interference with Constitutionally Protected Property Rights''), we have analyzed the potential takings implications of designating critical habitat for the Canada lynx in a takings implications assessment. The Act does not authorize the Services to regulate private actions on private lands or confiscate private property as a result of critical habitat designation. Designation of critical habitat does not affect land ownership, or establish any closures, or restrictions on use of or access to the designated areas. Furthermore, the designation of critical habitat does not affect landowner actions that do not require Federal funding or permits, nor does it preclude development of habitat conservation programs or issuance of incidental take permits to permit actions that do require Federal funding or permits to go forward. However, Federal agencies are prohibited from carrying out, funding, or authorizing actions that would destroy or adversely modify critical habitat. A takings implications assessment has been completed and concludes that this designation of critical habitat for the Canada lynx DPS does not pose significant takings implications for lands within or affected by the designation.

Federalism (E.O. 13132)

In accordance with E.O. 13132 (''Federalism''), this rule does not have significant federalism effects. A federalism summary impact statement is not required. In keeping with Department of the Interior and Department of Commerce policy, we requested information from, and coordinated development of this critical habitat designation with, the appropriate State resource agencies. From a federalism perspective, the designation of critical habitat directly affects only the responsibilities of Federal agencies. The Act imposes no other duties with respect to critical habitat, either for States and local governments, or for anyone else. As a result, the proposed rule does not have substantial direct effects either on the States, or on the relationship between the Federal Government and the States, or on the distribution of powers and responsibilities among the various levels of government.

The designation may have some benefit to these governments because the areas that contain the features essential to the conservation of the species are more clearly defined, and the physical or biological features of the habitat necessary for the conservation of the species are specifically identified. This information does not alter where and what federally sponsored activities may occur. However, it may assist State and local governments in long-range planning because they no longer have to wait for case-by-case section 7 consultations to occur.

Where State and local governments require approval or authorization from a Federal agency for actions that may affect critical habitat, consultation under section 7(a)(2) of the Act would be required. While non-Federal entities that receive Federal funding, assistance, or permits, or that otherwise require approval or authorization from a Federal agency for an action, may be indirectly impacted by the designation of critical habitat, the legally binding duty to avoid destruction or adverse modification of critical habitat rests squarely on the Federal agency.

Civil Justice Reform (E.O. 12988)

In accordance with E.O. 12988 (''Civil Justice Reform''), the Office of the Solicitor has determined that the rule will not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of the Order. We are designating critical habitat in accordance with the provisions of the Act. To assist the public in understanding the habitat needs of the species, this rule identifies the physical or biological features essential to the conservation of the species. The proposed areas of critical habitat are presented on maps, and the

rule provides several options for the interested public to obtain more detailed location information, if desired.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

This rule does not contain information collection requirements, and a submission to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) is not required. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act (42 U.S.C. 4321 et seq.)

Regulations adopted pursuant to section 4(a) of the Act are exempt from the NEPA (42 U.S.C. 4321 *et seq.*) and do not require an environmental analysis under NEPA. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244). This includes listing, delisting, and reclassification rules, as well as critical habitat designations. In a line of cases starting with *Douglas County* v. *Babbitt,* 48 F.3d 1495 (9th Cir. 1995), the courts have upheld this position. The Department has determined that this agency action does not require an environmental analysis under NEPA.

Government-to-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994 (''Government-to-Government Relations With Native American Tribal Governments;'' 59 FR 22951, May 4, 1994), E.O. 13175 (''Consultation and Coordination with Indian Tribal Governments''), the President's memorandum of November 30, 2022 (''Uniform Standards for Tribal Consultation;'' 87 FR 74479, December 5, 2022), and the Department of the Interior's manual at 512 DM 2, we readily acknowledge our responsibility to communicate meaningfully with federally recognized Tribes and Alaska Native Corporations on a government-to-government basis. In accordance with S.O. 3206 of June 5, 1997 (''American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act''), we readily acknowledge our responsibilities to work directly with Tribes in developing programs for healthy ecosystems, to acknowledge that Tribal lands are not subject to the same controls as Federal public lands, to remain sensitive to Indian culture, and to make information available to Tribes.

On October 13, 2022, the Service sent a letter to federally recognized Tribal partners across the range of the Canada lynx in the western United States, indicating that we would be updating the SSA, explaining why it was necessary to revise the SSA to inform this critical habitat revision, and requesting additional information. During development of the proposed rule and this final critical habitat rule, we coordinated with Tribes that have lands within the boundary of the proposed critical habitat revision to determine eligibility for exclusion of those lands from the final designation of critical habitat. As described above, we are excluding Flathead Indian Reservation and Blackfeet Reservation lands from the final critical habitat designation for the Canada lynx DPS. As a result, no Tribal lands fall within the boundaries of the final critical habitat for the Canada lynx, so no Tribal lands are be affected by the designation.

Proposed Regulation Promulgation

Accordingly, we amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; and 4201–4245, unless otherwise noted.

■ 2. In § 17.95, in paragraph (a), amend the entry for ''Canada Lynx *(Lynx canadensis)*'' by:
■ a. Revising paragraphs (1) through (5);
■ b. Adding figure captions to paragraphs (6) and (7);
■ c. Revising paragraphs (8) through (10); and
■ d. Adding paragraph (11).

The revisions and additions read as follows

§ 17.95 Critical habitat—fish and wildlife.

* * * * *

(a) *Mammals.*

* * * * *

Canada Lynx *(Lynx canadensis)*

(1) Critical habitat units are depicted for States and Counties on the maps in this entry.

(2) Within these areas, the physical or biological features essential to the conservation of Canada lynx consist of the following components:

(i) Presence of snowshoe hares that support lynx residency and reproduction over time within a mosaic of boreal/subalpine forest structural stages that includes snowshoe hare habitat with dense horizontal cover at ground- or snow-level.

(ii) Winter conditions that provide and maintain deep persistent unconsolidated (fluffy) snow.

(iii) Presence of denning structures, including downed trees, root wads, and accumulations of coarse woody debris.

(iv) Habitat types, such as dry forest or meadows, that are between boreal forest patches and are likely to be used by lynx traveling between those patches within and among home ranges.

(v) Landscapes with suitable habitat large enough (483 mi^2 (greater than or equal to 1,250 km^2)) to support breeding populations.

(3) Critical habitat does not include manmade structures (lands covered by buildings, houses, pavement, and other structures; paved highways and roads; active mines and existing mining infrastructure; existing developed ski runs and tree islands, ski lifts, and associated ski area infrastructure and buildings; and irrigation infrastructure) and the land on which they are located existing within the legal boundaries on August 17, 2026.

(4) Critical habitat units were delineated using a combination of datasets, including the Interagency Western Lynx Biology Team (WLBT) tier 1 polygons and multiple lynx habitat predictive models developed by lynx researchers. The WLBT polygons were based on the aforementioned habitat models that identified high probability lynx habitat, while accounting for minimum patch size necessary to support multiple home ranges and high-quality habitat metrics to support persistent occupancy and reproduction. These areas were then verified by species experts to contain

the physical and biological features essential to the conservation of the species. For purposes of designating critical habitat under the Act, the Service made adjustments to the *critical habitat boundaries*—not to the WLBT polygons themselves—based on information received during public comment and interagency review, including additions, removals, and refinements where warranted to better reflect the best available information. Additional processing information is available in our files.

Critical habitat units were mapped and analyzed using Environmental Systems Research Institute (ESRI) ArcGIS Pro 3.5 Geographic Information System (GIS) program. Area calculations were done in ArcGIS Pro using the North American Datum (NAD) 1983 USA Contiguous Albers Equal Area Conic USGS projection. The maps in this entry, as modified by any accompanying regulatory text, establish the boundaries of the critical habitat designation. The coordinates or plot points or both on which each map is based are available to the public at the Service's internet site, *https://www.fws.gov/species/canada-lynx-lynx-canadensis,* at *https://www.regulations.gov* at Docket No. FWS–R6–ES–2024–0142 and Docket No. FWS–R6–ES–2013–0101, and at the field office responsible for this designation. You may obtain field office location information by contacting one of the Service regional offices, the addresses of which are listed at 50 CFR 2.2.

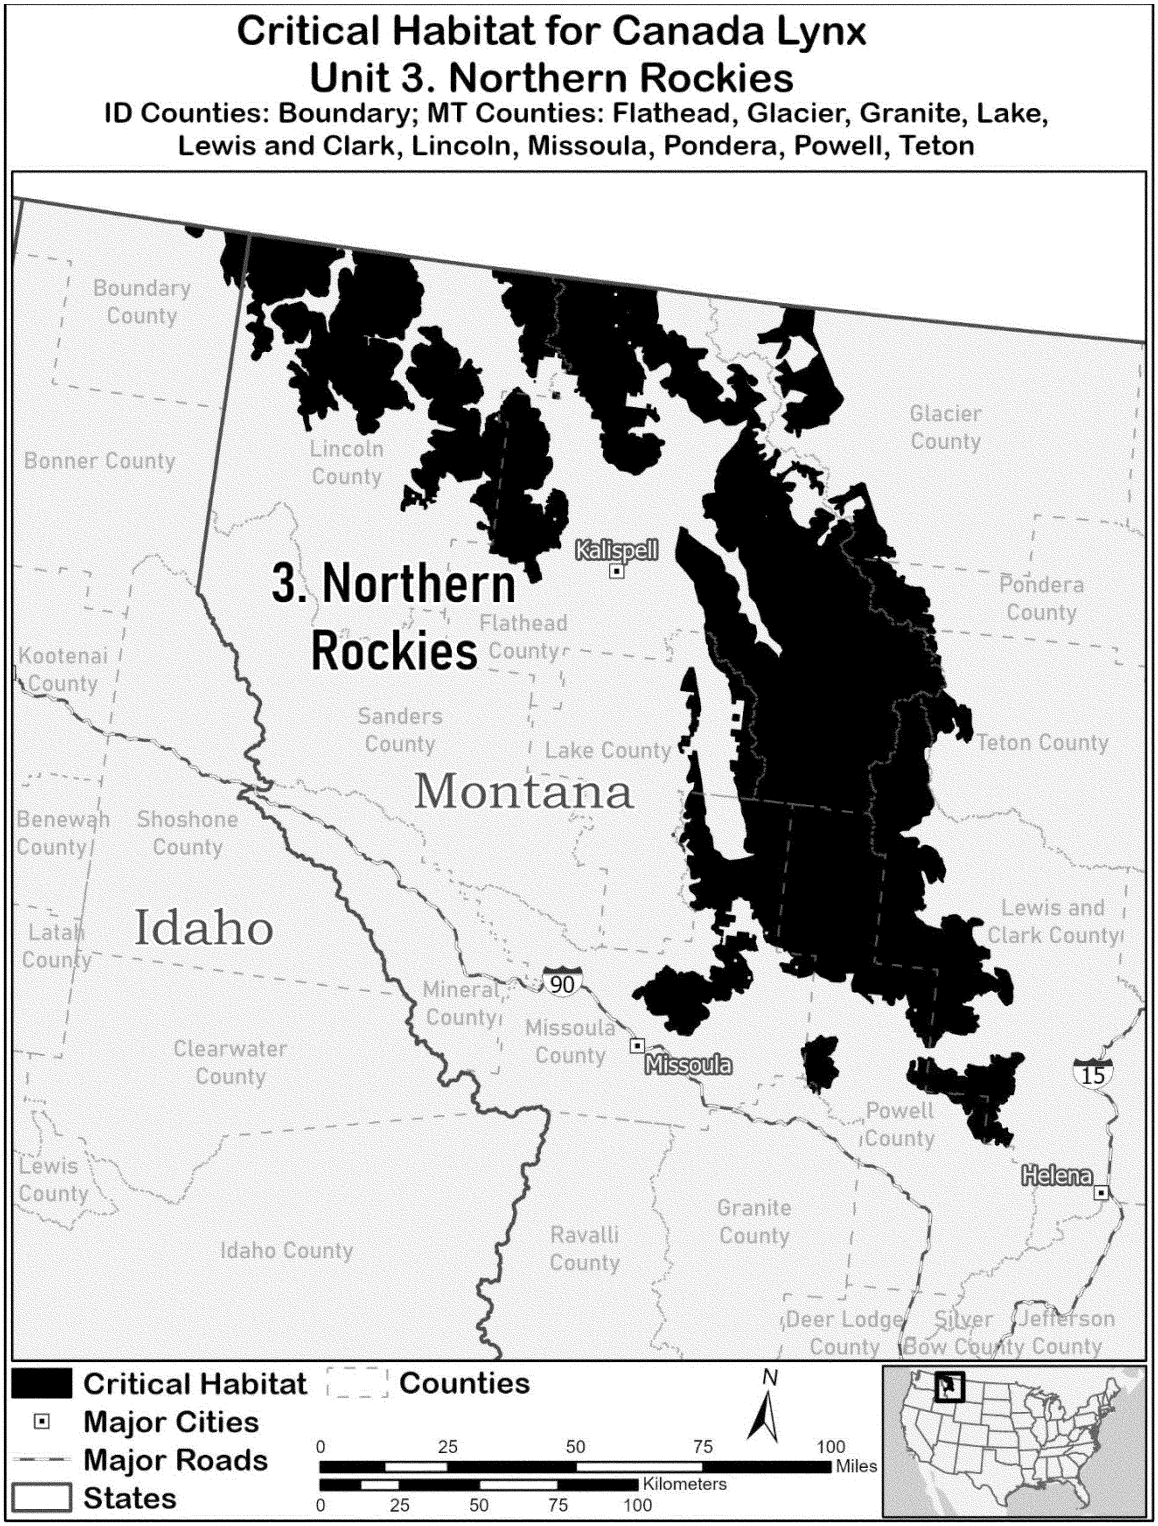
(8) Unit 3: Northern Rockies—The entirety or portions of Boundary County, ID, and Flathead, Glacier, Granite, Lake, Lewis and Clark, Lincoln, Missoula, Pondera, Powell, and Teton Counties, MT.

(i) Unit 3 consists of 6,918 mi^2 (17,918 km^2) located in northwestern Montana and northern Idaho. Land ownership within the unit is more than 99 percent Federal, with small parcels of State and private lands that represent less than one-half of 1 percent of the unit (total of 7 mi^2/18 km^2 State and private).

(ii) Map of Unit 3 follows:

Figure 4 to Canada Lynx (*Lynx canadensis*) paragraph (8)(ii)



(9) Unit 4: North Cascades—The entirety or portions of Chelan, Okanogan, Skagit, and Whatcom Counties, WA.

(i) Unit 4 consists of 2,075 mi² (5,375 km²) located in north-central Washington. Land ownership within the unit is over 99 percent Federal, with small parcels of private lands and one parcel of State land that represent less than one-half of 1 percent of the unit (less than 4 mi²/8 km²).

(ii) Map of Unit 4 follows:

Figure 5 to Canada Lynx (*Lynx canadensis*) paragraph (9)(ii).

(10) Unit 6: Southern Rockies—The entirety or portions of Archuleta, Chaffee, Clear Creek, Conejos, Dolores, Eagle, Gilpin, Grand, Gunnison, Hinsdale, La Plata, Lake, Mineral, Montezuma, Ouray, Park, Pitkin, Rio Grande, San Juan, San Miguel, and Summit Counties, CO.

(i) Unit 6 consists of 5,037 mi^2 (13,047 km^2) located in west-central and southwestern Colorado. Land ownership within the unit is approximately 97 percent Federal, 3 percent private, and less than 1 percent State and other.

(ii) Map of Unit 6 follows:

Part III

Department of Justice

Antitrust Division

United States of America, et al. v. RealPage, Inc., et al.; Proposed Final Judgment and Competitive Impact Statement

DEPARTMENT OF JUSTICE

Antitrust Division

United States of America, et al. v. RealPage, Inc., et al.; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the Middle District of North Carolina in *United States of America et al.* v. *RealPage, Inc. et al.,* Civil Action No. 1:24–cv–00710. On January 7, 2025, the United States filed a Complaint alleging that Willow Bridge Property Company, LLC's agreements with RealPage, Inc. and other landlords to share information and align pricing violate Section 1 of the Sherman Act, 15 U.S.C. 1. The proposed Final Judgment, filed on July 6, 2026, bars Willow Bridge from licensing or using a revenue management software that relies on competitively sensitive data and prohibits Willow Bridge from sharing competitively sensitive information with other landlords. Willow Bridge must also establish an antitrust compliance policy and cooperate with the United States in this litigation.

Copies of the Complaint, proposed Final Judgment, and Competitive Impact Statement are available for inspection on the Antitrust Division's website at *http://www.justice.gov/atr* and at the Office of the Clerk of the United States District Court for the Middle District of North Carolina. Copies of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Public comment is invited within 60 days of the date of this notice. Such comments, including the name of the submitter, and responses thereto, will be posted on the Antitrust Division's website, filed with the Court, and, under certain circumstances, published in the **Federal Register**. Comments should be submitted in English and directed to Danielle Hauck, Acting Chief, Technology and Digital Platforms Section, Antitrust Division, Department of Justice, 450 Fifth Street NW, Suite 7100, Washington, DC 20530 (email address: *ATR.Public-Comments-Tunney-Act-MB@usdoj.gov*).

Suzanne Morris,

Deputy Director Civil Enforcement Operations, Antitrust Division.

In the United States District Court for the Middle District of North Carolina

United States of America, U.S. Department of Justice, Antitrust Division, 950 Pennsylvania Avenue NW, Washington, DC 20530, State Of North Carolina, 114 W Edenton Street, Raleigh, NC 27603, State of California, 300 South Spring Street, Suite 1702, Los Angeles, CA 90013, State of Colorado, 1300 Broadway, 7th Floor, Denver, CO 80203, State of Connecticut, 165 Capitol Avenue, Hartford, CT 06106, State of Illinois, 115 S LaSalle St., Floor 23, Chicago, IL 60603, Commonwealth of Massachusetts, One Ashburton Place, 18th Floor, Boston, MA 02108, State of Minnesota, 445 Minnesota Street, St. Paul, MN 55101, State of Oregon, 100 SW Market St., Portland, OR 97201, State of Tennessee, P.O. Box 20207, Nashville, TN 37202, and State of Washington, 800 Fifth Avenue, Suite 2000, Seattle, WA 98104–3188, Plaintiffs, v. *RealPage, Inc., 2201 Lakeside Blvd., Richardson, TX 75082, Camden Property Trust, 11 Greenway Plaza, Ste. 2400, Houston, TX 77046, Cortland Management, LLC, 3424 Peachtree Rd., Ste. 300, Atlanta, GA 30326, Cushman & Wakefield, Inc., 225 W Wacker Dr., Ste. 3000, Chicago, IL 60606, Greystar Real Estate Partners, LLC, 465 Meeting St., Ste. 500, Charleston, SC 29403, Livcor, LLC, 233 South Wacker Dr., Ste. 4700, Chicago, IL 60606, Pinnacle Property Management Services, LLC, 2401 Internet Blvd., Ste. 110, Frisco, TX 75034, and Willow Bridge Property Company, LLC, 2000 McKinney Ave., Ste. 1100, Dallas, TX 75201,* Defendants.

I. Introduction
II. RealPage's Revenue Management Software Is Fueled by Nonpublic, Competitively Sensitive Information Shared by Landlords
A. Landlords Agree To Share Nonpublic, Competitively Sensitive Transactional Data With RealPage for Use in Generating Competitors' Pricing Recommendations
B. AIRM and YieldStar Users Agree With RealPage To Use the Software To Align Pricing
C. RealPage's Transactional Data Is Fundamentally Different From Other Data Available to Landlords
D. RealPage Revenue Management Software Uses Nonpublic, Competitively Sensitive Data To Recommend Prices
1. AIRM and YieldStar Leverage Competitively Sensitive Data To Generate Price Recommendations
(a) AIRM Model Training Relies on Competitively Sensitive Data To Generate Learned Parameters
(b) AIRM and YieldStar Incorporate Competitors' Nonpublic Data To Generate Floor Plan Price Recommendations
(c) AIRM and YieldStar Use Competitors' Nonpublic Data—Including Data on Future Occupancy—To Determine Unit-Level Prices
2. LRO Relies Primarily on Landlords To Input Data on Competitors
E. RealPage Uses Multiple Mechanisms To Increase Compliance With Price Recommendations
1. AIRM and YieldStar Make it Easy To Accept Recommendations and More Difficult and Time-Consuming To Decline
2. RealPage Pushes Clients To Adopt Auto-Accept Settings That Automatically Approve Recommendations
3. RealPage Pricing Advisors Provide a ''Check and Balance'' on Property Managers To Increase Acceptance of Recommendations
4. Pricing Recommendations Heavily Influence Landlords' Behavior
III. Coordination Among Competing Landlords Is a Feature of This Industry
A. Rental Housing Is a Necessity for Millions of Americans
B. The Multifamily Property Industry Is Rife With Cooperation Among Ostensible Competitors
1. At the Local Level, the Multifamily Property Industry Comprises a Small Number of Large Landlords Managing Buildings With Different Owners
2. Landlords Regularly Discuss Competitively Sensitive Topics With Their Competitors and Swap Information
3. At RealPage User Group Meetings, Landlords Discuss Competitively Sensitive Topics
C. RealPage Uses Nonpublic Information To Allow Landlords To More Easily Compare Units on an Apples-to-Apples Basis
IV. RealPage Harms the Competitive Process and Renters by Entering Into Unlawful Agreements With Landlords To Share and Exploit Competitively Sensitive Data
A. AIRM and YieldStar Have the Purpose and Effect of Distorting the Competitive Pricing of Apartments
B. AIRM and YieldStar Impose Multiple Guardrails Intended to Artificially Keep Prices High or Minimize Price Decreases
C. AIRM and YieldStar Harm the Competitive Process by Discouraging the Use of Discounts and Price Negotiations
D. AIRM and YieldStar Increase and Maintain Landlords' Pricing Power by Using Competitors' Data To Manage Lease Expirations
E. No Procompetitive Benefit Justifies, Much Less Outweighs, RealPage's Use of Competitively Sensitive Data To Align Competing Landlords
V. RealPage Uses Landlords' Competitively Sensitive Data To Maintain Its Monopoly And Exclude Commercial Revenue Management Software Competitors
A. Landlords Are Drawn to RealPage Because of Access to Nonpublic Transactional Data That Is Used To Increase Landlords' Revenue
B. RealPage's Collection and Use of Competitively Sensitive Data Excludes

Competition in Commercial Revenue Management Software
VI. Relevant Markets
A. Conventional Multifamily Rental Housing Markets
1. Product Markets

Appendix B: Submarkets by Bedroom Count

I. Introduction

1. Renters are entitled to the benefits of vigorous competition among landlords. In prosperous times, that competition should limit rent hikes; in harder times, competition should bring down rent, making housing more affordable. RealPage has built a business out of frustrating the natural forces of competition. In its own words, ''a rising tide raises all ships.'' This is more than a marketing mantra. RealPage sells software to landlords that collects nonpublic information from competing landlords and uses that combined information to make pricing recommendations. In its own words, RealPage ''*helps curb [landlords'] instincts to respond to down-market conditions by either dramatically lowering price* or by holding price when they are losing velocity and/or occupancy. . . . *Our tool [] ensures that [landlords] are driving every possible opportunity to increase price even in the most downward trending or unexpected conditions*'' (emphases added).

2. In fact, as RealPage's Vice President of Revenue Management Advisory Services described, ''*there is greater good in everybody succeeding versus essentially trying to compete against one another* in a way that actually keeps the entire industry down'' (emphasis added). As he put it, if enough landlords used RealPage's software, they would ''*likely move in unison versus against each other*'' (emphasis added). To RealPage, the ''greater good'' is served by ensuring that otherwise competing landlords rob Americans of the fruits of competition—lower rental prices, better leasing terms, more concessions. At the same time, the landlords enjoy the benefits of coordinated pricing among competitors.

3. RealPage replaces competition with coordination. It substitutes unity for rivalry. It subverts competition and the competitive process. It does so openly and directly—and American renters are left paying the price.

* * * * *

4. Americans spend more money on housing than any other expense. On average, American households allocate more than one-third of their monthly income to housing. Some purchase a home, while others choose to, or must, rent. A family's selection of an apartment reflects a complex set of values and criteria including comfort, safety, access to schools, convenience, and critically, affordability. To ensure they secure the greatest value for their needs, renters rely on robust and fierce competition between landlords.

5. RealPage distorts that competition. Across America, RealPage sells landlords commercial revenue management software. RealPage develops, markets, and sells this software to enable landlords to sidestep vigorous competition to win renters' business. Many of the largest landlords in the United States, including Greystar, Camden, Cortland, Cushman & Wakefield and Pinnacle, LivCor, and Willow Bridge (collectively, Defendant Landlords), which would otherwise be competing with each other, submit or have submitted on a daily basis their competitively sensitive information to RealPage.[1] This nonpublic, material, and granular rental data includes, among other information, a landlord's rental prices from executed leases, lease terms, and future occupancy. RealPage collects a broad swath of such data from competing landlords, combines it, and feeds it to an algorithm.

6. Based on this process and algorithm, RealPage provides daily, near real-time pricing ''recommendations'' back to competing landlords. These recommendations are based on the sensitive information of their rivals. But these are more than just ''recommendations.'' Because, in its own words, a ''rising tide raises all ships,'' RealPage monitors compliance by landlords to its recommendations. RealPage also reviews and weighs in on landlords' other policies, including trying to—and often succeeding in—ending renter-friendly concessions (like a free month's rent or waived fees) to attract or retain renters. A significant number of landlords then effectively agree to outsource their pricing function to RealPage with auto acceptance or other settings such that RealPage as a middleman, and not the free market, determines the price that a renter will pay. Competing landlords choose to share their information with RealPage to ''eliminate the guessing game'' about what their competitors are doing and ultimately take instructions from RealPage on how to make business decisions to ''optimize''—or in reality, maximize—rents.

7. Each landlord pays steep fees to license RealPage's software. RealPage's stated goals and value proposition are not a secret. Its executives are blunt: They want landlords to ''avoid the race to the bottom in down markets.'' Sometimes RealPage is even more direct, acknowledging that its software is aimed at ''driving every possible opportunity to increase price'' or observing that among landlords, ''there is a greater good in everybody succeeding versus essentially trying to compete against one another in a way that actually keeps the entire industry down.''

8. But that is not how the free market works. A free market requires that landlords compete on the merits, not coordinate pricing. Landlords should win renters by offering whatever combination of price and quality they think is most attractive. For example, landlords could lower rents or provide other financial concessions, like free months of rent, or with investments in amenities like gyms, grilling areas, or pools. Put differently, the fear of losing a renter to a competitor should motivate rival landlords to compete vigorously.

9. RealPage's revenue management software ingests on a daily basis nonpublic rental rates, future apartment availability, and changes in competitors' rates and occupancy. As competitor-landlords increase their rents, RealPage's software nudges other competing landlords to increase their rents as well. RealPage calls this ''maximiz[ing] opportunity[.]'' As RealPage explained to one landlord, by using competitors' data, they can identify situations where ''we may have a $50 increase instead of a $10 increase for that day.'' This is what RealPage encourages as ''stretch and pull pricing.''

10. RealPage allows landlords to manipulate, distort, and subvert market forces. One landlord observed that

[1] As used in this Complaint, the term ''landlord'' refers to a variety of entities that are responsible for setting rents and other lease terms at multifamily properties, including owners, operators, and managers.

RealPage's software ''can eliminate the guessing game'' for landlords' pricing decisions. Discussing a different RealPage product, another landlord said: ''I always liked this product because your algorithm uses proprietary data from other subscribers to suggest rents and term. That's classic price fixing . . . .'' A third landlord explained, ''Our very first goal we came out with immediately out of the gate is that we will not be the reason any particular sub-market takes a rate dive. So for us our strategy was to hold steady and to keep an eye on the communities around us and our competitors.''

11. RealPage's scheme not only distorts competition to the detriment of renters, but also allows it to reinforce its dominant position in the market for commercial revenue management software. By its own account, RealPage controls at least 80 percent of that market. Its dominant position is protected by substantial data advantages due to its massive reservoir of ill-gotten competitively sensitive information from competing landlords. No other revenue management company can match RealPage's access to landlords' nonpublic, competitively sensitive rental data. This is why RealPage acknowledges that it ''does not have any true competitors, mainly because our data is based on real lease transaction data.'' RealPage's conduct is predatory and exclusionary, which has allowed it to distort the market opportunities for honest providers of revenue management software.

12. At bottom, RealPage is an algorithmic intermediary that collects, combines, and exploits landlords' competitively sensitive information. And in so doing, it enriches itself and compliant landlords, including Defendant Landlords, at the expense of renters who pay inflated prices and honest businesses that would otherwise compete.

13. The United States, and the States of North Carolina, California, Colorado, Connecticut, Illinois, Minnesota, Oregon, Tennessee, and Washington, and the Commonwealth of Massachusetts, acting by and through their respective Attorneys General, bring this action pursuant to Sections 1 and 2 of the Sherman Act to rid markets of (i) RealPage's and Defendant Landlords' unlawful information-sharing and pricing alignment schemes, and (ii) RealPage's illegal monopoly in commercial revenue management software. In so doing, Plaintiffs seek to restore the free market to deserving individuals, families, and honest businesses.

II. RealPages's Revenue Management Software Is Fueled by Nonpublic, Competitively Sensitive Information Shared by Landlords

14. RealPage dominates the market for commercial revenue management software that landlords use to price apartments, controlling at least 80 percent of that market, according to its own estimates. RealPage currently offers three revenue management systems to landlords: YieldStar, AI Revenue Management (AIRM), and Lease Rent Options (LRO). The company's main legacy software, YieldStar, is the product of three acquisitions and subsequent internal development. Its successor, AIRM, uses much of the same codebase as YieldStar, but RealPage claims that AIRM's refined models and forecasting are more precise. RealPage acquired its other revenue management software, LRO, in 2017. RealPage has made plans to sunset both YieldStar and LRO by the end of 2024.

15. Competitively sensitive data collected from competing landlords is a critical input to RealPage's revenue management software. AIRM and YieldStar collect this data, such as rental applications, executed new leases, renewal offers and acceptances, and forward-looking occupancy, and use it to generate price recommendations for the competing landlords. This information is among the most competitively sensitive data a landlord maintains.

16. The exploitation of sensitive data from competing landlords is central to RealPage's approach. As part of pitching its software to landlords, RealPage highlights that its pricing algorithms use their competitors' data sourced directly from ''lease transaction data.'' RealPage describes this nonpublic data from competitors as one of three ''building blocks of price'' in AIRM and YieldStar. Landlords thus share their competitively sensitive information with RealPage with the understanding that RealPage's software will use the data to generate recommendations for rivals (and vice versa).

A. Landlords Agree To Share Nonpublic, Competitively Sensitive Transactional Data With RealPage for Use in Generating Competitors' Pricing Recommendations

17. RealPage amasses nonpublic, competitively sensitive data from competing landlords through use of its pricing algorithms, other rental property software, and thousands of monthly phone calls. The combined troves of nonpublic, competitively sensitive data are much more granular, sensitive, timely, and comprehensive than alternatives—and far more detailed than any data publicly available to potential renters. RealPage then uses this data in generating competitors' pricing recommendations.

18. *Data shared through YieldStar and AIRM.* Each AIRM and YieldStar client agrees to share detailed data with RealPage that are private, updated nightly, and granular. The data includes lease-level information on each unit's effective rent (rent net of discounts), rent discounts, rent term, and lease status, as well as unit characteristics such as layout and amenities. It also includes the number of potential future renters who have visited a property or submitted a rental application.

19. Landlords understand that AIRM and YieldStar use their data to recommend prices not just for their own units, but also for competitors. For example, a revenue management director at Greystar testified that she understood that Greystar, and other competing landlords who used AIRM or YieldStar, agreed with RealPage to share their data, which was combined in a single data pool for use by YieldStar and AIRM. An executive at Willow Bridge noted the advantages to using YieldStar at a property if others in the property's submarket—the small geographic area around the property—also used YieldStar because ''the shared data between the models at different communities can be a benefit in getting accurate transactional data on a timely basis.''

20. Landlords agree to provide this information for use by their competitors because they understand they will be able to leverage the sensitive information of their rivals in turn. In its pitch to prospective clients, RealPage describes AIRM's and YieldStar's access to competitors' granular, transactional data as a meaningful tool that it claims enables landlords to outperform their properties' competitors by 2–7%. RealPage clients receive training that highlights the role of competitors' transactional data in the price recommendation process.

21. *Data Shared Through Other RealPage Products.* AIRM and YieldStar are not the only ways that RealPage shares nonpublic, competitively sensitive information among landlords. RealPage obtains the same confidential transactional data from landlords that license at least three other programs: OneSite, Performance Analytics with Benchmarking, and Business Intelligence.

22. *OneSite* is RealPage's property management software, which operates as the central source of data for

landlords' leasing activity. *Performance Analytics with Benchmarking* allows landlords to compare the performance of their properties and floor plans (*e.g.,* a one-bedroom, one-bathroom unit) to their competitors. *Business Intelligence* is a data analytics tool that pulls data from a landlord's property management software and other products.

23. Each landlord using RealPage's OneSite, Business Intelligence, and Performance Analytics with Benchmarking products agrees to share its proprietary data with RealPage and agrees that RealPage's revenue management software can use the data to generate pricing recommendations. The license agreements for these products specifically identify the shared data, such as pricing information, as confidential, nonpublic information. RealPage takes this deeply confidential information and uses it to provide rent recommendations to competitors of these clients.

24. These agreements grant RealPage access to confidential information from over 16 million units across the country, including many that do not use its revenue management products. With respect to Performance Analytics with Benchmarking alone, a RealPage sales representative told a prospective client that ''we have over 16 million units of data coming from various source operating systems (PMS) [property management software] into the PAB platform,'' making RealPage the top choice for ''transactional data benchmarking.'' With properties containing approximately 3 million units using AIRM and YieldStar, these additional agreements meaningfully multiply the scale of the transactional data used by AIRM and YieldStar. This gives RealPage greater visibility, including into markets with less penetration by AIRM and YieldStar, granting even initial AIRM and YieldStar adopters in a new market the benefit of access to a significant amount of nonpublic, competitively sensitive information.

25. Landlords understand that AIRM and YieldStar will use data from these products. A revenue management director at Greystar explained that RealPage ingests transactional data from several RealPage products, besides AIRM and YieldStar, for use in revenue management. A property owner requested information from Greystar on which competing properties used revenue management software. In an internal response, the Greystar director noted that RealPage has ''access to more transactional history than anyone and [is] pulling data from anyone using RealPage products which includes companies who manually price or use other revenue management firms but leveraging their BI [Business Intelligence] products.''

26. A revenue management executive at Willow Bridge asked RealPage if other specific landlords were using RealPage's non-revenue management products. The landlord's owner client was concerned about the data available to YieldStar because competing properties were unsophisticated and did not use revenue management. This executive wanted to confirm that ''YieldStar will be able to leverage actual transactional data behind the scenes and not just look at offered rents for their comps.'' RealPage reminded the Willow Bridge executive that RealPage collected transactional data for *all* users of OneSite, Business Intelligence, and Performance Analytics with Benchmarking, and reassured the executive that YieldStar had ample transactional and survey data for that area.

27. *Calling Landlords.* RealPage has an additional, complementary product called Market Analytics. Market Analytics compiles data from over 50,000 monthly phone calls that RealPage makes to landlords across the country. On these calls RealPage collects nonpublic, competitively sensitive information by floor plan on occupancy rates, effective rents, and concessions, as well as information on the owner, management company, and any revenue management software used at the property. These market surveys cover over 11 million units and approximately 52,000 properties. Landlords, including but not limited to those that use AIRM, YieldStar, or other RealPage products, knowingly share this nonpublic information with RealPage.

B. AIRM and YieldStar Users Agree With RealPage To Use the Software To Align Pricing

28. In addition to agreeing to share nonpublic, competitively sensitive data with RealPage, each AIRM and YieldStar licensee agrees with RealPage to use the AIRM or YieldStar pricing software as RealPage designed it.[2] Landlords are expected to review daily AIRM or YieldStar floor plan price recommendations and use the programs to set scheduled floor plan rents or even unit-level prices.

29. While landlords may not accept every price recommendation, they use AIRM or YieldStar as their pricing software, regularly review AIRM or YieldStar floor plan recommendations, use AIRM or YieldStar to set a scheduled floor plan rent, and use AIRM or YieldStar to set unit-level prices.

30. Landlords who use AIRM and YieldStar know that others are using the same software. Some landlords track which revenue management software their competitors use, including by contacting competing properties directly and exchanging nonpublic information. Other landlords, including prospective AIRM and YieldStar users, ask RealPage whether there are existing AIRM and YieldStar users nearby before they themselves license the products.

31. An executive at Willow Bridge, for example, explained to her team how she would learn from RealPage data or from a property's website whether a property used revenue management. This information is important because properties that use revenue management tend to update prices much more frequently, and so a landlord will react differently to those price changes if it knows the competitor is using revenue management.

32. RealPage frequently tells prospective and current clients that a ''rising tide raises all ships.'' A RealPage revenue management vice president explained that this phrase means that ''there is greater good in everybody succeeding versus essentially trying to compete against one another in a way that actually keeps the industry down.'' This rising tide lifts all landlords, including but not limited to AIRM and YieldStar users.

33. In using AIRM and YieldStar, landlords expect this pricing alignment and use RealPage software in part for this reason. One landlord echoed the RealPage executive, using the phrase ''a rising tide rises [sic] all ships'' to explain that AIRM would move prices in a ''similar manner'' to how the top and bottom of the market move. Elsewhere that same landlord noted that ''if everyone in the market is doing well and everyone in the market has [sic] is having the rates go up, so should ours, right?'' An employee at Willow Bridge referenced RealPage's use of the phrase ''a rising tide raises all ships'' to explain how AIRM would provide price recommendations that amplify market trends. Multiple landlords have expressed their preference that their competitors use YieldStar and AIRM because widespread use would benefit them all. An executive of one landlord (which itself uses YieldStar and AIRM) said in a 2021 earnings call that more sophisticated, ''high-quality competition'' was better for that

[2] Defendants Camden, Cushman & Wakefield and Pinnacle, Greystar, LivCor, and Willow Bridge were active beta testers for AIRM and provided feedback to RealPage during the AIRM design process.

landlord when ''they all use revenue management. They are all smart. They raised rents when they should.'' RealPage highlighted in promotional materials the sentiments of another landlord who noted, ''It actually gives me chills to think about what a disadvantage we'd be at if we hadn't adopted YieldStar, knowing others are using it.''

C. RealPage's Transactional Data Is Fundamentally Different From Other Data Available to Landlords

34. The data that RealPage uses and supplies is unique relative to public data available to landlords on listing or property websites. As compared to public data, RealPage data is much more granular, covers a broader array of business information, and includes competitively sensitive data across several dimensions. For example:

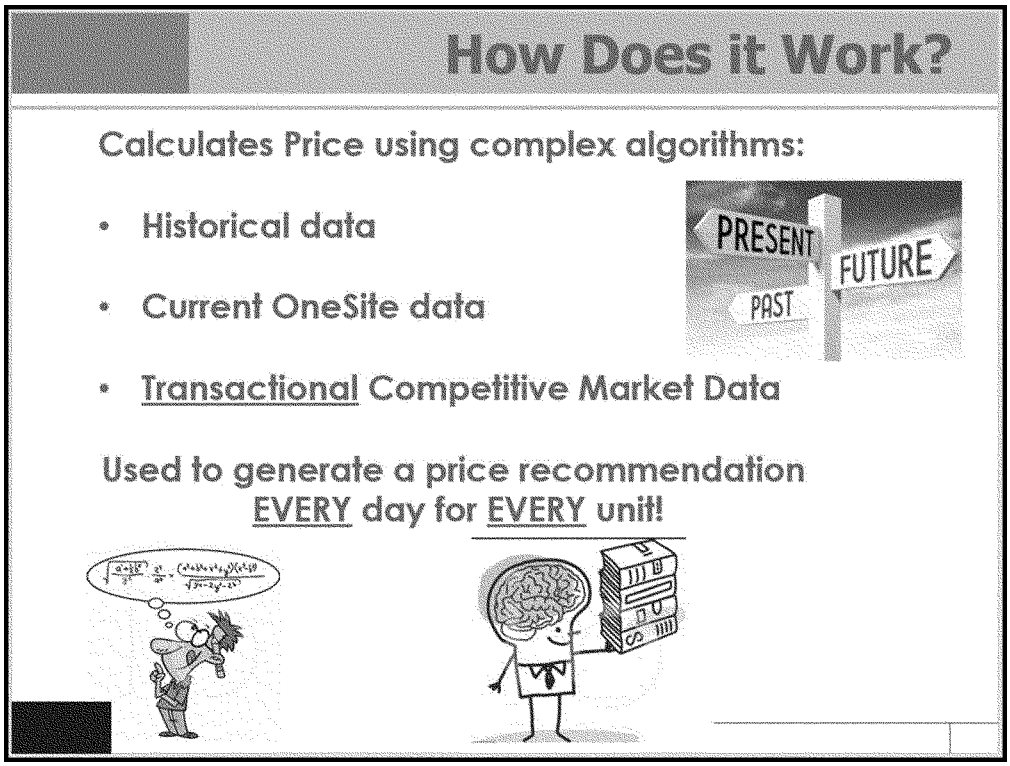
- *Information on Actual Transactions.* RealPage's data include, for each lease, the unit, floor plan, listed rent, final transacted lease price (including any discounts), and lease term.
- *Renewals.* RealPage's data include the same information for lease renewals. Information on renewals is not listed publicly—not even asking rents—leaving a significant blind spot for landlords not using RealPage.
- *Time Span.* AIRM and YieldStar have access to current and historical lease data, from the previous day and going back two to three years.
- *Future Demand.* The shared data further includes information on tenant demand, including detailed information on inquiries and applications by potential future tenants.
- *Accuracy.* Landlords have greater assurance of the accuracy of the data because it comes directly from the landlords' own databases.
- *Coverage.* The RealPage data covers millions of units from users of its revenue management software and other products.

35. RealPage touts how its data is different. As one RealPage pitch deck put it, ''we have [the] most data and the best data.'' And the ''[q]uality of data is best in class given that it is 'lease transaction data'—this provides insight into performance data from actual signed leases, both new and renewal, net effective of concessions.'' Another noted that without YieldStar ''you'll be pricing your renewals in the dark without insight into actual lease transaction data that YS uses to help you make pricing decisions. This is critical to price renewals right[,] especially in a downturn.''

36. Access to this data proves important in winning over revenue management clients, including skeptical ones. One RealPage senior manager noted that a ''highly suspicious CFO'' was won over in part by YieldStar's ''lease transaction data'' that allowed his company to ''achieve what his people couldn't achieve on their own.''

37. One landlord explained the benefits of YieldStar to its owner clients by calling the use of competitors' transactional data a ''game changer! We have 100% truth on [competitors'] activity powering YieldStar recommendations.''

38. Another landlord's internal training presentation on YieldStar highlighted the importance of having access to competitors' transactional data:



D. RealPage Revenue Management Software Uses Nonpublic, Competitively Sensitive Data To Recommend Prices

39. AIRM and YieldStar are built upon similar code and leverage competitive data in similar ways. LRO, on the other hand, was originally developed outside of RealPage and takes a different approach.

1. AIRM and YieldStar Leverage Competitively Sensitive Data To Generate Price Recommendations

40. AIRM uses competitors' nonpublic, transactional data in three

separate stages of the pricing process: (1) model training, (2) floor plan price recommendations, and (3) unit-level prices. YieldStar uses competitors' nonpublic, transactional data in stages two and three of its process.

(a) AIRM Model Training Relies on Competitively Sensitive Data To Generate Learned Parameters

41. In the first stage, RealPage trains its AIRM models using nonpublic data from OneSite and other property management software, totaling millions of executed lease transactions, new lead applications, renewal applications, and guest cards filled out by visiting potential tenants. This data is run through a machine learning model to generate learned parameters for supply and demand models that are then used for all AIRM clients across the country. Like the coefficients in a regression model, the learned parameters are applied to the data of a landlord's specific property, and to the data of its competitors, when AIRM makes pricing recommendations. RealPage generally retrains the models three to four times per year using updated nonpublic data.

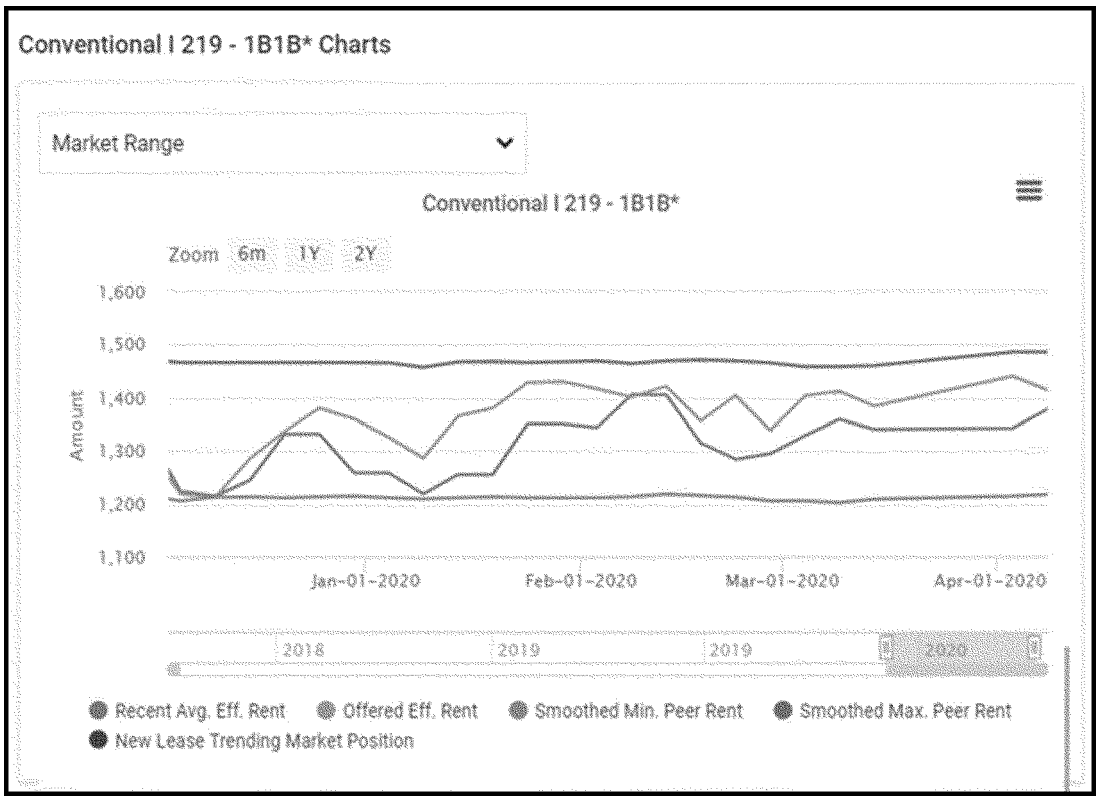
(b) AIRM and YieldStar Incorporate Competitors' Nonpublic Data To Generate Floor Plan Price Recommendations

42. In the second stage AIRM or YieldStar provides a price recommendation for every floor plan of a given property. A floor plan is a grouping of units that share similar characteristics, such as the number of bedrooms and bathrooms and square footage. Landlords define the floor plans in their buildings—for example, a large apartment building might have separate sets of floor plans for studios, one-bedroom, and two-bedroom apartments. As discussed below, AIRM and YieldStar use competitors' nonpublic, transactional data in nearly every step of setting a recommended floor plan price, including identifying peer properties, forecasting occupancy and leasing, increasing rents to match competitors' changes, and determining the magnitude of price changes.

43. *Identifying Peers.* First, AIRM and YieldStar use confidential transaction data to identify a property's peer properties, which include close competitors. In selecting peer properties, RealPage's algorithm generally looks for properties with similar floor plans, within close geographic proximity, and with similar effective rents over time. AIRM or YieldStar clients may review the list of peer properties and request that RealPage add or remove specific properties.

44. AIRM or YieldStar then uses the nonpublic data from competitors' executed leases to generate a market range chart for each floor plan. This chart identifies a ''smoothed'' market minimum effective rent and market maximum effective rent. The market minimum is a hard floor. AIRM and YieldStar will not recommend a rent below the market minimum. On the other hand, the market maximum is a ''soft ceiling,'' and the programs will recommend prices above the ceiling.

45. The client has access to the market range chart within the AIRM and YieldStar interfaces. As shown below, for each floor plan the client can see the smoothed market minimum and market maximum and where the client's own floor plan sits within the market range.



46. *Forecasting Occupancy and Leasing.* Every night, for each participating property, AIRM applies the model's learned parameters to that property's internal transactional data to forecast the number of expected vacancies and expected lease applications for a certain period into the future. AIRM may also use competitors' data to adjust the projected supply.

47. AIRM or YieldStar then determines whether actual leasing for a floor plan is on track to meet predicted

leasing. To do so, it creates a forecast of the number of leases over time, using nonpublic lease and application data from the subject property, and potentially from so-called surrogate properties (similar properties in the surrounding area).[3] When there is an imbalance between a property's actual and forecasted leasing, it recommends a price change.

48. *Changing Rents to Match Competitors.* Even when a property's supply and demand are balanced, RealPage's software will still recommend a price change, based on competitors' nonpublic data, when it determines that the market is moving. For example, if the minimum and maximum of the competing floor plans' effective rents increase, it will recommend a price increase to maintain the floor plan's market position (its price position relative to its competitors).

49. *Determining Magnitude of Price Changes.* Once AIRM or YieldStar has determined that it will recommend a price increase or a price decrease, it again uses competitors' transactional data to determine *how much* the price should move and provide a floor plan price recommendation. It uses nonpublic transactional data from peer properties, in addition to data from the subject property and surrogate properties, to generate a market response curve—analogous to a market demand curve—for every floor plan. This demand curve provides an estimate of how demand for particular apartments would change in response to changes in rents, a measure that RealPage calls elasticity. In other words, it uses competitors' nonpublic transactional data to calculate how many leases the property will likely gain or lose for a particular floor plan, for every price point along the curve. Using this data, AIRM or YieldStar can determine how much the price can increase and still achieve the target number of leases, or by how little price can decrease to maintain a target occupancy.

50. RealPage describes elasticity as a pivotal input into balancing supply and demand and, therefore, price.

51. The use of surrogate properties in this pricing process has the potential to push convergence on price even further. As two properties' surrogate sets become closer—and therefore their respective demand curves become more similar—AIRM and YieldStar will generate increasingly similar prices for the two properties. And the use of surrogates is common. One of the largest landlords in the country, for example, uses surrogates at over 80% of its properties.

52. This process repeats for every floor plan in the client's property, every night. A new floor plan price recommendation is generated daily.

(c) AIRM and YieldStar Use Competitors' Nonpublic Data—Including Data on Future Occupancy—To Determine Unit-Level Prices

53. A property manager at the landlord reviews each floor plan recommendation daily and enters the floor plan price. AIRM and YieldStar then use the floor plan price to generate prices for every unit within the floor plan. The unit price is shown in a pricing matrix, which provides the price for each combination of start date and lease term. To generate the price for an individual unit, the floor plan price is adjusted to account for unit-specific factors such as amenities (*e.g.,* a desirable view, the floor level, or an in-unit washer and dryer), staleness (*i.e.,* how long that specific unit has been vacant), and the timing of lease expirations. AIRM and YieldStar again use competitors' nonpublic data during this step in at least two ways.

54. First, AIRM and YieldStar use data on competitors' supply of multifamily housing to adjust recommendations to limit ''exposure'' with a feature called lease expiration management. Exposure refers to the number of units that are available for lease. Managing lease expirations is an important element of revenue management software. If too many leases expire and the corresponding units become available at the same time, supply increases and rents for those units will tend to drop. This process will also tend to repeat itself as the same units will become available at the same time a year later for leases with a standard twelve-month term.

55. The objective of expiration management is to smooth out this exposure so that landlords, as explained by one RealPage employee, ''remain in a position of pricing power.'' For example, if AIRM or YieldStar sees that a large number of units will likely be available in twelve months, it will increase the price recommendation for a twelve-month lease relative to price recommendations for leases of other terms, such as 11 months or 13 months, in order to nudge potential renters to accept those terms. Expiration management can only raise prices—AIRM does not lower a unit's price if the lease term would fall in an underexposed period.

56. This calculation does not rely *only* on the predicted future supply for the client's property. For any landlord who uses a ''market seasonality'' setting, AIRM and YieldStar *also* rely on competitors' transactional data and the supply for those competitors—including the supply of competitors' existing leases that expire in the future. AIRM and YieldStar thus work to manage lease expirations for the client's units based on how competitors' supply will change. RealPage strongly recommends to landlords that they use market seasonality.

57. The use of competitors' nonpublic data in expiration management to fill out the pricing matrix occurs regardless of whether the landlord accepts the AIRM or YieldStar recommendation. Thus, even if a landlord were to override every price recommendation, its rental prices would still be influenced by nonpublic information about its competitors' supply.

58. Second, AIRM and YieldStar include an amenity optimization feature. By pricing specific amenities within units, landlords can avoid making wholesale pricing changes to a floor plan if a specific unit fails to lease. Within the amenity analysis, AIRM and YieldStar provide market values for specific amenities to landlords, allowing them to compare their perceived value of an amenity with the nonpublic valuation of their competitors. The peer data include the market minimum and maximum value for specific amenities.

2. LRO Relies Primarily on Landlords To Input Data on Competitors

59. RealPage's LRO also provides pricing recommendations to users. Each week, LRO users manually input competitor information into the system that they have obtained from public websites or more questionable means, such as communicating directly with their competitors.

60. A small number of LRO users subscribe to a feature called AutoComp. With this feature, RealPage provides information on competitors' rents, traffic, and occupancy. This information comes from market surveys that RealPage compiles using call centers to call competitor properties. Landlords may use LRO without using AutoComp.

E. RealPage Uses Multiple Mechanisms To Increase Compliance With Price Recommendations

61. AIRM and YieldStar provide daily price recommendations. RealPage has taken multiple steps to increase

[3] If there is insufficient historical data for a particular building, or floor plan within that building, RealPage will use data from what it calls a ''surrogate property,'' which is the confidential transactional data from another property with characteristics similar to the subject property.

compliance with AIRM and YieldStar price recommendations. It designed AIRM and YieldStar to make it much easier to accept recommendations than to decline them. It built an auto-accept function and pushes clients to adopt it and increase its role. And its pricing advisors encourage landlords to follow AIRM and YieldStar pricing recommendations. Among their duties, pricing advisors review any request to override a price recommendation.

1. AIRM and YieldStar Make it Easy To Accept Recommendations and More Difficult and Time-Consuming To Decline

62. Every morning, the landlord's property manager chooses whether to accept the floor plan price recommendation, keep the previous day's rent, or override the recommendation. These options are the same for new leases and renewal leases. RealPage makes it easier and faster for a client to accept a recommendation than to decline it. When accepting recommendations, the manager can choose to do a bulk acceptance—she can accept all or multiple floor plan recommendations at once. But she cannot do the same when overriding, or rejecting, the recommendation.

63. Instead, for every recommendation that she does not accept—whether overriding or keeping the previous day's rent—the property manager must provide ''specific business commentary'' for diverging from the recommendation. This justification, RealPage instructs, should not be a mere preference for another price but must be based on a factor that the model cannot account for, such as local construction or renovations occurring in the building. It must be a ''strong sound business minded approach.''

64. The property manager knows that these recommendation rejections and accompanying justifications will be sent to a RealPage pricing advisor.[4] If the pricing advisor disagrees with the rejection or justification, the disagreement is escalated for resolution to a landlord's regional manager, who typically supervises the property manager.

65. As one client who complained to RealPage explained, RealPage's design is ''trying to persuade [clients] to take the recommendations (almost like we made it hard to do anything but).''

2. RealPage Pushes Clients To Adopt Auto-Accept Settings That Automatically Approve Recommendations

66. AIRM and YieldStar each include auto-accept functions. This functionality automatically accepts price recommendations falling within certain parameters. By default, AIRM and YieldStar set auto-accept parameters of a 3% daily change and an 8% weekly change. The landlord can change these parameters, disable or enable auto-accept, and even enable partial auto-accept. With partial auto-accept, if the recommendation exceeds the auto-accept parameters, the recommendation is accepted as far as the parameter permits. For example, if the auto-accept daily change limit is 4% and the price recommendation is 5%, using partial auto-accept will result in an increase of 4%. By enabling auto-accept, a landlord functionally delegates pricing authority to RealPage (within the bounds of the daily and weekly limits).

67. As part of the onboarding process, internal RealPage guidance states, ''AUTO ACCEPT should be confirmed as 'on' with parameters in place.'' Internal AIRM training explained that RealPage wanted to ''widen auto accept parameters'' by introducing the feature and then ''creating enough trust so that over time we have client[s] that are willing to let auto accept run with very wide parameters. . . AKA—accept all recommendations.'' RealPage trains pricing advisors to have an ''accountability conversation'' or a ''refresher on short term vs long term goals'' for clients that show less tolerance for increasing auto-accept parameters.

68. Even if a landlord does not want to use auto-accept, RealPage trains its advisors to convince the landlord to turn it on with 0% limits—a setting whereby auto-accept will never accept price changes. The reason? So that it is no longer a question of whether the client turns on auto-accept, but only a matter of convincing them to widen the parameters and further delegate pricing decisions. RealPage instructs its advisors on best practices: ''[I]f a partner is not ready to use auto acceptance, are they ready to use revenue management?''

3. RealPage Pricing Advisors Provide a ''Check and Balance'' on Property Managers To Increase Acceptance of Recommendations

69. RealPage offers landlords pricing advisory services. Landlords typically have an assigned pricing advisor, unless the client has internal revenue managers that were certified by RealPage. Pricing advisors play an important role in the daily review of pricing recommendations. Landlords' property managers are asked to review recommendations every morning by 9:30 a.m. After their review, a pricing advisor accepts agreed-upon pricing within an hour and escalates any disputes to the landlord's regional manager.

70. If a property manager disagrees with the direction of a recommended price change—*e.g.,* the manager wants to implement a price decrease when the model recommends a price increase—the RealPage pricing advisor escalates the dispute to the manager's superior. As a pricing advisor manager explained in a client training, the advisor would ''stop the process and reach out to our partners''—the property manager's supervisors—to ''talk about this further.'' The advisors, the manager elaborated, are part of a system of ''checks and balances.'' The client confirmed the value of this system to stop property managers from acting on emotions, which could limit RealPage's influence on their pricing.

71. Beyond the daily interactions between pricing advisors and their own property managers, clients agree to make meaningful changes when they use RealPage's pricing advisory services. Under the specifications for this service, clients agree to use AIRM or YieldStar exclusively to give quotes to potential renters, further tying landlords' pricing decisions to RealPage's software. Clients also agree to change their commission programs for leasing agents to ''ensure these programs motivate sales behavior that is consistent with the objectives of revenue growth.'' And clients further agree to revenue growth as the official metric to evaluate AIRM and YieldStar, as opposed to occupancy rates.

72. RealPage imposes additional requirements on landlords who want to use internal or in-house revenue management advisors with YieldStar or AIRM (rather than use RealPage pricing advisors). RealPage requires these landlords' employees go through RealPage certification. Certification is a multiday course in which landlords are trained—at times in the same session—on AIRM and YieldStar use and best practices, according to RealPage. Certification includes observing and leading pricing calls with property managers and passing a written exam. This certification program facilitates the landlords' agreements with RealPage to align pricing by ensuring that landlords' internal revenue managers are trained

[4] Some clients have internal revenue managers that are certified by RealPage. For those clients who have internalized the revenue management function, recommendation rejections may be routed to the internal revenue manager rather than a RealPage pricing advisor.

and tested to use AIRM and YieldStar in the same way.

4. Pricing Recommendations Heavily Influence Landlords' Behavior

73. RealPage defines an acceptance as where the final floor plan price is within 1% of the recommended floor plan price. According to that definition, the average acceptance rate across all landlords nationally for new leases between January 2017 and June 2023 is between 40–50%. But RealPage itself recognizes that acceptance rates are not necessarily the best measure of its influence; one employee explained that the spread between a floor plan recommendation and the final scheduled floor plan price is more useful for measuring model adoption—and therefore influence—than the binary accept/reject decision that the RealPage-defined acceptance rate reflects. Widening the definition of acceptance even slightly to account for partial acceptances illustrates the influence of recommendations: nearly 60% of final floor plan prices are within 2.5% of RealPage's recommendation, and more than 85% are within 5% of RealPage's recommendation.

74. RealPage's preferred measure of acceptance understates the influence of RealPage's price recommendations and the effect of competitors' data. AIRM and YieldStar use competitors' nonpublic transactional data to adjust unit-level pricing, after a floor plan recommendation has been accepted or rejected. RealPage's metric does not capture the cumulative effect of rate acceptances over time. Nor do they capture when a client is influenced by and partially accepts a recommendation.

III. Coordination Among Competing Landlords Is a Feature of This Industry

75. Several characteristics of apartment-rental markets make it easier for landlords to coordinate with, or accommodate, each other. Rental housing is a necessity for many Americans, meaning that demand is inelastic—that is, changes in rent produce relatively small changes in the number of renters. There is significant concentration among landlords in local markets, and these landlords engage in widespread, regular communications with one another. And RealPage makes rental units more comparable to each other in AIRM and YieldStar, allowing landlords to track one another more easily. These industry characteristics exacerbate the harm to the competitive process—and ultimately to renters—from the exchange of nonpublic, competitively sensitive data through RealPage and the use of the AIRM and YieldStar models.

A. Rental Housing Is a Necessity for Millions of Americans

76. Shelter is a basic, foundational necessity of life. And for tens of millions of Americans, conventional multifamily apartment buildings are the only reasonable option for much of their lives. Many renters cannot afford the significant down payment needed to purchase a single-family home, among other requirements.

77. Demand for apartments is relatively inelastic. Rising rents have disproportionately affected low-income residents: The percentage of income spent on rent for Americans without a college degree increased from 30% in 2000 to 42% in 2017. In 2021, the proportion of severely burdened households—households spending more than half of their income on gross rent—was 25%, or approximately 10.4 million households, an increase in approximately 1 million households since 2019. By 2022, this number increased to 12.1 million households. For college graduates, the percentage of income spent on rent increased from 26% to 34% from 2000 to 2017.

B. The Multifamily Property Industry Is Rife With Cooperation Among Ostensible Competitors

78. Within particular metropolitan areas and neighborhoods, the multifamily property industry is concentrated and replete with competitively sensitive discussions among ostensible competitors. Landlords have agreed with one another to share nonpublic, sensitive information, both indirectly through RealPage software and directly outside of RealPage's software. RealPage facilitates some of these discussions, while others are made directly between competing landlords. These discussions supplement and reinforce the indirect information sharing among landlords that occurs through AIRM and YieldStar. As a result of this coordination, RealPage's pricing algorithms are even more likely to restrain, rather than promote, competition.

1. At the Local Level, the Multifamily Property Industry Comprises a Small Number of Large Landlords Managing Buildings With Different Owners

79. In 595 zip codes with at least 1,000 total multifamily units across 125 core-based statistical areas, five or fewer landlords manage more than 50% of the multifamily units. Within the submarkets alleged in this complaint, there are at least 214 zip codes, each with at least 1,000 total multifamily units, in which five or fewer landlords manage more than half of those units. Similarly, within the ten core-based statistical areas alleged in the complaint, there are 144 zip codes, each with at least 1,000 total multifamily units, in which five or fewer landlords manage more than half of those units.

80. The same landlord often oversees nearby properties with different owners. In at least 502 zip codes, at least one landlord using AIRM or YieldStar oversees properties with different owners.

81. There is also overlap among RealPage pricing advisor assignments. In at least 683 zip codes, within 96 core-based statistical areas, a RealPage pricing advisor has responsibility for properties managed by different landlords. RealPage takes no steps to avoid assigning the same pricing advisor to properties with different owners, even if those properties compete with each other or are RealPage-mapped competitors.

2. Landlords Regularly Discuss Competitively Sensitive Topics With Their Competitors and Swap Information

82. Landlords regularly solicit and obtain nonpublic information about inquiries by prospective renters, occupancy, and rents from their direct competitors. Although this information is not as accurate or thorough as the transactional-level data shared with AIRM and YieldStar, it is nonetheless sensitive competitive information.

83. Landlords collect this information through a variety of means, including weekly phone calls, emails, and in-person visits. Some landlords also share information on their local geographic markets through shared Google Drive documents. One RealPage employee explained to his colleagues, reflecting on his former time working at a landlord, that these weekly inquiries ''required cooperation among the comp[etitor]s but wasn't hard to get that.'' In June 2023, a senior director at Cushman & Wakefield admitted that ''this practice has been prevalent in our industry for a long time.''

84. Landlords not only knew of these so-called ''market surveys,'' but expected their property managers to participate. As a manager of Cushman & Wakefield's revenue management department explained, ''we have always expected our properties to continue doing a traditional market survey[,]'' which ''gives us insight into the very specific handful of competitors closest to the subject property.''

85. At a February 2020 industry event, representatives from Cushman & Wakefield and two other landlords shared tips on collecting information on concessions and net effective rents from competitors. The suggestions included bi-weekly and monthly meetings with competitors, sponsored ''cocktail hours for regional competitors to share info and build relationships and rapport,'' and using Google Drive documents to share information on a weekly basis. Building relationships with competitors to get accurate data was ''critical.'' The representatives cautioned that the collected data was used to make ''major decisions about pricing,'' so the landlord employees collecting data should be trained accordingly to ask such questions as ''are you seeing a slow down?'' and ''are you adjusting pricing?''

86. Some landlords engage in even more sensitive communications about price, demand, and market conditions. These communications are not isolated instances at a specific property. Rather, they are conversations at the corporate revenue management level about strategies and approaches to market conditions that apply to the landlords' business across all markets.

87. For example, in January 2018, Willow Bridge's director of revenue management reached out to Greystar's director of revenue management and asked about Greystar's use of auto accept in YieldStar. In response, Greystar's director provided Greystar's standard auto-accept settings, including daily and weekly limits and for which days of the week auto accept was used. The Greystar director, explaining why she provided this information, testified that the Willow Bridge director was a ''colleague,'' even though Willow Bridge was a competitor to Greystar.

88. In March 2020, Cushman & Wakefield's director of revenue management reached out to Willow Bridge's director of revenue management. The Cushman & Wakefield director wanted to hold a call among revenue management executives at multiple landlords to discuss market conditions, use of YieldStar, and strategy plans. The Willow Bridge director agreed and suggested a small number of landlords to invite to keep the group ''tight.'' The directors agreed to reach out to Greystar, as well as several other landlords.

89. Also in March 2020, a senior executive at Greystar obtained a copy of Willow Bridge's sensitive strategic plans regarding the COVID–19 pandemic. The plans included Willow Bridge's corporate protocols for concessions, rent increases, and lease terms. The plans recommended that property managers work closely with YieldStar and LRO to preserve rent integrity. The Greystar executive forwarded Willow Bridge's plans to executives at Cushman & Wakefield and another landlord. All four landlords compete with one another.

90. In September 2020, Camden's director of revenue management reached out to Greystar's director of its internal revenue management team. Camden asked Greystar—a direct competitor—what increases on renewal pricing Greystar had seen in August and offered what it had seen. Greystar's director replied with information not only on August renewals, but also on how Greystar planned to approach pricing in the upcoming quarter. Greystar's director further disclosed its practices on accepting YieldStar rates and use of concessions. As the conversation continued, the two competitors shared additional highly-sensitive information on occupancy—including in specific markets—demand, and the strategic use of concessions.

91. At the same time, Camden's director emailed a revenue management executive at LivCor and asked how LivCor was faring on raising renewal rates. He explained his request by noting that Performance Analytics provided some good data, but it was ''hard to see what our competitors are signing today.'' The two executives shared information about their respective renewal increases. After the Camden executive passed this information along internally, he continued his outreach with several other landlords and with the LivCor executive—who in the meantime had reached out to three other landlords about their renewal rates. Camden's internal team decided to raise a renewal cap to get to the same renewal gains as LivCor.

92. Camden's director received competitively sensitive information from at least four competitors. Another senior executive at Camden asked him to compile the information so it could be shared internally. That executive noted the usefulness of the competitors' information and the need to take advantage of the shared information while it was fresh.

93. In June 2021, Willow Bridge's head of revenue management emailed Greystar's revenue management director. She proposed collaborating with Greystar to convince a client to move all of its properties, including those managed by Willow Bridge and those managed by Greystar, to AIRM. But she also noted that, in thinking about ''the larger picture as well,'' it could be useful to ''coordinate with the other companies that we often share business with'' to prepare to move their clients to AIRM as well. Greystar responded favorably to transitioning the joint client to AIRM.

94. In November 2021, a revenue management executive at LivCor emailed an executive at Camden to propose a call to discuss Camden's ''renewal philosophy,'' for the purpose of informing how LivCor calculated renewal increases. The two spoke that day. The following day, another LivCor executive—who was included on the call—thanked the Camden executive for the opportunity to ''connect on industry best practices'' and asked another ''operational question'' about implementing ''larger renewal increases.'' The executives exchanged emails over the next few months, including discussing their respective strategies on maximum increases to lease renewal prices. They shared not only their increase limits in specific markets but also what price increases they were able to achieve. For example, in April 2022, the executive at LivCor reached out to Camden to share that ''my current thinking (not sure it's right, just where my mind is at) is. . . prices for almost everything are up 20%. Therefore, unless there is a good reason not to, should we be increasing rates on rentable items by 20%?'' The Camden executive responded, ''I like your thinking.'' He continued, ''Typically, we lean into the demand signals to inspire a price increase. . . . I'm divided on whether the default increase should be 20% or closer to the 10% . . . . Curious what your thoughts are!?''

95. In September 2021, a property manager at Cortland explained to a colleague that the manager had called two competitors and received from them pricing information on two-bedroom and three-bedroom units. The property manager asked for the information to decide how to act on YieldStar's price recommendations.

96. Landlords also engage in group discussions with local and national competitors about sensitive topics. For example, for a number of months in 2020, dozens of ''high-level participants'' from competing landlords participated in weekly ''multifamily leadership huddle'' videoconferences. The organizer informed participants that ''the goal of the call is to share information about what our companies are doing, share some collateral and resources,'' and then—perhaps recognizing the problematic nature of these calls—he claimed that ''then we hang up and make our own decisions.''

97. In one such call in April 2020 with over 100 attendees, participants discussed a number of topics, including ''pricing and renewal strategies.'' Several senior landlord executives, including a Greystar senior managing director and a CEO of another landlord, participated and shared their practices on new leases and renewals, use of renter payment plans, and use of YieldStar and other revenue management software. On a similar call in October 2020, participants discussed current and forecast rent prices, renewal strategies, and use of concessions. A Willow Bridge employee forwarded a colleague notes from the call, and he specifically highlighted information about a competitor's use of concessions.

98. These conversations among competing landlords have extended from the national level to local markets across the country. For example, in Minnesota, property managers from Cushman & Wakefield, Greystar, and other landlords regularly discussed competitively sensitive topics, including their future pricing. When a property manager from Greystar remarked that another property manager had declined to fully participate due to ''price fixing laws,'' the Cushman & Wakefield property manager replied to Greystar, ''Hmm . . . Price fixing laws huh? That's a new one! Well, I'm happy to keep sharing so ask away. Hoping we can kick these concessions soon or at least only have you guys be the only ones with big concessions! It's so frustrating to have to offer so much.'' The property managers from Greystar and Cushman & Wakefield continued to discuss competitively sensitive topics. For example, in response to Greystar's tipoff that it had reduced concessions and ''hop[ed] the Spring/Summer market allow us to pull further back on concessions,'' the Cushman & Wakefield property manager replied, ''That's great news and I love hearing about the concessions being pulled back. We have done the same and hoping the rest of the market follows suit.'' These communications between RealPage users that are ostensibly competitors are examples of the industry-wide coordination that magnifies the anticompetitive effects of RealPage's software.

99. In addition to contacting each other directly, many landlords also exchange information through other intermediaries. One vendor offers a tool for landlords to exchange with one another nonpublic information on concessions, net effective rents, inquiries and visits by prospective renters, and occupancy that is pulled from each landlord's property management software. Over 150 landlords nationally have used this service, including Greystar, LivCor, and some of the other largest landlords across the country. The vendor's CEO described this as a ''quid pro quo or give to get'' arrangement among landlords where ''if you share this data with me, I'll share the same data.'' A RealPage employee noted that this vendor makes it ''quicker and easier to get your market surveys.''

100. Some landlords use this direct exchange of competitively sensitive information to update competitor rents within LRO—a practice that RealPage is aware of and accepts.

101. Recently, under the scrutiny of antitrust lawsuits, some landlords have adopted internal policies prohibiting ''call arounds'' and other direct sharing of competitively sensitive information with direct competitors. But even assuming that their property managers fully comply with these legally unenforceable internal policies, these landlords continue to use RealPage's revenue management software.

3. At RealPage User Group Meetings, Landlords Discuss Competitively Sensitive Topics

102. RealPage holds monthly ''user group'' meetings attended by competing landlords that use RealPage's software. There are separate user group meetings for LRO and for YieldStar and AIRM.[5] One of RealPage's stated purposes for the user groups is to ''to promote communications between users.'' Attendees include a wide mix of competing landlords. For example, the June 2022 YieldStar user group included representatives from five of the largest property management companies in the country, among a larger group.

103. Recurring topics at the user group meetings include product enhancements and an ''idea exchange'' on potential changes to the products. The user group participants often vote on the proposals discussed in the idea exchange. But discussions have covered competitively sensitive topics, including managing lease expirations, pricing amenities, the use of concessions, pricing strategies, and how to manage properties during the COVID–19 pandemic. RealPage encouraged landlords to use the user group meetings to discuss such topics in their industry and set agendas for these meetings to aid them in doing just that, remarking that ''[t]he user group is meant to be self-governed to a degree and the clients should be leading it.'' These RealPage-fostered discussions among competitors enhance and facilitate the landlords' agreement with RealPage to use AIRM and YieldStar to align pricing.

104. At an April 2020 YieldStar user group meeting, the participants discussed strategies for handling the COVID–19 pandemic. In the presentation, two RealPage employees and a landlord led a group discussion of trends in rent payments and collections and provided five strategic tips. One tip encouraged landlords to ''push for occupancy but don't give away the farm (pricing).'' Another counseled landlords to ''balance internal and external dynamics'' and, referring to the nonpublic information used by YieldStar, to ''use transactional market data for decision support and to know when you can be more aggressive'' in pushing higher rents. Invited attendees included representatives from at least twelve landlords. At this meeting, Greystar and another landlord shared information on their usage of payment plans with tenants.

105. In May 2020, RealPage started a YieldStar user group meeting by surveying them on concessions. RealPage asked landlords how many of their properties offered concessions, whether concessions applied to new leases or renewals, and the types of concessions offered (such as discounts, gift cards, or other benefits). Invited attendees included representatives of thirteen landlords.

106. In March 2021, the user group meeting included a discussion on possible adjustments to how YieldStar calculated lease expiration premiums. A RealPage executive shared that she liked the idea of adding weekend premiums to incentivize prospective renters to move in during the week, and commented that ''the rev[enue] potential would then scale up.'' The LivCor representative responded in favor of weekend premiums, and another user group member suggested adding the proposal to the user group idea exchange. RealPage agreed to do so.

107. RealPage began its agenda for an April 2021 YieldStar user group meeting with ''strategic insights'' from a RealPage economist. This employee shared ''21 key strategic insights,'' including ''focus on renewals,'' ''be cautious with concessions,'' and ''drive up revenues—not just base rent.'' Specifically, he urged the group to ''push up new and renewal pricing where demand [is] solid'' and warned against over-relying on concessions. They were instead to ''trust the science'' of YieldStar.

[5] RealPage previously held separate AIRM and YieldStar user groups but combined them in 2023.

108. In May 2021, RealPage included a ''Back to Basics'' discussion in a YieldStar user group meeting. This discussion covered ''returning to renewal increases post-COVID'' and ''declining concessions,'' as well as eviction moratoria and areas where acceptance rates were ''seeing significant uptick in past 6 months.'' The meeting group chat is even more revealing. Over a period of approximately fifteen minutes, representatives from fifteen landlords shared their plans for renewal increases and their use of concessions. The questions were posed, ''At what point do we go back to normal? I[f] we go back to normal[,] [i]s it now? Is anyone seeing that the model is raising rent and are you doing it?'' In response, these representatives made statements on renewal increases such as ''increasing, back to normal,'' ''major rent growth on the west coast,'' ''increasing the renewals,'' ''almost all markets we are raising rents,'' ''actually raising more than before covid at some,'' ''raising,'' and ''we are pushing to get back to normal. Sending increases.'' A representative from LivCor stated, ''increasing renewals and pushing new lease rents.''

109. The user group members were similarly open about their disinterest in concessions, signaling to each other that they do not intend to offer them or would offer them less frequently. Their pronouncements included ''no consessions [sic],'' ''no concessions,'' ''considerably less concessions,'' ''less frequent and less aggressive,'' ''no concessions except in markets with a lot of lease-ups,'' and ''almost no concessions currently.'' A representative from Willow Bridge noted concessions had ''gone away a LOT. People asking for a free month on renewals and being denied, but still signing the renewal.''

110. When the discussion turned to acceptance rates, a RealPage employee stated that rates had ''pretty much gone back to pre-COVID. Rate Acceptance has grown 11% over the past 6 months.'' A landlord responded that they had ''seen our acceptance rate increase tremendously.'' Another user group member explained to the group, for ''about ⅓ of the communities I manage the [YieldStar] model was too slow to respond, and we are pushing rates above market and above YS rec[ommendation].'' A representative from Willow Bridge concluded, ''Are we deciding as a group to remove hesitation?:).''

111. The LivCor representative who attended this May 2021 meeting testified that similar discussions happened numerous times during the COVID–19 pandemic—specifically, the beginning of 2020 through the middle of 2022. In these meetings, user group members discussed new and renewal rent increases, concessions, and renewal strategies, as well as other sensitive topics.

112. RealPage claims that this and other user group meetings were not recorded.

113. The July 2021 YieldStar user group meeting, held at RealWorld (a RealPage-hosted industry event), included a roundtable discussion among competitors. One of the discussion topics? ''What is the one thing you consistently consider outside of the model when accepting or changing price and why?''

114. At the October 2021 YieldStar user group meeting, a RealPage economist gave a presentation regarding the 2022 market outlook. RealPage presented analyses on current occupancy and pricing, and on expected occupancy and rent growth in 2022 by geographic regions.

115. At the July 2022 RealWorld YieldStar user group meeting, RealPage hosted a ''roundtable discussion'' on market volatility and its impact on how to use revenue management, unit amenities and their impact on tenant rents, and best practices for conducting lease ups.[6]

116. RealPage recognized the sensitive nature of the information shared at these meetings. Beginning in late 2022, after public reporting about AIRM and YieldStar, RealPage added an antitrust compliance statement in the user group presentations. Among other directions, the statement instructed participants not to discuss ''confidential or competitively sensitive information,'' and then noted that this included ''you or your competitors' prices or anything that may affect prices, such as current or future pricing strategies, costs, discounts, concessions or profit margins.'' But these were the very topics of previous user group meetings, as described above, that RealPage encouraged its users to discuss. And these are the very types of nonpublic information that AIRM and YieldStar use to recommend and determine prices.

117. Landlords frequently take advantage of RealPage user group meeting invites to email each other directly. In August 2020, for example, an employee of Cortland emailed a user group invitee list and asked them to support a change to how YieldStar calculated the number of leases needed. In response, an employee of a different landlord agreed, adding that ''I also rely on comparing available units to adj[usted] leases needed, to forecast leases, to gut check the pricing recs. These data points are always a factor in my pricing decisions.''

C. RealPage Uses Nonpublic Information To Allow Landlords to More Easily Compare Units on an Apples-to-Apples Basis

118. Renters typically search for a rental unit using certain key criteria, including the number of bedrooms and the location. Recognizing this market reality, RealPage enables landlords to more easily compare unit prices. When picking a property's ''peer set,'' RealPage matches floorplans with the same number of bedrooms that are geographically proximate. This makes it easier for landlords, through AIRM and YieldStar, to track and respond to competitors' movements at the floor plan level.

119. To account for amenities, RealPage instructs landlords to identify amenities using standardized naming conventions so that RealPage can use machine learning to group amenities together. RealPage then provides the market value for specific amenities, allowing landlords to more accurately identify and track how their competitors value these amenities and adjust their own pricing accordingly. The peer data include the market minimum and maximum value, as well as market quartile values, for specific amenities.

IV. Realpage Harms the Competitive Process and Renters by Entereing Into Unlawful Agreements With Landlords To Share and Exploit Competitively Sensitive Data

120. AIRM's and YieldStar's use of nonpublic, competitively sensitive data is likely to harm, and has harmed, the competitive process and renters. AIRM and YieldStar distort the competitive process by using nonpublic data to maximize pricing increases and minimize pricing decreases. AIRM and YieldStar incorporate special rules, called ''guardrails,'' that override the ordinary functioning of the algorithms in ways that tend to push rival landlords' rental prices higher than would occur in a competitive market. RealPage presses landlords to curtail ''concessions'' to renters. And AIRM and YieldStar's ''lease expiration management'' features aim to sequence vacancies to maximize landlords' pricing power.

[6] A lease up is typically a pre-leasing period (such as with a newly constructed property) where a landlord is seeking to reach a certain, initial occupancy threshold.

A. AIRM and YieldStar Have the Purpose and Effect of Distorting the Competitive Pricing of Apartments

121. As RealPage frequently trumpets to landlords, ''a rising tide raises all ships.'' AIRM and YieldStar ensure that the 'tide' flows primarily one way—higher rental prices. In a hot market, AIRM and YieldStar will recommend price increases to test what the market will bear, while in a down market AIRM and YieldStar will, to the extent possible, still increase or hold prices and minimize price decreases to reach the target occupancy rate.

122. AIRM and YieldStar are designed to help landlords press pricing beyond what they could otherwise achieve while reducing the risk that other landlords would undercut them. A revenue manager at Willow Bridge explained it succinctly: YieldStar is ''designed to always test the top of the market whenever it feels it's safe to.'' By using competitors' sensitive nonpublic data to generate elasticity estimates, among other things, AIRM and YieldStar can recommend higher price increases to extract more money from renters without losing an additional lease. As RealPage explained to a YieldStar client in training, this pricing elasticity measurement informs ''how far do we stretch and pull pricing within the market.'' That, in turn, means that ''we may have a $50 increase instead of a $10 increase for that day.''

123. That insight, gleaned from competitors sharing sensitive, transactional data with RealPage, which is in turn shared with landlords through pricing recommendations, removes uncertainty and competitive pressure that benefits renters. As one landlord put it, these products ''eliminate the guessing game'' on rent.

124. As RealPage explains to its clients, AIRM and YieldStar reveal ''hidden yield.'' This extra yield or revenue is hidden in a competitive market—a market in which competitors do not share sensitive information with each other—because landlords ''can't see the opportunity'' and ''fail to capture [the] full opportunity.''

125. AIRM and YieldStar disrupt the normal competitive bargaining process between landlords and renters. They place landlords in a better negotiating position vis-à-vis renters. Landlords using AIRM and YieldStar know that these models recommend floor plan prices and price units incorporating nonpublic data of their competitors, including effective rents and occupancy rates, all of which allow landlords to raise price with more certainty.

126. As landlords appreciate, AIRM and YieldStar use competitors' nonpublic data to predict with more certainty the highest price that the market will bear for a particular unit. A landlord is therefore less likely to negotiate on price. Any potential negotiation instead turns on lease term and move-in date, which AIRM and YieldStar adjust the pricing for to avoid overexposure for the landlord in the future.

127. AIRM and YieldStar also encourage landlords to follow each other in raising rents. When transactional data reveal that peers are raising effective rents—particularly the highest and lowest competitors for a given floor plan—AIRM and YieldStar follow with recommendations to increase rental prices. This movement with the market is ingrained in the AIRM and YieldStar models; AIRM and YieldStar will not recommend a floor plan price that falls below the market minimum.

128. Accordingly, as adoption of AIRM and YieldStar increases among peer competitors, the use of AIRM and YieldStar can push prices up through a feedback effect. As peers move up, other AIRM or YieldStar users may move up accordingly. This phenomenon, where participating landlords ''likely move in unison versus against each other,'' a RealPage executive testified, explains ''the rising tide.'' The same executive saw evidence of this ''rising tide'' in 2020: When looking at multiple peer sites using YieldStar, ''we started to see the trajectory of performance and trends be eerily similar when comparing subject sites and comp sets, thus showing that we are in fact 'r[a]ising the entire tide.' '' He acknowledged that YieldStar contributed to market prices rising as a tide.

129. Landlords rely on competitors' data within AIRM and YieldStar to determine their prices and how hard they need to try to be competitive. A revenue management director at Greystar noted in an internal AIRM deck that competitors' data is ''like the boundaries of the street you are driving on.'' The director elaborated that ''the competitive market range are [sic] the edges of the road, staying in those boundaries are [sic] necessary to get you to the destination.''

130. Another landlord that used YieldStar told RealPage that within a week of adopting YieldStar they started increasing their rents, and within eleven months had raised rents more than 25% and eliminated concessions. The landlord added that they were now pricing at the top of their peers and, importantly, had ''brought the rest of the Comps rents up with us.'' A RealPage executive responded internally that this was a ''great case study that highlights performance before, during, and a result of YS [YieldStar].''

131. A landlord explained in an internal presentation that because YieldStar recommends floor plan pricing that moves with the market—a market position—YieldStar would use competitors' data to inform ''how competitive we need to be [e]ach [d]ay.''

132. AIRM uses machine learning to train models on competing landlords' sensitive data. The parameters learned in this training are then applied to each AIRM client.[7] As a result, the model uses the same method and learned parameters to generate price recommendations from the relevant data for each landlord.

133. This aligns and stabilizes prices in at least two ways. First, it reduces volatility in *how* prices change, compared to a situation in which each client sets prices independently. No longer do competitors react in distinctive ways to changing market conditions as they would in a market without access to competitors' transactional data. Instead, AIRM price recommendations tend to standardize those reactions. This leads to the second result: pricing recommendations, and consequently pricing decisions, become more predictable and aligned among competitors as each is using the same set of learned model parameters.

134. RealPage has even manipulated competitor mappings to increase the likelihood that AIRM or YieldStar would recommend price increases. For example, a prominent client asked why a subject property had mapped peers located more than 100 miles away, in a different metropolitan area, when there were satisfactory mapped competitors within five miles. RealPage's response was that if these distant properties were not mapped, the client's property would be at the top of the market and it would be more difficult for AIRM to recommend price increases. RealPage had originally mapped these distant properties to give the model more room to recommend price increases for the client's property.

135. This dynamic exists not only in markets with growing demand, but also so-called ''down markets,'' where demand is decreasing. In a competitive market with a fixed supply (at least in the short run) of housing units, a demand decrease would result in prices falling. But AIRM and YieldStar resist price decreases in down markets as much as possible while achieving targeted occupancy rates. RealPage told one prospective AIRM client that the combination of ''AI and the robust data in the RealPage ecosystem'' would allow the landlord to ''avoid the race to the bottom in down markets.''

136. Using competitors' transactional data to calibrate and set the bounds of its model enables YieldStar and AIRM to decrease prices as little as possible in a down market. As one example, in 2023 a landlord reached out to RealPage with concerns about price recommendations at a property. Despite the property having too many vacancies and peer properties decreasing in price, AIRM was recommending price increases, frustrating the property owner. A senior RealPage executive responded that the model was not lowering prices because ''there isn't much elasticity between the recommended position and the current one'' and ''the model would recommend the highest possible position [*i.e.,* price] without affecting demand.''

137. RealPage succinctly summarized for landlords the effect of using AIRM and YieldStar in down markets: it ''curbs [clients'] instincts to respond to down-market conditions by either dramatically lowering price or by holding price when they are losing velocity and/or occupancy.'' These tools instill pricing discipline in landlords, curbing normal fully independent competitive reactions by substituting them with interdependent decision-making (*i.e.,* through the use of pricing recommendations based on shared, competitively sensitive information). These products ensure that clients are ''driving *every possible opportunity to increase price* even in the most

[7] There are separate AI Supply models, and therefore potentially different learned model parameters, for clients using Yardi's property management software and clients using other property management software. But within these two categories the learned model parameters for the AI Supply models are the same.

downward trending or unexpected conditions.''

138. When one client wanted to cancel YieldStar, a RealPage executive noted to colleagues that with cancelation the client would lose ''our helping them mitigate damage during rent control and covid.'' In particular, the client would lose ''us helping them rise with the tide given their strategy.''

139. Landlords understand the sensitivity of the information being shared and the likely anticompetitive effects. One potential client put it succinctly to RealPage: ''I always liked this product [AIRM] because your algorithm uses proprietary data from other subscribers to suggest rents and term. That's classic price fixing . . . .''

140. Cushman & Wakefield recognized the anticompetitive potential of sharing this level of detailed competitor data. When a property owner asked for information on specific competitors, Cushman & Wakefield's director of revenue management replied that the requested tool, RealPage's Performance Analytics with Benchmarking, did not provide information on specific competitors. The reason? Performance Analytics with Benchmarking ''tracks transactional information therefore due [to] the potential pricing collusion, it's anonymize[d] by RealPage.'' Performance Analytics with Benchmarking draws from the same transactional database as AIRM and YieldStar. And while AIRM and YieldStar do not display the granular transactional data to the user, AIRM and YieldStar see and use that data. The price recommendations are based upon the very data that this client recognized could lead to collusion.

141. Even RealPage employees selling LRO recognized the anticompetitive harm from using competitors' transactional data to recommend prices. In a 2018 training deck provided to clients, RealPage explained, ''we often times get the question about if comps are on LRO, can we just update the rents for you? Unfortunately, no, we can't. That could be considered price collusion, and it's illegal.'' But this is precisely what AIRM and YieldStar do.

B. AIRM and YieldStar Impose Multiple Guardrails Intended to Artificially Keep Prices High or Minimize Price Decreases

142. Unsatisfied with relying merely on competitively sensitive data to advantage landlords, RealPage created ''guardrails'' within AIRM and YieldStar to force adjustments to the price recommendation. But these guardrails serve as one-way ratchets that help landlords, not renters, by increasing price recommendations or limiting a recommended decrease. And each of these guardrails makes use of competitively sensitive data that landlords agree to share with RealPage. These guardrails have even spurred multiple landlords to tell RealPage that AIRM and YieldStar are not dropping recommended rents as much as their individual conditions, or even market conditions, would warrant.

143. *Hard Floor.* AIRM and YieldStar will not recommend a floor plan price that falls below the smoothed market minimum effective rent. The market minimum is a hard floor. AIRM and YieldStar thus explicitly constrain floor plan price recommendations based on the prices of competitors, using shared nonpublic information.

144. *Revenue Protection Mode.* RealPage created a ''revenue protection'' mode that effectively lowers output to increase revenues. Revenue protection activates when AIRM or YieldStar predict—using calculations incorporating competitors' data—that demand is too low for a landlord to meet its target occupancy. Rather than lowering the price to stimulate demand, the algorithm reduces the target number of leases. AIRM and YieldStar then maximizes revenue for the *reduced* occupancy level, which tends to reduce price decreases or increase rental prices.

145. RealPage acknowledges that revenue protection ''may seem counterintuitive to leasing needs.'' In June 2023, a landlord complained to RealPage that ''something in your model is broken'' because ''the pricing model is not lowering rents dramatically'' despite the client's high exposure during a busy summer leasing season. RealPage explained that, with revenue protection, ''the model still sees the way to make more revenue is to lease fewer units at higher prices.'' In other words, the model seeks to ''raise rates to get the highest dollar value possible for the leases we can statistically achieve'' and ignore those leases that the client wants but the model predicts, using competitors' data, the client will not get.

146. The model's hard price floor can trigger revenue protection mode. In May 2022, for example, a landlord complained that AIRM was recommending price increases despite a projected shortfall in leases. Because revenue protection mode cannot be turned off, the RealPage pricing advisor recommended that the client reduce sustainable capacity. Sustainable capacity is a client-set parameter that imposes an inventory constraint and determines the number of leases AIRM and YieldStar will try to achieve. This is, of course, what revenue protection mode functionally does on its own: increase inventory constraints to reduce output.

147. This phenomenon, a RealPage employee explained internally, was ''true revenue protection mode.'' The client's floor plan was priced toward the bottom of its competitors. AIRM did not see any price decrease that would achieve the original target number of leases without dropping below the market floor (determined using competitors' data). Because AIRM never recommends prices below the market floor, AIRM instead reduced the number of leases and optimized against that new, lower occupancy rate.

148. Revenue protection mode interrupts AIRM's and YieldStar's normal revenue maximization process. As a RealPage data scientist explained, ''the model really wants to reduce rent but is prevented from doing so by the revenue protection restriction.'' Revenue protection leads to higher prices and lower occupancy.

149. *Sold-Out Mode.* Once a landlord reaches its targeted capacity for a particular floor plan, the model considers that floor plan ''sold out'' even though units may still be physically available. In that situation, AIRM and YieldStar recommends the maximum rent charged by a property's competitors, even if the floor plan's previous price was far lower.

150. RealPage intentionally designed sold-out mode to use competitively sensitive data to lift rents. In an earlier version of the software, sold-out mode pushed rents to 95% of that floor plan's highest recently achieved rent. But RealPage modified the algorithm in 2022 to go ''straight to 100% of comps,'' deliberately aligning rents with competitors' highest rents, rather than the property's own historical performance.[8]

151. *The Governor.* AIRM and YieldStar favor recommended price increases over price decreases. When the model calculates that the current day's ''optimal'' price will result in greater revenue than the previous day, a feature called the ''governor'' causes the model to recommend the current day's optimal price.[9] But when AIRM or YieldStar calculates that the current

[8] RealPage has at least considered changing this model logic because it introduced meaningful pricing volatility and significant price increases. Even if RealPage has implemented this proposed logic change, the new model logic still incorporates competitors' confidential rents because AIRM and YieldStar recommend a market position that is tied to the bottom and top of the market, as defined by mapped competitors.

[9] In some circumstances AIRM will cap the floor plan recommended price increase at a five percent increase.

day's optimal price will result in less revenue than the previous day, the governor recommends the recent average price *even though it is not optimal for the current day.* In other words, when market conditions weaken and the model calculates that a price decrease is warranted, this guardrail kicks in and recommends keeping the recent rent even though it is suboptimal. This asymmetry favors price increases over price decreases.

152. The effect of these guardrails is intentionally asymmetric. AIRM and YieldStar recommend price increases generated by the model. But the guardrails reduce or eliminate certain proposed price decreases even though the model has determined such deviations may contravene the landlord's individual economic interest.

C. AIRM and YieldStar Harm the Competitive Process by Discouraging the Use of Discounts and Price Negotiations

153. RealPage discourages landlords using AIRM and YieldStar from discounting rents. In the multifamily property industry, discounts typically consist of ''concessions,'' which are financial allowances (such as a free month's rent or waived fees) offered to incentivize renters. Concessions may be offered generally or negotiated individually with a potential tenant.

154. In a competitive marketplace, each landlord may independently decide to offer concessions so that it can better compete in enticing lessors. But, again, RealPage seeks to replace fully independent, competitive decision-making with collective action by ending concessions. AIRM and YieldStar do not work as well when landlords use one-off or lumpy concessions. In its ''best practices'' for revenue management to landlords, RealPage's guidance is simple: ''Eliminate concessions.'' Detailed ''best practices'' documents for both YieldStar and AIRM users explain that ''concessions will no longer be used in conjunction with'' YieldStar and AIRM.

155. When onboarding a new property, RealPage emphasizes the importance of accepting price recommendations without offering discounts, including ''no concessions.'' Concessions cause landlords to deviate from what RealPage determines is the maximum revenue-generating price.

156. Landlords have worked to implement RealPage's requests. In one YieldStar training, Greystar explained that ''Concessions are gone!'' In a client-facing FAQ document about its revenue management products, RealPage explained that ''the vast majority of our clients have discontinued the use of concessions.'' A 2023 RealPage client presentation showed that the number of units offering concessions generally trended downward from approximately 30% of units in 2013 to under 15% in 2023. A client's refusal to offer concessions is bolstered by its awareness of competing landlords receiving the same advice from RealPage. In addition to discouraging discounts, RealPage discourages negotiating prices with renters. RealPage trains landlords that ''YieldStar [or AIRM] is managing your Price,'' so the landlord's staff can focus on other things. The YieldStar or AIRM rent matrix is to be the source of prices that are given to a prospective renter. RealPage instructs leasing staff to provide prospective renters the specific price from the matrix that corresponds to the prospect's desired move-in date, unit, and lease term. RealPage cautions landlords not to show renters the matrix itself.

D. AIRM and YieldStar Increase and Maintain Landlords' Pricing Power by Using Competitors' Data to Manage Lease Expirations

157. Supply is a basic component of pricing. For this reason, information on a company's supply is highly sensitive, and its disclosure to competitors is particularly concerning. Yet AIRM and YieldStar use competitors' supply data precisely for the purpose of adjusting unit-level pricing, regardless of whether the landlord accepts the floor plan price recommendation. The goal of this ''lease expiration management'' is clear: As a RealPage senior manager explained for a client, using this data means that the client's property ''will remain in a position of pricing power.''

158. The purpose of lease expiration management is to avoid too many units becoming available in the market at the same time. Expiration management only increases unit-level prices. It never reduces the price.

159. Every landlord can choose to use ''market seasonality'' to inform its lease expiration management. As the name suggests, market seasonality adjusts the landlord's prices based on how many of its competitors' units will be vacant—that is, *future supply.* This feature is popular among landlords. For example, one of the largest landlords in the United States uses it in 98% of its properties. Every single property that uses market seasonality is leveraging RealPage's access to this highly sensitive, nonpublic data about its competitors' supply to inform pricing. RealPage trains landlords to turn on market seasonality as a best practice.

160. When activated, the market seasonality function changes unit-level prices across the different possible lease terms *regardless* of whether the landlord accepts the AIRM or YieldStar floor plan price recommendation.

161. RealPage determines for landlords an important input into lease expiration management: the expirations threshold. This threshold influences the point at which expiration premiums are added. The threshold calculation relies on nonpublic lease transaction data for the property's submarket and pulls from numerous RealPage products, including YieldStar, AIRM, OneSite, Business Intelligence, and Performance Analytics with Benchmarking. Landlords cannot adjust the expirations threshold.

162. Fueled by competitor data, expiration management results in ''increased stability'' and ''pricing power.'' Using competitors' data reduces the risk of overexposure that ''could erode rent roll growth.'' By adjusting price recommendations based on how much total supply is forecast in the market for a given time period, AIRM empowers landlords to charge higher prices than they could without access to competitors' nonpublic data.

E. No Procompetitive Benefit Justifies, Much Less Outweighs, RealPage's Use of Competitively Sensitive Data To Align Competing Landlords

163. AIRM and YieldStar do not benefit the competitive process or renters. Any legitimate benefits of revenue management software can be achieved through less anticompetitive means, and any theoretical additional benefits of AIRM and YieldStar are not cognizable and outweighed by harm to the competitive process and to renters.

V. Realpage Uses Landlords' Competitively Sensitive Data To Maintain its Monopoly and Exclude Commercial Revenue Management Software Competitors

164. Landlords are not the only ones that benefit from RealPage's rental pricing practices. RealPage benefits too through maintaining its monopoly over commercial revenue management software for conventional multifamily housing rentals. In that market, RealPage's internal documents reflect that it commands an 80% share.

165. RealPage's core value proposition creates a self-reinforcing feedback loop of data and scale advantages. The sharing of competitively sensitive information among rivals attracts more landlords that seek to maximize revenues and extract more money from renters. As a result of its exclusionary conduct, RealPage has been able to

obstruct rival software providers from competing on the merits via revenue management products that do not harm the competitive process.

166. Over time, RealPage has become more entrenched and has stymied alternatives unless they too enter into similar unlawful agreements with landlords to obtain and use nonpublic transactional data to price units. Even then, RealPage's unparalleled troves of competitively sensitive data provide an ill-gotten advantage.

A. Landlords Are Drawn to RealPage Because of Access to Nonpublic Transactional Data That Is Used to Increase Landlords' Revenue

167. Landlords prize RealPage's accumulation of nonpublic transactional data from competing landlords. For example, Greystar noted that ''RealPage supplies the best set of transactional data available via their millions of units of data—this becomes a valuable source of truth to our competitive landscape.'' In a training document for its employees, the same landlord explained that ''better data = better outcomes'' and that AIRM has ''over 15 million units of data available.'' From the perspective of Greystar, ''pricing decisions start with data'' and that precision in pricing ''comes from data driven decisions.'' Importantly, the landlord believed that AIRM's ability to ''examine data quality . . . each night'' via its property management software integrations, including guest card entry, ''plays an important role'' in pricing.

168. As another example, Cushman & Wakefield identified this data as especially helpful in a dense market because of insights into competitors' actions in the market. The same landlord also concluded that the more data points, the better confidence a landlord has in RealPage's rental recommendations. According to Cushman & Wakefield, more data—especially data about concessions—enabled the landlord to make better decisions because it showed the landlord where the market stood. Cushman & Wakefield's director of revenue management explained to a colleague that YieldStar ''collects about 14 MILLION transactional lease data across the US and has over 20 years of historical records.'' The director acknowledged that ''[t]his is huge! Essentially, this is a window into the market and the shifts we are going to experience . . . Having insight into this data, allows [landlords] to make changes with the dynamic changes in the market.''

169. Willow Bridge, who compared AIRM to another commercial revenue management software product, noted that the competing product ''is about half of the cost and does a good job in reviewing rents and making recommendations but does it without the additional reporting capabilities and market data that AIRM uses.'' Ultimately, this landlord decided to push their owner clients towards AIRM. The landlord's decision to use AIRM was in part based on receiving ''more accurate and time sensitive data'' and noted that, although revenue management is not changing, ''the amount of data and how that information is used to grow revenue is bigger and better than ever'' with AIRM.

170. Landlords want access to RealPage's transactional data because RealPage advertises, and landlords believe, that the use of this data will increase a landlord's revenue. ''Due to the amount of data RealPage possesses,'' Greystar explained, RealPage developed AIRM ''to leverage machine learning to improve both the supply and demand modeling and provide a tool to further customize to each asset's needs.'' The materials sent to the landlord's clients also included a flyer explaining that AIRM will ''outperform the market 2–7% year over year'' and that it provides ''[a]ctionable intelligence derived from the industry's largest lease transaction database of 13M+ units.''

171. Landlords view the lack of access to transactional data as a significant shortcoming in other commercial revenue management software. One landlord received a request from a property owner client for information on YieldStar and how it compared to another commercial revenue management product. A landlord executive explained that YieldStar was backed by robust data and ''millions of units of transactional data to support not only their demand and forecast modeling but also their market/competitive set information.'' She concluded that the other revenue management software was ''in a completely different class'' than YieldStar. More than two years later, the same executive again concluded that this company's new revenue management product was inferior to AIRM because AIRM had far more transactional data, supported by RealPage's Market Analytics survey data. In another example, a different landlord compared multiple commercial revenue management products to RealPage's YieldStar. He concluded that a major weakness of these alternatives was that they lacked access to transactional data on competitors' rents.

B. RealPage's Collection and Use of Competitively Sensitive Data Excludes Competition in Commercial Revenue Management Software

172. RealPage recognizes the barriers to competition on the merits that its data, scale, and business model provide. RealPage understands that ''pricing decisions start with data.'' RealPage explains to its clients that ''[t]he data entered into your [property management software] and collected each night, along with current market data (and lead data if OneSite) provides insight into advantageous demand drivers, identifies revenue risk and opportunity, and captures this competitive landscape for informed pricing.''

173. This data and scale advantage is significant and creates a feedback loop that further increases barriers to competition for commercial revenue management software. RealPage touts its access to an ''unmatched database.'' In one case from 2023, a RealPage sales representative noted that RealPage's ''revenue management is the most widely adopted solution in the industry'' and RealPage had ''approximately 4.8M units on revenue management.'' In a 2023 presentation for AIRM, RealPage advertised that the ''[a]mount of data we have (~17mm units) is unique to RealPage'' and that the ''[q]uality of data is best in class given that it is 'Lease Transaction Data.'" RealPage claimed this ''supports that fact that the industry views RealPage as the source of truth for performance data.''

174. RealPage has used this competitively sensitive data to develop an AI-driven revenue management solution that leverages the scale and scope of its data. RealPage's plan to use this database as fuel for its AI pricing model is spelled out in a Go-To-Market summary from 2019. In that document, RealPage describes that:

> RealPage can achieve $10 Million in organic ACV growth through delivery of the next generation of revenue management. Failure to do so reduces the opportunity to harvest gains from our $300M investment in LRO and places a portion of current $100M revenue management revenue at risk to emerging competitors, including Yardi and low-cost alternatives that say 'all revenue management is the same.' Over time we can sunset YieldStar and LRO reducing expense, and leverage LRO capabilities as a revenue management lite offering.

175. This plan came to fruition with the introduction of AIRM. In a RealPage training presentation from February 2020—right before the launch of AIRM—RealPage discusses a new optimization solution that is built on the ''RealPage Foundation'' which is

defined as ''13.5m units of lease transactional data informing our models with real actionable intelligence in near real time.'' As described earlier in the deck, RealPage's competitors ''lack the foundational capabilities on which to build upon'' leaving RealPage with the possibility ''to tie together each capability . . . in a single view.''

176. RealPage knows that its rivals do not have access to similar data sets. In one presentation from 2022, RealPage discussed competing revenue management products from Yardi and Entrata. Yardi and Entrata have fewer than 250,000 units, RealPage concluded, while RealPage had at least 4 million. Unlike RealPage, Yardi had a limited data set that used data only from Yardi's property management software. RealPage likewise explained that Entrata lacked much data outside of student housing and Entrata's revenue management software worked only with its own property management software, meaning Entrata could not pull data from RealPage's OneSite or other property management software products. RealPage further criticized manual in-house pricing options for having biased data, introducing errors through manual pricing, and being inefficient.

177. RealPage pitches prospective clients on its unique access to and use of nonpublic transactional data that is competitively sensitive. In 2021, RealPage discussed internally how to pitch AIRM to a prospective client who was considering an alternative revenue management solution. A RealPage employee pointed to the competitor's lack of ''AI driven competitor information derived from lease transaction data.'' Another employee added that the salesperson should amplify the prospective client's concerns about the competitor's lack of nonpublic transactional data, comparing it to buying a ''Ferrari without an engine.'' RealPage's chief economist concurred.

178. RealPage's use of competitors' nonpublic transactional data provides it an important advantage on pricing renewals. Information on renewals is not available publicly. Competing revenue management vendors who do not use nonpublic, competitively sensitive data are left partially blind to this important part of the rental market. In 2022, a RealPage salesperson stressed this advantage to a prospective client who was also considering a competing commercial revenue management solution. The salesperson noted the lease transaction data RealPage collected on a nightly basis and declared that RealPage had an ''unequaled ability to stress test renewals *nightly* and drive amenity optimization.''

179. RealPage recognizes that its use of competitively sensitive data minimizes any competitive pressure it faces. A RealPage senior vice president explained in a strategy document that RealPage's unique nonpublic data on leasing decisions was a ''data moat,'' protecting RealPage from competitors. In 2020 RealPage's chief economist noted that RealPage's access to this data was a ''major competitive advantage'' and a ''major reason we can do what we do.'' In 2021 a prospective client asked RealPage why AIRM cost three times the amount of a competing revenue management product. Internally, a RealPage employee pointed to AIRM leveraging daily transactional data of over 13 million units to collect competitors' rents and forecast demand. He noted that multiple large landlords had refused to adopt the competing revenue management product rather than AIRM even when the competitor offered it for free. The same RealPage employee explained to another client that RealPage's leveraging of lease transaction data—with access to confidential data for over 14 million units—was a key advantage over a competing commercial revenue management provider.

180. In June 2023 a landlord emailed RealPage and asked, ''who are your competitors?'' A RealPage sales executive responded, ''Our revenue management solution does not have any true competitors, mainly because our data is based on real lease transaction data from all kinds of third-party property management systems . . . .''

181. In addition, when discussing a potential entrant, a RealPage executive noted that the entrant needed ''to get the data to enable [revenue management].'' He further noted that [g]etting the data (and more modern methods) . . . will be hurdles for [the entrant].'' Another RealPage senior executive explained that shifting clients from LRO, which is less reliant on competitively sensitive information of rivals, to AIRM, which is very reliant on such information, reduced the threat from new entry when she noted that migrating LRO clients to AIRM was ''critical to reducing the risk that may come from this new [entrant's] offering.''

182. RealPage's power and conduct in connection with commercial revenue management software serves to exclude rivals and maintain its monopoly power. RealPage has ensured rivals cannot compete on the merits unless they enter into similar agreements with landlords, offer to share competitively sensitive information among rival landlords, and engage in actions to increase compliance. As a result of its exclusionary conduct, RealPage has been able to obstruct rival software providers from competing via revenue management products that do not harm the competitive process in addition to cementing its massive data and scale advantage that keeps increasing due to feedback effects.

VI. Relevant Markets

A. Conventional Multifamily Rental Housing Markets

1. Product Markets

183. Conventional multifamily rental housing is a relevant product market. Conventional multifamily rental housing includes apartments available to the general public in properties that have five or more living units. Conventional rental housing does not include student housing, affordable housing, age-restricted or senior housing, or military housing. This product market reflects consumer preferences, industry practice, and governmental policy.

184. In 2023, RealPage estimated the conventional multifamily rental market to cover approximately 14 million units. The 2021 American Housing Survey estimated a total of 21.1 million multifamily apartments—not limited to conventional—in the United States.

(a) Conventional Multifamily Rentals Are Distinct From Other Types of Multifamily Housing

185. Other types of multifamily apartment buildings are not good substitutes for conventional multifamily rentals. Some kinds of multifamily buildings are restricted to specific types of renters, such as student housing units, affordable housing units (*i.e.,* income-restricted housing), senior (*i.e.,* age-restricted) housing, and military housing. These housing units focused on different classes of renters are not reasonable substitutes for conventional multifamily rentals. RealPage distinguishes conventional multifamily as being in a different market segment from senior, affordable, and student housing in the ordinary course of business.

186. Non-conventional units are not widely available to all renters and can exhibit different buying patterns. For example, student housing serves individuals enrolled in higher education and is typically located on or near universities. Student housing is typically leased by the bed instead of by unit, and faces a significantly different leasing cycle and different patterns in

renewals and leasing practices. Recognizing these differences, RealPage will assign to student properties surrogates that are distant student assets rather than nearby conventional assets. RealPage in fact offers a different version of both AIRM and OneSite, its property management software, for the ''student market.''

187. Affordable housing units are available only to individuals or households whose income falls below certain thresholds. Multiple federal affordable housing regulations, for example, require participants in affordable housing programs to have incomes lower than a set percentage, such as 30%, of the median family income in the local area. Affordable housing units are also relatively scarce, with families seeking such housing often waiting years on a waitlist. These legal and practical restrictions prevent affordable housing from being a reasonable substitute to conventional multifamily housing for the typical renter.

188. Senior housing is typically restricted to individuals aged 55 and older. RealPage separates senior housing into four categories: independent living, assisted living, memory care, and nursing care. Independent living offers senior-focused amenities—such as transportation, meals, and social gatherings among community members—that materially increase housing costs and are less desirable to younger households. The other three categories of senior housing provide professional or special care to assist renters with basic tasks like eating, bathing, and dressing, and they are not reasonable substitutes for conventional multifamily rentals.

189. Military housing is also not a reasonable substitute to conventional multifamily rentals. It is typically geographically proximate to military installations, with roughly 95% of military housing found on-base. Although civilians may in some cases be able to live in military housing properties experiencing low occupancy rates, military regulations place them below five higher-priority categories of potential renters, including active and retired military personnel.

(b) Single-Family Housing Is Not A Reasonable Substitute to Multifamily Rentals

190. The multifamily industry, government regulators, and policy documents distinguish between properties with at least five units, which are classified as ''multifamily housing'' and those with fewer units, which are classified as ''single-family rentals.''

191. The purchase of single-family or other types of homes is not a reasonable substitute for conventional multifamily housing rentals. A former RealPage economist explained that ''the choice between renting and owning is first and foremost a life stage and lifestyle choice over a financial one.'' Single-family homes also generally require a substantial down payment. In March 2023, a RealPage economist estimated an ''entry premium'' of $800 per month to home ownership over rentals. According to a 2021 RealPage strategic planning guide, the ''myth'' that people were abandoning multifamily properties for single-family homes is false, stating that ''rising home sales do not hurt apartment demand.'' Single-family home sales are not reasonable substitutes for conventional multifamily housing.

192. More broadly, renters living in conventional multifamily apartments will not switch to single-family homes—purchases or rentals—because of a small increase in rent. The decision to move from an apartment building to a single-family home is primarily a life-stage and lifestyle choice. For example, the decision by a household to have children may spur a move to a single-family home. In many areas, relatively few children live in conventional multifamily apartments. Multifamily apartments typically offer community amenities and a different lifestyle, such as high walkability in an urban area, whereas single-family homes generally do not offer the same amenities and offer instead increased privacy, including private yards. A RealPage analyst explained in 2022 that because a move to a single-family home is a ''lifestyle choice,'' single-family home rentals were not direct competitors to multifamily rental housing. A 2022 RealPage deck, shared with a landlord, stated that multifamily rentals and single-family rentals were ''complementary, not competitive,'' and targeted different renters, with different floor plans, in different locations. Another RealPage analyst explained to a multifamily property owner that single-family rentals offer a different renter profile than multifamily rentals.

193. Industry participants agree that single-family rentals attract a different pool of renters from multifamily rentals. A managing director of a single-family rental property management company explained in 2021 that a renter's journey from multifamily apartment living to single-family rentals came as life stages evolved. The CEO of a single-family rental developer similarly explained that these single-family rental homes are for renters who age out of multifamily apartments.

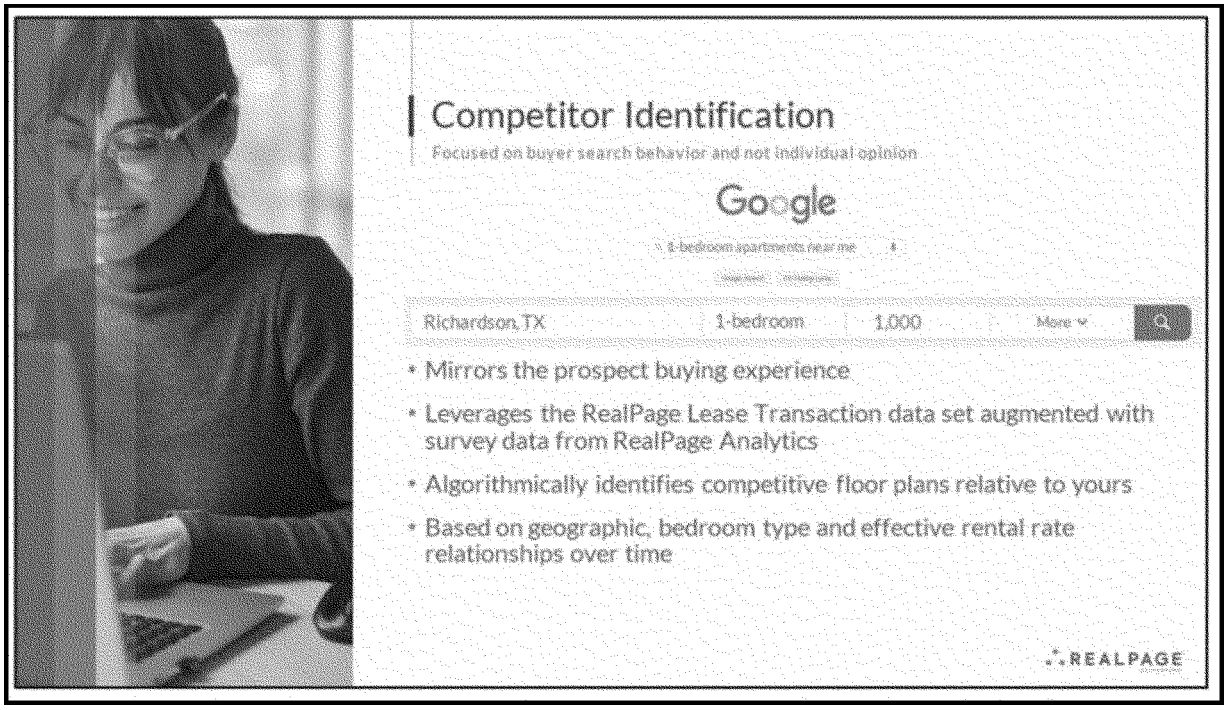
194. Single-family rentals are also typically priced higher than multifamily apartments, further reducing potential substitution between them. The chairman of one institutional multifamily property owner explained in a 2022 earnings call that multifamily housing was relatively affordable compared to single-family rentals. An industry price index showed that, in March 2024, single-family rent was approximately 18% higher than multifamily rent.

(c) Conventional Multifamily Rental Units With Different Bedroom Counts Are Relevant Product Markets

195. Different bedroom floor plans also constitute relevant product markets. A key criterion by which a current or prospective renter searches for a rental unit is the number of bedrooms. One-bedroom units are substitutes for other one-bedroom units, two-bedroom units are substitutes for other two-bedroom units, and so forth. Individual renters may change their desired numbers of bedrooms, but this is typically tied to changes in circumstance independent from price. For example, the birth of a new child may require a family to shift from a one-bedroom unit to a two-bedroom unit.

196. RealPage adopts this practical reality in the ordinary course of business. For every property using AIRM or YieldStar, RealPage maps peer floor plans. These mapped floor plans capture reasonable substitutes for the subject property floor plan and reflect the perceived market by a prospective renter.

197. To be selected as a peer, a floor plan must have the same number of bedrooms. A RealPage employee explained the mapping process to a client: ''we are looking specifically at the bedroom level. The tool will only map 2b[edroom] with 2b[edroom] or 1b[edroom] with 1b[edroom].'' The object of mapping peers is to mirror the prospect buying experience by identifying properties that a potential tenant will see in online searches when searching for a particular floor plan and price range.



198. AIRM and YieldStar price the different floor plans, which consist of different numbers of bedrooms, independently. RealPage testified that the model considers no cross-price elasticity between different floor plans: ''when you set up the different floor plans, a one bedroom, a two bedroom, or three bedroom, those are completely independent. . . . [T]here's no influence in what the pricing is for the two bedrooms, for example . . . has no influence on what the pricing is for the one bedrooms.'' Landlords also take steps to maintain a pricing spread between one- and two-bedroom units and avoid pricing one-bedrooms at a higher rate than two-bedroom units.

199. Landlords recognize that units with different bedroom counts face different demand from renters. For example, Greystar explained internally in 2022 that demand for studio apartments differs from demand for three-bedroom units. A separate 2023 training by Greystar reiterated that demand trends, and therefore pricing trends, differ by bedroom counts and that staff should not react to a downward trend in one category, such as two bedrooms, with discounts in one- or three-bedroom units. At another time, Greystar emphasized the benefit of RealPage's lease expiration management feature because it is managed at the bedroom level—not at the property level—so it could match seasonal demand for units with that specific number of bedrooms. A revenue manager at Willow Bridge similarly explained to colleagues that one-bedroom units have drastically different demand patterns from two-bedroom units and from three-bedroom units.

2. Geographic Markets

200. Defining relevant geographic markets help courts assess the potential anticompetitive impact of the agreements challenged. Here, the relevant geographic markets for the purposes of analyzing the anticompetitive effects of RealPage's agreements with landlords are the areas in which the sellers (the landlords) sell and in which the purchasers (potential renters) can practicably turn for alternatives. RealPage's agreements are alleged to have suppressed price competition in the markets for conventional multifamily housing. The relevant geographic markets to assess those agreements are those property locations close enough for their apartments to be considered reasonable substitutes. In delineating a geographic market for conventional multifamily housing, the focus is inherently local. Renters are typically tied to a particular location for work, family, or other needs.

201. RealPage recognizes the local nature of geographic markets. One RealPage former employee explained that under ''Real Estate 101 rules, real estate is local, local, local.'' Another RealPage former chief economist noted that an effective evaluation of a property's performance must be done in comparison to similar properties in the property's neighborhood because competitive conditions in the neighborhood could differ widely from the city at large. When training landlords on lease expiration management, two RealPage executives explained that market seasonality was based on the most accurate geographic level, such as zip code, neighborhood, or submarket. They further explained that renters typically move locally. Similarly, a former property manager explained that potential tenants will look at a small number of properties in the same neighborhood, and it is on that neighborhood level where competition occurs among multifamily properties. This individual testified, ''location really does matter in real estate.''

202. RealPage has created a tool called True Comps. Used in performance benchmarking products that provide decisional support to AIRM and YieldStar, True Comps provides a more accurate mapping of competitor properties. It uses an algorithm to find the properties most comparable to the subject property, as measured by characteristics including distance, effective rent, age, property height, and unit count and mix. By default, True Comps picks competitors within a 15-mile radius. In scoring distance, True Comps applies a ''highly-punitive model''—the distance score drops from 99% for a distance of 0.05 miles, to 56% for a distance of 2 miles, and to 10% for a distance of 8 miles. Thus, RealPage acknowledges and incorporates small geographic areas as the appropriate

location in which to find true competitive alternatives.

203. During a property's implementation process, AIRM and YieldStar require the mapping of peer properties, including competitors. RealPage starts by looking for competitors within a half-mile radius from the subject property and then expands as necessary. Geographic proximity is in fact so important that YieldStar has a default radius that limits its search for competing properties to no more than 5 miles in urban settings, and to no more than 10 miles in suburban settings. RealPage has an internal process for escalating any proposed peer property that is more than 15 miles away.

(a) RealPage-Defined Submarkets Identify Relevant Geographic Markets

204. RealPage defines geographic submarkets in the ordinary course of business. Each submarket reflects the geographic area, defined by a set of zip codes, that features similar properties that compete for the same pool of potential renters. In constructing submarkets, which are generally larger than its neighborhoods, RealPage considers major roads, city and county boundaries, and school districts. RealPage also considers socioeconomic factors and apartment market characteristics, such as the age of properties and rental rates.

205. Even within a city, apartment demand varies significantly based on factors such as employment. Supply may also vary widely as existing properties and new construction may be located in different parts of a city. A former RealPage chief economist explained that because ''real estate is very local . . . you typically want to take a . . . more narrow view if you can on what's going on in any given submarket.'' [10]

206. The multifamily industry recognizes submarkets as an important geographic area for analyzing competition and pools of renters. Multiple industry analysts offer data by submarkets. A revenue management director at Greystar testified about a submarket that ''everybody in our industry uses this term.'' She further stated that submarkets are a standard categorization system, used by RealPage and others, including to benchmark a subject property's performance with comparable properties. A revenue manager at Cushman & Wakefield circulated a scorecard comparing performance to the submarket, and exclaimed that ''we're perfectly aligned with the submarket'' on rent roll.

207. A revenue management executive at Willow Bridge testified that submarkets identify specific, smaller areas of a city where renters look to live to be close to schools or work. This executive testified that submarkets typically identify the area within which a renter is comparing apartment options. This landlord tracks other properties' rents in a subject property's submarket to make sure the subject property remains competitive, and if rents in a submarket increased, then the landlord expected that its property in that submarket would also raise its rents.

208. Appendix A lists RealPage-defined submarkets that identify relevant local markets in which the agreements among RealPage and landlords to share nonpublic, competitively sensitive information for use in pricing conventional multifamily rentals have harmed, or are likely to harm, competition and thus renters.

209. The RealPage-defined submarkets identified in Appendix A are relevant markets in which the agreements between RealPage and AIRM and YieldStar users to align pricing has harmed, or is likely to harm, competition and thus renters. In each of these markets, the penetration rate for AIRM and YieldStar ranges from at least around 26% to 69%, and for AIRM, YieldStar, and OneSite ranges from at least around 30% to 78%.[11] In each of these markets, the landlords using AIRM or YieldStar and/or sharing competitively sensitive information collectively have market power.

210. Appendix B identifies submarkets by bedroom count that are relevant markets in which the agreements between RealPage and landlords, and agreements among landlords, to share nonpublic, competitively sensitive information for use in pricing conventional multifamily rentals have harmed, or are likely to harm, competition and thus renters.

211. The markets identified in Appendix B are relevant markets in which the agreements between RealPage and AIRM and YieldStar users to align pricing collectively have harmed, or are likely to harm, competition and thus renters. In each of these markets, the penetration rate for AIRM and YieldStar ranges from at least around 26% to 79%, and for AIRM, YieldStar, and OneSite ranges from at least around 30% to over 80%. In each of these markets, the landlords using AIRM or YieldStar and/or sharing competitively sensitive information collectively have market power.

(b) Core-Based Statistical Areas (CBSAs) Are Relevant Geographic Markets

212. A core-based statistical area (CBSA) is also a relevant geographic market. A CBSA is a geographic area based on a county or group of counties. A CBSA has at least one core of at least 10,000 individuals. A CBSA includes adjacent counties that have a high degree of social and economic integration with the core, as measured by commuting ties. A CBSA includes both metropolitan statistical areas and micropolitan statistical areas. A CBSA includes the set of reasonable conventional multifamily rental alternatives to which a renter would turn in response to a small but significant, nontransitory price increase.

213. RealPage itself tracks CBSAs in the ordinary course of business and refers to them as ''markets.''

214. Table 1 identifies relevant markets in which the agreements between RealPage and landlords, and agreements among landlords, to share nonpublic, competitively sensitive information for use in pricing conventional multifamily rentals collectively have harmed, or are likely to harm, competition and/or consumers. In each of these markets, the penetration rate for AIRM and YieldStar ranges from at least around 26% to 37%, and for AIRM, YieldStar, and OneSite ranges from at least around 35% to 45%. Three of these markets are located in North Carolina.

[10] RealPage also tracks data at a more granular level than a submarket, called a neighborhood.

[11] Including penetration rates for RealPage's Business Intelligence and Performance Analytics with Benchmarking products, which landlord users agree to share nonpublic data with RealPage that RealPage then uses in AIRM and YieldStar, would increase the data penetration rates subject to unlawful agreements for these and all other relevant conventional multifamily rental housing markets identified in the Complaint.

Table 1: Core-Based Statistical Area (CBSA) Markets

Core-Based Statistical Area (CBSA) Markets	YS/AIRM 30% or More	YS/AIRM/OneSite 30% or More
Atlanta-Sandy Springs-Roswell, GA	Yes	Yes
Austin-Round Rock, TX	Yes	Yes
Charleston-North Charleston, SC		Yes
Charlotte-Concord-Gastonia, NC-SC	Yes	Yes
Dallas-Fort Worth-Arlington, TX	Yes	Yes
Denver-Aurora-Lakewood, CO	Yes	Yes
Durham-Chapel Hill, NC	Yes	Yes
Nashville-Davidson--Murfreesboro--Franklin, TN		Yes
Orlando-Kissimmee-Sanford, FL	Yes	Yes
Raleigh, NC	Yes	Yes

215. The markets identified in Table 1 are relevant markets in which the agreements between RealPage and AIRM and YieldStar users to align pricing collectively have harmed, or are likely to harm, competition and thus renters.

216. Table 2 identifies relevant CBSAs by bedroom counts that are relevant markets in which the agreements between RealPage and landlords, and agreements among landlords, to share nonpublic, competitively sensitive information for use in pricing conventional multifamily rentals collectively have harmed, or are likely to harm, competition and/or consumers. In each of these markets, the penetration rate for AIRM and YieldStar ranges from at least around 27% to 42%, and for AIRM, YieldStar, and OneSite ranges from at least around 33% to 45%.

Table 2: Core-Based Statistical Area (CBSA) Markets by Bedroom Count

Core-Based Statistical Area (CBSA) Markets	No. of Beds.	YS/AIRM 30% or More	YS/AIRM/ OneSite 30% or More
Atlanta-Sandy Springs-Roswell, GA	1	Yes	Yes
Atlanta-Sandy Springs-Roswell, GA	2	Yes	Yes
Austin-Round Rock, TX	1	Yes	Yes
Austin-Round Rock, TX	2	Yes	Yes
Charleston-North Charleston, SC	1	Yes	Yes
Charleston-North Charleston, SC	2		Yes
Charlotte-Concord-Gastonia, NC-SC	1	Yes	Yes
Charlotte-Concord-Gastonia, NC-SC	2	Yes	Yes
Dallas-Fort Worth-Arlington, TX	1	Yes	Yes
Dallas-Fort Worth-Arlington, TX	2	Yes	Yes
Denver-Aurora-Lakewood, CO	1	Yes	Yes
Denver-Aurora-Lakewood, CO	2	Yes	Yes
Durham-Chapel Hill, NC	1	Yes	Yes
Durham-Chapel Hill, NC	2	Yes	Yes
Nashville-Davidson--Murfreesboro--Franklin, TN	1	Yes	Yes
Nashville-Davidson--Murfreesboro--Franklin, TN	2		Yes
Orlando-Kissimmee-Sanford, FL	1	Yes	Yes
Orlando-Kissimmee-Sanford, FL	2	Yes	Yes
Raleigh, NC	1	Yes	Yes
Raleigh, NC	2	Yes	Yes

217. The markets identified in Table 2 are relevant markets in which the agreements between RealPage and AIRM and YieldStar users to align pricing collectively have harmed, or are likely to harm, competition and thus renters.

218. Even assuming available land and no regulatory constrictions, local markets for conventional multifamily rental housing feature substantial barriers to entry. Landlords seeking to respond to rising rental prices by expanding supply, rather than simply acquiring an existing property, typically face substantial lead times to construct a new multifamily property. Additionally, there are significant upfront capital costs, including to fund expenditures on building material and labor, that are recuperated over time, which may require landlords to secure financing.

B. Commercial Revenue Management Software Market

219. RealPage has monopoly power in the market for commercial revenue management software for conventional multifamily housing rentals in the United States, with a durable market share over 80%, according to internal documents and other information.

1. Product Market

220. Commercial revenue management software for conventional multifamily housing rentals is a relevant antitrust product market.

221. Other methods for pricing conventional multifamily housing units are not reasonable substitutes for commercial revenue management software. RealPage and others in the industry recognize that revenue management software companies for multifamily housing units compete primarily against each other and not manual or do-it-yourself pricing methods.

222. Internal documents from RealPage refer specifically to commercial revenue management for multifamily housing and recognize RealPage's substantial market share. For example, a 2021 strategy presentation described RealPage as ''the market leader in commercial revenue management for multifamily [housing] with 45 of the 50 Top NMHC Owner and Operators'' all using RealPage's revenue management products.

223. A presentation to RealPage's board in 2022 noted that ''[RealPage] has gained [the] pole position in Revenue Management largely through the success of AI Revenue Management, which has become RealPage's leading differentiating product.'' Additionally, the presentation described how ''Revenue Management is experiencing strong growth driven by AIRM'' due to its ''PMS agnostic approach'' which gives RealPage the ability to aggregate data from its clients resulting in ''revenue management [that] has achieved a market share of 95% of the top 50 owners and operators.''

224. RealPage acknowledges its market power and durable market position. A 2023 RealPage presentation reviewing the use of artificial

intelligence in property technology noted that ''RealPage is already the de facto market leader in certain key areas at leveraging AI for multifamily proptech'' and shows ''revenue management'' as the area where it is the furthest ahead.'' Later, the same presentation noted that RealPage's current offer for revenue management is ''best-in-class'' and that ''[n]o other company is cross-pollinating their pricing tools with data in a way similar to [RealPage].'' As early as 2019, a RealPage presentation for clients stated that RealPage ''has around 80% of the Revenue Management market share.'' That share has proved durable over time. In 2023, during a sales pitch to a property owner, a RealPage representative noted that ''[RealPage] has 80% to 85% of the market share with the closest competitor around 12% (<750K units).''

225. In late 2021, a RealPage employee preparing competitor intelligence explained to RealPage's chief economist that RealPage ''dominate[d]'' revenue management. He added that RealPage ''dominate[d]'' Yardi and Entrata, which are the next two largest commercial revenue management competitors.

226. RealPage's monopoly power is protected by barriers to entry, including the unlawful collection and use of competitors' nonpublic transactional data on millions of multifamily units.

227. Landlords also recognize RealPage's substantial market share and market power over commercial revenue management software. In 2024, a landlord revenue management executive testified that manual pricing does not compete with AIRM. The same landlord pitched YieldStar to its owner clients by explaining that ''it's evident manual pricing cannot solve at the level a revenue management tool can.''

228. In a 2023 pricing dispute with a large landlord, RealPage refused to lower the price for its AIRM software. In response, an employee employed by the landlord noted that it was no surprise they would not decrease their price, remarking that ''[h]ere is the joy of a monopoly on a product category.'' In 2021, a different landlord commented that ''the entire industry is feeling the monopolizing effects of RealPage right now and everyone is hungry for a new product.'' A third landlord noted during AIRM renewal negotiations in 2022 that it had no options besides RealPage, with a senior executive stating about RealPage, ''too bad they have a monopoly going here!'' Also in 2022, a fourth landlord, in the face of RealPage pushing a 400% increase in annual revenue management costs over a five-year period, bemoaned the ''limited competition in the market around revenue management tools'' and how ''the industry desperately needs a solid competitor,'' and then discussed a plan to ''incubate a viable alternative to AIRM in the future.'' In 2024, that alternative had less than one half of one percent market share.

2. Geographic Market

229. The United States is a relevant geographic market for commercial revenue management software. RealPage sells its commercial revenue management software in the United States and tracks its business in the United States in the ordinary course of business. RealPage sets its subscription prices on a nationwide basis. Further, RealPage can deploy its commercial revenue management software, which may use inputs from properties located throughout the country, in any U.S. state. Landlords in the United States purchase commercial revenue management software from RealPage to set rental prices for renters in the United States. Many landlords have centralized revenue management teams that set nationwide revenue management policies and conduct revenue management trainings for their employees across the United States.

VII. Jurisdiction, Venue, and Commerce

230. The United States brings this action pursuant to Section 4 of the Sherman Act, 15 U.S.C. 4, to prevent and restrain RealPage's violations of Sections 1 and 2 of the Sherman Act, 15 U.S.C. 1, 2.

231. The Attorneys General assert these claims based on their independent authority to bring this action pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, and common law, to obtain injunctive and other equitable relief based on RealPage's anticompetitive practices in violation of Sections 1 and 2 of the Sherman Act, 15 U.S.C. 1, 2.

232. The Attorneys General are the chief legal officers of their respective States. They have authority to bring actions to protect the economic well-being of their States and their residents, and to seek injunctive relief to remedy and protect against harm resulting from violations of the antitrust laws.

233. This Court has subject matter jurisdiction over this action under Section 4 of the Sherman Act, 15 U.S.C. 4, and 28 U.S.C. 1331, 1337(a), and 1345.

234. The Court has personal jurisdiction over RealPage, Inc. (''RealPage''); venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and under 28 U.S.C. 1391 because RealPage transacts business and resides within this District.

235. RealPage is a privately-owned company organized and existing under the laws of the State of Delaware and is headquartered in Richardson, Texas. It is registered to do business in the State of North Carolina as a foreign corporation offering software solutions for the multifamily housing industry and software as a service.

236. RealPage engages in, and its activities substantially affect, interstate trade and commerce. RealPage provides a range of products and services that are marketed, distributed, and offered to consumers throughout the United States and across state lines.

237. The Court has personal jurisdiction over Camden Property Trust (''Camden''); venue is proper in this District under Section 12 of the Clayton Act, 15. U.S.C. 22, and under 28 U.S.C. 1391 because Camden transacts business and resides within this District.

238. Camden is a publicly-traded multifamily company organized under the laws of the State of Delaware and is headquartered in Houston, Texas. Camden is registered to do business in the State of North Carolina. Camden owns or manages at least one multifamily rental property using AIRM within this District.

239. Camden engages in, and its activities substantially affect, interstate trade and commerce. Camden owns or manages multifamily rental units across the United States, including within this District. Camden's rental properties are marketed and offered to consumers throughout the United States and across state lines.

240. The Court has personal jurisdiction over Cortland Management, LLC (''Cortland''); venue is proper in this District under Section 12 of the Clayton Act, 15. U.S.C. 22, and under 28 U.S.C. 1391 because Cortland transacts business and resides within this District.

241. Cortland is a privately-owned company organized under the laws of the State of Delaware and is headquartered in Atlanta, Georgia. Cortland is responsible for the management of multifamily rental housing properties, either directly owned by an affiliated entity or other third-party owners of multifamily housing properties. Cortland is registered to do business in the State of North Carolina. Cortland owns or manages multiple multifamily rental properties within this District, which use (or recently used) AIRM. Cortland

has a registered agent for service of process in this District.

242. Cortland engages in, and its activities substantially affect, interstate trade and commerce. Cortland owns or manages multifamily rental units across the United States, including within this District. Cortland's rental properties are marketed and offered to consumers throughout the United States and across state lines.

243. The Court has personal jurisdiction over Cushman & Wakefield, Inc. (''Cushman & Wakefield'') and Pinnacle Property Management Services, LLC (''Pinnacle''); venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and under 28 U.S.C. 1391 because Cushman & Wakefield, including its subsidiary Pinnacle, transacts business and resides within this District.

244. Cushman & Wakefield is organized under the laws of the State of New York and is headquartered in Chicago, Illinois. Cushman & Wakefield's multifamily rental property business is operated through its subsidiary Pinnacle, and also under the Cushman & Wakefield name since acquiring Pinnacle in March 2020. Pinnacle is organized under the laws of the State of Delaware and is headquartered in Frisco, Texas. Pinnacle is registered to do business in the State of North Carolina. Cushman & Wakefield U.S., Inc. is also registered to do business in the State of North Carolina. Pinnacle owns or manages multiple multifamily rental properties using YieldStar within this District.

245. Cushman & Wakefield engages in, and its activities substantially affect, interstate trade and commerce. Through Pinnacle, Cushman & Wakefield owns or manages multifamily rental units across the United States, including within this District. Cushman & Wakefield provides a range of multifamily property and revenue management services that are marketed and offered to consumers throughout the United States and across state lines.

246. The Court has personal jurisdiction over Greystar Real Estate Partners, LLC (''Greystar''); venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and under 28 U.S.C. 1391 because Greystar transacts business and resides within the District.

247. Greystar is a privately-owned company organized under the laws of the State of Delaware and is headquartered in Charleston, South Carolina. A Greystar management services entity is registered to do business in the State of North Carolina. Greystar owns or manages multiple multifamily rental properties using AIRM within this District.

248. Greystar engages in, and its activities substantially affect, interstate trade and commerce. Through its subsidiaries, including Greystar Management Services, LLC, Greystar North America Holdings, LLC, and GREP Washington, LLC, Greystar owns or manages multifamily rental units across the United States, including within this District. Greystar provides a range of products and services that are marketed and offered to consumers throughout the United States and across state lines.

249. The Court has personal jurisdiction over LivCor, LLC (''LivCor''); venue is proper in this District under Section 12 of the Clayton Act, 15 U.S.C. 22, and under 28 U.S.C. 1391 because LivCor transacts business and resides within this District.

250. LivCor is a privately-owned company organized under the laws of the State of Delaware and is headquartered in Chicago, Illinois. It is registered to do business in the State of North Carolina as a foreign corporation engaging in ownership and investment in real property and related services. LivCor owns or provides asset management services at least one multifamily rental property using AIRM within this District.

251. LivCor engages in, and its activities substantially affect, interstate trade and commerce. LivCor owns or provides asset management services for multifamily rental units across the United States, including within this District. LivCor provides multifamily asset management services that are marketed and offered to consumers throughout the United States and across state lines.

252. The Court has personal jurisdiction over Willow Bridge Property Company LLC (''Willow Bridge''); venue is proper in this District under 28 U.S.C. 1391 and Section 12 of the Clayton Act, 15 U.S.C. 22 because Willow Bridge transacts business and resides within this District.

253. Willow Bridge is a privately-owned company organized under the laws of the State of Texas and is headquartered in Dallas, Texas. Willow Bridge is registered to do business in the State of North Carolina as a foreign corporation offering services for the multifamily real estate industry. Willow Bridge owns or manages multiple multifamily rental properties using AIRM within this District.

254. Willow Bridge engages in, and its activities substantially affect, interstate trade and commerce. Willow Bridge owns or manages multifamily rental units across the United States, including within this District. Willow Bridge's rental properties are marketed and offered to consumers throughout the United States and across state lines.

255. The Durham-Chapel Hill CBSA is partially or entirely within the Middle District of North Carolina.

256. RealPage tracks the number of rental housing units that use its commercial revenue management software products, including AIRM and YieldStar, by market (*i.e.,* a CBSA) and submarket, and several of these markets and submarkets are entirely or partially within North Carolina. These RealPage-defined markets include Raleigh/Durham, NC; Charlotte–Concord–Gastonia, NC–SC; Greensboro/Winston-Salem, NC; Wilmington, NC; Fayetteville, NC; and Asheville, NC. The submarkets include Southwest Durham, Northwest Durham/Downtown, East Durham, and Chapel Hill/Carrboro, all of which are located entirely or partially within this District.

257. Defendant Landlords each own or manage one or more properties in one or more relevant markets within the Middle District of North Carolina for which they, along with other landlords and RealPage, currently agree (or have in the past agreed) to share information and align pricing by using AIRM or YieldStar to generate rental pricing using pooled, competitively sensitive information.

258. A substantial part of the activities and conduct giving rise to the claims asserted in this Complaint occurred within this District. As alleged in paragraphs 208–211 above and Appendices A and B below, relevant local geographic markets in which competition and renters have been harmed by RealPage's anticompetitive conduct include the RealPage-defined submarkets in Raleigh/Durham. As alleged in paragraphs 214–217 above, relevant geographic markets in which competition and renters have been harmed by RealPage's anticompetitive conduct include the Durham–Chapel Hill CBSA.

VIII. Violations Alleged

First Claim for Relief: Violation of Section 1 of the Sherman Act by Unlawfully Sharing Information for Use in Competitors' Pricing

(By All Plaintiffs Against RealPage, Cushman & Wakefield, Greystar, LivCor, and Pinnacle; By All Plaintiffs Except Washington Against Camden and Willow Bridge; By the United States, Colorado, and North Carolina Against Cortland)

259. Plaintiffs incorporate the allegations of paragraphs 1 through 258 above.

260. Each landlord using AIRM and YieldStar, including each Defendant Landlord, has agreed with RealPage to provide RealPage daily nonpublic, competitively sensitive data. RealPage invites each landlord to share this information so that it can be pooled to generate pricing recommendations for the landlord and its competitors. Each of these landlords, including Defendant Landlords, uses (or has used) RealPage software, knowing or learning that RealPage will use this data to train its models and provide floor plan price recommendations and unit-level pricing not only for the landlord, but for the landlord's competitors (and vice versa). Landlords are therefore joining together in a way that deprives the market of fully independent centers of decision-making on pricing.

261. Each landlord using OneSite, Business Intelligence, or Performance Analytics with Benchmarking has agreed with RealPage to provide RealPage daily nonpublic, competitively sensitive data. RealPage invites each landlord to share this information, and each of these landlords understands that RealPage will use this data in RealPage's other products, including revenue management products that provide pricing recommendations and prices to competing landlords.

262. The transactional data these landlords agree to provide to RealPage, and indirectly to each other, includes current, forward-looking, granular, and highly competitively sensitive information. It includes information on effective rents, rent discounts, occupancy rates, availability, lease dates, lease terms, unit amenities, and unit layouts. Landlords also shared information on guest cards and lease applications.

263. Landlords, including Defendant Landlords and other landlords that compete with each other in the relevant markets alleged, have agreed with one another, through RealPage and directly, to exchange nonpublic, competitively sensitive data, both through RealPage's revenue management software and by other means. The other means include RealPage user groups, direct communications, market surveys, and other intermediaries. The information exchanged includes future pricing plans, current pricing and occupancy rates, pricing discounts, and guest traffic.

264. RealPage uses this nonpublic, competitively sensitive data to train its AIRM models and provide floor plan price recommendations and unit-level pricing to AIRM- and YieldStar-using landlords. AIRM and YieldStar are designed to increase prices as much as possible and minimize price decreases.

265. RealPage engages in a variety of conduct to increase compliance with the output of its products and the objectives it touts.

266. The sharing of nonpublic, competitively sensitive data with RealPage, and its use in AIRM and YieldStar, is anticompetitive. It harms or is likely to harm the competitive process and results, or is likely to result, in harm to renters and prospective renters in at least the relevant antitrust markets identified in this complaint.

267. In each relevant market, RealPage and participating landlords collectively have sufficient market power, including market and data penetration, to harm the competitive process and renters.

268. AIRM and YieldStar do not benefit the competitive process or renters. Any theoretical benefits are outweighed by harm to the competitive process and to renters.

269. Less restrictive alternatives are available to RealPage and the market. RealPage has recently altered AIRM or YieldStar for some clients to remove those clients' access to competitors' nonpublic data in at least certain portions of the software. RealPage has the ability to make changes to remove broader access to competitors' nonpublic data in AIRM and YieldStar. RealPage has the capability to modify its software products to eliminate competitive defects. LRO does not require the same type and quantity of nonpublic, transactional data pulled from competitors' property management software.[12] RealPage has stopped offering LRO to new clients and made plans to discontinue LRO for legacy clients by the end of 2024.

[12] Landlords may nevertheless use LRO in ways that may likely harm competition, as illustrated in paragraphs 59–60 and 100 above.

Second Claim for Relief: Violation of Section 1 of the Sherman Act Through Agreements to Align Pricing

(By All Plaintiffs Against RealPage, Cushman & Wakefield, Greystar, LivCor, and Pinnacle; By All Plaintiffs Except Washington Against Camden and Willow Bridge; By the United States, Colorado, and North Carolina Against Cortland)

270. Plaintiffs incorporate the allegations of paragraphs 1 through 268 above.

271. Each landlord, including Defendant Landlords, that licenses AIRM or YieldStar has agreed with RealPage to use the software as it has been designed. This includes providing nonpublic, competitively sensitive transactional data to RealPage, but more broadly is an agreement to use AIRM or YieldStar as the means to price the landlord's rental units. The landlord agrees to review AIRM or YieldStar floor plan price recommendations, use AIRM or YieldStar to set a scheduled floor plan rent, and use the AIRM or YieldStar pricing matrix to price units to renters.

272. AIRM and YieldStar are designed to ''raise the tide'' for all landlords, including AIRM- and YieldStar-using landlords. AIRM and YieldStar have the likely effect of aligning users' pricing processes, strategies, and pricing responses.

273. These landlords understand this effect, and it is a reason why they sign up for and use AIRM or YieldStar and discuss their usage with one another in user group meetings and other settings.

274. RealPage engages in a variety of conduct to increase compliance with the output of its products and the objectives it touts.

275. RealPage's user group meetings and its revenue management certification program facilitate landlords' agreements with RealPage to align pricing.

276. Taken together, the agreements between each AIRM or YieldStar landlord and RealPage to use AIRM or YieldStar, respectively, harm or are likely to harm the competitive process and renters.

277. The agreement by a landlord to use AIRM or YieldStar is an agreement to align users' pricing processes, strategies, and pricing responses. Collectively, these agreements between landlords using AIRM or YieldStar and RealPage are harmful to the competitive process and to renters.

278. In each relevant submarket and CBSA, RealPage and participating AIRM or YieldStar landlords collectively have sufficient market power, including

market and data penetration, to harm the competitive process and renters.

279. AIRM and YieldStar do not benefit the competitive process or renters. Any theoretical benefits are outweighed by harm to the competitive process and to renters, and less restrictive alternatives are available to RealPage and these landlords.

Third Claim for Relief: Violation of Section 2 of the Sherman Act Through Monopolization of the Commercial Revenue Management Software Market

(By All Plaintiffs Against RealPage)

280. Plaintiffs incorporate the allegations of paragraphs 1 through 279 above.

281. Commercial revenue management software for conventional multifamily housing rentals in the United States is a relevant antitrust market, and RealPage has monopoly power in that market.

282. RealPage has unlawfully monopolized the commercial revenue management market through unlawful exclusionary conduct. RealPage has amassed a massive reservoir of competitively sensitive data from competing landlords and used that data to sell AIRM and YieldStar. RealPage has ensured that rivals cannot compete on the merits unless they enter into similar agreements with landlords, offer to share competitively sensitive information among rival landlords, and engage in actions to increase compliance. As a result of its exclusionary conduct, RealPage has been able to obstruct rival software providers from competing via revenue management products that do not harm the competitive process in addition to cementing its massive data and scale advantage that keeps increasing due to self-reinforcing feedback effects.

283. RealPage's anticompetitive acts have harmed the competitive process and reduced feasible and less restrictive alternatives for landlords, which alternatives thereby pose less risk of competitive harm to renters.

284. RealPage's exclusionary conduct lacks a procompetitive justification that offsets the harm caused by RealPage's anticompetitive and unlawful conduct.

Fourth Claim for Relief, in the Alternative: Violation of Section 2 of the Sherman Act Through Attempted Monopolization of the Commercial Revenue Management Software Market

(By All Plaintiffs Against RealPage)

285. Plaintiffs incorporate the allegations of paragraphs 1 through 284 above.

286. Commercial revenue management software for conventional multifamily housing rentals in the United States is a relevant antitrust market.

287. RealPage has attempted to monopolize that market through unlawful exclusionary conduct enhanced by its self-reinforcing data and scale advantages. By amassing its massive reservoir of competitively sensitive data from competing landlords and the follow-on benefits that scale and its feedback effects provide in terms of blunting competition among landlords, RealPage's conduct excludes commercial revenue management rivals from competing on the merits in a lawful manner. As such, it has increased, maintained, or protected RealPage's power.

288. RealPage's anticompetitive acts have harmed the competitive process and reduced feasible and less restrictive alternatives for landlords, which alternatives thereby pose less risk of competitive harm to renters.

289. As inferred from the anticompetitive conduct described in Sections IV and V, *supra,* RealPage has acted with a specific intent to monopolize, and to eliminate effective competition in, the commercial revenue management software market in the United States. There is a dangerous probability that, unless restrained, RealPage will succeed in monopolizing the commercial revenue management software market in violation of Section 2 of the Sherman Act.

Fifth Claim for Relief: Violation of North Carolina Law

290. Plaintiff State of North Carolina incorporates the allegations of Paragraphs 1 through 289 above.

291. Defendants engaged in the conduct alleged above while operating their businesses in North Carolina markets, including, but not limited to, the markets alleged in paragraphs 214, 216, 256, and Appendices A and B. Defendants' anticompetitive conduct has affected commerce in North Carolina to a substantial degree by harming the competitive process and renters across the State including, but not limited to, in the North Carolina markets identified in paragraphs 214, 216, 256, and Appendices A and B.

292. Defendants' acts as alleged in the First and Second claims for reliefs stated in paragraphs 259–279 above, violate the North Carolina Unfair or Deceptive Trade Practices Act in that they constitute contracts in restraint of trade or commerce in North Carolina, and/or acts and contracts in restraint of trade or commerce which violate the principles of the common law. N.C.G.S. §§ 75–1, 75–2.

293. Defendant Real Page's acts as alleged in the Third and Fourth claims for relief stated in paragraphs 280–289, above, violate the North Carolina Unfair or Deceptive Trade Practices Act, N.C.G.S. § 75–1 *et seq.,* in that they constitute unlawful monopolization of a part of trade or commerce in North Carolina. N.C.G.S. § 75–2.1. Plaintiff State of North Carolina seeks the following remedies available for claims under federal law and claims under N.C.G.S. §§ 75–1, 75–2, and 75–2.1, without limitation:

a. Injunctive and other equitable relief pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, N.C.G.S. § 75–14, and the common law of North Carolina;

b. Civil penalties pursuant to N.C.G.S. § 75–15.2, which provides a penalty of up to $5,000 per violation;

c. Costs of suit, including expert witness fees, costs of investigation, and attorney's fees pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26 and N.C.G.S. § 75–16.1; and

d. Other remedies as the court may deem appropriate under the facts and circumstances of the case.

Sixth Claim for Relief: Violation of California Law

295. The State of California incorporates the allegations of Paragraphs 1 through 289 above.

296. Defendants' practices, as alleged above, violate the Sherman Act sections 1 and 2 and therefore constitute unlawful business practices under California's Unfair Competition Law (''UCL''), Cal. Bus. & Prof. Code § 17200, *et seq.*

297. Plaintiff State of California seeks the following:

a. injunctive relief and penalties pursuant to sections 17203 and 17206 of the UCL,

b. costs of suit, including expert witness fees, costs of investigation, and attorney's fees pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, and

c. other remedies as the court may deem appropriate under the facts and circumstances of the case.

Seventh Claim for Relief: Violation of Colorado Law

298. Plaintiff State of Colorado repeats and re-alleges and incorporates by reference Paragraphs 1 through 289 in this Complaint as if fully set forth herein.

299. The acts alleged in the Complaint violate the Colorado Antitrust Act, § 6–4–101 et. seq., including C.R.S. § 6–4–104 and C.R.S. § 6–4–105. These violations substantially affect the people

of Colorado and have impacts within the State of Colorado.

300. Each of the unlawful agreements, arrangements, or acts alleged herein constitute at least one distinct violation of the Colorado Antitrust Act within the meaning of C.R.S. § 6–4–113.

301. Defendants' acts alleged herein constitute a continuous pattern and practice of behavior within the meaning of C.R.S. § 6–4–113(2)(c).

302. Defendants' acts alleged herein were willful within the meaning of C.R.S. § 6–4–113(2)(d).

303. The State of Colorado seeks the following remedies under federal law and the Colorado Antitrust Act, including, without limitation:

a. Injunctive and other equitable relief pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26 and C.R.S. § 6–4–112;

b. Civil penalties pursuant to C.R.S. § 6–4–113 for each violation of the Colorado Antitrust Act;

c. Costs and attorneys' fees, pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, and C.R.S. § 6–4–112(5); and

d. Other remedies as the Court may deem appropriate based on the facts properly alleged and proven.

Eighth Claim for Relief: Violation of Connecticut Law

304. Plaintiff State of Connecticut, acting by and through its Attorney General pursuant to Conn. Gen. Stat. § 35–44a, incorporates the allegations of paragraphs 1 through 289 above. The State of Connecticut brings its state and federal law claims for relief against all Defendants except Cortland.

305. The acts alleged in the Complaint also constitute violations of the Connecticut Antitrust Act, Conn. Gen. Stat. § 35–24 *et seq.* These violations had impacts within the State of Connecticut and substantially affected the citizens of Connecticut.

306. Plaintiff State of Connecticut seeks all remedies available under federal law and the Connecticut Antitrust Act, including, without limitation, the following:

a. Civil penalties pursuant to Conn. Gen. Stat. § 35–38, which provides that in any action instituted by the Attorney General, any person who has been held to have violated any of the provisions of the Connecticut Antitrust Act shall forfeit and pay to the state a civil penalty of not more than one million dollars for each violation;

b. Injunctive and other equitable relief pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, Conn. Gen. Stat. §§ 35–34, 35–44a;

c. Costs and fees including, without limitation, costs of investigation, litigation, expert witness fees, and attorney's fees pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, Conn. Gen. Stat. §§ 35–34, 35–44a; and

d. Other remedies as the Court may deem appropriate under the facts and circumstances of the case.

Ninth Claim for Relief: Violation of Illinois Law

307. Plaintiff State of Illinois, acting by and through its Attorney General, incorporates the allegations of paragraphs 1 through 289 above. The State of Illinois brings its state and federal law claims for relief against all Defendants except Cortland.

308. The acts alleged in the Complaint violate the Illinois Antitrust Act, 740 ILCS 10/1 et seq, including 740 ILCS 10/3(1), 740 ILCS 10/3(2), and 740 ILCS 10/3(3). These violations substantially affect the people of Illinois and have impacts within the State of Illinois.

309. The State of Illinois seeks all available remedies under federal law and the Illinois Antitrust Act, including, without limitation:

a. Injunctive and other equitable relief pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26; and 740 ILCS 10/7;

b. Civil penalties pursuant to 740 ILCS 10/7(4) for each violation of the Illinois Antitrust Act;

c. Disgorgement, damages, and/or other equitable or monetary relief pursuant to federal law including Section 4 of the Sherman Act, 15 U.S.C. 4, Section 4c of the Clayton Act, 15 U.S.C. 15c and state law including 740 ILCS 10/7, and treble damages for injuries sustained, directly or indirectly, by individuals residing in Illinois to their property, pursuant to the State of Illinois' parens patriae authority under 740 ILCS 10/7(2);

d. Costs and attorneys' fees, pursuant to Section 4c of the Clayton Act, 15 U.S.C. 15c, Section 16 of the Clayton Act, 15 U.S.C. 26, 740 ILCS 10/7(2); and

e. Other remedies as the Court may deem appropriate on the basis of the facts properly alleged and proven.

Tenth Claim for Relief: Violation of Massachusetts Law

310. Plaintiff Commonwealth of Massachusetts repeats, realleges, and incorporates the allegations of paragraphs 1 through 289 above as if fully set forth herein. The Commonwealth of Massachusetts brings its state and federal law claims for relief against all Defendants except Cortland.

311. The acts alleged in the aforementioned paragraphs of this Complaint, including but not limited to unlawful agreements in restraint of trade and unlawful monopolization, constitute unfair methods of competition and/or unfair or deceptive acts or practices in trade or commerce in violation of the Massachusetts Consumer Protection Act, M.G.L c. 93A § 2 *et seq.*

312. Defendants knew or should have known that their conduct violated the Massachusetts Consumer Protection Act, M.G.L c. 93A § 2 *et seq.*

313. Plaintiff Commonwealth of Massachusetts is entitled to and seeks the following relief under M.G.L. c. 93A § 4:

a. Injunctive and other equitable relief pursuant to M.G.L. c. 93A § 4;

b. Civil penalties of up to $5,000 per each violation committed by the Defendants pursuant to M.G.L. c. 93A § 4;

c. Costs and fees including, without limitation, costs of investigation, litigation, and attorneys' fees pursuant to M.G.L. c. 93A § 4; and

d. Other remedies as the court may deem appropriate under the facts and circumstances of the case.

314. The Commonwealth of Massachusetts notified the Defendants of this intended action at least five days prior to the commencement of this action and gave the Defendants an opportunity to confer in accordance with M.G. L. c. 93A § 4.

Eleventh Claim for Relief: Violation of Oregon Law

315. Plaintiff State of Oregon, acting by and through its Attorney General, incorporates the allegations of paragraphs 1 through 289 above. The State of Oregon brings its state and federal law claims for relief against all Defendants except Cortland.

316. The acts alleged in the Complaint also constitute violations of the Oregon Antitrust Law, Oregon Revised Statutes (''ORS'') 646.705 to ORS 646.836. These violations had impacts within the State of Oregon and substantially affected the people of Oregon.

317. The State of Oregon appears in its sovereign or quasi-sovereign capacities and under its statutory, common law, and equitable powers, and as parens patriae on behalf of natural persons residing in the State of Oregon pursuant to ORS 646.775(1). The State of Oregon seeks all remedies available under federal law and the Oregon Antitrust Law, including, without limitation, the following:

a. Disgorgement and/or other equitable relief pursuant to federal law including Section 4 of the Sherman Act, 15 U.S.C. 4, and state law pursuant to ORS 646.770, and ORS 646.775;

b. Injunctive and other equitable relief pursuant to Section 16 of the Clayton

Act, 15 U.S.C. 26, ORS 646.760, ORS 646.770, and ORS 646.775;

c. Civil penalties pursuant to ORS 646.760(1) which provides that a court may assess for the benefit of the state a civil penalty of not more than $1,000,000 for each violation of the Oregon Antitrust Law,

d. Costs of suit, including expert witness fees, costs of investigation, and attorney's fees pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, ORS 646.760, ORS 646.770, ORS 646.775; and

e. Other remedies as the court may deem appropriate under the facts and circumstances of the case.

Twelfth Claim for Relief: Violation of Tennessee Law

318. Plaintiff State of Tennessee incorporates the allegations of paragraphs 1 through 289 above. The State of Tennessee brings its state and federal law claims for relief against all Defendants except Cortland.

319. Defendants engaged in the conduct described above, individually and collectively, to thwart competition for multifamily housing in Tennessee. This anticompetitive conduct in Tennessee harmed thousands of multifamily renters across the state.

320. Defendants' business practices have caused a reduction in competition in relevant Tennessee markets, including, but not limited to, in the markets identified in paragraphs 214 and 216 and Appendices A and B, and, as a result, Tennesseans have suffered anticompetitive harms.

321. Accordingly, Defendants' actions violate the Tennessee Trade Practices Act, Tenn. Code Ann. § 47–25–101, as amended.

322. Defendant RealPage engaged in the conduct described above to maintain its monopoly and exclude competing commercial revenue management software competitors.

323. Accordingly, Defendant RealPage's actions violate the Tennessee Trade Practices Act, Tenn. Code Ann. § 47–25–102, as amended.

324. This conduct has affected Tennessee trade and commerce to a substantial degree.

325. To remedy this anticompetitive conduct, the Tennessee Attorney General and Reporter seeks all remedies available to which it is entitled under federal law and claims under Tenn. Code Ann. §§ 47–25–101, 102, and 106, as amended, including, without limitation, the following:

a. injunctive or other equitable relief; reasonable attorney fees, costs, and expenses, pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26, Tenn. Code Ann. § 47–25–106(b), and the common law of Tennessee;

b. civil penalties pursuant to Tenn. Code Ann. § 47–25–106(g);

c. costs of suit, including expert witness fees, costs of investigation, and attorney's fees pursuant to Section 16 of the Clayton Act, 15 U.S.C. 26 and Tenn. Code Ann. § 47–25–106(b); and

d. other legal and equitable remedies as the court may deem appropriate and the interest of justice may require under the facts and circumstances of the case.

Thirteenth Claim for Relief: Violation of Washington Law

326. The State of Washington incorporates the allegations in Paragraphs 1 through 289, except for the portions of paragraphs 95, 96, 97, 117, 131, 171, and 228 that Washington was unable to review due to confidentiality redactions. Washington reserves the right to adopt the portions of those paragraphs which are later disclosed.

327. Washington brings its federal and state law claims for relief against Defendants RealPage, Cushman & Wakefield, Pinnacle, Greystar, and LivCor (''Washington Defendants'').

328. Washington Defendants engaged in the conduct alleged above while operating their businesses in Washington. This anticompetitive conduct in Washington harmed the competitive process and renters across the State including in, but not limited to, the markets identified in Appendices A and B.

329. The acts alleged in the paragraphs incorporated by the State of Washington also constitute antitrust violations of the Washington Consumer Protection Act under Wash. Rev. Code § 19.86.030, which declares unlawful every contract, combination, or conspiracy in restraint of trade or commerce.

330. The acts alleged in the paragraphs incorporated by the State of Washington also constitute antitrust violations of the Washington Consumer Protection Act under Wash. Rev. Code § 19.86.040, which declares monopolization or attempts to monopolize unlawful.

331. Washington seeks the following remedies available under the Washington Consumer Protection Act and federal law including, without limitation, the following:

a. That the Court adjudge and decree that conduct alleged in the complaint to be unlawful and in violation of the Washington Consumer Protection Act, Wash. Rev. Code § 19.86.030 and § 19.86.040;

b. Injunctive and other equitable relief pursuant to Wash. Rev. Code § 19.86.080;

c. Damages including treble damages; disgorgement; and/or restitution and any appropriate interest pursuant to federal law including Sherman Act, 15 U.S.C. 4, 15c and pursuant to state law including Wash. Rev. Code § 19.86.080;

d. Civil penalties pursuant to Wash. Rev. Code § 19.86.140;

e. Costs and attorney's fees and any appropriate interest on those fees and costs pursuant to Sherman Act, 15 U.S.C. 15c and/or pursuant to Wash. Rev. Code § 19.86.080; and

f. Other remedies, including pre-judgement interest, as the court may deem appropriate under the facts and circumstances of the case.

IX. Request for Relief

332. To remedy these illegal acts, Plaintiffs request that the Court:

a. Adjudge and decree that Defendants have acted unlawfully to restrain trade in conventional multifamily rental housing markets across the United States in violation of Section 1 of the Sherman Act, 15 U.S.C. 1;

b. Adjust and decree that RealPage has acted unlawfully to monopolize, or attempt to monopolize, the commercial revenue management software market in the United States in violation of Section 2 of the Sherman Act, 15 U.S.C. 2;

c. Enjoin Defendants from continuing to engage in the anticompetitive practices described herein and from engaging in any other practices with the same purpose and effect as the challenged practices;

d. Enter any other preliminary or permanent relief necessary and appropriate to restore competitive conditions in the markets affected by Defendants' unlawful conduct;

e. Enter any additional relief the Court finds just and proper; and

f. Award Plaintiffs an amount equal to their costs, including reasonable attorneys' fees, incurred in bringing this action.

X. Demand for a Jury Trial

333. Pursuant to Federal Rule of Civil Procedure 38(b), Plaintiffs demand a trial by jury of all issues properly triable to a jury in this case.

Dated this 7th day of January, 2025.

Respectfully submitted,

For Plaintiff United States of America:

Doha Mekki,
Acting Assistant Attorney General.
Ryan Danks,
Director of Civil Enforcement.
Catherine K. Dick,
Acting Director of Litigation.

United States District Court for the Middle District of North Carolina

United States of America, Plaintiff, v. *Willow Bridge Property Company, LLC*, Defendant.

No. 1:24–cv–00710–WLO–JGM

Proposed Final Judgment

Whereas, Plaintiff, United States of America, filed its Complaint on January 7, 2025;

And Whereas, the United States and Defendant, Willow Bridge Property Company, LLC, have consented to entry of this Final Judgment without the taking of testimony, without trial or adjudication of any issue of fact or law, and without this Final Judgment constituting any evidence against or admission by any party relating to any issue of fact or law;

And Whereas, Defendant agrees to undertake certain actions and refrain from certain conduct to remedy the loss of competition alleged in the Complaint;

And Whereas, Defendant represents that the relief required by this Final Judgment can and will be made and that Defendant will not later raise a claim of hardship or difficulty as grounds for asking the Court to modify any provision of this Final Judgment;

Now Therefore, it is *Ordered, Adjudged, and Decreed*:

I. Jurisdiction

The Court has jurisdiction over the subject matter of, and each of the parties to, this action. The Complaint states a claim upon which relief may be granted against Defendant under Section 1 of the Sherman Act, 15 U.S.C. 1.

II. Definitions

As used in this Final Judgment:

A. ''Willow Bridge'' or ''Defendant'' means Defendant Willow Bridge Property Company, LLC, with its headquarters in Dallas Texas, its successors and assigns, and all of its subsidiaries, divisions, groups, affiliates, parents, partnerships, and joint ventures engaged in the management or ownership of multifamily rental properties in the United States and its territories, and their directors, officers, managers, agents, and employees.

B. ''Competitively Sensitive Information'' means, in this Final Judgment, property-specific data or information (whether past, present, or prospective) which, individually or when aggregated with such data or information from other properties, (1) could be reasonably used to determine current or future rental supply, demand, or pricing at a property or of any property's units, including but not limited to executed rents, rental price concessions or discounts, guest traffic, guest applications, occupancy or vacancy, lease terms, or lease expirations; (2) relates to the Property Owner's or Property Manager's use of settings or user-specified parameters within Revenue Management Products with respect to such property or properties; or (3) relates to the Property Owner's or Property Manager's rental pricing amount, formula, or strategy,

including rental price concessions or discounts with respect to such property or properties.

C. ''Cooperation Subject Matter'' means the claims alleged in *United States et al.* v. *RealPage et al.* (currently docketed as No. 1:24–cv–00710 in the Middle District of North Carolina), and includes conduct as well as the effects of conduct.

D. ''External Nonpublic Data'' means all Nonpublic Data from any Third-Party. It does not include data for a Defendant Property.

E. ''Including'' means including, but not limited to.

F. ''Model Training'' means the process of analyzing data, including by machine learning or regression analysis, to create or adjust the parameters of a model or algorithm to improve the accuracy of the model's or algorithm's predictions.

G. ''Nonpublic Data'' means any Competitively Sensitive Information that is not Public Data.

H. ''Person'' means any natural person, corporate entity, partnership, association, joint venture, limited liability company, fund, investment vehicle, or any other legal entity or trust.

I. ''Property Manager(s)'' means any Person, or the Person's agent, who manages a multifamily rental property.

J. ''Property Owner(s)'' means any Person who (directly or indirectly) owns or controls a multifamily rental property or that Person's agent; multifamily rental properties have the same Property Owner if they are (directly or indirectly) owned or controlled by the same Person.

K. ''Pseudocode'' means any description of the steps in an algorithm or other software program in plain or natural language.

L. ''Public Data'' means information on a rental property or unit's asking rental price (including publicly offered concessions), amenities, availability, and other information that is readily accessible to the general public, including but not limited to, on the property's website, at a physical building, in brochures, or on an internet listing service. Public Data also includes information on a rental property or unit's asking price, concessions, amenities, and availability provided by a Property Manager or a Property Owner to any natural person who reasonably presents himself as a prospective renter. Public Data does not include any Competitively Sensitive Information obtained through communications between competitors, unless such information is also readily accessible to the general public. For the avoidance of doubt, the fact that information is available by paid subscription from a third party does not, on its own, render the information either Non-Public or Competitively Sensitive Information.

M. ''RealPage'' means RealPage, Inc., a Delaware corporation with its headquarters in Richardson, Texas.

N. ''RealPage Final Judgment'' means the Final Judgment between the United States and RealPage entered in *United States et al.* v. *RealPage et al.* (currently docketed as No. 1:24–cv–00710 in the Middle District of North Carolina).

O. ''RealPage Meeting(s)'' means RealPage steering committees, RealPage subcommittees, RealPage user groups, RealPage Idea Exchange, or any variation of these meetings. For avoidance of doubt, a RealPage Meeting does not include any communications between Willow Bridge and the Property Owner of a Willow Bridge Property or any other Person providing services to that Willow Bridge Property, or any software feedback provided solely to RealPage that is not otherwise shared by Willow Bridge with other Property Managers or Property Owners.

P. ''Revenue Management Product(s)'' means any software or service, including software as a service, that generates rental prices or rental pricing recommendations for multifamily housing rentals. For avoidance of doubt, a Revenue Management Product does not include general purpose spreadsheet software like Microsoft Excel.

Q. ''Runtime Operation'' means any action taken by a Revenue Management Product while it runs, including generating rental prices or pricing recommendations for any unit or set of units at a property. Runtime Operation does not mean Model Training.

R. ''Settled Civil Claims'' means any civil federal antitrust claim by the United States arising from Defendant's conduct accruing before the filing of the complaint in this action relating to (1) Revenue Management Products, including RealPage Revenue Management Products that use competitors' Competitively Sensitive Information, as well as (2) communications described by Paragraph VI.A.

S. ''Third-Party'' means any Person other than Defendant or a Defendant affiliate.

T. ''Willow Bridge Property'' means a multifamily rental property, located within the United States or its territories, for which Defendant provides revenue management or related reporting or consulting services (collectively referred to as ''Willow Bridge Properties''). Willow Bridge Property does not include student housing, affordable housing, age-restricted or senior housing, or military housing.

U. ''Willow Bridge Revenue Management Product'' means Defendant's proprietary Revenue Management Products, including RaMi.

III. Applicability

This Final Judgment applies to Defendant, as defined above, and all other Persons in active concert or participation with Defendant who receive actual notice of this Final Judgment.

IV. Use of Proprietary Revenue Management Product(s)

A. The Willow Bridge Revenue Management Product must not generate rental prices or rental pricing recommendations for a Willow Bridge Property during its Runtime Operation using (1) External Nonpublic Data in any way, or (2) Nonpublic Data from one Willow Bridge Property for another Willow Bridge Property with a different Property Owner by pooling or combining Nonpublic Data from Defendant Properties that have different Property Owners.

B. In any Model Training of the Willow Bridge Revenue Management Product, Defendant must not (1) use External Nonpublic Data in any way, or (2) pool or combine rental pricing, concessions, discounts, occupancy rates or capacity, or other rental pricing terms from Willow Bridge Properties with different Property Owners.

C. The Willow Bridge Revenue Management Product must not disclose in any way Nonpublic Data from a Willow Bridge Property to any Third-Party Property Manager or Third-Party Property Owner (other than a Third-Party Property Owner of the Willow Bridge Property from which the data arises or to which it relates, or to a Third-Party Property Manager that provides services to Willow Bridge Properties).

D. Willow Bridge may license its proprietary revenue management software to Third Parties, so long as the product complies with this Final Judgment, including the terms set forth in Paragraphs V.A.1–2, and such license otherwise complies with all applicable laws.

E. Except as provided in Paragraph V.A, if, during the term of this Final Judgment, revenue management responsibilities or ownership of a property within the United States or its territories is transferred from a Third-Party Property Manager or a Third-Party Property Owner to Defendant, Defendant will have 90 days from the

date of transfer to transition the transferred property to a Revenue Management Product that complies with the terms of this Final Judgment.

V. Restrictions Concerning Use of Third-Party Revenue Management Product(s)

A. Beginning 180 days after entry of the Stipulation and Order, Willow Bridge must not, within the United States and its territories:

1. license or use, for any Defendant Property, any Third-Party Revenue Management Product that: (1) uses External Nonpublic Data (other than Nonpublic Data of the Property Owner of the subject Willow Bridge Property) in its Runtime Operation to generate rental prices or rental pricing recommendations for a Willow Bridge Property; (2) uses Nonpublic Data from a Willow Bridge Property in its Runtime Operation to generate rental prices or rental pricing recommendations for any other Property Manager or Property Owner (unless the Property Owner of the non-Willow Bridge Property is the same as the Property Owner of the Willow Bridge Property from which the data arises or to which it relates); (3) discloses in any way Nonpublic Data from a Willow Bridge Property to any Third-Party Property Manager or Third-Party Property Owner (other than a Third-Party Property Owner of the Willow Bridge Property from which the data arises or to which it relates, or to a Third-Party Property Manager that provides services to Defendant Properties); (4) pools or combines Nonpublic Data from Willow Bridge Properties that have different Property Owners; or (5) contains or uses a pricing model or algorithm that has been trained using Nonpublic Data (other than Nonpublic Data of the Property Owner of the subject Defendant Property); or

2. license or use any Third-Party Revenue Management Product that: (1) incorporates a rental price floor or a limit on rental price recommendation decreases (excluding a rental price floor, or limit on rental price decreases, that Willow Bridge or the Property Owner manually selects and is not based on Nonpublic Data other than Nonpublic Data of the Property Owner of the subject Willow Bridge Property); or (2) requires Willow Bridge to accept, or provides any financial rewards for Defendant to accept, any recommended rental prices.

3. agree (expressly or tacitly) with any other Property Owner or Non-Willow Bridge Property Manager to use a particular Revenue Management Product (or the utilities or functionalities thereof) or require any other Person to use a particular Revenue Management Product (or the utilities or functionalities thereof). Willow Bridge is not prohibited by the preceding sentence from using a particular Revenue Management Product at a particular property pursuant to an agreement with another Person who is the Property Owner or who, along with Willow Bridge, provides services to that particular property on behalf of the Property Owner, provided that the Revenue Management Product complies with Paragraphs V.A.1–2.

B. If management responsibilities or ownership of a property within the United States or its territories is transferred from another Property Manager or Property Owner to Willow Bridge, then Willow Bridge will have 90 days from the date of transfer to comply with the requirements of Paragraph V.A. for the transferred property.

C. Within 180 days after entry of the Stipulation and Order, Willow Bridge must first notify the United States, in writing, of its intention to license or use a Third-Party Revenue Management Product 30 calendar days prior to using a Third-Party Revenue Management Product. Thereafter, if Defendant intends to license or use any other commercially available Revenue Management Product at any Willow Bridge Property, Defendant must first notify the United States, in writing, of its intention to license or use such a commercially available Revenue Management Product 30 calendar days prior to licensing or using the commercially available Revenue Management Product.

D. Notwithstanding Paragraphs IV.A–C and V.A, Willow Bridge may license or use a Revenue Management Product that complies with the terms of the RealPage Final Judgment.

E. Beginning 180 days after entry of the Stipulation and Order, if Defendant elects to license or use a Third-Party Revenue Management Product:

1. After entry by the Court of the RealPage Final Judgment, Defendant may license or use a RealPage Revenue Management Product at any Defendant Property without the need to obtain certification as required in this Paragraph V.E.

2. If Defendant licenses or uses a Third-Party Revenue Management Product from a Person other than RealPage or a reseller of a RealPage Revenue Management Product at any Defendant Property, Defendant must secure and submit to the United States a certification from the vendor of the Revenue Management Product that the Revenue Management Product complies with the requirements in Paragraph V.A or complies with the requirements for Revenue Management Products established in the RealPage Final Judgment.

VI. Other Prohibited Conduct

A. Willow Bridge must not, directly or indirectly, as part of setting rental prices or generating rental pricing recommendations for any Willow Bridge Property (1) disclose Nonpublic Data to any Third-Party Property Manager or Third-Party Property Owner (except to a Third-Party Property Owner of the particular Willow Bridge Property from which the data arises or to which it relates, or a Third-Party Property Manager that provides services to Defendant Properties); (2) solicit External Nonpublic Data from any Third-Party Property Manager or Third-Party Property Owner (except from a Third-Party Property Owner of the particular Willow Bridge Property from which the data arises or to which it relates, or from a Third-Party Property Manager that provides services to Defendant Properties); or (3) use External Nonpublic Data obtained from any Third-Party Property Manager or Third-Party Property Owner (except from a Third-Party Property Owner of the particular Willow Bridge Property from which the data arises or to which it relates, or from a Third-Party Property Manager that provides services to Defendant Properties). For the avoidance of doubt, the restrictions set forth in this Paragraph include Nonpublic Data obtained through any means, whether directly or through an intermediary, including call arounds or market surveys, in-person meetings, calls, text messages, chat communications, emails, surveys, spreadsheets, shared documents (*e.g.,* Google documents and SharePoint documents), industry meetings (*e.g.,* user groups), online fora, private meetings, Revenue Management Products, or information-exchange services.

B. Notwithstanding Paragraph VI.A, a Defendant employee may (1) disclose or solicit Nonpublic Data about a particular property for the purpose of evaluating or effectuating a bona fide sale or purchase of the property, as long as any Nonpublic Data received is not used to set rental prices or generate rental pricing recommendations, or (2) disclose Nonpublic Data about a particular Defendant Property between a departing Property Manager and replacement Property Manager as part of a bona fide transfer of management responsibilities for that property.

C. Defendant must not, within the United States or its territories, use or access, as part of setting rental prices or generating rental pricing recommendations for any Willow Bridge Property, any External Nonpublic Data (other than Nonpublic Data of the Property Owner of the subject Willow Bridge Property), including such data derived from any RealPage Revenue Management Product, in Defendant's possession, custody, or control as of the Court's entry of the Stipulation and Order in this matter, acquired through any means. Within 180 days of entry of the Stipulation and Order, Defendant must identify to the United States in writing the existence and location of any structured data set containing such External Nonpublic Data. For the avoidance of doubt, the proscriptions in this Paragraph do not apply to data for Willow Bridge Properties maintained in OneSite, Yardi Voyager, or other property management software.

D. Defendant will not attend or participate in any RealPage Meetings. If Willow Bridge attends or participates in a RealPage Meeting it will report such meeting within 30 days to the United States. Defendant must identify the date, time, and location of the meeting, identify all participants in that meeting, provide a description of the content of the meeting, provide a description of any document shown during the meeting, produce all documents received or provided by Defendant during the meeting, and produce any chats, recordings, or documents associated with the meeting.

VII. Antitrust Compliance

A. Within 30 days of entry of the Stipulation and Order, Defendant must adopt a written antitrust compliance policy, to be approved by the United States in its sole discretion, that complies with the obligations set forth in this Final Judgment. Defendant must annually train all employees on this written policy. As part of that policy, Defendant must designate a chief antitrust compliance officer, who will be responsible for implementing and enforcing Defendant's antitrust compliance policy and annual training. Defendant must identify to the United States the chief antitrust compliance officer's name, business address, telephone number, and email address. Within 45 days of a vacancy in Defendant's chief antitrust compliance officer position, Defendant must appoint a replacement and must identify to the United States the replacement's name, business address, telephone number, and email address. Defendant's initial and replacement appointment of a chief antitrust compliance officer is subject to the approval of the United States in its sole discretion. Defendant is responsible for all costs and expenses related to the chief antitrust compliance officer. The chief antitrust compliance officer will conduct an annual antitrust compliance audit. The annual audits must, at a minimum, cover: (1) employees (including supervisors) engaged in or overseeing Willow Bridge's revenue management of multifamily rental properties in the United States and its territories; and (2) randomly selected, local, regional, or supervisory employees who manage property operations (at least 12 each year). The chief antitrust compliance officer will provide the United States with an annual report identifying all individuals audited.

B. On an annual basis beginning 180 calendar days after entry of the Stipulation and Order, during the term of this Final Judgment, Defendant must:

1. submit to the Antitrust Division a certification from the General Counsel of Willow Bridge attesting under penalty of perjury that (1) Defendant has established and maintained the annual antitrust compliance policy and training required by Paragraph VII.A; (2) Defendant has complied with the attestation requirements in Paragraph VII.B.2.; (3) Defendant has provided the Antitrust Division with an annual report identifying the individuals audited pursuant to Paragraph VII.A; (4) Willow Bridge Revenue Management Product continues to satisfy the requirements in Section IV or if applicable, the requirements of the RealPage Final Judgment; (5) if required under this Final Judgment, the vendors of any Third-Party Revenue Management Products licensed or used by Willow Bridge have provided the certification(s) required by Paragraph VII.C; and (6) Defendant has complied with Paragraph VI.D.

2. require all of Defendant's employees (1) engaged in or overseeing Defendant's revenue management of multifamily rental properties in the United States and its territories, and (2) overseeing property management for multiple of Defendant's multifamily rental properties in the United States and its territories to attest under penalty of perjury that they have complied with Paragraphs V.A.3, VI.A, and VI.D;

C. if required under this Final Judgment, including Paragraph V.E, obtain and submit to the Antitrust Division a certification, as described in Paragraph V.E, that each Third-Party Revenue Management Product that Willow Bridge licenses or uses complies with Paragraph V.A or complies with the requirements for Revenue Management Products established in the RealPage Final Judgment; and

D. If applicable, provide the Antitrust Division a report that identifies for each Willow Bridge Property for which Willow Bridge uses a Third-Party Revenue Management Product: (1) the name of the Property Owner(s) and (2) any Third-Party Revenue Management Product used within the preceding twelve months for that Willow Bridge Property.

VIII. Cooperation

A. Defendant must cooperate fully and truthfully with the United States relating to the Cooperation Subject Matter in any civil investigation or civil litigation the United States brings or has brought. Defendant must use its best efforts to ensure that all current and former officers, directors, agents, and employees also fully and promptly cooperate with the United States relating to the Cooperation Subject Matter in any civil investigation or civil litigation the United States brings or has brought. Defendant's cooperation must include:

1. as requested on reasonable notice by the Antitrust Division, making up to 15 employees available for voluntary interviews for up to 60 hours total regarding the Cooperation Subject Matter;

2. providing full and truthful written or oral testimony in any deposition, trial, or other proceeding relating to the Cooperation Subject Matter and making witnesses available to the United States upon reasonable notice before any such testimony;

3. providing proffers, which may be made by counsel for Defendant, describing Defendant's knowledge of and evidence relating to the Cooperation Subject Matter;

4. within 30 days of receiving a written request (whether formal process or informal request) from the United States for documents, information, or other material relating to the Cooperation Subject Matter (or whatever additional time the Antitrust Division grants in its sole discretion), producing to the United States all responsive documents, information, and other materials, wherever located, not protected under the attorney-client privilege or the work-product doctrine, in the possession, custody, or control of Defendant, as well as a log of any responsive documents, information, or other materials that were not provided, including an explanation of the basis for withholding such materials;

5. authenticating or otherwise assisting with establishing the

evidentiary foundation of any documents Defendant produced or produces to the United States; and

6. taking all necessary steps to preserve all documents, information, and other materials relating to the Cooperation Subject Matter until the United States provides written notice to Defendant that its obligation to do so has expired.

B. Subject to Defendant's full, truthful, and continuing cooperation, as required under Paragraph VIII.A, Defendant is fully and finally discharged and released from Settled Civil Claims.

C. Nothing in this Section VIII affects Defendant's obligation to respond to any formal discovery requests in litigation or a civil investigative demand issued by the United States.

IX. Appointment of Monitor

A. Defendant will not be subject to a Monitor if all Third-Party Revenue Management Products that Defendant licenses or uses at Defendant Properties have been certified pursuant to, or are otherwise compliant with, Paragraph V.E.

B. However, if Defendant elects to license or use a Third-Party Revenue Management Product that has not been certified pursuant to, or is not otherwise compliant with, Paragraph V.E, at any Defendant Property, or if a Court finds that Defendant has violated any other term of the Final Judgment, upon application of the United States, which Defendant may not oppose, the Court will appoint an independent Third-Party antitrust monitor (the ''Monitor'') selected by the United States and approved by the Court.

C. Defendant may propose to the United States a pool of three candidates to serve as the Monitor, and the United States may consider Defendant's perspectives on the proposed candidates or any other candidates identified and considered by the United States. The United States will retain the ultimate right, in its sole discretion, either to select the Monitor from among the three candidates proposed by Defendant or to select a different candidate. Once approved, the Monitor should be considered by the United States and Defendant to be an arm and representative of the Court.

D. The Monitor will have the power and authority to monitor Defendant's compliance with Section IV and Paragraphs V.A, VI.A, VI.D, VII.A, and VII.B of this Final Judgment, including by determining whether employees (including supervisors) in Defendant's residential-property revenue management group have complied with their obligations set forth in those Sections. As part of its monitoring duties, the Monitor may also choose, in consultation with the United States, a yearly selection of other local, regional, or supervisory employees of Defendant who manage property operations (not to exceed 15 annually) and investigate whether those individuals have complied with the obligations set forth in Paragraphs V.A.3, V.B, and VI.A. The Monitor will have other powers as the Court deems appropriate. The Monitor will have no responsibility for the operation of the Defendant's business. No attorney-client relationship will be formed between Defendant and the Monitor.

E. The Monitor will have the authority to take such steps as, in the Monitor's discretion and the United States' view, may be necessary to accomplish the Monitor's responsibilities. The Monitor may seek information from Defendant's personnel, including in-house counsel, compliance personnel, and internal auditors. Defendant will annually communicate to all employees that employees may disclose any information to the Monitor without reprisal for such disclosure. Defendant must not retaliate against any employee or Third-Party for disclosing information to the Monitor.

F. Defendant may not object to actions taken by the Monitor in fulfillment of the Monitor's responsibilities under any Order of the Court on any ground other than malfeasance by the Monitor. Disagreements between the Monitor and Defendant related to the scope of the Monitor's responsibilities do not constitute malfeasance. Objections by Defendant must be conveyed in writing to the United States and the Monitor within 10 calendar days of the Monitor's action that gives rise to Defendant's objection, or else Defendant will have waived any such objections.

G. The Monitor will serve at the cost and expense of Defendant pursuant to a written agreement, on terms and conditions, including confidentiality requirements and conflict of interest certifications, approved by the United States in its sole discretion. If the Monitor and Defendant are unable to reach such a written agreement within 14 calendar days of the Court's appointment of the monitor, or if the United States, in its sole discretion, declines to approve the proposed written agreement, the United States, in its sole discretion, may take appropriate action, including making a recommendation as to the Monitor's costs and expenses to the Court, which may set the terms and conditions for the Monitor's costs and expenses.

H. The Monitor may hire, at the cost and expense of Defendant, any agents and consultants, including investment bankers, attorneys, and accountants, that are reasonably necessary in the Monitor's judgment to assist with the Monitor's duties. These agents or consultants will be directed by and solely accountable to the Monitor and will serve on terms and conditions, including confidentiality requirements and conflict-of-interest certifications, approved by the United States in its sole discretion. Within three business days of hiring any agents or consultants, the Monitor must provide written notice of the hiring and the rate of compensation to Defendant and the United States.

I. The Monitor must provide yearly reports to the United States, with the first report due six months after the Monitor is appointed and subsequent reports due yearly thereafter, setting forth Defendant's efforts to comply with its obligations under this Final Judgment. If the Monitor learns of any potential violation of the Final Judgment by Defendant's officers, agents, or employees, the Monitor must promptly disclose to the Antitrust Division the nature and extent of any such potential violation and the Antitrust Division may require, in its sole discretion and without prejudice to any other remedy available for any violation of the Final Judgment, that the Monitor conduct additional investigation of compliance with this Final Judgment beyond any limits set forth in Paragraph IX.D.

J. The Monitor must account for all costs and expenses incurred.

K. The compensation of the Monitor and agents or consultants retained by the Monitor must be on reasonable and customary terms commensurate with the individuals' experience and responsibilities.

L. Defendant's failure to promptly pay the Monitor's accounted-for costs and expenses, including for agents and consultants, will constitute a violation of this Final Judgment and may result in sanctions imposed by the Court. If Defendant disputes any part of the Monitor's accounted-for costs and expenses, Defendant must establish an escrow account into which Defendant must pay the disputed costs and expenses until the dispute is resolved.

M. Defendants must use best efforts to cooperate fully with the Monitor and to assist the Monitor to monitor Defendant's compliance with its obligations under this Final Judgment. Subject to reasonable protection for trade secrets, other confidential

research, development, or commercial information, or any applicable privileges, Defendant must provide the Monitor and agents or consultants retained by the Monitor with full and complete access to all personnel (current and former), agents, consultants, books, records, and facilities. Defendant may not take any action to interfere with or to impede accomplishment of the Monitor's responsibilities.

N. If the United States determines that the Monitor is not acting diligently or in a reasonably cost-effective manner, or if the Monitor becomes unable to continue in its role for any reason, the United States may recommend that the Court appoint a substitute.

O. Once appointed by the Court, the Monitor will serve until (1) the expiration of the Final Judgment; or (2) if a Monitor has been appointed pursuant to Paragraph IX.B, the United States will move the Court to terminate the monitorship upon the United States' determination that Defendant complies with the requirements in Paragraph V.E.

X. Compliance Inspection

A. For the purposes of determining or securing compliance with this Final Judgment or of related orders such as the Stipulation and Order entered in this matter or of determining whether this Final Judgment should be modified or vacated, upon written request of an authorized representative of the Assistant Attorney General for the Antitrust Division, and reasonable notice to Defendant, Defendant must permit, from time to time and subject to legally recognized privileges, authorized representatives, including agents retained by the United States:

1. to have access during Defendant's office hours to inspect and copy, or at the option of the United States, to require Defendant to provide, no later than 30 days after receiving a written request (whether formal or informal) from the United States, electronic copies of all books, ledgers, accounts, records, data, and documents in the possession, custody, or control of Defendant relating to any matters contained in this Final Judgment; and

2. to interview, either informally or on the record, Defendant's officers, agents, or employees, who may have their individual counsel present, relating to any matters contained in this Final Judgment. The interviews must be subject to the reasonable convenience of the interviewee and without restraint or interference by Defendant.

B. For the purposes of determining or securing compliance with this Final Judgment or related orders or determining whether this Final Judgment should be modified or vacated, upon the written request of an authorized representative of the Assistant Attorney General for the Antitrust Division, Defendant must submit written reports or respond to written interrogatories, under oath if requested, relating to any matters contained in this Final Judgment.

C. Upon request of the United States, Defendant must provide documents sufficient to show how Defendant's Revenue Management Product is trained and how it determines prices for Defendant Properties during its Runtime Operation, and changes to these processes.

D. The United States will have the right to obtain and inspect at an Antitrust Division office, or at another location at the Antitrust Division's discretion, the code and Pseudocode of the Defendant Revenue Management Product to ensure compliance with Section IV. Defendant will be responsible for the costs and expenses associated with said inspection once annually.

XI. Public Disclosure

A. No information or documents obtained pursuant to any provision or this Final Judgment, including reports the Monitor provides to the United States pursuant to Paragraph IX.I, may be divulged by the United States or the Monitor to any person other than an authorized representative of the executive branch of the United States, except in the course of legal proceedings to which the United States is a party, including grand-jury proceedings, or as otherwise required by law.

B. In the event that the Monitor should receive a subpoena, court order, or other court process seeking production of information or documents obtained pursuant to any provision in this Final Judgment, including reports the Monitor provides to the United States pursuant to Paragraph IX.I, the Monitor must notify Defendant immediately and prior to any disclosure, so that Defendant may address such potential disclosure and, if necessary, pursue alternative legal remedies, including intervention in the relevant proceedings.

C. In the event of a request by a Third-Party, pursuant to the Freedom of Information Act, 5 U.S.C. 552, for disclosure of information obtained pursuant to any provision of this Final Judgment, the Antitrust Division will act in accordance with that statute, and the Department of Justice regulations at 28 CFR part 16, including the provision on confidential commercial information, at 28 CFR 16.7. Defendant, when submitting information to the Antitrust Division, should designate the confidential commercial information portions of all applicable documents and information under 28 CFR 16.7. Designations of confidentiality expire 10 years after submission, ''unless the submitter requests and provides justification for a longer designation period.'' See 28 CFR 16.7(b).

D. If at the time that Defendant furnishes information or documents to the United States pursuant to any provision of this Final Judgment, Defendant represents and identifies in writing information or documents for which a claim of protection may be asserted under Rule 26(c)(1)(G) of the Federal Rules of Civil Procedure, and the Defendant marks each pertinent page of such material, ''Subject to claim of protection under Rule 26(c)(1)(G) of the Federal Rules of Civil Procedure,'' the United States must give Defendant 10 calendar days' notice before divulging the material in any legal proceeding (other than a grand-jury proceeding).

XII. Retention of Jurisdiction

The Court retains jurisdiction to enable any party to this Final Judgment to apply to the Court at any time for further orders and directions as may be necessary or appropriate to carry out or construe this Final Judgment, to modify any of its provisions, to enforce compliance, and to punish violations of its provisions.

XIII. Enforcement of Final Judgment

A. The United States retains and reserves all rights to enforce the provisions of this Final Judgment, including the right to seek an order of contempt from the Court. Defendant agrees that in a civil contempt action, a motion to show cause, or a similar action brought by the United States relating to an alleged violation of this Final Judgment, the United States may establish a violation of this Final Judgment and the appropriateness of a remedy therefor by a preponderance of the evidence, and Defendant waives any argument that a different standard of proof should apply.

B. This Final Judgment should be interpreted to give full effect to the procompetitive purposes of the antitrust laws and to restore the competition the United States alleges was harmed by the challenged conduct. Defendant agrees that it may be held in contempt of, and that the Court may enforce, any provision of this Final Judgment that, as interpreted by the Court in light of these procompetitive principles and applying

ordinary tools of interpretation, is stated specifically and in reasonable detail, whether or not it is clear and unambiguous on its face. In any such interpretation, the terms of this Final Judgment should not be construed against either party as the drafter.

C. In an enforcement proceeding in which the Court finds that Defendant has violated this Final Judgment, the United States may apply to the Court for an extension of this Final Judgment, together with other relief that may be appropriate. In connection with a successful effort by the United States to enforce this Final Judgment against Defendant, whether litigated or resolved before litigation, Defendant agrees to reimburse the United States for the fees and expenses of its attorneys, as well as all other costs including experts' fees, incurred in connection with that effort to enforce this Final Judgment, including in the investigation of the potential violation.
